# TABLE OF CONTENTS

Undergraduate Students ................................................................. 11

Academic Opportunities .............................................................. 11
   Auditing Courses ........................................................................ 11
   Majors, Minors, and Certificates .................................................. 11
   Non-Traditional Coursework ....................................................... 13
   Study Abroad ............................................................................. 13
   Undergraduate Degree Chart ..................................................... 14
   Undergraduate Degrees ............................................................ 16
   Undergraduate - Graduate Concurrent Enrollment ...................... 17
   Unique Programs ....................................................................... 17

Academic Policies and Procedures .................................................. 18
   Admission ................................................................................ 18
   Academic and Judicial Discipline ............................................... 22
   Attendance and Excused Absences ............................................. 23
   Final Examinations ................................................................... 24
   Grades ..................................................................................... 24
   Graduation Requirements .......................................................... 26
   Leaves, Withdrawals and Readmission ........................................ 28
   Name Changes .......................................................................... 31
   Registration .............................................................................. 31
   Transcript Policies .................................................................... 33
   Transfer Credit ......................................................................... 33
   Veterans Information .................................................................. 34

Student Services and Organizations ................................................ 35
   Clubs and Organizations ............................................................. 35
   Disability Resource Center ......................................................... 36
   Financial Aid ............................................................................ 36
   Health, Counseling and Wellbeing ............................................. 39
   Student Government ................................................................. 41
   Tuition, Fees and Expenses ........................................................ 41
   Undergraduate Student Life ....................................................... 43

Rights and Responsibilities ............................................................ 44
   Access to Student Records ......................................................... 44
   Code of Student Conduct ........................................................... 46
   Honor System ............................................................................ 46
   Student Responsibility ............................................................... 46

Honors and Distinctions .................................................................. 46
   Academic Honor Societies ......................................................... 47
   Honors Programs ...................................................................... 47
   President’s Honor Roll .............................................................. 48

University Honors ......................................................................... 48

Graduate Students ......................................................................... 49

   Academic Opportunities .......................................................... 49
   Auditing Courses ...................................................................... 49
   Graduate Degrees ..................................................................... 49
   Graduate Degree Chart ............................................................. 50
   Graduate Certificates ................................................................. 54
   Graduate Program Major Concentrations .................................. 54
   Non-Traditional Coursework ...................................................... 54

   Academic Policies and Procedures ............................................. 55
   Admission ................................................................................ 55
   All Graduate Students ............................................................... 55
   Doctoral Degrees ..................................................................... 65
   Diploma Programs ..................................................................... 68
   Non-Thesis Master’s Degrees .................................................... 68
   Thesis Master’s Degrees ............................................................ 68

   Student Services and Organizations ........................................... 70
   Clubs and Organizations ............................................................. 71
   Disability Resource Center ......................................................... 72
   Financial Aid ............................................................................ 72
   Graduate Student Government ................................................... 74
   Graduate Student Life ............................................................... 74
   Health, Counseling and Wellbeing ............................................. 75
   Tuition, Fees and Expenses ........................................................ 77

   Rights and Responsibilities ........................................................ 81
   Access to Student Records ......................................................... 81
   Code of Student Conduct ........................................................... 82
   Dispute Resolution .................................................................... 83
   Honor System ............................................................................ 84
   Student Responsibility ............................................................... 84

   Non-Traditional Students .......................................................... 86
   Auditors ................................................................................... 86
   Rice Learners ........................................................................... 86
   Second Bachelor’s Degree for Rice Alumni .................................. 86
   Visiting Students (non-degree) .................................................... 87

   Faculty ..................................................................................... 90
   Faculty Grading Guidelines ........................................................ 90
   Non-Traditional Coursework ...................................................... 90
   Syllabus Standards ................................................................... 91

   Programs of Study .................................................................... 92
   Departments and Programs ........................................................ 93

Accounting .................................................................................. 100
Chemical and Biomolecular Engineering ...................................................... 273

Master of Business Administration (MBA) Degree / Master of Science in Environmental Analysis (MSEA) Degree .............. 204

Master of Business Administration (MBA) Degree / Master of Science in Space Studies (MSSpS) Degree .................. 206

Master of Business Administration (MBA) Degree / Master of Science in Subsurface Geoscience (MSSG) Degree ........ 207

Master of Business Administration (MBA) Degree / Master of Statistics (MStat) Degree ........................................... 209

Master of Business Administration (MBA) Degree, Executive Program ........................................................................ 210

Master of Business Administration (MBA) Degree, Full-Time Program ........................................................................ 214

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Accounting .......... 218

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Energy ............... 223

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Entrepreneurship ........................................................................ 227

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Finance .................. 231

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Health Care .......... 236

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Marketing .......... 240

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Operations Management ........................................................................ 244

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Real Estate ........ 248

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Strategic Management ........................................................................ 253

Master of Business Administration (MBA) Degree, Online Program ............................................................................ 257

Master of Business Administration (MBA) Degree, Professional Program ................................................................. 260

Master of Business Administration (MBA) Degree, Professional Program (Evening, Evening Extended) .................. 265

Master of Business Administration (MBA) Degree, Professional Program (Weekend) .................................................. 269

Minor in Business ............................................................................. 272

Chemical and Biomolecular Engineering ...................................................... 273

Bachelor of Arts (BA) Degree with a Major in Chemical Engineering ........................................................................ 275

Bachelor of Science in Chemical Engineering (BSCHE) Degree ........................................................................... 277

Doctor of Philosophy (PhD) Degree in the field of Chemical Engineering ........................................................................... 282

Master of Chemical Engineering (MChE) Degree .......................... 283

Master of Chemical Engineering (MChE) Degree / Master of Business Administration (MBA) Degree .......................... 284

Chemical Physics ........................................................................ 285

Bachelor of Science (BS) Degree with a Major in Chemical Physics ........................................................................ 286

Chemistry .................................................................................. 287

Bachelor of Arts (BA) Degree with a Major in Chemistry ........................................................................ 289

Bachelor of Science (BS) Degree with a Major in Chemistry ........................................................................ 291

Doctor of Philosophy (PhD) Degree in the field of Chemistry ........................................................................ 294

Cinema and Media Studies ........................................................................ 295

Minor in Cinema and Media Studies .......................................................... 296

Civic Leadership ........................................................................ 298

Certificate in Civic Leadership ........................................................................ 299

Civil and Environmental Engineering .......................................................... 301

Bachelor of Arts (BA) Degree with a Major in Civil and Environmental Engineering and a Major Concentration in Civil Engineering ........................................................................ 303

Bachelor of Arts (BA) Degree with a Major in Civil and Environmental Engineering and a Major Concentration in Environmental Engineering ........................................................................ 306

Bachelor of Science in Civil Engineering (BSCE) Degree ........................................................................... 309

Doctor of Philosophy (PhD) Degree in the field of Civil Engineering ........................................................................ 314

Doctor of Philosophy (PhD) Degree in the field of Environmental Engineering ........................................................................ 316

Master of Civil and Environmental Engineering (MCEE) Degree in the field of Civil Engineering ........................................................................ 317

Master of Civil and Environmental Engineering (MCEE) Degree in the field of Environmental Engineering ........................................................................ 319

Master of Science (MS) Degree in the field of Civil Engineering ........................................................................ 321

Master of Science (MS) Degree in the field of Environmental Engineering ........................................................................ 323

Classical Studies ........................................................................... 324

Bachelor of Arts (BA) Degree with a Major in Classical Studies ........................................................................ 325

Classical and European Studies ........................................................................ 326

Cognitive Sciences ........................................................................... 327

Bachelor of Arts (BA) Degree with a Major in Cognitive Sciences ........................................................................ 328

College Courses ........................................................................... 333

Computational and Applied Mathematics .......................................................... 333

Bachelor of Arts (BA) Degree with a Major in Computational and Applied Mathematics .......................................................... 335
Doctor of Philosophy (PhD) Degree in the field of
Computational and Applied Mathematics ................. 337
Master of Computational and Applied Mathematics
(MCAAM) Degree .................................................. 338
Master of Computational and Applied Mathematics
(MCAAM) Degree / Master of Business Administration (MBA)
Degree .................................................................... 339
Minor in Computational and Applied Mathematics ...... 340
Computational Science and Engineering ...................... 341
Doctor of Philosophy (PhD) Degree in the field of
Computational Science and Engineering ...................... 342
Master of Computational Science and Engineering (MCSE)
Degree ............................................................... 343
Computer Science .................................................... 345
Bachelor of Arts (BA) Degree with a Major in Computer
Science ............................................................... 347
Bachelor of Science in Computer Science (BSCS) Degree
........................................................................ 349
Doctor of Philosophy (PhD) Degree in the field of Computer
Science .................................................................... 351
Master of Computer Science (MCS) Degree .................... 351
Master of Computer Science (MCS) Degree / Master of
Business Administration (MBA) Degree ................. 356
Master of Computer Science (MCS) Degree, Online Program
............................................................................. 357
Master of Science (MS) Degree in the field of Computer
Science ............................................................... 358
Critical and Cultural Theory ......................................... 359
Certificate in Critical and Cultural Theory ...................... 360
Data Science ............................................................. 362
Minor in Data Science ................................................ 362
Earth, Environmental, and Planetary Sciences ................ 364
Bachelor of Arts (BA) Degree with a Major in Earth Science
............................................................................. 365
Bachelor of Science (BS) Degree with a Major in Earth Science
............................................................................. 368
Doctor of Philosophy (PhD) Degree in the field of Earth Science
............................................................................. 372
Master of Science (MS) Degree in the field of Earth Science
............................................................................. 373
Economics ................................................................. 374
Bachelor of Arts (BA) Degree with a Major in Economics
............................................................................. 375
Doctor of Philosophy (PhD) Degree in the field of Economics
............................................................................. 377
Doctor of Philosophy (PhD) Degree in the field of Economics
and a Major Concentration in Economics and Finance ... 379
Education ................................................................. 380
Master of Arts in Teaching (MAT) Degree, for Current Rice
Undergraduates ....................................................... 382
Master of Arts in Teaching (MAT) Degree, for Experienced
Teachers ................................................................. 384
Master of Arts in Teaching (MAT) Degree, for Experienced
Teachers with Principal Certification ......................... 386
Master of Arts in Teaching (MAT) Degree, for New Teachers
........................................................................... 387
Electrical and Computer Engineering ............................ 389
Bachelor of Arts (BA) Degree with a Major in Electrical
Engineering ............................................................. 391
Bachelor of Science in Electrical Engineering (BSEE) Degree
............................................................................. 395
Doctor of Philosophy (PhD) Degree in the field of Electrical
and Computer Engineering .......................................... 400
Master of Electrical Engineering (MEE) Degree .............. 401
Energy and Water Sustainability ...................................... 404
Minor in Energy and Water Sustainability ...................... 404
Energy Economics .................................................... 406
Master of Energy Economics (MEEcon) Degree .............. 407
Engineering Design .................................................... 408
Minor in Engineering Design ....................................... 409
Engineering Leadership ................................................ 411
Certificate in Engineering Leadership ............................. 411
English ....................................................................... 413
Bachelor of Arts (BA) Degree with a Major in English ....... 414
Bachelor of Arts (BA) Degree with a Major in English and a
Major Concentration in Creative Writing ....................... 419
Doctor of Philosophy (PhD) Degree in the field of English
.............................................................................. 422
Environmental Analysis ................................................. 424
Master of Science in Environmental Analysis (MSEA) Degree
............................................................................. 425
Master of Science in Environmental Analysis (MSEA) Degree / Master of Business Administration (MBA) Degree
............................................................................. 427
Environmental Science .................................................. 428
Bachelor of Arts (BA) Degree with a Major in Environmental Science and a Major Concentration in Earth Science ..... 429
Bachelor of Arts (BA) Degree with a Major in Environmental Science and a Major Concentration in Ecology and Evolutionary Biology .......................................... 432
Bachelor of Science (BS) Degree with a Major in Environmental Science and a Major Concentration in Earth Science ................. 435
Bachelor of Science (BS) Degree with a Major in Environmental Science and a Major Concentration in Ecology and Evolutionary Biology ................................. 439
Environmental Studies ................................................. 442
Minor in Environmental Studies .................................... 442
European Studies .......................................................... 445
Bachelor of Arts (BA) Degree with a Major in European Studies .................................................. 445
Financial Computation and Modeling .......................... 449
Minor in Financial Computation and Modeling ............ 449
French Studies ............................................................... 451
Bachelor of Arts (BA) Degree with a Major in French Studies .................................................. 451
German Studies .............................................................. 453
Bachelor of Arts (BA) Degree with a Major in German Studies .................................................. 454
Global Affairs ............................................................... 456
Master of Arts in Global Affairs (MAGA) Degree .......... 456
Global Health Technologies ........................................... 459
Minor in Global Health Technologies ......................... 459
Gnosticism, Esotericism and Mysticism ....................... 462
Certificate in Gnosticism, Esotericism and Mysticism .... 463
History .......................................................... 464
Bachelor of Arts (BA) Degree with a Major in History ..... 465
Bachelor of Arts (BA) Degree with a Major in History and a Major Concentration in History: International Concentration .................................................. 470
Doctor of Philosophy (PhD) Degree in the field of History .......................................................... 474
Dual Doctor of Philosophy (PhD) Degree in the field of History, with Instituto Mora, in Mexico ............ 476
Dual Doctor of Philosophy (PhD) Degree in the field of History, with Universidade Estadual de Campinas (UNICAMP), in Brazil .................................................. 476
Human-Computer Interaction and Human Factors ........ 477
Master of Human-Computer Interaction and Human Factors (MHCIHF) Degree ................................. 478
Humanities Research Center .......................................... 480
Industrial Engineering ................................................... 481
Master of Industrial Engineering (MIE) Degree ............ 482
Master of Industrial Engineering (MIE) Degree / Master of Business Administration (MBA) Degree ........ 483
Jewish Studies .............................................................. 485
Minor in Jewish Studies .................................................. 486
Kinesiology ................................................................. 488
Bachelor of Arts (BA) Degree with a Major in Kinesiology and a Major Concentration in Health Sciences .................................................. 490
Bachelor of Arts (BA) Degree with a Major in Kinesiology and a Major Concentration in Sports Medicine .................................................. 492
Languages and Intercultural Communication ............... 493
Certificate in Language and Intercultural Communication - Arabic .................................................. 495
Certificate in Language and Intercultural Communication - Chinese .................................................. 497
Certificate in Language and Intercultural Communication - French .................................................. 498
Certificate in Language and Intercultural Communication - German .................................................. 500
Certificate in Language and Intercultural Communication - Hindi .................................................. 502
Certificate in Language and Intercultural Communication - Italian .................................................. 504
Certificate in Language and Intercultural Communication - Japanese .................................................. 506
Certificate in Language and Intercultural Communication - Korean .................................................. 508
Certificate in Language and Intercultural Communication - Portuguese ........................................... 509
Certificate in Language and Intercultural Communication - Russian .................................................. 511
Certificate in Language and Intercultural Communication - Spanish .................................................. 513
Latin American Studies .................................................. 515
Bachelor of Arts (BA) Degree with a Major in Latin American Studies .................................................. 516
Liberal Studies .............................................................. 518
Diploma in Liberal Studies (DLS) .................................... 519
Master of Liberal Studies (MLS) Degree ....................... 521
Lifetime Physical Activity Program .............................. 523
Linguistics ................................................................. 524
Bachelor of Arts (BA) Degree with a Major in Linguistics .................................................. 525
Doctor of Philosophy (PhD) Degree in the field of Linguistics .................................................. 527
Managerial Studies ....................................................... 528
Bachelor of Arts (BA) Degree with a Major in Managerial Studies .................................................. 529
Materials Science and NanoEngineering ...................... 531
Bachelor of Arts (BA) Degree with a Major in Materials Science and NanoEngineering .......................... 532
Bachelor of Science in Materials Science and NanoEngineering (BSMSNE) Degree ......................... 534
Doctor of Philosophy (PhD) Degree in the field of Materials Science and NanoEngineering .......................... 537
Master of Materials Science and NanoEngineering (MMSNE) Degree .................................................. 538
Master of Materials Science and NanoEngineering (MMSNE) Degree / Master of Business Administration (MBA) Degree

Master of Science (MS) Degree in the field of Materials Science and NanoEngineering

Mathematical Economic Analysis

Bachelor of Arts (BA) Degree with a Major in Mathematical Economic Analysis

Mathematics

Bachelor of Arts (BA) Degree with a Major in Mathematics

Bachelor of Science (BS) Degree with a Major in Mathematics

Doctor of Philosophy (PhD) Degree in the field of Mathematics

Minor in Mathematics

Mechanical Engineering

Bachelor of Arts (BA) Degree with a Major in Mechanical Engineering

Bachelor of Science in Mechanical Engineering (BSME) Degree

Doctor of Philosophy (PhD) Degree in the field of Mechanical Engineering

Master of Mechanical Engineering (MME) Degree

Master of Mechanical Engineering (MME) Degree / Master of Business Administration (MBA) Degree

Master of Science (MS) Degree in the field of Mechanical Engineering

Medical Humanities

Minor in Medical Humanities

Medieval and Early Modern Studies

Bachelor of Arts (BA) Degree with a Major in Medieval and Early Modern Studies

Military Science

Museums and Cultural Heritage

Minor in Museums and Cultural Heritage

Music

Artist Diploma (AD) in the field of Bassoon Performance

Artist Diploma (AD) in the field of Cello Performance

Artist Diploma (AD) in the field of Clarinet Performance

Artist Diploma (AD) in the field of Double Bass Performance

Artist Diploma (AD) in the field of Flute Performance

Artist Diploma (AD) in the field of Harp Performance

Artist Diploma (AD) in the field of Horn Performance

Artist Diploma (AD) in the field of Oboe Performance

Artist Diploma (AD) in the field of Opera Performance

Artist Diploma (AD) in the field of Orchestral Conducting

Artist Diploma (AD) in the field of Organ Performance

Artist Diploma (AD) in the field of Percussion Performance

Artist Diploma (AD) in the field of Piano Performance

Artist Diploma (AD) in the field of Trombone Performance

Artist Diploma (AD) in the field of Trumpet Performance

Artist Diploma (AD) in the field of Tuba Performance

Artist Diploma (AD) in the field of Viola Performance

Bachelor of Music (BMus) Degree with a Major in Bassoon Performance

Bachelor of Music (BMus) Degree with a Major in Cello Performance

Bachelor of Music (BMus) Degree with a Major in Clarinet Performance

Bachelor of Music (BMus) Degree with a Major in Composition

Bachelor of Music (BMus) Degree with a Major in Double Bass Performance

Bachelor of Music (BMus) Degree with a Major in Flute Performance

Bachelor of Music (BMus) Degree with a Major in Harp Performance

Bachelor of Music (BMus) Degree with a Major in Horn Performance

Bachelor of Music (BMus) Degree with a Major in Music History

Bachelor of Music (BMus) Degree with a Major in Music Theory

Bachelor of Music (BMus) Degree with a Major in Oboe Performance

Bachelor of Music (BMus) Degree with a Major in Organ Performance

Bachelor of Music (BMus) Degree with a Major in Percussion Performance

Bachelor of Music (BMus) Degree with a Major in Piano Performance

Bachelor of Music (BMus) Degree with a Major in Trombone Performance

Bachelor of Music (BMus) Degree with a Major in Trumpet Performance
Bachelor of Music (BMus) Degree with a Major in Tuba Performance .............................................. 645
Bachelor of Music (BMus) Degree with a Major in Viola Performance .................................................. 647
Bachelor of Music (BMus) Degree with a Major in Violin Performance .................................................. 649
Bachelor of Music (BMus) Degree with a Major in Vocal Performance .................................................. 652
Doctor of Musical Arts (DMA) Degree in the field of Cello Performance ................................................. 654
Doctor of Musical Arts (DMA) Degree in the field of Clarinet Performance .............................................. 656
Doctor of Musical Arts (DMA) Degree in the field of Composition .......................................................... 658
Doctor of Musical Arts (DMA) Degree in the field of Double Bass Performance ..................................... 660
Doctor of Musical Arts (DMA) Degree in the field of Flute Performance .................................................. 663
Doctor of Musical Arts (DMA) Degree in the field of Oboe Performance .................................................. 665
Doctor of Musical Arts (DMA) Degree in the field of Organ Performance ............................................... 667
Doctor of Musical Arts (DMA) Degree in the field of Percussion Performance ......................................... 669
Doctor of Musical Arts (DMA) Degree in the field of Piano Performance ................................................. 671
Doctor of Musical Arts (DMA) Degree in the field of Viola Performance .................................................. 673
Doctor of Musical Arts (DMA) Degree in the field of Violin Performance .................................................. 676
Doctor of Musical Arts (DMA) Degree in the field of Vocal Performance ............................................... 678
Master of Music (MMus) Degree in the field of Bassoon Performance .................................................... 680
Master of Music (MMus) Degree in the field of Cello Performance .......................................................... 683
Master of Music (MMus) Degree in the field of Clarinet Performance ..................................................... 686
Master of Music (MMus) Degree in the field of Composition .................................................................. 689
Master of Music (MMus) Degree in the field of Double Bass Performance ............................................. 692
Master of Music (MMus) Degree in the field of Flute Performance ......................................................... 695
Master of Music (MMus) Degree in the field of Harp Performance .......................................................... 698
Master of Music (MMus) Degree in the field of Horn Performance .......................................................... 700
Master of Music (MMus) Degree in the field of Musicology ................................................................... 703
Master of Music (MMus) Degree in the field of Oboe Performance .......................................................... 706
Master of Music (MMus) Degree in the field of Orchestral Conducting ...................................................... 709
Master of Music (MMus) Degree in the field of Organ Performance ...................................................... 712
Master of Music (MMus) Degree in the field of Percussion Performance ................................................. 715
Master of Music (MMus) Degree in the field of Piano Chamber Music and Accompanying .................... 718
Master of Music (MMus) Degree in the field of Piano Performance ....................................................... 721
Master of Music (MMus) Degree in the field of String Quartet Performance ......................................... 724
Master of Music (MMus) Degree in the field of Trombone Performance ................................................. 726
Master of Music (MMus) Degree in the field of Trumpet Performance ................................................... 729
Master of Music (MMus) Degree in the field of Tuba Performance .......................................................... 732
Master of Music (MMus) Degree in the field of Viola Performance .......................................................... 735
Master of Music (MMus) Degree in the field of Violin Performance ......................................................... 738
Master of Music (MMus) Degree in the field of Vocal Performance ........................................................ 741
Naval Science ......................................................................................................................................... 744
Minor in Naval Science ......................................................... 744
Neuroscience ........................................................................................................................................ 745
Bachelor of Arts (BA) Degree with a Major in Neuroscience ................................................................. 746
Minor in Neuroscience .......................................................... 748
Philosophy ............................................................................................................................................... 751
Bachelor of Arts (BA) Degree with a Major in Philosophy ....................................................................... 752
Doctor of Philosophy (PhD) Degree in the field of Philosophy .............................................................. 754
Physics and Astronomy ......................................................................................................................... 755
Bachelor of Arts (BA) Degree with a Major in Astronomy ....................................................................... 756
Bachelor of Arts (BA) Degree with a Major in Physics ........................................................................... 758
Bachelor of Science (BS) Degree with a Major in Astrophysics ........................................................... 759
Bachelor of Science (BS) Degree with a Major in Physics and a Major Concentration in Applied Physics .... 761
Bachelor of Science (BS) Degree with a Major in Physics and a Major Concentration in Biological Physics .... 762
Bachelor of Science (BS) Degree with a Major in Physics and a Major Concentration in Computational Physics ........................................ 764
Bachelor of Science (BS) Degree with a Major in Physics and a Major Concentration in General Physics ........................................ 766
Doctor of Philosophy (PhD) Degree in the field of Physics ................................................................................................................. 768
Minor in Physics ............................................................................. 768
Political Science ........................................................................... 769
Bachelor of Arts (BA) Degree with a Major in Political Science .................................................................................................. 770
Doctor of Philosophy (PhD) Degree in the field of Political Science .............................................................................................. 772
Politics, Law and Social Thought .................................................. 773
Minor in Politics, Law and Social Thought ........................................ 774
Poverty, Justice and Human Capabilities ........................................ 776
Minor in Poverty, Justice and Human Capabilities ......................... 777
Program in Writing and Communication ....................................... 782
Psychological Sciences ................................................................... 782
Bachelor of Arts (BA) Degree with a Major in Psychology ......................... 784
Doctor of Philosophy (PhD) Degree in the field of Psychology .................................................................................................. 785
Doctor of Philosophy (PhD) Degree in the field of Psychology and a Major Concentration in Cognitive and Affective Neuroscience ........................................................................................................ 786
Doctor of Philosophy (PhD) Degree in the field of Psychology and a Major Concentration in Human-Computer Interaction and Human Factors ................................................................................... 788
Doctor of Philosophy (PhD) Degree in the field of Psychology and a Major Concentration in Industrial-Organizational Psychology ........................................................................................................... 790
Doctor of Philosophy (PhD) Degree in the field of Psychology and a Major Concentration in Psychometrics and Quantitative Psychology ................................................................................................. 791
Religion ............................................................................................ 792
Bachelor of Arts (BA) Degree with a Major in Religion .................... 793
Doctor of Philosophy (PhD) Degree in the field of Religion .................... 797
Master of Arts (MA) Degree in the field of Religion ......................... 798
Minor in Religion ............................................................................. 799
Science Teaching ............................................................................ 802
Master of Science Teaching (MST) Degree ........................................ 802
Social Policy Analysis ........................................................................ 804
Bachelor of Arts (BA) Degree with a Major in Social Policy Analysis .......................................................................................... 805
Sociology .......................................................................................... 807
Bachelor of Arts (BA) Degree with a Major in Sociology ...................... 809
Doctor of Philosophy (PhD) Degree in the field of Sociology ...................... 810
Minor in Sociology ........................................................................... 812
Space Studies .................................................................................. 813
Master of Science in Space Studies (MSSpS) Degree ......................... 814
Master of Science in Space Studies (MSSpS) Degree / Master of Business Administration (MBA) Degree ........................................... 816
Spanish, Portuguese and Latin American Studies .............................. 817
Bachelor of Arts (BA) Degree with a Major in Spanish and Portuguese .................................................................................. 818
Sport Management ............................................................................ 820
Bachelor of Arts (BA) Degree with a Major in Sport Management and a Major Concentration in Sport Analytics .................................................. 821
Bachelor of Arts (BA) Degree with a Major in Sport Management and a Major Concentration in Sport Law ........................................ 823
Bachelor of Arts (BA) Degree with a Major in Sport Management and a Major Concentration in Sport Leadership ........................................ 824
Statistics .......................................................................................... 826
Bachelor of Arts (BA) Degree with a Major in Statistics ...................... 827
Doctor of Philosophy (PhD) Degree in the field of Statistics ...................... 830
Master of Statistics (MStat) Degree .................................................. 830
Master of Statistics (MStat) Degree / Master of Business Administration (MBA) Degree ...................................................... 833
Minor in Statistics ........................................................................... 834
Study of Women, Gender and Sexuality ........................................... 836
Bachelor of Arts (BA) Degree with a Major in Study Of Women, Gender and Sexuality ...................................................... 837
Certificate in the Study of Women, Gender and Sexuality ...................... 837
Subsurface Geoscience ...................................................................... 842
Master of Science in Subsurface Geoscience (MSSG) Degree ............... 843
Master of Science in Subsurface Geoscience (MSSG) Degree / Master of Business Administration (MBA) Degree ........................................... 846
Systems, Synthetic and Physical Biology .......................................... 847
Doctor of Philosophy (PhD) Degree in the field of Systems, Synthetic and Physical Biology ...................................................... 848
Teaching and Learning ...................................................................... 850
Certificate in Teaching and Learning ............................................... 851

UNDERGRADUATE STUDENTS

The undergraduate experience at Rice is one of intense personal interactions. The close sense of community created by individual placement in residential colleges is extended to warm intellectual and personal relationships with members of the Rice faculty. "Inside the hedges," the beautifully designed, spacious campus is small enough to encourage a sense of belonging even as students engage with the lively cultural currents of one of the country's largest cities.

The academic philosophy at Rice is to offer students beginning their college studies both a grounding in the broad fields of general knowledge and the chance to concentrate on very specific academic and research interests. By completing the required distribution courses, all students gain an understanding of the literature, arts, and philosophy essential to any civilization, a broad historical introduction to thought about human society, and a basic familiarity with the scientific principles underlying physics, chemistry, and mathematics. Building on this firm foundation, students then concentrate on studies in their major areas of interest.

Rice University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (SACSCOC), the recognized regional accrediting body in the 11 U.S. Southern states.

Rice grants eleven undergraduate degrees. The majority of undergraduates earn the Bachelor of Arts (BA) or the Bachelor of Science (BS), in a range of majors. The BS degree is offered in a number of science fields and in various fields of engineering. The George R. Brown School of Engineering offers seven BS degrees, including BS degrees in Computer Science (BSCS) and in Materials Science and NanoEngineering (BMSMNSE), with the five programs leading to the BS degrees in Bioengineering (BSBE), Civil Engineering (BSC), Chemical Engineering (BSCHE), Electrical Engineering (BSEE) and Mechanical Engineering (BMSMSE) being accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org/). The Shepherd School of Music also offers a Bachelor of Music (BMus), and the School of Architecture an undergraduate professional Bachelor of Architecture (BArch) degree.

Undergraduates may major in any of the numerous fields provided by the various schools of architecture, humanities, music, social sciences, natural sciences, and engineering. To accommodate the full range of individual student interests, specific interdepartmental majors and minors also are available, as are various departmental minors and selectively approved area majors. In certain departments, students also have the option of overlapping the upper-level course work of their undergraduate degree with those basic requirements necessary to earn an advanced degree in the field, considerably reducing the time required to complete their graduate studies. The Shepherd School of Music offers a dual degree in music (BMus/MMus) that may be completed with a fifth year of study. The BA–BArch professional track is the primary course of study for undergraduate architectural study at Rice. All students who successfully apply to the university and the School of Architecture enter into this program. This program leads to a degree of Bachelor of Arts with a major in Architecture (BA) after four years, followed immediately by the professional Bachelor of Architecture (BArch) degree sequence, which consists of a one year internship program (Preceptorship) and one year of advanced coursework.

Through Rice’s Education Program, students interested in teaching in secondary schools may complete a program of teacher training, leading to teacher (TEA) certification in the state of Texas, while pursuing their Rice degree. Students interested in satisfying the requirements for admission to medical, dental, or law school should consult with the Office of Academic Advising for completing these programs in conjunction with the various majors.

Academic Opportunities

- Auditing Courses (p. 11)
- Majors, Minors, and Certificates (p. 11)
- Non-Traditional Coursework (p. 13)
- Study Abroad (p. 13)
- Undergraduate Degree Chart (p. 14)
- Undergraduate Degrees (p. 16)
- Undergraduate - Graduate Concurrent Enrollment (p. 17)
- Unique Programs (p. 17)

Auditing Courses

During the fall and spring semesters, currently enrolled degree-seeking Rice students, who are registered for at least one course for credit, may audit one or more courses at Rice without charge by securing permission of the instructor and by registering as an auditor with the Office of the Registrar. During the summer sessions, enrolled Rice students may audit one or more courses at Rice at the cost of the auditor fee for Rice alumni (see Cashier’s website https://cashier.rice.edu/).

Upon completion, the audited course will appear on the student’s transcript with a grade of either ‘AUD’ or ‘NC’. As noted in Grades (p. 24), instructors report the AUD grade in those instances where the auditing student has met the audit requirements of the course and defined by the instructor. A grade of NC (No Credit) is reported in instances where the auditing student has not met the audit requirements of the course as defined by the instructor.

There are no credit hours associated with audited courses, and auditing a course does not affect a student’s GPA. Requests to audit a class or to change from audit to credit or vice versa must be done by the dates and deadlines documented in the posted Academic Calendar (see Academic Calendar https://registrar.rice.edu/calendars/).

Majors, Minors, and Certificates

Undergraduate Majors

To receive a bachelor’s degree, a student must complete the requirements for at least one major. Rice offers majors in many fields. Within some majors, students have the choice of a particular area of concentration. Students also may choose to fulfill the requirements for more than one major; such majors do not necessarily need to be in related fields. Because majors are part of degree programs, students should pay particular attention to the major’s corresponding degree. In some instances, the requirements for a major may differ depending on the degree and major combination the student is pursuing. As an example, the major requirements for a Computer Science major pursuing the BA degree differ from those of a Computer Science major pursuing the BSCS degree. When a student formally declares a major, they should declare both the degree and major combination that they are pursuing. The process for declaring majors appears in the Declaring Majors or Area Majors sections below.

More detailed information on the academic majors described below may be found in the corresponding school or Programs of Study.
sections, or by contacting the department. Additional information on degrees and majors, including some maximum total hours limits for majors, can be found at Undergraduate Degrees (p. 16). Other helpful information on dual degrees and multiple majors may be found at the Major, Minors, and University Certificates (https://registrar.rice.edu/students/majors_minors/#dual) page of the Office of the Registrar's website.

School of Architecture
Students admitted to the university as architecture majors must first complete four years of the BA program (architecture major) before applying to the BArch program in their senior year. If admitted, they are assigned a preceptorship with an architectural firm for a one-year period, after which they return to Rice to complete the BArch degree program. The School of Architecture also offers a BA in Architectural Studies, which provides a foundation for graduate level study of architecture and/or pursuit of other fields. More information on this academic school, its departments and programs can be found at: https://ga.rice.edu/programs-study/departments-programs/architecture/ (https://ga.rice.edu/programs-study/departments-programs/architecture/)

George R. Brown School of Engineering
Rice offers majors in bioengineering, chemical and biomolecular engineering, civil and environmental engineering, computational and applied mathematics, computer science, electrical and computer engineering, materials science and nanoengineering, mechanical engineering, and statistics. These programs lead to either the BA or the BS degree and may qualify students for further graduate study. More information on this academic school, its departments and programs can be found at: https://ga.rice.edu/programs-study/departments-programs/engineering/ (https://ga.rice.edu/programs-study/departments-programs/engineering/)

School of Humanities
Students may declare majors in art history, classical studies, English, European studies, French studies, German studies, Spanish and Portuguese, history, philosophy, religion, and visual and dramatic arts. Interdisciplinary majors are available in ancient mediterranean civilizations, Asian studies, Latin American studies, medieval and early modern studies, and the study of women, gender, and sexuality. More information on this academic school, its departments and programs can be found at: https://ga.rice.edu/programs-study/departments-programs/humanities/ (https://ga.rice.edu/programs-study/departments-programs/humanities/)

Shepherd School of Music
Music students may opt for either a BA or a Bachelor of Music (BMus) degree in performance, composition, music history, and music theory. Students who pass a special qualifying examination may elect an honors program that leads to the simultaneous awarding of the BMus and Master of Music (MMus) degrees after five years of study. More information on this academic school, its departments and programs can be found at: https://ga.rice.edu/programs-study/departments-programs/music/ (https://ga.rice.edu/programs-study/departments-programs/music/)

Wiess School of Natural Sciences
All natural sciences departments, including biosciences, chemistry, earth science, kinesiology, mathematics, neuroscience, and physics and astronomy offer programs leading to the BA degree. BS degrees are offered in some departments. Majors include astronomy, astrophysics, biochemistry and cell biology, biological sciences, kinesiology, chemical physics, chemistry, earth science, ecology and evolutionary biology, environmental studies, mathematics, and physics. Students also may elect double majors combining one of the programs in natural sciences with another science, a humanities discipline, or an engineering field. More information on this academic school, its departments and programs can be found at: https://ga.rice.edu/programs-study/departments-programs/natural-sciences/ (https://ga.rice.edu/programs-study/departments-programs/natural-sciences/)

School of Social Sciences
Rice offers majors in anthropology, economics, linguistics, mathematical economic analysis, political science, psychology, social policy analysis, sociology, and sport management. In addition the cognitive sciences major includes science, engineering, and humanities courses, while the managerial studies major incorporates coursework in the schools of engineering and management. More information on this academic school, its departments and programs can be found at: https://ga.rice.edu/programs-study/departments-programs/social-sciences/ (https://ga.rice.edu/programs-study/departments-programs/social-sciences/)

Declaring Majors, Minors, and Certificates
Students declare a major, minor, or certificate via a Declaration Form. The department chair or designee must sign the form acknowledging the declaration. The department will counsel the student about the requirements that must be met to complete the major and the likelihood the student will be able to meet them. If the department believes a student is not well prepared for success in its major (or minor, or certificate), it may express its reservations on the form and/or propose a specific course of study to help the student improve his or her background. No department or program, except the School of Architecture and Shepherd School of Music, may refuse to admit an undergraduate into its program unless specific curricular conditions for such refusals are included in the relevant description of the program requirements, or in cases of resource limitations. Students may not obtain both a BA and a BS in the same major.

Students are encouraged to declare an official major as soon as they have decided on it so that a major advisor can be assigned. Students may declare a major at any time up to, before, or during the spring semester of their second year at Rice. They will not be permitted to register for the fall semester of their third year without having declared a major. The major declaration deadline is listed in the Academic Calendar (https://registrar.rice.edu/calendars/) each year. (Transfer students should declare within their first year or before reaching junior level status.) Students are always free to change their major by completing the Change of Major form. However, such a change may entail one or more additional semesters at the university. Area majors are an exception to this rule and must be declared by the fourth semester before graduation (see Area Majors below).

Some majors provide students an opportunity to declare a major concentration. Major concentrations are formally recognized subfields of study within a major, and they are represented by a coordinated set of courses emphasizing a subfield in that program. For those majors with approved concentrations, the major concentration is listed on the student’s academic transcript as an element of the official curriculum.

Additionally, some majors allow for areas of specialization. Areas of specialization are pre-specified collections of elective courses that, when taken together, cover particular areas of specialization within a major
or major concentration. These can be viewed as an advising strategy to assist students in choosing electives. An area of specialization is not an academic credential and is not listed on the student’s academic transcript.

Students may declare a minor only after they have first declared a major. The declaration of minor process is identical to that of majors. Students may not major and minor in the same subject.

Additionally, students may declare their intent to pursue a university certificate only after they have first declared a major. The declaration of intent to pursue a university certificate process is identical to that of majors.

Once a student declares a major, minor, or certificate, the title of the major, minor, or university certificate is noted on the student’s transcript, and a faculty advisor in the appropriate department or program is assigned. To gain full benefit of departmental or program course offerings, students should meet regularly with faculty advisors.

To assess progress toward degree requirements, students should:

1. monitor their Degree Works degree audits (via ESTHER) to review progress toward degree requirements; and
2. meet regularly with their faculty advisors to review progress toward completion of major, minor, university certificate, and degree requirements.

For instructions on how to declare a major, minor or certificate in ESTHER, visit the Major, Minors, and University Certificates (https://registrar.rice.edu/students/majors_minors/) page of the Office of the Registrar’s website.

Area Majors

Students with well-defined needs that are not met by established departmental or interdisciplinary majors may propose an area major. Area majors combine courses from more than one department into a cohesive plan of original study that is equivalent in quality and rigor to a traditional major.

Area majors are rare and limited by the available academic resources and must be distinct from other majors at Rice. They differ from double majors, which must conform to the requirements of both departments. An area major constitutes a single major with specific requirements that include courses from two or more departments. No course in an area major may be used to fulfill the requirements of an additional major, minor or a certificate, and students with area majors must still meet all the other university graduation requirements.

Students initiate an area major after first consulting with faculty advisors from each of the departments involved. Once support has been obtained from these faculty advisors, students should consult the Office of Academic Advising (OAA) which serves as a liaison to the Committee on the Undergraduate Curriculum (CUC). Students work closely with each faculty advisor to design a comprehensive and substantial course of study and to decide on an appropriate title. This course of study must be formulated in a written proposal. Each faculty advisor and the OAA must sign off on the plan before submission to the chair of the CUC. The CUC determines final approval. As part of the review process, the CUC consults chairs of the involved departments to confirm that courses necessary for successful and timely completion of the major will be offered. If approved, the OAA officially certifies the area major plan to the Office of the Registrar and goes on to oversee the major on behalf of the faculty advisors. Any change in the area major requirements needs the approval of both the faculty advisors and the CUC.

Students may not propose an area major if they are within three semesters of graduation unless the Committee on Examinations and Standing rules that exceptional circumstances warrant this action. Under no circumstances may students propose an area major in their final semester before graduation.

Non-Traditional Coursework

Courses tailored for individual students provide a valuable opportunity for them to pursue an academic or professional interest under the supervision of a Rice faculty member. Such courses are typically titled as independent study or research, directed reading, internships, or are described as a teaching experience. Although the organization of these courses is quite variable, they are subject to the same basic requirements as other course offerings. In particular:

• The subject matter and intellectual level of the course must be appropriate for Rice.
• The instructor of record must hold a regular faculty appointment at Rice. This instructor is responsible for submitting the final grade, in consultation with the student’s immediate supervisor, if appropriate.
• The course must have a written syllabus that meets published Rice Syllabus Standards (p. 91). In addition, the syllabus must include a description of anticipated activities and topical content.
• Credit hours assigned are subject to the same amount-of-work considerations as other courses. Credit hours will be awarded in accordance with the Rice credit hour guidelines (https://registrar.rice.edu/facstaff/contact_hours/) and fixed at the time of registration.
• All Academic Calendar (https://registrar.rice.edu/calendars/) (or Registrar) deadlines for registration, add/drop, completion of coursework, and grade submission must be met.

Study Abroad

Rice University Study Abroad provides substantial, intellectually rigorous, and culturally enriching international opportunities. Rice Study Abroad is committed to providing high quality academic-based educational programs in collaboration with prestigious international universities and select program providers. Rice approved programs are distinguished by their academic focus contributing to the curricular needs of Rice University as well as integration with host communities through opportunities such as intensive language instruction, field studies, professional internships, and independent study.

Students must make their study abroad arrangements through Rice Study Abroad (http://abroad.rice.edu/) in order to ensure proper enrollment, credit transfer, financial aid portability, scholarship eligibility, and risk management coverage.

Students should familiarize themselves with the university’s transfer credit policy, and specifically that for International Transfer Credit (p. 33), before studying abroad. Please note that some departments have additional program-specific transfer credit guidelines or restrictions.
Undergraduate Degree Chart

The School of Architecture

Architecture
- Bachelor of Architecture (BArch) Degree (p. 123)
- Bachelor of Arts (BA) Degree with a Major in Architectural Studies (p. 124)
- Bachelor of Arts (BA) Degree with a Major in Architecture (p. 125)

The George R. Brown School of Engineering

Bioengineering
- Bachelor of Science in Bioengineering (BSBE) Degree (p. 148)

Chemical and Biomolecular Engineering
- Bachelor of Arts (BA) Degree with a Major in Chemical Engineering (p. 275)
- Bachelor of Science in Chemical Engineering (BSChE) Degree (p. 277)

Civil and Environmental Engineering
- Bachelor of Arts (BA) Degree with a Major in Civil and Environmental Engineering and a Major Concentration in Civil Engineering (p. 303)
- Bachelor of Arts (BA) Degree with a Major in Civil and Environmental Engineering and a Major Concentration in Environmental Engineering (p. 306)
- Bachelor of Science in Civil Engineering (BSCE) Degree (p. 309)

Computational and Applied Mathematics
- Bachelor of Arts (BA) Degree with a Major in Computational and Applied Mathematics (p. 335)
- Minor in Computational and Applied Mathematics (p. 340)

Computer Science
- Bachelor of Arts (BA) Degree with a Major in Computer Science (p. 347)
- Bachelor of Science in Computer Science (BSCS) Degree (p. 349)

Bachelor of Arts (BA) Degree with a Major in Environmental Science and a Major Concentration in Earth Science (p. 429)
Bachelor of Arts (BA) Degree with a Major in Environmental Science and a Major Concentration in Ecology and Evolutionary Biology (p. 432)
Bachelor of Science (BS) Degree with a Major in Environmental Science and a Major Concentration in Earth Science (p. 435)
Bachelor of Science (BS) Degree with a Major in Environmental Science and a Major Concentration in Ecology and Evolutionary Biology (p. 439)

Kinesiology
Bachelor of Arts (BA) Degree with a Major in Kinesiology and a Major Concentration in Health Sciences (p. 490)
Bachelor of Arts (BA) Degree with a Major in Kinesiology and a Major Concentration in Sports Medicine (p. 492)

Mathematics
Bachelor of Arts (BA) Degree with a Major in Mathematics (p. 547)
Bachelor of Science (BS) Degree with a Major in Mathematics (p. 549)
Minor in Mathematics (p. 551)

Neuroscience
Bachelor of Arts (BA) Degree with a Major in Neuroscience (p. 746)
Minor in Neuroscience (p. 748)

Physics and Astronomy
Bachelor of Arts (BA) Degree with a Major in Astronomy (p. 756)
Bachelor of Arts (BA) Degree with a Major in Physics (p. 758)
Bachelor of Science (BS) Degree with a Major in Astrophysics (p. 759)
Bachelor of Science (BS) Degree with a Major in Physics and a Major Concentration in Applied Physics (p. 761)
Bachelor of Science (BS) Degree with a Major in Physics and a Major Concentration in Biological Physics (p. 762)
Bachelor of Science (BS) Degree with a Major in Physics and a Major Concentration in Computational Physics (p. 764)
Bachelor of Science (BS) Degree with a Major in Physics and a Major Concentration in General Physics (p. 766)
Minor in Physics (p. 768)

The School of Social Sciences

Anthropology
Bachelor of Arts (BA) Degree with a Major in Anthropology (p. 113)
Minor in Anthropology (p. 116)

Cognitive Sciences
Bachelor of Arts (BA) Degree with a Major in Cognitive Sciences (p. 328)

Economics
Bachelor of Arts (BA) Degree with a Major in Economics (p. 375)

Linguistics
Bachelor of Arts (BA) Degree with a Major in Linguistics (p. 525)

Managerial Studies
Bachelor of Arts (BA) Degree with a Major in Managerial Studies (p. 529)

Mathematical Economic Analysis

Undergraduate Degrees

Bachelor of Arts Degrees

The specific requirements of individual majors leading to the Bachelor of Arts degree vary widely. No department may specify more than 80 semester credit hours (including prerequisites, required courses, and related laboratories included) for the Bachelor of Arts.

In addition to meeting the degree requirements for all bachelor’s degrees, to qualify for the Bachelor of Arts, students in all fields except architecture must complete at least 60 semester credit hours in coursework outside of major requirements. Students in architecture must complete at least 45 semester credit hours in coursework outside of major requirements.

Bachelor of Science Degrees in the Wiess School of Natural Sciences

The Bachelor of Science degree is offered with majors in astrophysics, biochemistry and cell biology, chemistry, chemical physics, earth science, environmental science, ecology and evolutionary biology, mathematics, and physics. The specific degree requirements vary from field to field and differ from those of the Bachelor of Arts in that there are greater technical requirements. No department may specify more than 80 semester credit hours (including prerequisites, required courses, and related laboratories) for the Bachelor of Science. To earn a BS degree in one of these fields, students must complete at least 60 semester credit hours in coursework outside the major.
Bachelor of Science Degrees in the George R. Brown School of Engineering

- Bioengineering (BSBE)
- Chemical Engineering (BSChE)
- Civil Engineering (BSCE)
- Computer Science (BSCS)
- Electrical Engineering (BSEE)
- Materials Science and NanoEngineering (BSMSNE)
- Mechanical Engineering (BSME)

The Bachelor of Science degree in a given engineering field is distinct from the Bachelor of Arts degree in that it must meet greater technical requirements. In establishing a departmental major for the Bachelor of Science degrees, departments may specify up to a defined maximum number of hours of coursework towards that major (including prerequisites, required courses, and related laboratories).

For the declared majors associated with the Bachelor of Science degrees, the Bioengineering department specifies up to 98 semester credit hours of coursework towards its major; the Chemical and Biomolecular Engineering department may specify up to 97 semester credit hours; the Civil and Environmental Engineering department up to 95; the Computer Science department up to 85; the Electrical and Computer Engineering department up to 86; the Materials Science and NanoEngineering department up to 95; and the Mechanical Engineering department specifies 87 semester credit hours of coursework.

To earn the corresponding Bachelor of Science degrees, students must meet the following minimum semester credit hour requirements in total course work:

- Bioengineering majors — a total of at least 131 semester credit hours
- Chemical Engineering majors — a total of 132 semester credit hours
- Civil Engineering majors — a total of at least 133 semester credit hours
- Computer Science majors — a total of at least 128 semester credit hours
- Electrical Engineering majors — a total of at least 134 semester credit hours
- Materials Science and NanoEngineering majors — a total of at least 132 semester credit hours
- Mechanical Engineering majors — a total of at least 127 semester credit hours

The programs leading to BS degrees in Bioengineering, Civil Engineering, Chemical Engineering, Electrical Engineering, and Mechanical Engineering are accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org.

Other Bachelor’s Degrees

The professional Bachelor of Architecture (BArch) degree requires a fifth year of study and a one-year preceptorship. The Bachelor of Music (BMus) degree requires advanced courses in performance and ensemble in addition to the core music curriculum.

Undergraduate - Graduate Concurrent Enrollment

Advanced Rice undergraduate students may be accepted into a Rice graduate program prior to receiving their undergraduate degree. Their formal graduate program enrollment is deferred until after the bachelor’s degree has been awarded, at which time the students will complete a minimum of one semester of residency as a Rice graduate student. With certain stipulations, undergraduate students may i.) begin work on their graduate degree at Rice prior to completing all degree requirements for their bachelor’s degree, and ii.) must complete the requirements for both the bachelor’s degree and the master’s degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).

While concurrently enrolled in a graduate program, each semester Rice undergraduates are required to maintain enrollment in no fewer than 12 credit hours of study to count toward the undergraduate degree and may be enrolled in no more than six hours of study to count toward the graduate degree. By default, all courses in which the undergraduate students are enrolled count toward the undergraduate degree, regardless of the course number. To designate courses that will count toward the graduate degree, Rice undergraduates concurrently enrolled in a graduate program must submit a Undergraduate Student in Graduate Degree Program Special Registration Request Form (https://registrar.rice.edu/sites/g/files/bxs751/f/Undergraduate%20Student%20in%20Graduate%20Degree%20Program%20Special%20Registration%20Request.pdf) as part of the registration process each semester. Students submit the completed form to the Office of the Registrar once registration is open, but no later than the Friday of the second week of courses for each term. **Please note:** If a student were to have a change of plans and withdraw from the graduate degree program before completing the bachelor’s degree, those courses taken toward the graduate degree program would be returned to the undergraduate record.

Important: Please note that seeking a graduate degree while still a Rice undergraduate may have financial aid implications. Undergraduate students applying for graduate programs should consult with the Office of Financial Aid prior to accepting an offer of admission. Any undergraduate students enrolled in a graduate degree program will not be eligible to request a continuance of their federal financial aid beyond their eighth semester of study at Rice. Furthermore, students will not be eligible for any undergraduate financial aid after the completion of their undergraduate degree requirements. Once the undergraduate degree is conferred, students that have been concurrently enrolled will be classified as a graduate student. Students are only eligible for graduate loans if classified as a graduate student. Students are not classified as graduate students until they have successfully completed their undergraduate degree program.

Unique Programs

Rice undergraduates have the opportunity to pursue a number of unique academic programs during their course of study. A few are highlighted below.

Century Scholars Program

The University’s goals of attracting superior undergraduates, fostering collaboration between students and professors, and sustaining a commitment to undergraduate education have culminated in a groundbreaking scholarship and mentoring program. The Rice University Century Scholars program matches select incoming freshmen...
Academic Policies and Procedures

All undergraduate students are subject to the academic regulations of the university. Students are responsible for making certain they meet all departmental and university requirements and academic deadlines.

The Committee on Examinations and Standing (EX&S) administers the rules and regulations documented here. Under unusual or mitigating circumstances, students may submit a written petition requesting special consideration to the committee. Students should address all correspondence to the EX&S committee in care of the Office of the Dean of Undergraduates. Further information about the petition process can be found on the Dean of Undergraduates website, at https://dou.rice.edu/committee-examinations-and-standing (https://dou.rice.edu/committee-examinations-and-standing/).

Admission

Dating back to the founding of Rice University, our first president, Edgar Odell Lovett, mandated that we aspire to be a world-class university of the highest standing. Dr. Lovett challenged us “to assign no upper limit to our educational endeavor.” He envisioned students and faculty as a community of scholars, their minds exercised by spirited discourse (John Boles, A University So Conceived: A Brief History of Rice, p. 17, third rev. ed. 2006). Therefore, as an integral part of the university’s mission, we seek a broadly diverse student body where educational diversity increases the intellectual vitality of education, scholarship, service, and communal life at Rice. We seek students, both undergraduate and graduate, of keen intellect and diverse backgrounds who not only show potential for success at Rice, but also who will contribute to the educational environment of those around them. Rice selects a group of applicants who, considered individually and collectively, will take fullest advantage of what we have to offer, contribute most to the educational process at Rice, and be most successful in their chosen fields and in society in general. Our evaluation process employs many different means to identify these qualities in applicants. History shows that no single gauge can adequately predict a student’s preparedness for a successful career at Rice. For example, we are cautious in the use of standardized test scores to assess student preparedness and potential. An applicant is considered in competition with all other applicants. In making a decision to admit or award financial aid, we are careful not to ascribe too much value to any single metric, such as rank in class, grade point average, or standardized test scores.

We use a broader perspective that includes such qualitative factors as the overall strength and competitive ranking of a student’s prior

Rice Undergraduate Scholars Program (RUSP)
The Rice Undergraduate Scholars Program (RUSP) is a two-semester, 1-credit undergraduate research program aimed at students interested in careers in academia and research. Junior and senior Rice students engage in a year-long research project and attend weekly seminars on topics of research and the academic life. The program is focused on developing research and presentation skills, an understanding of an academic career, and how to apply to post-undergraduate education (graduate, medical, and law) and nationally competitive fellowships. In addition to this, all students in the program will have access to funding that may be used for research materials or conference attendance.

For more information regarding the RUSP program, please see the program’s website: https://ouri.rice.edu/rice-undergraduate-scholars-program-rusp-1/ (https://ouri.rice.edu/rice-undergraduate-scholars-program-rusp-1/)

Rice-UT Public Health Scholars Program

Beginning in Fall 2015, a collaborative program agreement became effective between Rice University (Rice) and the University of Texas School of Public Health (UTSPH). The program is designed to allow select Rice undergraduate students interested in pursuing a graduate program in public health to obtain dual undergraduate and graduate credit by enrolling in up to 5 graduate courses (16 credit hours) at UTSPH during their senior year. This unique Rice-UTPH Program enables accepted Rice students to earn credit towards their Rice undergraduate degree (BA or BS with any major), and to accelerate the completion of their UTSPH Master of Public Health degree (MPH) to within one year after completing their Rice undergraduate degree.

For more information regarding the Rice-UTPH program, please see the program's website: https://ouri.rice.edu/student-resources/public-health-scholars-program (https://ouri.rice.edu/student-resources/public-health-scholars-program).

Teacher Education

Students in the teacher education program earn Texas state teacher certification at the secondary level, grades 7–12. Subjects include art, English language arts and reading, history, Latin, life sciences, mathematics, physical sciences, physics/mathematics, science, social studies, and Spanish. For more information on teacher education programs at the undergraduate and graduate levels, see Education.
institution, the rigor of his or her particular course of study, letters of recommendation, essays, responses to application questions, and (where required) auditions and portfolios. Taken together with a student's academic record and test scores, these additional factors provide a sound basis to begin assessing the applicant's potential on all levels.

Beyond indicators of academic competence, we look for other qualities among applicants, such as creativity, motivation, artistic talent, and leadership potential. We believe that students who possess these attributes in combination with strong academic potential will contribute to, and benefit from, a more vibrant, diverse educational atmosphere. Through their contributions and interactions with others, students will enrich the educational experience of all faculty and students. These qualities are not revealed in numerical measurements, but are manifested in the breadth of interests and the balance of activities in their lives.

Rice University strives to create on its campus a rich learning environment in which all students will meet individuals whose interests, talents, life experiences, beliefs, and world views differ significantly from their own. We believe that an educated person is one who is at home in many different environments, at ease among people from many different cultures, and willing to test his or her views against those of others. Moreover, we recognize that in this or any university, learning about the world we live in is not by any means limited to the structured interaction between faculty and students in the classroom, but also occurs through informal dialogue between students outside of the classroom.

To encourage our students' fullest possible exposure to the widest possible set of experiences, Rice seeks through its admission policies to bring bright and promising students to the university from a range of socioeconomic, cultural, geographic, and other backgrounds. We consider an applicant's race or ethnicity as a factor in the admission process and believe that racial and ethnic diversity is an important element of overall educational diversity. Though race or ethnicity is never the defining factor in an application or admission decision, we do seek to enroll students from underrepresented groups in sufficient and meaningful numbers as to prevent their isolation and allow their diverse voices to be heard. We also seek students whose parents did not attend college as well as students from families with a well-established history of college-level education. Rice places a premium on recruitment of students, regardless of their races or ethnicities, who have distinguished themselves through initiatives that build bridges between different cultural, racial, and ethnic groups. In so doing, we endeavor to craft a residential community that fosters creative, intercultural interactions among students, a place where prejudices of all sorts are confronted squarely and dispelled.

In assessing how well an applicant can contribute to enlivening the learning environment at Rice, we also try to determine the relative challenges that he or she may have faced. For economically disadvantaged students, this may mean achieving a high level of scholastic distinction while working a job in high school. For a first generation college student, it might mean achieving high standards for academic success within an environment relatively indifferent to intellectual attainment. Or it might mean overcoming a disability to excel in sports, music, or forensics. For students who do not have particular disadvantages, we also look at whether they chose a more challenging road than the normal path through high school. This might mean an especially strenuous course of study, a prolonged, in-depth engagement in a school project, or a particularly creative and wide-ranging set of extracurricular activities.

Rice does not view offers of admission as entitlements based on grades and test scores. Our admission process combines an examination of academic ability with a flexible assessment of an applicant's talents, experiences, and potential, including potential diversity contributions; it precludes any quick formula for admitting a given applicant or for giving preference to one particular set of qualifications without reference to the class as a whole. Rice is a highly selective institution and receives many more applications from viable candidates than it has available spaces. An inevitable consequence of Rice's approach is that some highly accomplished students will not be admitted. However, by selecting a wide range of matriculants of all types, the admission process seeks to enrich the learning environment at Rice and thus improve the quality of a Rice education for all students.

Due to the nature of the Rice education, Rice admits undergraduate degree candidates on a full-time basis only.

Applicants are selected on a competitive basis in six academic divisions: architecture, engineering, humanities, music, natural sciences, and social sciences. Candidates should give careful consideration to the category under which they wish to be considered. However, once enrolled, students are able to move freely among most divisions after consultation with their advisors. Music students must pursue the music program for at least the first year before changing divisions. The schools of music and architecture maintain limited enrollments; all majors are subject to faculty approval.

Those offered admission are expected to complete the remainder of their high school courses with the same superior performance that led to their admission.

**First-Year Applicants**

The areas of focus generally used in evaluation of first-year candidates for admission include: scholastic record as reflected by the courses taken and the quality of academic performance, recommendations from high school, the application presentation of personal information, special talents, essays, and standardized testing.

**The High School Record—** Students must complete at least 16 college preparatory units as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>4</td>
</tr>
<tr>
<td>Social Studies</td>
<td>2</td>
</tr>
<tr>
<td>Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>Laboratory Science (e.g. biology, chemistry, physics)</td>
<td>2</td>
</tr>
<tr>
<td>A foreign language</td>
<td>2</td>
</tr>
<tr>
<td>Additional credits in any of the categories above</td>
<td>3</td>
</tr>
</tbody>
</table>

The natural science and engineering divisions require trigonometry (precalculus) or other advanced mathematics courses and both chemistry and physics. Students may substitute a second year of chemistry or biology for physics.

Students admitted with curriculum deficiencies will be asked to complete the required work by taking high school or college-level courses during the summer before enrollment at Rice.

**Note:** Because of the admission competition to enter Rice, successful applicants generally have taken 20 or more college preparatory courses in high school, many at the college level. Therefore, only those students who have more than 20 college preparatory courses may have the Office
of the Registrar consider for Rice credit their college courses taken in high school.

Transfer of Coursework Taken During High School—College-level courses taken during high school years may be considered for credit at Rice University on receipt of the following documentation:

1. An official transcript of all college courses sent directly from the college(s) attended. The college courses should be part of the normal curriculum of the college and taught by regular members of the college faculty.

2. Official notification by letter from the high school principal or guidance counselor that the credit earned was not used to meet high school diploma requirements. College-level courses that appear on the high school transcript will not yield credits at Rice.

Recommendations—Candidates must submit evaluations from their counselor and two teachers. At least one teacher recommendation should relate to the applicant’s intended area of study, and both should highlight their academic strengths and contributions in the classroom.

The Application—All first-year applicants must complete the Common Application, the Coalition Application, or the QuestBridge Application. The application and the Rice supplement provide the committee with important information on the student’s background and gives the applicant an opportunity to provide statements on his or her interests, experiences, and goals. The application fee is $75. Students for whom this fee creates a hardship may apply for a waiver. First-year applicants should provide proof of a fee waiver for the SAT or ACT test, or a NACAC fee waiver form, or eligibility for the school free or reduced lunch program. In any case, a letter from the student’s high school counselor is required. Financial stress created by application fees to other institutions is not considered a valid reason to grant a fee waiver.

Standardized Testing—All first-year applicants for Fall 2020 must submit at least one of the following:

- SAT (Reading/Writing/Language and Math). The SAT Essay is optional.
- ACT. Writing is optional.

These exams are administered by the College Board and the American College Testing Program. Applicants attending U.S. high schools can submit either self-reported or official scores during the application process. Admitted students who choose to enroll at Rice will be required to submit official test scores prior to matriculation. First-year applicants who will graduate from high schools outside the U.S. and all transfer applicants will be required to submit an official score report at the time of application. Rice uses the highest scores from any sitting on the SAT and the ACT in order to consider each applicant’s most positive test results.

Applicants whose first language is not English are required to demonstrate English proficiency, which can be achieved in one of two ways. Those who have received two years of full-time instruction in English at a high school or college are not required to submit English proficiency testing. Applicants who have not received two years of full-time instruction in English must submit official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). The minimum acceptable score on the TOEFL Internet-based test is 100 or a 7.5 on the Paper-delivered test. The minimum acceptable score on the IELTS is a seven.

In addition to the standardized testing requirement, Rice recommends applicants submit two SAT Subject Tests related to their proposed area of study.

To be considered official, all scores must be sent directly from the testing organization. Rice’s College Board code is 6609, our ACT code is 4152, and our TOEFL code is 6609.

Personal Interview—Although a personal interview is not a requirement, we recommend an interview for first-year applicants as an excellent opportunity to discuss the applicant’s interests, needs, and questions. On-campus interviews are conducted by the admission staff and a select group of Rice senior students. Off-campus interviews are conducted throughout the United States and abroad by Rice alumni. Important dates regarding interviews can be found on the admission website. The Rice Admission Committee makes no distinction between on-campus and off-campus interviews. Interviews are available to high school seniors only.

Music Audition—All applicants to the Shepherd School of Music must submit all required documents by December 1. An Audition Profile Form, preliminary recording, or portfolio of composition on music history is also required.

Architecture Portfolio—Architecture applicants must submit a portfolio along with the required application materials by the deadline for either the Early Decision or Regular Decision Plan.

Decision Plans

Early Decision Plan—Early Decision is a binding decision plan designed for students who have selected Rice as their first choice. Students may initiate applications to other colleges under nonbinding plans but must withdraw those applications if admitted to Rice.

Early Decision applicants must complete the required standardized testing prior to or by the November testing dates in their senior year. All other materials should be submitted by November 1. Admission notices will be mailed by mid-December. The admission committee will admit, defer, or deny Early Decision applicants. Deferred applicants are considered with the Regular Decision pool.

It is important to note that, if admitted under Early Decision, a candidate must withdraw all other college applications, may not submit any additional applications after accepting the offer, and must accept Rice’s offer of admission by submitting a $300 nonrefundable deposit by January 1. An additional $100 housing deposit is required of those desiring on-campus accommodations.

Those accepted under Early Decision who demonstrate financial aid eligibility will receive a financial aid package in the admission packet. To apply for need-based aid, Early Decision applicants must submit the Free Application for Federal Student Aid (FAFSA), the College Scholarship Service Profile (CSS PROFILE) and the student and parent income tax and W-2 forms by November 15, 2019. Complete the FAFSA at [https://fafsa.gov/](https://fafsa.gov/). Rice’s FAFSA code is 003604. Register for the CSS PROFILE at [https://student.collegeboard.org/css-financial-aid-profile](https://student.collegeboard.org/css-financial-aid-profile). Students will complete the PROFILE online. The PROFILE number for Rice is 6609. For more detailed information go to [https://financialaid.rice.edu](http://financialaid.rice.edu/).

Regular Decision Plan—Students who apply Regular Decision must submit their materials by January 1 to receive notification by April 1. Candidates who miss the deadline must do so in full knowledge that
they are in a less competitive position. Regular Decision applicants must complete their standardized tests by December of their senior year of high school.

Regular Decision applicants who are offered admission must submit a $300 enrollment deposit by May 1 to reserve their places in the incoming class. Those who desire a room on campus must pay an additional $100 deposit. Enrollment deposits are not refundable.

Shepherd School of Music—All candidates applying to the Shepherd School of Music must submit their application and all required supporting documents by December 1. Admission notification is April 1. Admitted students must submit a $300 nonrefundable deposit by May 1.

Rice/Baylor Medical Scholars Program—All candidates interested in the Rice/Baylor Medical Scholars Program must submit the Baylor College of Medicine application to Rice University by December 1. Rice application materials are due by November 1 for Early Decision or December 1 for Regular Decision.

Accelerated Students
Rice University will accept applications from students who are completing high school in less than four years. It is important to note that these students will compete with other candidates who will be completing four years of high school. Therefore, it is the candidates’ responsibility to demonstrate that they have exhausted all college preparatory course work at their schools. Further, because of the residential focus and commitment to student self-governance at Rice, candidates must also demonstrate the maturity and personal development that would allow them to participate fully and responsibly in campus life. Because of the unique circumstances surrounding the accelerated student, it is strongly recommended that these candidates have an on-campus interview with an admission officer well before the application deadline.

Home-Schooled Applicants
Rice recognizes that each home-schooled applicant is in a unique educational program. To ensure that our evaluation process is fully informed, home-schooled applicants are encouraged to provide clear, detailed documentation of their curriculum of study, assessment tools, and learning experiences. Rice requires a recommendation from an applicant’s counselor and two teachers. For home-schooled applicants, at least one of these recommendations must be from someone not related to the student.

Transfer Students
Students with superior records from two-year or four-year colleges or universities may apply as transfer candidates. Applicants should have completed at least 12 semester hours of college work since graduating from high school. Students with less than 12 semester hours should apply through the first-year admission process. High school students enrolled in an Early College program or Dual Enrollment program are not eligible to apply as transfer students and should apply through the first-year admission process. Students who have already completed a bachelor’s degree may not apply for transfer admission.

Applicants for transfer admission must file the following with the Office of Admission:

- The Transfer Common or Coalition Application and Rice supplement.
- Official transcripts of all high school and college work completed to date, as well as courses in progress
- Professional evaluation of transcripts from non-U.S. institutions. Recommended evaluators are SpanTran (https://www.spantran.com/) and Education Credential Evaluators (https://www.ece.org/).
- Two college instructor recommendations
- The college official’s report
- SAT or ACT
- A $75 application fee (non-refundable)

Applications with the appropriate documents must be submitted by March 15. Rice receives applications only for the fall term. Notification of the admission decisions are made on a rolling basis between May 1 and June 1. The criteria used in evaluating transfer applications are similar to those applied to applicants for the first-year class, except that special emphasis is given to performance at the college level. Because of the highly competitive nature of transfer admission, it is recommended that applicants have a minimum 3.20 (4.00 scale) grade point average on all college work. The SAT must be taken by December 2019 or the ACT must be taken by February 2010.

Applicants whose first language is not English are required to demonstrate English proficiency, which can be achieved in one of two ways. Those who have received two years of full-time instruction in English at a high school or college are not required to submit English proficiency testing. Applicants who have not received two years of full-time instruction in English must submit official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). The minimum acceptable score on the TOEFL internet-based test is 100 or a 75 on the Paper-delivered test. The minimum acceptable score on the IELTS is a seven.

Students for whom the $75 application fee creates a hardship may apply for a waiver. Transfer applicants must send a copy of the Student Aid Report that they receive after completing the Free Application for Federal Student Aid (FAFSA) along with a request for a fee waiver to the Office of Admission. Financial stress created by application fees to other institutions is not considered a valid reason to grant a fee waiver. U.S. citizens, permanent residents, DACA students, and undocumented students who have lived in the United States for an extended period of time are eligible for an application fee waiver.

Transfer students must be registered in residence at Rice for at least four full semesters during the fall or spring terms and must complete no fewer than 60 semester hours before earning a Rice degree.
**Advanced Placement/International Baccalaureate/International Certificate Programs**

**Advanced Placement**—Students who score a four or five on the applicable Advanced Placement College Board examinations taken before matriculation at Rice may receive university credit for the corresponding Rice course(s). For more information, see AP Credit (https://registrar.rice.edu/students/ap_credit/).

**International Baccalaureate**—Students who complete the International Baccalaureate diploma and receive a score of six or seven on a higher-level IB exam may receive course credit for the corresponding Rice course(s). For more information, see IB Credit (https://registrar.rice.edu/students/ib_credit/).

**International Certificate Programs**—Students who have completed various international certificate programs may receive course credit for corresponding Rice courses; however, each student’s documentation will be reviewed individually and on a case-by-case basis. The General Certificate of Education A-Level (United Kingdom), the Abitur (Germany), and the Baccalaureate (France) are eligible for review. For more information, see International Exam Credit (https://registrar.rice.edu/students/international_exam/).

---

**Academic and Judicial Discipline**

**Academic Probation**

Students are placed on academic probation at the end of any semester if:

- Their grade point average for that semester is less than 1.67, or
- Their cumulative grade point average is less than 1.67 (this requirement is waived if the grade point average for that semester is at least 2.00)

The period of probation extends to the end of the next semester in which the student is enrolled. Students on academic probation may not be candidates for, or hold, any elected or appointed office, nor are they allowed to enroll in more than 17 semester hours.

**Academic Suspension**

Students are suspended from the university at the end of any semester if they:

- Earn grades that will place them on academic probation a third time, or
- Have a grade point average for the semester that is less than 1.00 (exceptions are made for students completing their first semester at Rice).

Students readmitted after a previous suspension will again be suspended if in any succeeding semester they fail to achieve at least one of the following requirements:

- a cumulative and semester grade point average of at least 1.67, or
- a semester grade point average of at least 2.00.

The first suspension period is normally one semester; the second suspension period is at least two semesters. Students may only return for a fall or spring semester following suspension, not for summer school. Students are not readmitted after a third suspension.

Participation in student activities on and off campus and use of Rice facilities, including, but not limited to, the student center, the colleges, the playing fields, the recreation center, and the computer labs, are limited to enrolled students.

Students placed on academic suspension are notified by the Office of the Registrar after all final grades have been received and posted to their record. Suspension is lifted the first day of class of the semester when the student returns to the university. When students serve the nominal term of suspension but do not intend to return to Rice, suspension is lifted after permission from the Committee on Examinations and Standing is granted.

Students facing a first or second academic suspension who verify with the Office of the Registrar, academic advising, and their department that successful completion of their proposed academic plan would satisfy their degree requirements in one semester if allowed to return, may petition the dean of undergraduates for immediate readmission. This is known as the "senior exception rule", and students may be granted this exception only once. If granted, both the immediate readmission and the exception will be noted on the student's academic transcript.

Senior exception students that do not complete their degree requirements in the one semester for which they were readmitted, but finish with a GPA which allows for good academic standing may be allowed to continue with their studies at Rice, but only by petitioning and receiving approval from the dean of undergraduates.

Senior exception students should note that if they do not complete their degree requirements in the one semester for which they were readmitted, and finish with a GPA resulting in an academic suspension, that second or third suspension will be applied to their academic record.

Students who fulfill all of their degree requirements at the end of a semester under academic circumstances that would normally place them on probation or suspension will not have the terms “academic probation” or “academic suspension” placed on their transcript for that semester, but will instead have the notation of “Good Standing with Exception” and be permitted to graduate.

**Readmission After Academic Suspension**

Students seeking readmission after academic suspension should address a letter of petition to the Committee on Examinations and Standing, in care of the Office of the Dean of Undergraduates, which must be received by June 1 for readmission in the fall semester and November 1 for readmission in the spring semester. The petition should demonstrate what the student did while they were separated from Rice and how they have prepared themselves to function successfully as a student at Rice. The petition must include two supporting letters from persons for whom the student has worked during the suspension period as a student or an employee, as well as an academic plan. Academic plans must be reviewed and approved by the Office of Academic Advising by June 1 for readmission in the fall semester and November 1 for readmission in the spring semester. To allow time for review and revision of the academic plan, students must submit their first draft academic plan at least three weeks in advance of the deadline. Guidelines for completing an academic plan can be found at https://oaa.rice.edu/.

If the problems causing the previous difficulty appear to be resolved, the student generally is readmitted. Students returning from academic suspension must maintain regular contact with the Office of Academic Advising or a designated faculty advisor throughout the semester. In the first semester upon return from an academic suspension, students may...
not become candidates for, or hold, any elected or appointed office, nor are they allowed to enroll in more than 17 semester hours.

In some instances, the committee may postpone approval of readmission or rule that suspension is permanent. Although it may do so at its discretion, the Office of the Registrar does not normally place on probation or suspension students who perform poorly in the Rice Summer Sessions. Students should be aware, however, that Rice Summer Sessions grades are included in their grade point averages.

**Disciplinary Probation, Suspension, and Expulsion**

The Code of Student Conduct (p. 46) applies to all Rice students and encompasses conduct both on and off campus. The Office of Student Judicial Programs may sanction students including implementing disciplinary probation, suspension, or expulsion for violations of the Code of Student Conduct or the Honor Code. Students who have been expelled, who are serving a suspension, who are under investigation for disciplinary violations, or who have pending Code of Conduct or Honor Code proceedings against them may not receive their degree, even if they have met all academic requirements for graduation. Students who are suspended or expelled must leave the university within the time frame specified by Student Judicial Programs, generally 48 hours from being informed of the decision, though in cases of unusual hardship, Student Judicial Programs may extend the deadline. Any tuition refund will be calculated from the official date of suspension or expulsion based on the refund schedule noted in the Academic Calendar (https://registrar.rice.edu/calendars/) published by the Office of the Registrar. A grade of ‘W’ will be awarded to all enrolled courses regardless of when the suspension or expulsion began. Expelled students will have the expulsion noted on their transcript.

While on disciplinary probation or suspension, students may not run for, or hold, any elective or appointed office in any official Rice organization. Participation in student activities on and off campus and use of Rice facilities, including, but not limited to the student center, the colleges, the playing fields, the recreation center, and the computer labs, are reserved for enrolled students.

Students seeking readmission after a suspension for Honor Code or Code of Conduct violations or other nonacademic action should submit a petition in writing to the Office of Student Judicial Programs by emailing SJP@rice.edu. That petition should include information on what the student did while away from Rice, including any schooling or employment; how the student met any requirements described by Rice at the time of separation; what the student did to address any issues leading to the separation; and what the student learned from the separation. Once approved by Student Judicial Programs, the petition is forwarded to the dean of undergraduates for final readmission approval and action.

**Degree Revocation**

The University reserves the right to revoke any degrees granted. A degree awarded may be revoked if the University becomes aware that the degree should not have been granted, such as a degree that was obtained by violating the Honor Code or Code of Student Conduct or by deception, misrepresentation, falsification of records, academic misconduct, research misconduct, or if the work submitted in fulfillment of — and indispensable to — the requirements for such degree are determined to fail to meet the academic standards that were in effect at the time the degree was awarded. Notification of the date of revocation will appear on the student’s transcript, and the student will be asked to return the diploma. The Provost receives all recommendations for revocation of degrees and, after consideration and review, forwards to the President any recommendations deemed to be warranted. The Provost may also initiate and forward to the President his or her own recommendation for a degree revocation. The President will consider all such recommendations forwarded by the Provost and effectuate those he or she determines to be warranted. Procedures governing degree revocations may be obtained from the offices of the Registrar, Provost, or President.

The University also reserves the right to withdraw a degree to correct an administrative error, such as an incorrectly listed degree, or in a situation where it was found that a student had not actually fulfilled all graduation requirements.

**Attendance and Excused Absences**

Students are expected to attend all scheduled activities for all of the classes for which they are registered during the entire course of the academic semester for which they are enrolled. The Academic Calendar (https://registrar.rice.edu/calendars/) indicates normal class days, recesses, and holidays. Instructors, however, may schedule required activities on other days, including recesses, holidays, and weekends, if required by programmatic needs, such as laboratories or field trips. Such requirements must be clearly stated in the online course description available at registration and on the syllabus, and instructors should try to provide compensatory time off for students.

The university understands that students participating in university-sponsored events, including athletics competitions, will miss some class sessions during the semester. Students will inform their instructors in a timely manner and in advance of absences resulting from participation in such events. In these cases, faculty will give students a reasonable accommodation to make up for the work missed.

No nonacademic university-sponsored event at which student attendance is required may be scheduled or rescheduled for any date after the day following the last day of classes. Exceptions may be granted by a quorum of the Committee on Examinations and Standing only for events where scheduling is not under the control of the university. On the class days falling during the last calendar week of classes, an individual student may participate in only one university-sponsored event, which may be scheduled or rescheduled, so long as no more than one night would be spent outside of Houston for travel. For events during the last week of classes, the reading period, and the final examination period, a quorum of the Committee on Examinations and Standing must be satisfied that each student is in satisfactory academic standing to participate in an event. If a quorum of the Committee on Examinations and Standing cannot meet in a timely fashion, then the executive committee of the Faculty Senate will handle exception requests.

Absences for activities other than university-sponsored events may be negotiated on an informal basis between the student and the faculty member. Alternatively, absences may be formally excused on a case-by-case basis if a petition explaining the nature of the event, accompanied by suitable documentation, is submitted to the Committee on Examinations and Standing at least two weeks before the event.
Resolving Conflicting Course Obligations
Scheduled Outside of Assigned Class Time

Many courses require presentations that cannot reasonably be accommodated within the scheduled class period. Problems occur when faculty schedule these presentations during times that conflict with other regularly scheduled classes.

Principles
• Generally, faculty should plan their course activities to avoid conflicts with other regularly scheduled classes.
• Generally, all deadlines and schedules will be included in the syllabus or announced, in writing, early in the semester.
• It is the responsibility of faculty members to make appropriate accommodations and adjustments when required class exercises are scheduled outside of assigned class time.
• A student must not be penalized either directly or indirectly.

Resolution of Scheduling Conflicts
• Class presentations outside of the scheduled class time should be held on evenings and weekends.
• Registrar-assigned class times take priority over activities of other classes.
• When two or more classes require activities outside of class time, the order of priority is determined by the date at which the exercise was announced in writing and scheduled.
• When two or more classes require activities outside of class time, activities which require external reviewers or coordination of multiple schedules have priority over individual exercises that can be rescheduled.
• Required exercises outside of assigned class times that are announced at the last minute do not take priority over those announced earlier, even if they require coordination of multiple schedules.

Roles and Responsibilities
• Ideally, faculty will cooperate with one another when they need to resolve scheduling conflicts.
• If faculty involved are unable to find a solution that does not penalize or unduly disadvantage the student, department chairs will resolve the scheduling conflict.
• If department chairs are unable to resolve the scheduling conflict, the matter will be referred to the dean of undergraduates or the dean of graduate and postdoctoral studies, or their designees, who will have final authority for resolution.

Final Examinations
The decision to give a final exam as a required part of the course rests with the instructor. All tests and examinations are conducted under the honor system. No examinations or other course assignments may be due between the last day of classes and the first day of the final examination period.

Examinations are considered final examinations when they:
• Cover more than the material learned since the last exam, or
• Are the only exam in the course, or
• Require comprehensive knowledge of the entire course.

Such exams may be given only during the final examination period.

All undergraduate-level courses are assigned a final examination time by the Office of the Registrar. Upon request, graduate-level courses may be scheduled for a final examination time. Instructors may choose to use that officially assigned time for a scheduled final examination, may choose to give a take-home exam, or may choose to give no exam at all.

If they choose to give a scheduled final examination, the Office of the Registrar will assign a room, and the final exam will be administered in that room at the designated time. Some instructors assign end-of-term projects or papers rather than final examinations. With regard to due dates, final papers or projects will be treated the same as take-home exams.

Take-home exams should be made available to students as soon as possible after the semester’s last day of classes, and no later than the end of the next business day after classes have ended. Take-home exams may be no longer than five hours in length. The due date of take-home exams may be no earlier than the end of the examination time assigned to that class by the Office of the Registrar. Instructors may specify due dates later than this time, but not later than the end of the last day of the examination period.

As noted in the Faculty Grading Guidelines (p. 90), no student should be given an extension of time or opportunity to improve a grade that is not available to all members of the class, except for verified illness or justified absence from campus. However, students cannot be required to take more than two scheduled exams in two consecutive calendar days. Students also cannot be required to complete more than two take-home and/or scheduled final exams on the same calendar day (unless this is the last day of the examination period). In both instances, if the student wishes to make alternative arrangements and is unable to work out such arrangements with the instructor(s) involved, the instructor of the third and any subsequent exams will be required to allow the student to reschedule that exam.

Grades
See also Faculty Grading Guidelines (p. 90) and Syllabus Standards (p. 91).

Pass/Fail Option
Undergraduates may register for courses on a Pass/Fail basis. Students:
• May not take more than one course as a Pass/Fail per semester for each full year of residence (students studying in off-campus programs through Rice are considered to be in residence for the purpose of this rule).
• May not take more than four courses as Pass/Fail.
• May not take more than a total of 14 semester hours total as Pass/Fail.
• May register for only one course as Pass/Fail in a semester.
• May not take as Pass/Fail a repeatable course previously taken and designated as Pass/Fail.
• May not take as Pass/Fail those courses used to meet the requirements for their major, minor, or certificate.*
• Must designate courses to the Pass/Fail grade mode online, via ESTHER, no later than the posted deadline, usually the end of the 10th week of semester.
• May not take First-Year Writing-Intensive Seminar (FWIS) courses as Pass/Fail.

Students may convert a pass/fail course to a graded course by submitting the proper online conversion form, via ESTHER, and must adhere to the pass/fail deadlines as stated in the Academic Calendar (https://registrar.rice.edu/calendars/). Students wishing to designate a course as pass/fail during the summer sessions should see Registration During Summer Sessions (p. 31).

Students should be aware that while a grade of P does not affect their grade point average, a grade of F is counted as a failure and is included in their GPA. Students who take a course during the Rice summer session as pass/fail also should be aware that this counts toward their allowable total of four courses. For more information, see The Pass/Fail Option. (https://registrar.rice.edu/students/reg_pass_fail/)

*Please Note: If students have completed Pass/Fail courses that are needed to meet the requirements for their major, minor or certificate, they should request in writing to the Office of the Registrar that the P grade be replaced with the letter grade earned. Otherwise, the Office of the Registrar will uncover the P grade during the final degree audit process (which begins with day one of the student’s final semester). Once the P is uncovered, it will not be restored; therefore, students should review their Degree Works degree audits carefully to ensure that the courses are applied in their degree audit as expected.

**Satisfactory/Unsatisfactory**

Satisfactory/unsatisfactory courses are those that do not use traditional grading procedures and instead assign a grade of S or U rather than a letter grade. Such courses or labs are designated by the instructor and are, in most cases, graduate level courses. With S/U courses, instructors report the S if the student successfully completes the course, or the U if they have not. Students should be aware that while a grade of S or U does not affect their grade point average, no credit will be awarded if a grade of U is received. Courses with a grade of S will count towards total credits earned.

**Audit**

Students have the option of auditing courses. For auditing students, instructors report either the AUD or the NC grade symbol, the AUD if the student met the audit requirements of the class, or the NC if they have not. There are no credit hours associated with audited courses, and auditing a course does not affect a student’s GPA. Request to audit a course as pass/fail during the summer sessions should see Registration During Summer Sessions (p. 31).

There are no credit hours associated with an AUD grade designation. (See Audit above.)

**INC (“Incomplete”)**

Instructors report this designation to the Office of the Registrar when a student fails to complete a course because of verified illness or other circumstances beyond the student's control that occur during the semester. Students must provide independent corroboration of their illness or circumstances, and they are expected to coordinate with the instructor prior to final grades being submitted. For an INC received in the fall semester, students must complete the work by the end of the first week of the spring semester or an earlier date as defined by the instructor, and instructors must submit a revised grade by the end of the second week. For an INC received in the spring or summer semester, students must complete the work before the start of the fall semester or an earlier date as defined by the instructor, and instructors must submit a revised grade by the end of the first week. If a grade is not submitted by the appropriate deadline, the INC will be automatically converted to a failing grade.

Students with an INC must be certain that tests, papers, and other materials affecting their grade or essential to completing a course requirement are delivered by hand to the appropriate professor or office according to the timeline previously stated, for the instructor to grade the documents and submit the final grade to the Office of the Registrar by the deadline. Loss or lateness because of mail service is not an acceptable excuse for failing to meet academic deadlines. Students also should be aware that they may be placed on probation or suspension when the INC is changed to a grade, either by an instructor or by default.

**NC (“No Credit”)**

This designation signals that no credit was granted for the course. It is used in situations where a person auditing a course has not met the audit requirements of the course as defined by the instructor. (See Audit above.)

**NG (“No Grade”)**

This designation signals that no credit was granted for the course. As a non-punitive grade, the NG is applied administratively and used in rare situations.

**OT (“Other”)**

Instructors report this designation to the Office of the Registrar when a student fails to appear for the final examination after completing all the other required work for the course. An OT received during a fall semester must be resolved and instructors must submit a revised grade by the end of the first week of the spring semester. An OT received during a spring semester must be resolved and instructors must submit a revised grade by the end of the fourth week after Commencement. An OT received during a summer semester must be resolved and instructors must submit a revised grade by the end of the first week of the fall semester. If a grade

**Grade Symbols**

Instructors are required to report a grade for all students whose names appear on the class roster. They grade their students using the following conventional symbols: A+, A, A−, B+, B, B−, C+, C, C−, D+, D, D−, F.

**Grade Designations**

Under certain circumstances, special designations accompany the student’s grade. These designations do not affect the grade point average. The special designations include the following:

**AUD (“Audit”)**

This designation is only used for students auditing the course, and specifically where the auditing student has met the audit requirements of the course as defined by the instructor. A grade designation of ‘NC’ (No Credit) is given to students who do not meet the audit requirements. There are no credit hours associated with an AUD grade designation. (See Audit above.)

**INC (“Incomplete”)**

Instructors report this designation to the Office of the Registrar when a student fails to complete a course because of verified illness or other circumstances beyond the student’s control that occur during the semester. Students must provide independent corroboration of their illness or circumstances, and they are expected to coordinate with the instructor prior to final grades being submitted. For an INC received in the fall semester, students must complete the work by the end of the first week of the spring semester or an earlier date as defined by the instructor, and instructors must submit a revised grade by the end of the second week. For an INC received in the spring or summer semester, students must complete the work before the start of the fall semester or an earlier date as defined by the instructor, and instructors must submit a revised grade by the end of the first week. If a grade is not submitted by the appropriate deadline, the INC will be automatically converted to a failing grade.

Students with an INC must be certain that tests, papers, and other materials affecting their grade or essential to completing a course requirement are delivered by hand to the appropriate professor or office according to the timeline previously stated, for the instructor to grade the documents and submit the final grade to the Office of the Registrar by the deadline. Loss or lateness because of mail service is not an acceptable excuse for failing to meet academic deadlines. Students also should be aware that they may be placed on probation or suspension when the INC is changed to a grade, either by an instructor or by default.

**NC (“No Credit”)**

This designation signals that no credit was granted for the course. It is used in situations where a person auditing a course has not met the audit requirements of the course as defined by the instructor. (See Audit above.)

**NG (“No Grade”)**

This designation signals that no credit was granted for the course. As a non-punitive grade, the NG is applied administratively and used in rare situations.

**OT (“Other”)**

Instructors report this designation to the Office of the Registrar when a student fails to appear for the final examination after completing all the other required work for the course. An OT received during a fall semester must be resolved and instructors must submit a revised grade by the end of the first week of the spring semester. An OT received during a spring semester must be resolved and instructors must submit a revised grade by the end of the fourth week after Commencement. An OT received during a summer semester must be resolved and instructors must submit a revised grade by the end of the first week of the fall semester. If a grade
is not submitted by the appropriate deadline, the OT will be automatically converted to a failing grade. Students should be aware that they may be placed on probation or suspension when the OT is changed to a grade, either by an instructor or by default.

SA (“Study Away”)  
This designation is used for students that participate in a course of study hosted at another institution, such as a Rice-sanctioned Study Abroad program, or an approved Inter-Institutional agreement. The grade of SA is awarded for the Rice placeholder course, carries no grade points and there are no credit hours earned for a course which receives a grade of SA. There is corresponding transfer credit that is articulated once an official transcript is received from the host school.

W (“Official Withdrawal from University”)  
Students who officially withdraw from the university after the designated drop deadline, the seventh week of classes, will receive a final grade of “W” for each course in which they were enrolled at the time of withdrawal. Students who officially withdraw from the university by the drop deadline will not receive the grade of “W” for any courses in which they were enrolled for that semester. These courses will not be included on the official transcript.

W (“Late Drop with Approval”)  
A student who receives approval from the Committee on Examinations and Standing to drop a course after the designated drop deadline will receive a grade of “W” for that course. When requests for late drops are denied by the committee, the Office of the Registrar records the submitted grade.

If a student drops a class before the designated drop deadline for the semester, the course will not be included on his/her official transcript. New matriculants in their first semester at Rice may drop a class up until the last day of classes, and through the end of week ten in their second semester, if that is a full-term Spring semester, and the course will not be included on the student’s official transcript.

Grade Points  
To compute grade point average, letter grades are assigned numeric values as follows:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Numeric Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00 ¹</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.67</td>
</tr>
<tr>
<td>B+</td>
<td>3.33</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.67</td>
</tr>
<tr>
<td>C+</td>
<td>2.33</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.67</td>
</tr>
<tr>
<td>D+</td>
<td>1.33</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
</tr>
<tr>
<td>D-</td>
<td>0.67</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
</tr>
</tbody>
</table>

¹ Effective Academic Year 2018-2019, the A+ grade is now worth 4.00, not 4.33, in calculating the GPA.

Grade Point Average Calculation  
For each course carrying standard letter grades, the credit hours attempted and the points for the grade earned are multiplied. The grade points for each course are added together, and the sum is divided by the total credit hours attempted. Grade point averages are noted each semester on the student’s official transcripts. Courses taken on a S/U or pass/fail basis are excluded from the grade point average calculation.

Graduation Requirements  
The General Announcements (GA) is the official Rice curriculum. In the event that there is a discrepancy between the GA and any other websites or publications, the GA shall prevail as the authoritative source.

Degree Requirements for All Bachelor's Degrees  
Students are responsible for making certain that their plan of study meets all degree and major (and minor and/or certificate) requirements. To graduate from Rice University, all students must:

- Be registered at Rice University full-time for at least four full fall and/or spring semesters*.
- Complete the requirements of at least one major and degree program.
- Complete at least 120 semester credit hours (some degree programs require more than a minimum 120 credit hours).
- Complete at least 60 semester credit hours at Rice University.
- Complete at least 48 semester credit hours in upper-level coursework (courses at the 300-level or above).
- Complete more than half of the upper-level coursework (at least 25 of the 48 minimum semester credit hours) at Rice University.
- Complete more than half of the upper-level coursework required by the declared major(s) at Rice University (as designated by the department or program, some may specify a higher proportion).
- Complete at least 60 semester credit hours outside of major requirements for Bachelor of Arts and Bachelor of Science degrees. Exceptions include:
  - Students pursuing the BA degree with a major in architecture must complete at least 45 credit hours outside of major requirements.
  - Students pursuing the BMus (Bachelor of Music) degree, or a BS degree in engineering are not subject to this ‘outside of major’ requirement.
- Complete all Rice coursework with a cumulative grade point average of at least 1.67 or higher.
- Complete all Rice coursework that satisfy major, minor and/or certificate requirements (as designated by the department or program):
  - with a cumulative grade point average of at least 2.00 or higher.
  - with the standard letter grade earned (not on a Pass/Fail basis)**.
- Satisfy the Writing and Communication Requirement (see below).
- Complete courses to satisfy the Distribution Requirements (see below).
- Complete one Lifetime Physical Activity Program (LPAP) course for one credit hour. Students with disabilities may make special arrangements to satisfy this requirement.
Writing and Communication Requirement

All students must complete and pass a First-Year Writing-Intensive Seminar (FWIS). An FWIS is a content-based, 3-credit hour seminar open only to first-year students that can focus on any topic, and in which writing and communication pedagogy plays a significant role in assignments and grading. To facilitate success in meeting this requirement, all students must take the Composition Examination prior to matriculating. Students who fail the Composition Exam, or fail to take it, must successfully complete the FWIS 100 Fundamentals of Academic Communication course during their first semester, and prior to enrolling in the FWIS course used to meet the graduation requirement. FWIS 100 cannot be used to meet the Writing and Communication (FWIS) graduation requirement.

All first-year students must enroll in and successfully complete an FWIS during their first year at Rice, and all first-year students will be notified prior to Orientation Week if they have been assigned to take an FWIS during the fall or spring of their first year. The following transfer credit restrictions exist for FWIS courses, and this Writing and Communication Requirement:

- Students who matriculate as freshmen may not substitute pre-matriculation transfer credit for the FWIS.
- Transfer students who wish to satisfy the FWIS requirement with courses from another institution must apply for this credit in their first semester at Rice. The course taken at another institution will only be considered for transfer as an equivalent FWIS course i.) with the approval of the Program Director, and ii.) provided that the course transfers in as at least 2.5 semester credit hours.
- Neither freshmen nor transfer students may satisfy the FWIS requirement by taking an equivalent course at another institution after matriculating at Rice.

PLEASE NOTE:

- LPAP courses: No more than 4 hours of credit for LPAP courses may be counted toward graduation.
- COLL courses: No more than 3 hours of credit for student-taught College Courses (COLL) may be counted toward graduation. (This includes all courses COLL 100 - COLL 199 as well as the COLL 200 Teaching Practicum.)
- *Full-time registration: Participation in a full semester Rice-approved Study Abroad program may count towards the fulfillment of this requirement (where full-time enrollment is at least 12 semester credit hours in that fall or spring semester).
- **Pass/Fail courses: If students have completed Pass/Fail courses that are needed to meet the requirements for their major, minor, or certificate, they should request in writing to the Office of the Registrar that the P grade be replaced with the letter grade earned. Otherwise, the Office of the Registrar will uncover the P grade during the final degree audit process (which begins with day one of the student’s final semester). Once the P is uncovered, it will not be restored; therefore, students should review their Degree Works degree audits carefully to ensure that the courses are applied in their degree audit as expected.

In order to earn a second degree, students must fulfill the requirements outlined in the Dual-Degree Requirements section below.

Distribution Requirements (Groups I / II / III)

Distribution courses introduce the knowledge, intellectual skills and habits of thought characteristic of disciplines or of inquiry across disciplines within three main areas: humanities, social sciences, and natural sciences and engineering. They are broad-based, accessible to non-majors, and provide a foundation that enables students to integrate knowledge from multiple perspectives. No single course is expected to fulfill all the criteria or goals of a distribution group. Courses that presume students’ special expertise or that teach techniques or career-based skills without exposure to modes of analysis and scholarship in the relevant discipline are not eligible for distribution credit. Research or independent study courses and internships and practica are also excluded.

Group I

These courses, which are broad in theme and scope, prompt students to probe the modes of knowledge, inquiry or creative practice characteristic of the arts and humanities. Group I courses provide students with essential knowledge and tools for thinking critically about history and culture, and for understanding the centrality of such capacity to informed participation in social, political, and professional life.

Group II

These courses introduce the theories, problems, methodologies, and substance of the social sciences. They are intended to familiarize students with different approaches to the study of human behavior and how individuals interact with and are shaped by cultural, social, economic, and political groups and institutions. Because of the complexity and scope of human behavior, these courses may be multi-disciplinary in nature. Group II courses provide a foundation for thinking about the social worlds we inhabit and the diverse behavioral factors that both structure human activity at multiple scales and contribute to the dynamism of social and cultural systems.

Group III

These courses are designed to give students a basic knowledge of the capabilities and limitations of scientific inquiry and technological development, and to develop their skills in analytical thinking and quantitative reasoning. They provide grounding in the scientific method, engineering design, theorem development, or quantitative analysis. They provide students with the essential knowledge and tools required to appreciate, understand, and critically assess the elegance and power of the natural world and our effect upon it. Some understanding of basic scientific concepts and how the scientific process produces new knowledge is essential for informed participation in contemporary society. In an increasingly data-driven world, an
understanding of how numerical and categorical information can be manipulated and interpreted is also vital. The goal of Group III courses is to promote an understanding of the value and impact of scientific thinking and engineering design, and to foster a critical appreciation of experimentation, quantitative applications, and scientific research.

### Academic Planning for Distribution Requirements

Each student is required to complete at least 3 courses of designated distribution courses of at least 3 credit hours each in each of Distribution Groups I, II, and III. The 3 courses in each group must include courses in at least two departments in that group. Divisional or interdisciplinary designations, e.g., HUMA or NSCI, count as departments. For the purpose of this rule, a course taken at another institution and transferred to Rice as an equivalent distribution course will be counted as one of these courses, provided that the course earns at least 2.5 semester credit hours.

Students must complete the distribution requirements in each group by taking courses that are designated as a distribution course at the time of course registration, as published in that semester’s Course Offerings (https://courses.rice.edu). Courses taken outside of Rice and transferred in can be used to satisfy distribution requirements, assuming they are on the list of approved and designated distribution courses at the time they were taken. Completed courses taken prior to matriculation are subject to the list of designated distribution courses at the time of matriculation.

### Applicable Academic Graduation Requirements

Students enrolled in bachelor’s programs may choose to follow the graduation general and program requirements in effect for any academic year between their matriculation or graduation. This is known as the GA Year, or Catalog Year in the university’s degree audit system, Degree Works.

If the student graduates more than seven years after their matriculation, they must graduate under the regulations in effect at the time of their last readmission, or those in effect for any academic year between their readmission and graduation. Departments and programs may review coursework completed more than seven years before the student’s anticipated graduation. However, if they determine that a course no longer satisfies the requirements of that major, minor, or certificate, then it is not credited toward the program’s requirements, although it remains on the student’s record.

Academic credential (degree program, major, minor, or certificate) requirements may vary from year to year during the period between a student’s matriculation and graduation. The department or program may, at its discretion, make any of these variations available to a student for completion of the program requirements. When declaring the degree and major, minor, or certificate, students and advisors should identify and clearly document the catalog year and the requirements to be followed. Each should retain a copy of the documented requirements. If a new degree program, major, minor, or certificate is created during the student’s time at Rice, the new program will be available to the student as of the year the program appears in the General Announcements.

### Application for Degree and Degree Conferral

Students are responsible for making certain that their plan of study meets all degree and major (and minor and/or certificate) requirements. To graduate from Rice University, all students must submit an Application for Degree Form available in ESTHER. This form is required for all students who plan to complete their degree requirements at the end of a fall, spring, or summer semester. A late fee will be assessed for applying after the deadline (please consult the semester-specific Academic Calendar (https://registrar.rice.edu/calendars/) for deadlines).

Upon completion of degree requirements, degrees are approved by the faculty and conferred in December, May, and August. Fall and Spring degree recipients may then participate in the annual commencement ceremony, celebrated each year after the conclusion of the spring semester. Under specific, limited circumstances, an undergraduate student may participate in commencement without being a degree recipient, provided that the student would be joining his or her matriculating class in that commencement. The specific policy, rules and procedures are available on the Office of the Dean of Undergraduates’ website. Summer degree recipients have the option of participating in the following year’s annual commencement ceremony.

### Dual-Degree Requirements

To earn a second four-year bachelor’s degree, also known as a dual degree, currently enrolled undergraduates who have not yet completed their first bachelor’s degree must:

- Be accepted for the second major by the major’s department or program
- Fulfill all requirements for the second degree
- Complete at least 30 additional semester hours at Rice University, beyond the hours required for their first degree (these hours are applied to the second degree)

Students seeking a second degree should submit an additional declaration of major form with the Office of the Registrar (https://registrar.rice.edu/students/majors_minors/). This paperwork should include the addition of the proposed degree and major programs along with the approval of the chair or undergraduate advisor of each department involved, indicating that the proposed course program satisfies all major and degree requirements.

Students with a previously earned bachelor’s degree from Rice who wish to earn a second bachelor’s should look at the Second Bachelor’s Degree for Rice Alumni (p. 86) page.

### Leaves, Withdrawals and Readmission

All students taking a leave or withdrawal from Rice should submit their written request on an Undergraduate Separation Request Form (https://dou.rice.edu/student-resources/petitions-special-requests/undergraduate-separation-request/). Student separations are effective when acknowledged by the university. Approval of a withdrawal and leave of absence is always contingent on the student’s satisfactory completion of course work in the semester preceding the leave. Students performing poorly may have their approved leave converted to an academic suspension.
After a separation of more than four semesters, students seeking to return to Rice must submit a written petition to the dean of undergraduates who has discretion to submit it to the Committee on Examinations and Standing. The petition should be received no later than June 1 for the fall semester and November 1 for the spring semester. The petition should include an academic plan approved by the Office of Academic Advising and two letters of support. Academic plans must be reviewed and approved by the Office of Academic Advising by June 1 for readmission in the fall semester and November 1 for readmission in the spring semester. To allow time for review and revision of the academic plan, students must submit their first draft academic plan by October 7 in the fall semester and by May 7 in the spring semester. Guidelines for completing an academic plan can be found on the Academic Advising website (https://oaa.rice.edu/academic-planning/).

**Coordination of Separations and Returns**

Rice is committed to students’ long-term success and to seeing them thrive during their college experience. Part of that commitment means that Rice supports students if they decide to leave the university for a period of time. Professionals in these areas also work with students to plan a roadmap back to Rice.

The Office of the Dean of Undergraduates oversees readmission processes. Each request for readmission will be reviewed individually. The dean of undergraduates or his/her designee will make readmission decisions. Students are encouraged to contact the Office of the Dean of Undergraduates with questions about separations and re-enrollment at the university.

Students are expected to follow the process outlined in their letter from the dean of undergraduates and any other communications from Rice regarding expectations for separation and readmission. Additionally, sometimes students are separated from Rice through more than one process and are required to submit readmission requests to multiple university departments. In certain cases, readmission may be accompanied by additional requirements to support the success and wellbeing of the student.

**Leave of Absence**

Students may request a leave of absence from the university by submitting their written request on an Undergraduate Separation Request Form (https://dou.rice.edu/student-resources/petitions-special-requests/undergraduate-separation-request/) at any time before the first day of classes in the semester for which they are requesting a leave. A leave of absence taken after the first day of classes is considered a voluntary withdrawal.

To gain readmission following an approved leave of absence of not more than four semesters, students must notify the Office of the Dean of Undergraduates no later than June 1 for the fall semester and November 1 for the spring semester. We strongly recommend that the student consult with the Office of Academic Advising about their academic plan.

**Voluntary Withdrawal and Readmission**

Students may withdraw voluntarily from the university at any time during the semester up until the last day of classes. Students wishing to withdraw should inform their college magister and submit their written request on an Undergraduate Separation Request Form (https://dou.rice.edu/student-resources/petitions-special-requests/undergraduate-separation-request/). The Office of the Dean of Undergraduates may notify other offices of the university as necessary. Students who fail to give notice of withdrawal should expect to receive grades reflective of any missed academic work.

If students are in good academic standing at the time of their withdrawal, they may be considered for readmission after submitting a written petition to the Office of the Dean of Undergraduates. The petition, received no later than June 1 for the fall semester, and November 1 for the spring semester, should include an academic plan approved by the Office of Academic Advising and two letters of support. Academic plans must be reviewed and approved by the Office of Academic Advising by June 1 for readmission in the fall semester and November 1 for readmission in the spring semester. To allow time for review and revision of the academic plan, students must submit their first draft academic plan by October 7 in the fall semester and by May 7 in the spring semester. Guidelines for completing an academic plan can be found on the Academic Advising website (https://oaa.rice.edu/academic-planning/).

If students withdraw within five weeks of the last day of classes, they must submit the written application on an Undergraduate Separation Request Form (https://dou.rice.edu/student-resources/petitions-special-requests/undergraduate-separation-request/) to the dean of undergraduates who has discretion to submit it to the Committee on Examinations and Standing. If students withdraw within five weeks of the last day of classes, the Committee on Examinations and Standing takes into account their grades (which reflects their performance up to the day of withdrawal) when ruling on their readmission. For purposes of readmission, students whose grades would have led to suspension had they not withdrawn are treated as if they had been suspended.

If students voluntarily withdraw for medical or psychological/psychiatric reasons, students are encouraged to contact the Student Wellbeing Office (https://wellbeing.rice.edu/home/) about the readmission process.

**Medical Withdrawal**

Students may request a medical withdrawal from the university by submitting their written request on an Undergraduate Separation Request Form (https://dou.rice.edu/student-resources/petitions-special-requests/undergraduate-separation-request/) at any time during the semester, up until the last day of classes. Students considering taking time off for personal reasons related to their wellbeing and mental health are also encouraged to contact the Student Wellbeing Office (https://wellbeing.rice.edu/home/) about the roadmap back to Rice. The Student Wellbeing Office is part of the Dean of Undergraduates Division and serves as a liaison to the medical readmission process during the separation process and when students are ready to return.
Following a medical withdrawal, students should submit a written petition for readmission to the Office of the Dean of Undergraduates no later than June 1 for the fall semester and November 1 for the spring semester. This petition must include documentation of treatment provided. Students also may be required to schedule an interview with the director of the Rice Counseling Center (https://wellbeing.rice.edu/wellbeing-center/) or Student Health Services (http://health.rice.edu/) or their designees. Academic plans must be reviewed and approved by the Office of Academic Advising by June 1 for readmission in the fall semester and November 1 for readmission in the spring semester. To allow time for review and revision of the academic plan, students must submit their first draft academic plan by October 7 in the fall semester and by May 7 in the spring semester. Guidelines for completing an academic plan can be found at the Office of Academic Advising (https://oaa.rice.edu/academic-planning/).

Students who withdraw for psychological reasons within the last five weeks of a semester are strongly encouraged to focus on their wellbeing needs and will not be eligible to apply for immediate readmission. Therefore, petitions for readmission will be considered in the following readmission request cycle and must be received no later than the applicable June 1 or November 1 deadline.

Involuntary Withdrawal

The university may insist on a student’s involuntary withdrawal if, in the judgment of the dean of undergraduates or his/her designee, the student’s behavior includes, but is not limited to, one or more of the following:

- Poses a threat to the safety or welfare of him/herself or other members of the Rice community;
- Has a serious medical or a psychological condition that the student cannot effectively address while enrolled or which is likely to be severely exacerbated by the Rice academic and/or living environment;
- Demonstrates behavior that seriously interferes with the education of other members of the Rice community;
- Is not able to continue functioning as a student.

Following an involuntary withdrawal, students should submit a written petition for readmission to the Office of the Dean of Undergraduates (https://dou.rice.edu/) no later than June 1 for the fall semester and November 1 for the spring semester. This petition must include documentation of treatment provided. Students may be required to schedule an interview with the director of the Rice Counseling Center (https://wellbeing.rice.edu/wellbeing-center/) or Student Health Services (https://health.rice.edu/) or their designees. Academic plans must be reviewed and approved by the Office of Academic Advising by June 1 for readmission in the fall semester and November 1 for readmission in the spring semester. To allow time for review and revision of the academic plan, students must submit their first draft academic plan by October 7 in the fall semester and by May 7 in the spring semester. Guidelines for completing an academic plan can be found on the Academic Advising website (https://oaa.rice.edu/academic-planning/).

Unauthorized Withdrawal

Students who leave the university without proper notification of withdrawal are considered to have resigned. Resigned students will only be considered for readmission under exceptional circumstances. In order to be considered for readmission, students must submit a petition no later than June 1 for the fall semester and November 1 for the spring semester to the dean of undergraduates who has the discretion to submit it to the Committee on Examinations and Standing (https://dou.rice.edu/committee-examinations-and-standing/). The petition should include an academic plan approved by the Office of Academic Advising and two letters of support. Academic plans must be reviewed and approved by the Office of Academic Advising by June 1 for readmission in the fall semester and November 1 for readmission in the spring semester. To allow time for review and revision of the academic plan, students must submit their first draft academic plan by October 7 in the fall semester and by May 7 in the spring semester. Guidelines for completing an academic plan can be found on the Academic Advising website (https://oaa.rice.edu/academic-planning/).

Resignation

A student may resign from the university by notifying the dean of undergraduates in writing. Resignation means the student is withdrawing, is no longer a student at Rice, and will not return to Rice. A resignation becomes effective when accepted by the dean of undergraduates. In general, if a student is under investigation for a potential Code of Student Conduct violation or has charges pending under the Code, disciplinary proceedings will terminate upon acceptance of the resignation by the dean of undergraduates. However, this general rule does not apply if the resigning student has been charged with sexual assault, sexual harassment, dating violence, stalking or any other behavior that could result in expulsion. A student who resigns is not eligible to receive a degree from Rice, even if the student has otherwise met all of the requirements for the degree. A notation will appear on the resigned student’s transcript indicating that the student is ineligible to reenroll unrelated to academic or financial reasons.

All Separated Students, Presence on Campus

All students separated from Rice, whether voluntarily or involuntarily, withdrawn, resigned, or due to academic or disciplinary suspension, must leave campus within 48 hours. Exceptions are granted by the dean of undergraduates or, in the case of disciplinary suspensions, the Office of Student Judicial Programs. All separated students must return their college key to their college coordinator and their student ID to the dean of undergraduates. Participation in student activities on and off campus and use of Rice facilities, including, but not limited to, the student center, the colleges, the playing fields, the recreation center, and the computer labs, are limited to enrolled students. Separated students are expected to be away from Rice during the term of the separation. If the student is employed by Rice at the time of separation, he or she...
must relinquish such employment or petition the dean of undergraduates (https://dou.rice.edu) for written permission to continue the on-campus employment; separated students may not begin employment with Rice during the separation. Noncompliance with these requirements may delay readmission.

**All Readmitted Students, Return to Campus**

Students who have been readmitted must comply with any restrictions or requirements placed upon them by the dean of undergraduates or the Office of Student Judicial Programs. Failure to comply with or follow the restrictions or requirements may be cause for disciplinary action under the Code of Student Conduct (https://sjp.rice.edu/). Student Judicial Programs may implement a period of disciplinary probation and/or other restrictions as a condition of any readmission.

**Completing Graduation Requirements Elsewhere**

Students planning to complete graduation requirements at another institution must first secure formal written approval from the dean of undergraduates by submitting their written request on an Undergraduate Separation Request Form (https://dou.rice.edu/student-resources/petitions-special-requests/undergraduate-separation-request/). Transfer credit is subject to all Rice’s transfer credit policies and must be approved by the Registrar. All other graduation requirements apply, and the student is expected to adhere to all requirements and deadlines.

**Name Changes**

To comply with a number of government agencies’ reporting requirements, the university must record the name of each student who is a U.S. citizen as the student’s name appears on his or her Social Security card. Students who need to change their names on Rice University records and who are U.S. citizens must notify the Office of the Registrar and present a Social Security card, marriage license, divorce decree or court order, and picture identification when submitting the form. After the change is implemented, the name on the Rice University transcript will read as printed on the supporting document(s).

**Registration**

Currently enrolled students register in April for the fall semester and in November for the spring semester. Student registration is prioritized based on a student’s matriculation term and their hours completed and in academic history. Students matriculating in the fall complete their registration during Orientation Week before classes begin in August. Students matriculating mid-year register during Mid-Year Orientation before classes begin in January. Students are strongly encouraged to meet with their divisional or major advisor to discuss their courses for the upcoming semester.

New students may not register or attend classes until they return a properly completed health data form and meet immunization and TB screening requirements. Additionally, all first-time undergraduate students, including transfers, must meet the meningococcal meningitis vaccine requirement to live on campus. Immunizations required for admission are diphtheria/tetanus, measles, rubella, and mumps, meningococcal meningitis, with immunizations against hepatitis B and chicken pox recommended. The Mantoux tuberculin skin test is also required. A late fee of $30 is charged for failure to submit a fully completed health data form by the required date.

Each year, the Office of the Registrar publishes specific registration deadlines for the semesters of that year in the Academic Calendar (https://registrar.rice.edu/calendars/). Deadline due dates for student account balances for each term are published here in the General Announcements under the appropriate sections and on the Cashier’s website (https://cashier.rice.edu/). Any student not registered as of the last day to add classes or any student who is in arrears or becomes in arrears after the last day to add classes will be withdrawn from the university. Withdrawn students will not be allowed to receive credit for the withdrawn semester.

Appeals to this policy must be addressed to the dean of undergraduates. If readmitted, students must petition the Committee on Examinations and Standing (https://dou.rice.edu/committee-examinations-and-standing/) to add classes late and must pay a late registration fee of $125. Additionally, students who are readmitted after being withdrawn for nonpayment will be assessed a $375 readmission fee.

**Drop/Add**

During the first two weeks of classes, students may add or drop courses without penalty. After the second week of the semester, the following conditions apply for adds and drops. Undergraduate students:

- • May not add courses after the second week of classes, except in extenuating circumstances and with the approval of the Committee on Examinations and Standing (https://dou.rice.edu/committee-examinations-and-standing/) (a $75 fee per course will be assessed)
- • May drop courses through the seventh week of classes without penalty
- • May not drop courses after the end of the seventh week of classes except in extenuating circumstances and with the approval of the Committee on Examinations and Standing (https://dou.rice.edu/committee-examinations-and-standing/) (a $75 fee per course will be assessed). Students who receive approval to drop a course after the designated drop deadline will receive a grade of “W” for that course.

Newly matriculated undergraduate students, both new first-time and transfer students in their first full-term semester at Rice (Fall or Spring), are permitted to drop courses up to the last day of classes. These same students, in their second semester at Rice, if that semester is a full-term Spring semester, are permitted to drop courses through the tenth week of classes without a fee.

Students are allowed to change FWIS sections during the first two weeks of classes each semester, but they cannot drop one FWIS section without simultaneously adding another. After week two, FWIS courses cannot be dropped. In extraordinary circumstances, students may submit a petition to the Committee on Examinations and Standing (https://dou.rice.edu/committee-examinations-and-standing/) who may approve a drop on an exception basis.

There are a small number of courses for which an approved drop-back provision exists. Under certain conditions, for the course pairings on that approved list, a student can drop from the advanced course into the identified lower course until the seventh week of class. More information on this, including the list of courses, may be found on the Office of the Registrar (https://registrar.rice.edu/) website, on the Drop-Back Provision page (https://registrar.rice.edu/students/dropback/).
For courses with start and end dates not coinciding with Rice’s typical semester calendar, otherwise known as “part of term” courses, the Office of the Registrar will consult with the instructor and:

- Set the add deadline approximately one-seventh of the way into the course
- Set the drop deadline approximately one-half of the way into the course
- Post these special deadlines on the Office of the Registrar’s website, under Academic Calendars (https://registrar.rice.edu/calendars/).

Students may not drop courses where the Honor Council has ruled a loss of credit.

Note: Weeks are defined as academic instruction; thus, midterm recess is not included in this calculation.

Course Load

Students at Rice normally enroll for 15 to 17 semester credit hours each semester. For most students, this allows completion of graduation requirements in 8 semesters. In some instances a student may feel the need to petition for a registration overload. Petitioning for a registration overload should be a last resort and only for students with truly extenuating circumstances that would necessitate a course overload. The petition process for receiving a registration overload is dependent upon the student’s matriculation semester.

For Students that Matriculated to Rice Prior to Fall 2016 Semester:

- Students must secure permission in writing from the Office of the Academic Advising to register for more than 20 credit hours in any semester. Guidelines and the petition form can be found on the Academic Advising website (https://oaa.rice.edu/overloads-and-part-time-status/).
- Petitions for more than 24 credit hours are not considered.
- No student may receive credit for more than 20 semester credit hours in a semester, including courses taken elsewhere, without prior written approval.

For Students that Matriculated to Rice in the Fall 2016 Semester, and thereafter:

- Students must secure permission in writing from either the Office of the Academic Advising or their appropriate major advisor(s) to register for more than 18 credit hours in any semester.
- Updated guidelines (as of Fall 2017) and a new process and timeline for petition approval can be found on the Academic Advising website (https://oaa.rice.edu/overloads-and-part-time-status/).
- Music students and architecture students are not held to this semester credit hour limit due to their unique curricula; the credit hour limit for these students remains 20 credit hours per semester.

Students must secure permission in writing from the Office of the Dean of Undergraduates (https://dou.rice.edu/student-resources/petitions-special-requests/) before registering for courses if they want to:

- Complete graduation requirements elsewhere
- Register for less than 12 semester credits hours, which will move the student to part-time status
- Register concurrently at another university, regardless of the delivery method of the course
  a. In the absence of extenuating circumstances necessitating concurrent registration, such permission will not generally be granted.
  b. Credit for coursework at another college or university completed in a semester while enrolled at Rice will not be recorded by the Office of the Registrar without prior receipt of written permission from the dean of undergraduates.

Students also should be aware that the Office of the Registrar must report a student’s part-time status to various groups, such as loan agencies, scholarship foundations, insurance companies, etc. It is in the student’s best interest to determine if he or she will be affected in any way by part-time status.

For more information, visit the Office of the Registrar website (https://registrar.rice.edu/home/).

Course Numbering System

Courses numbered 100-499 are considered undergraduate level, with the 100-299 sequence classified as lower-level (freshman/sophomore) and the 300-499 sequence classified as upper-level (junior/senior). Courses numbered 500 and above are considered to be at the post-baccalaureate or graduate level. Graduate and undergraduate students may, with departmental approval, take certain courses outside their designated level.

Repeated Courses

Students may repeat courses previously taken; however the record of all attempts and the corresponding earned grades remain on the transcript. Additionally the grades for all attempts are included in both the term and cumulative grade point average calculations. If students repeat courses previously passed, credit is awarded only for the course with the highest grade. For example, a student took HIST 117 and received a grade of B. The student then repeated HIST 117 and received a grade of A. Both grades—the B and the A—appear on the transcript and are included in his/her GPA; however, he/she only receives three credits toward his/her degree. On the transcript, a repeated course is indicated by one of the following values:

- I – Included in GPA and earned hours
- A – Included in GPA, but excluded from earned hours
- E – Excluded from both GPA and earned hours

Each course attempt will be included in a student’s academic history. Under no circumstances will repeated course attempts be removed from a student’s academic history or official transcript, nor will a student be retroactively dropped from a course that they completed.

Some Rice University courses may be repeated for credit. They are specifically noted in the Course Offerings (https://courses.rice.edu) each semester. If a course may be repeated for credit, each grade appears on the permanent record and is included in the student’s grade point average.
If students repeat courses for which they have received either advanced placement or transfer credit, the credit will be removed from the transfer or advanced placement credit. Nor can credit be received twice for students transferring in courses that repeat courses previously completed at Rice. Likewise, students will not receive transfer credit for courses previously completed at Rice with a passing grade, with the exception of courses designated as repeatable for credit. In extraordinary extenuating circumstances, an exception to the repeat transfer credit rule can be granted by the dean of undergraduates.

Students may not receive credit twice for cross-listed, equivalent, or graduate/undergraduate equivalency courses taken at the same time. If the course is not repeatable, students may not receive credit for cross-listed, equivalent, or graduate/undergraduate equivalency courses taken in different semesters.

**Change in Registration**

The Academic Calendar (https://registrar.rice.edu/calendars/) lists deadlines for dropping or adding a course or section. This schedule is binding for all students. Adding or dropping a course, including transferring from one section to another or changing credit status in a course, must be accomplished online or through the completion of the appropriate forms and submission to the Office of the Registrar. Changing a course to/from audit status must be done by the deadlines as posted in the Academic Calendar (https://registrar.rice.edu/calendars/) for the applicable semester. If a student feels they have exceptional circumstances, they can request exceptions to these deadlines by petitioning the Committee on Examinations and Standing (https://dou.rice.edu/committee-examinations-and-standing/).

**Registration During Summer Sessions**

Registration for the Summer Sessions begins in March of each year. Currently enrolled Rice students should register for summer courses online via ESTHEB (https://esther.rice.edu) as per normal registration processes and procedures. Rice students should be aware that the registration and payment deadlines do differ, depending on the summer session, and should familiarize themselves with the Academic Calendar (https://registrar.rice.edu/calendars/). Summer courses that do not generate enrollments sufficient to cover their costs may be canceled prior to the first day of class.

**Pass/Fail During Summer Sessions**

Currently enrolled Rice students can designate a summer course as Pass/Fail during the summer sessions, but can do so only by visiting the Office of the Registrar in person and completing a Pass/Fail Designation form. Similarly, conversions of summer Pass/Fail grades can only be done via paper form at the Office of the Registrar. Students should adhere to the applicable Pass/Fail deadlines, as stated in the Academic Calendar (https://registrar.rice.edu/calendars/).

**Auditing Courses During Summer Sessions**

As noted in Auditing Courses (p. 11), currently enrolled Rice students may audit one or more summer courses at Rice at the cost of the auditor fee for Rice alumni (see Cashier's Website (https://cashier.rice.edu)).

**Transcript Policies**

Rice University provides official hard-copy transcripts and electronic transcripts. Official transcripts are issued only at the request of the student. Official transcript requests should be made at least five working days before the desired date of issue. A $10 fee per transcript must be received before a transcript is issued.

Transcripts that have been presented for admission or evaluation of credit become a part of the student's permanent record and are not reissued. Transcripts from other institutions, if needed, must be sent to Rice University directly from the original issuing institution.

**Transfer Credit**

Courses taken at another college or university that are appropriate to the Rice curriculum may be approved for transfer credit toward a Rice undergraduate degree. Students must have taken the course at a United States academic institution accredited by a regional accrediting agency, or at a foreign institution accredited by the appropriate agency, such as the government's Ministry of Education. Studies done in one's home country constitute transfer credit through the Office of the Registrar. Official transcripts from the transfer credit institution must be sent directly from the institution's registrar to Rice's Office of the Registrar or hand-delivered in an official sealed envelope. For students participating in an official study abroad program (i.e., studying in a country that is not one's home country) this coursework must be approved by Rice's Study Abroad Office.

All coursework must have earned a grade of at least a C- or the equivalent. Students may not transfer courses taken pass/fail or on a similar basis at other institutions. Additionally, students will not receive transfer credit for courses previously completed at Rice with a passing grade, with the exception of courses designated as repeatable for credit. In extraordinary extenuating circumstances, an exception to the repeat transfer credit rule can be granted by the dean of undergraduates.

The following types of non-traditional coursework will not transfer to Rice for undergraduate credit: a.) life experience; courses offered by non-collegiate sponsors such as businesses and government agencies, and labor unions, even if evaluated by the American Council on Education (ACE); b.) equivalency examinations (e.g. CLEP; c.) remedial, college preparatory, and life skills courses; d.) MOOCs (massive open online courses); and e.) areas of study offered by regionally accredited institutions but not offered at Rice, such as agriculture, hotel management, police academy, and fire science. Generally, grades earned for transfer credit are not entered on the Rice transcript, and transferred courses have no effect on a student's Rice grade point average. However, where coursework taken at other institutions has been approved by the faculty as an explicitly specified component to a program's curriculum, the courses will be entered on the transcript and counted in the student's Rice grade point average (including grades lower than C-). Such opportunities are listed in the program curriculum description. Students should keep in mind that if they choose to pursue an advanced degree, the transcripts from transfer credit institutions, with the actual grades earned in the transferring courses, will be requested as part of a graduate school's admission process.

After matriculation at Rice, students are limited to 15 semester hours of summer school transfer credit. This restriction is waived for credit earned during an official summer study abroad program through the Study Abroad Office. Additionally, transfer credit taken at another institution while concurrently enrolled at Rice is subject to Rice’s course load (p. 32) policy. Individual departments may place additional restrictions on particular courses and/or institutions. Similarly, various
majors, minors, certificates and degree programs may limit the amount of transfer credit that students may apply to them.

All transferable credits from schools utilizing a system other than the semester hour (such as quarter hours or ECTS credits) will be converted to semester hours. In accordance with university guidelines and based on the external transcript, the Office of the Registrar will determine appropriate transferable credit hours and whether the credits are upper-level or lower-level. In no instance will a course transfer in with credit greater than the semester hour equivalent originally earned for the coursework.

Students with much transfer credit should be aware of the general graduation requirements. Students must be registered at Rice full-time for at least four full fall and/or spring semesters, complete at least 60 semester hours, more than half of their upper-level degree work, and more than half of their upper-level major work at Rice; for the purpose of distribution eligibility, a course taken at another institution and transferred to Rice as an equivalent distribution course must earn at least 2.5 semester credit hours. (Students also should check their specific departmental major requirements).

**Prematriculation Transfer Credit**
For transfer work completed prior to matriculation, the Office of the Registrar, in conjunction with the academic departments, determines whether courses are appropriate for transfer to Rice as Rice equivalent courses or as TRAN, general elective hours. TRAN will be indicated as either upper- or lower-level and will count toward the total hours needed for graduation and for required upper-level credit if the TRAN credit is designated by the Office of the Registrar as upper-level. If courses transferred to Rice as TRAN credit are subsequently granted Rice equivalent course credit by the Office of the Registrar and academic department, the TRAN credit is reduced by the number of credit hours of the Rice equivalent course. The Rice equivalent course is then listed on the student’s transcript and satisfies the university and major requirements the Rice course satisfies.

**Postmatriculation Transfer Credit**
Continuing students who plan to transfer courses are strongly advised to seek prior approval. Without such approval, students cannot be certain transfer credit will be accepted at Rice. To receive Rice equivalent credit, students are required to complete the appropriate form through the Office of the Registrar and secure approval from the designated transfer credit advisor in the department offering the Rice equivalent course. Unless approval is secured before or after completing the transfer credit, students can expect transferable courses to be granted TRAN. Transfer credit will be evaluated only after the Office of the Registrar receives an official transcript from the other college or university.

**International Transfer Credit**
Students seeking transfer credit for courses taken prematriculation and postmatriculation at institutions outside the United States must present a professional course-by-course evaluation of the foreign official transcript. The professional evaluation must verify that the foreign institution is equivalent to a regionally accredited U.S. academic institution and must include an explanation of credits earned (including U.S. semester hour equivalents), grade equivalents, and course levels (lower or upper level). Two reliable services with course-by-course evaluations that include this required information are:

- SpanTran (https://www.spantran.com/)
- Education Credentials (https://www.ece.org/)

All professional evaluations should be obtained from one of these two recommended credential services and submitted to the Office of the Registrar. Payment for the professional evaluation is the responsibility of the student.

Students participating in an official study abroad program through the Study Abroad Office are exempt from the requirement of having the international transcript professionally evaluated, unless the Office of the Registrar is unable to make a clear distinction of the credit earned. Study abroad international transfer credit may be transferred back to Rice in the following situations:

**Third-Party Providers**
Students participating in a study abroad program with a third party provider must provide a School of Record transcript in order to transfer credit back to Rice.

**Direct Enrollment**
Students participating in a study abroad program with direct enrollment into a foreign university should be prepared to provide a professionally evaluated transcript if the Office of the Registrar is unable to make a clear distinction of the credit earned.

**European Credit Transfer System (ECTS)**
A number of European institutions use the European Credit Transfer System (ECTS). One ECTS credit is comparable to one-half (0.5) semester hour credit at Rice. It is suggested that students take 30 ECTS credits per semester, which will transfer to Rice as 15 semester hours. A minimum full-time load during the fall and spring semesters is 24 ECTS, which will transfer to Rice as 12 semester credit hours.

Transfer credit for study away from Rice, including international study, is governed by guidelines established by Rice’s Faculty Senate, available here (https://professor.rice.edu/uploadedFiles/Professor/Faculty_Senate/Guidelines%20for%20international%20credit%20rev.pdf).

**Veterans Information**
Qualified veterans, dependents of deceased or disabled veterans whose death or disability is a direct result of their military service, or dependents in receipt of transferred benefits from a veteran may be eligible for VA educational benefits under one of the following programs while attending Rice University:

- Chapter 30: Montgomery G.I. Bill® - Active Duty/Discharged
- Chapter 31: Vocational Rehabilitation
- Chapter 32: Veterans Educational Assistance Program (VEAP)
- Chapter 33: Post 9/11 G.I. Bill®
- Chapter 35: Dependents Education Assistance
- Chapter 1606: Montgomery G.I. Bill® - Selected Reserve
- Chapter 1607: Reserve Education Assistance Program (REAP)

Rice University does not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual’s inability to meet his or her financial obligations to Rice University due to the delayed disbursement funding from VA under Chapter 31 or Chapter 33 (other than those that may be required by the particular aid program itself). Rice
University may require additional payment or impose a fee for the amount that is the difference between the amount of the student’s financial obligation and the amount of the VA education benefit disbursement. In some cases, the student may be required to submit a Free Application for Federal Student Aid (FAFSA).

If you qualify for state or federal education benefits through military service and payment to the school is delayed, you may be eligible for a 60 day deferment of tuition and fees to avoid late fees and/or being dropped from classes. The deferment request form is available here: https://www.tvc.texas.gov/wp-content/uploads/2017/09/HB-846-Form-Fillable.pdf. Submit the completed form to the Office of the Registrar.

At Rice University, veterans' benefits are managed through the Office of the Registrar. This office assists all veterans and their dependents who wish to receive Veterans Administration (VA) educational benefits.

Please see the Office of the Registrar’s website (https://registrar.rice.edu/students/veterans/) regarding the documentation required to obtain educational allowances from the VA.

Veterans who are planning to attend the university should contact Rice University’s Veterans Affairs Representative (registrar@rice.edu) at least two months before the date of entry. Such time is required to expedite the processing of paperwork for educational allowances from the VA.

For certification of benefits, students should have an enrollment of at least half time (6 credit hours for undergraduates).

For additional information regarding other veterans’ educational programs, contact the Office of the Registrar at 713-348-4999 or registrar@rice.edu.

Clubs and Organizations

Office of Student Activities

The Office of Student Activities, located in the Rice Student Center, oversees the activities of various campus-wide student organizations, student requests for facilities usage, and coordination of various leadership development programs.

In addition to managing the registration process, finances, and general advising for over 250 registered clubs at Rice University, Student Activities provides direct advising to the following organizations:

- Student Association (SA) (https://sa.rice.edu/) - Undergraduate student government, including college presidents
- Graduate Student Association (GSA) (https://gsa.rice.edu/) - Graduate student government
- Impact Rice Retreat (IRR) (https://studentcenter.rice.edu/impact/) - A student-led leadership development retreat for freshman and sophomore students
- Leadership Summit (https://studentcenter.rice.edu/summit/) - Advanced student leadership development program
- Rice Program Council (https://riceprogramcouncilsite.wordpress.com/) - Host campus-wide student events on and off campus

The Rice University clubs are divided into eleven genres: Academic/Honorary, Cultural/International, Environmentalism and Sustainability, Political, Recreational/Sport, Religious/Spiritual, Service, Social Justice, Social/Special Interest, STEM, and Visual/Performing Arts. The full list of registered clubs can be found online (https://studentcenter.rice.edu/club-listings/). Student Activities also provides leadership development opportunities in the form of Lunch and Lead sessions, Base Camp workshops, the Impact Rice Retreat, Leadership Summit, and additional Club Development programs.

A large number of student organizations address special student interests, such as the Black Student Association, the Hispanic Association for Cultural Enrichment at Rice, the Chinese Student Association, Rice Young Democrats, and Rice University College Republicans. There are also numerous sport related clubs such as sailing, rugby, volleyball, and soccer. Some of the special-interest groups include a pre-med society, a pre-law society, and Habitat for Humanity.

Many organizations are associated with academic and professional disciplines, such as foreign language clubs, honor societies, and student affiliate groups such as the American Institute of Chemical Engineers, the American Society of Civil Engineers, and the American Society of Mechanical Engineers.

Student Activities also recognizes a number of religious and spiritual organizations. These include, but are not limited to, Chi Alpha Christian Ministries, the Baptist Student Ministry, Catholic Student Association, Hillel, the Muslim Student Association, and the Boniuk Council for Interfaith. Many of these clubs are assisted by local clergy or staff, and form the Joint Campus Ministers. Many of these clubs are assisted by local clergy or staff, and form the Joint Campus Ministers (https://studentcenter.rice.edu/student-activities/group/club-resources/joint-campus-ministries/).

The Clubs Office is located in the basement of the Rice Student Center and provides computers, workspace, storage, and a color copier for club convenience.

For more information on the Office of Student Activities, please visit https://studentactivities.rice.edu/.

Center for Civic Leadership

The Center for Civic Leadership (CCL) fosters engaged citizenship among Rice undergraduates through integrated curricular and experiential learning opportunities. These opportunities help students develop the capacity to exercise civic leadership by better understanding themselves, their responsibilities as citizens, the complexity of social issues, and the mechanisms for creating sustainable change in Houston and communities beyond. By serving as the hub for the university’s engagement with off-campus partners in Houston, the United States, and around the world, the CCL assists Rice faculty and staff with creating additional experiential learning opportunities with external partners.

In addition to academic coursework in leadership, the CCL offers research, service, advocacy, philanthropy, and public policy opportunities.
that enable students to work with a range of off-campus partners in the public, private, and non-profit sectors. Programs include Urban Immersion, Alternative Spring Break, Houston Action Research Teams, the Loewenstein Fellowship in Civic Research and Service, and the Leadership Rice Mentorship Experience. While CCL programs are open to all undergraduates, those who seek greater depth and intentionality in their leadership development have the opportunity to pursue the Certificate in Civic Leadership. As home to undergraduate fellowships advising, the CCL also enables students to build upon their academic and leadership experiences to identify undergraduate and post-baccalaureate opportunities that best meet their future goals.

For more information on the Center for Civic Leadership, please visit [https://www.rsvp.rice.edu](https://www.rsvp.rice.edu/).

### Rice Student Volunteer Program

By heightening student awareness of community needs and generally raising social consciousness, the Rice Student Volunteer Program (RSVP) has organized volunteer projects for Rice students, faculty, and staff since 1985. Historically, the most popular event of each semester is Outreach Day, a Saturday when students volunteer with multiple nonprofit agencies throughout the Houston area, learning how to take thoughtful action to build a stronger, more just community. RSVP invites each student’s involvement as an officer, a committee member, a project organizer, or an interested participant in any RSVP event.

For more information on the Rice Student Volunteer Program, visit [https://www.rsvp.rice.edu](https://www.rsvp.rice.edu/).

### Intercollegiate Speech and Debate

Consistently ranked in the top 10 nationally, the George R. Brown Forensic Society sponsors competition in the categories of Individual Events, Lincoln–Douglas, and Parliamentary Debate. The society provides students with the chance to hone their public speaking skills and to qualify for competition both at the American Forensic Association National Individual Events Tournament and at the National Parliamentary Debate Championships. Recognizing the importance of developing strong communication skills, the society has an open admission policy, inviting students with little or no previous experience as well as those with extensive high school backgrounds to become members of one of the most successful teams at Rice.

For more information on speech and debate, please visit: [https://debate.rice.edu/](https://debate.rice.edu/).

### Office of Multicultural Affairs

The Office of Multicultural Affairs (OMA) has, as its primary mission, coordinating and implementing comprehensive educational, cultural, and social programs designed to emphasize inclusiveness, while promoting intercultural dialogue, awareness, and respect for diversity. Through advocacy, cultural programs, and education, OMA also helps students understand and appreciate racial, ethnic, gender, and other differences, while creating opportunities for students to challenge prejudice and expand their cultural knowledge and appreciation.

OMA utilizes its programming and support systems to provide an optimum developmental environment where all members of the University community may develop to the highest level of their potential in an atmosphere free from harassment and bias, thereby ensuring Rice’s standing as an intellectually and culturally vibrant community. Cultural student clubs, such as the Black Student Association, the Hispanic Association for Cultural Enrichment at Rice, and the South Asian Society meet regularly with OMA to discuss programming logistics and other issues. Another major program for students under OMA is HARAMBE, (Swahili for ‘working together in unity’ or ‘let’s pull together’), a group that seeks to create a unifying event for entering African-American students, allowing them to build social and academic connections with peers, faculty, and staff.

For more information about the Office of Multicultural Affairs, please visit [https://oma.rice.edu](https://oma.rice.edu/).

### Disability Resource Center

Located on the first floor of Allen Center, the Disability Resource Center coordinates campus services for individuals with documented disabilities. For academic accommodations, adaptive equipment, or disability-related housing needs, the Disability Resource Center is the campus resource for all students with disabilities. Information is maintained on scholarships, internships, and other programs specific to students with disabilities. For more information, see the Disability Resource Center website at [https://drc.rice.edu](https://drc.rice.edu). Students can schedule an appointment with the director of the Disability Resource Center by calling 713-348-5841.

**Section 504/ADA Coordinator—**The director of affirmative action serves as the Section 504/ADA coordinator at Rice University. Concerns or complaints relative to disability issues should be directed to:

Office of Affirmative Action ([https://professor.rice.edu/professor/EEOAA.asp](https://professor.rice.edu/professor/EEOAA.asp))
205 Allen Center
713-348-4930

### Financial Aid

The financial aid programs at Rice provide assistance to meet demonstrated need for university attendance for all admitted students. Through grants, endowments, low-interest loans, campus work opportunities, or a combination of these programs, Rice makes every effort to provide students and families assistance to meet their educational expenses. The financial aid program receives funding from many sources. Rice uses contributions from alumni and friends to establish and maintain scholarships and loan funds. Federal and state grant, work, and loan programs also provide funds. Awards are based primarily on financial need and a computed Expected Family Contribution (EFC), although there also are attractive loan opportunities for students and families who demonstrate no need. Financial information is also available online at the Office of Financial Aid ([https://financialaid.rice.edu](https://financialaid.rice.edu)) website.

The university determines need for first-time students by having them complete the College Scholarship Service (CSS) PROFILE ([https://student.collegeboard.org/css-financial-aid-profile](https://student.collegeboard.org/css-financial-aid-profile)). Students register for CSS PROFILE by visiting its website at [https://www.collegeboard.org/](https://www.collegeboard.org/) Students will complete the PROFILE online. The PROFILE number for Rice is 6609. First-time students also complete the Free Application for Federal Student Aid (FAFSA ([https://fafsa.ed.gov](https://fafsa.ed.gov))). The FAFSA school code for Rice is 003604. Student and parent income tax documents, including W-2 forms, are required to be submitted to The College Board using Institutional Documentation (IDOC) Service ([https://idoc.collegeboard.org/idoc](https://idoc.collegeboard.org/idoc)).
The university determines need for continuing students by having them complete the FAFSA (https://fafsa.ed.gov/) and the PROFILE (https://student.collegeboard.org/css-financial-aid-profile/). Additional documents may be requested by the Office of Financial Aid and uploaded through ESTHER.

“Need” is the amount required to meet the difference between each student’s basic educational expenses and his or her family’s resources. Parents are expected to contribute according to their financial means, taking into account income, assets, home equity, number of dependents, and other relevant factors. Students are expected to contribute as well from their own assets and earnings, including appropriate borrowing against future earnings.

Financial aid offers are determined annually. Award amounts are varied from year to year, even when the student’s financial situation appears to remain relatively stable.

Disbursements
Financial aid awards during the academic year occur in two equal disbursements (fall and spring semesters), and are released to the student’s account once all requirements are completed. The scheduled disbursements are credited a week prior to the start of each term or upon completion of financial aid requirements, whichever is later. Missing requirements may be reviewed through the financial aid tab in Esther (https://esther.rice.edu/). Additional disbursement information is available on the Office of Financial Aid (https://financialaid.rice.edu) website.

Types of Financial Aid and Assistance

Need-Based Scholarships/Grants
Various need-based scholarships and grants are awarded to assist students with demonstrated need. Institutional need-based grants (i.e. Rice Investment Grant, Rice Grant, etc.) may be exchanged for endowed or named scholarships in part or in full.

Merit Scholarships
Merit Scholarships are offered through the Office of Admission to incoming students. Merit scholarships may only be used for coursework sponsored by Rice University. Should a student with a merit award graduate early, unexpended merit funds will not be granted to the student. Merit scholarships may be exchanged for endowed or named scholarships in part or in full.

Student Loan Funds
To assist students and parents with educational financing, the Office of Financial Aid participates in the following programs:

- **Federal Direct Loans**—These are low-interest loans made to students attending school on at least a half-time basis. Subsidized loans require need-based financial aid eligibility, but unsubsidized loans are not based on financial need.

- **Federal Direct PLUS Loan**—The PLUS loan is a low-interest loan to parents or legal guardians of dependent undergraduate students. Eligibility is not based on demonstrated financial need.

- **Private Education Loans**—These nonfederal and state loans are available to students attending school on at least a half-time basis. Eligibility is not based on financial need. These are credit-based loans and may require a co-signer.

A few endowments for student loans have been established at Rice primarily as memorial tributes. These funds exist separately from the normal financial aid program. Rice uses them to make small emergency loans to students experiencing unexpected financial problems or showing additional need beyond regular eligibility. All requests for these loans must be submitted to the Office of Financial Aid.
Additional information regarding loan options is available online through the Office of Financial Aid (https://financialaid.rice.edu/).

**Student Employment Programs**

Opportunities for employment are available to students, either on or off campus, during the academic year. Students are eligible to work under either the Federal Work-Study Program or the Rice Work Program. Students interested in employment should access the Office of Financial Aid (https://financialaid.rice.edu/student-employment/) webpage.

**Deferred Payment Plan**

Rice offers a deferred payment plan to enable families to finance students’ educational costs. This plan divides each semester's charge over four installments. Details are available to eligible students each semester at the time of billing. Students arrange for deferred payment through the Cashier's Office (https://cashier.rice.edu/).

**Summer Aid**

Effective with Summer Session 2019, degree-seeking Rice undergraduates who receive need-based aid during the academic year are eligible to receive financial aid toward a total of nine credit hours of Rice summer coursework during their time as a Rice undergraduate. This aid is only available for for-credit Rice Online, in class, or ‘Rice in country’ coursework, and for participants in other Rice faculty-led overseas programs offered for Rice credit during the summer. It is not available for non-Rice summer programs.

A summer request form is required to be submitted to the Office of Financial Aid for consideration of summer aid eligibility. The summer request deadline and additional information is available through the Office of Financial Aid (https://financialaid.rice.edu/).

**Financial Aid Eligibility**

Undergraduate students are eligible to apply for need-based Rice sponsored and federal/state/private aid during the first eight semesters at Rice; for transfer students the number of semesters is prorated based on the number of hours transferred. If a student is enrolled beyond eight semesters, the student may apply for federal/state/private aid for an additional two semesters. (Architecture students may apply for Rice sponsored aid for two semesters following their preceptorship to complete the BArch degree.) If a student attends part time during a semester or withdraws during a term, the semester is counted toward the number of semesters aid is available.

Undergraduates Enrolled in Graduate Courses

In some cases, an undergraduate student may be accepted provisionally to a Rice graduate program, allowing the student to pursue simultaneously graduate and undergraduate degrees while still classified as an undergraduate student. In order to maintain need-based financial aid eligibility as a full-time undergraduate, the student must be classified as an undergraduate student and be enrolled in at least 12 undergraduate semester credit hours toward the undergraduate degree. If the undergraduate hours drop below 12 semester credit hours, then the need-based financial aid may be adjusted or cancelled. Need-based aid is not available once the student is classified as a graduate level student or graduate level credit hours exceed undergraduate level credit hours for the semester.

**International Students**

Need-based aid is available to international students and is decided on a case-by-case basis. If the student indicated on the application for admission that need-based aid would be required to attend, then the student must submit an application for need-based aid to the Office of Financial Aid, and that office will determine whether there is demonstrated need. Eligible students must reapply each year by submitting a CSS Profile (https://cssprofile.collegeboard.org/).

International students not receiving need-based aid in their first year are not eligible to apply for need-based aid in subsequent years at Rice.

**Consumer Information**

A summary listing of student consumer information is available through the Office of Financial Aid (https://financialaid.rice.edu/).

**Loan Counseling**

Students who are recipients of federal student loans will be required to complete online loan entrance counseling before funds will be credited to student accounts. Students also will be required to complete online exit counseling at the completion of a program of study, enrollment of less than half-time, or withdrawal from Rice. Failure to complete online loan exit counseling will result in a transcript hold.

**Satisfactory Academic Progress**

Federal regulations (CRF § 668.34) require that students demonstrate satisfactory academic progress toward completion of their degree to continue to receive institutional, federal, and state financial aid. With the exception of the BArch degree program in architecture, eligibility for institutional aid is limited to the equivalent of 8 semesters of undergraduate enrollment, including coursework taken at other colleges and universities. In addition to meeting the standard for receiving financial aid, students must also meet the academic standards of Rice University.

Satisfactory academic progress is comprised of three areas as required by federal regulations. A student must complete their degree within a specified period that does not exceed 150% of the published length of the program, demonstrate they are making progress towards the completion of their degree by successfully completing 67% percent of all attempted courses, and maintain a cumulative 1.67 GPA, which is consistent with meeting graduation requirements. This regulation applies to each financial aid applicant, whether a previous recipient or not.

Credits counted in the maximum time are all attempted credits (even when not a financial aid recipient). Attempted credits include:

- Earned credits – Passed (A+ through D), Satisfactory (S)
- Repeated courses
- Withdrawal
- Failures – Failed (F), Unsatisfactory (U)
- Incomplete
- All accepted transfer credits (including Study Abroad courses) toward the degree program

If a student fails to meet the satisfactory academic progress standards by the end of the academic year, the student will be placed on Financial Aid Suspension and will not be eligible for aid until the satisfactory academic progress standards are met.

**Appeal**

Students are allowed to appeal their Financial Aid Suspension in cases of the death of a relative, an injury or illness of the student, or other special circumstances. Students must submit a letter discussing why the student failed to make satisfactory academic progress, and what has changed in the student’s situation that will allow the student to
demonstrate satisfactory academic progress at the next evaluation. Supporting documentation (doctor’s letter or academic plan) must accompany the appeal letter and must be submitted to the Office of Financial Aid prior to the beginning of the subsequent term. The Appeals Committee will review appeals on a case-by-case basis.

If an appeal is approved by the Appeals Committee, the student will be placed on financial aid probation and may receive financial aid for one probationary semester. At the end of the probationary term, the student must meet the satisfactory academic progress standards or meet the requirements of an approved academic plan developed by the student’s academic department(s).

Financial Aid after Academic Suspension

Students who have been suspended by the university for academic reasons need to be aware that if they are readmitted by the Committee on Examinations and Standing, they may not be eligible for financial aid based on their prior academic performance. Students who are petitioning for readmission are advised to contact the Office of Financial Aid to determine their aid eligibility.

Return of Title IV Funds

Students who receive federal funds as part of their aid packages and do not complete the academic term may be subject to returning a portion of those funds. Contact the Office of Financial Aid for information about “Return of Title IV Funds” policies and procedures.

Health, Counseling and Wellbeing

Health and Wellness Support Services Fee

By paying an annual student Health and Wellness Support Services Fee, all students gain access to the Student Health Services, Rice Counseling Center and the Student Wellbeing Office. Detailed information on the care and services each provide is available from these centers.

Student Health Services

Student Health Services, an outpatient medical clinic, is located in the Morton L. Rich Health Center. The clinic is staffed by primary care physicians, nurses, and ancillary support staff. More information can be found at https://health.rice.edu.

Clinic hours are from 8:00 a.m. to 5:00 p.m., Monday through Friday, during fall and spring semesters. For after-hours and weekend medical care, students may choose among a number of local clinics and hospitals (guidance on self-care as well as local healthcare options can be found on the website). The clinic is open full-time from the first day of Orientation Week until the day before commencement. It is closed during Thanksgiving and the winter break. The clinic also is open for reduced hours during the summer months. Visits to the clinic are covered by the Student Health Services physician–patient relationship is a confidential one. Medical records will be released only on receipt of written authorization from the student or as required by law or when the patient poses a significant risk to herself or himself or another person. Physicians with Student Health Services are considered confidential employees under Title IX, meaning that should a student wish to speak about domestic or sexual violence or stalking with a physician, his/her information is confidential and will not be released without the student’s written consent. The only exception is for students under the age of 18.

Health Insurance

All registered, degree-seeking students are required to maintain health insurance coverage while enrolled at Rice University.

Students are required to either enroll in the Rice student health insurance plan administered by Aetna Student Health, or complete an online waiver application demonstrating comparable insurance coverage. Every eligible student will have the insurance premium fee placed on their account until they have actively enrolled in insurance coverage or submitted a waiver. The student’s tuition bill will be updated based on successful completion of enrollment or the waiver application. Insurance and waiver applications, as well as specific dates for enrolling, frequently asked questions, and more can be found on the Rice Student Health Insurance website: https://studenthealthinsurance.rice.edu.

The fall student insurance open enrollment period will begin on July 9, 2019 and end on August 30, 2019. The spring student insurance open enrollment period will begin on December 2, 2019 and end on January 17, 2020. Please note, however, that students have until August 30, 2019 (Fall) or January 17, 2020 (Spring) to remove the student insurance charge by submitting a successful waiver application. All students who have not taken action to enroll in or waive coverage by the open enrollment deadlines will be automatically enrolled in the student insurance annual plan. The premium amount will not be prorated. Once enrolled in coverage, students are unable to cancel coverage for any reason. Please note the automatic enrollment process does require additional processing time. You may have to pay out of pocket for medical services until your enrollment has been processed. Once processed, you will be able to file a claim for reimbursement.

For questions concerning the Rice plan, please contact studentinsurance@rice.edu or call (713) 348-5544.

Note: Students may enroll in an annual plan or by semester only. If you waive coverage in the fall open enrollment period, you are still expected to have insurance coverage for the spring. If you enroll in the fall semester plan, you may enroll or submit a waiver for the spring semester plan. If you are auto-enrolled in the fall, you will be enrolled in the annual...
plan and will not be able to waive spring coverage. If you experience a qualifying life event (https://studenthealthinsurance.rice.edu/about/qualifying-life-events/) and need to enroll in coverage mid-year, please email studentinsurance@rice.edu.

International students that have an F1 or J1 visa are subject to the Rice University International Student Health Insurance Policy. For more information on the policy, please visit the OISS website (https://oiss.rice.edu/). Here students will find detailed information concerning the approved alternative insurance option through Student Assurance Services (SAS), as well as application and rate information.

Wellbeing and Counseling Center Services

Center Contact Information

The Wellbeing and Counseling Center provides confidential counseling treatment, as well as wellbeing case management services and Title IX support for graduate and undergraduate students. The Center also provides mental health and wellbeing related education for the student body. The Wellbeing and Counseling Center is located in the Barbara and David Gibbs Recreation and Wellness Center. The Center is open Monday - Friday from 9:00 a.m. to 5:00 p.m. For appointments contact the Wellbeing and Counseling Center at 713-348-3311 (24/7) or visit https://wellbeing.rice.edu/ for more information. In emergencies, students should call the Rice University Police Department (https://rupd.rice.edu/) at 713-348-6000.

Rice Counseling Center

Rice Counseling Center addresses students’ psychological needs with various programs and services. Typically, students who use the counseling services bring with them very common concerns: roommate problems, breakup of a relationship, academic and/or interpersonal anxiety, family problems, difficulties adjusting to Rice, or confusion about personal goals, values, and identity. Counselors are equipped to handle a variety of issues, including substance use, eating concerns, sexual assault and relationship violence, depression, and the coming-out process. Rice Counseling Center offers both individual and group counseling, as well as educational workshops and programs.

When students need long term or specialized counseling or treatment, counselors refer them to an outside provider. The students, or their health insurance, must pick up these costs. All students who have paid the Health and Wellness Support Services Fee are eligible for initial assessment sessions, consultations, crisis intervention, and educational programming. Students who have worked with a mental health professional prior to enrolling at Rice are encouraged to make contact with the Rice Counseling Center prior to coming to Rice. This will allow the student to make arrangements for a continued care plan. This plan may involve working with the Rice Counseling Center or working with the center to find a suitable off-campus provider.

The Rice Counseling Center can be contacted at 713-348-3311 or at https://wellbeing.rice.edu/. The Rice Counseling Center provides the following services:

- Psychological crisis intervention, on a walk-in emergency basis during regular office hours or by phone at any time, 24 hours a day, by calling 713-348-3311. This includes after hours and weekends.
- Initial intake to assess needs and assignment to an appropriate level of care
- Short-term individual and couples counseling
- Group therapy and support groups
- Medication consultations with the center's psychiatrist for students in counseling at the center
- Other consultations (e.g., how to make a referral or how to respond to a friend in distress)
- Educational programming (e.g., various presentations on mental health issues)

Confidentiality for Counseling

Rice Counseling Center services are confidential; information about a student is not released without the student’s written consent except as required by Texas state law. Before entering a therapeutic relationship with a counselor, students may review and discuss confidentiality with their counselor, ask all necessary questions, and be certain they understand how confidentiality will be applied in their case. As detailed in RCC’s treatment agreements, state law does not extend confidentiality to several circumstances, including where:

1. there is risk of imminent harm to the student or others;
2. the counselor has reason to believe that a child or an elderly or handicapped person is, or is in danger of, being abused or neglected;
3. a court order is issued to release information; or
4. the counselor suspects that the student has been the victim of sexual exploitation by a former health care provider during the course of treatment with that provider.

In addition, RCC sometimes provides de-identified information to administrative officials who are in a need-to-know capacity. In some cases the terms of the treatment engagement with RCC may require a student to share assessments, diagnoses, or treatment plans from non-Rice treating professionals with Rice counselors.

Therapists with Rice Counseling Services are considered “confidential” employees under Title IX, meaning that a student wish to speak about domestic or sexual violence or stalking with their therapist, their information is confidential and will not be released without his or her written consent. The only exception to this is for students under the age of 18.

Student Wellbeing Office

The Student Wellbeing Office provides wellbeing advising and case management services to support students who have experienced wellbeing challenges that may be impacting their personal or academic goals and overall success at Rice. Wellbeing advisors connect students to university resources and procedural options to help students during their enrollment. If students decide to take time off to focus on their wellbeing needs, wellbeing advisors work with them and serve as liaisons to the medical re-admission process when students are ready to return. Wellbeing advisors also coordinate with the clinical counselors and Title IX Support to provide wellbeing programs and education for the student body.

For more information, please visit https://wellbeing.rice.edu/studentwellbeing (https://wellbeing.rice.edu/studentwellbeing/) or contact the office at 713-348-3311 or wellbeing@rice.edu.

Office of Sexual Violence Prevention and Title IX Support

Rice encourages any student who has experienced an incident of sexual, relationship, or another form of interpersonal violence, harassment, or gender discrimination to seek support. There are many options
available both on and off campus for all students, regardless of whether the perpetrator was a fellow student, a staff or faculty member, or someone unaffiliated with the university. Students have access to a Title IX resource navigator who will assist the student in determining the best path for them. Furthermore, students who have been accused of committing interpersonal violence or harassment can also seek support (https://safe.rice.edu/) under Title IX.

Students should be aware when seeking support (http://safe.rice.edu/) on campus that most employees are deemed 'responsible,’ and thus are required by Title IX to disclose all incidents of non-consensual interpersonal behaviors to Title IX professionals on campus who can act to support that student and meet their needs. Rice prioritizes student privacy and safety, and only shares disclosed information on a need-to-know basis.

The therapists at the Rice Counseling Center and the doctors at Student Health Services are ‘confidential’ employees, meaning that Rice will not be informed about the incident if a student discloses it to one of these staff members.

For more information, including how to reach out to Title IX Support, please visit https://safe.rice.edu or email titleixsupport@rice.edu.

**Student Government**

All undergraduate students are members of the Rice Student Association (SA) (https://sa.rice.edu/), which is governed through the Student Senate. The senate includes the president, two vice presidents, the secretary, the treasurer, the eleven college presidents, and eleven college senators. Each year committees are appointed within the SA to work on immediate projects. The SA strives to communicate with the Rice administration, faculty, and staff to implement changes benefiting the Rice community and to collaborate with the eleven colleges to establish a Rice identity. The SA is also the umbrella organization for all registered undergraduate student clubs and is a constant resource for students at Rice, is awarded to students who have rendered distinguished service to the student body. The Rice Service Award, a memorial to Hugh Scott Cameron, first dean of students at Rice, is awarded to students who have contributed the most to excellence throughout their time at Rice. The Mentor Recognition Award recognizes extraordinary service to the student body by a current member of the Student Senate. The Mentor Recognition Award is awarded to students who have rendered distinguished service to the student body or staff. The Rice Service Award and the Mentor Recognition Award recognize extraordinary service to the student body by a current member of the faculty or staff. Student committees appointed by the association make the selections.

**Award Presentations**

The Rice Student Association presents three coveted awards annually, two to students and one to a faculty or staff member. The Rice Outstanding Senior Awards are presented to graduating seniors who have contributed the most to excellence throughout their time at Rice. The Rice Service Award, a memorial to Hugh Scott Cameron, first dean of students at Rice, is awarded to students who have rendered distinguished service to the student body. The Mentor Recognition Award recognizes extraordinary service to the student body by a current member of the Student Senate.

**Tuition, Fees and Expenses**

The following costs apply to undergraduates in the 2019-2020 school year:

<table>
<thead>
<tr>
<th>Tuition &amp; Fees</th>
<th>Hour</th>
<th>Semester</th>
<th>Annual</th>
</tr>
</thead>
<tbody>
<tr>
<td>Undergraduate Tuition (Entering and Continuing)</td>
<td>$2,014</td>
<td>$24,165</td>
<td>$48,330</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Required Fees</th>
<th>Fall</th>
<th>Spring</th>
<th>Annual</th>
</tr>

<td>$59</td>
<td>$59</td>
<td>$118</td>
</tr>
<tr>
<td>Student Recreation Center Fee</td>
<td>$53</td>
<td>$53</td>
<td>$106</td>
</tr>
<tr>
<td>Health and Wellness Support Services Fee</td>
<td>$279</td>
<td>$279</td>
<td>$558</td>
</tr>
<tr>
<td>Health Insurance - Student Premium only</td>
<td>$980</td>
<td>$1,502</td>
<td>$2,482</td>
</tr>
</tbody>
</table>

1 Individual pricing may apply based on the following:

Part-Time Enrollment refers to enrollment of less than 12 credit hours during a semester. Students seeking part-time enrollment must obtain approval from the Office of the Dean of Undergraduates (https://dou.rice.edu/reduced-course-load-requests/) and adjust their schedule accordingly within the first two weeks of the semester. Part-time enrollment tuition is calculated on the per-credit rate. Students are also assessed a one-time per semester part-time enrollment fee. Students not approved for part-time enrollment or students with approval who fail to adjust their schedule before the end of the second week of classes will be assessed the full-time enrollment tuition charge.

<table>
<thead>
<tr>
<th>Orientation Week Fees</th>
<th>Fall</th>

<td>$195</td>
</tr>
</tbody>
</table>

**Course Fees**

Courses having additional charges are provided on the Course Schedule. In some cases the associated charges may be in lieu of Rice tuition and/or required fees.

**Additional Fees**

The following charges are separate from the regular fees. Charges due to late registration or course changes made after the deadline are described in the Registration (p. 31) section.
Application Fee $75
College Withdrawal (breach of housing agreement) $1,000
Diploma Fee: Facsimile (8x10, mini-diploma) $20
Diploma Fee: Parchment (17x23, official diploma) $50
Diploma Mailing Fee: Domestic $30
Diploma Mailing Fee: International $50
Enrollment Verification $10
Internship per Semester $325
Late Application for Graduation $100
Late Course Change Fee (Add/Drop) $75
Late Mailing Fee (calculated on amount past due) 1.5%
Late Registration Fee (Week 1-3) $75
Late Registration Fee (after Week 3) $125
Letter of Standing $10
Part-time Enrollment Fee $150
Payment Plan Fee $75
Preceptorship per semester $325
Readmission fee after withdrawal for nonpayment $375
Recreation Center Membership fees (Annual) $137
Recreation Center Membership fees (Summer) $34
Replacement Diploma Fee $50
Replacement Rice ID $10
Returned Payment Fee $30
Study Abroad Fee for Summer $228
Summer Health and Wellness Support Services Fee (Early Fall Matriculants) $147
Transcript Fee $10
Transcript Express Delivery Fee $30

Billing Information

Electronic billing (E-Bill) is the official mechanism for student billing at Rice University. E-Bills are generated monthly. Fall and Spring E-Bills are generated on the 1st of each month, having a due date of the 10th.

Fall semester charges are due in full by August 10. Spring semester charges are due in full by January 10. Payment Plans are available for students who wish to pay installments over the course of the semester. Accounts not enrolled in a payment plan or paid in full by the term due dates are subject to Late Payment Fees.

Summer E-Bills are generated on the 1st for Summer months, having a due date on the 10th. Charges are due by the due date on the E-Bill notice. Payment Plans are not available for the Summer semester.

Late Payments

Student accounts not paid in full (or whose payment plan is not current) by the billing due date will be subject to a 1.5% late fee. Late fees are calculated based on the amount past due. Students experiencing difficulty with paying their balance should contact the Cashier’s Office promptly to discuss payment options.

Delinquent Accounts

Rice University reserves the right to block or cancel the registration of any student who fails to pay, when due, any indebtedness to the institution.

Academic credits, transcripts, and diplomas will be withheld until all financial obligations are paid in full.

Student Financial Responsibility Agreement

Before enrollment for a new semester can occur, students must consent to a Student Financial Responsibility Agreement (https://cashier.rice.edu/student-financial-responsibility-agreement/).

Refunds

Tuition and Fee Reversals for Withdrawals and Drops

University Withdrawals

Students officially withdrawing from all courses or dropping one or more course(s) are eligible for a 100% refund of tuition and fees through the deadlines listed on the Academic Calendar (https://registrar.rice.edu/calendars/) by semester.

Students officially withdrawing from all courses after the 100% tuition reversal period are eligible for a partial reversal of tuition. Fees are not reversed. Consult the Academic Calendar (https://registrar.rice.edu/calendars/) for specific tuition refund prorations based on the date of withdrawal.

Dropped Courses

Students dropping individual course(s) after the 100% tuition reversal period will not be eligible for a refund and will remain liable for payment of full tuition and fee charges though certain exceptions may apply, outlined in the Registration Drop/Add (https://ga.rice.edu/undergraduate-students/academic-policies-procedures/registration/#text) section. Non-attendance does not constitute an official course drop or withdrawal. All charges due to Rice University must be paid before refunds or adjustments will be permitted.
In cases of academic or disciplinary suspension, eligibility for tuition refunds and adjustments will depend on the conditions of the suspension and will be entirely at the option of the institution. Should unforeseen circumstances beyond the reasonable control of Rice University result in curtailing classes, closing residence facilities, or otherwise withdrawing services that are a normal function of the institution, refunds of any nature will be at the discretion of university administration.

Financial Aid
In addition to the university's reversal schedule and in accordance with the Higher Education Amendments of 1992, if a student completely withdraws from the university and has utilized Federal Title IV funds (e.g. Federal Pell Grant, Federal Supplemental Educational Opportunity Grant [SEOG], Academic Competitiveness Grant, National SMART Grant, Federal Perkins Loan, Federal Direct Stafford Student Loan, Federal Direct PLUS, Federal Direct Graduate PLUS), during the semester in which they withdraw, the university will observe the federally mandated process in determining what, if any amount of money must be returned to the federal program(s).

The calculation of the return of funds may result in the student owing a balance to the university and/or the Department of Education.

Refund of Credit Balances
Student account credits resulting from excess Federal Financial Aid payments, scholarship payments, and loan payments are automatically refunded by the Cashier's Office; however, there may be certain circumstances where credits on student accounts occur that may not be automatically refunded. Reversed charges, over payments, tuition waivers, and other varying factors may lead to a credit balance on a student account.

For those credits not automatically refunded, students may request disbursement of the credit balance through email to cashier@rice.edu.

Refund Delivery
Refunds are issued daily to students that are enrolled in Electronic Refund Delivery (https://cashier.rice.edu/general-refund-information/). For students not enrolled in Electronic Refund Delivery (https://cashier.rice.edu/general-refund-information/), refund checks are issued weekly and are mailed directly from JP Morgan Chase to the student mailing address on record.

Health Insurance
All students, full-time or part-time—including those on away status—must have appropriate health insurance. For information about health insurance, visit Health, Counseling and Wellbeing (p. 39). For current premium rates for university-provided student health insurance, see the Student Health Insurance (https://studenthealthinsurance.rice.edu/current-rates/) website.

Living Expenses
Residence fees cover dining hall costs and residence maintenance. They are established each year as needs dictate. For 2019-20, the annual room and board charge for residence in a residential college is $14,140.

<table>
<thead>
<tr>
<th>Room and Board</th>
<th>Semester</th>
<th>Annual</th>
</tr>
</thead>
<tbody>
<tr>
<td>Room</td>
<td>$4,850</td>
<td>$9,700</td>
</tr>
<tr>
<td>Off Campus Meal Plan - Option A</td>
<td>$2,220</td>
<td>$4,440</td>
</tr>
</tbody>
</table>

Housing
An electronic housing agreement must be signed in Esther no later than April 30 for students to receive residential room assignments. New students are required to submit a $100, non-refundable housing deposit no later than April 30, which will be applied to that semester’s room and board charges. For more information about housing, see Undergraduate Student Life (https://ga.rice.edu/undergraduate-students/student-services-organizations/life/).

Meal Plans
College Dining provides all-you-care-to-eat meals with the purchase of the meal plan. All students living on campus must purchase a meal plan. It is recommended that students living off campus also purchase a meal plan. More information is available at http://dining.rice.edu/.

Refunds for Housing and Meal Plans
Students who move out of their college may receive a prorated credit to their student account, equal to the difference between the payments received and the reduced room and board charges. A termination fee will be applied. Exceptions for academic suspension, Rice-sponsored study abroad, family emergencies, and other isolated incidents will be considered on a case-by-case basis.

Undergraduate Student Life
Residential Colleges
Each undergraduate student at Rice, whether living on campus or not, is a member of one of 11 residential colleges. All colleges are sex and gender neutral.

Each college has faculty magisters who live in a house next to the college. Reporting to the dean of undergraduates, the magisters have overall responsibility for all aspects of student life in the college, especially for encouraging broad cultural and intellectual interests and for promoting self-discipline and effective self-government within the college. Upon agreement, the students and magisters invite other members of the Rice faculty to become resident and nonresident associates of the college. Faculty associates act as advisors to the students and participate in the various activities of the college. Colleges also have nonfaculty university associates and community associates drawn from various professions in the Houston area.

Each college exists as a self-governing group of students. The elected officers and representatives are responsible to the magisters and to the college membership for:

- Directing the college’s academic, cultural, social, and athletic activities
Housing

College buildings include a dining hall and public rooms, which are available to both resident and nonresident members, and living quarters for resident students from all classes and all academic disciplines.

The university guarantees housing for all incoming students. Information about the residential colleges and room application forms accompany the notice of admission sent to each new undergraduate. Room reservations cannot be made before notification of admission. Registered sex offenders may not live in campus housing.

About 75 percent of Rice undergraduates live in the on-campus residential colleges. On-campus housing is not guaranteed beyond the first year at Rice. Although most of the students who want to live in the colleges can be accommodated, demand usually exceeds the available number of rooms. The determination of housing for sophomores, juniors, and seniors is made by their residential college government. Sophomores, juniors, and seniors draw for rooms according to the priority system of their residential college. Some students, while remaining full members of the college, choose voluntarily to live off campus for one or more years. No student is required to live on campus; however, those members of the colleges who live off campus are encouraged to eat in the colleges.

Meal Plans

College Dining provides all-you-care-to-eat meals with the purchase of the meal plan. All students living on campus must purchase meal plan A. It is recommended that students living off campus also purchase a meal plan. Its other services include:

- Assisted living Datum cafe
- Sack lunches for students who must miss a meal due to a job conflict
- Sick trays for students when requested by the Student Health Service
- Alternate menu entrées, whenever possible, to accommodate students’ religious practices

Meals are served cafeteria style. The colleges provide three meals per day Monday through Saturday and lunch and dinner on Sunday. Meals are not served during the Thanksgiving holiday, winter break, or spring break.

College Courses

One of the colleges’ important activities is their sponsorship of courses and workshops open to all students. By expanding course offerings outside the traditional departments, college courses promote the academic involvement of the colleges while introducing students to interdisciplinary topics of particular interest.

For more information, see the College Courses (p. 1066) listing.

Rice Student Center

The Student Center provides services and developmental opportunities to build community and enrich the Rice experience through facilities, events, student run businesses, and student activities. It houses a variety of retail and dining operations including the campus store, Sammy’s, 4.Tac0, and Ambassador Cafe. The Graduate Student Lounge, Multicultural Center, and the Clubs offices are all located in the basement with other student life offices throughout the building, including meeting rooms for departments, clubs, and organizations. Visitors can also make use of an ATM located outside the store and ask questions of the Information Desk staff located near the circle drive. Students and visitors alike can enjoy a beverage of their choice and fellowship with their peers at the Rice Coffeehouse (https://coffeeshouse.rice.edu), purchase a late night snack from the Hoot (https://thehoot.rice.edu/), or visit the new Rice Bikes (https://bikes.rice.edu/) location in the Housing and Dining Garage located on the inner loop to rent a bicycle or get repairs.

For more information on the Rice University Student Center, go to https://studentcenter.rice.edu/.

Rights and Responsibilities

- Access to Student Records (p. 44)
- Code of Student Conduct (p. 46)
- Honor System (p. 46)
- Student Responsibility (p. 46)

Access to Student Records

Notification of Rights under the Family Educational Rights and Privacy Act (FERPA)

The Family Educational Rights and Privacy Act (FERPA) is a federal law that protects the privacy of, and limits access to, student education records. The law affords students the following rights with respect to their education records:

1. the right to inspect and review the student’s education records within 45 days after the date Rice University (‘Rice’) receives a request for access;
2. the right to seek amendment of the student’s education records that the student believes are inaccurate, misleading, or otherwise in violation of the student’s privacy rights under FERPA;
3. the right to provide written consent to disclosures of personally identifiable information ("PII," as defined by law) contained in the student’s education records, except to the extent FERPA authorizes disclosure without consent;
4. the right to file a complaint with the U.S. Department of Education concerning alleged failures by Rice to comply with the requirements of FERPA. The name and address of the federal office that administers FERPA is:

   Family Policy Compliance Office
   U.S. Department of Education
   400 Maryland Ave., S.W.
   Washington, DC 20202

Inspect and Review Records

A student should make written request to any offices that maintain student education records, identifying the record(s) the student wishes to inspect. Though not exhaustive, as a guide for students, this is a list of the primary offices that maintain student education records: Office of the Registrar, Office of the Dean of Undergraduates, Office of Graduate and Postdoctoral Studies, Office of Student Judicial Programs, Office of Admission, Office of Financial Aid, Center for Career Development, Office of Student Activities, Office of Academic Advising, Office of International Students and Scholars, Cashier’s Office, and departmental offices. The appropriate Rice official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the Rice official to whom the request is submitted, that Rice official will advise the student of the correct official to whom the request should be addressed.

Amendment of Records

Any questions, problems, or written requests for amendment of records should be submitted to the Office of the Registrar. A student requesting to amend a record should clearly identify the part of the record the student wants changed and specify why it should be changed. If Rice decides not to amend the record as requested, Rice will notify the student in writing of the decision and of the student’s right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when the student is notified of the right to a hearing.

Disclosure of Information

As permitted by FERPA, Rice reserves the right to publish or release the following directory information without prior consent:

1. Name; permanent, local, mailing, and campus address; residential college affiliation; telephone and mobile number(s); campus email address(es); and Net ID
2. Date and place of birth
3. Classification, degrees or programs, and majors and minors
4. Participation in officially recognized activities and sports
5. Weight and height of members of athletic teams
6. Dates of attendance, degrees, honors, and awards received
7. The most recent previous educational agency or institution attended by the student
8. Photograph

Students who would like Rice to withhold this directory information may do so by logging in to ESTHER, clicking Personal Information, clicking Release or Withhold Directory Information, and indicating that the information should be withheld. Thereafter, Rice will withhold access to, and release of, the student’s directory information until further written instruction is received from the student. For more information regarding FERPA, please visit the U.S. Department of Education’s website (https://www2.ed.gov/policy/gen/uid/fpco/ferpa/).

FERPA permits the disclosure of PII from students’ education records, without consent of the student, if the disclosure meets certain conditions found in 34 C.F.R. §99.31 of the FERPA regulations. Except for disclosures to school officials, disclosures related to some judicial orders or lawfully issued subpoenas, disclosures of directory information, and disclosures to the student, Section 99.32 of the FERPA regulations requires the institution to record the disclosure. Eligible students have a right to inspect and review the record of disclosures. A postsecondary institution may disclose PII from the education records without obtaining prior written consent of the student—

- To other school officials, within Rice whom Rice has determined have legitimate educational interests and require this information in order to perform instructional, supervisory, advisory, administrative, or other duties for Rice. These school officials include faculty, research personnel, staff (including law enforcement unit personnel and health staff), trustees, or students serving on official committees (such as disciplinary or grievance committees) or assisting another school official. A school official has a legitimate educational interest if the official needs to review an educational record in order to fulfill his or her professional responsibility to Rice. This includes contractors, consultants, auditors, attorneys, collection agents, volunteers, or other parties to whom Rice has outsourced institutional services or functions, provided that the conditions listed in §99.31(a)(1)(i)(B) - (a)(1)(i)(B)(3) are met. (§99.31(a)(1))
- To officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student’s enrollment or transfer, subject to the requirements of §99.34. (§99.31(a)(2))
- To authorized representatives of the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or State and local educational authorities, such as a State postsecondary authority that is responsible for supervising the university’s State-supported education programs. Disclosures under this provision may be made, subject to the requirements of §99.35, in connection with an audit or evaluation of Federal- or State-supported education programs, or for the enforcement of, or compliance with, Federal legal requirements that relate to those programs. These entities may make further disclosures of PII to outside entities that are designated by them as their authorized representatives to conduct any audit, evaluation, or enforcement or compliance activity on their behalf. (§§99.31(a)(3) and 99.35)
- In connection with financial aid for which the student has applied or which the student has received, if the information is necessary to determine eligibility for the aid, determine the amount of the aid, determine the conditions of the aid, or enforce the terms and conditions of the aid. (§99.31(a)(4))
- To organizations conducting studies for, or on behalf of, the school, in order to: (a) develop, validate, or administer predictive tests; (b) administer student aid programs; or (c) improve instruction. (§99.31(a)(6))
- To accrediting organizations to carry out their accrediting functions. (§99.31(a)(7))
- To parents of an eligible student if the student is a dependent for IRS tax purposes, though Rice limits such information to financial details of the student’s enrollment. (§99.31(a)(8))
Code of Student Conduct

The university expects all Rice students to exercise personal responsibility over their actions. Their behavior should reflect a respect for the law and for their contractual obligations, a consideration for the rights of others, and shared standards of considerate and ethical behavior.

Students are responsible for knowing and following all information, policies, and procedures listed in this General Announcements. Questions should be directed to the appropriate office or administrator.

Rice utilizes e-mail as an official form of communication and sends correspondence to a student’s Rice email address. Students should frequently check and maintain their Rice email inbox. Failure to do so does not relieve students of the responsibility to act or respond in a timely manner to official notices sent via email.

Rice encourages self-discipline, recognizing that effective student government, including judicial processes, and the integrity of the honor system depend on the willingness of all students to meet community standards of conduct.

The university, however, reserves the right to insist on the withdrawal of any student whose conduct it judges to be clearly detrimental to the best interests of either the student or the university. The appropriate authorities take such action only after careful consideration.

No individual or group may use the name of the university or one of its colleges without prior approval of the university or the college.

Honors and Distinctions

- **Academic Honor Societies** (p. 47)
- **Honors Programs** (p. 47)
Academic Honor Societies
Honor societies at Rice include the following:

**AGLSP National Honor Society**
The Association of Graduate Liberal Studies Program (AGLSP) National Honor Society serves to recognize the scholarly achievement of graduate students and scholars in liberal studies programs across the U.S. and Canada. Students are selected, approved and invited to join the Honor Society three times annually. (Rice chapter: 2015)

**Chi Epsilon**
The Civil Engineering Honor Society. It serves to recognize students of high scholarship, character, practicality, and sociability. Students are inducted into the society once or twice annually and are selected from the pool of upper division level civil engineering students. (Rice chapter: 1995).

**Delta Phi Alpha**
To promote an interest in the German language and literature (Gamma Xi chapter at Rice: April 1949).

**Eta Kappa Nu**
Founded in 1904 at the University of Illinois for electrical engineering students to stimulate and reward scholarship as well as assist and encourage its members to grow professionally throughout their lives (Rice chapter: January 1981).

**Omega Psi**
Omega Pi unifies members of the Cognitive Science program on campus through an affiliation with its national chapter (Rice chapter: October 2017).

**Omicron Delta Epsilon**
To promote study in economics (Rice chapter: 1981).

**Phi Beta Kappa**
Founded in 1776 at the College of William and Mary to recognize intellectual achievement and the love of learning among students in the liberal arts and sciences (Rice chapter: March 1, 1929).

**Phi Lambda Upsilon**
National honorary chemical society promoting high scholarship and original investigation in all branches of pure and applied chemistry (Rice chapter: 1926).

**Pi Delta Phi**
Organized to interest French students in competing for high standing in scholarship (Theta chapter at Rice: May 1930).

**Pi Sigma Alpha**
The National Political Science Honor Society. It aims to provide networking opportunities for political science students and to promote campus interest in political science (Rice chapter: 2008).

**Psi Chi**
Founded in 1929 at Yale University to encourage, stimulate, and maintain excellence in scholarship and to advance the science of psychology (Rice chapter: April 23, 1990).

**Sigma Delta Pi**
To promote an interest in the Spanish language and literature (Rice chapter May 14, 1953).

**Sigma Xi**
For the promotion of research in science (Beta of Texas chapter at Rice: March 23, 1938).

**Tau Beta Pi Association**
Organized to interest engineering students in competing for high standing in scholarship (Gamma of Texas chapter at Rice: December 18, 1940).

**Tau Sigma Delta**
National honor society in architecture and applied arts (Tau chapter at Rice: May 7, 1961).

Honors Programs
To enroll in the two semester Rice Undergraduate Scholars Program, students register for HONS 470 and HONS 471 Proposal Development and Research. This program is for juniors and seniors in all disciplines who are considering graduate study and an academic career after graduation. Students enroll in the program plan and execute independent research under the supervision of a sponsoring faculty member (they may apply for funding to cover expenses related to their projects). They meet once a week to discuss each other's work and to hear a range of presentations on life in academia. Students may apply in the spring of each year. For more information, contact the program's faculty co-director.

Individual departments may offer undergraduates the option of honors program enrollment. These programs enable students to receive advanced training or to deepen their understanding of a given discipline through an intensive program of independent supervised research. Customary procedure is for students to submit a proposed project to their department's Undergraduate Committee, which helps them rework it, as needed, into a substantial but feasible proposal. Once accepted, students are assigned a faculty advisor to guide their research. The project concludes in an honors thesis, which the advisor and two readers evaluate, and an oral examination. Departments also use honors programs to recognize formally students who have shown outstanding work through the individual projects. Acceptance into a departmental honors program is at the discretion of the faculty. For more information, please visit the Rice Club Listings page (https://studentcenter.rice.edu/club-listings/) or the department associated with the Honor Society.
specific requirements and procedures, students should contact the individual departments.

**President's Honor Roll**

The President's Honor Roll, published each semester, recognizes outstanding students. To be eligible, students must have earned grades in a total of 12 or more semester hours without receiving a grade of F. Courses taken as Pass/Fail may not be counted for the purposes of this rule. Approximately the top 30 percent of undergraduates receive recognition each semester. While undergraduates enrolled in a four-year bachelor's degree program are always eligible for the President's Honor Roll, students enrolled in five-year bachelor's or master's programs are eligible only during their first eight semesters.

**University Honors**

**Latin Honors**

Unlike the President's Honor Roll, which recognizes academic excellence achieved over a single semester, eligibility for the three categories of Latin Honors (summa cum laude, magna cum laude, and cum laude) are based on the cumulative grade point average for all undergraduate work at Rice. Recipients are determined at the end of the spring semester and after receipt of all grades. The grade point average within the highest five percent of the year’s graduating majors within each school is recommended for the summa cum laude honor. The grade point average included within the next highest 10 percent is used to determine those eligible to graduate with the magna cum laude honor. Finally, the grade point average included within the next 15 percent is used to determine those majors eligible to graduate with the cum laude honor. Thus, approximately 30 percent of each graduating class, distributed approximately evenly across all schools, receives Latin Honors on graduation.

**Distinction in Research and Creative Work**

Distinction in Research and Creative Work is a university award for select undergraduates, granted at Commencement, which appears on the transcript and diploma. Students must apply to be considered for the award, and the application must be supported by a letter from a faculty member (or center director). The most common path of application would be to the student’s major department. A student whose research or other creative project is in a field outside of his or her major should submit an application to the academic department or program most closely associated with the subject matter of their project.

Eligibility for the award extends widely to include a variety of research, design, and other creative projects, as well as persistent dedication to research. Projects completed in part or entirely at other institutions or with community partners will be eligible for consideration.

Applicants must be in good academic standing and have a cumulative GPA of at least 3.30 in courses completed at Rice at the time of their graduation. The award will be granted only to projects that produce a concrete outcome—e.g., an essay, invention, design, musical composition—and demonstrate commitment and/or achievement above and beyond the norm. Students who complete senior theses, senior design projects, or other required senior capstone projects are eligible and may submit their thesis or capstone project for consideration; however, these students do not qualify automatically for consideration for this university distinction.

Responsibility for judging applications and determining those that merit the distinction award rests with the undergraduate degree programs or departments. Annually, departments and degree granting programs publish clear expectations and criteria for the research and design projects that will be considered for the award, as well as guidelines for what constitutes research or creative work above and beyond the norm within their respective fields. Departments may designate additional requirements as well, such as completion of a research seminar or oral defense.
GRADUATE STUDENTS

Since Rice opened in 1912, the university has recognized the importance of graduate study and research as a principal means of advancing knowledge. The first doctor of philosophy degree was awarded in 1918 in mathematics. Since that time, graduate study has expanded to encompass the schools of architecture, engineering, humanities, management, music, natural sciences, and social sciences, as well as interdepartmental programs. Rice now enrolls approximately 2,800 graduate students and offers advanced degrees in 37 fields of study.

Graduate programs lead to either research or professional degrees. Research programs generally require the completion of a publishable thesis that represents an original and significant contribution to the particular field of study. Research degrees include the doctor of philosophy (PhD), doctor of architecture (DArch), master of arts (MA), and master of science (MS).

Professional programs provide advanced course work in several disciplines but do not generally include independent research. These programs lead to degrees in most of the major schools, including many engineering disciplines.

All degrees conferred by the university are awarded solely in recognition of educational attainments and not as warranty of future employment or admission to other programs of higher education.

For additional information on graduate programs and requirements, please go to the Office of Graduate and Postdoctoral Sciences website, at https://graduate.rice.edu.

Academic Opportunities

- Auditing Courses (p. 49)
- Graduate Degrees (p. 49)
- Graduate Degree Chart (p. 50)
- Graduate Certificates (p. 54)
- Graduate Program Major Concentrations (p. 54)
- Non-Traditional Coursework (p. 54)

Auditing Courses

During the fall and spring semesters, currently enrolled degree-seeking Rice students, who are registered for at least one course for credit, may audit one or more courses at Rice without charge by securing permission of the instructor and by registering as an auditor with the Office of the Registrar. During the summer sessions, enrolled Rice students may audit one or more courses at Rice at the cost of the auditor fee for Rice alumni (see Cashier’s website (https://cashier.rice.edu/)).

Upon completion, the audited course will appear on the student's transcript with a grade of either 'AUD' or 'NC'. As noted in Grades (p. 24), instructors report the AUD grade in those instances where the auditing student has met the audit requirements of the course as defined by the instructor. A grade of NC (No Credit) is reported in instances where the auditing student has not met the audit requirements of the course as defined by the instructor.

There are no credit hours associated with audited courses, and auditing a course does not affect a student’s GPA. Requests to audit a class or to change from audit to credit or vice versa must be done by the dates and deadlines documented in the posted Academic Calendar (see Academic Calendar (https://registrar.rice.edu/calendars/)).

Graduate Degrees

The General Announcements (GA) is the official Rice curriculum. In the event that there is a discrepancy between the GA and any other websites or publications, the GA shall prevail as the authoritative source.

Research Degrees

Research degrees are offered in seven of the eight schools at Rice, with some degrees combining studies in more than one school. Specific requirements for advanced research degrees in each field of study appear in the appropriate departmental pages (see Departments and Programs (p. 93)). Students seeking additional material should contact the appropriate department (see Graduate Degree Chart (p. 50)).

Doctoral Programs

The PhD degree is awarded for original studies in the departments listed in the Graduate Degree Chart (p. 50); in architecture, the equivalent degree is the DArch; in music, the equivalent degree is the DMA. Candidates receive a PhD degree after successfully completing at least 90 semester credit hours of graduate study (coursework and research at the 500-level and above) and concluding an original investigation that is formalized in an approved thesis. As final evidence of preparation for this degree, the candidate must pass a public oral examination and submit the approved thesis to the Office of Graduate and Postdoctoral Studies. (See also Regulations and Procedures for Doctoral Degrees (p. 65).) The residency requirement for the doctorate is four semesters of full-time graduate study at Rice University.

Thesis Master’s Programs

The MA degree is available in the departments listed in the Graduate Degree Chart (p. 50), including certain scientific fields of study. The MS degree is offered in the engineering and science fields also listed in the chart. Candidates may undertake the MArch, MArch in Urban Design, and MMus degrees as research degrees by adopting the thesis option. Candidates receive a master's degree after completing program specific degree requirements in addition to meeting university degree requirements (See also Regulations and Procedures for Thesis Master’s Graduate Degrees (p. 68)).

- A minimum of 30 graduate semester credit hours of coursework taken at the 500-level or above (including thesis credit hours).
- A minimum of 24 graduate credit hours must be taken at Rice University.
- A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the thesis master’s degree.*
- All courses must be taken in the relevant field.
- Original work reported in an approved public oral examination and thesis submitted to the Office of Graduate and Postdoctoral Studies.

*Note: Departments or programs may identify and define in their program’s General Announcements Requirements tab stricter standards than the minimum GPA for coursework that satisfies their academic program requirements.
Most students take three or four semesters to complete a master’s degree (some programs may require more time).

Non-Thesis Master's Programs

Students also may pursue a non-thesis degree, sometimes referred to as a professional degree in certain departments. In some departments, the non-thesis degree also prepares the student for a doctoral-level program. This degree would be based on alternative departmental requirements and would include, but not be limited to, the following university requirements (See also Regulations and Procedures for Non-Thesis Master's Graduate Degrees (p. 68)):

- A minimum of 30 graduate semester credit hours of coursework taken at the 500-level or above.
- A minimum of 24 graduate credit hours must be taken at Rice University.
- A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University. Some graduate programs may require full-time residency or additional semesters of residency.
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 2.67 or higher in all Rice coursework that satisfies the requirements for the non-thesis master’s degree.*
- All courses taken must be in the relevant field.

*Note: Departments or programs may identify and define in their program’s General Announcements Requirements tab stricter standards than the minimum GPA for coursework that satisfies their academic requirements. In some graduate programs, students may receive a master’s degree when they achieve candidacy for the doctoral degree. Students seeking a master’s degree in this manner must submit a petition for the degree, signed by their department chair, to the Office of Graduate and Postdoctoral Studies by the deadline specified in the official Academic Calendar (http://registrar.rice.edu/calendars/) for degree conferral in the year in which the degree is to be awarded.

Diploma Programs

Diploma programs at Rice are post-master’s degree academic credential programs. Diploma candidates in these programs may be awarded this academic credential after completing (See also: Regulations and Procedures for Diploma Programs):

- A minimum of 30 graduate semester credit hours of coursework taken at the 500-level or above.
- A minimum of 24 graduate semester credit hours must be taken at Rice University.
- A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University. Some diploma programs may require full-time residency or additional semesters of residency.
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the diploma program.*
- All courses taken must be in the relevant field.

*Note: Departments or programs may identify and define in their program’s General Announcements Requirements tab stricter standards than the minimum GPA for coursework that satisfies their academic program requirements.

Graduate Degree Chart

The School of Architecture

Architecture

- Master of Architecture (MArch) Degree (p. 127)
- Master of Arts (MA) Degree in the field of Architecture (p. 131)
- Master of Urban Design (MAUD) Degree†
- Doctor of Architecture (DArch) Degree†

The Glasscock School of Continuing Studies

Education

- Master of Arts in Teaching (MAT) Degree, for Current Rice Undergraduates (p. 382)
- Master of Arts in Teaching (MAT) Degree, for Experienced Teachers (p. 384)
- Master of Arts in Teaching (MAT) Degree, for Experienced Teachers with Principal Certification (p. 386)
- Master of Arts in Teaching (MAT) Degree, for New Teachers (p. 387)

School of Continuing Studies

- Master of Liberal Studies (MLS) Degree (p. 521)
- Diploma in Liberal Studies (DLS) (p. 519)

The George R. Brown School of Engineering

Applied Physics

- Master of Science (MS) Degree in the field of Applied Physics
- Doctor of Philosophy (PhD) Degree in the field of Applied Physics (p. 118)

Bioengineering

- Master of Bioengineering (MBE) Degree (p. 153)
- Master of Science (MS) Degree in the field of Bioengineering
- Doctor of Philosophy (PhD) Degree in the field of Bioengineering (p. 152)
- Doctor of Philosophy (PhD) Degree in the field of Bioengineering / Doctor of Medicine (MD) Degree with Baylor College of Medicine (p. 153)

Chemical and Biomolecular Engineering

- Master of Chemical Engineering (MChE) Degree (p. 283)
- Master of Chemical Engineering (MChE) Degree / Master of Business Administration (MBA) Degree (p. 284)
- Master of Science (MS) Degree in the field of Chemical Engineering
- Doctor of Philosophy (PhD) Degree in the field of Chemical Engineering (p. 282)

Civil and Environmental Engineering

- Master of Civil and Environmental Engineering (MCEE) Degree in the field of Civil Engineering (p. 317)
- Master of Civil and Environmental Engineering (MCEE) Degree in the field of Environmental Engineering (p. 319)
- Master of Science (MS) Degree in the field of Civil Engineering (p. 321)
- Master of Science (MS) Degree in the field of Environmental Engineering (p. 323)
- Doctor of Philosophy (PhD) Degree in the field of Civil Engineering (p. 314)
- Doctor of Philosophy (PhD) Degree in the field of Environmental Engineering (p. 316)

Computational Science and Engineering
Master of Arts (MA) Degree in the field of Computational Science and Engineering

Master of Computational Science and Engineering (MCSE) Degree (p. 343)

Doctor of Philosophy (PhD) Degree in the field of Computational Science and Engineering (p. 342)

Computational and Applied Mathematics

Master of Arts (MA) Degree in the field of Computational and Applied Mathematics

Master of Computational and Applied Mathematics (MCAAM) Degree (p. 338)

Master of Computational and Applied Mathematics (MCAAM) Degree / Master of Business Administration (MBA) Degree (p. 339)

Doctor of Philosophy (PhD) Degree in the field of Computational and Applied Mathematics (p. 337)

Computer Science

Master of Computer Science (MCS) Degree (p. 351)

Master of Computer Science (MCS) Degree / Master of Business Administration (MBA) Degree (p. 356)

Master of Computer Science (MCS), Online Program (p. 357)

Master of Science (MS) Degree in the field of Computer Science (p. 358)

Doctor of Philosophy (PhD) Degree in the field of Computer Science (p. 351)

Electrical and Computer Engineering

Master of Electrical Engineering (MEE) Degree (p. 401)

Master of Science (MS) Degree in the field of Electrical and Computer Engineering

Doctor of Philosophy (PhD) Degree in the field of Electrical and Computer Engineering (p. 400)

Industrial Engineering

Master of Industrial Engineering (MIE) Degree (p. 482)

Master of Industrial Engineering (MIE) Degree / Master of Business Administration (MBA) Degree (p. 483)

Materials Science and Nanoengineering

Master of Materials Science and NanoEngineering (MMSNE) Degree (p. 538)

Master of Materials Science and NanoEngineering (MMSNE) Degree / Master of Business Administration (MBA) Degree (p. 540)

Master of Science (MS) Degree in the field of Materials Science and NanoEngineering (p. 542)

Doctor of Philosophy (PhD) Degree in the field of Materials Science and NanoEngineering (p. 537)

Mechanical Engineering

Master of Mechanical Engineering (MME) Degree (p. 560)

Master of Mechanical Engineering (MME) Degree / Master of Business Administration (MBA) Degree (p. 561)

Master of Science (MS) Degree in the field of Mechanical Engineering (p. 563)

Doctor of Philosophy (PhD) Degree in the field of Mechanical Engineering (p. 559)

Statistics

Master of Arts (MA) Degree in the field of Statistics

Master of Statistics (MStat) Degree (p. 830)

Master of Business Administration (MBA) Degree (p. 833)

Doctor of Philosophy (PhD) Degree in the field of Statistics (p. 830)

Systems, Synthetic, and Physical Biology

Master of Science (MS) Degree in the field of Systems, Synthetic and Physical Biology

Doctor of Philosophy (PhD) Degree in the field of Systems, Synthetic and Physical Biology (p. 848)

Doctor of Philosophy (PhD) Degree in the field of Economics (p. 377)
Doctor of Philosophy (PhD) Degree in the field of Economics and a Major Concentration in Economics and Finance (p. 379)

Energy Economics

Master of Energy Economics (MEEcon) Degree (p. 407)

Global Affairs

Master of Arts in Global Affairs (MAGA) Degree (p. 456)

Linguistics

Master of Arts (MA) Degree in the field of Linguistics (p. 527)
Doctor of Philosophy (PhD) Degree in the field of Linguistics (p. 527)

Political Science

Master of Arts (MA) Degree in the field of Political Science (p. 772)
Doctor of Philosophy (PhD) Degree in the field of Political Science (p. 772)

Psychological Sciences

Master of Arts (MA) Degree in the field of Psychology (p. 478)
Master of Human-Computer Interaction and Human Factors (MHCIHF) Degree (p. 478)
Doctor of Philosophy (PhD) Degree in the field of Psychology (p. 785)
Doctor of Philosophy (PhD) Degree in the field of Psychology and a Major Concentration in Cognitive and Affective Neuroscience (p. 786)
Doctor of Philosophy (PhD) Degree in the field of Psychology and a Major Concentration in Human-Computer Interaction and Human Factors (p. 788)
Graduate Certificates

Graduate certificate programs at Rice are post-bachelor’s degree academic credential programs that may be earned by students who are already enrolled in graduate degree-granting programs at Rice. In order to apply for a certificate program, students must declare the graduate certificate using the Graduate Declaration and Change of University Certificate From ([https://registrar.rice.edu/sites/g/files/bxs751/f/Declaration%20of%20University%20Certificate%20%28GR%29.pdf](https://registrar.rice.edu/sites/g/files/bxs751/f/Declaration%20of%20University%20Certificate%20%28GR%29.pdf)) available from the Office of the Registrar ([https://registrar.rice.edu/](https://registrar.rice.edu/)). Declaration of the certificate requires the student to obtain the approval of their director of graduate studies (in the degree program to which they have been admitted) as well as approval from the appropriate certificate advisor for the university certificate program. Students may complete and acquire more than one certificate, provided that the student meets any and all of the requirements for each certificate program.

Graduate certificate programs are intended to recognize students who have achieved a defined level of competence, skill, or professional expertise, as well as to encourage students to pursue additional areas of interest in a particular area or field that may complement their coursework in the graduate degree-granting program to which they have been admitted. Upon completion, the certificate is awarded at the same time as the conferral of the student’s Rice degree, along with a formal notation on their academic transcript.

Graduate certificates are awarded when the student’s graduate degree is conferred, and the declared Graduate Certificate Candidates have completed:

- A minimum of 4 courses (12 credit hours) to satisfy certificate requirements, or
- A minimum of 3 courses (9 credit hours) and a graduate-level internship or other experiential learning opportunity.
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the graduate certificate with a minimum grade of B-(2.67 grade points) in each course.*

- All coursework taken to satisfy certificate requirements with the standard letter grade earned (not on a Pass/Fail basis), with no more than one-third of the coursework taken to meet certificate requirements on a Satisfactory/Unsatisfactory basis and no more than one-third of the coursework taken to meet certificate requirements earned through transfer credit.
- All requirements for the graduate degree-granting program in which the student is enrolled.

*Note: Departments or programs may identify and define in their program’s General Announcements Requirements tab stricter standards than the minimum GPA for coursework that satisfies their academic program requirements.

Non-Traditional Coursework

Courses tailored for individual students provide a valuable opportunity for them to pursue an academic or professional interest under the supervision of a Rice faculty member. Such courses are typically titled as independent study or research, directed reading, or internships. Although the organization of these courses is quite variable, they are subject to the same basic requirements as other course offerings. In particular:

- The subject matter and intellectual level of the course must be appropriate for Rice.
- The instructor of record must hold a regular faculty appointment at Rice. This instructor is responsible for submitting the final grade, in consultation with the student’s immediate supervisor, if appropriate.
- The course must have a written syllabus that meets published Rice Syllabus Standards (p. 91). In addition, the syllabus must include a description of anticipated activities and topical content.
- Credit hours assigned are subject to the same amount-of-work considerations as other courses. Credit hours will be awarded in accordance with the Rice credit hour guidelines ([https://](https://))
specific information regarding application deadlines. Admittance to a Rice University graduate-degree program, with the exception of those in the School of Music, requires a baccalaureate degree from a regionally accredited U.S. institution or an international institution officially recognized by that country's Ministry of Education or its equivalent as determined by the Office of Graduate and Postdoctoral Studies. For the Shepherd School of Music, the equivalent to the baccalaureate degree will be determined by the school's graduate committee.

Applicants for admission to graduate study should either contact the appropriate department for application forms and relevant information about the program or visit the department's website for online application information. The Graduate Studies website also has links to the graduate departments' websites.

Application Process
An application for graduate study should include the completed application form, the application fee, transcript(s), recommendations, and writing samples, if required. Some departments require scores on the aptitude portion of the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT) and an appropriate advanced test. The ETS school code for Rice is 6609; in addition, applicants should send their test scores directly to the admitting department. See individual departmental listings for specific requirement information.

To make sure scores are available when admission decisions normally are made, applicants should take the GRE by the December before the fall for which they are applying. Application deadlines vary by department and degree program. In general, these occur between December and February for fall semester admission, and departments may occasionally consider late applications. Some departments will also accept spring applications. See individual departmental websites for specific information regarding application deadlines.

Admission depends on students’ previous academic records, available test scores, and letters of reference from scholars under whom they have studied. Writing samples, portfolios, statements of purpose, and work experience may be evaluated as part of the admissions decision. In general, applicants should have at least a 3.00 (B) grade point average, or the equivalent, in undergraduate work. Applicants who are foreign nationals or whose native language is not English must take either the TOEFL or IELTS test and must score at least 90 on the iBT TOEFL or at least 600 on the paper-based TOEFL. For those students who choose to take the IELTS in lieu of TOEFL, the minimum score is 7. The TOEFL school code for Rice is 6609. The TOEFL and IELTS are not necessary for an international student who has received a degree from a university in which English is the official language of communication. Waiver of the TOEFL and IELTS test may be requested by the admitting department if the department deems that the student has sufficient English communication skills to be successful in their degree program. If a student does not meet the minimum English language requirement above, then a formal request must be submitted to the Office of Graduate and Postdoctoral Studies by the graduate program. Letters of endorsement should be addressed to the dean of graduate and postdoctoral studies.

Graduate students seeking to transfer to another graduate department at Rice may do so after being admitted to the new degree program and being released from their current department. A student is not eligible to return to any Rice graduate program following a dismissal. Students previously on probation must petition the dean of graduate and postdoctoral studies for admission into any graduate program, regardless of their current enrollment status.

Regulations and Procedures for All Graduate Students
Academic and Judicial Discipline
Academic Probation and Dismissal
Graduate students are placed on academic probationary status by the Office of Graduate and Postdoctoral Studies if their overall grade point average falls below 2.67, their semester GPA falls below 2.33, or they receive an unsatisfactory grade in research credit hours.

The period of probation extends to the end of the next semester in which the student is enrolled. If that probationary semester results in an overall grade point average below 2.67 or a semester grade point average below 2.33, the student may be dismissed without further warning. Additionally, graduate students with a cumulative GPA below 2.00 may be dismissed by the Office of Graduate and Postdoctoral Studies without a probationary period.

As a courtesy, students will be notified of their probationary status once final grades have been received and posted to their records.

S/U grades cannot be used to end probationary status for low cumulative GPA.

Departments or programs may identify and define in their General Announcements Requirements tab stricter standards than the minimum GPA for coursework that satisfies their academic program requirements. A program can dismiss a student without a probationary semester by faculty vote.
Deadlines

Students must observe all deadlines listed in the Academic Calendar (https://registrar.rice.edu/calendars/) and the General Announcements.

Dismissal

The two most common grounds for dismissal of a graduate student are (1) inadequate academic progress and (2) a disciplinary violation. The latter is discussed in detail under Disciplinary Probation, Suspension and Expulsion (p. 56). The following relates to academic progress.

Graduate programs must provide students upon entry to the program with detailed requirements, deadlines, and other program policies. Students are then responsible for meeting program and university requirements in their program of education. A student who is failing to meet departmental or university requirements, such as failing to meet grade requirements, failing to pass required examinations by the required time, or failing to advance to candidacy or defend her or his thesis within the required time, is subject to dismissal without further warning.

When a student is judged not to be making adequate academic progress, he or she must be warned in writing of the possibility of dismissal and given clear information about what must be done within a specified time period to alleviate the problem. These expectations must be reasonable and consistent with expectations held for all students similarly situated in the program. If the student does not meet the stated requirements within the time frame specified, he or she will be dismissed by the graduate program. A student is not eligible to return to Rice following a dismissal.

It is difficult to give a precise and general definition of “adequate academic progress” for graduate students, due to the variation in requirements among different graduate programs. Nevertheless, some general principles do apply. For example, most graduate programs consist of two stages. The first stage, preceding candidacy, typically consists of explicit requirements and milestones, such as course requirements, exams, research projects, and the like. In this stage, adequate academic progress typically means compliance with the requirements and milestones of the program, as well as research progress when applicable. The second stage, post-candidacy, is often referred to as “all but dissertation” (ABD). In this stage, graduate students are expected to conduct research and write and defend their theses. As the second stage typically lacks explicit intermediate milestones, it is harder to assess academic progress during this stage. It is extremely important, therefore, for graduate programs to make their expectations explicit for post-candidacy graduate students.

Post-candidacy graduate students often enroll only in research courses. Such courses can offer standard letter grades or satisfactory/unsatisfactory (S/U) grades. Grading mode, however, must be uniform within a section of a research course. Thus, all students in such a section should receive letter grades or all should receive S/U grades.

Graduate programs must establish mechanisms for tracking, reviewing, and documenting academic progress of graduate students on an ongoing basis and must provide graduate students a written assessment of their academic progress at least annually. In some graduate programs, this ongoing progress review is carried out by a student’s thesis committee, while in others it is carried out by a standing faculty committee. Although a student’s supervisor plays an important role in reviewing the student’s academic progress, the responsibility for conducting the review process lies with the program and requires the involvement of additional faculty members in the program. For graduate students who are primarily engaged in coursework, for example, professional master’s students, the transcript is an adequate form of written assessment.

Dismissal of a graduate student requires that the student be notified of his/her dismissal from the graduate program. Such a notice is distinct from any earlier warning, which lets the student know of the possibility of dismissal. All dismissal notices, as well as warnings of possible dismissal, must be in writing, with a copy sent to the Office of Graduate and Postdoctoral Studies. Email communication is considered to be “in writing”. (Academic units should archive copies of all email communications pertaining to student dismissal.)

Because of the serious consequences of dismissal from a graduate program, dismissed students must receive a 15-day notice of the dismissal. Such a notice may precede the trigger for the dismissal. For example, a program can notify a student 15 days before an examination that failure to pass the examination with a certain minimal grade would result in dismissal. In general, dismissal should not take effect during a semester in which the student is enrolled. Dismissals that take effect during a semester are exceptional and must be approved by the dean of graduate and postdoctoral studies. A dismissal will be held in abeyance until the petition and appeal process is concluded, as students may petition for a dismissal to be revoked as described in the Dispute Resolution section (p. 83).

Disciplinary Probation, Suspension and Expulsion

The Code of Student Conduct (p. 82) applies to all Rice students and applies to conduct both on and off campus. The Office of Student Judicial Programs may sanction students, including implementing disciplinary probation or suspension or expulsion for violations of the Code of Student Conduct or the Honor Code. Students who have been expelled, who are serving a suspension, who are under investigation for disciplinary violations, or who have Code of Conduct or Honor Code proceedings pending against them may not receive their degree even if they have met all academic requirements for graduation. Students who are suspended or expelled must leave the university within the time frame specified by Student Judicial Programs, generally 48 hours of being informed of the decision, though in cases of unusual hardship, Student Judicial Programs may extend the deadline. Any tuition refund will be calculated from the official date of suspension or expulsion based on the refund schedule noted in the Academic Calendar (https://registrar.rice.edu/calendars/), published by the Office of the Registrar. A grade of “W” will be assigned to all enrolled courses regardless of when the suspension or expulsion began. Expelled students will have the expulsion noted on their transcript.

While on disciplinary probation or suspension, students may not run for or hold any elective or appointed office in any official Rice organization. Participation in student activities on and off campus and use of Rice facilities, including, but not limited to, the student center, the colleges, the playing field, the recreation center, and the computer labs, are limited to enrolled students.

Students seeking readmission after a suspension for Honor Code or Code of Conduct violations or other nonacademic action should submit a petition in writing to the Office of Student Judicial Programs by emailing SJP@rice.edu. That petition should include information on what the student did while away from Rice, including any schooling or employment; how the student met any requirements described by Rice at the time of separation; what the student did to address any issues leading to the separation; and what the student learned from the separation. Once approved by Student Judicial Programs, the petition...
is forwarded to the dean of graduate and postdoctoral studies for final readmission approval and action.

**Termination of Financial Support**

Graduate students often receive financial support in the form of graduate stipend and tuition waivers. The termination of financial support to a graduate student, while not equivalent to dismissal, is a serious action that could deprive students of their financial ability to continue graduate studies. Consequently, the procedure to terminate a student's financial support before the end of the financial-support commitment period should be analogous to those for dismissal as described above. Therefore, termination of financial support of a graduate student requires that the student be notified of the termination 15 days prior to the cancellation of support. Such a notice is distinct from any earlier warning, which lets the student know of the possibility of support termination. All termination of support notices, as well as warnings of possible termination, must be in writing, with a copy sent to the Office of Graduate and Postdoctoral Studies.

Active participation in required academic activities (for example, laboratory work in certain science and engineering programs) is a basic condition for continued financial support. Students who are absent from such required activities for contiguous two weeks without permission and without mitigating circumstances may be subject to termination of financial support. In addition, they may be judged not to be making adequate academic progress. Thus, if absences have to occur, they must be prearranged with the student's supervisor, except for medical and family emergencies, in which cases timely notification is required. Graduate advisors and programs should be aware of unexplained student absences and must provide immediate written warnings when students are not present and carrying out required academic activities for more than one week.

When the source of a graduate stipend is an externally sponsored research grant, the principal investigator is responsible for certifying that compensation paid to those who are supported by the grant faithfully corresponds to actual effort in carrying out the sponsored research. This process is referred to as “effort certification.” The requirements above to give students warnings and notices before dismissal or termination of stipend are separate and independent of the effort-certification requirement. If a principal investigator determines that a graduate student is not contributing to the sponsored project that is the source of the student’s stipend, then the charge for the affected pay period must be reallocated to another fund by the program.

**Degree Revocation**

Rice University reserves the right to revoke any degrees granted. A degree may be revoked if the university becomes aware that the degree should not have been granted, such as a degree that was obtained by violating the Honor Code or Code of Student Conduct or by deception, misrepresentation, falsification of records, academic misconduct, research misconduct, or if the work submitted in fulfillment of — and indispensable to — the requirements for the degree are determined to fail to meet the academic standards that were in effect at the time the degree was awarded. Notification of the date of revocation will appear on the student's transcript, and the student will be asked to return the diploma. The Provost receives all recommendations for revocation of degrees and, after consideration and review, forwards to the President any recommendations deemed to be warranted. The Provost may also initiate and forward to the President his or her own recommendation for a degree revocation. The President will consider all recommendations forwarded by the Provost and effectuate those he or she determines to be warranted. Procedures governing degree revocations may be obtained from the offices of the Registrar, Provost, or President.

The university also reserves the right to withdraw a degree to correct an administrative error, such as an incorrectly listed degree, or in a situation where it was found that a student had not actually fulfilled all graduation requirements.

**Academic Regulations and Good Standing**

**Good Standing**

Graduate students must meet the minimum deadlines and course or grade requirements detailed on this page and the Grades page to remain in good standing and to graduate from the university. Graduate students must meet other requirements specifically mandated as essential for good standing by the graduate student handbook published by the relevant department or program. Failure to remain in good standing may result in probation, separation from the university, or dismissal.

**Enrollment Requirements**

PhD and DMA students must complete at least four full fall and/or spring semesters in full-time study at Rice University. The minimum enrollment requirements for all thesis master’s programs and non-thesis master’s programs in Business, Architecture, and Music is one fall or spring semester of full-time graduate study. For non-thesis master’s programs outside of Business, Architecture, and Music, programs the minimum enrollment requirement is one fall or spring semester in full-time or part-time graduate study.

**Concurrent Enrollment at Another Institution**

Doctoral and thesis master’s students must secure written permission from the Office of the Dean of Graduate and Postdoctoral Studies to seek concurrently a degree at another institution, regardless of the level or delivery method. Additional permission is not needed for students in interinstitutional dual degree programs listed in the General Announcements. Non-thesis graduate programs may also require the approval of the graduate program. Graduate students seeking two graduate degrees should refer to this section (p. 65) of the General Announcements. Undergraduates seeking graduate degrees should refer here (p. 17). Graduate students seeking multiple graduate degrees at Rice should review the section under ‘Second Degree Programs at Rice’.

**Minimum Credit Hours**

Students must register for at least three credit hours in a semester. Students in their final semester who require less than three credit hours to complete their degree, may register for less than 3 credits with permission from the dean of graduate and postdoctoral studies.

**Continuous Enrollment**

Students must maintain continuous program involvement and enrollment during fall and spring semesters unless granted an official leave of absence. See Leaves, Intermittency of Study and Withdrawals (p. 60) for more information.

**Full-Time Study**

Semester course load for full-time students on Rice's three-semester Academic Calendar (https://registrar.rice.edu/calendars/) is nine credit hours or more as required by specific graduate programs for the fall, spring, and summer semesters. Additional registration requirements and limitations can be found under 'Registration and Courses.'
Semester course load for full-time students on Rice's four-term Academic Calendar (https://registrar.rice.edu/calendars/) (e.g. the online MBA, MBA@Rice) is six credit hours or more, as required by specific graduate programs.

Graduate programs at Rice generally require full-time study. For information about dropping below full-time or changing to part-time status, see below.

**Part-Time Study**

Part-time students must register for at least three credit hours in a semester or term. All time boundary and degree requirements apply to part-time students. Students who wish to become part-time in the upcoming semester or term must obtain written permission from the graduate department before the semester or term begins. Students who wish to obtain part-time status after the semester or term has started must also obtain the approval of the Office of Graduate and Postdoctoral Studies. In order for students to receive the per credit hour, part-time tuition rate, they must obtain verification of part-time approval from the Office of the Registrar by the end of the second week of classes. Part-time students are not eligible to receive fellowships, assistantship aid, tuition scholarships, or reduced rate tuition from Rice. See also Financial Aid (p. 72). International students should consult the Office of International Students and Scholars about the possible impact on their visa status of dropping below full-time.

**Time to Degree (All Degrees)**

PhD and DMA students are required to complete their program, including thesis defense, within 10 years of initial enrollment in the degree program. All master's students are required to complete their program, including thesis defense, within five years of initial enrollment. In both cases, students have a limit of six additional months from the date of defense to submit their theses to the Office of Graduate and Postdoctoral Studies. These time boundaries include any period in which the student was not enrolled or enrolled part-time, for whatever reason. Failure to meet any university time to degree deadline may result in the student not being able to continue in their degree program.

**Standard of Conduct**

Students are expected to live up to the high standards Rice sets for its community members, as described in the Code of Student Conduct (p. 82). Graduate students should be in compliance with the Code of Student Conduct at all times and not have holds from Student Judicial Programs or other offices.

**Research and Scholarly Activities**

Research and other scholarly activities of all students must conform to Rice University policies. It is recommended that students familiarize themselves with these policies before embarking on research or other scholarly activities. Particularly pertinent to students are policy 324 (Research Misconduct) (http://professor.rice.edu/uploadedFiles/Professor/Independent_Pages/Policies/Rice_University_Policy_324.pdf), policy 326 (Human Research Protection Policy) (http://professor.rice.edu/uploadedFiles/Professor/Independent_Pages/Policies/326.pdf), policy 333 (Patent and Software Policies) (https://policy.rice.edu/333/), and policy 334 (Copyright Policy) (https://policy.rice.edu/334/).

**Non-course Training**

Within their first semester of enrollment, graduate students are expected to complete some non-course training:

- Orientation – New graduate students are expected to attend all orientation events.
- Preventing Sexual Harassment – New graduate students are required to complete this online training.
- Responsible Conduct of Research – All graduate students are required to complete this online training. Students in the MBA and MLS programs are exempt from this training.
- Lab Safety Training - Lab Safety training is mandatory for all new students in the School of Engineering; in the School of Natural Science, with the exception of the Mathematics department; and any student outside those schools who will be working in a laboratory at Rice. This training is provided through the Office of Environmental Health and Safety (https://safety.rice.edu/).

**Applicable Academic Graduation Requirements**

The General Announcements (GA) is the official Rice curriculum. In the event that there is a discrepancy between the GA and any other websites or publications, the GA shall prevail as the authoritative source.

All graduate students must meet the minimum university requirements for the academic credential, in addition to any program specific requirements. The official certifier of the graduate degree, may petition the dean of graduate and postdoctoral studies, or the delegate to allow substitutions or waivers to the degree requirements when academically appropriate. Graduate programs may not independently allow substitutions or waivers to program specific degree requirements.

Students enrolled in graduate programs at Rice may decide whether to follow the graduation general and degree program requirements in effect when they first matriculated at Rice or those in effect when they graduate. If a student has been separated from the university due to a voluntary or involuntary withdrawal, students must graduate under the regulations in effect at the time of their last readmission or those in effect when they graduate unless granted an exception by the dean of graduate and postdoctoral studies. An archive of General Announcements is available online here (https://qa.rice.edu/archive/).

Graduate program degree requirements may vary from year to year during the period between a student's matriculation and graduation. The graduate program may, at its discretion, make any of these variations available to a student for completion of the degree requirements. If a new academic credential is created during the student’s time at Rice, the new program will be available to the student as if the program appeared in the General Announcements at the time of matriculation.

**Application for Degree**

All students must complete and submit an Application for Degree Form available in ESTHER (https://esther.rice.edu/). This form is required for all students who plan to complete their degree requirements at the end of the fall or spring semester. A late fee will be assessed for applying after the deadline (please consult the semester-specific Academic Calendar (https://registrar.rice.edu/calendars/) for deadline).
Grades

See also Faculty Grading Guidelines (p. 90) and Syllabus Standards (p. 91).

Minimum GPA

Students must achieve an overall 2.67 GPA in courses required for their chosen program of graduate study. Each department or program can identify and define stricter standards than the institutional overall 2.67 GPA minimum. Where applicable, stricter GPA standards are communicated in the General Announcements Programs of Study section, in the Requirements tab.

In addition to the minimum graduation requirement, to remain in good standing, graduate students must maintain a minimum overall GPA of 2.67 and a minimum term GPA of 2.33. Academic probation is discussed in detail in that section (p. 55).

Pass/Fail Option

Graduate students may not take a course pass/fail within their graduate degree requirements. Courses outside of their degree requirements must be designated as pass/fail no later than the end of the 10th week of classes; however, a pass/fail course may later be converted to a graded course by submitting the proper online form with the Office of the Registrar by the end of the second week of the following semester.

Registration During Summer Sessions

Currently enrolled Rice students should register for summer courses online via ESTHER (https://esther.rice.edu/) as per normal registration processes and procedures. Rice students should be aware that the registration and payment deadlines do differ, depending on the summer session, and should familiarize themselves with the Academic Calendar (https://registrar.rice.edu/calendars/). Summer courses that do not generate enrollments sufficient to cover their costs may be canceled prior to the first day of class. Please see Graduate Student Financial Aid (p. 72) for information regarding course tuition and financial aid.

Pass/Fail During Summer Sessions

Currently enrolled Rice students can designate a summer course as Pass/Fail during the summer sessions, but can do so only by visiting the Office of the Registrar in person and completing a Pass/Fail Designation form. Similarly, conversions of summer Pass/Fail grades can only be done via paper form at the Office of the Registrar. Students should adhere to the applicable Pass/Fail deadlines, as stated in the Academic Calendar (https://registrar.rice.edu/calendars/).

Satisfactory/Unsatisfactory

Satisfactory/unsatisfactory courses are those that do not use traditional grading procedures and instead assign a grade of S or U rather than a letter grade. Such courses or labs are designated by the instructor and are, in most cases, graduate level courses. With S/U courses, instructors report the S if the student successfully completes the course, or the U if they have not. Students should be aware that while a grade of S or U does not affect their grade point average, no credit will be awarded if a grade of U is received. Courses with a grade of S will count towards total credits earned. Visiting Post Baccalaureates cannot take courses on a satisfactory/unsatisfactory grading basis.

Audit

Students have the option of auditing courses. For auditing students, instructors report either the AUD or the NC grade symbol, the AUD if the student met the audit requirements of the class, or the NC if they have not. There are no credit hours associated with audited courses, and auditing a course does not affect a student's GPA. Request to audit a class or to change from audit to credit or vice versa must be done by the dates and deadlines documented in the posted Academic Calendar (https://registrar.rice.edu/calendars/). (See Grade Designations AUD (p. 59) and NC (p. 59) below.)

Grade Symbols

Instructors are required to report a grade for all students whose names appear on the class roster. They grade their students using the following conventional symbols: A+, A, A-, B+, B, B-, C+, C, C-, D+, D, D-, F.

Grade Designations

Under certain circumstances, special designations accompany the student’s grade. These designations do not affect the grade point average. The special designations include the following:

AUD ("Audit")

This designation is only used for students auditing the course, and specifically where the auditing student has met the audit requirements of the course as defined by the instructor. A grade designation of "NC" (No Credit) is given to students who do not meet the audit requirements. There are no credit hours associated with an AUD grade designation. (See Audit above.)

INC ("Incomplete")

Instructors report this designation to the Office of the Registrar when a student fails to complete a course because of verified illness or other circumstances beyond the student's control that occur during the semester. Students must provide independent corroboration of their illness or circumstances, and they are expected to coordinate with the instructor prior to final grades being submitted. For an INC received in the fall semester, students must complete the work by the end of the first week of the spring semester or an earlier date as defined by the instructor, and instructors must submit a revised grade by the end of the second week. For an INC received in the spring or summer semester, students must complete the work before the start of the fall semester or an earlier date as defined by the instructor, and instructors must submit a revised grade by the end of the first week. If a grade is not submitted by the appropriate deadline, the INC will be automatically converted to a failing grade.

Students with an INC must be certain that tests, papers, and other materials affecting their grade or essential to completing a course requirement are delivered by hand to the appropriate professor or office according to the dates and deadlines documented in the posted Academic Calendar (https://registrar.rice.edu/calendars/).

NC ("No Credit")

This designation signals that no credit was granted for the course. It is used in situations where a person auditing a course has not met the audit requirements of the course as defined by the instructor. (See Audit above.)
NG ("No Grade")
This designation signals that no credit was granted for the course. As a non-punitive grade, the NG is applied administratively and used in rare situations.

OT ("Other")
Instructors report this designation to the Office of the Registrar when a student fails to appear for the final examination after completing all the other work for the course. An OT received during a fall semester must be resolved and instructors must submit a revised grade by the end of the first week of the spring semester. An OT received during a spring semester must be resolved and instructors must submit a revised grade by the end of the fourth week after Commencement. An OT received during a summer semester must be resolved and instructors must submit a revised grade by the end of the first week of the fall semester. If a grade is not submitted by the appropriate deadline, the OT will be automatically converted to a failing grade. Students should be aware that they may be placed on probation or suspension when the OT is changed to a grade, either by an instructor or by default.

SA ("Study Away")
This designation is used for students that participate in a course of study hosted at another institution, such as a Rice-sanctioned Study Abroad program, or an approved Inter-Institutional agreement. The grade of SA is awarded for the Rice placeholder course, carries no grade points and there are no credit hours earned for a course which receives a grade of SA. There is corresponding transfer credit that is articulated once an official transcript is received from the host school.

W ("Official Withdrawal from University")
Students who officially withdraw from the university after the designated drop deadline, the seventh week of classes, will receive a final grade of "W" for each course in which they were enrolled at the time of withdrawal. Students who officially withdraw from the university before the drop deadline will not receive the grade of "W" for any courses in which they were enrolled for that semester. These courses will not be included on the official transcript.

W ("Late Drop with Approval")
A student may petition in writing the dean of graduate and postdoctoral studies to drop a course after the designated drop deadline. Students who receive approval from the dean of graduate and postdoctoral studies will receive a grade of "W" for that course. When requests for late drops are denied by the dean of graduate and postdoctoral studies, the Office of the Registrar records the submitted grade. Please see the Drop/Add (p. 63) section of the General Announcements.

If a student drops a class before the designated drop deadline for the semester, the course will not be included on his/her official transcript. Graduate students are reminded that the rule allowing new matriculants in their first semester at Rice to drop a class up until the last day of classes applies only to undergraduates.

Grade Points and Grade Point Average Calculation
To compute grade point average, letter grades are assigned numeric values as follows:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Numeric Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00&lt;sup&gt;1&lt;/sup&gt;</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.67</td>
</tr>
<tr>
<td>B+</td>
<td>3.33</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.67</td>
</tr>
<tr>
<td>C+</td>
<td>2.33</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.67</td>
</tr>
<tr>
<td>D+</td>
<td>1.33</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
</tr>
<tr>
<td>D-</td>
<td>0.67</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
</tr>
</tbody>
</table>

<sup>1</sup> Effective Academic Year 2018-2019, the A+ grade is now worth 4.00, not 4.33, in calculating the GPA.

For each course carrying standard letter grades, the credit hours attempted and the points for the grade earned are multiplied. The grade points for each course are added together, and the sum is divided by the total credit hours attempted. Grade point averages are noted each semester on the student's official transcripts. Courses taken on a S/U or pass/fail basis are excluded from the grade point average calculation.

Employment
Students receiving a stipend may accept employment only with the approval of their graduate program. Students working for more than 20 hours per week are not normally eligible for full-time status.

Leaves, Interruptions of Study, and Withdrawals
There are two types of interruptions in study: short-term releases and separations. Both releases and separations may be either voluntary or involuntary. Separations are periods of nonenrollment and require specific reinstatement or readmission processes.

Short-Term Medical and Parental Release
There are two types of short-term releases: medical and parental. Short-term releases can be up to six weeks in length.

If a graduate student cannot fulfill the duties of his or her appointment due to a medical emergency or the adoption or birth of a child, the student may be temporarily released from their academic responsibilities.

Enrollment and stipend support may be continued for up to six weeks or until the appointment expires (whichever occurs first). A student may apply for short-term medical or parental release at any time during the semester. Complete guidelines for obtaining a medical or parental release are available at [https://graduate.rice.edu/leaves](https://graduate.rice.edu/leaves). Students taking a voluntary short-term release should make arrangements with their advisor and instructors to complete their academic responsibilities in a timely way.

The university may also insist on a student’s short-term medical release if, in the judgment of the dean of graduate and postdoctoral studies, or her/his designee, the student has a serious medical or psychological condition that the student cannot effectively address while enrolled or which is likely to be exacerbated severely by the Rice academic and/or living environment.

Students may not do degree work or work involving Rice faculty or facilities while on short-term medical release. Students returning from a...
short-term medical release will be required to provide documentation that they are able to return to their studies.

**Voluntary Separations**

Voluntary separations include leaves of absence (generally one to two semesters in length) and withdrawals (medical and nonmedical). Students on a leave of absence are not required to petition for readmission. Withdrawn students are eligible to reapply. If students voluntarily withdraw for medical or psychological/psychiatric reasons, however, they must meet the readmission conditions for a medical or involuntary withdrawal.

**Leave of Absence**

A leave of absence allows a student to take time off from their studies and later resume study without having to petition for readmission to the university. Normally, students may take a leave of absence for no more than two consecutive semesters. The semesters that a student is on leave do not count against the time to candidacy or the time to defense. They do, however, count against time to degree.

A leave of absence is granted only by the Office of Graduate and Postdoctoral Studies on the recommendation of the department chair or program director and only to graduate students in good standing with the university. Students must obtain approval for a leave before the beginning of the academic semester in which the leave is taken. Leave requests, endorsed by the graduate program, must be received in the Office of Graduate and Postdoctoral Studies prior to the first day of classes (see https://graduate.rice.edu/leaves/).

**Medical Leave of Absence**

Students who take a leave of absence for medical/health issues must submit documentation of treatment and demonstration of medical stability from their treating healthcare provider prior to returning from leave.

Students must pay a reinstatement fee of $125 on their return from an official leave.

**Nonmedical Withdrawal and Readmission**

Students who wish to withdraw from Rice during the semester, for any nonmedical reason, are to notify the chair of their academic department in writing (see Refund of Tuition and Fees (p. 80)). Failure to register before the end of the fourth week of classes without a leave of absence granted by the Office of Graduate and Postdoctoral Studies constitutes a de facto withdrawal.

Students who later wish to resume study after a voluntary or de facto withdrawal must petition for readmission to the university. Petitions must be submitted to the Office of Graduate and Postdoctoral Studies no later than August 1 for Fall, December 15 for Spring and April 1 for Summer readmissions. International students should apply earlier if they are able to return to their wellbeing and mental health are encouraged to contact the Student Wellbeing Office (https://wellbeing.rice.edu/) about the roadmap back to Rice. The Student Wellbeing Office serves as a liaison to the medical readmission process, during the separation process, as well as when students are ready to return.

Graduate students who wish to seek readmission following a medical withdrawal must submit to the Office of Graduate and Postdoctoral Studies a written petition for readmission no later than June 1 for the fall semester and November 1 for the spring semester, and April 1 for the summer semester.

- The petition must include documentation of treatment provided and demonstration of medical stability (usually six months); students may also be required to interview with the director of the Rice Counseling Center or Student Health Services or their designees. The petition should include a letter to the Dean stating why the student feels they are ready to return to the University, actions they have undertaken in the interim that could support their return, and specific plans for their follow up treatment in Houston (if applicable).
- The petition also must include an academic plan devised in consultation with the student’s advisor, advising committee, or director of graduate studies (depending upon the graduate program’s advising structure) and approved by the department chair. Academic plan consultations should be initiated at least three weeks prior to the petition due date.

Students who withdraw for psychological reasons within the last five weeks of a semester are strongly encouraged to focus on their wellbeing needs and will not be eligible to apply for immediate readmission the following semester. Students who withdraw for psychological reasons while enrolled during the summer session are not eligible to apply for immediate readmission in the fall.

The semesters that a student is not enrolled do not count against the time to candidacy or the time to defense. They do, however, count against the time to degree. Readmission requires the approval of the dean of graduate and postdoctoral studies. Therefore the petition should be reviewed by the department chair and a written statement of recommendation should be submitted with the petition or emailed directly to the graduate office (graduate@rice.edu).

The semesters that a student is not enrolled do not count against the time to candidacy or the time to defense. They do, however, count against the time to degree. Readmitted students must pay a readmission fee of $350.

Further information is available by contacting the Office of Graduate and Postdoctoral Studies.
Further information is available by contacting the Office of Graduate and Postdoctoral Studies (https://graduate.rice.edu/contactus/).

**Involuntary Separation**

Sometimes, the university will require a student to withdraw, which requires a specific readmission process. An involuntary separation may result from a disciplinary and/or a medical reason.

The university may insist on a student’s involuntary separation from the university if, in the judgment of the dean of graduate and postdoctoral studies or her/his designee, or, in the case of disciplinary action, of Student Judicial Programs, the student’s behavior includes, but is not limited to, the following:

- Poses a threat to the safety or welfare of him/herself or other members of the Rice community;
- Has a serious medical or a psychological condition that the student cannot effectively address while enrolled or that is likely to be severely exacerbated by the Rice academic and/or living environment;
- Demonstrates behavior that seriously interferes with the education of other members of the Rice community; behavior that violates the Rice Code of Student Conduct, the Rice Honor Code, the Rice Sexual Misconduct Policy, the Rice Weapons Policy; or other relevant policies, or behavior that otherwise requires disciplinary action;
- Is not able to continue functioning as a student.

An involuntary separation can be the result of an interim decision or a final decision. An interim decision is usually a summary process that may result in a temporary separation.

A final decision comes after a process that includes notification, opportunity to respond, and opportunity to appeal. It can result in a suspension (i.e. temporary separation) or in an expulsion (i.e. permanent separation), as well as other sanctions.

**Readmission Following Involuntary Separation**

Following an involuntary separation, graduate students who wish to seek readmission must submit a written petition to the Office of Graduate and Postdoctoral Studies no later than June 1 for the fall semester, November 1 for the spring semester, and April 1 for summer semester.

Students taking time off due to an involuntary withdrawal are encouraged to contact the graduate affairs manager or the Student Wellbeing Office (http://wellbeing.rice.edu/) about the roadmap back to Rice. The Student Wellbeing Office serves as a liaison to the readmission process, during the separation process, as well as when students are ready to return.

- The petition should include a letter to the graduate dean stating why the student feels they are ready to return to the university and actions they have undertaken in the interim that could support their return.
- Petitions must also include an academic plan devised in consultation with the student’s advisor, advising committee, or director of graduate studies (depending upon the graduate program’s advising structure) and approved by the department chair. Academic plan consultations should be initiated at least three weeks prior to the petition due date.
- Petitions for return following an involuntary medical withdrawal must include documentation of treatment provided and demonstration of medical stability (usually six months); students may be required to interview with the director of the Rice Counseling Center or Student Health Services or their designees.

- Students involuntarily separated from the university for violations of the Code of Student Conduct or other disciplinary reasons, including honor code violations, must also submit the petition to the Office of Student Judicial Programs and receive approval prior to returning to the university or for the award of a degree (See Academic and Judicial Discipline (p. 55)). Students should refer to their separation letter for any additional requirements.

Students who are involuntarily separated from the university for psychological reasons within the last 5 weeks of either fall, spring, or summer terms are not eligible for readmission for the following term.

The semesters that a student is not enrolled do not count against the time to candidacy or the time to defense. They do, however, count against the time to degree. Readmission requires the approval of the dean of graduate and postdoctoral studies, and readmitted students must pay a readmission fee of $350.

Further information is available by contacting the Office of Graduate and Postdoctoral Studies (https://graduate.rice.edu/contactus/).

**Resignation**

A student may resign from the university by notifying the dean of graduate and postdoctoral studies in writing. Resignation means the student is withdrawing, is no longer a student at Rice, and will not return to Rice. A resignation becomes effective when accepted by the dean of graduate and postdoctoral studies. In general, if a student is under investigation for a potential Code of Student Conduct (p. 82) violation or has charges pending under the Code, disciplinary proceedings will terminate upon acceptance of the resignation by the dean of graduate and postdoctoral studies. However, this general rule does not apply if the resigning student has been charged with sexual assault, sexual harassment, dating violence, stalking or any other behavior that could result in expulsion. A student who resigns is not eligible to receive a degree from Rice, even if the student has otherwise met all of the requirements for the degree. A notation will appear on the resigned student’s transcript indicating that the student is ineligible to reenroll unrelated to academic or financial reasons.

**Nonenrollment Restrictions**

Students may not do degree work at Rice or work involving Rice faculty or facilities during any period of nonenrollment, except during the period following successful oral defense prior to submission of the final thesis.

All separated students must return their student ID to the Office of Graduate and Postdoctoral Studies. All university keys must be returned to the appropriate offices. Participation in student activities on and off campus and use of Rice facilities, including, but not limited to, the student center, the playing fields, the recreation center, and the computer labs, are limited to enrolled students.

Separated students are expected to be away from Rice during the term of the separation. If the student is employed by Rice at the time of separation, he or she must relinquish such employment or petition the Office of Graduate and Postdoctoral Studies (graduate@rice.edu) for written permission to continue the on-campus employment; separated students may not begin employment with Rice during the separation. Noncompliance with these requirements may delay or prevent readmission.
Name Changes
To comply with a number of government agencies’ reporting requirements, the university must record the name of each student who is a U.S. citizen as the student’s name appears on his or her Social Security card. Students who need to change their names on Rice University records and who are U.S. citizens must notify the Office of the Registrar and present a Social Security card, marriage license, divorce decree or court order, and picture identification when submitting the form. After the change is implemented, the name on the Rice University transcript will read as printed on the supporting document(s).

Registration and Courses
See also Academic Regulations (p. 57).

Drop/Add
During the first two weeks of classes, students may change their registration, add or drop courses without penalty. After the second week, the following conditions apply for both adding and dropping courses and credits hours. Graduate students:

• May not add courses after the second week of classes, except in extenuating circumstances and with the approval of the Office of Graduate and Postdoctoral Studies (a $75 penalty fee per course will be assessed). The student’s request to add a course first must be supported and approved by the student’s advisor along with the course instructor and then forwarded to the dean of graduate and postdoctoral studies for consideration.
• May drop courses through the seventh week without penalty.
• May not drop courses after the end of the seventh week of classes, except in extenuating circumstances and with the final approval of the Office of Graduate and Postdoctoral Studies (a $75 penalty fee per course will be assessed). The student’s request to drop a course first must be supported and approved by the student’s advisor, the course instructor, and the director of graduate studies or the department chair. Afterward, it should be forwarded to the dean of graduate and postdoctoral studies for consideration. Students who receive approval to drop a course after the designated drop deadline will receive a grade of “W” for that course.

Graduate students that drop a class after the second week should keep in mind that there is no refund of tuition, assuming the student continues to enroll in at least one other class. For additional information and relevant deadlines, please see the Academic Calendar (https://registrar.rice.edu/calendars/).

Course Load
Graduate students must secure written permission from the dean of graduate and postdoctoral studies or his/her designee to register for more than 18 credit hours in a semester, including courses taken elsewhere. Graduate programs may set lower course load maximums. Architecture, business, and music students are not held to this credit hour limit due to their unique curricula.

Course Registration
Currently enrolled students register in April for the fall semester and in November for the spring semester. Students are strongly encouraged to meet with their advisor to discuss their courses for the upcoming semester. Please see the Drop/Add section above for requirements for adding or dropping a course after the semester has begun.

Course Numbering System
Courses numbered 100-499 are considered undergraduate level, with the 100-299 sequence classified as lower-level (freshman/sophomore) and the 300-499 sequence classified as upper-level (junior/senior). Courses numbered 500 and above are considered to be at the post-baccalaureate or graduate level. Graduate and undergraduate students may, with departmental approval, take certain courses outside their designated level.

Holds
Registration, official transcripts, degree verification, and other administrative processes may be impacted by a hold on a student account. Students may consult the website of the Office of the Registrar (https://registrar.rice.edu/students/holds/) to discover why a hold exists and how to resolve the issue. The Office of the Registrar cannot remove holds governed by another office or department.

Repeated Courses
Students may repeat courses previously taken, but the record of the first attempt (and grade) remains on the transcript, and both grades are included in term and cumulative grade point average calculations. In most cases, if students repeat courses previously passed, credit is awarded only once. For example, a student took HIST 571 and received a grade of B. The student then repeated HIST 571 and received a grade of A. Both grades—the A and B—appear on the transcript and are included in his/her GPA; however, he/she only receives three credits toward his/her degree. On the transcript, a repeated course is indicated by one of the following values:

• I – Included in GPA and earned hours
• A – Included in GPA, but excluded from earned hours
• E – Excluded from both GPA and earned hours

Some Rice University courses may be repeated for credit. They are specifically noted in the Course Offerings (https://courses.rice.edu) each semester. If a course may be repeated for credit, each grade appears on the permanent record and is included in the grade point average.

If students repeat courses for which they have received either advanced placement or transfer credit, credit will not be counted. Nor can credit be received twice for students transferring courses that repeat previous enrollment at Rice.

Students may not receive credit twice for cross-listed, equivalent, or graduate/undergraduate equivalency courses taken at the same time. If the course is not repeatable, students may not receive credit for cross-listed, equivalent, or graduate/undergraduate equivalency courses taken in different semesters.

Final Examinations in Graduate Courses
Graduate courses, especially those with significant undergraduate student enrollment, should follow the guidelines for undergraduate courses (see Final Examinations section) regarding scheduling of projects, papers, and finals during the last weeks of classes, reading periods, and final exam periods. However, instructors have the discretion to modify those guidelines as appropriate for their specific courses. Such modifications and the final schedule must be made clear at the beginning of the semester.
Transcript Policies
Rice University provides official hard-copy transcripts and electronic transcripts. Official transcripts are issued only at the request of the student. Official transcript requests should be made at least five working days before the desired date of issue. A $10 fee per transcript must be received before a transcript is issued.

Transcripts that have been presented for admission or evaluation of credit become part of the student’s permanent record and are not reissued. Transcripts from other institutions, if needed, must be sent to Rice University directly from the original issuing institution.

Transfer Credit
Transfer Credit Guidelines
Courses taken at another accredited college or university are not automatically approved for transfer credit. Transfer credit is only granted with the approval of the student’s major department. Transfer credits are subject to the following restrictions:

- Students must have taken the course at a United States academic institution accredited by a regional accrediting agency, or at a foreign institution accredited by the appropriate agency, such as the government’s Ministry of Education.
- Official transcripts from the transfer credit institution must be sent directly from the institution’s registrar to the major department or hand-delivered in an official sealed envelope.
- All coursework must have earned a grade of at least a C- or the equivalent. Some departments or programs may set a higher standard. Students may not transfer courses taken pass/fail or on a similar basis at other institutions.
- Students seeking transfer credit must submit a Graduate Request for Transfer Credit form (https://registrar.rice.edu/sites/g/files/bxs751/f/Graduate%20Request%20for%20Transfer%20Credit%20ao11052014.pdf) to the department for approval.
- The major department must approve the credits and submit a copy of the transcript and the approved Graduate Request for Transfer Credit form to the Office of the Registrar.

The following types of non-traditional coursework will not transfer to Rice for credit: a.) life experience; courses offered by non-collegiate sponsors such as businesses and government agencies, and labor unions, even if evaluated by the American Council on Education (ACE); b.) equivalency examinations (e.g. CLEP); and c.) MOOCs (massive open online courses).

Grades earned for transfer credit are not entered on the Rice transcript, and transferred courses have no effect on a student’s Rice grade point average.

All transferable credits from schools utilizing a system other than the semester hour (such as quarter hours or ECTS credits) will be converted to semester hours. In accordance with university guidelines and based on the external transcript, the Office of the Registrar will determine appropriate transferable credit hours. In no instance will a course transfer in with credit greater than the semester hour equivalent originally earned for the coursework.

International Transfer Credit
Students seeking transfer credit for courses taken at institutions outside the United States must present a professional course-by-course evaluation of the foreign official transcript. The professional evaluation must verify that the foreign institution is equivalent to a regionally accredited U.S. academic institution and must include an explanation of credits earned (including U.S. semester hour equivalents), grade equivalents, and course levels. Two reliable services with course-by-course evaluations that include this required information are:

- SpanTran (https://www.spantran.com/)
- Education Credentials (https://www.ece.org/)

All professional evaluations should be obtained from one of these two recommended credential services and submitted to the major department. Payment for the professional evaluation is the responsibility of the student.

Coursework Taken While an Undergraduate at Rice
Graduate programs may consider counting courses taken by a student while an undergraduate at Rice as credit toward a graduate degree. The following guidelines must be followed:

- The courses must be chosen from those that normally satisfy requirements for the advanced degree
- No course can be used simultaneously to satisfy both an undergraduate and a graduate degree requirement
- Coursework taken as an undergraduate will not be converted to indicate a graduate level in the student’s academic history until after the bachelor’s degree is awarded
- Coursework taken as an undergraduate does not indicate the student’s matriculation term for the graduate program—the matriculation term will be the term the student officially enters the program as a graduate student after completing all undergraduate requirements
- Regardless of the number of graduate courses taken at the undergraduate level, a student must meet the residency requirement of the degree as a graduate student

Graduate programs may admit advanced undergraduates to a graduate program to seek concurrently the bachelor’s and graduate degrees. For additional information, please review the Undergraduate - Graduate Concurrent Enrollment section (p. 17) of the General Announcements.

Rice Undergraduates Entering a Graduate Degree Program
Advanced Rice undergraduate students who wish to enter a master’s degree program should apply for admission through the normal admissions procedures as they begin to pursue seriously the degree, regardless of their planned undergraduate degree conferral. The application material requirements of official transcripts and test scores may be waived in these cases, the authority for the waiver rests with the graduate program. Letters of recommendation are still required for admission.

Graduate programs may count courses taken by the student while an undergraduate as credit towards the degree if the credit was not already counted towards the undergraduate degree.

For additional information, please review the Undergraduate - Graduate Concurrent Enrollment section (p. 17) of the General Announcements.

Transfer of Graduate Program
Graduate students at Rice are admitted into a specific graduate program. Admissions criteria are program specific; therefore, students who wish to transfer graduate programs must follow the guidelines listed below.
Transferring from Research/Thesis to a Professional/Non-Thesis Program

Students who wish to change from a thesis program to a professional/non-thesis degree program must petition their department in writing. Upon recommendation of the department and approval by the dean’s office, the request is sent to the Office of Graduate and Postdoctoral Studies for consideration and final approval. If approved, students who received tuition waivers while enrolled in the thesis program may be expected to repay the tuition before their professional degrees are awarded.

Transferring from Non-Thesis to Research/Thesis Program Within the Department

Non-Thesis degree programs terminate when the degree is awarded. Students who wish to continue graduate study after completing a non-thesis degree program must apply for admission into the research/thesis degree program. Upon recommendation of the department, the request for admission is sent to the Office of Graduate and Postdoctoral Studies for consideration and final approval. Some students may become eligible for tuition waivers in subsequent semesters. Tuition waivers will not be awarded retroactively.

Transferring to Master’s Program (Non-Thesis or Thesis) as a Result of Dismissal from Doctoral Program

A graduate program may offer a non-thesis or thesis master’s opportunity to students who are being dismissed from a doctoral program. If the student accepts the master’s opportunity, the graduate program would follow internal procedures and notify the Office of Graduate and Postdoctoral Studies of the change in degree program. Tuition will not be charged retroactively for courses already completed. If the student declines the master’s opportunity, the student will be dismissed without a degree awarded. Students who are dismissed from a doctoral program are not eligible for admission to other doctoral programs at Rice.

Transferring Departments

Students in good standing and not on academic probation who wish to change their graduate program to a graduate program in another department must apply for admission to the new department’s degree program, stating that they are currently a graduate student in another program at Rice. The application must be vetted through the regular admissions process. In addition to admission to the new department, applications for a transfer must also be approved by the dean of graduate and postdoctoral studies.

Second Degree Programs at Rice

Graduate students may enroll in a second degree program only with the approval of their home academic department. No course or credit hour may be used to satisfy the degree requirements of more than one degree. Graduate students seeking concurrent enrollment at another institution should review the section under ‘Concurrent Enrollment at Another Institution.’

Veterans Information

Qualified veterans, dependents of deceased or disabled veterans whose death or disability is a direct result of their military service, or dependents in receipt of transferred benefits from a veteran may be eligible for VA educational benefits under one of the following programs while attending Rice University.

- Chapter 30: Montgomery G.I. Bill® - Active Duty/Discharged
- Chapter 31: Vocational Rehabilitation
- Chapter 32: Veterans Educational Assistance Program (VEAP)
- Chapter 33: Post 9/11 G.I. Bill®
- Chapter 35: Dependents Education Assistance
- Chapter 1606: Montgomery G.I. Bill® - Selected Reserve
- Chapter 1607: Reserve Education Assistance Program (REAP)

Rice University does not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual’s inability to meet his or her financial obligations to Rice University due to the delayed disbursement funding from VA under Chapter 31 or Chapter 33 (other than those that may be required by the particular aid program itself). Rice University may require additional payment or impose a fee for the amount that is the difference between the amount of the student’s financial obligation and the amount of the VA education benefit disbursement. In some cases, the student may be required to submit a Free Application for Federal Student Aid (FAFSA).

If you qualify for state or federal education benefits through military service and payment to the school is delayed, you may be eligible for a 60 day deferment of tuition and fees to avoid late fees and/or being dropped from classes. The deferment request form is available here: https://www.tvc.texas.gov/wp-content/uploads/2017/09/HB-846-Form-Fillable.pdf. Submit the completed form to the Office of the Registrar.

At Rice University, veterans’ benefits are managed through the Office of the Registrar. This office assists all veterans and their dependents who wish to receive Veterans Administration (VA) educational benefits.

Please see the Office of the Registrar’s website (https://registrar.rice.edu/students/veterans/) regarding the documentation required to obtain educational allowances from the VA.

Veterans who are planning to attend the university should contact Rice University’s Veterans Affairs Representative (registrar@rice.edu) at least two months before the date of entry. Such time is required to expedite the processing of paperwork for educational allowances from the VA.

For certification of benefits, students should have an enrollment of at least half time (6 credit hours for undergraduates).

For additional information regarding other veterans’ educational programs, contact the Office of the Registrar at 713-348-4999 or registrar@rice.edu.

Regulations and Procedures for Doctoral Degrees

University Graduation Requirements for Doctoral Degrees

Candidates receive the PhD degree after successfully completing:

- A minimum of 90 graduate semester credit hours of study at the 500-level and above (including thesis credit hours).
- Doctoral students must complete at least four full fall and/or spring semesters in full-time study at Rice University.
- An original investigation that is formalized in an approved thesis.
Candidacy, Oral Examinations, and Thesis

Time Boundaries for Candidacy and Defense

Time To Candidacy
PhD and DMA students must be approved for candidacy before the beginning of the 9th semester of their enrollment at Rice.

Time to Defense
PhD and DMA students must defend their theses before the end of the 16th semester of their enrollment at Rice.

Time to Thesis Submission
Candidates who successfully pass the oral examination in defense of the thesis must submit the thesis to the Office of Graduate and Postdoctoral Studies no later than six months from the date of the examination. See Candidacy, Oral Examinations and Thesis (p. 67).

Time to Degree
PhD and DMA students are required to complete their program, including thesis defense, within 10 years of initial enrollment in the degree program. This time boundary includes any period in which the student was not enrolled or enrolled part-time, for whatever reason. Failure to meet any university time to degree deadline may result in the student not being able to continue in their degree program.

Approval of Candidacy
Candidacy marks a midpoint in the course of graduate education. Achieving candidacy for the PhD/DMA signals that a graduate student has:

1. completed required coursework,
2. passed required exams to demonstrate his/her comprehensive grasp of the subject area,
3. demonstrated the ability for clear oral and written communication, and
4. shown the ability to carry on scholarly work in his/her subject area.

Requirements for achieving candidacy for the doctoral degree are determined at the departmental (p. 93) level. The department is also authorized to grant waivers or substitutions of specific course requirements, but not to make exceptions to university requirements.

Students enrolled in research degree programs submit their petitions for candidacy for a doctoral degree through the department chair to the dean of graduate and postdoctoral studies. In the petition sent to the dean, the department chair identifies the student's thesis director, recommends a thesis committee, certifies that the applicant has fulfilled the departmental requirements, and provides a course transcript as evidence that work completed within the department is of high quality.

PhD/DMA students must be approved for candidacy before the beginning of the ninth semester of their enrollment at Rice. However, in order to qualify for a given commencement, they must meet the submission deadline for that commencement per the Academic Calendar (https://registrar.rice.edu/calendars/). This date falls at the end of October for December degree conferral and the end of February for May degree conferral.

Students who are unable to meet the university time boundary for candidacy may petition the dean of graduate and postdoctoral studies or his/her designee for an extension of time to candidacy. Students who exceed their time boundaries without an approved extension request will be charged a fee of $125 for reinstatement to good standing. Students who exceed their time boundaries and do not receive an extension to their time to candidacy are subject to immediate dismissal by the Office of Graduate and Postdoctoral Studies.

Thesis Committee
The thesis committee administers the oral examination for the student's thesis defense and has final approval/disapproval authority and responsibility for the written thesis.

A thesis committee is composed of at least three members. Two, including the committee chair, must be members of the student's department faculty; in doctoral thesis committees one member must have his or her primary appointment in another department within the university. At least three members of the committee must meet one of the following requirements:

- Tenured or tenure-track members of the Rice faculty
- Research faculty holding the rank of assistant research professor, associate research professor, or research professor
- Qualified individuals who have been certified as thesis committee members by the dean of graduate and postdoctoral studies

The composition of the thesis committee must always meet the guidelines mentioned above, with the following exceptions:

- Interdisciplinary programs (Applied Physics & SSPB) - The chair of the thesis committee is either the advisor or in the host department of the student, and is affiliated with the program. The second member of the committee is affiliated with the program. The third committee member of these programs must not be affiliated with either the student's graduate program or the department where their advisor has their primary appointment. The formal structure of the thesis committee for the programs can be found in the program specific sections of the General Announcements and are regularly reviewed by the Office of Graduate and Postdoctoral Studies.

The thesis director must be a tenured or tenure-track member of the Rice University faculty or a research faculty holding the rank of assistant research professor, associate research professor, or research professor. Faculty whose primary appointment is at another institution may serve as thesis director if approved by the dean of graduate and postdoctoral studies. Emeritus professors may not accept new graduate students without the approval of the dean of graduate and postdoctoral studies and an appointment letter from the school dean.

The committee chair need not be the thesis director. The chair, however, must be either a tenured or tenure-track member of the major department or a research faculty member of the student's major department. In addition to the three required members, additional members of the committee may be selected with the approval of the department chair.

In the event that a member of a students' thesis committee leaves their position at Rice University, they may continue serve on the thesis committee if they continue to have the support of the department chair.
(or in the case of interdisciplinary programs, the graduate program director) to serve in this capacity.

Candidates are responsible for keeping the members of their committee informed about the nature and progress of their research. They also must establish a schedule for thesis completion and review. The members of the committee, in turn, should review the thesis in a timely manner, approving a preliminary form of the thesis before scheduling the oral examination.

**Announcement of Thesis Defense**

Oral examinations for the doctoral degree must be announced at least 14 days in advance. Oral examination announcements are to be submitted to the Office of Graduate and Postdoctoral Studies by entering the information into the Graduate Students Thesis Defense Announcement form at [https://events.rice.edu/rgs](https://events.rice.edu/rgs).

**Oral Examination in Defense of Thesis**

The public oral defense of a thesis is intended to be an examination of a completed body of work and should be scheduled only when the thesis is essentially completed. Students may take the final oral examination in defense of their thesis only after the dean of graduate and postdoctoral studies approves their candidacy.

PhD and DMA students must defend their theses before the end of the 16th semester of their enrollment at Rice. Students who are unable to meet the university time boundary for thesis defense may petition the dean of graduate and postdoctoral studies or his/her designee for an extension of time to defense. Students who exceed their time boundaries without an approved extension request will be charged a fee of $125 for reinstatement to good standing. Students who exceed their time boundaries and do not receive an extension to their time to defense are subject to dismissal by the Office of Graduate and Postdoctoral Studies.

A candidate must be enrolled in the semester in which his or her oral examination is held. Students who defend during the summer must enroll in the summer session of classes. For the purpose of the oral defense only, enrollment in a semester is considered valid through the Friday of the first week of class of the following semester. Students passing the oral examination on or before the end of the first week of classes of any semester do not have to register for that or any subsequent semester even though they may be continuing to make minor revisions to the final copy of their thesis.

In addition to announcing the planned defense as described above, at least one copy of the thesis must be available in the departmental office not less than two calendar weeks prior to the date of the oral defense. Graduate programs may allow or require the thesis to be submitted and stored in an electronic format.

The length of the oral examination and the subject matter on which the candidate is questioned are left to the judgment of the thesis committee. The defense should be scheduled by the student after consultation with the thesis advisor, who agrees that the thesis is completed and ready to be defended. All oral thesis defenses must take place on the Rice University campus with the candidate and all thesis committee members in physical attendance. In exceptional cases, appeals to this requirement can be made in writing to the dean of graduate and postdoctoral studies.

Should a candidate fail, the committee chair may schedule a second examination. Students who fail a second time will be dismissed from the university.

Following their defense, students must submit a copy of their approval of candidacy form, signed by the thesis committee signifying successful defense of the thesis, to the Office of Graduate and Postdoctoral Studies within one week after the oral examination. Instructions to submit this form are located online at [https://graduate.rice.edu/thesis](https://graduate.rice.edu/thesis). The original approval of candidacy form must be turned in when the thesis is submitted.

**Thesis Submission Regulations and Procedures**

The thesis is the principal record of a student's work for an advanced degree. Instructions for online thesis submission and guidelines for thesis formatting are available at [https://graduate.rice.edu/thesis](https://graduate.rice.edu/thesis).

Candidates who successfully pass the oral examination in defense of the thesis must submit the thesis to the Office of Graduate and Postdoctoral Studies no later than six months from the date of the examination. If the thesis is not submitted by the end of the six-month period, the “pass” will be revoked and an additional oral defense will need to be scheduled. Applications for an extension without reexamination must be made by the candidate with the unanimous support of the thesis committee, endorsed by the department chair (or in the case of interdisciplinary programs, the graduate program director), and approved by the Office of Graduate and Postdoctoral Studies. Extensions of this six-month period for completion without reexamination will be granted only in rare circumstances. Approved petitions for extension without reexamination received after the six month time boundary expired will be charged a fee of $125 for reinstatement to good standing.

Students must have the original signatures of each member of their thesis committee on two title pages of their thesis. Students submitting a thesis for the PhD, DArch, or DMA must fill out a Survey of Earned Doctorates form and a ProQuest/University Microfilms International (UMI) publishing contract. Students must pay their thesis submission fee before submitting the thesis to the Office of Graduate and Postdoctoral Studies for degree approval.

All theses are permanently preserved in Rice's Institutional Repository and are available via [https://scholarship.rice.edu](https://scholarship.rice.edu) shortly after the final submission of the thesis. At the time of thesis submission, a student may request an embargo of six months, one year, or two years; embargoes beyond this period are subject to the approval of the dean of graduate and postdoctoral studies.

Students have six months from the date of their defense to submit their thesis. However, in order to qualify for a given degree conferral, they must meet the submission deadline for that degree conferral per the Academic Calendar [https://registrar.rice.edu/calendars/](https://registrar.rice.edu/calendars/). This date falls on the last day of classes in the fall and spring semesters.

**Departmental Duties**

In most research degree programs, students must undertake a limited amount of teaching or perform other services as part of their training. Assigned duties should not entail more than 10 hours per week, averaged over the semester, or extend over more than eight semesters.

**Other Requirements**

There are other additional requirements, regulations and procedures for all graduate programs. They are found under Graduate Students > Academic Policies and Procedures > All Graduate Students, or can be found online.
Regulations and Procedures for Diploma Programs

University Graduation Requirements for Diploma Programs

Diploma programs at Rice are post-master's degree academic credential programs. At present there are two diploma programs: the Artist Diploma (p. 575) offered by the Shepherd School of Music, and the Diploma in Liberal Studies (p. 519) offered by the Glasscock School of Continuing Studies. Declared Diploma Candidates in these programs may be awarded this academic credential after completing:

- A minimum of 30 graduate semester credit hours of coursework taken at the 500-level or above.
- A minimum of 24 graduate semester credit hours must be taken at Rice University.
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the diploma program.*
- A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University. Some diploma programs may require full-time residency or additional semesters of residency.
- All courses taken must be in the relevant field.

*Note: Departments or programs may identify and define in their program's General Announcements Requirements tab stricter standards than the minimum GPA for coursework that satisfies their academic program requirements.

Other Requirements

There are other additional requirements, regulations and procedures for all graduate programs. They are found under Graduate Students > Academic Policies and Procedures > All Graduate Students, or can be accessed directly here (p. 55).

Regulations and Procedures for Non-Thesis Master's Graduate Degrees

University Graduation Requirements for Non-Thesis Master's Degrees

Students also may pursue a non-thesis master's degree in certain departments. This degree would be based on alternative departmental requirements and would include, but not be limited to, the following:

- A minimum of 30 graduate semester credit hours of coursework taken at the 500-level or above.
- A minimum of 24 graduate semester credit hours must be taken at Rice University.
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree.*
- A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University. Some graduate programs may require full-time residency or additional semesters of residency.
- All courses taken must be in the relevant field.

*Note: Departments or programs may identify and define in their program's General Announcements Requirements tab stricter standards than the minimum GPA for coursework that satisfies their academic program requirements.

Time to Degree

All master's students are required to complete their program within five years of initial enrollment. This time boundary includes any period in which the student was not enrolled or enrolled part time, for whatever reason. Failure to meet any university time to degree deadline may result in the student not being able to continue in their degree program.

Applicable Academic Graduation Requirements

Non-thesis master's students must meet the minimum university requirement for the academic credential, in addition to any program specific requirements. The official certifier of the graduate or the relevant program curriculum committee, may petition the dean of graduate and postdoctoral studies, or the dean's designee to allow substitutions or waivers to the degree requirements when academically appropriate. Graduate programs may not independently allow substitutions or waivers to program specific degree requirements.

Other Requirements

There are other additional requirements, regulations and procedures for all graduate programs. They are found under Graduate Students > Academic Policies and Procedures > All Graduate Students, or can be accessed directly here (p. 55).

Regulations and Procedures for Thesis Master's Graduate Degrees

University Graduation Requirements for Thesis Master's Degrees

Candidates receive a master's degree after completing:

- A minimum of 30 graduate semester credit hours of coursework taken at the 500-level or above (including thesis credit hours).
- A minimum of 24 graduate semester credit hours must be taken at Rice University.
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the thesis master's degree.*
- A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
- Original work reported in a thesis and a public oral examination, approved and submitted to the Office of Graduate and Postdoctoral Studies.

*Note: Departments or programs may identify and define in their program's General Announcements Requirements tab stricter standards than the minimum GPA for coursework that satisfies their academic program requirements.
Candidacy, Oral Examinations, and Thesis

Time Boundaries for Candidacy and Defense

Time To Candidacy

MArch students must be approved for candidacy before October 31st prior to their juried defense. MMus students must be approved for candidacy before beginning the 4th semester of study. All other thesis master’s students must be approved for candidacy no later than the beginning of the 5th semester of their enrollment in the degree program at Rice. See Candidacy, Oral Examinations and Thesis (p. 69).

Time to Defense

Master’s students must defend the thesis no later than the 8th semester from the date of their enrollment in the degree program at Rice. See Candidacy, Oral Examinations and Thesis (p. 70).

Time to Thesis Submission

Candidates who successfully pass the oral examination in defense of the thesis must submit the thesis to the Office of Graduate and Postdoctoral Studies no later than six months from the date of the examination. See Candidacy, Oral Examinations and Thesis (p. 70).

Time to Degree

All master’s students are required to complete their program within five years of initial enrollment. This time boundary includes any period in which the student was not enrolled or enrolled part-time, for whatever reason. Failure to meet any university time to degree deadline may result in the student not being able to continue in their degree program.

Approval of Candidacy

Candidacy marks a midpoint in the course of graduate education. Achieving candidacy for the master’s degree signals that a graduate student has:

1. completed required coursework,
2. passed any required exams to demonstrate his/her comprehensive grasp of the subject area,
3. demonstrated the ability for clear oral and written communication, and
4. shown the ability to carry on scholarly work in his/her subject area.

Requirements for achieving candidacy for the master’s degree are determined at the departmental (p. 93) level. The department is also authorized to grant waivers or substitutions of specific course requirements, but not to make exceptions to university requirements.

Students enrolled in research degree programs submit their petitions for candidacy for a master’s degree through the department chair to the dean of graduate and postdoctoral studies. In the petition sent to the dean, the department chair identifies the student’s thesis director, recommends a thesis committee, certifies that the applicant has fulfilled the departmental requirements, and provides a course transcript as evidence that work completed within the department is of high quality.

Master’s candidacy students must be approved for candidacy before the beginning of the fifth semester of their enrollment at Rice. However, in order to qualify for a given commencement, they must meet the submission deadline for that commencement per the Academic Calendar (https://registrar.rice.edu/calendars/). This date falls at the end of October for December degree conferral and the end of February for May degree conferral.

Students who are unable to meet the university time boundary for candidacy may petition the dean of graduate and postdoctoral studies or his/her designee for an extension of time to candidacy. Students who exceed their time boundaries without an approved extension request will be charged a fee of $125 for reinstatement to good standing. Students who exceed their time boundaries and do not receive an extension to their time to candidacy are subject to immediate dismissal by the Office of Graduate and Postdoctoral Studies.

Thesis Committee

The thesis committee administers the oral examination for the student’s thesis defense and has final approval/disapproval authority and responsibility for the written thesis.

A thesis committee is composed of at least three members. Two, including the committee chair, must be members of the student’s department faculty. At least three members of the committee must meet one of the following requirements:

- Tenured or tenure-track members of the Rice faculty
- Research faculty holding the rank of assistant research professor, associate research professor, or research professor
- Qualified individuals who have been certified as thesis committee members by the dean of graduate and postdoctoral studies

The composition of the thesis committee must always meet the guidelines mentioned above, with the following exceptions:

- Interdisciplinary programs (Applied Physics & SSPB) - The chair of the thesis committee is either the advisor or in the host department of the student, and is affiliated with the program. The second member of the committee is affiliated with the program. The formal structure of the thesis committee for the programs can be found in the program specific sections of the General Announcements and are regularly reviewed by the Office of Graduate and Postdoctoral Studies.
- Master of Architecture - The committee chair must be a tenured or tenure-track faculty member. Other committee members can be tenured, tenure-track, or non-tenure track Rice faculty.

The thesis director must be a tenured or tenure-track member of the Rice University faculty or a research faculty holding the rank of assistant research professor, associate research professor, or research professor. Faculty whose primary appointment is at another institution may serve as thesis director if approved by the dean of graduate and postdoctoral studies. Emeritus professors may not accept new graduate students without the approval of the dean of graduate and postdoctoral studies and an appointment letter from the school dean.

The committee chair need not be the thesis director. The chair, however, must be either a tenured or tenure-track member of the major department or a research faculty member of the student’s major department. In addition to the three required members, additional members of the committee may be selected with the approval of the department chair.

In the event that a member of a students’ thesis committee leaves their position at Rice University, they may continue serve on the thesis committee if they continue to have the support of the department chair (or in the case of interdisciplinary programs, the graduate program director) to serve in this capacity.

Candidates are responsible for keeping the members of their committee informed about the nature and progress of their research. They also must
establish a schedule for thesis completion and review. The members of the committee, in turn, should review the thesis in a timely manner, approving a preliminary form of the thesis before scheduling the oral examination.

**Announcement of Thesis Defense**

Oral examinations for the master’s degree must be announced at least 7 days in advance. Oral examination announcements are to be submitted to the Office of Graduate and Postdoctoral Studies by entering the information into the Graduate Students Thesis Defense Announcement form at [https://events.rice.edu/rgs](https://events.rice.edu/rgs).

**Oral Examination in Defense of Thesis**

The public oral defense of a thesis is intended to be an examination of a completed body of work and should be scheduled only when the thesis is essentially completed. Students may take the final oral examination in defense of their thesis only after the dean of graduate and postdoctoral studies approves their candidacy.

Master’s students must defend their theses before the end of the eighth semester of their enrollment at Rice. Students who are unable to meet the university time boundary for thesis defense may petition the dean of graduate and postdoctoral studies or his/her designee for an extension of time to defense. Students who exceed their time boundaries without an approved extension request will be charged a fee of $125 for reinstatement to good standing. Students who exceed their time boundaries and do not receive an extension to their time to defense are subject to dismissal by the Office of Graduate and Postdoctoral Studies.

A candidate must be enrolled in the semester in which his or her oral examination is held. Students who defend during the summer must enroll in the summer session of classes. For the purpose of the oral defense only, enrollment in a semester is considered valid through the Friday of the first week of class of the following semester. Students passing the oral examination on or before the end of the first week of classes of any semester do not have to register for that or any subsequent semester even though they may be continuing to make minor revisions to the final copy of their thesis.

In addition to announcing the planned defense as described above, at least one copy of the thesis must be available in the departmental office not less than two calendar weeks prior to the date of the oral defense. Graduate programs may allow or require the thesis to be submitted and stored in an electronic format.

The length of the oral examination and the subject matter on which the candidate is questioned are left to the judgment of the thesis committee. The defense should be scheduled by the student after consultation with the thesis advisor, who agrees that the thesis is completed and ready to be defended. All oral thesis defenses must take place on the Rice University campus with the candidate and all thesis committee members in physical attendance. In exceptional cases, appeals to this requirement can be made in writing to the dean of graduate and postdoctoral studies.

Should a candidate fail, the committee chair may schedule a second examination. Students who fail a second time will be dismissed from the university.

Following their defense, students must submit a copy of their approval of candidacy form, signed by the thesis committee signifying successful defense of the thesis, to the Office of Graduate and Postdoctoral Studies within one week after the oral examination. Instructions to submit this form are located online at [https://graduate.rice.edu/thesis](https://graduate.rice.edu/thesis). The original approval of candidacy form must be turned in when the thesis is submitted.

**Thesis Submission Regulations and Procedures**

The thesis is the principal record of a student’s work for an advanced degree. Instructions for online thesis submission and guidelines for thesis formatting are available at [https://graduate.rice.edu/thesis](https://graduate.rice.edu/thesis). Candidates who successfully pass the oral examination in defense of the thesis must submit the thesis to the Office of Graduate and Postdoctoral Studies no later than six months from the date of the examination. If the thesis is not submitted by the end of the six-month period, the “pass” will be revoked and an additional oral defense will need to be scheduled. Applications for an extension without reexamination must be made by the candidate with the unanimous support of the thesis committee, endorsed by the department chair (or in the case of interdisciplinary programs, the graduate program director), and approved by the Office of Graduate and Postdoctoral Studies. Extensions of this six-month period for completion without reexamination will be granted only in rare circumstances. Approved petitions for extension without reexamination received after the six month time boundary expired will be charged a fee of $125 for reinstatement to good standing.

Students must have the original signatures of each member of their thesis committee on two title pages of their thesis. All students submitting theses must complete a ProQuest/University Microfilms International (UMI) publishing contract. Students must pay their thesis submission fee before submitting the thesis to the Office of Graduate and Postdoctoral Studies for degree approval.

All theses are permanently preserved in Rice’s Institutional Repository and are available via [https://scholarship.rice.edu](https://scholarship.rice.edu) shortly after the final submission of the thesis. At the time of thesis submission, a student may request an embargo of six months, one year, or two years; embargos beyond this period are subject to the approval of the dean of graduate and postdoctoral studies.

Students have six months from the date of their defense to submit their thesis. However, in order to qualify for a given degree conferral, they must meet the submission deadline for that degree conferral per the Academic Calendar. This date falls on the last day of classes in the fall, spring, and summer semesters.

**Departmental Duties**

In most research degree programs, students must undertake a limited amount of teaching or perform other services as part of their training. Assigned duties should not entail more than 10 hours per week, averaged over the semester, or extend over more than eight semesters.

**Other Requirements**

There are other additional requirements, regulations and procedures for all graduate programs. They are found under Graduate Students > Academic Policies and Procedures > All Graduate Students, or can be accessed directly here (p. 55).

**Student Services and Organizations**

- Clubs and Organizations (p. 71)
- Disability Resource Center (p. 72)
• Financial Aid (p. 72)
• Graduate Student Government (p. 74)
• Graduate Student Life (p. 74)
• Health, Counseling and Wellbeing (p. 75)
• Tuition, Fees and Expenses (p. 77)

Clubs and Organizations
Office of Student Activities

The Office of Student Activities, located in the Rice Student Center, oversees the activities of various campus-wide student organizations, student requests for facilities usage, and coordination of various leadership development programs.

In addition to managing the registration process, finances, and general advising for over 280 registered clubs at Rice University, Student Activities provides direct advising to the following organizations:

- Graduate Student Association (GSA) (https://gsa.rice.edu/ - Graduate student government with many opportunities for graduate student involvement including a variety of social and professional development events and ways to volunteer
- Leadership Summit (https://studentcenter.rice.edu/summit/) - Advanced student leadership development program

The Rice University clubs are divided into eleven genres: Academic/Honorary, Cultural/International, Environmentalism and Sustainability, Political, Recreational/Sport, Religious/Spiritual, Service, Social Justice, Social/Special Interest, STEM, and Visual/Performing Arts. The full list of registered clubs can found online (https://studentcenter.rice.edu/club-listings/). Student Activities also provides leadership development opportunities in the form of Lunch and Lead sessions, Base Camp workshops, Leadership Summit, and partnership events through graduate clubs and the GSA.

A large number of student organizations address special student interests, such as the Black Graduate Student Association, Indian Students at Rice, Chinese Students and Scholars Association, and the GSA. There are also numerous sport-related clubs such as sailing, rugby, volleyball, and soccer. Additionally, department level government organizations also provide involvement opportunities for graduate students.

Student Activities also recognizes a number of religious and spiritual organizations. These include, but are not limited to, Chi Alpha Christian Ministries, the Baptist Student Ministry, Catholic Student Association, Hillel, the Muslim Student Association, and the Boniuk Council for Interfaith. Many of these clubs are assisted by local clergy or staff and form the Joint Campus Ministers (https://studentcenter.rice.edu/student-activities/group/club-resources/joint-campus-ministries/).

The Clubs Office is located in the basement of the Rice Student Center and provides computers, workspace, storage, and a color copier for club convenience.

For more information on the Office of Student Activities, please visit https://studentcenter.rice.edu/student-activities/.

Rice Student Volunteer Program

By heightening student awareness of community needs and generally raising social consciousness, the Rice Student Volunteer Program (RSVP) has organized volunteer projects for Rice students, faculty, and staff since 1985. Historically, the most popular event of each semester is Outreach Day, a Saturday when students volunteer with multiple nonprofit agencies throughout the Houston area, learning how to take thoughtful action to build a stronger, more just community. RSVP invites each student’s involvement as an officer, a committee member, a project organizer, or an interested participant in any RSVP event.

For more information on the Rice Student Volunteer Program, please visit https://www.rsvp.rice.edu/.

Intercollegiate Speech and Debate

Consistently ranked in the top 10 nationally, the George R. Brown Forensic Society sponsors competition in the categories of Individual Events, Lincoln–Douglas, and Parliamentary Debate. The society provides students with the chance to hone their public speaking skills and to qualify for competition both at the American Forensic Association National Individual Events Tournament and at the National Parliamentary Debate Championships. Recognizing the importance of developing strong communication skills, the society has an open admission policy, inviting students with little or no previous experience as well as those with extensive high school backgrounds to become members of one of the most successful teams at Rice.

For more information on speech and debate, please visit: https://debate.rice.edu/.

Office of Multicultural Affairs

The Office of Multicultural Affairs (OMA) has, as its primary mission, coordinating and implementing comprehensive educational, cultural, and social programs designed to emphasize inclusiveness, while promoting intercultural dialogue, awareness, and respect for diversity. Through advocacy, cultural programs, and education, OMA also helps students understand and appreciate racial, ethnic, gender, and other differences, while creating opportunities for students to challenge prejudice and expand their cultural knowledge and appreciation.

OMA utilizes its programming and support systems to provide an optimum developmental environment where all members of the University community may develop to the highest level of their potential in an atmosphere free from harassment and bias, thereby ensuring Rice’s standing as an intellectually and culturally vibrant community. Cultural student clubs, such as the Black Student Association, the Hispanic Association for Cultural Enrichment at Rice, and the Rice Native American Student Association, meet regularly with OMA to discuss programming logistics and other issues. OMA also directly advises ADVANCE (Advancing Diversity and the Need for Cultural Exchange), a student club that hosts a weekly discussion on a topical issue, and organizes an annual cultural fair. Other programs for students under OMA include HARAMBE, (Swahili for ‘working together in unity’ or ‘let’s pull together’), a group that seeks to create a unifying event for entering African-American students, allowing them to build social and academic connections with peers, faculty, and staff, and FRESH, a group dedicated to forming relationships through education, scholarship, and heuristics at Rice.
For more information about the Office of Multicultural Affairs, please visit https://oma.rice.edu/.

Disability Resource Center

Located on the first floor of Allen Center, the Disability Resource Center coordinates campus services for individuals with documented disabilities. For academic accommodations, adaptive equipment, or disability-related housing needs, the Disability Resource Center is the campus resource for all students with disabilities. Information is maintained on scholarships, internships, and other programs specific to students with disabilities. Students can schedule an appointment with the director of the Disability Resource Center by calling 713-348-5841. For more information, see the Disability Resource Center website at https://drc.rice.edu.

Section 504/ADA Coordinator

The director of affirmative action serves as the Section 504/ADA coordinator at Rice University. Concerns or complaints relative to disability issues should be directed to the Office of Affirmative Action (https://eoeppa.rice.edu/) 205 Allen Center, 713-348-4930.

Financial Aid

Fellowships, Scholarships, and Assistantships

A range of fellowships, scholarships, and assistantships are available at Rice. Most graduate students in degree programs requiring a thesis are supported by fellowships or research assistantships.

Rice Graduate Fellowships

Doctoral students with high academic records and strong qualifications receive support through Rice fellowships. In most cases, these fellowships provide a stipend plus tuition.

Research and Teaching Assistantships

Usually funded from grants and contracts, research assistantships are available in many graduate programs. Qualified students (usually second-year or later) receive these awards to provide assistance on faculty research projects, work that usually contributes to the student’s own thesis. In some departments, a limited number of teaching assistantships may be available to advanced students. In most cases, these assistantships provide a stipend plus tuition.

Fellowship, scholarship, and assistantship recipients are selected by the individual graduate programs, subject to the approval of the Office of Graduate and Postdoctoral Studies. Students should send their applications for such awards directly to the graduate program involved.

To receive Rice fellowships, graduate tuition scholarships, or assistantship aid, students must be engaged in full-time graduate study; part-time students and students who are not enrolled are not eligible for such aid.

Students receiving stipends from fellowships or assistantships may not accept any regular paid employment on or off campus without the explicit permission of the graduate program. Full-time students, whether receiving stipend support or not, may not accept paid employment in excess of 20 hours per week without the explicit permission of both the graduate program as well as the dean of graduate and postdoctoral studies.

Please see the Graduate and Postdoctoral Program website (https://graduate.rice.edu/financialsupport/) for more information.

Merit-Based Scholarships

Graduate students admitted to the Full-Time MBA and Master of Accounting (MAcc) programs as well as the Shepherd School of Music and the School of Architecture may be considered for limited merit-based scholarships. Assessment of eligibility occurs during the admission process; there is no separate application. Recipients are notified of merit scholarships at the time of admission or shortly after.

Summer Assistance

Graduate students may register for summer research hours. Student accounts will be charged based on the summer rates listed on the Tuition & Fees (https://cashier.rice.edu/tuition_fee_rates/) page of the Cashier’s website. A waiver will be applied to cover the cost of the research hours.

However, with limited exception, tuition is charged for all other courses offered in the summer semester. As with fall and spring, the Office of the Registrar manages the summer course schedule, and any questions on course offerings should be directed to that office. Tuition waivers are not available for summer classes, even for students who receive full tuition waivers during the fall and spring semesters.

Graduate students are eligible to apply for federal, state, and private educational loans if they are registered during the summer semester.

Loans

In addition to fellowships, scholarships, and assistantships, the Office of Financial Aid (https://financialaid.rice.edu/) offers assistance in the form of loans. Interested students must file a Free Application for Federal Student Aid (https://fafsa.ed.gov/) (FAFSA). If selected for federal verification, students may also be required to submit copies of income tax transcripts and W-2’s. The priority deadline to apply is May 15.

To be eligible to apply for loans, graduate students must maintain satisfactory academic progress as defined by their graduate program. Should a graduate student fail to make satisfactory academic progress, the student’s aid eligibility will be suspended. Graduate students who enroll for less than half-time in a semester or term will not be eligible for financial aid. Half-time is 4.5 hours for students in programs that use Rice’s three-semester Academic Calendar (https://registrar.rice.edu/calendars/). Half-time is 3 hours for students in programs that use the four-quadsemester Academic Calendar (https://registrar.rice.edu/calendars/) (e.g. MBA@Rice).

Loans cannot exceed the student’s cost of education, as determined by Rice, minus other resources. Loans may be adjusted or canceled due to changes in eligibility or other resources.

A summary listing of student consumer information is available through the Office of Financial Aid (https://financialaid.rice.edu/consumer-information/)..

Federal Student Loans

These are loans made to students attending the university at least half-time. Federal Direct Unsubsidized Loans and PLUS Loans are available to degree-seeking students meeting Federal Student Aid eligibility requirements regardless of need. Loan eligibility is subject to annual and lifetime borrowing limits; Federal Direct PLUS Loans require a
satisfactory credit check. In addition, loans cannot exceed the student’s cost of education, as determined by Rice, minus other resources.

**Loan Counseling**

Students who are recipients of federal student loans will be required to complete online loan entrance counseling before funds will be credited to student accounts. Students also will be required to complete online exit counseling at the completion of a program of study, enrollment of less than half-time, or withdrawal from Rice. Failure to complete online exit counseling will result in a transcript hold.

**Private Loan Programs**

Private loans are available to graduate and MBA students. These loans are not based on need but do require credit approval from the lender and cannot exceed the student’s cost of education, as determined by Rice, minus other resources.

**Disbursements**

Financial aid awards during the academic year occur in two equal disbursements (Fall and Spring) for on campus programs and in three equal disbursements (quadmester 1, 2, and 3) for MBA@Rice. The scheduled disbursements are credited to the student’s account each term by the third day of class or upon completion of financial aid requirements, whichever is later. Missing requirements may be reviewed through the financial aid tab in Esther. Additional disbursement information is available on the Office of Financial Aid ([https://financialaid.rice.edu/](https://financialaid.rice.edu/)) website.

**Special Loan Programs**

A Gulf Oil Corporation Foundation Loan Fund and the Benjamin S. Lindsey and Veola Noble Lindsey Memorial Loan Fund are available to help students working toward a degree meet their educational expenses. The funds are limited, between $500 to $2000. Interested students may contact the Office of Financial Aid ([https://financialaid.rice.edu/](https://financialaid.rice.edu/)).

**The Mary Lyn and Niles Moseley Loan Fund and the Professor John A. S. Adams, Sr., Memorial Graduate Student Loan Fund**

These funds provide financial assistance, in the form of loans, to graduate students at Rice University, with the exception of Jones School master’s and Liberal Studies students. Students wishing to apply for such a loan should obtain an application from the Office of Student Financial Services. Guidelines for the program are:

- Individual loans are made for an amount not to exceed $2,000.
- Loans are made for a period of up to one year and, upon request, may be renewable annually.
- The interest rate applicable to these loans is determined by the university.
- Graduate students must be enrolled on a full-time basis to be eligible to apply for a loan and must maintain full enrollment during the full term of the loan.
- Upon completion, applications are submitted to the Office of Graduate and Postdoctoral Studies ([https://gps.rice.edu/](https://gps.rice.edu/)) for approval.
- Loans are available during the full course of the academic year.
- Loans must be repaid in full before graduation.
- Registration, transcripts, and diplomas will be held for students and former students who are in arrears on these loans.

For more information, visit [https://graduate.rice.edu/moseleyadams](https://graduate.rice.edu/moseleyadams) ([https://graduate.rice.edu/moseleyadams/](https://graduate.rice.edu/moseleyadams/)).

**Emergency Loan Fund**

Established through gifts from the Graduate Wives Club of 1972–73, the Graduate Student Association, and various faculty members, this fund makes available emergency loans to help graduate students at Rice with short-term needs. Loans are limited to $500 and must be repaid within 90 days. In lieu of interest, a charge of 2% of the principal loan is assessed to maintain the fund.

**Student On Campus Employment**

Opportunities for employment are available to students during the academic year. Students are eligible to work under either the Federal Work-Study Program or the Rice Work Program. Students interested in employment should access the Office of Financial Aid ([https://financialaid.rice.edu/](https://financialaid.rice.edu/)) webpage.

**Deferred Payment Plan**

Rice offers a deferred payment plan to finance students’ educational costs. This plan divides each semester’s charge over four installments. Details are available to eligible students each semester at the time of billing. Students arrange for deferred payment through the Cashier’s Office ([https://cashier.rice.edu/](https://cashier.rice.edu/)).

**Satisfactory Academic Progress**

Federal regulations (CRF § 668.34) require that graduate students demonstrate satisfactory academic progress toward completion of their degree to continue to receive federal and state financial aid. In addition to meeting the standard for receiving financial aid, students must also meet the academic standards of Rice University.

Satisfactory academic progress is comprised of three areas as required by federal regulations. A student must complete their degree within a specified period that does not exceed 150% of the published length of the program, demonstrate they are making progress towards the completion of their degree by successfully completing 67% percent of all attempted courses, and maintain at least the minimum cumulative GPA requirement for the program in which they are enrolled. This regulation applies to each financial aid applicant, whether a previous recipient or not.

Credits counted in the maximum time are all attempted credits (even when not a financial aid recipient). Attempted credits include:

- Earned credits – Passed (A+ through D-), Satisfactory (S)
- Repeated courses
- Withdrawal
- Failures – Failed (F), Unsatisfactory (U)
- Incomplete
- All accepted transfer credits toward the degree program

If a student fails to meet the satisfactory academic progress standards by the end of the academic year, the student will be placed on Financial Aid Suspension and will not be eligible for aid until the satisfactory academic progress standards are met.

**Appeal**

Students are allowed to appeal their Financial Aid Suspension in cases of the death of a relative, an injury or illness of the student, or other
special circumstances. Students must submit a letter discussing why the student failed to make satisfactory academic progress, and what has changed in the student’s situation that will allow the student to demonstrate satisfactory academic progress at the next evaluation. Supporting documentation (doctor’s letter or academic plan) must accompany the appeal letter and must be submitted to the Office of Financial Aid (https://financialaid.rice.edu/) prior to the beginning of the subsequent term. The Appeals Committee will review appeals on a case-by-case basis.

If an appeal is approved by the Appeals Committee, the student will be placed on financial aid probation and may receive financial aid for one probationary semester. At the end of the probationary semester, the student must meet the satisfactory academic progress standards or meet the requirements of an approved academic plan developed by the student’s department or program.

Financial Aid after Academic Suspension
Students who have been suspended by the university for academic reasons need to be aware that if they are readmitted, they may not be eligible for financial aid based on their prior academic performance. Students who are petitioning for readmission are advised to contact the Office of Financial Aid (https://financialaid.rice.edu/) to determine their aid eligibility.

Return of Title IV Funds
Students who receive federal funds as part of their aid packages and do not complete the academic term may be subject to returning a portion of those funds. Contact the Office of Financial Aid (https://financialaid.rice.edu/) for information about policies and procedures regarding the return of Title IV funds.

Other Fellowships, Honors, and Prizes
Provisions are made for a variety of fellowships, scholarships, and prizes available to graduates of this and other universities. Memorial fellowships that have been founded and endowed by gift or bequest on the part of friends of Rice University provide stipends enabling the holders to devote their time to study and research in their chosen fields. There also are several industrial fellowships maintained by companies interested in the development of technical fields and the training of competent scientists, engineers, and business executives.

Persons desiring consideration for appointment as fellows should consult with the graduate program in which they wish to do research. However, not all fellowships are available every year.

Graduate Student Government
Graduate Student Association
All full-time students in graduate programs are members of the Graduate Student Association (GSA). The mission of the GSA is to enrich the graduate student experience and to represent, support, and promote graduate student interests and values. An integral and essential part of the Rice community, the GSA provides programs and services aiding in recruitment and retention of graduate students, represents graduate student interests to the University administration, and builds a strong sense of community both on and off campus.

The GSA represents all graduate students and is comprised of two branches: the Council and the Executive. The Council consists of representatives from all departments who serve as the voting body for the graduate students. The Executive is led by the president, internal vice president, external vice president, secretary, and treasurer, and these positions are elected by the Council. Graduate students also participate in university affairs through their representatives on many standing and ad hoc university committees, such as the Graduate Council, the Research Council, and various department committees.

One function of the GSA is to promote academic, professional, and personal development of graduate students. The association accomplishes this by supporting professional development opportunities, alumni networking, and well-being programs for students. Another function of the GSA is to encourage social interaction among graduate students from different departments and cultures. To that end, the association organizes a variety of social activities, including picnics, intramural sports, and volunteer opportunities, that are open to all members of the graduate student body. For more information on the Graduate Student Association, see https://gsa.rice.edu/.

School and Department Graduate Student Associations
A second strata of graduate student governance on campus are the specific GSAs of schools and departments who represent particular concerns and interests of students to the deans, to the chairs, and to the larger GSA. Each school and/or department is encouraged to develop its own governing structure to advocate for graduate concerns and initiatives at Rice.

Graduate Student Life
Housing for Graduate Students
Graduate students have two different housing facilities: Rice Graduate Apartments and Rice Village Apartments. Both properties are within walking distance from the campus, and also provide easy transportation to and from campus and all shopping needs on the weekend through a shuttle service. They also provide social activities and events to help students take a break from their studies. Each community is unique in its own way and provides a broad living environment. For all property information, please visit http://campushousing.rice.edu/graduate-housing/.

Rice Graduate Apartments is a garden style complex located just north of campus on Bissonnet. The community includes quick and easy access to campus, study rooms, laundry facilities, bike rooms, two courtyards, and recreational areas. Electronically controlled access gates for pedestrian and vehicular paths are provided. ADA accessible units are available to students requesting reasonable accommodations. Each apartment is furnished with a bed, desk, desk chair, night stand, chest of drawers, and a bookshelf. In addition, each unit includes basic cable, water, and Wi-Fi Internet. Housing is assigned through a lottery, with a high placement rate given to incoming graduate students. For further information, visit the website above, call 713-348-GRAD (4723), or email gradaps@rice.edu.

The Rice Village Apartments is a four-story contemporary style community located on Shakespeare Street within a short walk of the Village. It offers four ADA accessible units for students requesting reasonable accommodations, and also offers family housing. Each unit offers appliances equipped with Energy Star efficiency to conserve energy and protect the environment. In addition, it is furnished with a dresser, nightstand, desk, chair, and bed. Basic cable, Wi-Fi Internet, and water also are included. The laundry facility has a system that can email
alert you when your laundry is done. Other amenities include common areas, study rooms, a recreational area, bike room, and a community herb garden. Controlled security access is provided by a keyless front door using either a biometric fingerprint or a key fob system. Housing is assigned through a lottery, with a high placement rate given to incoming graduate students. For more information, call 713-348-4050, or email rvapts@rice.edu.

Rice Student Center
The Student Center provides services and developmental opportunities to build community and enrich the Rice experience through facilities, events, student run businesses, and student activities. It houses a variety of retail and dining operations including the campus store, Sammy’s, 4.Tac0, and Ambassador Cafe. The Graduate Student Lounge, Multicultural Center, and the Clubs offices are all located in the basement with other student life offices throughout the building, including meeting rooms for departments, clubs, and organizations. Visitors can also make use of an ATM located outside the store and ask questions of the Information Desk staff located near the circle drive. Students and visitors alike can enjoy a beverage of their choice and fellowship with their peers at the Rice Coffeehouse (http://coffeehouse.rice.edu/), purchase a late night snack from the Hoot (http://thethehoot.rice.edu/), or visit the new Rice Bikes (http://bikes.rice.edu/) location in the Housing and Dining Garage located on the inner loop to rent a bicycle or get repairs.

For more information on the Student Center, visit http://studentcenter.rice.edu.

For information regarding services and resources for graduate students, please visit https://graduate.rice.edu/lifeatrice (https://graduate.rice.edu/lifeatrice).

Health, Counseling and Wellbeing

Health and Wellness Support Services Fee
By paying an annual Health and Wellness Support Services Fee, all students gain access to the Student Health Services (https://studenthealth.rice.edu), Rice Counseling Center (https://wellbeing.rice.edu/) and the Student Wellbeing Office (https://wellbeing.rice.edu/). Detailed information on the care and services each provide is available from these centers. The Health and Wellness Support Services Fee is a required fee for all enrolled students, except those in “away” status. See Away Status (p. 77) for more information.

Student Health Services
Student Health Services, an outpatient medical clinic, is located in the Morton L. Rich Health Center. The clinic is staffed by primary care physicians, nurses, and ancillary support staff. More information can be found at https://health.rice.edu (https://health.rice.edu/).

Clinic hours are from 8:00 a.m. to 5:00 p.m., Monday through Friday, during fall and spring semesters. For after-hours and weekend medical care, students may choose among a number of local clinics and hospitals (guidance on self-care as well as local healthcare options can be found on the website). The clinic is open full-time from the first day of Orientation Week until the day before commencement. It is closed during Thanksgiving and the winter recess. The clinic is also open for reduced hours during the summer months. Visits to the clinic are covered by the services fee, however, students must pay for all medical care outside the clinic’s purview, including blood tests, x-rays, and outside physician consultations. Should such medical care be necessary, students are urged to review their insurance coverage and pick the best available option.

Care at the clinic is arranged through appointment at 713-348-4966. In emergencies, students should call the Rice University Police Department (https://rupd.rice.edu/) at 713-348-6000.

The Student Health Service provides the following:

• Medical care for illness and injury with referrals to specialists when needed
• Maintenance of health records for all students
• Immunizations and other preventive services
• General information for all students
• Contraceptive counseling and routine Pap smears
• Physical examinations

Confidentiality for Health Services
The Student Health Service physician–patient relationship is a confidential one. Medical records will be released only on receipt of written authorization from the student or as required by law or when the patient poses a significant risk to herself or himself or another person. Physicians with Student Health Services are considered confidential employees under Title IX, meaning that should a student wish to speak about domestic or sexual violence or stalking with a physician, his/her information is confidential and will not be released without their expressed written consent. The only exception to this is for students under the age of 18.

Health Insurance
All registered students are required to maintain health insurance coverage while enrolled at Rice University with the exception of visiting post baccalaureates, auditors, and students enrolled in the part-time Masters of Liberal Studies program through the Glasscock School of Continuing Studies.

Students are required to either enroll in the Rice student health insurance plan administered by Aetna Student Health, or complete an online waiver application demonstrating comparable insurance coverage (https://studenthealthinsurance.rice.edu/about/waiver-requirements/). Every eligible student will have the insurance premium fee placed on their account until they have actively enrolled in insurance coverage or submitted a waiver. The student’s tuition bill will be updated based on successful completion of enrollment or the waiver application. Insurance and waiver applications, as well as specific dates for enrolling, frequently asked questions, and more can be found on the Rice Student Insurance website: https://studenthealthinsurance.rice.edu

The fall student insurance open enrollment period will begin on July 9, 2019 and end on August 30, 2019. The spring student insurance open enrollment period will begin on December 2, 2019 and end on January 17, 2020. Please note, however, that students have until August 30, 2019 (Fall) or January 17, 2020 (Spring) to remove the student insurance charge by submitting a successful waiver application. All students who have not taken action to enroll in or waive coverage by the open enrollment deadlines will be automatically enrolled in the student insurance annual plan. The premium amount will not be prorated. Once enrolled in coverage, students are unable to cancel coverage for any reason. Please note the automatic enrollment process does require additional processing time. You may have to pay out of pocket
for medical services until your enrollment has been processed. Once processed, you will be able to file a claim for reimbursement.

For questions concerning the Rice plan, please contact studentinsurance@rice.edu or call (713) 348-5544.

NOTE: Students may enroll in an annual plan or by semester only. If you waive coverage in the fall open enrollment period, you are still expected to have insurance coverage for the spring. If you enroll in the fall semester plan, you may enroll or submit a waiver for the spring semester plan.

If you are auto-enrolled in the fall, you will be enrolled in the annual plan and will not be able to waive spring coverage. If you experience a qualifying life event (https://studenthealthinsurance.rice.edu/about/qualifying-life-events/) and need to enroll in coverage mid-year, please email studentinsurance@rice.edu.

International students that have an F1 or J1 visa are subject to the Rice University International Student Health Insurance Policy. For more information on the policy, please visit the OISS website (https://oiss.rice.edu/). Here students will find detailed information concerning the approved alternative insurance option through Student Assurance Services (SAS), as well as application and rate information.

Wellbeing and Counseling Center Services

Center Contact Information

The Wellbeing and Counseling Center provides confidential counseling treatment as well as wellbeing case management services and Title IX support for graduate and undergraduate students. The Center also provides mental health and wellbeing related education for the student body. The Wellbeing and Counseling Center is located in the Barbara and David Gibbs Recreation and Wellness Center. The Center is open Monday - Friday from 9:00a.m. to 5:00p.m. Walk-ins are available during business hours. For appointments contact the Wellbeing and Counseling Center at 713-348-3311 (24/7) or visit https://wellbeing.rice.edu/ for more information. In emergencies, students should call the Rice University Police Department (https://rupd.rice.edu/) at 713-348-6000.

Rice Counseling Center

The Rice Counseling Center addresses students’ psychological needs with various programs and services. Services are confidential. Student information is not released to anyone without the student’s written consent. There are no costs for Counseling Center services.

Typically, students who use the counseling services bring with them very common concerns: roommate problems, breakup of a relationship, academic and/or interpersonal anxiety, family problems, difficulties adjusting to Rice, or confusion about personal goals, values, and identity. Counselors are equipped to handle a variety of issues, including substance use, eating concerns, sexual assault and relationship violence, depression, and the coming-out process. Rice Counseling Center offers both individual and group counseling, as well as educational workshops and programs.

When students need long term or specialized counseling or treatment, counselors refer them to an outside provider. The students, or their health insurance, must pick up these costs. All students who have paid the Health and Wellness Support Services Fee are eligible for initial assessment sessions, consultations, crisis intervention, and educational programming. Individual or group counseling may also be available, if appropriate.

Students who have worked with a mental health professional prior to enrolling at Rice are encouraged to make contact with the Rice Counseling Center prior to coming to Rice. This will allow the student to make arrangements for a continued care plan. This plan may involve working with the Rice Counseling Center or working with the center to find a suitable off-campus provider.

The Rice Counseling Center can be contacted at 713-348-3311 or at https://wellbeing.rice.edu/. The Rice Counseling Center provides the following services:

- Psychological crisis intervention, on a walk-in emergency basis during regular office hours, or by phone at any time, 24 hours a day, by calling 713-348-3311. This includes after hours and weekends.
- Initial intake to assess needs and assignment to an appropriate level of care
- Short-term individual and couples counseling
- Group therapy and support groups
- Medication consultations with the center’s psychiatrist for students in counseling at the center
- Other consultations (e.g., how to make a referral or how to respond to a friend in distress)
- Educational programming (e.g., various presentations on mental health issues)

Confidentiality for Counseling

Rice Counseling Center services are confidential; information about a student is not released without the student’s written consent. Before entering a therapeutic relationship with a counselor, students may review and discuss confidentiality with their counselor, ask all necessary questions, and be certain they understand how confidentiality will be applied in their case. As detailed in RCC’s treatment agreements, state law does not extend confidentiality to several circumstances, including where:

1. there is risk of imminent harm to the student or others;
2. the counselor has reason to believe that a child or an elderly or handicapped person is, or is in danger of, being abused or neglected;
3. a court order is issued to release information; or
4. the counselor suspects that the student has been the victim of sexual exploitation by a former health care provider during the course of treatment with that provider.

In addition, RCC sometimes provides de-identified information to administrative officials who are in a need-to-know capacity. In some cases the terms of the treatment engagement with RCC may require a student to share assessments, diagnoses, or treatment plans from non-Rice treating professionals with Rice counselors.

Therapists with Rice Counseling Services are considered “confidential” employees under Title IX, meaning that should a student wish to speak about domestic or sexual violence or stalking with their therapist, their information is confidential and will not be released without his or her written consent. The only exception to this is for students under the age of 18.

Student Wellbeing Office

The Student Wellbeing Office provides wellbeing advising and case management services to support students who have experienced wellbeing challenges that may be impacting their personal or academic goals and overall success at Rice. Wellbeing advisors connect students
to university resources and procedural options to help students during their enrollment. If students decide to take time off to focus on their wellbeing needs, Wellbeing advisors work with them and serve as liaisons to the medical readmission process when students are ready to return. Wellbeing advisors also coordinate with the clinical counselors and Title IX Support to provide wellbeing programs and education for the student body.

For more information, please visit [https://wellbeing.rice.edu/studentwellbeing](https://wellbeing.rice.edu/studentwellbeing/) or contact the office at 713-348-3311 or wellbeing@rice.edu.

**Office of Sexual Violence Prevention and Title IX Support**

Rice encourages any student who has experienced an incident of sexual, relationship, or another form of interpersonal violence, harassment, or gender discrimination to seek support. There are many options available both on and off campus for all students, regardless of whether the perpetrator was a fellow student, a staff or faculty member, or someone unaffiliated with the university. Students have access to a Title IX resource navigator who will assist the student in determining the best path for them. Furthermore, students who have been accused of committing interpersonal violence or harassment can also seek support ([http://safe.rice.edu](http://safe.rice.edu)) under Title IX.

Students should be aware when seeking support ([http://safe.rice.edu/](http://safe.rice.edu/)) on campus that most employees are deemed ‘responsible,’ and thus are required by Title IX to disclose all incidents of non-consensual interpersonal behaviors to Title IX professionals on campus who can act to support that student and meet their needs. Rice prioritizes student privacy and safety, and only shares disclosed information on a need-to-know basis.

The therapists at the Rice Counseling Center and the doctors at Student Health Services are ‘confidential’ employees, meaning that Rice will not be informed about the incident if a student discloses it to one of these staff members.

For more information, including how to reach out to Title IX Support, please visit [https://safe.rice.edu](https://safe.rice.edu/) or email titleixsupport@rice.edu.

**Tuition, Fees and Expenses**

| Health Insurance - Student Premium only (unless waiver has been approved) 1 | Fall: $980 | $2,482 |
| | Spring: $1,052 | |

1 **Reduced Tuition**

After 10 semesters of full-time study in one doctoral degree program (excluding the summer semesters), continuing students may be eligible for a reduced tuition rate. A semester of full-time study is defined as a fall or spring semester in which at least 9 hours of credit are earned. Students in the Shepherd School of Music and the School of Architecture are eligible for reduced rate tuition after six semesters of full-time study.

2 **Health Insurance**

All students, full-time or part-time—including those on away status—must carry health insurance. For further information, visit the Health Insurance ([https://ga.rice.edu/graduate-students/student-services-organizations/health-counseling-wellbeing/](https://ga.rice.edu/graduate-students/student-services-organizations/health-counseling-wellbeing/)) section or visit [https://studenthealthinsurance.rice.edu/current-rates](https://studenthealthinsurance.rice.edu/current-rates).

### Part-Time Students

Part-time enrollment refers to enrollment of less than 9 credits during a semester. Students seeking part-time enrollment must obtain approval from the Office of Graduate and Post-Doctoral Studies. Part-time enrollment tuition is calculated on the per-credit rate. Students are also assessed a one-time per semester part-time enrollment fee. Students not approved for part-time enrollment will be assessed the full-time enrollment tuition charge.

### Course Fees

Courses with additional charges are provided on the Course Schedule. In some cases the associated charges may be in lieu of Rice tuition and/or required fees.

### Additional Fees

The following charges are separate from the regular fees. Charges due to late registration or course changes made after the deadline are described in the Registration section.

- Audit Fee: Rice Alumni (per course) $510
- Audit Fee: Visitors (per course) $1,025
- Application Fee $85
## Billing Information

Electronic billing (E-Bill) is the official mechanism for student billing at Rice University. E-Bills are generated monthly. Fall and Spring E-Bills are generated on the 1st of each month, having a due date of the 10th.

Fall semester charges are due in full by August 10. Spring semester charges are due in full by January 10. Payment Plans are available for students who wish to pay installments over the course of the semester. Accounts not enrolled in a payment plan or paid in full by the term due dates are subject to Late Payment Fees.

Summer E-Bills are generated on the 1st for Summer months, having a due date on the 10th. Charges are due by the due date on the E-Bill notice. Payment Plans are not available for the Summer semester.

### Late Payments

Student accounts not paid in full (or whose payment plan is not current) by the billing due date will be subject to a 1.5% late fee. Late fees are calculated based on the amount past due. Students experiencing difficulty with paying their balance should contact the Cashier’s Office (https://cashier.rice.edu/home/) promptly to discuss payment options.

### Transcripts

- Transcript Fee: $30
- Transcript Express Delivery Fee: $30

### Diplomas

#### Tuition and Fee Reversal for Withdrawals and Drops

#### University Withdrawals

Students officially withdrawing from all courses or dropping one or more course(s) are eligible for a 100% reversal of tuition and fees through the deadlines listed on the Academic Calendar (https://registrar.rice.edu/calendars/) by semester.

Students officially withdrawing from all courses after the 100% reversal of tuition and fee deadline are eligible for a partial reversal of tuition. Fees are not reversed. Consult the Academic Calendar (https://registrar.rice.edu/calendars/) for specific tuition refund prorations based on the date of withdrawal.

#### Dropped Courses

Students withdrawing from one or more individual course(s) after the 100% tuition reversal period will not be eligible for a refund and will remain liable for payment of full tuition and fee charges through certain exceptions may apply, outlined in the Registration Drop/Add section (https://ga.rice.edu/graduate-students/academic-policies-procedures/regulations-procedures-all-degrees/). Non-attendance does not constitute an official course drop or withdrawal. All charges due to Rice University must be paid before refunds or adjustments will be permitted.

In cases of academic or disciplinary suspension, eligibility for tuition refunds and adjustments will depend on the conditions of the suspension and will be entirely at the option of the institution. Should unforeseen circumstances beyond the reasonable control of Rice University result in curtailing classes, closing residence facilities, or otherwise withdrawing services that are a normal function of the institution, refunds of any nature will be at the discretion of university administration.

#### Financial Aid

In addition to the university’s reversal schedule and in accordance with the Higher Education Amendments of 1992, if a student completely withdraws from the university and has utilized Federal Title IV funds (e.g. Federal Pell Grant, Federal Supplemental Educational Opportunity Grant [SEOG], Academic Competitiveness Grant, National SMART Grant, Federal Perkins Loan, Federal Direct Stafford Student Loan, Federal Direct PLUS, Federal Direct Graduate PLUS) during the semester in which they withdraw, the university will observe the federally mandated process in determining what, if any amount of money must be returned to the federal program(s).

The calculation of the return of funds may result in the student owing a balance to the university and/or the Department of Education.

#### Refund of Credit Balances

Student account credits resulting from excess Federal Financial Aid payments, scholarship payments, and loan payments are automatically refunded by the Cashier’s Office; however, there may be certain circumstances where credits on student accounts occur that may not be automatically refunded. Reversed charges, over payments, tuition
waivers, and other varying factors may lead to a credit balance on a
student account.

For those credits not automatically refunded, students may request
reimbursement of the credit balance through email to cashier@rice.edu.

Refund Delivery
Refunds are issued daily to students that are enrolled in Electronic
Refunds (https://cashier.rice.edu/general-refund-information/). For
students not enrolled in Electronic Refunds (https://cashier.rice.edu/
general-refund-information/), refund checks are issued weekly and are
mailed directly from JP Morgan Chase to the student mailing address on
record.

Student Financial Responsibility
Agreement
Before enrollment for a new semester can occur, students must
consent to a Student Financial Responsibility Agreement (https://
cashier.rice.edu/student-financial-responsibility-agreement/).

Rights and Responsibilities
See also Faculty Grading Guidelines (p. 90).

Graduate students are entitled to at least one formal progress review
(p. 90) with written feedback per year.

- Access to Student Records (p. 81)
- Code of Student Conduct (p. 82)
- Dispute Resolution (p. 83)
- Honor System (p. 84)
- Student Responsibility (p. 84)

Access to Student Records
Notification of Rights under the Family
Educational Rights and Privacy Act
(FERPA)
The Family Educational Rights and Privacy Act (FERPA) is a federal
law that protects the privacy of, and limits access to, student education
records. The law affords students the following rights with respect to
their education records:

1. the right to inspect and review the student’s education records within
45 days after the date Rice University (‘Rice’) receives a request for
access;
2. the right to seek amendment of the student’s education records
that the student believes are inaccurate, misleading, or otherwise in
violation of the student’s privacy rights under FERPA;
3. the right to provide written consent to disclosures of personally
identifiable information (‘PII’, as defined by law) contained in the
student’s education records, except to the extent FERPA authorizes
disclosure without consent;
4. the right to file a complaint with the U.S. Department of Education
concerning alleged failures by Rice to comply with the requirements
of FERPA. The name and address of the federal office that
administers FERPA is:

Family Policy Compliance Office

U.S. Department of Education
400 Maryland Ave., S.W.
Washington, DC 20202

Inspect and Review Records
A student should make written request to any offices that maintain
student education records, identifying the record(s) the student wishes
to inspect. Though not exhaustive, as a guide for students, this is a list
of the primary offices that maintain student education records: Office of
the Registrar, Office of the Dean of Undergraduates, Office of Graduate
and Postdoctoral Studies, Office of Student Judicial Programs, Office of
Admission, Office of Financial Aid, Center for Career Development, Office
of Student Activities, Office of Academic Advising, Office of International
Students and Scholars, Cashier’s Office, and departmental offices. The
appropriate Rice official will make arrangements for access and notify
the student of the time and place where the records may be inspected. If
the records are not maintained by the Rice official to whom the request is
submitted, that Rice official will advise the student of the correct official
to whom the request should be addressed.

Amendment of Records
Any questions, problems, or written requests for amendment of records
should be submitted to the Office of the Registrar. A student requesting
to amend a record should clearly identify the part of the record the
student wants changed and specify why it should be changed. If Rice
decides not to amend the record as requested, Rice will notify the student
in writing of the decision and of the student’s right to a hearing regarding
the request for amendment. Additional information regarding the hearing
procedures will be provided to the student when the student is notified of
the right to a hearing.

Disclosure of Information
As permitted by FERPA, Rice reserves the right to publish or release the
following directory information without prior consent:

1. Name; permanent, local, mailing, and campus address; residential
college affiliation; telephone and mobile number(s); campus email
address(es); and Net ID
2. Date and place of birth
3. Classification, degrees or programs, and majors and minors
4. Participation in officially recognized activities and sports
5. Weight and height of members of athletic teams
6. Dates of attendance, degrees, honors, and awards received
7. The most recent previous educational agency or institution attended
   by the student
8. Photograph

Students who would like Rice to withhold this directory information
may do so by logging in to ESTHER, clicking Personal Information,
clicking Release or Withhold Directory Information, and indicating that
the information should be withheld. Thereafter, Rice will withhold access
to, and release of, the student’s directory information until further written
instruction is received from the student. For more information regarding
FERPA, please visit the U.S. Department of Education’s website (https://
www2.ed.gov/policy/gen/guid/fpco/ferpa/).

FERPA permits the disclosure of PII from students’ education records,
without consent of the student, if the disclosure meets certain
conditions found in 34 C.F.R. §99.31 of the FERPA regulations. Except
for disclosures to school officials, disclosures related to some judicial
orders or lawfully issued subpoenas, disclosures of directory information,
and disclosures to the student, Section 99.32 of the FERPA regulations requires the institution to record the disclosure. Eligible students have a right to inspect and review the record of disclosures. A postsecondary institution may disclose PII from the education records without obtaining prior written consent of the student –

- To other school officials, within Rice whom Rice has determined have legitimate educational interests and require this information in order to perform instructional, supervisory, advisory, administrative, or other duties for Rice. These school officials include faculty, research personnel, staff (including law enforcement unit personnel and health staff), trustees, or students serving on official committees (such as disciplinary or grievance committees) or assisting another school official. A school official has a legitimate educational interest if the official needs to review an educational record in order to fulfill his or her professional responsibility to Rice. This includes contractors, consultants, auditors, attorneys, collection agents, volunteers, or other parties to whom Rice has outsourced institutional services or functions, provided that the conditions listed in §99.31(a)(1)(i)(B)(7) - (a)(1)(i)(B)(3) are met. (§99.31(a)(1))

- To officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student's enrollment or transfer, subject to the requirements of §99.34. (§99.31(a)(2))

- To authorized representatives of the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or State and local educational authorities, such as a State postsecondary authority that is responsible for supervising the university's State-supported education programs. Disclosures under this provision may be made, subject to the requirements of §99.35, in connection with an audit or evaluation of Federal- or State-supported education programs, or for the enforcement of, or compliance with, Federal legal requirements that relate to those programs. These entities may make further disclosures of PII to outside entities that are designated by them as their authorized representatives to conduct any audit, evaluation, or enforcement or compliance activity on their behalf. (§§99.31(a)(3) and 99.35)

- In connection with financial aid for which the student has applied or which the student has received, if the information is necessary to determine eligibility for the aid, determine the amount of the aid, determine the conditions of the aid, or enforce the terms and conditions of the aid. (§99.31(a)(4))

- To organizations conducting studies for, or on behalf of, the school, in order to: (a) develop, validate, or administer predictive tests; (b) administer student aid programs; or (c) improve instruction. (§99.31(a)(6))

- To accrediting organizations to carry out their accrediting functions. (§99.31(a)(7))

- To parents of an eligible student if the student is a dependent for IRS tax purposes, though Rice limits such information to financial details of the student's enrollment. (§99.31(a)(8))

- To comply with a judicial order or lawfully issued subpoena. (§99.31(a)(9))

- To appropriate officials in connection with a health or safety emergency, subject to §99.36. (§99.31(a)(10))

- Information the school has designated as "directory information" above and pursuant to §99.37. (§99.31(a)(11))

- To a victim of an alleged perpetrator of a crime of violence or a non-forcible sex offense, subject to the requirements of §99.39. The disclosure may only include the final results of the disciplinary proceeding with respect to that alleged crime or offense, regardless of the finding. (§99.31(a)(13))

- To the general public, the final results of a disciplinary proceeding, subject to the requirements of §99.39, if the school determines the student is an alleged perpetrator of a crime of violence or non-forcible sex offense and the student has committed a violation of the school's rules or policies with respect to the alleged violation and the student is under the age of 21. (§99.31(a)(15))

For further information regarding Rice's policy on student education records, please contact the Office of the Registrar.

Rice University
Office of the Registrar–MS 57

Rice University Privacy Notice

Additionally, you may also wish to consult privacy rights and practices discussed at https://privacy.rice.edu/ and https://privacy.rice.edu/GDPR (https://privacy.rice.edu/GDPR/)

Code of Student Conduct

The Office of Student Judicial Programs oversees the judicial system, enforces the Code of Student Conduct (which governs the administration of student order and discipline), and may participate in Title IX investigations. The Code of Student Conduct applies to all students, including: undergraduate, graduate, and those enrolled in professional and Continuing Studies programs, visiting students (including online students), visiting post baccalaureates, second degree students, and auditors. For students who attend class on campus, the Code of Student Conduct applies from the time they arrive on campus for orientation or any activities related to their student status. For online students, the Code of Student Conduct applies from the time they begin engaging with the university as a student, including participating in any activities related to their online status. Organizations also are subject to this Code. All enrolled students also are subject to Rice University policies and rules.

Alleged violations of university policies or rules are handled in accordance with the Code of Student Conduct. Students may appeal decisions as described in the Code of Student Conduct. Rice retains ultimate authority in all matters of discipline and over all actions that affect its educational function or the safety and wellbeing of members of the university community. The Code is not intended to—and does not—confer any contractual rights on any individuals involved. Procedures for students who are entirely online students may differ.

The Code of Student Conduct can be found at https://sjp.rice.edu (https://sjp.rice.edu/code-of-student-conduct/).

After Rice’s grievance process has been exhausted and documented, students may also pursue an external complaints process (p. 1753).
**Dispute Resolution**

**Petitions and Appeals**

Graduate students may petition for exceptions to academic requirements, regulations, and judgments. A course requirement is an example of an academic requirement. Allowed time to degree is an example of an academic regulation. Course grades and dismissals from programs are examples of academic judgments. If a petition is denied, one level of appeal is allowed.

**Petitions**

Petitions should include the circumstances that may qualify the student for an exception as well any supporting documentation or endorsements. In general, petitions will be handled at the lowest appropriate level.

- A petition regarding requirements, regulations, or judgments of a graduate program will be handled at that level, that is, by the program. Such petitions need to follow procedures established by these programs.

- A petition regarding University requirements, regulations, or judgment must be submitted to the Office of Graduate and Postdoctoral Studies; such a petition must be accompanied by a recommendation from the program.

- When the program’s recommendation is negative, or when the petition requests a major exception—for example, an extension of allowed time to degree by more than 1/2 semester—the Office of Graduate and Postdoctoral Studies may also obtain the recommendation of the school overseeing the program (when relevant) and the Graduate Council with regard to such petitions.

Petitions for exceptions to academic requirements, regulations, and judgments should be viewed as unusual, rather than typical. Extensions of various time limits, such as time to candidacy or time to defense, will not be granted routinely. See Candidacy, Oral Examinations and Thesis (p. 65). Students requesting such extensions have to document the unusual circumstances justifying their request, demonstrate their academic progress towards the goal, and provide a concrete plan for meeting the goal within the requested extension.

Petitions regarding academic decisions must be submitted in writing within 15 days from the time that the student knew or should reasonably have known of the decision being petitioned, or within 15 days after an informal effort to resolve the situation has not been successful.

Petitions seeking exceptions to academic requirements or regulations should be submitted in writing at least 30 days before the requirement or regulation takes effect. For example, a petition to extend allowed time to degree should be submitted at least 30 days before the deadline in effect. Late petitions may be dismissed, except for unusual situations when a delay is found justifiable by the unit receiving the petition. Petitions must be acknowledged in writing immediately upon their receipt by the receiving unit. Email communication is considered to be “in writing.”

**Appeals**

If a petition is denied, a student (or other parties affected by the decision) is allowed only one level of appeal. In general, the appeal process will be resolved at the lowest level possible.

- When the petition is decided at the graduate program or department level, the appeal must be submitted to the Office of Graduate and Postdoctoral Studies.
- When the petition is decided at a school level, the appeal must be handled by the Office of Graduate and Postdoctoral Studies.
- When the petition is decided by the Office of Graduate and Postdoctoral Studies, the appellant may submit an appeal to the Provost.

An appeal must be submitted within 15 days from receipt of the decision that is being appealed. Late appeals will be dismissed, except for unusual situations when a delay is justified. Appeals must be acknowledged in writing immediately upon their receipt by the receiving unit. Email communication is considered to be “in writing.”

**Guidelines Regarding Petitions and Appeals**

- Grounds for a petition/appeal could be procedural errors by academic or administrative personnel or special circumstances found to be mitigating by the unit receiving the petition/appeal. Disagreement over evaluation of academic quality will not be considered as an appropriate basis for petitions/appeals unless the evaluation is found to be patently unreasonable by the unit receiving the petition/appeal.

- All petitions and appeals should indicate the requirement, regulation, or judgment that is the subject of the petition/appeal, the specific exception requested, and the grounds for the request.

- Additionally, an appeal must indicate why the decision involving the earlier petition was incorrectly decided.

Petitions involving a violation of University policy or improper conduct by University personnel will be handled as grievances (see Grievances below).

Petitions and appeals should be resolved within 30 days of their submission. When such resolution cannot be achieved within 30 days, students will be informed of the delay before the 30 days are over. A resolution of the petition or appeal must be achieved within 60 days. A lack of resolution of a petition within 60 days is an acceptable cause for an appeal.

An academic program directly managing graduate students must establish a standing Petitions, Appeals, and Grievances Committee. A petition concerning a graduate program regulation by a student will be handled by a committee consisting of at least three faculty members. The committee must be independent of the cause for the petition. Members of a student’s thesis committee must not participate in the handling of a petition by the student. (The department chair or dean may appoint ad-hoc members to the committee to ensure independence of the committee.) The committee will conduct an investigation of the circumstances and reach a decision regarding the petition. Their written report to the graduate director, and the chair (or dean) will describe the circumstances, the decision, and the rationale for the decision. The graduate director or chair (or dean) will convey the final decision to the student and include the committee report. (Redaction from the report is allowed to protect the privacy of other students.) In case of decisions by the faculty members of a graduate program acting as a committee of the whole, petitions will also be considered by the Petitions, Appeals, and Grievances Committee, which will reconsider the decision in view of the information provided in the petition. This committee may choose to bring the matter back for consideration by the faculty members of the academic program, acting as a committee of the whole. Petitions regarding University requirements, regulations, or judgments submitted to the Office of Graduate and Postdoctoral Studies may be handled by the
Grievances

Grievances are different from petitions and appeals. Petitions and appeals involve exceptions to academic requirements, regulations, and judgments. A grievance is a complaint regarding inappropriate conduct by other students, faculty members, or staff. Inappropriate conduct encompasses both inappropriate personal conduct, such as sexual harassment, as well as inappropriate official conduct, such as violation of University policies. Specific policies exist to address grievances based on discrimination or sexual harassment and these policies must be followed in situations involving these issues. Grievances against another student may be raised with the director of student judicial programs and addressed under the Code of Student Conduct. In other cases, a student may present a grievance in writing at the lowest appropriate level, typically the graduate program or school. If a satisfactory resolution is not obtained at that level, the student may appeal the outcome of the grievance by presenting the problem at the next administrative level: the Office of Graduate and Postdoctoral Studies. A written report of proceedings at stage 2 will be presented to the dean of graduate and postdoctoral studies. The decision of dean of graduate and postdoctoral studies is considered final.

The time frame for handling problem resolution is similar to that for handling petitions, appeals, and grievances. Students may seek guidance on any of these procedures through discussions with the Office of Graduate and Postdoctoral Studies. After Rice’s grievance process has been exhausted and documented, students may also pursue an external complaints process (p. 1753).

Honor System

Students take all written examinations and complete any specifically designated assignments under the honor system. By committing themselves to the honor system, all students accept responsibility for assuring the integrity of the examinations and assignments conducted under it. The Graduate Honor Council (GHC) is responsible for investigating reported violations and for conducting a hearing when the facts warrant. The Office of Student Judicial Programs, which reviews the results of the investigations and hearings, considers the GHC’s recommendations when issuing penalties. Procedures for accusations arising out of summer classes or Rice Online classes may differ.

The Honor Code and other related information and resources are located at the homepage of the Graduate Honor Council: https://gradhononor.rice.edu/.

Student Responsibility

The university expects all Rice students to exercise personal responsibility over their actions. Their behavior should reflect a respect for the law and for their contractual obligations, a consideration for the rights of others, and shared standards of considerate and ethical behavior.

Students are responsible for knowing and following all information, policies, and procedures listed in this General Announcements. Questions should be directed to the appropriate office or administrator.

Rice utilizes e-mail as an official form of communication and sends correspondence to a student’s Rice email address. Students should frequently check and maintain their Rice email inbox. Failure to do so
does not relieve students of the responsibility to act or respond in a
timely manner to official notices sent via email.

Rice encourages self-discipline, recognizing that effective student
government, including judicial processes, and the integrity of the honor
system depend on the willingness of all students to meet community
standards of conduct.

The university, however, reserves the right to insist on the withdrawal
of any student whose conduct it judges to be clearly detrimental to the
best interests of either the student or the university. The appropriate
authorities take such action only after careful consideration.

No individual or group may use the name of the university or one of its
colleges without prior approval of the university or the college.

**Teaching Assistant Responsibility**

Individuals appointed as teaching assistants must abide by the policies
stated below.

**TA Policy**

Teaching assistants are graduate students who help faculty with the
delivery of courses. Services provided by teaching assistants include, but
are not limited to, grading, monitoring, leading labs and/or discussion
sessions, offering office hour assistance to students, and performing
clerical tasks associated with course instruction.

Teaching assistants are supervised by the course instructor of record and
are subject to established departmental policy.

Although they are not members of the faculty, teaching assistants
are expected to conform to the same standards of conduct in the
performance of their academic duties as are members of the faculty
and shall respect the rights and opinions of students and uphold the
academic standards of the University.

Teaching assistants are subject to the guidelines stated in the [University
Amorous Relationship Policy](https://professor.rice.edu/uploadedFiles/
Professor/Faculty_Senate/CORRECTED%20Clean%20copy%20post %20Senate%20mtg%2012-3-2014.pdf) as well as the [Family Educational
Rights and Privacy Act (FERPA)](https://registrar.rice.edu/ferpa/).

When serving in the role of a teaching assistant, graduate students are
considered responsible employees under the University [Title IX Policy](https://safe.rice.edu/). As a responsible employee of Rice University,
when a teaching assistant knows about any incident of sexual assault,
harassment, relationship violence, stalking, or another non-consensual
interpersonal behavior, Rice Title IX personnel need to know so they can
act to support the student and keep our community safe. You can gain
access to the Title IX Resource Navigator, Student Wellbeing, and the
Rice Counseling Center by calling 713-348-3311. If a student wants to
make a report through the university, wants Title IX accommodations
without making a report, or isn't sure what to do, also call 713-348-3311
or extension 3311 on campus.

If the student wants to make a report through the legal system or is
considering making a report, or needs immediate assistance, call the Rice
University Police Department (RUPD) 713-348-6000 or extension 6000 on
campus.
NON-TRADITIONAL STUDENTS

- Auditors (p. 86)
- Rice Learners (p. 86)
- Second Bachelor's Degree for Rice Alumni (p. 86)
- Visiting Students (non-degree) (p. 87)

Auditors

Any interested person may audit one or more courses at Rice by securing permission of the instructor and by registering as an auditor with the Office of the Registrar. Detailed instructions to apply as an auditor can be found on the Office of the Registrar’s website (https://registrar.rice.edu/students/visiting/).

Upon completion, the audited course will appear on the student's transcript with a grade of either “AUD” or “NC” (see Grade Symbols (p. 24)). Instructors report the AUD if the student met the audit requirements of the class, or the NC if they have not. There are no credit hours associated with audited courses, and auditing a course does not affect a student's GPA.

During the fall and spring semesters, and/or during the summer sessions, an audit fee of $1,025 per course per semester is charged for the privilege of auditing (see Cashier’s website (https://cashier.rice.edu/)). Rice alumni may audit a course at a reduced rate, $510 per course per semester.

A request to audit a class or to change from audit to credit or vice versa must be done by the deadlines as posted in the Academic Calendar (https://registrar.rice.edu/calendars/) for the applicable semester.

Current enrolled Rice students will find more information regarding auditing in the undergraduate (p. 11) and graduate (p. 49) sections.

Please note that financial assistance is not available for auditing students.

Rice Learners

Non-Credit Educational Opportunities at Rice

Rice University offers a number of opportunities for persons, or learners, to access various educational programs and materials. While not degree-granting, many of these programs or courses lead to certificates, continuing education credits, and other rewarding professional development opportunities.

Continuing Studies (at the Glasscock School of Continuing Studies)

The Glasscock School of Continuing Studies offers hundreds of non-credit course offerings throughout the year in a variety of areas of study. Choose from coursework focusing on non-credit preK - 12 education, philanthropy, professional studies, arts & design, humanities & social sciences, science, technology & health, foreign languages and much more. In addition, the Glasscock school offers several for-credit academic programs.

For additional information, please see the Glasscock School’s website: https://glasscock.rice.edu/.

Executive Education (at the Jones Graduate School of Business)

The Jones Graduate School of Business offers open enrollment, customized, and specialty non-credit programs to help learners and their organizations to take charge of their personal and professional development. These executive education programs and courses are deliberately designed to maximize learning and transfer of knowledge by incorporating assessments, lecture, case studies, group activity, simulations, and coaching. All are taught by world-class business school faculty who are prolific researchers in their areas of expertise, and have won numerous prestigious teaching awards. Additionally, executive education faculty leverage their consulting experience and the professional experience of classroom participants to co-create a rich learning environment.

For additional information, please see the Jones School’s website: https://business.rice.edu/about-executive-education/.

Rice Online Learning

Rice Online Learning develops innovative non-credit and for-credit coursework to improve educational and professional outcomes for learners of all ages, around the world. Rice Online Learning is dedicated to providing broad access to top quality Rice University education while enhancing the curriculum and student experience on the Rice campus, and is committed to advancing the research frontiers in technology for education. Rice Online Learning’s objectives are organized by around three goals:

1. Improve the quality of education at Rice University
2. Expand Rice University’s reach and reputation
3. Generate resources to support Rice University's core mission

For additional information, please see Rice Online Learning’s website: http://online.rice.edu/.

Second Bachelor’s Degree for Rice Alumni

Rice alumni with a Rice bachelor’s degree have the option of earning a second four-year bachelor’s degree at Rice in a different discipline. In addition to being in a different discipline, the second degree must also be a different bachelor’s degree from the one already held; for example, the holder of a BA degree may pursue coursework leading to a BS or BMus degree.

Rice alumni with a Rice bachelor’s degree desiring to earn a different four-year bachelor’s degree must:

- Be accepted for the major by the major department
- Fulfill all requirements for the second degree
- Complete at least 30 additional semester hours at Rice (must include two full-time fall and/or spring semesters) upon their return to Rice and beyond their first bachelor’s degree (these hours are applied to the second bachelor’s degree)

The entire undergraduate record for these students continues cumulatively. Those seeking admission to this program should complete the Second Four-Year Bachelor’s Degree Application available on the Office of the Registrar (https://registrar.rice.edu/online_forms/) website.
This application should include a written statement specifying the proposed major and course program for the second degree, a supporting letter from the chair of the major department, and an explanation of the student’s reasons for returning to Rice for a second degree. This letter of application and paperwork should be submitted to the Office of the Registrar no later than August 1 for the fall semester and November 1 for the spring semester.

Eligible students considering this option should note that coursework completed at Rice as visiting students can only be applied to the second degree with the approval of the major department for that degree. Additionally, coursework completed at Rice as Visiting Post Baccalaureates can only be applied to the second degree with the approval of the major department for that degree and the dean of graduate and postdoctoral studies.

Financial Aid
Students seeking information about financial aid available to participants in the second four-year bachelor’s degree program should contact the Office of Financial Aid (https://financialaid.rice.edu/).

Second Four-Year Bachelor's Degree for Current Rice Undergraduates
Currently enrolled undergraduates who have not yet completed their first bachelor's degree and desire to concurrently earn a second four-year bachelor's degree, also known as a dual degree, should reference the Dual-Degree Requirements on the undergraduate Graduation Requirements (p. 26) page.

Visiting Students (non-degree)
Inter-Institutional Graduate Students
A number of inter-institutional graduate student enrollment agreements have been established enabling graduate students from one institution to take graduate-level courses at other participating institutions. The institutions currently participating in inter-institutional agreements include Rice University, Baylor College of Medicine, Texas A&M Health Science Center, University of Houston, University of Texas Health Science Center at Houston, and the University of Texas Medical Branch at Galveston. The number of credits allowed per term/semester and the course offerings may vary depending on the policy of the host school.

Registration Rules and Guidelines
The following registration rules and guidelines apply to graduate students (at participating inter-institutional institutions) seeking to be Rice University visiting students under an inter-institutional agreement:

- The student must be registered full-time (9 credit hours) between the student’s home institution and the host institution during the semester they register for courses.
- Requested class must not be offered by the home institution during the requested term/semester.
- Requested class must be necessary for completion of graduate degree at the home institution.
- The student may register for a total of no more than 12 credit hours outside the home institution.
- Tuition and fees are paid to the home institution.
- All paperwork with the appropriate approval signatures must be completed.

- Foreign students taking inter-institutional courses must check with the Office of International Students and Scholars (https://oiss.rice.edu/) regarding additional paperwork (e.g., passport, I-94 arrival/departure card, and Check-In Sheet https://registrar.rice.edu/sites/g/files/bxs751/f/Inter-Inst%20Grad%20CHECKIN%20SHEET.pdf).

- For a comprehensive list of Registration Deadlines (including Add, Drop, Variable Credit deadlines etc.), please consult the semester-specific Rice University Academic Calendar (https://registrar.rice.edu/calendars/).

Please Note:
- Inter-institutional graduate students may not take a course Pass/Fail.
- Due to the structure of the summer sessions at Rice University, this inter-institutional registration arrangement is not available to non-Rice students during the summer sessions.

For more information, including the enrollment process under an inter-institutional agreement, please see the Office of the Registrar’s website: https://registrar.rice.edu/students/inter_institutional (https://registrar.rice.edu/students/inter_institutional/).

Online-Distance Education
A complete list of all of Rice University’s online course offerings, both for-credit and non-credit offerings, can be found at Rice Online (http://online.rice.edu/).

Rice Online for-credit Courses
Each academic year Rice offers a number of courses online. These courses use the online method of instruction, indicating that the majority of the class time instruction is occurring when and where students and instructors are not in the same place. These online course offerings can be found in the official Rice Course Schedule (https://courses.rice.edu/admweb/swkscat.main) by querying by method of instruction.

Visiting students seeking to register for a Rice Online for-credit course should follow the application procedures documented on the Office of the Registrar web site noted here (https://registrar.rice.edu/students/visiting). Upon admission and registration of a Rice Online for-credit course, all students, including non-degree seeking visiting students, must abide by and support the Honor System at Rice University. Prior to the first day of classes, affirmation and acknowledgement of the Honor Code (https://honors.rice.edu/) will be required of all visiting students enrolled in any for-credit Rice course.

State Authorizations
The State Authorization Reciprocity Agreement (SARA) is a national initiative to provide more access to online courses while maintaining compliance standards with state regulatory agencies. SARA allows institutions to provide online courses outside of their own state borders by seeking and maintaining state approvals via a streamlined process. On June 19, 2017, the National Council for State Authorization Reciprocity Agreements (NC-SARA) approved institutional participation for Rice University.

For information regarding student complaints, please see Rice University Policy 701, Written Student Complaints, or NC-SARA at: https://nc-sara.org/content/sara-and-students/ (https://nc-sara.org/content/sara-and-students/).
Rice Faculty and Staff Members
Fall and Spring Semesters

With the appropriate authorizations, benefits-eligible employees of Rice may take one course per semester, either for-credit or audit. (See important note below regarding eligible courses.) Please see University Policy #409 (https://policy.rice.edu/409/) and/or #432 (https://policy.rice.edu/432/) for complete details about benefits eligibility. Employees must meet a six-month probationary period before using this benefit.

The registration period is the first two weeks of the semester. The following registration rules and guidelines apply to Rice benefits-eligible employees during the fall and spring semesters:

- Complete a Tuition Waiver Application Form (https://peopleblogs.rice.edu/hr-forms/tuition-waiver/)
- Get an authorizing signature of the employee’s supervisor, the course instructor, and Human Resources.
- Complete a Visiting Student Application (https://riceuniversityco1.qualtrics.com/SE/?SId=SV_1TSPXGbWgWkV57/) and either upload the Tuition Waiver Application form to the application or bring it to the Office of the Registrar.
- Course registration is limited by availability, and priority is given to enrolled, degree-seeking students.

Retirees, spouses and domestic partners of benefits-eligible employees are also able to audit one course per semester. Spouses and domestic partners should follow the same registration procedures as benefits-eligible employees.

Please Note: All graduate courses in the Jones Graduate School of Business, all courses offering individual instruction in the School of Architecture, all undergraduate and graduate courses offering individual instruction including musical performance or composition in the Shepherd School of Music, and Glasscock School of Continuing Studies are also able to audit one course per semester. Spouses and domestic partners should follow the same registration procedures as benefits-eligible employees.

Summer Sessions

The tuition waiver or audit benefit is not available to Rice benefits-eligible employees during the Summer Sessions; however, with the appropriate authorizations, benefits-eligible employees of Rice may take courses offered during Rice’s Summer Sessions (https://registrar.rice.edu/students/summersessions/) and apply for tuition reimbursement. Please see University Policy #432 (https://policy.rice.edu/432/).

The following registration rules and guidelines apply to Rice benefits-eligible employees during the Summer Sessions:

- Adhere to the deadlines to apply as a visiting student (https://registrar.rice.edu/students/summersessions/#enroll_nonrice), depending on the session in which enrollment is requested.
- Application for tuition reimbursement (https://peopleblogs.rice.edu/hr-forms/tuition-reimbursement-form/) This needs to be signed by the employee’s supervisor and turned into Human Resources before the start date of the course.
- Visiting Student Application (https://riceuniversityco1.qualtrics.com/SE/?SId=SV_1TSPXGbWgWkV57/)

Course registration is limited by availability, and priority is given to degree-seeking students.

Summer Sessions for Visiting Students

Rice’s Summer Sessions offer for-credit courses to Rice students, visiting undergraduates, and visiting post baccalaureates. Students can choose to take courses in combined summer sessions. Current Rice students follow the same registration policies and procedures that are in place for the fall and spring semesters.

Resources

- For a schedule of summer sessions, please refer to the Academic Calendar (https://registrar.rice.edu/calendars/).
- For course offerings, please refer to https://courses.rice.edu.
- For information related to the Summer Sessions, please see https://registrar.rice.edu/students/summersessions/.

Enrollment Process for Visiting Students

To apply, students will need to submit the following materials to the Rice University Office of the Registrar. Applicants will be notified as soon as possible of acceptance or non-acceptance:

- Visiting Student Application
- Dean of Students Recommendation Form (https://registrar.rice.edu/sites/g/files/bxs751/f/Dean_s_Recommendation_Letter.pdf) (visiting undergraduates from other institutions only)
- Application fee of $100. This must be paid online on the OTR Fees website (https://ebank.rice.edu/C21279_ustores/web/store_main.jsp?STOREID=8/) and may be paid by credit card or electronic check.
- Official college transcript from all colleges or universities attended
- Official final high school transcript (waived if attended a college/university in the previous Spring semester) All transcripts must be mailed in and will not be accepted by fax or email.
- Proof of Meningococcal Vaccination Record or Waiver (required if under the age of 22)

Guidelines

- Tuition is due in full at registration before the beginning of classes.
- Enrollment in courses during the summer sessions carries no implications for regular admission to Rice.
- Visiting students may not take courses on a pass/fail basis.

It is essential that students follow the deadlines listed on the summer website at https://registrar.rice.edu/students/summersessions/ and the Academic Calendar (https://registrar.rice.edu/calendars/). Students may apply after the deadline (but before the start of classes) by paying a late fee. Course offerings are at the discretion of Rice and may be canceled at any time for any reason.

Visiting Post Baccalaureates

The visiting post baccalaureate (VPB) program at Rice allows a visiting student who has an undergraduate or graduate degree from an accredited college or university to take courses at Rice for credit but not in a specific degree program. Students interested in taking courses, but not for credit, should audit the courses. (See Auditors (p. 86).)

VPB Applicants must have a 3.00 (B) or better grade average in the previous undergraduate or graduate program. Registration requires the permission of the course instructor or department chair and
approval by the dean of graduate and postdoctoral studies. Visiting Post Baccalaureates cannot take courses on a pass/fail basis. Visiting Post Baccalaureates must receive at least a B for all classes taken or they will not be allowed to remain in the program.

A student may not use courses taken under this arrangement to fulfill the requirements for a Rice degree unless and until the student has been accepted into a degree program by an academic department. A former Visiting Post Baccalaureate student may request that his or her department allow up to three courses taken as Visiting Post Baccalaureates to count toward the graduate degree. Once approved by the department, the student must also obtain the approval of the dean of graduate and postdoctoral studies.

Applications for Visiting Post Baccalaureate Program
Applications are available from the Office of the Registrar (https://Registrar.rice.edu/students/visiting/) upon request. Official transcripts from all colleges and universities the student has attended should be mailed directly to the institutions to the Office of Graduate and Postdoctoral Studies. A student who was previously a Visiting Post Baccalaureate must complete a new application (without transcripts) for each semester. All application materials are due by the workday nearest to July 15 for fall semester courses and November 15 for spring semester courses. No late applications are accepted.

Individuals applying as Visiting Post Baccalaureates for the summer term should apply to enroll in Rice's Summer Sessions (https://Registrar.rice.edu/students/summersessions/).

Tuition and Fees for Visiting Post Baccalaureate Program
Tuition and fee information can be found on the Cashier's Website (https://Cashier.rice.edu/). If a class fills with Rice degree-seeking students, instructors may drop Visiting Post Baccalaureates up to the end of the second week of class. In that case, the tuition (less the nonrefundable application fee) will be refunded. If a Visiting Post Baccalaureate withdraws, drops, or adds classes, the same rules regarding grades, refunds, and applicable fees apply as for degree-seeking graduate students. There is no refund for dropping a class after the second week as long as the student stays enrolled in at least one other class. Pro-rated refunds for complete withdrawals are according to the deadlines listed on the Academic Calendar (https://Registrar.rice.edu/calendars/). Please visit the Summer Sessions for Visiting Students (https://Registrar.rice.edu/students/summersessions/) page for information pertaining to summer sessions.

Please Note: Financial assistance is not available for Visiting Post Baccalaureate students.

Visiting Researchers
Visiting researchers are students who are enrolled in a degree-seeking program at another institution and, at the invitation by a Rice faculty member or department, engage in experiential research-specific learning. Such research is meant to assist the faculty with research efforts or to gain research experience which the student might apply toward degree requirements at his or her home institution.

Visiting researchers should first work with the academic department to apply for the specific research program. International visiting researchers and departments must also work with the Office of International Students and Scholars (https://OISS.rice.edu/vsugresearch/) to obtain the necessary pre-certifications, if applicable.

For more information, see the Office of the Registrar's website: https://Registrar.rice.edu/students/visiting/researcher (https://Registrar.rice.edu/students/visiting/researcher/)

Visiting Undergraduate Students
A student who wishes to spend a semester or a year at Rice taking courses for credit to be applied toward his or her undergraduate degree at another school may apply for admission as a visiting student through the Office of Admission (https://Admissions.rice.edu/). The student's application should be accompanied by the $75 application fee, an official high school transcript, an official transcript of college work to date, an SAT or ACT score, and recommendations from the dean of students and a faculty member who has taught the student within the past academic year. Visiting student applications are available on the Admission website (https://Futureowls.rice.edu/futureowls/Visiting_Student.asp) and should be submitted by March 15 for the fall semester.

Visiting students are assigned membership to one of the residential colleges during their stay and are charged the same fees as other undergraduates. In classes where enrollment is limited because of space or other considerations, candidates for Rice degrees have priority over visiting students for registration.

Visiting students may apply to transfer to Rice only after having left Rice for at least one semester.

Please Note: Financial assistance is not available for visiting students.
The Committee on Examinations and Standing has drawn up the following guidelines on grading. Additional information is available in both the undergraduate (p. 11) and graduate (p. 49) student sections under the heading of 'Grades'.

- The evaluation of the student's performance in a course and a decision on the appropriate grade is the responsibility of the designated instructor or instructors in the course.

- No student should be given an extension of time or opportunities to improve a grade that are not available to all members of the class, except for verified illness or justified absence from campus. No course assignments may be due between the last day of classes and the first day of the final examination period.

- Students in independent study courses are not to be allowed an extension beyond the time when grades are due. Faculty are to submit grades at the end of the semester for such students based on work completed during the semester. The instructor directing the independent study assumes responsibility with the student for ensuring that the work undertaken is appropriate to the span of a semester and for determining the degree credit to be received.

- The basis for grading and the expectations on all written assignments or tests should be clearly explained to the class in advance, preferably in writing at the beginning of the semester. The instructor should explain clearly which assignments or homework are covered by the honor system and which are not. To prevent allegations of plagiarism on written assignments, students should be warned that all direct and indirect quotations from other sources should be properly acknowledged. The instructor should explain the extent to which the student's paper is expected to be independent of the references and clearly distinguishable from them.

- Instructors should be willing to give any student an explanation of his or her grade as consistent with the grading for the rest of the class. For this reason, the committee urges the faculty to preserve all examinations and written material not returned to students, as well as grade records, for at least the following semester so that students may, if they wish, review with their instructor the basis for the grade received.

- Instructors may not change a semester grade after the grade has been submitted to the Office of the Registrar, except when there is a clerical error in calculating the grade. This is a long-standing university rule of which the faculty are reminded by the Office of the Registrar at the end of each semester. It is designed, in part, to protect the faculty from student pressure for grade changes. All other grade changes, including retroactive change to withdrawal, incomplete, or other, must be approved by the Committee on Examinations and Standing on the basis of a written petition from the student and on information from the instructor.

- There is no university requirement that a final examination be given in a course. It is university policy that final examinations that cover more than the material since the last examination, that are the only exam in the course, or that are comprehensive of the entire course may be given only during the final examination period.

Such examinations may not, for example, be labeled “tests” and administered during the last week of classes. Final examinations normally are of three-hour duration. Faculty who, under exceptional circumstances, wish to give longer examinations may do so only if the exam is scheduled as take-home. Under no circumstances may final exams exceed five hours.

- First-year undergraduate students receive mid-semester grades around the eighth week of the fall and spring semesters so that they can, if advisable, seek academic assistance or drop a class for which they may not be prepared. Faculty who teach first-year students in any of their classes will be asked to submit grades of standing for these students during the seventh week of the semester and should schedule the grading of tests, quizzes, or homework assignments accordingly. These grades are not recorded on the student's transcript nor calculated in the grade point average, but they are important indicators for students and their faculty advisors.

- Departments using teaching associates, adjunct professors, or visiting faculty of any kind should make sure these teachers are familiar with Rice grading procedures. A regular faculty member who is well-versed in the grading guidelines should be assigned to assist such instructors.

The chair of the Committee on Examinations and Standing, the Office of the Dean of Undergraduates, or the dean of graduate and postdoctoral studies will be glad to advise any faculty member faced with exceptional circumstances that may justify special consideration. Students may petition the committee or, for graduate students, their department chair concerning the application of these guidelines. Suspected or possible violations of the honor system should be submitted to the Honor Council.

### Academic Progress Reviews for Graduate Students

Graduate programs must establish mechanisms for tracking, reviewing, and documenting academic progress of graduate students on an ongoing basis and must provide graduate students a written assessment of their academic progress at least annually. In some graduate programs this ongoing progress review is carried out by a student’s thesis committee, while in others it is carried out by a standing faculty committee. Although a student’s supervisor plays an important role in reviewing the student’s academic progress, the responsibility for conducting the review process lies with the program and requires the involvement of additional faculty members in the program. For graduate students who are primarily engaged in coursework, for example, professional master’s students, the transcript is an adequate form of written assessment.

### Non-Traditional Coursework

Courses tailored for individual students provide a valuable opportunity for them to pursue an academic or professional interest under the supervision of a Rice faculty member. Such courses are typically titled as independent study or research, directed reading, or internships. Although the organization of these courses is quite variable, they are subject to the same basic requirements as other course offerings. In particular:

- The subject matter and intellectual level of the course must be appropriate for Rice.

- The instructor of record must hold a regular faculty appointment at Rice. This instructor is responsible for submitting the final grade, in consultation with the student’s immediate supervisor, if appropriate.
• The course must have a written syllabus that meets published Rice Syllabus Standards (p. 91). In addition, the syllabus must include a description of anticipated activities and topical content.
• Credit hours assigned are subject to the same amount-of-work considerations as other courses. Credit hours will be awarded in accordance with the Rice credit hour guidelines (https://registrar.rice.edu/facstaff/contact-hours/) and fixed at the time of registration.
• All Registrar deadlines for registration, add/drop, completion of course work, and grade submission must be met.

**Syllabus Standards**

Faculty members and course instructors are required to provide a course syllabus to students on or before the first day of class. The syllabus should be uploaded into ESTHER, and may additionally be distributed in hard copy and/or on Canvas. For archiving purposes, updated versions of the course syllabus can be uploaded into ESTHER through the end of the semester. Each syllabus must include the following instructions:

1. Instructor's name, office number, and email address
2. Office hours or a statement of either an “open-door” policy or hours by appointment
3. Overall course objectives and expected learning outcomes
4. Grade policies
5. Absence policies
6. List of required texts
7. Special materials required for the class, if any
8. Number of required examinations and papers
9. Statement of expectations regarding course work and the Rice Honor Code
10. A statement encouraging any student with a disability that requires accommodation to contact both the course instructor and Disability Resource Center
11. It is permissible to include a statement indicating that the information contained in the course syllabus, other than the absence policies, may be subject to change with reasonable advance notice, as deemed appropriate by the instructor.

The Center for Teaching Excellence (https://cte.rice.edu/) provides a syllabus outline (https://cte.rice.edu/syllabus/) that aids in meeting the above requirements.
PROGRAMS OF STUDY

The contents of Rice’s curricular programs are the collective responsibility of the faculty acting through their representatives in the Faculty Senate (https://senate.rice.edu/). There are specific guidelines for the creation, elimination, and modification of undergraduate (https://senate.rice.edu/undergraduate-programs/) and graduate (https://senate.rice.edu/graduate-programs/) programs, including undergraduate major concentrations (https://senate.rice.edu/sites/g/files/bxs1911/f/Senate%20Approved%20Creating%20a%20New%20Major%20Concentration%2821%29.pdf) and graduate major concentrations (https://senate.rice.edu/sites/g/files/bxs1911/f/2016-09-06%20approved%20graduate%20major%20concentrations.pdf), undergraduate minors (https://senate.rice.edu/sites/g/files/bxs1911/f/Guidelines%20min%20revised%204.4.2018.pdf), and graduate certificates (https://senate.rice.edu/sites/g/files/bxs1911/f/2015-10-02%20Graduate%20Certificate%20Guidelines%202%20Revised%203.3.2016.pdf).

## Accounting

### Master's Program

- **Master of Accounting (MAcc) Degree** (p. 102)

### Dean

Peter Rodriguez

### Deputy Dean of Academic Affairs

Jefferson D. Fleming

---

The Master of Accounting degree, offered by the Jones Graduate School of Business, is designed to enable students with a top-tier non-accounting undergraduate education to complete the educational requirements for becoming a certified public accountant. Certified public accountants conduct independent audits and provide accounting, tax, and consulting services. The program prepares students to enter careers in public accounting, corporate accounting, management accounting, governmental accounting, financial analysis, and law enforcement.

Graduates of the program will excel in analytics, critical thinking, ethics, judgment, and communications, built on outstanding technical accounting skills. An understanding of global capital markets and macroeconomic forces will complement graduates' accounting expertise, along with proficiency in corporate finance, risk and valuation.

Accounting does not currently offer an academic program at the undergraduate level.

Description and Code Legend
Note: Internally, the university uses the following descriptions, codes, and abbreviations for this academic program. The following is a quick reference:

Course Catalog/Schedule
• Course offerings/subject code: MACC

Department Description and Code
• Management: MGMT
Master of Accounting (MAcc) Degree

Program Learning Outcomes for the MAcc Degree

Upon completing the MAcc degree, students will be able to:

1. Demonstrate technical proficiency in the major aspects of public accounting.
2. Demonstrate financial valuation expertise.
3. Demonstrate strong written and verbal business communication skills.
4. Demonstrate a sound knowledge of public policy and corporate governance.
5. Demonstrate a critical and analytical approach to problem solving.

Requirements for the MAcc Degree

The MAcc degree is a non-thesis master's degree. For general university requirements, please see Non-Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MAcc degree must complete:

- A minimum of 17 courses (36 credit hours) to satisfy degree requirements.
- A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above).
- A minimum of 24 credit hours must be taken at Rice University.
- A minimum residency enrollment of 2 semesters of full-time graduate study at Rice University.
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree with a minimum grade of C (2.00 grade points) in each course.

MAcc coursework is comprised of 24 credit hours of accounting coursework, 9 credit hours of business coursework, and 3 credit hours of ethics coursework.

The MAcc degree program has a lockstep curriculum that students typically complete during contiguous fall and spring semesters. With approval from the MAcc program director, a student may take up to four semesters to complete the program. This approval would be granted for internship opportunities and other commitments. In such instances, the program must be completed in contiguous fall and spring semesters, and the student must begin the program in a fall semester. Students requesting the three-semester program option or the four-semester program option must explain in their application the reason for requesting the extended program option, given the academic goals of the program. Students approved for the three- or four-semester program option must agree to follow the specific course sequence as required by the program director to ensure a meaningful pedagogic experience.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Total Credit Hours 36
Policies for the MAcc Degree

Admission Requirements

For general university requirements, see Graduate Degrees (p. 49). Criteria for evaluating participants include: completion of (or plans for completion of) required undergraduate prerequisite courses, academic and professional accomplishments, GMAT or GRE test score, an interview, and, possibly, an admissions assessment examination. Current Rice students and Rice alumni are exempted from the test score requirement, although they may provide a GMAT or GRE score at their discretion. Applicants with exceptional undergraduate academic records are eligible to apply for a standardized test score requirement waiver.

Rice Undergraduates

Students who are on track to fulfill the requirements of the Rice business minor prior to completing their undergraduate degree are eligible for admission to the program. Non-business minors are also eligible for admission if specific prerequisite courses will be completed before undergraduate graduation; the MAcc program director will consult prospective applicants to determine what prerequisite classes are needed. All MAcc applicants, regardless of being a business minor, need to have completed the introductory financial accounting course (BUSI 305), the first intermediate financial accounting course (BUSI 405), and the auditing course (BUSI 440) prior to beginning the MAcc program. Students potentially interested in the MAcc program are encouraged to take BUSI 305 in their sophomore year. Rice undergraduates can apply and gain conditional admission to the MAcc program as early as the fall semester of their junior year and as late as the spring semester of their senior year. Conditionally admitted students who lack any of the prerequisite accounting courses must take appropriate classes to correct their deficiency.

Non-Rice Undergraduates

Students should apply in the fall semester of their senior year. Admitted students who lack the prerequisite accounting course work must take summer pre-term classes.

Academic and Professional Standards

Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MAcc program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

Academic Standards

A minimum overall grade point average of 2.67 (B-) is required for graduation. All courses taken towards the MAcc degree are counted in the overall grade point average calculation.

Students with an overall grade point average lower than 2.67 at the end of any semester will be notified of dismissal. A student who has been notified of dismissal may appeal to the Academic Standards Committee of the Jones Graduate School of Business. The committee will decide, based on the circumstances of the appeal, whether the student:

1. may resume studies on probation,
2. is to be suspended for one semester or an academic year, or
3. is to be dismissed from the MAcc program.

Students are removed from probation only upon achieving an overall grade point average of at least 2.67 at the end of the following semester of work.
Students proposing to return after a period of academic suspension must apply to the Academic Standards Committee and receive permission to be readmitted. If permitted to return, the student will pay the current rate of tuition, based upon the class of students s/he is joining.

Only grades of C (2.00 grade points) and above are counted for credit toward graduation. If a student receives a grade below a C (2.00 grade points) in a course, s/he must meet with the program director to determine remediation. Any plans for remediation must be approved by the Academic Standards Committee.

Professional Standards
Masters students are held to the high standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct (p. 82). The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing specific charges. (This probationary notice, however, is not required as a precondition for filing specific charges.)

Guidelines for Appealing Academic Dismissal
The Process
A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.

Timing
If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

Appeals
Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

Confidentiality
The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

Grade Appeal Process
Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.
2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).
6. Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.
7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.

The Family Educational Rights and Privacy Act of 1974 and amendments govern records of these actions.

kward@rice.edu
African Studies is a broad-ranging field that is committed to an interdisciplinary approach to the study of African peoples and their complex histories, cultures, and languages. Drawn from the Schools of Social Science and Humanities, African Studies at Rice University has strengths in archaeological and anthropological research, historical studies, African religions and theology, African arts, and global health technologies. These foci provide a unique opportunity for students broadly interested in historical, cultural, African diaspora studies, and contemporary issues and will attract students preparing for career fields related to their interest in Africa, including academia (potential applicants to graduate school, Fulbright, or other competitive scholarships), development, diplomacy, business and finance, governance, global health, law, and others.

The African Studies minor at Rice benefits undergraduate students by providing a course of study to explore the richness and complexity of the continent and its place in issues of wider global concern and import. The required interdisciplinary course(s) allow students to traverse departments and schools, creating links between diverse intellectual trajectories. Through study in the African Studies minor, students have the opportunity to appreciate the relationship contemporary Africa has with the large African Diaspora, and to understand not only the place of Africa in global histories and networks, but the crucial role that it has played in them.

Minor
  • Minor in African Studies (p. 105)

African Studies does not currently offer an academic program at the graduate level.

Minor in African Studies

Program Learning Outcomes for the Minor in African Studies
Upon completing the minor in African Studies, students will be able to:

1. Demonstrate the ability to complicate and challenge their understanding of African history, culture, and politics by critically examining the diversity of Africans’ own historical and contemporary perspectives.

2. Understand topics in African Studies in their interdisciplinary contexts, including being able to make connections between African religions, cultures, and politics as well as understand reasons for changes to these relationships across historical time.

3. Identify and explain key theoretical developments in African Studies, in addition to being able to identify and apply interdisciplinary methodologies to topics in African Studies.

4. Demonstrate the ability to read critically and evaluate a variety of sources on African religious thought, customs, and spirituality and critically apply their insights from these sources.

Requirements for the Minor in African Studies
Students pursuing the minor in African Studies must complete:

• A minimum of 6 courses (18 credit hours) to satisfy minor requirements.
• A minimum of 3 courses (9 credit hours) taken at the 300-level or above.
• A maximum of 3 courses (9 credit hours) from study abroad or transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab.

The courses listed below satisfy the requirements for this minor. In certain instances, courses not on this official list may be substituted upon approval of the minor’s academic advisor, or where applicable,
the Program Director. (Course substitutions must be formally applied and entered into Degree Works by the minor’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Students and their academic advisors should identify and clearly document the courses to be taken.

### Footnotes and Additional Information

1. All courses listed in the Core Requirement also fulfill the 100% African Content requirement. Any course not chosen to fulfill the Core Requirement may be chosen to fulfill the 100% African Content requirement.

2. The Elective Requirements (100% African Content and/or 25% African Content coursework) must be taken from at least 3 of the following 6 subject codes: Anthropology (ANTH), English (ENGL), French (FREN), Art History (HART), History (HIST), Religion (RELI).

3. Students must select at least 3 courses (9 credit hours) and may select up to 5 courses (15 credit hours) from the 100% African Content coursework, in addition to the Core Requirement.

4. Students may select up to 2 courses (6 credit hours) from the 25% African Content coursework, or they may select additional 100% African Content coursework to reach the 6 total required courses (18 credit hours) for the minor.

### Policies for the Minor in African Studies

#### Program Restrictions and Exclusions

Students pursuing the minor in African Studies should be aware of the following program restriction:

- As noted in Majors, Minors, and Certificates (p. 11), i.) students may declare their intent to pursue a minor only after they have first declared a major, and ii.) students may not major and minor in the same subject.

#### Transfer Credit

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

#### Program Transfer Credit Guidelines

Students pursuing the minor in African Studies should be aware of the following program-specific transfer credit guidelines:

- No more than 3 courses (9 credit hours) of transfer credit from U.S. or international universities of similar standing as Rice may apply towards the minor.
- No more than 2 courses (6 credit hours) of transfer credit in African languages may be applied to the minor. This may include courses on African languages or other individualized study in African languages with advisor approval. ‘African languages’ does not include the languages of European colonial powers or Arabic. Other languages spoken on the continent, including Afrikaans, will be accepted.
 Requests for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

**Distribution Credit Information**

The determination of distribution eligibility is done as part of the new course creation process (https://registrar.rice.edu/facstaff/courseprocess/). As part of an annual roll call (https://registrar.rice.edu/facstaff/distribution_credit/) coordinated each Spring by the Office of the Registrar, course distribution eligibility is reviewed and reaffirmed by the Dean’s Offices of each of the academic schools.

Faculty and leadership in the academic schools are responsible for ensuring that the courses identified as distribution-eligible meet the criteria as set in the General Announcements (p. 26). Students are responsible for ensuring that they meet graduation requirements (p. 26) by completing coursework designated as distribution at the time of course registration.

**Additional Information**

For additional information, please see the African Studies website: https://africanstudies.rice.edu/

**Opportunities for the Minor in African Studies**

**Academic Honors**

The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

**Additional Information**

For additional information, please see the African Studies website: https://africanstudies.rice.edu/

See https://humanities.rice.edu/student-life (https://humanities.rice.edu/student-life/) for tables of fellowships, prizes, and internships/practica that may be relevant to this minor.

**Air Force Science**

The Air Force Reserve Officer Training Corps (ROTC) program prepares men and women of character, commitment, and courage to assume leadership positions as commissioned officers in the active duty United States Air Force. On completion of the curriculum, students will have a thorough understanding of the core values, leadership, teamwork, and other requirements to be an effective officer in the world’s greatest Air Force.

For additional information regarding Air Force Science, please see the program’s website, at: https://www.uh.edu/class/airforce/.

Air Force Science is not a free-standing degree program; in addition to fulfilling the ROTC curriculum, candidates are required to successfully complete the degree program to which they have been admitted. Upon successful completion of both the Air Force Sciences curriculum and the conferral of their Rice undergraduate degree, the student will become an active duty commissioned officer in the United States Air Force.

**Four-Year Program**

The General Military Course (GMC) is the first half of the four-year ROTC program and is taken during the freshman and sophomore years. This program allows the student to experience Air Force ROTC without obligation (unless the student is on an Air Force ROTC scholarship).

Each semester of the GMC consists of one classroom hour of instruction as well as Leadership Laboratory each week.

During the first two years, the student will learn about the Air Force and the historical development of aerospace power.

During the summer preceding the junior year, the student will compete for the opportunity to attend a four-week Field Training Unit. Successful completion of field training is mandatory for entrance into the Professional Officer Course (POC), the junior and senior years of the four-year program.

As a junior, the student will study the core values, leadership, teamwork, and management tools required to become an effective Air Force officer.

During the senior year, students study the national security policy process and regional and cultural studies, participate in a war-game, and complete final requirements for commissioning as second lieutenants.

**Leadership Laboratory**

As an Air Force ROTC cadet, each student is required to attend an additional two-hour class known as Leadership Laboratory.

Although not part of the academic class requirement, it is an essential element of officer training. Leadership Laboratory is an intensive military training program in which students gain invaluable leadership and managerial experience while learning about the Air Force way of life.

Students have numerous opportunities to hear guest speakers and panel discussions, participate in field trips, and experience practical leadership exercises.

**AFROTC Scholarship Opportunities**

**In-College Scholarship Program (ICSP)** is a highly competitive scholarship program aimed primarily at college freshmen and sophomores in any major (students with a bachelor’s degree can compete to earn a master’s degree). The ICSP awards cover tuition capped at either $18,000 per year plus $900 per year for books or $9,000 per year plus $900 per year for books.

The Express Scholarship Program is operated on a fully qualified basis: those who meet the qualifications are awarded the scholarship. Though the list of eligible college majors differs from year to year, the express scholarship covers full tuition per year and $900 for books. Currently, majors that qualify include: Electrical and Computer Engineering, and Strategic foreign languages. For the most up-to-date information, visit https://www.afrotc.com/.

ROTC scholarship students incur a military obligation. For additional information on AFROTC scholarship opportunities, please visit the AFROTC website at https://www.afrotc.com/ or call 1-800-4AFROTC.

**Stipend**

All AFROTC scholarship recipients and POC cadets receive a nontaxable monthly stipend. The annual stipend amount ranges from $2,000 per year to $4,000 per year depending on the recipient’s enrollment year.
Field Training (FT)
Cadets completing the General Military Course attend four weeks of field training (FT) during the summer at Maxwell AFB, Alabama. Those who have not completed the GMC attend an extended FT Unit. This rigorous program of leadership training, physical conditioning and academics assesses the cadet’s potential to be an Air Force officer.

Cadets also receive survival and firearms training and career information. Cadets receive travel pay and daily pay for FT.

Flight Orientation Program
All cadets can volunteer to participate in a joint Air Force ROTC/Civil Air Patrol flight orientation program. This consists of eight flights, four in the front seat of a small passenger aircraft and four additional flights in the back seat as an observer. A soaring program also is available in which cadets get four sorties in gliders. In addition, an abbreviated flying ground school course is taught in the ROTC classrooms using FAA textbooks. The flight program and ground school course are both free for all cadets.

Physical Fitness Training
Cadets meet twice per week at the University of Houston Alumni Center to perform physical fitness training. The training is mandatory and emphasizes push-ups, sit-ups, and running in order to pass the USAF physical fitness test.

Professional Development Training (PDT)
Cadets are eligible to compete to attend PDT during the summer months.

PDT consists of several programs, including:

• Tours of nearby active duty Air Force bases
• Soaring and free-fall parachuting at the United States Air Force Academy
• (USAFA)
• Cultural and Foreign Language Immersion
• Hands-on research at Air Force laboratories
• Shadowing a Air Force officer in Operation Air Force
• Internships at NASA and other government organizations

Cadets receive travel pay and daily pay for the majority of these programs.

For more information contact the Unit Admissions Officer at 713-743-4932/3704 or visit the University of Houston Air Force website at https://www.uh.edu/class/airforce/.

Summary
The mission of producing Air Force second lieutenants of character, commitment, and courage is more important than ever.

See AFSC in the Rice Course Schedule (these are taught at the University of Houston).

Air Force Science does not currently offer an academic program at the graduate level.

Michael R. Maas
Program Director
maas@rice.edu

This interdisciplinary major in the cultures of ancient Greece and Rome, Judaism, early Christianity, and early Islam, as well as their antecedents, explores these traditions both for their intrinsic interest and for the contributions each has made to contemporary Western society. Our combined focus on ancient cultural history in its broadest sense and on perspectives offered by cultural criticism enables students to examine the beginnings of the civilization in which they now participate.

Courses for this major address common questions about the transmission and transformation of cultures in the ancient Mediterranean world. Students examine sources, such as texts and artifacts that illuminate the process. They study how shifting cultural centers and frontiers in this world are delineated, and they explore the general integration and disintegration of specific ancient cultures. This major also offers opportunities for archaeological fieldwork and study abroad.

Rice is a sponsor of the American School of Classical Studies at Athens, the American School of Oriental Research, the American Academy in Rome, the American Research Center in Sofia, and the Intercollegiate Center for Classical Studies in Rome. Students majoring in Ancient Mediterranean Civilizations are encouraged to study in these programs as well as in the College Year in Athens program.

Bachelor’s Program

• Bachelor of Arts (BA) Degree with a Major in Ancient Mediterranean Civilizations (p. 109)

Ancient Mediterranean Civilizations does not currently offer an academic program at the graduate level.

Bachelor of Arts (BA) Degree with a Major in Ancient Mediterranean Civilizations

Program Learning Outcomes for the BA Degree with a Major in Ancient Mediterranean Civilizations

Upon completing the BA degree with a major in Ancient Mediterranean Civilizations, students will be able to:

1. Explain the historical trajectory of at least two of these Ancient Mediterranean Civilizations: Graeco-Roman, Islamic, Jewish, Christian.

2. Identify and explain how cultural, political, intellectual, religious, and other aspects of Ancient Mediterranean Civilizations have affected aspects of contemporary societies.

3. Create convincing arguments about one or more aspects of Ancient Mediterranean Civilizations through the evaluation and critical analysis of textual and material evidence.

Requirements for the BA Degree with a Major in Ancient Mediterranean Civilizations

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Ancient Mediterranean Civilizations must complete:

• A minimum of 10 courses (30-32 credit hours, depending on course selection) to satisfy major requirements.
• A minimum of 120 credit hours to satisfy degree requirements.
• A minimum of 60 credit hours outside of major requirements.
• A minimum of 5 courses (15 credit hours) taken at the 300-level or above.

Although not required, courses in ancient languages are recommended.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

**Policies for the BA Degree with a Major in Ancient Mediterranean Civilizations**

**Transfer Credit**

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

**Program Transfer Credit Guidelines**

Students pursuing the major in Ancient Mediterranean Civilizations should be aware of the following program-specific transfer credit guidelines:

- Request for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

**Distribution Credit Information**

The determination of distribution eligibility is done as part of the new course creation process (https://registrar.rice.edu/facstaff/courseprocess/). As part of an annual roll call (https://registrar.rice.edu/facstaff/distribution_credit/) coordinated each Spring by the Office of the Registrar, course distribution eligibility is reviewed and reaffirmed by the Dean’s Offices of each of the academic schools.

Faculty and leadership in the academic schools are responsible for ensuring that the courses identified as distribution-eligible meet the criteria as set in the General Announcements (p. 26). Students are responsible for ensuring that they meet graduation requirements (p. 26) by completing coursework designated as distribution at the time of course registration.

**Additional Information**

For additional information, please see the Ancient Mediterranean Civilizations website: https://amc.rice.edu/
Opportunities for the BA Degree with a Major in Ancient Mediterranean Civilizations

Academic Honors

The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Additional Information

For additional information, please see the Ancient Mediterranean Civilizations website:
https://amc.rice.edu/

See https://humanities.rice.edu/student-life for tables of fellowships, prizes, and internships/practica that may be relevant to this major.

Anthropology is a discipline that encompasses many subjects of study, all related to understanding human beings and their cultures. A student may organize a major in one or more of anthropology’s principal fields or may combine a major in anthropology with one in another discipline. The goal of anthropology is to understand and interpret cultural and biological differences among human societies, both past and present.

The Rice Anthropology department includes diverse offerings in all major subfields of the subject. In archaeology there are courses on the rise and decline of past civilizations and cultures, as well as practical courses that permit students to participate in excavations. In biological anthropology there are courses in human evolution, human nutrition, and on the practice of medicine in our own and other cultures. Cultural anthropology surveys the diversity of world cultures, and offers courses on particular culture areas and provides critical perspectives on the study of contemporary culture changes globally. Social anthropology courses focus upon the study of myth, ritual, and religion among traditional and complex societies and the idea of history as cultural myth.

We also offer courses that explore the relationships between language, culture, and modes of thought in a number of societies. For those interested in the history of anthropology and its current concerns, there are a number of courses offered, including the art of ethnography and the study of the historical, political, and literary roots of anthropological ideas.

Bachelor’s Program

• Bachelor of Arts (BA) Degree with a Major in Anthropology (p. 113)

Minor

• Minor in Anthropology (p. 116)

Master’s Program

• Master of Arts (MA) Degree in the field of Anthropology*

Doctoral Program

• Doctor of Philosophy (PhD) Degree in the field of Anthropology (p. 115)

* Although students are not normally admitted to a Master of Arts (MA) degree program, graduate students may earn the MA as they work towards the PhD.

Description and Code Legend

Note: Internally, the university uses the following descriptions, codes, and abbreviations for this academic program. The following is a quick reference:

Course Catalog/Schedule

• Course offerings/subject code: ANTH

Department Description and Code

• Anthropology: ANTH
Bachelor of Arts (BA) Degree with a Major in Anthropology

Program Learning Outcomes for the BA Degree with a Major in Anthropology

Upon completing the BA degree with a major in Anthropology, students will be able to:

1. Understand how the history of anthropological debates, concepts, and goals is relevant to the discipline’s changing understanding of the dynamics of cultures past and present.
2. Think historically and comparatively, based on a solid understanding of anthropological perspectives on culture, experience, and social practice with regard to particular dimensions of culture, for example gender, health, law, ethics, ritual, materiality, heritage, and the environment.
3. Apply disciplinary tools for responsibly researching and describing culture and critically conceptualizing the relationship between culture and factors such as historical change, power and social difference, and human diversity. These tools are based on an understanding of anthropological theory and method.
4. Apply research and analytical tools to individual research questions and case studies in order to become effective producers and critical evaluators of anthropological knowledge.

Requirements for the BA Degree with a Major in Anthropology

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Anthropology must complete:

- A minimum of 10 courses (30 credit hours) to satisfy major requirements.
- A minimum of 120 credit hours to satisfy degree requirements.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 6 courses (18 credit hours) taken at the 300-level or above.
- A maximum of 4 courses (12 credit hours) from study abroad or transfer credit. For additional departmental guidelines regarding transfer credit, see the Policies tab.
- A minimum of 8 courses (24 credit hours) from departmental (ANTH) course offerings.
- The requirements for one area of specialization (see below for areas of specialization). The BA degree with a major in Anthropology offers two areas of specialization:
  - Anthropological Archaeology (p. ), or
  - Social-Cultural Anthropology (p. )
- A final Capstone or Honors research project culminating in an oral presentation as well as a written paper.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degneworks/officialcertifier/ ) Students and their academic advisors should identify and clearly document the courses to be taken.

Degree Requirements

Core Requirements

Introductory Courses

Select 2 courses from the following:

- ANTH 201 INTRODUCTION TO SOCIAL/CULTURAL ANTHROPOLOGY
- ANTH 203 INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY
- ANTH 205 INTRODUCTION TO ARCHAEOLOGY

Method Course

Select 1 course from the following:

- ANTH 362 ARCHAEOLOGICAL FIELD TECHNIQUES
- ANTH 398 ETHNOGRAPHIC RESEARCH METHODS
- SOSC 302 QUANTITATIVE ANALYSIS FOR THE SOCIAL SCIENCES
- SOSC 303 QUALITATIVE METHODS IN THE SOCIAL SCIENCES

Theory Course

- ANTH 302 ANTHROPOLOGICAL THEORY: A SURVEY
  or ANTH 460 ADVANCED ARCHAEOLOGICAL THEORY

Elective Requirements
The major in Anthropology has two distinct areas of specialization, Anthropological Archaeology and Social-Cultural Anthropology. Depending on a student’s interest and desired area of specialization, students should see specific department advisors for assistance with elective course selection.

Area of Specialization: Anthropological Archaeology
In this area of specialization, the focus is on research skills in the library, the field, and the laboratory. Anthropology students will also engage theoretical developments and critical contemporary debates on issues such as the politics of the past and cultural heritage. Students also develop at least one analytical skill, such as, archaeological statistics, osteology, or geoarchaeology, drawing on the university’s laboratory and computer facilities. The anthropology program at Rice has a long-term focus on the archaeology of urban, complex societies in East and West Africa. The program offers students the opportunity to participate in archaeological excavations abroad as well as projects in Houston that focus on the city’s African-American past. Students inquiring about the anthropological archaeology area of specialization should see Dr. Jeffrey Fleisher (jfleisher@rice.edu, Sewall Hall, 582) about elective course options.

Area of Specialization: Social-Cultural Anthropology
This area of specialization engages with contemporary issues populations, and social dynamics that affect human life and culture broadly around the world. Social-cultural anthropology inquires across a vast range of human concerns from religion to social movements, from gender to medicine, from science studies to media, and from nature to law. Students are trained in ethnographic research methods and qualitative data collection, and they learn the theoretical principles that have shaped the discipline as well as contemporary, innovative approaches that question how human sociality is constituted in the 21st century. The social-cultural anthropology program at Rice has always championed interdisciplinary theoretical, and experimental modes of anthropology inquiry, and students are encouraged to add their creative intellectual insights to their research pursuits and goals. Students inquiring about the social-cultural anthropology area of specialization should see Dr. Jeffrey Fleisher (jfleisher@rice.edu, Sewall Hall, 582) about elective course options.

Policies for the BA Degree with a Major in Anthropology
Transfer Credit
For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines
Students pursuing the major in Anthropology should be aware of the following departmental transfer credit guidelines:

- No more than 4 courses (12 credit hours) of transfer credit from U.S. or international universities of similar standing may apply towards the major.
- Requests for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.
- Dr. Beverly Mitchell is the undergraduate transfer credit advisor. All students seeking transfer credit in anthropology for courses taken elsewhere should see Dr. Mitchell for approval.
- Transfer credit coursework from online-only courses cannot be used to count towards the major.

Additional Information
For additional information, please see the Anthropology website: https://anthropology.rice.edu/.
Opportunities for the BA Degree with a Major in Anthropology

Academic Honors
The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Archaeological Field School in Sub-Saharan Africa
The Department of Anthropology offers an archaeological field school during the summer months in Africa. Past field schools have been on the island of Gorée, located off the coast of Senegal, where research focused on the development of Gorée as a supply port for the Atlantic trade, at Songa Mnara, a 15th-century Swahili urban center on the southern Tanzanian coast, and Basanga, an Iron Age settlement mound in southwest Zambia. This course is offered for a total of six hours of credit (ANTH 364 and ANTH 370). The course is offered without specific prerequisites, but there is a general requirement that students have some prior coursework in archaeology or African history. Program fees apply.

Requirements for the Departmental Honors Program
The Honors Program is intended to acknowledge outstanding students, and to provide them with advanced training in the planning and execution of sustained, independent research. As a rule, students should petition the undergraduate advisor to be admitted to the Program no later than the 10th week of the spring semester of their junior year. Admission is at the discretion of the department faculty. The only formal prerequisite to admittance are a Grade Point Average in the major of at least 3.50 and an overall GPA at the end of the junior year of at least 3.00. Final decisions concerning admission are at the discretion of department faculty. Once admitted to the Program, each student must complete a thesis, on a topic of her or his choosing, under the direction of one of the members of the department's faculty. Topics should be approved by the faculty advisor by the end of the first month of the senior year. Theses are due at the end of the last semester of the senior year.

The Honors Thesis includes a one-credit research preparation and support course, ANTH 493, and two three-credit research courses (Directed Honors Research ANTH 490 and ANTH 491).

All honors projects will be considered for the Distinction in Research and Creative Work (p. 48).

Additional Information
For additional information, please see the Anthropology website: https://anthropology.rice.edu/.

Doctor of Philosophy (PhD) Degree in the field of Anthropology

Program Learning Outcomes for the MA and PhD Degrees in the field of Anthropology
Upon completing the MA and PhD degrees in the field of Anthropology, students will be able to:

1. Excel at professions within and outside the academy that emphasize research, analytic, and writing skills.
2. Demonstrate a comprehensive understanding of the history of the discipline as well as anthropological theory and practice.
3. Utilize the key methodological, theoretical, and analytical skills at the heart of the discipline and become skilled producers of anthropological knowledge, able to critique actively and reconfigure canonical approaches to social science.
4. Apply research and analytical skills to original research questions and case studies to produce innovative approaches to anthropological knowledge and intervene effectively in both disciplinary discussions and wider sociocultural debates.
5. Conduct responsible, ethical research with interlocutors and consultants in a world of increasingly complex interplay between small-scale and large-scale concerns and commitments.

Requirements for the MA and PhD Degrees in the field of Anthropology

The department seeks applicants to the PhD program with a defined research interest in sociocultural anthropology; an undergraduate background in anthropology is desirable, but not required. Entering students will devise a detailed first-year plan of study with provisional plans for succeeding years in consultation with a faculty advisory committee. The plan will emphasize broad training in the discipline before the eventual definition of a thesis research project.

MA Degree Program
The MA degree is a thesis master’s degree. For general university requirements, please see Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Although students are not normally admitted to study for an MA in the social-cultural area of specialization, graduate students may earn the MA degree after obtaining approval of their candidacy for the PhD. To earn an MA degree in the field of Anthropology, students must complete:

- 30 semester hours of approved course work.
- Two qualifying exams or two qualifying essays required for PhD candidacy.
- A thesis which meets the standards of the student’s PhD candidacy committee.

Requirements for the PhD Degree in the field of Anthropology

PhD Degree Program
For general university requirements, please see Doctoral Degrees (p. 65). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the PhD degree program in Anthropology with the social-cultural specialization must:

- Complete required course work: 90 semester hours of graduate study (undergraduate courses, including language courses, do not satisfy this requirement).
- Complete 5 Required Courses (15 credit hours) listed below.
- Complete 4 additional courses (12 credit hours) as electives in the Department of Anthropology (either ANTH 500-level or ANTH 600-level).
Minor in Anthropology

• Prior to achieving candidacy, successfully complete an end-of-year report. Students will write a 2-3 page (double-spaced) summary of their achievements for the year and consult with a faculty panel at the end of each spring semester.

Footnotes and Additional Information

¹ Only one semester of ANTH 650 is required, however a minimum of 18 credit hours of graduate credit is required in order to be eligible to take this course.

Requirements for PhD Candidacy (and thus eligibility for the candidacy MA)

Students pursuing the PhD degree program in Anthropology must complete the following. These requirements must be completed no later than the end of the eighth semester of enrollment in the program:

• Successful completion of all required courses. Students must receive at least a ’B’ in a course for the department to deem it successfully completed. An overall GPA of at least 3.00 each semester must be maintained to remain in good academic standing.

• The approval by the student’s candidacy committee of either two qualifying examinations or two qualifying essays (further details are noted in the Graduate Student Handbook on the Department of Anthropology’s website [http://gradhandbooks.rice.edu/2017_18/Anthropology_Graduate_Handbook.pdf](http://gradhandbooks.rice.edu/2017_18/Anthropology_Graduate_Handbook.pdf)).

• The approval by the student’s candidacy committee of the design and content of at least one undergraduate syllabus to be created in ANTH 650.

• The committee’s approval of the thesis research.

• For students not bilingual (in English and their field research language), the passing of an examination in a period of 90 minutes, with the help of a dictionary, of at least 1,000 words into English from an academic journal article in anthropology in either the relevant field language or a major scholarly language, such as French, German, or Spanish.

• (For acquisition of the PhD) Successful completion of extended fieldwork with regular reports made back to the thesis committee.

• (For acquisition of the PhD) Complete and defend the thesis to the satisfaction of the thesis committee.

Policies for the PhD Degree in the field of Anthropology

Department of Anthropology Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Anthropology publishes a graduate program handbook, which can be found here: [https://gradhandbooks.rice.edu/2019_20/Anthropology_Graduate_Handbook.pdf](https://gradhandbooks.rice.edu/2019_20/Anthropology_Graduate_Handbook.pdf)

Financial Support

All first-year students receive the same level of support: a combination of graduate fellowships and tuition scholarships. These awards are renewed for a further four years of study contingent upon satisfactory performance.

Additional Information

For additional information, please see the Anthropology website: [https://anthropology.rice.edu/](https://anthropology.rice.edu/)

Opportunities for the PhD Degree in the field of Anthropology

Additional Information

For additional information, please see the Anthropology website: [https://anthropology.rice.edu/](https://anthropology.rice.edu/)

Minor in Anthropology

Program Learning Outcomes for the Minor in Anthropology

Upon completing the minor in Anthropology, students will be able to:

1. Understand the origins and current state of approaches and methods across the discipline’s subfield.
2. Describe anthropology’s unique, comparative, and historically informed perspective on human social, cultural, and political continuity and variation.
3. Make use of anthropology’s critical perspectives to understand contemporary social and cultural practices in the world around them.
4. Utilize critical reading and thinking skills to make original arguments about the significance of social and cultural practices in the world around them.

Requirements for the Minor in Anthropology

Students pursuing the minor in Anthropology must complete:
• A minimum of 6 courses (18 credit hours) to satisfy minor requirements.
• A minimum of 3 courses (9 credit hours) taken at the 300-level or above.
• A maximum of 2 courses (6 credit hours) from study abroad or transfer credit. For additional departmental guidelines regarding transfer credit, see the Policies tab.

The courses listed below satisfy the requirements for this minor. In certain instances, courses not on this official list may be substituted upon approval of the minor's academic advisor, or where applicable, the Program Director. (Course substitutions must be formally applied and entered into Degree Works by the minor's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/)). Students and their academic advisors should identify and clearly document the courses to be taken.

Policies for the Minor in Anthropology

Program Restrictions and Exclusions

Students pursuing the minor in Anthropology should be aware of the following program restriction:

- As noted in Majors, Minors, and Certificates (p. 11), i.) students may declare their intent to pursue a minor only after they have first declared a major, and ii.) students may not major and minor in the same subject.

Transfer Credit

For Rice University's policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the minor in Anthropology should be aware of the following departmental transfer credit guidelines:

- No more than 2 courses (6 credit hours) of transfer credit from U.S. or international universities of similar standing as Rice may apply towards the minor.
- Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.
- Dr. Beverly Mitchell is the undergraduate transfer credit advisor. All students seeking transfer credit in anthropology for courses taken elsewhere should see Dr. Mitchell for approval.
- Transfer credit coursework from online-only courses cannot be used to count towards the minor.

Additional Information

For additional information, please see the Anthropology website: https://anthropology.rice.edu/.

Opportunities for the Minor in Anthropology

Academic Honors

The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Archaeological Field School in Sub-Saharan Africa

The Department of Anthropology offers an archaeological field school during the summer months in Africa. Past field schools have been on the island of Gorée, located off the coast of Senegal, where research focused on the development of Gorée as a supply port for the Atlantic trade, at Songo Mnara, a 15th-century Swahili urban center on the southern Tanzanian coast, and Basanga, an Iron Age settlement mound in southwest Zambia. This course is offered for a total of six hours of credit (ANTH 364 and ANTH 370). The course is offered without specific prerequisites, but there is a general requirement that students have some prior coursework in archaeology or African history. Program fees apply.

Additional Information

For additional information, please see the Anthropology website: https://anthropology.rice.edu/.

Applied Physics

Contact Information

Applied Physics

Junichiro Kono
Program Chair
kono@rice.edu
The Applied Physics Graduate Program (APP) includes faculty from the departments of electrical and computer engineering, physics and astronomy, bioengineering, chemistry, chemical and biomolecular engineering, materials science and nanotechnology, and statistics.

A joint effort of both the Wiess School of Natural Sciences and the George R. Brown School of Engineering at Rice where the application of physics principles is beneficial, and overseen by the Smalley-Curl Institute (SCI), the Applied Physics Graduate Program is administered by a committee composed of members from the participating departments mentioned above. The objective is to provide an interdisciplinary graduate education in the basic science that underlies important technology. The faculty believes that the experience obtained by performing research at the intellectually stimulating interface of physical science and engineering is particularly effective in producing graduates who succeed in careers based on new and emerging technologies.

Due to the interdisciplinary nature of the program, students can involve virtually any of the research facilities in either the natural sciences or engineering schools of Rice University. Prospective students are urged to contact the Program Chair or SCI for detailed descriptions of research facilities and ongoing research projects.

Applied Physics does not currently offer an academic program at the undergraduate level.

**Master's Program**

- Master of Science (MS) Degree in the field of Applied Physics*

**Doctoral Program**

- Doctor of Philosophy (PhD) Degree in the field of Applied Physics (p. 118)

  * Although students are not directly admitted to a Master of Science (MS) degree program, graduate students must earn the MS in lieu of a qualifying exam as they work toward the PhD.

**Chair, Applied Physics Graduate Program**

Junichiro Kono

**Director, Smalley-Curl Institute**

Naomi J. Halas

**Executive Director, Smalley-Curl Institute**

Alberto Pimpinelli

*Doctor of Philosophy (PhD) Degree in the field of Applied Physics*
Program Learning Outcomes for the MS and PhD Degrees in the field of Applied Physics

Upon completing the MS and PhD degrees in the field of Applied Physics, students will be able to:

1. Acquire and demonstrate advanced knowledge in the foundational applications of physics including familiarity with past and current scientific literature in their chosen specialization.
2. Develop the ability to conduct independent applied physics research including the aptitude to identify, formulate, and overcome challenging scientific and engineering problems in this endeavor.
3. Make an original and significant technical contribution in their chosen specialization area.

Requirements for the MS and PhD Degrees in the field of Applied Physics

The Applied Physics Program (APP) offers a PhD degree. For general university requirements, please see Doctoral Degrees (p. 65). The MS degree is a thesis master’s degree. For general university requirements, please see Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55).

The program does not offer a stand-alone thesis MS degree, although students admitted to the program are required to earn the MS within the program before proceeding to the PhD. For each degree, the student must fulfill the university requirements set forth in the General Announcements under which he/she entered. The semester hour requirements may be fulfilled both by classroom hours and research hours. A total of nine one-semester, 3-credit hour per course minimum, graduate level courses is required for the master’s degree in applied physics, ordinarily a requirement for advancement to candidacy in the PhD program. Four of these are core courses required of all students, and five are elective courses chosen according to individual research goals. The Applied Physics Curriculum and Admissions Committee (APCAC) may waive some course requirements for students who demonstrate a thorough knowledge of material in one or more core/elective course(s). Full requirements are available online at [https://appliedphysics.rice.edu/](https://appliedphysics.rice.edu/).

By the end of the third year in the program, all APP students should have completed the university requirements for the master’s degree, fulfilled the course requirements of the APP, and defended a master’s thesis in a public oral examination by a committee approved by the APCAC. The examination covers the work reported in the thesis as well as the entire field in which the student intends to work toward their PhD. The examining committee votes separately on awarding the master’s degree and on admission to candidacy for the PhD. The student may be required to fulfill teaching/grading requirements set by the host department. Fulfillment of all university degree requirements and successful defense of a PhD thesis in a public examination by an APCAC-approved committee is necessary for the PhD.

### Footnotes and Additional Information

1. Any course taken beyond the four-course requirement for the Applied Physics Core Requirements can be applied towards the Applied Physics Electives requirement.
2. It is assumed that the student has an adequate background in classical mechanics, electrostatics, and statistical and thermal physics. This background is determined from interviews or exams given to entering students by the APCAC or the host department.
3. A full list of elective courses can be found on the Applied Physics website ([http://rqi.rice.edu/curriculum/](http://rqi.rice.edu/)). No courses may be used for both core and elective courses. Due to overlap of curricula, only one from each of the pairs PHYS 521/CHEM 530, and PHYS 526/CHEM 520 may be used for the nine required courses.

### Course Lists to Satisfy Requirements

Director of Undergraduate Studies
archug@rice.edu

Dawn Finley
Director of Graduate Studies
finley@rice.edu

The Rice School of Architecture focuses on speculative practice - that is, the teaching and research of architecture and urban design as speculations that will advance professional practice as well as our built environment. Intimate student-faculty interaction, academic freedom, and unrestricted institutional cooperation within and outside the university are distinctive qualities of the architecture degree programs at Rice. Students build on their classroom experience through design-build projects in our Construct program; site and office visits with our Mentorship program; and our award-winning Totalization program, which incorporates professional consultants and instruction (structural, façade, financial, MEP and other) within the studio, enabling our students to apply advanced technologies to building design and construction.

Rice Architecture’s undergraduate programs maintain a balance between a focused study of architecture and a broad general education. In addition to formal coursework, students benefit from lectures and presentations from distinguished practitioners and scholars, symposia and other cultural events, and the unique Rice Preceptorship program, which places students in an outstanding professional office for a nine to twelve-month internship that includes all phases of the design-construction process.

Rice Architecture’s graduate programs contextualize design within a broader tableau of architectural history, contemporary practice, and advanced material and fabrication technologies. Rice’s graduate program culminates in an independent design thesis, on the principle that an architectural education provides a complete exposure to architecture’s breadth, from which the student establishes his or her depth, or expertise, through this independent research project.

Bachelor’s Programs

- Bachelor of Arts (BA) Degree with a Major in Architecture (p. 125)
- Bachelor of Arts (BA) Degree with a Major in Architectural Studies (p. 124)

Post-Bachelor’s Program

- Bachelor of Architecture (BArch) Degree (p. 123)
Master’s Programs

- Master of Architecture (MArch) Degree (p. 127)
- Master of Arts (MA) Degree in the field of Architecture (p. 131)
- Master of Architecture in Urban Design (MAUD) Degree*

Doctoral Programs

- Doctor of Architecture (DArch) Degree*

* The MAUD and DArch degree programs are currently inactive and are not accepting applications for admission.

Bachelor of Architecture (BArch) Degree

Program Learning Outcomes for the BArch Degree

Upon completing the BArch degree, students will be able to:

1. Innovate the knowledge and practice of architecture through advanced critical thinking, experimentation, and research.
2. Explore the practice of architecture through the Preceptorship Program, a year-long supervised internship in an architectural firm that subsequently informs advanced research and design.
3. Project innovative architectural practices and ideas through experimental research and design, synthesizing heterogeneous cultural and technical considerations into a coherent project.
4. Integrate experience in architectural practice with experimental design projects through advanced building technologies, including material, structural, environmental, and mechanical systems.

Requirements for the BArch Degree

Students pursuing the BArch degree must complete:

- A minimum of 8 courses (62 credit hours) to satisfy major requirements.
- A minimum of 62 credit hours to satisfy degree requirements.
- A minimum grade of C (2.00 grade points) in each required course.
- A minimum of 8 courses (62 credit hours) to satisfy major requirements.
- A minimum grade of C (2.00 grade points) in each course.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major's academic advisor, or where applicable, the department's Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

Total Credit Hours

62

Footnotes and Additional Information

1 All courses above must be taken in the sequence and semester prescribed by the School of Architecture and completed with a grade of C (2.00 grade points) or higher.
2 By accepting a place in the BArch degree program and Preceptorship, each student agrees to all the terms specified by Rice and/or the assigned Preceptorship office, including: registration fees, start and end dates, work responsibilities, performance expectations, and agreement to return to Rice the subsequent year. Failure to meet these expectations will result in an unsatisfactory grade evaluation and may prevent further progress in the program. Students’ concerns while on Preceptorship should be brought to the attention of the Director of External Programs as soon as possible. While on Preceptorship, a student remains a Rice student and is governed by applicable student codes of conduct, rights, and responsibilities.
3 ARCH 500 is taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As a S/U course, it does not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.
4 Students will substitute a course at the 300-level or above from departmental (ARCH) offerings if the student completed ARCH 423/ARCH 623 during his/her first four years of study.
5 If students are attending the Rice School of Architecture in Paris, students must enroll in two semesters of ARCH 620 Architectural Problems as their studio courses, in place of ARCH 601 and ARCH 602.

Policies for the BArch Degree

The Bachelor of Architecture (BArch) degree program is open to students who have completed the undergraduate preprofessional architecture program at Rice. The BArch degree requires the successful completion of the Bachelor of Arts (BA) degree with a major in Architecture, completion of the two-semester Preceptorship, and completion of two advanced option studios and approved lecture or seminar courses. Admission into the program requires completion of all university and major requirements for the BA degree, a portfolio of work and formal application. Admittance is dependent upon satisfactory academic performance, demonstrated aptitude, and preparation for the Preceptorship and the advanced coursework of the final year. Grades are not the exclusive criterion for admission; however, the school expects a minimum of a B (3.00) GPA within the required courses for the major and, typically, no grades in the C (2.00) GPA range during the last two years of studio courses. Preliminary admittance is offered early in the spring semester of senior year contingent upon satisfactory completion of remaining coursework.
The academic year immediately following preceptorship, students must return for their final year of study to the School of Architecture, taking advanced level studios and courses. In this year, students may apply to Rice Architecture in Paris to complete a semester abroad. The autumn studios feature the Totalization studio, in which the student’s experience from preceptorship is integrated into academic research through a comprehensive design project. At the end of this final two-year stage, students graduate with a Bachelor of Architecture (professional) degree.

The Bachelor of Architecture (BArch) degree program is accredited by the National Architectural Accrediting Board (NAAB) and qualifies graduates to take the state professional licensing exams after completing the required internship in an architectural office.

Transfer Credit
For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines
Students pursuing the BArch degree should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

Additional Information
For additional information, please see the School of Architecture website: https://arch.rice.edu/.

Opportunities for the BArch Degree
Rice Architecture - Paris
BArch students in their fifth year may apply to the Paris program to complete one semester in Paris.

Bachelor of Arts (BA) Degree with a Major in Architectural Studies
Program Learning Outcomes for the BA Degree with a Major in Architectural Studies
Upon completing the BA degree with a major in Architectural Studies, students will be able to:

1. Gain knowledge of the history and theory of architecture in relation to broader social, technological, and cultural practices and transformations.
2. Understand the design process in architecture through a variety of scales and problems and with an appreciation of design’s importance in the quality of our cities and environment.
3. Explore and develop specific interests concerning the discipline and/or its relationship to other fields and endeavors.

Requirements for the BA Degree with a Major in Architectural Studies
For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Architectural Studies must complete:

- A minimum of 12 courses (48 credit hours) to satisfy major requirements.
- A minimum of 120 credit hours to satisfy degree requirements.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 2 courses (6 credit hours) taken at the 300-level or above.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/) ) Students and their academic advisors should identify and clearly document the courses to be taken.

Footnotes and Additional Information

* Includes coursework completed as distribution credit, FWIS, LPAR, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The "hours outside of the major" requirement may include all of the above university requirements.

Policies for the BA Degree with a Major in Architectural Studies

Admission
The BA degree with a major in Architectural Studies provides a foundation in architectural ideas and design while allowing a broader pursuit of other fields as an undergraduate. Enrollment is restricted to students admitted into the architecture program who have completed the first two years of required courses. Approval is based on academic performance and demonstrated aptitude indicating that the student is on track for continued study in the discipline. While grades are not the exclusive criteria for the decision, the School of Architecture expects a minimum of a B (3.00) GPA within the required courses for the major, and no more than 1 studio course grade in the C (2.00) GPA range.

Transfer Credit
For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines
Students pursuing the major in Architectural Studies should be aware of the following departmental transfer credit guidelines:

• Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.

Additional Information
For additional information, please see the School of Architecture website: https://arch.rice.edu/.

Opportunities for the BA Degree with a Major in Architectural Studies

Academic Honors
The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Additional Information
For additional information, please see the School of Architecture website: https://arch.rice.edu/ (https://architecture.rice.edu/).

Bachelor of Arts (BA) Degree with a Major in Architecture

Program Learning Outcomes for the BA Degree with a Major in Architecture
Upon completing the BA degree with a major in Architecture, students will be able to:

1. Formulate architectural projects that integrate design skills with critical thinking, engaging broader theoretical, social, political, economic, cultural, and environmental issues.
2. Explore how technology, issues of the environment, and construction inform innovative design solutions.
3. Strategize how the relationship of architectural concepts, communication and representation techniques, and construction technology can innovate practice.
Requirements for the BA Degree with a Major in Architecture

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Architecture must complete:

- A minimum of 17 courses (75 credit hours) to satisfy major requirements.
- A minimum of 130 credit hours to satisfy degree requirements.
- A minimum of 55 credit hours outside of major requirements, 45 of which must be taken outside of the School of Architecture (courses outside of departmental (ARCH) course offerings), and 10 of which may be taken as free electives from any subject code.
- A minimum of 11 courses (45 credit hours) taken at the 300-level or above.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier.) Students and their academic advisors should identify and clearly document the courses to be taken.

2019-2020 General Announcements
PDF Generated 11/12/2019
Policies for the BA Degree with a Major in Architecture

The BA degree with a major in Architecture, leading to a Bachelor of Architecture (BArch) degree, is the primary undergraduate architecture program at Rice. Students who apply and are accepted into the University and the School of Architecture enter directly into this program. The required courses for the BA degree with a major in Architecture, leading ultimately to the BArch degree, consist of four integrated sequences in the following areas: Design Studios, History and Theory, Technology, and Practice. Courses in these sequences must be taken in the order and semesters specified by the School of Architecture.

The curriculum for this professional degree program sequence has three two-year long stages. The first stage provides a foundation sequence in design, history and theory, and technology taken in the first and second years. Students are also expected to fulfill the majority of University general distribution requirements during these two years. The curriculum is designed to provide an intensive focus on architecture, while allowing each student to receive a broad education and to pursue other interests.

Approval of major is based on academic performance and demonstrated aptitude indicating that the student is on track for advanced study at the BArch level. While grades are not the exclusive criteria for the decision, the school expects a minimum of a B (average 3.00) GPA within the required courses for the major and no more than one studio course grade in the C (2.00) GPA range. Students apply during the Spring of their second year of architectural study, and are notified after the conclusion of that semester.

The second intermediate stage occurs in the third and fourth years. Students complete the courses required for the BA degree with a major in Architecture, remaining university requirements, and take electives through which each student can develop his or her particular interests in the field and in other areas. In their fourth year, students pursue a design research sequence through a seminar in the fall that is linked to the spring studio. At the end of this stage, and with the completion of all major and university requirements, students graduate, receiving the degree of a BA degree with a major in Architecture.

The third and final stage consists of the Bachelor of Architecture (BArch) degree and includes the year of Preceptorship. The BArch degree program is only open to students who have completed the first four years at Rice School of Architecture and who apply for admission into this stage of the program during their fourth year. As with the approval for major two years prior, approval is based on satisfactory academic performance and preparation for the advanced studies of the BArch degree.

Transfer Credit

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the major in Architecture should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

Additional Information

For additional information, please see the School of Architecture website: https://arch.rice.edu/.

Opportunities for the BA Degree with a Major in Architecture

Academic Honors

The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Additional Information

For additional information, please see the School of Architecture website: https://arch.rice.edu/.

Master of Architecture (MArch) Degree

Program Learning Outcomes for the MArch Degree

Upon completing the MArch degree, students will be able to:

1. Innovate the knowledge and practice of architecture through advanced critical thinking, experimentation, and research.

2. Develop or augment a comprehensive knowledge of the technical aspects of design and construction including an understanding of their impact on design and the environment at a level commensurate with advanced study.

3. Develop a comprehensive knowledge of diverse, advanced building technologies and their application to the design, construction, and operation of buildings, including environmental, material, structural, and mechanical systems, using leading computer applications and tools.

4. Develop or augment a comprehensive understanding of architectural practice and foster the development of innovative forms of practice at a level commensurate with advanced study.
Requirements for the MArch Degree

The MArch degree can be either a thesis or a non-thesis master's degree depending on the option the student pursues. For general university requirements for thesis master's degrees, please see Thesis Master's Degrees (p. 68). For general university requirements for non-thesis master's degrees, please see Non-Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MArch degree must complete:

- A minimum of 93-95 credit hours or 131-133 credit hours, depending on option pursued, to satisfy degree requirements.
- A minimum of 30 credit hours of graduate-level study (coursework at the 500-level and above).
- A minimum of 24 credit hours must be taken at Rice University.
- A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
- The requirements for one degree program option (see below for options). The MArch degree program offers two options:
  - Option 1 (Thesis or Non-Thesis) (p. ), or
  - Option 2 (Thesis or Non-Thesis) (p. ).
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the thesis master's degree or the non-thesis master's degree with a minimum grade of B- (2.67 grade points) in each course.

The Master of Architecture (MArch) degree program understands architecture to be a generalist practice, while encouraging each student's freedom to forge a specific trajectory within this generalist milieu. We prepare students to engage an ever more ambiguous world—one that can no longer simply be flattened by such binaries as local and global, quantity and quality, mind and nature, form and function, or standards and exceptions. The challenge we pose to our students is to transgress the obsolescence of opposing values and to navigate the tricky waters of a world no longer organized around presupposed notions of solidity, permanence, rootedness, centrality, protection, and identity. Our program is the very place where visions of the future are tested and where students are asked to understand the world's complexity in order to focus on the tangible, the legible, and the relevant.

Individuals who possess a Bachelor's degree in any discipline can apply to the MArch degree program. Our curriculum offers a set of core courses (in Design, History and Theory, Technology, and Practice) and many free electives, both in the School of Architecture and across campus. In studio courses, strong emphasis is given to the very means by which architecture is able to change the world through program, form, and technology. Such fundamental aspects to design can, when mobilized, produce a practice of architecture that is as speculative as it is realist. Every fall, advanced "Totalization" studios are conducted in such a way as to have students rigorously weigh all aspects of building design while nonetheless biasing their engagement so as to produce highly specific architectural projects. In their final thesis semester, students are asked to face the world and engage it through architectural speculation and a precise understanding of historical, political, economic, and physical dimensions, which can together define a better future.

The MArch degree program is accredited by the National Architectural Accrediting Board (NAAB) and qualifies graduates to take the state professional licensing exams after completing the required internship in an architectural office.

Programs of Study

There are two program options at the Master of Architecture (MArch) level: Option 1 and Option 2. They differ according to the Bachelor's degree received prior to entering the graduate program. MArch students in Options 1 and 2 complete the degree requirements by either submitting a thesis or by taking alternative coursework. Thesis students are required to take Design Thesis Studio (ARCH 703, 10 credit hours) and Written Thesis (ARCH 729 or ARCH 730, 3 credit hours). Students who pursue the non-thesis MArch degree are required to take the Totalization Studio (ARCH 601, 10 credit hours) in lieu of the thesis studio and an additional elective (worth 3 credit hours) in lieu of the written thesis course. All students are required to enroll in Thesis Proposal (ARCH 701), even if they pursue the non-thesis degree program (option 1 or 2).

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Option 1 - MArch Degree Program

Offered to individuals who hold a four-year undergraduate degree with a major in a field other than Architecture or a major in Architecture with fewer than five semesters of architectural design studio. Preference for admission is given to those who have completed a balanced education in the arts, sciences, and humanities. A minimum of two semesters of college-level courses in the history of art and/or architecture and one semester of college-level courses in mathematics or physics is recommended. Previous preparation in the visual arts is also desirable, as are courses in philosophy, literature, and economics. In order to graduate, students in this program must complete, in addition to 6 semesters of design studios (70-72 credit hours), a curriculum of 34 credit hours with an additional free electives course load of 27 credit hours.

**Thesis Requirements**
- ARCH 701 | THESIS PROPOSAL | 2,3 |
- ARCH 703 | DESIGN THESIS STUDIO | 2,3 |
- ARCH 729 | THESIS WRITTEN DOCUMENT (FALL) | 2,3 |
- or ARCH 730 | THESIS WRITTEN DOCUMENT (SPRING) | 3 |

**Elective Requirements**
- Students must complete 9 additional courses | 27 |

Total Credit Hours | 131-133 |

---

**Footnotes and Additional Information**

1. Students enrolled in the Paris program (RSAP) will register for ARCH 620 design studio in lieu of ARCH 601 (fall) or ARCH 602 (spring).

2. All students are required to take ARCH 701 even if they pursue the non-thesis degree program (option 1 or 2). Students who wish to remain enrolled as a registered student for an eighth semester will register for ARCH 703 in their seventh semester and ARCH 730 (instead of ARCH 729) in the eighth semester. Students who wish to take this extension must decide at the beginning of their seventh semester. Students who pursue the non-thesis MArch degree are required to take the Totalization Studio (ARCH 601, 10 credit hours) in lieu of the thesis studio and an additional elective (worth 3 credit hours) in lieu of the written thesis course ARCH 729 or ARCH 730.

3. ARCH 701, ARCH 703, ARCH 729, and ARCH 730 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of B- (2.67) in each required course.

Students who wish to take this extension must decide at the beginning of their seventh semester. Students who pursue the non-thesis MArch degree are required to take the Totalization Studio (ARCH 601, 10 credit hours) in lieu of the thesis studio and an additional elective (worth 3 credit hours) in lieu of the written thesis course ARCH 729 or ARCH 730.
ARCH 701, ARCH 703, ARCH 729, ARCH 730 and are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of B- (2.67) in each required course.

**Option 2 - MArch Degree Program**

Offered to individuals who hold a four-year undergraduate degree with a major in Architecture. Advanced placement into Option 2 is at the discretion of the admissions committee, but generally preference for admission is given to those who have successfully completed five semesters or more of undergraduate design studio as well as undergraduate courses that are analogous to those given in the first year of Option 1. A minimum of two semesters of college-level courses in the history of art and/or architecture and one semester of college-level courses in mathematics or physics is expected. In order to graduate, students in this program must complete, in addition to 4 semesters of design studios (50-52 credit hours), a curriculum of 31 credit hours with an additional free electives course load of 12 hours.

**Footnotes and Additional Information**

1. Students who have previously taken courses equivalent to Technology I and II at another institution may instead take electives with permission from the director of graduate studies.
2. Students enrolled in the Paris program (RSAP) should register for ARCH 620 design studio in lieu of ARCH 601 (fall) or ARCH 602 (spring).
3. All students are required to take ARCH 701 even if they pursue the non-thesis degree program (option 1 or 2). Students who wish to remain enrolled as a registered student for an eighth semester will register for ARCH 703 in their seventh semester and ARCH 730 (instead of ARCH 729) in the eighth semester. Students who wish to take this extension must decide at the beginning of their seventh semester. Students who pursue the non-thesis MArch degree are required to take the Totalization Studio (ARCH 601, 10 credit hours) in lieu of the thesis studio and an additional elective (worth 3 credit hours) in lieu of the written thesis course ARCH 729 or ARCH 730.
4. ARCH 701, ARCH 703, ARCH 729, and ARCH 730 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of B- (2.67) in each required course.

Footnotes and Additional Information
1. Students who have previously taken courses equivalent to Technology I and II at another institution may instead take electives with permission from the director of graduate students.
2. Students enrolled in the Paris program (RSAP) should register for ARCH 620 in lieu of ARCH 601 (fall) or ARCH 602 (spring).
3. All students are required to take ARCH 701 even if they pursue the non-thesis degree program (option 1 or 2). Students who wish to remain enrolled as a registered student for an eighth semester will register for ARCH 703 in their seventh semester and ARCH 730 (instead of ARCH 729) in the eighth semester. Students who wish to take this extension must decide at the beginning of their seventh semester. Students who pursue the non-thesis MArch degree are required to take the Totalization Studio (ARCH 601, 10 credit hours) in lieu of the thesis studio and an additional elective (worth 3 credit hours) in lieu of the written thesis course ARCH 729 or ARCH 730.
4. ARCH 701, ARCH 703, ARCH 729, and ARCH 730 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of B- (2.67) in each required course.
5. Students are required to enroll in ARCH 525 (the ARCH 525 course serves as a History and Theory I Introduction), after which students must select two further History and Theory courses from the following options: ARCH 645, ARCH 646, or ARCH 652. The additional credit hours earned from the two History and Theory courses will complete the 93-95 credit hours required for the MArch degree, Option 2.

Notes for the MArch Degree Program
All courses above (for both Option 1 and 2) must be taken in the sequence and semester prescribed by the School of Architecture and completed with a minimum overall GPA of 3.00 in required coursework and a minimum grade of B- (2.67 grade points) in each course.

Policies for the MArch Degree
School of Architecture Graduate Program Handbook
The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the school of Architecture publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Architecture_Graduate_Handbook.pdf

Transfer Credit
For Rice University's policy regarding transfer credit, see Transfer Credit (p. 64). Some departments and programs have additional restrictions on transfer credit. Students are encouraged to meet with their academic program's advisor when considering transfer credit possibilities.

Additional Information
For additional information, please see the School of Architecture website: https://arch.rice.edu/

Opportunities for the MArch Degree
Master of Architecture (MArch) Thesis Requirement
Thesis is payback time—it is when students build upward and outward from what they've learned over the years, giving back to the school by providing new disciplinary fodder. More immediate than a crystal ball, some of the common threads underlying a Rice thesis might well reveal tomorrow's future. Despite working in the context of Texas's vast horizon, Rice thesis students do not envision an endless frontier. Rather than turning away from the discipline, our students have found new territories embedded within architectural and urban paradigms, breathing into them new life and vitality. All MArch degree candidates are required to propose an independent thesis, articulating an ambition, and envisioning its architectural specificity. Students develop their individual thesis proposals during their penultimate semester. Students in Options 1 and 2 complete the degree requirements by either submitting a thesis or by taking alternative coursework. Thesis design evolves from the honing of that proposal and continues through the final semester, under the guidance of an individual advisor. In early January, thesis projects are reviewed publicly by a panel of eminent invited guests. In short, the school starts each new year with a batch of new visions.

RSA Paris
MArch degree (Option 1 and Option 2) students may apply to RSAP to complete one semester in Paris: Option 1 students may do so in their fifth or sixth semester, Option 2 in their third or fourth semester. BArch students may apply to RSAP in their final year of study.

Additional Information
For additional information, please see the School of Architecture website: https://arch.rice.edu/

Master of Arts (MA) Degree in the field of Architecture
Program Learning Outcomes for the MA Degree in the field of Architecture
Upon completing the MA degree in the field of Architecture, students will be able to:
1. Integrate architecture and advanced research to address the most pressing and complex issues of design, environment, and culture.
2. Develop research techniques and knowledge of advanced systems, techniques, and processes.
3. Innovate the knowledge and practice of architecture through advanced critical thinking and experimentation.
Requirements for the MA Degree in the field of Architecture

The MA degree is a thesis master's degree. For general university requirements, please see Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55).

Present Future is a concentrated undertaking culminating in the MA (Master of Arts) degree, in the field of Architecture. The program is structured around a three-semester-long exploration of a topic led by a Rice School of Architecture faculty member. A select group of students form the core: a collective intelligence responsible for developing a discourse that synthesizes theoretical, historical, and design ambitions.

Subjects will be of contemporary importance and will be framed by a 3-credit seminar the first term, a 12-credit collective thesis in the second term, and a concluding 3-credit seminar in the third term. In addition to free electives, each semester will include additional required credits that are appropriate to the selected topic, bringing the total credit hours to 39.

The program’s student body will include those with backgrounds in architecture as well as other fields: individuals with BA, BS equivalent, or more advanced degrees in architecture or other disciplines are invited to apply. Coursework will include offerings from the School of Architecture and other departments across Rice University.

Leo Costello
Department Chair
lcostell@rice.edu
The Department of Art History offers a wide range of courses in European, American, Latin American, Middle Eastern/Islamic, and Asian art history. The major in Art History is structured to expose students to the chronological, geographical, and methodological breadth of the field of scholarship.

**Bachelor’s Program**
- Bachelor of Arts (BA) Degree with a Major in Art History (p. 133)

**Minor**
- Minor in Cinema and Media Studies (p. 296)

**Master's Program**
- Master of Arts (MA) Degree in the field of Art History*

**Doctoral Program**
- Doctor of Philosophy (PhD) Degree in the field of Art History (p. 140)

* Although students are not normally admitted to a Master of Arts (MA) degree program, graduate students may earn the MA as they work towards the PhD.

**Bachelor of Arts (BA) Degree with a Major in Art History**

**Program Learning Outcomes for the BA Degree with a Major in Art History**

Upon completing the BA degree with a major in Art History, students will be able to:

1. Understand the historical, social, cultural and political contexts and traditions of art. Students will develop an understanding of the multiple contexts of art, including its relationship to religion, politics, gender and sexuality, urbanism, history, culture, and other domains of human social experience.
2. Demonstrate effective use of specialized disciplinary vocabulary and appropriate methodologies to analyze works of art and communicate their form, function, and meaning orally and in writing.
Requirements for the BA Degree with a Major in Art History

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Art History must complete:

- A minimum of 10 courses (30 credit hours) to satisfy major requirements.
- A minimum of 120 credit hours to satisfy degree requirements.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 5 courses (15 credit hours) taken at the 300-level or above.
- A maximum of 4 courses (12 credit hours) from study abroad or transfer credit. For additional departmental guidelines regarding transfer credit, see the Policies tab.
- The requirements for one area of specialization (see below for areas of specialization). When students declare the major (p. 11) in Art History, students must additionally identify and declare one of two areas of specialization, either in:
  - Art History (p. 11), or
  - History of Architecture (p. 11).

It is possible for students to change their area of specialization at any time, even after initially declaring the major. To do so, please contact the Office of the Registrar (registrar@rice.edu).

The department of Art History also offers a unique departmental Honors Program. For more information, including Honors Program requirements, see the Opportunities tab.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degwerk/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

Footnotes and Additional Information

* Includes coursework completed as distribution credit, FWIS, LPAP, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The “hours outside of the major” requirement may include all of the above university requirements.

Areas of Specialization

Students must complete a total of 10 courses (30 credit hours) as listed in the requirements for one of the Art History areas of specialization. Note that the course lists to satisfy each requirement can be found below the specialization requirements.

Area of Specialization: Art History

To satisfy the requirements for the Art History Specialization, Art History majors must complete 10 courses (30 credit hours) as listed below.

Footnotes and Additional Information

1 Transfer credit for HART 100 received via the articulation of advanced placement credit (AP) credit, international baccalaureate (IB) credit, or A-level credit will not count toward any major requirements, including elective requirements.

2 Courses listed in the Seminar Courses list can also satisfy a requirement in the History of Architecture, Outside European and American Traditions, or the three chronological categories requirements.

Policies for the BA Degree with a Major in Art History

Transfer Credit

For Rice University's policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the major in Art History should be aware of the following departmental transfer credit guidelines:

- No more than 4 courses (12 credit hours) of transfer credit from U.S. or international universities of similar standing as Rice may apply towards the major.
- Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.
- Transfer credit received via the articulation of advanced placement (AP) credit (HART 100), international baccalaureate (IB) credit, or A-level credit will not be considered towards major requirements.

Distribution Credit Information

The determination of distribution eligibility is done as part of the new course creation process (https://registrar.rice.edu/facstaff/courseprocess/). As part of an annual roll call (https://registrar.rice.edu/facstaff/distribution_credit/) coordinated each Spring by the Office of the Registrar, course distribution eligibility is reviewed and reaffirmed by the Dean's Offices of each of the academic schools.

Faculty and leadership in the academic schools are responsible for ensuring that the courses identified as distribution-eligible meet the criteria as set in the General Announcements (p. 26). Students are responsible for ensuring that they meet graduation requirements (p. 26) by completing coursework designated as distribution at the time of course registration.

Distribution courses from Art History (HART) introduce students to fundamental historical and/or methodological concepts for the study of art, architecture, and material culture. They aim to develop key
skills in looking at, writing about, and discussing works of art and their historical roles. These courses may introduce a broad historical overview (Renaissance to the present, etc.), a more specific historical period or concept (Baroque, modernism, ancient Rome, etc.), or a cultural idea or practice that has been important for art’s history (pilgrimage, iconoclasm, etc.).

Additional Information
For additional information, please see the Art History website: https://arthistory.rice.edu/

Opportunities for the BA Degree with a Major in Art History

Academic Honors
The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Departmental Honors Program in Art History
The departmental honors designation is reserved for those accepted into the Art History Honors Program. Students apply (via the departmental Director of Undergraduate Studies) no earlier than spring of the sophomore year and no later than spring of the junior year, and once accepted, they will be assigned to a faculty mentor. Financial assistance is available for honors students to conduct research between their junior and senior years. Students pursuing this opportunity will have a stronger engagement with art historical research to better prepare for a graduate degree in art history.

To remain in the Honors Program, students must maintain an overall grade point average of 3.30 or higher and receive an A (4.00 grade points) or A- (3.67 grade points) in both semesters of the Honors Thesis (HART 402 and HART 403) taken in their senior year. Students who maintain a grade point average of 3.70 or higher and who receive an A (4.00 grade points) in both semesters of the Honors Thesis (HART 402 and HART 403) may be awarded high honors by vote of the department. If students are not able to maintain the requirements of the Departmental Honors Program, they can still graduate with the Art History major.

Departmental Honors Program Requirements
To satisfy the requirements for the Honors Program in Art History, Art History majors must complete 12 courses (36 credit hours) as listed below. A minimum of 6 courses (18 credit hours) must be taken at the 300-level or above.

<table>
<thead>
<tr>

</tr>
<tr>
<td>HART 403</td>
<td>HONORS THESIS (Senior Year, Spring Semester)</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credit Hours 36

Footnotes and Additional Information
1 Courses listed in the Seminar Courses list can also satisfy a requirement in the Outside European and American Traditions or the three chronological categories requirements.
2 Students register for HART 402 Honors Thesis in the fall semester and HART 403 Honors Thesis in the spring semester of their senior year. Students generally spend the fall semester conducting research on their topic and the spring semester writing the thesis. The final result is a 25-30 page paper with an original statement, well support by research. Students’ interpretative, analytical, research, and writing skills evidenced in the thesis are expected to approach graduate-level work.

The final step of the Honors Thesis is the defense, in which students present their thesis to the faculty and students of the Art History department in a 20-minute talk followed by 20 minutes of questions and discussions.

Students must maintain an overall GPA of 3.30 or higher and receive an A (4.00 grade points) or A- (3.67 grade points) in both semesters of the Honors Thesis (HART 402 and HART 403) to remain in the Honors Program in Art History. High honors are awarded to students earning 4.00 grade points in both HART 402 and HART 403.

It is strongly recommended that majors in Art History acquire proficiency in at least one foreign language.

In addition, Art History majors are encouraged to take advantage of the opportunities provided by museum internships, study abroad programs, and travel fellowships.

Additional Information
For additional information, please see the Art History website: https://arthistory.rice.edu/

See https://humanities.rice.edu/student-life/ for tables of fellowships, prizes, and internships/practica that may be relevant to this major.

Doctor of Philosophy (PhD) Degree in the field of Art History

Program Learning Outcomes for the MA and PhD Degrees in the field of Art History

Upon completing the MA and PhD degrees in the field of Art History, students will be able to:

1. Apply disciplinary methods for the visual interpretation and critique of art to produce scholarship and communicate about art using...
appropriate disciplinary vocabularies and primary and secondary
texts where appropriate.

2. Understand art not as an isolated incident but in relation to the
contexts that not only shape art, but are shaped by art, including:
history, society, culture, geography, and politics.

3. Understand art as a multicultural issue.

4. Develop and apply understanding of major artistic movements,
artists, and art pieces by identifying and situating individual artists
and works of art within major movements.

Requirements for the MA and PhD Degrees in the field of Art History

For general university requirements, please see Doctoral Degrees
(p. 65). For additional requirements, regulations, and procedures for all
graduate programs, please see All Graduate Students (p. 55). The PhD
in Art History program at Rice University trains students for academic
research and teaching, curatorial positions, and other careers in the
visual arts. Program requirements include two years of coursework and
the demonstration of two language proficiencies in addition to English,
as well as the successful completion of a graduate research paper,
oral and written qualifying exams, a thesis prospectus, and a doctoral
thesis. All students entering the PhD program must complete the full
curriculum, regardless of the degrees and coursework completed prior to
the student’s admission to Rice’s doctoral program.

The MA degree is a non-thesis master's degree. For general university
requirements, please see Non-Thesis Master’s Degrees (p. 68). For
additional requirements, regulations, and procedures for all graduate
programs, please see All Graduate Students (p. 55). Although all students
are admitted into the doctoral program, and no MA program is available,
an MA degree may be conferred upon the successful completion of the
first two years of coursework, the passing of at least one language exam,
and the completion of the graduate research paper.

In addition to the traditional degree timeline, the department also offers
a Museum Professionals area of specialization, which is designed for
students who currently hold professional appointments at local
museums. All requirements for the program remain the same; however,
graduate students who continue to hold their position at museums have
a longer timetable for completing requirements.

The program is overseen by the Graduate Committee in Art History.
The committee is comprised of department faculty and supervised
by a Director of Graduate Studies (DGS). The DGS is responsible for
advising students on coursework and degree requirements, and the
department’s Graduate Program Administrator oversees completion and
documentation of program requirements, as well as financial matters
concerning graduate students.

All incoming students will be assigned to the DGS for the first semester
of enrollment. The DGS will assist in explaining departmental guidelines,
choosing courses, and beginning to strategize about primary and
secondary fields. Primary and secondary fields are later finalized by the
student in consultation with his or her advisor and with a view towards
the requirements of the job market. First-year students need to identify
a potential faculty advisor in their primary field, approach the faculty
member for permission, and, with the advisor’s agreement, declare a
permanent advisor by the end of the first week of classes in the Spring
semester of the first year.

Coursework

Satisfactory completion (grade C+ or above) of at least 36 credit hours
(12 courses) of graduate coursework (500-level or 600-level) is required;
at least half of these courses need to be seminars. All incoming students
are required to take HART 590 (Methods in Art History), an introductory
seminar, in the Fall term of their first year, as well as HART 503 (Graduate
Research Paper), an independent study, in the second or third year,
according to the degree timeline. Both of these courses count toward the
12-course requirement.

Of the 12 required courses, at least 4 courses must be taken in the
student’s primary field of interest and least 2 courses in the secondary
field. Students should work with their advisors to identify primary and
secondary fields by the end of the second year. Up to 3 graduate courses
may be taken outside the department, as approved by the student’s
advisor.

If a student chooses to enroll in an independent study course, the student
and course supervisor should establish and document the format and
expectations for the course by the second week of the term.

Additionally, research hours leading to candidacy and a thesis
are also required, but do not count toward the 12-course
requirement. HART 600 (Qualifying Exams) and HART 601 (Thesis
Prospectus) are taken in preparation for candidacy, and
HART 800 (Thesis Research) is taken in preparation for the thesis
and for defense.

Foreign Languages

Reading knowledge of at least two languages other than English is
required. These languages must be relevant to research in the student’s
field of study and must be approved by the student’s advisor. A third
language may also be strongly recommended by the student’s advisor.
The first language proficiency exam must be taken by December 15 of the
first semester of the first year, and the second exam taken by May 1 of
the second semester of the second year. If the student fails either exam,
s/he may retake them no more than two additional times. The first exam
must be passed within a year of the original exam. The second exam
must be passed for the student to enter into candidacy, and no later than
September 15th of the fourth year. If necessary, students are strongly
encouraged to begin study of their second language at the start of their
first year.

Graduate Research Paper

In the Spring term of their second year, students are required to complete
a substantial research paper, as part of HART 503 (Graduate Research
Paper). In preparation for this paper, the student should submit a topic and preliminary bibliography for the graduate research paper to his or her advisor by the end of Fall term of the second year. The purpose of the paper is to demonstrate research skills in art history including the ability to develop a convincing argument, to use visual evidence, to undertake research in foreign languages where applicable, and to develop an original thesis. The paper topic should be the result of careful thought and planning between student and advisor. It should not be thought of as a preliminary version of a thesis, but rather an opportunity to explore in depth a topic of interest, perhaps related to course work. It need not, however, be outside of the student’s primary field of study and may end up being related to an eventual thesis topic. The topic of the paper, and a preliminary bibliography, should be discussed with the advisor before the end of the Fall semester of the second year.

Teaching and Research Assistantships
All students in their third year will serve as Teaching Assistants (TAs). TAs will be assigned to courses based on course enrollments and numbers of TAs available, but in each semester some TAs will be assigned to HART 101 or HART 102. In some semesters, a TA may be assigned to a different course, based on interest/experience, combined with course size and professors’ needs. In both cases, the focus will be on a collaborative process in which TAs are an integral part of the department’s teaching, and will be supervised and trained in ways which will help in the development of their pedagogical skills. Students will gain experience by either leading discussion sections or taking over class sessions during the semester and the TA will be observed and given feedback. After the first year, each student will also serve as a Research Assistant to a faculty member in the department for one semester.

Qualifying Exams
The doctoral qualifying exams (HART 600 and HART 601) consist of two written exams, followed by an oral exam. Preparation of the qualifying exams will begin during the summer term between the second and third years, and continue throughout the third year. The written and oral exams must be completed in the Spring semester of the third year. The exams will cover topics in the student’s primary field of study and secondary field, as agreed upon with the student’s advisor and based on the student’s interests and intended area of study for the doctoral thesis. Passing the qualifying exams is necessary for continuation in the program into the thesis phase.

Thesis Prospectus
In the Spring semester of the third year, students will enroll in HART 601 and prepare a prospectus of 10-12 pages plus bibliography on their thesis topic to be presented to their advisor and thesis committee. Students are encouraged to think of the thesis prospectus as a base document for their thesis research and writing phases. It should clearly present the thesis topic, significance and contribution to the field(s), historical context, methodology and archival sources, and preliminary structure. Format details should be agreed upon with the thesis advisor, and the thesis committee should be approved by the department’s graduate committee. Once the student has passed the doctoral exams and had the prospectus approved by the thesis committee, the student will file a petition for approval of candidacy for the PhD with the Office of Graduate Studies.

Thesis
A thesis represents independent and original research, equivalent to a publishable book, which makes a significant contribution to the current body of knowledge in the field. It must show a mastery of the literature in the subject, be written in acceptable literary style, and conform to the standards outlined on the Rice University Office of Graduate Studies website. Theses may be written on any subject that falls within the supervisory competence of a permanent member of the department.

Policies for the PhD Degree in the field of Art History
Department of Art History Graduate Program Handbook
The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, including more detailed information regarding the PhD degree program policies and requirements, evaluation of student progress, and recommended timetable for degree completion for traditional students and those in the Museum Professionals Track, please see the Department of Art History Graduate Program Handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Art_History_Graduate_Handbook.pdf

Additional Information
For additional information, please see the Art History website: https://arthistory.rice.edu.

Opportunities for the PhD Degree in the field of Art History
Co-Teaching
A competitive co-teaching program will be available to in-residence students beginning in their fifth year, with applications due by January 15 of the preceding year. This is a chance to build on the teaching assistant experience of the third year, while giving students a means to build their teaching résumé during the dissertation stage of the program and as they prepare to go into the job market.

Exhibitions, Lectures, and Arts Programs at Rice and in Houston
Houston is fortunate to have some of the best art collections in the United States. The department enjoys a strong and ongoing relationship with the local museums, in particular the Menil Collection and the Museum of Fine Arts, Houston. The department offers opportunities for students to study with local museums, galleries, and alternative art spaces by way of internship courses, summer internship working opportunities, fellowships, or collaborative events. The collections and special exhibitions of local museums are often the focus of class lectures and research papers in art history.

The department sponsors the Katherine Tsanoff Brown Lecture Series, which brings leading scholars to Rice to speak on a wide variety of topics. The department also hosts occasional symposia and lectures in collaboration with other departments, presenting the ideas of top scholars, critics, and artists.

The Department of Art History houses the Visual Resources Center, which currently offers a broad and extensive collection of digital images related to the arts for teaching and research, serving both the department and the university at large. Additionally, exhibitions and related activities organized by the Rice University Moody Center for the Arts enrich the university and the Houston community. The Department of Visual and Dramatic Arts mounts several art and photography exhibitions each year and sponsors Rice Cinema, a public alternative film program.
Prizes and Awards
Information regarding graduate prizes and awards, as well as fellowship and internship opportunities at local museums, can be found on the department website, under the Funding and Additional Opportunities section: https://arthistory.rice.edu/graduate/funding-additional-opportunities/.

Additional Information
For additional information, please see the Art History website: https://arthistory.rice.edu.

Description and Code Legend
Note: Internally, the university uses the following descriptions, codes, and abbreviations for this academic program. The following is a quick reference:

Course Catalog/Schedule
- Course offerings/subject: ASIA

Program Description and Code
- Asian Studies: ASIA

Undergraduate Degree Description and Code
- Bachelor of Arts degree: BA

Undergraduate Major Description and Code
- Major in Asian Studies: ASIA

CIP Code and Description
- ASIA Major/Program: CIP Code/Title: 05.0103 - Asian Studies/Civilization
Bachelor of Arts (BA) Degree with a Major in Asian Studies

Program Learning Outcomes for the BA Degree with a Major in Asian Studies

Upon completing the BA degree with a major in Asian Studies, students will be able to:

1. Develop a broad historical and geographic knowledge about Asia as a transnational region.
2. Design and execute independent research on Asia by using either social scientific or humanistic methods.
3. Demonstrate the ability to incorporate Asian-language sources into academic research.

Requirements for the BA Degree with a Major in Asian Studies

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Asian Studies must complete:

- A minimum of 10 courses (30 credit hours) to satisfy major requirements.
- A minimum of 120 credit hours to satisfy degree requirements.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 4 courses (12 credit hours) taken at the 300-level or above.
- Demonstration of advanced language proficiency in an Asian language.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/dregeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

Footnotes and Additional Information

* Includes coursework completed as distribution credit, FWIS, LPAP, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The “hours outside of the major” requirement may include all of the above university requirements.

1 Students must demonstrate advanced language proficiency in an Asian language, and this proficiency requirement may be fulfilled by courses taken at Rice University, through AP credit received, or other means. Up to 4 of the 8 required elective courses may be Asian language courses (Arabic, Chinese, Hindi, Japanese, Korean, or Russian). Students are encouraged to consult with a major advisor regarding this point.

2 A minimum of 3 courses (9 credit hours) must be taken from at least three different subject codes (i.e., HART, HIST, RELI, etc.) to meet Elective Requirements.

Course List to Satisfy Requirements

Elective Requirements

Students must complete a total of 8 courses (24 credit hours) from course offerings with predominantly Asian content, which can be found below. Of these 8 courses, up to 4 may be language courses in a single Asian language (Arabic, Chinese, Hindi, Japanese, Korean, or Russian). A minimum of 3 courses (9 credit hours) must be taken from at least three different subject codes (i.e., HART, HIST, RELI, etc.) to meet Elective Requirements.

Footnotes and Additional Information
1 In addition to the courses listed here, all ASIA program course offerings, many of which are cross-listed, may be used to satisfy the major requirements.
2 ENGL 397 is a variable topics course. Dependent on the topic in any given semester, the course may or may not fulfill an Asian Studies elective. See a major advisor for more information.

Policies for the BA Degree with a Major in Asian Studies

Transfer Credit
For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

Program Transfer Credit Guidelines
Students pursuing the major in Asian Studies should be aware of the following program-specific transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program’s transfer credit advisor) on an individual case-by-case basis.

Distribution Credit Information
The determination of distribution eligibility is done as part of the new course creation process (https://registrar.rice.edu/facstaff/courseprocess/). As part of an annual roll call (https://registrar.rice.edu/facstaff/distribution_credit/) coordinated each Spring by the Office of the Registrar, course distribution eligibility is reviewed and reaffirmed by the Dean’s Offices of each of the academic schools.

Faculty and leadership in the academic schools are responsible for ensuring that the courses identified as distribution-eligible meet the criteria as set in the General Announcements (p. 26). Students are responsible for ensuring that they meet graduation requirements (p. 26) by completing coursework designated as distribution at the time of course registration.

Distribution courses from Asian Studies (ASIA) develop students’ critical and aesthetic understanding of texts and the arts. They lead students to the analytical examination of ideas and values and introduce students to the variety of approaches and methods with which different disciplines approach intellectual problems. Additionally, they engage students with words of culture that have intellectual importance by virtue of the ideas they express, their historical influence, their mode of expression, or their critical engagement with established cultural assumptions and traditions.

Additional Information
For additional information, please see the Asian Studies website: https://chaocenter.rice.edu/

Opportunities for the BA Degree with a Major in Asian Studies

Academic Honors
The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Additional Information
For additional information, please see the Asian Studies website: https://chaocenter.rice.edu/

See https://humanities.rice.edu/student-life (https://humanities.rice.edu/student-life/) for tables of fellowships, prizes, and internships/practica that may be relevant to this major.

To train the next generation of leaders in bioengineering, Rice’s Bioengineering department has created an innovative teaching program that transcends boundaries between bioengineering, basic science, and clinical medicine, integrating the academic, industrial, and societal perspectives. Our hands-on approach to education is supported by a long standing tradition of cross-disciplinary research and education.

The Rice Bioengineering program is a comprehensive training program that provides student with:

- A fundamental understanding of the life and medical sciences.
- Advanced analytical and engineering capabilities.
- Translational research capability for transferring biotechnical advances from bench to bedside.

With this educational background, graduates will be well prepared to participate in independent or collaborative research and development endeavors in industry or academia.

Graduate programs in bioengineering offer concentrations in areas such as biomedical imaging and diagnostics, cellular and biomolecular
engineering, computational and theoretical bioengineering, biomaterials and drug delivery and biomaterials, systems and synthetic biology, and tissue engineering and biomechanics. Research areas include biomechanical engineering, biological systems modeling, bioinformatics, cellular and molecular engineering, controlled release technologies, metabolic engineering, spectroscopy, statistical mechanics, systems engineering and instrumentation, thrombosis, tissue engineering, and transport processes.

Bachelor’s Program
- Bachelor of Science in Bioengineering (BSBE) Degree (p. 148)

Master’s Programs
- Master of Bioengineering (MBE) Degree (p. 153)
- Master of Science (MS) Degree in the field of Bioengineering*

Doctoral Program
- Doctor of Philosophy (PhD) Degree in the field of Bioengineering (p. 152)

Coordinated Program
- Doctor of Philosophy (PhD) Degree in the field of Bioengineering / Doctor of Medicine (MD) Degree with Baylor College of Medicine (p. 153)

* Although students are not normally admitted to a Master of Science (MS) degree program, graduate students may earn the MS as they work towards the PhD.

Description and Code Legend

Note: Internally the university uses the following descriptions, codes, and abbreviations for this academic program. The following is a quick reference:

Course Catalog/Schedule
- Course offerings/subject: BIOE

Department Description and Code
- Bioengineering: BIOE

Undergraduate Degree Description and Code
- Bachelor of Science in Bioengineering degree: BSBE

Undergraduate Major Description and Code
- Major in Bioengineering: BIOE

Graduate Degree Descriptions and Codes
- Master of Bioengineering degree: MBE
- Master of Science degree: MS
- Doctor of Philosophy degree: PhD

Graduate Degree Program Description and Code
- Degree Program in Bioengineering: BIOE

Graduate Degree Program Option Descriptions and Codes*
- Degree Program Option - Applied Bioengineering (MBE degree only): MBE
- Degree Program Option - Global Medical Innovation (MBE degree only): MBE-GMI

CIP Code and Description
- BIOE Major/Program: CIP Code/Title: 14.0501 - Bioengineering and Biomedical Engineering

* Systems Use Only: this information is used solely by internal offices at Rice University (such as OTR, GPS, etc.) and primarily within student information systems and support.

Classification of Instructional Programs (CIP) 2010 Codes and Descriptions from the National Center for Education Statistics: https://nces.ed.gov/ipeds/cipcode/

Bachelor of Science in Bioengineering (BSBE) Degree

The program leading to the BSBE degree is accredited by the Engineering Accreditation Commission (EAC) of ABET, https://www.abet.org.

Program Learning Outcomes (Student Outcomes) for the BSBE Degree

Upon completing the BSBE degree, students will be able to demonstrate:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives for the BSBE Degree

The overall goal of the Bachelor of Science in Bioengineering (BSBE) degree is to prepare graduates to succeed in professional careers by equipping them with the conceptual and technical expertise sought after by top graduate and medical schools, as well as by companies seeking technical skills in bioengineering. Recognizing that graduates may embark on a number of different educational and career paths, the Program Educational Objectives (PEOs) that graduates are expected to exhibit or achieve with the Bachelor of Science in Bioengineering (BSBE) degree from Rice University are:

1. Graduates demonstrate technical and/or professional skills, which may include engineering problem-solving, scientific inquiry, and/or engineering design, to solve challenging problems in bioengineering and related fields.
2. Graduates are accomplished at communicating and working collaboratively in diverse work environments.
3. Graduates seeking further education at graduate, medical or other professional schools find appropriate levels of success in admission to and progression through these programs. Graduates entering professional careers find appropriate career progression and success.

Requirements for the BSBE Degree

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BSBE degree must complete:

- A minimum of 37 courses (96 or 98 credit hours, depending on course selection) to satisfy major requirements.
• A minimum of 131 credit hours to satisfy degree requirements.
• A minimum of 20 courses (48 credit hours) taken at the 300-level or above.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier.) Students and their academic advisors should identify and clearly document the courses to be taken.

Footnotes and Additional Information

* Includes coursework completed as distribution credit, FWIS, LPAR, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The “hours outside of the major” requirement may include all of the above university requirements.

1 Students should complete these courses during their freshman year.

2 Students should complete these courses during their sophomore year.

3 BIOE 400 can be counted in place of one of the required senior laboratory courses if taken for at least 3 credit hours at once. If used in this capacity, the student cannot also count that iteration of the course towards an Engineering Point or Technical Elective Requirement.

4 One of BIOE 330, BIOE 332, or BIOE 420 can be replaced with one or more additional Technical Elective courses of equal or greater BIOE Engineering Points value. Engineering points for the courses are: BIOE 330 (2 points), BIOE 332 (3 points), or BIOE 420 (3 points).

5 The Department of Bioengineering anticipates that BIOE 451 will change from 3 credit hours to 4 credit hours in academic year 2020-2021.

6 IF BIOE 447 is taken as a Bioengineering Laboratory course, the student should note that ENGI 355, listed in the Technical Electives section, will not count as a course that satisfies the Technical Electives Requirement.

Course Lists to Satisfy Requirements

Technical Electives

To fulfill the remaining BIOE major requirements, students must complete a minimum of 3 courses (9 credit hours) and 6 Engineering Points from the Technical Elective course offerings. A combination of Technical Electives must be selected that meets this minimum of 3 courses (9 credit hours) and 6 Engineering Points. If a student should choose to replace one of the optional core courses (BIOE 330, BIOE 332, or BIOE 420), then a minimum of 4 Technical Electives will be required as well as adequate Engineering Points for the replaced course’s value (2 to 3 Engineering Points).

Please Note: The following list of courses are those that satisfy the approved Technical Electives requirement. In certain instances, courses not on this official list may be substituted upon approval of the department’s Director of Undergraduate Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Engineering Points

Courses listed below may count toward the Technical Elective requirement (minimum of 3 courses (9 credit hours) and 6 Engineering Points), and will carry the following Engineering Point values.

Please Note: the list of courses and their associated Engineering Point values may change. Students should check with their academic advisor before registering for Technical Elective courses.

### Footnotes and Additional Information

1. BIOE 400: Students may earn 1 Engineering Point for every 3 credit hours completed. A maximum of 2 Engineering Points can be applied towards the 6 Engineering Points requirement by completing BIOE 400 courses.

2. ENGI 300: Students may earn 1 Engineering Point for every credit hour completed. A maximum of 4 Engineering Points, and 6 credit hours, may be applied towards the Technical Elective requirement from ENGI 300 or from a combination of independent research and/or design courses (i.e. ENGI 300, BIOE 400, BIOE 401, BIOE 360/GLHT 360, BIOE 392/GLHT 392.)

3. BIOE 360 or BIOE 392: These courses are design courses. See ENGI 300 Note. A maximum of 4 Engineering Points, and 6 credit hours, may be applied towards the Technical Elective requirement from independent research and/or design courses.

4. ENGI 355 can be applied toward the Technical Elective requirement only in the event that BIOE 447 is not completed as a Senior Lab requirement. Both MECH 403 and ENGI 355 cannot be counted towards Technical Elective or Engineering Point Requirements.

5. BIOE 400: Students may substitute 3 credit hours (in one semester) of BIOE 400 in place of one credit of the BIOE Laboratory Requirement for BIOE 442, BIOE 443, BIOE 444, BIOE 445, BIOE 446, BIOE 447, or BIOE 449. If this option is chosen, student may not use the same BIOE 400 credit for the Technical Elective or Engineering Point Requirements.

### Policies for the BSBE Degree

#### Transfer Credit

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: [https://oaa.rice.edu](https://oaa.rice.edu). Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

#### Departmental Transfer Credit Guidelines

Students pursuing the BSBE degree should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

### Additional Information

For additional information, please see the Bioengineering website: [https://bioengineering.rice.edu/](https://bioengineering.rice.edu/)

### Opportunities for the BSBE Degree

#### Academic Honors

The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) *(summa cum laude, magna cum laude, and cum laude)* and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.
Fifth-Year Master's Degree Option for Rice Undergraduate Students

Rice students have an option to pursue the Master of Bioengineering (MBE) degree by adding an additional fifth year to their four undergraduate years of science and engineering studies.

Advanced Rice undergraduate students in good academic standing may apply to the MBE degree program during their junior or senior year. Upon acceptance, depending on course load, financial aid status, and other variables, they may then start taking some required courses of the master's degree program. A plan of study will need to be approved by the student's undergraduate advisor and the MBE program director.

As part of this option and opportunity, Rice undergraduate students:

• must complete the requirements for a bachelor's degree and the master's degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
• should be aware there could be financial aid implications if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
• must complete the requirements for a bachelor’s degree and the master’s degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
• should be aware there could be financial aid implications if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
• must be aware there could be financial aid implications if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
• more information on this Undergraduate - Graduate Concurrent Enrollment opportunity, including specific information on the registration process can be found here (p. 17).

Additional Information

For additional information, please see the Bioengineering website: https://bioengineering.rice.edu/

Doctor of Philosophy (PhD) Degree in the field of Bioengineering

Program Learning Outcomes for the MS and PhD Degrees in the field of Bioengineering

Upon completing the MS and PhD degrees in the field of Bioengineering, students will be able to:

1. Work as independent researchers.
2. Acquire a graduate-level understanding of foundations in Bioengineering and apply this material across a variety of sub-disciplines.
3. Integrate knowledge from different sources to solve a defined Bioengineering problem.
4. Acquire deep knowledge in a sub-discipline in which they will pursue their thesis.
5. Demonstrate professional skills in both oral and written communication.

Requirements for the MS and PhD Degrees in the field of Bioengineering

MS Degree Program

The MS degree is a thesis master's degree. For general university requirements, please see Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MS degree in the field of Bioengineering must complete:

• A minimum of 30 credit hours to satisfy degree requirements. MS students must earn additional credits they need for graduation by registering for the research course BIOE 500 during the terms they are engaged in research.
• A minimum of 18 credit hours from foundation, supporting, and advanced courses.
• A minimum GPA of 3.00.

In addition, students must:

• Show evidence on their undergraduate transcript of completion of a class in systems physiology, cell (or physical) biology, and statistics. (If courses were not taken for an undergraduate degree, they must be completed at the beginning of the MS program.)
• Fulfill a teaching requirement.
• Submit an original research thesis.
• Defend the thesis in a public oral examination.

Requirements for the PhD Degree in the field of Bioengineering

PhD Degree Program

For general university requirements, please see Doctoral Degrees (p. 65). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the PhD degree in the field of Bioengineering must complete:

• A minimum of 90 credit hours to satisfy degree requirements. In addition to foundation, PhD students must earn additional credits they need for graduation by registering for the PhD research course, BIOE 500, during the terms they are engaged in research.
• A minimum of 30 credit hours from foundation, supporting, and advanced courses with high standing.
• A minimum GPA of 3.20.

In addition, students must:

• Show evidence on their undergraduate transcript of completion of a class in systems physiology, cell (or physical) biology, and statistics. (If courses were not taken for an undergraduate degree, they must be completed at the beginning of the PhD program.)
• Students are required to serve as a teaching assistant in up to three undergraduate or graduate courses.
• Submit a thesis proposal. PhD students must submit and successfully defend their thesis proposals by the end of their fourth semester in residence.
• Submit a thesis that provides evidence of their ability to carry out original research in a specialized area of bioengineering.
• Defend the thesis in a public oral examination.
Graduate students take required courses and electives in the following areas:

- Synthetic Biology and Genome Engineering
- Biomaterials, Tissue Engineering, Mechanobiology, and Biophysics
- Quantitative Computational and Theoretical Bioengineering
- Biomedical Imaging, Optics, and Diagnostics

### Policies for the PhD Degree in the field of Bioengineering

#### Department of Bioengineering Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Bioengineering publishes a graduate program handbook, which can be found here: [https://gradhandbooks.rice.edu/2019_20/Bioengineering_Graduate_Handbook.pdf](https://gradhandbooks.rice.edu/2019_20/Bioengineering_Graduate_Handbook.pdf)

### Admissions

To make sure scores are available when admission decisions are made, applicants need to register to take the GRE and, if an international student, the TOEFL at least three months before the application deadline. Applicants should also request transcripts at least two months in advance to give senders time to get the material to Rice University by the deadline. The application deadline for MBE students for spring admission the following year is October 30th. The application deadline for PhD students for fall admission in the same year is April 30th. The application deadline for PhD students for fall admission of the following year is December 20th. PhD students are not admitted in the spring semester. Application materials received after the deadline will not be considered. Once admitted, departmental policy requires full-time PhD students to be registered for at least 12 credit hours each semester. MBE students in the Applied Bioengineering area of specialization may register part-time with the permission of the department. MBE students in the Global Medical Innovation area of specialization are expected to attend full-time.

### Additional Information

For additional information, please see the Bioengineering website: [https://bioengineering.rice.edu/](https://bioengineering.rice.edu/)

### Opportunities for the PhD Degree in the field of Bioengineering

Additional Information

For additional information, please see the Bioengineering website: [https://bioengineering.rice.edu/](https://bioengineering.rice.edu/)

### Doctor of Philosophy (PhD) Degree in the field of Bioengineering / Doctor of Medicine (MD) Degree with Baylor College of Medicine

#### Program Learning Outcomes for the PhD/MD Coordinated Degrees Program

Upon completing the PhD degree in the field of Bioengineering, students will be able to:

1. Work as independent researchers.
2. Acquire a graduate-level understanding of foundations in Bioengineering and apply this material across a variety of sub-disciplines.
3. Integrate knowledge from different sources to solve a defined Bioengineering problem.
4. Acquire deep knowledge in a sub-discipline in which they will pursue their thesis.
5. Demonstrate professional skills in both oral and written communication.

#### Requirements for the PhD/MD Coordinated Degrees Program

For general university requirements, see Graduate Degrees (p. 49). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). This PhD/MD dual degree program is offered by the Rice University Bioengineering Department and Baylor College of Medicine. This coordinated degrees program prepares students for research careers in medicine. Students must initially be accepted into the program through the Baylor College of Medicine.

### Master of Bioengineering (MBE) Degree

2019-2020 General Announcements

PDF Generated 11/12/2019
Program Learning Outcomes for the MBE Degree

Program Learning Outcomes for the Applied Bioengineering Area of Specialization

Upon completing the MBE degree, students pursuing the Applied Bioengineering area of specialization requirements will be able to:

1. Apply and integrate advanced knowledge of Bioengineering topics in at least one of the following areas: Biomaterials and Drug Delivery, Biomedical Imaging and Diagnostics, Computational and Theoretical Bioengineering, Tissue Engineering and Biomechanics, or Systems and Synthetic Biology.
2. Apply knowledge from engineering and other disciplines to identify, formulate, and solve novel and complex problems that require advanced knowledge in bioengineering.
3. Select and apply quantitative analytic techniques to analyze bioengineering data.
4. Gain admission to a graduate or professional program, if students want to pursue further education.

Program Learning Outcomes for the Global Medical Innovation Area of Specialization

Upon completing the MBE degree, students pursuing the Global Medical Innovation area of specialization requirements will be able to:

1. Apply knowledge of Bioengineering topics in at least one of the following areas: Biomaterials and Drug Delivery, Biomedical Imaging and Diagnostics, Computational and Theoretical Bioengineering, Tissue Engineering and Biomechanics, or Systems and Synthetic Biology.
2. Develop effective medical products, from concept to commercialization, within a team environment.
3. Comprehend and navigate the global medical technology industry by leveraging an internship experience.
4. Gain employment or advance professionally in a technical field related to bioengineering.

Requirements for the MBE Degree

The MBE degree is a non-thesis master's degree. For general university requirements, please see Non-Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MBE degree must complete:

- A minimum of 30 credit hours to satisfy degree requirements.
- A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above).
- A minimum of 24 credit hours must be taken at Rice University.
- A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University.
- The requirements for one area of specialization (see below for areas of specialization). The MBE degree program offers two areas of specialization:
  - Applied Bioengineering: designed as a flexible degree for students who will pursue careers in research, medicine, or related fields, or
  - Global Medical Innovation: designed specifically for students who will pursue a career in the global medical technology industry. As the medical technology industry becomes increasingly global with an emphasis in cost-effective health care solutions and clinical outcomes, Rice University seeks to prepare engineers for this new and changing environment. This area of specialization of the MBE degree is designed to prepare engineers for careers in medical technology through education in innovation, emerging-market design projects and internships. The Rice MBE area of specialization in Global Medical Innovation program specifically targets students who have an undergraduate degree in engineering (mechanical, electrical, chemical, or bioengineering/medical) or a related field, and who are interested in pursing a career in the private, public, or non-profit sectors of medical technology.

- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree with a minimum grade of a B- (2.67 grade points) in each course (for the Applied Bioengineering area of specialization), or a minimum GPA of 3.20 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree with a minimum grade of a B- (2.67 grade points) in each course (for the Global Medical Innovation area of specialization).

Both areas of specialization have the same prerequisites, though applicants will be evaluated considering the different purposes of each. More information about each of these areas of specialization can be found below. Curriculum must be approved by the Graduate Academic Affairs Committee and the Bioengineering Department. This is done on a case-by-case basis.

The Master of Bioengineering (MBE) degree is a professional non-thesis master's degree. Students who have a BS or BA degree in an engineering or science discipline may apply. Depending on their background, some students may need to fulfill prerequisites or take remedial engineering courses to earn the MBE degree. For more information, see the department website.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

1 This will be considered on a case-by-case basis, and the student is responsible for obtaining and selecting an internship that best aligns with their career goals.
2 BIOE 539 or an alternative quantitative-based BIOE course, taken at the 400-level or above, with the advisor’s approval.
3 Students may complete a course offered by another department, but it must be relevant to the MBE degree.

Policies for the MBE Degree
Department of Bioengineering Graduate Program Handbook
The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Bioengineering publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Bioengineering_Graduate_Handbook.pdf

Enrollment Status Requirements
Students may enroll for the Applied Bioengineering area of specialization on a full-time or part-time basis. Students may only enroll on a full-time basis for the Global Medical Innovation area of specialization. University graduation requirements (including the minimum residency requirement for students in graduate degree programs) still apply.

Transfer Credit
For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 64). Some departments and programs have additional restrictions on transfer credit. Students are encouraged to meet with their academic program’s advisor when considering transfer credit possibilities.

Assistant Department Chair
mscates@rice.edu

The BioSciences department unites faculty engaged in research and teaching in a wide range of disciplines within the life sciences, creating a vibrant and diverse community of scholars. The department offers a broad range of introductory and advanced courses that lead to undergraduate degrees in Biochemistry and Cell Biology (BA, BS), Ecology and Evolutionary Biology (BA, BS), and Biological Sciences (BA). In addition, a Minor in Biochemistry and Cell Biology and a Minor in Ecology and Evolutionary Biology are offered. The BA degrees offer a rigorous
biological curriculum suitable for many career paths while allowing the flexibility for extended academic exploration in other areas. The BS degrees offer greater depth in upper-level coursework. Most BioSciences students, regardless of major, participate in undergraduate research, availing themselves of the numerous research opportunities at Rice and in the Houston community.

All major degree paths will prepare students for graduate, medical, or other professional schools and a wide range of careers in the life sciences. In addition, qualified students may apply to the Biochemistry and Cell Biology BA-MS-PhD program track. Additional information on departmental programs, courses, and advising is available at the BioSciences website (http://biosciences.rice.edu/).

The BioSciences department also oversees academic programs that lead to undergraduate degrees in Environmental Science (BA, BS) and Neuroscience (BA), as well as a Minor in Neuroscience. At the graduate-level, the BioSciences department administers graduate programs in Biochemistry and Cell Biology (PhD, MS) and in Ecology and Evolutionary Biology (PhD, MS). In addition, some BioSciences faculty members participate in the Systems, Synthetic, and Physical Biology (SSPB) PhD program administered by the Institute of Biosciences and Bioengineering (https://ibb.rice.edu/). Graduate studies include a combination of advanced coursework and individual research with faculty mentors.

For additional information regarding BioSciences and its associated academic programs, please see the department's website: https://biosciences.rice.edu/.

### Bachelor's Programs
- Bachelor of Arts (BA) Degree with a Major in Biochemistry and Cell Biology (p. 161)
- Bachelor of Arts (BA) Degree with a Major in Biological Sciences (p. 164)
- Bachelor of Arts (BA) Degree with a Major in Ecology and Evolutionary Biology (p. 167)
- Bachelor of Science (BS) Degree with a Major in Biochemistry and Cell Biology (p. 169)
- Bachelor of Science (BS) Degree with a Major in Ecology and Evolutionary Biology (p. 172)

### Minors
- Minor in Biochemistry and Cell Biology (p. 181)
- Minor in Ecology and Evolutionary Biology (p. 183)

### Accelerated Program
- Bachelor of Arts (BA) Degree / Master of Science (MS) Degree / Doctor of Philosophy (PhD) Degree in the field of Biochemistry and Cell Biology (p. 159)

### Master's Programs
- Master of Science (MS) Degree in the field of Biochemistry and Cell Biology (p. 178)
- Master of Science (MS) Degree in the field of Ecology and Evolutionary Biology (p. 180)

### Doctoral Programs
- Doctor of Philosophy (PhD) Degree in the field of Biochemistry and Cell Biology (p. 175)

### Chair
Janet Braam

### Professors
Caroline Ajo-Franklin
Bonnie Bartel
Kathleen M. Beckingham
George M. Bennett
Daniel D. Carson
Michael C. Gustin
Oleg A. Igoshin
Caroline A. Masiello

Description and Code Legend

Note: Internally, the university uses the following descriptions, codes, and abbreviations for this academic program. The following is a quick reference:

Course Catalog/Schedule
- Course offerings/subject code for Biochemistry and Cell Biology: BIOC
- Course offerings/subject code for Ecology and Evolutionary Biology: EBIO

Department Description and Code
- BioSciences: BIOS

Undergraduate Degree Descriptions and Codes
- Bachelor of Arts degree: BA
- Bachelor of Science degree: BS

Undergraduate Major Descriptions and Codes
- Major in Biochemistry and Cell Biology (for both the BA and BS degrees): BIOC
- Major in Ecology and Evolutionary Biology (for both the BA and BS degrees): EBIO
- Major in Biological Sciences (BA degree only): BIOS

Undergraduate Minor Descriptions and Codes
- Minor in Biochemistry and Cell Biology: BCBM
- Minor in Ecology and Evolutionary Biology: EEBM

Graduate Degree Descriptions and Codes
- Master of Science degree: MS
- Doctor of Philosophy degree: PhD

Graduate Degree Program Descriptions and Codes
- Degree Program in Biochemistry and Cell Biology: BIOC
- Degree Program in Ecology and Evolutionary Biology: EBIO

CIP Code and Description

1. BIOC Major/Program: CIP Code/Title: 26.0202 - Biochemistry
- BIOC Major/Program: CIP Code/Title: 26.0101 - Biology/Biological Sciences, General
- EBIO Major/Program: CIP Code/Title: 26.1310 - Ecology and Evolutionary Biology
- BCBM Minor: CIP Code/Title: 26.0202 - Biochemistry
- EEBM Minor: CIP Code/Title: 26.1310 - Ecology and Evolutionary Biology
Bachelor of Arts (BA) Degree / Master of Science (MS) Degree / Doctor of Philosophy (PhD) Degree in the field of Biochemistry and Cell Biology

Program Learning Outcomes for the BA/MS/PhD Accelerated Degree Program in the field of Biochemistry and Cell Biology

Upon completing the Bachelor’s degree requirements for this program, students majoring in Biochemistry and Cell Biology will be able to:

1. Demonstrate a comprehensive knowledge of biology with particular emphasis on biochemistry, genetics, and cell biology.
2. Demonstrate the ability to apply the modern scientific method, including designing experiments and/or building mathematical models, and collecting, analyzing, and interpreting data using common statistical methods and software programs.
3. Demonstrate effective oral and written communication skills, including an ability to communicate effectively and work with diverse groups, and the ability to interpret and communicate the results of original research.
4. Locate primary scientific literature and demonstrate the ability to use critical thinking and problem-solving skills to evaluate published and proposed research in the biological sciences and to apply these skills.
5. Demonstrate understanding of the practice and culture of science, scientific ethics, and the relationship between science and society.
6. Develop quantitative reasoning via the construction of models and/or the analysis of data.

Students completing the MS degree requirements will be able to:

1. Develop a knowledge of past and current research accomplishments and techniques in biochemistry and cell biology.
2. Demonstrate problem solving and critical thinking skills.
3. Demonstrate the effective written, oral, and visual communication skills required to articulate scientific findings and significance via a thesis describing independent research, publishable research, and seminars.

Students completing the PhD degree requirements will be able to:

1. Develop a comprehensive knowledge of current and past research accomplishments and techniques in biochemistry and cell biology.
2. Demonstrate independent problem solving and critical thinking skills.
3. Demonstrate the effective written, oral, and visual communication skills required to articulate scientific findings and significance via a thesis describing independent research, publications, and seminars.

Requirements for the BA/MS/PhD Accelerated Degree Program in the field of Biochemistry and Cell Biology

BA in Biochemistry and Cell Biology Requirements
All of the requirements for a BA in Biochemistry and Cell Biology are required for the BA/MS/PhD accelerated program.

MS in Biochemistry and Cell Biology Requirements
The BA/MS/PhD Committee will advise students pursuing the BA/MS completion and will approve their formal course program during their final two years in the BA/MS program. Students who wish to pursue the BA/MS program must select the MS thesis advisor by the end of their second year, when they declare their major, to provide the opportunity to begin a project that will form the basis of the MS thesis.

Course requirements for the MS degree include:

<table>

Select at least 6 credit hours from BIOC course offerings at the 500-level

Additional Coursework as Approved by Department

Total Credit Hours\(^1\) Minimum of 40

---

\(^1\) Classification of Instructional Programs (CIP) 2010 Codes and Descriptions from the National Center for Education Statistics: [https://nces.ed.gov/ipeds/cipcode/](https://nces.ed.gov/ipeds/cipcode/)
Footnotes and Additional Information

1. Safety training in Environmental Health and Safety is required before entry into the laboratory, and training in responsible conduct of research (UNIV 594) is taken during the freshmen or sophomore year. The courses listed must be completed or evidence provided of successful completion of courses that covered the same material with a B- grade average (GPA ≥ 2.67). Students in the BA-MS track are required to register for and participate in BIOC 581 or BIOC 582 both semesters during their junior and senior years and to present their research at least once. Students generally enroll in at least 9 credit hours of BIOC 800 during the summer between the sophomore and junior year, BIOC 587 and up to 6 credit hours of BIOC 800 during the summer between the junior and senior years. Students take BIOC 583 and BIOC 588 in their senior year. Registration for at least 9 credit hours of BIOC 800 is required during the summer following the senior year for MS thesis defense. Undergraduates who are on financial aid must register for at least 12 credit hours that will be applied to the undergraduate transcript each semester to maintain full-time status.

Students will be responsible for the content of these courses in their MS defense (which also serves as the Admission to PhD Candidacy examination).

Progress reviews with the MS thesis committee occur at the end of the junior year and the early spring of the senior year. The MS thesis will be submitted and public oral defense will occur in the summer following graduation at the end of the senior year with completion of the BA requirements. MS candidates continuing to the PhD must maintain a GPA ≥ 3.00, complete a thesis, and make a public oral defense that includes a private examination by their MS thesis committee. Students who complete the MS requirements with a GPA ≥ 2.67 but less than 3.00 must defend their thesis to complete the MS degree, but will not be admitted to the PhD program.

PhD in Biochemistry and Cell Biology Requirements

The following are required for admission to the PhD portion of the BA/MS/PhD accelerated program: Successful completion of the MS thesis and oral defense, which will serve as the admission to candidacy examination for all PhD candidates in this program, an overall GPA ≥ 3.00 for the BA-MS degree courses. Students who are in good academic standing in the BA/MS portion and have passed their MS final oral examination may begin their doctoral studies the summer following graduation with the approval of their PhD mentor and the Department Chair.

Course requirements for the completion of the PhD studies within the accelerated BA/MS/PhD program include all of the required courses taken during the MS studies and the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><strong>Core Requirements</strong></td>
<td></td>
</tr>
<tr>
<td>BIOC 581 or BIOC 582</td>
<td>GRADUATE SEMINAR IN BIOCHEMISTRY AND CELL BIOLOGY (required in all semesters of residency) ¹</td>
<td>Minimum of 6 credit hours</td>
</tr>
<tr>
<td>BIOC 599</td>
<td>GRADUATE TEACHING IN BIOCHEMISTRY AND CELL BIOLOGY ²</td>
<td>Minimum of 2 credit hours</td>
</tr>
</tbody>
</table>

Footnotes and Additional Information

¹ A minimum of 75 credit hours beyond the MS is required for the PhD. PhD students are required to enroll in BIOC 581 or BIOC 582 during all semesters of residency. A minimum of 6 credit hours of BIOC 581 and BIOC 582 combined are required.

² BIOC 599 provides PhD students with teaching experience by serving as discussion leaders and grades in two undergraduate courses, and additional teaching experiences are available on an optional basis.

³ BA/MS/PhD students are required to enroll in 15 credit hours each semester after they have defended the master's degree, including summer semesters, to reflect their full-time status. After enrolling in any other required courses, students should enroll in the number of hours of BIOC 800 such that their total credit hours equal 15.

Evaluation of Progress in the PhD Phase of the BA/MS/PhD Program

The Graduate Advisory Committee evaluates each student's record and recommends any further coursework based on the requirements and on the interests of the student. Thesis advisors may require additional courses. At the end of each semester, the department chair, in consultation with the faculty, reviews student performance in the formal coursework. Students must maintain at least a B grade average (GPA ≥ 3.00), perform satisfactorily in their research efforts, and demonstrate outstanding motivation and potential for research.

Evaluation during the PhD phase of the program includes:

- The MS thesis and its oral defense constitute the admission to candidacy examination
- Ongoing review of research progress by the thesis advisor; satisfactory research progress will be indicated by a grade of ‘S’ in BIOC 800 each semester
- A yearly research progress assessment by the student’s Research Progress Review Committee
- Presentation of research progress at least once a year in seminar format (BIOC 581 or BIOC 582) starting in the first year of PhD study and continuing until submission of the doctoral thesis
- Defense of the PhD thesis research and text in a final public seminar presentation and oral examination attended by the student’s Thesis Committee

Policies for the BA/MS/PhD Accelerated Degree Program in the field of Biochemistry and Cell Biology

Biochemistry and Cell Biology Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, Biochemistry and Cell Biology publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Biochemistry_Cell_Biology_Graduate_Handbook.pdf
Admission

Qualified Rice University undergraduates can apply to enroll in the Biochemistry and Cell Biology BA/MS/PhD accelerated program in the spring of their sophomore year. Students who are strong candidates for this program typically join a Rice research lab to start research on a project related to biochemistry or cell biology prior to applying. Upon acceptance, depending on course load, financial aid status, and other variables, program participants may then start taking required graduate course requirements at the same time as their upper-level undergraduate degree course requirements. Students pursuing this program should be aware that there could be financial aid implications, should the conversion of undergraduate coursework to that of graduate level reduce their earned undergraduate credit for any semester below that of full-time undergraduate status (12 hours). Advisors for the program can assist in this determination.

Laboratory research performed in undergraduate and graduate research courses is presented as the MS thesis in the summer following graduation and provides the basis for the PhD thesis work. As a result, the graduate careers of these students will be accelerated by an anticipated 1-2 years, and such students may be able to obtain their PhD degrees approximately 3 years after obtaining their BA/MS degree. If circumstances require, students may stop at the BA or MS level if they meet all the requirements for the respective degrees.

Criteria for selection include academic performance (GPA ≥ 3.50), motivation, previous research experience, and personal qualities. Enrollment is limited, and the Biochemistry and Cell Biology BA/MS/PhD Committee will select applicants for admission.

Additional Information

For additional information, please see the BioSciences website: https://biosciences.rice.edu/.

Opportunities for the BA/MS/PhD Accelerated Degree Program in the field of Biochemistry and Cell Biology

Information about Student Resources, Attendance at Scientific Conferences, Internships, Graduate Student Awards, the Graduate Student Association, etc. can be found in the Biochemistry and Cell Biology Graduate Program Handbook: http://gradhandbooks.rice.edu/2017_18/Biochemistry_Cell_Biology_Graduate_Handbook.pdf.

Additional Information

For additional information, please see BioSciences website: https://biosciences.rice.edu/.

Bachelor of Arts (BA) Degree with a Major in Biochemistry and Cell Biology

Program Learning Outcomes for the BA Degree with a Major in Biochemistry and Cell Biology

Upon completing the BA degree with a major in Biochemistry and Cell Biology, students will be able to:

1. Demonstrate a comprehensive knowledge of biology with particular emphasis on biochemistry, genetics, and cell biology.
2. Demonstrate the ability to apply the modern scientific method, including designing experiments and/or building mathematical models, and collecting, analyzing, and interpreting data using common statistical methods and software programs.
3. Demonstrate effective oral and written communication skills, including an ability to communicate effectively and work with diverse groups and the ability to interpret and communicate the results of original research.
4. Locate primary scientific literature and demonstrate the ability to use critical thinking and problem-solving skills to evaluate published and proposed research in the biological sciences and to apply these skills.
5. Demonstrate understanding of the practice and culture of science, scientific ethics, and the relationship between science and society.
6. Develop quantitative reasoning via the construction of models and/or the analysis of data.

Requirements for the BA Degree with a Major in Biochemistry and Cell Biology

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Biochemistry and Cell Biology must complete:

- A minimum of 26 courses (minimum of 63 credit hours) to satisfy major requirements. Additional credit hours may be required depending on course selection.
- A minimum of 123 credit hours to satisfy degree requirements. Additional credit hours may be required depending on course selection.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 10 courses (minimum of 25 credit hours) taken at the 300-level or above.

The BA degree emphasizes a broad understanding of biochemistry and cell biology, provides room for exploration anywhere in the Natural Sciences or Engineering, and culminates in a required 400-level capstone course from an approved list of advanced courses. Students in Biochemistry and Cell Biology are strongly encouraged to pursue their research interests through independent research experiences. The BA degree program offers greater flexibility than the BS due to fewer required courses as detailed below.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

### Advanced Laboratory Courses

Select 2 courses from the following:

- BIOC 313 | EXPERIMENTAL SYNTHETIC BIOLOGY | 2 |
- BIOC 318 | MICROBIOLOGY LABORATORY | 2 |
- BIOC 320 / BIOE 342 | LABORATORY IN TISSUE CULTURE | 2 |

## Elective Lecture Courses

Select 2 courses offered by either the School of Natural Sciences or the School of Engineering at the 300-level or above

- BIOC 401 | UNDERGRADUATE HONORS RESEARCH | 3 |
- BIOC 402 | UNDERGRADUATE HONORS RESEARCH | 3 |
- BIOC 412 | UNDERGRADUATE RESEARCH SEMINAR | 3 |
- BIOC 424 | MICROBIOLOGY AND BIOTECHNOLOGY | 3 |
- BIOC 425 | PLANT MOLECULAR GENETICS AND DEVELOPMENT | 3 |
- BIOC 442 | MOLECULES, MEMORY AND MODEL ANIMALS: METHODS IN BEHAVIORAL NEUROSCIENCE | 3 |
- BIOC 443 | DEVELOPMENTAL NEUROBIOLOGY | 3 |
- BIOC 445 | ADVANCED MOLECULAR BIOLOGY AND GENETICS | 3 |
- BIOC 447 | EXPERIMENTAL BIOLOGY AND THE FUTURE OF MEDICINE | 3 |
- BIOC 449 | ADVANCED CELL AND MOLECULAR NEUROSCIENCE | 3 |
- BIOC 450 | VIRUSES AND INFECTIOUS DISEASES | 3 |
- BIOC 455 | COMPUTATIONAL SYNTHETIC BIOLOGY | 3 |
- BIOC 460 | CANCER BIOLOGY | 3 |
- BIOC 464 / BIOE 464 | EXTRACELLULAR MATRIX | 3 |
- BIOC 470 | COMPUTATION WITH BIOLOGICAL DATA | 3 |
- BIOC 481 | MOLECULAR BIOPHYSICS | 3 |
- BIOC 482 | STRUCTURAL BIOLOGY | 3 |

### Capstone Requirement

Select 1 course from the following:

- BIOC 401 | UNDERGRADUATE HONORS RESEARCH | 3 |
- BIOC 402 | UNDERGRADUATE HONORS RESEARCH | 3 |
- BIOC 412 | UNDERGRADUATE RESEARCH SEMINAR | 3 |
- BIOC 424 | MICROBIOLOGY AND BIOTECHNOLOGY | 3 |
- BIOC 425 | PLANT MOLECULAR GENETICS AND DEVELOPMENT | 3 |
- BIOC 442 | MOLECULES, MEMORY AND MODEL ANIMALS: METHODS IN BEHAVIORAL NEUROSCIENCE | 3 |
- BIOC 443 | DEVELOPMENTAL NEUROBIOLOGY | 3 |
- BIOC 445 | ADVANCED MOLECULAR BIOLOGY AND GENETICS | 3 |
- BIOC 447 | EXPERIMENTAL BIOLOGY AND THE FUTURE OF MEDICINE | 3 |
- BIOC 449 | ADVANCED CELL AND MOLECULAR NEUROSCIENCE | 3 |
- BIOC 450 | VIRUSES AND INFECTIOUS DISEASES | 3 |
- BIOC 455 | COMPUTATIONAL SYNTHETIC BIOLOGY | 3 |
- BIOC 460 | CANCER BIOLOGY | 3 |
- BIOC 464 / BIOE 464 | EXTRACELLULAR MATRIX | 3 |
- BIOC 470 | COMPUTATION WITH BIOLOGICAL DATA | 3 |
- BIOC 481 | MOLECULAR BIOPHYSICS | 3 |
- BIOC 482 | STRUCTURAL BIOLOGY | 3 |

## Footnotes and Additional Information

* Includes coursework completed as distribution credit, FWIS, LPAP, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The “hours outside of the major” requirement may include all of the above university requirements.
Permissible Substitutions: MATH 105 or MATH 111 and MATH 112 may be substituted for MATH 101; MATH 106 may be substituted for MATH 102; CHEM 151 may be substituted for CHEM 121 or CHEM 111; CHEM 153 may be substituted for CHEM 123 or CHEM 113; CHEM 152 may be substituted for CHEM 122 or CHEM 112, and CHEM 154 may be substituted for CHEM 124 or CHEM 114; CHEM 320 may be substituted for CHEM 212; PHYS 101 and PHYS 103 or PHYS 111 may be substituted for PHYS 125; PHYS 102 and PHYS 104 or PHYS 112 may be substituted for PHYS 126.

CHEM 301 and CHEM 302 (both courses for 6 credit hours total) may substitute for BIOC 352.

BIOC 212 may be substituted for BIOC 211.

These advanced labs must be taken concurrently with or after completion of BIOC 482.

All Biochemistry and Cell Biology majors must take at least 1 of the listed additional advanced laboratory courses. If desired, the second advanced laboratory requirement may be satisfied by completing:

1. BIOC 310 if taken for at least 3 credits; or
2. HONS 470 and HONS 471, if the research supervisor is from one of the biosciences departments or if the research is biological in nature and pre-approved by the student's major advisor; or
3. honors research (BIOC 401 and BIOC 402 and BIOC 412).

This substitution may be used only once regardless of the number of semesters of independent research taken.

The combined courses BIOC 401 and BIOC 402 and BIOC 412 are considered a single BIOC 400-level course and can be counted as one capstone course together as a series and/or as the independent research experience, provided that this substitution has not been used previously; this 3-course series can count as a single lab at 300-level or higher. To be applied toward the major all 3 courses must be completed.

Students must complete a total of 2 courses (6 credit hours) from courses offered by the School of Natural Sciences or the School of Engineering. Courses in Natural Sciences/Engineering include any course taken at the 300-level or higher, for at least 3 credit hours from any department in the Wiess School of Natural Sciences (including BioSciences) or George R. Brown School of Engineering, except independent research courses such as BIOC 310, BIOC 401 and BIOC 402, BIOE 400 and BIOE 401, or EBI0 306, EBI0 403, and EBI0 404, which cannot be used to fulfill this requirement. A maximum of 3 credit hours from BIOC 390 (transfer credit in Biochemistry and Cell Biology) may be applied to this requirement. Courses offered by the School of Natural Science and the School of Engineering include the following subject codes: ASTR, BIOE, CAAM, CEVE, CHBE, CHEM, COMP, ELEC, ENGI, ENST, ESCI, GLHT, HEAL, KINE, MATH, MECH, MSNE, NSCI, PHYS, and STAT. BIOC 300 is only allowed to fulfill this elective requirement when it is taken prior to BIOC 301 and BIOC 341, or their equivalent transfer course.

To fulfill the remaining BIOC major requirements, students pursuing the BA degree must complete 1 additional course (3 credit hours) as a capstone. Only BIOC 400-level lecture courses from the list which are explicitly designed for the BIOC major, can be used to satisfy this requirement.

### Policies for the BA Degree with a Major in Biochemistry and Cell Biology

#### Advising

Rice University policies are governed primarily by the General Announcements; students are encouraged to look there first for academic policies. Advising information specific to the Department of BioSciences can be found at the department website by clicking on the tab for Undergraduate Studies: [https://biosciences.rice.edu/](https://biosciences.rice.edu/).

#### Program Restrictions and Exclusions

Students pursuing the major in Biochemistry and Cell Biology should be aware of the following program restriction:

- Students pursuing the major in Biochemistry and Cell Biology may not additionally declare the major in Biological Sciences.

#### Transfer Credit

For Rice University's policy regarding transfer credit, see [Transfer Credit](p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: [https://oaa.rice.edu](https://oaa.rice.edu). Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

#### Departmental Transfer Credit Guidelines

Students pursuing the major in Biochemistry and Cell Biology should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.

#### Additional Information

For additional information, please see the BioSciences website: [https://biosciences.rice.edu/](https://biosciences.rice.edu/).

#### Opportunities for the BA Degree with a Major in Biochemistry and Cell Biology

#### Academic Honors

The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see [Latin Honors](p. 48) (summa cum laude, magna cum laude, and cum laude) and [Distinction in Research and Creative Work](p. 48). Some departments have department-specific Honors awards or designations.

#### Departmental Honors

Instructions on applying for the Distinction in Research and Creative Work award from the Department of BioSciences can be found at the department website, by clicking on the link for [Undergraduate Studies](https://biosciences.rice.edu/).

#### Research in the BioSciences

Research is highly encouraged for all biosciences majors, and there are many opportunities for independent research at Rice. Information about research for credit and research internships specific to the Department of BioSciences can be found at the department website, by clicking on the link for [Undergraduate Studies](https://biosciences.rice.edu/).
Additional Information
For additional information, please see the BioSciences website: https://biosciences.rice.edu/

Bachelor of Arts (BA) Degree with a Major in Biological Sciences

Program Learning Outcomes for the BA Degree with a Major in Biological Sciences
Upon completing the BA degree with a major in Biological Sciences, students will be able to:

1. Demonstrate a comprehensive knowledge of the field of biology, illustrated by the ability to describe the breadth of the discipline and to synthesize a range of biological concepts and ideas.
2. Demonstrate an understanding of the modern scientific method, including a familiarity with current methods for designing experiments and/or mathematical models, and the ability to analyze and interpret data.
3. Demonstrate effective oral and written communication skills, including an ability to communicate effectively and work with diverse groups.
4. Locate primary scientific literature and demonstrate the ability to apply critical thinking and problem-solving skills to evaluate published and proposed research in the biological sciences.
5. Demonstrate understanding of the practice and culture of science, scientific ethics, and the relationship between science and society.
6. Develop quantitative reasoning via the construction of models and/or the analysis of data.

Requirements for the BA Degree with a Major in Biological Sciences
For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Biological Sciences must complete:

- A minimum of 28 courses (minimum of 67 credit hours) to satisfy major requirements. Additional credit hours may be required depending on course selection.
- A minimum of 127 credit hours to satisfy degree requirements. Additional credit hours may be required depending on course selection.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 10 courses (minimum of 24 credit hours) taken at the 300-level or above.

The BA degree with a major in Biological Sciences incorporates elements from both the Biochemistry and Cell Biology and the Ecology and Evolutionary Biology programs.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major's academic advisor, or where applicable, the department's Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/).

Students and their academic advisors should identify and clearly document the courses to be taken.

| University Graduation Requirements (p. 26) * | Minimum of 67 |
|                                        |               |
|                                        |               |

<table>
<thead>
<tr>
<th>Total Credit Hours</th>
<th>Minimum of 127</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Footnotes and Additional Information**

* Includes coursework completed as distribution credit, FWIS, LPAR, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The "hours outside of the major" requirement may include all of the above university requirements.

1. **Permissible substitutions:** MATH 105 or MATH 111 and MATH 112 may be substituted for MATH 101; MATH 106 may be substituted for MATH 102; CHEM 151 may be substituted for CHEM 121 or CHEM 111; CHEM 153 may be substituted for CHEM 123 or CHEM 113; CHEM 152 may be substituted for CHEM 122 or CHEM 112, and CHEM 154 may be substituted for CHEM 124 or CHEM 114; PHYS 101 and PHYS 103 or PHYS 111 may be substituted for PHYS 125; PHYS 102 and PHYS 104 or PHYS 112 may be substituted for PHYS 126.

2. BIOC 212 may be substituted for BIOC 211

3. These advanced labs (BIOC 530 and BIOC 535) must be taken concurrently with or after BIOC 482.

4. Only one of the advanced laboratory course requirements can be satisfied by taking any of the following:
   1. BIOC 310 if taken for at least 3 credit hours or EBIO 306 if taken for at least 2 credit hours
   2. HONS 470 and HONS 471, if the research supervisor is from the BioSciences department or if the research is biological in nature and pre-approved by the student's major advisor
   3. BIOC 401 and BIOC 402 and BIOC 412 or EBIO 403 and EBIO 404
   4. BIOC 393/EBIO 393

This substitution may be used only once regardless of the number of semesters of independent research or transfer credit.

5. CHEM 301 and CHEM 302 (both courses for 6 credit hours total) may substitute for BIOC 352.

6. If students choose to complete 3 courses (9 credit hours) from the EBIO Lecture Courses requirement, students will be required to complete 2 courses (6 credit hours) from the BIOC Lecture Courses requirement. BIOC 300 is only allowed to fulfill a BIOC elective lecture course requirement when it is taken prior to BIOC 301 and BIOC 341, or their equivalent transfer course. A maximum of 3 credits of EBIO 391 can apply to this major.

7. If students choose to complete 1 course (3 credit hours) from the BIOC Lecture Courses requirement, students will be required to complete 4 courses (12 credit hours) from the EBIO Lecture Courses requirement. BIOC 300 is only allowed to fulfill a BIOC elective lecture course requirement when it is taken prior to BIOC 301 and BIOC 341, or their equivalent transfer course. A maximum of 3 credit hours of BIOC 390 can apply to this major.

**Policies for the BA Degree with a Major in Biological Sciences**

**Advising**

Rice University policies are governed primarily by the General Announcements; students are encouraged to look there first for academic policies. Advising information specific to the Department of BioSciences can be found at the department website by clicking on the tab for Undergraduate Studies: [https://biosciences.rice.edu/](https://biosciences.rice.edu/).

**Program Restrictions and Exclusions**

Students pursuing the major in Biological Sciences should be aware of the following program restrictions:

- Students pursuing the major in Biological Sciences may not additionally pursue the major or minor in Biochemistry and Cell Biology.
- Students pursuing the major in Biological Sciences may not additionally pursue the major or minor in Ecology and Evolutionary Biology.

**Transfer Credit**

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: [https://oaa.rice.edu/](https://oaa.rice.edu/). Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

**Departmental Transfer Credit Guidelines**

Students pursuing the major in Biological Sciences should be aware of the following transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

**Additional Information**

For additional information, please see the BioSciences website: [https://biosciences.rice.edu/](https://biosciences.rice.edu/).

**Opportunities for the BA Degree with a Major in Biological Sciences**

**Academic Honors**

The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (*summa cum laude*, *magna cum laude*, and *cum laude*) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.
Departmental Honors
Instructions on applying for the Distinction in Research and Creative Work award from the Department of BioSciences can be found at the department website, by clicking on the link for Undergraduate Studies, at: https://biosciences.rice.edu/.

Research in the BioSciences
Research is highly encouraged for all biosciences majors, and there are many opportunities for independent research at Rice. Information about research for credit and research internships specific to the Department of BioSciences can be found at the department website, by clicking on the link for Undergraduate Studies, at: https://biosciences.rice.edu/.

Additional Information
For additional information, please see the BioSciences website: https://biosciences.rice.edu/.

Bachelor of Arts (BA) Degree with a Major in Ecology and Evolutionary Biology

Program Learning Outcomes for the BA Degree with a Major in Ecology and Evolutionary Biology

Upon completing the BA degree with a major in Ecology and Evolutionary Biology, students will be able to:

1. Locate primary scientific literature and demonstrate the ability to apply critical thinking and problem solving skills to evaluate published and proposed research in the biological sciences.
2. Demonstrate an understanding of the modern scientific method, including a familiarity with current methods for designing experiments and/or mathematical models, and the ability to analyze and interpret data.
3. Demonstrate effective oral and written communication skills, including an ability to communicate effectively and work with diverse groups.
4. Demonstrate familiarity with the diversity of life.
5. Demonstrate a comprehensive knowledge of biology and an in-depth understanding of ecology and evolutionary biology.
6. Demonstrate understanding of the practice and culture of science, scientific ethics, and the relationship between science and society.

Requirements for the BA Degree with a Major in Ecology and Evolutionary Biology

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Ecology and Evolutionary Biology must complete:

• A minimum of 20 courses (minimum 49 credit hours) to satisfy major requirements. Additional credit hours may be required depending on course selection.
• A minimum of 120 credit hours to satisfy degree requirements.
• A minimum of 60 credit hours outside of major requirements.
• A minimum of 9 courses (minimum 22 credit hours) taken at the 300-level or above.

The Ecology and Evolutionary Biology major is intended for students pursuing a wide range of careers in the life sciences. Coursework emphasizes a broad understanding of basic biology, together with in-depth knowledge of ecology and evolutionary biology that culminates in a required 400-level capstone course incorporating primary scientific literature, presentations, and writing in an advanced topic. The BA program is well suited for students with an additional major outside of the sciences, and students are strongly encouraged to take advantage of study abroad opportunities.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

Total Credit Hours Required for the Major in Ecology and Evolutionary Biology

Minimum of 49

Additional Credit Hours to Complete BA Degree Requirements

University Graduation Requirements (p. 26)
Footnotes and Additional Information

- Includes coursework completed as distribution credit, FWIS, LPAR upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The “hours outside of the major” requirement may include all of the above university requirements.

**Permissible substitutions:**
- BIOC 212 may be substituted for BIOC 211; MATH 111 and MATH 112 may be substituted for MATH 101 or MATH 105; CHEM 151 may be substituted for CHEM 121 or CHEM 111; CHEM 153 may be substituted for CHEM 123 or CHEM 113; PHYS 101 and PHYS 103 or PHYS 111 may be substituted for PHYS 125.

- One of the advanced laboratory course requirements may be satisfied by taking EBIOL 306, if taken for at least 2 credit hours.

- The elective course in Natural Science or Engineering must be taken for at least 3 credit hours. Courses offered by the School of Natural Sciences and the School of Engineering include the following subject codes: ASTR, BIOL, CAAM, CEVE, CHBE, CHEM, COMP ELEC, ENGI, ENST, ESCI, GLHT, HEAL, KINE, MATH, MECH, MSNE, NSCI, PHYS, and STAT.

**Policies for the BA Degree with a Major in Ecology and Evolutionary Biology**

**Advising**

Rice University policies are governed primarily by the General Announcements; students are encouraged to look there first for academic policies. Advising information specific to the Department of BioSciences can be found at the department website, by clicking on the link for Undergraduate Studies: [https://biosciences.rice.edu/](https://biosciences.rice.edu/).

**Program Restrictions and Exclusions**

Students pursuing the major in Ecology and Evolutionary Biology should be aware of the following program restrictions:

- Students pursuing the major in Ecology and Evolutionary Biology may not additionally declare the major in Biological Sciences.

**Transfer Credit**

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: [https://oaad.rice.edu](https://oaad.rice.edu). Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

**Departmental Transfer Credit Guidelines**

Students pursuing the major in Ecology and Evolutionary Biology should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.

**Additional Information**

For additional information, please see the BioSciences website: [https://biosciences.rice.edu/](https://biosciences.rice.edu/).

**Opportunities for the BA Degree with a Major in Ecology and Evolutionary Biology**

**Academic Honors**

The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

**Departmental Honors**

Instructions on applying for the Distinction in Research and Creative Work award from the Department of BioSciences can be found at the department website, by clicking on the link for Undergraduate Studies, at: [https://biosciences.rice.edu/](https://biosciences.rice.edu/).

**Research in the BioSciences**

Research is highly encouraged for all biosciences majors, and there are many opportunities for independent research at Rice. Information about research for credit and research internships specific to the Department of BioSciences can be found at the department website, by clicking on the link for Undergraduate Studies, at: [https://biosciences.rice.edu/](https://biosciences.rice.edu/).

**Additional Information**

For additional information, please see the BioSciences website: [https://biosciences.rice.edu/](https://biosciences.rice.edu/).

**Bachelor of Science (BS) Degree with a Major in Biochemistry and Cell Biology**

**Program Learning Outcomes for the BS Degree with a Major in Biochemistry and Cell Biology**

Upon completing the BS degree with a major in Biochemistry and Cell Biology, students will be able to:

1. Demonstrate a comprehensive knowledge of biology with particular emphasis on biochemistry, genetics, and cell biology.
2. Demonstrate the ability to apply the modern scientific method, including designing experiments and/or building mathematical models, and collecting, analyzing, and interpreting data using common statistical methods and software programs.
3. Demonstrate effective oral and written communication skills, including an ability to communicate effectively and work with diverse groups and the ability to interpret and communicate the results of original research.
4. Locate primary scientific literature and demonstrate the ability to use critical thinking and problem-solving skills to evaluate published and proposed research in the biological sciences and to apply these skills.
5. Demonstrate understanding of the practice and culture of science, scientific ethics, and the relationship between science and society.
6. Develop quantitative reasoning via the construction of models and/or the analysis of data.

Requirements for the BS Degree with a Major in Biochemistry and Cell Biology

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BS degree with a major in Biochemistry and Cell Biology must complete:

- A minimum of 28 courses (minimum of 69 credit hours) to satisfy major requirements. Additional credit hours may be required depending on course selection.
- A minimum of 129 credit hours to satisfy degree requirements. Additional credit hours may be required depending on course selection.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 12 courses (minimum of 31 credit hours) taken at the 300-level or above.

The BS degree path emphasizes a broad understanding of biochemistry and cell biology, provides room for exploration anywhere in the Natural Sciences or Engineering, and culminates in two required 400-level capstone courses from an approved list of courses. Students in Biochemistry and Cell Biology are strongly encouraged to pursue their research interests through independent research experiences. The BS degree program offers greater coverage and depth as compared to the BA.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

2019-2020 General Announcements
PDF Generated 11/12/2019
All Biochemistry and Cell Biology majors must take at least one advanced lab. These advanced labs must be taken with or after completion of BIOC 301 and BIOC 341.

The combined courses BIOC 401 and BIOC 402 and BIOC 412 are considered a single BIOC 400-level course and can be counted as one capstone course together as a series and/or as an independent research experience, provided that this substitution has not been used previously; this 3-course series can count as a single lab at 300-level or higher. **To be applied toward the major all three courses must be completed.**

Students must complete a total of 2 courses (6 credit hours) from courses offered by the School of Natural Sciences or the School of Engineering. Courses in Natural Sciences/Engineering include any 300-level or greater course of at least 3 credit hours from any department in the Wiess School of Natural Sciences (including BioSciences) or George R. Brown School of Engineering, except independent research courses such as BIOC 310, BIOC 401/BIOC 402, BIOE 400/BIOE 401, or EBIOS 306/EBIOS 403/EBIOS 404, which cannot be used to fulfill this requirement. A maximum of 3 credit hours from BIOC 390 (transfer credit in Biochemistry and Cell Biology) may be applied to this requirement. Courses offered by the School of Natural Sciences and the School of Engineering include the following subject codes: ASTR, BIOC, BIOE, CAAM, CEVE, CHBE, CHEM, COMP, EBIOS, ELEC, ENGI, ENST, ESCI, GLHT, HEAL, KINE, MATH, MECHE, MSNE, NSCI, PHYS, STAT. BIOC 300 is only allowed to fulfill this elective requirement when it is taken prior to BIOC 301 and BIOC 341, or their equivalent transfer course.

To fulfill the remaining BIOC major requirements, students pursuing the **BS degree** must complete a total of 2 additional courses (6 credit hours) as capstones. Only BIOC 400-level lecture courses from the list which are explicitly designed for the BIOC major, can be used to satisfy this requirement.

---

**Policies for the BS Degree with a Major in Biochemistry and Cell Biology**

**Advising**

Rice University policies are governed primarily by the General Announcements; students are encouraged to look there first for academic policies. Advising information specific to the Department of BioSciences can be found at the department website by clicking on the tab for Undergraduate Studies: [https://biosciences.rice.edu/](https://biosciences.rice.edu/).

**Program Restrictions and Exclusions**

Students pursuing the major in Biochemistry and Cell Biology should be aware of the following program restrictions:

- Students pursuing the major in Biochemistry and Cell Biology may not additionally declare the major in Biological Sciences.

**Transfer Credit**

For Rice University's policy regarding transfer credit, see **Transfer Credit** (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: [https://oaa.rice.edu/](https://oaa.rice.edu/). Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

**Departmental Transfer Credit Guidelines**

Students pursuing the major in Biochemistry and Cell Biology should be aware of the following departmental transfer credit guidelines:
• Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.

Additional Information
For additional information, please see the BioSciences website: https://biosciences.rice.edu/.

Opportunities for the BS Degree with a Major in Biochemistry and Cell Biology

Academic Honors
The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Departmental Honors
Instructions on applying for the Distinction in Research and Creative Work award from the Department of BioSciences can be found at the department website, by clicking on the link for Undergraduate Studies, at: https://biosciences.rice.edu/.

Research in the BioSciences
Research is highly encouraged for all biosciences majors, and there are many opportunities for independent research at Rice. Additional Information
For additional information, please see the BioSciences website: https://biosciences.rice.edu/.

Bachelor of Science (BS) Degree with a Major in Ecology and Evolutionary Biology

Program Learning Outcomes for the BS Degree with a Major in Ecology and Evolutionary Biology

Upon completing the BS degree with a major in Ecology and Evolutionary Biology, students will be able to:

1. Locate primary scientific literature and demonstrate the ability to apply critical thinking and problem solving skills to evaluate published and proposed research in the biological sciences and to apply these skills to develop an independent research project.
2. Demonstrate the ability to apply the modern scientific method, including designing experiments and/or building mathematical models, collecting, analyzing, and interpreting data using common statistical methods and software programs.
3. Demonstrate effective oral and written communication skills, including an ability to communicate effectively and work with diverse groups and the ability to interpret and communicate the results of original research.
4. Demonstrate familiarity with the diversity of life and an in-depth understanding of at least one level or biological organization (i.e. genetic, genomic, cellular, organismal, population, community, or ecosystem).
5. Demonstrate a comprehensive knowledge of biology and an in-depth understanding of ecology and evolutionary biology.
6. Demonstrate understanding of the practice and culture of science, scientific ethics, and the relationship between science and society.

Requirements for the BS Degree with a Major in Ecology and Evolutionary Biology

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BS degree with a major in Ecology and Evolutionary Biology must complete:

• A minimum of 22 courses (minimum 61 credit hours) to satisfy major requirements. Additional credit hours may be required depending on course selection.
• A minimum of 121 credit hours to satisfy degree requirements. Additional credit hours may be required depending on course selection.
• A minimum of 60 credit hours outside of major requirements.
• A minimum of 12 courses (minimum 34 credit hours) taken at the 300-level or above.

The Ecology and Evolutionary Biology major is intended for students pursuing a wide range of careers in the life sciences. Course work emphasizes a broad understanding of basic biology together with in-depth knowledge of ecology and evolutionary biology that culminates in a required capstone 400-level course incorporating primary scientific literature, presentations, and writing in an advanced topic. The BS program is well suited for students planning to go on to graduate or professional school, or who will enter the workforce with the BS as their terminal degree. Students pursuing the BS degree are also required to conduct independent research under the supervision or co-supervision of an Ecology and Evolutionary Biology faculty member (though the research can take place in other locations or institutions such as the Texas Medical Center or at field sites throughout the world). Students are strongly encouraged to take advantage of study abroad opportunities.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major's academic advisor, or where applicable, the department's Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major's Official Certifier (https://registrar.rice.edu/facstaff/degeworks/officialcertifier/) Students and their academic advisors should identify and clearly document the courses to be taken.

Natural Sciences or Engineering

Select 1 course offered by the School of Natural Sciences or the School of Engineering at the 300-level or above: 1

Total Credit Hours Required for the Major in Ecology and Evolutionary Biology Minimum of 61

University Graduation Requirements (p. 26) * 60

Total Credit Hours Minimum of 121

Footnotes and Additional Information

* Includes coursework completed as distribution credit, FWIS, LPAR upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The "hours outside of the major" requirement may include all of the above university requirements.

1 Permissible substitutions: BIOC 212 may be substituted for BIOC 211; MATH 111 and MATH 112 may be substituted for MATH 101 or MATH 105; CHEM 160 or CHEM 161 may be substituted for CHEM 121 or CHEM 111; CHEM 151 or CHEM 152 may be substituted for PHYS 101 or PHYS 102 or PHYS 111 may be substituted for PHYS 125.

2 The elective course in Natural Sciences or Engineering must be taken for at least 3 credit hours. Courses offered by the School of Natural Sciences and the School of Engineering include the following subject codes: ASTR, BIOC, CAAM, CEVE, CHEM, COMP, ELEC, ENGI, ENST, ESCI, GLHT, HEAL, KINE, MATH, MECH, MSNE, NSCI, PHYS, and STAT.

Policies for the BS Degree with a Major in Ecology and Evolutionary Biology

Advising

Rice University policies are governed primarily by the General Announcements; students are encouraged to look there first for academic policies. Advising information specific to the Department of BioSciences can be found at the department website by clicking on the tab for Undergraduate Studies: https://biosciences.rice.edu/.

Program Restrictions and Exclusions

Students pursuing the major in Ecology and Evolutionary Biology should be aware of the following program restrictions:

- Students pursuing the major in Ecology and Evolutionary Biology may not additionally declare the major in Biological Sciences.

Transfer Credit

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the major in Ecology and Evolutionary Biology should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.

Additional Information

For additional information, please see the BioSciences website: https://biosciences.rice.edu/.

Opportunities for the BS Degree with a Major in Ecology and Evolutionary Biology

Academic Honors

The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Departmental Honors

Instructions on applying for the Distinction in Research and Creative Work award from the Department of BioSciences can be found at the department website, by clicking on the link for Undergraduate Studies, at: https://biosciences.rice.edu/.
Research in the BioSciences

Research is highly encouraged for all biosciences majors, and there are many opportunities for independent research at Rice. Information about research for credit and research internships specific to the Department of BioSciences can be found at the department website, by clicking on the link for Undergraduate Studies, at: https://biosciences.rice.edu/.

Additional Information

For additional information, please see the BioSciences website: https://biosciences.rice.edu/.

Doctor of Philosophy (PhD) Degree in the field of Biochemistry and Cell Biology

Program Learning Outcomes for the PhD Degree in the field of Biochemistry and Cell Biology

Upon completing the PhD degree in the field of Biochemistry and Cell Biology, students will be able to:

1. Develop a comprehensive knowledge of current and past research accomplishments and techniques in biochemistry and cell biology.
2. Demonstrate independent problem solving and critical thinking skills.
3. Demonstrate effective written, oral, and visual communication skills required to articulate scientific findings and significance via publications, seminars, and a thesis describing independent research.

Requirements for the PhD Degree in the field of Biochemistry and Cell Biology

For general university requirements, please see Doctoral Degrees (p. 65). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the PhD Degree in the field of Biochemistry and Cell Biology must complete the requirements as listed below.

Course Requirements

Most of the formal course studies will be completed in the first year of residence to allow the students to commence thesis research at the end of their second semester at Rice. During the first year, the BCB Graduate Advisory Committee will advise all graduate students. This committee will determine the formal course program to be taken during the first year in residence. Students are required to have training in biochemistry and cell biology; training in genetics and physical chemistry or biophysics is also beneficial. Students lacking formal training in biochemistry or cell biology are required to take the equivalent background courses during their first year.

The following Rice courses must be taken if students lack these prerequisites in their final undergraduate transcript:

Policies for the PhD Degree in the field of Biochemistry and Cell Biology

Biochemistry and Cell Biology Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, Biochemistry and Cell Biology publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Biochemistry_Cell_Biology_Graduate_Handbook.pdf

Admission

Applicants for graduate study in the Biochemistry and Cell Biology Program must have:

- BA or BS degree in biochemistry, biology, chemistry, chemical engineering, physics, or some equivalent
- High levels of intellectual strength and motivation, as indicated by academic record, Graduate Record Examination (GRE) scores, and recommendations

Although the department offers an MS degree in Biochemistry and Cell Biology, the department admits students who intend to pursue the PhD program. For general university requirements, see Graduate Degrees (p. 49).

Additional Information

For additional information, please see the BioSciences website: https://biosciences.rice.edu/

Opportunities for the PhD Degree in the field of Biochemistry and Cell Biology

All full-time Biochemistry and Cell Biology graduate students receive funding and full tuition waivers as specified in their offer letters. Information about Student Resources, Attendance at Scientific Conferences, Internships, Graduate Students Awards, the Graduate Student Association, etc. can be found in the Biochemistry and Cell Biology Graduate Program Handbook online at the department website: http://gradhandbooks.rice.edu/2018_19/Biochemistry_Cell_Biology_Graduate_Handbook.pdf

Additional Information

For additional information, please see the BioSciences website: https://biosciences.rice.edu/

Doctor of Philosophy (PhD) Degree in the field of Ecology and Evolutionary Biology

Program Learning Outcomes for the PhD Degree in the field of Ecology and Evolutionary Biology

Upon completing the PhD degree in the field of Ecology and Evolutionary Biology, students will be able to:

1. Students generally complete BIOC 583, BIOC 587, and BIOC 588 in their first year, and will be responsible for the content of these courses in their admission to candidacy examination.

2. Students gain teaching experience by serving as discussion leaders and graders in two undergraduate courses during their second year (BIOC 599); additional teaching experiences are available on an individual basis.

3. Students are required to enroll in at least 9 hours of BIOC 800 during all semesters of residency after the first 2 semesters.

Evaluation of Progress in Graduate Study

The BCB Graduate Advising Committee evaluates each student’s undergraduate record and recommends course work based on the requirements. Thesis advisors may require additional courses.

At the end of each semester of the first year, the department chair, in consultation with the faculty, reviews student performance in the formal coursework. Students must maintain at least a B average (GPA ≥ 3.00), perform satisfactorily in BIOC 701/BIOC 702, and demonstrate outstanding motivation and potential for research. Thesis lab assignments are made based on student and faculty preferences following research rotations.

Evaluation after the first year includes:

- Ongoing review of research progress by the thesis advisor; satisfactory research progress will be indicated by a grade of ‘S’ in BIOC 800 each semester.
- A yearly research progress assessment by the student’s Research Progress Review Committee.
- Presentation of research progress at least once a year in seminar format (BIOC 581/BIOC 582) starting in the fourth semester and continuing until submission of the thesis.
- Completion of a written and oral admission to candidacy examination before the start of the fifth semester.
- Defense of the PhD thesis research and text in a final public seminar presentation and oral examination attended by the student’s Thesis Committee.

Footnotes and Additional Information

1. Students generally complete BIOC 583, BIOC 587, and BIOC 588 in their first year, and will be responsible for the content of these courses in their admission to candidacy examination.

2. Students gain teaching experience by serving as discussion leaders and graders in two undergraduate courses during their second year (BIOC 599); additional teaching experiences are available on an individual basis.

3. Students are required to enroll in at least 9 hours of BIOC 800 during all semesters of residency after the first 2 semesters.
1. Demonstrate an ability to understand and critically evaluate concepts, research accomplishments, and techniques in ecology and evolutionary biology.

2. Demonstrate independent problem solving and critical thinking skills by identifying novel research questions in ecology and evolutionary biology and synthesizing critical paths towards answering them.

3. Demonstrate technical proficiency in a range of ecology and evolutionary biology research methods.

4. Demonstrate the effective written communication skills required for scientific publications, grant proposal submissions, and a thesis describing independent research.

5. Demonstrate the effective oral and visual communication skills necessary for articulating scientific findings and significance to diverse audiences.

Requirements for the PhD Degree in the field of Ecology and Evolutionary Biology

For general university requirements, please see Doctoral Degrees (p. 65). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the PhD Degree in the field of Ecology and Evolutionary Biology must complete the requirements as listed below.

Course Requirements

Most of the formal course studies will be completed in the first year of residence to allow the students to begin thesis research at the end of their second semester at Rice. Entering students will meet with their faculty advisor to form a course of study of the first year. Students should have completed coursework in ecology, evolution (or equivalent), mathematics (including calculus), and statistics prior to admission. Deficiencies in these subject areas should be made up during the first year of residence; some may be waived at the discretion of the EEB Graduate Advising Committee and the EEB Graduate Program Director.

The following Rice courses must be taken if students lack course work in ecology or evolution in their final undergraduate transcript:

<table>

</tr>
</tbody>
</table>

Thesis Requirement

Completion and public defense of a thesis embodying the results of an original investigation

Additional Coursework as Approved by Department

Total Credit Hours Minimum of 90

Footnotes and Additional Information

1. At least two topics courses must be completed before candidacy.

2. Students must complete 2 semesters of EBIO 591 during their first 4 semesters to gain teaching experience; additional teaching experiences are available on an optional basis.

3. EBIO 801 EEB Graduate Research credit hours vary depending on the number of other courses the student is taking in a given semester.

Evaluation of Progress in Graduate Study

Students must maintain a minimum grade average of B (3.00 grade points) in courses taken in the department and satisfactory grades in courses taken outside the department. Students must demonstrate satisfactory progress in their degree program in annual reviews by the EEB faculty. The review process requires that each student:

- Presents a public seminar on his/her research at the annual EEB Graduate Student Symposium
- Prepares a written report on his/her progress

First-year students must also participate in a meeting with the EEB Graduate Advising Committee.

PhD Degree Program

In addition to the general university requirements and those listed above, the PhD degree in Ecology and Evolutionary Biology requires:

- Passing the qualifying examination given by the thesis committee. (The committee will be composed of at least three members. Two, including the committee chair, must be members of the student’s department faculty; in doctoral thesis committees one member must have his or her primary appointment in another department within the university.)
- Complete an original investigation and a doctoral thesis with at least three chapters with the potential to produce publications in reputable, peer-reviewed scientific journals.

Completion and public defense of a thesis

**Additional Coursework as Approved by Department**

<table>
<thead>
<tr>
<th>Total Credit Hours</th>
<th>Minimum of 30</th>
</tr>
</thead>
</table>

**Footnotes and Additional Information**

1. Students generally complete BIOC 583, BIOC 587, and BIOC 588 in their first year.
2. Students are required to enroll in at least 9 hours of BIOC 800 during all semesters of residency after the first 2 semesters.

**Evaluation of Progress in Graduate Study**
The BCB Graduate Advising Committee evaluates each student’s undergraduate record and recommends course work based on the requirements. Thesis advisors may require additional courses.

At the end of each semester, the department chair, in consultation with the faculty, reviews student performance in the formal course work.

MS candidates must maintain a GPA ≥ 2.67, complete a thesis, and successfully complete a public oral defense of their research work to their Thesis Committee and other interested parties.

**Evaluation after the first year includes:**
- The research progress review examination held during the MS student’s second year replaces the admission to candidacy examination; no other preliminary examination is required before the final oral defense of the master’s thesis; satisfactory research progress will be indicated by a grade of ‘S’ in BIOC 800 each semester
- Presentation of research progress at least once a year in seminar format (BIOC 581/BIOC 582) starting in the fourth semester and continuing until submission of the thesis
- Defense of the MS thesis research and text in a final public seminar presentation and oral examination attended by the student’s Thesis Committee

**Policies for the MS Degree in the field of Biochemistry and Cell Biology**

**Biochemistry and Cell Biology Graduate Program Handbook**
The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, Biochemistry and Cell Biology publishes a graduate program handbook, which can be found here: [https://gradhandbooks.rice.edu/2019_20/Biochemistry_Cell_Biology_Graduate_Handbook.pdf](https://gradhandbooks.rice.edu/2019_20/Biochemistry_Cell_Biology_Graduate_Handbook.pdf)

**Admission**
Applicants for graduate study in the Biochemistry and Cell Biology Program must have:

- BA or BS degree in biochemistry, biology, chemistry, chemical engineering, physics, or some equivalent
- High levels of intellectual strength and motivation, as indicated by academic record, Graduate Record Examination (GRE) scores, and recommendations

Although the department offers an MS degree in biochemistry and cell biology, the department admits students who intend to pursue the PhD program. For general university requirements, see [Graduate Degrees](p. 49).

**Transfer Credit**
For Rice University’s policy regarding transfer credit, see [Transfer Credit](p. 64). Some departments and programs have additional restrictions on transfer credit. Students are encouraged to meet with their academic program’s advisor when considering transfer credit possibilities.

Thesis Requirement
Completion and public defense of a thesis embodying the results of an original investigation

Additional Coursework as Approved by Department

Total Credit Hours Minimum of 30

Footnotes and Additional Information

1 At least 2 topics courses must be completed before candidacy. Students are strongly encouraged to take at least 1 topics course per semester during all years of residency.
2 Students must complete 2 semesters of EBIO 591 during their first 4 semesters to gain teaching experience; additional teaching experiences are available on an optional basis.
3 A minimum of 10 credit hours of EBIO 801 EEB Graduate Research is required for a master’s degree. EBIO 801 credit hours vary per student, depending on the number of other courses the student is taking in a given semester.
Evaluation of Progress in Graduate Study
Students must maintain a minimum grade average of B (3.00 grade points) in courses taken in the department and satisfactory grades in courses taken outside the department. Students must demonstrate satisfactory progress in their degree program in annual reviews by the EEB faculty. The review process requires that each student:

- Presents a public seminar on their research at the annual EEB Graduate Student Symposium
- Prepares a written report on their progress

First-year students must also participate in a meeting with the EEB Graduate Advising Committee.

MS Degree Program
In addition to the general university requirements and those listed above, the MS degree in Ecology and Evolutionary Biology requires:

- Convening a master’s thesis committee. A thesis committee is composed of at least three members. Two, including the committee chair, must be members of the student’s department faculty.
- Completing an original investigation and a master’s thesis
- Presenting a departmental seminar on the research
- Publicly defending the master’s thesis

Policies for the MS Degree in the field of Ecology and Evolutionary Biology
Ecology and Evolutionary Graduate Program Handbook
The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, Ecology and Evolutionary Biology publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Ecology_Evolutionary_Biology_Graduate_Handbook.pdf

Admission
Applicants for graduate study in the Ecology and Evolutionary Biology Program must have:

- BA or BS degree or equivalent that provides a strong background in biology
- Strong ability and motivation, as indicated by academic record, Graduate Record Examination (GRE) scores, and recommendations
- Scores from the GRE biology subject exam are optional but can be helpful, particularly for students with nontraditional backgrounds in biology

These requirements do not preclude admission of qualified applicants who have majored in areas other than biology. Although the program offers MS degrees, only on rare occasions are students who do not intend to pursue the PhD admitted to the graduate program. For general university requirements, see Graduate Degrees (p. 49).

Transfer Credit
For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 64). Some departments and programs have additional restrictions on transfer credit. Students are encouraged to meet with their academic program’s advisor when considering transfer credit possibilities.

Additional Information
For additional information, please see the BioSciences website: https://biosciences.rice.edu/

Opportunities for the MS Degree in the field of Ecology and Evolutionary Biology
All full-time Ecology and Evolutionary Biology graduate students receive funding and full tuition waivers as specified in their offer letters. Information about Student Resources, Attendance at Scientific Conferences, Internships, Graduate Students Awards, the Graduate Student Association, etc. can be found in the Ecology and Evolutionary Biology Graduate Program handbook here: http://gradhandbooks.rice.edu/2018_19/Ecology_Evolutionary_Biology_Graduate_Handbook.pdf

Additional Information
For additional information, please see the BioSciences website: https://biosciences.rice.edu/

Minor in Biochemistry and Cell Biology
Program Learning Outcomes for the Minor in Biochemistry and Cell Biology
Upon completing the minor in Biochemistry and Cell Biology, students will be able to:

1. Demonstrate knowledge of biology with particular emphasis on biochemistry and cell biology.
2. Demonstrate effective oral and written communication skills, including the ability to interpret and communicate the results of biological research.
3. Demonstrate the critical thinking and analysis skills necessary to evaluate published and proposed research in the biological sciences.

Requirements for the Minor in Biochemistry and Cell Biology
Students pursuing the minor in Biochemistry and Cell Biology must complete:

- A minimum of 18 courses (minimum of 44 credit hours) to satisfy minor requirements.

The minor in Biochemistry and Cell Biology is intended for those with an interest in the life sciences but who may be majoring in other areas. This minor incorporates many of the life science core courses required for the health professions.

The courses listed below satisfy the requirements for this minor. In certain instances, courses not on this official list may be substituted upon approval of the minor’s academic advisor, or where applicable, the Program Director. (Course substitutions must be formally applied and entered into Degree Works by the minor’s Official Certifier (https://registrar.rice.edu/facstaff/degeworks/officialcertifier/). Students and their academic advisors should identify and clearly document the courses to be taken.

10. **CHEM 212 & CHEM 214** ORGANIC CHEMISTRY II and ORGANIC CHEM DISCUSSION II 3

11. **CHEM 215 & CHEM 365** ORGANIC CHEMISTRY LAB or ORGANIC CHEMISTRY LAB 2

12. **BIOC 201** INTRODUCTORY BIOLOGY 3

13. **BIOC 301** BIOCHEMISTRY I 3

14. **BIOC 341** CELL BIOLOGY 3

Lab Course Requirement

- **BIOC 211** INTERMEDIATE EXPERIMENTAL BIOSCIENCES 2

Lecture Course Requirement

- Select 1 lecture course from BIOC course offerings at the 300-level or above 3

Total Credit Hours Minimum of 44

Footnotes and Additional Information

1. Permissible Substitutions: MATH 105 or MATH 111 and MATH 112 may be substituted for MATH 101; MATH 106 may be substituted for MATH 102; CHEM 151 may be substituted for CHEM 121 or CHEM 111; CHEM 153 may be substituted for CHEM 123 or CHEM 113; CHEM 152 may be substituted for CHEM 122 or CHEM 112, and CHEM 154 may be substituted for CHEM 124 or CHEM 114; CHEM 320 may be substituted for CHEM 212; PHYS 101 and PHYS 103 or PHYS 111 may be substituted for PHYS 125; PHYS 102 and PHYS 104 or PHYS 112 may be substituted for PHYS 126; BIOC 212 may be substituted for BIOC 211.

2. Lecture courses are noted in Rice's Course Catalog with a course type of 'lecture'. These courses do not include courses listed with a course type of 'lecture/laboratory'.

Policies for the Minor in Biochemistry and Cell Biology

Advising

Rice University policies are governed primarily by the General Announcements; students are encouraged to look there first for academic policies. Advising information specific to the Department of BioSciences can be found at the department website by clicking on the tab for Undergraduate Studies: [https://biosciences.rice.edu](https://biosciences.rice.edu/).

Program Restrictions and Exclusions

Students pursuing the minor in Biochemistry and Cell Biology should be aware of the following program restrictions:

- As noted in Majors, Minors, and Certificates (p. 11), i.) students may declare their intent to pursue a minor only after they have first declared a major, and ii.) students may not major and minor in the same subject.
- Students pursuing the major in Biological Sciences may not declare the minor in Biochemistry and Cell Biology.

Transfer Credit

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: [https://oaa.rice.edu](https://oaa.rice.edu). Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the minor in Biochemistry and Cell Biology should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.

Additional Information

For additional information, please see the BioSciences website: [https://biosciences.rice.edu](https://biosciences.rice.edu/).

Opportunities for the Minor in Biochemistry and Cell Biology

Academic Honors

The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Research in the BioSciences

Research is highly encouraged for all biosciences majors, and there are many opportunities for independent research at Rice. Information about research for credit and research internships specific to the Department of
BioSciences can be found at the department website, by clicking on the link for Undergraduate Studies, at: https://biosciences.rice.edu/.

Additional Information
For additional information, please see the BioSciences website: https://biosciences.rice.edu/.

Minor in Ecology and Evolutionary Biology

Program Learning Outcomes for the Minor in Ecology and Evolutionary Biology

Upon completing the minor in Ecology and Evolutionary Biology, students will be able to:

1. Demonstrate knowledge of biology with particular emphasis on ecology and evolutionary biology.
2. Demonstrate effective oral and written communication skills, including the ability to interpret and communicate the results of biological research.
3. Demonstrate the critical thinking and analysis skills necessary to evaluate published and proposed research in the biological sciences.

Requirements for the Minor in Ecology and Evolutionary Biology

Students pursuing the minor in Ecology and Evolutionary Biology must complete:

- A minimum of 7 courses (20 credit hours) to satisfy minor requirements.
- A minimum of 4 courses (12 credit hours) taken at the 300-level or above.

The minor in Ecology and Evolutionary Biology is intended for the numerous Rice students with an avid interest in ecology and evolutionary biology but whose major interests are in other departments.

The courses listed below satisfy the requirements for this minor. In certain instances, courses not on this official list may be substituted upon approval of the minor’s academic advisor, or where applicable, the Program Director. (Course substitutions must be formally applied and entered into Degree Works by the minor’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Students and their academic advisors should identify and clearly document the courses to be taken.

The professional master's degree in Bioscience and Health Policy creates broad options for science students interested in working in biomedical research, health care professions, health care management, for the government, or in governmental relations positions at non-profit organizations, in industry, and in academic institutions. This interdisciplinary program equips students with advanced bioscience skills; teaches quantitative skills and data analysis; provides students with communication skills enabling them to understand and formulate public policy recommendations; and trains students how to integrate science knowledge into developing informed policies and practices.

The Bioscience and Health Policy program gives students an advanced background in bioscience complemented by courses in business, economics, humanities, and policy studies to foster their understanding of the role of science in policy making and the role of public policy in science. The coursework provides research and study skills enabling development of specific policy recommendations. Students will also receive the tool-set necessary to become knowledgeable in the formulation and execution of public policy. Direct access to the Baker Institute will allow students to work closely with policy scholars as well as meet with many of the leaders in science and technology policy.

The MS in Bioscience and Health Policy (MSBHP) degree is part of the professional science master's (PSM) program at Rice housed in the Wiess School of Natural Sciences. These master's degrees are designed for students seeking to gain further scientific core expertise coupled with enhanced management and communication skills. They instill a level of scholastic proficiency that exceeds that of the bachelor's level, and create the cross-functional aptitudes needed in modern industry and government.

Students receiving the MSBHP degree will be able to enter into governmental positions; work in non-governmental agencies, insurance, medical and pharmaceutical companies; serve as governmental relations officers for companies or universities with a vested science interest; or enter into post-graduate training in health care professions or biosciences.

A coordinated MBA/MSBHP degrees program is also offered in conjunction with the Jesse H. Jones Graduate School of Business.

Bioscience and Health Policy does not currently offer an academic program at the undergraduate level.

Master of Science in Bioscience and Health Policy (MSBHP) Degree

Program Learning Outcomes for the MSBHP Degree

Upon completing the MSBHP degree, students will be able to:

1. Become knowledgeable in current advanced bioscience and health policy topics affecting society.
2. Integrate science knowledge into policies and practices.
3. Demonstrate written, oral, and visual communication strategies required to work effectively across science, business, and government.

Requirements for the MSBHP Degree

The MSBHP degree is a non-thesis master’s degree. For general university requirements, please see Non-Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MSBHP degree must complete:

- A minimum of 14 courses (minimum of 39-40 credit hours, depending on course selection) to satisfy degree requirements.
- A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above).
- A minimum of 24 credit hours must be taken at Rice University.
- A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University.
- A 3-6 month internship. Instead of a thesis, at the conclusion of their internship, students must present their internship project in both oral and written form as part of the Professional Master’s Project (NSCI 512). Part-time students who already work in their area of study may request approval to fulfill the internship requirement by working on a specific, pre-approved project with their current employer.
- A minimum overall GPA of 2.67 or higher in all Rice coursework.

Note: Some of the listed courses are not offered every year, and some may also have prerequisites or require instructor permission.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

NSCI 530 THE SHAPING OF HEALTH POLICY
SOCI 525 POPULATION HEALTH SEMINAR

Footnotes and Additional Information

1. Note: Some of the listed courses are not offered every year, and other coursework may be offered that satisfies the stated requirements upon approval. Depending on the student's background or interest, course substitutions for any required or elective course may be approved by the program's academic advisor. Students should consult with their academic advisors before enrolling. For example, students can choose up to two electives from the UT Graduate School of Biomedical Science (GS), Informatics (HI), and/or Health Science Center (PH). See department for more details.

2. PH 3910 is a course offered at the UTHealth School of Public Health and available to Rice students as part of an existing inter-institutional agreement between our two institutions. Once received as approved transfer credit, PH3910 is eligible to be approved to meet the 3 credit hour requirement for Group B, Finance and Economics. Students are not permitted to take this inter-institutional course in their last semester at Rice.

3. Practical experience is offered via a three to six month internship. The internship will be under the guidance of a host company, government agency, or non-profit organization. At the conclusion of the internship, students must present a summary of their internship project in both oral and written form for the cohort of the internship, students must present a summary of their internship project in both oral and written form for the cohort. Part-time students who already work in their area of study may fulfill the internship requirements by working on an approved project with their current employer.

Policies for the MSBHP Degree
Professional Science Master’s Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the Professional Science Master’s Program publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Professional_Science_Masters_Handbook.pdf

Admission

Admission to graduate study in Bioscience and Health Policy is open to qualified students holding a bachelor's degree in biology or a related field. Preparation in biology, chemistry, calculus and statistics is preferred. Scores from the general Graduate Record Examination (GRE) are
Modern issues in personal finance require. Department faculty evaluate the previous academic record and credentials of each applicant individually and make admission decisions.

The Bioscience and Health Policy Professional Master's Program has distinct focus areas for students with primary interests in policy careers, biomedical and health care related positions, or additional post-graduate training or education after degree conferral.

Transfer Credit

For Rice University's policy regarding transfer credit, see Transfer Credit (p. 64). Some departments and programs have additional restrictions on transfer credit. Students are encouraged to meet with their academic program's advisor when considering transfer credit possibilities.

Additional Information

For additional information, please see the Bioscience and Health Policy website: https://profms.rice.edu/ (https://profms.rice.edu/bioscience-health-policy/overview/)

Opportunities for the MSBHP Degree

Fifth-Year Master's Degree Option for Rice Undergraduate Students

Rice students have an option to pursue the Master of Science in Bioscience and Health Policy (MSBHP) degree by adding an additional fifth year to their four undergraduate years of science studies.

Advanced Rice undergraduate students in good academic standing may apply to the MSBHP degree program during their junior or senior year. Upon acceptance, depending on load, financial aid status, and other variables, they may then start taking some required courses of the master's degree program. A plan of study will need to be approved by the student's undergraduate advisor, the Professional Science Master's (PSM) program director, and the MSBHP program director.

As part of this option and opportunity, Rice undergraduate students:

- must complete the requirements for a bachelor's degree and the master's degree independently of each other (i.e., no course may be counted toward the fulfillment of both degrees).
- should be aware there could be financial aid implications if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
- more information on this Undergraduate - Graduate Concurrent Enrollment opportunity, including specific information on the registration process can be found here (p. 17).

Additional Information

For additional information, please see the Bioscience and Health Policy website: https://profms.rice.edu/ (https://profms.rice.edu/bioscience-health-policy/overview/)

Master of Science in Bioscience and Health Policy (MSBHP) Degree / Master of Business Administration (MBA) Degree

Program Learning Outcomes for the MSBHP Degree

Upon completing the MSBHP degree, students will be able to:

1. Become knowledgeable in current advanced bioscience and health policy topics affecting society.
2. Integrate science knowledge into policies and practices.
3. Demonstrate written, oral, and visual communication strategies required to work effectively across science, business, and government.

Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MSBHP/MBA Coordinated Degrees Program

Students may earn a coordinated MBA degree and a Master of Science degree from the Wiess School of Natural Sciences Professional Science Master's (PSM) program in the following fields:

- Bioscience and Health Policy (MSBHP)
- Environmental Analysis (MSEA)
- Space Studies (MSSpS)
- Subsurface Geoscience (MSSG)

For the coordinated MBA/Master of Science degree from the Professional Science Master's (PSM) program, students must complete:

- A minimum of 75 credit hours in approved coursework, including:
  - A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the Professional Science Master's (PSM) degree requirements
  - A minimum of 30 credit hours in the corresponding science discipline
  - All PSM degree-specific requirements
  - A three to six month internship
  - A minimum of 45 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the MBA degree requirements
  - All MBA core requirements, the global field experience, custom core requirements, and coordinated elective requirements

Students plan their course schedules in consultation with the Wiess School of Natural Sciences PSM program director and with the Jones Graduate School of Business Registrar Department. Coordinated degrees
candidates can fulfill requirements for both degrees within 3 academic years.

For general university requirements, see Graduate Degrees (p. 49). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Candidates in the MBA/Master of Science degree from the Professional Science Master’s (PSM) program must complete all requirements as listed for both degrees, and must apply and be accepted in both degree programs.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

**Footnotes and Additional Information**

1. To fulfill the remaining requirements for the coordinated MBA degree program, students must complete an additional 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 45 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) The second year of the program is dedicated entirely to MBA elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

The Jesse H. Jones Graduate School of Business (JGSB) was established in 1974 through a gift from Houston Endowment, Inc. The Jones Graduate School of Business offers a minor in business (BUSI) for undergraduate students, a master’s degree in business administration (MBA) program for graduate students seeking to further their professional careers in business, a one-year master of accounting (MAcc) program, and a PhD program in business for graduate students seeking academic careers in research universities.

Undergraduate Minor in Business

The business minor consists of six integrated courses designed to provide a strong foundation in the essential disciplines of business and to develop students’ critical thinking and communication skills. All courses in the minor are taught by JGSB faculty.

Master of Accounting (MAcc) Degree

The Master of Accounting degree is designed to enable students with a top-tier non-accounting undergraduate education to complete the educational requirements for becoming a certified public accountant. Program requirements and additional information regarding the Master of Accounting program may be found here (p. 100).

Master of Business Administration (MBA) Degree Programs

The MBA degree can be obtained via the Full-Time MBA program, the MBA for Executives program, the MBA for Professionals program, or the MBA@Rice hybrid online program. The Executive and Professional MBA programs and MBA@Rice are designed for executives and working professionals who do not wish to interrupt their careers while pursuing the MBA degree. The MBA for Professionals program has three formats: an evening format, an alternating weekend format, and an extended evening format.

A coordinated MBA/master of engineering program is offered by the Jones Graduate School of Business and the George R. Brown School of Engineering, in many of the departments of engineering. This program prepares students to become managers in organizations requiring a high level of technical expertise and management skills. Students must apply separately and be accepted by both the business school and the appropriate engineering department.

A coordinated MBA/master of science program is offered by the Jones Graduate School of Business and the Weiss School of Natural Sciences Professional Science Master’s (PSM) Program. This program prepares students to become managers in organizations requiring specialized technical knowledge and general management skills. Students must apply separately and be accepted by both the business school and by the appropriate PSM program.

An MBA/MD dual degree program is offered by the Jones Graduate School of Business and Baylor College of Medicine. This program prepares students to become both physicians and managers in institutions involved in the delivery of high-quality health care, as well as biotechnology-focused industries, health insurance/managed health care firms, and pharmaceutical and medical supply and equipment companies.

Doctor of Philosophy (PhD) Degree in the field of Business

The Jones Graduate School of Business PhD program is designed for candidates with outstanding intellectual abilities and a strong commitment to research. The goal of the PhD program is to train students for academic careers focused on cutting-edge, rigorous research and teaching in a business school environment. Applicants to the PhD program must hold a four-year bachelor’s degree from an accredited institution. A master’s degree and work experience are not required for PhD admission. (Advanced degrees (e.g. master’s degrees) and prior work experience are taken into account in admission decisions, but evidence of strong intellectual ability is of utmost importance). Although the Jones Graduate School of Business does not normally admit students to study for an MA, graduate students in the PhD program may earn the MA as they work towards the PhD.

Minor

Doctor of Philosophy (PhD) Degree in the field of Business

Program Learning Outcomes for the MA and PhD Degrees in the field of Business

Upon completing the MA and PhD degrees in the field of Business, students will be able to:

1. Summarize major themes and current research problems in their area of specialization.
2. Explain and identify open problems and areas needing development in their discipline.
3. Execute and present original research in their discipline.
4. Communicate effectively, orally and in writing, their research and the major tenets of their discipline.

Requirements for the MA and PhD Degrees in the field of Business

**MA Degree Program**

The MA degree is a non-thesis master's degree. For general university requirements, please see [Non-Thesis Master's Degrees](#) (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see [All Graduate Students](#) (p. 55). Although students are not normally admitted to study for an MA in the field of Business, graduate students in the PhD program may complete the MA as part of their path towards the PhD. Students pursuing the MA degree in the field of Business must complete:

- A minimum of 36 credit hours to satisfy degree requirements.
- A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above).
- A minimum residency enrollment of four fall and/or spring semesters of full-time graduate study at Rice University.
- A minimum of 9 credit hours of doctoral seminars in the student’s specified discipline or area of specialization.
- A minimum overall GPA of 3.00.

Students must also successfully complete the research workshop participation requirements and the first-year summer research requirements (if applicable) in the area of specialization. Additionally, the Jones School requires that not more than 3 years elapse between the time the student is admitted to the PhD program in Business and the completion of the MA degree, unless an extension is approved by the PhD Program Committee.

**Code** | **Title** | **Credit Hours**
--- | --- | ---
Total Credit Hours Required for the MA Degree in the field of Business | | 36

**PhD Degree Program**

For general university requirements, please see [Doctoral Degrees](#) (p. 65). For additional requirements, regulations, and procedures for all graduate programs, please see [All Graduate Students](#) (p. 55). For program details, see the PhD Program Guidebook distributed by the Jones Graduate School of Business. Admissions applications should include scores on the Graduate Management Admissions Test (GMAT) or the Graduate Record Examination (GRE). Full financial support will be provided to admitted doctoral students. Candidates for the PhD degree spend at least two years in full-time coursework and at least two years writing the thesis. Four to five years is a reasonable goal for completing the program. For the PhD, students must:

- Complete a program of doctoral-level courses that is approved by the area faculty advisor. Students take courses from departments such as economics, psychology, statistics, and political science in addition to courses from Jones Graduate School of Business.
- Complete and defend orally a doctoral thesis, setting forth in publishable form, the results of original research.

**Jones Graduate School of Business Graduate Program Handbook**

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the Jones Graduate School of Business publishes a graduate program handbook, which can be found here: [https://gradhandbooks.rice.edu/2019_20/Jones_Graduate_Handbook.pdf](https://gradhandbooks.rice.edu/2019_20/Jones_Graduate_Handbook.pdf)

**Withdrawal Policy**

A Jones Graduate School of Business student, participating in any offered program, may voluntarily withdraw from school at any time. Upon withdrawal, Rice University applies a sliding scale to tuition, which is noted in the university’s Academic Calendar posted on the Rice [Office of the Registrar website](https://registrar.rice.edu/calendars/).

**Additional Information**

For additional information, please see the Jones Graduate School of Business website: [https://business.rice.edu/](https://business.rice.edu/)

**Opportunities for the PhD Degree in the field of Business**

**Financial Aid**

Jones Graduate School of Business scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded one academic year at a time. Continued assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of...
performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (i.e. scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Doctor of Philosophy (PhD) Degree in the field of Business and a Major Concentration in Economics and Finance

Program Learning Outcomes for the PhD Degree in the field of Business and a Major Concentration in Economics and Finance

Upon completing the PhD degree in the field of Business and a major concentration in Economics and Finance, students will be able to:

1. Learn mathematical, statistical, econometric and computational tools to carry out independent research in economics and finance.
2. Write an independent and original thesis that is of sufficient quality to merit publication in a top economics or finance journal.
3. Conduct a focused review of the literature and develop a research design to carry out independent research.
4. Learn to defend their research design and modeling choices by presenting their paper in a seminar environment.
5. Communicate their research effectively by writing clearly, concisely, and cogently.
6. Read critically and assess research manuscripts related to their field of study and in other fields.

Requirements for the PhD Degree in the field of Business and a Major Concentration in Economics and Finance

For general university requirements, please see Doctoral Degrees (p. 65). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). For program details, see the PhD Program Guidebook distributed by the Jones Graduate School of Business. Admissions applications should include scores on the Graduate Management Admissions Test (GMAT) or the Graduate Record Examination (GRE). The PhD in Business degree program offers a wide range of areas of specialization, depending on each student’s interests and goals. Students are encouraged to contact the Jones Graduate School of Business for additional details regarding the areas of specialization available.

Students pursuing the PhD degree programs in the fields of Business or Economics have the option to participate in a unique program of study, one recognized with a formal major concentration in Economics and Finance. To participate, students in either PhD degree program (Business or Economics) have the option to declare the major concentration in Economics and Finance.

Master of Business Administration (MBA) Degree / Doctor of Medicine (MD) Degree with Baylor College of Medicine

Program Learning Outcomes for the MBA/MD Dual Degree Program

Upon completing the MBA/MD dual degree program, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including
accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and contributor.

Requirements for the MBA/MD Dual Degree Program
As part of the coordinated dual degree program, students have the opportunity to earn both the (Rice) MBA degree and the (Baylor College of Medicine) MD degree in 5 years. The program is structured as follows:

- **Years 1, 2, and 3**—Medical training at Baylor College of Medicine.
- **Year 4**—First-year MBA core courses at Rice including 2 custom core courses and 2 electives.
- **Summer**—Students are encouraged to do an internship. To ensure that the internship is a combination of business/management and health care, approval is required from both schools. The internship does not count toward credit for either degree.
- **Year 5**—Second-year MBA elective courses in fall including US Health Care Management, MGMT 678 and medical training at Baylor College of Medicine in the spring semester.

Students are expected to follow the requirements for the health care concentration as the blueprint for their MBA studies, to the extent possible and in consultation with the Program Director of the Health Care Initiative at Jones Graduate School of Business. To obtain the concentration, students take US Health Care Management, MGMT 678 and medical training at Baylor College of Medicine in fall of their second year and complete 12 credits from a suite of health care courses offered throughout the year.

Students are eligible to receive their MBA degree from Rice i.) after they have completed 45 credit hour of approved business coursework, and ii.) after they have completed the MD degree requirements specified by the Baylor College of Medicine.

Program Learning Outcomes for the MBA Degree
Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Program Learning Outcomes for the MChE Degree
Upon completing the MChE degree, students will be able to:

1. Identify, formulate, and solve complex engineering problems that require synthesis of advanced knowledge in chemical engineering fundamentals.
2. Demonstrate broad advanced knowledge in science and math, and depth in one chemical engineering sub-discipline (energy engineering, biomolecular engineering, materials science).
3. Demonstrate knowledge of business policies and practices in the current business environment in identifying, formulating, and solving engineering challenges in a problem/engineering challenge they undertake to solve as part of independent study.
4. Demonstrate effective oral and written communication skills.

Requirements for the MBA/MChE Coordinated Degrees Program
Students may earn a coordinated MBA degree and a non-thesis Master of Engineering degree from the George R. Brown School of Engineering in the following fields:

- Chemical Engineering (MChE)
- Computational and Applied Mathematics (MCAAM)
- Computer Science (MCS)
- Industrial Engineering (MIE)
- Materials Science and Nanoengineering (MMSNE)
- Mechanical Engineering (MME)
- Statistics (MStat)

For the coordinated MBA/Master of Engineering degrees, students must complete:

- A minimum of 69 credit hours in approved coursework*, including:
  - A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the Master of Engineering degree requirements
  - A minimum of 24 credit hours in the corresponding engineering discipline
  - A minimum of 6 credit hours in elective requirements*
  - A minimum of 45 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the MBA degree requirements
Coordinated MBA Degree Requirements

Students in the coordinated MBA/MChE degrees program must complete the Core Requirements of the MChE degree program (p. 283) and Coordinated MChE Elective Requirements below.

Additional Information

For additional information on these two degrees:

1. Please see the Jones Graduate School of Business website: [https://business.rice.edu/](https://business.rice.edu/)
2. Please see the Chemical and Biomolecular Engineering website: [https://chbe.rice.edu/](https://chbe.rice.edu/)

Master of Business Administration (MBA) Degree / Master of Computational and Applied Mathematics (MCAAM) Degree

Footnotes and Additional Information

1 To fulfill the remaining requirements for the coordinated MBA degree program, students must complete an additional 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 45 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) The second year of the program is dedicated entirely to MBA elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.
Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Program Learning Outcomes for the MCAAM Degree

Upon completing the MCAAM degree, students will be able to:

1. Acquire broad, advanced knowledge in Computational and Applied Mathematics that is also deep within a major sub-discipline.
2. Demonstrate an ability to gain employment or advancement in a technical field related to Computational and Applied Mathematics.

Requirements for the MBA/MCAAM Coordinated Degrees Program

Students may earn a coordinated MBA degree and a non-thesis Master of Engineering degree from the George R. Brown School of Engineering in the following fields:

- Chemical Engineering (MChE)
- Computational and Applied Mathematics (MCAAM)
- Computer Science (MCS)
- Industrial Engineering (MIE)
- Materials Science and Nanoengineering (MMSNE)
- Mechanical Engineering (MME)
- Statistics (MStat)

For the coordinated MBA/Master of Engineering degrees, students must complete:

- A minimum of 69 credit hours in approved coursework*, including:
  - A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the Master of Engineering degree requirements
  - A minimum of 24 credit hours in the corresponding engineering discipline
  - A minimum of 6 credit hours in elective requirements*
  - A minimum of 45 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the MBA degree requirements
  - A minimum of 45 credit hours of business coursework
  - All MBA core requirements, the global field experience, custom core requirements, and coordinated elective requirements
- *Note: A maximum of 6 credit hours of the Master of Engineering degree elective requirements may be selected from business course offerings (MGMP, MGMT, or MICO) and used to fulfill the requirements for both the MBA and the Master of Engineering degrees.

Students plan their course schedules in consultation with the George R. Brown School of Engineering department in which they are enrolled and with the Jones Graduate School of Business Registrar Department. Coordinated degrees candidates can fulfill requirements for both degrees within 2 academic years.

For general university requirements, see Graduate Degrees (p. 49). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Candidates in the MBA/Master of Engineering coordinated degrees program must complete all requirements as listed for both degrees, and must apply and be accepted in both degree programs.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Program Learning Outcomes for the MCS Degree

Upon completing the MCS degree, students will be able to:

1. Solve advanced Computer Science problems. Students will acquire and apply a graduate-level understanding of material in sub-areas of Computer Science.
2. Design and implement complex software systems. Students will demonstrate skill in their design and implementation and function effectively in teams.
3. Communicate effectively to a client and user.

Requirements for the MBA/MCS Coordinated Degrees Program

Students may earn a coordinated MBA degree and a non-thesis Master of Engineering degree from the George R. Brown School of Engineering in the following fields:

- Chemical Engineering (MChE)
- Computational and Applied Mathematics (MCAAM)
- Computer Science (MCS)
- Industrial Engineering (MIE)
- Materials Science and Nanoengineering (MMSNE)
- Mechanical Engineering (MME)
- Statistics (MStat)

For the coordinated MBA/Master of Engineering degrees, students must complete:

- A minimum of 69 credit hours in approved coursework*, including:
  - A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the Master of Engineering degree requirements
  - A minimum of 24 credit hours in the corresponding engineering discipline
  - A minimum of 6 credit hours in elective requirements*
- A minimum of 45 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the MBA degree requirements
  - A minimum of 45 credit hours of business coursework
  - All MBA core requirements, the global field experience, custom core requirements, and coordinated elective requirements
Master of Business Administration (MBA) Degree / Master of Industrial Engineering (MIE) Degree

- **Note**: A maximum of 6 credit hours of the Master of Engineering degree elective requirements may be selected from business course offerings (MGMP, MGMT, or MICO) and used to fulfill the requirements for both the MBA and the Master of Engineering degrees.

Students plan their course schedules in consultation with the George R. Brown School of Engineering department in which they are enrolled and with the Jones Graduate School of Business Registrar Department. Coordinated degrees candidates can fulfill requirements for both degrees within 2 academic years.

For general university requirements, see Graduate Degrees (p. 49). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Candidates in the MBA/Master of Engineering coordinated degrees program must complete all requirements as listed for both degrees, and must apply and be accepted in both degree programs.

The courses listed below satisfy the requirements for this degree program. Master of Business Administration (MBA) Degree / Master of Industrial Engineering (MIE) Degree
Program Learning Outcomes for the MBA Degree
Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Program Learning Outcomes for the MIE Degree
Upon completing the MIE degree, students will be able to:

1. Build physical and mathematical models of complex systems that arise in real-world situations.
2. Understand the flow of material from manufacturing to warehouses to customers through physical or mathematical models.
3. Produce data-driven and implementable solutions that improve the efficiency of real-world systems.
4. Communicate the solutions and insights generated by the models to a non-technical audience.

Requirements for the MBA/MIE Coordinated Degrees Program

Students may earn a coordinated MBA degree and a non-thesis Master of Engineering degree from the George R. Brown School of Engineering in the following fields:

- Chemical Engineering (MChE)
- Computational and Applied Mathematics (MCAAM)
- Computer Science (MCS)
- Industrial Engineering (MIE)
- Materials Science and Nanoengineering (MMSNE)
- Mechanical Engineering (MME)
- Statistics (MStat)

For the coordinated MBA/Master of Engineering degrees, students must complete:

- A minimum of 69 credit hours in approved coursework*, including:
  - A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the Master of Engineering degree requirements
  - A minimum of 24 credit hours in the corresponding engineering discipline
  - A minimum of 6 credit hours in elective requirements*
  - A minimum of 45 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the MBA degree requirements
  - A minimum of 45 credit hours of business coursework
  - All MBA core requirements, the global field experience, custom core requirements, and coordinated elective requirements

*Note: A maximum of 6 credit hours of the Master of Engineering degree elective requirements may be selected from business course offerings (MGMP, MGMT, or MICO) and used to fulfill the requirements for both the MBA and the Master of Engineering degrees.

Students plan their course schedules in consultation with the George R. Brown School of Engineering department in which they are enrolled and with the Jones Graduate School of Business Registrar Department. Program Learning Outcomes for the MBA Degree
Upon completing the MBA degree, students will be able to:
1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Program Learning Outcomes for the MMSNE Degree
Upon completing the MMSNE degree, students will be able to:
1. Acquire broad, advanced knowledge within either Materials Science or NanoEngineering, which is also in-depth in one major sub-discipline of the field.
2. Conduct research at an advanced level in at least one area of Materials Science and Nanoengineering.
3. Communicate scientific ideas effectively in writing and when speaking.

Requirements for the MBA/MMSNE Coordinated Degrees Program
Students may earn a coordinated MBA degree and a non-thesis Master of Engineering degree from the George R. Brown School of Engineering in the following fields:

- Chemical Engineering (MChE)
- Computational and Applied Mathematics (MCAAM)
- Computer Science (MCS)
- Industrial Engineering (MIE)
- Materials Science and Nanoengineering (MMSNE)
- Mechanical Engineering (MME)
- Statistics (MStat)

For the coordinated MBA/Master of Engineering degrees, students must complete:

- A minimum of 69 credit hours in approved coursework*, including:
  - A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the Master of Engineering degree requirements
  - A minimum of 24 credit hours in the corresponding engineering discipline
  - A minimum of 6 credit hours in elective requirements*
  - A minimum of 45 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the MBA degree requirements
  - A minimum of 45 credit hours of business coursework
  - All MBA core requirements, the global field experience, custom core requirements, and coordinated elective requirements
• **Note**: A maximum of 6 credit hours of the Master of Engineering degree elective requirements may be selected from business course offerings (MGMP, MGMT, or MICO) and used to fulfill the requirements for both the MBA and the Master of Engineering degrees.

Students plan their course schedules in consultation with the George R. Brown School of Engineering department in which they are enrolled and with the Jones Graduate School of Business Registrar Department. Coordinated degrees candidates can fulfill requirements for both degrees within 2 academic years.

For general university requirements, see Graduate Degrees (p. 49). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Candidates in the MBA/Master of Engineering coordinated degrees program must complete all requirements as listed for both degrees, and must apply and be accepted in both degree programs.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

2019-2020 General Announcements

PDF Generated 11/12/2019
Footnotes and Additional Information

1 To fulfill the remaining requirements for the coordinated MBA degree program, students must complete an additional 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 45 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) The second year of the program is dedicated entirely to MBA elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

Coordinated MME Degree Requirements

Students in the coordinated MBA/MME degrees program must complete the Core Requirements of the MME degree program (p. 560) and Coordinated MME Elective Requirements below.

Master of Business Administration (MBA) Degree / Master of Science in Bioscience and Health Policy (MSBHP) Degree

Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Program Learning Outcomes for the MSBHP Degree

Upon completing the MSBHP degree, students will be able to:

1. Become knowledgeable in current advanced bioscience and health policy topics affecting society.
2. Integrate science knowledge into policies and practices.
3. Demonstrate written, oral, and visual communication strategies required to work effectively across science, business, and government.

Requirements for the MBA/MSBHP Coordinated Degrees Program

Students may earn a coordinated MBA degree and a Master of Science degree from the Wiess School of Natural Sciences Professional Science Master’s (PSM) program in the following fields:

- Bioscience and Health Policy (MSBHP)
- Environmental Analysis (MSEA)
- Space Studies (MSSpS)
- Subsurface Geoscience (MSSG)

For the coordinated MBA/Master of Science degree from the Professional Science Master’s (PSM) program, students must complete:

- A minimum of 75 credit hours in approved coursework, including:
  - A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the Professional Science Master’s (PSM) degree requirements
  - A minimum of 30 credit hours in the corresponding science discipline
  - All PSM degree-specific requirements
  - A three to six month internship
- A minimum of 45 credit hours of business coursework
- All MBA core requirements, the global field experience, custom core requirements, and coordinated elective requirements

Students plan their course schedules in consultation with the Wiess School of Natural Sciences PSM program director and with the Jones Graduate School of Business Registrar Department. Coordinated degrees
candidates can fulfill requirements for both degrees within 3 academic years.

For general university requirements, see Graduate Degrees (p. 49). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Candidates in the MBA/Master of Science degree from the Professional Science Master's (PSM) program must complete all requirements as listed for both degrees, and must apply and be accepted in both degree programs.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Master of Business Administration (MBA) Degree / Master of Science in Environmental Analysis (MSEA) Degree

Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.
Program Learning Outcomes for the MSEA Degree

Upon completing the MSEA Degree, students will be able to:

1. Apply technical and analytical skills and scientific evaluation methods to help solve problems affecting the environment.
2. Demonstrate written, oral, and visual communication strategies required to work effectively across science, business, and government.
3. Possess business and management skills and professional ethics to be effective in a business environment.

Requirements for the MBA/MSEA Coordinated Degrees Program

Students may earn a coordinated MBA degree and a Master of Science degree from the Wiess School of Natural Sciences Professional Science Master’s (PSM) program in the following fields:

- Bioscience and Health Policy (MSBHP)
- Environmental Analysis (MSEA)
- Space Studies (MSSPS)
- Subsurface Geoscience (MSSG)

Master of Business Administration (MBA) Degree / Master of Science in Space Studies (MSSpS) Degree

Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Program Learning Outcomes for the MSSpS Degree

Upon completing the MSSpS Degree, students will be able to:

1. Achieve advanced science, engineering, and computational skills and a broad understanding of the methodologies applied in the space industry.
2. Gain real life experience in solving technical problems in a science and technology environment.
3. Develop business and communication skills to bridge the gap between science and business.

Requirements for the MBA/MSSpS Coordinated Degrees Program

Master of Business Administration (MBA) Degree / Master of Statistics (MStat) Degree

Program Learning Outcomes for the MBA Degree
Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Program Learning Outcomes for the MStat Degree
Upon completing the MStat degree, students will be able to:

1. Master fundamental theory in probability and statistics.
2. Become familiar with a broad range of statistical methods for applications.
4. Develop effective communication skills as a professional statistician.

Requirements for the MBA/MStat Coordinated Degrees Program
Students may earn a coordinated MBA degree and a non-thesis Master of Engineering degree from the George R. Brown School of Engineering in the following fields:

- Chemical Engineering (MChE)
- Computational and Applied Mathematics (MCAAM)
- Computer Science (MCS)
- Industrial Engineering (MIE)
- Materials Science and Nanoengineering (MMSNE)
- Mechanical Engineering (MME)
- Statistics (MStat)

For the coordinated MBA/Master of Engineering degrees, students must complete:

- A minimum of 69 credit hours in approved coursework*, including:
  - A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the Master of Engineering degree requirements
  - A minimum of 24 credit hours in the corresponding engineering discipline
  - A minimum of 6 credit hours in elective requirements*
  - A minimum of 45 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the MBA degree requirements
  - A minimum of 45 credit hours of business coursework
  - All MBA core requirements, the global field experience, custom core requirements, and coordinated elective requirements

  *Note: A maximum of 6 credit hours of the Master of Engineering degree elective requirements may be selected from business course offerings (MGMP, MGMT, or MICO) and used to fulfill the requirements for both the MBA and the Master of Engineering degrees.

Students plan their course schedules in consultation with the George R. Brown School of Engineering department in which they are enrolled and with the Jones Graduate School of Business Registrar Department. Coordinated degrees candidates can fulfill requirements for both degrees within 2 academic years.

For general university requirements, see Graduate Degrees (p. 49). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Candidates in the MBA/Master of Engineering coordinated degrees program must complete all requirements as listed for both degrees, and must apply and be accepted in both degree programs.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Coordinated MBA Degree Requirements
Students in the coordinated MBA/Master of Engineering degrees program or in the coordinated MBA/Master of Science degree from the Professional Science Master's (PSM) degrees program must complete the Core Requirements, Global Field Experience, and Custom Core Requirements of the full-time MBA degree program (p. 214) and the Coordinated MBA Elective Requirements below.
Master of Business Administration (MBA) Degree, Executive Program

Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MBA Degree, Executive Program

The MBA degree is a non-thesis master’s degree. For general university requirements, please see Non-Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the Executive MBA degree must complete:

- A minimum of 54 credit hours to satisfy degree requirements.
- A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
- A minimum overall GPA of 3.00 or higher in all Rice coursework.
- A minimum overall GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master’s degree with a minimum grade of C (2.00 grade points) in each course.

The program is a lock-step progression in which students take required courses in sequence. The program includes four 5-day intensive executive forums that focus on leadership, strategy, critical decision-making and global management.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Footnotes and Additional Information

1 To fulfill the remaining requirements for the coordinated MBA degree program, students must complete an additional 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 45 total credit hours.

Policies for the MBA/MStat Coordinated Degrees Program

Additional Information

For additional information on these two degrees:

1. Please see the Jones Graduate School of Business website: https://business.rice.edu/
2. Please see the Statistics website: https://statistics.rice.edu/

Opportunities for the MBA/MStat Coordinated Degrees Program

Additional Information

For additional information on these two degrees:

1. Please see the Jones Graduate School of Business website: https://business.rice.edu/
2. Please see the Statistics website: https://statistics.rice.edu/
is limited to those who have performed with distinction across all areas of the application. A bachelor’s degree (or equivalent) from an accredited undergraduate institution is required. All applicants submit an interview as part of their admission requirements.

All applicants to the MBA degree program must submit the following:

- an online application and application fee
- scores from the Graduate Management Admission Test (GMAT), the Graduate Record Examination (GRE),* or the Executive Assessment (EA)**
- transcripts from all previously-attended and/or degree-granting institutions
- resume with complete work history
- essays
- letter(s) of recommendation

Notes:

*Scores from the TOEFL, PTE, or IELTS are also required for international applicants, whose undergraduate degree was from an institution where the primary language of instruction was not English.

**The Executive Assessment (EA) is only accepted for MBA Degree, Executive Program applicants.

Executive MBA Degree Program

In addition to meeting the standards for admission to the other MBA programs, students admitted to the Executive MBA degree program typically have between 15-20 years of relevant work experience with 10 of those being at the management level.

Academic and Professional Standards

Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MBA program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

Academic Standards

A minimum overall grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university, but outside the JGBS) are counted in the overall grade point average calculation.

Students with an overall grade point average lower than 3.00 at the end of any semester will be notified of academic standing. Students not meeting the 3.00 requirement will be provided specific instruction and guidance on the next steps specific to their academic situation. In some cases, students may submit an appeal to the JGBS Academic Standards Committee, requesting to be placed on academic probation. The committee reviews all academic cases, and may consult the dean’s office for counsel and/or suggestions on proposed handling of the case. The committee decides, based on the circumstances of the appeal, whether the student may resume studies on academic probation; is to be academically suspended for one semester or an academic year; or is to be dismissed from the MBA program.

Students proposing to return after a period of academic suspension must follow the appropriate procedures outlined in the General Announcements by the Office of Graduate and Postdoctoral Studies to receive permission to be readmitted. If permitted to return, the student...
will pay the current rate of tuition, based upon the class of students s/he is joining.

Only courses in which a grade of C or above is earned will be counted for credit toward graduation. If students receive a grade below C in a course required for graduation, they must repeat the course. If students receive a grade lower than C in an elective course, they need not repeat the specific course, but they must make up the credit hours. If the required course is not offered again prior to graduation, the student will be permitted to take the course the following academic year, but will be charged the current pro-rated tuition for the program in which the additional coursework is completed.

Students on academic probation must complete all future courses with a grade of C or above and may be considered candidates for student offices by permission only. Students are removed from probation only upon achieving an overall grade point average of at least 3.00.

JGSB students may not take courses pass/fail to count toward their degree requirements. JGSB students may audit courses with departmental and professor approval. The courses will not count toward the MBA, but will appear on the transcript.

Professional Standards
MBA students are held to the highest standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct (p. 82). The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing specific charges. This probationary notice, however, is not required as a precondition for filing specific charges.

Class Attendance Policy
Students are expected to be in class on the first day of each term. The instructor reserves the right to exclude a student from their course who is absent on the first day. Students should refer to the specific attendance policy for each program. This information can be found in the Jones Graduate School of Business Student Handbook, which is referenced below. For special circumstances, students should see the Director of Advising in the Student Program Office and the instructor.

Guidelines for Appealing Academic Dismissal
The Process
A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.

Timing
If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

Appeals
Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

Confidentiality
The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

Grade Appeal Process
Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.
2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).
6. Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.
7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.

MBA Elective Course Add/Drop Policy and Procedures
Due to the unique term schedule followed by the Jones Graduate School of Business MBA programs, MBA students have special procedures they must follow to make schedule changes. The Jones Graduate School of Business Registrar Department administers an add/drop policy which allows students to add/drop elective courses at various times throughout the semester. For all elective courses, student may not add/drop a course after the deadline for the appropriate term.
Withdrawal Policy
A Jones Graduate School of Business student, participating in any offered program, may voluntarily withdraw from school at any time. Upon withdrawal, Rice University applies a sliding scale to tuition, which is noted in the university’s Academic Calendar posted on the Rice Office of the Registrar website (https://registrar.rice.edu/calendars/).

JONES GRADUATE SCHOOL OF BUSINESS STUDENT HANDBOOK
Generally, the Jones Graduate School of Business adheres to the academic regulations of Rice University. However, the Jones Graduate School of Business MBA program has unique policies and procedures that vary from the Office of Graduate and Postdoctoral Studies regarding, but not limited to, leave of absence, withdrawals and readmission, add/drop, and academic dismissal. A copy of the handbook is available on Campus Groups.

Financial Aid
Jones Graduate School of Business scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded one academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (i.e. scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

Additional Information
For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Opportunities for the MBA Degree, Executive Program
Independent Study
Minimum Hours Requirement
Each credit of independent study should contain approximately as much time content as a one-credit course at Jones Graduate School of Business, which is 12 hours of class time, plus an average of at least 24–36 outside-class hours, for a minimum total of 36–48 hours of work. Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 credit. 3.0 credit independent study projects are rarely approved. Occasionally, a group independent study project may arise, though most independent studies are undertaken by individual students.

The number of credits for an independent study must be determined at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the Jones Graduate School of Business associate registrar must be approved by the Academic Standards Committee. The committee will rely on input from sponsoring faculty in making its decision about ex post credit increases. Requests to increase the number of project credit hours must be made before the end of the second week of classes in the term in which the project begins.

Restrictions
No student may take more than three credit hours of independent study during the course of the MBA program without the approval of the Academic Standards Committee. If an independent study is proposed that would cause a student to exceed the 3.0 credit limit, the Academic Standards Committee will select two faculty members, other than the faculty member who will supervise the project, within the area most closely related to the study’s academic content to review and approve the study. Independent study exceeding 3.0 credits in total should consider current policies restricting use of independent study as well as the incremental value of additional independent study in light of past independent studies. If the study does not align with any of the Jones Graduate School of Business academic groups, the Academic Standards Committee will perform the review and make the final approval decision.

Independent study projects are for academic credit, not for hire. Students may not earn credit for paid work.

Faculty Sponsorship
Independent study projects normally are sponsored only by full-time Jones Graduate School of Business faculty; faculty typically sponsor projects only in their area of expertise. Students wanting sponsorship by a part-time faculty member must submit a project overview to the Academic Standards Committee and obtain the committee’s approval before the term in which the project is to begin.

Common Requirements
The goal of independent study projects is to advance or deepen a student’s knowledge or competency in a business discipline or activity. To facilitate these goals, independent study projects generally fall into two broad categories:

1. directed reading and study resulting in a research paper, or
2. an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the “deliverable.”

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, to ensure relatively equal workloads per unit of independent study credit and some common requirements across independent study projects, students and/or sponsoring faculty should:

1. Prepare and submit to the Jones Graduate School of Business associate registrar an overview of the independent study project with number of project credits, anticipated final results, and a broad timeline of anticipated project milestones.
2. Meet to discuss the project, after the initial agreement on the project scope, at least once every two to three weeks.
3. Prepare a final paper (in the case of directed reading and research projects) or complete a concrete deliverable (for example, computer program, survey results, empirical analyses, etc) together with an executive summary of the project (in the case of experiential projects).
4. File a copy of each student’s final paper, or executive summary, with the Jones Graduate School of Business associate registrar.

Applications
Independent study applications are available for interested students on Campus Groups. Completed independent study applications must be approved by the senior associate dean of academic affairs. Completed and approved applications are due to the Jones Graduate School of Business associate registrar by the first week of the term in which the project will be completed. The student will be registered for MGMT 700/MGMT 800 independent study for the appropriate credit amount, only when the appropriate permissions have been obtained.
Additional Information
For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Master of Business Administration (MBA) Degree, Full-Time Program

Program Learning Outcomes for the MBA Degree
Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MBA Degree, Full-Time Program
The MBA degree is a non-thesis master's degree. For general university requirements, please see Non-Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the full-time MBA degree program must complete:

- A minimum of 60 credit hours to satisfy degree requirements.
- A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
- A Global Field Experience (during the first year of enrollment in the degree program).
- A maximum of 6 credit hours from graduate-level coursework as transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab. Information regarding Exchange Program transfer credit can be found in the Student Handbook under Campus Groups.
- A minimum overall GPA of 3.00 or higher in all Rice coursework.
- A minimum overall GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree with a minimum grade of C (2.00 grade points) in each course.

Students who register for a standard course load of 9-18 credit hours per semester are considered full-time students. All registration and elective selection via add/drop is completed online through ESTHER (https://esther.rice.edu/). It is the responsibility of the student to monitor and maintain his or her schedule and academic record.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Footnotes and Additional Information
1 The first year of the program is primarily dedicated to core courses in the basic functional areas of business.
Major Concentrations: MBA Degree, Full-Time Program

The Rice MBA program at the Jones Graduate School of Business offers major concentrations to students enrolled in the full-time MBA program. The goal of a major concentration is to provide students with the ability to demonstrate functional, professional, or industry expertise in a particular area of interest within a general management program. Major concentrations are revised annually and students are encouraged to contact the Jones Graduate School associate registrar for additional information.

Students have the option of selecting up to 2 functional or professional major concentrations. Completing a major concentration is not required to complete the requirements for the MBA degree; it is optional. Students must officially declare the major concentration through the Jones Graduate School of Business associate registrar.

Major concentrations typically consist of 9 to 12 credit hours of course work. If a student completes 2 concentrations, a maximum of 3 credit hours can be shared between the 2 concentrations. Similarly, a custom core course listed in the Core Requirements above can be counted toward the completion of a concentration only if the student has taken 3.0 credit hours of custom core which can be counted toward the custom core requirement. Specific concentration requirements for the academic year are available on Campus Groups. Students should know that the classes listed will likely not be offered each semester, and that the course offerings are subject to change. Students should see courses.rice.edu (http://courses.rice.edu) to review the course offerings each semester.

Major Concentration: Accounting

The major concentration in Accounting provides a broad understanding of the use and importance of accounting information to decision makers within the firm and to external users of financial statements. The core financial and management accounting courses provide a basic understanding of accounting principles. Completion of the concentration in accounting will serve to reinforce the fundamental concepts for the core, to provide additional insight into accounting processes and principles, and to enhance the ability to analyze and interpret accounting reports.

Major Concentration: Energy

The major concentration in Energy provides commercial acumen and leadership perspective to students with a technical background and develops their capability for taking additional responsibilities and higher-level management roles at companies in the energy sector. This is accomplished by engaging students in a curriculum that addresses three distinct, but inter-related, career paths which are widely regarded as conduits to leadership positions in energy industry midstream and upstream organizations: finance, operations, and product/customer focus.

Major Concentration: Entrepreneurship

The major concentration in Entrepreneurship provides students a framework for being an entrepreneur. The required courses equip students with the tools and processes for starting a business. The remaining courses allow students to select specific entrepreneurial topics suited to their objectives.

Major Concentration: Finance

The major concentration in Finance provides students with a broad foundation in financial management principles and an opportunity for further specialization. Students are required to complete the primary finance electives in the MBA program and Financial Statement Analysis. Students supplement these foundational courses with at least two specialized courses from a list of approved offerings.

Major Concentration: Health Care

The focus of the major concentration in Health Care is to provide students with an understanding of how management principles are interpreted and applied in the different inter-locking sectors (providers, hospitals/small practices, payers, pharmaceutical, biotechnology) of the health care industry, and how the different dynamics in these sectors make it uniquely health care.

Major Concentration: Marketing

The major concentration in Marketing prepares students for careers in strategic marketing across a wide range of organizations, markets and industries. It provides critical knowledge for understanding and analyzing customers, and emphasizes the development of requisite quantitative and conceptual skills to contribute to the firm’s overall success. Among the career trajectories for which students will be prepared are product management, customer analytics and customer insights, and management consulting.
Major Concentration: Operations Management
The major concentration in Operations Management presents students with a framework for design, planning, control, coordination, and improvement of business processes, systems, and resources essential to meet consumers’ needs. Instead of the technical engineering view of operations, the focus is on managing the business well.

Major Concentration: Real Estate
The major concentration in Real Estate prepares students for a career in the real estate industry. The required course introduces a series of basic business concepts commonly used in the real estate industry, and it covers in detail the application of the discounted cash flow model to real estate decisions. The elective courses provide for both a depth and breadth of understanding of the industry.

Major Concentration: Strategic Management
The major concentration in Strategic Management prepares students for careers in strategic planning, management consulting, and global business management across a variety of industries such as health care, energy, high technologies, consumer products, and professional services. It provides knowledge and analytic tools for students to understand why some companies are financially much more successful than others and to analyze how executives (at different levels) can devise a set of strategies and design processes that allow companies to achieve competitive advantage.

Policies for the MBA Degree Programs

MBA Admission Requirements
Admission to the MBA degree program is open to students regardless of their undergraduate major, but the program is highly selective and access is limited to those who have performed with distinction across all areas of the application. A bachelor’s degree (or equivalent) from an accredited undergraduate institution is required. All applicants submit an interview as part of their admission requirements.

All applicants to the MBA degree program must submit the following:

- an online application and application fee
- scores from the Graduate Management Admission Test (GMAT), the Graduate Record Examination (GRE),* or the Executive Assessment (EA)**
- transcripts from all previously-attended and/or degree-granting institutions
- resume with complete work history
- essays
- letter(s) of recommendation

Notes:
*Scores from the TOEFL, PTE, or IELTS are also required for international applicants, whose undergraduate degree was from an institution where the primary language of instruction was not English.

**The Executive Assessment (EA) is only accepted for MBA Degree, Executive Program applicants.

MBA/Master of Engineering Program
To enter this coordinated degree program, applicants apply separately and be accepted by both the Jones Graduate School of Business and the engineering department in which they wish to pursue graduate study. The program requires the Jones Graduate School of Business application, one letter of recommendation, if it is from the applicant’s direct supervisor, (otherwise two letters of recommendation), and the GMAT or GRE.

MBA/Professional Science Master’s Program
To enter this coordinated degree program, applicants must be accepted by both the Jones Graduate School of Business and one of the following Weiss School of Natural Sciences Professional Science Master’s (PSM) programs: Environmental Analysis, Nanoscale Science, Space Studies or, Subsurface Geoscience. The program requires the Jones Graduate School of Business application, one letter of recommendations if from the applicant’s direct supervisor (otherwise two letters of recommendation are required), and the GMAT or GRE.

MBA/Doctor of Medicine (MD) Program
To enter this coordinated degree program, applicants must first be accepted by Baylor College of Medicine and apply separately to the Jones Graduate School of Business. The MCAT is accepted rather than the GMAT or GRE, but the GMAT is required for scholarship consideration.

Three years of medical school are required before starting MBA classes.

Academic and Professional Standards
Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MBA program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

Academic Standards
A minimum overall grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university, but outside the JGSB) are counted in the overall grade point average calculation.

Students with an overall grade point average lower than 3.00 at the end of any semester will be notified of academic standing. Students not meeting the 3.00 requirement will be provided specific instruction and guidance on the next steps specific to their academic situation. In some cases, students may submit an appeal to the JGSB Academic Standards Committee, requesting to be placed on academic probation. The committee reviews all academic cases, and may consult the dean’s office for counsel and/or suggestions on proposed handling of the case. The committee will decide, based on the circumstances of the appeal, whether the student may resume studies on academic probation; is to be academically suspended for one semester or an academic year; or is to be dismissed from the MBA program.

Students proposing to return after a period of academic suspension must follow the appropriate procedures outlined in the General Announcements by the Office of Graduate and Postdoctoral Studies to receive permission to be readmitted. If permitted to return, the student will pay the current rate of tuition, based upon the class of students s/he is joining.

Only courses in which a grade of C or above is earned will be counted for credit toward graduation. If students receive a grade below C in a course required for graduation, they must repeat the course. If students receive a grade lower than C in an elective course, they need not repeat the specific course, but they must make up the credit hours. If the required course is not offered again prior to graduation, the student will be permitted to take the course the following academic year, but will be charged the current pro-rated tuition for the program in which the additional coursework is completed.
Students on academic probation must complete all future courses with a grade of C or above and may be considered candidates for student offices by permission only. Students are removed from probation only upon achieving an overall grade point average of at least 3.00.

JGSB students may not take courses pass/fail to count toward their degree requirements. JGSB students may audit courses with departmental and professor approval. The courses will not count toward the MBA, but will appear on the transcript.

Professional Standards
MBA students are held to the highest standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct (p. 82). The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing specific charges. This probationary notice, however, is not required as a precondition for filing specific charges.

Class Attendance Policy
Students are expected to be in class on the first day of each term. The instructor reserves the right to exclude a student from their course who is absent on the first day. Students should refer to the specific attendance policy for each program. This information can be found in the Jones Graduate School of Business Student Handbook, which is referenced below. For special circumstances, students should see the Director of Advising in the Student Program Office and the instructor.

Guidelines for Appealing Academic Dismissal
The Process
A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.

Timing
If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

Appeals
Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

Confidentiality
The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

Grade Appeal Process
Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.
2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).
6. Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.
7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.

The Family Educational Rights and Privacy Act of 1974 and amendments govern records of these actions.

MBA Elective Course Add/Drop Policy and Procedures
Due to the unique term schedule followed by the Jones Graduate School of Business MBA programs, MBA students have special procedures they must follow to make schedule changes. The Jones Graduate School of Business Registrar Department administers an add/drop policy which allows students to add/drop elective courses at various times throughout the semester. For all elective courses, student may not add/drop a course after the deadline for the appropriate term.

Withdrawal Policy
A Jones Graduate School of Business student, participating in any offered program, may voluntarily withdraw from school at any time. Upon withdrawal, Rice University applies a sliding scale to tuition, which is noted in the university’s Academic Calendar posted on the Rice Office of the Registrar website (https://registrar.rice.edu/calendars/).

Jones Graduate School of Business Student Handbook
Generally, the Jones Graduate School of Business adheres to the academic regulations of Rice University. However, the Jones Graduate School of Business MBA program has unique policies and procedures.
that vary from the Office of Graduate and Postdoctoral Studies regarding, but not limited to, leave of absence, withdrawals and readmission, add/drop, and academic dismissal. A copy of the handbook is available on Campus Groups.

**Financial Aid**

Jones Graduate School of Business scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded one academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (i.e. scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

**Additional Information**

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

**Opportunities for the MBA Degree Programs**

**Independent Study**

**Minimum Hours Requirement**

Each credit of independent study should contain approximately as much time content as a one-credit course at Jones Graduate School of Business, which is 12 hours of class time, plus an average of at least 24–36 outside-class hours, for a minimum total of 36–48 hours of work. Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 credit hours; 3.0 credit independent study projects are rarely approved. Occasionally, a group independent study project may arise, though most independent studies are undertaken by individual students.

The number of credits for an independent study must be determined at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the Jones Graduate School of Business associate registrar must be approved by the Academic Standards Committee. The committee will rely on input from sponsoring faculty in making its decision about ex post credit increases. Requests to increase the number of project credit hours must be made before the end of the second week of classes in the term in which the project begins.

**Restrictions**

No student may take more than three credit hours of independent study during the course of the MBA program without the approval of the Academic Standards Committee. If an independent study is proposed that would cause a student to exceed the 3.0 credit limit, the Academic Standards Committee will select two faculty members, other than the faculty member who will supervise the project, within the area most closely related to the study’s academic content to review and approve the study. Independent study exceeding 3.0 credits in total should consider current policies restricting use of independent study as well as the incremental value of additional independent study in light of past independent studies. If the study does not align with any of the Jones Graduate School of Business academic groups, the Academic Standards Committee will perform the review and make the final approval decision.

Independent study projects are for academic credit, not for hire. Students may not earn credit for paid work.

**Faculty Sponsorship**

Independent study projects normally are sponsored only by full-time Jones Graduate School of Business faculty; faculty typically sponsor projects only in their area of expertise. Students wanting sponsorship by a part-time faculty member must submit a project overview to the Academic Standards Committee and obtain the committee’s approval before the term in which the project is to begin.

**Common Requirements**

The goal of independent study projects is to advance or deepen a student’s knowledge or competency in a business discipline or activity. To facilitate these goals, independent study projects generally fall into two broad categories:

1. directed reading and study resulting in a research paper, or
2. an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the “deliverable.”

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, to ensure relatively equal workloads per unit of independent study credit and some common requirements across independent study projects, students and/or sponsoring faculty should:

1. Prepare and submit to the Jones Graduate School of Business associate registrar an overview of the independent study project with number of project credits, anticipated final results, and a broad timeline of anticipated project milestones.
2. Meet to discuss the project, after the initial agreement on the project scope, at least once every two to three weeks.
3. Prepare a final paper (in the case of directed reading and research projects) or complete a concrete deliverable (for example, computer program, survey results, empirical analyses, etc.) together with an executive summary of the project (in the case of experiential projects).
4. File a copy of each student’s final paper, or executive summary, with the Jones Graduate School of Business associate registrar.

**Applications**

Independent study applications are available for interested students on Campus Groups. Completed independent study applications must be approved by the senior associate dean of academic affairs. Completed and approved applications are due to the Jones Graduate School of Business associate registrar by the first week of the term in which the project will be completed. The student will be registered for MGMT 700/MGMT 800 independent study for the appropriate credit amount, only when the appropriate permissions have been obtained.

**Additional Information**

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

**Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Accounting**
Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MBA Degree, Full-Time Program

The MBA degree is a non-thesis master’s degree. For general university requirements, please see Non-Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the full-time MBA degree program must complete:

- A minimum of 60 credit hours to satisfy degree requirements.
- A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
- A Global Field Experience (during the first year of enrollment in the degree program).
- A maximum of 6 credit hours from graduate-level coursework as transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab. Information regarding Exchange Program transfer credit can be found in the Student Handbook under Campus Groups.
- A minimum overall GPA of 3.00 or higher in all Rice coursework.
- A minimum overall GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master’s degree with a minimum grade of C (2.00 grade points) in each course.

Students who register for a standard course load of 9-18 credit hours per semester are considered full-time students. All registration and elective selection via add/drop is completed online through ESTHER (https://esther.rice.edu/). It is the responsibility of the student to monitor and maintain his or her schedule and academic record.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

### Total Credit Hours

60

### Footnotes and Additional Information

¹ The first year of the program is primarily dedicated to core courses in the basic functional areas of business.

² MGMT 594, MGMT 596, MGMT 710, and MGMT 711 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.
Students participate in a required global field experience during the first year of enrollment in the degree program. Additional costs apply towards this global experience.

The custom core courses are taken during the second semester of the first year.

To fulfill the remaining requirements for the full-time MBA degree program, students must complete an additional 27-30 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 60 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) Students take two elective courses during the spring semester of the first year. The second year of the program is dedicated entirely to elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. If students wish to apply courses that are offered outside of the Jones Graduate School of Business (MGMP, MGMT, or MICO course offerings), the student must obtain permission from the Jones Graduate School associate registrar. Electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

Students in the coordinated MBA/Master of Science degree program. For students in those coordinated programs, the Elective Requirements are 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach the total of 45 credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) The second year of the program is dedicated entirely to MBA elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

Major Concentration: Accounting
The major concentration in Accounting provides a broad understanding of the use and importance of accounting information to decision makers within the firm and to external users of financial statements. The core financial and management accounting courses provide a basic understanding of accounting principles. Completion of the concentration in accounting will serve to reinforce the fundamental concepts for the core, to provide additional insight into accounting processes and principles, and to enhance the ability to analyze and interpret accounting reports.

Students pursuing the major concentration in Accounting must complete:

- A minimum of 9 credit hours as listed below to satisfy major concentration requirements*

Total Credit Hours 9

Footnotes and Additional Information
* The courses listed are approved to satisfy the requirements for the Accounting concentration for the current academic year only. Courses not on this official list may be substituted upon approval of the Jones Graduate School of Business Associate Registrar. Students and their academic advisors should identify and clearly document the courses to be taken with the Jones Graduate School of Business Associate Registrar.

1 Contact the Jones Graduate School of Business Registrar Department to determine if Master of Accounting (MAcc) electives open to MBA student enrollment can be counted towards this concentration.

2 MGMT 503 only counts towards the concentration if it is not used to satisfy the Custom Core requirement.

Policies for the MBA Degree Programs
MBA Admission Requirements
Applicants to the MBA programs must submit scores on the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). International applicants, who did not earn an undergraduate degree from an institution where the primary language of instruction was English must submit a valid score report from either TOEFL, PTE, or IELTS. Admission to the MBA programs is open to students regardless of their undergraduate major, but it is highly selective and limited to those who have performed with distinction in their previous academic work and on the GMAT or GRE.

Academic and Professional Standards
Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MBA program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

Academic Standards
A minimum overall grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university, but outside the JGSB) are counted in the overall grade point average calculation.
Guidelines for Appealing Academic Dismissal

The Process

A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.

Timing

If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

Appeals

Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

Confidentiality

The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

Grade Appeal Process

Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.
2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).

Class Attendance Policy

Students are expected to be in class on the first day of each term. The instructor reserves the right to exclude a student from their course who is absent on the first day. Students should refer to the specific attendance policy for each program. This information can be found in the Jones Graduate School of Business Student Handbook, which is referenced below. For special circumstances, students should see the Director of Advising in the Student Program Office and the instructor.
Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 credit hours; 3.0 credit independent study projects are rarely approved. Occasionally, a group independent study project may arise, though most independent studies are undertaken by individual students.

The number of credits for an independent study must be determined at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the Jones Graduate School of Business associate registrar must be approved by the Academic Standards Committee. The committee will rely on input from sponsoring faculty in making its decision about ex post credit increases. Requests to increase the number of project credit hours must be made before the end of the second week of classes in the term in which the project begins.

**Restrictions**

No student may take more than three credit hours of independent study during the course of the MBA program without the approval of the Academic Standards Committee. If an independent study is proposed that would cause a student to exceed the 3.0 credit limit, the Academic Standards Committee will select two faculty members, other than the faculty member who will supervise the project, within the area most closely related to the study’s academic content to review and approve the study. Independent study exceeding 3.0 credits in total should consider current policies restricting use of independent study as well as the incremental value of additional independent study in light of past independent studies. If the study does not align with any of the Jones Graduate School of Business academic groups, the Academic Standards Committee will perform the review and make the final approval decision.

Independent study projects are for academic credit, not for hire. Students may not earn credit for paid work.

**Faculty Sponsorship**

Independent study projects normally are sponsored only by full-time Jones Graduate School of Business faculty; faculty typically sponsor projects only in their area of expertise. Students wanting sponsorship by a part-time faculty member must submit a project overview to the Academic Standards Committee and obtain the committee's approval before the term in which the project is to begin.

**Common Requirements**

The goal of independent study projects is to advance or deepen a student's knowledge or competency in a business discipline or activity. To facilitate these goals, independent study projects generally fall into two broad categories:

1. directed reading and study resulting in a research paper, or
2. an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the “deliverable.”

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, to ensure relatively equal workloads per unit of independent study credit and some common requirements across independent study projects, students and/or sponsoring faculty should:

1. Prepare and submit to the Jones Graduate School of Business associate registrar an overview of the independent study project with number of project credits, anticipated final results, and a broad timeline of anticipated project milestones.
2. Meet to discuss the project, after the initial agreement on the project scope, at least once every two to three weeks.
3. Prepare a final paper (in the case of directed reading and research projects) or complete a concrete deliverable (for example, computer program, survey results, empirical analyses, etc.) together with an executive summary of the project (in the case of experiential projects).

4. File a copy of each student’s final paper, or executive summary, with the Jones Graduate School of Business associate registrar.

Applications
Independent study applications are available for interested students on Campus Groups. Completed independent study applications must be approved by the senior associate dean of academic affairs. Completed and approved applications are due to the Jones Graduate School of Business associate registrar by the first week of the term in which the project will be completed. The student will be registered for MGMT 700/MGMT 800 independent study for the appropriate credit amount, only when the appropriate permissions have been obtained.

Additional Information
For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Energy

Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.

2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.

3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MBA Degree, Full-Time Program

The MBA degree is a non-thesis master’s degree. For general university requirements, please see Non-Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for full-time graduate students, please see All Graduate Students (p. 55). Students pursuing the full-time MBA degree program must complete:

- A minimum of 60 credit hours to satisfy degree requirements.
- A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
- A Global Field Experience (during the first year of enrollment in the degree program).
- A maximum of 6 credit hours from graduate-level coursework as transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab. Information regarding Exchange Program transfer credit can be found in the Student Handbook under Campus Groups.
- A minimum overall GPA of 3.00 or higher in all Rice coursework.
- A minimum overall GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master’s degree with a minimum grade of C (2.00 grade points) in each course.

Students who register for a standard course load of 9-18 credit hours per semester are considered full-time students. All registration and elective selection via add/drop is completed online through ESTHER (https://esther.rice.edu/). It is the responsibility of the student to monitor and maintain his or her schedule and academic record.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the program or department’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Elective Requirements

Select an additional 27-30 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 60 total credit hours.

Total Credit Hours 60

Footnotes and Additional Information

1. The first year of the program is primarily dedicated to core courses in the basic functional areas of business.
2. MGMT 594, MGMT 596, MGMT 710, and MGMT 711 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.
3. Students participate in a required global field experience during the first year of enrollment in the degree program. Additional costs apply towards this global experience.
4. The custom core courses are taken during the second semester of the first year.
5. To fulfill the remaining requirements for the full-time MBA degree program, students must complete an additional 27-30 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 60 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) Students take two elective courses during the spring semester of the first year. The second year of the program is dedicated entirely to elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. If students wish to apply courses that are offered outside of the Jones Graduate School of Business (MGMP, MGMT, or MICO course offerings), the student must obtain permission from the Jones Graduate School of Business Associate Registrar. Electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.
6. Students in the coordinated MBA/Master of Science degree from the PSM (professional science master’s) program or in the coordinated MBA/Master of Engineering degree program must complete the Core Requirements, Global Field Experience, and Custom Core Requirements as listed above for the full-time MBA degree program. For students in those coordinated programs, the Elective Requirements are 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach the total of 45 credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) The second year of the program is dedicated entirely to MBA elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

Major Concentration: Energy

The major concentration in Energy provides commercial acumen and leadership perspective to students with a technical background and develops their capability for taking additional responsibilities and higher-level management roles at companies in the energy sector. This is accomplished by engaging students in a curriculum that addresses three distinct, but inter-related, career paths which are widely regarded as conduits to leadership positions in energy industry midstream and upstream organizations: finance, operations, and product/customer focus.

Students pursuing the major concentration in Energy must complete:

- A minimum of 9 credit hours as listed below to satisfy major concentration requirements:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Footnotes and Additional Information

- The courses listed are approved to satisfy the requirements for the Energy concentration for the current academic year only. Courses not on this official list may be substituted upon approval of the Jones Graduate School of Business Associate Registrar. Students and their academic advisors should identify and clearly document the courses to be taken with the Jones Graduate School of Business Associate Registrar.

- Students may complete Integrative Course Offerings as substitutes for the credit hours required as Foundational, Environment, or Application and Context coursework. These courses include: MGMT 604, MICO 602, MICO 603, or MICO 605.
Policies for the MBA Degree Programs

MBA Admission Requirements

Applicants to the MBA programs must submit scores on the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). International applicants, who did not earn an undergraduate degree from an institution where the primary language of instruction was English must submit a valid score report from either TOEFL, PTE, or IELTS. Admission to the MBA programs is open to students regardless of their undergraduate major, but it is highly selective and limited to those who have performed with distinction in their previous academic work and on the GMAT or GRE.

Academic and Professional Standards

Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MBA program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

Academic Standards

A minimum overall grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university, but outside the JGSB) are counted in the overall grade point average calculation.

Students with an overall grade point average lower than 3.00 at the end of any semester will be notified of academic standing. Students not meeting the 3.00 requirement will be provided specific instruction and guidance on the next steps specific to their academic situation. In some cases, students may submit an appeal to the JGSB Academic Standards Committee, requesting to be placed on academic probation. The committee reviews all academic cases, and may consult the dean’s office for counsel and/or suggestions on proposed handling of the case. The committee will decide, based on the circumstances of the appeal, whether the student may resume studies on academic probation; is to be academically suspended for one semester or an academic year; or is to be dismissed from the MBA program.

Students proposing to return after a period of academic suspension must follow the appropriate procedures outlined in the General Announcements by the Office of Graduate and Postdoctoral Studies to receive permission to be readmitted. If permitted to return, the student will pay the current rate of tuition, based upon the class of students s/he is joining.

Only courses in which a grade of C or above is earned will be counted for credit toward graduation. If students receive a grade below C in a course required for graduation, they must repeat the course. If students receive a grade lower than C in an elective course, they need not repeat the specific course, but they must make up the credit hours. If the required course is not offered again prior to graduation, the student will be permitted to take the course the following academic year, but will be charged the current pro-rated tuition for the program in which the additional coursework is completed.

Students on academic probation must complete all future courses with a grade of C or above and may be considered candidates for student offices by permission only. Students are removed from probation only upon achieving an overall grade point average of at least 3.00.

JGSB students may not take courses pass/fail to count toward their degree requirements. JGSB students may audit courses with departmental and professor approval. The courses will not count toward the MBA, but will appear on the transcript.

Professional Standards

MBA students are held to the highest standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct (p. 82). The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing specific charges. This probationary notice, however, is not required as a precondition for filing specific charges.

Class Attendance Policy

Students are expected to be in class on the first day of each term. The instructor reserves the right to exclude a student from their course who is absent on the first day. Students should refer to the specific attendance policy for each program. This information can be found in the Jones Graduate School of Business Student Handbook, which is referenced below. For special circumstances, students should see the Director of Advising in the Student Program Office and the instructor.

Guidelines for Appealing Academic Dismissal

The Process

A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.

Timing

If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

Appeals

Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

Confidentiality

The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

Grade Appeal Process

Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than
calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.
2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).
6. Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.
7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.

The Family Educational Rights and Privacy Act of 1974 and amendments govern records of these actions.

**MBA Elective Course Add/Drop Policy and Procedures**

Due to the unique term schedule followed by the Jones Graduate School of Business MBA programs, MBA students have special procedures they must follow to make schedule changes. The Jones Graduate School of Business Registrar Department administers an add/drop policy which allows students to add/drop elective courses at various times throughout the semester. For all elective courses, student may not add/drop a course after the deadline for the appropriate term.

**Withdrawal Policy**

A Jones Graduate School of Business student, participating in any offered program, may voluntarily withdraw from school at any time. Upon withdrawal, Rice University applies a sliding scale to tuition, which is noted in the university's Academic Calendar posted on the Rice Office of the Registrar website (https://registrar.rice.edu/calendars/).

**Jones Graduate School of Business Student Handbook**

Generally, the Jones Graduate School of Business adheres to the academic regulations of Rice University. However, the Jones Graduate School of Business MBA program has unique policies and procedures that vary from the Office of Graduate and Postdoctoral Studies regarding, but not limited to, leave of absence, withdrawals and readmission, add/drop, and academic dismissal. A copy of the handbook is available on Campus Groups.

**Financial Aid**

Jones Graduate School of Business scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded one academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (i.e. scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

**Additional Information**

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

**Opportunities for the MBA Degree Programs**

**Independent Study**

**Minimum Hours Requirement**

Each credit of independent study should contain approximately as much time content as a one-credit course at Jones Graduate School of Business, which is 12 hours of class time, plus an average of at least 24–36 outside-class hours, for a minimum total of 36–48 hours of work. Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 credit hours; 3.0 credit independent study projects are rarely approved. Occasionally, a group independent study project may arise, though most independent studies are undertaken by individual students.

The number of credits for an independent study must be determined at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the Jones Graduate School of Business associate registrar must be approved by the Academic Standards Committee. The committee will rely on input from sponsoring faculty in making its decision about ex post credit increases. Requests to increase the number of project credit hours must be made before the end of the second week of classes in the term in which the project begins.

**Restrictions**

No student may take more than three credit hours of independent study during the course of the MBA program without the approval of the Academic Standards Committee. If an independent study is proposed that would cause a student to exceed the 3.0 credit limit, the Academic Standards Committee will select two faculty members, other than the faculty member who will supervise the project, within the area most closely related to the study's academic content to review and approve the study. Independent study exceeding 3.0 credits in total should consider current policies restricting use of independent study as well as the incremental value of additional independent study in light of past independent studies. If the study does not align with any of the Jones Graduate School of Business academic groups, the Academic Standards Committee will perform the review and make the final approval decision.

Independent study projects are for academic credit, not for hire. Students may not earn credit for paid work.

**Faculty Sponsorship**

Independent study projects normally are sponsored only by full-time Jones Graduate School of Business faculty; faculty typically sponsor
projects only in their area of expertise. Students wanting sponsorship by a part-time faculty member must submit a project overview to the Academic Standards Committee and obtain the committee’s approval before the term in which the project is to begin.

Common Requirements
The goal of independent study projects is to advance or deepen a student’s knowledge or competency in a business discipline or activity.

To facilitate these goals, independent study projects generally fall into two broad categories:

1. directed reading and study resulting in a research paper, or
2. an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the “deliverable.”

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, to ensure relatively equal workloads per unit of independent study credit and some common requirements across independent study projects, students and/or sponsoring faculty should:

1. Prepare and submit to the Jones Graduate School of Business associate registrar an overview of the independent study project with number of project credits, anticipated final results, and a broad timeline of anticipated project milestones.
2. Meet to discuss the project, after the initial agreement on the project scope, at least once every two to three weeks.
3. Prepare a final paper (in the case of directed reading and research projects) or complete a concrete deliverable (for example, computer program, survey results, empirical analyses, etc.) together with an executive summary of the project (in the case of experiential projects).
4. File a copy of each student’s final paper, or executive summary, with the Jones Graduate School of Business associate registrar.

Applications
Independent study applications are available for interested students on Campus Groups. Completed independent study applications must be approved by the senior associate dean of academic affairs. Completed and approved applications are due to the Jones Graduate School of Business associate registrar by the first week of the term in which the project will be completed. The student will be registered for MGMT 700/MGMT 800 independent study for the appropriate credit amount, only when the appropriate permissions have been obtained.

Additional Information
For additional information, please see the Jones Graduate School of Business website: [https://business.rice.edu](https://business.rice.edu).

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Entrepreneurship

Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MBA Degree, Full-Time Program

The MBA degree is a non-thesis master's degree. For general university requirements, please see [Non-Thesis Master’s Degrees](https://p.68). For additional requirements, regulations, and procedures for all graduate programs, please see [All Graduate Students](https://p.55). Students pursuing the full-time MBA degree program must complete:

- A minimum of 60 credit hours to satisfy degree requirements.
- A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
- A Global Field Experience (during the first year of enrollment in the degree program).
- A maximum of 6 credit hours from graduate-level coursework as transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab. Information regarding Exchange Program transfer credit can be found in the Student Handbook under Campus Groups.
- A minimum overall GPA of 3.00 or higher in all Rice coursework.
- A minimum overall GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree with a minimum grade of C (2.00 grade points) in each course.

Students who register for a standard course load of 9-18 credit hours per semester are considered full-time students. All registration and elective selection via add/drop is completed online through [ESTHER](https://esther.rice.edu). It is the responsibility of the student to monitor and maintain his or her schedule and academic record.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s [Official Certifier](https://registrar.rice.edu/facstaff/degeworks/officialcertifier). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

**Custom Core Courses:** 

Select 2 courses from the following: 3-6

- MGMT 503 MANAGEMENT CONTROL
- MGMT 541 ECONOMIC ENVIRONMENT OF BUSINESS
- MGMT 561 BUSINESS-GOVERNMENT RELATIONS
- MGMT 599 ACTION LEARNING PROJECT
- MGMT 621 THE NEW ENTERPRISE
- MGMT 721 BUSINESS LAW

**Elective Requirements**

Select an additional 27-30 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 60 total credit hours. To fulfill the remaining requirements for the full-time MBA degree program, students must complete an additional 27-30 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 60 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) Students take two elective courses during the spring semester of the first year. The second year of the program is dedicated entirely to elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. If students wish to apply courses that are offered outside of the Jones Graduate School of Business (MGMP, MGMT, or MICO course offerings), the student must obtain permission from the Jones Graduate School associate registrar. Electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

**Global Field Experience Requirement**

MGMT 789 GLOBAL FIELD EXPERIENCE 3

To fulfill the remaining requirements for the full-time MBA degree program, students must complete an additional 27-30 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 60 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) Students take two elective courses during the spring semester of the first year. The second year of the program is dedicated entirely to elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. If students wish to apply courses that are offered outside of the Jones Graduate School of Business (MGMP, MGMT, or MICO course offerings), the student must obtain permission from the Jones Graduate School associate registrar. Electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

**Major Concentration: Entrepreneurship**

The major concentration in Entrepreneurship provides students a framework for being an entrepreneur. The required courses equip students with the tools and processes for starting a business. The remaining courses allow students to select specific entrepreneurial topics suited to their objectives.

Students pursuing the major concentration in Entrepreneurship must complete:

- A minimum of 12 credit hours as listed below to satisfy major concentration requirements*

**Footnotes and Additional Information**

1. The first year of the program is primarily dedicated to core courses in the basic functional areas of business.
2. MGMT 594, MGMT 596, MGMT 710, and MGMT 711 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.
3. Students participate in a required global field experience during the first year of enrollment in the degree program. Additional costs apply towards this global experience.
4. The custom core courses are taken during the second semester of the first year.

Policies for the MBA Degree Programs

MBA Admission Requirements
Applicants to the MBA programs must submit scores on the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). International applicants, who did not earn an undergraduate degree from an institution where the primary language of instruction was English must submit a valid score report from either TOEFL, PTE, or IELTS. Admission to the MBA programs is open to students regardless of their undergraduate major, but it is highly selective and limited to those who have performed with distinction in their previous academic work and on the GMAT or GRE.

Academic and Professional Standards
Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MBA program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

Academic Standards
A minimum overall grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university, but outside the JGSB) are counted in the overall grade point average calculation.

Students with an overall grade point average lower than 3.00 at the end of any semester will be notified of academic standing. Students not meeting the 3.00 requirement will be provided specific instruction and guidance on the next steps specific to their academic situation. In some cases, students may submit an appeal to the JGSB Academic Standards Committee, requesting to be placed on academic probation. The committee will decide, based on the circumstances of the appeal, whether the student may resume studies on academic probation; is to be academically suspended for one semester or an academic year; or is to be dismissed from the MBA program.

Students proposing to return after a period of academic suspension must follow the appropriate procedures outlined in the General Announcements by the Office of Graduate and Postdoctoral Studies to receive permission to be readmitted. If permitted to return, the student will pay the current rate of tuition, based upon the class of students s/he is joining.

Only courses in which a grade of C or above is earned will be counted for credit toward graduation. If students receive a grade below C in a course required for graduation, they must repeat the course. If students receive a grade lower than C in an elective course, they need not repeat the specific course, but they must make up the credit hours. If the required course is not offered again prior to graduation, the student will be permitted to take the course the following academic year, but will be charged the current pro-rated tuition for the program in which the additional coursework is completed.

Students on academic probation must complete all future courses with a grade of C or above and may be considered candidates for student offices by permission only. Students are removed from probation only upon achieving an overall grade point average of at least 3.00.

JGSB students may not take courses pass/fail to count toward their degree requirements. JGSB students may audit courses with departmental and professor approval. The courses will not count toward the MBA, but will appear on the transcript.

Professional Standards
MBA students are held to the highest standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct (p. 82). The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing specific charges. This probationary notice, however, is not required as a precondition for filing specific charges.

Class Attendance Policy
Students are expected to be in class on the first day of each term. The instructor reserves the right to exclude a student from their course who is absent on the first day. Students should refer to the specific attendance policy for each program. This information can be found in the Jones Graduate School of Business Student Handbook, which is referenced below. For special circumstances, students should see the Director of Advising in the Student Program Office and the instructor.
Guidelines for Appealing Academic Dismissal

The Process
A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.

Timing
If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

Appeals
Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

Confidentiality
The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

Grade Appeal Process
Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.
2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).
6. Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.
7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.

The Family Educational Rights and Privacy Act of 1974 and amendments govern records of these actions.

MBA Elective Course Add/Drop Policy and Procedures
Due to the unique term schedule followed by the Jones Graduate School of Business MBA programs, MBA students have special procedures they must follow to make schedule changes. The Jones Graduate School of Business Registrar Department administers an add/drop policy which allows students to add/drop elective courses at various times throughout the semester. For all elective courses, student may not add/drop a course after the deadline for the appropriate term.

Withdrawal Policy
A Jones Graduate School of Business student, participating in any offered program, may voluntarily withdraw from school at any time. Upon withdrawal, Rice University applies a sliding scale to tuition, which is noted in the university's Academic Calendar posted on the Rice Office of the Registrar website (https://registrar.rice.edu/calendars/).

Jones Graduate School of Business Student Handbook
Generally, the Jones Graduate School of Business adheres to the academic regulations of Rice University. However, the Jones Graduate School of Business MBA program has unique policies and procedures that vary from the Office of Graduate and Postdoctoral Studies regarding, but not limited to, leave of absence, withdrawals and readmission, add/drop, and academic dismissal. A copy of the handbook is available on Campus Groups.

Financial Aid
Jones Graduate School of Business scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded one academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (i.e. scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

Additional Information
For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Opportunities for the MBA Degree Programs

Independent Study
Minimum Hours Requirement
Each credit of independent study should contain approximately as much time content as a one-credit course at Jones Graduate School of Business, which is 12 hours of class time, plus an average of at least 24–36 outside-class hours, for a minimum total of 36–48 hours of work.
Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 credit hours; 3.0 credit independent study projects are rarely approved. Occasionally, a group independent study project may arise, though most independent studies are undertaken by individual students.

The number of credits for an independent study must be determined at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the Jones Graduate School of Business associate registrar must be approved by the Academic Standards Committee. The committee will rely on input from sponsoring faculty in making its decision about ex post credit increases. Requests to increase the number of project credit hours must be made before the end of the second week of classes in the term in which the project begins.

Restrictions

No student may take more than three credit hours of independent study during the course of the MBA program without the approval of the Academic Standards Committee. If an independent study is proposed that would cause a student to exceed the 3.0 credit limit, the Academic Standards Committee will select two faculty members, other than the faculty member who will supervise the project, within the area most closely related to the study's academic content to review and approve the study. Independent study exceeding 3.0 credits in total should consider current policies restricting use of independent study as well as the incremental value of additional independent study in light of past independent studies. If the study does not align with any of the Jones Graduate School of Business academic groups, the Academic Standards Committee will perform the review and make the final approval decision.

Independent study projects are for academic credit, not for hire. Students may not earn credit for paid work.

Faculty Sponsorship

Independent study projects normally are sponsored only by full-time Jones Graduate School of Business faculty; faculty typically sponsor projects only in their area of expertise. Students wanting sponsorship by a part-time faculty member must submit a project overview to the Academic Standards Committee and obtain the committee's approval before the term in which the project is to begin.

Common Requirements

The goal of independent study projects is to advance or deepen a student's knowledge or competency in a business discipline or activity. To facilitate these goals, independent study projects generally fall into two broad categories:

1. directed reading and study resulting in a research paper, or
2. an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the “deliverable.”

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, to ensure relatively equal workloads per unit of independent study credit and some common requirements across independent study projects, students and/or sponsoring faculty should:

1. Prepare and submit to the Jones Graduate School of Business associate registrar an overview of the independent study project with number of project credits, anticipated final results, and a broad timeline of anticipated project milestones.
2. Meet to discuss the project, after the initial agreement on the project scope, at least once every two to three weeks.

3. Prepare a final paper (in the case of directed reading and research projects) or complete a concrete deliverable (for example, computer program, survey results, empirical analyses, etc.) together with an executive summary of the project (in the case of experiential projects).
4. File a copy of each student’s final paper, or executive summary, with the Jones Graduate School of Business associate registrar.

Applications

Independent study applications are available for interested students on Campus Groups. Completed independent study applications must be approved by the senior associate dean of academic affairs. Completed and approved applications are due to the Jones Graduate School of Business associate registrar by the first week of the term in which the project will be completed. The student will be registered for MGMT 700/MGMT 800 independent study for the appropriate credit amount, only when the appropriate permissions have been obtained.

Additional Information

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Finance

Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MBA Degree, Full-Time Program

The MBA degree is a non-thesis master's degree. For general university requirements, please see Non-Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the full-time MBA degree program must complete:

• A minimum of 60 credit hours to satisfy degree requirements.
• A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
• A Global Field Experience (during the first year of enrollment in the degree program).
• A maximum of 6 credit hours from graduate-level coursework as transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab. Information regarding Exchange
Program transfer credit can be found in the Student Handbook under Campus Groups.

- A minimum overall GPA of 3.00 or higher in all Rice coursework.
- A minimum overall GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree with a minimum grade of C (2.00 grade points) in each course.

Students who register for a standard course load of 9-18 credit hours per semester are considered full-time students. All registration and elective selection via add/drop is completed online through ESTHER (https://esther.rice.edu/). It is the responsibility of the student to monitor and maintain his or her schedule and academic record.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

**Elective Requirements**

Select an additional 27-30 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 60 total credit hours 5, 6

| Total Credit Hours | 60 |

**Footnotes and Additional Information**

1. The first year of the program is primarily dedicated to core courses in the basic functional areas of business.
2. MGMT 594, MGMT 596, MGMT 710, and MGMT 711 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.
3. Students participate in a required global field experience during the first year of enrollment in the degree program. Additional costs apply towards this global experience.
4. The custom core courses are taken during the second semester of the first year.
5. To fulfill the remaining requirements for the full-time MBA degree program, students must complete an additional 27-30 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 60 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) Students take two elective courses during the spring semester of the first year. The second year of the program is dedicated entirely to elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. If students wish to apply courses that are offered outside of the Jones Graduate School of Business (MGMP, MGMT, or MICO course offerings), the student must obtain permission from the Jones Graduate School associate registrar. Electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.
6. Students in the coordinated MBA/Master of Science degree from the PSM (professional science master’s) program or in the coordinated MBA/Master of Engineering degree program must complete the Core Requirements, Global Field Experience, and Custom Core Requirements as listed above for the full-time MBA degree program. For students in those coordinated programs, the Elective Requirements are 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach the total of 45 credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) The second year of the program is dedicated entirely to MBA elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.
Major Concentration: Finance

The major concentration in Finance provides students with a broad foundation in financial management principles and an opportunity for further specialization. Students are required to complete the primary finance electives in the MBA program and Financial Statement Analysis. Students supplement these foundational courses with at least two specialized courses from a list of approved offerings.

Students pursuing the major concentration in Finance must complete:

- A minimum of 12-14 credit hours as listed below to satisfy major concentration requirements*

Elective Requirements

Select 2 courses from the following: 3-5

- MGMT 630 FINANCIAL MARKETS AND INSTRUMENTS
- MGMT 638 QUANTITATIVE INVESTMENT STRATEGIES
- MGMT 643 EQUITY PRACTICUM I - WRIGHT FUND
- MGMT 644 EQUITY PRACTICUM II - WRIGHT FUND
- MGMT 647 CORPORATE FINANCIAL POLICY
- MGMT 650 FUTURES AND OPTIONS II
- MGMT 651 FIXED INCOME MANAGEMENT
- MGMT 652 MERGERS AND ACQUISITIONS
- MGMT 655 ENERGY DERIVATIVES
- MGMT 657 INTERNATIONAL FINANCE
- MGMT 658 APPLIED RISK MANAGEMENT
- MGMT 659 REAL ESTATE FINANCE: ASSET VALUATION
- MGMT 674 REAL ESTATE FINANCE: SECURITIES
- MGMT 726 FIXED INCOME PRACTICUM I - RICE FI FUND
- MGMT 727 FIXED INCOME PRACTICUM II - RICE FI FUND
- MGMT 739 CAPITAL FORMATION IN ENERGY AND INFRASTRUCTURE
- MGMT 767 QUANTITATIVE INVESTMENT LAB
- MGMT 787 FINANCIAL CRISES
- MGMT 954 CORPORATE FINANCIAL RESTRUCTURING

Total Credit Hours 12-14

Footnotes and Additional Information

* The courses listed are approved to satisfy the requirements for the Finance concentration for the current academic year only. Courses not on this official list may be substituted upon approval of the Jones Graduate School of Business Associate Registrar. Students and their academic advisors should identify and clearly document the courses to be taken with the Jones Graduate School of Business Associate Registrar.

1 Only 3 credit hours from an investment practicum course will count as elective hours toward the major concentration in Finance. These 3 credit hours may come from either a) three of the four credit hours from the Wright Fund curriculum (MGMT 643 plus one credit hour from MGMT 644) or b) the two 1.5 credit hour courses in the Zions Portfolio curriculum (MGMT 726 and MGMT 727).

Policies for the MBA Degree Programs

MBA Admission Requirements

All applicants to the MBA program must complete an online application. In addition, they must have or provide:

- Bachelor’s Degree or equivalent from an accredited undergraduate institution
- Submit scores on the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). International applicants, who did not earn an undergraduate degree from an institution where the primary language of instruction was English must submit a valid score report from either TOEFL, PTE, or IELTS. Admission to the MBA programs is open to students regardless of their undergraduate major, but it is highly selective and limited to those who have performed with distinction in their previous academic work and on the GMAT or GRE.

Academic and Professional Standards

Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MBA program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

Academic Standards

A minimum overall grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university, but outside the JGSB) are counted in the overall grade point average calculation.

Students with an overall grade point average lower than 3.00 at the end of any semester will be notified of academic standing. Students not meeting the 3.00 requirement will be provided specific instruction and guidance on the next steps specific to their academic situation. In some cases, students may submit an appeal to the JGSB Academic Standards Committee, requesting to be placed on academic probation. The committee reviews all academic cases, and may consult the dean’s office for counsel and/or suggestions on proposed handling of the case. The committee will decide, based on the circumstances of the appeal, whether the student may resume studies on academic probation; is to be academically suspended for one semester or an academic year; or is to be dismissed from the MBA program.

Students proposing to return after a period of academic suspension must follow the appropriate procedures outlined in the General Announcements by the Office of Graduate and Postdoctoral Studies to receive permission to be readmitted. If permitted to return, the student will pay the current rate of tuition, based upon the class of students s/he is joining.

Only courses in which a grade of C or above is earned will be counted for credit toward graduation. If students receive a grade below C in a course required for graduation, they must repeat the course. If students receive a grade lower than C in an elective course, they need not repeat the specific course, but they must make up the credit hours. If the required course is not offered again prior to graduation, the student will be permitted to take
Students on academic probation must complete all future courses with a grade of C or above and may be considered candidates for student offices by permission only. Students are removed from probation only upon achieving an overall grade point average of at least 3.00.

JGSB students may not take courses pass/fail to count toward their degree requirements. JGSB students may audit courses with departmental and professor approval. The courses will not count toward the MBA, but will appear on the transcript.

**Professional Standards**

MBA students are held to the highest standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct (p. 82). The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing specific charges. This probationary notice, however, is not required as a precondition for filing specific charges.

**Class Attendance Policy**

Students are expected to be in class on the first day of each term. The instructor reserves the right to exclude a student from their course who is absent on the first day. Students should refer to the specific attendance policy for each program. This information can be found in the Jones Graduate School of Business Student Handbook, which is referenced below. For special circumstances, students should see the Director of Advising in the Student Program Office and the instructor.

**Guidelines for Appealing Academic Dismissal**

**The Process**

A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.

**Timing**

If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

**Appeals**

Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

**Confidentiality**

The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

**Grade Appeal Process**

Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.
2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).
6. Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.
7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.

The Family Educational Rights and Privacy Act of 1974 and amendments govern records of these actions.

**MBA Elective Course Add/Drop Policy and Procedures**

Due to the unique term schedule followed by the Jones Graduate School of Business MBA programs, MBA students have special procedures they must follow to make schedule changes. The Jones Graduate School of Business Registrar Department administers an add/drop policy which allows students to add/drop elective courses at various times throughout the semester. For all elective courses, student may not add/drop a course after the deadline for the appropriate term.

**Withdrawal Policy**

A Jones Graduate School of Business student, participating in any offered program, may voluntarily withdraw from school at any time. Upon withdrawal, Rice University applies a sliding scale to tuition, which is noted in the university’s Academic Calendar posted on the Rice Office of the Registrar website (https://registrar.rice.edu/calendars/).
Jones Graduate School of Business Student Handbook

Generally, the Jones Graduate School of Business adheres to the academic regulations of Rice University. However, the Jones Graduate School of Business MBA program has unique policies and procedures that vary from the Office of Graduate and Postdoctoral Studies regarding, but not limited to, leave of absence, withdrawals, readmission, add/drop, and academic dismissal. A copy of the handbook is available on Campus Groups.

Financial Aid

Jones Graduate School of Business scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded one academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (i.e., scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

Opportunities for the MBA Degree Programs

Independent Study

Minimum Hours Requirement

Each credit of independent study should contain approximately as much time content as a one-credit course at Jones Graduate School of Business, which is 12 hours of class time, plus an average of at least 24–36 outside-class hours, for a minimum total of 36–48 hours of work. Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 credit hours; 3.0 credit independent study projects are rarely approved. Occasionally, a group independent study project may arise, though most independent studies are undertaken by individual students.

The number of credits for an independent study must be determined at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the Jones Graduate School of Business associate registrar must be approved by the Academic Standards Committee. The committee will rely on input from sponsoring faculty in making its decision about ex post credit increases. Requests to increase the number of project credit hours must be made before the end of the second week of classes in the term in which the project begins.

Restrictions

No student may take more than three credit hours of independent study during the course of the MBA program without the approval of the Academic Standards Committee. If an independent study is proposed that would cause a student to exceed the 3.0 credit limit, the Academic Standards Committee will select two faculty members, other than the faculty member who will supervise the project, within the area most closely related to the study's academic content to review and approve the study. Independent study exceeding 3.0 credits in total should consider current policies restricting use of independent study as well as the incremental value of additional independent study in light of past independent studies. If the study does not align with any of the Jones Graduate School of Business academic groups, the Academic Standards Committee will perform the review and make the final approval decision.

Independent study projects are for academic credit, not for hire. Students may not earn credit for paid work.

Faculty Sponsorship

Independent study projects normally are sponsored only by full-time Jones Graduate School of Business faculty; faculty typically sponsor projects only in their area of expertise. Students wanting sponsorship by a part-time faculty member must submit a project overview to the Academic Standards Committee and obtain the committee's approval before the term in which the project is to begin.

Common Requirements

The goal of independent study projects is to advance or deepen a student's knowledge or competency in a business discipline or activity. To facilitate these goals, independent study projects generally fall into two broad categories:

1. directed reading and study resulting in a research paper, or
2. an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the "deliverable."

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, to ensure relatively equal workloads per unit of independent study credit and some common requirements across independent study projects, students and/or sponsoring faculty should:

1. Prepare and submit to the Jones Graduate School of Business associate registrar a project overview that includes a timeline of anticipated project milestones.
2. Meet to discuss the project, after the initial agreement on the project scope, at least once every two to three weeks.
3. Prepare a final paper (in the case of directed reading and research projects) or complete a concrete deliverable (for example, computer program, survey results, empirical analyses, etc.) together with an executive summary of the project (in the case of experiential projects).
4. File a copy of each student's final paper, or executive summary, with the Jones Graduate School of Business associate registrar.

Applications

Independent study applications are available for interested students on Campus Groups. Completed independent study applications must be approved by the senior associate dean of academic affairs. Completed and approved applications are due to the Jones Graduate School of Business associate registrar by the first week of the term in which the project will be completed. The student will be registered for MGMT 700/MGMT 800 independent study for the appropriate credit amount, only when the appropriate permissions have been obtained.

Additional Information

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/
Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Health Care

Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MBA Degree, Full-Time Program

The MBA degree is a non-thesis master’s degree. For general university requirements, please see Non-Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the full-time MBA degree program must complete:

- A minimum of 60 credit hours to satisfy degree requirements.
- A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
- A Global Field Experience (during the first year of enrollment in the degree program).
- A maximum of 6 credit hours from graduate-level coursework as transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab. Information regarding Exchange Program transfer credit can be found in the Student Handbook under Campus Groups.
- A minimum overall GPA of 3.00 or higher in all Rice coursework.
- A minimum overall GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master’s degree with a minimum grade of C (2.00 grade points) in each course.

Students who register for a standard course load of 9-18 credit hours per semester are considered full-time students. All registration and elective selection via add/drop is completed online through ESTHER (https://esther.rice.edu/). It is the responsibility of the student to monitor and maintain his or her schedule and academic record.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Footnotes and Additional Information

¹ The first year of the program is primarily dedicated to core courses in the basic functional areas of business.
MGMT 594, MGMT 596, MGMT 710, and MGMT 711 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.

Students participate in a required global field experience during the first year of enrollment in the degree program. Additional costs apply towards this global experience.

The custom core courses are taken during the second semester of the first year.

To fulfill the remaining requirements for the full-time MBA degree program, students must complete an additional 27-30 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 60 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) Students take two elective courses during the spring semester of the first year. The second year of the program is dedicated entirely to elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. If students wish to apply courses that are offered outside of the Jones Graduate School of Business (MGMP, MGMT, or MICO course offerings), the student must obtain permission from the Jones Graduate School associate registrar. Electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

Students in the coordinated MBA/Master of Science degree from the PSM (professional science master’s) program or in the coordinated MBA/Master of Engineering degree program must complete the Core Requirements, Global Field Experience, and Custom Core Requirements as listed above for the full-time MBA degree program. For students in those coordinated programs, the Elective Requirements are 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach the total of 45 credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) The second year of the program is dedicated entirely to MBA elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

### Major Concentration: Health Care

The focus of the major concentration in Health Care is to provide students with an understanding of how management principles are interpreted and applied in the different inter-locking sectors (providers, hospitals/small practices, payers, pharmaceutical, biotechnology) of the health care industry, and how the different dynamics in these sectors make it uniquely health care.

Students pursuing the major concentration in Health Care must complete:

- A minimum of 12 credit hours as listed below to satisfy the major concentration requirements*

<table>

### Footnotes and Additional Information

* The courses listed are approved to satisfy the requirements for the Health Care concentration for the current academic year only. Courses not on this official list may be substituted upon approval of the Jones Graduate School of Business Associate Registrar. Students and their academic advisors should identify and clearly document the courses to be taken with the Jones Graduate School of Business Associate Registrar.

1 MGMT 776 is taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As a S/U course, it does not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.

### Policies for the MBA Degree Programs

#### MBA Admission Requirements

Applicants to the MBA programs must submit scores on the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). International applicants, who did not earn an undergraduate degree from an institution where the primary language of instruction was English must submit a valid score report from either TOEFL, PTE, or IELTS. Admission to the MBA programs is open to students regardless of their undergraduate major, but it is highly selective and limited to those who have performed with distinction in their previous academic work and on the GMAT or GRE.

#### Academic and Professional Standards

Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the
MBA program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

**Academic Standards**
A minimum overall grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university, but outside the JGSB) are counted in the overall grade point average calculation.

Students with an overall grade point average lower than 3.00 at the end of any semester will be notified of academic standing. Students not meeting the 3.00 requirement will be provided specific instruction and guidance on the next steps specific to their academic situation. In some cases, students may submit an appeal to the JGSB Academic Standards Committee, requesting to be placed on academic probation. The committee reviews all academic cases, and may consult the dean’s office for counsel and/or suggestions on proposed handling of the case. The committee will decide, based on the circumstances of the appeal, whether the student may resume studies on academic probation; is to be academically suspended for one semester or an academic year; or is to be dismissed from the MBA program.

Students proposing to return after a period of academic suspension must follow the appropriate procedures outlined in the General Announcements by the Office of Graduate and Postdoctoral Studies to receive permission to be readmitted. If permitted to return, the student will pay the current rate of tuition, based upon the class of students s/he is joining.

Only courses in which a grade of C or above is earned will be counted for credit toward graduation. If students receive a grade below C in a course required for graduation, they must repeat the course. If students receive a grade lower than C in an elective course, they need not repeat the specific course, but they must make up the credit hours. If the required course is not offered again prior to graduation, the student will be permitted to take the course the following academic year, but will be charged the current pro-rated tuition for the program in which the additional coursework is completed.

Students on academic probation must complete all future courses with a grade of C or above and may be considered candidates for student offices by permission only. Students are removed from probation only upon achieving an overall grade point average of at least 3.00.

JGSB students may not take courses pass/fail to count toward their degree requirements. JGSB students may audit courses with departmental and professor approval. The courses will not count toward the MBA, but will appear on the transcript.

**Professional Standards**
MBA students are held to the highest standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct (p. 82). The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing specific charges. This probationary notice, however, is not required as a precondition for filing specific charges.

**Class Attendance Policy**
Students are expected to be in class on the first day of each term. The instructor reserves the right to exclude a student from their course who is absent on the first day. Students should refer to the specific attendance policy for each program. This information can be found in the Jones Graduate School of Business Student Handbook, which is referenced below. For special circumstances, students should see the Director of Advising in the Student Program Office and the instructor.

**Guidelines for Appealing Academic Dismissal**

**The Process**
A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.

**Timing**
If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

**Appeals**
Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

**Confidentiality**
The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

**Grade Appeal Process**
Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.
2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).

6. Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.

The Family Educational Rights and Privacy Act of 1974 and amendments govern records of these actions.

**MBA Elective Course Add/Drop Policy and Procedures**

Due to the unique term schedule followed by the Jones Graduate School of Business MBA programs, MBA students have special procedures they must follow to make schedule changes. The Jones Graduate School of Business Registrar Department administers an add/drop policy which allows students to add/drop elective courses at various times throughout the semester. For all elective courses, student may not add/drop a course after the deadline for the appropriate term.

**Withdrawal Policy**

A Jones Graduate School of Business student, participating in any offered program, may voluntarily withdraw from school at any time. Upon withdrawal, Rice University applies a sliding scale to tuition, which is noted in the university's Academic Calendar posted on the Rice Office of the Registrar website (https://registrar.rice.edu/calendars/).

**Jones Graduate School of Business Student Handbook**

Generally, the Jones Graduate School of Business adheres to the academic regulations of Rice University. However, the Jones Graduate School of Business MBA program has unique policies and procedures that vary from the Office of Graduate and Postdoctoral Studies regarding, but not limited to, leave of absence, withdrawals and readmission, add/drop, and academic dismissal. A copy of the handbook is available on Campus Groups.

**Financial Aid**

Jones Graduate School of Business scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded one academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (i.e. scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

**Additional Information**

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

**Opportunities for the MBA Degree Programs**

**Independent Study**

**Minimum Hours Requirement**

Each credit of independent study should contain approximately as much time content as a one-credit course at Jones Graduate School of Business, which is 12 hours of class time, plus an average of at least 24–36 outside-class hours, for a minimum total of 36–48 hours of work. Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 credit hours; 3.0 credit independent study projects are rarely approved. Occasionally, a group independent study project may arise, though most independent studies are undertaken by individual students.

The number of credits for an independent study must be determined at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the Jones Graduate School of Business associate registrar must be approved by the Academic Standards Committee. The committee will rely on input from sponsoring faculty in making its decision about ex post credit increases. Requests to increase the number of project credit hours must be made before the end of the second week of classes in the term in which the project begins.

**Restrictions**

No student may take more than three credit hours of independent study during the course of the MBA program without the approval of the Academic Standards Committee. If an independent study is proposed that would cause a student to exceed the 3.0 credit limit, the Academic Standards Committee will select two faculty members, other than the faculty member who will supervise the project, within the area most closely related to the study’s academic content to review and approve the study. Independent study exceeding 3.0 credits in total should consider current policies restricting use of independent study as well as the incremental value of additional independent study in light of past independent studies. If the study does not align with any of the Jones Graduate School of Business academic groups, the Academic Standards Committee will perform the review and make the final approval decision.

Independent study projects are for academic credit, not for hire. Students may not earn credit for paid work.

**Faculty Sponsorship**

Independent study projects normally are sponsored only by full-time Jones Graduate School of Business faculty; faculty typically sponsor projects only in their area of expertise. Students wanting sponsorship by a part-time faculty member must submit a project overview to the Academic Standards Committee and obtain the committee’s approval before the term in which the project is to begin.

**Common Requirements**

The goal of independent study projects is to advance or deepen a student’s knowledge or competency in a business discipline or activity.

To facilitate these goals, independent study projects generally fall into two broad categories:

1. directed reading and study resulting in a research paper, or
2. an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the “deliverable.”

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, to ensure
relatively equal workloads per unit of independent study credit and some common requirements across independent study projects, students and/or sponsoring faculty should:

1. Prepare and submit to the Jones Graduate School of Business associate registrar an overview of the independent study project with number of project credits, anticipated final results, and a broad timeline of anticipated project milestones.
2. Meet to discuss the project, after the initial agreement on the project scope, at least once every two to three weeks.
3. Prepare a final paper (in the case of directed reading and research projects) or complete a concrete deliverable (for example, computer program, survey results, empirical analyses, etc.) together with an executive summary of the project (in the case of experiential projects).
4. File a copy of each student’s final paper, or executive summary, with the Jones Graduate School of Business associate registrar.

Applications
Independent study applications are available for interested students on Campus Groups. Completed independent study applications must be approved by the senior associate dean of academic affairs. Completed and approved applications are due to the Jones Graduate School of Business associate registrar by the first week of the term in which the project will be completed. The student will be registered for MGMT 700/MGMT 800 independent study for the appropriate credit amount, only when the appropriate permissions have been obtained.

Additional Information
For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Marketing

Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MBA Degree, Full-Time Program

The MBA degree is a non-thesis master’s degree. For general university requirements, please see Non-Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the full-time MBA degree program must complete:

- A minimum of 60 credit hours to satisfy degree requirements.
- A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
- A Global Field Experience (during the first year of enrollment in the degree program).
- A maximum of 6 credit hours from graduate-level coursework as transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab. Information regarding Exchange Program transfer credit can be found in the Student Handbook under Campus Groups.
- A minimum overall GPA of 3.00 or higher in all Rice coursework.
- A minimum overall GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master’s degree with a minimum grade of C (2.00 grade points) in each course.

Students who register for a standard course load of 9-18 credit hours per semester are considered full-time students. All registration and elective selection via add/drop is completed online through ESTHER (https://esther.rice.edu). It is the responsibility of the student to monitor and maintain his or her schedule and academic record.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Footnotes and Additional Information

1. The first year of the program is primarily dedicated to core courses in the basic functional areas of business.

2. MGMT 594, MGMT 596, MGMT 710, and MGMT 711 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.

3. Students participate in a required global field experience during the first year of enrollment in the degree program. Additional costs apply towards this global experience.

4. The custom core courses are taken during the second semester of the first year.

5. To fulfill the remaining requirements for the full-time MBA degree program, students must complete an additional 27-30 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 60 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) Students take two elective courses during the spring semester of the first year. The second year of the program is dedicated entirely to elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

6. Students in the coordinated MBA/Master of Science degree from the PSM (professional science master’s) program or in the coordinated MBA/Master of Engineering degree program must complete the Core Requirements, Global Field Experience, and Custom Core Requirements as listed above for the full-time MBA degree program. For students in those coordinated programs, the Elective Requirements are 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach the total of 45 credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) The second year of the program is dedicated entirely to MBA elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

**Major Concentration: Marketing**

The major concentration in Marketing prepares students for careers in strategic marketing across a wide range of organizations, markets, and industries. It provides critical knowledge for understanding and analyzing customers, and emphasizes the development of requisite quantitative and conceptual skills to contribute to the firm's overall success. Among the career trajectories for which students will be prepared are product management, customer analytics and customer insights, and management consulting.

Students pursuing the major concentration in Marketing must complete:

- A minimum of 12 credit hours as listed below to satisfy the major concentration requirements*

**Code** | **Title** | **Credit Hours**
---|---|---
MGMT 680 | CUSTOMER LIFETIME VALUE | 3
MGMT 686 | INTRODUCTION TO MARKETING RESEARCH | 3
MGMT 689 / MGMP 689 | DECISION MODELS | 3
MGMT 707 | ADVANCED MARKETING RESEARCH | 3
MGMT 995 | ADVANCED BUSINESS ANALYTICS | 3

**Conceptual Foundations**

Select a minimum of 3 credit hours from the following:

- MGMT 681 MANAGING CUSTOMER PERCEPTIONS
- MGMT 682 PRICING STRATEGIES
- MGMT 684 BRAND STRATEGY
- MGMT 688 BUYER BEHAVIOR
- MGMT 692 CUSTOMER RELATIONSHIP MANAGEMENT
- MGMT 693 NEW PRODUCTS
- MGMT 701 MARKETING EXPERIMENTATION
- MGMT 778 CUSTOMER EXPERIENCE MANAGEMENT

**Marketing Applications**

Select a minimum of 1.5 credit hours from the following:

- 1.5

---

\(^{1}\) The first year of the program is primarily dedicated to core courses in the basic functional areas of business.

\(^{2}\) MGMT 594, MGMT 596, MGMT 710, and MGMT 711 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.

\(^{3}\) Students participate in a required global field experience during the first year of enrollment in the degree program. Additional costs apply towards this global experience.

\(^{4}\) The custom core courses are taken during the second semester of the first year.

\(^{5}\) To fulfill the remaining requirements for the full-time MBA degree program, students must complete an additional 27-30 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 60 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) Students take two elective courses during the spring semester of the first year. The second year of the program is dedicated entirely to elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

\(^{6}\) Students in the coordinated MBA/Master of Science degree from the PSM (professional science master’s) program or in the coordinated MBA/Master of Engineering degree program must complete the Core Requirements, Global Field Experience, and Custom Core Requirements as listed above for the full-time MBA degree program. For students in those coordinated programs, the Elective Requirements are 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach the total of 45 credit hours. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.
Academic and Professional Standards

Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MBA program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

Academic Standards

A minimum overall grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university, but outside the JGSB) are counted in the overall grade point average calculation.

Students with an overall grade point average lower than 3.00 at the end of any semester will be notified of academic standing. Students not meeting the 3.00 requirement will be provided specific instruction and guidance on the next steps specific to their academic situation. In some cases, students may submit an appeal to the JGSB Academic Standards Committee, requesting to be placed on academic probation. The committee reviews all academic cases, and may consult the dean’s office for counsel and/or suggestions on proposed handling of the case. The committee will decide, based on the circumstances of the appeal, whether the student may resume studies on academic probation; is to be academically suspended for one semester or an academic year; or is to be dismissed from the MBA program.

Students proposing to return after a period of academic suspension must follow the appropriate procedures outlined in the General Announcements by the Office of Graduate and Postdoctoral Studies to receive permission to be readmitted. If permitted to return, the student will pay the current rate of tuition, based upon the class of students s/he is joining.

Only courses in which a grade of C or above is earned will be counted for credit toward graduation. If students receive a grade below C in a course required for graduation, they must repeat the course. If students receive a grade lower than C in an elective course, they need not repeat the specific course, but they must make up the credit hours. If the required course is not offered again prior to graduation, the student will be permitted to take the course the following academic year, but will be charged the current pro-rated tuition for the program in which the additional coursework is completed.

Students on academic probation must complete all future courses with a grade of C or above and may be considered candidates for student offices by permission only. Students are removed from probation only upon achieving an overall grade point average of at least 3.00. JGSB students may not take courses pass/fail to count toward their degree requirements. JGSB students may audit courses with departmental and professor approval. The courses will not count toward the MBA, but will appear on the transcript.

Professional Standards

MBA students are held to the highest standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct (p. 82). The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing specific charges. This probationary notice, however, is not required as a precondition for filing specific charges.

Class Attendance Policy

Students are expected to be in class on the first day of each term. The instructor reserves the right to exclude a student from their course who is absent on the first day. Students should refer to the specific attendance policy for each program. This information can be found in the Jones Graduate School of Business Student Handbook, which is referenced below. For special circumstances, students should see the Director of Advising in the Student Program Office and the instructor.

Guidelines for Appealing Academic Dismissal

The Process

A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.
Timing
If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

Appeals
Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

Confidentiality
The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

Grade Appeal Process
Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.
2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).
6. Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.
7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.

The Family Educational Rights and Privacy Act of 1974 and amendments govern records of these actions.

MBA Elective Course Add/Drop Policy and Procedures
Due to the unique term schedule followed by the Jones Graduate School of Business MBA programs, MBA students have special procedures they must follow to make schedule changes. The Jones Graduate School of Business Registrar Department administers an add/drop policy which allows students to add/drop elective courses at various times throughout the semester. For all elective courses, student may not add/drop a course after the deadline for the appropriate term.

Withdrawal Policy
A Jones Graduate School of Business student, participating in any offered program, may voluntarily withdraw from school at any time. Upon withdrawal, Rice University applies a sliding scale to tuition, which is noted in the university’s Academic Calendar posted on the Rice Office of the Registrar website (https://registrar.rice.edu/calendars/).

Jones Graduate School of Business Student Handbook
Generally, the Jones Graduate School of Business adheres to the academic regulations of Rice University. However, the Jones Graduate School of Business MBA program has unique policies and procedures that vary from the Office of Graduate and Postdoctoral Studies regarding, but not limited to, leave of absence, withdrawals, and readmission, add/drop, and academic dismissal. A copy of the handbook is available on Campus Groups.

Financial Aid
Jones Graduate School of Business scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded one academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (e.g. scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

Additional Information
For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Opportunities for the MBA Degree Programs
Independent Study
Minimum Hours Requirement
Each credit of independent study should contain approximately as much time content as a one-credit course at Jones Graduate School of Business, which is 12 hours of class time, plus an average of at least 24–36 outside-class hours, for a minimum total of 36–48 hours of work. Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 credit hours; 3.0 credit independent study projects are rarely approved. Occasionally, a group independent study project may arise, though most independent studies are undertaken by individual students.

The number of credits for an independent study must be determined at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the Jones Graduate School of Business associate registrar must be approved by the Academic Standards Committee. The committee will rely on input from sponsoring faculty in making its decision about ex post credit increases. Requests to increase the number of project credit hours must be made before the end of the second week of classes in the term in which the project begins.

Financial assistance is generally awarded one academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (e.g. scholarship, employment, Federal/State student loans, etc.). Opportunities for the MBA Degree Programs
Independent Study
Minimum Hours Requirement
Each credit of independent study should contain approximately as much time content as a one-credit course at Jones Graduate School of Business, which is 12 hours of class time, plus an average of at least 24–36 outside-class hours, for a minimum total of 36–48 hours of work. Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 credit hours; 3.0 credit independent study projects are rarely approved. Occasionally, a group independent study project may arise, though most independent studies are undertaken by individual students.

The number of credits for an independent study must be determined at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the Jones Graduate School of Business associate registrar must be approved by the Academic Standards Committee. The committee will rely on input from sponsoring faculty in making its decision about ex post credit increases. Requests to increase the number of project credit hours must be made before the end of the second week of classes in the term in which the project begins.
Restrictions
No student may take more than three credit hours of independent study during the course of the MBA program without the approval of the Academic Standards Committee. If an independent study is proposed that would cause a student to exceed the 3.0 credit limit, the Academic Standards Committee will select two faculty members, other than the faculty member who will supervise the project, within the area most closely related to the study's academic content to review and approve the study. Independent study exceeding 3.0 credits in total should consider current policies restricting use of independent study as well as the incremental value of additional independent study in light of past independent studies. If the study does not align with any of the Jones Graduate School of Business academic groups, the Academic Standards Committee will perform the review and make the final approval decision.

Independent study projects are for academic credit, not for hire. Students may not earn credit for paid work.

Faculty Sponsorship
Independent study projects normally are sponsored only by full-time Jones Graduate School of Business faculty; faculty typically sponsor projects only in their area of expertise. Students wanting sponsorship by a part-time faculty member must submit a project overview to the Academic Standards Committee and obtain the committee's approval before the term in which the project is to begin.

Common Requirements
The goal of independent study projects is to advance or deepen a student's knowledge or competency in a business discipline or activity. To facilitate these goals, independent study projects generally fall into two broad categories:

1. directed reading and study resulting in a research paper, or
2. an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the "deliverable."

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, to ensure relatively equal workloads per unit of independent study credit and some common requirements across independent study projects, students and/ or sponsoring faculty should:

1. Prepare and submit to the Jones Graduate School of Business associate registrar an overview of the independent study project with number of project credits, anticipated final results, and a broad timeline of anticipated project milestones.
2. Meet to discuss the project, after the initial agreement on the project scope, at least once every two to three weeks.
3. Prepare a final paper (in the case of directed reading and research projects) or complete a concrete deliverable (for example, computer program, survey results, empirical analyses, etc.) together with an executive summary of the project (in the case of experiential projects).
4. File a copy of each student's final paper, or executive summary, with the Jones Graduate School of Business associate registrar.

Applications
Independent study applications are available for interested students on Campus Groups. Completed independent study applications must be approved by the senior associate dean of academic affairs. Completed and approved applications are due to the Jones Graduate School of Business associate registrar by the first week of the term in which the project will be completed. The student will be registered for MGMT 700/ MGMT 800 independent study for the appropriate credit amount, only when the appropriate permissions have been obtained.

Additional Information
For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Operations Management

Program Learning Outcomes for the MBA Degree
Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MBA Degree, Full-Time Program
The MBA degree is a non-thesis master's degree. For general university requirements, please see Non-Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the full-time MBA degree program must complete:

- A minimum of 60 credit hours to satisfy degree requirements.
- A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
- A Global Field Experience (during the first year of enrollment in the degree program).
- A maximum of 6 credit hours from graduate-level coursework as transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab. Information regarding Exchange Program transfer credit can be found in the Student Handbook under Campus Groups.
- A minimum overall GPA of 3.00 or higher in all Rice coursework.
- A minimum overall GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree with a minimum grade of C (2.00 grade points) in each course.

Requirements: To facilitate these goals, independent study projects generally fall into two broad categories:

1. directed reading and study resulting in a research paper, or
2. an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the "deliverable."

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, to ensure relatively equal workloads per unit of independent study credit and some common requirements across independent study projects, students and/ or sponsoring faculty should:

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Operations Management

Program Learning Outcomes for the MBA Degree
Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MBA Degree, Full-Time Program
The MBA degree is a non-thesis master's degree. For general university requirements, please see Non-Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the full-time MBA degree program must complete:

- A minimum of 60 credit hours to satisfy degree requirements.
- A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
- A Global Field Experience (during the first year of enrollment in the degree program).
- A maximum of 6 credit hours from graduate-level coursework as transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab. Information regarding Exchange Program transfer credit can be found in the Student Handbook under Campus Groups.
- A minimum overall GPA of 3.00 or higher in all Rice coursework.
- A minimum overall GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree with a minimum grade of C (2.00 grade points) in each course.

Students who register for a standard course load of 9-18 credit hours per semester are considered full-time students. All registration and elective selection via add/drop is completed online through ESTHER (https://esther.rice.edu/). It is the responsibility of the student to monitor and maintain his or her schedule and academic record.
The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

### Footnotes and Additional Information

1. The first year of the program is primarily dedicated to core courses in the basic functional areas of business.
2. MGMT 594, MGMT 596, MGMT 710, and MGMT 711 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.
3. Students participate in a required global field experience during the first year of enrollment in the degree program. Additional costs apply towards this global experience.
4. The custom core courses are taken during the second semester of the first year.
5. To fulfill the remaining requirements for the full-time MBA degree program, students must complete an additional 27-30 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 60 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) Students take two elective courses during the spring semester of the first year. The second year of the program is dedicated entirely to elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. If students wish to apply courses that are offered outside of the Jones Graduate School of Business (MGMP, MGMT, or MICO course offerings), the student must obtain permission from the Jones Graduate School associate registrar. Electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.
6. Students in the coordinated MBA/Master of Science degree from the PSM (professional science master's) program or in the coordinated MBA/Master of Engineering degree program must complete the Core Requirements, Global Field Experience, and Custom Core Requirements as listed above for the full-time MBA degree program. For students in those coordinated programs, the Elective Requirements are 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach the total of 45 credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) The second year of the program is dedicated entirely to MBA elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

### Major Concentration: Operations Management

The major concentration in Operations Management presents students with a framework for design, planning, control, coordination, and improvement of business processes, systems, and resources essential to meet consumers' needs. Instead of the technical engineering view of operations, the focus is on managing the business well.

Students pursuing the major concentration in Operations Management must complete:
• A minimum of 10.5 credit hours as listed below to satisfy the major concentration requirements*

**Total Credit Hours** 10.5

---

*MGMT 752 is taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As a S/U course, it does not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.

---

**Policies for the MBA Degree Programs**

**MBA Admission Requirements**

Applicants to the MBA programs must submit scores on the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). International applicants, who did not earn an undergraduate degree from an institution where the primary language of instruction was English must submit a valid score report from either TOEFL, PTE, or IELTS. Admission to the MBA programs is open to students regardless of their undergraduate major, but it is highly selective and limited to those who have performed with distinction in their previous academic work and on the GMAT or GRE.

**Academic and Professional Standards**

Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MBA program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

**Academic Standards**

A minimum overall grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university, but outside the JGSB) are counted in the overall grade point average calculation.

Students with an overall grade point average lower than 3.00 at the end of any semester will be notified of academic standing. Students not meeting the 3.00 requirement will be provided specific instruction and guidance on the next steps specific to their academic situation. In some cases, students may submit an appeal to the JGSB Academic Standards Committee, requesting to be placed on academic probation. The committee reviews all academic cases, and may consult the dean’s office for counsel and/or suggestions on proposed handling of the case. The committee will decide, based on the circumstances of the appeal, whether the student may resume studies on academic probation; is to be academically suspended for one semester or an academic year; or is to be dismissed from the MBA program.

Students proposing to return after a period of academic suspension must follow the appropriate procedures outlined in the General Announcements by the Office of Graduate and Postdoctoral Studies to receive permission to be readmitted. If permitted to return, the student will pay the current rate of tuition, based upon the class of students s/he is joining.

Only courses in which a grade of C or above is earned will be counted for credit toward graduation. If students receive a grade below C in a course required for graduation, they must repeat the course. If students receive a grade lower than C in an elective course, they need not repeat the specific course, but they must make up the credit hours. If the required course is not offered again prior to graduation, the student will be permitted to take the course the following academic year, but will be charged the current pro-rated tuition for the program in which the additional coursework is completed.

Students on academic probation must complete all future courses with a grade of C or above and may be considered candidates for student
offices by permission only. Students are removed from probation only upon achieving an overall grade point average of at least 3.00.

JGSB students may not take courses pass/fail to count toward their degree requirements. JGSB students may audit courses with departmental and professor approval. The courses will not count toward the MBA, but will appear on the transcript.

Professional Standards
MBA students are held to the highest standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct (p. 82). The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing specific charges. This probationary notice, however, is not required as a precondition for filing specific charges.

Class Attendance Policy
Students are expected to be in class on the first day of each term. The instructor reserves the right to exclude a student from their course who is absent on the first day. Students should refer to the specific attendance policy for each program. This information can be found in the Jones Graduate School of Business Student Handbook, which is referenced below. For special circumstances, students should see the Director of Advising in the Student Program Office and the instructor.

Guidelines for Appealing Academic Dismissal
The Process
A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.

Timing
If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

Appeals
Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

Confidentiality
The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

Grade Appeal Process
Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.
2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).
6. Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.
7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.

The Family Educational Rights and Privacy Act of 1974 and amendments govern records of these actions.

MBA Elective Course Add/Drop Policy and Procedures
Due to the unique term schedule followed by the Jones Graduate School of Business MBA programs, MBA students have special procedures they must follow to make schedule changes. The Jones Graduate School of Business Registrar Department administers an add/drop policy which allows students to add/drop elective courses at various times throughout the semester. For all elective courses, student may not add/drop a course after the deadline for the appropriate term.

Withdrawal Policy
A Jones Graduate School of Business student, participating in any offered program, may voluntarily withdraw from school at any time. Upon withdrawal, Rice University applies a sliding scale to tuition, which is noted in the university’s Academic Calendar posted on the Rice Office of the Registrar website (https://registrar.rice.edu/calendars/).

Jones Graduate School of Business Student Handbook
Generally, the Jones Graduate School of Business adheres to the academic regulations of Rice University. However, the Jones Graduate School of Business MBA program has unique policies and procedures that vary from the Office of Graduate and Postdoctoral Studies regarding, but not limited to, leave of absence, withdrawals and readmission, add/
Financial Aid

Jones Graduate School of Business scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded one academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (i.e. scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

Additional Information

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Opportunities for the MBA Degree Programs

Independent Study

Minimum Hours Requirement

Each credit of independent study should contain approximately as much time content as a one-credit course at Jones Graduate School of Business, which is 12 hours of class time, plus an average of at least 24–36 outside-class hours, for a minimum total of 36–48 hours of work. Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 credit hours; 3.0 credit independent study projects are rarely approved. Occasionally, a group independent study project may arise, though most independent studies are undertaken by individual students.

The number of credits for an independent study must be determined at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the Jones Graduate School of Business associate registrar must be approved by the Academic Standards Committee. The committee will rely on input from sponsoring faculty in making its decision about ex post credit increases. Requests to increase the number of project credit hours must be made before the end of the second week of classes in the term in which the project begins.

Restrictions

No student may take more than three credit hours of independent study during the course of the MBA program without the approval of the Academic Standards Committee. If an independent study is proposed that would cause a student to exceed the 3.0 credit limit, the Academic Standards Committee will select two faculty members, other than the faculty member who will supervise the project, within the area most closely related to the study's academic content to review and approve the study. Independent study exceeding 3.0 credits in total should consider current policies restricting use of independent study as well as the incremental value of additional independent study in light of past independent studies. If the study does not align with any of the Jones Graduate School of Business academic groups, the Academic Standards Committee will perform the review and make the final approval decision.

Independent study projects are for academic credit, not for hire. Students may not earn credit for paid work.

Faculty Sponsorship

Independent study projects normally are sponsored only by full-time Jones Graduate School of Business faculty; faculty typically sponsor projects only in their area of expertise. Students wanting sponsorship by a part-time faculty member must submit a project overview to the Academic Standards Committee and obtain the committee’s approval before the term in which the project is to begin.

Common Requirements

The goal of independent study projects is to advance or deepen a student’s knowledge or competency in a business discipline or activity. To facilitate these goals, independent study projects generally fall into two broad categories:

1. directed reading and study resulting in a research paper, or
2. an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the “deliverable.”

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, to ensure relatively equal workloads per unit of independent study credit and some common requirements across independent study projects, students and/or sponsoring faculty should:

1. Prepare and submit to the Jones Graduate School of Business associate registrar an overview of the independent study project with number of project credits, anticipated final results, and a broad timeline of anticipated project milestones.
2. Meet to discuss the project, after the initial agreement on the project scope, at least once every two to three weeks.
3. Prepare a final paper (in the case of directed reading and research projects) or complete a concrete deliverable (for example, computer program, survey results, empirical analyses, etc.) together with an executive summary of the project (in the case of experiential projects).
4. File a copy of each student’s final paper, or executive summary, with the Jones Graduate School of Business associate registrar.

Applications

Independent study applications are available for interested students on Campus Groups. Completed independent study applications must be approved by the senior associate dean of academic affairs. Completed and approved applications are due to the Jones Graduate School of Business associate registrar by the first week of the term in which the project will be completed. The student will be registered for MGMT 700/MGMT 800 independent study for the appropriate credit amount, only when the appropriate permissions have been obtained.

Additional Information

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Real Estate
Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MBA Degree, Full-Time Program

The MBA degree is a non-thesis master's degree. For general university requirements, please see Non-Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the full-time MBA degree program must complete:

- A minimum of 60 credit hours to satisfy degree requirements.
- A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
- A Global Field Experience (during the first year of enrollment in the degree program).
- A maximum of 6 credit hours from graduate-level coursework as transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab. Information regarding Exchange Program transfer credit can be found in the Student Handbook under Campus Groups.
- A minimum overall GPA of 3.00 or higher in all Rice coursework.
- A minimum overall GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree with a minimum grade of C (2.00 grade points) in each course.

Students who register for a standard course load of 9-18 credit hours per semester are considered full-time students. All registration and elective selection via add/drop is completed online through ESTHER (https://esther.rice.edu/). It is the responsibility of the student to monitor and maintain his or her schedule and academic record.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's Official Certifier (https://registrar.rice.edu/facstaff/degeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Elective Requirements

Select an additional 27-30 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 60 total credit hours 5, 6

Total Credit Hours 60

Footnotes and Additional Information

1 The first year of the program is primarily dedicated to core courses in the basic functional areas of business.
2 MGMT 594, MGMT 596, MGMT 710, and MGMT 711 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.
Students participate in a required global field experience during the first year of enrollment in the degree program. Additional costs apply towards this global experience.

The custom core courses are taken during the second semester of the first year.

To fulfill the remaining requirements for the full-time MBA degree program, students must complete an additional 27-30 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 60 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) Students take two elective courses during the spring semester of the first year. The second year of the program is dedicated entirely to elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. If students wish to apply courses that are offered outside of the Jones Graduate School of Business (MGMP, MGMT, or MICO course offerings), the student must obtain permission from the Jones Graduate School associate registrar. Electives are offered on the daytime schedule, the evening schedule, and the weekend schedule. Students in the coordinated MBA/Master of Science degree from the PSM (professional science master’s) or the coordinated MBA/Master of Engineering degree program must complete the Core Requirements, Global Field Experience, and Custom Core Requirements as listed above for the full-time MBA degree program. For students in those coordinated programs, the Elective Requirements are 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach the total of 45 credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) The second year of the program is dedicated entirely to MBA elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

Major Concentration: Real Estate

The major concentration in Real Estate prepares students for a career in the real estate industry. The required course introduces a series of basic business concepts commonly used in the real estate industry, and it covers in detail the application of the discounted cash flow model to real estate decisions. The elective courses provide for both a depth and breadth of understanding of the industry.

Students pursuing the MBA degree and a major concentration in Real Estate must complete:

- A minimum of 12 credit hours as listed below to satisfy the major concentration requirements*

<table>

Footnotes and Additional Information

* The courses listed are approved to satisfy the requirements for the Real Estate concentration for the current academic year only. Courses not on this official list may be substituted upon approval of the Jones Graduate School of Business Associate Registrar. Students and their academic advisors should identify and clearly document the courses to be taken with the Jones Graduate School of Business Associate Registrar.

1. MGMT 754 may be taken twice with approval of instructor.

2. MGMT 776 is taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As a S/U course, it does not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.

Policies for the MBA Degree Programs

MBA Admission Requirements

Applicants to the MBA programs must submit scores on the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). International applicants, who did not earn an undergraduate degree from an institution where the primary language of instruction was English must submit a valid score report from either TOEFL, PTE, or IELTS. Admission to the MBA programs is open to students regardless of their undergraduate major, but it is highly selective and limited to those who have performed with distinction in their previous academic work and on the GMAT or GRE.

Academic and Professional Standards

Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MBA program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

Academic Standards

A minimum overall grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university, but outside the JGSB) are counted in the overall grade point average calculation.

Students with an overall grade point average lower than 3.00 at the end of any semester will be notified of academic standing. Students not meeting the 3.00 requirement will be provided specific instruction and guidance on the next steps specific to their academic situation. In some cases, students may submit an appeal to the JGSB Academic Standards Committee, requesting to be placed on academic probation.
The committee reviews all academic cases, and may consult the dean's office for counsel and/or suggestions on proposed handling of the case. The committee will decide, based on the circumstances of the appeal, whether the student may resume studies on academic probation; is to be academically suspended for one semester or an academic year; or is to be dismissed from the MBA program.

Students proposing to return after a period of academic suspension must follow the appropriate procedures outlined in the General Announcements by the Office of Graduate and Postdoctoral Studies to receive permission to be readmitted. If permitted to return, the student will pay the current rate of tuition, based upon the class of students s/he is joining.

Only courses in which a grade of C or above is earned will be counted for credit toward graduation. If students receive a grade below C in a course required for graduation, they must repeat the course. If students receive a grade lower than C in an elective course, they need not repeat the specific course, but they must make up the credit hours. If the required course is not offered again prior to graduation, the student will be permitted to take the course the following academic year, but will be charged the current pro-rated tuition for the program in which the additional coursework is completed.

Students on academic probation must complete all future courses with a grade of C or above and may be considered candidates for student offices by permission only. Students are removed from probation only upon achieving an overall grade point average of at least 3.00.

JGSB students may not take courses pass/fail to count toward their degree requirements. JGSB students may audit courses with departmental and professor approval. The courses will not count toward the MBA, but will appear on the transcript.

Professional Standards
MBA students are held to the highest standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct (p. 82). The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing specific charges. This probationary notice, however, is not required as a precondition for filing specific charges.

Class Attendance Policy
Students are expected to be in class on the first day of each term. The instructor reserves the right to exclude a student from their course who is absent on the first day. Students should refer to the specific attendance policy for each program. This information can be found in the Jones Graduate School of Business Student Handbook, which is referenced below. For special circumstances, students should see the Director of Advising in the Student Program Office and the instructor.

Guidelines for Appealing Academic Dismissal

The Process
A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.

Timing
If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

Appeals
Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

Confidentiality
The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

Grade Appeal Process
Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.
2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).
6. Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.
7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.
The Family Educational Rights and Privacy Act of 1974 and amendments govern records of these actions.

**MBA Elective Course Add/Drop Policy and Procedures**

Due to the unique term schedule followed by the Jones Graduate School of Business MBA programs, MBA students have special procedures they must follow to make schedule changes. The Jones Graduate School of Business Registrar Department administers an add/drop policy which allows students to add/drop elective courses at various times throughout the semester. For all elective courses, student may not add/drop a course after the deadline for the appropriate term.

**Withdrawal Policy**

A Jones Graduate School of Business student, participating in any offered program, may voluntarily withdraw from school at any time. Upon withdrawal, Rice University applies a sliding scale to tuition, which is noted in the university's Academic Calendar posted on the Rice Office of the Registrar website [https://registrar.rice.edu/calendars/](https://registrar.rice.edu/calendars/).

**Jones Graduate School of Business Student Handbook**

Generally, the Jones Graduate School of Business adheres to the academic regulations of Rice University. However, the Jones Graduate School of Business MBA program has unique policies and procedures that vary from the Office of Graduate and Postdoctoral Studies regarding, but not limited to, leave of absence, withdrawals and readmission, add/drop, and academic dismissal. A copy of the handbook is available on Campus Groups.

**Financial Aid**

Jones Graduate School of Business scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded one academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (i.e. scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

**Additional Information**

For additional information, please see the Jones Graduate School of Business website: [https://business.rice.edu/](https://business.rice.edu/)

**Opportunities for the MBA Degree Programs**

**Independent Study**

**Minimum Hours Requirement**

Each credit of independent study should contain approximately as much time content as a one-credit course at Jones Graduate School of Business, which is 12 hours of class time, plus an average of at least 24–36 outside-class hours, for a minimum total of 36–48 hours of work. Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 credit hours; 3.0 credit independent study projects are rarely approved. Occasionally, a group independent study project may arise, though most independent studies are undertaken by individual students.

The number of credits for an independent study must be determined at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the Jones Graduate School of Business associate registrar must be approved by the Academic Standards Committee. The committee will rely on input from sponsoring faculty in making its decision about ex post credit increases. Requests to increase the number of project credit hours must be made before the end of the second week of classes in the term in which the project begins.

**Restrictions**

No student may take more than three credit hours of independent study during the course of the MBA program without the approval of the Academic Standards Committee. If an independent study is proposed that would cause a student to exceed the 3.0 credit limit, the Academic Standards Committee will select two faculty members, other than the faculty member who will supervise the project, within the area most closely related to the study's academic content to review and approve the study. Independent study exceeding 3.0 credits in total should consider current policies restricting use of independent study as well as the incremental value of additional independent study in light of past independent studies. If the study does not align with any of the Jones Graduate School of Business academic groups, the Academic Standards Committee will perform the review and make the final approval decision.

Independent study projects are for academic credit, not for hire. Students may not earn credit for paid work.

**Faculty Sponsorship**

Independent study projects normally are sponsored only by full-time Jones Graduate School of Business faculty; faculty typically sponsor projects only in their area of expertise. Students wanting sponsorship by a part-time faculty member must submit a project overview to the Academic Standards Committee and obtain the committee's approval before the term in which the project is to begin.

**Common Requirements**

The goal of independent study projects is to advance or deepen a student’s knowledge or competency in a business discipline or activity. To facilitate these goals, independent study projects generally fall into two broad categories:

1. directed reading and study resulting in a research paper, or
2. an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the “deliverable.”

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, to ensure relatively equal workloads per unit of independent study credit and some common requirements across independent study projects, students and/or sponsoring faculty should:

1. Prepare and submit to the Jones Graduate School of Business associate registrar an overview of the independent study project with number of project credits, anticipated final results, and a broad timeline of anticipated project milestones.
2. Meet to discuss the project, after the initial agreement on the project scope, at least once every two to three weeks.
3. Prepare a final paper (in the case of directed reading and research projects) or complete a concrete deliverable (for example, computer program, survey results, empirical analyses, etc.) together with an executive summary of the project (in the case of experiential projects).
Applications
Independent study applications are available for interested students on Campus Groups. Completed independent study applications must be approved by the senior associate dean of academic affairs. Completed and approved applications are due to the Jones Graduate School of Business associate registrar by the first week of the term in which the project will be completed. The student will be registered for MGMT 700/MGMT 800 independent study for the appropriate credit amount, only when the appropriate permissions have been obtained.

Additional Information
For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Master of Business Administration (MBA) Degree, Full-Time Program, and a Major Concentration in Strategic Management

Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MBA Degree, Full-Time Program

The MBA degree is a non-thesis master’s degree. For general university requirements, please see Non-Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the full-time MBA degree program must complete:

• A minimum of 60 credit hours to satisfy degree requirements.
• A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
• A Global Field Experience (during the first year of enrollment in the degree program).
• A maximum of 6 credit hours from graduate-level coursework as transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab. Information regarding Exchange Program transfer credit can be found in the Student Handbook under Campus Groups.
• A minimum overall GPA of 3.00 or higher in all Rice coursework.

• A minimum overall GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master’s degree with a minimum grade of C (2.00 grade points) in each course.

Students who register for a standard course load of 9-18 credit hours per semester are considered full-time students. All registration and elective selection via add/drop is completed online through ESTHER (https://esther.rice.edu). It is the responsibility of the student to monitor and maintain his or her schedule and academic record.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

The major concentration in Strategic Management prepares students for careers in strategic planning, management consulting, and global business management across a variety of industries such as health care, energy, high technologies, consumer products, and professional services.

**Major Concentration: Strategic Management**

The courses listed are approved to satisfy the requirements for the Strategic Management concentration for the current academic year only. Courses not on this official list may be substituted upon approval of the Jones Graduate School of Business Associate Registrar. Students and their academic advisors should identify and clearly document the courses to be taken with the Jones Graduate School Associate Registrar. Electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

### Elective Requirements

Select an additional 27-30 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 60 total credit hours.

### Core Requirements

### Footnotes and Additional Information

1. The courses listed are approved to satisfy the requirements for the Strategic Management concentration for the current academic year only. Courses not on this official list may be substituted upon approval of the Jones Graduate School of Business Associate Registrar. Students and their academic advisors should identify and clearly document the courses to be taken with the Jones Graduate School of Business Associate Registrar.

2. MGMT 561 can only be applied toward major concentration requirements if not counted as a Custom Core course.
Students may only apply one Jones EdGE course (MGMT 786, MGMT 789, or MGMT 797) towards major concentration requirements.

Policies for the MBA Degree Programs

MBA Admission Requirements

Applicants to the MBA programs must submit scores on the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). International applicants, who did not earn an undergraduate degree from an institution where the primary language of instruction was English must submit a valid score report from either TOEFL, PTE, or IELTS. Admission to the MBA programs is open to students regardless of their undergraduate major, but it is highly selective and limited to those who have performed with distinction in their previous academic work and on the GMAT or GRE.

Academic and Professional Standards

Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MBA program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

Academic Standards

A minimum overall grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university, but outside the JGSB) are counted in the overall grade point average calculation.

Students with an overall grade point average lower than 3.00 at the end of any semester will be notified of academic standing. Students not meeting the 3.00 requirement will be provided specific instruction and guidance on the next steps specific to their academic situation. In some cases, students may submit an appeal to the JGSB Academic Standards Committee, requesting to be placed on academic probation. The committee reviews all academic cases, and may consult the dean’s office for counsel and/or suggestions on proposed handling of the case. The committee will decide, based on the circumstances of the appeal, whether the student may resume studies on academic probation; is to be academically suspended for one semester or an academic year; or is to be dismissed from the MBA program.

Students proposing to return after a period of academic suspension must follow the appropriate procedures outlined in the General Announcements by the Office of Graduate and Postdoctoral Studies to receive permission to be readmitted. If permitted to return, the student will pay the current rate of tuition, based upon the class of students s/he is joining.

Only courses in which a grade of C or above is earned will be counted for credit toward graduation. If students receive a grade below C in a course required for graduation, they must repeat the course. If students receive a grade lower than C in an elective course, they need not repeat the specific course, but they must make up the credit hours. If the required course is not offered again prior to graduation, the student will be permitted to take the course the following academic year, but will be charged the current pro-rated tuition for the program in which the additional coursework is completed.

Students on academic probation must complete all future courses with a grade of C or above and may be considered candidates for student offices by permission only. Students are removed from probation only upon achieving an overall grade point average of at least 3.00.

JGSB students may not take courses pass/fail to count toward their degree requirements. JGSB students may audit courses with departmental and professor approval. The courses will not count toward the MBA, but will appear on the transcript.

Professional Standards

MBA students are held to the highest standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct (p. 82). The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing specific charges. This probationary notice, however, is not required as a precondition for filing specific charges.

Class Attendance Policy

Students are expected to be in class on the first day of each term. The instructor reserves the right to exclude a student from their course who is absent on the first day. Students should refer to the specific attendance policy for each program. This information can be found in the Jones Graduate School of Business Student Handbook, which is referenced below. For special circumstances, students should see the Director of Advising in the Student Program Office and the instructor.

Guidelines for Appealing Academic Dismissal

The Process

A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.

Timing

If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

Appeals

Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

Confidentiality

The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.
Grade Appeal Process

Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.

2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.

3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.

4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.

5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student, and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).

6. Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.

The Family Educational Rights and Privacy Act of 1974 and amendments govern records of these actions.

MBA Elective Course Add/Drop Policy and Procedures

Due to the unique term schedule followed by the Jones Graduate School of Business MBA programs, MBA students have special procedures they must follow to make schedule changes. The Jones Graduate School of Business Registrar Department administers an add/drop policy which allows students to add/drop elective courses at various times throughout the semester. For all elective courses, student may not add/drop a course after the deadline for the appropriate term.

Withdrawal Policy

A Jones Graduate School of Business student, participating in any offered program, may voluntarily withdraw from school at any time. Upon withdrawal, Rice University applies a sliding scale to tuition, which is noted in the university's Academic Calendar posted on the Rice Office of the Registrar website (https://registrar.rice.edu/calendars/).

Jones Graduate School of Business Student Handbook

Generally, the Jones Graduate School of Business adheres to the academic regulations of Rice University. However, the Jones Graduate School of Business MBA program has unique policies and procedures that vary from the Office of Graduate and Postdoctoral Studies regarding, but not limited to, leave of absence, withdrawals and readmission, add/drop, and academic dismissal. A copy of the handbook is available on Campus Groups.

Financial Aid

Jones Graduate School of Business scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded one academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (i.e. scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

Additional Information

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/.

Opportunities for the MBA Degree Programs

Independent Study

Minimum Hours Requirement

Each credit of independent study should contain approximately as much time content as a one-credit course at Jones Graduate School of Business, which is 12 hours of class time, plus an average of at least 24–36 outside-class hours, for a minimum total of 36–48 hours of work. Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 credit hours; 3.0 credit independent study projects are rarely approved. Occasionally, a group independent study project may arise, though most independent studies are undertaken by individual students.

The number of credits for an independent study must be determined at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the Jones Graduate School of Business associate registrar must be approved by the Academic Standards Committee. The committee will rely on input from sponsoring faculty in making its decision about ex post credit increases. Requests to increase the number of project credit hours must be made before the end of the second week of classes in the term in which the project begins.

Restrictions

No student may take more than three credit hours of independent study during the course of the MBA program without the approval of the Academic Standards Committee. If an independent study is proposed that would cause a student to exceed the 3.0 credit limit, the Academic Standards Committee will select two faculty members, other than the faculty member who will supervise the project, within the area most closely related to the study’s academic content to review and approve the study. Independent study exceeding 3.0 credits in total should consider current policies restricting use of independent study as well as the incremental value of additional independent study in light of past independent studies. If the study does not align with any of the Jones Graduate School of Business academic groups, the Academic Standards Committee will perform the review and make the final approval decision.

Independent study projects are for academic credit, not for hire. Students may not earn credit for paid work.
Faculty Sponsorship

Independent study projects normally are sponsored only by full-time Jones Graduate School of Business faculty; faculty typically sponsor projects only in their area of expertise. Students wanting sponsorship by a part-time faculty member must submit a project overview to the Academic Standards Committee and obtain the committee's approval before the term in which the project is to begin.

Common Requirements

The goal of independent study projects is to advance or deepen a student's knowledge or competency in a business discipline or activity.

To facilitate these goals, independent study projects generally fall into two broad categories:

1. directed reading and study resulting in a research paper, or
2. an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the "deliverable."

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, to ensure relatively equal workloads per unit of independent study credit and some common requirements across independent study projects, students and/or sponsoring faculty should:

1. Prepare and submit to the Jones Graduate School of Business associate registrar an overview of the independent study project with number of project credits, anticipated final results, and a broad timeline of anticipated project milestones.
2. Meet to discuss the project, after the initial agreement on the project scope, at least once every two to three weeks.
3. Prepare a final paper (in the case of directed reading and research projects) or complete a concrete deliverable (for example, computer program, survey results, empirical analyses, etc.) together with an executive summary of the project (in the case of experiential projects).
4. File a copy of each student’s final paper, or executive summary, with the Jones Graduate School of Business associate registrar.

Applications

Independent study applications are available for interested students on Campus Groups. Completed independent study applications must be approved by the senior associate dean of academic affairs. Completed and approved applications are due to the Jones Graduate School of Business associate registrar by the first week of the term in which the project will be completed. The student will be registered for MGMT 700/MGMT 800 independent study for the appropriate credit amount, only when the appropriate permissions have been obtained.

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Master of Business Administration (MBA) Degree, Online Program

Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MBA Degree, Online Program

The MBA degree is a non-thesis master's degree. For general university requirements, please see Non-Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MBA@Rice degree must complete:

- A minimum of 54 credit hours to satisfy degree requirements.
- A minimum overall GPA of 3.00 or higher in all Rice coursework.
- A minimum overall GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree with a minimum grade of C (2.00 grade points) in each course.

MBA@Rice Program

The MBA@Rice program consists of a 24-month curriculum generally earned over eight consecutive terms (3-month quadimesters) over a two-year period.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Total Credit Hours 54

Footnotes and Additional Information
1 MGMT 513 and MGMT 514 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.
2 To fulfill the remaining requirements for the Online MBA degree program, students must complete an additional 13.5 credit hours from departmental (MGMT) course offerings at the 500-level or above to reach 54 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.)

Proposed Plan-of-Study
The following plan-of-study represents the lockstep two-year sequence in which students pursuing the MBA@Rice degree complete the required coursework. In some instances students may follow a three-year or a four-year program. In those instances, students must agree to follow a specific course sequence as outlined by the Student Success Advisor.

Footnotes and Additional Information
1 MGMT 513, MGMT 514, and MGMT 515 together comprise the Residential Intensive Learning Experiences (ILE) and Global Field Experience requirements for this degree program. It is highly encouraged that these courses are taken in the first year of the program (or as early in the program as possible). Students should consult their Student Success Advisor for more information regarding enrollment in these courses.
2 To fulfill the remaining requirements for the Online MBA degree program, students must complete an additional 13.5 credit hours from departmental (MGMT) course offerings at the 500-level or above to reach 54 total credit hours.
Policies for the MBA Degree, Online Program

MBA Admission Requirements

Admission to the MBA degree program is open to students regardless of their undergraduate major, but the program is highly selective and access is limited to those who have performed with distinction across all areas of the application. A bachelor’s degree (or equivalent) from an accredited undergraduate institution is required. All applicants submit an interview as part of their admission requirements.

All applicants to the MBA degree program must submit the following:

- an online application and application fee
- scores from the Graduate Management Admission Test (GMAT), the Graduate Record Examination (GRE),* or the Executive Assessment (EA)**
- transcripts from all previously-attended and/or degree-granting institutions
- resume with complete work history
- essays
- letter(s) of recommendation

Notes:

*Scores from the TOEFL, PTE, or IELTS are also required for international applicants, whose undergraduate degree was from an institution where the primary language of instruction was not English.

**The Executive Assessment (EA) is only accepted for MBA Degree, Executive Program applicants.

The MBA@Rice Program

The MBA@Rice Program does not have specific prerequisite courses required for admission.

Academic and Professional Standards

Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MBA program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

Academic Standards

A minimum overall grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university, but outside the JGSB) are counted in the overall grade point average calculation.

Students with an overall grade point average lower than 3.00 at the end of any semester will be notified of academic standing. Students not meeting the 3.00 requirement will be provided specific instruction and guidance on the next steps specific to their academic situation. In some cases, students may submit an appeal to the JGSB Academic Standards Committee, requesting to be placed on academic probation. The committee reviews all academic cases, and may consult the dean’s office for counsel and/or suggestions on proposed handling of the case. The committee will decide, based on the circumstances of the appeal, whether the student may resume studies on academic probation, is to be academically suspended for one semester or an academic year, or is to be dismissed from the MBA program.

Guidelines for Appealing Academic Dismissal

The Process

A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.

Timing

If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

Students proposing to return after a period of academic suspension must follow the appropriate procedures outlined in the General Announcements by the Office of Graduate and Postdoctoral Studies to receive permission to be readmitted. If permitted to return, the student will pay the current rate of tuition, based upon the class of students s/he is joining.

Only courses in which a grade of C or above is earned will be counted for credit toward graduation. If students receive a grade below C in a course required for graduation, they must repeat the course. If students receive a grade lower than C in an elective course, they need not repeat the specific course, but they must make up the credit hours. If the required course is not offered again prior to graduation, the student will be permitted to take the course the following academic year, but will be charged the current pro-rated tuition for the program in which the additional coursework is completed.

Students on academic probation must complete all future courses with a grade of C or above and may be considered candidates for student offices by permission only. Students are removed from probation only upon achieving an overall grade point average of at least 3.00.

JGSB students may not take courses pass/fail to count toward their degree requirements. JGSB students may audit courses with departmental and professor approval. The courses will not count toward the MBA, but will appear on the transcript.

Professional Standards

MBA students are held to the highest standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct (p. 82). The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing specific charges. This probationary notice, however, is not required as a precondition for filing specific charges.

Rice University
Appeals
Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

Confidentiality
The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

Grade Appeal Process
Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.
2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).
6. Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.
7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.

The Family Educational Rights and Privacy Act of 1974 and amendments govern records of these actions.

MBA Elective Course Add/Drop Policy and Procedures
Due to the unique term schedule followed by the Jones Graduate School of Business MBA programs, MBA students have special procedures they must follow to make schedule changes. The Jones Graduate School of Business Registrar Department administers an add/drop policy which allows students to add/drop elective courses at various times throughout the semester. For all elective courses, student may not add/drop a course after the deadline for the appropriate term.

Withdrawal Policy
A Jones Graduate School of Business student, participating in any offered program, may voluntarily withdraw from school at any time. Upon withdrawal, Rice University applies a sliding scale to tuition, which is noted in the university’s Academic Calendar posted on the Rice Office of the Registrar website (https://registrar.rice.edu/calendars/).

Jones Graduate School of Business Student Handbook
Generally, the Jones Graduate School of Business adheres to the academic regulations of Rice University. However, the Jones Graduate School of Business MBA program has unique policies and procedures that vary from the Office of Graduate and Postdoctoral Studies regarding, but not limited to, leave of absence, withdrawals and readmission, add/drop, and academic dismissal. A copy of the handbook is available on Campus Groups.

Financial Aid
Jones Graduate School of Business scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded one academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (i.e. scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

Additional Information
For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Opportunities for the MBA Degree, Online Program

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Master of Business Administration (MBA) Degree, Professional Program
Program Learning Outcomes for the MBA Degree
Upon completing the MBA degree, students will be able to:
1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MBA Degree, Professional Program
The MBA degree is a non-thesis master’s degree. For general university requirements, please see Non-Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate
The Jones Graduate School of Business offers the MBA for Professionals program in three formats. These programs cover the same content, but are offered at different times and over different periods.

Students choose a program based on life-style preference and professional and personal commitments. The current three formats are:

- MBA for Professionals, Evening Program (p. 261), or
- MBA for Professionals, Weekend Program (p. 261), or
- MBA for Professionals, Evening Extended Program (p. 262)

### MBA for Professionals, Evening Program

The MBA for Professionals Evening Program consists of a 22-month, lock-step curriculum delivered in four consecutive semesters over a two-year period. Students pursuing the MBA for Professionals Evening Program must complete:

- A minimum of 54 credit hours as listed below to satisfy degree requirements.
- A Global Field Experience (during the first year of enrollment in the degree program).
- A minimum overall GPA of 3.00 in required coursework and with a minimum grade of C (2.00 grade points) in each course.

Global Field Experience Requirement

MGMW 789 GLOBAL FIELD EXPERIENCE 3

Custom Core Courses

MGMW 541 ECONOMIC ENVIRONMENT OF BUSINESS or MGMW 561 BUSINESS-GOVERNMENT RELATIONS 1.5

Elective Requirements 4

Select an additional 16.5 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above 16.5

Total Credit Hours 54

Footnotes and Additional Information

1 Classes are offered predominately on Friday evenings from 4:00pm – 9:30pm and Saturdays from 7:30am – 6:30pm every other weekend.
2 MGMW 500, MGMW 594, and MGMW 596 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.
3 Students participate in a required global field experience during the first year of the program. Additional costs apply towards this global experience.
4 Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. If students wish to apply courses that are offered outside of the Jones Graduate School of Business (MGMP, MGMT, or MICO course offerings), the student must obtain permission from the Jones Graduate School of Business registrar department. Electives are offered on the weekend schedule, the evening schedule, and the daytime schedule.

MBA for Professionals Evening Extended Program

The MBA for Professionals-Evening Extended Program allows students to complete the same curricular requirements as the MBA for Professionals Evening Program (a minimum of 54 credit hours) over a longer period of time (typically 3-5 academic years, rather than 22 months). There are minimum requirements each semester, but the structure facilitates the alignment of the pace of completion with professional preferences and commitments.

Policies for the MBA Degree, Professional Program

MBA Admission Requirements

Admission to the MBA degree program is open to students regardless of their undergraduate major, but the program is highly selective and access is limited to those who have performed with distinction across all areas of the application. A bachelor's degree (or equivalent) from an accredited undergraduate institution is required. All applicants submit an interview as part of their admission requirements.

All applicants to the MBA degree program must submit the following:

- an online application and application fee
- scores from the Graduate Management Admission Test (GMAT), the Graduate Record Examination (GRE),* or the Executive Assessment (EA)**
- transcripts from all previously-attended and/or degree-granting institutions
- resume with complete work history
- essays
- letter(s) of recommendation

Notes:

*Scores from the TOEFL, PTE, or IELTS are also required for international applicants, whose undergraduate degree was from an institution where the primary language of instruction was not English.

**The Executive Assessment (EA) is only accepted for MBA Degree, Executive Program applicants.

The MBA for Professionals Programs

The MBA for Professionals Programs do not have specific prerequisite courses required for admission.

Academic and Professional Standards

Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MBA program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

Academic Standards

A minimum overall grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university, but outside the JGSB) are counted in the overall grade point average calculation.

Students with an overall grade point average lower than 3.00 at the end of any semester will be notified of academic standing. Students not meeting the 3.00 requirement will be provided specific instruction and guidance on the next steps specific to their academic situation. In some cases, students may submit an appeal to the JGSB Academic...
Standards Committee, requesting to be placed on academic probation. The committee reviews all academic cases, and may consult the dean's office for counsel and/or suggestions on proposed handling of the case. The committee will decide, based on the circumstances of the appeal, whether the student may resume studies on academic probation; is to be academically suspended for one semester or an academic year; or is to be dismissed from the MBA program.

Students proposing to return after a period of academic suspension must follow the appropriate procedures outlined in the General Announcements by the Office of Graduate and Postdoctoral Studies to receive permission to be readmitted. If permitted to return, the student will pay the current rate of tuition, based upon the class of students s/he is joining.

Only courses in which a grade of C or above is earned will be counted for credit toward graduation. If students receive a grade below C in a course required for graduation, they must repeat the course. If students receive a grade lower than C in an elective course, they need not repeat the specific course, but they must make up the credit hours. If the required course is not offered again prior to graduation, the student will be permitted to take the course the following academic year, but will be charged the current pro-rated tuition for the program in which the additional coursework is completed.

Students on academic probation must complete all future courses with a grade of C or above and may be considered candidates for student offices by permission only. Students are removed from probation only upon achieving an overall grade point average of at least 3.00.

JGSB students may not take courses pass/fail to count toward their degree requirements. JGSB students may audit courses with departmental and professor approval. The courses will not count toward graduation. If students receive a grade below C in a course the following year, they need not repeat the specific course. The courses will not count toward the MBA, but will appear on the transcript.

Professional Standards
MBA students are held to the highest standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct (p. 82). The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing specific charges. This probationary notice, however, is not required as a precondition for filing specific charges.

Guidelines for Appealing Academic Dismissal
The Process
A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.

Timing
If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

Appeals
Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

Confidentiality
The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

Grade Appeal Process
Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.
2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).
6. Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.
7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.

The Family Educational Rights and Privacy Act of 1974 and amendments govern records of these actions.

MBA Elective Course Add/Drop Policy and Procedures
Due to the unique term schedule followed by the Jones Graduate School of Business MBA programs, MBA students have special procedures they must follow to make schedule changes. The Jones Graduate School of Business Registrar Department administers an add/drop policy which allows students to add/drop elective courses at various times throughout
the semester. For all elective courses, student may not add/drop a course after the deadline for the appropriate term.

**Class Attendance Policy**

Students are expected to be in class on the first day of each term. The instructor reserves the right to exclude a student from their course who is absent on the first day. Students should refer to the specific attendance policy for each program. This information can be found in the Jones Graduate School of Business Student Handbook, which is referenced below. For special circumstances, students should see the Director of Advising in the Student Program Office and the instructor.

**Withdrawal Policy**

A Jones Graduate School of Business student, participating in any offered program, may voluntarily withdraw from school at any time. Upon withdrawal, Rice University applies a sliding scale to tuition, which is noted in the university’s Academic Calendar posted on the Rice Office of the Registrar website (https://registrar.rice.edu/calendars/).

**Jones Graduate School of Business Student Handbook**

Generally, the Jones Graduate School of Business adheres to the academic regulations of Rice University. However, the Jones Graduate School of Business MBA program has unique policies and procedures that vary from the Office of Graduate and Postdoctoral Studies regarding, but not limited to, leave of absence, withdrawals and readmission, add/drop, and academic dismissal. A copy of the handbook is available on Campus Groups.

**Financial Aid**

Jones Graduate School of Business scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded one academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (i.e. scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

**Additional Information**

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/.

**Opportunities for the MBA Degree, Professional Program**

**Independent Study**

**Minimum Hours Requirement**

Each credit of independent study should contain approximately as much time content as a one-credit course at Jones Graduate School of Business, which is 12 hours of class time, plus an average of at least 24–36 outside-class hours, for a minimum total of 36–48 hours of work. Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 credit hours; 3.0 credit independent study projects are rarely approved. Occasionally, a group independent study project may arise, though most independent studies are undertaken by individual students.

The number of credits for an independent study must be determined at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the Jones Graduate School of Business associate registrar must be approved by the Academic Standards Committee. The committee will rely on input from sponsoring faculty in making its decision about ex post credit increases. Requests to increase the number of project credit hours must be made before the end of the second week of classes in the term in which the project begins.

**Restrictions**

No student may take more than three credit hours of independent study during the course of the MBA program without the approval of the Academic Standards Committee. If an independent study is proposed that would cause a student to exceed the 3.0 credit limit, the Academic Standards Committee will select two faculty members, other than the faculty member who will supervise the project, within the area most closely related to the study’s academic content to review and approve the study. Independent study exceeding 3.0 credits in total should consider current policies restricting use of independent study as well as the incremental value of additional independent study in light of past independent studies. If the study does not align with any of the Jones Graduate School of Business academic groups, the Academic Standards Committee will perform the review and make the final approval decision.

Independent study projects are for academic credit, not for hire. Students may not earn credit for paid work.

**Faculty Sponsorship**

Independent study projects normally are sponsored only by full-time Jones Graduate School of Business faculty; faculty typically sponsor projects only in their area of expertise. Students wanting sponsorship by a part-time faculty member must submit a project overview to the Academic Standards Committee and obtain the committee’s approval before the term in which the project is to begin.

**Common Requirements**

The goal of independent study projects is to advance or deepen a student’s knowledge or competency in a business discipline or activity. To facilitate these goals, independent study projects generally fall into two broad categories:

1. directed reading and study resulting in a research paper, or
2. an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the “deliverable.”

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, to ensure relatively equal workloads per unit of independent study credit and some common requirements across independent study projects, students and/or sponsoring faculty should:

1. Prepare and submit to the Jones Graduate School of Business associate registrar an overview of the independent study project with number of project credits, anticipated final results, and a broad timeline of anticipated project milestones.
2. Meet to discuss the project, after the initial agreement on the project scope, at least once every two to three weeks.
3. Prepare a final paper (in the case of directed reading and research projects) or complete a concrete deliverable (for example, computer program, survey results, empirical analyses, etc.) together with an executive summary of the project (in the case of experiential projects).
4. File a copy of each student's final paper, or executive summary, with the Jones Graduate School of Business associate registrar.

**Applications**

Independent study applications are available for interested students on Campus Groups. Completed independent study applications must be approved by the senior associate dean of academic affairs. Completed and approved applications are due to the Jones Graduate School of Business associate registrar by the first week of the term in which the project will be completed. The student will be registered for MGMT 700/MGMT 800 independent study for the appropriate credit amount, only when the appropriate permissions have been obtained.

**Additional Information**

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

---

**Master of Business Administration (MBA) Degree, Professional Program (Evening, Evening Extended)**

**Program Learning Outcomes for the MBA Degree**

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

**Requirements for the MBA Degree, Professional Program (Evening, Evening Extended)**

The MBA degree is a non-thesis master's degree. For general university requirements, please see Non-Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). The Jones Graduate School of Business offers the MBA Professional Program in three formats. These programs cover the same content, but are offered at different times and over different periods.

Students choose a program based on lifestyle preference and professional and personal commitments. The current three formats are:

- MBA Professional Program, Evening (p. 265), or
- MBA Professional Program, Evening Extended (p. 266), or
- MBA Professional Program, Weekend (p. 269)

**MBA Professional Program, Evening**

The MBA Professional Program, Evening, consists of a 22-month, lock-step curriculum delivered in four consecutive semesters over a two-year period. Students pursuing the MBA Professional Program, Evening, must complete:

- A minimum of 54 credit hours to satisfy degree requirements.
- A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
- A Global Field Experience (during the first year of enrollment in the degree program).
- A minimum overall GPA of 3.00 or higher in all Rice coursework.
- A minimum overall GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master’s degree with a minimum grade of C (2.00 grade points) in each course.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

All applicants to the MBA degree program must submit the following:

- an online application and application fee
- scores from the Graduate Management Admission Test (GMAT), the Graduate Record Examination (GRE),* or the Executive Assessment (EA)**
- transcripts from all previously-attended and/or degree-granting institutions
- resume with complete work history
- essays
- letter(s) of recommendation

Notes:
*Scores from the TOEFL, PTE, or IELTS are also required for international applicants, whose undergraduate degree was from an institution where the primary language of instruction was not English.
**The Executive Assessment (EA) is only accepted for MBA Degree, Executive Program applicants.

The MBA Professional Program (Evening, Evening Extended)
The MBA Professional Program (Evening, Evening Extended) does not have specific prerequisite courses required for admission.

Academic and Professional Standards
Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MBA program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

Academic Standards
A minimum overall grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university, but outside the JGSB) are counted in the overall grade point average calculation.

Students with an overall grade point average lower than 3.00 at the end of any semester will be notified of academic standing. Students not meeting the 3.00 requirement will be provided specific instruction and guidance on the next steps specific to their academic situation.

Policies for the MBA Degree, Professional Program (Evening, Evening Extended)
MBA Admission Requirements
Admission to the MBA degree program is open to students regardless of their undergraduate major, but the program is highly selective and access is limited to those who have performed with distinction across all areas of the application. A bachelor’s degree (or equivalent) from an accredited undergraduate institution is required. All applicants submit an interview as part of their admission requirements.

All applicants to the MBA degree program must submit the following:

Global Field Experience Requirement
MGMP 789  GLOBAL FIELD EXPERIENCE 3

Elective Requirements 4
Select an additional 16.5 credit hours from departmental (MGMP, MGMT, MICO) course offerings at the 500-level or above 16.5

Total Credit Hours 54

Footnotes and Additional Information
1. Required first year classes are offered during the week from 6:15pm to 9:30pm predominantly on Monday and Wednesday evenings.
2. MGMP 500, MGMP 560, MGMP 594, MGMP 596, MGMP 708, MGMP 709 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.
3. Students participate in a required global field experience during the first year of enrollment in the degree program. Additional costs apply towards this global experience.
4. To fulfill the remaining requirements for the degree program, students must complete an additional 16.5 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 54 total credit hours. (MGMP 703, MGMP 704, and MGMP 705 are not accepted as electives.) Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. If students wish to apply courses that are offered outside of the Jones Graduate School of Business (MGMP, MGMT, or MICO course offerings), the student must obtain permission from the Jones Graduate School of Business registrar department. Electives are offered on the evening schedule, the weekend schedule, and the daytime schedule.

MBA Professional Program, Evening Extended
The MBA Professional Program, Evening Extended, allows students to complete the same curricular requirements as the MBA Professional Program, Evening, (a minimum of 54 credit hours) over a longer period of time (typically 3-5 academic years, rather than 22 months). There are minimum requirements each semester, but the structure facilitates the alignment of the pace of completion with professional preferences and commitments.
the course the following academic year, but will be charged the current pro-rated tuition for the program in which the additional coursework is completed.

Students on academic probation must complete all future courses with a grade of C or above and may be considered candidates for student offices by permission only. Students are removed from probation only upon achieving an overall grade point average of at least 3.00.

JGSB students may not take courses pass/fail to count toward their degree requirements. JGSB students may audit courses with departmental and professor approval. The courses will not count toward the MBA, but will appear on the transcript.

Professional Standards
MBA students are held to the highest standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct (p. 82). The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing specific charges. This probationary notice, however, is not required as a precondition for filing specific charges.

Class Attendance Policy
Students are expected to be in class on the first day of each term. The instructor reserves the right to exclude a student from their course who is absent on the first day. Students should refer to the specific attendance policy for each program. This information can be found in the Jones Graduate School of Business Student Handbook, which is referenced below. For special circumstances, students should see the Director of Advising in the Student Program Office and the instructor.

Guidelines for Appealing Academic Dismissal
The Process
A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.

Timing
If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

Appeals
Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

Confidentiality
The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

Grade Appeal Process
Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.
2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).
6. Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.
7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.

The Family Educational Rights and Privacy Act of 1974 and amendments govern records of these actions.

MBA Elective Course Add/Drop Policy and Procedures
Due to the unique term schedule followed by the Jones Graduate School of Business MBA programs, MBA students have special procedures they must follow to make schedule changes. The Jones Graduate School of Business Registrar Department administers an add/drop policy which allows students to add/drop elective courses at various times throughout the semester. For all elective courses, student may not add/drop a course after the deadline for the appropriate term.

Withdrawal Policy
A Jones Graduate School of Business student, participating in any offered program, may voluntarily withdraw from school at any time. Upon withdrawal, Rice University applies a sliding scale to tuition, which is noted in the university’s Academic Calendar posted on the Rice Office of the Registrar website (https://registrar.rice.edu/calendars/).
Jones Graduate School of Business Student Handbook

Generally, the Jones Graduate School of Business adheres to the academic regulations of Rice University. However, the Jones Graduate School of Business MBA program has unique policies and procedures that vary from the Office of Graduate and Postdoctoral Studies regarding, but not limited to, leave of absence, withdrawals and readmission, add/drop, and academic dismissal. A copy of the handbook is available on Campus Groups.

Financial Aid

Jones Graduate School of Business scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded one academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (i.e. scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

Additional Information

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Opportunities for the MBA Degree, Professional Program (Evening, Evening Extended)

Independent Study

Minimum Hours Requirement

Each credit of independent study should contain approximately as much time content as a one-credit course at Jones Graduate School of Business, which is 12 hours of class time, plus an average of at least 24–36 outside-class hours, for a minimum total of 36–48 hours of work. Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 credit hours; 3.0 credit independent study projects are rarely approved. Occasionally, a group independent study project may arise, though most independent studies are undertaken by individual students.

The number of credits for an independent study must be determined at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the Jones Graduate School of Business associate registrar must be approved by the Academic Standards Committee. The committee will rely on input from sponsoring faculty in making its decision about ex post credit increases. Requests to increase the number of project credit hours must be made before the end of the second week of classes in the term in which the project begins.

Restrictions

No student may take more than three credit hours of independent study during the course of the MBA program without the approval of the Academic Standards Committee. If an independent study is proposed that would cause a student to exceed the 3.0 credit limit, the Academic Standards Committee will select two faculty members, other than the faculty member who will supervise the project, within the area most closely related to the study’s academic content to review and approve the study. Independent study exceeding 3.0 credits in total should consider current policies restricting use of independent study as well as the incremental value of additional independent study in light of past independent studies. If the study does not align with any of the Jones Graduate School of Business academic groups, the Academic Standards Committee will perform the review and make the final approval decision.

Independent study projects are for academic credit, not for hire. Students may not earn credit for paid work.

Faculty Sponsorship

Independent study projects normally are sponsored only by full-time Jones Graduate School of Business faculty; faculty typically sponsor projects only in their area of expertise. Students wanting sponsorship by a part-time faculty member must submit a project overview to the Academic Standards Committee and obtain the committee’s approval before the term in which the project is to begin.

Common Requirements

The goal of independent study projects is to advance or deepen a student’s knowledge or competency in a business discipline or activity. To facilitate these goals, independent study projects generally fall into two broad categories:

1. directed reading and study resulting in a research paper, or
2. an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the “deliverable.”

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, to ensure relatively equal workloads per unit of independent study credit and some common requirements across independent study projects, students and/or sponsoring faculty should:

1. Prepare and submit to the Jones Graduate School of Business associate registrar an overview of the independent study project with number of project credits, anticipated final results, and a broad timeline of anticipated project milestones.
2. Meet to discuss the project, after the initial agreement on the project scope, at least once every two to three weeks.
3. Prepare a final paper (in the case of directed reading and research projects) or complete a concrete deliverable (for example, computer program, survey results, empirical analyses, etc.) together with an executive summary of the project (in the case of experiential projects).
4. File a copy of each student’s final paper, or executive summary, with the Jones Graduate School of Business associate registrar.

Applications

Independent study applications are available for interested students on Campus Groups. Completed independent study applications must be approved by the senior associate dean of academic affairs. Completed and approved applications are due to the Jones Graduate School of Business associate registrar by the first week of the term in which the project will be completed. The student will be registered for MGMT 700/MGMT 800 independent study for the appropriate credit amount, only when the appropriate permissions have been obtained.

Additional Information

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/
Master of Business Administration (MBA) Degree, Professional Program (Weekend)

Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MBA Degree, Professional Program (Weekend)

The MBA degree is a non-thesis master’s degree. For general university requirements, please see Non-Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). The Jones Graduate School of Business offers the MBA Professional Program in three formats. These programs cover the same content, but are offered at different times and over different periods.

Students choose a program based on lifestyle preference and professional and personal commitments. The current three formats are:

• MBA Professional Program, Evening (p. 265), or
• MBA Professional Program, Evening Extended (p. 265), or
• MBA Professional Program, Weekend (p. )

MBA Professional Program, Weekend

The MBA Professional Program, Weekend, consists of a 22-month, lock-step curriculum delivered in four consecutive semesters over a two-year period. Students pursuing the MBA Professional Program, Weekend, must complete:

• A minimum of 54 credit hours to satisfy degree requirements.
• A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
• A Global Field Experience.
• A minimum overall GPA of 3.00 or higher in all Rice coursework.
• A minimum overall GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master’s degree with a minimum grade of C (2.00 grade points) in each course.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Total Credit Hours

| Credit Hours | 54          |

Footnotes and Additional Information

1 Classes are offered predominately on Friday evenings from 4:00pm – 9:30pm and Saturdays from 7:30am – 6:30pm every other weekend.
2 MGMW 500, MGMW 594, and MGMW 596 are taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As S/U courses, they do not apply to the requirement of a minimum grade of C (2.00 grade points) in each required course.
Students participate in a required global field experience during the first year of the program. Additional costs apply towards this global experience.

To fulfill the remaining requirements for the degree program, students must complete an additional 16.5 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 54 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. If students wish to apply courses that are offered outside of the Jones Graduate School of Business (MGMP, MGMT, or MICO course offerings), the student must obtain permission from the Jones Graduate School of Business registrar department. Electives are offered on the weekend schedule, the evening schedule, and the daytime schedule.

Policies for the MBA Degree, Professional Program (Weekend)

MBA Admission Requirements

Admission to the MBA degree program is open to students regardless of their undergraduate major, but the program is highly selective and access is limited to those who have performed with distinction across all areas of the application. A bachelor’s degree (or equivalent) from an accredited undergraduate institution is required. All applicants submit an interview as part of their admission requirements.

All applicants to the MBA degree program must submit the following:

- an online application and application fee
- scores from the Graduate Management Admission Test (GMAT), the Graduate Record Examination (GRE),** or the Executive Assessment (EA)**
- transcripts from all previously-attended and/or degree-granting institutions
- resume with complete work history
- essays
- letter(s) of recommendation

Notes:

*Scores from the TOEFL, PTE, or IELTS are also required for international applicants, whose undergraduate degree was from an institution where the primary language of instruction was not English.

**The Executive Assessment (EA) is only accepted for MBA Degree, Executive Program applicants.

The MBA Professional Program (Weekend)

The MBA Professional Program (Weekend) does not have specific prerequisite courses required for admission.

Academic and Professional Standards

Students must meet both academic and professional standards to continue academic work and to graduate. In accepting admission to the MBA program, all students agree to be governed by the standards and procedures for dismissal or disciplinary action stated below.

Academic Standards

A minimum overall grade point average of 3.00 (B) is required for graduation. All courses taken for the MBA degree (including approved courses taken at the university, but outside the JGSB) are counted in the overall grade point average calculation.

Students with an overall grade point average lower than 3.00 at the end of any semester will be notified of academic standing. Students not meeting the 3.00 requirement will be provided specific instruction and guidance on the next steps specific to their academic situation. In some cases, students may submit an appeal to the JGSB Academic Standards Committee, requesting to be placed on academic probation. The committee reviews all academic cases, and may consult the dean’s office for counsel and/or suggestions on proposed handling of the case. The committee will decide, based on the circumstances of the appeal, whether the student may resume studies on academic probation; is to be academically suspended for one semester or an academic year; or is to be dismissed from the MBA program.

Students proposing to return after a period of academic suspension must follow the appropriate procedures outlined in the General Announcements by the Office of Graduate and Postdoctoral Studies to receive permission to be readmitted. If permitted to return, the student will pay the current rate of tuition, based upon the class of students s/he is joining.

Only courses in which a grade of C or above is earned will be counted for credit toward graduation. If students receive a grade below C in a course required for graduation, they must repeat the course. If students receive a grade lower than C in an elective course, they need not repeat the specific course, but they must make up the credit hours. If the required course is not offered again prior to graduation, the student will be permitted to take the course the following academic year, but will be charged the current pro-rated tuition for the program in which the additional coursework is completed.

Students on academic probation must complete all future courses with a grade of C or above and may be considered candidates for student offices by permission only. Students are removed from probation only upon achieving an overall grade point average of at least 3.00.

JGSB students may not take courses pass/fail to count toward their degree requirements. JGSB students may audit courses with departmental and professor approval. The courses will not count toward the MBA, but will appear on the transcript.

Professional Standards

MBA students are held to the highest standards of professional conduct expected of managers—standards substantially exceeding those expected of them simply as students. Students may be dismissed or suspended for failure to meet professional standards, as defined in the University Code of Conduct (p. 82). The dean may place a student on disciplinary probation for unacceptable conduct, giving oral and written notice that future misconduct will lead to filing specific charges. This probationary notice, however, is not required as a precondition for filing specific charges.

Class Attendance Policy

Students are expected to be in class on the first day of each term. The instructor reserves the right to exclude a student from their course who is absent on the first day. Students should refer to the specific attendance policy for each program. This information can be found in the Jones Graduate School of Business Student Handbook, which is referenced...
Guidelines for Appealing Academic Dismissal

The Process

A student who wishes to appeal a dismissal should address the following issues in a letter to the Academic Standards Committee. The student must send the letter to the chair of the Academic Standards Committee.

1. What circumstances led to your academic performance last semester and to what degree were those circumstances beyond your control?
2. If your performance in a particular course(s) last semester was below par, describe any circumstances specific to that course that explain your performance.
3. Do you expect the circumstances that created the problems for you last semester to change next semester? If so, how?

Students may include any additional information they deem relevant in the appeal letter.

Timing

If the student intends to appeal, the letter to the committee must be filed within one week after receiving a dismissal letter. If a student plans to appeal, he/she should continue to attend classes. It is important to keep up with studies during the appeal process. If the appeal is accepted, the student may continue progress towards the completion of their degree.

Appeals

Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.

Confidentiality

The Family Educational Rights and Privacy Act of 1974 and amendments govern the records of actions related to appeals.

Grade Appeal Process

Once a course grade has been assigned by an instructor, it is generally considered final and is rarely changed for any reason other than calculation or transcription errors. The procedure below outlines the process by which a student may appeal a course grade.

1. The student should first pursue any grading question with the instructor following the formal or informal process the instructor has outlined for the course.
2. If the matter is not resolved in step 1 above, the student must file a written appeal to the instructor and send a copy to the senior associate dean of degree programs. This written appeal must be filed no later than two weeks after the final grade for a course was assigned.
3. The instructor must schedule a meeting with the student within two weeks of receiving the written appeal to further discuss the appeal with the student. Notice of the appeal time and date will be provided by the instructor to the senior associate dean of degree programs.
4. If step 3 does not resolve the issue to the satisfaction of both parties, the student may appeal to the Academic Standards Committee by sending a written notice describing the grounds for the appeal within two weeks of the date of the scheduled meeting in step 3.
5. The Academic Standards Committee will seek out information on the appeal from the instructor and the student and, at its discretion, hold a hearing to further consider the matter. The decision of the Academic Standards Committee will be rendered within 4 weeks of receiving a written notice of appeal (step 4).
6. Appeals beyond the Academic Standards Committee must go to the dean of the Jones Graduate School of Business, who may seek guidance from other constituents of the school. All decisions rendered by the dean are final.
7. In the event that the protested grade is necessary for the student to graduate, an accelerated schedule will be followed.

The Family Educational Rights and Privacy Act of 1974 and amendments govern records of these actions.

MBA Elective Course Add/Drop Policy and Procedures

Due to the unique term schedule followed by the Jones Graduate School of Business MBA programs, MBA students have special procedures they must follow to make schedule changes. The Jones Graduate School of Business Registrar Department administers an add/drop policy which allows students to add/drop elective courses at various times throughout the semester. For all elective courses, student may not add/drop a course after the deadline for the appropriate term.

Withdrawal Policy

A Jones Graduate School of Business student, participating in any offered program, may voluntarily withdraw from school at any time. Upon withdrawal, Rice University applies a sliding scale to tuition, which is noted in the university’s Academic Calendar posted on the Rice Office of the Registrar website (https://registrar.rice.edu/calendars/).

Jones Graduate School of Business Student Handbook

Generally, the Jones Graduate School of Business adheres to the academic regulations of Rice University. However, the Jones Graduate School of Business MBA program has unique policies and procedures that vary from the Office of Graduate and Postdoctoral Studies regarding, but not limited to, leave of absence, withdrawals and readmission, add/drop, and academic dismissal. A copy of the handbook is available on Campus Groups.

Financial Aid

Jones Graduate School of Business scholarships are awarded at the point of admission and are based on the merit of the application. Financial assistance is generally awarded one academic year at a time. Continuation of assistance depends on Satisfactory Academic Progress (SAP) in accordance with Academic and Professional Standards of performance, professional behavior, and is subject to the availability of funds. Academic or disciplinary probation, suspension, or general failure to maintain academic pace will result in the removal of all forms of financial assistance (i.e. scholarship, employment, Federal/State student loans, etc.). Students have the right to appeal the suspension. All appeals will be reviewed by a committee.

Additional Information

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Opportunities for the MBA Degree, Professional Program (Weekend)

Independent Study

Minimum Hours Requirement

Each credit of independent study should contain approximately as much time content as a one-credit course at Jones Graduate School of
Business, which is 12 hours of class time, plus an average of at least 24–36 outside-class hours, for a minimum total of 36–48 hours of work. Independent study projects can be accommodated in increments of 1.0, 1.5, 2.0, or 3.0 credit hours; 3.0 credit independent study projects are rarely approved. Occasionally, a group independent study project may arise, though most independent studies are undertaken by individual students.

The number of credits for an independent study must be determined at the beginning of a project. Increases to the number of project credit hours after the project overview has been filed with the Jones Graduate School of Business associate registrar must be approved by the Academic Standards Committee. If an independent study is proposed that would cause a student to exceed the 3.0 credit limit, the Academic Standards Committee will select two faculty members, other than the faculty member who will supervise the project, within the area most closely related to the study's academic content to review and approve the study. Independent study exceeding 3.0 credits in total should consider current policies restricting use of independent study as well as the incremental value of additional independent study in light of past independent studies. If the study does not align with any of the Jones Graduate School of Business academic groups, the Academic Standards Committee will perform the review and make the final approval decision.

Independent study projects are for academic credit, not for hire. Students may not earn credit for paid work.

Faculty Sponsorship
Independent study projects normally are sponsored only by full-time Jones Graduate School of Business faculty; faculty typically sponsor projects only in their area of expertise. Students wanting sponsorship by a part-time faculty member must submit a project overview to the Academic Standards Committee and obtain the committee's approval before the term in which the project is to begin.

Common Requirements
The goal of independent study projects is to advance or deepen a student's knowledge or competency in a business discipline or activity.

To facilitate these goals, independent study projects generally fall into two broad categories:

1. directed reading and study resulting in a research paper, or
2. an experiential or hands-on project resulting in an outcome such as an empirical analysis with an executive summary of the "deliverable."

While the content of individual independent study projects are at the discretion of a student and the sponsoring faculty member, to ensure relatively equal workloads per unit of independent study credit and some common requirements across independent study projects, students and/or sponsoring faculty should:

1. Prepare and submit to the Jones Graduate School of Business associate registrar an overview of the independent study project with number of project credits, anticipated final results, and a broad timeline of anticipated project milestones.

Minor in Business

Program Learning Outcomes for the Minor in Business

Upon completing the minor in Business, students will be able to:

1. Demonstrate an understanding of financial statements from the perspective of a user of this information.
2. Demonstrate an understanding of the major sociological and social psychological processes that underlie individual and group behavior in organizations.
3. Demonstrate an understanding of the basic concepts of corporate financial management and of the set of analytical tools used to evaluate corporate investment and financing decisions.
4. Demonstrate an understanding of the basic concepts of strategic management and the frameworks necessary to execute competitive industry analysis and strategy formulation and implementation.
5. Demonstrate a basic understanding of the role of marketing in organizations and of the primary marketing decisions facing management.
6. Demonstrate mastery of best practices in creating communication strategies and delivering effective internal and external communications.

Requirements for the Minor in Business

Students pursuing the minor in Business must complete:

- A minimum of 6 courses (18 credit hours) to satisfy minor requirements.
- A maximum of 2 courses (6 credit hours) from study abroad or transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab.

The courses listed below satisfy the requirements for this minor. In certain instances, courses not on this official list may be substituted upon approval of the minor’s academic advisor, or where applicable,
the Program Director. (Course substitutions must be formally applied and entered into Degree Works by the minor’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/)). Students and their academic advisors should identify and clearly document the courses to be taken.

Footnotes and Additional Information

1. Enrollment in BUSI 343 and BUSI 380 requires completion of instruction in microeconomics and statistics. The statistics requirement can be fulfilled by completing STAT 280, or an approved alternative as listed on the Jones School website (http://business.rice.edu/academic-program/undergraduate-business-minor/course-descriptions/). The economics requirement can be fulfilled by completing ECON 100 at Rice.

2. Enrollment in BUSI 343 and BUSI 390 requires completion of BUSI 305. Please Note: The Program Director will not approve requests to waive prerequisites for BUSI 343 or BUSI 390. For further details on course prerequisites, please see course descriptions (http://courses.rice.edu/).

Enrollment Lottery

If a given BUSI course is oversubscribed, the Jones Graduate School of Business will conduct a weighted lottery to determine which students will be admitted to the course. The lottery will give advantage to students who have successfully completed a greater number of Business minor courses and who are closer to graduation.

Policies for the Minor in Business

Declaration of the Business Minor

To declare the minor in Business, students must bring a completed declaration form and unofficial transcript to the program director for review and signature. The Declaration and Change of Minor Form is available on ESTHER (https://esther.rice.edu/).

Program Restrictions and Exclusions

Students pursuing the minor in Business should be aware of the following program restriction:

- As noted in Majors, Minors, and Certificates (p. 11), i.) students may declare a minor only after they have first declared a major, and ii.) students may not major and minor in the same subject.

Transfer Credit

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: https://oaad.rice.edu. Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

Program Transfer Credit Guidelines

Students pursuing the minor in Business should be aware of the following program-specific transfer credit guidelines:

- No more than 2 courses (6 credit hours) of transfer credit from U.S. or international universities of similar standing as Rice may apply towards the minor.
- Requests for transfer credit will be considered by the Program Director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

Additional Information

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/

Opportunities for the Minor in Business

Academic Honors

The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Additional Information

For additional information, please see the Jones Graduate School of Business website: https://business.rice.edu/
The Chemical and Biomolecular Engineering Department’s programs provide undergraduates with a sound scientific and technical grounding for further development in a variety of professional environments. Courses in mathematics, chemistry, physics, and computational engineering provide the background for the chemical engineering core, which introduces students to chemical process fundamentals, fluid mechanics, heat and mass transfer, thermodynamics, kinetics, reactor design, process control, product and process design. Course electives may be used to create a focus area in one of the following five disciplines: biotechnology/bioengineering, environmental engineering, materials science/engineering, sustainability and energy engineering, and computational engineering. Upon completing either the flexible BA requirements or the more scientific and professional BSChE requirements, students may apply for a fifth year of study leading to the nonthesis Master of Chemical Engineering (MChE) degree.

Students admitted for graduate studies leading to the MS or PhD degrees must complete a rigorous program combining advanced course work and original research that must be formalized in an approved thesis. Graduate research is possible in a number of areas, including catalysis and nanotechnology, thermodynamics and phase equilibria, interfacial phenomena, colloids, microemulsions, rheology and fluid mechanics, biosystems engineering, biocatalysis and metabolic engineering, cell population heterogeneity and biological pattern formation, cellular and tissue engineering, sustainability and energy, gas hydrates, enhanced oil recovery, reservoir characterization, and pollution control.

A coordinated MBA/MChE degrees program is also offered in conjunction with the Jesse H. Jones Graduate School of Business.

**Bachelor's Programs**
- Bachelor of Arts (BA) Degree with a Major in Chemical Engineering (p. 275)
- Bachelor of Science in Chemical Engineering (BSChE) Degree (p. 277)

Description and Code Legend
Note: Internally, the university uses the following descriptions, codes, and abbreviations for this academic program. The following is a quick reference:

Course Catalog/Schedule
• Course offerings/subject code: CHBE

Department Description and Code
• Chemical and Biomolecular Engineering: CHBE

Undergraduate Degree Descriptions and Codes
• Bachelor of Arts degree: BA
• Bachelor of Science in Chemical Engineering degree: BSChE

Undergraduate Major Description and Code
• Major in Chemical Engineering (both BA and BSChE degrees) code: CENG

Undergraduate Major Areas of Specialization Descriptions and Attribute Codes*
• Area of Specialization in Biotechnology and Bioengineering (BSChE degree only): CEBB
• Area of Specialization in Computational Engineering (BSChE degree only): CECE
• Area of Specialization in Environmental Engineering (BSChE degree only): CEEE
• Area of Specialization in Materials Science and Engineering (BSChE degree only): CEMS
• Area of Specialization in Sustainable and Energy Engineering (BSChE degree only): CESE
• Area of Specialization in Engineering Breadth (BSChE degree only): CEBR

Please Note: Areas of Specialization are department/program-specific and are not formally recognized academic credentials. Unlike Major Concentrations, Areas of Specialization do not appear on the student’s official academic transcript, etc.

Graduate Degree Descriptions and Codes
• Master of Chemical Engineering degree: MChE
• Master of Science degree: MS
• Doctor of Philosophy degree: PhD

Graduate Degree Program Description and Code
• Degree Program in Chemical Engineering: CENG

CIP Code and Description ¹
• CENG Major/Program: CIP Code/Title: 14.0701 - Chemical Engineering

¹ Systems Use Only: this information is used solely by internal offices at Rice University (such as OTR, GPS, etc.) and primarily within student information systems and support.

Classification of Instructional Programs (CIP) 2010 Codes and Descriptions from the National Center for Education Statistics: https://nces.ed.gov/ipeds/cipcode/

Bachelor of Arts (BA) Degree with a Major in Chemical Engineering

Program Learning Outcomes for the BA Degree with a Major in Chemical Engineering
Upon completing the BA degree with a major in Chemical Engineering, students will be able to demonstrate:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to communicate effectively with a range of audiences
3. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
4. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
5. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Requirements for the BA Degree with a Major in Chemical Engineering
For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Chemical Engineering must complete:

• A minimum of 72 credit hours to satisfy major requirements.
• A minimum of 132 credit hours to satisfy degree requirements.
• A minimum of 60 credit hours outside of major requirements.
• A minimum of 13 courses (37 credit hours) taken at the 300-level or above.

The BA with a Major in Chemical Engineering is a flexible program and allows a student to pursue other areas of interest with or without a second major (or an academic minor).
The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/) Students and their academic advisors should identify and clearly document the courses to be taken.

Total Credit Hours Required for the Major in Chemical Engineering: 72

#### University Graduation Requirements (p. 26)

* Includes coursework completed as distribution credit, FWIS, LPAP, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The “hours outside of the major” requirement may include all of the above university requirements.

1 CHEM 121 or CHEM 111 can be satisfied by completing CHEM 151; CHEM 123 or CHEM 113 can be satisfied by completing CHEM 153. CHEM 122 or CHEM 112 can be satisfied by completing CHEM 152; CHEM 124 or CHEM 114 can be satisfied by completing CHEM 154; CHEM 217 can be satisfied by completing CHEM 215.

2 MATH 221 and MATH 222 may substitute for MATH 212.

### Policies for the BA Degree with a Major in Chemical Engineering

#### Transfer Credit

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

#### Departmental Transfer Credit Guidelines

Students pursuing the major in Chemical Engineering should be aware of the following departmental transfer credit guidelines:
• Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.

Additional Information
For additional information, please see the Chemical and Biomolecular Engineering website: https://chbe.rice.edu/.

Opportunities for the BA Degree with a Major in Chemical Engineering

Academic Honors
The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Fifth-Year Master's Degree Option for Rice Undergraduate Students

Rice students have an option to pursue the Master of Chemical Engineering (MChE) degree by adding an additional fifth year to their four undergraduate years of science and engineering studies.

Advanced Rice undergraduate students in good academic standing may apply to the MChE degree program during their junior or senior year. Upon acceptance, depending on course load, financial aid status, and other variables, they may then start taking some required courses of the master's degree program. A plan of study will need to be approved by the student's undergraduate advisor and the (MChE) chair of the department graduate studies committee.

As part of this option and opportunity, Rice undergraduate students:
• must complete the requirements for a bachelor's degree and the master's degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
• should be aware there could be financial aid implications if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
• more information on this Undergraduate - Graduate Concurrent Enrollment opportunity, including specific information on the registration process can be found here (p. 17).

Additional Information
For additional information, please see the Chemical and Biomolecular Engineering website: https://chbe.rice.edu/.

Bachelor of Science in Chemical Engineering (BSChE) Degree

The program leading to the BSChE degree is accredited by the Engineering Accreditation Commission (EAC) of ABET, https://www.abet.org (https://www.abet.org/).

Program Learning Outcomes (Student Outcomes) for the BSChE Degree
Upon completing the BSChE degree, students will be able to demonstrate:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Program Educational Objectives for the BSChE Degree
Upon completing the BSChE degree, students will be able to:

1. Graduate students, professionals, and entrepreneurs who are moving towards leadership positions as exemplary members of the global workforce; and
2. Professionals who practice their societal, environmental, and ethical responsibilities.

Requirements for the BSChE Degree
For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BSChE degree must complete:

• A minimum of 97 credit hours to satisfy major requirements.
• A minimum of 132 credit hours to satisfy degree requirements.
• A minimum of 18 courses (53 credit hours) taken at the 300-level or above.
• The requirements for one area of specialization (see below for areas of specialization). When students declare the major (p. 11) in Chemical Engineering (associated with the BSChE degree), students must additionally identify and declare one of six areas of specialization, either in:
  • Biotechnology and Bioengineering (p. ), or
  • Computational Engineering (p. ), or
  • Environmental Engineering (p. ), or
  • Materials Science and Engineering (p. ), or
  • Sustainability and Energy Engineering (p. ), or

2019-2020 General Announcements
PDF Generated 11/12/2019
Bachelor of Science in Chemical Engineering (BSChE) Degree

- **Engineering Breadth** (p. ) (Engineering Breadth is an area of specialization comprised of electives from a mix of engineering disciplines).

Because of the common core requirements, it is possible for students to change their area of specialization at any time, even after initially declaring the major. To do so, please contact the Office of the Registrar (registrar@rice.edu).

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier [https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/].) Students and their academic advisors should identify and clearly document the courses to be taken.

### Area of Specialization

Select 1 from the following Areas of Specialization (see Areas of Specialization below):

- Biotechnology and Bioengineering
- Computational Engineering
- Environmental Engineering
- Materials Science and Engineering
- Sustainability and Energy Engineering
- Engineering Breadth

**Total Credit Hours Required for the Major in Chemical Engineering** 97

### University Graduation Requirements (p. 26)^*^ 35

**Total Credit Hours** 132

---

**Footnotes and Additional Information**

^*^ Includes coursework completed as distribution credit, FWIS, LPAP, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The "hours outside of the major" requirement may include all of the above university requirements.
Notes regarding the Chemistry course requirements: CHEM 121 or CHEM 111 can be satisfied by completing CHEM 151; CHEM 123 or CHEM 113 can be satisfied by completing CHEM 153. CHEM 122 or CHEM 112 can be satisfied by completing CHEM 152; CHEM 124 or CHEM 114 can be satisfied by completing CHEM 154; CHEM 217 can be satisfied by completing CHEM 215.

MATH 221 and MATH 222 may substitute for MATH 212.

Areas of Specialization
Students must complete the requirements as listed for one of the following areas of specialization for the BSChE degree program. A minimum of 4 courses (minimum of 12 credit hours) must be taken from one of the areas of specialization as listed below.

Please Note: The following list of approved courses can be used to satisfy the requirements of the area of specialization. Courses not on the list may be taken upon approval of the academic advisor. Students and their academic advisors should identify and clearly document the courses to be taken.

Area of Specialization: Biotechnology and Bioengineering
To fulfill the BSChE degree requirements, students pursuing the Biotechnology and Bioengineering area of specialization must complete:

- 1 course (3 credit hours) from the area of specialization Core Requirement
- 3 courses (9 credit hours) from the area of specialization Elective Requirements

Total Credit Hours 12

Footnotes and Additional Information
1 A maximum of 3 credit hours for CHBE 499 or CHBE 495 may replace 3 credit hours of any of the discipline electives above, but not the Core Requirement.

Policies for the BSChE Degree
Transfer Credit
For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines
Students pursuing the BSChE degree should be aware of the following departmental transfer credit guidelines:

• Requests for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

Additional Information
For additional information, please see the Chemical and Biomolecular Engineering website: https://chbe.rice.edu/

Opportunities for the BSChE Degree
Academic Honors
The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Fifth-Year Master’s Degree Option for Rice Undergraduate Students
Rice students have an option to pursue the Master of Chemical Engineering (MChE) degree by adding an additional fifth year to their four undergraduate years of science and engineering studies.

Advanced Rice undergraduate students in good academic standing may apply to the MChE degree program during their junior or senior year. Upon acceptance, depending on course load, financial aid status, and
Doctor of Philosophy (PhD) Degree in the field of Chemical Engineering

Program Learning Outcomes for the MS and PhD Degrees in the field of Chemical Engineering

Upon completing the MS and PhD degrees in the field of Chemical Engineering, students will be able to:

1. Demonstrate a solid foundation in the fundamentals of chemical engineering in four areas: applied mathematics, kinetics and reaction engineering, thermodynamics, and transport phenomena.
2. Apply advanced knowledge from several major areas of modern chemical engineering.
3. Conduct independent research by working on research projects, individually and in interdisciplinary groups.
4. Demonstrate professional written and oral communication skills.

Requirements for the MS and PhD Degrees in the field of Chemical Engineering

MS Degree Program

The MS degree is a thesis masters degree. For general university requirements, please see Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MS degree in the field of Chemical Engineering must:

• Obtain permission by the department to apply for the program.
• Accepted candidates must complete at least 18 credit hours, which must include:
  • 5 courses (15 credit hours) of core Chemical Engineering courses, and
  • 1 course (3 credit hours) as an Elective, taken at the 500-level or above.

• Complete at least 18 approved advanced course credit hours with high standing.
• Submit an original research thesis.
• Defend the thesis in a public oral examination.
• Complete a teaching requirement.

Total Credit Hours for the MS Degree in the field of Chemical Engineering

Requirements for the PhD Degree in Chemical Engineering

PhD Degree Program

For general university requirements, please see Doctoral Degrees (p. 65). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the PhD degree in the field of Chemical Engineering must:

• Satisfactorily complete 24 credit hours of advanced coursework at the 500-level or above, including required core courses. Students who already have an MS degree in chemical engineering can request departmental approval to be excluded from the required core courses, but must satisfactorily complete the 24 required credit hours.
• Pass qualifying examinations demonstrating a general understanding of reaction engineering, thermodynamics, transport phenomena, and applied mathematics.
• Prepare and present a thesis proposal.
• Complete a publishable thesis representing research that is an original and significant contribution to the field of chemical and biomolecular engineering.
• Pass a public oral examination in defense of the thesis.
• Fulfill a residency requirement.
• Complete a teaching assignment.

Department of Chemical and Biomolecular Engineering Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Chemical and Biomolecular Engineering publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Chemical_Biomolecular_Engineering_MS_Graduate_Handbook.pdf and here: https://gradhandbooks.rice.edu/2019_20/Chemical_Biomolecular_Engineering_PhD_Graduate_Handbook.pdf
Additional Information
For additional information, please see the Chemical and Biomolecular Engineering website: https://chbe.rice.edu/

Opportunities for the PhD Degree in the field of Chemical Engineering
Additional Information
For additional information, please see the Chemical and Biomolecular Engineering website: https://chbe.rice.edu/

Master of Chemical Engineering (MChE) Degree

Program Learning Outcomes for the MChE Degree
Upon completing the MChE degree, students will be able to:

1. Identify, formulate, and solve complex engineering problems that require synthesis of advanced knowledge in chemical engineering fundamentals.
2. Demonstrate broad advanced knowledge in science and math, and depth in one chemical engineering sub-discipline (energy engineering, biomolecular engineering, materials science).
3. Demonstrate knowledge of business policies and practices in the current business environment in identifying, formulating, and solving engineering challenges in a problem/engineering challenge they undertake to solve as part of independent study.
4. Demonstrate effective oral and written communication skills.

Requirements for the MChE Degree
The MChE degree is a non-thesis master's degree. For general university requirements, please see Non-Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MChE degree must complete:

- A minimum of 10 courses (30 credit hours) to satisfy degree requirements.
- A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above).
- A minimum of 24 credit hours must be taken at Rice University.
- A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University.
- A minimum of 5 courses (15 credit hours) from the Core Requirements.
- A minimum of 5 courses (15 credit hours) from Elective Requirements, which must include 1 course (3 credit hours) from CHBE course offerings.
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree with a minimum grade of B- (2.67 grade points) in each course.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Opportunities for the MChE Degree
Fifth-Year Master’s Degree Option for Rice Undergraduate Students

Rice students have an option to pursue the Master of Chemical Engineering (MChE) degree by adding an additional fifth year to their four undergraduate years of science and engineering studies.

Advanced Rice undergraduate students in good academic standing may apply to the MChE degree program during their junior or senior year. Upon acceptance, depending on course load, financial aid status, and other variables, they may then start taking some required courses of the master’s degree program. A plan of study will need to be approved by the student’s undergraduate advisor and the (MChE) chair of the department graduate studies committee.

As part of this option and opportunity, Rice undergraduate students:

• must complete the requirements for a bachelor’s degree and the master’s degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
• should be aware there could be financial aid implications if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
• more information on this Undergraduate - Graduate Concurrent Enrollment opportunity, including specific information on the registration process can be found here (p. 17).

Additional Information
For additional information, please see the Chemical and Biomolecular Engineering website: https://chbe.rice.edu/

Master of Chemical Engineering (MChE) Degree / Master of Business Administration (MBA) Degree

Program Learning Outcomes for the MChE Degree

Upon completing the MChE degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MChE/MBA Coordinated Degrees Program

Students may earn a coordinated MBA degree and a non-thesis Master of Engineering degree from the George R. Brown School of Engineering in the following fields:

- Chemical Engineering (MChE)
- Computational and Applied Mathematics (MCAAM)
- Computer Science (MCS)
- Industrial Engineering (MIE)
- Materials Science and Nanoengineering (MMSNE)
- Mechanical Engineering (MME)
- Statistics (MStat)

For the coordinated MBA/Master of Engineering degrees, students must complete:

• A minimum of 69 credit hours in approved coursework*, including:
  • A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the Master of Engineering degree requirements
  • A minimum of 24 credit hours in the corresponding engineering discipline
  • A minimum of 6 credit hours in elective requirements*
  • A minimum of 45 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the MBA degree requirements
  • A minimum of 45 credit hours of business coursework
  • All MBA core requirements, the global field experience, custom core requirements, and coordinated elective requirements

*Note: A maximum of 6 credit hours of the Master of Engineering degree elective requirements may be selected from business course offerings (MGMP, MGMT, or MICO) and used to fulfill the requirements for both the MBA and the Master of Engineering degrees.

Students plan their course schedules in consultation with the George R. Brown School of Engineering department in which they are enrolled and with the Jones Graduate School of Business Registrar Department. Coordinated degrees candidates can fulfill requirements for both degrees within 2 academic years.

For general university requirements, see Graduate Degrees (p. 49). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Candidates in the MBA/Master of Engineering coordinated degrees program must complete all requirements as listed for both degrees, and must apply and be accepted in both degree programs.
The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier. Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Total Credit Hours 45

### Footnotes and Additional Information

1. To fulfill the remaining requirements for the coordinated MBA degree program, students must complete an additional 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 45 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) The second year of the program is dedicated entirely to MBA elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

### Policies for the MChE/MBA Coordinated Degrees Program

#### Additional Information

For additional information on these two degrees:

1. Please see the Chemical and Biomolecular Engineering website: [https://chbe.rice.edu/](https://chbe.rice.edu/)
2. Please see the Jones Graduate School of Business website: [https://business.rice.edu/](https://business.rice.edu/)

### Opportunities for the MChE/MBA Coordinated Degrees Program

#### Additional Information

For additional information on these two degrees:

1. Please see the Chemical and Biomolecular Engineering website: [https://chbe.rice.edu/](https://chbe.rice.edu/)
2. Please see the Jones Graduate School of Business website: [https://business.rice.edu/](https://business.rice.edu/)

### Chemical Physics

#### Contact Information

**Chemical Physics**

Stanley A. Dodds  
Program Co-Director  
dodds@rice.edu  
R. Bruce Weisman  
Program Co-Director  
weisman@rice.edu

The Bachelor of Science (BS) degree in Chemical Physics is jointly managed by the Department of Chemistry and the Department of Physics and Astronomy. Students take upper-level courses in both chemistry and physics, focusing on the applications of physics to chemical systems.

For additional information regarding Chemical Physics, please see the following department websites:

- Chemistry: [https://chemistry.rice.edu/](https://chemistry.rice.edu/)
- Physics and Astronomy: [https://physics.rice.edu/](https://physics.rice.edu/)
Bachelor of Science (BS) Degree with a Major in Chemical Physics

Bachelor’s Program

- Bachelor of Science (BS) Degree with a Major in Chemical Physics (p. 286)

Chemical Physics does not currently offer an academic program at the graduate level.

Co-Directors

Stanley A. Dodds
R. Bruce Weisman

Description and Code Legend

Note: Internally, the university uses the following descriptions, codes, and abbreviations for this academic program. The following is a quick reference:

Course Catalog/Schedule

- Course offerings/subject code: Courses from various subjects may apply towards the major.

Program Description and Code

- Chemical Physics: CPHY

Undergraduate Degree Description and Code

- Bachelor of Science degree: BS

Undergraduate Major Description and Code

- Major in Chemical Physics: CPHY

CIP Code and Description

- CPHY Major/Program: CIP Code/Title: 40.0508 - Chemical Physics

Requirements for the BS Degree with a Major in Chemical Physics

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BS degree with a major in Chemical Physics must complete:

- A minimum of 73 credit hours to satisfy major requirements.
- A minimum of 133 credit hours to satisfy degree requirements.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 33-35 credit hours, depending on course selection, taken at the 300-level or above.

The Chemical Physics major is offered jointly by the Department of Chemistry and the Department of Physics and Astronomy. Students take upper-level courses in both chemistry and physics, focusing on the applications of physics to chemical systems. Students may obtain credit for some courses by advanced placement, and the program’s undergraduate committee can modify requirements to meet the needs of students with special backgrounds.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major's academic advisor, or where applicable, the department's Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major's Official Certifier ([https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/](https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

Total Credit Hours Required for the Major in Chemical Physics 73

University Graduation Requirements (p. 26) 60

Total Credit Hours 133

Footnotes and Additional Information
* Includes coursework completed as distribution credit, FWIS, LPAP, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The “hours outside of the major” requirement may include all of the above university requirements.
1 CHEM 151 may be substituted for CHEM 121 or CHEM 111; CHEM 153 may be substituted for CHEM 123 or CHEM 113; CHEM 152 may be substituted for CHEM 122 or CHEM 112, and CHEM 154 may be substituted for CHEM 124 or CHEM 114.
2 A limit of 2 credit hours from CHEM 491 or PHYS 461 or PHYS 462 may count toward the Advanced Laboratories requirement.

Policies for the BS Degree with a Major in Chemical Physics
Transfer Credit
For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

Program Transfer Credit Guidelines
Students pursuing the major in Chemical Physics should be aware of the following program-specific transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

Additional Information
For additional information, please see the following department websites:

- Chemistry: https://chemistry.rice.edu/
- Physics and Astronomy: https://physics.rice.edu/

Opportunities for the BS Degree with a Major in Chemical Physics
Academic Honors
The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Chemistry
Contact Information

Chemistry
The Department of Chemistry offers undergraduate chemistry majors leading to both the bachelor of science (BS) degree and the bachelor of arts (BA) degree. The BS program rigorously prepares students for advanced work in chemistry or a related discipline, and the degree requirements are consistent with the guidelines for certification by the American Chemical Society. This curriculum provides a broad and comprehensive introduction to core areas of chemistry while promoting depth of understanding in one or more specific fields. BS students complete a series of foundation courses in general chemistry, analytical chemistry, biological chemistry, inorganic chemistry, organic chemistry, and physical chemistry. Students then complete one or more areas of specialization, consisting of in-depth courses both in and out of the specialization. The BA degree is a more flexible program that provides a comprehensive overview of all areas of chemistry, including laboratory experiences, but can be coupled more easily with other majors or professional career paths. Both degree programs offer students a solid background in the fundamental principles of chemistry, the properties and reactions of chemical compounds, and their uses.

Graduate studies emphasize individual research together with a fundamental understanding of chemistry beyond the students’ specific interests. Faculty research interests include the synthesis and biosynthesis of organic natural products; supramolecular chemistry, molecular recognition and biological catalysis; bioorganic and organometallic chemistry; main group element and transition metal chemistry; the design of nanophase solids; molecular photochemistry and photophysics; infrared kinetic spectroscopy, laser, and NMR spectroscopy; studies of electron transfer in crossed beams; theoretical and computational chemistry; the study of fullerene molecules, carbon nanotubes, and their derivatives; polymer synthesis and characterization; molecular electronics; molecular machines; and chemical-based nanotechnology.

### Bachelor's Programs
- Bachelor of Arts (BA) Degree with a Major in Chemistry (p. 289)
- Bachelor of Science (BS) Degree with a Major in Chemistry (p. 291)

### Coordinated Program

Bachelor of Arts (BA) Degree with a Major in Chemistry

Program Learning Outcomes for the BA Degree with a Major in Chemistry
Upon completing the BA degree with a major in Chemistry, students will be able to:

1. Demonstrate understanding of and proficiency with:
   a. the structure, bonding, spectroscopy, and reactivity of organic compounds and functional groups;
   b. curved-arrow formalism to describe reaction mechanisms, and
   c. the synthesis of organic compounds.

2. Demonstrate understanding of and proficiency with:
   a. thermochemical principles, acid-base and redox reactions,
   b. structure of simple solids and construction of molecular orbital diagrams (group theory), and
   c. survey of main group chemistry.

3. Demonstrate understanding of:
   a. the principles of quantum mechanics and applications to atomic and molecular structure and spectroscopy,
   b. classical and basic statistical thermodynamics and applications to equilibrium physico-chemical systems, and
   c. kinetics of gas phase processes and chemical reactions.

Note: Internally, the university uses the following descriptions, codes, and abbreviations for this academic program. The following is a quick reference:
Requirements for the BA Degree with a Major in Chemistry

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Chemistry must complete:

- A minimum of 21-23 courses, depending on course selection, (55 credit hours) to satisfy major requirements.
- A minimum of 120 credit hours to satisfy degree requirements.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 9 courses (24 credit hours) taken at the 300-level or above.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Students and their academic advisors should identify and clearly document the courses to be taken.

### Footnotes and Additional Information

* Includes coursework completed as distribution credit, FWIS, LPAP, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The “hours outside of the major” requirement may include all of the above university requirements.

1. CHEM 121 or CHEM 111 may be substituted for CHEM 151; CHEM 123 or CHEM 113 may be substituted for CHEM 153; CHEM 122 or CHEM 112 may be substituted for CHEM 152; CHEM 124 or CHEM 114 may be substituted for CHEM 154.

2. Chemistry students may enroll in BIOC 301 without the prerequisite BIOC 201. Requests to waive the prerequisite course are approved by the course instructor. Students should contact the course instructor for more information.

3. Though not required, MATH 211 is strongly recommended for students planning to specialize in Physical and Theoretical chemistry or planning to pursue graduate studies. Additionally, the Department of Mathematics may, after consultation with a student concerning his/her previous math preparation, recommend that a student be placed into a higher level math course than that for which the student has received official credit. The Department of Chemistry will accept this waiver of the math classes upon a written confirmation of the waiver from the Department of Mathematics and upon the student’s successful completion of the higher level math course.

4. MATH 221 and MATH 222 may substitute for MATH 212.
For the purposes of this requirement, “advanced coursework” includes chemistry lecture courses at the 400-level or higher (courses in Rice's course catalog that have a course type listed as 'lecture'). CHEM 212 or CHEM 320 or BIOL 302 counts as “advanced coursework” for purposes of this requirement. Courses in other departments with substantial chemistry content may count toward this requirement with approval of the Director of the Undergraduate Program.

**Policies for the BA Degree with a Major in Chemistry**

**Transfer Credit**

For Rice University's policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

**Departmental Transfer Credit Guidelines**

Students pursuing the major in Chemistry should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

**Additional Information**

For additional information, please see the Chemistry website: https://chemistry.rice.edu

**Opportunities for the BA Degree with a Major in Chemistry**

**Academic Honors**

The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

**Additional Information**

For additional information, please see the Chemistry website: https://chemistry.rice.edu

**Bachelor of Science (BS) Degree with a Major in Chemistry**

**Program Learning Outcomes for the BS Degree with a Major in Chemistry**

Upon completing the BS degree with a major in Chemistry, students will be able to:

1. Demonstrate understanding of and proficiency with:
   a. the structure, bonding, spectroscopy, and reactivity of organic compounds and functional groups;
   b. curved-arrow formalism to describe reaction mechanisms, and
   c. the synthesis of organic compounds.
2. Demonstrate understanding of and proficiency with:
   a. thermochemical principles, acid-base and redox reactions,
   b. structure of simple solids and construction of molecular orbital diagrams (group theory), and
   c. survey of main group chemistry.
3. Demonstrate understanding of:
   a. the principles of quantum mechanics and applications to atomic and molecular structure and spectroscopy,
   b. classical and basic statistical thermodynamics and applications to equilibrium physico-chemical systems, and
   c. kinetics of gas phase processes and chemical reactions.
4. Design, conduct, record, and analyze chemical experiments, while practicing responsible and ethical scientific conduct.

**Requirements for the BS Degree with a Major in Chemistry**

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BS degree with a major in Chemistry must complete:

- A minimum of 24-28 courses, depending on course selection, (69 credit hours) to satisfy major requirements.
- A minimum of 129 credit hours to satisfy degree requirements.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 14-16 courses, depending on course selection, (41 credit hours) at the 300-level or above.
- The requirements for one area of specialization (see below for areas of specialization). The BS degree with a major in Chemistry offers four areas of specialization:
  - Biological and Medicinal Chemistry (p. 292), or
  - Inorganic Chemistry and Inorganic Materials (p. 293), or
  - Organic Chemistry (p. 293), or
  - Physical and Theoretical Chemistry (p. 293).

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

**General Chemistry**

Rice University
Bachelor of Science (BS) Degree with a Major in Chemistry

University Graduation Requirements (p. 26) 60

Total Credit Hours 129

Footnotes and Additional Information

* Includes coursework completed as distribution credit, FWIS, LPAP, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The “hours outside of the major” requirement may include all of the above university requirements.

1 CHEM 121 or CHEM 111 may be substituted for CHEM 151; CHEM 123 or CHEM 113 may be substituted for CHEM 153; CHEM 122 or CHEM 112 may be substituted for CHEM 152; CHEM 124 or CHEM 114 may be substituted for CHEM 154.

2 Chemistry students may enroll in BIOC 301 without the prerequisite BIOC 201. Requests to waive the prerequisite course are approved by the course instructor. Students should contact the course instructor for more information.

3 Though not required, MATH 211 is strongly recommended for students planning to specialize in Physical and Theoretical chemistry or planning to pursue graduate studies. Additionally, the Department of Mathematics may, after consultation with a student concerning his/her previous math preparation, recommend that a student be placed into a higher level math course than the one for which the student has received official credit. The Department of Chemistry will accept this waiver of the math classes upon a written confirmation of the waiver from the Department of Mathematics and upon the student’s successful completion of the higher level math course.

4 MATH 221 and MATH 222 may substitute for MATH 212.

5 CHEM 391 must be taken as part of the Research requirement and for at least 3 credit hours. Enrollment in CHEM 391 requires permission of the course instructor. Students are expected to complete CHEM 391 before the end of their junior year; permission will not normally be granted for students in their final year of undergraduate study.

6 If CHEM 700 is selected as a Research course, it may only be taken for up to 2 credit hours.

Areas of Specialization

To fulfill the remaining Chemistry major requirements, students must complete advanced work that satisfies the requirements of one area of specialization as listed below. A student may working with his or her chemistry major advisor and with the approval of the Director of the Undergraduate Program, propose a course of study in another specialization. Such proposed areas of specialization must have course and laboratory experiences comparable to those of the areas of specialization listed below.

Additionally, a double specialization can be earned by completing the requirements for two specialities. For double specialization, only two advanced lecture courses may count towards both specializations. The remaining two advanced courses in each specialization must be unique (i.e., double specialization requires six advanced lecture courses, and triple specialization require eight). A NanoChemistry specialization can be added to any of the standard areas of specialization by adding two nanoscience courses.

Area of Specialization: Biological and Medicinal Chemistry

Students must complete a minimum of 4 courses (12 credit hours) as listed below to satisfy the requirements for the area of specialization in Biological and Medicinal Chemistry.
Select 1 from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tbody>
</table>

Select 1 course (for at least 3 credit hours) from MATH or PHYS course offerings at the 400-level or above

Total Credit Hours: 12

Footnotes and Additional Information
1. For purposes of this requirement, "advanced coursework" includes chemistry lecture courses at the 400-level or higher (courses in Rice's course catalog that have a course type listed as 'lecture'). CHEM 212 or CHEM 320 or BIOC 302 count as "advanced coursework" for purposes of this requirement. Courses in other departments at the 400-level or higher with substantial chemistry content may count toward this requirement with approval of the Director of the Undergraduate Program.

Policies for the BS Degree with a Major in Chemistry

Transfer Credit

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the major in Chemistry should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.

Additional Information

For additional information, please see the Chemistry website: https://chemistry.rice.edu

Opportunities for the BS Degree with a Major in Chemistry

Academic Honors

The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.
Honors Research Program in Chemistry
The Chemistry Honors Research Program is a suite of courses (CHEM 492/CHEM 493) offering the opportunity for a rigorous two-semester “capstone” individual research project in Chemistry. This immersive program is intended to give students a first-hand experience of a career in research. Students interested in graduate school are strongly encouraged to apply. Students having completed previous independent research (as CHEM 391 and/or CHEM 491) in an off-campus laboratory in the Texas Medical Center are eligible to apply to perform honors research in that laboratory. The honors research courses (CHEM 492 and CHEM 493) function as a pair and must all be taken in the same academic year. Registration for CHEM 492 requires a commitment to register for CHEM 493.

Students who complete the Chemistry Honors Research Program are given primary consideration for the Distinction in Research and Creative Work, a university honor for select undergraduates, carefully selected by the department and granted at commencement, which appears on the transcript and diploma.

Chemistry Honors Research Program Components
• CHEM 492: Fall semester, 5 credit hours. For approved students only, requires a formal application and recommendation of a faculty research advisor. Requirements include at least 15 hours of laboratory research per week and regular written/oral progress reports.
• CHEM 493: Spring semester, 5 credit hours. Requirements include at least 15 hours of laboratory research per week and a formal thesis.
• Applications may be submitted to the course instructor, February 1 – August 1. Students are encouraged to apply early.

Additional Information
For additional information, please see the Chemistry website: https://chemistry.rice.edu

Doctor of Philosophy (PhD) Degree in the field of Chemistry
Program Learning Outcomes for the MA and PhD Degrees in the field of Chemistry
Upon completing MA and PhD degrees in the field of Chemistry, students will be able to:

1. Design and conduct independent and novel experimental and/or theoretical/computational chemical-based research that contributes to the existing body of knowledge in the field.
2. Locate, retrieve, read, and interpret current chemical literature using modern literature search methods.
3. Demonstrate an awareness of the ethical, societal, and environmental impact of chemistry.
4. Effectively communicate to both the scientific community and the general public the results of their work both orally and in writing.

Requirements for the MA and PhD Degrees in the field of Chemistry
MA Degree Program
The MA degree is a thesis master’s degree. For general university requirements, please see Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Although students are not normally admitted to study for the MA degree, graduate students may earn the MA degree after obtaining approval of their candidacy for the PhD. The MA degree may also be earned by students who do not achieve PhD candidacy by:
• Completing the six one-semester courses required for PhD candidacy
• Producing a master’s thesis that presents the results of a program of research approved by the department
• Passing a final master’s thesis defense and submitting the thesis to the Office of Graduate and Postdoctoral Studies.

<td>Total Credit Hours Required for the PhD Degree in the field of Chemistry</td>
<td>90</td>
</tr>
</tbody>
</table>

Research
The PhD in chemistry is awarded for original research in chemistry. During the first semester of residence, students select a research advisor from among the members of the faculty. In some cases, students may choose research advisors outside of the department. Approval of the department chair is required to formalize these advising relationships. The research advisor will guide the student in the choice of an appropriate research topic and in the detailed training required to complete that project. Students must successfully complete CHEM 800 and CHEM 600 every semester of residence. Candidates earn a PhD after successfully completing at least 90 semester hours of advanced study in chemistry and related fields, culminating in a thesis that describes an original and significant investigation in chemistry. The thesis must be satisfactorily defended in a public oral examination. The student must pass the thesis defense before the end of the 16th semester of residency.

Coursework
Within the first two years, the student must complete six 3-semester-hour graduate-level lecture courses at Rice University, or their approved equivalent. In order to satisfy this requirement, each of these courses must satisfy the following criteria:
• They must be approved by the department’s graduate advising committee.

• Chemistry graduate courses must be at the 500 level or higher. Certain 300-level and 400-level courses in other departments may be acceptable with prior approval by the department’s graduate advising committee, but a maximum of three lower-level courses in other departments can count towards the six-class requirement, and these do not count towards the university-wide requirement of 90 credits at the 500-level. Courses must be in technical subjects in science or engineering. Courses in teaching, presentation, or management will not be counted toward the six-class requirement.

• Each course must be passed with a grade of B- or higher. It is possible to repeat or replace a course, upon approval of the department’s graduate advising committee. A maximum of two courses can be repeated/replaced.

• Students who pursue both the BS and the PhD at Rice need not duplicate course work for the two degrees. However, teaching as an undergraduate does not substitute for the teaching requirements in the PhD program.

**Responsible Conduct of Research**
Each graduate student must successfully complete the ethics course UNIV 594.

**Teaching**

• Each graduate student must participate in teaching (CHEM 700) for the equivalent of three semesters. Assignments are determined by departmental needs.

• An average of a B- in all three courses is required. Assignments are determined by departmental needs.

**Qualifying Examination**
The qualifying exam has written and oral components, and the expectations for these are available in the department office. The examination committee will be composed of three faculty members, excluding the research advisor. The written document must be submitted to the committee at least one week before the date of the oral examination. The examination must be taken by the last day of class at the end of the student’s fourth semester in residency. Any follow-up work required by the committee must be completed by the assigned date, and the exam must be passed by the end of the sixth semester.

**Advancement to Candidacy for the PhD**
After completing the required coursework, teaching, and qualifying examination, a student must petition to be Advanced to Candidacy for the PhD degree. Upon Advancement to Candidacy, a student chooses a thesis committee of at least three faculty members with the guidance and approval of the research advisor and department chair. The thesis committee must include one faculty member whose primary appointment is outside of the chemistry department.

**Policies for the PhD Degree in the field of Chemistry**

**Department of Chemistry Graduate Program Handbook**
The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Chemistry publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Chemistry_Graduate_Handbook.pdf

**Appeals**
Students may petition the Chemistry Graduate Studies Committee for variances on these academic regulations.

**Satisfactory Performance**
To remain in good academic standing, a student must maintain a GPA of 3.00 (B) or higher in all lecture courses, a GPA of 3.00 (B) or higher in all semesters of CHEM 700, and a grade of B or higher in every semester of CHEM 600 and CHEM 800. Failure to maintain satisfactory grades and sufficient progress in research will result in probation and possible dismissal. The student must be enrolled full-time in a departmentally approved research group beginning the second semester, and every semester thereafter. All graduate students are evaluated annually to ensure that they are making appropriate progress towards the degree. The student, advisor, or department may request a meeting between the student and a faculty committee at any time to evaluate progress or to determine a course of action. If progress is unsatisfactory, the committee may recommend a semester of probation, which could result in dismissal from the program if progress remains unsatisfactory in the probationary semester.

**Additional Information**

Program Co-Director
Gordon.A.Hughes@rice.edu

Cinema and Media Studies is an interdisciplinary program that focuses on the history, analysis, and theorization of film and other technologically driven visual media, including television, video art, the Internet, and expanded cinema.

Broader survey courses introduce students to the history of moving images and to the fundamentals of cinematic and media analysis, while advanced seminars focus on particular movements, concepts, and themes across specific periods and geographic areas.
The Cinema and Media Studies minor is housed in the Art History department.

**Minor**

- Minor in Cinema and Media Studies (p. 296)

Cinema and Media Studies does not currently offer an academic program at the graduate level.

1 Classification of Instructional Programs (CIP) 2010 Codes and Descriptions from the National Center for Education Statistics: https://nces.ed.gov/ipeds/cipcode/

**Minor in Cinema and Media Studies**

**Program Learning Outcomes for the Minor in Cinema and Media Studies**

Upon completing the minor in Cinema and Media Studies, students will be able to:

1. Develop an understanding of film and media history in the context of cultural, economic, political, and national developments.
2. Utilize specialized disciplinary vocabulary and methodologies effectively, and communicate the function and meaning of film and media works both verbally and in writing.
3. Develop an understanding of modes of theoretical inquiry relevant to film and media studies.
4. Understand major film movements, trends, and genres across regional, national, and global contexts.
5. Develop analytical thinking skills to generate and answer original research questions and produce independent research.

**Requirements for the Minor in Cinema and Media Studies**

Students pursuing the minor in Cinema and Media Studies must complete:

- A minimum of 6 courses (18-22 credit hours, depending on course selection) to satisfy minor requirements.
- A minimum of 2 courses (6 credit hours) taken at the 300-level or above.
- A maximum of 3 courses (9 credit hours) from study abroad or transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab.

Students who pursue the minor in Cinema and Media Studies are encouraged to meet with a program co-director before the end of the winter semester of their third year to declare their intention to complete the minor.

The courses listed below satisfy the requirements for this minor. In certain instances, courses not on this official list may be substituted upon approval of the minor’s academic advisor, or where applicable, the Program Director. (Course substitutions must be formally applied and entered into Degree Works by the minor’s Official Certifier [https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/]). Students and their academic advisors should identify and clearly document the courses to be taken.

Footnotes and Additional Information

1 At least 2 elective courses (6 credit hours) must be numbered at the 300-level or above. With the exception of core courses, no more than 2 courses (6 credit hours) from the same subject code (i.e. ENGL, GERM, etc.) may be used to fulfill the Electives Requirement.

2 ENGL 374 is a variable topics course. Depending on the topic in any given semester, the course may or may not fulfill the minor requirement. Contact the Program Director or Advisor for more information.

Policies for the Minor in Cinema and Media Studies

Program Restrictions and Exclusions

Students pursuing the minor in Cinema and Media Studies should be aware of the following program restriction:

- As noted in Majors, Minors, and Certificates (p. 11), i.) students may declare their intent to pursue a minor only after they have first declared a major, and ii.) students may not major and minor in the same subject.

Transfer Credit

For Rice University's policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

Program Transfer Credit Guidelines

Students pursuing the minor in Cinema and Media Studies should be aware of the following program-specific transfer credit guidelines:

- No more than 3 courses (9 credit hours) of transfer credit from U.S. or international universities of similar standing as Rice may apply towards the minor.
- Request for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.

Distribution Credit Information

The determination of distribution eligibility is done as part of the new course creation process (https://registrar.rice.edu/facstaff/)
courseprocess/). As part of an annual roll call (https://registrar.rice.edu/ facstaff/distribution_credit/) coordinated each Spring by the Office of the Registrar, course distribution eligibility is reviewed and reaffirmed by the Dean's Offices of each of the academic schools.

Faculty and leadership in the academic schools are responsible for ensuring that the courses identified as distribution-eligible meet the criteria as set in the General Announcements (p. 26). Students are responsible for ensuring that they meet graduation requirements (p. 26) by completing coursework designated as distribution at the time of course registration.

Additional Information
For additional information, please see the Cinema and Media Studies website: https://arthistory.rice.edu/minors/cinema-and-media-studies-minor
(https://arthistory.rice.edu/minors/cinema-and-media-studies-minor/)

Opportunities for the Minor in Cinema and Media Studies
Academic Honors
The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Additional Information
For additional information, please see the Cinema and Media Studies website: https://arthistory.rice.edu/minors/cinema-and-media-studies-minor
(https://arthistory.rice.edu/minors/cinema-and-media-studies-minor/)

See https://humanities.rice.edu/student-life (https://humanities.rice.edu/ student-life/) for tables of fellowships, prizes, and internships/practica that may be relevant to this minor.

Civic Leadership
Contact Information
Civic Leadership
https://ccl.rice.edu/
208 Rice Memorial Center
713-348-2223

Caroline Quenemoen
Associate Dean of Undergraduates, Director of Inquiry Based Learning
cq@rice.edu

In support of Rice's mission of providing a distinctive undergraduate experience, the Center for Civic Leadership (CCL) helps undergraduate students develop the knowledge, skills, and values to address the problems of the 21st century and to lead in a variety of community environments. The focus on civic leadership reflects not only Rice's mission but a broader trend that recognizes the civic purpose of 21st century institutions of higher education to cultivate social responsibility and active citizenship. The CCL's approach to leadership education stresses the development of knowledge to understand the complex challenges facing today's society, skills to motivate and collaborate with diverse stakeholders to take informed action, and values to effect positive change.

Students begin the program by completing a CCL Immersion Program, which introduces them to social issues in community-based contexts (through lectures, community tours, and short-term service) and develops skills in reflective practice critical to leadership development.

Additionally, students complete a minimum of 3 credit hours of social issues electives and a minimum of 3 credit hours of leadership electives chosen from a list of courses covering relevant topics. Timely, personalized advising plays an important role in the selection of the electives in order to ensure that students follow an academically coherent path to the certificate. The purpose of this element of the certificate pathway is to provide foundational knowledge directly pertinent to a student's capstone project.

Students will apply to participate in a CCL Action Program that allows them to work in collaboration with a community partner to address a social issue and identified need through research and service. To be selected to one of these programs, students must demonstrate relevant academic preparation.

Upon completion of the above listed requirements, students may apply in the spring of their sophomore or junior year for admittance to the Certificate in Civic Leadership.

To receive the certificate, students must complete a substantial civic leadership project in partnership with a community organization under the guidance of one faculty and a CCL advisor. In the fall semester, all admitted certificate students take UNIV 402, in which they prepare for their capstone projects by learning principles of community partnership development, researching a community need or issue in context, designing a sustainable response, developing a project proposal, and reflecting on leadership challenges and solutions. Students subsequently carry out their projects independently in the spring semester under the direction of their faculty advisor and the capstone instructor (UNIV 403).

To register for UNIV 403, students must have successfully completed UNIV 402 and received approval for their CCL capstone project proposal from their advisor, their community partner, and the UNIV 402 course instructor. UNIV 403 students must present their project results to the community partner through a formal presentation and written report before the conclusion of the course. Additionally, students are encouraged to present at a formal venue, such as a conference or symposium, within one year of course completion.

Consideration for receipt of the certificate requires submission of a portfolio that includes the capstone project and description of its outcomes, responses to reflective questions regarding their civic leadership development, and a public presentation to the campus and community. Upon recommendation of the capstone instructor and faculty advisor, the certificate will be awarded by vote of the faculty and center directors and recognized on the student’s official transcript upon graduation.

Certificate in Civic Leadership

Program Learning Outcomes for the Certificate in Civic Leadership
Upon completing the certificate in Civic Leadership, students will be able to:

1. Integrate academic and experiential knowledge in civic contexts.
2. Analyze issues through the framework of democratic values, processes, and policies.
3. Address real world issues through interaction and collaboration with diverse community partners.
4. Communicate with and present their work effectively to a range of audiences both within and beyond the academic community.
5. Employ reflection to express their individual values and goals and be able to act on them.
6. Demonstrate motivation to realizing equitable and inclusive communities.

Requirements for the Certificate in Civic Leadership
Students pursuing the certificate in Civic Leadership must complete:

• A minimum of 4 courses (12 credit hours) to satisfy certificate requirements.
• A minimum of 2 Experiential Learning Programs:
  • 1 LEARN Level Program
  • 1 ACT Level Program
• A Civic Leadership Portfolio.
• A Capstone Requirement.
• A minimum overall GPA of 2.00 in required coursework with a minimum grade of C (2.00 grade points) in each course.

This certificate is not a freestanding degree program; in addition to fulfilling the certificate requirements outlined below, candidates will be required to complete successfully the degree program to which they have been admitted in order to receive this certificate. Upon completion, the certificate is awarded at the same time as the conferral of the student’s Rice degree, along with a formal notation on their academic transcript.

The courses listed below satisfy the requirements for this certificate. In certain instances, courses not on this official list may be substituted upon approval of the certificate’s academic advisor, or where applicable, the Program Director. (Course substitutions must be formally applied and entered into Degree Works by the certificate’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

Program Restrictions and Exclusions
Students pursuing the Certificate in Civic Leadership should be aware of the following program restriction:

- As noted in Majors, Minors, and Certificates (p. 11), ‘Students may declare their intent to pursue a university certificate only after they have first declared a major.’

Transfer Credit
For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

Program Transfer Credit Guidelines
Students pursuing the Certificate in Civic Leadership should be aware of the following program-specific transfer credit guidelines:

- Request for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

Additional Information
For additional information, please see the Center for Civic Leadership website: https://ccl.rice.edu/ (https://ccl.rice.edu).

Opportunities for the Certificate in Civic Leadership
Academic Honors
The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Civil and Environmental Engineering (CEE) is a broad and diverse field of study that offers students an education with several degree options. The most flexible degree options are at the bachelor's level, where students...
can pursue either the Bachelor of Science in Civil Engineering (BSCE) degree or the Bachelor of Arts (BA) degree. The more scientific BSCE includes four areas of specialization while the BA, with its two distinct major concentrations, affords students more flexibility, including the possibility to complete a double major with any other Rice University major.

At the graduate level, the department offers one non-thesis graduate degree, the Master of Civil and Environmental Engineering (MCEE), to students who desire additional education and specialization in the practice of civil engineering or environmental sciences and engineering. Students admitted for graduate study leading to a Master of Science (MS) or Doctor of Philosophy (PhD) degree must complete a rigorous course of study that combines advanced coursework with scholarly research culminating in the public defense of a written thesis. Graduate research is carried out in a range of areas reflecting the interests of the department’s faculty. Examples include environmental engineering, geotechnical engineering, structural engineering and mechanics, infrastructure reliability, hydrology, water resources and water quality management, air pollution and its control, and hazardous waste treatment.

**Bachelor’s Programs**

- Bachelor of Arts (BA) Degree with a Major in Civil and Environmental Engineering
  - and a Major Concentration in Civil Engineering (p. 303)
  - and a Major Concentration in Environmental Engineering (p. 306)
- Bachelor of Science in Civil Engineering (BSCE) Degree (p. 309)

**Minor**

- Minor in Energy and Water Sustainability (p. 404)

**Master’s Programs**

- Master of Civil and Environmental Engineering (MCEE) Degree in the field of Civil Engineering (p. 317)
- Master of Civil and Environmental Engineering (MCEE) Degree in the field of Environmental Engineering (p. 319)
- Master of Science (MS) Degree in the field of Civil Engineering (p. 321)
- Master of Science (MS) Degree in the field of Environmental Engineering (p. 323)

**Doctoral Programs**

- Doctor of Philosophy (PhD) Degree in the field of Civil Engineering (p. 314)
- Doctor of Philosophy (PhD) Degree in the field of Environmental Engineering (p. 316)

**Chair**

Philip B. Bedient

**Professors**

Pedro J. J. Alvarez
Philip B. Bedient
Reginald DesRoches
Robert J. Griffin
Qilin Li

**Associate Professors**

Satish Nagarajaiah
Pol D. Spanos
Mason B. Tomson

**Assistant Professor**

Lauren Stadler

**Professors Emeriti**

Ahmad J. Durrani
Ronald P. Nordgren
Anestis S. Veletsos
Calvin H. Ward

**Professor in the Practice of Civil Engineering**

Edmund P. Segner III

**Professor in the Practice of Environmental Law**

James B. Blackburn

**Lecturers**

David T. Adamson
Mandi Chapa
Philip C. deBlanc
Travis McGuire
Charles M. Penland
Nestor Rubiano-Benavides
Christof Spieler
Bob Stevens
Jacob Torres
Steve Wilkerson

**Joint Appointments**

William Tillman Cannady
Michael S. Wong

**Adjunct Professors**

Jean-Yves Bottero
Wei Chen
Joseph Cibor
Nick Fang
Jorge Loyo
Charles J. Newell
Carroll L. Oubre
Jerome Rose
Baxter Vieux

**Adjunct Lecturer**

Richard Johnson
Description and Code Legend

Note: Internally, the university uses the following descriptions, codes, and abbreviations for this academic program. The following is a quick reference:

Course Catalog/Schedule
• Course offerings/subject code: CEVE

Department Description and Code
• Civil and Environmental Engineering: CEEG

Undergraduate Degree Descriptions and Codes
• Bachelor of Arts degree: BA
• Bachelor of Science in Civil Engineering degree: BSCE

Undergraduate Major Descriptions and Codes
• Major in Civil Engineering (offered to students pursuing the BSCE degree): CIVI
• Major in Civil and Environmental Engineering (offered to students pursuing the BA degree): CEEG

Undergraduate Major Concentration Descriptions and Codes
• Major Concentration in Civil Engineering (attached to the BA degree): CIEG
• Major Concentration in Environmental Engineering (attached to the BA degree): ENEG

Undergraduate Major Areas of Specialization Descriptions and Attribute Codes
• Area of Specialization in Area I - Environmental Engineering (BSCE degree only): CEEN
• Area of Specialization in Area II - Hydrology and Water Resources (BSCE degree only): CEHW
• Area of Specialization in Area III - Structural Engineering and Mechanics (BSCE degree only): CESM
• Area of Specialization in Area IV - Urban Infrastructure, Reliability, and Management (BSCE degree only): CEUR

Please Note: Areas of Specialization are department/program-specific and are not formally recognized academic credentials. Unlike Major Concentrations, Areas of Specialization do not appear on the student's official academic transcript, etc.

Undergraduate Minor Description and Code
• Minor in Energy and Water Sustainability: EWSU

Graduate Degree Descriptions and Codes
• Master of Civil and Environmental Engineering degree: MCEE
• Master of Science degree: MS
• Doctor of Philosophy degree: PhD

Graduate Degree Program Descriptions and Codes
• Degree Program in Civil Engineering: CIVI
• Degree Program in Environmental Engineering: ENVI

CIP Code and Description
• CEEG Major/Program: CIP Code/Title: 14.0801 - Civil Engineering, General
• ENVI Major/Program: CIP Code/Title: 14.1401 - Environmental/Environmental Health Engineering
• CIEG Major Concentration: CIP Code/Title: 14.0802 - Geotechnical and Geoenvironmental Engineering
• ENEG Major Concentration: CIP Code/Title: 14.1401 - Environmental/Environmental Health Engineering
• EWSU Minor: CIP Code/Title: 40.0605 - Hydrology and Water Resources Science

* Systems Use Only: this information is used solely by internal offices at Rice University (such as OTR, GPS, etc.) and primarily within student information systems and support.

1 Classification of Instructional Programs (CIP) 2010 Codes and Descriptions from the National Center for Education Statistics: https://nces.ed.gov/ipeds/cipcode/

Bachelor of Arts (BA) Degree with a Major in Civil and Environmental Engineering and a Major Concentration in Civil Engineering

Program Learning Outcomes for the BA Degree with a Major in Civil and Environmental Engineering and a Major Concentration in Civil Engineering

Upon completing the BA degree with a major in Civil and Environmental Engineering and a major concentration in Civil Engineering, students will demonstrate the ability to:

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Communicate effectively with a range of audiences.
3. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
6. Acquire and apply new knowledge as needed, using appropriate learning strategies.

Requirements for the Bachelor of Arts (BA) Degree with a Major in Civil and Environmental Engineering

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Civil and Environmental Engineering must complete:
• A minimum of 62 credit hours to satisfy major requirements.
• A minimum of 122 credit hours to satisfy degree requirements.
• A minimum of 60 credit hours outside of major requirements.
• A minimum of 8 courses (22-25 credit hours, depending on declared major concentration) taken at the 300-level or above.
• 11 courses (25 credit hours) of General Math and Science courses.
• 5-6 courses (16 credit hours) as Major Concentration Core courses.
• 7 courses (21 credit hours) in a focused specialty area of study.
• The requirements of a major concentration. When students declare the major (p. 11) in Civil and Environmental Engineering, students must additionally identify and declare one of two major concentrations, either in:
  • Civil Engineering (p. 304), or
  • Environmental Engineering (p. 307).

Because of the common core requirements, it is possible for students to change their major concentration at any time, even after initially declaring the major. To do so, please contact the Office of the Registrar (%20Registrar@rice.edu).

Each major concentration is to be tailored to the specific needs of the student by discussions with, and approval by, the Civil and Environmental Engineering departmental major concentration advisor. Although not required, students are encouraged to double major when pursuing the BA degree.

The coherent and complete core curriculum is designed to give Rice undergraduate students a consistent technological literacy through the lens of Civil and Environmental Engineering and to prepare students for graduate school in engineering, various sciences (depending upon focus), economics, business MBA, political science, law, or medicine. Select students will be invited to finish an accelerated MS/PhD degree in the CEVE Department (see your advisor or department chair for details). Those students who want to obtain an engineering degree from a program accredited by the Engineering Accreditation Commission (EAC) of ABET must follow one of the Bachelor of Science programs the EAC has accredited at Rice, like the Bachelor of Science in Civil Engineering (BSCE). Students pursuing professional engineering licensure should also consider our BS in Civil and Environmental Engineering (BSCE).

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/)) Students and their academic advisors should identify and clearly document the courses to be taken.

### Major Concentration

Select 1 of the following Major Concentrations (see below for Major Concentration requirements):

- **Civil Engineering**
- **Environmental Engineering**

### Specialty Focus Area

Select 7 courses from approved electives selected with the Civil and Environmental Engineering advisor (see below for more information, including course requirements).

### Total Credit Hours Required for the Major in Civil and Environmental Engineering

| University Graduation Requirements (p. 26) | 60 |
| Total Credit Hours | 122 |

### Footnotes and Additional Information

- Includes coursework completed as distribution credit, FWIS, LPAP, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The "hours outside of the major" requirement may include all of the above university requirements.

### Major Concentration: Civil Engineering

Students must complete the following 6 courses (16 credit hours) to satisfy the requirements for the major concentration in Civil Engineering.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>

CEVE 211 / MECH 211 ENGINEERING MECHANICS 3
CEVE 310 PRINCIPLES OF ENVIRONMENTAL ENGINEERING 3
CEVE 311 / MECH 311 MECHANICS OF SOLIDS AND STRUCTURES 3
CEVE 312 STRENGTH OF MATERIALS LAB 1
CEVE 325 STRUCTURAL ANALYSIS AND MODELING 3
Total Credit Hours 16

Specialty Focus Area
To satisfy the remaining Specialty Focus Area of the BA degree with a major in Civil and Environmental Engineering, students must complete a total of 7 courses (21 credit hours) from approved electives selected with the Civil and Environmental Engineering advisor. Course selection must meet the following requirements:

- A minimum of 4 courses (12 credit hours) must be within one Specialty Focus Area (See examples below).
- A minimum of 4 courses (12 credit hours) from the 300-level or above; 2 of these 4 courses (6 credit hours) must also be selected from departmental (CEVE) course offerings.

Example Specialty Focus areas are suggested below; however students are encouraged to prepare their own specialty related to their career objectives in consultation with, and approval by, their Civil and Environmental Engineering advisor.

1. Biology
2. Chemical Engineering
3. Chemistry
4. Civil Engineering
5. Economics
6. Environmental Science and Engineering
7. Management

Policies for the BA Degree with a Major in Civil and Environmental Engineering and a Major Concentration in Civil Engineering Transfer Credit

For Rice University's policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the major in Civil and Environmental Engineering should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.

Additional Information

For additional information, please see the Civil and Environmental Engineering website: https://ceve.rice.edu/

Opportunities for the BA Degree with a Major in Civil and Environmental Engineering and a Major Concentration in Civil Engineering

Academic Honors

The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Departmental Honor, Award, and Scholarship Opportunities

- Distinction in Research and Creative Work: The Department of Civil and Environmental Engineering will recognize graduating seniors for outstanding creative contributions with the award of Distinction in Research and Creative Work. The Department recognizes this award as being a significant honor. As such, it will be awarded to no more than 20% of a graduating class (rounded up to next whole number). This award shall be given for significant contributions in research, design, and creative projects beyond class assignments (except CEVE 499). Generally, it is expected that the student recipients will have performed research/design for a minimum of two academic segments (one segment = one academic year or one summer) during their undergraduate career (either for credit or pay). It may be given for one outstanding piece of work for consistent meaningful contributions made over the course of an undergraduate career. All majors (BA and BS) with a GPA of 3.30 or higher in all courses completed at Rice are eligible and will be considered for this distinction in the spring prior to their graduation.

- Rice Global Forum: Rice Global Forum (RGF) is an engineering and construction industry funded center which is in its second decade of operation. It was founded by Ahmad Durrani, past chair of Civil and Environmental Engineering at Rice. RGF funds and facilitates interaction with the engineering and construction industry, particularly oil and gas related work. RGF funds $25,000 worth of scholarships every year. In addition, RGF also consistently sponsors and supports Engineers Without Borders (EWB) and has donated to other student clubs as well in addition to holding an engineering design competition every year in February during National Engineers Week.

Fifth-Year Master's Degree Option for Rice Undergraduate Students

Rice students have an option to pursue the Master of Civil and Environmental Engineering (MCEE) degree by adding an additional fifth year to their four undergraduate years of science and engineering studies.

Advanced Rice undergraduate students in good academic standing may apply to the MCEE degree program during their junior or senior year. Upon acceptance, depending on course load, financial aid status, and other variables, they may then start taking some required courses of the
master’s degree program. A plan of study will need to be approved by the student’s undergraduate advisor and the (MCCE) chair of the department graduate studies committee.

As part of this option and opportunity, Rice undergraduate students:

- must complete the requirements for their bachelor’s degree and the master’s degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
- should be aware of the financial aid implications, if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
- more information on this Undergraduate - Graduate Concurrent Enrollment possibility, including specific information on the registration process can be found here (p. 17).

Student Organizations and Clubs

- American Society of Civil Engineers Student (ASCE): https://www.asce.org/membership/student/. ASCE seeks to promote civil and environmental engineering, expose students to real world engineering, and connect students to alumni and professionals. Throughout the year we invite speakers from the industry, visit plants and sites, and organize social events. The objectives of this Chapter are to encourage the development of a professional consciousness, to afford an opportunity for civil engineering students to become acquainted and to practice working together effectively, to promote a spirit of congeniality among them, and to provide friendly contact with the engineering profession. We also support the Concrete Canoe competition (see below) and the Seismic Design Competition of the Earthquake Engineering Research Institute (EERI).
- Chi Epsilon: https://www.chi-epsilon.org/vxwebgeneral2/. Chi Epsilon is dedicated to maintaining and promoting the status of civil engineering as an ideal profession. Chi Epsilon was organized to recognize the characteristics of the individual civil engineering degree to be fundamental to the successful pursuit of an engineering career, and to aid in the development of those characteristics in the civil engineering student.
- Engineers Without Borders (EWB): https://ewb.rice.edu/. EWB partners with developing communities worldwide to design engineering solutions that will improve their standards of living. It is an important component of the Civil and Environmental Engineering program. BA students with their flexible curriculum are encouraged to participate. This exciting endeavor allows undergraduates to have an experience in a developing country, where they are able to design and build a project to help society. Students have been attracted to the EWB program in large numbers and our local chapter is one of the most successful in the United States. Some CEVE courses are EWB-related, providing the opportunity to also obtain credit hours.
- Concrete Canoe: https://concretencanoe.rice.edu/. Rice Concrete Canoe is a student-run club that creates a functional concrete canoe to race and present at the yearly ASCE sponsored competition. Through the year, members gain engineering experience through the research, planning and constructing of a concrete canoe. By offerings members exposure to the engineering design process, small-group work, software such as Matlab and Adobe Illustrator (and possibly more starting this year), and laser cutters, Concrete Canoe offers a unique experience to students regardless of whether or not they want to become engineers.
- Society of Women Engineers: https://swe.rice.edu. The Society of Women Engineers aims to empower women to pursue and achieve their full potential in science and engineering related fields. We provide opportunities in professional development, academic and post-graduate planning, community outreach, and social events.

Additional Information

For additional information, please see the Civil and Environmental Engineering website: https://ceve.rice.edu/

Bachelor of Arts (BA) Degree with a Major in Civil and Environmental Engineering and a Major Concentration in Environmental Engineering

Program Learning Outcomes for the BA Degree with a Major in Civil and Environmental Engineering and a Major Concentration in Environmental Engineering

Upon completing the BA with a major in Civil and Environmental Engineering and a major concentration in Environmental Engineering, students will demonstrate the ability to:

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Communicate effectively with a range of audiences.
3. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
6. Acquire and apply new knowledge as needed, using appropriate learning strategies.

Requirements for the Bachelor of Arts (BA) Degree with a Major in Civil and Environmental Engineering

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Civil and Environmental Engineering must complete:

- A minimum of 62 credit hours to satisfy major requirements.
- A minimum of 122 credit hours to satisfy degree requirements.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 8 courses (22-25 credit hours, depending on declared major concentration) taken at the 300-level or above.
- 11 courses (25 credit hours) of General Math and Science courses.
• 5-6 courses (16 credit hours) as Major Concentration Core courses.
• 7 courses (21 credit hours) in a focused specialty area of study.
• The requirements of a major concentration. When students declare the major (p. 11) in Civil and Environmental Engineering, students must additionally identify and declare one of two major concentrations, either in:
  • Civil Engineering (p. 304), or
  • Environmental Engineering (p. 307).
Because of the common core requirements, it is possible for students to change their major concentration at any time, even after initially declaring the major. To do so, please contact the Office of the Registrar (%20registrar@rice.edu).

Each major concentration is to be tailored to the specific needs of the student by discussions with, and approval by, the Civil and Environmental Engineering departmental major concentration advisor. Although not required, students are encouraged to double major when pursuing the BA degree.

The coherent and complete core curriculum is designed to give Rice undergraduate students a consistent technological literacy through the lens of Civil and Environmental Engineering and to prepare students for graduate school in engineering, various sciences (depending upon focus), economics, business MBA, political science, law, or medicine. Select students will be invited to finish an accelerated MS/PhD degree in the CEVE Department (see your advisor or department chair for details). Those students who want to obtain an engineering degree from a program accredited by the Engineering Accreditation Commission (EAC) of ABET must follow one of the Bachelor of Science programs the EAC has accredited at Rice, like the Bachelor of Science in Civil Engineering (BSCE). Students pursuing professional engineering licensure should also consider our BS in Civil and Environmental Engineering (BSCE).

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

**Bachelor of Science in Civil Engineering (BSCE) Degree**

The program leading to the BSCE degree is accredited by the Engineering Accreditation Commission (EAC) of ABET, [https://www.abet.org](https://www.abet.org/).

**Program Learning Outcomes (Student Outcomes) for the BSCE Degree**

Upon completing the BSCE degree, students will be able to demonstrate:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**Program Educational Objectives for the BSCE Degree**

Within 3 to 5 years of graduation, graduates with a Bachelor of Science in Civil Engineering (BSCE) degree are expected to attain the following Program Educational Objectives (PEOs):

1. Demonstrate strong problem-solving and communication skills.
2. Achieve leadership positions in technical or managerial areas.
3. Demonstrate initiative and innovation in professional endeavors.
4. Demonstrate engagement in addressing ethical, social, environmental, and global concerns.
5. Remain engaged in continuing learning, including advanced degrees.
6. Obtain a Professional Engineering license, if appropriate.

**Requirements for the BSCE Degree**

For general university requirements, see [Graduation Requirements](p. 26). Students pursuing the BSCE degree must complete:
• A minimum of 35-36 courses (94-95 credit hours), depending on course selection, to satisfy major requirements.
• A minimum of 133-134 credit hours, depending on course selection, to satisfy degree requirements.
• A minimum of 19 courses (54 credit hours) taken at the 300-level or above.

The requirements for one area of specialization (see below for areas of specialization). When students declare the major (p. 11) in Civil Engineering (associated with the BSCE degree), students must additionally identify and declare one of four areas of specialization, either in:

- **Area I - Environmental Engineering (p. 30):** Air and water quality, transport theory, modeling, and energy, or
- **Area II - Hydrology and Water Resources (p. 30):** Watershed and aquifer management, flood prediction, data analysis, GIS, and hydrologic modeling, or
- **Area III - Structural Engineering and Mechanics (p. 30):** Structural analysis, mechanics, design, dynamics, and matrix method, or
- **Area IV - Urban Infrastructure, Reliability, and Management (p. 30):** Transportation systems, complex urban systems, system reliability, soil mechanics, decision theory, engineering economics, and project management.

• A minimum of 16 courses (40-41 credit hours, depending on course selection) from the General Math and Science courses.
• A minimum of 9 courses (24 credit hours) from the Core Requirements.

Because of the common core requirements, it is possible for students to change their area of specialization at any time, even after initially declaring the major. To do so, please contact the Office of the Registrar (registrar@rice.edu).

Civil and Environmental Engineering’s innovative and challenging BSCE degree’s engineering curriculum is designed to provide significant flexibility to the student. Specific details and typical course layouts by semester can be found on the departmental website (http://ceve.rice.edu/).

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted, either in:

- • A minimum of 24 credit hours from the Core Requirements.
- • A minimum of 24 credit hours from the General Math and Science Requirements.

2019-2020 General Announcements
PDF Generated 11/12/2019
Elective Requirements

Select electives to fulfill the remaining BSCE degree requirements (see below for suggested elective courses) 5

Total Credit Hours Required for the Major in Civil Engineering 94-95

University Graduation Requirements (p. 26) 1

Total Credit Hours 133-134

Footnotes and Additional Information

1 Includes coursework completed as distribution credit, FWIS, LPAP upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The “hours outside of the major” requirement may include all of the above university requirements.

2 Students may substitute ESCI 115 with any departmental (ESCI) course offering.

3 Students may substitute STAT 310 with any departmental (STAT) course offering at the 300-level or above with the exception of STAT 305.

4 Please Note: For students pursuing an area of specialization in Environmental Engineering (Area I) or Hydrology and Water Resources (Area II), CEVE 401 is required, and CEVE 471 and CEVE 472 are Urban Infrastructure, Reliability, and Management (Area IV) electives. For students pursuing an area of specialization in Structural Engineering and Mechanics (Area III) or Urban Infrastructure, Reliability, and Management (Area IV), CEVE 471 and CEVE 472 are required and CEVE 401 is an Environmental Engineering (Area I) elective.

5 Courses that introduce fundamentals of civil and environmental engineering primarily targeted at students with diverse science, engineering, and humanities backgrounds (CEVE 101, CEVE 211, CEVE 310, CEVE 311, CEVE 312)

6 See also the University Graduation Requirements footnote above denoted with an *.

Areas of Specialization

To fulfill the remaining BSCE degree requirements, students must complete a total of 10 courses (30 credit hours) from the four areas of specialization as follows:

- 8 courses (24 credit hours), consisting of a minimum of 2 courses (6 credit hours) from each of the four areas of specialization as breadth.
- 2 additional courses (6 credit hours) from one of the four areas of specialization for a total of 4 courses (12 credit hours, including breadth) in that specific area as an area of specialization.

Area of Specialization: Area I - Environmental Engineering

All students must select a minimum of 2 courses (6 credit hours) from Area I. Students pursuing the Area I - Environmental Engineering area of specialization must complete:

- 4 courses (12 credit hours) from Area I - Environmental Engineering
- 2 courses (6 credit hours) from Area II - Hydrology and Water Resources
- 2 courses (6 credit hours) from Area III - Structural Engineering and Mechanics
- 2 courses (6 credit hours) from Area IV - Urban Infrastructure, Reliability and Management

Area of Specialization: Area II - Hydrology and Water Resources

All students must select a minimum of 2 courses (6 credit hours) from Area II. Students pursuing the Area II - Hydrology and Water Resources area of specialization must complete:

- 4 courses (12 credit hours) from Area II - Hydrology and Water Resources
- 2 courses (6 credit hours) from Area I - Environmental Engineering
- 2 courses (6 credit hours) from Area III - Structural Engineering and Mechanics
- 2 courses (6 credit hours) from Area IV - Urban Infrastructure, Reliability and Management

Policies for the BSCE Degree

Transfer Credit
For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines
Students pursuing the BSCE degree should be aware of the following departmental transfer credit guidelines:

• Requests for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

Additional Information
For additional information, please see the Civil and Environmental Engineering website: https://ceve.rice.edu/

Opportunities for the BSCE Degree

Academic Honors
The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Departmental Honor, Award, and Scholarship Opportunities

• Distinction in Research and Creative Work: The Department of Civil and Environmental Engineering will recognize graduating seniors for outstanding creative contributions with the award of Distinction in Research and Creative Work. The Department recognizes this award as being a significant honor. As such, it will be awarded to no more than 20% of a graduating class (rounded up to next whole number). This award shall be given for significant contributions in research, design, and creative projects beyond class assignments (except CEVE 499). Generally, it is expected that the student recipients will have performed research/design for a minimum of two academic segments (one segment = one academic year or one summer) during their undergraduate career (either for credit or pay). It may be given for one outstanding piece of work for consistent meaningful contributions made over the course of an undergraduate career. All majors (BA and BS) with a GPA of 3.30 or higher in all courses completed at Rice are eligible and will be considered for this distinction in the spring prior to their graduation.

• Rice Global Forum: Rice Global Forum (RGF) is an engineering and construction industry funded center which is in its second decade of operation. It was founded by Ahmad Durrani, past chair of Civil and Environmental Engineering at Rice. RGF funds and facilitates interaction with the engineering and construction industry, particularly oil and gas related work. RGF funds $25,000 worth of scholarships every year. In addition, RGF also consistently sponsors and supports Engineers Without Borders (EWB) and has donated to other student clubs as well in addition to holding an engineering design competition every year in February during National Engineers Week.

Fifth-Year Master’s Degree Option for Rice Undergraduate Students
Rice students have an option to pursue the Master of Civil and Environmental Engineering (MCEE) degree by adding an additional fifth year to their four undergraduate years of science and engineering studies.

Advanced Rice undergraduate students in good academic standing may apply to the MCEE degree program during their junior or senior year. Upon acceptance, depending on course load, financial aid status, and other variables, they may then start taking some required courses of the master’s degree program. A plan of study will need to be approved by the student’s undergraduate advisor and the (MCEE) chair of the department graduate studies committee.

As part of this option and opportunity, Rice undergraduate students:

• must complete the requirements for their bachelor’s degree and the master’s degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
• should be aware of the financial aid implications, if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
• more information on this Undergraduate - Graduate Concurrent Enrollment possibility, including specific information on the registration process can be found here (p. 17).

Student Organizations and Clubs

• American Society of Civil Engineers Student (ASCE): https://www.asce.org/membership/student/
ASCE seeks to promote civil and environmental engineering, expose students to real world engineering, and connect students to alumni and professionals. Throughout the year we invite speakers from the industry, visit plants and sites, and organize social events. The objectives of this Chapter are to encourage the development of a professional consciousness, to afford an opportunity for civil engineering students to become acquainted and to practice working together effectively, to promote a spirit of congeniality among them, and to provide friendly contact with the engineering profession. We also support the Concrete Canoe competition (see below) and the Seismic Design Competition of the Earthquake Engineering Research Institute (EERI).

• Chi Epsilon: https://www.chi-epsilon.org/xewebgeneral2/
Chi Epsilon is dedicated to maintaining and promoting the status of civil engineering as an ideal profession. Chi Epsilon was organized to recognize the characteristics of the individual civil engineering deemed to be fundamental to the successful pursuit
of an engineering career, and to aid in the development of those characteristics in the civil engineering student.

- **Engineers Without Borders (EWB):** [https://ewb.rice.edu/](https://ewb.rice.edu/)
  EWB partners with developing communities worldwide to design engineering solutions that will improve their standards of living. It is an important component of the Civil and Environmental Engineering program. BA students with their flexible curriculum are encouraged to participate. This exciting endeavor allows undergraduates to have an experience in a developing country, where they are able to design and build a project to help society. Students have been attracted to the EWB program in large numbers and our local chapter is one of the most successful in the United States. Some CEVE courses are EWB-related, providing the opportunity to also obtain credit hours.

- **Concrete Canoe:** [https://concretecanoe.rice.edu/](https://concretecanoe.rice.edu/)
  Rice Concrete Canoe is a student-run club that creates a functional concrete canoe to race and present at the yearly ASCE sponsored competition. Through the year, members gain engineering experience through the research, planning and constructing of a concrete canoe. By offering members exposure to the engineering design process, small-group work, software such as Matlab and Adobe Illustrator (and possibly more starting this year), and laser cutters, Concrete Canoe offers a unique experience to students regardless of whether or not they want to become engineers.

- **Society of Women Engineers:** [https://swe.rice.edu/](https://swe.rice.edu/)
  The Society of Women Engineers aims to empower women to pursue and achieve their full potential in science and engineering related fields. We provide opportunities in professional development, academic and post-graduate planning, community outreach, and social events.

### Additional Information

For additional information, please see the Civil and Environmental Engineering website: [https://ceve.rice.edu/](https://ceve.rice.edu/)

## Doctor of Philosophy (PhD) Degree in the field of Civil Engineering

### Program Learning Outcomes for the PhD Degree in the field of Civil Engineering

Upon completing the PhD degree in the field of Civil Engineering, students will be able to:

1. Demonstrate a solid foundation in civil and environmental engineering at the graduate level.
2. Acquire advanced knowledge of the principles of civil and environmental engineering and apply them to advanced technical problems.
3. Conduct an independent research program.
4. Demonstrate professional written and oral communication skills.

## Requirements for the PhD Degree in the field of Civil Engineering

For general university requirements, please see Doctoral Degrees (p. 65). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the PhD degree in the field of Civil Engineering must:

- Complete 90 credit hours at the 500-level or above of approved courses past the BS degree (60 credit hours past the MS degree) with high standing (see guidelines at: [https://ceve.rice.edu/](https://ceve.rice.edu/))
- Complete at least 6 core courses required by the department.
  - For students focusing on civil, structural engineering, and mechanics, coursework must include one course in each of the following areas: structural mechanics and FEM, structural dynamic systems, earthquake engineering, probabilistic mechanics, and applied mathematics. Comparable coursework completed previously may be substituted for these core courses. A minimum grade of B- (2.67 grade points) must be achieved for each of these core courses, as well as a minimum GPA of 3.00.
- Spend at least four semesters in full-time study at Rice and successfully accomplish the following:
  - Pass a [preliminary examination](https://ceve.rice.edu/graduate-program/msphd-program/preliminary-phd-exam/) in civil engineering (see guidelines at: [https://ceve.rice.edu/](https://ceve.rice.edu/)).
  - Pass a qualifying examination on coursework, proposed research, and related topics.
  - Complete a thesis indicating an ability to conduct original and scholarly research.
  - Pass a formal public oral examination on the thesis and related topics.

Course requirements are stipulated to prepare and train students for rigorous and high quality education, research, and practice. These courses, usually completed within the first two years of graduate school, are designed to train and test the student’s aptitude for higher level thinking, problem solving, and independent research. Core courses also contribute breadth beyond minimum competency as civil and environmental engineers. The students are expected to strive for breadth and depth in core course selection, by working with their advisor and preliminary examination committee, and ensure that minimum core competency expectations are met.

Civil engineering graduate students will be scheduled to take their preliminary examination no later than after two semesters of coursework at Rice. If a student enters in the spring semester, he/she needs to take the exam in the following spring semester along with other students. A student who passes the written and oral parts of the preliminary exam becomes eligible for taking the qualifying exam.

The qualifying examination is administered by the doctoral committee after students develop a research proposal to demonstrate their preparation for the proposed research and identify any areas requiring additional coursework or study. As part of the advanced degree training, we also may require students to assist the faculty in undergraduate courses and laboratory instructions.

CEVE 560  BRIDGE ENGINEERING AND EXTREME EVENTS  3
CEVE 571  PRINCIPLES OF SOIL MECHANICS AND FOUNDATION ENGINEERING  3
CEVE 576  STRUCTURAL DYNAMIC SYSTEMS  3
CEVE 578  EARTHQUAKE ENGINEERING  3
CEVE 592  MODELING AND ANALYSIS OF NETWORKED SYSTEMS  3
CEVE 596  SYSTEM IDENTIFICATION OF DYNAMIC SYSTEMS WITH MACHINE LEARNING  3
CEVE 678  APPLIED STOCHASTIC MECHANICS  3
CEVE 679  APPLIED MONTE CARLO ANALYSIS  3

Additional Coursework as Approved by the Department

Total Credit Hours 90

Footnotes and Additional Information
1 Substitutions will be considered when a Core Requirement is not offered, or under special circumstances related to the professional goals of the student. Substitutions will be considered on a case-by-case basis, and will require approval by the faculty. Potential substitute courses include: CEVE 518, CEVE 520, CEVE 592.

Policies for the PhD Degree in the field of Civil Engineering

Department of Civil and Environmental Engineering Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Civil and Environmental Engineering publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Civil_Environmental_Engineering_Graduate_Handbook.pdf

Admission

Applicants pursuing graduate education in structural engineering, structural mechanics, and geotechnical engineering should have a BS in Civil Engineering with a significant emphasis on structural engineering, but students with other undergraduate degrees may apply if they have adequate preparation in mathematics, mechanics, and structural analysis and design.

Applicants pursuing graduate education in environmental engineering or hydrology should have a BS or BA in related areas of science and engineering and preparation in mathematics, science, and engineering or related courses. A BS degree in engineering or a degree in natural science is preferred.

Successful applicants typically have at least a 3.00 (B) grade point average in undergraduate work and high Graduate Record Examination (GRE) scores. For general university requirements, see Graduate Degrees (p. 49) and Admission to Graduate Study (p. 55).

Additional Information

For additional information, please see the Civil and Environmental Engineering website: https://ceve.rice.edu/

Opportunities for the PhD Degree in the field of Civil Engineering

Fellowships and Opportunities

- NASA Internships: multiple opportunities are available for undergraduate and graduate students for spring and fall semesters, as well as year-long appointments.
- NRC Research Associateship Program: the National Academies of Sciences, Engineering, and Medicine offer paid postdoctoral, senior, and graduate fellowships.
- NASA Fellowships and other opportunities: NASA offers several internships, fellowships, and scholarships for both undergraduate and graduate students.
- NSF Graduate Research Fellowship Program (NSF-GRFP): provides fellowships to individuals selected early in their graduate careers based on their demonstrated potential for significant achievements in science and engineering.
- Fulbright-Hays Doctoral Dissertation Research Abroad Program (DDRA): provides grants to fund individual doctoral students to conduct research in other countries in modern foreign languages and area studies for periods of 6 to 12 months.
- DOE Computational Science Graduate Fellowship: The Department of Energy Computational Science Graduate Fellowship (DOE CSGF) program provides outstanding benefits and opportunities to students pursuing doctoral degrees in fields of study that utilize high performance computing to solve complex problems in science and engineering.
- Fullbright-Hays Doctoral Dissertation Research Abroad Program (DDRA): provides grants to fund individual doctoral students to conduct research in other countries in modern foreign languages and area studies for periods of 6 to 12 months.
- DOD National Defense Science and Engineering Graduate Fellowship (NDSEG): it is a highly competitive portable fellowship that is awarded to US citizens and nationals who intend to pursue a doctoral degree in one of fifteen supported disciplines.
- Pathways to Science: it is a project of the Institute for Broadening Participation. The organization places emphasis on connecting underrepresented groups with STEM programs, funding, mentoring, and resources. Fellowships for masters and doctoral students are available, as is funding for travel and summer institutes.

Student Clubs

- Civil and Environmental Department Graduate Student Association: The main purpose of the club is to 1) foster better professional and personal relationships among students and between students and faculty members 2) provide a forum for concerns, both professional and personal, about graduate student life and 3) foster professional growth through mentoring, recruitment, and affiliate/internship relationships.
- Earthquake Engineering Research Institute: http://eeri.rice.edu. The objective of this student chapter is to encourage, facilitate, and promote learning and interest among students in the field of

Doctor of Philosophy (PhD) Degree in the field of Environmental Engineering

Program Learning Outcomes for the PhD Degree in the field of Environmental Engineering

Upon completing the PhD degree in the field of Environmental Engineering, students will be able to:

1. Demonstrate a solid foundation in civil and environmental engineering at the graduate level.
2. Acquire advanced knowledge of the principles of civil and environmental engineering and apply them to advanced technical problems.
3. Conduct an independent research program.
4. Demonstrate professional written and oral communication skills.

Requirements for the PhD Degree in the field of Environmental Engineering

For general university requirements, please see Doctoral Degrees (p. 65). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the PhD degree in the field of Environmental Engineering must:

- Complete 90 credit hours at the 500-level and above of approved courses past the BS degree (60 credit hours past the MS degree) with high standing (see guidelines on the department website (http://www.ceve.rice.edu/)).
- Complete at least 6 core courses required by the department.
- Spend at least four semesters in full time study at Rice and successfully accomplish the following:
  - Complete up to two semesters of approved courses past the BS degree (60 credit hours past the MS degree) with high standing (see guidelines on the department website (http://www.ceve.rice.edu/)).
  - Complete at least 6 core courses required by the department.
  - Spend at least four semesters in full time study at Rice and successfully accomplish the following:
    - Pass a preliminary examination (https://ceve.rice.edu/graduate-program/msphd-program/preliminary-phd-exam/) in environmental engineering (see guidelines on the department website (http://www.ceve.rice.edu/)).
    - Pass a qualifying examination on coursework, proposed research, and related topics.
    - Complete a thesis indicating an ability to conduct original and scholarly research.
    - Pass a formal public oral examination on the thesis and related topics.

Course requirements are stipulated to prepare and train students for rigorous and high quality education, research, and practice. These courses, usually completed within the first two years of graduate school, are designed to train and test the student’s aptitude for higher level thinking, problem solving, and independent research. Core courses also contribute breadth beyond minimum competency as civil and environmental engineers. The students are expected to strive for breadth and depth in core course selection, by working with their advisor and preliminary examination committee, and ensure that minimum core competency expectations are met.

PhD students in the EES field will be scheduled to take their preliminary examination no later than after two semesters of coursework at Rice. If a student enters in the spring semester, he/she needs to take the exam in the following spring semester along with other students. A student who passes the written and oral parts of the preliminary exam becomes eligible for taking the qualifying exam.

The qualifying examination is administered by the doctoral committee after students develop a research proposal to demonstrate their preparation for the proposed research and identify any areas requiring additional coursework or study. As part of the advanced degree training, we also may require students to assist the faculty in undergraduate courses and laboratory instructions.

The objective of this student chapter is to encourage, facilitate, and promote learning and interest among students in the field of earthquake engineering through interaction with professionals and experts and through interdisciplinary involvement.

Additional Information

For additional information, please see the Civil and Environmental Engineering website: https://ceve.rice.edu/

Master of Civil and Environmental Engineering (MCEE) Degree in the field of Civil Engineering

Program Learning Outcomes for the MCEE Degree in the field of Civil Engineering

Upon completing the MCEE degree in the field of Civil Engineering, students will be able to:

1. Demonstrate a solid foundation in civil and environmental engineering at the graduate level.
2. Demonstrate professional written and oral communication skills.

Requirements for the MCEE in the field of Civil Engineering

The MCEE degree is a non-thesis master’s degree. For general university requirements, please see Non-Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MCEE degree in the field of Civil Engineering must complete:

- A minimum of 11 courses (30 credit hours) to satisfy degree requirements.
- A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above).
- A minimum of 24 credit hours must be taken at Rice University.
• A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University.
• A minimum of one graduate seminar (CEVE 601 or CEVE 602).
• A final project (CEVE 590).
• A minimum overall GPA of 2.67 or higher in all Rice coursework.
• A minimum GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree.

The Master of Civil and Environmental Engineering (MCEE) degree is a professional non-thesis master's degree. Students who have a BS or BA degree in any field of engineering or related study may apply. Depending on their background, some students may need to fulfill prerequisites or take remedial engineering courses to earn the MCEE degree. For more information, see the department website (http://www.ceve.rice.edu/).

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/dgeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

### Footnotes and Additional Information

1 The professional masters final project is overseen by a Civil and Environmental Engineering department faculty member.
Policies for the MCEE Degree in the field of Civil Engineering

Department of Civil and Environmental Engineering Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Civil and Environmental Engineering publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Civil_Environmental_Engineering_Graduate_Handbook.pdf

Admission

Applicants pursuing graduate education in structural engineering, structural mechanics, and geotechnical engineering should have a BS in Civil Engineering with a significant emphasis on structural engineering, but students with other undergraduate degrees may apply if they have adequate preparation in mathematics, mechanics, and structural analysis and design.

Applicants pursuing graduate education in environmental engineering or hydrology should have a BS or BA in related areas of science and engineering and preparation in mathematics, science, and engineering or related courses. A BS degree in engineering or a degree in natural science is preferred.

Admission into a professional program is granted separately from admission into a research and thesis program. Professional degree programs terminate when the degree is awarded. Students who wish to continue graduate study after completing a professional program must apply for admission into a research program.

Transfer Credit

For Rice University's policy regarding transfer credit, see Transfer Credit (p. 64). Some departments and programs have additional restrictions on transfer credit. Students are encouraged to meet with their academic program's advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the MCEE degree in the field of Civil Engineering or Environmental Engineering should be aware of the following departmental transfer credit guidelines:

- No more than 2 courses (6 credit hours) of transfer credit from U.S. or international universities of similar standing as Rice may apply towards the degree.
- Request for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.

Additional Information

For additional information, please see the Civil and Environmental Engineering website: https://ceve.rice.edu/

Opportunities for the MCEE Degree in the field of Civil Engineering

Fifth-Year Master's Degree Option for Rice Undergraduate Students

Rice students have an option to pursue the Master of Civil and Environmental Engineering (MCEE) degree by adding an additional fifth year to their four undergraduate years of science and engineering studies.

Advanced Rice undergraduate students in good academic standing may apply to the MCEE degree program during their junior or senior year. Upon acceptance, depending on course load, financial aid status, and other variables, they may then start taking some required courses of the master's degree program. A plan of study will need to be approved by the student's undergraduate advisor and the (MCEE) chair of the department graduate studies committee.

As part of this option and opportunity, Rice undergraduate students:

- must complete the requirements for their bachelor's degree and the master's degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
- should be aware of the financial aid implications, if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
- more information on this Undergraduate - Graduate Concurrent Enrollment possibility, including specific information on the registration process can be found here (p. 17).

George R. Brown School of Engineering Scholarships for Professional Master's Degrees in Engineering

The George R. Brown School of Engineering Scholarships for Professional Master's Degrees in Engineering were established by the Dean of the School of Engineering to encourage outstanding Rice undergraduate engineering students to pursue a professional master's degree at Rice.

Rice Global Forum (RGF)

The Rice Global Forum (RGF) is a group of industry professionals plus Rice faculty who gather regularly to discuss topics that define their interests. They sponsor the Engineering Competition each year and give out scholarships that are derived from membership dues. The scholarships are geared toward professional master's and terminal master's (MS) students.

Additional Information

For additional information, please see the Civil and Environmental Engineering website: https://ceve.rice.edu/

Master of Civil and Environmental Engineering (MCEE) Degree in the field of Environmental Engineering

Program Learning Outcomes for the MCEE Degree in the field of Environmental Engineering

Upon completing the MCEE degree in the field of Environmental Engineering, students will be able to:

1. Demonstrate a solid foundation in civil and environmental engineering at the graduate level.
2. Demonstrate professional written and oral communication skills.
Requirements for the MCEE Degree in the field of Environmental Engineering

The MCEE degree is a non-thesis master's degree. For general university requirements, please see Non-Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MCEE degree in the field of Environmental Engineering must complete:

- A minimum of 11 courses (30 credit hours) to satisfy degree requirements.
- A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above).
- A minimum of 24 credit hours must be taken at Rice University.
- A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University.
- A minimum of one graduate seminar (CEVE 601 or CEVE 602).
- A final project (CEVE 590).
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree.

The Master of Civil and Environmental Engineering (MCEE) degree is a professional non-thesis master's degree. Students who have a BS or BA degree in any field of engineering or related study may apply. Depending on their background, some students may need to fulfill prerequisites or take remedial engineering courses to earn the MCEE degree. Master of Science (MS) Degree in the field of Civil Engineering

Program Learning Outcomes for the MS Degree in the field of Civil Engineering

Upon completing the MS degree in the field of Civil Engineering, students will be able to:

1. Demonstrate a solid foundation in civil and environmental engineering at the graduate level.
2. Acquire advanced knowledge of the principles of civil and environmental engineering and apply them to advanced technical problems.
3. Conduct an independent research program.
4. Demonstrate professional written and oral communication skills.
Requirements for the MS Degree in the field of Civil Engineering

The MS degree is a thesis master's degree. For general university requirements, please see Thesis Master's Degrees (p. 68). Students pursuing the MS degree in the field of Civil Engineering must:

- Complete a minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy degree requirements.
- Complete a minimum of 24 credit hours at Rice University from approved graduate-level courses and 6 credit hours of thesis research.
  - Core courses contribute to breadth, depth, and minimum competency as civil and environmental engineers. For students focusing on civil, structural engineering and mechanics, coursework must include at least one course in each of the following areas: structural mechanics and FEM, structural dynamic systems, earthquake engineering, probabilistic mechanics, and applied mathematics. Comparable coursework completed previously may be substituted for these core courses. Students must obtain a minimum grade of B- (2.67 grade points) for each core course, and maintain a minimum GPA of 3.00.
- Select a thesis committee according to departmental requirements and conduct original research in consultation with the committee.
- Present and defend in oral examination an approved research thesis.

Students take the oral exam only after the committee determines the thesis to be in a written format acceptable for public defense. Normally, students take two academic years and the intervening summer to complete the degree.

Students intending to extend their studies into the PhD degree program should note that the department does not grant an automatic (candidacy) MS degree to candidates who have not written a satisfactory master's thesis.

Policies for the MS Degree in the field of Civil Engineering

Department of Civil and Environmental Engineering Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Civil and Environmental Engineering publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Civil_EnvironmentalEngineering_Graduate_Handbook.pdf

Transfer Credit

For Rice University's policy regarding transfer credit, see Transfer Credit (p. 64). Some departments and programs have additional restrictions on transfer credit. Students are encouraged to meet with their academic program's advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the MS degree in the field of Civil or Environmental Engineering should be aware of the following departmental transfer credit guidelines:

- No more than 2 courses (6 credit hours) of transfer credit from U.S. or international universities of similar standing as Rice may apply towards the degree.

Additional Information

For additional information, please see the Civil and Environmental Engineering website: https://ceve.rice.edu/

Opportunities for the MS Degree in the field of Civil Engineering

Fellowships and Opportunities

- NASA Internships: multiple opportunities are available for undergraduate and graduate students for spring and fall semesters, as well as year-long appointments.
- NRC Research Associateship Program: the National Academies of Sciences, Engineering, and Medicine offer paid postdoctoral, senior, and graduate fellowships.
- NASA Fellowships and other opportunities: NASA offers several internships, fellowships, and scholarships for both undergraduate and graduate students.
- NSF Graduate Research Fellowship Program (NSF-GRFP): provides fellowships to individuals selected early in their graduate careers based on their demonstrated potential for significant achievements in science and engineering.
- Fulbright-Hays Doctoral Dissertation Research Abroad Program (DDRA): provides grants to fund individual doctoral students to conduct research in other countries in modern foreign languages and area studies for periods of 6 to 12 months.
- DOE Computational Science Graduate Fellowship (DOE CSGF) program provides outstanding benefits and opportunities to students pursuing doctoral degrees in fields of study that utilize high performance computing to solve complex problems in science and engineering.
- DOD National Defense Science and Engineering Graduate Fellowship (NDSEG): it is a highly competitive portable fellowship that is awarded to US citizens and nationals who intend to pursue a doctoral degree in one of fifteen supported disciplines.
- Pathways to Science: it is a project of the Institute for Broadening Participation. The organization places emphasis on connecting underrepresented groups with STEM programs, funding, mentoring, and resources. Fellowships for masters and doctoral students are available, as is funding for travel and summer institutes.

Student Clubs

- Civil and Environmental Department Graduate Student Association: The main purpose of the club is to 1) foster better professional and personal relationships among students and between students and faculty members 2) provide a forum for concerns, both professional and personal, about graduate student life and 3) foster professional growth through mentoring, recruitment, and affiliate/internship relationships.
The objective of this student chapter is to encourage, facilitate, and promote learning and interest among students in the field of earthquake engineering through interaction with professionals and experts and through interdisciplinary involvement.

**Additional Information**
For additional information, please see the Civil and Environmental Engineering website: [https://ceve.rice.edu/](https://ceve.rice.edu/)

**Master of Science (MS) Degree in the field of Environmental Engineering**

**Program Learning Outcomes for the MS Degree in the field of Environmental Engineering**

Upon completing the MS degree in the field of Environmental Engineering, students will be able to:

1. Demonstrate a solid foundation in environmental engineering at the graduate level.
2. Apply principles of environmental engineering and related knowledge to advanced technical problems.
3. Conduct independent research.
4. Demonstrate professional written and oral communication skills.

**Requirements for the MS Degree in the field of Environmental Engineering**

The MS degree is a thesis master’s degree. For general university requirements, please see Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MS degree in the field of Environmental Engineering must:

- Complete a minimum of 30 total credit hours of graduate-level study (coursework at the 500-level or above) to satisfy degree requirements.
- Complete a minimum of 24 credit hours at Rice University from approved graduate-level courses and 6 credit hours of thesis research.
  - Core courses contribute to breadth, depth, and minimum competency. For students focusing on environmental engineering, coursework must include at least one course in each of the following areas: environmental chemistry, water treatment, bioremediation, hydrology, and air quality. Comparable coursework completed previously may be substituted for these core courses. Students must obtain a minimum grade of B- (2.67 grade points) for each core course, and maintain a minimum GPA of 3.00.
- Select a thesis committee according to departmental requirements and conduct original research in consultation with the committee.
- Present and defend in oral examination an approved research thesis.

Students take the oral exam only after the committee determines the thesis to be in a written format acceptable for public defense. Normally, students take two academic years and the intervening summer to complete the degree.

Students intending to extend their studies into the PhD degree program should note that the department does not grant an automatic (candidacy) MS degree to candidates who have not written a satisfactory master’s thesis.

Classical Studies

Contact Information

Classical and European Studies
https://ces.rice.edu/
207 Rayzor Hall
713-348-4151

Christian J. Emden
Department Chair
department@rice.edu

Classical Studies is a major offered by the Classical and European Studies (CES) Department. The Classical Studies program provides instruction in the Greek and Latin languages, in Greek and Roman literature (studied in the original and in translation), in the classical civilizations surveyed as a whole, and in particular themes, genres, and periods of classical culture and its influence through subsequent ages.

The Classical Studies program offers two specializations that satisfy the requirements for a BA. The Classical Languages specialization emphasizes Greek and Latin and reading classical texts in the original languages. The Classical Civilizations specialization allows for a broader set of approaches and does not include a language requirement.

Bachelor's Program

• Bachelor of Arts (BA) Degree with a Major in Classical Studies (p. 325)

Classical Studies does not currently offer an academic program at the graduate level.

Chair
Christian J. Emden

Program Advisor
Hilary S. Mackie

Professors
Scott McGill
Harvey E. Yunis

Associate Professor
Hilary S. Mackie

Lecturer
Ted Somerville

Description and Code Legend

Note: Internally, the university uses the following descriptions, codes, and abbreviations for this academic program. The following is a quick reference:

Course Catalog/Schedule
• Course offerings/subject code for Classical Studies: CLAS
• Course offerings/subject code for Greek: GREE
• Course offerings/subject code for Latin: LATI

Department Description and Code
• Classical and European Studies: CLEU

Undergraduate Degree Description and Code
• Bachelor of Arts degree: BA

Undergraduate Major Description and Code
• Major in Classical Studies: CLST

CIP Code and Description

• CLST Major/Program: CIP Code/Title: 16.1200 - Classics and Classical Languages, Literatures, and Linguistics, General

Classification of Instructional Programs (CIP) 2010 Codes and Descriptions from the National Center for Education Statistics: https://nces.ed.gov/ipeds/cipcode/
Bachelor of Arts (BA) Degree with a Major in Classical Studies

Program Learning Outcomes for the BA Degree with a Major in Classical Studies

Upon completing the BA degree with a major in Classical Studies, students will be able to:

1. Understand texts, artifacts, institutions, events, personalities, and places that are integral to ancient Greek and Roman culture.
2. Analyze, interpret, and think critically about those texts, artifacts, institutions, events, personalities, and places.
3. Situate those texts, artifacts, institutions, events, personalities, and places in their historical and cultural contexts.
4. Relate classical civilization to the world around them, and appreciate the profound influence classical civilization had on later Western civilization.

Additionally, upon completing the major in Classical Studies and an area of specialization in Classical Languages, students will be able to:

1. Read Greek and Latin proficiently and display articulate knowledge of the grammar and style of both languages.

Requirements for the BA Degree with a Major in Classical Studies

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Classical Studies must complete:

- A minimum of 10 courses (30 credit hours) to satisfy major requirements.
- A minimum of 120 credit hours to satisfy degree requirements.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 2 courses (6 credit hours) taken at the 300-level or above.
- The requirements for one area of specialization (see below for areas of specialization). The BA degree with a major in Classical Studies offers two areas of specialization:
  - Classical Civilizations (p. ), or
  - Classical Languages (p. ).

The Classical Studies major offers instruction in the Greek and Latin languages, in Greek and Roman literature (studied in the original and in translation), in the classical civilizations surveyed as a whole, and in particular themes, genres, and periods of classical culture and their influence through subsequent ages. The program caters to students who wish to prepare for graduate school in classics as well as to students interested in Greek and Roman culture for other reasons and wish to take a less specialized approach. The program provides maximum flexibility without sacrifice of focus. Students will be able to explore ancient Greece and Rome from a variety of different angles and with whatever emphasis best suits their individual needs and goals.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s

Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Students and their academic advisors should identify and clearly document the courses to be taken.

</table>

Degree Requirements

Core Requirements

Select 2 courses from the following:

- CLAS 107 / HUMA 107  GREEK CIVILIZATION AND ITS LEGACY  6
- CLAS 108 / HUMA 111  ROMAN CIVILIZATION AND ITS LEGACY  6
- CLAS 235  CLASSICAL MYTHOLOGY: INTERPRETATION, ORIGINS, AND INFLUENCE  3
- CLAS 336 / LING 336  INTRO TO INDO-EUROPEAN  3

Area of Specialization

Select 1 from the following Areas of Specialization (see Areas of Specialization below):

- Classical Civilizations
- Classical Languages

Total Credit Hours Required for the Major in Classical Studies  30
Additional Credit Hours to Complete BA Degree Requirements  30
University Graduation Requirements (p. 26)  60
Total Credit Hours  120

Footnotes and Additional Information

* Includes coursework completed as distribution credit, FWIS, LPAP, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The “hours outside of the major” requirement may include all of the above university requirements.

1 A minimum of 2 courses (6 credit hours) must be taken at the 300-level or above.

Areas of Specialization

Students must complete the requirements as listed for one of the following areas of specialization as offered by the Classical Studies major. A total of 8 courses (24 credit hours) must be taken in the area of specialization.

Area of Specialization: Classical Civilizations

Students must complete a total of 8 courses (24 credit hours) as listed below to satisfy the requirements for the area of specialization in Classical Civilizations.
Select 8 courses from Classical Studies (CLAS), Greek (GREE), or Latin (LATI) course offerings 1

Total Credit Hours 24

Footnotes and Additional Information

1 A minimum of 2 courses (6 credit hours) must be taken at the 300-level or above.

Area of Specialization: Classical Languages

Students must complete a total of 8 courses (24 credit hours) as listed below to satisfy the requirements for the area of specialization in Classical Languages.

Select 1 course from Greek (GREE) at the 300-level or above

Select 1 course from Latin (LATI) at the 300-level or above

Select 1 from the following:

Select 1 course from Greek (GREE) at the 300-level or above

Select 1 course from Latin (LATI) at the 300-level or above

Select 5 courses from Classical Studies (CLAS), Greek (GREE), or Latin (LATI) course offerings 1

Total Credit Hours 24

Footnotes and Additional Information

1 A minimum of 1 course (3 credit hours) must be taken at the 300-level or above.

Policies for the BA Degree with a Major in Classical Studies

Transfer Credit

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the major in Classical Studies should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

Distribution Credit Information

The determination of distribution eligibility is done as part of the new course creation process (https://registrar.rice.edu/facstaff/courseprocess/). As part of an annual roll call (https://registrar.rice.edu/facstaff/distribution_credit/) coordinated each Spring by the Office of the Registrar, course distribution eligibility is reviewed and reaffirmed by the Dean’s Offices of each of the academic schools.

Faculty and leadership in the academic schools are responsible for ensuring that the courses identified as distribution-eligible meet the criteria as set in the General Announcements (p. 26). Students are responsible for ensuring that they meet graduation requirements (p. 26) by completing coursework designated as distribution at the time of course registration.

Distribution courses from the Department of Classical and European Studies are broad in theme and scope and provide students with a substantial inquiry into literature, art, media, history, thought, and/or politics, including specific national traditions, linguistic contexts, and historical periods. Such courses involve a broad and often interdisciplinary spectrum of knowledge, providing students with the tools for thinking critically about the formation of European culture, its colonial past, and its national and linguistic traditions from antiquity to the present.

Additional Information

For additional information, please see the Classical and European Studies website: https://ces.rice.edu/.

Opportunities for the BA Degree with a Major in Classical Studies

Academic Honors

The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Additional Information

For additional information, please see the Classical and European Studies website: https://ces.rice.edu/.

See https://humanities.rice.edu/student-life for tables of fellowships, prizes, and internships/practica that may be relevant to this major.

Researchers in the interdisciplinary field of Cognitive Sciences seek to understand such mental phenomena as perception, thought, memory, the acquisition and use of language, learning, concept formation, and consciousness. Some investigators focus on relations between brain structures and behavior, some work with computer simulation, some use experimental methodology, and others work at more abstract theoretical levels.
Bachelor's Program

- Bachelor of Arts (BA) Degree with a Major in Cognitive Sciences

(p. 328)

Cognitive Sciences does not currently offer an academic program at the graduate level.

Bachelor of Arts (BA) Degree with a Major in Cognitive Sciences

Program Learning Outcomes for the BA Degree with a Major in Cognitive Sciences

Upon completing the BA degree with a major in Cognitive Sciences, students will be able to:

1. Understand cognitive science as an interdisciplinary field and demonstrate the ability to synthesize key knowledge, theories, methods, research, and other elements from many related disciplines and bring these interdisciplinary elements to bear on problems or questions in the cognitive sciences.

2. Demonstrate a breadth of knowledge of the key issues, questions, and perspectives at stake in the multiple disciplines that contribute to the study of the cognitive sciences.

3. Achieve a depth of knowledge in one core area of the cognitive sciences – linguistics, neuroscience, philosophy, or psychology – and develop a knowledge base in that discipline, as well as an understanding of the theories, methods, and research approaches in that discipline.

4. Demonstrate the advanced critical thinking skills necessary to evaluate multiple theories or methods from a variety of related disciplines and choose which to apply to a particular problem or question in the cognitive sciences, as well as the advanced critical thinking ability necessary to evaluate the validity of research results.
that purport to address the same problem or question, but with different results.

5. Demonstrate the ability to communicate original research or research by other scholars effectively and at a college level in written and oral formats.

Requirements for the BA Degree with a Major in Cognitive Sciences

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Cognitive Sciences must complete:

- A minimum of 14 courses (42-46 credit hours, depending on course selection) to satisfy major requirements.
- A minimum of 120 credit hours to satisfy degree requirements.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 6 courses (18 credit hours) taken at the 300-level or above.
- A maximum of 4 courses (12 credit hours) from study abroad or transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab.
- The requirements for one area of specialization (see below for areas of specialization). When students declare the major (p. 11) in Cognitive Sciences, students must additionally identify and declare one of four areas of specialization, either in:
  - Linguistics (p. 330), or
  - Neuroscience (p. 331), or
  - Philosophy (p. 331), or
  - Psychology (p. 332).

Because of the common core requirements, it is possible for students to change their area of specialization at any time, even after initially declaring the major. To do so, please contact the Office of the Registrar (registrar@rice.edu).

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

Bachelor of Arts (BA) Degree with a Major in Cognitive Sciences

Area of Specialization

Select 1 from the following Areas of Specialization (see Areas of Specialization below):

- Linguistics
- Neuroscience
- Philosophy
- Psychology

Elective Requirements

Select 2-3 elective courses from the other Areas of Specialization or from the following additional electives:

- COMP 182 ALGORITHMIC THINKING
- COMP 330 TOOLS AND MODELS FOR DATA SCIENCE
- COMP 440 / ELEC 440 ARTIFICIAL INTELLIGENCE
- COMP 450 / ELEC 450 / MECH 450 ALGORITHMIC ROBOTICS
- COMP 540 STATISTICAL MACHINE LEARNING
- CSCI 390 SUPERVISED RESEARCH IN COGNITIVE SCIENCES
- CSCI 481 HONORS PROJECT
- DSCI 302 INTRODUCTION TO DATA SCIENCE TOOLS AND MODELS

Footnotes and Additional Information

1. Only one of COMP 180 and COMP 182 may be counted toward the Cognitive Sciences major. For example, if COMP 180 was used to satisfy the Advanced Computing Core requirement, COMP 182 cannot be used as an Elective course.

2. If the Cognitive Sciences major chooses 3 courses (9 credit hours minimum) to satisfy the Area of Specialization requirement, they must complete a remainder total of 3 courses (9 credit hours minimum) to fulfill the Elective requirement. If the Cognitive Sciences major chooses 4 courses (12 credit hours minimum) to satisfy the Area of Specialization requirement, they must complete a remainder total of 2 courses (6 credit hours minimum) to fulfill the Elective requirement. The courses that are eligible to fulfill the Electives requirement are the same as the courses required to fulfill the Areas of Specialization other than the student's chosen Area of Specialization. For example, if the student's Area of Specialization is Psychology, all Elective courses must come from areas other than Psychology.

3. Students must complete at least 3 courses (9 credit hours), and no more than 4 courses (12 credit hours) in an Area of Specialization. Students may not use the same course to fulfill both a Core Course requirement and an Area of Specialization requirement.

Areas of Specialization

Students must complete the requirements as listed for one of the following areas of specialization as offered by the Cognitive Sciences major. A total of 6 courses (minimum of 18-19 credit hours, depending on course selection) must be taken in the area of specialization and elective requirements. See footnote above.

Area of Specialization: Linguistics

To fulfill the remaining Cognitive Sciences major requirements, students pursuing the Linguistics area of specialization must complete:

- a minimum of 3 courses (9 credit hours) from the Linguistics area of specialization
- 2 courses (6-7 credit hours, depending on course selection) from any area of specialization outside Linguistics (from Neuroscience, Philosophy, or Psychology)
• 1 course (3-4 credit hours, depending on course selection) from any area of specialization (including Linguistics) or from approved elective coursework (listed above)

Footnotes and Additional Information

1 LING 409 only counts toward the Cognitive Sciences major when the topic is related to Cognitive Science. For example, 'Computational Linguistics' and 'Gesture, Cognition, and Communication' count but 'Variation in U.S. Hip Hop' does not. For questions regarding a specific instance of LING 409, consult a CSCI major advisor.

Area of Specialization: Neuroscience

To fulfill the remaining Cognitive Sciences major requirements, students pursuing the Neuroscience area of specialization must complete:

• a minimum of 3 courses (9 credit hours) from the Neuroscience area of specialization
• 2 courses (6-7 credit hours, depending on course selection) from any area of specialization outside Neuroscience (from Linguistics, Philosophy, or Psychology)
• 1 course (3-4 credit hours, depending on course selection) from any area of specialization (including Neuroscience) or from approved elective coursework (listed above)

Footnotes and Additional Information

1 Some of the neuroscience courses are taught by Baylor College of Medicine faculty. Rice - Baylor College of Medicine neuroscience course offerings change frequently. Baylor courses not on the list below may be counted at the discretion of the steering committee. The most up-to-date listing of courses counting as additional courses is found at cogsci.rice.edu (http://cogsci.rice.edu).

Area of Specialization: Philosophy

To fulfill the remaining Cognitive Sciences major requirements, students pursuing the Philosophy area of specialization must complete:

• a minimum of 3 courses (9 credit hours) from the Philosophy area of specialization
• 2 courses (6-7 credit hours, depending on course selection) from any area of specialization outside Philosophy (from Linguistics, Neuroscience, or Psychology)
• 1 course (3-4 credit hours, depending on course selection) from any area of specialization (including Philosophy) or from approved elective coursework (listed above)

Footnotes and Additional Information

1 PSYC 480 only counts toward the Cognitive Sciences major when the topic is related to Cognitive Science. For example, ‘Genes and Cognition’ counts, but ‘Topics in Clinical Psychology’ does not. For questions regarding a specific instance of PSYC 480, consult a CSCI major advisor.

Policies for the BA Degree with a Major in Cognitive Sciences

Transfer Credit

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

Program Transfer Credit Guidelines

Students pursuing the major in Cognitive Sciences should be aware of the following program-specific transfer credit guidelines:

• No more than 4 courses (12 credit hours) of transfer credit from U.S. or international universities of similar standing as Rice may apply towards the major.
• Request for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

Additional Information

For additional information, please see the Cognitive Sciences website: https://cogsci.rice.edu.

Opportunities for the BA Degree with a Major in Cognitive Sciences

Academic Honors

The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Honors Program in Cognitive Sciences

Students with a 3.50 major GPA in Cognitive Sciences and 3.30 overall GPA may apply for the cognitive sciences honors program. Students in the honors program are expected to conduct an independent research project of either one or two semesters under the guidance of a member of the cognitive sciences faculty. Students who wish to enter this program...
should consult with prospective advisors during their junior year and submit a proposal by the end of the semester preceding the initiation of the project. Typically, this means submitting a proposal by the end of the junior year and beginning the project during the fall of the senior year. Proposal will be reviewed by both the supervisor and the program director. Students who undertake a two-semester project will be allowed to continue into the second semester only if their advisor judges that sufficient progress has been made during the first semester. At the end of a project, honors students are expected to submit a final paper to both their advisor and the program director and make an oral presentation to faculty and students. For more details, please contact the program director.

Independent Research
Majors may undertake supervised independent research by enrolling in CSCI 390 or the honors program. Students who wish to take CSCI 390 must complete a CSCI 390 contract and have it approved by their supervisor and the program director prior to the end of the first week of classes. All students taking CSCI 390 also must write a substantive research paper, which is to be submitted to both their advisor and the program director at the end of the semester, and presented in the Rice Undergraduate Research Symposium as a poster. (Copies of the contract form and instructions are available on the “forms” section of the cognitive sciences website.)

Additional Information
For additional information, please see the Cognitive Sciences website: https://cogsci.rice.edu/.

College Courses
One of the colleges’ important activities is their sponsorship of courses and workshops open to all students. By expanding course offerings outside the traditional departments, College Courses promote the academic involvement of the colleges while introducing students to interdisciplinary topics of particular interest.

Students who wish to teach a student-taught course must first take COLL 300, a course on pedagogy that is taught by faculty magisters in consultation with the Center for Teaching Excellence. As a part of their participation in COLL 300, students then propose College Courses during the semester before they are offered. Once approved by the Dean of Undergraduates, these 1-credit student-taught College Courses are offered for academic credit on the same basis as departmental courses. More information about student-taught courses can be found here (https://cte.rice.edu/stc/).

No more than three hours of credit for student-taught College Courses (COLL) may be counted toward graduation. This includes all courses COLL 100-199 as well as COLL 200.

For additional information regarding College Courses, see the program’s website: https://cte.rice.edu/stc/.

Undergraduate Requirements
College Courses are taught and overseen by Residential Colleges. Many of these are Student Taught Courses (STC). These courses can be found at the 100-199 level in Rice’s Course Catalog (https://courses.rice.edu). Student-taught courses became part of the Rice curriculum in 2006. These courses provide undergraduates a chance to teach fellow students about subjects in which they consider themselves to be an expert. Since then, hundreds of undergraduates have instructed their peers on a diverse set of topics. Student-taught courses allow undergraduates to teach and to take courses in non-traditional subjects, and to thereby supplement the Rice curriculum. These courses are labeled COLL (College Courses) and are offered for 1 credit hour on a satisfactory/unsatisfactory basis. A student may only count up to 3 hours of credit for student-taught courses towards graduation, including teaching practicum courses.

Guidelines for Student Taught Courses
Students are invited to propose student-taught courses to the Dean of Undergraduates. Guidelines for student-taught courses are listed below:

1. The courses must be graded on a satisfactory/unsatisfactory scale—this is functionally equivalent to pass/fail, but does not count against a student’s quota for pass/fail courses.
2. All student-taught courses are offered for 1 credit hour.
3. A student instructor cannot be paid a salary, but is awarded 1 credit hour. Colleges have the student instructor register in a teaching practicum that is overseen by their master. The faculty sponsor of the student taught courses would be responsible for the course including involvement in its planning, operations, and grading. The sponsor is expected to attend at least 1 class and meet with the student instructor.
4. A student may have a GPA of 2.50 or higher and be enrolled at Rice for at least 2 semesters before teaching a course. Students must be enrolled at Rice for at least 1 full semester before proposing a class.
5. A student may take as many student-taught courses as they like. Courses are listed on the transcript, but no more than 3 resulting credit hours can be applied towards the satisfaction of his/her graduation requirements.
6. Student-taught courses must have an enrollment cap of 19 or fewer.
7. Completing COLL 300 is required of all students who wish to teach an STC and have not already taught an STC.

For more information regarding Student Taught Courses, including the procedures for STC proposals, and evaluation criteria, please see the Center for Teaching Excellence (https://cte.rice.edu/stc/).

There are no College Courses (COLL) offered at the graduate-level (500-level or above).

Dean of Undergraduates
Bridget K. Gorman

The coursework within the Computational and Applied Mathematics (CAAM) major provides foundations applicable to the many fields of engineering, physical sciences, life sciences, behavioral and social sciences, and computer science. CAAM students receive training in foundational mathematics for newly developed algorithms in data science and training in all aspects of computation from algorithmic analysis to cost-accuracy performance. CAAM majors can plan a course of study consistent with their particular interests.

The professional Master of Computational and Applied Mathematics (MCAAM) is an advanced professional degree program designed for students interested in a technical career path in industry or business. The PhD and MA program concentrates on research. Faculty research interests fall in the four general areas of numerical analysis and scientific computing; numerical methods for partial differential equations; operations research and optimization; and mathematical modeling in physical, biological, or behavioral sciences.

A further advanced interdisciplinary degree program in computational science and engineering (CSE) addresses the current need for sophisticated computation in both engineering and the sciences. For more information, see Computational Science and Engineering (p. 341).

A coordinated MBA/MCAAM degrees program is also offered in conjunction with the Jesse H. Jones Graduate School of Management.

Bachelor’s Program
- Bachelor of Arts (BA) Degree with a Major in Computational and Applied Mathematics (p. 335)

Minor
- Minor in Computational and Applied Mathematics (p. 340)

Master’s Programs
- Master of Computational and Applied Mathematics (MCAAM) Degree (p. 338)
- Master of Arts (MA) Degree in the field of Computational and Applied Mathematics*

Doctoral Program
- Doctor of Philosophy (PhD) Degree in the field of Computational and Applied Mathematics (p. 337)

Coordinated Programs
- Master of Computational and Applied Mathematics (MCAAM) Degree / Master of Business Administration (MBA) Degree (p. 339)
* Although students are not normally admitted to a Master of Arts (MA) degree program, graduate students may earn the MA as they work towards the PhD.

Bachelor of Arts (BA) Degree with a Major in Computational and Applied Mathematics

Program Learning Outcomes for the BA Degree with a Major in Computational and Applied Mathematics

Upon completing the BA degree with a major in Computational and Applied Mathematics, students will be able to:

1. Use modern numerical methods to analyze and solve typical problems in linear systems.
2. Design and test a mathematical model, following a multi-stage process.

Requirements for the BA Degree with a Major in Computational and Applied Mathematics

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Computational and Applied Mathematics must complete:

- A minimum of 17-18 courses (49-52 credit hours), depending on course selection, to satisfy major requirements.
- A minimum of 120 credit hours to satisfy degree requirements.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 13 courses (37 credit hours) taken at the 300-level or above.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

Elective Requirements

Select 2 elective courses at the 300-level or above 6
Select 2 elective courses at the 400-level or above 6

Total Credit Hours Required for the Major in Computational and Applied Mathematics 49-52

University Graduation Requirements (p. 26) 60

Total Credit Hours 120

Footnotes and Additional Information

1. Includes coursework completed as distribution credit, FWIS, LPAP, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The "hours outside of the major" requirement may include all of the above university requirements.

2. The Introductory Courses requirement is typically fulfilled during the student's first two years.

3. Students may petition the Director of Undergraduate Studies to substitute MATH 354 for CAAM 335.

4. Students with prior experience with calculus may replace MATH 101 or MATH 105 with a 3-credit quantitative elective at the 200-level or above, as approved by a CAAM undergraduate advisor (this quantitative elective is in addition to the four electives required below). Entering students should enroll in the most advanced course commensurate with their background; advice is available from the CAAM department during Orientation Week.

5. The Intermediate Courses requirement is typically fulfilled by the end of the student's third year.

6. Students who plan to pursue graduate studies in Computational and Applied Mathematics should take MATH 302 and MATH 321.

7. The Advanced Courses requirement is typically completed by the end of the student's fourth year.

8. To fulfill the remaining Computational and Applied Mathematics major requirements, students must complete 4 additional courses (12 credit hours) at the 300-level or above. At least 2 elective courses (6 credit hours) must be from the departmental (CAAM) course offerings and may not include CAAM 480 or independent study courses (such as CAAM 490 or CAAM 491). Elective courses from other programs must be chosen from a list approved by the CAAM Undergraduate Committee. At least 2 elective courses (6 credit hours) must be at the 400-level or above. The elective courses completed must be taken for a minimum of 3 credit hours. Highly recommended electives may be found in the Highly Recommended Electives list (below).

Policies for the BA Degree with a Major in Computational and Applied Mathematics

Transfer Credit

For Rice University's policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the major in Computational and Applied Mathematics should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.
Additional Information
For additional information, please see the Computational and Applied Mathematics website: https://www.caam.rice.edu/.

Opportunities for the BA Degree with a Major in Computational and Applied Mathematics

Academic Honors
The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Fifth-Year Master’s Degree Option for Rice Undergraduate Students
Rice students have an option to pursue the Master of Computational and Applied Mathematics (MCAAM) degree by adding an additional fifth year to their four undergraduate years of science and engineering studies.

Advanced Rice undergraduate students in good academic standing may apply to the MCAAM degree program during their junior or senior year. Upon acceptance, depending on course load, financial aid status, and other variables, they may then start taking some required courses of the master’s degree program. A plan of study will need to be approved by the student’s undergraduate advisor and the MCAAM program director.

As part of this option and opportunity, Rice undergraduate students:

• must complete the requirements for a bachelor’s degree and the master’s degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
• should be aware there could be financial aid implications if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
• more information on this Undergraduate - Graduate Concurrent Enrollment opportunity, including specific information on the registration process can be found here (p. 17).

Additional Information
For additional information, please see the Computational and Applied Mathematics website: https://www.caam.rice.edu/.

Doctor of Philosophy (PhD) Degree in the field of Computational and Applied Mathematics

Program Learning Outcomes for the PhD Degree in the field of Computational and Applied Mathematics
Upon completing the PhD degree in the field of Computational and Applied Mathematics, students will be able to:

1. Solve problems using advanced foundational knowledge.
2. Conduct an independent research program.
3. Communicate professionally and effectively in writing and when speaking.

Requirements for the PhD Degree in Computational and Applied Mathematics
For general university requirements, please see Doctoral Degrees (p. 65). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the PhD degree in the field of Computational and Applied Mathematics must:

• Complete a course of study approved by the department to establish a broad foundation in applied mathematics.
• Perform satisfactorily on qualifying examinations and reviews.
• Produce an original thesis acceptable to the department.
• Perform satisfactorily on a final public oral examination on the thesis.

Summary of the Program Learning Outcomes for the PhD Degree in the field of Computational and Applied Mathematics

Policies for the PhD Degree in the field of Computational and Applied Mathematics

Department of Computational and Applied Mathematics Graduate Program Handbook
The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Computational and Applied Mathematics publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Computational_Applied_Mathematics_Graduate_Handbook.pdf

Admission
Admission to graduate study in computational and applied mathematics is open to qualified students holding bachelor's or master's degrees (or their equivalent) in engineering; mathematics; or the physical, biological, mathematical, or behavioral sciences. Department faculty evaluate the previous academic record and credentials of each applicant individually.

For general information and university requirements, see Graduate Degrees (p. 49) and Admission to Graduate Study (p. 55).

Applicants should be aware that it normally takes two years to obtain a master’s degree and an additional two to four years for the doctoral degree.

Financial Assistance
Graduate fellowships, research assistantships, and graduate scholarships are awarded on the basis of merit to qualified students. Current practice in the department is for most doctoral students in good academic standing to receive some financial aid.

Additional Information
For additional information, please see the Computational and Applied Mathematics website:
Opportunities for the PhD Degree in the field of Computational and Applied Mathematics

Additional Information

For additional information, please see the Computational and Applied Mathematics website: https://www.caam.rice.edu/

Master of Computational and Applied Mathematics (MCAAM) Degree

Program Learning Outcomes for the MCAAM Degree

Upon completing the MCAAM degree, students will be able to:

1. Acquire broad, advanced knowledge in Computational and Applied Mathematics that is also deep within a major sub-discipline.
2. Demonstrate an ability to gain employment or advancement in a technical field related to Computational and Applied Mathematics.

Requirements for the MCAAM Degree

The MCAAM degree is a non-thesis master’s degree. For general university requirements, please see Non-Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MCAAM degree must complete:

- A minimum of 10 courses (30 credit hours) to satisfy degree requirements.
- A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above).
- A minimum of 24 credit hours must be taken at Rice University.
- A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University.
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the non-thesis master’s degree.

This professional degree program emphasizes the applied aspects of mathematics, and requires satisfactory completion of at least 30 credit hours of graduate-level coursework approved by the department.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Master of Computational and Applied Mathematics (MCAAM) Degree / Master of Business Administration (MBA) Degree

Program Learning Outcomes for the MCAAM Degree

Upon completing the MCAAM degree, students will be able to:

1. Acquire broad, advanced knowledge in Computational and Applied Mathematics that is also deep within a major sub-discipline.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Demonstrate an ability to gain employment or advancement in a technical field related to Computational and Applied Mathematics.

Program Learning Outcomes for the MBA Degree

Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MCAAM/MBA Coordinated Degrees Program

Students may earn a coordinated MBA degree and a non-thesis Master of Engineering degree from the George R. Brown School of Engineering in the following fields:

- Chemical Engineering (MChE)
- Computational and Applied Mathematics (MCAAM)
- Computer Science (MCS)
- Industrial Engineering (MIE)
- Materials Science and Nanoengineering (MMSNE)
- Mechanical Engineering (MME)
- Statistics (MStat)

For the coordinated MBA/Master of Engineering degrees, students must complete:

- A minimum of 69 credit hours in approved coursework*, including:
  - A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the Master of Engineering degree requirements
  - A minimum of 24 credit hours in the corresponding engineering discipline
  - A minimum of 6 credit hours in elective requirements*
  - A minimum of 45 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the MBA degree requirements
  - A minimum of 45 credit hours of business coursework
  - All MBA core requirements, the global field experience, custom core requirements, and coordinated elective requirements

*Note: A maximum of 6 credit hours of the Master of Engineering degree elective requirements may be selected from business course offerings (MGMP, MGMT, or MICO) and used to fulfill the requirements for both the MBA and the Master of Engineering degrees.

Students plan their course schedules in consultation with the George R. Brown School of Engineering department in which they are enrolled and with the Jones Graduate School of Business Registrar Department. Coordinated degrees candidates can fulfill requirements for both degrees within 2 academic years.

For general university requirements, see Graduate Degrees (p. 49). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Candidates in the MBA/Master of Engineering coordinated degrees program must complete all requirements as listed for both degrees, and must apply and be accepted in both degree programs.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into
Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/dreereworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

<td></td>
</tr>
</tbody>
</table>

Select an additional 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 45 total credit hours.

Total Credit Hours | 45 |

**Footnotes and Additional Information**

1. To fulfill the remaining requirements for the coordinated MBA degree program, students must complete an additional 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 45 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) The second year of the program is dedicated entirely to MBA elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

**Policies for the MCAAM/MBA Coordinated Degrees Program**

**Additional Information**

For additional information on these two degrees:

1. Please see the Computational and Applied Mathematics website: https://www.caam.rice.edu/
2. Please see the Jones Graduate School of Business website: https://business.rice.edu/

**Opportunities for the MCAAM/MBA Coordinated Degrees Program**

**Additional Information**

For additional information on these two degrees:

1. Please see the Computational and Applied Mathematics website: https://www.caam.rice.edu/
2. Please see the Jones Graduate School of Business website: https://business.rice.edu/

**Minor in Computational and Applied Mathematics**

**Program Learning Outcomes for the Minor in Computational and Applied Mathematics**

Upon completing the minor in Computational and Applied Mathematics, students will be able to:

1. Use modern numerical methods to analyze and solve typical problems in linear systems.
2. Design and test a mathematical model, following a multi-stage process.

**Requirements for the Minor in Computational and Applied Mathematics**

Students pursuing the minor in Computational and Applied Mathematics must complete:

- A minimum of 6 courses (18 credit hours) to satisfy minor requirements.
• A minimum of 5 courses (15 credit hours) taken at the 300-level or above.

The courses listed below satisfy the requirements for this minor. In certain instances, courses not on this official list may be substituted upon approval of the minor's academic advisor, or where applicable, the Program Director. (Course substitutions must be formally applied and entered into Degree Works by the minor’s Official Certifier [https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/]). Students and their academic advisors should identify and clearly document the courses to be taken.

Footnotes and Additional Information

1 To fulfill the remaining Computational and Applied Mathematics minor requirements, students must complete a total of 3 additional courses (9 credit hours) at the 300-level or above from Computational and Applied Mathematics (CAAM) departmental course offerings. The elective courses completed must be taken for a minimum of 3 credit hours each. At least 2 of these 3 elective courses (6 credit hours) must be completed at the 400-level or above.

Policies for the Minor in Computational and Applied Mathematics

Program Restrictions and Exclusions

Students pursuing the minor in Computational and Applied Mathematics should be aware of the following program restriction:

• As noted in Majors, Minors, and Certificates (p. 11), i.) students may declare their intent to pursue a minor only after they have first declared a major, and ii.) students may not major and minor in the same subject.

Transfer Credit

For Rice University's policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the minor in Computational and Applied Mathematics should be aware of the following departmental transfer credit guidelines:

• Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.

Contact Information

Computational Science and Engineering
https://engrprofmasters.rice.edu/programs (https://engrprofmasters.rice.edu/programs/)

Jan E. Odegard
Program Director
odegard@rice.edu

The advanced multi-disciplinary degree program in Computational Science and Engineering addresses the current need for sophisticated skills in data and computation in both engineering and the sciences. Such skills require an understanding of tools, techniques, and algorithmic capabilities in a range of subjects including simulation, modeling, analytics, parallelization, visualization, networking, and programming. An awareness of a variety of new algorithms and analytic techniques is essential to maximizing the power of the new data and computational tools.
The Master of Computational Science and Engineering (MCSE) professional master's degree is for individuals interested in practicing within the field of data and computation, while the PhD program concentrates more specifically on research.

Computational Science and Engineering does not currently offer an academic program at the undergraduate level.

**Master's Programs**
- Master of Computational Science and Engineering (MCSE) Degree (p. 343)
- Master of Arts (MA) Degree in the field of Computational Science and Engineering*

**Doctoral Program**
- Doctor of Philosophy (PhD) Degree in the field of Computational Science and Engineering (p. 342)
  *Although students are not normally admitted to a Master of Arts (MA) degree program, graduate students may earn the MA as they work towards the PhD.*

**Director**
Jan E. Odegard, Ken Kennedy Institute

**Advisory Committee**
John Dobelman, Statistics
Matthias Heinkenschloss, Computational and Applied Mathematics
Mack Joyner, Computer Science
Michael T. Orchard, Electrical and Computer Engineering

**Description and Code Legend**
*Note: Internally, the university uses the following descriptions, codes, and abbreviations for this academic program. The following is a quick reference:*

**Course Catalog/Schedule**
- Course offerings/subject codes: Courses from various subjects can be applied towards this program

**Department (or Program) Description and Code**
- MCSE students are admitted to one of the following four home departments:
  - Computational and Applied Mathematics: CAAM
  - Computer Science: COMP
  - Electrical and Computer Engineering: ELEC
  - Statistics: STAT

**Graduate Degree Descriptions and Codes**
- Master of Computational Science and Engineering degree: MCSE
- Master of Arts degree: MA
- Doctor of Philosophy degree: PhD

**Graduate Degree Program Description and Code**
- Degree Program in Computational Science and Engineering: CSCE

**CIP Code and Description**
- CSCE Major/Program: CIP Code/Title: 11.0101 - Computer and Information Sciences, General

1 Classification of Instructional Programs (CIP) 2010 Codes and Descriptions from the National Center for Education Statistics: [https://nces.ed.gov/ipeds/cipcode/](https://nces.ed.gov/ipeds/cipcode/)

**Doctor of Philosophy (PhD) Degree in the field of Computational Science and Engineering**

**Program Learning Outcomes for the PhD Degree in the field of Computational Science and Engineering**
Upon completing the PhD degree in the field of Computational Science and Engineering, students will be able to:

1. Acquire broad, advanced knowledge in Computational and Applied Mathematics, Computer Science, or Statistics that is also deep in one major area within one of the three disciplines.
2. Conduct independent research that demonstrates advanced mastery of a sub-discipline within one of the three disciplines.
3. Communicate advanced technical ideas effectively.

**Requirements for the PhD Degree in the field of Computational Science and Engineering**
For general university requirements, please see [Doctoral Degrees](p. 65). For additional requirements, regulations, and procedures for all graduate programs, please see [All Graduate Students](p. 55). Students pursuing the PhD in the field of Computational Science and Engineering must:

- Complete a course of study approved by the Computational Science Committee, including at least 2 courses outside the major area.
- Perform satisfactorily on preliminary and qualifying examinations and reviews.
- Produce an original thesis acceptable to the Computational Science Committee.
- Perform satisfactorily on a final public oral examination on the thesis.

Recognizing the increasing reliance of modern science and engineering on computation as an aid to research, development, and design, the Department of Computational and Applied Mathematics, in conjunction with the Departments of Biochemistry and Cell Biology, Earth, Environmental, and Planetary Sciences, Computer Science, Chemical and Biomolecular Engineering, Electrical and Computer Engineering, Civil and Environmental Engineering, and Statistics, has established an advanced degree program in computational science and engineering (CSE). The
program focuses on modern computational techniques and provides a resource for training and expertise in this area.

The program is administered by a faculty committee chosen by the deans of engineering and natural sciences. The Computational Science Committee (CSC) helps students design an appropriate course of study and sets the examination requirements.

Students may enter the Computational Science and Engineering program either directly or indirectly through one of the participating departments (see list above). In all cases, however, students must fulfill the admissions requirements of their associated department. Students then meet the normal requirements for graduate study within that department in every way (including teaching and other duties), except that the curriculum and examination requirements are set by the Computational Science Committee.

**Policies for the PhD Degree in the field of Computational Science and Engineering**

**Additional Information**

For additional information, please see the Computational Science and Engineering website: [https://engineering.rice.edu/](https://engineering.rice.edu/)

**Opportunities for the PhD Degree in the field of Computational Science and Engineering**

**Additional Information**

For additional information, please see the Computational Science and Engineering website: [https://engineering.rice.edu/](https://engineering.rice.edu/)

**Master of Computational Science and Engineering (MCSE) Degree**

**Program Learning Outcomes for the MCSE Degree**

Upon completing the MCSE degree, students will be able to:

1. Acquire broad, advanced knowledge in modern computational techniques.
2. Possess skills to identify, formulate, and solve advanced technical problems related to one of the focus areas.
3. Communicate technical ideas effectively.

**Requirements for the MCSE Degree**

The MCSE degree is a non-thesis master’s degree. For general university requirements, please see *Non-Thesis Master’s Degrees* (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see *All Graduate Students* (p. 55). Students pursuing the MCSE degree must complete:

- A minimum of 30 credit hours to satisfy degree requirements.
- A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above).
- A minimum of 24 credit hours must be taken at Rice University.

- A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University.
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the non-thesis master’s degree.

The Master in Computational Science and Engineering (MCSE) degree in the School of Engineering is a non-thesis degree program designed to provide training and expertise in computational science and engineering and in data engineering and analytics. The MCSE degree program is intended for students interested in technical and managerial positions such as computational scientist, computational engineering, data engineering, and data analyst. The program offers students opportunities to specialize in areas such as high-performance computing, data analytics, data engineering, data science, machine learning, software engineering, and distributed systems.

The departments of Computational and Applied Mathematics, Computer Science, Electrical and Computer Engineering, and Statistics jointly offer the MCSE degree program. Based on preferences indicated in candidates’ applications, MCSE students are admitted to one of the following four home departments:

- Computational and Applied Mathematics (CAAM),
- Computer Science (COMP),
- Electrical and Computer Engineering (ELEC), or
- Statistics (STAT).

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Office of Graduation and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

**Degree Requirements**

**Core Requirements**

Select 1 course from 3 of the following 4 groups:

- Group 1 (CAAM)
  - CAAM 519  COMPUTATIONAL SCIENCE I
  - CAAM 520  COMPUTATIONAL SCIENCE II
  - CAAM 536 / CEVE 555  DIFFERENTIAL EQUATIONS
  - CAAM 550  NUMERICAL ANALYSIS I
  - CAAM 553  ADVANCED NUMERICAL ANALYSIS I
  - CAAM 554  NUMERICAL ANALYSIS II
  - CAAM 564  NUMERICAL OPTIMIZATION

Select up to 1 course from the following:

- CAAM 536 / CEVE 555  DIFFERENTIAL EQUATIONS
- CAAM 550  NUMERICAL ANALYSIS I
- CAAM 553  ADVANCED NUMERICAL ANALYSIS I
- CAAM 554  NUMERICAL ANALYSIS II
- CAAM 564  NUMERICAL OPTIMIZATION

- CAAM 519  COMPUTATIONAL SCIENCE I
- CAAM 520  COMPUTATIONAL SCIENCE II
- CAAM 536 / CEVE 555  DIFFERENTIAL EQUATIONS
- CAAM 550  NUMERICAL ANALYSIS I
- CAAM 553  ADVANCED NUMERICAL ANALYSIS I
- CAAM 554  NUMERICAL ANALYSIS II
- CAAM 564  NUMERICAL OPTIMIZATION
### Group 2 (COMP)

Select up to 1 course from the following:

- COMP 504 GRADUATE OBJECT-ORIENTED PROGRAMMING AND DESIGN
- COMP 506 COMPILER CONSTRUCTION FOR GRADUATE STUDENTS
- COMP 520 / ELEC 520 DISTRIBUTED SYSTEMS
- COMP 521 / ELEC 552 OPERATING SYSTEMS AND CONCURRENT PROGRAMMING
- COMP 522 MULTI-CORE COMPUTING
- COMP 529 / ELEC 529 ADVANCED COMPUTER NETWORKS
- COMP 530 DATABASE SYSTEM IMPLEMENTATION
- COMP 533 INTRODUCTION TO DATABASE SYSTEMS
- COMP 540 STATISTICAL MACHINE LEARNING
- COMP 541 INTRODUCTION TO COMPUTER SECURITY
- COMP 542 LARGE-SCALE MACHINE LEARNING
- COMP 557 / ELEC 557 ARTIFICIAL INTELLIGENCE
- COMP 582 / ELEC 512 GRADUATE DESIGN AND ANALYSIS OF ALGORITHMS

### Group 3 (ELEC)

Select up to 1 course from the following:

- ELEC 513 / COMP 513 COMPLEXITY IN MODERN SYSTEMS
- ELEC 525 / COMP 525 VIRTUALIZATION AND CLOUD RESOURCE MANAGEMENT
- ELEC 526 / COMP 526 HIGH PERFORMANCE COMPUTER ARCHITECTURE
- ELEC 531 STATISTICAL SIGNAL PROCESSING
- ELEC 533 / CAAM 583 / STAT 583 INTRODUCTION TO RANDOM PROCESSES AND APPLICATIONS
- ELEC 546 / COMP 546 INTRODUCTION TO COMPUTER VISION
- ELEC 547 COMPUTER VISION
- ELEC 549 COMPUTATIONAL PHOTOGRAPHY
- ELEC 553 MOBILE AND EMBEDDED SYSTEM DESIGN AND APPLICATION
- ELEC 554 / COMP 554 COMPUTER SYSTEMS ARCHITECTURE
- ELEC 558 DIGITAL SIGNAL PROCESSING
- ELEC 575 LEARNING FROM SENSOR DATA
- ELEC 576 / COMP 576 A PRACTICAL INTRODUCTION TO DEEP MACHINE LEARNING

### Group 4 (STAT)

Select up to 1 course from the following:

- STAT 502 / COMP 502 / ELEC 502 NEURAL MACHINE LEARNING I
- STAT 502 / COMP 502 / ELEC 502 PROBABILITY
- STAT 518 STATISTICAL INFERENCE
- STAT 541 MULTIVARIATE ANALYSIS

### Elective Requirements

Select additional courses from departmental (CAAM, COMP, ELEC, or STAT) course offerings at the 500-level or above to reach a minimum of 30 total credit hours

- 10-15 credit hours

### Communication, Leadership, Management and Ethics

Select up to 6 credit hours as Electives from the following:

- ENGI 501 WORKPLACE COMMUNICATION FOR PROFESSIONAL MASTER'S STUDENTS IN ENGINEERING
- ENGI 510 TECHNICAL AND MANAGERIAL COMMUNICATIONS
- ENGI 515 LEADING TEAMS AND INNOVATION
- ENGI 528 / CEVE 528 ENGINEERING ECONOMICS
- ENGI 529 / CEVE 529 ETHICS AND ENGINEERING LEADERSHIP
- ENGI 542 PROFESSIONAL COMMUNICATION FOR ENGINEERING LEADERS
- ENGI 610 / NSCI 610 MANAGEMENT FOR SCIENCE AND ENGINEERING
- ENGI 614 LEARNING HOW TO INNOVATE?
- ENGI 615 LEADERSHIP COACHING FOR ENGINEERS

### Total Credit Hours

30

### Footnotes and Additional Information

1. Other courses may satisfy the Communication, Leadership, Management, and Ethics group requirement. See advisor for more details.

2. Credit hours earned for ENGI 530 Engineering Practicum, thesis, seminar, project based courses, independent study courses, or similar variable credit hour courses may not be applied toward MCSE degree requirements.

### Policies for the MCSE Degree

Departments of Computational and Applied Mathematics, Computer Science, Electrical and Computer Engineering, and Statistics Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the departments of Computational and Applied Mathematics, Computer Science, Electrical and Computer Engineering, and Statistics, which jointly offer the MCSE degree program, publish graduate program handbooks, which can be found here:

Rice University

Application Information
Students must have completed a BA or BS degree in an engineering or science discipline, with training in engineering mathematics, statistical foundations, and programming methodology to be admitted to the program.

- Fall semester admission application deadline – February 1
- To apply to the program go to MSCE application (https://mcsegradapps.rice.edu/)
- For additional information about the program contact mcse@rice.edu
- Enrollments and degrees awarded for degree programs in the Engineering School are available at: https://engineering.rice.edu/about/enrollment-degrees-awarded/

Transfer Credit
For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 64). Some departments and programs have additional restrictions on transfer credit. Students are encouraged to meet with their academic program’s advisor when considering transfer credit possibilities.

Additional Information
For additional information, please see the Computational Science and Engineering website: https://engrprofmasters.rice.edu/

Opportunities for the MCSE Degree
Fifth-Year Master's Degree Option for Rice Undergraduate Students
Rice students have an option to pursue the Master of Computational Science and Engineering (MCSE) degree by adding an additional fifth year to their four undergraduate years of science and engineering studies.

Advanced Rice undergraduate students in good academic standing may apply to the MCSE degree program during their junior or senior year. Upon acceptance, depending on course load, financial aid status, and other variables, they may then start taking some required courses of the master's degree program. A plan of study will need to be approved by the student's undergraduate advisor and the MCSE program director.

As part of this option and opportunity, Rice undergraduate students:

- must complete the requirements for a bachelor's degree and the master's degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
- should be aware there could be financial aid implications if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).

- more information on this Undergraduate - Graduate Concurrent Enrollment opportunity, including specific information on the registration process can be found here (p. 17).

Additional Information
For additional information, please see the Computational Science and Engineering website: https://engrprofmasters.rice.edu/

Computer science is concerned with the study of computers and computing, focusing on algorithms, programs and programming, and computational systems. The main goal of the discipline is to build a systematic body of knowledge, theories, and models that explain the properties of computational systems and to show how this body of knowledge can be used to produce solutions to real-world computational problems.

Computer science is the intellectual discipline underlying information technology, which is widely accepted now as the ascendant technology of the next century. Students in computer science at Rice benefit from the latest in equipment and ideas as well as the flexibility of the educational programs. The research interests of the faculty include algorithms and complexity, artificial intelligence and robotics, compilers, distributed and parallel computation, graphics and visualization, operating systems, and programming languages.

The department offers two undergraduate degrees: the Bachelor of Arts (BA) degree and the Bachelor of Science in Computer Science (BSCS) degree.

At the graduate level, the department offers a PhD degree as well as two master's degrees: the professional Master of Computer Science (MCS) degree and the research-oriented Master of Science (MS) degree.

- The MCS degree is a professional degree for students intending to pursue a technical career. The MCS degree has both an on-premise and a fully online option. Students are admitted directly into one or the other option and cannot switch between the two, but the resulting degree is the same.
- The MS degree is a research degree requiring a thesis in addition to course work. The MS degree is primarily for students pursuing their PhD. Typically students are not admitted directly to the MS program.
Students wishing to pursue a terminal masters degree should apply to the MCS program.

- Students wishing to pursue a PhD should apply directly to the PhD program.

A coordinated MBA/MCS degrees program is also offered in conjunction with the Jesse H. Jones Graduate School of Business.

**Bachelor's Programs**

- Bachelor of Arts (BA) Degree with a Major in Computer Science (p. 347)
- Bachelor of Science in Computer Science (BSCS) Degree (p. 349)

**Master's Programs**

Description and Code Legend

Note: Internally, the university uses the following descriptions, codes, and abbreviations for this academic program. The following is a quick reference:

**Course Catalog/Schedule**
- Course offerings/subject code: COMP

**Department Description and Code**
- Computer Science: COMP

**Undergraduate Degree Descriptions and Codes**
- Bachelor of Arts degree: BA
- Bachelor of Science in Computer Science degree: BSCS

**Undergraduate Major Description and Code**
- Major in Computer Science (for both the BA and BSCS degrees): COMP

**Graduate Degree Descriptions and Codes**
- Master of Computer Science degree: MCS
- Master of Science degree: MS
- Doctor of Philosophy degree: PhD

**Graduate Degree Program Description and Code**
- Degree Program in Computer Science: COMP

**Graduate Degree Program Option Description and Code**
- Degree Program Option - Online (MCS degree only): OMCS

CIP Code and Description

1. COMP Major/Program: CIP Code/Title: 11.0101 - Computer and Information Sciences, General

* Systems Use Only: this information is used solely by internal offices at Rice University (such as OTR, GPS, etc.) and primarily within student information systems and support.

1. Classification of Instructional Programs (CIP) 2010 Codes and Descriptions from the National Center for Education Statistics: [https://nces.ed.gov/ipeds/cipcode/](https://nces.ed.gov/ipeds/cipcode/)

Bachelor of Arts (BA) Degree with a Major in Computer Science

**Program Learning Outcomes for the BA Degree with a Major in Computer Science**

Upon completing the BA degree with a major in Computer Science, students will be able to:

1. Be knowledgeable about algorithms and their use. Students will analyze new problems, choose appropriate algorithms for their solutions, and develop analytical skills in the manipulation of algorithms.

2. Demonstrate the ability to design and implement complex software systems. Students will demonstrate skill in their design and implementation and function effectively in teams.

3. Be knowledgeable about programming languages and their use. Students will demonstrate an understanding of distinguishing and mapping two different programming languages.

**Requirements for the BA Degree with a Major in Computer Science**

For general university requirements, see [Graduation Requirements](p. 26).

Students pursuing the BA degree with a major in Computer Science must complete:

- A minimum of 17 courses (61-62 credit hours, depending on course selection) to satisfy the major requirements.
- A minimum of 121 credit hours to satisfy degree requirements.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 10 courses (36 credit hours) taken at the 300-level or above.

The undergraduate program in computer science has been designed to accommodate a wide range of student interests. The program is sufficiently flexible for a student to customize it to his or her interests. A student can develop a broad educational program that couples computer science education with a variety of other fields in engineering, natural sciences, the humanities, or social sciences. Alternatively, a program might be designed for a student preparing for graduate study in computer science or for a career in computing and information technology.

The undergraduate program consists of required math and science courses; computer science core courses, including introductory courses and upper-level courses ensuring knowledge in a broad range of areas; and computer science electives, which give students the freedom to explore specific interests.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier [https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/].) Students and their academic advisors should identify and clearly document the courses to be taken.

Select 2 courses from departmental (COMP) course offerings (a minimum of 3 credit hours each) at the 300-level or above

Total Credit Hours Required for the Major in Computer Science 61-62

University Graduation Requirements (p. 26) * 60

Total Credit Hours 121-122

Footnotes and Additional Information

* Includes coursework completed as distribution credit, FWIS, LPAP, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The “hours outside of the major” requirement may include all of the above university requirements.

1 Typically, the Math and Science courses are taken during the freshman and sophomore years.

2 At most 1 of these 2 courses may be an independent study project (COMP 390, COMP 490, or COMP 491). Students may take courses at the 500-level, however, departmental approval is required to use a course at the 600-level (or above) as an elective.

Policies for the BA Degree with a Major in Computer Science

Transfer Credit

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the major in Computer Science should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

Additional Information

For additional information, please see the Computer Science website: https://www.cs.rice.edu/.

Opportunities for the BA Degree with a Major in Computer Science

Academic Honors

The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Fifth-Year Master’s Degree Option for Rice Undergraduate Students

Rice students have an option to pursue the Master of Computer Science (MCS) degree by adding an additional fifth year to their four undergraduate years of science and engineering studies.

Advanced Rice undergraduate students in good academic standing may apply to the MCS degree program during their junior or senior year. Upon acceptance, depending on course load, financial aid status, and other variables, they may then start taking some required courses of the master’s degree program. A plan of study will need to be approved by the student’s undergraduate advisor and the MCS program director.
As part of this option and opportunity, Rice undergraduate students:

- must complete the requirements for a bachelor's degree and the master's degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
- should be aware there could be financial aid implications if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
- more information on this Undergraduate - Graduate Concurrent Enrollment opportunity, including specific information on the registration process can be found here (p. 17).

Additional Information

For additional information, please see the Computer Science website: https://www.cs.rice.edu/.

Bachelor of Science in Computer Science (BSCS) Degree

Program Learning Outcomes for the BSCS Degree

Upon completing the BSCS degree, students will be able to:

1. Be knowledgeable about algorithms and their use. Students will analyze new problems, choose appropriate algorithms for their solutions, and develop analytical skills in the manipulation of algorithms.
2. Demonstrate the ability to design and implement complex software systems. Students will demonstrate skill in their design and implementation and function effectively in teams.
3. Be knowledgeable about programming languages and their use. Students will demonstrate an understanding of distinguishing and mapping two different programming languages.
4. Demonstrate a deep knowledge in a subarea of Computer Science. Students will be able to explain issues in the selected subarea and demonstrate a depth of knowledge.
5. Communicate effectively to a client and user.

Requirements for the BSCS Degree

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BSCS degree must complete:

- A minimum of 23-25 courses (84-85 credit hours), depending on course selection, to satisfy the major requirements.
- A minimum of 128-129 credit hours, depending on course selection, to satisfy degree requirements.
- A minimum of 14 courses (51 credit hours) taken at the 300-level or above.

The BSCS degree is designed for students who are interested in an in-depth study of computer science to prepare themselves for a professional career in the computing industry.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department's Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

Computer Science Courses

Select 1 course from the following: 4

¹ For general university requirements, see Graduation Requirements (p. 26).
**Policies for the BSCS Degree**

**Transfer Credit**

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 48). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university’s official list of transfer credit advisors on their website: [https://oaa.rice.edu](https://oaa.rice.edu). Students are encouraged to meet with their academic program’s transfer credit advisor when considering transfer credit possibilities.

**Departmental Transfer Credit Guidelines**

Students pursuing the BSCS degree should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.

**Additional Information**

For additional information, please see the Computer Science website: [https://www.cs.rice.edu/](https://www.cs.rice.edu/)

**Opportunities for the BSCS Degree**

**Academic Honors**

The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

**Fifth-Year Master’s Degree Option for Rice Undergraduate Students**

Rice students have an option to pursue the Master of Computer Science (MCS) degree by adding an additional fifth year to their four undergraduate years of science and engineering studies.

Advanced Rice undergraduate students in good academic standing may apply to the MCS degree program during their junior or senior year. Upon acceptance, depending on course load, financial aid status, and other variables, they may then start taking some required courses of the master’s degree program. A plan of study will need to be approved by the student’s undergraduate advisor and the MCS program director.

As part of this option and opportunity, Rice undergraduate students:

- must complete the requirements for a bachelor’s degree and the master’s degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
- should be aware there could be financial aid implications if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
- more information on this Undergraduate - Graduate Concurrent Enrollment opportunity, including specific information on the registration process can be found [here](https://oaa.rice.edu) (p. 17).

**Additional Information**

For additional information, please see the Computer Science website: [https://www.cs.rice.edu/](https://www.cs.rice.edu/)
Doctor of Philosophy (PhD) Degree in the field of Computer Science

Program Learning Outcomes for the MS and PhD Degrees in the field of Computer Science

Upon completing the MS and PhD degrees in the field of Computer Science, students will be able to:

1. Acquire a solid foundation in Computer Science at graduate level. Students will demonstrate a graduate-level understanding of material across a variety of sub-disciplines, be able to synthesize problem solutions by combining knowledge from different sources, and demonstrate a deep knowledge of sub-area in which they will pursue their thesis.

2. Conduct an independent research program. Students will identify and pose a research problem, place that problem in context within the field's established literature, and conduct an independent investigation that leads to credible scientific results.

3. Demonstrate professional skills in both oral and written communication. Students will write well-organized, coherent technical prose, deliver a professional presentation on par with a solid conference presentation, demonstrate the ability to describe scientific issues and techniques in writing and in presentation, and be able to answer unanticipated technical questions in a public setting.

Requirements for the MS and PhD Degrees in the field of Computer Science

MS Degree Program

The MS degree is a thesis master's degree. For general university requirements, please see Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students who successfully meet the first three requirements listed in the requirements for the PhD degree below are awarded the Master of Science degree.

Requirements for the PhD Degree in the field of Computer Science

PhD Degree Program

For general university requirements, please see Doctoral Degrees (p. 65). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the PhD degree in the field of Computer Science must:

- Complete a master's thesis by the end of the fifth semester, if a previous master's thesis has not been approved by the graduate committee.
- Pass a qualifying examination in an area of specialization within seven semesters after entering the PhD program.
- Conduct original research, submit an acceptable PhD thesis proposal, and successfully defend the thesis proposal.
- Submit an acceptable PhD thesis that reports research results and pass a final oral defense.

The PhD degree is for students planning to pursue a career in computer science research and education. The doctoral program normally requires four to six years of study.

Policies for the PhD Degree in the field of Computer Science

Department of Computer Science Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Computer Science publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Computer_Science_Graduate_Handbook.pdf

Financial Assistance

Fellowships and research assistantships are available to students in the PhD program. Both provide a monthly stipend for the academic year and cover all tuition expenses. More substantial monthly stipends may be available during the summer for students working on departmental research projects. In all cases, continued support is contingent on satisfactory progress in the program. PhD students also are expected to assist in the teaching and administration of undergraduate and graduate courses.

Additional Information

For additional helpful information, please refer to the Graduate Study in Computer Science web page at https://www.cs.rice.edu/academics/graduate-studies/ or contact the department at gradapp@rice.edu.

Opportunities for the PhD Degree in the field of Computer Science

Master of Computer Science (MCS) Degree
Program Learning Outcomes for the MCS Degree

Upon completing the MCS degree, students will be able to:

1. Solve advanced Computer Science problems. Students will acquire and apply a graduate-level understanding of material in sub-areas of Computer Science.
2. Design and implement complex software systems. Students will demonstrate skill in their design and implementation and function effectively in teams.
3. Communicate effectively to a client and user.

Requirements for the MCS Degree

The MCS degree is a non-thesis master's degree. For general university requirements, please see Non-Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MCS degree must complete:

• A minimum of 30 credit hours to satisfy degree requirements.
• A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above).
• A minimum of 24 credit hours must be taken at Rice University.
• A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University.
• The requirements for one area of specialization (see below for areas of specialization). The MCS degree program offers twelve areas of specialization:
  • AI and Robotics (p. 3-4), or
  • Architecture (p. 3-4), or
  • Compilers (p. 3-4), or
  • Computer Vision (p. 3-4), or
  • Data Science (p. 3-4), or
  • Database (p. 3-4), or
  • Networking (p. 3-4), or
  • Optimization (p. 3-4), or
  • Parallel Computing (p. 3-4), or
  • PL Theory and Logic (p. 3-4), or
  • Software Engineering (p. 3-4), or
  • Systems and Security (p. 3-4).
• A 3-6 month internship (or COMP 539). Students are responsible for obtaining and selecting an internship that best aligns with their career goals.
• A minimum overall GPA of 2.67 or higher in all Rice coursework.
• A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the non-thesis master’s degree.

The MCS degree is a terminal degree for students intending to pursue a technical career in the computer industry. MCS degree areas of specialization include artificial intelligence and robotics, computer vision, data science, databases, operating systems and security, computer networks, computer architecture, parallel computing, compiler construction, programming languages, and software engineering. The MCS degree program normally requires three semesters of study.

Students in the MCS degree program are expected to pay full tuition and all fees. No financial aid is available from the university or the department for MCS students.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Three to Six Month Internship
A three to six month internship (or COMP 539) is required.  4

Total Credit Hours
30

Footnotes and Additional Information
1  These specializations are representative, but not comprehensive. Students may design their own specialization with approval by the MCS advisor.
2  Students demonstrating that they have passed one or more courses of comparable depth to a course listed for a core requirement area may petition to use one or more of those courses to waive requirements for that core requirement area.
3  MCS advisor approval is required to use COMP 590 Computer Science Projects to satisfy the MCS design project requirement. To be eligible to satisfy the MCS design project requirement, the proposed COMP 590 project must include a significant programming design and implementation effort.
4  Students are required to complete either 1) an approved 3-6 month internship or 2) COMP 539. Students are responsible for obtaining an internship that best aligns with their career goals.
5  Elective coursework must be approved professional development coursework (see below) and/or 500-level or above departmental (COMP) course offerings other than independent study projects (e.g. COMP 590). At most, 3 credit hours total, of 1-credit-hour and 2-credit-hour courses, may be applied toward MCS degree requirements. Up to 6 credit hours of professional development courses may be applied toward MCS degree requirements. See below for a list of approved professional development courses. Credit hours earned for ENGI 530 Engineering Practicum may not be applied toward MCS degree requirements.

Areas of Specialization
Students must complete a tightly coupled two-course area of specialization (6-8 credit hours). Approved specialization areas appear below. Student-designed specialization areas are permitted if approved by the student's MCS advisor. Custom specialization areas may include coursework from departments other than Computer Science (COMP) and may include one independent study project (e.g. COMP 590).
Area of Specialization: AI and Robotics

### Policies for the MCS Degree

#### Department of Computer Science Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Computer Science publishes a graduate program handbook, which can be found here: [https://gradhandbooks.rice.edu/2019_20/Computer_Science_Graduate_Handbook.pdf](https://gradhandbooks.rice.edu/2019_20/Computer_Science_Graduate_Handbook.pdf)

#### Financial Aid

No financial aid is available from Rice University or the Computer Science Department for students in the MCS degree program.

#### Transfer Credit

For Rice University’s policy regarding transfer credit, see [Transfer Credit](p. 64). Some departments and programs have additional restrictions on transfer credit. Students are encouraged to meet with their academic program’s advisor when considering transfer credit possibilities.

#### Departmental Transfer Credit Guidelines

Students pursuing the MCS degree should be aware of the following departmental transfer credit guidelines:

- No more than 6 credit hours of credit from another U.S. or international universities of similar standing at Rice may apply towards the degree. Transferred courses must be comparable in content and depth to the corresponding course at Rice, and must not have counted toward another degree.
- Request for transfer credit will be considered by the Computer Science Graduate Committee Chair, and the instructor of the equivalent Rice course.

#### Additional Information

For additional helpful information, please refer to the [Graduate Study in Computer Science](https://www.cs.rice.edu/academics/graduate-studies/) web page at [https://www.cs.rice.edu/academics/graduate-studies/](https://www.cs.rice.edu/academics/graduate-studies/) or contact the department at gradapp@rice.edu.

#### Opportunities for the MCS Degree

##### Fifth-Year Master’s Degree Option for Rice Undergraduate Students

Rice students have an option to pursue the Master of Computer Science (MCS) degree by adding an additional fifth year to their four undergraduate years of science and engineering studies.

Advanced Rice undergraduate students in good academic standing may apply to the MCS degree program during their junior or senior year. Upon acceptance, depending on course load, financial aid status, and other variables, they may then start taking some required courses of the...
master’s degree program. A plan of study will need to be approved by the student’s undergraduate advisor and the MCS program director.

As part of this option and opportunity, Rice undergraduate students:

• must complete the requirements for a bachelor’s degree and the master’s degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
• should be aware there could be financial aid implications if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
• more information on this Undergraduate - Graduate Concurrent Enrollment opportunity, including specific information on the registration process can be found here (p. 17).

Additional Information
For additional helpful information, please refer to the Graduate Study in Computer Science web page at https://www.cs.rice.edu/academics/graduate-studies or contact the department at gradapp@rice.edu.

Master of Computer Science (MCS) Degree / Master of Business Administration (MBA) Degree

Program Learning Outcomes for the MCS Degree
Upon completing the MCS degree, students will be able to:

1. Solve advanced Computer Science problems. Students will acquire and apply a graduate-level understanding of material in sub-areas of Computer Science.
2. Design and implement complex software systems. Students will demonstrate skill in their design and implementation and function effectively in teams.
3. Communicate effectively to a client and user.

Program Learning Outcomes for the MBA Degree
Upon completing the MBA degree, students will be able to:

1. Demonstrate an understanding and application of the foundational frameworks and tools of all business disciplines, including accounting, finance, marketing, organizational behavior, and strategic management.
2. Develop, evaluate, and implement complex business strategies and operational solutions holistically, integrating management principles across the functional areas.
3. Function effectively in a team setting both as a leader and a contributor.

Requirements for the MCS/MBA Coordinated Degrees Program
Students may earn a coordinated MBA degree and a non-thesis Master of Engineering degree from the George R. Brown School of Engineering in the following fields:

• Chemical Engineering (MChE)
• Computational and Applied Mathematics (MCAAM)
• Computer Science (MCS)
• Industrial Engineering (MIE)
• Materials Science and Nanoengineering (MMSNE)
• Mechanical Engineering (MME)
• Statistics (MStat)

For the coordinated MBA/Master of Engineering degrees, students must complete:

• A minimum of 69 credit hours in approved coursework*, including:
  • A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the Master of Engineering degree requirements
  • A minimum of 24 credit hours in the corresponding engineering discipline
  • A minimum of 6 credit hours in elective requirements*
  • A minimum of 45 credit hours of graduate-level study (coursework at the 500-level or above) to satisfy the MBA degree requirements
  • A minimum of 45 credit hours of business coursework
  • All MBA core requirements, the global field experience, custom core requirements, and coordinated elective requirements

*Note: A maximum of 6 credit hours of the Master of Engineering degree elective requirements may be selected from business course offerings (MGMP, MGMT, or MICO) and used to fulfill the requirements for both the MBA and the Master of Engineering degrees.

Students plan their course schedules in consultation with the George R. Brown School of Engineering department in which they are enrolled and with the Jones Graduate School of Business Registrar Department. Coordinated degrees candidates can fulfill requirements for both degrees within 2 academic years.

For general university requirements, see Graduate Degrees (p. 49). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Candidates in the MBA/Master of Engineering coordinated degrees program must complete all requirements as listed for both degrees, and must apply and be accepted in both degree programs.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.
### Coordinated MCS Degree Requirements

Students in the coordinated MBA/MCS degrees program must complete the Core Requirements, Area of Specialization, and Design Project of the MCS degree program (p. 352) and Coordinated MCS Elective Requirements below.

<table>

### Coordinated MBA Degree Requirements

Students in the coordinated MBA/Master of Engineering degrees program or in the coordinated MBA/Master of Science degree from the Professional Science Master's (PSM) degrees program must complete the Core Requirements, Global Field Experience, and Custom Core Requirements of the full-time MBA degree program (p. 214) and the Coordinated MBA Elective Requirements below.

</tbody>
</table>

### Footnotes and Additional Information

1. To fulfill the remaining requirements for the coordinated MBA degree program, students must complete an additional 12-15 credit hours from departmental (MGMP, MGMT, or MICO) course offerings at the 500-level or above to reach 45 total credit hours. (MGMT 703, MGMT 704, and MGMT 705 are not accepted as electives.) The second year of the program is dedicated entirely to MBA elective coursework. Although the Jones Graduate School of Business offers a variety of courses for students to take as electives, students may wish to take courses from other departments at Rice University. MBA electives are offered on the daytime schedule, the evening schedule, and the weekend schedule.

### Policies for the MCS/MBA Coordinated Degrees Program

**Additional Information**

For additional information on these two degrees:

1. Please see the Computer Science website: [https://www.cs.rice.edu/](https://www.cs.rice.edu/)
2. Please see the Jones Graduate School of Business website: [https://business.rice.edu/](https://business.rice.edu/)

### Opportunities for the MCS/MBA Coordinated Degrees Program

**Additional Information**

For additional information on these two degrees:

1. Please see the Computer Science website: [https://www.cs.rice.edu/](https://www.cs.rice.edu/)
2. Please see the Jones Graduate School of Business website: [https://business.rice.edu/](https://business.rice.edu/)

### Master of Computer Science (MCS) Degree, Online Program

**Program Learning Outcomes for the MCS Degree**

Upon completing the MCS degree, students will be able to:

1. Solve advanced Computer Science problems. Students will acquire and apply a graduate-level understanding of material in sub-areas of Computer Science.
2. Design and implement complex software systems. Students will demonstrate skill in their design and implementation and function effectively in teams.
3. Communicate effectively to a client and user.

### Requirements for the MCS Degree, Online Program

The MCS degree is a non-thesis master’s degree. For general university requirements, please see [Non-Thesis Master’s Degrees](p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see [All Graduate Students](p. 55). Students pursuing the MCS degree must complete:
• A minimum of 30 credit hours to satisfy degree requirements.
• A minimum of 30 credit hours of graduate-level study (coursework at the 500-level or above).
• A minimum of 24 credit hours must be taken at Rice University.
• A minimum overall GPA of 2.67 or higher in all Rice coursework.
• A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree.

Students in the MCS degree program are expected to pay full tuition and all fees. No financial aid is available from the university or the department for MCS students. The MCS degree is a terminal degree for students intending to pursue a career in the computer industry.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

**Footnotes and Additional Information**

1 Computer Architecture (COMP 625), Databases (COMP 630), Programming Languages and Design (COMP 613), and Principles of Algorithms and Software Area (COMP 682) are prerequisites to other required courses and must be taken first.

**Policies for the MCS Degree, Online Program**

**Department of Computer Science Graduate Program Handbook**

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Computer Science publishes a graduate program handbook, which can be found here: [https://gradhandbooks.rice.edu/2019_20/Computer_Science_Graduate_Handbook.pdf](https://gradhandbooks.rice.edu/2019_20/Computer_Science_Graduate_Handbook.pdf)

**Admission**

The GRE test is highly recommended for all applicants, however it may be waived, upon discretion of the department’s Admission Committee, if an applicant has relevant industrial experience.

**Financial Aid**

No financial aid is available from Rice University or the Computer Science Department for students in the MCS degree program.

**Transfer Credit**

For Rice University’s policy regarding transfer credit, see [Transfer Credit](p. 64). Some departments and programs have additional restrictions on transfer credit. Students are encouraged to meet with their academic program's advisor when considering transfer credit possibilities.

**Departmental Transfer Credit Guidelines**

Students pursuing the MCS degree should be aware of the following departmental transfer credit guidelines:

- No more than 6 credit hours of credit from another U.S. or international universities of similar standing at Rice may apply towards the degree. Transferred courses must be comparable in content and depth to the corresponding course at Rice, and must not have counted toward another degree.
- Request for transfer credit will be considered by the Computer Science Graduate Committee Chair, and the instructor of the equivalent Rice course.

**Additional Information**

For additional helpful information, please refer to the [Graduate Study in Computer Science](https://www.cs.rice.edu/academics/graduate-studies/) web page at [https://www.cs.rice.edu/academics/graduate-studies/](https://www.cs.rice.edu/academics/graduate-studies/) or contact the department at gradapp@rice.edu.

**Master of Science (MS) Degree in the field of Computer Science**
Program Learning Outcomes for the MS Degree in the field of Computer Science

Upon completing the MS degree in the field of Computer Science, students will be able to:

1. Acquire a solid foundation in Computer Science at the graduate level.
2. Conduct an independent research program.
3. Demonstrate professional skills in both oral and written communication.

Requirements for the MS Degree in the field of Computer Science

The MS degree is a thesis master's degree. For general university requirements, please see Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MS degree in the field of Computer Science must complete:

- A minimum of 30 credit hours at the 500-level or above to satisfy degree requirements.

Summary

Critical and Cultural Theory

Contact Information

Critical and Cultural Theory
https://3ct.rice.edu/
116 Humanities Building
713-348-4810
Cary E. Wolfe
Director
cewolfe@rice.edu

The Center for Critical and Cultural Theory (3CT) was founded to promote intellectual synergy and community among Rice faculty and graduate students whose work is informed by a deep and sustained engagement with critical and cultural theory and their ongoing development and permutations. Though housed in the School of Humanities, and drawing primarily on faculty and students from the Humanities, Social Sciences, and Architecture, 3CT welcomes and encourages faculty and students in any field whose work is framed by an intensive engagement with critical and cultural theory and its methodological innovations.

The program's primary pedagogical aim is to help equip students to engage ambitious and synthetic research projects of social and cultural significance in a wide range of areas such as new media studies, race and ethnicity studies, science and technology studies, ecocriticism and environmental humanities, animal studies, medical humanities, transnationalism, art and architecture, psychoanalysis, and political and social theory - just to name a few of the more established pursuits in which a strong theoretical background is indispensable. 3CT is therefore committed to the view that rigorous theoretical training enables empowering reflection upon the dominant forms of disciplinary norms, practices, and protocols and their historically and socially constituted nature. 3CT aims to strengthen and enrich how its participants understand and relate to their ‘home’ disciplines.

The Center for Critical and Cultural Theory does not currently offer an academic program at the undergraduate level.

### Certificate in Critical and Cultural Theory

#### Program Learning Outcomes for the Certificate in Critical and Cultural Theory

Upon completing the certificate in Critical and Cultural Theory, students will be able to:

1. Demonstrate knowledge of a range of approaches in contemporary critical and cultural theory.
2. Articulate the relationship between concepts and methodologies drawn from critical and cultural theory and the current state of the specific discipline(s) in which they work.
3. Incorporate concepts and methodologies from critical and cultural theory into their own intellectual and academic practice in forms such as oral and written exchange, conference papers, academic publications, and thesis research and writing.

#### Requirements for the Certificate in Critical and Cultural Theory

The certificate in Critical and Cultural Theory is a graduate certificate. For general university requirements, please see [Graduate Certificates](#) (p. 54). For additional requirements, regulations, and procedures for all graduate programs, please see [All Graduate Students](#) (p. 55). Students pursuing the certificate in Critical and Cultural Theory must complete:

- A minimum of 4 courses (12 credit hours) to satisfy certificate requirements.
- A minimum of 1 course (3 credit hours) outside of the student’s home department.
- A minimum of 1 3CT Annual Colloquium.
- No graduate-level coursework from transfer credit. For additional program guidelines regarding transfer credit, see the Policies tab.
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the graduate certificate with a minimum grade of B-(2.67 grade points) in each course.

This certificate is not a freestanding degree program; in addition to fulfilling the certificate requirements outlined below, candidates will be required to complete successfully the degree program to which they have been admitted in order to receive this certificate. Upon completion, the certificate is awarded at the same time as the conferral of the student’s Rice degree, along with a formal notation on their academic transcript.

The courses listed below satisfy the requirements for this certificate. In certain instances, courses not on this official list may be substituted upon approval of the certificate’s academic advisor, or where applicable, the Program Director. Course substitutions must be formally applied and entered into Degree Works by the certificate’s Official Certifier ([https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/](https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/)). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Colloquium

Students must participate in at least one annual colloquium 3

Total Credit Hours 12

Footnotes and Additional Information

1 Required core courses for other graduate degree or certificate programs may not count toward the minimum of 4 courses requirement. However, elective courses used to fulfill requirements for other graduate degree or certificate programs at Rice may count toward this requirement. The Center recommends that students interested in applying for the certificate seek approval for courses as they are taken. Students may petition the Center for approval of courses not listed above.

2 HURC 602 is taken for a Satisfactory/Unsatisfactory grade and must be completed with a Satisfactory grade. As a S/U course, it does not apply to the requirement of a minimum grade of B- (2.67 grade points) in each required course.

3 The 3CT Annual Colloquium consists of two modules: a lecture and seminar given by a visiting scholar in the Spring semester and a second lecture/seminar module in the Fall semester. Students need not complete the modules in consecutive semesters, but must complete two modules within three years from the date of acceptance into the program.

Policies for the Certificate in Critical and Cultural Theory

Application Procedures

1. **Status:** The Certificate in Critical and Cultural Theory (CCT) program is open only to students already enrolled and in good academic standing in a Rice graduate-level degree-granting program.

2. **Application:** Students must apply for admission to the Certificate program by the end of the registration period for Fall semester each year. The application should consist of a vita, a 2-3 page single-spaced description of the student's research interests, of the primary theoretical commitments that frame those interests, and how the research intervenes in the current state of critical and cultural theory. A brief (one or two paragraph) letter of endorsement from the faculty member directing the student’s research is also required. Only students in good academic standing in their home departments may apply. Students will be informed promptly early in the Fall semester each year of their acceptance, and students not accepted may reapply once to the Certificate program.

Program Restrictions and Exclusions

Students pursuing the certificate in Critical and Cultural Theory should be aware of the following program restriction:

- Graduate students may declare their intent to pursue a university certificate only after they have first been admitted into a graduate-level Rice degree-granting program.

Transfer Credit

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 64). Some departments and programs have additional restrictions.
on transfer credit. Students are encouraged to meet with their academic program's advisor when considering transfer credit possibilities.

**Program Transfer Credit Guidelines**

Students pursuing the certificate in Critical and Cultural Theory should be aware of the following program-specific transfer credit guidelines:

- The Certificate in Critical and Cultural Theory (CCT) program does not allow any of its course requirements to be met by transfer credit.

**Additional Information**

For additional information, please see the Center for Critical and Cultural Theory website: [https://3ct.rice.edu/](https://3ct.rice.edu/).

** Opportunities for the Certificate in Critical and Cultural Theory**

Data Science

[https://datascience.rice.edu](https://datascience.rice.edu)

Christopher M. Jermaine
Program Director

christopher.m.jermaine@rice.edu

Rudy Guerra
Minor Advisor

rguerra@rice.edu

The minor in Data Science is an interdisciplinary undergraduate program administered by the George R. Brown School of Engineering.

The Data Science minor curriculum emphasizes doing data science and aims to teach students best practices in the field. Students learn technical competencies by taking core courses in statistics, computer science, and machine learning. This knowledge base is complemented with courses that inform the student of the broader impact of the information age on human activity, including discussions on data privacy, ethics, reproducibility, communication, decision-making, and data visualization. This program culminates with a capstone experience whereby students work in teams to complete a semester-long data science project selected from a variety of disciplines and industries. The curriculum is summarized in terms of four foundational competencies: quantitative, communications, ethics, and substantive application.

**Minor**

**Minor in Data Science**

**Program Learning Outcomes for the Minor in Data Science**

Upon completing the minor in Data Science, students will be able to:
1. Formulate questions in a domain that can be answered with data.
2. Use tools and algorithms from statistics, applied mathematics, and computer science for analyses.
3. Visualize, interpret, and explain results cogently, accurately, and persuasively.
4. Understand the underlying social, political, and ethical contexts that are importantly and inevitably tied to data-driven decision-making.

**Requirements for the Minor in Data Science**

Students pursuing the minor in Data Science must complete:

- A minimum of 9 courses (27-30 credit hours, depending on course selection) to satisfy minor requirements.
- A minimum of 6 courses (18-20 credit hours, depending on course selection) taken at the 300-level or above.
- 3 courses (9-10 credit hours, depending on course selection) to satisfy Prerequisites.
- 5 courses (15-17 credit hours, depending on course selection) to satisfy the Core Requirements.
- A capstone project (3 credit hours).

The courses listed below satisfy the requirements for this minor. In certain instances, courses not on this official list may be substituted upon approval of the minor's academic advisor, or where applicable, the Program Director. (Course substitutions must be formally applied and entered into Degree Works by the minor's Official Certifier (https://registrar.rice.edu/facstaff/degeworks/officialcertifier/)). Students and their academic advisors should identify and clearly document the courses to be taken.

**Footnotes and Additional Information**

1. Students may substitute a higher-level MATH course for the MATH 101/MATH 105/MATH 211 and MATH 102/MATH 106/MATH 212 prerequisites.
2. As a programming prerequisite, COMP 140 is highly recommended (due to its inclusion of Python programming in its course material). Students will only be able to register for DSCI 302 if they have COMP 140 in their academic history, or in exceptional circumstances, by permission of the DSCI 302 instructor.
3. In certain situations the DSCI Official Certifier may approve various and specific course substitutions.

**Policies for the Minor in Data Science**

**Program Restrictions and Exclusions**

Students pursuing the minor in Data Science should be aware of the following program restrictions:

- As noted in Majors, Minors, and Certificates (p. 11), i.) students may declare their intent to pursue a minor only after they have first declared a major, and ii.) students may not major and minor in the same subject.
- Students pursuing the major in Statistics and the minor in Data Science may fulfill the Data Science minor requirements according to the following guidelines: i.) DSCI 301 may be fulfilled by STAT 310 or STAT 315; ii.) DSCI 302 may be used as the STAT major's Advanced Computing elective; and iii.) DSCI 303 must be substituted with STAT 413.

**Transfer Credit**

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

**Program Transfer Credit Guidelines**

Students pursuing the minor in Data Science should be aware of the following program-specific transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.
Additional Information
For additional information, please see the Data Science website: https://datascience.rice.edu/

Opportunities for the Minor in Data Science

Academic Honors
The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Cin-Ty Lee
Department Chair
citlee@rice.edu

The Department of Earth, Environmental, and Planetary Sciences offers students the opportunity to work with open-ended, complex, and highly interconnected problems, giving them the skills to become leaders and entrepreneurs in the real world - field and laboratory opportunities abound! Future opportunities in the field include academia academia, running a business, or working with and for societal issues. Field and laboratory opportunities abound. Many students also present their own research projects at national and international professional conferences.

Faculty members have joint research projects with scientists at over 100 institutions worldwide, giving an international scope to the department with research programs on all the continents, in all of the oceans, and on four planets. Their research interests span a wide range of topics and fall broadly under two principal research themes: Earth Structure and Dynamics, and Earth Systems Science. Many departmental research programs involve substantial field activities, both on land and at sea. Similarly, several course offerings include field trips to a variety of destinations and geologic settings.

All undergraduate majors in earth science take a five-course core sequence, typically in the sophomore and junior years, on earth processes, materials, observations, and history. Majors also take a course in geological field techniques and introductory courses in mathematics, chemistry, and in many cases, physics and biology.

The selection of upper-division courses and additional science courses depends on which degree, BA or BS, and, for the BS degree, which of five areas of specialization are chosen by the student: geology, geochemistry, geophysics, environmental earth science, or an area of specialization designed by the student subject to the approval of the department undergraduate advisor. The program of study typically includes experience with analytical equipment, computer systems, and fieldwork.

The BS degree should be chosen by students planning a career or further study in earth science or a related field. The BA degree has fewer requirements and might be a good choice for students planning a career or further study to which earth science is incidental.

Bachelor's Programs
• Bachelor of Arts (BA) Degree with a Major in Earth Science (p. 365)
• Bachelor of Science (BS) Degree with a Major in Earth Science (p. 368)

Master's Programs

Description and Code Legend
Note: Internally, the university uses the following descriptions, codes, and abbreviations for this academic program. The following is a quick reference:

Course Catalog/Schedule
- Course offerings/subject code: ESCI

Department Description and Code
- Earth, Environmental, and Planetary Sciences: EEPS

Undergraduate Degree Description and Code
- Bachelor of Arts degree: BA
- Bachelor of Science degree: BS

Undergraduate Major Description and Code
- Major in Earth Science (for both the BA and BS degrees): ESCI

Graduate Degree Descriptions and Codes
- Master of Science degree: MS
- Doctor of Philosophy degree: PhD

Graduate Degree Program Description and Code
- Degree Program in Earth Science: ESCI

CIP Code and Description
- ESCI Major/Program: CIP Code/Title: 40.0601 - Geology/Earth Science, General

1 Classification of Instructional Programs (CIP) 2010 Codes and Descriptions from the National Center for Education Statistics: https://nces.ed.gov/ipeds/cipcode/

Bachelor of Arts (BA) Degree with a Major in Earth Science

Program Learning Outcomes for the BA Degree with a Major in Earth Science
Upon completing the BA degree with a major in Earth Science, students will be able to:

1. Demonstrate comprehensive knowledge of how the Earth system operates over geologic and modern timescales.
2. Demonstrate the ability to make and record observations in the field, and to analyze and interpret these data in the context of the geologic history.
3. Demonstrate effective oral and written communication skills.
4. Demonstrate the ability to apply critical thinking and problem-solving skills to evaluate published research in the Earth, Environmental and Planetary sciences.

Requirements for the BA Degree with a Major in Earth Science
For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Earth Science must complete:

- A minimum of 24 courses (60-63 credit hours, depending on course selection) to satisfy major requirements.
- A minimum of 120-123 credit hours to satisfy degree requirements.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 9 courses (31 credit hours) taken at the 300-level or above.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

**Elective Requirements**

Directed Electives in Fields Outside Earth Science

Select 2-4 courses from either Group A or Group B: 6-8

Group A

Select 1 from the following:

| BIOC 201 & EBIO 202 | INTRODUCTORY BIOLOGY and INTRODUCTORY BIOLOGY II |              |
| PHYS 101 & PHYS 103 & PHYS 102 & PHYS 104 | MECHANICS (WITH LAB) and MECHANICS DISCUSSION and ELECTRICITY & MAGNETISM (WITH LAB) and ELECTRICITY AND MAGNETISM DISCUSSION |              |
| PHYS 125 & PHYS 126 | GENERAL PHYSICS (WITH LAB) and GENERAL PHYSICS II (WITH LAB) |              |

Group B

Select 2 from the following Option Categories:

<table>
<thead>
<tr>
<th>Option Category - 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 101 &amp; PHYS 103</td>
</tr>
<tr>
<td>PHYS 125</td>

</tbody>
</table>

<table>
<thead>
<tr>
<th>Option Category - 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>CAAM 210</td>
</tr>
</tbody>
</table>

Directed Electives in Earth Science

Select 4 courses from departmental (ESCI) course offerings at the 300-level or above. 12

Directed Electives in Natural Science and Engineering

Select 2 courses from the School of Natural Sciences or the School of Engineering course offerings at the 200-level or above. 2 6

**Total Credit Hours Required for the Major in Earth Science** 60-63

**University Graduation Requirements** (p. 26) * 60

Total Credit Hours 120-123

---

**Footnotes and Additional Information**

* Includes coursework completed as distribution credit, FWIS, LPAP, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The "hours outside of the major" requirement may include all of the above university requirements.

1 CHEM 121 or CHEM 111 can be satisfied by completing CHEM 151; CHEM 123 or CHEM 113 can be satisfied by completing CHEM 153. CHEM 122 or CHEM 112 can be satisfied by completing CHEM 152; CHEM 124 or CHEM 114 can be satisfied by completing CHEM 154.

2 Courses must be approved by the department undergraduate advisor. Courses from the School of Natural Sciences or the School of Engineering include the following subject codes: ASTR, BIOC, BIOE, CAAM, CEVE, CHBE, CHEM, COMP, EBIO, ELEC, ENGI, ENST, ESCI, GLHT, HEAL, KINE, MATH, MECH, MSNE, NSCI, PHYS, STAT.

---

**Policies for the BA Degree with a Major in Earth Science**

**Transfer Credit**

For Rice University’s policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: [https://oaa.rice.edu](https://oaa.rice.edu). Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

**Departmental Transfer Credit Guidelines**

Students pursuing the major in Earth Science should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.
Additional Information
For additional information, please see the Earth Science major page, on the Department of Earth, Environmental, and Planetary Sciences website: https://earthscience.rice.edu/academics/undergraduate-program/

Opportunities for the BA Degree with a Major in Earth Science

Academic Honors
The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Honors Research
Undergraduates are encouraged to embark on an undergraduate honors thesis. The purpose of the honors thesis is for students to develop and demonstrate their creative and independent research potential. Students are recommended to begin in the fall of their junior year to provide ample time for research projects to be developed, executed and written. Students are expected to enroll in at least two semesters of the course ESCI 481, spanning their senior year. Juniors who have identified a research project and mentor can also enroll in ESCI 481. Students should sign up for ESCI 481 for 3 credits.

Criteria for Participating in Undergraduate Honors Thesis Research
• Strong performance in ESCI courses, in particular, ESCI 321, ESCI 322, ESCI 323, ESCI 324, and ESCI 334
• A grade of A- or better in ESCI 481
• Letter of recommendation of a faculty research mentor
• Research proposal

Requirements for Completing an Undergraduate Honors Thesis

Spring Semester of Junior Year
Each honors thesis candidate should choose a research topic, identify a faculty research advisor, and initiate independent research. The student should select a thesis committee, consisting of a faculty advisor, one member of the honors thesis committee, and one other faculty member of their choosing. Candidates are expected to turn in a preliminary written proposal (2 pages) at the end of their spring semester, accompanied by a formal application, both of which will be evaluated by the honors thesis committee for consideration of acceptance into the honors thesis program in their senior year. Required course:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESCI 401</td>
<td>SEMINAR: UNDERGRADUATE HONORS THESIS</td>
<td>1</td>
</tr>
</tbody>
</table>

And if they have research project and mentor identified, they can also take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESCI 481</td>
<td>UNDERGRADUATE RESEARCH IN EARTH SCIENCE</td>
<td>3</td>
</tr>
</tbody>
</table>

Fall Semester of Senior Year
Students accepted into the honors thesis program continue to develop and refine their proposed research in concert with their research advisor and thesis committee. Students participate in meetings with other honors thesis candidates to discuss basic research protocols and philosophies, and meet independently with their chosen scientific advisor, and generate data, experiments or models. Students will give oral presentations of their research proposals in public by mid-semester, in the presence of their examining committee. At the end of the semester, students must submit final versions of their proposals, describing motivation, hypothesis, methodology, and preliminary results. The honors thesis committee will evaluate the proposals, and if approved, students can continue in the honors thesis program. Required courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESCI 401</td>
<td>SEMINAR: UNDERGRADUATE HONORS THESIS</td>
<td>1</td>
</tr>
<tr>
<td>ESCI 481</td>
<td>UNDERGRADUATE RESEARCH IN EARTH SCIENCE</td>
<td>3</td>
</tr>
</tbody>
</table>

Spring Semester of Senior Year
Students continue and complete their research. A mid-semester progress report must be submitted to the thesis committee for feedback. At the end of the spring semester, students submit their final theses, and give public oral exit talks. To complete the honors thesis program, student theses must be approved by the honors thesis committee. Required courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESCI 401</td>
<td>SEMINAR: UNDERGRADUATE HONORS THESIS</td>
<td>1</td>
</tr>
<tr>
<td>ESCI 481</td>
<td>UNDERGRADUATE RESEARCH IN EARTH SCIENCE</td>
<td>3</td>
</tr>
</tbody>
</table>

Further details about the program, and expectations and criteria for the thesis proposal and final thesis can be found on the Department of Earth, Environmental, and Planetary Sciences website (https://earthscience.rice.edu/academics/undergraduate-program/honors-thesis/).

Application Process
Students must apply and be accepted to participate in the senior honors research program. The application form can be downloaded from Department of Earth, Environmental, and Planetary Sciences website (https://earthscience.rice.edu/academics/undergraduate-program/honors-thesis/), and should be submitted along with a ~two page thesis proposal at the end of the spring semester of the junior year. Students will be informed of their acceptance into the honors thesis program before the start of the following fall semester.

Other Points of Consideration
Students who are accepted into the 'RUSP Rice Undergraduate Scholars Program' can substitute ESCI 481 courses for semesters 2 and 3 with HONS 470 and HONS 471. However, the students will have to meet all other requirements of the honors thesis set by the department of the honors thesis set by the department.

Other expectations, conditions, and opportunities related to carrying out an Earth Science Honors Thesis can be found on the Department of Earth, Environmental, and Planetary Sciences website (https://
Bachelor of Science (BS) Degree with a Major in Earth Science

Program Learning Outcomes for the BS Degree with a Major in Earth Science

Upon completing the BS degree with a major in Earth Science, students will be able to:

1. Demonstrate a comprehensive knowledge of the structure of the Earth from core to atmosphere, and how it has changed over time.
2. Demonstrate the ability to make and record observations in the field, and to analyze and interpret these data in the context of the geologic history.
3. Demonstrate effective oral and written communication skills.
4. Demonstrate the ability to apply critical thinking and problem-solving skills to evaluate published research in the Earth, Environmental and Planetary sciences.
5. Demonstrate an understanding of the scientific method and its application to the study of Earth, Environmental and Planetary sciences.

Requirements for the BS Degree with a Major in Earth Science

For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BS degree with a major in Earth Science must complete:

- A minimum of 20-22 courses (69-73 credit hours), depending on course selection, to satisfy major requirements.
- A minimum of 129-133 credit hours to satisfy degree requirements.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 8-12 courses (28-40 credit hours), depending on course selection, taken at the 300-level or above.
- The requirements for one area of specialization (see below for areas of specialization). The BS degree with a major in Earth Science offers five areas of specialization:
  - Environmental Earth Science (p. ), or Geochemistry (p. 369), or Geology (p. 370), or Geophysics (p. 370), or Self-Designed (p. 371).

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

Footnotes and Additional Information
• Includes coursework completed as distribution credit, FWIS, LPAP, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The "hours outside of the major" requirement may include all of the above university requirements.

1 CHEM 121 or CHEM 111 can be satisfied by completing CHEM 151; CHEM 123 or CHEM 113 can be satisfied by completing CHEM 153. CHEM 122 or CHEM 112 can be satisfied by completing CHEM 152; CHEM 124 or CHEM 114 can be satisfied by completing CHEM 154.
Bachelor of Science (BS) Degree with a Major in Earth Science

ESCI 430 TRACE-ELEMENT AND ISOTOPE GEOCHEMISTRY FOR EARTH AND ENVIRONMENTAL SCIENCE

ESCI 472 EARTH SYSTEMS MODELING: NUMERICAL TECHNIQUES AND APPLICATIONS

Geochemistry Area of Specialization Electives

Select 2-4 courses from the following or from any ESCI course offerings at the 300-level or above:

- BIOC 211 INTERMEDIATE EXPERIMENTAL BIOSCIENCES
- CAAM 210 INTRODUCTION TO ENGINEERING COMPUTATION
- CEVE 401 CHEMISTRY FOR ENVIRONMENTAL ENGINEERING AND SCIENCE LAB
- CEVE 434 FATE AND TRANSPORT OF CONTAMINANTS IN THE ENVIRONMENT
- CHEM 211 ORGANIC CHEMISTRY I
- & CHEM 213 ORGANIC CHEMISTRY DISCUSSION
- CHEM 212 ORGANIC CHEMISTRY II
- & CHEM 214 ORGANIC CHEM DISCUSSION II
- CHEM 415 CHEMICAL KINETICS AND DYNAMICS
- CHEM 495 TRANSITION METAL CHEMISTRY
- EBIO 202 INTRODUCTORY BIOLOGY II
- MATH 212 MULTIVARIABLE CALCULUS

Total Credit Hours: 27

Area of Specialization: Geology

Elective Requirements

Group A

Select 2 courses from the following:

- ESCI 421 PALEOCENOGRAPHY
- ESCI 427 SEQUENCE STRATIGRAPHY
- ESCI 431 GEOMORPHOLOGY
- ESCI 435 MECHANICS OF SEDIMENT TRANSPORT
- ESCI 504 SILICICLASTIC DEPOSITIONAL SYSTEMS
- ESCI 506 CARBONATE DEPOSITIONAL SYSTEMS
- ESCI 552 MARINE GEOLOGY SYSTEMS

Group B

Select 2 courses from the following:

- ESCI 410 OPTICAL MINERALOGY AND PETROGRAPHY
- ESCI 411 ADVANCED PETROLOGY II
- ESCI 418 / CEVE 418 QUANTITATIVE HYDROGEOLOGY
- ESCI 419 MATERIALS CHARACTERIZATION
- ESCI 426 INTRODUCTION TO SEISMIC INTERPRETATION: STRUCTURAL STYLES AND SEISMIC STRATIGRAPHY
- ESCI 429 MAGMATIC, VOLCANIC AND HYDROTHERMAL PROCESSES
- ESCI 442 EXPLORATION GEOPHYSICS
- ESCI 463 STRUCTURE AND EVOLUTION OF TECTONIC SYSTEMS
- ESCI 464 GLOBAL TECTONICS
- ESCI 467 GEOMECHANICS
- ESCI 472 EARTH SYSTEMS MODELING: NUMERICAL TECHNIQUES AND APPLICATIONS

Total Credit Hours: 24

Area of Specialization: Geophysics

Courses chosen from the list of ESCI course offerings must be 3 credit hours or more.

Elective Requirements

Upper-Level Electives (ESCI course offerings)

Select 2 courses from the following:

- ESCI 418 / CEVE 418 QUANTITATIVE HYDROGEOLOGY
- ESCI 426 INTRODUCTION TO SEISMIC INTERPRETATION: STRUCTURAL STYLES AND SEISMIC STRATIGRAPHY
- ESCI 440 GEOPHYSICAL DATA ANALYSIS: DIGITAL SIGNAL PROCESSING
- ESCI 441 GEOPHYSICAL DATA ANALYSIS: INVERSE METHODS
- ESCI 442 EXPLORATION GEOPHYSICS
- ESCI 450 / CEVE 450 REMOTE SENSING
- ESCI 452 GIS FOR SCIENTISTS AND ENGINEERS
- ESCI 461 SEISMOLOGY I
- ESCI 462 TECTONOPHYSICS
- ESCI 463 STRUCTURE AND EVOLUTION OF TECTONIC SYSTEMS
- ESCI 464 GLOBAL TECTONICS
- ESCI 467 GEOMECHANICS
ESCI 472  EARTH SYSTEMS MODELING: NUMERICAL TECHNIQUES AND APPLICATIONS
ESCI 542  SEISMOLOGY II
ESCI 564  SEISMIC REFLECTION DATA PROCESS

Geophysics Area of Specialization Electives
Select 2 courses from the following: 6
Any course from ESCI course offerings between ESCI 410 and ESCI 475, except for research and special studies
Any course from MATH, CAAM, or PHYS course offerings at the 300-level or above
CHEM 301  PHYSICAL CHEMISTRY I

Total Credit Hours 28

Area of Specialization: Self-Designed
The department recognizes the interdisciplinary nature of modern earth science and the opportunity for students to specialize in nontraditional and emerging fields. Therefore, students can design their own area of specialization, normally in close consultation with one faculty member and followed by approval from the department's undergraduate advisor. In addition to required earth science courses and related courses, these areas of specialization will generally comprise 18 additional hours that target a coherent theme from an approved list of coursework at the 300-level or above, from inside or outside the department. Interested students are expected to submit a statement of rationale by the beginning of their third year.

Code  Title  Credit Hours

Elective Requirements
Earth Science Field Experience:
ESCI 391  EARTH SCIENCE FIELD EXPERIENCE (at least 3 credit hours) 3

Self-Designed Electives
Select 2 courses from the following: 6
BIOC 201  INTRODUCTORY BIOLOGY
CAAM 210  INTRODUCTION TO ENGINEERING COMPUTATION
CHEM 301  PHYSICAL CHEMISTRY I
CHEM 302  PHYSICAL CHEMISTRY II
MATH 211  ORDINARY DIFFERENTIAL EQUATIONS AND LINEAR ALGEBRA
MATH 212  MULTIVARIABLE CALCULUS
PHYS 201  WAVES, LIGHT, AND HEAT

Directed Electives in Self-Designed Specialization
Students must complete a total of 6 courses at the 300-level or higher targeting a coherent theme selected with the approval of the department's undergraduate advisor 18

Total Credit Hours 27

Policies for the BS Degree with a Major in Earth Science

Transfer Credit
For Rice University's policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: https://oaa.rice.edu. Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines
Students pursuing the major in Earth Science should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.

Additional Information
For additional information, please see the Earth Science major page, on the Department of Earth, Environmental, and Planetary Sciences website: https://earthscience.rice.edu/academics/undergraduate-program/

Opportunities for the BS Degree with a Major in Earth Science

Academic Honors
The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Honors Research
Undergraduates are encouraged to embark on an undergraduate honors thesis. The purpose of the honors thesis is for students to develop and demonstrate their creative and independent research potential. Students are recommended to begin in the fall of their junior year to provide ample time for research projects to be developed, executed and written. Students are expected to enroll in at least two semesters of the course ESCI 481, spanning their senior year. Juniors who have identified a research project and mentor can also enroll in ESCI 481. Students should sign up for ESCI 481 for 3 credits.

Criteria for Participating in Undergraduate Honors Thesis Research

- Strong performance in ESCI courses, in particular, ESCI 321, ESCI 322, ESCI 323, ESCI 324, and ESCI 334
- A grade of A- or better in ESCI 481
- Letter of recommendation of a faculty research mentor
- Research proposal

Requirements for Completing an Undergraduate Honors Thesis

Spring Semester of Junior Year
Each honors thesis candidate should choose a research topic, identify a faculty research advisor, and initiate independent research. The student should select a thesis committee, consisting of a faculty advisor, one member of the honors thesis committee, and one other faculty member of their choosing. Candidates are expected to turn in a preliminary written proposal (2 pages) at the end of their spring semester, accompanied by a formal application, both of which will be evaluated by the honors thesis committee for consideration of acceptance into the honors thesis program in their senior year. Required course:
And if they have research project and mentor identified, they can also take:

<table>

<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESCI 481</td>
<td>UNDERGRADUATE RESEARCH IN EARTH SCIENCE</td>
<td>3</td>
</tr>
</tbody>
</table>

**Fall Semester of Senior Year**

Students accepted into the honors thesis program continue to develop and refine their proposed research in concert with their research advisor and thesis committee. Students participate in meetings with other honors thesis candidates to discuss basic research protocols and philosophies, and meet independently with their chosen scientific advisor, and generate data, experiments or models. Students will give oral presentations of their research proposals in public by mid-semester, in the presence of their examining committee. At the end of the semester, students must submit final versions of their proposals, describing motivation, hypothesis, methodology, and preliminary results. The honors thesis committee will evaluate the proposals, and if approved, students can continue in the honors thesis program. Required courses:

<table>
<thead>
<tr>

<td>SEMINAR: UNDERGRADUATE HONORS THESIS</td>
<td>1</td>
</tr>
<tr>
<td>ESCI 481</td>
<td>UNDERGRADUATE RESEARCH IN EARTH SCIENCE</td>
<td>3</td>
</tr>
</tbody>
</table>

**Spring Semester of Senior Year**

Students continue and complete their research. A mid-semester progress report must be submitted to the thesis committee for feedback. At the end of the spring semester, students submit their final theses, and give public oral exit talks. To complete the honors thesis program, student theses must be approved by the honors thesis committee. Required courses:

<table>
<thead>
<tr>

<td>SEMINAR: UNDERGRADUATE HONORS THESIS</td>
<td>1</td>
</tr>
<tr>
<td>ESCI 481</td>
<td>UNDERGRADUATE RESEARCH IN EARTH SCIENCE</td>
<td>3</td>
</tr>
</tbody>
</table>

Further details about the program, and expectations and criteria for the thesis proposal and final thesis can be found on the Department of Earth, Environmental, and Planetary Sciences website (https://earthscience.rice.edu/academics/undergraduate-program/honors-thesis/).

**Other Points of Consideration**

Students who are accepted into the 'RUSP Rice Undergraduate Scholars Program' can substitute ESCI 481 courses for semesters 2 and 3 with HONS 470 and HONS 471. However, the students will have to meet all other requirements of the honors thesis set by the department of the honors thesis set by the department.

Other expectations, conditions, and opportunities related to carrying out an Earth Science Honors Thesis can be found on the Department of Earth, Environmental, and Planetary Sciences website (https://earthscience.rice.edu/academics/undergraduate-program/honors-thesis/).

**Undergraduate Independent Research**

The department encourages, but does not require, Earth Science undergraduate majors to pursue independent supervised research in ESCI 481. This can also be carried out as part of the Earth Science Honors Thesis Program.

**Additional Information**

For additional information, please see the Earth Science major page, on the Department of Earth, Environmental, and Planetary Sciences website: https://earthscience.rice.edu/academics/undergraduate-program/

**Doctor of Philosophy (PhD) Degree in the field of Earth Science**

**Program Learning Outcomes for the PhD Degree in the field of Earth Science**

Upon completing the PhD degree in the field of Earth Science, students will be able to:

1. Understand the structure and composition of the Earth and Planets, their evolution, and how the Earth changes over time.
2. Use appropriate computational or analytical techniques in the conduct of research investigations.
3. Demonstrate significant skills in scientific communication, written and oral.
4. Demonstrate peer-reviewed literature, and to write and publish a substantial contribution.

**Requirements for the PhD Degree in the field of Earth Science**

For general university requirements, please see Doctoral Degrees (p. 65). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). All incoming students should have a strong background in physics, chemistry, and mathematics and should have, or should acquire, a broad grounding in fundamental earth science. The department encourages applications from well-qualified students with degrees in the other sciences, mathematics, or engineering. The requirements for the MS and PhD Degrees in earth science are similar, but the PhD demands a significantly higher level of knowledge, research skills, and scholarly independence. Most students need at least two years beyond the
a course of study following the Guidelines for Advanced Degrees in the Department of Earth Science handbook, distributed to all incoming students. Students pursuing the MS and PhD degrees in the field of Earth Science must:

- Complete 20 semester hours of coursework at the 500-level or above (or other approved courses), not including research hours
- Pass a written preliminary exam
- Maintain a grade point average of 3.00 (B) or better
- Prepare a written thesis comprised of peer-reviewed publication(s) that represent an original contribution to science
- Defend the research and conclusions of the thesis in an oral examination

Students with a bachelor’s degree and department approval may work directly toward the PhD, in which case the course of study is equivalent to that required for both degrees; performance on the examinations and the thesis, however, should be at the level required for the PhD. Because the graduate programs require full-time study and close interaction with faculty and fellow students, the department discourages students from holding full-time (or nearly full-time) jobs outside the university. Outside employment must be approved by the chair.

Department of Earth, Environmental, and Planetary Science Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Earth, Environmental, and Planetary Science publishes a graduate program handbook, which can be found here: [https://gradhandbooks.rice.edu/2019_20/EEPS_Graduate_Handbook.pdf](https://gradhandbooks.rice.edu/2019_20/EEPS_Graduate_Handbook.pdf)

Additional Information

For additional information, please see the Earth, Environmental, and Planetary Science website: [https://earthscience.rice.edu/](https://earthscience.rice.edu/)

Opportunities for the PhD Degree in the field of Earth Science

Additional Information

For additional information, please see the Earth, Environmental, and Planetary Science website: [https://earthscience.rice.edu/](https://earthscience.rice.edu/)

Master of Science (MS) Degree in the field of Earth Science

Program Learning Outcomes for the MS Degree in the field of Earth Science

Upon completing the MS degree in the field of Earth Science, students will be able to:

1. Understand the structure and composition of the Earth and Planets, their evolution, and how the Earth changes over time.
2. Use appropriate computational or analytical techniques in the conduct of research investigations.
3. Demonstrate significant skills in scientific communication, written and oral.
4. Develop the ability to contribute to the peer-reviewed literature.

Requirements for the MS Degree in the field of Earth Science

The MS degree is a thesis master’s degree. For general university requirements, please see Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). All incoming students should have a strong background in physics, chemistry, and mathematics and should have, or should acquire, a broad grounding in fundamental earth science. The department encourages applications from well-qualified students with degrees in the other sciences, mathematics, or engineering. The requirements for the MS and PhD in earth science are similar, but the PhD demands a significantly higher level of knowledge, research skills, and scholarly independence. Most students need at least 2 years beyond the bachelor’s degree to complete the MS or 4 years beyond the bachelor’s degree to complete the PhD.

Candidates determine, with their major professor and thesis committee, a course of study following the Guidelines for Advanced Degrees in the Department of Earth Science handbook, distributed to all incoming students. For both degrees, candidates must:

- Complete 20 semester hours of coursework at the 500-level or above (or other approved courses), not including research hours
- Pass a written preliminary exam
- Maintain a grade point average of 3.00 (B) or better
- Prepare a written thesis comprised of peer-reviewed publication(s) that represent an original contribution to science
- Defend the research and conclusions of the thesis in an oral examination

Students will learn the basic principles of microeconomics, macroeconomics, and econometrics, and how to apply those principles in studying economic phenomena and analyzing public policy issues.

Undergraduates may major in economics or mathematical economic analysis (but not both). The major in mathematical economic analysis is a mathematically-intensive course of study recommended for students who intend to pursue graduate work in economics or a business or governmental job in which extensive analytical and quantitative skills are required.

Master of Energy Economics (MEEcon) students will be able to produce insightful analyses of energy markets to inform such things as capital asset decisions, firm strategic direction, and future market orientation.

The PhD program in economics equips students with the theoretical and empirical skills essential to entering research careers in academia, business, and government.

**Bachelor’s Programs**

- Bachelor of Arts (BA) Degree with a Major in Economics  
  (p. 375)
- Bachelor of Arts (BA) Degree with a Major in Mathematical Economic Analysis  
  (p. 544)

**Minor**

- Minor in Financial Computation and Modeling  
  (p. 449)

**Master’s Programs**

- Master of Energy Economics (MEEcon) Degree  
  (p. 407)
- Master of Arts (MA) Degree in the field of Economics*

**Doctoral Programs**

- Doctor of Philosophy (PhD) Degree in the field of Economics 
  (p. 377)
- and a Major Concentration in Economics and Finance  
  (p. 379)

* Although students are not normally admitted to a Master of Arts (MA) degree program, graduate students may earn the MA as they work towards the PhD.

Bachelor of Arts (BA) Degree with a Major in Economics

Program Learning Outcomes for the BA Degree with a Major in Economics
Upon completing the BA degree with a major in Economics, students will have:

1. Learned various statistical and econometric skills, including a thorough knowledge of applied econometrics and the ability to use statistical software packages to analyze economic data and interpret statistical results.
2. Learned the core principles of microeconomics, including supply and demand, utility maximization by consumers and profit maximization by firms, and equilibrium market structures, as well as advanced topics in microeconomics, especially economic applications of game theory.
3. Learned the core principles of macroeconomics, including the macroeconomic effects of monetary and fiscal policy, the nature of the business cycle, and the determinants of growth, and learn alternative approaches to analyzing the performance of the macroeconomy.
4. Learned how the basic economic principles that have been absorbed in the core courses are utilized in economic analyses of critical policy issues in a wide variety of applied subject areas.

Additionally, students completing the two-semester departmental honors program will have:

1. Learned how to conduct economic research, beginning with framing of a research idea and progressing to a critical review and evaluation of the relevant literature, the construction of an economic model to analyze the issue under consideration, the identification of testable hypotheses, the collection of data and econometric testing of their hypotheses, the presentation of a research paper that presents those results.

Requirements for the BA Degree with a Major in Economics
For general university requirements, see Graduation Requirements (p. 26). Students pursuing the BA degree with a major in Economics must complete:

2019-2020 General Announcements
PDF Generated 11/12/2019
The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major's academic advisor, or where applicable, the department's Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major's Official Certifier [https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/].) Students and their academic advisors should identify and clearly document the courses to be taken.

### Summary

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Total Credit Hours Required for the Major in Economics**: 44-48

**Total Credit Hours Required for the BA Degree with a Major in Economics**: 120

### Degree Requirements

#### Core Requirements

**Mathematics and Statistics**: 1

- Select 1 from the following:
  - MATH 101: SINGLE VARIABLE CALCULUS I
  - MATH 101AP/OTH CREDIT IN CALCULUS I
  - MATH 111 & MATH 112: CALCULUS: DIFFERENTIATION AND ITS APPLICATIONS and CALCULUS: INTEGRATION AND ITS APPLICATIONS
  - MATH 102: SINGLE VARIABLE CALCULUS II
  - MATH 106: AP/OTH CREDIT IN CALCULUS II
  - ECON 307 / STAT 310: PROBABILITY AND STATISTICS
  - STAT 315 / DSCI 301: PROBABILITY AND STATISTICS FOR DATA SCIENCE

**Economics and Econometrics**: 1

- ECON 100: PRINCIPLES OF ECONOMICS
- ECON 200: MICROECONOMICS
- ECON 203: MACROECONOMICS
- ECON 209: APPLIED ECONOMETRICS
- ECON 300: GAME THEORY AND OTHER MICRO TOPICS FOR ECON MAJORS

#### Elective Requirements**: 1, 2, 3

- Select 3 courses from the following:
  - ECON 210: BEHAVIORAL ECONOMICS
  - ECON 239: LAW AND ECONOMICS
  - Courses between ECON 343-ECON 495

**Total Credit Hours**: 120

### Policies for the BA Degree with a Major in Economics

#### Program Restrictions and Exclusions

- Students pursuing the BA degree with a major in Economics should be aware of the following program restrictions:
  - Students pursuing the major in Economics may not additionally declare the major in Mathematical Economic Analysis.

#### Transfer Credit

For Rice University's policy regarding transfer credit, see Transfer Credit (p. 33). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors on their website: [https://oaad.rice.edu](https://oaad.rice.edu). Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

---

**Footnotes and Additional Information**

- Includes coursework completed as distribution credit, FWIS, LPAP, upper-level, residency (hours taken at Rice), 60 hours outside of the major (if applicable), and any additional academic program requirements. The "hours outside of the major" requirement may include all of the above university requirements.

1. **After matriculation**: In some cases, transfer credit may be awarded by the economics department for courses completed at other schools after the student has matriculated at Rice. Students may present a maximum of 2 such transfer courses in fulfilling the mathematics and statistics core requirements, and a maximum of 3 such transfer courses in fulfilling the economics/econometrics core requirements and elective requirements combined. (Additional transfer courses may count toward meeting university graduation requirements, but not toward fulfillment of requirements for the major.)

2. Before matriculation: Credits awarded to transfer students for courses taken prior to matriculation at Rice are not counted against the departmental limit on transfer courses, but all students must complete more than half of their upper-level major coursework (300-level and 400-level courses) at Rice.

3. Students who have received credit for ECON 111 and ECON 113 and have made a grade of B- or better in MATH 102 (taken at Rice University) may substitute any Economics major elective for ECON 100. Students must notify the department's Director of Undergraduate Studies if they wish to exercise this option.

As specified in their course descriptions, the following courses do not satisfy the Electives requirement for the major in Economics: ECON 101, ECON 103, ECON 111, ECON 113, ECON 260, ECON 265, ECON 270, ECON 275, ECON 499. In addition, BUSI 343 may be substituted for ECON 343, and STAT 449 may be substituted for ECON 449.
Departmental Transfer Credit Guidelines
Students pursuing the major in Economics should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program’s official transfer credit advisor) on an individual case-by-case basis.
- No more than 5 courses (15 credit hours) of transfer credit from U.S. or international universities of similar standing as Rice may apply towards specific major requirements after matriculation at Rice as follows:
  - No more than 2 courses (6 credit hours) of transfer credit may apply towards the mathematics and statistics core requirements
  - No more than 3 courses (9 credit hours) of transfer credit may apply towards the economics/econometrics core requirements and the elective requirements combined

Please Note: Additional transfer courses may count toward meeting university graduation requirements, but not toward fulfillment of requirements for the major. Credits awarded to transfer students for courses taken prior to matriculation at Rice are not counted against the departmental limit on transfer courses, but all students must complete more than half of their upper-level major coursework (300-level and 400-level courses) at Rice.

Additional Information
For additional information, please see the Economics website: https://economics.rice.edu/

Opportunities for the BA Degree with a Major in Economics

Academic Honors
The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (p. 48) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (p. 48). Some departments have department-specific Honors awards or designations.

Requirements for Departmental Honors
1. To earn departmental honors in economics, students must earn a grade of B+ (3.33 grade points) or better in each semester of the department’s two-semester honors program, ECON 498 and ECON 499.
2. The honors program is available to both ECON and MTEC majors.
3. To be admitted to the honors program, students:
   a. must have a GPA of 3.67 or better in all courses taken toward fulfilling their departmental major requirements at the beginning of the academic year in which they enter the honors program;
   b. must have completed all of the core requirements for their major;
   c. must have completed the 400-level course or courses most closely related to their area of research, and
   d. must be accepted to the honors program by the professor supervising the program.
4. For additional information, consult the Economics Department Honors Program at https://economics.rice.edu/undergraduate-program/honors-program (https://economics.rice.edu/undergraduate-program/honors-program/).

Doctor of Philosophy (PhD) Degree in the field of Economics

Program Learning Outcomes for the MA and PhD Degrees in the field of Economics
Upon completing the MA and PhD degrees in the field of Economics, students will be able to:

1. Carry out independent research in economics, using mathematical, statistical, econometric, and computational tools.
2. Write an independent and original thesis that is of sufficient quality to merit publication in a top economics journal.
3. Conduct a focused review of the literature and develop a research design to carry out independent research.
4. Defend their research design and modeling choices by presenting their paper in a seminar environment.
5. Communicate their research effectively by writing clearly, concisely, and cogently.
6. Read critically and assess research manuscripts related to their field of study and in other fields.

Requirements for the MA and PhD Degrees in the field of Economics

MA Degree Program
The MA degree is a non-thesis master’s degree. For general university requirements for non-thesis masters degrees, please see Non-Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Although students are not normally admitted to study for an MA, graduate students may earn the MA along the way to the PhD. In order to obtain the MA Degree in the field of Economics:

- Students must pass the first year core courses with a grade point average of 2.67 or better
- Students must complete 6 field courses with passing grades

Requirements for the PhD Degree in the field of Economics

PhD Degree Program
For general university requirements, please see Doctoral Degrees (p. 65). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Candidates for the PhD usually spend from 2 to 2-1/2 years in full-time coursework and at least 1 year writing the thesis; 5 years is a reasonable goal for
Doctor of Philosophy (PhD) Degree in the field of Economics

completing the program. For the PhD degree in the field of Economics, students must:

1. Attend the statistics and mathematics camp before starting their first year courses.
2. Complete an approved program of at least 18 courses (including approved courses in other departments), no more than 4 of which are research workshops. At least 2 years of full-time study must be in residence at Rice.
3. Perform satisfactorily on the written general exams in economic theory and econometrics.
4. Write a research paper proposal before the start of their third year.
5. Write and present a research paper before the end of their third year.
6. Choose a thesis advisor by the end of their seventh semester.
7. Attend a research workshop every semester after their first year and present their own research in a workshop once every year after their second year.
8. Submit a written progress report in every semester they register for ECON 800.
9. Submit a thesis progress report every year starting with their fourth year.

Policies for the PhD Degree in the field of Economics

Department of Economics Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Economics publishes a graduate program handbook, which can be found here: [https://gradhandbooks.rice.edu/2019_20/Economics_PhD_Graduate_Handbook.pdf](https://gradhandbooks.rice.edu/2019_20/Economics_PhD_Graduate_Handbook.pdf)

Admission

Preparation for PhD Program: Applicants to the PhD program should have a strong background in mathematics and statistics. All applicants are required to take the Graduate Record Exam (GRE).

Additional Information

For additional information, please see the Economics website: [https://economics.rice.edu/](https://economics.rice.edu/)

Opportunities for the PhD Degree in the field of Economics

Additional Master’s Degrees Options for the PhD Degree in the field of Economics, or the PhD Degree in the field of Statistics

Students pursuing the PhD degree in the field of Economics, or in the field of Statistics, have the opportunity to also earn a Master of Arts (MA) degree in either the fields of Economics or Statistics, respectively.

Requirements for the PhD Degree in the field of Economics with an MA Degree in the field of Statistics

Students pursuing the PhD degree in the field of Economics and the MA degree with coordinated work in Statistics must complete:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>5 courses from departmental (ECON or BUSI) course offerings that have a strong statistics content.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>5 courses from departmental (STAT) course offerings that are significantly different in content to courses in economics</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Qualifier in Econometrics at the comparable level of an MA degree in Statistics.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>A Major Project</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Total Credit Hours</td>
</tr>
</tbody>
</table>

Footnotes and Additional Information

1 Courses that are jointly listed (cross-listed) between the 2 departments are counted towards the number of courses in the ‘home’ department for the particular course.
2 Must include Advanced Statistical Methods and Multivariate Statistics.
3 This may be directed by Economics faculty, but must have strong statistical content. The doctoral proposal in Economics can count toward this requirement.

Requirements for the PhD Degree in the field of Statistics with an MA Degree in the field of Economics

Students pursuing the PhD degree in the field of Statistics and the MA degree with coordinated work in Economics must complete:

Total Credit Hours Required for the PhD Degree in the field of Economics

Requirements for the Major Concentration: Economics and Finance

Students pursuing the PhD degree program in the field of Economics and a major concentration in Economics and Finance must:

1. Achieve a minimum grade of B (3.00 grade points) in each of the 10 required courses (32 credit hours), including Microeconomics, Macroeconomics, Econometrics, Real Analysis, Computational Economics, and Financial Economics.
2. Successfully pass comprehensive exams in Economic Theory and Econometrics administered by the Economics faculty at the end of the first year.
4. Successfully complete 6 credit hours of elective requirements from the following courses: BUSI 524, BUSI 525, BUSI 526, BUSI 527, and ECON 575.
5. Successfully pass a comprehensive exam on Corporate Finance and Empirical Methods administered by the Finance faculty at the end of the Fall semester of the second year.
6. Write and present a paper in the third year of the program. The paper and its presentation must be approved by two faculty advisors, one of whom must be in the Economics department and one of whom must be a member of the Finance group in the Business school.

7. Write and defend a thesis. The thesis committee must include at least one member from the Economics department and at least one member from the Finance group in the Business School.

Judy Radigan
Program Director
jradigan@rice.edu

The Education program at Rice University’s Susanne M. Glasscock School of Continuing Studies offers a comprehensive educational program that integrates work in courses with field-work experience. Additionally, we facilitate a network of support for our students and alumni so that we ensure our teacher leaders continue to grow and evolve as professionals.

Education courses are open to Rice students studying for careers in teaching and to Rice students interested in studying the complexities of the educational system and its role in society. The program provides fieldwork grounded in education research and theory. All of the courses include field-based experiences that encourage students to compare and apply their theoretical work to what is actually happening in schools. Our 21st century mission is to prepare and support teacher leaders to work with diverse students and be responsive to the paradigm shift in education that moves us from teaching academic content to teaching skills and strategies that foster lifelong learning.

The Education program engages, prepares, and supports its leaders for student-centered classrooms in a diverse society. The program emphasizes the value of equity in education and the political and educational policies that should undergird that equity. Students acquire a strong foundation in educational leadership, assessment, classroom culture, instructional strategies, literacy across the curriculum, and human developmental processes. All students will implement culturally relevant content and pedagogy in working with English language and diverse learners as this program acknowledges the changing face of Houston and the nation.

Rice offers four education plans:

Policies for the PhD Degree in the field of Economics

Department of Economics Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Economics publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Economics_PhD_Graduate_Handbook.pdf
1. a program leading to the state of Texas Teacher Certification in combination with the undergraduate degree in the elected subject field(s), including notation of Texas Teacher Certification on the recipient’s Rice academic transcript,
2. a Master of Arts in Teaching (MAT) that can be completed concurrently with a Rice bachelor’s degree with generally one additional year of study,
3. a Master of Arts in Teaching (MAT) for pre-service, and
4. a Master of Arts in Teaching (MAT) for experienced teachers with an optional route to principal certification.

The Rice Education program balances academic integrity with Texas Education Agency (TEA) compliance. Students seeking additional information about the Education program are encouraged to meet with an advisor in the Education department in Rice University’s Susanne M. Glasscock School of Continuing Studies.

Texas Teaching (TEA) Credentials (Texas Teacher and Principal Certifications)

Rice is approved by the State of Texas to offer teacher preparation programs in the following fields: art, English language arts and reading, history, Latin, life sciences, mathematics, physical sciences, physics/mathematics, science, social studies, Spanish, and principalship.

After satisfactory completion of the Rice Education program, which includes the state-mandated examinations for teachers, students are recommended for a Texas teaching credential. The Texas Education Agency (TEA) then awards Texas Teacher Certification (for Grades 7–12) or Principal Certification.

Higher Education Act Title II Reports

The Higher Education Act (HEA) of the U.S. Congress requires each institution of higher education with a teacher preparation program that enrolls students receiving federal assistance under this act to report annually “to the State and the general public” certain information. This information includes the pass rate of their program completers on assessments required by the state for teacher licensure or certification, the statewide pass rate on those assessments and other basic information on their teacher preparation program.

Rice University’s Education program is accredited by the state of Texas. The first year pass rate for program completers on assessments required by the state for 2017-2018 was 100%, compared with 97% for the overall state pass rate. Thirty-six students were enrolled in the program. Student teachers spent an average of 40 hours per week in supervised student teaching with a student/faculty ratio of 1.33-to-1. Rice Education program graduates are regularly recruited by school districts in Houston and the surrounding areas because of their innovative ideas, content knowledge, expertise, leadership abilities, and dedication to the teaching profession.

Texas Teacher (TEA) Certification for Rice Undergraduates

The Rice University Education program seeks to engage, prepare, and support teacher leaders for student-centered classrooms in a diverse society. While Rice does not award a formal undergraduate academic major, minor or certificate in education, the Education program does offer an academic plan to current Rice degree-seeking undergraduate students, one that fulfills all requirements for Texas Teacher (TEA) Certification for grades 7-12. Upon completion of the Education program, all undergraduate degree requirements, and certification by the State of Texas, Rice students will receive an acknowledgement and formal notation of their Texas Teacher Certification on their official Rice academic transcript.

Undergraduate students participating in the Education program, who wish to obtain Texas Teacher (TEA) Certification must complete:

• A minimum of 30 credit hours to satisfy the Texas Teacher (TEA) Certification requirements. Students must meet with an Education program advisor to develop a course of study.
• All university and major requirements for a Rice University bachelor’s degree.
• All courses in teaching field and education with a grade of B- (2.67 grade points) or better.
• All of the content courses specified by the certification field advisor(s). Lists of courses for each subject are available online and in the Education office.
• A minimum of 75 hours of field-based experience in local secondary schools, in conjunction with satisfactory results on background check with participating school districts.

In addition, undergraduate students in the Education program must satisfy the following requirements:

• Students must begin two-semester work in assigned school with first semester curriculum development and theory and methods courses and a second semester full-day practicum with a cooperating teacher (EDUC 421, EDUC 460, EDUC 461, EDUC 462, EDUC 463, EDUC 464, EDUC 465, EDUC 466, and EDUC 467).
• Students must pass the appropriate TExES exams.
• Students must apply with the appropriate (Texas) state agency for Texas Teacher (TEA) Certification when all requirements are completed.

Professional Education Courses

The following courses fulfill requirements for Texas Teacher (TEA) Certification. For additional information regarding requirements, students should contact the Education program (https://teach.rice.edu/texas-teacher-certification-rice-undergraduates/).

- EDUC 460 THEORY AND METHODS: ART
- EDUC 461 THEORY AND METHODS: ENGLISH LANGUAGE ARTS & READING (ELAR)
- EDUC 462 THEORY AND METHODS: LOTE
- EDUC 463 THEORY AND METHODS: MATHEMATICS
Admission
Rice undergraduate students may apply for admission to the Rice University Education program. In support of their application, candidates must submit:

- Official transcripts of previous and current university studies
- Proof of SAT or ACT scores
- Three letters of reference accompanied by the forms provided with the application
- Minimum 2.50 GPA
- Applications submitted during sophomore year with minimum 12 credit hours in the content area (15 credit hours for math and science) completed before admission
- Evidence of adequate physical vigor and speech to perform as a teacher in a classroom.

The Texas Education Agency (TEA) requires candidates to undergo a criminal background check prior to field-based experience, prior to clinical training, and prior to being hired as a first-year teacher. Candidates may go through the fingerprinting process before applying for admission. If the results are unsatisfactory, the candidate may petition the TEA for reconsideration of the results. More information on this important rule is on the Education program website at: https://glasscock.rice.edu/departments/education/teacher-certification-undergraduate-students/

Master of Arts in Teaching (MAT) Degree, for Current Rice Undergraduates

Program Learning Outcomes for the MAT Degree
Upon completing the MAT degree, students will be able to:

1. Create environments where students discover and construct meaning from content (using classroom students’ unique perceptions, thoughts, and feelings).
2. Facilitate teaching strategies for diverse learners.
3. Assess students’ progress and content mastery to guide instruction.
5. Demonstrate instructional leadership.

Requirements for the MAT Degree, for Current Rice Undergraduates
The MAT degree is a non-thesis master’s degree. For general university requirements, please see Non-Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MAT degree must complete:

- A minimum of 11 courses (36 credit hours) to satisfy degree requirements.
- A minimum of 36 credit hours of graduate-level study (coursework at the 500-level or above).
- A minimum of 24 credit hours must be taken at Rice University.
- A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University.
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the non-thesis master’s degree with a minimum grade of B-(2.67 grade points) in each course.

The MAT is a non-thesis degree program for students who want to qualify for secondary school teaching following the completion of a bachelor’s degree. Most MAT degree candidates entering the program have had no professional education courses. MAT degree and Education program participants who wish to obtain Texas Teacher (TEA) Certification (for grades 7-12) must satisfy the following requirements:

- Students must begin two-semesters of work in assigned school with first semester curriculum development and theory and methods courses and a second semester full-day field-based study with a cooperating teacher (EDUC 521, EDUC 560, EDUC 561, EDUC 562, EDUC 563, EDUC 564, EDUC 565, EDUC 566, and EDUC 570).
- Students must complete a two-semester supervised teaching internship by acquiring and fulfilling all professional responsibilities of a teaching position in a local accredited secondary school and completing a seminar course (EDUC 540).
- Students must complete 75 hours of field-based experience in local secondary schools, in conjunction with satisfactory results on background check with participating school districts.
- Students must earn grades of B-(2.67 grade points) or better in all teaching field and education courses.
- Students must pass the appropriate TExES exams.
- Students must apply with the appropriate (Texas) state agency for Texas Teacher (TEA) Certification when all requirements are completed.

The cooperating school districts pay a regular salary for internship teaching.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Theory and Methods

Select 1 course from the following:

- EDUC 560 THEORY AND METHODS: ART
- EDUC 561 THEORY AND METHODS: ENGLISH LANGUAGE ARTS & READING (ELAR)
- EDUC 562 THEORY AND METHODS: LOTE
- EDUC 563 THEORY AND METHODS: MATHEMATICS
- EDUC 564 THEORY AND METHODS: PHYSICAL EDUCATION
- EDUC 565 THEORY AND METHODS: SCIENCE
- EDUC 566 THEORY AND METHODS: SOCIAL STUDIES

Senior Year, Full-time Practice Teaching

- EDUC 570 FIELD-BASED STUDIES IN TEACHING AND LEARNING (Supervised Teaching) Internship

(Supervised Teaching) Internship

- EDUC 540 SEMINAR FOR FIRST-YEAR TEACHERS (2 semesters required, 1st semester)
- EDUC 540 SEMINAR FOR FIRST-YEAR TEACHERS (2 semesters required, 2nd semester)

Total Credit Hours | 36 |

Footnotes and Additional Information

1 At the discretion of the associate dean and academic advisor, some students may require additional courses to address deficiencies prior to seeking Texas Teacher Certification

Fifth-Year MAT Degree Option for Rice Undergraduate Students

Rice students have the option to pursue the MAT degree by adding an additional fifth year to their four undergraduate years of study. For more information, please see the Opportunities (p. 384) tab.
Policies for the MAT Degree, for Current Rice Undergraduates

Department of Education Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, Education publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2019_20/Education_Graduate_Handbook.pdf

Admission

Applicants must have a bachelor's degree, scholarly ability, and a commitment to teaching, and they must have taken the Graduate Record Examination (GRE) within 5 years. Specific requirements include:

- Completion of a bachelor's degree before admission to the program.
- Completion of 24 credit hours in a specified content area is required.
- Grades of B- (2.67 grade points) or better in all semester hours attempted in the teaching field and a grade point average of 3.00 or better, both in courses for the teaching field and overall.
- Evidence of adequate physical vigor and speech to perform as a teacher in a classroom.

The Texas Education Agency (TEA) requires candidates to undergo a criminal background check prior to field-based experience, prior to clinical training, and prior to being hired as a first-year teacher. Candidates may go through the fingerprinting process before applying for admission. If the results are unsatisfactory, the candidate may petition the TEA for reconsideration of the results. More information on this important rule is on the Education program website at: https://glasscock.rice.edu/degrees-certificates/degrees/master-arts-teaching/master-arts-teaching-new-teachers (https://glasscock.rice.edu/degrees-certificates/degrees/master-arts-teaching/master-arts-teaching-new-teachers/)

Education team members review each application. Limited tuition assistance is available. See Admission to Graduate Study (https://graduate.rice.edu/admissions/).

Transfer Credit

For Rice University's policy regarding transfer credit, see Transfer Credit (p. 64). Some departments and programs have additional restrictions on transfer credit. Students are encouraged to meet with their academic program's advisor when considering transfer credit possibilities.

Additional Information

For additional information, please see the Education program website: https://glasscock.rice.edu/departments/education-department (https://glasscock.rice.edu/departments/education-department/)

Opportunities for the MAT Degree, for Current Rice Undergraduates

Fifth-Year Master's Degree Option for Rice Undergraduate Students

Rice students have an option to pursue the Master of Arts in Teaching (MAT) degree by adding an additional fifth year to their four undergraduate years of studies.

Advanced Rice undergraduate students in good academic standing may apply to the MAT degree program during their sophomore year. Upon acceptance, depending on course load, financial aid status, and other variables, they may then start taking some required courses of the master's degree program during their junior year. A plan of study will need to be approved by the student's undergraduate advisor and the MAT program director.

As part of this option and opportunity, Rice undergraduate students:

- must complete the requirements for a bachelor's degree (a minimum of 120 credit hours) and the master's degree (an additional 36 credit hours) independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
- must complete at least 24 credit hours in the selected teaching area.
- should be aware there could be financial aid implications if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
- more information on this Undergraduate - Graduate Concurrent Enrollment opportunity, including specific information on the registration process can be found here (p. 17).

Requirements for Visiting Post-Baccalaureate (VPB) Certification

A non-degree (Visiting Post-Baccalaureate) plan leading to secondary teacher certification or principal certification is available for those who have earned a BA and/or MA degree, but do not choose to pursue a Rice University graduate degree. Candidates complete all requirements for state of Texas secondary teacher certification or principal certification, including professional education courses. Interested students should contact the Education Program.

Additional Information

For additional information, please see the Education program website: https://glasscock.rice.edu/departments/education-department (https://glasscock.rice.edu/departments/education-department/)

Master of Arts in Teaching (MAT) Degree, for Experienced Teachers

Program Learning Outcomes for the MAT Degree

Upon completing the MAT degree, students will be able to:

1. Create environments where students discover and construct meaning from content (using classroom students' unique perceptions, thoughts, and feelings).
2. Facilitate teaching strategies for diverse learners.
3. Assess students' progress and content mastery to guide instruction.
5. Demonstrate instructional leadership.

Requirements for the MAT Degree, for Experienced Teachers

The MAT degree is a non-thesis master's degree. For general university requirements, please see Non-Thesis Master's Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MAT degree must complete:
• A minimum of 12 courses (36 credit hours) to satisfy degree requirements.
• A minimum of 36 credit hours of graduate-level study (coursework at the 500-level or above).
• A minimum of 24 credit hours must be taken at Rice University.
• A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University.
• A minimum overall GPA of 2.67 or higher in all Rice coursework.
• A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the non-thesis master’s degree with a minimum grade of B- (2.67 grade points) in each course.

This MAT degree program is offered for experienced teachers that have a minimum of 2 years experience teaching. This degree program for experienced teachers also offers a route toward Texas Education Agency (TEA) principal certification (please see the separate program entry for the Master of Arts in Teaching (MAT) Degree, for Experienced Teachers with Principal Certification (p. 386)).

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program’s academic advisor, or where applicable, the department or program’s Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Master of Arts in Teaching (MAT) Degree, for New Teachers

Program Learning Outcomes for the MAT Degree

Upon completing the MAT degree, students will be able to:

1. Create environments where students discover and construct meaning from content (using classroom students’ unique perceptions, thoughts, and feelings).
2. Facilitate teaching strategies for diverse learners.
3. Assess students’ progress and content mastery to guide instruction.
5. Demonstrate instructional and organizational leadership.

Requirements for the MAT Degree, for New Teachers

The MAT degree is a non-thesis master’s degree. For general university requirements, please see Non-Thesis Master’s Degrees (p. 68). For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students (p. 55). Students pursuing the MAT degree must complete:

- A minimum of 11 courses (36 credit hours) to satisfy degree requirements.
- A minimum of 36 credit hours of graduate-level study (coursework at the 500-level or above).
- A minimum of 24 credit hours must be taken at Rice University.
- A minimum residency enrollment of one fall or spring semester of full-time graduate study at Rice University.
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the non-thesis master’s degree with a minimum grade of B- (2.67 grade points) in each course.

The MAT is a non-thesis degree program for students who want to qualify for secondary school teaching following the completion of a bachelor’s degree. Most MAT degree candidates entering the program have had no professional education courses. MAT degree and Education program participants who wish to obtain Texas Teacher (TEA) Certification (for grades 7-12) must satisfy the following requirements:

- Students must begin two-semesters of work in assigned school with a first semester curriculum development and theory and methods courses and a second semester full-day field-based study with a cooperating teacher (EDUC 521, EDUC 560, EDUC 561, EDUC 562, EDUC 563, EDUC 564, EDUC 565, EDUC 566, and EDUC 570).
- Students must complete a two-semester supervised teaching internship by acquiring and fulfilling all professional responsibilities of a teaching position in a local accredited secondary school and completing a seminar course (EDUC 540).
- Students must complete 75 hours of field-based experience in local secondary schools, in conjunction with satisfactory results on background check with participating school districts.
- Students must earn grades of B- (2.67 grade points) or better in all teaching field and education courses.
• Students must pass the appropriate TExES exams.
• Students must apply with the appropriate (Texas) state agency for Texas Teacher (TEA) Certification when all requirements are completed.

The cooperating school districts pay a regular salary for internship teaching.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.
