Description: Studies current methods of crisis communications with practical application utilizing numerous recent real-world case studies. Class will research and prepare strategies, make recommendations, then dissect and analyze each crisis situation, the processes, policies and results. This process will enhance strategic thinking, allow the consideration of pros and cons of alternative courses of action and provide a better understanding of the management decision making process. Class time will be interactive with individual and small group participation. Repeatable for Credit.

MGMT 672 - INTRODUCTION TO SUPPLY CHAIN MANAGEMENT
Short Title: INTRO TO SUPPLY CHAIN MGMT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 673 - COST ANALYSIS IN HEALTHCARE
Short Title: COST ANALYSIS IN HEALTHCARE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA program.
Course Level: Graduate
Prerequisite(s): MGMT 502 or MGMP 502 or MGMW 502
Description: Repeatable for Credit.

MGMT 674 - REAL ESTATE FINANCE: SECURITIES
Short Title: REAL ESTATE FINANCE:SECURITIES
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.
MGMT 676 - SOCIAL ENTERPRISE  
Short Title: SOCIAL ENTERPRISE  
Department: Management  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: What might constitute social responsibility in a market setting? If social responsibility connotes a connection between a person and a social problem say between you and a poor person in Bangladesh or Houston how might it be exercised in a market transaction of buying or selling? Is there a role of private enterprise or of private consumption for alleviating some of the social problems (e.g., health, education, pollution, poverty, etc.) that we observe and experience in communities across the world? Social Enterprise explores these and related questions in the context of business.

MGMT 678 - U.S. HEALTH CARE MANAGEMENT  
Short Title: U.S. HEALTH CARE MANAGEMENT  
Department: Management  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Sequence of offerings that provides an introduction to the business of health care in the U.S. Topics include health care systems, health service organizations, and issues relating to the aging problem and the technology explosion in health care. Required elective for MD/MBA's dual degree students. Repeatable for Credit.

MGMT 679 - COST AND QUALITY IN HEALTH CARE  
Short Title: COST & QUALITY IN HEALTH CARE  
Department: Management  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5-3  
Restrictions: Enrollment limited to students in the MBA or PMBA programs.  
Course Level: Graduate  
Description: Sequence of offerings that provides further analysis of the business of health care in the U.S. Topics include issues of cost and quality, health care financial management, and national and international solutions to the challenge of providing health care to a population. This class is designed to stand-alone, yet build upon MGMT 678. Required elective for MD/MBA dual degree students. Repeatable for Credit.

MGMT 680 - CUSTOMER ANALYTICS FOR SATISFACTION AND LOYALTY  
Short Title: CUSTOMER ANALYTICS  
Department: Management  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment limited to students in the MBA or PMBA programs.  
Course Level: Graduate  
Prerequisite(s): (MGMT 580 or MGMP 580 or MGMW 580) and (MGMT 595 or MGMP 596 or MGMW 596)  
Description: Introduction to major concepts in the analysis of customer satisfaction and loyalty, with emphasis on managerial applications. Also examines related consumption and post-purchase phenomena related to customer satisfaction and loyalty. Open only to second-year MBA students.

MGMT 681 - MARKETING COMMUNICATIONS  
Short Title: MARKETING COMMUNICATIONS  
Department: Management  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Marketing Communications is the Promotion "P" of the traditional 4 Ps of the Marketing Mix (Product, Price, Place, Promotion) as taught in marketing courses. In Services Marketing courses, they sometimes add three additional Ps (People, Processes and Physical Evidence) to the Marketing Mix (becoming 7 Ps) due to the intangible characteristics of services that add to the marketing challenges. In this course, we will focus on the concept of Integrated Marketing Communications. We will consider the unique situations of various organizations and the implications for the Integrated Marketing Communications (IMC) program. And we will discuss the IMC processes, media and tools and their roles in contributing to the success of the program. The tools available include Advertising, Direct Marketing, Interactive/Internet Marketing, Sales Promotion, PR/publicity, and Personal Selling. We will look at the various tools/media available and the strengths and weaknesses of each when applied to a given organization and its situation. Some organizations leverage all of these tools in their IMC programs while some will emphasize as few as one or two. That is because each organization's situation (internally and environmentally) is unique.

MGMT 682 - PRICING STRATEGIES  
Short Title: PRICING STRATEGIES  
Department: Management  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Study of the paradigm that success of a product lies not only in its acceptance by the end consumer but also in how it is priced and how it reaches the intended consumer, with emphasis on understanding and analyzing the issues, problems, and opportunities characteristic of the channel relationship and of the various faces of pricing. Repeatable for Credit.
MGMT 683 - GLOBAL BUSINESS TO BUSINESS MARKETING
Short Title: GLOBAL B2B MARKETING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 684 - BRAND STRATEGY
Short Title: BRAND STRATEGY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The Brand Management short course addresses important branding decisions faced by an organization. The focus of the course is on understanding how consumers, develop brand attitudes and behaviors and on developing a framework for planning and evaluating brand strategies.

MGMT 685 - GO-TO-MARKET STRATEGY
Short Title: GO-TO-MARKET STRATEGY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An effective “Go-to-Market” strategy is a critical component of commercial success and building customer preference. This course is designed to build capability in the design and management of route-to-market channels. Students will gain understanding of the importance of customer-focused channel design, how to build channel power (and use it responsibly), and create a performance-driven channel culture.

MGMT 686 - MARKETING RESEARCH
Short Title: MARKETING RESEARCH
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The objective of the course is to provide a comprehensive look at the marketing research process and the associated data collection techniques that can be used to collect information to better manage the marketing mix. Qualitative, survey-based, and experimental research designs will be discussed.

MGMT 687 - APPLIED MARKETING STRATEGY
Short Title: APPLIED MARKETING STRATEGY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course lays out a framework for marketing strategy and guides students through each step in the development process. While business challenges are inevitable, developing and following a well-structured marketing strategy, as laid out in this course, will help avoid many of the pitfalls that can lead businesses into trouble. Case studies, together with examples from the professor’s lengthy business career, will be used to illustrate the principles and identify pathways out of trouble should it occur. Repeatable for Credit.

MGMT 688 - BUYER BEHAVIOR
Short Title: BUYER BEHAVIOR
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Drawing on established theoretical frameworks of cognitive and social psychology, this course examines three aspects of consumer behavior: (1) individual, social and cultural influences on consumers, (2) psychological mechanisms of pre- and post-consumption processes such as decision-making and attitude formation and change, and (3) methodological issues in consumer analysis. Implications for strategy as well as marketing program design, measurement and execution are discussed. These topics will be studied through discussion of academic articles, cases and projects.

MGMT 689 - DECISION MODELS
Short Title: DECISION MODELS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Successful management requires the ability to recognize a decision situation, understand its essential features, and make a choice. However, many of these situations - particularly those involving uncertainty and/or complex interactions - may be too difficult to grasp intuitively, and the stakes may be too high to learn by experience. This course introduces spreadsheet modeling, simulation, decision analysis and optimization to represent and analyze such complex problems. The skills learned in this course are applicable in almost all aspects of business and should be helpful in future courses. The course is divided into two parts. In the first part, we discuss the use of decision trees for structuring decision problems under uncertainty. In the second part of the course, we discuss Monte Carlo simulation, a technique for simulating complex, uncertain systems. Throughout the course, we will use Microsoft Excel as a modeling environment, using add-in programs as necessary. Familiarity with Excel is an important prerequisite for this course. Repeatable for Credit.
MGMT 690 - HEALTHCARE STRATEGY
Short Title: HEALTHCARE STRATEGY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The Healthcare sector, which includes areas such as health care delivery, payment, pharmaceuticals, medical equipment, etc., is an important part of any economy and society in all countries of the world including the US. This sector presents an exciting platform for upcoming business leaders in pursuit of a promising and transformational professional career. This elective course offers students interested in this sector the opportunity to study and review core strategy concepts, analytical techniques, and frameworks relevant to developing, evaluating, and implementing value-creating strategies for organizations operating in various sectors of the healthcare space. Repeatable for Credit.

MGMT 691 - BREAKTHROUGH NEGOTIATIONS IN A HEALTH CARE CONTEXT
Short Title: BREAKTHROUGH NEGOTIATIONS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs.
Course Level: Graduate
Description: This course is tailored for an audience interested in healthcare. We will talk about how the characteristics of the healthcare industry impinge on negotiations, and the exercises and simulations conducted are based in a healthcare context. Repeatable for Credit.

MGMT 692 - CUSTOMER RELATIONSHIP MANAGEMENT
Short Title: CUSTOMER RELATIONSHIP MANAGEMENT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Increasingly, firms want to enhance profitability by using strategies and tactics that fall under the broad domain of customer relationship management (CRM). In this course, students take a marketer’s perspective when assessing the strategic and operational impacts of CRM in a variety of industry/customer settings. Because CRM requires crossfunctional coordination, successful implementation often expands the role and impact of the marketing organization within the firm. Thus, students also will learn how customercentricity, as an organizational mindset, changes expectations chief marketing officers, as well as other senior marketing managers, as they attempt engage others in CRM strategy development and execution. Three perspectives serve as a foundation for learning about CRM in this course: (1) CRM as a strategy that prioritizes the allocation of organizational resources toward serving customers profitably, (2) CRM as an organizational capability to gather and use customer intelligence to create value for both customers and the firm and 3) CRM as a technology-enabled process that supports customer-centric goals and tactics. Thus, students will gain an appreciation for the critical roles that information management and technology play in supporting CRM strategies but content of the course will focus on strategic and operational issues related to CRM success. Repeatable for Credit.

MGMT 693 - NEW PRODUCTS
Short Title: NEW PRODUCTS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Exploration of the critical role of new products within the corporation and in small businesses, focusing on consumer products. Discusses the critical steps in new product development from ideal generation to business analysis and cross-functional team management to product launch into the marketplace. Students will work in groups to develop their own new products and to prepare the key elements of a new product introduction. Repeatable for Credit.
MGMT 694 - INTERPERSONAL COMMUNICATION IN HEALTHCARE
Short Title: INTERPERSL COMM IN HEALTHCARE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: How to listen well, converse productively, use body language, and communicate across different cultures – all these fundamentals are covered and customized to healthcare settings. The course integrates lecture, discussion, and in-class exercises every week, providing many opportunities to apply lessons and practice skills. Students often break into small teams to simulate typical healthcare interactions and receive feedback on what they are doing well and what can be improved. Repeatable for Credit.

MGMT 695 - STOCK ANALYSIS
Short Title: STOCK ANALYSIS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: This course brings together some of the topics from Accounting, Finance, Economics and Strategy to better make investment decisions in your personal or corporate portfolio, as an investment management professional or helping you analyze how equity markets view different management decisions. The course will consist of hands-on stock analysis and will touch upon various aspects of improving your odds in making good investment decisions through both quantitative and qualitative fundamental analysis. We will touch on analyzing a company’s franchise, assessing the quality of the management, formulating your own investment thesis, and will use various valuation methods to assess the attractiveness of different stocks. We will also review how different political/regulatory, economic, and or sector-specific macro factors may affect your investment decision. The course will make use of current and historical events including touching upon the aspects of how the emerging markets secular growth impacts different stocks. Various other topics may include how the following affect stock valuation and prices: cash flow, leverage, mergers & acquisitions, spinoffs, corporate governance issues, currency and country exposures, new share offerings, restructuring, and competitive pressures. Repeatable for Credit.

MGMT 696 - SECURITIES VALUATION
Short Title: SECURITIES VALUATION
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: This new course will focus on valuing income streams from different types of securities. Below is a quick list of topics which build from very simple to increasingly complex variations on the theme. (1) Review net present value calculation under conditions of perfect certainty with respect to all inputs. Review broad application to many types of income streams. (2) Successively begin to relax assumptions: treasuries, agencies, corporates, and to be topical, sovereign debt. (3) Brief detour into the world of credit default swaps somewhere along the line. (4) Equity security valuation. (5) Blended securities, implied options. (6) Asset backed securities Repeatable for Credit.

MGMT 697 - STRATEGIC PROCESS MANAGEMENT IN HEALTHCARE
Short Title: STRATEGIC MGMT HEALTHCARE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs.
Course Level: Graduate
Description: This new course will focus on valuing income streams from different types of securities. Below is a quick list of topics which build from very simple to increasingly complex variations on the theme. (1) Review net present value calculation under conditions of perfect certainty with respect to all inputs. Review broad application to many types of income streams. (2) Successively begin to relax assumptions: treasuries, agencies, corporates, and to be topical, sovereign debt. (3) Brief detour into the world of credit default swaps somewhere along the line. (4) Equity security valuation. (5) Blended securities, implied options. (6) Asset backed securities Repeatable for Credit.

MGMT 698 - APPLIED BUSINESS PROCESS OPTIMIZATION
Short Title: BUSINESS PROCESS OPTIMIZATION
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This quantitative class will tie concepts presented in core classes and available data to resolve real business issues. We will use various constrained optimization and simulation techniques to shed light on common operations issues such as the efficient frontier, production mix, optimal scheduling, supply chain and marketing channel coordination, revenue management and even waiting in lines.

MGMT 699 - STRATEGIC CONSIDERATIONS IN CAPITAL INVESTMENT: HEALTH CARE AND BEYOND
Short Title: STRAT CONS IN CAP INV:HLTHCARE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Repeatable for Credit.
MGMT 700 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Management
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 0.25-4
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Independent study or directed reading on an approved project under faculty supervision. Contact MBA program office for application information. No more than 3 credit hours of independent study will count towards graduation unless approved by the Jones School Academic Standard Committee. Department Permission Required. Repeatable for Credit.

MGMT 701 - MANAGEMENT CONSULTING
Short Title: MANAGEMENT CONSULTING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: This course will introduce students to the basics of management consulting, with a focus on what it means to be a successful management consultant. The course will include instruction on managing client relations and projects, determining and controlling the scope of engagements, working effectively in, and leading client teams, and integrating strategic/analytic, organizational/process, and behavioral/anthropological disciplines into lasting impact for clients. Class work will include case studies, role-play, and interaction with real clients.

MGMT 702 - JONES EDGE INTERNATIONAL STUDY
Short Title: JONES EDGE INTERNATIONAL STUDY
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 703 - FIELD STUDY IN AMERICAN BUSINESS I
Short Title: FIELD STUDY - AMERICAN BUS I
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment limited to students in the MBA program.
Course Level: Graduate
Description: The purpose of this course is to expose students to the American business enterprise. This exposure is accomplished through two primary means: (1) readings about the drivers of success in U.S. firms; and (2) a summer internship with a firm in the United States. The readings are meant to complement much of your course work in the first year of the MBA program. A final paper is due at end of summer to summarize experience. Instructor Permission Required.

MGMT 704 - FIELD STUDY IN AMERICAN BUSINESS II
Short Title: FIELD STUDY - AMERICAN BUS II
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment limited to students in the MBA program.
Course Level: Graduate
Description: The purpose of this course is to expose students to the American business enterprise. This exposure is accomplished through two primary means: (1) readings about the drivers of success in U.S. firms; and (2) a fall internship with a firm in the United States. The readings are meant to complement much of your course work in the second year of the MBA program. Report due at end of term summarizing work experience.

MGMT 705 - FIELD STUDY IN AMERICAN BUSINESS III
Short Title: FIELD STUDY - AMERICAN BUS III
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The purpose of this course is to expose students to the American business enterprise. This exposure is accomplished through two primary means: (1) readings about the drivers of success in U.S. firms; and (2) a spring internship with a firm in the United States. The readings are meant to complement much of your course work in the second year of the MBA program. Department Permission Required.

MGMT 706 - CORPORATE TALENT ACQUISITION AND MANAGEMENT
Short Title: CORP TALENT ACQ & MGMT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course takes students through contrasting models of talent identification and sourcing. An emphasis is placed on talent attraction methodologies and theories among Fortune 500 companies, consulting and banking firms and entrepreneurial ventures. Talent sourcing utilizing on line and social networking is explored. Differences between management training programs and experienced hiring recruiting are discussed with global development programs within companies such as ExxonMobil and GE explored and contrasted. Finally, analytics measuring successful sourcing, attraction and retention strategies are reviewed. Repeatable for Credit.

MGMT 707 - MARKETING ANALYTICS FOR MANAGERS AND CONSULTANTS
Short Title: MARKETING ANALYTICS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.
MGMT 708 - PRICING STRATEGIES: OIL & GAS INDUSTRY
Short Title: PRICING STRATEGIES-OIL&GAS IND
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will help students apply the key strategic management frameworks and concepts into the innovation management context in technology industries and help them understand that innovation is an essential and integral part of strategic management. Within this strategic perspective, this course draws upon strategic management, organization theory, product innovation, and technology management for analytical tools to address important challenges faced by managers in technology-based firms. Repeatable for Credit.

MGMT 710 - LEADERSHIP ILE
Short Title: LEADERSHIP ILE
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Intensive Learning Experience
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course emphasizes active discussion of short case studies of people making career decisions. The course also includes readings from psychologists who have researched what it is that gives people satisfaction from their work. Repeatable for Credit.

MGMT 712 - PROCESS MANAGEMENT AND QUALITY IMPROVEMENT
Short Title: PROCESS MGMT & QUALITY IMPROV
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will help students apply the key strategic management frameworks and concepts into the innovation management context in technology industries and help them understand that innovation is an essential and integral part of strategic management. Within this strategic perspective, this course draws upon strategic management, organization theory, product innovation, and technology management for analytical tools to address important challenges faced by managers in technology-based firms. Repeatable for Credit.
MGMT 716 - INNOVATION IN THE DESIGN AND CONSTRUCTION INDUSTRY
Short Title: INNOV.DESIGN & CONST. INDUSTRY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Process innovation in the design and construction industries is far too rare. Even with access to powerful tools such as CADD and the Internet, many opportunities for process improvement are overlooked and problems are repeatedly ignored. Within this course, cross-discipline project teams will use contemporary business tools to evaluate long-standing industry practices and develop ideas for process innovation. At the end of the semester, students will present innovation concepts to members of the Project Delivery Innovation Forum, a group of industry leaders that may select student ideas for further research on real projects. Space is limited and registration does not guarantee a space in this course. The final course roster is formulated on the first day class by the individual instructor. Cross-list: ARCH 616.

MGMT 717 - GLOBAL LEADERSHIP
Short Title: INTERNATIONAL BUSINESS
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 1-3
Restrictions: Enrollment limited to students in the MBA program.
Course Level: Graduate

MGMT 718 - MARKETING BASED PROJECT ANALYSIS
Short Title: MARKETING BASED PROJ ANALYSIS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: This course provides an overview of the role of market research in real estate development. Students will learn the steps used to conduct a market study, the role of economic data in evaluating a market, the use of comparable properties in preparing financial projections for a real estate project and the importance of public/private financing options in making a project feasible. This course would be useful to students interested in pursuing a career in real estate development. Students interested in real estate investments may also benefit from this course. While the principals learned in the course are applicable to all real estate development, the examples used in the course will focus on hotel development. Repeatable for Credit.

MGMT 719 - SUPPLY CHAIN MANAGEMENT: AN INTEGRATED APPROACH
Short Title: SUPPLY CHAIN: INTEGRATED APP
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Developing sourcing strategies for materials or services that are based on a fact based approach that is driven by business needs. Topics explored include Operations to Commercial Translation, Stakeholder Engagement, Strategic Sourcing, Category Management, e-Commerce, Bid Formulation, Bid Evaluation, Actionable Market Intelligence, Cost Modeling, Total Cost of Ownership, Regulatory Impact, Sustainability, Ethics and communication.

MGMT 720 - STRATEGY AND MANAGING INTERNATIONAL STRATEGIC ALLIANCES
Short Title: STR & MNG INTL STRAT ALLIANCES
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course seeks to provide students with the skills, knowledge, and sensitivity required to structure and manage strategic alliances/joint ventures within a global environment. This course will discuss the following topics: motivations for joining strategic alliances/joint ventures, partner selection, structuring strategic alliances/joint ventures to meet firms' strategic objectives, control and management of alliances/joint ventures, evaluation of performance of alliances/joint ventures, and exiting alliances/joint ventures. Case studies will also be used to develop students' capacity to identify issues, to reason carefully through various options and improve students' ability to manage the organizational process by which alliances/joint ventures get formed and executed. We will also read and discuss recent articles from the business press and academic journals.

MGMT 721 - BUSINESS LAW
Short Title: BUSINESS LAW
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course examines the broad subject of law as it relates to business and is designed to help the student develop "legal astuteness." That is, the ability to communicate effectively with counsel and to work together with counsel to solve complex problems and/or to protect and leverage the firm's resources. It is designed to be a guide to understanding how the law impacts daily management decisions and business strategies, to spotting legal issues before they become legal problems, and to using laws and legal tools to marshal resources and manage risk. Repeatable for Credit.
MGMT 722 - SUPPLY CHAIN MANAGEMENT: MAINTAINING AND OPTIMIZING VALUE
Short Title: SUPPLY CHAIN: OPTIMIZING VALUE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Executing sourcing strategies for materials or services that sustain value, drives performance, encourages innovation and ethical behaviors. Topics explored include Operations to Commercial Translation, Contract Negotiation, Contracting, Performance Management, Risk Assessment, Risk Mitigation, Supplier Relationships, Stakeholder Engagement and Communication.

MGMT 723 - PROFESSIONAL SERVICE FIRMS
Short Title: PROFESSIONAL SERVICE FIRMS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs.
Course Level: Graduate
Description: Professional service firms – consulting, money management, private equity, venture capital, advertising, medical service, and law firms – are confronted with significant challenges as they experience increased competition from boutique firms as well as global and international competitors. Clients are more demanding, and there are significant, strategic and organizational challenges which require different approaches from traditional approaches. One observer noted that this competition has moved from gentlemanly competition to a “blood sport”. Interestingly, the service sector in the US furnishes 68 percent of the GDP and this is growing in emerging economies; for example, the service sector in India contributed 56 percent to the GDP during 2008-09. Additionally, many of these firms’ leaders are overwhelmed by the expectation of a dual role where they are not only managers but also high profile producers. As such, it is important for a course to examine the strategy and leadership challenges these firms face and likewise to expose students to the challenges they will face as professionals in one of these organizations, and ultimately as leaders in such professional service firms. The course will also include visits from managers associated with professional service firms. Repeatable for Credit.

MGMT 724 - SOCIAL ENTREPRENEURSHIP
Short Title: SOCIAL ENTREPRENEURSHIP
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Millennials are no longer satisfied with pursuing a career that allows them just to make money. They are driven as well to make a difference in the lives of others, and live a richer life themselves. This practical course will study social entrepreneurship and its ability to create social change by applying business principles and earned income strategies; it will explore the elements needed to start and grow a social enterprise, using as a real-life example the organization founded and led by the lecturer; and it will allow students to explore areas they feel passionate about and utilize the knowledge gained through their MBA to draft a business plan for a plausible social enterprise. Guest speakers for this course include nationally-renowned major philanthropists, who will share their view of what it takes to be a successful social entrepreneur. Repeatable for Credit.

MGMT 725 - INTELLECTUAL PROPERTY STRATEGY FOR ENTREPRENEURS: LEGAL AND STRATEGIC ASPECTS
Short Title: IP FOR ENTREPRENEURS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course examines: theory and logic of alliances in value creation, alliance evolution in various industries, the spectrum of alliance types from a low level of interdependence to a high. The course is discussion-based, focusing on reading material, case studies and problem sets. Repeatable for Credit.
MGMT 726 - FIXED INCOME PRACTICUM I - RICE FI FUND
Short Title: FIXED INCOME PRACTICUM I
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MGMT 648 and MGMT 645
Corequisite: MGMT 651
Description: In this course, students will gain hands-on experience in the challenges and excitement of managing a simulated Fixed Income portfolio (U.S. Treasuries, corporate bonds and mortgages). FIP Sim 'student-managers' will actively learn and utilize the resources of the El Paso Finance Center to set up, research, and manage/trade their simulated portfolios. Each portfolio will consist of securities selected by the 'student manager' from an index in conformance with pre-established investment guidelines - analogous to the real investment management world. Monthly portfolio performance will be calculated and benchmarked against the index. Classroom time will be used for a combination of lectures, speakers, interactive Finance Center activities, and professor/student consultation sessions on investment strategy. This course work will leverage off of material learned in MGMT 651, and to receive credit, you must simultaneously take MGMT 651. Instructor Permission Required. Repeatable for Credit.

MGMT 727 - FIXED INCOME PRACTICUM II - RICE FI FUND
Short Title: FIXED INCOME - PRACTICUM II
Department: Management
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate

MGMT 728 - REAL ESTATE DEVELOPMENT
Short Title: REAL ESTATE DEVELOPMENT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The Real Estate Development course follows the development process from an entrepreneurial and "deal making" point-of-view. Course topics include market analysis, site selection, project budgeting/financial analysis, land acquisition, marketing and leasing, joint ventures, financing, design and construction management, and dispositions.

MGMT 729 - MANAGEMENT OF INNOVATION AND TECHNOLOGY
Short Title: MGMT OF INNOVATION AND TECH
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Companies that successfully select, adopt, and exploit IT will sooner or later open up large competitive gaps that are difficult to close. Business leaders, executives, strategists, innovators and line managers are the principal determinants of a company's success with IT. But, as we shall see in this course, they don't need to become technologists in order to get involved; they just need to master a set of concepts, frameworks, and models about IT's impact. There are no technical prerequisites for this course. (You will complete an online course that will give you a sufficient introduction to the technology.) In the classroom, our focus will be on cases in which business leaders have tried to use IT to create enhance organizational development and support competitive strategy. Some succeeded and others failed. From our analysis of their experiences and ideas and principles I will present, we will develop some general guidelines for businesses seeking to exploit IT. Because we have only a short time to consider a number of complex matters, I will concentrate on industries in which IT has great potential to promote outcomes that are of interest to general managers.
MGMT 730 - LEGAL ASPECTS OF ENTREPRENEURSHIP  
**Short Title:** LEGAL ASPECTS OF ENT.  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the MBA, MPA, or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course focuses on the legal dimensions of entrepreneurship and is designed to help students develop the managerial capability to work effectively with legal counsel to solve complex problems and to protect and leverage firm resources. Like information technology, the legal dimensions of business should not be treated as an after-thought or add-on to the business strategy development process. Corporate leaders with an understanding of American law have a unique capacity to protect and enhance shareholder wealth. Conversely, managers who lack the ability to integrate law into the development of strategy can place the firm at a competitive disadvantage and imperil its economic viability. The overarching purpose of Legal Aspects of Entrepreneurship is to prepare students to meet the legal and regulatory challenges and opportunities they can expect to encounter as entrepreneurs, venture capitalists, and managers of private and public businesses. The course provides a conceptual framework for understanding both the societal context within which businesses are organized and operate, as well as the various legal tools available to managers engaged in evaluating and pursuing opportunities. Legal Aspects of Entrepreneurship will offer strategies and tactics for working with counsel to use the law as a positive force to increase realizable value while managing the attendant risks and keeping the legal costs under control. The objective is not to teach business students how to think like lawyers, but rather to teach students how to become more legally astute so they can handle with confidence the legal aspects of entrepreneurship and management. This includes developing legal literacy and learning what to look for when selecting an attorney and knowing when to call one. Repeatable for Credit.

MGMT 731 - REPUTATION AND CRISIS MANAGEMENT  
**Short Title:** REPUTATION MANAGEMENT  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Companies with strong reputations gain competitive advantage. However, reputation is not a tangible attribute of a firm, but rather an intangible asset held in the minds of the firm’s constituents. The goal of this course is to provide students with analytical tools to assess how an organization can build, damage, and repair its reputation.

MGMT 732 - ANTITRUST FOR BUSINESS MANAGERS  
**Short Title:** ANTITRUST - BUSINESS MANAGERS  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the MBA or PMBA programs.  
**Course Level:** Graduate  
**Description:** Repeatable for Credit.

MGMT 733 - STRATEGIES FOR GROWTH  
**Short Title:** STRATEGIES FOR GROWTH  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** (MGMW 570 or MGMP 570 or MGMT 570) and (MGMW 571 or MGMP 571 or MGMT 571)  
**Description:** This course focuses on examining various strategies that companies can adopt to achieve sustainable and profitable growth. The course will use a variety of real-life cases of companies and supplement them with relevant readings, lectures, or other exercises, as necessary.

MGMT 734 - TECHNOLOGY ENTREPRENEURSHIP  
**Short Title:** TECH ENTREPRENEURSHIP  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment limited to students in the EMBA, MBA or PMBA programs.  
**Course Level:** Graduate  
**Description:** The goal of this course is to provide the student with exposure to early stage technology entrepreneurship. Evaluation of opportunities, business model, capitalization, and early operations are covered. The focus is on the parts of entrepreneurship that are unique to dealing with the commercialization of research discoveries. A significant amount of time will be spent on university to business transitions and in thinking about how to take research discoveries and create a business. Repeatable for Credit.

MGMT 735 - MARKETING LAB  
**Short Title:** MARKETING LAB  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 1.5-3  
**Restrictions:** Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** (MGMW 580 or MGMP 580 or MGMW 580) and MGMT 684  
**Description:** Provides students with an opportunity to build their marketing and management skills by applying their coursework to a hands-on, real-world project. Students who maximize their experiential/ applied learning experiences in the program generally help maximize their career opportunities and “hit the ground running” in their new positions after graduation. Instructor Permission Required.

MGMT 736 - STRATEGIC AND MORAL LEADERSHIP  
**Short Title:** STRATEGIC & MORAL LEADERSHIP  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the MBA program.  
**Course Level:** Graduate  
**Description:** This elective course examines strategies of effective leaders, with emphasis on the roles of strategy and ethics in leadership effectiveness. The course emphasizes group discussion of cases, examples, and readings. Repeatable for Credit.
MGMT 737 - INVESTOR RELATIONS
Short Title: INVESTOR RELATIONS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Students learn theory and practice of investor relations, with emphasis on the role of investor relations/financial communications. Subjects covered include: history of the stock market, formation of the SEC, evolution of SEC regulations, dynamics of the equity markets, flow of investor information, planning and implementing an investor relations program, fitting investor relations into a corporation's communications program. Students will be mentored by local investor relations practitioners who will serve as real world guides for course assignments. Students will learn specifics about filing with the SEC, the creation of annual reports, road shows, stockholder meetings, preparing financials, and more. Investor relations managers, analysts, and CEOs will serve as guest lecturers to talk about their challenges in today's workplace.

MGMT 738 - CUSTOMER FOCUS IN HEALTH CARE AND SERVICE INDUSTRIES: A STRATEGIC APPROACH
Short Title: CUSTOMER FOCUS IN HEALTH CARE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA program.
Course Level: Graduate
Prerequisite(s): MGMT 683

MGMT 739 - CAPITAL FORMATION IN THE ENERGY INDUSTRY
Short Title: CAPITAL FORMATION IN ENERGY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A capstone course for second year MBAs. Students form a private startup exploration and production company that grows to become a mid-cap ($10 billion) and then suffers a severe contraction. Students will learn the various forms of capital available depending on the size of the company and state of the capital market and the commodity markets.

MGMT 740 - MURPHREE VENTURES INTERNSHIP
Short Title: MURPHREE VENTURES INTERNSHIP
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA program.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 741 - MANAGING GROWTH
Short Title: MANAGING GROWTH
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs.
Course Level: Graduate
Description: Companies are either thought of as small start-ups or large, mature businesses. The small start-up is considered to be the domain of the entrepreneur, where by force of personality, spark of creativity, or bold opportunism, a business is formed ex nihilo. On the other extreme, the large business is considered to be the domain of the manager, where by force of scale and scope, imposition of process, and careful analysis, an empire is sustained and expanded. In summary, the focus of the course will be how to create wealth by buying a small business, putting systems and processes in place to create a foundation for future growth, driving growth both internally and externally, and, finally, selling the business. Students will learn to apply those skills to small businesses with growth potential.

MGMT 742 - INTERNATIONAL PRIVATE EQUITY REAL ESTATE
Short Title: INTL PRIVATE EQTY REAL ESTATE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: - Repeatable for Credit.

MGMT 743 - MANAGING INNOVATION IN ENERGY TECHNOLOGIES
Short Title: INNOVATION IN ENERGY TECH
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Innovation is critical to the survival of the energy industry, both for traditional carbon-based energy and for renewable and "green" energy. Management of innovation requires a special set of skills beyond those of typical management. We will discuss the issues faced by energy managers in addressing innovation, and look at cases where these issues played a central role.
MGMT 744 - SERVICES OPERATIONS
Short Title: SERVICES OPERATIONS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MGMT 574 or MGMT 574 or MGMT 574
Description: This course examines how energy companies construct portfolios of international assets. The first half of the course focuses on the lifecycle of international energy projects, from the point at which a company decides it wishes to acquire an international project to the point at which the company divests that interest. These initial classes will discuss the business development processes companies employ to identify, analyze and acquire overseas assets; the typical commercial structures and contracts used to acquire rights and obligations in different types of energy projects; how companies build and manage relationships with host governments, including cultural difference, negotiation and corruption; issues related to joint ventures and joint operations with other companies; threats to international project cash flow such as renegotiation, expropriation and force majeure; and how companies structure exits and divestments from international energy projects. The last half of the course examines in detail a few specific projects that Professor Gaille has been involved in — including oil and gas exploration in Africa and a 2 billion cubic feet per day natural gas pipeline project in the Middle East. The course concludes with students being divided into teams or “companies” and then engaging in a dynamic bid round and petroleum exploration exercise, whereby students compete with one another to acquire acreage and then create (or destroy) net present value.

MGMT 745 - INTERNATIONAL ENERGY DEVELOPMENT
Short Title: INTL ENERGY DEVELOPMENT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate

MGMT 746 - REAL PROPERTY
Short Title: REAL PROPERTY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Survey course providing a short but intensive overview of real estate and the real estate industry.

MGMT 747 - REGULATION OF BUSINESS AND FINANCIAL MARKETS
Short Title: REGULATION OF BUS&FIN MARKETS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course examines the broad subject of government regulation of business and financial markets and is designed to help the student develop what the authors of the text term “legal astuteness.” That is, the ability to exercise informed judgment based on context-specific knowledge of the law and the regulatory environment. To achieve this, we will apply the methodology of neoclassical economic analysis to understand the role and function of government and governmental decision-making; explore the intersection between economics and the law; and learn to spot legal issues before they become grounds for termination, lawsuits, or criminal indictments. Emphasis is placed on high impact regulatory programs, such as antitrust, security regulation, civil rights, and environmental laws. Repeatable for Credit.

MGMT 748 - INTERNATIONAL BUSINESS BRIEFING - AFRICA
Short Title: INTL BUS BRIEFING - AFRICA
Department: Management
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: This course provides a unique opportunity for students to travel to Africa during fall break and 1) apply their business school knowledge, 2) learn about business in developing countries, 3) learn about entrepreneurship 4) learn about social enterprise, and 5) help the poor. Students taking this course will also have a once-in-a-lifetime trip to Africa that tourism can never duplicate. The travel to Africa includes extensive on the ground field work and also includes visits with leaders in business, government, non-profits, and various social enterprises. All students will be on project teams and will participate in the development of business plans for commercializing new technologies in developing countries and preparing a written and oral public presentation to some faculty, students, potential donors and investors, and others. Instructor Permission Required. Repeatable for Credit.
MGMT 749 - TOPICS IN FAMILY BUSINESS MANAGEMENT
Short Title: TOPICS IN FAMILY BUSINESS MGMT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Family businesses present a more complicated decision-making environment due to the overlap of three distinct systems: family, ownership and control. This course is a case-based course that surveys key topic areas for owners and managers of family-owned businesses: overlap of family system with the business, governing the family business, conflicts in family relationships, entering the family business, succession, estate planning, special valuation issues and ownership transfer. All of the above will be covered in case analyses and supplemented with readings in the text (Gersick, et.al.) and related articles. Repeatable for Credit.

MGMT 750 - STRATEGIC CONSIDERATIONS IN HEALTH INFORMATICS
Short Title: HEALTH INFORMATICS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate

MGMT 751 - ECONOMICS OF HEALTH CARE SECTORS
Short Title: ECON OF HEALTH CARE SECTORS
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate

MGMT 752 - OPERATIONS LAB: ENERGY
Short Title: OPERATIONS LAB: ENERGY
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Laboratory
Credit Hours: 0.75-3
Restrictions: Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate

MGMT 753 - OPERATIONS LAB: HEALTH CARE
Short Title: OPERATIONS LAB: HEALTH CARE
Department: Management
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 0.75-3
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate

MGMT 754 - REAL ESTATE: ULI LAB
Short Title: REAL ESTATE: ULI LAB
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate

MGMT 755 - HOSPITAL MANAGEMENT - THE BUILDING BLOCKS
Short Title: HOSPITAL MGMT BUILDING BLOCKS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 756 - MANAGEMENT OF HEALTHCARE ORGANIZATIONS
Short Title: MGMT OF HEALTHCARE ORGS.
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 757 - REAL ESTATE LAB: DEVELOP, DESIGN AND CONSTRUCTION
Short Title: RE LAB: DEVELOP DESIGN CONSTR.
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Cross-list: ARCH 691. Repeatable for Credit.

MGMT 758 - ECONOMIC FORECASTING
Short Title: ECONOMIC FORECASTING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Covers forecasting techniques and time series analysis.
MGMT 759 - DIGITAL BUSINESS EXCELLENCE
Short Title: DIGITAL BUSINESS EXCELLENCE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Organizational dysfunctions remain the norm despite decades of management attention. Year after year, management gurus take passionate positions that are mutually exclusive, contrast “IT doesn’t matter” with “IT savvy is critical.” Clever executives see opportunity amid this controversy. This course steps directly into the controversy. It is designed to equip future business leaders with knowledge needed to position their firms among the 30% that do succeed. This is a business class that will focus on the use of information technology to achieve business goals. While specific technologies are discussed, as are hot technology trends, the objective is always to clarify the underlying business principles that business and IT executives require for success. Repeatable for Credit.

MGMT 760 - E-LAB: VENTURE CAPITAL
Short Title: E-LAB: VENTURE CAPITAL
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Laboratory
Credit Hours: 0.75-3
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 761 - E-LAB: ENTERPRISE ACQUISITION
Short Title: E-LAB: ENTERPRISE ACQUISITION
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture/Laboratory
Credit Hours: 0.75-3
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 762 - E-LAB: NEW ENTERPRISE
Short Title: E-LAB: NEW ENTERPRISE
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Laboratory
Credit Hours: 0.75-3
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 763 - E-LAB: TECHNOLOGY
Short Title: E-LAB: TECHNOLOGY
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Laboratory
Credit Hours: 0.75-3
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 764 - ENTREPRENEURSHIP LAB: ENERGY
Short Title: ENERGY E-LAB
Department: Management
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 765 - IGNITE ENTREPRENEURSHIP
Short Title: IGNITE ILE
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Intensive Learning Experience
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate

MGMT 766 - E-LAB: HEALTH CARE
Short Title: E-LAB: HEALTH CARE
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 0.75-3
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate

MGMT 767 - QUANTITATIVE FINANCE LAB
Short Title: QUANTITATIVE FINANCE LAB
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MGMT 642 and MGMT 648
Description: Class focuses on fixed income, securitization, pricing and hedging of derivatives, banking regulation, and reserve requirements pre- and post-crisis. We consider issues of risk from perspectives across the capital structure, rigorously considering financial risk management and capital markets. The format of the class combines theory, case study and quantitative applications. Repeatable for Credit.
MGMT 768 - LEGAL ISSUES IN MERGERS & ACQUISITIONS
Short Title: LEGAL ISSUES IN M&A
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: This course will examine the deal from a legal perspective. The course will focus on what executives need to know to deal effectively with key legal issues in a transactional context and in general takeover defense. We will discuss contractual and strategic issues in structuring, negotiating, and protecting a deal. We will study deals between strategic partners as well as deals involving non-strategic investors such as private equity and will address discrete issues arising in each scenario. We will also explore the role of the board of directors in negotiated and hostile transactions and in addressing issues of shareholder activism. In that regard, we will discuss the underlying tension between the duties and authority of the board pursuant to state corporate law, on one hand, and the individual interests of shareholders, on the other.

MGMT 769 - WASTE MANAGEMENT INTERNSHIP
Short Title: WASTE MANAGEMENT INTERNSHIP
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Waste Management (WM) has established a formal internship program with the Jones Graduate School of Management (JGSM) at Rice University in order to give students more exposure to the emerging field of sustainable solutions. Students will gain valuable experience in the launch of new enterprises within WM and associated deal analysis. Instructor Permission Required. Repeatable for Credit.

MGMT 770 - CONSULTATIVE SELLING
Short Title: CONSULTATIVE SELLING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course introduces students to the communications skills and behaviors required for success in the field of consultative selling, including effective questioning, active listening, client learning style and personality assessment, creating and delivering persuasive presentations, and proposal writing.

MGMT 771 - DIGITAL MARKETING
Short Title: DIGITAL MARKETING
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Course provides an introduction to digital marketing and examines ways it should be implemented. In addition to learning fundamental constructs and principles, students will focus on tools and skills needed for setting goals, implementing campaigns, and measuring success. Guest speakers and in-class exercises are used to provide insights and relevancy to this swiftly expanding area of marketing. Repeatable for Credit.

MGMT 772 - RICE ALLIANCE INTERNSHIP
Short Title: RICE ALLIANCE INTERNSHIP
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 773 - SURGE INTERNSHIP
Short Title: SURGE INTERNSHIP
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA program.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 774 - LEADERSHIP COACHING
Short Title: LEADERSHIP COACHING
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The best leaders understand the importance of developing the next generation - ensuring they have prepared successors and effective teams. This course will examine models and frameworks for coaching and development and is intended for those interested in practicing coaching as a manager or peer. Department Permission Required.
MGMT 775 - SUPPLY CHAIN ILE
Short Title: SUPPLY CHAIN ILE
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Intensive Learning Experience
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA program.
Course Level: Graduate
Description: The Supply Chain for most companies is a very vital ingredient in their success, maybe even survival. Whether you are a company such as Apple, where your core competency is the design/styling of products, or your company designs, manufactures and distributes all of your products, the supply chain’s has to perform at a high level. In the face of increasing customer expectations and global competitions, companies have to become more efficient in controlling the flow of materials throughout the supply chain. This ILE is designed to provide an introduction to the major components important in the Supply Chain. The course will be a combination of lectures and some thought-provoking activities and discussions of current events from the Supply Chain affecting companies will be part of the class, and participants are encouraged to bring in relevant examples from their previous work experience to share. Repeatable for Credit.

MGMT 776 - INTRODUCTION TO REAL ESTATE INDUSTRY
Short Title: INTRO TO REAL ESTATE INDUSTRY
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Intensive Learning Experience
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: An introductory survey course intended to provide a foundational understanding of the real estate industry. This course aims to be useful to students interested in pursuing a career in the real estate industry who have no or limited experience in real estate. This course is open to MBA students in each program. Outside graduate students can enroll with instructor permission provided space is available.

MGMT 777 - INVESTMENT BANKING AND MARKETS ILE
Short Title: INVESTMENT BANKING & MARKETS
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Intensive Learning Experience
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 778 - CUSTOMER DRIVEN STRATEGY: METRICS AND IMPLEMENTATION
Short Title: CUSTOMER DRIVEN STRAT: METRICS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 779 - BUSINESS AND URBAN ANALYTICS
Short Title: BUSINESS & URBAN ANALYTICS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Course Level: Graduate
Description: The project based class offers the unique opportunity for students from distinct fields of business and engineering to solve a real world data driven problem in a collaborative way. The data and the problem statement will come from the Rice University’s Administrative Center for Sustainability and Energy Management (ACSEM) at the start of the semester. Instructor Permission Required. Cross-list: ENGI 779.

MGMT 781 - TEAM DYNAMICS I
Short Title: TEAM DYNAMICS I
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 0.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: During the Executive MBA program the students work in teams frequently to complete group assignments. This course provides them with concepts and methods to promote the learning of team members as well as the successful completion of assignments. Many of these concepts and methods can be used in work with team in other contexts.

MGMT 782 - TEAM DYNAMICS II
Short Title: TEAM DYNAMICS II
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Laboratory
Credit Hours: 0.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
MGMT 783 - CORPORATE FINANCIAL POLICY
Short Title: CORPORATE FINANCIAL POLICY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: This course examines the investment decisions faced by corporate managers. It begins by developing a general framework for corporate valuation, and then uses this framework to review and expand on the capital budgeting issues introduced in the core finance course. The course will review the foundations of option valuation, and then apply those tools to value real investments. It will also cover new material on estimating the cost of capital, including the effects of leverage and taxes. The course format is a mixture of theory, empirical evidence, and practical application.

MGMT 786 - INTERNATIONAL BUSINESS BRIEFING - CHINA
Short Title: JONES EDGE - ASIA
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An overseas course trip involving intensive meetings with company and commercial bank executives, directors in consulting and investment banking firms, executives in public sector and health care enterprises, and government officials and academics. The objective is to enhance students' appreciation of the opportunities and obstacles to doing business in different parts of the world and to heighten their interest in engaging in global ventures. Department Permission Required. Repeatable for Credit.

MGMT 789 - GLOBAL FIELD EXPERIENCE
Short Title: GLOBAL FIELD EXPERIENCE
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: This unique experiential learning opportunity requires students to apply what was learned in the first year of the program through consulting projects on the ground in a designated country. The course fosters a global mindset and further develops the ability to tackle business challenges in dynamic, divers and complex environments. Department Permission Required. Repeatable for Credit.

MGMT 790 - LEADERSHIP DEVELOPMENT
Short Title: LEADERSHIP DEVELOPMENT
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Laboratory
Credit Hours: 0.5
Restrictions: Enrollment limited to students in the EMBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate

MGMT 792 - INVESTMENTS / PORTFOLIO MANAGEMENT
Short Title: INVESTMENTS / PORTFOLIO MGMT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: This course examines the determinants and behavior of asset prices and provides a framework for portfolio management. We rely on both financial theory and analytical tools. Topics covered will include asset pricing models, market efficiency, asset allocation, portfolio management, and performance evaluation. The course is designed to provide a conceptual understanding of investment returns and portfolio management processes coupled with a strong quantitative focus that develops analytical tools and spreadsheet modeling techniques.

MGMT 796 - LEADERSHIP DEVELOPMENT II
Short Title: LEADERSHIP DEVELOPMENT II
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 0.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate

MGMT 797 - EDGE INTERSESSION ABROAD - SOUTH AMERICA
Short Title: JONES EDGE - SOUTH AMERICA
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 798 - PSYCHOLOGICAL FOUNDATIONS OF PROFESSIONAL LIVES
Short Title: PSYCH FOUNDATIONS OF PROF LIFE
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Course draws from psychology and management research, exploring complexity of professional lives and identity dynamics, underlying career decisions, compromises, and regrets. Through exercises, cases, and discussions, students develop an understanding of the type of professional path they want and why, and how to get it and overcome setbacks and successes.
MGMT 799 - HEALTHCARE INNOVATION AND ENTREPRENEURSHIP

Short Title: HEALTHCARE INNOV & ENTREP
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is designed for healthcare entrepreneurs who want to build innovative medical technologies. Students work in interdisciplinary teams comprised of engineering, business, and medical students. Key concepts include: how to validate and scope clinical needs, ideate solutions, draft a business model, and determine regulatory and reimbursement strategies. Instructor Permission Required.

MGMT 800 - INDEPENDENT STUDY

Short Title: INDEPENDENT STUDY
Department: Management
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1.5-3
Restrictions: Enrollment limited to students in the EMBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 801 - FINANCIAL ACCOUNTING

Short Title: FINANCIAL ACCOUNTING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the EMBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the preparation, analysis, and use of corporate financial reports. Covers the basic techniques of financial reporting and analysis from the perspective of managers as well as external users of information such as investors. Repeatable for Credit.

MGMT 802 - MANAGERIAL ACCOUNTING

Short Title: MANAGERIAL ACCOUNTING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Provides general managers with an understanding of the design and function of a firm's management accounting system to enable them to become active consumers of accounting information. The course describes how accounting information can assist managers in making decisions about products, services, and customers; improving existing processes; and aligning organizational activities toward long-term strategic objectives.

MGMT 806 - EXECUTIVE 2ND YEAR CAPSTONE

Short Title: EXEC 2ND YEAR CAPSTONE
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: The second-year capstone is an applied management course in the program's core curriculum, where student teams learn how to work through an end-to-end strategic assessment and planning effort on a current real-life strategic challenge faced by a Houston-based, socially-oriented community organization. It provides students the opportunity to apply their multi-functional (strategy, finance, marketing, organizational behavior, etc.) knowledge from the program and their own professional experience, as well as provides background on management of non-profit organizations. Repeatable for Credit.

MGMT 807 - LEADERSHIP

Short Title: LEADERSHIP
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: This course covers key elements of sound leadership theory and practice in various organizational settings. Emphasis is on readings concerning leadership skill development and cases concerning effective versus ineffective leadership practices. Applications range from team settings to business units to executive suites. Course emphasizes strategic, moral, and organizational dimensions of leadership.

MGMT 809 - ORGANIZATIONAL BEHAVIOR

Short Title: ORGANIZATIONAL BEHAVIOR
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: The purpose of this course is to help students become better decision makers, motivators, and leaders. Topics include perception, attribution, decision making, motivation, influence, leadership, culture, and innovation. Special attention is paid to the importance of managing based on evidence (evidence-based management).

MGMT 813 - LEADING FOR CREATIVITY AND INNOVATION

Short Title: LEADING FOR CREATIVITY & INNOV
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: Study of the nature of creativity, creative thinking skills and ways to encourage, promote, and effectively manage creativity and innovation in complex organizations.
MGMT 815 - BARGAINING
Short Title: BARGAINING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 817 - DECISION STRATEGIES
Short Title: DECISION STRATEGIES
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: Decision analysis is the discipline that helps people choose wisely under conditions of uncertainty. Decision analysis provides the only logical, consistent way to incorporate judgments about risks and uncertainties into an analysis.

MGMT 820 - COMPLEXITIES OF PEOPLE AND ORGANIZATIONS
Short Title: COMPLEXITIES OF PEOPLE & ORGS
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: A seminar focused on contemporary issues in organizational behavior.

MGMT 821 - OPTIMIZING THE WORKFORCE OF THE FUTURE
Short Title: OPTIMIZING THE WORKFORCE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: Students consider optimal ways to plan for, encourage, and manage diversity in organizations. We explore the data and analyze the business case for diversity and evaluate strategies to recruit and retain diverse talent. This active-learning course relies on the latest empirical research and provides practical skills for managing tomorrow’s workforce.

MGMT 830 - STRATEGIC IT
Short Title: STRATEGIC IT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: Today, businesses spend several trillion dollars annually on information technology (IT). To gain the greatest benefit from this investment, managers need to understand the interaction of this technology with ways of working. Our focus will be on cases in which business leaders have tried to use IT to enhance organizational development and support competitive strategy. From our analysis of their experiences, we will develop some management guidelines for businesses seeking to exploit IT.

MGMT 833 - TECHNOLOGY, KNOWLEDGE AND BUSINESS
Short Title: TECH, KNOWLEDGE & BUSINESS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: Within companies, technology supports new ways to coordinate undertakings and share best practices across organizational boundaries. In this course, we will first consider the development of knowledge management and how it relates to improved performance. We will then consider how the pervasive use of digital technology is changing ideas about privacy, security, authority, social relations and knowledge itself.

MGMT 840 - ECONOMICS FOR BUSINESS
Short Title: ECONOMICS FOR BUSINESS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate

MGMT 841 - ECONOMIC ENVIRONMENT OF BUSINESS
Short Title: ECONOMIC ENVIR OF BUSINESS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: Examination of the global economic environment that serves as a backdrop for business decision making, with emphasis on the key macroeconomic policy goals and tools and how they affect exchange rates, interest rates, business cycles, and long-term economic growth.
MGMT 843 - CORPORATE FINANCIAL MANAGEMENT
Short Title: CORPORATE FINANCIAL MANAGEMENT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the EMBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course emphasizes concepts and skills related to valuation tasks in a corporate setting. Topics include financial market structure and efficiency, time value of money, net present value, internal rate of return, capital budgeting, risk and return, capital asset pricing model, cost of capital, capital structure, payout policy, and real options analysis.

MGMT 845 - CORPORATE FINANCIAL STRATEGY FOR EXECUTIVES
Short Title: CORP FIN STRATEGY FOR EXECS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is a case study course based on current corporate finance transactions and topics. The intent is to expose Executive MBA candidates to some of the practical challenges and opportunities within the primary financial decision governed by Corporate Financial policies (Capital Structure, Financial Risk Management, Liquidity, Funding/Financing, and Payout Policy).

MGMT 848 - APPLIED FINANCE
Short Title: APPLIED FINANCE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course demonstrates how organizations, especially corporations, set up processes for identifying and managing public policy issues. Then, to help achieve their public policy objectives, it discusses how corporations use best practices in engaging with stakeholders—governments, media, communities and non-profit NGOs. The course covers both good and bad practices in communications with these stakeholders, including in crisis situations. Finally, it illustrates how corporations can use social responsibility activities to enhance their reputation and help achieve success in the public policy arena.

MGMT 861 - BUSINESS-GOVERNMENT RELATIONS
Short Title: BUSINESS-GOVERNMENT RELATIONS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: The course exposes students to the governmental institutions that surround the business environment. Strategies for influencing and responding to governmental factors are explored as well as other issues related to business-government relations.

MGMT 865 - GLOBALIZATION OF BUSINESS
Short Title: GLOBALIZATION OF BUSINESS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: This course examines the increasing importance of trade and foreign direct investment and the global political-economy to U.S. business. We first study the historical roots of globalization and move forward to consider the impact on business of the global trade rules promulgated by the World Trade Organization. We also consider U.S. policies towards trade and foreign direct investment.

MGMT 866 - PUBLIC POLICY MANAGEMENT AND ADVOCACY
Short Title: PUBLIC POLICY MGMT & ADVOCACY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: This course demonstrates how organizations, especially corporations, set up processes for identifying and managing public policy issues. Then, to help achieve their public policy objectives, it discusses how corporations use best practices in engaging with stakeholders—governments, media, communities and non-profit NGOs. The course covers both good and bad practices in communications with these stakeholders, including in crisis situations. Finally, it illustrates how corporations can use social responsibility activities to enhance their reputation and help achieve success in the public policy arena.

MGMT 870 - COMPETITIVE STRATEGY
Short Title: STRATEGY THEORY & ACTION
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: Systematic examination of models and techniques used to analyze a competitive situation within an industry from a strategic perspective. Examines the role of key players in competitive situations and the fundamentals of analytical and fact oriented strategic reasoning. Examples of applied competitive and industry analysis are emphasized.
MGMT 872 - STRATEGY THEORY AND ACTION II
Short Title: STRATEGY THEORY & ACTION II
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate

MGMT 874 - OPERATIONS MANAGEMENT
Short Title: OPERATIONS MANAGEMENT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the design and improvement of operations, including manufacturing technologies, quality management and control, and organizational issues in operations. Understand, manage, and improve process/operations. Lean management and six sigma concepts.

MGMT 880 - STRATEGIC MARKETING
Short Title: STRATEGIC MARKETING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the EMBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the key concepts and perspectives underlying the function of marketing in a business enterprise. Emphasis is placed on strategic marketing issues and the formulation of marketing strategies. Includes value proposition; customer & market analysis; segmentation & targeting, product strategy; branding; pricing strategy; marketing channels; marketing communication and selling. Lectures and extensive analysis of marketing management case studies.

MGMT 881 - CONSULTATIVE SELLING
Short Title: CONSULTATIVE SELLING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: This course introduces students to the knowledge, skills, and behaviors required for success in the field of consultative selling. Topics include effective questioning, active listening, client learning style and personality assessment, principles of influence, effective sales call planning and execution, and delivering persuasive presentations.

MGMT 884 - BRAND MANAGEMENT
Short Title: BRAND MANAGEMENT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: Application of various dimensions of marketing strategy and management to the role of the product manager responsible for all marketing activities of a given product.

MGMT 885 - MARKETING CHANNELS
Short Title: MARKETING CHANNELS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: Repeatable for Credit.

MGMT 886 - DECISION MODELS
Short Title: DECISION MODELS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment limited to students in the EMBA program.
Course Level: Graduate
Description: Successful management requires the ability to recognize a decision situation, understand its essential features, and make a choice. However, many of these situations - particularly those involving uncertainty and/or complex interactions - may be too difficult to grasp intuitively, and the stakes may be too high to learn by experience. This course introduces spreadsheet modeling, simulation, decision analysis and optimization to represent and analyze such complex problems. The skills learned in this course are applicable in almost all aspects of business and should be helpful in future courses. The course is divided into two parts. In the first part, we discuss the use of decision trees for structuring decision problems under uncertainty. In the second part of the course, we discuss Monte Carlo simulation, a technique for simulating complex, uncertain systems. Throughout the course, we will use Microsoft Excel as a modeling environment, using add-in programs as necessary. Familiarity with Excel is an important prerequisite for this course.

MGMT 892 - CUSTOMER RELATIONSHIP MANAGEMENT STRATEGY
Short Title: CUSTOMER REL MGMT STRATEGY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Course Level: Graduate
Description: Repeatable for Credit.
MGMT 901 - FINANCIAL STATEMENT ANALYSIS
Short Title: FINANCIAL STATEMENT ANALYSIS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Description: Examines the role of financial statements in the evaluation of a firm’s financial condition and the prediction of its future prospects. Covers the strategic, financial, and accounting analysis of a firm’s profitability and riskiness by means of financial statement data, and introduces the fundamentals of financial statement forecasting and building pro-forma financial statements.

MGMT 902 - FINANCIAL STATEMENT ANALYSIS II
Short Title: FINANCIAL STATEMENT ANALYSIS II
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Description: Repeatable for Credit.

MGMT 903 - TAXES AND MULTINATIONAL BUSINESS STRATEGY
Short Title: TAXES/MULTINATIONAL BUS STRAT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Students in the EMBA program may not enroll.
Description: Repeatable for Credit.

MGMT 904 - STRATEGIC COST ACCOUNTING
Short Title: STRATEGIC COST ACCOUNTING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.

MGMT 905 - CORPORATE GOVERNANCE
Short Title: CORPORATE GOVERNANCE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Description: Developement of analytical and behavioral skills for resolving conflict and negotiating successfully in a business context. Topics include analysis of your negotiation counterpart, adversarial versus cooperative bargaining, influence tactics, and ethics.

MGMT 906 - VALUATION APPLICATIONS IN ACCOUNTING
Short Title: VALUATION
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.

MGMT 907 - NEGOTIATION AND CONFLICT RESOLUTION
Short Title: NEGOTIATIONS II
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.

MGMT 908 - NEGOTIATION AND CONFLICT RESOLUTION
Short Title: NEGOTIATION & CONFLICT RES
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 0
Restrictions: Enrollment limited to students in the EMBA program.

MGMT 909 - NEGOTIATION AND CONFLICT RESOLUTION
Short Title: NEGOTIATION AND CONFLICT RES
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.

MGMT 910 - FINANCIAL STATEMENT ANALYSIS
Short Title: FINANCIAL STATEMENT ANALYSIS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Description: Examines the role of financial statements in the evaluation of a firm’s financial condition and the prediction of its future prospects. Covers the strategic, financial, and accounting analysis of a firm’s profitability and riskiness by means of financial statement data, and introduces the fundamentals of financial statement forecasting and building pro-forma financial statements.

MGMT 919 - CORPORATE GOVERNANCE
Short Title: CORPORATE GOVERNANCE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Description: Repeatable for Credit.
MGMT 922 - GLOBAL SUPPLY CHAIN MANAGEMENT
Short Title: GLOBAL SUPPLY CHAIN MGMT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Description: The course is an overview of the supply chain management; the formation, organization and operation of a supply chain; monitoring the portfolio companies and mentoring their management teams; valuation methodology and term sheets; legal issues; problems that a VC faces; exiting a portfolio company; failure and how to deal with it. The class has guest speakers from the industry and utilizes several relevant cases to give students situational experience. The entire course is based on real-world situations.

MGMT 926 - VENTURE CAPITAL
Short Title: VENTURE CAPITAL
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment limited to students in the EMBA program.
Description: The course is an overview of the venture capital industry; the formation, organization and operation of a venture capital fund; monitoring the portfolio companies and mentoring their management teams; valuation methodology and term sheets; legal issues; problems that a VC faces; exiting a portfolio company; failure and how to deal with it. The class has guest speakers from the industry and utilizes several relevant cases to give students situational experience. The entire course is based on real-world situations.

MGMT 927 - THE NEW ENTERPRISE
Short Title: THE NEW ENTERPRISE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Description: The course is an overview of the venture capital industry; the formation, organization and operation of a venture capital fund; monitoring the portfolio companies and mentoring their management teams; valuation methodology and term sheets; legal issues; problems that a VC faces; exiting a portfolio company; failure and how to deal with it. The class has guest speakers from the industry and utilizes several relevant cases to give students situational experience. The entire course is based on real-world situations.

MGMT 928 - ENTERPRISE EXCHANGE
Short Title: ENTERPRISE EXCHANGE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment limited to students in the EMBA program.
Description: The course is an overview of the venture capital industry; the formation, organization and operation of a venture capital fund; monitoring the portfolio companies and mentoring their management teams; valuation methodology and term sheets; legal issues; problems that a VC faces; exiting a portfolio company; failure and how to deal with it. The class has guest speakers from the industry and utilizes several relevant cases to give students situational experience. The entire course is based on real-world situations.

MGMT 930 - FINANCIAL MARKETS
Short Title: FINANCIAL MARKETS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Description: Repeatable for Credit.

MGMT 932 - CORPORATE GOVERNANCE AND FINANCIAL REPORTING
Short Title: CORP GOV & FINANCIAL REPORTING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment limited to students in the EMBA program.
Description: Repeatable for Credit.

MGMT 952 - MERGERS AND ACQUISITIONS
Short Title: MERGERS AND ACQUISITIONS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment limited to students in the EMBA program.
Description: Repeatable for Credit.

MGMT 954 - CORPORATE FINANCIAL RESTRUCTURING
Short Title: CORP FINANCIAL RESTRUCTURING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA program.
Description: Repeatable for Credit.
Innovation is critical for firms to achieve better performance and sustainable competitive advantage. However, the management of innovation is inherently difficult and risky because customer demand and preferences change quickly and technological changes are highly unpredictable and thus most new products and technologies are not a commercial success. This course is designed to help executives apply the key strategic management frameworks and concepts to address important challenges they face in innovation management: How to manage market uncertainty, technological uncertainty and competitive volatility? What are the enemies of innovation in both new ventures and successful established firms? How to build strategic alliances for technology/product innovation? And how to manage innovation in the global market?
MACC 502 - BUSINESS LAW FOR ACCOUNTANTS
Short Title: BUSINESS LAW FOR ACCOUNTANTS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 6
Restrictions: Enrollment limited to students in the MACC program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course examines the broad subject of law as it relates to business, and is designed to help the accounting student develop "legal astuteness." The course provides an initial exposure to contracts and crucial concepts of tort, crime, agency, and federal legal and regulatory schemes. Scientifically-proven course material and dynamic, interactive teaching style.

MACC 501 - ACCOUNTING ETHICS AND PROFESSIONALISM
Short Title: ETHICS IN ACCOUNTING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MACC program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The purpose of the course is to prepare the future CPA for ethical judgement. Course materials emphasize ethical reasoning and giving voice to values; principles of integrity, objectivity, independence (in fact and appearance) and avoidance of intentional misrepresentation of facts; the role of core values in a dynamically changing global economy; and professional and ethical issues in accounting practice.
MACC 503 - ACCOUNTING AND AUDITING REGULATION
Short Title: ACCTING & AUDITING REGULATION
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MACC program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Students will travel to Washington, DC for an intensive, 5-day learning program. An accounting faculty member will oversee the course, and various officials involved in public policy will lead many presentations and discussions. The grade for this course will be 100% based on accounting and business writing.

MACC 504 - FINANCIAL FUTURES AND OPTIONS
Short Title: FINANCIAL FUTURES & OPTIONS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MACC program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An introduction to forward, futures, option, and swap contracts, including the basic valuation, principles, the use of these contracts for hedging financial risk, and an analysis of option-like investment decisions.

MACC 505 - ECONOMIC ENVIRONMENT OF BUSINESS
Short Title: ECONOMIC ENVIRONMT OF BUSINESS
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MACC program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: EEB stresses an understanding of the major macroeconomic forces affecting business in today's global economy. Fluency in major macroeconomic concepts and forces enhances business decision-making in the globally competitive product, financial, and labor markets that characterize the modern business environment.

MACC 511 - ISSUES IN FINANCIAL REPORTING II
Short Title: ISSUES IN FIN REPORTING II
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics include: accounting for dilutive securities and stock-based compensation; recognition and derecognition of investments, leases, deferred taxes, and pension and other postretirement obligations; advanced topics on inter-corporate investment accounting. Codification research will be integrated throughout course. Comparison of U.S. GAAP and IFRS.

MACC 512 - FINANCIAL STATEMENT ANALYSIS AND VALUATION
Short Title: FINANCIAL STATEMENT ANALYSIS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MACC program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The first half of the course focuses on documenting and understanding a firm's profitability relative to past performance and comparable firms. The second half of the course covers: 1) forecasting financial statements and 2) deriving firm value under a variety of approaches, including DCF and residual income valuation (RIV).

MACC 513 - ISSUES IN FINANCIAL REPORTING III
Short Title: ISSUES IN FIN REPORTING III
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MACC program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers the advanced financial accounting topics of: preparation of consolidated statements, partnership accounting and reporting, accounting for bankruptcy and reorganization, segment disclosures, and interim reporting, and the role of the SEC in financial reporting for publicly traded companies.

MACC 514 - FAIR VALUE ACCOUNTING
Short Title: FAIR VALUE ACCOUNTING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MACC program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course examines: fair value accounting, as outlined in Accounting Standard Codification section 820 and other U.S. accounting standards; use of 3rd party pricing services, credit risk considerations, and recent accounting updates impacting the valuation of various financial instruments, such as loans, equities, department securities, alternative investments, real estate investments and liabilities.

MACC 530 - INTRODUCTION TO MANAGERIAL ACCOUNTING
Short Title: INTRO TO MGMT ACCOUNTING
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 0.5
Restrictions: Enrollment limited to students in the MACC program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Course introduces the vocabulary and mechanics of cost accounting. Basic managerial accounting topics will be covered, including cost-volume analysis, cost behavior, relevant costs, and the use of cost information for decision making.
MACC 531 - ADVANCED MANAGEMENT ACCOUNTING
Short Title: ADVANCED MGMT ACCOUNTING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MACC program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The use of management accounting information to serve management decision making; review of cost concepts; standards and variances; relevance and decision making; role of cost allocations; different costs for different purposes; product costing systems; and managing customers.

MACC 541 - ACCOUNTING CONTROL SYSTEMS
Short Title: ACCOUNTING CONTROL SYSTEMS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to Graduate level students.
Course Level: Graduate
Description: Examines the concepts of the integrated audit of internal control over financial reporting in accordance with PCAOB Audit Standard 5. Also covers fundamental procedures used in financial statement audits, specifically in the client acceptance and continuance, planning and risk assessment, and audit comfort cycle phases of the engagement.

MACC 561 - ACCOUNTING INFORMATION SYSTEMS
Short Title: ACCOUNTING INFORMATION SYSTEMS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to Graduate level students.
Course Level: Graduate
Description: A study of automated systems of processing data for accounting information. The accounting system is discussed from the perspective of developing and maintaining systems capable of producing information for internal decision-making and external reporting. Hands-on experience may include general ledger, ERP, flowcharting software and other relevant computer technology.

MACC 562 - ACCOUNTING AND DATA ANALYTICS
Short Title: ACCOUNTING & DATA ANALYTICS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to Graduate level students.
Course Level: Graduate
Description: This capstone course applies accounting and critical thinking skills to real-world data analytics examples from auditing and forensics. The focus is on (1) the methodologies of transforming raw and unstructured data into workable data sets, (2) how to interpret data sets, and (3) the presentation of data to decision makers.

MACC 571 - FEDERAL TAXATION I
Short Title: FEDERAL TAXATION I
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MACC program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to federal income tax principles. Emphasis on general skills in identifying and resolving tax issues, understanding the administrative and public policy and reasoning underlying tax law choices and integrating the tax laws into business and personal decisions and planning. Coverage of taxation of C-corporations, S-corporations, and partnerships.

MACC 572 - FEDERAL TAXATION II
Short Title: FEDERAL TAXATION II
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MACC program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MACC 571
Description: Building on the subject matter covered in MACC 571, this course provides further knowledge of the federal tax structure and fundamental skills for decision-making regarding tax compliance and tax planning.

MACC 581 - GOVERNMENT AND NOT-FOR-PROFIT ACCOUNTING
Short Title: GOVT AND NFP ACCOUNTING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MACC program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Financial reporting, managerial, auditing, taxation, and information systems issues in governmental and nonprofit entities; ethics and professional standards; fund accounting concepts and practices, as well as government-wide financial reporting similar to private business consolidated reporting and the relationships between the two; not-for-profit budgeting, accounting, and reporting standards.
Materials Science & NanoEng (MSNE)

MSNE 201 - INTRODUCTION TO NANOENGINEERING
Short Title: INTRO TO NANOENGINEERING
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to the properties of nanomaterials and their applications in engineering, technology, chemistry, energy, biology, and medicine. General discussion of nanotechnology, from multidisciplinary research to consumer products, suitable for all levels and specializations. Students will develop the understanding needed to separate the hype from the real in one of the most dynamic and prolific areas of research in the last ten years. Includes demonstrations, student-lead projects, and lab tours. Required for MSNE majors.

MSNE 210 - WILD TOPICS IN CHEMISTRY AND NANOTECHNOLOGY
Short Title: WILD TOPICS CHEM AND NANOTECH
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A variety of topics related to chemistry and nanotechnology will be discussed. Some topics are classical while others are current. Topics may include nanocars, molecular electronics, how to form a startup company. Grades will be based upon attendance and quizzes. Cross-list: CEVE 210, CHEM 210. Repeatable for Credit.

MSNE 302 - MATERIALS PROCESSING AND NANOMANUFACTURING
Short Title: MATERIALS PROCESSING
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 211 and MATH 212
Corequisite: MSNE 303
Description: An overview of mass, momentum, and heat transport with applications in materials processing and nanomanufacturing. Emphasis is on analytical modeling of processing techniques with a view towards improving their efficiency and yield.

MSNE 303 - MATERIALS SCIENCE JUNIOR LAB
Short Title: MATERIALS SCIENCE JUNIOR LAB
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Corequisite: MSNE 302
Description: Selected lab experiments in materials science. Open only to junior materials science and engineering majors. Required for materials science and engineering majors. At the start of the semester, please check with the Department of Mechanical Engineering and Materials Science for the time and location of the organizational meeting for the course. Instructor Permission Required.
**MSNE 311 - MATERIALS SELECTION AND DESIGN**

**Short Title:** MATERIALS SELECTION & DESIGN  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** MSNE 301  
**Description:** Survey of the mechanical properties of solid materials. Many of the concepts will be explained by drawing from applications in sustainability (photovoltaics, solar-to-fuel conversion) and materials science and engineering. Required for materials science and engineering majors. For non-majors with permission of instructor. Required for Materials Science and NanoEngineering.

**MSNE 365 - NANOMATERIALS FOR ENERGY**

**Short Title:** NANOMATERIALS FOR ENERGY  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 4  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** An interdisciplinary capstone design experience in materials science and nanoengineering. This course provides an opportunity for students to apply knowledge and skills acquired in previous courses to the solution of a realistic engineering problem. Teams of students will specify, design, and build an engineering system/device to meet a prescribed set of requirements. Must complete MSNE 406 to receive credit for MSNE 407 and both courses must be taken the same academic year. Required for MSNE majors in B.S. program. Instructor Permission Required.

**MSNE 406 - PHYSICAL PROPERTIES OF SOLIDS**

**Short Title:** PHYSICAL PROPERTIES OF SOLIDS  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** MATH 211  
**Description:** Survey of the electrical, magnetic, and optical properties of metals, semiconductors, and dielectrics based upon elementary band theory concepts. Required for materials science and engineering majors. Graduate/Undergraduate Equivalency: MSNE 506. Mutually Exclusive: Credit cannot be earned for MSNE 406 and MSNE 506.
MSNE 409 - PHYSICAL METALLURGY
Short Title: PHYSICAL METALLURGY
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Fundamentals of metallic materials, with a focus on defect engineering, microstructure design, and alloy design. The course will provide students with the understanding needed to develop alloys with specific desirable properties. Examples will be drawn from the processing of both ferrous and non-ferrous (e.g., Cu, Al, and Ti based) alloys. Graduate/Undergraduate Equivalency: MSNE 509. Recommended Prerequisite(s): MSNE 435 and MSNE 411. Mutually Exclusive: Credit cannot be earned for MSNE 409 and MSNE 509.

MSNE 411 - METALLOGRAPHY AND PHASE RELATIONS
Short Title: METALLOGRAPHY & PHASE RELATION
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MSCI 301 or MSNE 301
Description: Study of microstructures that may be observed in metals and alloys, optical metallography (in addition to more sophisticated techniques), and the relationships between structural properties and failures. Required for materials science and engineering majors.

MSNE 415 - CERAMICS AND GLASSES
Short Title: CERAMICS AND GLASSES
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MSNE 301 or MSCI 301
Description: Fundamentals of ceramic and glassy materials, including phase relations, theoretical properties, structure, bonding, and design.

MSNE 416 - STRUCTURE AND PROPERTIES OF POLYMERS AND SOFT MATERIALS
Short Title: PROPERTIES OF SOFT MATERIALS
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MSNE 301 and MSNE 302 (may be taken concurrently) and MSNE 401 (may be taken concurrently) and MSNE 402 (may be taken concurrently) and MSNE 406 (may be taken concurrently)
Description: This graduate level course addresses the fundamental structures and properties of polymers and other forms of soft matter (gels, colloids, nanoparticles, etc.) and their many roles as technologically important materials. The electrical, optical, transport, acoustic and mechanical properties are presented with respect to the underlying physics and engineering. Prereqs are concurrent except for MSNE 301. Mutually Exclusive: Credit cannot be earned for MSNE 416 and MSNE 516.

MSNE 417 - ELECTRONIC, OPTICAL AND MAGNETIC PROPERTIES OF POLYMERS
Short Title: POLYMER ELECTRONICS
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 211 or MSNE 301
Description: Covers physical and material concepts and engineering applications of electronic polymers. Examines the structural origins of the diverse electronic, optoelectronic, photonic and magnetic properties of conjugated polymers. Topics include synthesis, electronic structure, physico-chemical characterization, applications in LEDs, solar cells, transistors, spintronics, and bioelectronics. Mutually Exclusive: Credit cannot be earned for MSNE 417 and MSNE 517.

MSNE 433 - COMPUTATIONAL MATERIALS MODELING
Short Title: COMPUTATIONAL MATERIALS MODEL
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Physico-chemical principles augmented by ever-advancing computation technology have become a tool for explaining rich materials properties, designing nano-structures and their possible functionality. This course overviews basic quantum principles of materials structure, and a hierarchy of approximations broadly used in computational models. This includes classical multi-body potentials, tight-binding approximations, electronic density functional theory methods, etc. Graduate/Undergraduate Equivalency: MSNE 533. Mutually Exclusive: Credit cannot be earned for MSNE 433 and MSNE 533.

MSNE 435 - CRYSTALLOGRAPHY & DIFFRACTION
Short Title: CRYSTALLOGRAPHY & DIFFRACTION
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MSNE 301 or MSCI 301
Description: Study of crystals by diffraction techniques, focusing on x-ray, with an overview of electron and neutron diffraction as well as complementary techniques. Provides mathematical foundations and nomenclature for diffraction and related phenomena. Includes basics of crystallographic analysis and surface/point/group symmetry, experiment design (sources, geometry, detectors), and data analysis and interpretation. Required for undergraduate MSNE major. Meets with MSNE 535 (less course work for the undergraduate class). Graduate/Undergraduate Equivalency: MSNE 535. Mutually Exclusive: Credit cannot be earned for MSNE 435 and MSNE 535.
MSNE 437 - CRYSTALLOGRAPHY & DIFFRAC LAB
Short Title: CRYSTALLOGRAPHY & DIFFRAC LAB
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MSNE 435 (may be taken concurrently)
Description: Selected laboratory experiments in materials science, focusing on lattice symmetry, crystallography, phase identification, and metallurgy. Required for undergraduate MSNE major. Prerequisite MSNE 435 may be taken concurrently. Instructor Permission Required. Graduate/Undergraduate Equivalency: MSNE 537. Mutually Exclusive: Credit cannot be earned for MSNE 437 and MSNE 537.

MSNE 450 - MATERIALS SCIENCE SEMINAR
Short Title: MATERIALS SCIENCE SEMINAR
Department: Materials Science & NanoEng
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 0
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A series of seminars on selected topics in Materials Science. Recommended for Materials Science and NanoEngineering majors.

MSNE 451 - MATERIALS SCIENCE SEMINAR
Short Title: MATERIALS SCIENCE SEMINAR
Department: Materials Science & NanoEng
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A series of seminars on selected topics in Materials Science. Recommended for Materials Science and NanoEngineering majors.

MSNE 490 - MATERIALS SCIENCE RESEARCH PROJECTS
Short Title: MATERIALS SCIENCE RESEARCH PROJ
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent investigation of a specific topic or problem in materials science. Research under the direction of a selected faculty member. Instructor Permission Required. Repeatable for Credit.

MSNE 491 - SUPERVISED RESEARCH
Short Title: SUPERVISED RESEARCH
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 101 and MATH 102
Description: Supervised research, reports and/or final reports required. Sponsorship by faculty member required. Instructor Permission Required. Repeatable for Credit.

MSNE 499 - CURRENT TOPICS
Short Title: CURRENT TOPICS
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-9
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Designed for undergraduate materials science students. Topics vary from term to term. Please consult with the department for additional information.

MSNE 500 - MATERIALS SCIENCE SEMINAR
Short Title: MATERIALS SCIENCE SEMINAR
Department: Materials Science & NanoEng
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A series of seminars on selected topics in Materials Science. Required for Materials Science and Engineering majors. Repeatable for Credit.

MSNE 501 - GRADUATE STUDENT SEMINAR
Short Title: GRADUATE STUDENT SEMINAR
Department: Materials Science & NanoEng
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Two graduate students will present every week, except for 1st year graduate students who will present 3 per class. Every week, students will be encouraged to fill out peer evaluation forms and include anonymous comments/suggestions for improving the presentation. The results of these comments will not be shared, but given to the presenter for their reference. Repeatable for Credit.

MSNE 502 - MECH PROPERTIES OF MATERIALS
Short Title: MECH PROPERTIES OF MATERIALS
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Survey of the mechanical properties of solid materials. Includes basic mechanics, elasticity, plasticity, fracture, fatigue, creep, hardening mechanisms, mechanical testing, and structure-property relationships. Required for Materials Science and Engineering majors. Additional work required. Graduate/Undergraduate Equivalency: MSNE 402. Mutually Exclusive: Credit cannot be earned for MSNE 502 and MSNE 402.
MSNE 503 - THERMODYNAMICS IN MATERIALS SCIENCE  
**Short Title:** THERMODYNAMICS IN MAT SCIENCE  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Unified presentation of the kinetics and thermodynamics of mass and energy transport. Includes heterogeneous equilibrium, diffusion in solids, and heat transfer, as well as their application to engineering design. Required for Materials Science and Engineering majors. Graduate/Undergraduate Equivalency: MSNE 401. Mutually Exclusive: Credit cannot be earned for MSNE 503 and MSNE 401.

MSNE 505 - MICROSTRUCTURE AND NANOSTRUCTURE EVOLUTION  
**Short Title:** MICRO/NANO-STRUCTURE EVOLUTION  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Study of the thermodynamic and kinetic principles underlying structural evolution in materials at micro- and nanoscales. Includes atomic diffusion, phase transformations and morphological evolution of surfaces and interfaces under capillary and mechanical forces. Elucidation of atomistic mechanisms and mathematical treatment are emphasized. Undergraduates may register with instructor permission. Recommended Prerequisite(s): MSNE 503.

MSNE 506 - PHYSICAL PROPERTIES OF SOLIDS  
**Short Title:** PHYSICAL PROPERTIES OF SOLIDS  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Survey of the electrical, magnetic, and optical properties of metals, semiconductors, and dielectrics based upon elementary band theory concepts. Required for Materials Science and Engineering majors. Graduate/Undergraduate Equivalency: MSNE 406. Mutually Exclusive: Credit cannot be earned for MSNE 506 and MSNE 406.

MSNE 509 - PHYSICAL METALLURGISTRY  
**Short Title:** PHYSICAL METALLURGY  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Fundamentals of metallic materials, with a focus on defect engineering, microstructure design, and alloy design. The course will provide students with the understanding needed to develop alloys with specific desirable properties. Examples will be drawn from the processing of both ferrous and non-ferrous (e.g., Cu-, Al-, and Ti based) alloys. Graduate/Undergraduate Equivalency: MSNE 409. Recommended Prerequisite(s): MSNE 435 and MSNE 411. Mutually Exclusive: Credit cannot be earned for MSNE 509 and MSNE 409.

MSNE 510 - SCALING CONCEPTS IN 2D MATERIALS AND POLYMER PHYSICS  
**Short Title:** SCALING CONCEPTS IN MATERIALS  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** The course is an introduction to symmetry breaking, scaling and universality in low dimensional materials and polymers. Using simple models as examples, the course addresses 2D crystals and melting, surface roughening, scaling properties of polymers, phase transitions and the mean field approach. It then goes over to explain how renormalization works in condensed matter, and how it gives rise to universality. Recommended Prerequisite(s): MSNE 401

MSNE 516 - STRUCTURE AND PROPERTIES OF POLYMERS AND SOFT MATERIALS  
**Short Title:** PROPERTIES OF SOFT MATERIALS  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This graduate level course addresses the fundamental structures and properties of polymers and other forms of soft matter (gels, colloids, nanoparticles, etc.) and their many roles as technologically important materials. The electrical, optical, transport, acoustic and mechanical properties are presented with respect to the underlying physics and engineering. Mutually Exclusive: Credit cannot be earned for MSNE 516 and MSNE 416.

MSNE 517 - ELECTRONIC, OPTICAL AND MAGNETIC PROPERTIES OF POLYMERS  
**Short Title:** POLYMER ELECTRONICS  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Covers physical and material concepts and engineering applications of electronic polymers. Examines the structural origins of the diverse electronic, optoelectronic, photonic and magnetic properties of conjugated polymers. Topics include synthesis, electronic structure, physico-chemical characterization, applications in LEDs, solar cells, transistors, spintronics, and bioelectronics. Mutually Exclusive: Credit cannot be earned for MSNE 517 and MSNE 417.
MSNE 523 - PROPERTIES, SYNTHESIS AND DESIGN OF COMPOSITE MATERIALS  
**Short Title:** DESIGN OF COMPOSITE MATERIALS  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Study of the science of interfaces and the properties that govern their use in composite materials. Not offered every year. The study of composite processing and methods for synthesis polymer, metal and ceramic matrix composition.

MSNE 533 - COMPUTATIONAL MATERIALS MODELING  
**Short Title:** COMPUTATIONAL MATERIALS MODEL  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Physico-chemical principles augmented by ever-advancing computation technology have become a tool for explaining rich materials properties, designing nano-structures and their possible functionality. This course overviews basic quantum principles of materials structure, and a hierarchy of approximations broadly used in computational models. This includes classical multi-body potentials, tight-binding approximations, electronic density functional theory methods, etc. MSNE 533 requires additional work. Graduate/Undergraduate Equivalency: MSNE 433. Mutually Exclusive: Credit cannot be earned for MSNE 533 and MSNE 433.

MSNE 534 - NANOSCIENCE AND NANOTECHNOLOGY I  
**Short Title:** NANOSCIENCE & NANOTECHNOLOGY  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Course Level:** Graduate  
**Description:** Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. An introduction to the basic principles of nanoscience and nanotechnology. Size dependent physical properties of nanoscopic solids will be described using solid state physics and molecular orbital theory as a foundation. Wet chemical techniques that produce nanoscale materials (e.g. carbon nanotubes, semiconductor and metallic nanocrystals, dendrimers...) will be introduced in the second half of the semester. Expected to be taught Spring 2019. Cross-list: CEVE 533, CHEM 533.

MSNE 535 - CRYSTALLOGRAPHY & DIFFRACTION  
**Short Title:** CRYSTALLOGRAPHY & DIFFRACTION  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Study of crystals by diffraction techniques, focusing on x-ray, with an overview of electron and neutron diffraction as well as complementary techniques. Provides mathematical foundations and nomenclature for diffraction and related phenomena. Includes basics of crystallographic analysis and surface/point/group symmetry, experiment design (sources, geometry, detectors), and data analysis and interpretation. Required for undergraduate MSNE major. Meets with MSNE 435 (additional work for the graduate version). Cross-list: PHYS 535. Graduate/Undergraduate Equivalency: MSNE 435. Mutually Exclusive: Credit cannot be earned for MSNE 535 and MSNE 435.

MSNE 537 - CRYSTALLOGRAPHY & DIFFRAC LAB  
**Short Title:** CRYSTALLOGRAPHY & DIFFRAC LAB  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Laboratory  
**Credit Hour:** 1  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Selected laboratory experiments in materials science, focusing on lattice symmetry, crystallography, phase identification, and metallurgy. Required for undergraduate MSNE major. Credit may be given for only one, MSNE 537 or MSNE 437. Instructor Permission Required. Graduate/Undergraduate Equivalency: MSNE 437. Mutually Exclusive: Credit cannot be earned for MSNE 537 and MSNE 437.

MSNE 538 - COMPUTATIONAL NANOSCIENCE FOR GREEN INFRASTRUCTURE  
**Short Title:** COMPUTATIONAL NANOSCIENCE  
**Department:** Materials Science & NanoEng  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Computational methods such as first principles, kinetic Monte Carlo (KMC), classical MC (in Canonical, Grand Canonical, and isobaric-isothermal ensembles), and classic MD in predicting materials formation and properties. Case studies include cementitious materials, metals, and thermoelectric materials. Other case studies are possible depending on the student's background and instructor's approval. Cross-list: CEVE 538.
MSNE 545 - THIN FILMS
Short Title: THIN FILMS
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Deposition methods, structure, properties, performance and failure mechanisms of thin solid films for various applications. Deposition methods include sputtering, plating, evaporation and chemical vapor deposition. Material types include crystalline and amorphous metals as well as semiconductors and insulators. Applications are primarily in microelectronics; data storage; micro-electro-mechanical systems, wear and corrosion prevention and thermal barriers. NOTE: Not offered every year. Cross-list: ELEC 545.

MSNE 555 - MATERIALS IN NATURE AND BIO-MIMETIC STRATEGIES
Short Title: BIO-MIMETIC STRATEGIES
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This graduate level course will discuss the origin of several materials that exists in nature from a technology perspective and strategies to replicate them using synthetic materials processing protocols. Silicates, carbon based materials, abalone shell, bone etc. will be used to discuss the fascinating architecture developed by nature. Similarly several functional structures designed by nature such as Gecko tape and IR sensors will be discussed for designing bio-medic structure and devices. NOTE: Not offered every year.

MSNE 560 - COLLOIDAL AND INTERFACIAL PHENOMENA
Short Title: COLLOIDAL & INTERFACIAL PHENOM
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course will provide knowledge into the fundamentals of colloidal interactions (e.g., stabilisation, adsorption, self-assembly) and the techniques currently applied for their assessment. Apart from the theoretical background, the course will also provide applicable knowledge by covering current and emerging applications involving these phenomena. Interfacial tension, wetting and spreading, contact angle hysteresis, interaction between colloid particles, stability of interfaces, flow and transport near interfaces will be covered. NOTE: Offered in alternative year with MSNE 594/CHBE 594. Cross-list: CHBE 560.

MSNE 569 - SCIENCE AND APPLICATIONS OF CORROSION SCIENCE AND ENGINEERING
Short Title: CORROSION SCIENCE & ENGINEERING
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MSCI 301 or MSNE 301
Description: Students will learn basics of corrosion science of metals and alloys exposed to different classes of conditions, prevalent forms of corrosion, consequences of corrosion and corrosion mitigation approaches in a range of industries. Discussion of nano science aspects related to corrosion control in industry will be included.

MSNE 570 - SENIOR DESIGN THESIS PROJECT
Short Title: SENIOR DESIGN THESIS PROJECT
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A design project in the materials science field will be undertaken by the student in close collaboration with at least one materials science faculty member.

MSNE 571 - SENIOR DESIGN THESIS PROJECT
Short Title: SENIOR DESIGN THESIS PROJECT
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A design project in the materials science field will be undertaken by the student in close collaboration with at least one materials science faculty member. Instructor Permission Required.

MSNE 580 - MICROSCOPY METHODS IN MATERIALS SCIENCE
Short Title: MICROSCOPY METHODS
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers theory and applications of electron microscopy techniques with an emphasis on transmission and scanning transmission electron microscopy (TEM, STEM). Topics include modern instrumentation and hardware, electron diffraction, imaging modes, tomography, and spectroscopy (energy dispersive x-ray spectroscopy (EDS), electron-energy loss spectroscopy (EELS), cathodoluminescence (CL)). Previous experience with electron microscopes recommended. Can be taken alone or concurrently with lab course MSNE 582. Instructor Permission Required. Cross-list: CHEM 580.
MSNE 593 - INTRODUCTION TO POLYMER PHYSICS AND ENGINEERING
Short Title: POLYMER PHYSICS
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to students with a class of Graduate or Senior. Enrollment is limited to students with a major in Mechanical Engineering or Materials Science & NanoEng. Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CHEM 211 and CHEM 212
Description: The course focuses on demonstrating how the physical properties of polymers can be understood from simple models. Students will be introduced to the terminology and mathematics involved in the physical understanding of polymer systems. The course is intended for students who would like to gain an understanding of modern approaches to polymer physics. NOTE: Not offered every year. Cross-list: CHBE 593.

MSNE 594 - PROPERTIES OF POLYMERS
Short Title: PROPERTIES OF POLYMERS
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (CHEM 211 or CHEM 251) and (MATH 211 or MATH 221)
Description: The course will introduce basic concepts in polymer science including the synthesis and chemical modification of polymers as well as physical properties of polymers. Topics include approaches to polymer synthesis, processing and characterization of polymer materials, and an introduction to mathematical models applied to describe the structure and dynamics of polymeric materials. NOTE: Offered in alternative year with MSNE 560/CHBE 560. Cross-list: CHBE 594. Repeatable for Credit.

MSNE 580 - ELECTRON MICROSCOPY CENTER LAB
Short Title: ELECTRON MICROSCOPY CENTER LAB
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Corequisite: MSNE 580
Description: Hands-on laboratory using the instruments in the electron microscopy center. The students will gain the knowledge necessary to operate the instruments and analyze data independently. Must be taken concurrently with MSNE 580. Instructor Permission Required. Cross-list: CHEM 582.

MSNE 581 - MICRO AND NANO HEAT TRANSPORT METHODOLOGIES AND DESIGN
Short Title: MICRO & NANO HEAT TRANSPORT
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to students with a class of Graduate or Senior. Enrollment is limited to students with a major in Mechanical Engineering or Materials Science & NanoEng. Enrollment is limited to Graduate level students.
Course Level: Graduate

MSNE 582 - ELECTRON MICROSCOPY CENTER LAB
Short Title: ELECTRON MICROSCOPY CENTER LAB
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Corequisite: MSNE 580
Description: Hands-on laboratory using the instruments in the electron microscopy center. The students will gain the knowledge necessary to operate the instruments and analyze data independently. Must be taken concurrently with MSNE 580. Instructor Permission Required. Cross-list: CHEM 582.

MSNE 589 - INTRODUCTION TO POLYMER PHYSICS AND ENGINEERING
Short Title: POLYMER PHYSICS
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CHEM 211 and CHEM 212
Description: The course focuses on demonstrating how the physical properties of polymers can be understood from simple models. Students will be introduced to the terminology and mathematics involved in the physical understanding of polymer systems. The course is intended for students who would like to gain an understanding of modern approaches to polymer physics. NOTE: Not offered every year. Cross-list: CHBE 593.

MSNE 594 - PROPERTIES OF POLYMERS
Short Title: PROPERTIES OF POLYMERS
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (CHEM 211 or CHEM 251) and (MATH 211 or MATH 221)
Description: The course will introduce basic concepts in polymer science including the synthesis and chemical modification of polymers as well as physical properties of polymers. Topics include approaches to polymer synthesis, processing and characterization of polymer materials, and an introduction to mathematical models applied to describe the structure and dynamics of polymeric materials. NOTE: Offered in alternative year with MSNE 560/CHBE 560. Cross-list: CHBE 594. Repeatable for Credit.

MSNE 609 - RISK ASSESSMENT AND ASSET INTEGRITY IN OIL AND GAS PRODUCTION AND REFINING OPERATIONS I
Short Title: OIL AND GAS ASSET INTEGRITY I
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course integrates risk assessment and mitigation, asset integrity management, corrosion control and materials selection across the oil and gas value chain, from production to refining and retail. The full course covers 2 semesters. Session "I," to be delivered in the Spring 2017 semester. Session "II" will be delivered in the Fall 2017 semester. Instructor Permission Required. Cross-list: CHBE 609.

MSNE 613 - SPECIAL TOPICS I
Short Title: SPECIAL TOPICS I
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Enrollment is limited to Graduate level students.

MSNE 560 - RISK ASSESSMENT AND ASSET INTEGRITY IN OIL AND GAS PRODUCTION AND REFINING OPERATIONS I
Short Title: OIL AND GAS ASSET INTEGRITY I
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course integrates risk assessment and mitigation, asset integrity management, corrosion control and materials selection across the oil and gas value chain, from production to refining and retail. The full course covers 2 semesters. Session "I," to be delivered in the Spring 2017 semester. Session "II" will be delivered in the Fall 2017 semester. Instructor Permission Required. Cross-list: CHBE 609.

MSNE 613 - SPECIAL TOPICS I
Short Title: SPECIAL TOPICS I
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Enrollment is limited to Graduate level students.

MSNE 560 - RISK ASSESSMENT AND ASSET INTEGRITY IN OIL AND GAS PRODUCTION AND REFINING OPERATIONS I
Short Title: OIL AND GAS ASSET INTEGRITY I
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course integrates risk assessment and mitigation, asset integrity management, corrosion control and materials selection across the oil and gas value chain, from production to refining and retail. The full course covers 2 semesters. Session "I," to be delivered in the Spring 2017 semester. Session "II" will be delivered in the Fall 2017 semester. Instructor Permission Required. Cross-list: CHBE 609.
MSNE 614 - SPECIAL TOPICS II
Short Title: SPECIAL TOPICS II
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course gives an overview of micro and nanoelectronics technologies. The primary aim is to learn the main concepts and underlying principles of various lithography techniques and clean room practices, as well as the ways materials development has been contributing to the continuous improvement of electronic components and devices. This will be a 3-credit hour course. UG students can register via special registration form. Repeatable for Credit.

MSNE 615 - SPECIAL TOPICS III
Short Title: SPECIAL TOPICS III
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course will introduce the most important process plant safety concepts and design techniques for the early identification and minimization of operational hazards. A broad selection of historical and recent industrial accident cases will be discussed and analyzed. What can we learn, what are the best practices for loss prevention? This will be a 2 credit hour course. UG students can register via special registration form. Repeatable for Credit.

MSNE 616 - AUTOMOTIVE ENGINEERING: MATERIALS AND DYNAMICS
Short Title: AUTOMOTIVE ENGINEERING
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Discussion of the engineering and materials technology that is involved in modern automotive design. Topics include: chassis design and construction; composite design and fabrication; aerodynamics and ground effects; suspension dynamics; performance technology. External expert speakers will provide a real-world perspective. Course will only be offered with sufficient demand. Check with the instructor. Instructor Permission Required. Repeatable for Credit.

MSNE 617 - AUTOMOTIVE ENGINEERING: LAB
Short Title: AUTOMOTIVE ENGINEERING: LAB
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Laboratory application of engineering skills towards the materials technology and dynamics of chassis design, composite design, and fabrication, aerodynamics, and performance technology. Not offered every year. Instructor Permission Required. Recommended Prerequisite(s): MSCI 616 or MSNE 616. Repeatable for Credit.

MSNE 618 - RISK ASSESSMENT AND ASSET INTEGRITY IN OIL AND GAS PRODUCTION AND REFINING OPERATIONS II
Short Title: OIL AND GAS ASSET INTEGRITY II
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course integrates risk assessment and mitigation, asset integrity management, corrosion control and materials selection across the oil and gas value chain, from production to refining and retail. The full course covers 2 semesters. Session "I" to be delivered in the Spring 2017 semester. Session "II" will be delivered in the Fall 2017 semester. Instructor Permission Required. Cross-list: CHBE 618.

MSNE 621 - M.M.S. RESEARCH PROJECT I
Short Title: M.M.S. RESEARCH PROJECT I
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is the first part of the M.M.E. research project course. The faculty advisor, taking into account the background and research interests of the student as well as the research interests of the faculty advisor, will determine the contents. Course requirements will include a final report. Instructor Permission Required. Repeatable for Credit.

MSNE 622 - M.M.S. RESEARCH PROJECT II
Short Title: M.M.S. RESEARCH PROJECT II
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is the second part of the M.M.E. research project course. The faculty advisor, taking into account the background and research interests of the student as well as the research interests of the faculty advisor, will determine the contents. Course requirements will include a final report. Instructor Permission Required. Repeatable for Credit.

MSNE 650 - NANOMATERIALS AND NANOMECHANICS
Short Title: NANOMATERIALS & NANOMECHANICS
Department: Materials Science & NanoEng
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The primary goal of this course is to introduce important current developments in the field of nanomaterials and nanomechanics. The course will discuss synthesis and characterization of nanomaterials, the behaviors especially mechanical behaviors in the broad sense of such materials, and their technological applications. The basic physics and fundamental mechanisms responsible for nanoscale induced changes in properties will be stressed.
MSNE 800 - RESEARCH AND THESIS
Short Title: RESEARCH AND THESIS
Department: Materials Science & NanoEng
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-12
Restrictions: Enrollment is limited to students with a major in Materials Science & NanoEng. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

Mathematics (MATH)

MATH 101 - SINGLE VARIABLE CALCULUS I
Short Title: SINGLE VARIABLE CALCULUS I
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Limits, continuity, differentiation, integration, and the Fundamental Theorem of Calculus. Mutually Exclusive courses may only be taken with instructor permission. Should not be taken if student already has credit for MATH 102, MATH 211, MATH 212, or MATH 221, without permission. Mutually Exclusive: Credit cannot be earned for MATH 101 and MATH 112.
Course URL: math.rice.edu

MATH 102 - SINGLE VARIABLE CALCULUS II
Short Title: SINGLE VARIABLE CALCULUS II
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Continuation of the study of calculus from MATH 101. Integration, the Fundamental Theorem of Calculus, techniques of integration and applications. Should not be taken if student already has credit for MATH 102, MATH 211, MATH 212, or MATH 221, without permission. Mutually Exclusive: Credit cannot be earned for MATH 112 and MATH 101.
Course URL: math.rice.edu

MATH 111 - ORDINARY DIFFERENTIAL EQUATIONS AND LINEAR ALGEBRA
Short Title: ORD DIFFERENTIAL EQUATIONS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Continuation of the study of calculus from MATH 111. Integration, the Fundamental Theorem of Calculus, techniques of integration and applications. Should not be taken if student already has credit for MATH 102, MATH 211, MATH 212, MATH 221, without permission. Mutually Exclusive: Credit cannot be earned for MATH 112 and MATH 101.
Course URL: math.rice.edu

MATH 112 - CALCULUS: INTEGRATION AND ITS APPLICATIONS
Short Title: CALCULUS: INTEGRATION + APPS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Study of calculus, forming with MATH 102 a version of MATH 101/102 that does not cover infinite series. MATH 111 covers functions, limits, continuity, and derivatives and their applications. Mutually Exclusive courses may only be taken with instructor permission. Should not be taken if student already has credit for MATH 101, MATH 102, MATH 211, MATH 212, or MATH 221 without permission.
Course URL: math.rice.edu

MATH 211 - ORDINARY DIFFERENTIAL EQUATIONS AND LINEAR ALGEBRA
Short Title: ORD DIFFERENTIAL EQUATIONS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Study of ordinary differential equations (e.g., solutions to separable and linear first-order equations and to higher-order linear equations with constant coefficients, the properties of solutions to differential equations, and numerical solution methods) and linear algebra (e.g., vector spaces and solutions to algebraic linear equations, dimension, eigenvalues, and eigenvectors of a matrix), as well as the application of linear algebra to first-order systems of differential equations and the qualitative theory of nonlinear systems and phase portraits.
MATH 212 - MULTIVARIABLE CALCULUS
Short Title: MULTIVARIABLE CALCULUS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Calculus of multiple variables. Vectors, partial derivatives and gradients, double and triple integrals, vector fields, line and surface integrals, Green's theorem, Stokes's theorem, and Gauss's theorem. May substitute Math 221 and 222. Mutually Exclusive: Credit cannot be earned for MATH 212 and MATH 222.
Course URL: math.rice.edu

MATH 221 - HONORS CALCULUS III
Short Title: HONORS CALCULUS III
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course and MATH 222 include the material of MATH 212 and much more. Topology of Rn, calculus for functions of several variables, linear and multilinear algebra, theory of determinants, inner product spaces, integration on manifolds.

MATH 222 - HONORS CALCULUS IV
Short Title: HONORS CALCULUS IV
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: See MATH 221. A student may not receive credit for both MATH 222 and MATH 212. Mutually Exclusive: Credit cannot be earned for MATH 222 and MATH 212.

MATH 238 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Internship/Practicum, Lecture, Laboratory, Seminar
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Topics and credit hours may vary each semester. Contact Department for current semester's topic(s). Repeatable for Credit.

MATH 300 - TOPICS IN UNDERGRADUATE MATH
Short Title: TOPICS IN UNDERGRADUATE MATH
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 102
Description: Treatment of topics in undergraduate mathematics. Topics vary by year. May be repeated for credit with permission of department.
Course URL: math.rice.edu

MATH 302 - ELEMENTS OF ANALYSIS
Short Title: ELEMENTS OF ANALYSIS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 102
Description: Introductory treatment of topics in analysis and topology, with the real line as a central example. Techniques include connected and compact sets, sequences and subsequences, continuity, and uniform approximation. Clear, cogent, and complete mathematical arguments are emphasized.

MATH 304 - ELEMENTS OF KNOT THEORY
Short Title: ELEMENTS OF KNOT THEORY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 221 or MATH 354 or MATH 355
Description: Introduction to the mathematical theory of knots. Techniques to distinguish knots from one another, Reidemeister moves, mod-p colorings, knot determinants, knot polynomials, Seifert surfaces, Euler characteristic, knot groups, and untying knots in four dimensions. We will also discuss open problems in knot theory.
Course URL: math.rice.edu

MATH 306 - ELEMENTS OF ABSTRACT ALGEBRA
Short Title: ELEMENTS OF ABSTRACT ALGEBRA
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (MATH 354 or MATH 355) and (MATH 302 or MATH 354 or MATH 221)
Description: Introductory treatment of the basic structures of abstract algebra: groups, rings, and fields. Clear, cogent, and complete mathematical arguments are emphasized. A student many not receive credit for both MATH 306 and MATH 356. Mutually Exclusive: Credit cannot be earned for MATH 306 and MATH 356.
Course URL: math.rice.edu
MATH 321 - INTRODUCTION TO ANALYSIS I
Short Title: INTRODUCTION TO ANALYSIS I
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 221 or MATH 354 or MATH 302
Description: A thorough treatment of the foundations of real analysis such as metric spaces, compactness, sequences and series of functions, differentiation, Riemann integration. Mutually Exclusive: Credit cannot be earned for MATH 321 and MATH 331.
Course URL: math.rice.edu

MATH 322 - INTRODUCTION TO ANALYSIS II
Short Title: INTRODUCTION TO ANALYSIS II
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 321 or MATH 331
Description: Further study in real analysis. Possible topics include analysis in higher dimensions, Hilbert spaces, Fourier series, Sturm-Liouville theory. Repeatable for Credit.
Course URL: math.rice.edu

MATH 331 - HONORS ANALYSIS
Short Title: HONORS ANALYSIS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 221 or MATH 302 or MATH 354
Description: A careful treatment of basic topics in real analysis, including metric spaces and their topology, sequences and series, continuity, and differentiation. The content of this course is similar to that of MATH 321, but the intensity and conceptual level will be higher. Mutually Exclusive: Credit cannot be earned for MATH 331 and MATH 321.
Course URL: math.rice.edu

MATH 354 - HONORS LINEAR ALGEBRA
Short Title: HONORS LINEAR ALGEBRA
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Vector spaces, linear transformations and matrices, theory of systems of linear equations, determinants, eigenvalues and diagonalizability, inner product spaces; and optional material chosen from: dual vector spaces, spectral theorem for self-adjoint operators, Jordan canonical form. Content is similar to that of MATH 355, but with more emphasis on theory. The course will include instruction on how to construct mathematical proofs. This course is appropriate for potential Mathematics majors and others interested in learning how to construct rigorous mathematical arguments. Recommended Prerequisite(s): A 200-level math class. Mutually Exclusive: Credit cannot be earned for MATH 354 and MATH 355.
Course URL: math.rice.edu

MATH 355 - LINEAR ALGEBRA
Short Title: LINEAR ALGEBRA
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Linear transformations and matrices, solution of linear equations, inner products eigenvalues and eigenvectors, the spectral theorem for real symmetric matrices, applications of Jordan canonical form. Mutually Exclusive: Credit cannot be earned for MATH 355 and MATH 354.

MATH 356 - ABSTRACT ALGEBRA I
Short Title: ABSTRACT ALGEBRA I
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (MATH 354 or MATH 355) and (MATH 302 or MATH 354 or MATH 221)
Description: Group theory: normal subgroups, factor groups, Abelian groups, permutations, matrix groups, and group action. Recommended Prerequisite(s): MATH 354 or MATH 355; and some proof-based course such as MATH 302, MATH 354, or MATH 365. Mutually Exclusive: Credit cannot be earned for MATH 356 and MATH 306.
Course URL: math.rice.edu
MATH 365 - NUMBER THEORY
Short Title: NUMBER THEORY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 221 or MATH 302 or MATH 354
Description: Prime numbers and factorization, modular arithmetic, Diophantine equations, quadratic reciprocity, and other topics such as cryptography or continued fractions.
Course URL: math.rice.edu

MATH 366 - GEOMETRY
Short Title: GEOMETRY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of classical groups as symmetries of Euclidean spaces. Geometry of complex numbers and quaternions, rotations and reflections of Rn, the orthogonal, unitary and symplectic groups. Tangent spaces to matrix groups, Lie algebras and the exponential map. If time permits: the structure of Lie algebras and the matrix logarithm. Recommended Prerequisite(s): MATH 354 or MATH 355 (may be taken the same semester).
Course URL: math.rice.edu

MATH 368 - TOPICS IN COMBINATORICS
Short Title: TOPICS IN COMBINATORICS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Topics chosen from Euclidean, spherical, hyperbolic, and projective geometry, with emphasis on the similarities and differences found in various geometries. Isometries and other transformations are studied and used throughout. The history of the development of geometric ideas is discussed. This course is strongly recommended for prospective high school teachers.

MATH 370 - CALCULUS ON MANIFOLDS
Short Title: CALCULUS ON MANIFOLDS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (MATH 302 or MATH 321 or MATH 331) and (MATH 354 or MATH 355)
Description: Differentiation and integration on manifolds: calculus on Rn, exterior differentiation, differentiation forms, vector fields, Stokes' theorem.
Course URL: math.rice.edu

MATH 371 - LIE THEORY
Short Title: LIE THEORY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 306 or MATH 356
Description: Study of classical groups as symmetries of Euclidean spaces. Geometry of complex numbers and quaternions, rotations and reflections of Rn, the orthogonal, unitary and symplectic groups. Tangent spaces to matrix groups, Lie algebras and the exponential map. If time permits: the structure of Lie algebras and the matrix logarithm. Recommended Prerequisite(s): MATH 354 or MATH 355 (may be taken the same semester).
Course URL: math.rice.edu

MATH 373 - ELLIPTIC CURVES
Short Title: ELLIPTIC CURVES
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 306 or MATH 356
Description: Elliptic curves are central to modern number theory and instrumental in the proof of Fermat's Last Theorem. Topics will include: The addition law, solutions over the rational numbers, explicit computations, applications to factorization and cryptography; if time permits, infinite series attached to elliptic curves and the Birch-Swinnerton-Dyer conjecture. Recommended Prerequisite(s): 200 Level Math Course
Course URL: math.rice.edu

MATH 374 - INTRODUCTION TO REPRESENTATION THEORY
Short Title: INTRO TO REPRESENTATION THEORY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 306 or MATH 356
Description: First course in representation theory, with an emphasis on concrete examples, especially the symmetric group. Topics include representations of finite groups, characters, classification, symmetric functions, Young symmetrizers, and Schur-Weyl duality. Prior experience with proofs is necessary; some familiarity with linear or abstract algebra would be helpful, but can be acquired along the way. Recommended Prerequisite(s): Linear Algebra (MATH 221, MATH 354, or MATH 355) and MATH 356.
Course URL: math.rice.edu
MATH 376 - ALGEBRAIC GEOMETRY
Short Title: ALGEBRAIC GEOMETRY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (MATH 354 or MATH 355) and (MATH 306 or MATH 356)
Description: An introduction to algebraic geometry, with an emphasis on algorithms. Topics include: polynomial rings and ideals, Groebner bases and elimination theory, affine varieties, Hilbert's Nullstellensatz, and the Algebra-Geometry correspondence. Projective varieties; Bezout's Theorem.

MATH 381 - INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS
Short Title: INTRO PARTIAL DIFF EQUATIONS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 222 or MATH 354 or MATH 302
Description: Study of the differential geometry of curves and surfaces in R3. Includes an introduction to the concept of curvature and thorough treatment of the Gauss-Bonnet theorem.
Course URL: math.rice.edu

MATH 382 - COMPUTATIONAL COMPLEX ANALYSIS
Short Title: COMPUTATIONAL COMPLEX ANALYSIS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 321 or MATH 331
Description: Study of the Cauchy integral theorem, Taylor series, residues, as well as the evaluation of integrals by means of residues, conformal mapping, and application to two-dimensional fluid flow. Graduate/Undergraduate Equivalency: MATH 427, MATH 517. Recommended Prerequisite(s): MATH 212 OR 221. Mutually Exclusive: Credit cannot be earned for MATH 382 and MATH 427/MATH 517.
Course URL: math.rice.edu

MATH 390 - UNDERGRADUATE COLLOQUIUM
Short Title: UNDERGRADUATE COLLOQUIUM
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Lectures by undergraduate students on mathematical topics not usually covered in other courses. Presentation of one lecture and attendance at all sessions required. Repeatable for Credit.
MATH 423 - PARTIAL DIFFERENTIAL EQUATIONS I
Short Title: PARTIAL DIFFERENTIAL EQNS I
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level

MATH 424 - TOPICS IN PARTIAL DIFFERENTIAL EQUATIONS
Short Title: TOPICS IN PARTIAL DIFF EQNS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 423
Description: Continuation of MATH 423. Repeatable for Credit.
Course URL: math.rice.edu

MATH 425 - INTEGRATION THEORY
Short Title: INTEGRATION THEORY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 321 or MATH 331
Description: Lebesgue theory of measure and integration. Graduate/Undergraduate Equivalency: MATH 515. Mutually Exclusive: Credit cannot be earned for MATH 425 and MATH 515.
Course URL: math.rice.edu

MATH 426 - TOPICS IN REAL ANALYSIS
Short Title: TOPICS IN REAL ANALYSIS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 425
Description: Content varies from year to year. May include Fourier series, harmonic analysis, probability theory, advanced topics in measure theory, ergodic theory, and elliptic integrals. Graduate/Undergraduate Equivalency: MATH 516. Mutually Exclusive: Credit cannot be earned for MATH 426 and MATH 516. Repeatable for Credit.
Course URL: math.rice.edu

MATH 427 - COMPLEX ANALYSIS
Short Title: COMPLEX ANALYSIS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 354 or MATH 222 or MATH 302
Description: Study of the Cauchy-Riemann equation, power series, Cauchy’s integral formula, residue calculus, and conformal mappings. Emphasis on the theory. Graduate/Undergraduate Equivalency: MATH 382, MATH 517. Recommended Prerequisite(s): MATH 321 or MATH 331. Mutually Exclusive: Credit cannot be earned for MATH 427 and MATH 382/MATH 517.
Course URL: math.rice.edu

MATH 428 - TOPICS IN COMPLEX ANALYSIS
Short Title: TOPICS IN COMPLEX ANALYSIS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 382 or MATH 427
Description: Special topics include Riemann mapping theorem, Runge’s Theorem, elliptic function theory, prime number theorem, Riemann surfaces, et al. Graduate/Undergraduate Equivalency: MATH 518. Mutually Exclusive: Credit cannot be earned for MATH 428 and MATH 518. Repeatable for Credit.

MATH 435 - DYNAMICAL SYSTEMS
Short Title: DYNAMICAL SYSTEMS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Existence and uniqueness for solutions of ordinary differential equations and difference equations, linear systems, nonlinear systems, stability, periodic solutions, bifurcation theory. Theory and theoretical examples are complemented by computational, model driven examples from biological and physical sciences. Cross-list: CAAM 435. Recommended Prerequisite(s): (MATH 212 or MATH 221) and (CAAM 335 or MATH 355 or MATH 354) and (MATH 302 or MATH 321 or MATH 331)
Course URL: math.rice.edu
MATH 443 - GENERAL TOPOLOGY  
Short Title: GENERAL TOPOLOGY  
Department: Mathematics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): MATH 321 or MATH 331  
Description: Study of basic point set topology. Includes a treatment of cardinality and well ordering, as well as metrization. Graduate/Undergraduate Equivalency: MATH 538. Mutually Exclusive: Credit cannot be earned for MATH 443 and MATH 538.  
Course URL: math.rice.edu

MATH 444 - GEOMETRIC TOPOLOGY  
Short Title: GEOMETRIC TOPOLOGY  
Department: Mathematics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): MATH 306 or MATH 356  
Description: Introduction to algebraic methods in topology and differential topology. Elementary homotopy theory. Covering spaces. Graduate/Undergraduate Equivalency: MATH 539. Recommended Prerequisite(s): MATH 443. Mutually Exclusive: Credit cannot be earned for MATH 444 and MATH 539.  
Course URL: math.rice.edu

MATH 445 - ALGEBRAIC TOPOLOGY  
Short Title: ALGEBRAIC TOPOLOGY  
Department: Mathematics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): MATH 444  
Description: Introduction to the theory of homology. Includes simplicial complexes, cell complexes and cellular homology and cohomology, as well as manifolds, and Poincare duality. Graduate/Undergraduate Equivalency: MATH 540. Mutually Exclusive: Credit cannot be earned for MATH 445 and MATH 540.  
Course URL: math.rice.edu

MATH 463 - ABSTRACT ALGEBRA II  
Short Title: ABSTRACT ALGEBRA II  
Department: Mathematics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): MATH 356  

MATH 464 - ABSTRACT ALGEBRA III  
Short Title: ABSTRACT ALGEBRA III  
Department: Mathematics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): MATH 463  
Description: Continuation of MATH 463. Tensor and exterior algebra, introductory commutative algebra, structure of modules, and elements of homological algebra. Additional advanced topics may include representations of finite groups and affine algebraic geometry. Graduate/Undergraduate Equivalency: MATH 564. Mutually Exclusive: Credit cannot be earned for MATH 464 and MATH 564.

MATH 465 - TOPICS IN ALGEBRA: INTRODUCTION TO ALGEBRAIC GEOMETRY  
Short Title: TOPICS IN ALGEBRA  
Department: Mathematics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Varieties as solution sets of systems of polynomial equations, varieties in projective space, rational and regular functions, maps of varieties, local properties and singularities. Graduate/Undergraduate Equivalency: MATH 565. Mutually Exclusive: Credit cannot be earned for MATH 465 and MATH 565. Repeatable for Credit.

MATH 466 - TOPICS IN ALGEBRA II  
Short Title: TOPICS IN ALGEBRA II  
Department: Mathematics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Content varies from year to year. Graduate/Undergraduate Equivalency: MATH 566. Mutually Exclusive: Credit cannot be earned for MATH 466 and MATH 566.

MATH 468 - POTPOURRI  
Short Title: POTPOURRI  
Department: Mathematics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course deals with miscellaneous special topics not covered in other courses. Repeatable for Credit.
MATH 471 - MATHEMATICS OF APERIODIC ORDER
Short Title: MATHEMATICS OF APERIODIC ORDER
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 321 or MATH 354 or MATH 355
Description: Mathematical models of quasicrystals, whose discovery in the early 1980's led to a paradigm shift in materials science. Topics include: classical theory of ordered structures (i.e., lattices modeling crystals), Delone subsets and tilings of Euclidean space, aperiodically ordered structures generated by inflation or cut-and-project schemes. Graduate/Undergraduate Equivalency: MATH 571. Recommended Prerequisite(s): MATH 356. Mutually Exclusive: Credit cannot be earned for MATH 471 and MATH 571.

MATH 479 - MATHEMATICS UNDERGRADUATE RESEARCH
Short Title: MATH UNDERGRADUATE RESEARCH
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: In depth investigation of a particular area of mathematics of mutual interest to the student and the faculty adviser. Instructor Permission Required. Repeatable for Credit.
Course URL: math.rice.edu

MATH 490 - SUPERVISED READING
Short Title: SUPERVISED READING
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MATH 498 - RESEARCH THEMES IN THE MATHEMATICAL SCIENCES
Short Title: RESEARCH THEMES IN MATH. SCI.
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A seminar course that will cover selected theme of general research in the mathematical sciences from the perspectives of mathematics, computational and applied mathematics and statistics. The course may be repeated multiple times for credit. Cross-list: CAAM 498, STAT 498. Graduate/Undergraduate Equivalency: MATH 698. Mutually Exclusive: Credit cannot be earned for MATH 498 and MATH 698. Repeatable for Credit.

MATH 499 - MATHEMATICAL SCIENCES VIGRE SEMINAR
Short Title: MATHEMATICAL SCIENCES
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MATH 500 - DIFFERENTIAL GEOMETRY
Short Title: DIFFERENTIAL GEOMETRY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topic to be announced. Repeatable for Credit.

MATH 501 - TOPICS IN DIFFERENTIAL GEOMETRY
Short Title: TOPICS DIFFERENTIAL GEOMETRY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topic to be announced. Repeatable for Credit.

MATH 502 - TOPICS IN DIFFERENTIAL GEOMETRY
Short Title: TOPICS DIFFERENTIAL GEOMETRY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topic to be announced. Repeatable for Credit.

MATH 513 - PARTIAL DIFFERENTIAL EQUATIONS I
Short Title: PARTIAL DIFFERENTIAL EQNS I
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
MATH 515 - INTEGRATION THEORY
Short Title: INTEGRATION THEORY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate/Undergraduate Equivalency: MATH 425. Mutually Exclusive: Credit cannot be earned for MATH 515 and MATH 425.

MATH 516 - TOPICS IN REAL ANALYSIS
Short Title: TOPICS IN REAL ANALYSIS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MATH 425
Description: Graduate/Undergraduate Equivalency: MATH 426. Mutually Exclusive: Credit cannot be earned for MATH 516 and MATH 426.

MATH 517 - COMPLEX ANALYSIS
Short Title: COMPLEX ANALYSIS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate/Undergraduate Equivalency: MATH 382, MATH 427. Mutually Exclusive: Credit cannot be earned for MATH 517 and MATH 382/MATH 427.

MATH 518 - TOPICS IN COMPLEX ANALYSIS
Short Title: TOPICS IN COMPLEX ANALYSIS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MATH 382 or MATH 427
Description: Graduate/Undergraduate Equivalency: MATH 428. Mutually Exclusive: Credit cannot be earned for MATH 518 and MATH 428.
Repeatable for Credit.

MATH 521 - ADVANCED TOPICS IN REAL ANALYSIS
Short Title: ADV TOPIC: REAL ANALYSIS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topic to be announced. Repeatable for Credit.

MATH 522 - TOPICS IN ANALYSIS
Short Title: TOPICS IN ANALYSIS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topic to be announced. Repeatable for Credit.

MATH 523 - FUNCTIONAL ANALYSIS
Short Title: FUNCTIONAL ANALYSIS
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Banach spaces: review of L^p spaces, linear operators, dual space, Hahn-Banach theorem, weak topologies, Banach-Alaoglu theorem, compact and bounded operators, closed graph theorem; Hilbert spaces: self-adjoint and unitary operators (including spectral theorem), symmetric operators and self-adjoint extensions; if time allows, distributions and Sobolev spaces. Repeatable for Credit.

MATH 524 - TOPICS IN PARTIAL DIFFERENTIAL EQUATIONS
Short Title: TOPICS IN PDE
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topic to be announced. Repeatable for Credit.

MATH 527 - ERGODIC THEORY AND TOPOLOGICAL DYNAMICS
Short Title: ERGODIC THRY&TOPOLOGICAL DYN
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topic to be announced. Repeatable for Credit.

MATH 528 - ERGODIC THEORY AND TOPOLOGICAL DYNAMICS
Short Title: ERGODIC THRY&TOPOLOGICAL DYN
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topic to be announced. Repeatable for Credit.

MATH 538 - GENERAL TOPOLOGY
Short Title: GENERAL TOPOLOGY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate/Undergraduate Equivalency: MATH 443. Mutually Exclusive: Credit cannot be earned for MATH 538 and MATH 443.
MATH 539 - GEOMETRIC TOPOLOGY
Short Title: GEOMETRIC TOPOLOGY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MATH 356 and MATH 443
Description: Graduate/Undergraduate Equivalency: MATH 444. Mutually Exclusive: Credit cannot be earned for MATH 539 and MATH 444.

MATH 540 - ALGEBRAIC TOPOLOGY
Short Title: ALGEBRAIC TOPOLOGY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MATH 539
Description: Graduate/Undergraduate Equivalency: MATH 445. Mutually Exclusive: Credit cannot be earned for MATH 540 and MATH 445.

MATH 541 - TOPICS IN TOPOLOGY
Short Title: TOPICS IN TOPOLOGY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topic to be announced. Repeatable for Credit.

MATH 542 - TOPICS IN ADVANCED TOPOLOGY
Short Title: TOPICS IN ADVANCED TOPOLOGY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topic to be announced. Repeatable for Credit.

MATH 543 - TOPICS IN LOW-DIMENSIONAL TOPOLOGY
Short Title: TOPICS IN L-D TOPOLOGY
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MATH 563 - ABSTRACT ALGEBRA II
Short Title: ABSTRACT ALGEBRA II
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MATH 356
Description: Graduate/Undergraduate Equivalency: MATH 463. Mutually Exclusive: Credit cannot be earned for MATH 563 and MATH 463.
MATH 571 - MATHEMATICS OF APERIODIC ORDER
Short Title: MATHEMATICS OF APERIODIC ORDER
Department: Mathematics
Grade Mode: Graduate
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Mathematical models of quasicrystals, whose discovery in the early 1980's led to a paradigm shift in materials science. Topics include: classical theory of ordered structures (i.e., lattices modeling crystals), Delone subsets and tilings of Euclidean space, aperiodically ordered structures generated by inflation or cut-and-project schemes. Graduate/Undergraduate Equivalency: MATH 471. Recommended Prerequisite(s): MATH 356 Mutually Exclusive: Credit cannot be earned for MATH 571 and MATH 471.

MATH 590 - CURRENT MATHEMATICS SEMINAR
Short Title: CURRENT MATHEMATICS SEMINAR
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Lectures on topics of recent research in mathematics delivered by mathematics graduate students and faculty. Repeatable for Credit.

MATH 591 - GRADUATE TEACHING SEMINAR
Short Title: GRADUATE TEACHING SEMINAR
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Discussion on teaching issues and practice lectures by participants as preparation for classroom teaching of mathematics. Repeatable for Credit.

MATH 680 - MATHEMATICS COLLOQUIUM
Short Title: MATHEMATICS COLLOQUIUM
Department: Mathematics
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Presentations of research topics in mathematics and related fields. Repeatable for Credit.

MATH 681 - TOPOLOGY SEMINAR
Short Title: TOPOLOGY SEMINAR
Department: Mathematics
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Presentations of research in topology and related areas. Repeatable for Credit.

MATH 682 - ALGEBRAIC GEOMETRY SEMINAR
Short Title: ALGEBRAIC GEOMETRY SEMINAR
Department: Mathematics
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Presentations of research in algebraic geometry and related areas. Repeatable for Credit.

MATH 683 - GEOMETRY AND ANALYSIS SEMINAR
Short Title: GEOMETRY AND ANALYSIS SEMINAR
Department: Mathematics
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Presentations of research in geometric analysis, mathematical physics, dynamics and related areas. Repeatable for Credit.

MATH 690 - SUPERVISED READING
Short Title: SUPERVISED READING
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MATH 698 - RESEARCH THEMES IN THE MATHEMATICAL SCIENCES
Short Title: RESEARCH THEMES IN MATH. SCI.
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A seminar course that will cover selected theme of general research in the mathematical sciences from the perspectives of mathematics, computational and applied mathematics and statistics. The course may be repeated multiple times for credit. Cross-list: CAAM 698, STAT 698. Graduate/Undergraduate Equivalency: MATH 498. Mutually Exclusive: Credit cannot be earned for MATH 698 and MATH 498. Repeatable for Credit.

MATH 699 - MATHEMATICAL SCIENCES VIGRE SEMINAR
Short Title: MATHEMATICAL SCIENCES
Department: Mathematics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.
MATH 800 - GRADUATE THESIS AND RESEARCH  
Short Title: GRADUATE THESIS AND RESEARCH  
Department: Mathematics  
Grade Mode: Standard Letter  
Course Type: Research  
Credit Hours: 1-15  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Repeatable for Credit.

MBA for Professionals-Evening (MGMP)  
MGMP 500 - MBA-P IMMERSION  
Short Title: MBA-P IMMERSION  
Department: Management  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Intensive Learning Experience  
Credit Hours: 1.5  
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Study of the many factors, which influence how individuals, groups, and teams behave and function in complex organizations and how they can be effectively managed.

MGMP 510 - ORGANIZATIONAL BEHAVIOR  
Short Title: ORGANIZATIONAL BEHAVIOR  
Department: Management  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Study of the many factors, which influence how individuals, groups, and teams behave and function in complex organizations and how they can be effectively managed.

MGMP 511 - ORGANIZATIONAL CHANGE  
Short Title: ORGANIZATIONAL CHANGE  
Department: Management  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Intensive Learning Experience  
Credit Hours: 0.75  
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Emphasizes understanding what constitutes effective organizational designs, considers both the macro designing initiatives and the micro execution of those initiatives. Required for MBA.

MGMP 540 - MANAGERIAL ECONOMICS  
Short Title: MANAGERIAL ECONOMICS  
Department: Management  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: We study production and pricing decisions under different assumptions about firm market power. Emphasis is placed on understanding the relevant costs in firm decision-making. Examples are used from marketing and accounting areas. Required for MBA.

MGMP 543 - FINANCE  
Short Title: FINANCE  
Department: Management  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Introduction to the theory and practice of corporate finance, with emphasis on topics such as valuation, capital budgeting, risk and return, and capital structure. Required for MBA.
MGMP 560 - CORPORATE RESPONSIBILITY
Short Title: CORPORATE RESPONSIBILITY
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the principles of production management and tools for implementation. Required for MBA.

MGMP 570 - OPERATIONS MANAGEMENT
Short Title: OPERATIONS MANAGEMENT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the strategy and practice of management communication. Assignments are based on core courses integrated across the curriculum. Includes individual communication skills assessment and development and team-based oral and written communication instruction. Required for MBA.

MGMP 571 - STRATEGY FORMULATION AND IMPLEMENTATION
Short Title: STRATEGY FORMULATION
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Systematic examination of models and techniques used to analyze a competitive situation within an industry from a strategic perspective. Examines the roles of key players in competitive situations and the fundamentals of analytical and fact-oriented strategic reasoning. Examples of applied competitive and industry analysis are emphasized. Required for MBA.

MGMP 574 - OPERATIONS MANAGEMENT
Short Title: OPERATIONS MANAGEMENT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An exploration of the ethical and legal basis of managerial decision making and the social dimension of the business firm. Required for MBA. Repeatable for Credit.

MGMP 574 - OPERATIONS MANAGEMENT
Short Title: OPERATIONS MANAGEMENT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An exploration of the ethical and legal basis of managerial decision making and the social dimension of the business firm. Required for MBA. Repeatable for Credit.

MGMP 576 - STRATEGIC BUSINESS COMMUNICATIONS II
Short Title: STRATEGIC BUSINESS COMM II
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the strategy and practice of business presentations. Includes frequent oral presentations (both individual and team) and feedback.

MGMP 580 - MARKETING
Short Title: MARKETING
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the key concepts underlying the function of marketing and its interaction with other functions in a business enterprise. Explores marketing’s role in defining, creating, and communicating value to customers. Primarily case-based with capstone simulation exercise, providing a foundation for advanced course work in marketing. Required for MBA.

MGMP 585 - DATA ANALYSIS
Short Title: DATA ANALYSIS
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture/Laboratory
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the strategy and practice of business presentations. Includes frequent oral presentations (both individual and team) and feedback.

MGMP 596 - STRATEGIC BUSINESS COMMUNICATIONS II
Short Title: STRATEGIC BUSINESS COMM II
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the strategy and practice of management communication. Assignments are based on core courses integrated across the curriculum. Includes individual communication skills assessment and development and team-based oral and written communication instruction. Required for MBA.
MGMP 597 - INTEGRATIVE COMPETITIVE EXERCISE ILE
Short Title: ILE
Department: Management
Grade Mode: Standard Letter
Course Type: Intensive Learning Experience
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: This course is designed with two major objectives in mind. First, to thoroughly understand, and be able to competently apply, those statistical methods typically used in the analysis of business data. Secondly, is to affect how you think about problems. If data can help you resolve a business problem, this course should enable you to: structure the problem in a way that facilitates its analysis; specify the data that needs to be analyzed; decide on the statistical technique(s) most appropriate for analyzing the data; apply the technique correctly; and, insightfully interpret the results in terms of their implications for the original problem.

MGMP 600 - EDUCATION LEADERSHIP INDEPENDENT STUDY
Short Title: EDUCATION LEADERSHIP IND STUDY
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Independent Study
Credit Hours: 1.5
Course Level: Graduate
Description: Repeatable for Credit.

MGMP 601 - USING FINANCIAL STATEMENTS TO EVALUATE FIRM PERFORMANCE
Short Title: USING FINANCIAL STATEMENTS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is designed to develop basic skills in financial statement analysis with special emphasis on understanding, organizing and summarizing financial data for decision making purposes related to valuation. The course focuses on financial and accounting analysis which consists of documenting and understanding a firm’s profitability relative to past performance and comparable firms. Ratio analysis, accounting quality, and earnings management are the focal points of this portion of the course.

MGMP 602 - ACCOUNTING-BASED VALUATION
Short Title: ACCOUNTING-BASED VALUATION
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MGMP 601 (may be taken concurrently)
Description: This course covers two major topics: 1) Forecasting financial statements based on a complete historical analysis of the firm; 2) Deriving firm value under a variety of approaches including DCF and residual income valuation (RIV). The prerequisite MGMP 601 may be taken concurrently with MGMP 602.

MGMP 603 - FEDERAL TAXATION
Short Title: FEDERAL TAXATION
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Taxes affect most business decisions in the industrialized world. This course provides the body of tax knowledge that corporate executives and professionals need as a part of basic business decision making. The course is designed for those with no formal tax background and for those whose tax work is dated or has not included a focus on business entities. The course emphasizes corporate tax matters and questions to consider in choosing a business entity. Class members should be tax literate at the end of the course.

MGMP 626 - FINANCING THE STARTUP VENTURE
Short Title: FINANCING THE STARTUP VENTURE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The goal of this course is to provide students with an overview of financing options for startups. The course covers crowdfunding, angel investors, accelerators, and the venture capital industry; the organization and operation of venture capital funds; investment methodology; monitoring and portfolio liquidation.

MGMP 627 - ENTERPRISE EXCHANGE
Short Title: ENTERPRISE EXCHANGE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Repeatable for Credit.

MGMP 645 - INVESTMENTS / PORTFOLIO MANAGEMENT
Short Title: INVESTMENTS / PORTFOLIO MGMT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Review of classic investment theory, with emphasis on measuring & managing investment risk & return. Includes the development of modern portfolio theory & asset pricing models, an introduction to option & futures contracts, market efficiency, & stock evaluation. Repeatable for Credit.
MGMP 651 - FIXED INCOME MANAGEMENT
Short Title: FIXED INCOME MANAGEMENT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Course Level: Graduate
Description: The course provides an in-depth analysis of the concepts that are most often encountered in the market for fixed income securities. The goals of the course are twofold: (i) to illustrate the fundamental concepts that are commonly used for analyzing fixed income instruments; (ii) to investigate how the fundamental concepts are related to the institutional structures that are most often encountered in practice. The course will focus on topics that are most likely to have practical relevance for students once they graduate. The goals are accomplished via a combination of case studies, lectures, problem sets (to be handed in). Some of the topics that will be covered include term structure of interest rate, duration-based analysis, inverse floater, corporate bond markets, mortgage-backed securities. Repeatable for Credit.

MGMP 659 - REAL ESTATE FINANCE
Short Title: REAL ESTATE FINANCE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: This course has two major objectives: First, this course provides an overview of topics related to real estate finance. Specifically, this course provides a detailed description of the Discounted Cash Flow (DCF) model applied to real estate. The DCF model is the main financial decision tool used in the real estate industry and we use it extensively in this course. In addition, this course also describes the connection between financial markets and real estate. A large part of this course is devoted to the study of public traded securities that have their cash flows tied to real property cash flows, such as commercial mortgage-backed securities and REITs. Second, this course is the first elective related to real estate in a series available to Rice MBA students, and hence it briefly overviews basic concepts commonly used in the Real Estate Industry. Repeatable for Credit.

MGMP 684 - BRAND STRATEGY
Short Title: BRAND STRATEGY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Brand Management is an elective class that addresses important branding decisions faced by an organization. Its basic objectives are: 1) to provide students with a complete understanding of the consumer and of how consumers develop brand attitudes and behaviors; 2) to increase understanding of the important issues in planning and evaluating brand strategies; and 3) to provide a forum for students to apply branding strategies in a variety of domains. Particular emphasis is placed in the course on understanding psychological principles at the consumer or customer level that will improve managerial decision-making with respect to brands. One aim of the course is to make these concepts relevant for any type of organization (public or private, large or small, etc).

MGMP 689 - DECISION MODELS
Short Title: DECISION MODELS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Successful management requires the ability to recognize a decision situation, understand its essential features, and make a choice. However, many of these situations - particularly those involving uncertainty and/or complex interactions - may be too difficult to grasp intuitively, and the stakes may be too high to learn by experience. This course introduces spreadsheet modeling, simulation, decision analysis and optimization to represent and analyze such complex problems. The skills learned in this course are applicable in almost all aspects of business and should be helpful in future courses. The course is divided into two parts. In the first part, we discuss the use of decision trees for structuring decision problems under uncertainty. In the second part of the course, we discuss Monte Carlo simulation, a technique for simulating complex, uncertain systems. Throughout the course, we will use Microsoft Excel as a modeling environment, using add-in programs as necessary. Familiarity with Excel is an important prerequisite for this course. Repeatable for Credit.

MGMP 700 - REEP SUMMER INSTITUTE: EDUCATION ENTREPRENEURSHIP
Short Title: EDUCATION ENTREPRENEURSHIP
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
MGMP 701 - COMMUNICATION I ILE
Short Title: COMMUNICATION I ILE
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Intensive Learning Experience
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Internal and Interpersonal Communications Students discuss and practice effective ways to communicate both to groups within and organization and one-on-one. Content includes analyzing pitfalls of hierarchical communication; listening skills; productive vs. unproductive feedback; etc. Repeatable for Credit.

MGMP 703 - CORPORATE RESPONSIBILITY II
Short Title: CORPORATE RESPONSIBILITY II
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Intensive Learning Experience
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: This ILE expands on the topics of the first ILE with three learning objectives in mind: 1. Heightened moral imagination defined as the ability to recognize ethical dilemmas / moral problems in business situations. 2. Increased skill at analyzing those dilemmas / problems in terms of economic outcomes, legal requirement, and moral duties through use of ethical decision-making frameworks. 3. Increased skill at ethical leadership as an executive / manager in presenting your moral point of view to others in order to best develop and maintain an ethical climate / culture in all our organizations, communities, and societies. Repeatable for Credit.

MGMP 704 - COMMUNICATION II ILE
Short Title: COMMUNICATION II ILE
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Intensive Learning Experience
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Crisis Communications Students discuss and practice the methodology of managing crisis in business settings. Both proactive and reactive actions are reviewed; historic examples of both good and bad communication in a crisis are studied. Guest lecturer will discuss crisis communications. Repeatable for Credit.

MGMP 707 - COMMUNICATIONS ILE
Short Title: COMMUNICATIONS ILE
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Intensive Learning Experience
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Intercultural Communications Students focus on understanding how to conduct business in cultures different from their own. Content includes cultural and emotional intelligence; cross-cultural exercises; and ways to approach and learn about foreign culture and its related business practices.

MGMP 708 - LEADERSHIP ILE
Short Title: LEADERSHIP ILE
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Intensive Learning Experience
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The purpose of this course is to teach you some skills and give you some hands on practice around leading others in group settings. The course will focus on Fundamental Leadership Skills: Influence and Vision; Fundamental Leadership Skills: Leading a Key Decision; Fundamental Leadership Skills: Interpretive Leading under Crisis; Putting it Together: Climbing Mt. Everest.

MGMP 709 - NEGOTIATIONS ILE
Short Title: NEGOTIATIONS ILE
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Intensive Learning Experience
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Managers and professionals cannot be successful without possessing effective negotiation skills and strategies. The purpose of this ILE is to help one understand the processes of negotiation in a variety of settings. The ILE will cover a broad spectrum of negotiation problems faced by managers and professionals. This ILE helps students develop negotiation skills by tackling a series important topics central to effective negotiation.

MGMP 789 - GLOBAL FIELD EXPERIENCE
Short Title: GLOBAL FIELD EXPERIENCE
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students in the EMBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This unique experiential learning opportunity requires students to apply what was learned in the first year of the program through consulting projects on the ground in a designated country. The course fosters a global mindset and further develops the ability to tackle business challenges in dynamic, divers and complex environments. Department Permission Required.
MGMP 798 - FIRST YEAR CAPSTONE
Short Title: FIRST YEAR CAPSTONE
Department: Management
Grade Mode: Standard Letter
Course Type: Intensive Learning Experience
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: This core course uses a capstone business strategy simulation conducted in close proximity to the required formulation/implementation course. Student teams operate simulated companies in a highly competitive industry. Emphasis is placed on integrating strategy, financial control, operational excellence, and team building. Teams make presentations at the end of the course.

MGMP 799 - MBA-P PROGRAM CAPSTONE
Short Title: MBA-P PROGRAM CAPSTONE
Department: Management
Grade Mode: Standard Letter
Course Type: Intensive Learning Experience
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The MBA-P Capstone course gives students the opportunity to apply their multi-functional (strategy, finance, marketing, organizational behavior, etc.) knowledge that they have gained in the program and their own professional experience to solve a complex, real-world managerial problem. However, this course will provide a unique twist to challenge the students - the real-world problem will be faced by a non-corporate, Houston-based, community organization. Students will work with senior executives at these organizations over the course of the semester to develop actionable solutions to strategic challenges facing these organizations.

MBA for Professionals-Weekend (MGMW)

MGMW 500 - MBAP-W IMMERSION
Short Title: MBAP-W IMMERSION
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Financial statements are a key source of information about the economic activities of a firm. This course addresses the construction and interpretation of financial statements. The goal of the course is not to train you to become an accountant. Rather, the course should equip you to become an informed user of financial statement information. Because annual reports are somewhat formidable, we will study how firms present the information for various accounts in their financial statements, including the footnotes. By the end of the course, you should have a basic understanding of financial statements and the ability to use them for decision making. Fulfillment of these objectives involves acquiring several skills. The course will emphasize (i) gaining familiarity with the types of transaction firms engage in, (ii) the mapping of transactions into accounting numbers, (iii) understanding the accounting-related choices that managers have for transactions and the rationale behind the various methods, (iv) developing fluency in accounting terminology, and (v) appreciating the complexity of accounting due to the (often considerable) discretion and judgment involved in choosing among alternative accounting methods, making estimates, and disclosing information in financial statements.

MGMW 501 - FINANCIAL ACCOUNTING
Short Title: FINANCIAL ACCOUNTING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Financial statements are a key source of information about the economic activities of a firm. This course addresses the construction and interpretation of financial statements. The goal of the course is not to train you to become an accountant. Rather, the course should equip you to become an informed user of financial statement information. Because annual reports are somewhat formidable, we will study how firms present the information for various accounts in their financial statements, including the footnotes. By the end of the course, you should have a basic understanding of financial statements and the ability to use them for decision making. Fulfillment of these objectives involves acquiring several skills. The course will emphasize (i) gaining familiarity with the types of transaction firms engage in, (ii) the mapping of transactions into accounting numbers, (iii) understanding the accounting-related choices that managers have for transactions and the rationale behind the various methods, (iv) developing fluency in accounting terminology, and (v) appreciating the complexity of accounting due to the (often considerable) discretion and judgment involved in choosing among alternative accounting methods, making estimates, and disclosing information in financial statements.

MGMW 502 - MANAGERIAL ACCOUNTING
Short Title: MANAGERIAL ACCOUNTING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course provides an introduction to accounting systems that managers use to support decision making and to align behaviors. The objective of cost management systems is to provide information about costs; including, but not limited to costs of products and services. While financial accounting requires that product cost information be accumulated in particular ways for external reporting, these approaches often provide inadequate information for managing the firm. Management accounting is distinct from financial accounting in its focus on internal (to the firm) uses of accounting and nonfinancial data and in the relative absence of external rules-making bodies such as the SEC or FASB and external monitors such as public accounting firms.
### MGMW 510 - ORGANIZATIONAL BEHAVIOR
**Short Title:** ORG. BEHAVIOR  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Issues involving power and influence, norms and values, and incentives and rewards shape individual and group behavior in organizations. Throughout your work life, you have accrued a number of experiences and insights concerning the “human” side of management. In this course, we will discuss your experiences, evaluate and interpret them, and develop a toolkit that will further enhance your ability to make effective decisions, motivate and lead employees, and understand the processes underlying social interaction in organizations.

### MGMW 511 - ORGANIZATIONAL CHANGE
**Short Title:** ORGANIZATIONAL CHANGE  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 0.75  
**Restrictions:** Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Over the course of your life you have already encountered—and will continue to encounter—the need to lead change or, at a minimum, adapt to change. Chances are good that you already do an adequate job navigating change and may have experienced satisfactory or even better-than-expected results. However, by applying frameworks that elevate your abilities beyond the “common sense” level of performance, you can markedly improve the degree and/or frequency of your success. The primary goal of this course is to help you become an effective leader of organizational change. In this very brief class, you will learn, discuss and put into action an important framework for managing organizational change. Your participation in this course will: 1) provide you with an effective framework for managing organizational change. 2) improve your competencies as both a leader and participant in change. Repeatable for Credit.

### MGMW 540 - MANAGERIAL ECONOMICS
**Short Title:** MANAGERIAL ECONOMICS  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Managerial economics deals with the application of microeconomic analysis to managerial decision-making. It is therefore a very broad subject and serves as the foundation for making decisions in finance, accounting, marketing, and management/strategy.

### MGMW 541 - ECONOMIC ENVIRONMENT OF BUSINESS
**Short Title:** ECONOMIC ENV. OF BUSINESS  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** EEB stresses an understanding of the major macroeconomic forces affecting business in today’s global economy. Fluency in major macroeconomic concepts and forces enhances business decision making in the globally competitive product, financial, and labor markets that characterize the modern business environment. With this in mind, the learning objectives for the course include an understanding of 1) the key economic policy goals and how they are related: low unemployment, price stability and long-term sustainable growth; 2) the primary economic policy tools: fiscal policy and monetary policy; and 3) key economy-wide prices: inflation, interest rates, and exchange rates. Repeatable for Credit.

### MGMW 543 - FINANCE
**Short Title:** FINANCE  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** The objective of this course is to introduce you to the theory and practice of corporate finance, and to provide you with a set of analytical tools necessary to answer the most important questions related to firms’ financing and investment policies. The theory of corporate finance consists of the following building blocks: Valuation, Investment Decisions, Risk and Return, Financing Decisions, Derivative Securities.

### MGMW 560 - CORPORATE RESPONSIBILITY
**Short Title:** CORPORATE RESPONSIBILITY  
**Department:** Management  
**Grade Mode:** Satisfactory/Unsatisfactory  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** MGMW 560 is an interdisciplinary, interactive study of business ethics and the social responsibility of business organizations. It is not designed to dictate individual values, but to show how values can be integrated effectively in successful business decision-making. It encompasses an in-depth examination of the sorts of ethical conflicts that arise in business and an exploration of the interplay between professional and applied ethics, law and management. Emphasis is placed on consideration of stakeholder concerns and the development of personal ethical decision-making skills. Repeatable for Credit.
MGMW 561 - BUSINESS - GOVERNMENT RELATIONS
Short Title: BUS - GOVERNMENT RELATIONS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to Graduate level students.
Course Level: Graduate
Description: MGMW 561 is a study of the relationship between business and government and its impact on the formation of public policy. The course examines how business issues are influenced by: political structures and institutions, information, relationships, stakeholders, crisis, media and ethics. Students will participate in a Congressional simulation exercise and create an issue management plan that applies class lectures, readings and independent research to an issue of their choice.

MGMW 570 - COMPETITIVE STRATEGY
Short Title: COMPETITIVE STRATEGY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The field of strategic management explores how firms achieve competitive advantage in a dynamic and complex environment from the general manager's perspective. This course is organized around fundamental frameworks to assist you in analyzing a wide range of strategic issues facing a firm. It will: 1) Cover theories for in-depth industry analysis, for anticipating and predicting future industry developments; 2) Examine some of the firm specific underpinnings of competitive advantage and growth in both domestic and international settings; 3) Explore some of the challenges in implementing the strategy that has been formulated. Nevertheless, the best analysis in the world will have little effect if it cannot be communicated to others. Managers must be able to articulate their views coherently and persuasively, and they must be skilled at understanding and critiquing other points of view. Management is a "verbal sport," perhaps 90% of a typical manager's day is consumed by oral communication. Time is often scarce. You must learn to make convincing arguments and to make them quickly, or the merits of your ideas are likely to become simply irrelevant. This skill takes practice, and we will place a great deal of emphasis on it in class.

MGMW 571 - STRATEGY FORMULATION AND IMPLEMENTATION
Short Title: STRATEGY FORMULATION
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: The central concern of strategic management is to help companies succeed in competitive environments. Hence, the purpose of the course is to expose students to core concepts, ideas and analytical techniques that can be used to create sustainable advantage and growth in difficult competitive environments. The perspective adopted is that of a general manager who has overall responsibility for the performance of the firm as whole. To this end, the course will attempt to build students' ability to develop, evaluate, and implement value-creating strategies at the business and corporate level. In doing so, the course will not only introduce new or advanced concepts in strategy, but also review and build upon some of the concepts students have already studied in the first core course in strategy. Given the integrative nature of strategic management, we shall attempt to establish links with important concepts that students have been exposed to in other functional areas.

MGMW 574 - OPERATIONS
Short Title: OPERATIONS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course facilitates the development of ideas, concepts, analytic methods and skills needed to manage the effective integration of technology, people, and operations. The aim is to (a) familiarize you with problems and issues confronting operations managers, and (b) provide you with language, concepts, insights and tools to deal with these issues in order to gain competitive advantage through operations. The course will consider both the development and manufacture of products as well as the creation and delivery of services.

MGMW 580 - MARKETING
Short Title: MARKETING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is built around the premise that providing superior value to customers is a central means of creating value for the firm's stakeholders. The course focuses on marketing strategy—the strategic decision of what value to provide, how to provide it, and to whom. You will lean the importance of balancing effectiveness and efficiency through formulation, implementation, evaluation, and control of marketing mix programs directed at target segments.
MGMW 594 - STRATEGIC BUSINESS COMMUNICATION
Short Title: STRAT BUSINESS COMMUNICATION
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture/Laboratory
Credit Hours: 0.75
Restrictions: Students in the MBA or PMBA programs may not enroll. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the strategy and practice of business presentations. Includes frequent oral presentations (both individual and team) and feedback.

MGMW 595 - DATA ANALYSIS
Short Title: DATA ANALYSIS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The objective of this course is to help you learn to analyze data and use methods of statistical inference in making business decisions.

MGMW 596 - STRATEGIC BUSINESS COMMUNICATIONS II
Short Title: STRATEGIC BUSINESS COMM II
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The goal of the course is to ensure that students possess the communications knowledge and skills to perform effectively in a variety of roles in your organizations. By the end of the Rice MBA for Professionals program, students should be able to: Communicate on the basis of sound strategic thinking; Create and deliver both individual and team presentations confidently and persuasively; Write strategic, effective emails; Use PowerPoint® effectively as a tool to support content; Participate constructively in team activities; Provide meaningful peer feedback

MGMW 597 - ICE ILE
Short Title: ICE ILE
Department: Management
Grade Mode: Standard Letter
Course Type: Intensive Learning Experience
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: The Ice Cream Game is a realistic, competitive game set in a Marketing Context. Student teams have a fixed budget to spend on Production and Advertising across each of three different time periods. They control: 1) How many different product types they offer (up to 4); 2) What specific raw material ingredient combinations make up those products; 3) How many units of each product type to produce; 4) What price to charge; 5) How much money to allocate to advertising (if any) for each product in each media; and, 6) How much to spend stressing each product attribute. All teams compete with each other for share, sales, and profit in a world composed of three segments which (may) differ in their preferences – thus each team's strategy can definitely affect all the other team's results. The game allows the student to apply what they have learned in Data Analysis, Marketing, Economics, Strategy, and Organization Behavior all in a world where both analysis and creativity are important ingredients in the recipe for success.

MGMW 700 - 2ND YEAR IMMERSION
Short Title: 2ND YEAR IMMERSION
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Intensive Learning Experience
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Repeatable for Credit.

MGMW 701 - COMMUNICATIONS
Short Title: COMMUNICATIONS
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: In this course students will explore current topics in business communications. The course applies theory and research in business communications to everyday business communication practice. Individual sessions focus on the following issues: Internal Corporate Communications and Web 2.0; Crisis Communications; Cross-Cultural Communications; Interpersonal Communications in Business. Students will be expected to conduct research, analyze case studies, and present their findings. The course strives to teach knowledge and skills immediately applicable to solving business communication problems in the 21st century workplace. Repeatable for Credit.
MGMW 706 - LEADERSHIP
Short Title: LEADERSHIP
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.

Description: This course aims to develop a more thorough understanding of leadership and the leadership process. Through this exploration, it is hoped that students will come to understand themselves better within the leadership context (i.e., as a follower, as a self-leader, and as a leader of others).

MGMW 709 - NEGOTIATIONS
Short Title: NEGOTIATIONS
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.

Course Level: Graduate

Description: Negotiating is an important part of our everyday lives, whether we realize this or not. As research tends to show, however, most of us are often not as effective as we could be in negotiation situations. The purpose of this course is simply to improve your ability to negotiate in ways that are consistent with the demands of the situation and your own personal values. The course is designed around the premise that negotiation is a science and an art. The assigned readings are informed by the latest research on negotiations. The exercises and other learning activities were chosen to help you gain a feel for how this science informs the practice of securing agreements between interdependent parties. Repeatable for Credit.

MGMW 798 - FIRST YEAR CAPSTONE
Short Title: FIRST YEAR CAPSTONE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.

Course Level: Graduate

Description: The goal of MGMW 798: First Year Capstone Course is to deliver an applied learning educational experience that provides broad functional and foundational coverage of first year MBA core courses. In order to be successful, students must be able to demonstrate the following: (1) integrating concepts across business functional areas, (2) articulating value and solicit buy in for their plan internally and externally, and (3) demonstrating results from a strategic plan.

MGMW 799 - PROGRAM CAPSTONE
Short Title: PROGRAM CAPSTONE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

Course Level: Graduate

Description: The MBA-P Capstone course gives students the opportunity to apply the multi-functional (strategy, finance, marketing, organizational behavior, etc.) knowledge that they have gained in the program and their own professional experience to solve a complex, real-world managerial problem. However, this course provides a unique twist to further challenge the students — the real-world problem is based on a Houston-based, social oriented community organization. Students will work with senior executives at these organizations and the course instructors through the semester to develop thorough and actionable solutions to the strategic challenges facing these organizations. For instance, cases include growth strategies, turnaround strategies, business plans for major programs, alliance/partnership strategies, and entrepreneurial start-ups. Capstone organizations come from many different parts of the community, including education/childhood development, healthcare, social services, and environment/conservation, as well as come in many different sizes.

Mechanical Engineering (MECH)

MECH 200 - CLASSICAL THERMODYNAMICS
Short Title: CLASSICAL THERMODYNAMICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Lower-Level

Description: Explication of the fundamental laws of classical thermodynamics and deductions from them. Includes applications with particular attention to pure substances. Required for mechanical engineering majors. Department Permission Required. Recommended Prerequisite(s): PHYS 101 and PHYS 102.

MECH 211 - ENGINEERING MECHANICS
Short Title: ENGINEERING MECHANICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Lower-Level

Prerequisite(s): (PHYS 101 or PHYS 111 or PHYS 125 or PHYS 141) and MATH 101 and MATH 102

Description: The study equilibrium of static systems, the dynamics of a particle and particle systems, and rigid-body dynamics. Required for mechanical engineering and materials science and engineering majors. Cross-list: CEVE 211.
MECH 308 - SENIOR DESIGN JUNIOR OBSERVERS
Short Title: SENIOR DESIGN JUNIOR OBSERVERS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MECH 311 - MECHANICS OF SOLIDS AND STRUCTURES
Short Title: MECHANICS OF SOLIDS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MECH 211 or CEVE 211
Description: Analysis of stress and the deformation of solids with applications to beams, circular shafts, and columns. Open only to mechanical engineering and civil engineering majors. Required for mechanical engineering majors. Cross-list: CEVE 311.

MECH 331 - JUNIOR LABORATORY I
Short Title: JUNIOR LABORATORY I
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Instruction in static and impact testing of engineering materials. Includes beam deflection and shear center experiments, as well as the application and testing of strain gauges. Required for mechanical engineering majors in B.S. program. Department Permission Required.

MECH 332 - JUNIOR LABORATORY II
Short Title: JUNIOR LABORATORY II
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MECH 371
Description: Instruction in fluid mechanics and thermodynamics. Students work in groups and perform classic experiments in fluid flow. This laboratory course provides experimental support to MECH 371. Required course for mechanical engineering majors in B.S. program. See on-line registration for sections.

MECH 340 - INDUSTRIAL PROCESS LAB
Short Title: INDUSTRIAL PROCESS LAB
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Enrollment is limited to students with a major in Mechanical Engineering. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Practical experience in, and observation of, selected industrial processes. Must sign up in department office at the beginning of registration for sections; each section is limited to 8 students. Open only to mechanical engineering majors. Required for mechanical engineering majors in B.S. program. Final registration confirmed after the first week's organizational meeting. Meeting announcements posted in the MEMS department.

MECH 343 - MODELING OF DYNAMIC SYSTEMS
Short Title: MODELING OF DYNAMIC SYSTEMS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (MECH 211 or CEVE 211) and MECH 200 and MATH 211
Description: Energy-based modeling of dynamic systems. The focus of the course will be mechanical systems and electrical circuits, but will also involve fluid, thermal and other domains. The course will introduce modeling and simulation of systems via MATLAB, Simulink, and Labview, and an introduction to systems theory. Modeling and simulation of systems via MATLAB, and an introduction to systems theory. Includes laboratory assignments. Required for mechanical engineering majors in B.S. program. Recommended Prerequisite(s): CAAM 335.

MECH 371 - FLUID MECHANICS I
Short Title: FLUID MECHANICS I
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MECH 200 and (MECH 211 or CEVE 211) and MATH 212
Description: Introduction to fluid statics and dynamics. Includes the development of the fundamental equations of fluid mechanics and their application to problems of engineering interest. Required for mechanical engineering majors in B.S. program. Department Permission Required.

MECH 373 - ACOUSTICS
Short Title: ACOUSTICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Basics of technical acoustics, including generation, propagation, reception and reproduction of sound, speech and hearing, musical and architectural acoustics, and noise control. Offered alternate years.
MECH 380 - INTRODUCTION TO MECHANICAL EFFECTS IN TISSUES
Short Title: INTRO TO MECHANICAL EFFECTS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MECH 211 and MECH 311 or CEVE 300
Description: Development of a general background in physiology and advanced mechanics for applications in medicine. Includes bone mechanics in remodeling, cartilage and ligament mechanics, and muscle mechanics, as well as an on paper design project on a subject selected by students.

MECH 383 - INTRODUCTION TO BIOMEDICAL INSTRUMENTATION AND MEASUREMENT TECHNIQUES
Short Title: BIOMED INSTRUMENT&MESURE TECHN
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 381
Description: Review of basic sensors, measurement principles and analog electronics using operational amplifiers. Includes design problems using operational amplifier circuits (e.g. instrumentation and isolation amplifiers, comparators, timer circuits). Introduction to development of virtual instruments (VIs) using LabView. Discussion of micro and macro-biopotential electrodes, cell cytometry, the measurement of blood pressure, blood flow, and heart sounds, temperature, and the principles of electrical safety (e.g. micro and macro-shock hazards in the clinical environment). Includes discussion of pulmonary instrumentation and medical applications of ultrasound. Two lab exercises and a term project required.

MECH 400 - ADVANCED MECHANICS OF MATERIALS
Short Title: ADV MECHANICS OF MATERIALS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (MECH 211 or CEVE 211) and (MECH 311 or CEVE 311)
Description: Advanced topics in solid mechanics and strength of materials including energy methods, principle of virtual work, conservation laws, constitutive modeling, aspects of elasticity theory, stability and fracture mechanics with application to the analysis and design of reliable structures. Cross-list: CEVE 400. Graduate/Undergraduate Equivalency: MECH 500. Mutually Exclusive: Credit cannot be earned for MECH 400 and MECH 500.

MECH 401 - MECHANICAL DESIGN APPLICATIONS
Short Title: MECHANICAL DESIGN APPLICATIONS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MECH 311 or CEVE 311
Description: Brief review of solid mechanics with introduction to failure theories and fatigue analysis. The principles of mechanics are applied to the design of machine elements. A semester design project requires using the analysis tools learned in the course. Required for mechanical engineering majors in B.S. program.

MECH 403 - COMPUTER AIDED DESIGN
Short Title: COMPUTER AIDED DESIGN
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Investigation of the integration of the computer into the area of mechanical design. Includes such subjects as optimization, finite element, analysis, and commercial software. Graduate/Undergraduate Equivalency: MECH 503. Mutually Exclusive: Credit cannot be earned for MECH 403 and MECH 503.

MECH 404 - MECHANICAL DESIGN PROJECT
Short Title: MECHANICAL DESIGN PROJECT
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Project based course for group or individual design projects relating to mechanical engineering topics.

MECH 407 - CAPSTONE DESIGN PROJECT I
Short Title: CAPSTONE DESIGN PROJECT I
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An interdisciplinary capstone design experience in mechanical engineering. This course provides an opportunity for students to apply knowledge and skills acquired in previous courses to the solution of a realistic engineering problem. Teams of students will specify, design, and build a system to meet a prescribed set of requirements. The topics covered in this course will include design methodology, effective teamwork, project management, documentation, and presentation skills. Must complete MECH 408 to receive credit for MECH 407. Required for mechanical engineering majors in B.S. program.
MECH 408 - CAPSTONE DESIGN PROJECT II
Short Title: CAPSTONE DESIGN PROJECT II
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An interdisciplinary capstone design experience in mechanical engineering. This course provides an opportunity for students to apply knowledge and skills acquired in previous courses to the solution of a realistic engineering problem. Teams of students will specify, design, and build a system to meet a prescribed set of requirements. The topics covered in this course will include design methodology, effective teamwork, project management, documentation, and presentation skills. Must complete MECH 408 to receive credit for MECH 407. Required for mechanical engineering majors in B.S. program. Department Permission Required.

MECH 411 - DYNAMICS AND CONTROL OF MECHANICAL SYSTEMS
Short Title: DYNAMICS & CONTROL OF MECH SYS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MECH 343 and MECH 420
Description: The application of the principles of kinematics, dynamics and systems and control theory to the design and analysis of controlled mechanical systems. Kinematics and Newtonian dynamics of particles and rigid bodies, elements of analytical dynamics, system analysis, stability, and simulation of dynamical behavior, control of mechanical systems. Demonstrations and laboratory examples. Graduate/Undergraduate Equivalency: MECH 501. Mutually Exclusive: Credit cannot be earned for MECH 411 and MECH 501.

MECH 412 - VIBRATIONS
Short Title: VIBRATIONS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MECH 343
Description: Analysis of discrete and continuous linear vibrating systems, with emphasis on multi-degree-of-freedom systems. Includes approximate methods. Coverage of statistics (e.g. Gaussian and other distributions; and power spectra) as a foundation for random vibrations analysis. Required for mechanical engineering majors in B.S. program. Graduate/Undergraduate Equivalency: MECH 502. Mutually Exclusive: Credit cannot be earned for MECH 412 and MECH 502.

MECH 417 - FINITE ELEMENT ANALYSIS
Short Title: FINITE ELEMENT ANALYSIS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (MATH 212 or MATH 222) and (CAAM 210 or CAAM 211)
Description: An introduction to finite element analysis by Galerkin's method and the method of least squares as applied to both ordinary and partial differential equations common in engineering applications. Element interpolations, numerical integration, computational considerations for efficient solution and post-processing methods. Application of the commercial codes to ANSYS and Cosmosworks. Cross-list: CEVE 417. Graduate/Undergraduate Equivalency: MECH 517. Mutually Exclusive: Credit cannot be earned for MECH 417 and MECH 517.

MECH 420 - FUNDAMENTALS OF CONTROL SYSTEMS
Short Title: FUNDAMENTALS OF CONTROL SYST
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MECH 343 or (ELEC 242 and ELEC 244) or (CAAM 335 or MATH 355)
Description: Linear systems and the fundamental principles of classical feedback control, state variable analysis of linear dynamic systems, stability of linear control systems, time-domain analysis and control of linear systems, root-locus analysis and design and pole-zero synthesis, frequency domain techniques for the analysis and design of control systems. Required for mechanical engineering majors in B.S. program. Cross-list: ELEC 436. Graduate/Undergraduate Equivalency: MECH 620. Mutually Exclusive: Credit cannot be earned for MECH 420 and MECH 620.

MECH 427 - COMPUTATIONAL STRUCTURAL MECHANICS AND FEM
Short Title: COMPUTATIONAL STR MECH & FEM
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CEVE 311 or MECH 311
Description: Introduction to matrix structural analysis, trusses, beams, frames. Use of computer programs for structural analysis of Civil, Mechanical, and Aerospace Structures. Cross-list: CEVE 427.
MECH 371 (may be taken concurrently) and MECH 481.

Description: Design and synthesis of systems based on applications of thermodynamics, fluid mechanics, heat transfer, economics, and optimization theories. Required for mechanical engineering majors in B.S. program.

MECH 454 - COMPUTATIONAL FLUID MECHANICS

Short Title: COMPUTATIONAL FLUID MECHANICS

Department: Mechanical Engineering

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Prerequisite(s): MECH 371 (may be taken concurrently) or CEVE 363 (may be taken concurrently) or CHBE 401 (may be taken concurrently)

Description: Fundamental concepts of finite element methods in fluid mechanics, including spatial discretization and numerical integration in multidimensions, time-integration, and solution of nonlinear ordinary differential equation systems. Advanced numerical stabilization techniques designed for fluid mechanics problems. Strategies for solution of complex, real-world problems. Topics in large-scale computing, parallel processing, and visualization. Prerequisites may be taken concurrently. Cross-list: BIOE 454, CEVE 454. Graduate/Undergraduate Equivalency: MECH 554. Mutually Exclusive: Credit cannot be earned for MECH 454 and MECH 554.

MECH 456 - LEGAL THEMES IN ENGINEERING AND MANAGING PRACTICES

Short Title: LEGAL THEMES IN ENGI PRACTICES

Department: Mechanical Engineering

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: Introduction to fundamental legal concepts of the American legal system for upper level undergraduate students, primarily aimed at what engineers, scientists and other professionals could expect to encounter in their professional careers. The primary focus is to provide students with the basic tools to understand and interact with lawyers. Cross-list: MANA 499. Graduate/Undergraduate Equivalency: MECH 556. Mutually Exclusive: Credit cannot be earned for MECH 456 and MECH 556.

MECH 472 - THERMAL SYSTEMS DESIGN

Short Title: THERMAL DESIGN

Department: Mechanical Engineering

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Prerequisite(s): MECH 371 (may be taken concurrently) and MECH 481

Description: Design and synthesis of systems based on applications of thermodynamics, fluid mechanics, heat transfer, economics, and optimization theories. Required for mechanical engineering majors in B.S. program.
MECH 473 - ADVANCED FLUID MECHANICS I
Short Title: ADVANCED FLUID MECHANICS I
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Governing equations for inviscid and viscous flows. Constitutive laws, simple non-Newtonian flows, and surface tension. Derivation and applications of the equations representing the conservation of mass and momentum. Various forms of the Bernoulli equation. Introductory concepts of computational fluid mechanics. Graduate/Undergraduate Equivalency: MECH 573. Mutually Exclusive: Credit cannot be earned for MECH 473 and MECH 573.

MECH 474 - ADVANCED COMPUTATIONAL MECHANICS
Short Title: ADV COMPUTATIONAL MECHANICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 454 or CEVE 454 or MECH 454 or BIOE 554 or CEVE 554 or MECH 554
Description: Undergraduate version of MECH 654. The required semester-end report and presentation will be on the introductory topics of the course. Mutually Exclusive: Credit cannot be earned for MECH 474 and MECH 654.

MECH 481 - HEAT TRANSFER
Short Title: HEAT TRANSFER
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (MECH 200 and MECH 371)
Description: Study of the general principles of heat transfer by conduction, convection, and radiation. Includes their application to problems of engineering practice. Required for mechanical engineering majors in B.S. program.

MECH 488 - DESIGN OF MECHATRONIC SYSTEMS
Short Title: DESIGN OF MECHATRONIC SYSTEMS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MECH 343 or ELEC 241 or ELEC 243
Description: Analog electronic design for purposes of controlling electromechanical systems, including electromechanical sensors and actuators, analog electronic design of filters, state space and classical controllers, and transistor-based servo amplifiers and high voltage amplifiers. Implementation of digital controllers. Significant laboratory component with design and fabrication of circuits to control electromechanical systems. Graduate/Undergraduate Equivalency: MECH 588. Recommended Prerequisite(s): MECH 211 and ELEC 436 or MECH 420. Mutually Exclusive: Credit cannot be earned for MECH 488 and MECH 588.

MECH 490 - MECHANICAL ENGINEERING RESEARCH PROJECTS
Short Title: MECH ENG RESEARCH PROJECTS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent investigation of a specific topic or problem in mechanical engineering. Research under the direction of a selected faculty member. Instructor Permission Required. Repeatable for Credit.

MECH 498 - INTRODUCTION TO ROBOTICS
Short Title: INTRODUCTION TO ROBOTICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 354 or MATH 355 or CAAM 335
Description: The course will provide the student with a mathematical introduction to many of the key ideas used in today's intelligent robot systems. The focus of the course is on the analysis and control of manipulators. The course will also give an overview of common approaches to building intelligent robot systems. Cross-list: COMP 498, ELEC 498. Graduate/Undergraduate Equivalency: MECH 598. Mutually Exclusive: Credit cannot be earned for MECH 498 and MECH 598.

MECH 499 - CURRENT TOPICS
Short Title: CURRENT TOPICS
Department: Mechanical Engineering
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Designed for undergraduate mechanical engineering students. Lectures in areas of current interest in mechanical engineering. Topics vary from term to term. Repeatable for Credit.
MECH 500 - ADVANCED MECHANICS OF MATERIALS  
Short Title: ADV MECHANICS OF MATERIALS  
Department: Mechanical Engineering  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): (MECH 211 or CEVE 211) and (MECH 311 or CEVE 311)  
Description: Advanced topics in solid mechanics and strength of materials including energy methods, principle of virtual work, conservation laws, constitutive modeling, aspects of elasticity theory, stability and fracture mechanics with application to the analysis and design of reliable structures. Cross-list: CEVE 500. Graduate/Undergraduate Equivalency: MECH 400. Mutually Exclusive: Credit cannot be earned for MECH 500 and MECH 400.

MECH 501 - DYNAMICS AND CONTROL OF MECHANICAL SYSTEMS  
Short Title: DYNAMICS & CONTROL OF MECH SYS  
Department: Mechanical Engineering  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): MECH 343 and MECH 420  
Description: Graduate version of MECH 411. Offered continually with MECH 411. Graduate/Undergraduate Equivalency: MECH 411. Mutually Exclusive: Credit cannot be earned for MECH 501 and MECH 411.

MECH 502 - VIBRATIONS  
Short Title: VIBRATIONS  
Department: Mechanical Engineering  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): MECH 343  
Description: Term project is required. Graduate/Undergraduate Equivalency: MECH 412. Mutually Exclusive: Credit cannot be earned for MECH 502 and MECH 412.

MECH 503 - COMPUTER AIDED DESIGN  
Short Title: COMPUTER AIDED DESIGN  
Department: Mechanical Engineering  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Investigation of the integration of the computer into the area of design. Includes such subjects as optimization, finite element analysis, and commercial software. Graduate/Undergraduate Equivalency: MECH 403. Mutually Exclusive: Credit cannot be earned for MECH 503 and MECH 403.

MECH 505 - NUMERICAL METHODS FOR ENGINEERS  
Short Title: NUMERICAL METHODS  
Department: Mechanical Engineering  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Numerical methods are the computational solution of mathematical problems. This course focuses on developing a competency in the four basic areas of numerical methods: differentiation, integration, optimization, and continuation. These four categories of methods form a tool set that are used throughout the computational solution of engineering problems.

MECH 508 - NONLINEAR SYSTEMS: ANALYSIS AND CONTROL  
Short Title: NONLINEAR SYSTEMS  
Department: Mechanical Engineering  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  

MECH 510 - ELASTO DYNAMICS  
Short Title: ELASTO DYNAMICS  
Department: Mechanical Engineering  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
MECH 517 - FINITE ELEMENT ANALYSIS
Short Title: FINITE ELEMENT ANALYSIS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (MATH 212 or MATH 222) and (CAAM 210 or CAAM 211)

MECH 519 - ELASTICITY, PLASTICITY AND DAMAGE MECHANICS
Short Title: ELASTICITY/PLASTICITY/DAMAGE
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An overview of phenomena that determine the response of solids to deformation and loading: elasticity, plasticity, damage mechanics and cracking. Review of continuum mechanics with emphasis on the physical mechanisms of deformation and fracture. Classification of the behavior of solids. Modeling of different types of material behavior. The physics underlying the phenomena and methods for the numerical analysis of the resulting equations are discussed. Cross-list: CEVE 519.

MECH 520 - NONLINEAR FINITE ELEMENT ANALYSIS
Short Title: NONLINEAR FEM
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

MECH 523 - PROBABILISTIC STRUCTURAL DYNAMICS
Short Title: PROB STRUCTURAL DYNAMICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MECH 412 or CEVE 521
Description: Introduction to probability theory and random processes. Includes the dynamic analysis of linear and nonlinear structural systems subjected to stationary and nonstationary random excitations reliability studies related to first excursion and fatigue failures, and applications to earthquake engineering, offshore engineering, and wind engineering. Recommended prerequisite(s): Basic knowledge of probability theory.

MECH 524 - ENGINEERING MATHEMATICAL AND NUMERICAL METHODS
Short Title: ENGR MATH & NUMERICAL METHODS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Elements of linear algebra, linear operators, systems of linear differential equations for discrete physical systems, calculus of variations, partial differential equations, Green's functions, examples from solid and fluid mechanics, discretization of continuous systems, finite element method.

MECH 527 - COMPUTATIONAL STRUCTURAL MECHANICS AND FEM
Short Title: COMPUTATIONAL STR MECH & FEM
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to differential and integral formulations, minimum principles, variational principles, weighted residuals, energy principles, and principle of virtual work. Boundary, initial, and eigenvalue problems. Finite element and finite difference methods for structural mechanics. Applications to static and dynamic truss beams and frame problems. MATLAB programming and use of computer software. Cross-list: CEVE 527.
MECH 535 - INTRODUCTION TO ENERGY-EFFICIENT MECHATRONICS

Short Title: INTRO TO MECHATRONICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

Description: Introduction to electromechanical systems, focusing on motor mechanics, electric drives & electronics, & modern digital control algorithms. Covers basic principles of electromechanical energy conversion & motor control. Students are introduced to energy efficiency considerations of modern electric drives. Includes hands-on laboratory projects involving digital computer control of various motor types. Additional coursework required beyond the undergraduate course requirements. Cross-list: ELEC 532. Graduate/Undergraduate Equivalency: MECH 435. Mutually Exclusive: Credit cannot be earned for MECH 535 and MECH 435.

MECH 537 - DESIGN AND CONTROL OF COMPUTER NETWORKS

Short Title: COMMUNICATION NETWORKS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

Description: Graduate-level introduction to design and analysis of communication networks. Topics include wireless networks, medium access, routing, traffic modeling, congestion control, and scheduling. Cross-list: ELEC 537.

MECH 550 - ALGORITHMIC ROBOTICS

Short Title: ALGORITHMIC ROBOTICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

Prerequisite(s): (COMP 221 or COMP 321) and COMP 215

Description: Robots have fascinated people for generations. Today, robots are built for applications as diverse as exploring remote planets, de-mining war zones, cleaning toxic waste, assembling cars, inspecting pipes in industrial plants and mowing lawns. Robots are also interacting with humans in a variety of ways: robots are museum guides, robots assist surgeon in life threatening operations, and robotic cars can drive us around. The field of robotics studies not only the design of new mechanisms but also the development of artificial intelligence frameworks to make these mechanism useful in the physical world, integrating computer science, engineering, mathematics and more recently biology and sociology, in a unique way. This class will present fundamental algorithmic advances that enable today’s robots to move in real environments and plan their actions. It will also explore fundamentals of the field of Artificial Intelligence through the prism of robotics. The class involves a significant programming project. Graduate/Undergraduate Equivalency: MECH 450. Mutually Exclusive: Credit cannot be earned for MECH 550 and MECH 450.

MECH 554 - COMPUTATIONAL FLUID MECHANICS

Short Title: COMPUTATIONAL FLUID MECHANICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

Prerequisite(s): MECH 371 (may be taken concurrently) or CEVE 363 (may be taken concurrently) or CHBE 401 (may be taken concurrently)

Description: Additional work required. Cross-list: BIOE 554, CEVE 554. Graduate/Undergraduate Equivalency: MECH 454. Mutually Exclusive: Credit cannot be earned for MECH 554 and MECH 454.

MECH 555 - COMPUTATIONAL FLUID-STRUCTURE INTERACTION

Short Title: COMPUTATIONAL FSI
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

Prerequisite(s): MECH 454 or BIOE 454 or CEVE 454 or (MECH 554 or BIOE 554 or CEVE 554)

Description: Components and challenges of fluid-structure interaction (FSI) computations. Finite element methods for flows with moving interfaces; space-time techniques. Fluid-structure interface projection techniques. Mesh moving and remeshing techniques. FSI coupling techniques for fluid, structure, and mesh equation blocks. FSI computation sequences. FSI contact algorithms, multiscale FSI, cardiovascular FSI, and parachute FSI.

MECH 556 - LEGAL THEMES IN ENGINEERING AND MANAGING PRACTICE

Short Title: LEGAL THEMES IN ENGI PRACTICES
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

Description: Introduction to fundamental legal concepts of the American legal system for upper level undergraduate students, primarily aimed at what engineers, scientists and other professionals could expect to encounter in their professional careers. The primary focus is to provide students with the basic tools to understand and interact with lawyers. Graduate/Undergraduate Equivalency: MECH 456. Mutually Exclusive: Credit cannot be earned for MECH 556 and MECH 456.

MECH 572 - AEROSPACE SYSTEMS ENGINEERING

Short Title: AEROSPACE SYSTEMS ENGINEERING
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

Description: Integration of engineering problem solving methodologies based on systems concepts. Applications to complex, large scale aerospace systems and problems faced by engineering managers. Recommended Prerequisite(s): MECH 472 and MECH 594.
MECH 573 - ADVANCED FLUID MECHANICS I
Short Title: ADVANCED FLUID MECHANICS I
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced study in fluid mechanics to prepare engineering or materials science students for advanced coursework and research. Specific topics may vary based on instructor. Prerequisite(s): MECH 481.

MECH 575 - INTRODUCTION TO HYDRODYNAMIC STABILITY
Short Title: INTRO HYDRODYNAMIC STABILITY
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Rigorous study of the transfer of heat by free and forced convection. Not offered every year.

MECH 576 - STRUCTURAL DYNAMIC SYSTEMS
Short Title: STRUCTURAL DYNAMIC SYSTEMS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate.
Course Level: Graduate
Description: Introduction to structural dynamic systems. Linear SDOF and MDOF discrete systems, undamped and damped systems, free and forced vibration, dynamic response to periodic and arbitrary excitations, numerical evaluation of dynamic response, response spectrum and modal analysis. Additional topics for graduate version 576: Linear system theory, transform methods, state space methods, feedback control, observers and identification. Applications using MATLAB. Demonstrations and laboratory examples. Students will be required to do more advanced assignments and a project. Cross-list: CEVE 576. Recommended Prerequisite(s): (CEVE 521 or CIVI 521 or MECH 502) and (CEVE 527 or CIVI 527).

MECH 580 - MECHANICS AND KINEMATICS OF RESPIRATORY MUSCLE IN OBESITY
Short Title: RESPIRATORY MECH IN OBESITY
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course is designed to understand unique aspects of remodeling the respiratory system mechanics in obesity. Focus will be on remodeling of diaphragm muscle and chest wall as a consequence of obesity. In particular, alteration in the kinematics and mechanics of the diaphragm in obese subjects will be evaluated.

MECH 581 - MICRO AND NANO HEAT TRANSPORT METHODOLOGIES AND DESIGN
Short Title: MICRO & NANO HEAT TRANSPORT
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate or Senior. Enrollment is limited to students with a major in Mechanical Engineering or Materials Science & NanoEng. Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MECH 481

MECH 582 - CONVECTIVE HEAT TRANSFER
Short Title: CONVECTIVE HEAT TRANSFER
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Rigorous study of the transfer of heat by free and forced convection. Not offered every year.

MECH 586 - RESPIRATORY SYSTEM MECHANICS
Short Title: RESPIRATORY SYSTEM MECHANICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Mechanics of ventilation, respiratory muscle mechanics, rib cage mechanics, mechanical coupling between the respiratory muscles and the rib cage, and inferences on mechanics from respiratory muscle anatomy. The class will meet in the Pulmonary Division at Baylor College of Medicine in the Texas Medical Center. Cross-list: BIOE 586.
MECH 588 - DESIGN OF MECHATRONIC SYSTEMS
Short Title: DESIGN OF MECHATRONIC SYSTEMS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Additional work required. Graduate/Undergraduate
Equivalency: MECH 488. Mutually Exclusive: Credit cannot be earned for MECH 588 and MECH 488.

MECH 591 - GAS DYNAMICS
Short Title: GAS DYNAMICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MECH 371
Description: Study of the fundamentals of compressible, one-dimensional gas flows with area change, normal shocks, friction, and heat addition. Includes oblique shocks, Prandtl-Meyer flows expansions, and numerical techniques.

MECH 592 - DESIGN FOR AEROSPACE ENVIRONMENTS
Short Title: AEROSPACE ENVIRONMENTS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate course on aerospace environments, including theoretical bases. Topics include key mission phases, orbital mechanics, the effects of the sun, plasma, particles and ionizing radiation, neutral atmosphere, contamination, micrometeoroid/orbital debris, thermal and aerothermal environments. Extraterrestrial environments are briefly discussed.

MECH 593 - MECHANICAL ENGINEERING PROBLEMS
Short Title: MECH ENGINEERING PROBLEMS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Mechanical Engineering. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An approved investigation or design project under the direction of a member of the staff. Open only to mechanical engineering majors. Repeatable for Credit.

MECH 594 - INTRODUCTION TO AERONAUTICS
Short Title: INTRODUCTION TO AERONAUTICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MECH 371
Description: Development of theories for the prediction of aerodynamic forces and moments acting on airfoils, wings, and bodies. Includes their design applications.

MECH 595 - MODELING TISSUE MECHANICS
Short Title: MODELING TISSUE MECHANICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MECH 371 or CEVE 371
Description: Independent study and seminar course which focuses on modeling the mechanical properties of biological tissues. Data from experiments will be used to refine the predictions of nonlinear mathematical computer models. Aimed at juniors, seniors, and graduate students. Laboratory work performed at Baylor College of Medicine, computer work at Rice University. Cross-list: BIOE 595.

MECH 596 - INTRODUCTION TO FLIGHT MECHANICS
Short Title: INTRO TO FLIGHT MECHANICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MECH 371 or CEVE 371
Description: This course will examine the basic flight mechanics of aircraft and spacecraft. Simulation exercises will be conducted to illustrate the principles. Recommended Prerequisite(s): MECH 594

MECH 598 - INTRODUCTION TO ROBOTICS
Short Title: INTRODUCTION TO ROBOTICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the kinematics, dynamics, and control of robot manipulators and to applications of artificial intelligence and computer vision in robotics. Additional work required for Graduate course. Cross-list: COMP 598, ELEC 598. Graduate/Undergraduate Equivalency: MECH 498. Mutually Exclusive: Credit cannot be earned for MECH 598 and MECH 498.
MECH 599 - CURRENT TOPICS IN MECHANICAL ENGINEERING
Short Title: SPECIAL TOPICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Designed for senior and graduate level students. Lectures in areas of current interest in mechanical engineering. Topics may vary from term to term. Spring 2018: Section 001: Covers the science of surfaces interacting via dry, lubricated, and mixed (i.e., dry + lubricated) contact. Fundamental aspects include the Reynolds Equation, tribology, friction, and wear. Applied topics include bearings, surface analysis, nanomanufacturing, and biotribology. The course will conclude with a team project which will require computer programming. Section 002: This course will cover recent topics in bioengineering, with a focus on human-machine interface systems for individuals with neurological impairment, bioinspired and wearable sensing and robotic systems for diagnostic, assistive, and therapeutic applications, and neurorehabilitation. Intended for graduate students with a background in neuroscience, robotics, and control systems. The course will include a significant technical communications component (oral and written) covering the research pipeline process, and will require experimental work via project. Repeatable for Credit.

MECH 601 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics may vary. Please consult with the department for additional information. FA 2016, Section 001: Special Topics: Advanced Topics and Tools in Particle Flows & Tribology. Instructor Permission Required.

MECH 602 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics may vary. Please consult with the department for additional information.

MECH 606 - GRADUATE SEMINAR
Short Title: GRADUATE SEMINAR
Department: Mechanical Engineering
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MECH 609 - CURRENT TOPICS IN MECHANICAL ENGINEERING
Short Title: SPECIAL TOPICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Designed for senior and graduate level students. Lectures in areas of current interest in mechanical engineering. Topics may vary from term to term. Spring 2018: Section 001: Covers the science of surfaces interacting via dry, lubricated, and mixed (i.e., dry + lubricated) contact. Fundamental aspects include the Reynolds Equation, tribology, friction, and wear. Applied topics include bearings, surface analysis, nanomanufacturing, and biotribology. The course will conclude with a team project which will require computer programming. Section 002: This course will cover recent topics in bioengineering, with a focus on human-machine interface systems for individuals with neurological impairment, bioinspired and wearable sensing and robotic systems for diagnostic, assistive, and therapeutic applications, and neurorehabilitation. Intended for graduate students with a background in neuroscience, robotics, and control systems. The course will include a significant technical communications component (oral and written) covering the research pipeline process, and will require experimental work via project. Repeatable for Credit.

MECH 611 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MECH 612 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MECH 613 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MECH 620 - FUNDAMENTALS OF CONTROL SYSTEMS
Short Title: FUNDAMENTALS OF CONTROL SYST
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Linear systems and the fundamental principles of classical feedback control, state variable analysis of linear dynamic systems, stability of linear control systems, time-domain analysis and control of linear systems, root-locus analysis and design and pole-zero synthesis, frequency domain techniques for the analysis and design of control systems. Required for mechanical engineering majors in B.S. program. Additional work required for MECH 620. Cannot be taken if MECH 420 or ELEC 436 was previously taken. Instructor Permission Required. Graduate/Undergraduate Equivalency: MECH 420. Mutually Exclusive: Credit cannot be earned for MECH 620 and MECH 420.

MECH 621 - M.M.E. RESEARCH PROJECT I
Short Title: M.M.E. RESEARCH PROJECT I
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is the first part of the M.M.E. research project course. The faculty advisor, taking into account the background and research interests of the student as well as the research interests of the faculty advisor, will determine the contents. Course requirements will include a final report. Instructor Permission Required.

MECH 622 - M.M.E. RESEARCH PROJECT II
Short Title: M.M.E. RESEARCH PROJECT II
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is the second part of the M.M.E. research project and continuation of MECH 621. Course requirements will include a final report.
MECH 654 - ADVANCED COMPUTATIONAL MECHANICS
Short Title: ADV COMPUTATIONAL MECHANICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): BIOE 554 or CEVE 554 or MECH 554 or MECH 454 or MECH 474

MECH 665 - ANALYSIS OF VIBRATIONS IN NONLINEAR SYSTEMS
Short Title: NONLINEAR VIBRATIONS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MECH 502
Description: Nonlinear vibrations are studied in structural and mechanical systems. Methods for the qualitative and quantitative analysis of these systems are applied. The classification and stability of equilibrium and periodic solutions are discussed for continuous time systems and discrete maps. Floquet theory and Poincare maps are used to study periodic behavior.

MECH 667 - NONLINEAR DYNAMIC BEHAVIOR IN MECHANIC SYSTEMS AND STRUCTURES
Short Title: NONLINEAR DYNAMICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MECH 502
Description: Various types of nonlinear dynamic behavior are studied in mechanical systems and structures. The course will focus mainly on quasi-periodic and chaotic behavior but will also include periodic behavior. Modeling and analysis methods will be discussed for both discrete and continuous time systems including Lyapunov exponents and pseudo-state space. Recommended Prerequisite(s): MECH 665

MECH 678 - ADVANCED STOCHASTIC MECHANICS
Short Title: ADV STOCHASTIC MECHANICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Nonlinear random vibrations, Statistical Linearization, ARMA filters modeling, Monte Carlo Simulation, Wiener-Volterra series, time-variant structural reliability, and Stochastic Finite Elements are presented from a perspective of usefulness to aerospace, civil, marine, and mechanical applications. Cross-list: CEVE 678.

MECH 679 - APPLIED MONTE CARLO ANALYSIS
Short Title: APPLIED MONTE CARLO ANALYSIS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Probability density and power spectrum based simulation concepts and procedures are discussed. Scalar and vectorial simulation are addressed. Spectral decomposition and digital filter algorithms are presented. Applications from aerospace, earthquake, marine, and wind engineering, and from other applied science disciplines are included. Cross-list: CEVE 679.

MECH 683 - RADIATIVE HEAT TRANSFER I
Short Title: RADIATION HEAT TRSF I
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Rigorous study of the transfer of heat by radiant exchange in the absence of absorbing media.

MECH 691 - INTRODUCTION TO HYPERSONIC AERODYNAMICS
Short Title: INTRO TO HYPERSONICS
Department: Mechanical Engineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Recommended Prerequisite(s): MECH 591.

MECH 800 - RESEARCH AND THESIS
Short Title: RESEARCH AND THESIS
Department: Mechanical Engineering
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-12
Restrictions: Enrollment is limited to students with a major in Mechanical Engineering. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.
MDEM 100 - ROMANCING RELIGION: NARRATIVES OF THE SACRED
Short Title: ROMANCING RELIGION
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines links between religious experience and romance narrative taking the grail as a focal point. We start with grail legends in the middle ages, explore historical associations of the grail with medieval Christianity, and end with quest narratives and grail motifs in modern occultism, fiction and film. This course is limited to first-year students only, any others will be removed from this course. Cross-list: FSEM 100, RELI 100.

MDEM 101 - ELEMENTARY LATIN I
Short Title: ELEMENTARY LATIN I
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Study of the fundamentals of Latin grammar with emphasis on acquisition of reading skills. Cross-list: LATI 101.

MDEM 102 - ELEMENTARY LATIN II
Short Title: ELEMENTARY LATIN II
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): LATI 101 or MDST 101 or MDEM 101
Description: Continuation of LATI 101 and MDEM 101. Graduate students require permission of instructor. Cross-list: LATI 102.

MDEM 103 - INTRODUCTION TO JEWISH MYSTICISM
Short Title: INTRO TO JEWISH MYSTICISM
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Surveys the historical development and central themes of Jewish mysticism. From the bible to ancient mysticism to medieval Kabbalah to modern expressions, we will critically reflect the ideas such as divine presence in the world, the cultivation of insight and magical powers, contemplative and restorative practices, and charismatic authority. Cross-list: RELI 104.

MDEM 105 - INTRODUCTION TO MEDIEVAL CHRISTIAN THOUGHT
Short Title: MEDIEVAL CHRISTIAN THOUGHT
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of major medieval Christian thinkers. Primary focus on high and late middle ages (12th-15th century), with some attention to spiritual and apocalyptic writings and dissenting thought in this period. Cross-list: RELI 105.

MDEM 108 - ART IN CONTEXT: LATE MEDIEVAL AND RENAISSANCE CULTURE
Short Title: LATE MEDIEVAL & RENAISSANCE CULTURE
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will be concerned with art, architecture, and history of the late Middle Ages and Renaissance. We will employ historical texts, literature, and illustrations of works of art, showing how historical documents and sources can illuminate the cultural context of art and architecture. Cross-list: HART 240, HUMA 108.

MDEM 111 - INTRODUCTION TO THE HISTORY OF WESTERN ART I: PREHISTORIC TO GOTHIC
Short Title: INTRO TO HIST OF WESTERN ART I
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A survey of painting, sculpture, and architecture from Antiquity through the 15th century. Students will also attend a one-hour weekly tutorial with a teaching assistant. Cross-list: CLAS 102, HART 101.

MDEM 116 - MYSTICISM THROUGHOUT THE AGES
Short Title: MYSTICISM THROUGHOUT THE AGES
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines the historical development of mysticism in Western thought, placing the Christian experiential traditions in comparison with Jewish developments. Through mystical texts, we will explore key concepts, such as visions of God and spiritual journeys, as developed during late antiquity, the middle-ages, and into the early modern period. Cross-list: RELI 116.
MDEM 120 - MEDIEVAL CIVILIZATIONS
Short Title: MEDIEVAL CIVILIZATIONS
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Focusing on the period between 300-1500 CE, the course will survey political institutions, society, and culture in medieval European, Byzantine, and Islamic civilizations. Topics include Christianization of Europe, the rise of Islam, the Crusades, scholastic theology, persecution of heretics, bubonic plague, and the rise of centralized monarchies. Cross-list: HIST 120.

MDEM 171 - THE BODY AND THE COSMOS IN THE MIDDLE AGES
Short Title: BODY & COSMOS IN MIDDLE AGES
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: What shaped medieval Christian notions of the body? How did common experiences of pain, sexuality, childbirth, and death refract the grasp of larger concepts - God, time, and the cosmos? This seminar will explore the issues connecting body to cosmos through close reading of medieval, mystical, and autobiographical texts. This course is limited to first-year students only, any others will be removed from this course. Cross-list: FSEM 171, RELI 171. Mutually Exclusive: Credit cannot be earned for MDEM 171 and FWIS 150.

MDEM 201 - HISTORY OF PHILOSOPHY I
Short Title: HISTORY OF PHILOSOPHY I
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of the major philosophers and philosophical systems of ancient Greece, from Parmenides to the Stoics. Cross-list: CLAS 201, PHIL 201.

MDEM 205 - MEDIEVAL MEDITERRANEAN WORLD
Short Title: MEDIEVAL MEDITERRANEAN WORLD
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Course examines the political, institutional, military, and cultural development of the societies that successively dominated the "Middle Sea" from AD 500-1500 in Europe and the Islamic World. It highlights the Mediterranean legacy of commercial, cultural, and religious exchange and coexistence, as well as its history of confrontation and warfare. Cross-list: HIST 205.

MDEM 210 - MEDIEVAL VIOLENCE
Short Title: MEDIEVAL VIOLENCE
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Discussion course looks at private and large-scale warfare during the European Middle Ages. It considers how violence was legitimized and carried out, and examines attitudes towards violence and its effects on society. Topics include theoretical approaches to violence, crusading, chivalry, Truce of God, rituals of violence, military technologies, and cinematic portrayals of medieval warfare. Cross-list: HIST 211.

MDEM 211 - INTERMEDIATE LATIN I: PROSE
Short Title: INTERMEDIATE LATIN I: PROSE
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Review of grammar and readings in Latin prose. Cross-list: LATI 201.

MDEM 212 - INTERMEDIATE LATIN II
Short Title: INTERMEDIATE LATIN II
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): LATI 201 or MDST 211 or MDEM 211

MDEM 222 - MEDIEVAL AND RENAISSANCE ERAS
Short Title: MEDIEVAL AND RENAISSANCE ERAS
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): MUSI 211 or MUSI 317
Description: Introduction to the study of Western music history, with emphasis on music before 1600. Score reading ability required. Cross-list: MUSI 222.
MDEM 271 - MEDIEVAL POPULAR CHRISTIANITY
Short Title: MEDIEVAL POPULAR CHRISTIANITY
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: For much of the Middle Ages, literacy was a luxury that ordinary people could not afford. How could peasants participate in Christian traditions? Course surveys devotional practices engaged by the laity, including penance, pilgrimage, plays, charms and spells, as well as traditions of lay interaction with dead saints and ghosts. Cross-list: RELI 271.

MDEM 281 - THE MIDDLE EAST FROM THE PROPHET MUHAMMAD TO SULAYMAN THE MAGNIFICENT
Short Title: PREMODERN MIDDLE EAST HISTORY
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to the Middle East from the rise of Islam to the middle of the 16th century. Topics include conquests and classical Islamic states, Arabization, Jewish and Christian communities, impact of Turkic peoples, and the Ottoman Empire, with emphasis on social, cultural, political, and religious trends that shaped the region's history. Cross-list: HIST 281.

MDEM 301 - ANCIENT AND MEDIEVAL PHILOSOPHY
Short Title: ANCIENT & MEDIEVAL PHILOSOPHY
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Topics in the history of philosophy from the 4th century B.C. through the 14th century. Graduate students require permission of instructor. Credit may not be received for both MDEM 301 and MDEM 481. Cross-list: CLAS 301, PHIL 301. Mutually Exclusive: Credit cannot be earned for MDEM 301 and MDEM 481. Repeatable for Credit.

MDEM 305 - PAIN, ECSTASY AND EMBODIMENT IN RELIGIOUS EXPERIENCE
Short Title: PAIN, ECSTASY AND EMBODIMENT
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: From exorcism to other worldly visions, we experience religion as embodied human beings. This course explores embodied religion by focusing on connections between pain and transcendence, looking at medieval Christianity as well as contemporary and cross-cultural examples. Cross-list: RELI 305.

MDEM 308 - THE WORLD OF LATE ANTIQUITY
Short Title: THE WORLD OF LATE ANTIQUITY
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of the social, religious, and political history of the Roman world from Diocletian to the rise of Islam, with emphasis on the breaking of the unity of the Mediterranean world and the emergence of early medieval societies in the east and west. Cross-list: HIST 308.

MDEM 311 - AFRICAN PREHISTORY
Short Title: AFRICAN PREHISTORY
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Thematic coverage of developments throughout the continent from the Lower Paleolithic to medieval times, with emphasis on food production, metallurgy and the rise of cities and complex societies. Cross-list: ANTH 312.

MDEM 312 - TOPICS IN OLD ENGLISH
Short Title: TOPICS IN OLD ENGLISH
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A various topics course that includes a wide range of reading of poems, prose, materials from chronicle, myth, and legend. Topics will vary from semester to semester. Cross-list: ENGL 312. Repeatable for Credit.
Course URL: www.english.rice.edu

MDEM 313 - BEOWULF FOR THE 21ST CENTURY
Short Title: BEOWULF FOR THE 21ST CENTURY
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A close reading of Beowulf with attention to Anglo-Saxon culture and Old English poetics. Cross-list: ENGL 313.
Course URL: www.english.rice.edu
MDEM 314 - DIVINE SEX: GENDER AND DIVINITY IN THE MIDDLE AGES  
Short Title: DIVINE SEX  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course will examine key medieval works, with special attention to women's writing, focusing on gender construction in mysticism and theology. Primary readings will include works by Hildegard of BinGen, Birgtta of Sweden, Margery Kempe, and others. Cross-list: RELI 314, SWGS 314.

MDEM 315 - MEDIEVAL CULTURES THROUGH FILM  
Short Title: MEDIEVAL CULTURES THROUGH FILM  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 4  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: An interdisciplinary course exploring the literature, art, philosophy, history, music, and science of the Middle Ages, with films by Pasolini, Bergman, Dreyer, Einstein, Annaud, Vigne, and others, and highlighted by a medieval banquet. Cross-list: ENGL 315.

MDEM 316 - CHAUCER  
Short Title: CHAUCER  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: An introduction to Geoffrey Chaucer's The Canterbury Tales, Middle English, and the political and cultural climate of the fourteenth century. Cross-list: ENGL 316, SWGS 305.

MDEM 317 - ARTHURIAN LITERATURE  
Short Title: ARTHURIAN LITERATURE  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: A survey of the origins and development of the Arthurian legend from the earliest chronicles in the sixth century and later medieval French, Welsh, Irish, and English Arthurian poems to modern adaptations of Arthurian material, including films. Cross-list: ENGL 317, SWGS 301.

MDEM 319 - MEDIEVAL ROMANCE  
Short Title: MEDIEVAL ROMANCE  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: A course that examines the development of romance as a genre during the medieval period. Cross-list: ENGL 314.

MDEM 320 - DIRECTED READING IN MEDIEVAL STUDIES  
Short Title: DIRECTED READING MEDIEVAL STDY  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Independent Study  
Credit Hours: 1-3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Student works one-on-one with an individual faculty member on a topic directly related to Medieval Studies. Instructor Permission Required.

MDEM 323 - RELIGIOUS VISUAL CULTURES IN TRADITIONAL CHINA  
Short Title: CHINESE RELIGIOUS ART  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This seminar explores the visual materials and their context that shed light on pre-modern China's Buddhist, Daoist, funeral, and other diverse religious and ritual practices. Topics of discussion include iconic and aniconic traditions; breathing, meditation, and visualization; paradise and hell; body; ritual performance; patronage; Buddhist grottoes; tombs; multi-ethnic; printing. Cross-list: ASIA 323, HART 323.

MDEM 324 - COEXISTENCE IN MEDIEVAL SPAIN  
Short Title: COEXISTENCE IN MEDIEVAL SPAIN  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Course explores the history of the Iberian Peninsula from late Antiquity to the early 16th century, focusing on coexistence and conflict between medieval Spain's three religious communities - Christians, Jews, and Muslims. Cross-list: HIST 324.
MDEM 327 - EUROPEAN FRONTIER SOCIETIES  
Short Title: MEDIEVAL BORDERLANDS  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Courses examines the military, political, social and cultural developments on the European frontiers between 500-1500 AD. Topics include colonization and conquest, crusades and Spanish Reconquista, piracy, slavery, encounters with native peoples, spread of Christianity, medieval colonial regimes, map-making and cultural exchanges. Cross-list: HIST 327.

MDEM 330 - EARLY MEDIEVAL ART  
Short Title: EARLY MEDIEVAL ART  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Early Medieval Art from the 5th Century to the Romanesque period. This course begins with a study of the art and architecture of the Ostrogoths, Visigoths, Lombards, Celts, Anglo-Saxons, Franks, and Merovingians, and the transformation of the Roman World through new Germanic, Barbarian, and Christian forces. The second part of the course considers the cultural Renaissance of the Carolingian and Ottonian Periods under rulers such as Charlemagne and Otto III. The last third of the course focuses on themes of pilgrimage, relics, crusades and the emergence of new monumental tradition in art and architecture during the Romanesque Period. Cross-list: HART 330.

MDEM 331 - GOTHIC ART  
Short Title: GOTHIC ART  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Examination of the full array of sacred art and architecture produced in the early and high gothic periods in northern Europe. Includes cathedral architecture, sculpture, stained glass, manuscripts, and metalwork studies in relationship to the expansion of royal and Episcopal power. Cross-list: HART 331.

MDEM 332 - ART OF THE COURTS  
Short Title: ART OF THE COURTS  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Examination of art and architecture produced in the late gothic period within three distinct settings-the court, the city, and the church. Includes private, public, and religious life as expressed in the objects, architecture, and decoration of the castle and palace, the house, city hall and hospital, and the chapel and parish church. Cross-list: HART 332.

MDEM 340 - NORTHERN RENAISSANCE ART  
Short Title: NORTHERN RENAISSANCE ART  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Study of art in northern Europe from Jan van Eyck to Peter Bruegel. Cross-list: HART 340.

MDEM 343 - MASTERS OF THE BAROQUE ERA  
Short Title: MASTERS OF THE BAROQUE ERA  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Study of the works of the greatest painters and sculptors in Europe during the Baroque period. Includes Rembrandt, Rubens, Caravaggio, Poussin, Claude, and Velazquez. Cross-list: HART 343.

MDEM 345 - RENAISSANCE EUROPE  
Short Title: RENAISSANCE EUROPE  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: How did the recovery of ancient texts shape the discovery of new worlds and perhaps the destruction of the old? This course explores major developments in western Europe from the rise of Italian humanism in the fourteenth century to the imperial expansion and devastating conflicts of the 1500s and 1600s. Cross-list: HIST 345.
MDEM 350 - DEMONS, MENTAL ILLNESS AND MEDICINE  
Short Title: DEMONS/MENTAL ILLNESS/MEDICINE  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Treats complex connections between religious beliefs/practices and formulation of human psychology in western tradition, through a historical reckoning with demonology. Consider the way demons are represented -- from semi-corporeal beings to marks of mental illness -- by looking at texts from the ancient world to modern psychiatry. Cross-list: RELI 350.

MDEM 357 - JEWS AND CHRISTIANS IN MEDIEVAL EUROPE  
Short Title: JEWS & CHRISTIANS-MEDIEVAL EUR  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Course will focus on Jewish-Christian coexistence in medieval Europe. Will examine the Jews’ legal status in Christendom, their communal life, economic activities, intellectual achievements, while also focusing on the complex dynamics of Jewish-Christian interaction, and the shifting patterns of persecution and acceptance. Cross-list: HIST 357.

MDEM 363 - THE RISE OF CAPITALISM AND LATE MEDIEVAL AND EARLY MODERN ART  
Short Title: CAPITALISM & ART, 1300-1700  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course will explore how the rise of capitalism affected late medieval and early modern art. It will explore depictions of avarice, charity, and poverty; representations of shopping; how the rise of the art market affected art production; images of different socio-economic classes, and the material culture of money. Cross-list: HART 364.

MDEM 364 - CENTRAL ASIAN CONQUEST EMPIRES  
Short Title: CENTRAL ASIAN CONQUEST EMPIRES  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Course examines the rise of Chingis Khan and Mongol Steppe society (religion, role of women, cultural exchange, strategies of violence, imperial ideologies) as well as successor empires: Yuan, Golden Horde, Ilkhanid and eventually that ruled by Timur/Taerlane, who reproduced Mongol imperial power in Central Asia and India. Cross-list: HIST 364.

MDEM 370 - INTRODUCTION TO TRADITIONAL CHINESE POETRY  
Short Title: INTRO TO TRAD CHINESE POETRY  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course seeks to decode enchanting features of traditional Chinese poetry through examining the transformation of poetic genres, the interaction between poetic creation and political, social and cultural changes, and the close association of poetry with art. Thus, this course also serves to understand Chinese culture and history through poetic perspectives. All readings in English translation. Cross-list: ASIA 330, CHIN 330.

MDEM 373 - CHINESE ART AND VISUAL CULTURE  
Short Title: CHINESE ART AND VISUAL CULTURE  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: In this course, we will study how various artistic styles developed in historical, social, and cultural contexts from the ancient period to the present day. Through the careful examination of architecture, calligraphy, painting, sculpture, ceramics, bronze, and film, students will gain a deeper understanding of Chinese art and visual culture. Cross-list: ASIA 372, HART 372.

MDEM 375 - INTRODUCTION TO CLASSICAL CHINESE NOVELS  
Short Title: CLASSICAL CHINESE NOVELS  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Examination of the basic characteristics of classical Chinese novels, primarily through six important works from the 16th to 18th centuries: Water Margin, Monkey, Golden Lotus, Scholars, Romance of the Three Kingdoms, and Dream of the Red Chamber. Cross-list: ASIA 335, CHIN 335.

MDEM 376 - EAST & WEST: MEDIEVAL VISUAL CULTURE IN CHINA AND NORTHERN EUROPE  
Short Title: EAST AND WEST  
Department: Medieval/Early Modern Studies  
Grade Mode: Standard Letter  
Course Type: Seminar  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course explores a series of issues that are critically important for the medieval art of both China and northern Europe. Topics include materials and techniques; public and private art: commerce, technology and prints; art and motion; archaeology, paradise and hell; maps and space; the gaze; erotica; patronage; and multiculturalism. Cross-list: ASIA 376, HART 376.
MDEM 377 - MEDIEVAL MANUSCRIPTS
Short Title: MEDIEVAL MANUSCRIPTS
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar explores illuminated European manuscripts from late antiquity through the early sixteenth century. It examines manuscripts' functions, patrons, makers, and materials and technique, as well as such issues as the relationship between text and image and the manuscript's ideological stance. Students have the opportunity to study original medieval illuminations. Cross-list: HART 377.

MDEM 378 - DUTCH ART IN THE AGE OF REMBRANDT
Short Title: DUTCH ART IN AGE OF REMBRANDT
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will examine Dutch and Flemish seventeenth-century art, including major masters, such as Rembrandt, Rubens, and Vermeer, and major developments, such as the rise of still life, genre, and landscape painting. Cross-list: HART 378.

MDEM 379 - WOMEN IN CHINESE LITERATURE
Short Title: WOMEN IN CHINESE LITERATURE
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines women's roles in Chinese Literature as writers, readers, and characters, focusing particularly on the tension between women's lived bodily experiences and the cultural experiences inscribed on the female body and how, in the process, women have contrarily gendered patriarchal culture into their own. It will also touch on Chinese women's incorporation of the Western Tradition. Cross-list: ASIA 399, SWGS 399.

MDEM 391 - THE REFORMATION & ITS RESULTS
Short Title: THE REFORMATION & ITS RESULTS
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Theology and church-state issues from 16th-century Reformation to 17th-century; medieval background; Luther and Calvin, the Catholic Reformation; religious wars; Protestant orthodoxy; Pietist spirituality; Puritanism; and calls for toleration. Cross-list: RELI 391.
Mutually Exclusive: Credit cannot be earned for MDEM 391 and RELI 286.

MDEM 395 - CLASSICAL CHINESE NOVELS
Short Title: CLASSICAL CHINESE NOVELS
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level

MDEM 398 - INDEPENDENT STUDY IN MEDIEVAL AND EARLY MODERN STUDIES
Short Title: INDEPENDENT STUDY
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level

MDEM 402 - MIDDLE HIGH GERMAN
Short Title: MIDDLE HIGH GERMAN
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An introduction to the phonology and morphology of Middle High German, such as will prepare students to read 'Tristan', 'Parzifal', and the 'Niebelungenlied', as well as the great lyric poets of that period. Emphasis will be on pronunciation and grammatical distinctions between Middle High and Modern High German as well as on the diverging semantic developments of the two vocabularies.

MDEM 404 - BEGINNINGS OF THE LANGUAGE AND LITERATURE OF FRANCE
Short Title: THE LANG AND LIT OF FRANCE
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course includes an external history of the French language, an examination of hagiographic literature and the chanson de geste in their cultural and artistic contexts, as well as bibliographic component to acquaint the students with library tools available for research emphasizing medieval resources but not excluding those for later periods. Students will acquire a reading knowledge of Old French. Course taught in French. Cross-list: FREN 404. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor
MDEM 411 - THE LITERARY AND HISTORICAL IMAGE OF THE MEDIEVAL WOMAN
Short Title: LIT & HIST IMAGE MED WOMAN
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): FREN 311 or FREN 312
Description: Comparison and contrast of the presentation of the medieval woman in literature with evidence of historical women from contemporary documents and records.

MDEM 412 - INTRODUCTION TO OLD ENGLISH LANGUAGE
Short Title: INTRO TO OLD ENGLISH LANGUAGE
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An introduction to the language, prose and shorter poems. Cross-list: ENGL 412.

MDEM 413 - BEOWULF IN OLD ENGLISH
Short Title: BEOWULF IN OLD ENGLISH
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ENGL 412 or MDST 412 or MDEM 412
Description: A course in the study of Beowulf in Old English. Cross-list: ENGL 413. Repeateable for Credit.

MDEM 425 - COURTLY LOVE IN MEDIEVAL FRANCE
Short Title: COURTLY LOVE MEDIEVAL FRANCE
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): FREN 311 or FREN 312
Description: Undergraduate version of FREN 515. Study of the Occitan and Old French poetry that served as the source of the kind of love that came to be called "amour courtois" in the 19th century. Cross-list: FREN 415. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor.

MDEM 427 - TOPICS IN EARLY MUSIC
Short Title: TOPICS IN EARLY MUSIC
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A course on the medieval and early modern periods, focusing on the development of music as an art form and its relationship to art, society, and culture. Cross-list: MUSI 427.

MDEM 429 - MUSIC OF THE MIDDLE AGES
Short Title: MUSIC OF THE MIDDLE AGES
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A study of the major musical styles and composers of western art music before 1400 and their historical, cultural, and sociological contexts. Cross-list: MUSI 429.

MDEM 431 - ARCHITECTURE OF THE GOTHIC CATHEDRAL FROM THE MIDDLE AGES TO THE TWENTIETH CENTURY
Short Title: ARCH OF GOTHIC CATHEDRAL
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will focus on one of the most important contributions to the history of western architecture--the Gothic cathedral. The course will approach the material from a number of different perspectives--the formal and technical development of Gothic architecture; the Medieval architect and the design of Gothic buildings; the social, economic, and political history of "big church" building in the Middle Ages; Gothic architecture as experience and metaphor; and the afterlife of the Gothic cathedral from Vasari to the National Cathedral in Washington, D.C. Cross-list: HART 431.

MDEM 434 - SEEING SEX IN EUROPEAN ART, 1400-1700
Short Title: SEEING SEX IN EUROPEAN ART
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will examine the visual history of sexuality from 1400-1700. It will explore how imagery structured sexual desire; the role of erotic sacred art; the rise of pornography; the intersection of spatial topography and sexuality; the linkage of licit and illicit sexualities; and the sexuality of artist and patrons. Cross-list: HART 434, SWGS 434.

MDEM 435 - MULTICULTURAL EUROPE, 1400-1700
Short Title: MULTICULTURAL EUROPE,1400-1700
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The art of Europe was never the product of a single culture working in isolation. This seminar will explore the multicultural aspects of medieval and early modern Europe by focusing on the visual culture of groups who defined themselves or are today defined by nationality, race, or religion. Cross-list: HART 435, HIST 443.
MDEM 436 - LITERATURE AND CULTURE OF THE MIDDLE AGES: KING ARTHUR
Short Title: LIT & CULTURE OF MIDDLE AGES
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): FREN 311 or FREN 312
Description: Examination of the origins of the legend of King Arthur and reasons for its popularity, particularly in literature of the French Middle Ages but also in other medieval literatures of Western Europe. Includes discussion of the legend's influence in diverse areas even in modern times. Cross-list: FREN 416. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor

MDEM 444 - VISIONS AND VISIONARY PRACTICES: MEDIEVAL TO MODERN
Short Title: VISIONS & VISIONARY PRACTICES
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines accounts of visions, comparing medieval and modern visionary techniques and processes and relating visionary writings to cultural and personal contexts. Includes some Christian theology along with other theoretical frameworks, but emphasis on praxis. Cross-list: RELI 444.

MDEM 456 - COLLEGIUM MUSICUM
Short Title: COLLEGIUM MUSICUM
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Performance of music up to the early 17th century. Does not count as chamber music. Instructor permission required. Repeatable for credit. Instructor Permission Required. Cross-list: MUSI 436. Repeatable for Credit.

MDEM 462 - ENGLISH SPIRITUALITY AFTER HENRY VIII: PROTESTANT, CATHOLIC, OR ANGLICAN?
Short Title: ENGLISH SPIRITUALITY
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Reformation's aftermath explored through key topics, texts in spiritual practice, e.g.: ecclesiastical discipline; secularization; stylized and free-form intersections of English time with Christian eternity; King James Bible; Book of Common Prayer; "saintly revolution;" Thomas Cranmer; William Laud; William Shakespeare; Lancelot Andrews; John Donne; J.H. Newman; hymnody; C.S. Lewis; T.S. Eliot. Cross-list: RELI 462.

MDEM 478 - MEDIEVAL STUDIES
Short Title: MEDIEVAL STUDIES
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Special Topics in medieval Europe comparative literature. Repeatable for Credit.

MDEM 481 - ANCIENT AND MEDIEVAL PHILOSOPHY
Short Title: ANCIENT & MEDIEVAL PHILOSOPHY
Department: Medieval/Early Modern Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Topics in the history of philosophy from the 4th century B.C. through the 14th century. Mutually Exclusive: Credit cannot be earned for MDEM 481 and CLAS 301/MDEM 301/MDST 301/PHIL 301.

Mgmt Integrated Crse Offering (MICO)

MICO 601 - CRITICAL THINKING AND STRATEGIC DECISION MAKING
Short Title: CRITICAL THINKING & DECISION
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 6
Course Level: Graduate

MICO 602 - CUSTOMER FOCUS PRODUCT MANAGEMENT FOR OILFIELD SERVICES FIRMS
Short Title: CUSTOMER FOCUS PRODUCT MGMT
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Course Level: Graduate
Description: Understanding customer needs, and developing products that successfully meet those needs is a cornerstone of success for oilfield services firms. Products in such firms may range from nuts and bolts to multi#million dollar rigs. How should firms ensure that their products, processes, people, and pricing strategies are aligned to customer needs? The course will introduce a strategic framework that can enable firms to become customer focused, gain competitive advantage, become financially disciplined, and develop strategic focus. Case studies and articles from business press will be used to illustrate the key concepts. Department Permission Required.
**Military Science (MILI)**

**MILI 106 - INTERMEDIATE PHYSICAL FITNESS**
*Short Title:* INTRO TO PHYSICAL FITNESS  
*Department:* Military Science  
*Grade Mode:* Undergraduate Lower-Level  
*Description:* Physically demanding. Develops skills through team competition. Land navigation, assembly/disassembly of weapon, tactics, assembly of one-man rope bridge. Students are also required to attend fitness training 5 times a week. Participants compete for Ranger Challenge slots. Selected cadets compete against other teams at the annual Ranger Challenge competition. Course taught at the University of Houston. Must provide CC Form 139-r to Military Science Dept. at UH prior to attendance. Repeatable for Credit.

**MILI 109 - INTRODUCTION TO PHYSICAL FITNESS**
*Short Title:* INTRODUCTION TO PHYSICAL FITNESS  
*Department:* Military Science  
*Grade Mode:* Undergraduate Lower-Level  
*Description:* Open to all students. Utilizes Army fitness techniques; develops strength, flexibility and endurance; develops self-confidence through leadership training and physical activities. Course taught at the University of Houston. Must provide CC Form 139-r to Military Science Dept. at UH prior to attendance. Repeatable for Credit.

**MILI 121 - INTRODUCTION TO LEADERSHIP**
*Short Title:* INTRODUCTION TO LEADERSHIP  
*Department:* Military Science  
*Grade Mode:* Undergraduate Lower-Level  
*Description:* Principles of effective leadership and reinforcement of self-confidence through participation in physically and mentally challenging training with upper-division ROTC students; develop communication skills to improve individual performance and group interaction. One hour classroom session and a required lab. No military commitment is required for attending this course. Course taught at the University of Houston. Must provide CC Form 139-r to Military Science Dept. at UH prior to attendance. Department Permission Required.

---

**MICO 603 - STRATEGIC DESIGN AND MANAGEMENT OF LOGISTICS DISTRIBUTION NETWORKS FOR THE ENERGY INDUSTRY**
*Short Title:* STRATEGY DGN & MGMT: LOGISTICS  
*Department:* Management  
*Grade Mode:* Standard Letter  
*Course Type:* Seminar  
*Credit Hours:* 1.5  
*Course Level:* Graduate  
*Description:* This course provides the necessary quantitative modeling techniques for managers to address logistics problems – that is, finding the least expensive way to transport products from their origin to their destinations. Real logistic problems are often coupled with manufacturing / plant location decisions. We will study both Linear and Non-Linear modeling techniques. Many of these problems have a natural graphical network representation and are part of the minimum cost network flow model. Specific examples of network optimization problems include plant location problems, transportation problems, shortest route problems, maximal flow problems, equipment replacement problems and others. We will develop the basic concepts behind those methodologies with simple examples and then use them to solve complex problems in the oil and gas industry. We will use excel and other appropriate software. Department Permission Required.

---

**MICO 604 - MINDFULNESS AND PERFORMANCE IN HIGH RELIABILITY ORGANIZATIONS**
*Short Title:* MINDFULNESS AND PERFORMANCE  
*Department:* Management  
*Grade Mode:* Standard Letter  
*Course Type:* Seminar  
*Credit Hours:* 1.5  
*Restrictions:* Enrollment is limited to Graduate level students.  
*Course Level:* Graduate  
*Description:* While organizations frequently discuss the importance of safety, safety incidents are both commonplace and costly across a number of industries. This course is designed to equip you with tools and insights that will help you and your organization prevent costly, safety-related errors and achieve higher and more reliable performance. Department Permission Required.

---

**MICO 605 - MANAGING FOREIGN MARKET ENTRY FOR THE ENERGY INDUSTRY**
*Short Title:* MANAGING FOREIGN MARKET ENTRY  
*Department:* Management  
*Grade Mode:* Standard Letter  
*Course Type:* Seminar  
*Credit Hours:* 1.5  
*Restrictions:* Enrollment is limited to Graduate level students.  
*Course Level:* Graduate  

---

**MICO 606 - POST-MERGER INTEGRATION PROCESS FOR THE ENERGY INDUSTRY**
*Short Title:* POSTMERGER INTEGRATION PROCESS  
*Department:* Management  
*Grade Mode:* Standard Letter  
*Course Type:* Seminar  
*Credit Hours:* 1.5  
*Course Level:* Graduate
MILI 122 - INTRODUCTION TO LEADERSHIP II  
**Short Title:** INTRODUCTION TO LEADERSHIP II  
**Department:** Military Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 2  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Description:** Continuation of MILI 121. One hour classroom session and a required lab. No military commitment is required for attending this course. Course taught at the University of Houston. Must provide CC Form 139-r and DA 3425 to Military Science Dept. at UH prior to attendance. Department Permission Required.

MILI 123 - LEADERSHIP LAB  
**Short Title:** LEADERSHIP LAB  
**Department:** Military Science  
**Grade Mode:** Standard Letter  
**Course Type:** Laboratory  
**Credit Hours:** 0  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Description:** Course taught at the University of Houston. Must provide CC Form 139-r to Military Science Dept. at UH prior to attendance. Department Permission Required.

MILI 201 - FOUNDATIONS OF LEADERSHIP  
**Short Title:** FOUNDATIONS OF LEADERSHIP  
**Department:** Military Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 2  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Description:** Characteristics of leadership, problem analysis, decision making, oral presentations, first aid, small unit tactics, land navigation, fitness training. Fitness training required two times per week in addition to class and lab. Course taught at the University of Houston. Must provide CC Form 139-r to Military Science Dept. at UH prior to attendance. Department Permission Required.

MILI 202 - FOUNDATIONS OF LEADERSHIP II  
**Short Title:** FOUNDATIONS OF LEADERSHIP II  
**Department:** Military Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 2  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Description:** Continuation of MILI 201. Course taught at the University of Houston. Must provide CC Form 139-r to Military Science Dept. at UH prior to attendance. Department Permission Required.

MILI 203 - LEADERSHIP LABORATORY  
**Short Title:** LEADERSHIP LABORATORY  
**Department:** Military Science  
**Grade Mode:** Standard Letter  
**Course Type:** Laboratory  
**Credit Hours:** 0  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Description:** Course taught at the University of Houston. Must provide CC Form 139-rand DA 3425 to Military Science Dept. at UH prior to attendance. Department Permission Required.

MILI 281 - LEADER TRAINING COURSE (LTC)  
**Short Title:** LEADER TRAINING COURSE (LTC)  
**Department:** Military Science  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 8  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Description:** Four week off campus field training practicum. Introduces students to the Army and Leadership. No military obligation is associated with this course. Course taught at the University of Houston. Department Permission Required.

MILI 301 - ADVANCED LEADERSHIP  
**Short Title:** ADVANCED LEADERSHIP  
**Department:** Military Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Leadership training, preparing combat orders, military instruction principles, small unit tactics, and tactical communications. Course is designed to prepare students for Leader Development Assessment Course (LDAC). In addition to class, students must attend lab and physical fitness training. Course taught at the University of Houston. Department Permission Required.

MILI 302 - ADVANCED LEADERSHIP II  
**Short Title:** ADVANCED LEADERSHIP II  
**Department:** Military Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Continuation of MILI 301. Course taught at the University of Houston. Department Permission Required.

MILI 304 - LEADERSHIP LABORATORY  
**Short Title:** LEADERSHIP LABORATORY  
**Department:** Military Science  
**Grade Mode:** Standard Letter  
**Course Type:** Laboratory  
**Credit Hours:** 0  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Course taught at the University of Houston. Department Permission Required.

MILI 349 - LEADER DEVELOPMENT ASSESSMENT  
**Short Title:** LEADER DEVELOPMENT ASSESSMENT  
**Department:** Military Science  
**Grade Mode:** Standard Letter  
**Course Type:** Internship/Practicum  
**Credit Hours:** 4  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** MILI 302  
**Description:** Off campus field training practicum stressing application of leadership management with emphasis on tactical and special military skills. Course taught at the University of Houston. Department Permission Required.
MILI 398 - SPECIAL PROBLEMS
Short Title: SPECIAL PROBLEMS
Department: Military Science
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Junior or Senior. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course taught at the University of Houston. Department Permission Required.

MILI 401 - ADAPTIVE LEADERSHIP
Short Title: ADAPTIVE LEADERSHIP
Department: Military Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MILI 302
Description: Leadership and command, military law, administrative/ staff operations and procedures, dynamics of the military team, training management, ethics and professionalism. Prepares students for commissioning as an Army Officer. In addition to class, students must attend lab and physical fitness training. Course taught at the University of Houston. Department Permission Required.

MILI 402 - LEADERSHIP IN A COMPLEX WORLD
Short Title: LEADERSHIP IN A COMPLEX WORLD
Department: Military Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MILI 302
Description: Continuation of MILI 401. Course taught at the University of Houston. Department Permission Required.

MILI 403 - LEADERSHIP LABORATORY
Short Title: LEADERSHIP LABORATORY
Department: Military Science
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 0
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course taught at the University of Houston. Department Permission Required.

MILI 439 - SPECIAL PROBLEMS
Short Title: SPECIAL PROBLEMS
Department: Military Science
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Senior. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course taught at the University of Houston. Department Permission Required.

MUSIC (MUSI)

MUSI 117 - FUNDAMENTALS OF MUSIC I
Short Title: FUNDAMENTALS OF MUSIC I
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: For non-music majors with minimal music preparation. Rudiments of pitch and duration. Study of scales, chord structure, tonality, and forms.

MUSI 119 - EXPERIENCING MUSIC, EXPRESSING CULTURE: AN INTRODUCTION TO CHINESE MUSIC
Short Title: INTRODUCTION TO CHINESE MUSIC
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course is an introduction to Chinese music in the context of its historical and cultural evolution. It will explore the music on its own terms and in comparison to Western classical music.

MUSI 141 - CLASSICAL GUITAR/NON-MAJOR
Short Title: CLASSICAL GUITAR/NON-MAJOR
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Private instruction on guitar. Must register with the Shepherd School and the Registrar’s Office by the first week of classes. Department Permission Required. Repeatable for Credit.

MUSI 151 - FLUTE FOR NON-MAJORS
Short Title: FLUTE FOR NON-MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Must register with the Shepherd School and the Registrar’s Office by the first week of classes. Department Permission Required. Repeatable for Credit.

MUSI 153 - OBOE FOR NON-MAJORS
Short Title: OBOE FOR NON-MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Must register with the Shepherd School and the Registrar’s Office by the first week of classes. Department Permission Required. Repeatable for Credit.

MUSI 187 - HARP FOR NON-MAJORS
Short Title: HARP FOR NON-MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Must register with the Shepherd School and the Registrar’s Office by the first week of classes. Department Permission Required. Repeatable for Credit.

MUSI 191 - VIOLIN FOR NON-MAJORS
Short Title: VIOLIN FOR NON-MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Must register with the Shepherd School and the Registrar’s Office by the first week of classes. Department Permission Required. Repeatable for Credit.

MUSI 193 - VIOLA FOR NON-MAJORS
Short Title: VIOLA FOR NON-MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Must register with the Shepherd School and the Registrar’s Office by the first week of classes. Department Permission Required. Repeatable for Credit.

MUSI 195 - VIOLONCELLO FOR NON-MAJORS
Short Title: VIOLONCELLO FOR NON-MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Must register with the Shepherd School and the Registrar’s Office by the first week of classes. Department Permission Required. Repeatable for Credit.

MUSI 197 - DOUBLE BASS FOR NON-MAJORS
Short Title: DOUBLE BASS FOR NON-MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Must register with the Shepherd School and the Registrar’s Office by the first week of classes. Department Permission Required. Repeatable for Credit.

MUSI 205 - UNDERGRADUATE PERFORMANCE SEMINAR
Short Title: UG PERFORMANCE SEMINAR
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course is designed to create a dynamic performance experience. Practical exercises that harness, develop and enhance performance skills will be a major focus. Areas of study include efficient practice and performance preparation, confidence on stage, and audience communication. A final performance will incorporate skills developed throughout the semester. NOTE: For Music Majors Only

MUSI 211 - THEORY I
Short Title: THEORY I
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Intensive study of the fundamentals of pitch, rhythm, and timbre. Introduction to diatonic harmony and harmonic progression.

MUSI 212 - THEORY II
Short Title: THEORY II
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Harmony and counterpoint of the Baroque and Classical Eras.

MUSI 220 - SURVEY OF WORLD MUSIC
Short Title: SURVEY OF WORLD MUSIC
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Traditional, popular and classical musical styles from around the world will be explored for their sonic qualities as well as from an ethno musicological perspective, i.e., in terms of the musics’ interaction with cultural elements such as cosmology, social structure, art, language, economics and politics.
MUSI 222 - MEDIEVAL AND RENAISSANCE ERAS
Short Title: MEDIEVAL AND RENAISSANCE ERAS
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): MUSI 211 or MUSI 317
Description: Introduction to the study of Western music history, with emphasis on music before 1600. Score reading ability required. Cross-list: MDEM 222.

MUSI 231 - AURAL SKILLS AND PERFORMANCE TECHNIQUE I
Short Title: AURAL SKILLS & PERFORM TECH I
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Preliminary studies in ear-training, sight-singing, and dictation.

MUSI 232 - AURAL SKILLS AND PERFORMANCE TECHNIQUE II
Short Title: AURAL SKILLS & PERF TECH II
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Continuation of MUSI 231.

MUSI 236 - MUSIC HISTORY THROUGH TECHNOLOGY
Short Title: MUSIC HISTORY THRU TECHNOLOGY
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An exploration of music history and literature taught electronically.

MUSI 240 - UNITY AND VARIETY IN MUSIC
Short Title: UNITY AND VARIETY IN MUSIC
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In music, as in life, we need unity and variety: expectations met and occasional surprises. Through studying folk, pop, and art songs, piano solos, instrumental sonatas, chamber and orchestral music, this course helps students become more perceptive listeners by investigating how composers manipulate musical elements to balance unity and variety. Must be able to read music.

MUSI 251 - SECONDARY FLUTE
Short Title: SECONDARY FLUTE
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Repeatable for Credit.

MUSI 253 - SECONDARY OBOE
Short Title: SECONDARY OBOE
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Repeatable for Credit.

MUSI 255 - SECONDARY CLARINET
Short Title: SECONDARY CLARINET
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Repeatable for Credit.

MUSI 257 - SECONDARY BASSOON
Short Title: SECONDARY BASSOON
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Repeatable for Credit.

MUSI 261 - SECONDARY HORN
Short Title: SECONDARY HORN
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Repeatable for Credit.

MUSI 263 - SECONDARY TRUMPET
Short Title: SECONDARY TRUMPET
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Repeatable for Credit.
MUSI 265 - SECONDARY TROMBONE  
Short Title: SECONDARY TROMBONE  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Repeatable for Credit.

MUSI 267 - SECONDARY TUBA  
Short Title: SECONDARY TUBA  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Repeatable for Credit.

MUSI 271 - SECONDARY PERCUSSION  
Short Title: SECONDARY PERCUSSION  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Repeatable for Credit.

MUSI 273 - SECONDARY VOICE  
Short Title: SECONDARY VOICE  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Repeatable for Credit.

MUSI 281 - SECONDARY PIANO  
Short Title: SECONDARY PIANO  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Repeatable for Credit.

MUSI 285 - SECONDARY HARPSICHORD  
Short Title: SECONDARY HARPSICHORD  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Repeatable for Credit.

MUSI 287 - SECONDARY HARP  
Short Title: SECONDARY HARP  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Repeatable for Credit.

MUSI 291 - SECONDARY VIOLIN  
Short Title: SECONDARY VIOLIN  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Repeatable for Credit.

MUSI 293 - SECONDARY VIOLA  
Short Title: SECONDARY VIOLA  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Repeatable for Credit.

MUSI 295 - SECONDARY VIOLONCELLO  
Short Title: SECONDARY VIOLONCELLO  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Repeatable for Credit.

MUSI 297 - SECONDARY DOUBLE BASS  
Short Title: SECONDARY DOUBLE BASS  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Repeatable for Credit.
MUSI 303 - UNDERGRAD COMPOSITION SEMINAR
Short Title: UNDERGRAD COMPOSITION SEMINAR
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 305 - COMPOSITION ELECTIVE
Short Title: COMPOSITION ELECTIVE
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Must register with the Shepherd School of Music and the Registrar’s office by the first week of classes. Department Permission Required. Repeatable for Credit.

MUSI 307 - COMPOSITION FOR NON-MAJORS
Short Title: COMPOSITION FOR NON-MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Creative composition employing 20th and 21st century vocabularies. Repeatable for Credit.

MUSI 311 - THEORETICAL STUDIES III
Short Title: THEORETICAL STUDIES III
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An examination of music from the Classical Era through the late Nineteenth Century, with particular focus on phrase structure, form and chromatic harmony.

MUSI 312 - THEORETICAL STUDIES IV
Short Title: THEORETICAL STUDIES IV
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Analysis of selected works composed since 1900

MUSI 316 - EXPERIMENTAL SOUND AND VIDEO
Short Title: EXPERIMENTAL SOUND AND VIDEO
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The purpose of this course is to create experimental, collaborative digital media artworks. Students will learn the basic tools and techniques of digital video and audio production. Students will engage in experiment with sound and moving images by working to complete a number of short projects. Pre-registration of this course is limited to 8 students. 4 additional places will be reserved for VADA and Shepherd School of Music majors. Cross-list: FILM 323. Repeatable for Credit.

MUSI 317 - THEORY FOR NON-MAJORS I
Short Title: THEORY FOR NON-MAJORS I
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of harmony, melody, rhythm, and form.

MUSI 318 - THEORY FOR NON-MAJORS II
Short Title: THEORY FOR NON-MAJORS II
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MUSI 317
Description: Continuation of MUSI 317.

MUSI 321 - BAROQUE AND EARLY CLASSICAL ERAS
Short Title: BAROQUE & EARLY CLASSICAL ERAS
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MUSI 212 or MUSI 317 and (MUSI 222 or MDST 222)
Description: Advanced historical studies in music of the seventeenth and eighteenth centuries. Score reading ability required.
MUSI 322 - CLASSICAL AND ROMANTIC ERAS  
**Short Title:** CLASSICAL AND ROMANTIC ERAS  
**Department:** Music  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** MUSI 321  
**Description:** Advanced historical studies in the music of the eighteenth and nineteenth centuries. Score reading ability required.

MUSI 327 - MUSIC LITERATURE FOR NON-MAJORS I  
**Short Title:** MUSIC LIT NON-MAJORS I  
**Department:** Music  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Historical survey of music from the Middle Ages to 1750.

MUSI 328 - MUSIC LITERATURE FOR NON-MAJORS II  
**Short Title:** MUSIC LIT NON-MAJORS II  
**Department:** Music  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Historical survey of music from 1750 to the present.

MUSI 329 - SPECIAL STUDIES IN MUSIC HISTORY  
**Short Title:** SPEC STUDIES IN MUSIC HISTORY  
**Department:** Music  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Special studies in music history. Topics may vary. Please consult with the department for additional information. Repeatable for Credit.

MUSI 331 - AURAL SKILLS AND PERFORMANCE TECHNIQUES III  
**Short Title:** AURAL SKILLS & PERF TECH III  
**Department:** Music  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 2  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Continuation of MUSI 232.

MUSI 332 - AURAL SKILLS AND PERFORMANCE TECHNIQUES IV  
**Short Title:** AURAL SKILLS & PERF TECH IV  
**Department:** Music  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 2  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Continuation of MUSI 331.

MUSI 334 - CAMPANILE ORCHESTRA  
**Short Title:** CAMPANILE ORCHESTRA  
**Department:** Music  
**Grade Mode:** Standard Letter  
**Course Type:** Studio  
**Credit Hour:** 1  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Registration is by audition only. This course requires weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Repeatable for Credit.

MUSI 335 - UNDERGRADUATE CHORUS  
**Short Title:** RICE CHORALE  
**Department:** Music  
**Grade Mode:** Standard Letter  
**Course Type:** Studio  
**Credit Hour:** 1  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Repeatable for Credit.

MUSI 336 - UNDERGRADUATE OPERA WORKSHOP  
**Short Title:** UNDERGRADUATE OPERA WORKSHOP  
**Department:** Music  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hour:** 1  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Operatic techniques for the singer/actor: the cultivation, through study and performance, of free, expressive and significant movement on stage, and the development of musical, dramatic and muscular sensitivity as the basis of good opera theater. MUSI 337 - UNDERGRADUATE ORCHESTRA  
**Short Title:** UNDERGRADUATE ORCHESTRA  
**Department:** Music  
**Grade Mode:** Standard Letter  
**Course Type:** Studio  
**Credit Hours:** 2  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Repeatable for Credit.
**MUSI 338 - UNDERGRADUATE CHAMBER MUSIC**
*Short Title: CHAMBER MUSIC - UG*  
*Department: Music*  
*Grade Mode: Standard Letter*  
*Course Type: Studio*  
*Credit Hour: 1*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Description: On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts.*  

**MUSI 339 - UNDERGRADUATE ORCHESTRAL REPETTORE**
*Short Title: UG ORCHESTRAL REP*  
*Department: Music*  
*Grade Mode: Standard Letter*  
*Course Type: Studio*  
*Credit Hour: 1*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Description: Section 1: Violin; Section 2: Viola; Section 3: Cello; Section 4: Double Bass; Section 5: Woodwinds; Section 6: Brass; Section 7: Percussion; Section 8: Harp. Repeatable for Credit.*  

**MUSI 340 - RICE SYMPHONIC BAND**
*Short Title: RICE SYMPHONIC BAND*  
*Department: Music*  
*Grade Mode: Standard Letter*  
*Course Type: Studio*  
*Credit Hour: 1*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Description: Section 1: SYMPHONIC BAND, TUD Band Hall; Section 2: CHAMBER MUSIC FOR NON-MAJORS: students with already-formed chamber ensembles will apply for this course in the fall. See bands.rice.edu for applications. Those selected will be given instructor permission for the spring semester. Repeatable for Credit.*  

**MUSI 341 - JUNIOR RECITAL**
*Short Title: JUNIOR RECITAL*  
*Department: Music*  
*Grade Mode: Satisfactory/Unsatisfactory*  
*Course Type: Studio*  
*Credit Hours: 0*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Description: On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Department Permission Required.*  

**MUSI 342 - RICE JAZZ ENSEMBLE**
*Short Title: RICE JAZZ ENSEMBLE*  
*Department: Music*  
*Grade Mode: Standard Letter*  
*Course Type: Studio*  
*Credit Hour: 1*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Description: Section 1, Jazz Ensemble; Section 2, Jazz Lab. TUD Band Hall. On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Repeatable for Credit.*  

**MUSI 345 - APPLIED STUDIES IN JAZZ**
*Short Title: APPLIED STUDIES IN JAZZ*  
*Department: Music*  
*Grade Mode: Standard Letter*  
*Course Type: Studio*  
*Credit Hours: 2*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Description: Private lessons on specific advanced techniques in jazz improvisation. Must register with the Shepherd School and the Registrar’s Office by the first week of classes. Department Permission Required. Repeatable for Credit.*  

**MUSI 351 - CONCENTRATION FLUTE**
*Short Title: CONCENTRATION FLUTE*  
*Department: Music*  
*Grade Mode: Standard Letter*  
*Course Type: Lecture/Laboratory*  
*Credit Hours: 2*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Description: Repeatable for Credit.*  

**MUSI 353 - CONCENTRATION OBOE**
*Short Title: CONCENTRATION OBOE*  
*Department: Music*  
*Grade Mode: Standard Letter*  
*Course Type: Lecture/Laboratory*  
*Credit Hours: 2*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Description: Repeatable for Credit.*  

**MUSI 355 - CONCENTRATION CLARINET**
*Short Title: CONCENTRATION CLARINET*  
*Department: Music*  
*Grade Mode: Standard Letter*  
*Course Type: Lecture/Laboratory*  
*Credit Hours: 2*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Description: Repeatable for Credit.*  

**MUSI 357 - CONCENTRATION BASSOON**
*Short Title: CONCENTRATION BASSOON*  
*Department: Music*  
*Grade Mode: Standard Letter*  
*Course Type: Laboratory*  
*Credit Hours: 2*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Description: Repeatable for Credit.*  

**MUSI 361 - CONCENTRATION HORN**
*Short Title: CONCENTRATION HORN*  
*Department: Music*  
*Grade Mode: Standard Letter*  
*Course Type: Lecture/Laboratory*  
*Credit Hours: 2*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Description: Repeatable for Credit.*
MUSI 363 - CONCENTRATION TRUMPET
Short Title: CONCENTRATION TRUMPET
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 365 - CONCENTRATION TROMBONE
Short Title: CONCENTRATION TROMBONE
Department: Music
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 367 - CONCENTRATION TUBA
Short Title: CONCENTRATION TUBA
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 369 - CONCENTRATION PERCUSSION
Short Title: CONCENTRATION PERCUSSION
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 371 - CONCENTRATION VOICE
Short Title: CONCENTRATION VOICE
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 373 - UNDERGRADUATE OPERA PERFORMANCE
Short Title: UG OPER PERFORMANCE
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 1-2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: After audition, Director of Opera Studies makes role assignments and grants credit to roles. Leading roles get 2 credits, small roles and chorus in opera get 1 credit. Instructor Permission Required. Repeatable for Credit.

MUSI 378 - CLASSICAL, CONTEMPORARY, AND CROSS-CULTURAL ASIAN MUSIC
Short Title: CROSS-CULTURAL ASIAN MUSIC
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.

Short Title: CONCENTRATION PIANO
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 383 - CONCENTRATION ORGAN
Short Title: CONCENTRATION ORGAN
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 384 - CONCENTRATION ORGAN INTENSIVE
Short Title: CONCENTRATION ORGAN INTENSIVE
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.
MUSI 387 - CONCENTRATION HARP
Short Title: CONCENTRATION HARP
Department: Music
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 389 - COLLABORATIVE PIANO SKILLS
Short Title: COLLABORATIVE PIANO SKILLS
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A practicum exploring the pianist as an ensemble player. 3 sessions weekly. Performance class for pianists in partnership with instrumentalists and singers-particular techniques discovered in balance, pedaling, articulation, style, etc.; Supervised sight-reading private appointment with instructor on individual repertoire-songs, sonatas, concerto reductions, etc. Instructor Permission Required. Repeatable for Credit.

MUSI 391 - CONCENTRATION VIOLIN
Short Title: CONCENTRATION VIOLIN
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 393 - CONCENTRATION VIOLA
Short Title: CONCENTRATION VIOLA
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 395 - CONCENTRATION VIOLONCELLO
Short Title: CONCENTRATION VIOLONCELLO
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 397 - CONCENTRATION DOUBLE BASS
Short Title: CONCENTRATION DOUBLE BASS
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.
MUSI 413 - INTRODUCTION TO DALCROZE EURHYTHMICS  
Short Title: Dalcroze Eurhythmics  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Laboratory  
Credit Hours: 2

MUSI 414 - PIANO CHAMBER MUSIC LITERATURE  
Short Title: Piano Chamber Music Literature  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Survey on 20th and 21st century chamber music with piano. Instructor Permission Required.

MUSI 415 - BAND ARRANGING  
Short Title: Band Arranging  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Creative band arranging for marching, jazz, and concert bands. Study of contemporary harmony, musical style, and scoring supported by practical performance and analysis of student projects. Meets in TUD S101A. Repeatable for Credit.

MUSI 416 - ORCHESTRATION  
Short Title: Orchestration  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Intensive study of the individual instruments of the orchestra and orchestration techniques from the classical period through the present. Works for analysis include those by Mozart, Beethoven, and Ravel. Students will also form an ensemble and arrange/orchestrate works for the ensemble.

MUSI 417 - MUSIC FOR MEDIA  
Short Title: Music for Media  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: An overview of writing music for linear and non-linear media, includes motion pictures, television, interactive and passive multimedia and digital games. Instructor Permission Required.

MUSI 421 - THE MODERN ERA  
Short Title: The Modern Era  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): MUSI 322  
Description: Advanced historical studies in music of the twentieth and twenty-first centuries. Score reading ability required.

MUSI 422 - RENAISSANCE MUSIC  
Short Title: Renaissance Music  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: A study of the major musical styles and composers of Western art and music between 1400 and 1600 and their historical, cultural, and sociological contexts.

MUSI 426 - PIANO LITERATURE - SURVEY  
Short Title: Piano Literature - Survey  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: A study of the major musical styles and composers of western art music before 1400 and their historical, cultural, and sociological contexts. Cross-list: MDEM 429.

MUSI 431 - AURAL SKILLS AND PERFORMANCE TECHNIQUES V  
Short Title: Aural Skills & Perform Tech V  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Continuation of MUSI 332.
MUSI 432 - GRADUATE AURAL SKILLS REVIEW  
Short Title: GRADUATE AURAL SKILLS REVIEW  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: A remedial course in ear-training, sight-singing, and musical dictation.

MUSI 435 - CONTEMPORARY MUSIC ENSEMBLE  
Short Title: CONTEMPORARY MUSIC ENSEMBLE  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Note: Does not count as chamber music. Not offered regularly. On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Repeatable for Credit.

MUSI 436 - COLLEGIUM MUSICUM  
Short Title: COLLEGIUM MUSICUM  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: The performance of vocal and instrumental music of the Renaissance and Baroque eras in which instrumentalists use period instruments. Specific repertory will depend on student interest and on the availability of instruments. The class entails two hours of evening rehearsal each week and an end-of-semester recital of music prepared. Repeatable for Credit.

MUSI 437 - CANZONETTE CHAMBER ENSEMBLE  
Short Title: CANZONETTE CHAMBER ENSEMBLE  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: The performance of vocal and instrumental music of the Renaissance and Baroque eras in which instrumentalists use period instruments. Specific repertory will depend on student interest and on the availability of instruments. The class entails two hours of evening rehearsal each week and an end-of-semester recital of music prepared. On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Instructor Permission Required. Cross-list: MDEM 456. Repeatable for Credit.

MUSI 441 - SENIOR RECITAL  
Short Title: SENIOR RECITAL  
Department: Music  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Studio  
Credit Hours: 0  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Department Permission Required.

MUSI 444 - PRACTICUM IN CONTEMPORARY MUSIC  
Short Title: PRACTICUM IN CONTEMPORARY MUSIC  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Each student will write a piece for an ensemble formed within the class. The piece will be rehearsed and coached as it is being written, and will be performed on various recitals. Repeatable for Credit.

MUSI 445 - KEYBOARD HARMONY AND FIGURED BASS I  
Short Title: KEYBOARD HARMONY & FIG BASS I  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): MUSI 483 or MUSI 683  
Description: A study in skills of harmonization at the keyboard, realization of figured bass, score and clef reading, transposition, and modulation.

MUSI 446 - KEYBOARD HARMONY AND FIGURED BASS II  
Short Title: KEYBOARD HARMONY & FIG BASS II  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): MUSI 483 or MUSI 683  
Description: A continued exploration of skills introduced in MUSI 445. In addition to further study in score reading, and harmonization at the keyboard, students will learn to realize continuo accompaniments from scores using figured bass.

MUSI 447 - INTRODUCTION TO PIANO TECHNOLOGY  
Short Title: INTRO TO PIANO TECHNOLOGY  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Introduction to the tuning and maintenance of pianos. Includes the theory and acoustics of tuning, a brief history of the piano, and a general exposure to restoration, as well as "hands-on" experience.

MUSI 448 - PIANO TECHNOLOGY PRACTICUM FOR PIANISTS  
Short Title: PIANO TECH PRACTICUM PIANISTS  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: A practicum exploring the basic maintenance procedures of the modern pianoforte. Students will learn cleaning and unison tuning as well as basic action regulation.
MUSI 449 - UNDERGRADUATE INDEPENDENT STUDY
Short Title: UNDERGRAD INDEPENDENT STUDY
Department: Music
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 450 - QUALIFYING RECITAL
Short Title: QUALIFYING RECITAL
Department: Music
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Studio
Credit Hours: 0
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Department Permission Required.

MUSI 451 - FLUTE FOR MAJORS
Short Title: FLUTE FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 453 - OBOE FOR MAJORS
Short Title: OBOE FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 454 - OBOE TECHNOLOGY
Short Title: OBOE TECHNOLOGY
Department: Music
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A hands on study of the basic maintenance and regulation of the oboe, as well as an overview of available equipment for gouging and shaping. Course offered irregularly. Recommended prerequisite(s): DMA enrollment in oboe performance.

MUSI 455 - CLARINET FOR MAJORS
Short Title: CLARINET FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 457 - BASSOON FOR MAJORS
Short Title: BASSOON FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 459 - THEORY OF WOOD WIND PERFORMANCE TECHNIQUES
Short Title: THEORY OF WOODWIND PERF TECH
Department: Music
Grade Mode: Lecture/Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Primarily for conductors and composers.

MUSI 461 - HORN FOR MAJORS
Short Title: HORN FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 463 - TRUMPET FOR MAJORS
Short Title: TRUMPET FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 465 - TROMBONE FOR MAJORS
Short Title: TROMBONE FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 467 - TUBA FOR MAJORS
Short Title: TUBA FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.
MUSI 469 - THEORY OF BRASS PERFORMANCE TECHNIQUES
Short Title: THEORY OF BRASS PERF TECH
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Primarily for conductors and composers.

MUSI 471 - PERCUSSION FOR MAJORS
Short Title: PERCUSSION FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 472 - GENERAL PERCUSSION STUDIES
Short Title: GENERAL PERCUSSION STUDIES
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A class that will address other issues of percussion playing to prepare for a job that is not related to regular classical studies, i.e. drum set, jazz kits, rudimental drumming, instrument building, playing shows, sight-reading, etc. The emphasis of the class will vary each semester. Repeatable for Credit.

MUSI 473 - VOICE FOR MAJORS
Short Title: VOICE FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Undergraduate Performance Seminar is required for all freshmen and sophomores. The seminar will meet on Tuesday and Thursday from 1:00-1:50. Repeatable for Credit.

MUSI 475 - THEORY OF VOCAL PERFORMANCE TECHNIQUES
Short Title: THEORY OF VOCAL PERFORM TECH
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Primarily for conductors and composers.

MUSI 477 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Topics and credit hours may vary each semester. Contact department for current semester's topic(s). FALL 2017: A PROUST SONATA: Weekly seminars explore the music, art and ideas which intersect in Marcel Proust's in Search of Lost Time, the inspiration for Moody Center guest pianist/director Sarah Rothenberg's multi-media performance, A Proust Sonata. The course also delves in the process of creating interdisciplinary work. Students of all backgrounds are welcome. Repeatable for Credit.

MUSI 479 - THEORY OF PERCUSSION PERFORMANCE TECHNIQUES
Short Title: THEORY OF PERCUSSION PERF TECH
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Primarily for conductors and composers.

MUSI 481 - PIANO FOR MAJORS
Short Title: PIANO FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 483 - ORGAN FOR MAJORS
Short Title: ORGAN FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 487 - HARP FOR MAJORS
Short Title: HARP FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.
MUSI 491 - VIOLIN FOR MAJORS
Short Title: VIOLIN FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 492 - STRING TECHNOLOGY
Short Title: STRING TECHNOLOGY
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An introduction and practicum in the maintenance and repair of string instruments. Instructor Permission Required.

MUSI 493 - VIOLA FOR MAJORS
Short Title: VIOLA FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 495 - VIOLONCELLO FOR MAJORS
Short Title: VIOLONCELLO FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 497 - DOUBLE BASS FOR MAJORS
Short Title: DOUBLE BASS FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

MUSI 499 - THEORY OF STRING PERFORMANCE TECHNIQUES
Short Title: THEORY OF STRING PERF TECH
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Primarily for conductors and composers.

MUSI 500 - IMAGINATION AND COMMUNICATION: DEVELOPING MUSICAL SKILLS THROUGH THEATRICAL TECHNIQUES
Short Title: IMAGINATION AND COMMUNICATION
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course focuses on teaching communication skills through techniques from other areas of the performing arts. Through exercises that enhance imagination and creativity, students will learn to use their physical presences more effectively, thus becoming more effective communicators with audiences, musician colleagues, and future employers. Department Permission Required.

MUSI 501 - ENHANCED PERFORMANCE: WRITING, SPEAKING, PLAYING
Short Title: MUSIC PERFORMANCE ENHANCEMENT
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course prepares music students to communicate with audiences effectively beyond their musical performance through the use of words, both written and oral. Students will study, practice, and gain practical experience in writing and speaking about music through a variety of performance situations. Department Permission Required.

MUSI 502 - CONDUCTING: AN OVERVIEW OF PRACTICAL SKILLS
Short Title: CONDUCTING
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is designed to present an array of conducting tools to instrumentalists, vocalists and composers. Discussions and presentations will cover diverse topics ranging from baton technique to education/outreach programming. Department Permission Required.

MUSI 503 - MUSIC AND PERFORMANCE: THE MIND/BODY CONNECTION
Short Title: MUSIC AND PERFORMANCE
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Students learn effective ways to address the physical and mental stress of performance by developing an awareness of the mind/body connection. This course introduces a variety of techniques that help musicians to notice and change unhelpful practice habits and move toward a better performance experience. Department Permission Required.
Music (MUSI)

MUSI 504 - COMPUTER ASSISTED MUSIC COMPOSITION
Short Title: COMPUTER ASSISTED MUSIC COMP
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Course not offered regularly. Instructor Permission Required.

MUSI 505 - MULTIMEDIA AUTHORIZING
Short Title: MULTIMEDIA AUTHORIZING
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Course not offered regularly. Instructor Permission Required.

MUSI 507 - TECHNOLOGY FOR MUSICIANS
Short Title: TECHNOLOGY FOR MUSICIANS
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Course will provide student musicians with the computer skills necessary for modern musical life. Computer assisted notation, the basics of audio/video production, and website creation will be covered as students learn to use a number of computer applications. Department Permission Required.

MUSI 508 - FUNDAMENTALS OF PRIVATE TEACHING
Short Title: PRIVATE TEACHING FUNDAMENTALS
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will focus on the teaching of individual lessons to music students. It will emphasize effective ways to start a beginning student, how to develop musicianship, and how to teach good practice habits. Department Permission Required.

MUSI 510 - PROFESSIONAL DEVELOPMENT FOR MUSICIANS
Short Title: PRO DEVELOPMENT FOR MUSICIANS
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course explores the practical aspects of building and sustaining a career in music. Using networking, self-promotion, and presentation skills, students will create projects needed for pursuing their careers. Guest speakers will offer additional resources for students as they learn how to navigate the world of the Music Business. Department Permission Required.

MUSI 511 - GRADUATE THEORY REVIEW
Short Title: GRADUATE THEORY REVIEW
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A comprehensive review of Common Practice theory, plus a brief introduction to 20th Century analysis.

MUSI 512 - ANALYTICAL SYSTEMS
Short Title: ANALYTICAL SYSTEMS
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Practical applications of principal analytical systems.

MUSI 513 - MODAL COUNTERPOINT
Short Title: MODAL COUNTERPOINT
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Applied contrapuntal techniques of the 16th century, and analysis of selected works.

MUSI 514 - SCORE READING AND THEORY AT THE KEYBOARD
Short Title: SCORE READING
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced studies in reading an orchestral score at the keyboard. Department Permission Required.

MUSI 515 - MUSIC ENTREPRENEURSHIP
Short Title: MUSIC ENTREPRENEURSHIP
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Music Entrepreneurship introduces the music student to the idea and development of a business strategy via introduction to the business plan model. Students learn to develop mission statements, analyze markets and competition, research advertising and promotional strategies and put together financial assumptions and forecast into business friendly templates. Department Permission Required.
MUSI 516 - ADVANCED ORCHESTRATION
Short Title: ADV ORCHESTRATION
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MUSI 416
Description: Advanced studies in orchestrational techniques from the classical era through the present day.

MUSI 517 - EARLY MODERN MASTERS
Short Title: EARLY MODERN MASTERS
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Analysis of music from 1900-1950. Repeatable for Credit.

MUSI 518 - THE ART AND BUSINESS OF STUDIO TEACHING
Short Title: ART & BUSINESS STUDIO TEACHING
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Independent studio teaching offers musicians both income stability and flexibility in scheduling, but requires clarity of approach, organization, and business savvy to be effective and rewarding. In addition to practicing these skills, students will learn how to attract students and build a reputation as an exemplary teacher. Department Permission Required.

MUSI 519 - THEMATIC PROGRAMMING: THE ART OF THE RECITAL
Short Title: THEMATIC PROGRAMMING
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course concentrates on ways to revitalize and re-invent the traditional recital so that it appeals to performer and audience alike. After gaining an understanding of innovative and thematic programming, presentational skills and production planning, students will create, produce and perform an invigorating and exiting recital program. Department Permission Required.

MUSI 520 - GRADUATE REVIEW OF MUSIC HISTORY I
Short Title: GRAD REVIEW OF MUSIC HIST I
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Survey of Medieval, Renaissance, and Baroque music for graduate students. Assigned on the basis of placement exam only.

MUSI 521 - GRADUATE REVIEW OF MUSIC HISTORY II
Short Title: GRAD REVIEW OF MUSIC HIST II
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of gender in music, including aesthetics and representation, and of the major roles women have assumed in music, especially as composers, performers and patrons. While the course emphasizes the western art tradition, other types of music are explored as well. Cross-list: SWGS 440.
MUSI 527 - TOPICS IN EARLY MUSIC
Short Title: TOPICS IN EARLY MUSIC
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced study in selected topics in music history prior to 1600. Topics may vary. Please consult with the department for additional information. Repeatable for Credit.

MUSI 528 - TOPICS IN THE 17TH AND 18TH CENTURIES
Short Title: TOPICS IN 17TH&18TH CENTURIES
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics in the 17th and 18th Centuries. Topics may vary. Please consult with the department for additional information. SECTION ONE - HANDEL'S OPERAS & ORATORIOS: This seminar focuses on the operas and oratorios of Handel's career in London with an emphasis on rediscovering their artistic and literary contexts. Related topics area the practices of the theater that defined Handel's operas and oratorios, such as voice types and singing styles, acting techniques, staging, theater design. SECTION TWO - MOZART: This seminar will focus on the life and works of Mozart. Stylistic and critical analysis of his music will alternate with the study of his biography. Repeatable for Credit.

MUSI 529 - TOPICS IN 19TH AND 20TH CENTURIES
Short Title: TOPICS IN 19TH&20TH CENTURIES
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced study in selected topics in music history of the 19th and 20th centuries. Topics may vary. Please consult with the department for additional information. SECTION ONE: FOLKLORE IN 19TH CENTURY MUSIC: Romantic composers frequently borrowed from both native and exotic folk music. This seminar will explore the political and aesthetic motivations for this practice, its influence on musical style, and its effect on the reception of 10th century music. Repeatable for Credit.

MUSI 530 - MUSIC, MAGIC, AND SCIENCE IN THE MODERN WORLD
Short Title: MUSIC, MAGIC, AND SCIENCE
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course explores the place of music vis-a-vis changing conceptions of the natural and supernatural worlds in Western modernity. Topics include music and occult science in the Renaissance, the impact of the Scientific Revolution and the Enlightenment on musical thought; the development of modern acoustics, and contemporary approaches of the field of music cognition.

MUSI 531 - ORCHESTRAL REPERTOIRE
Short Title: ORCHESTRAL REPERTOIRE
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Section 1: violin; Section 2: viola; Section 3: cello; Section 4: double bass; Section 5: woodwinds; Section 6: brass; Section 7: percussion; Section 8: harp. Repeatable for Credit.

MUSI 532 - THE FELDENKRAIS METHOD AND THE MUSICIAN'S BODY
Short Title: THE FELDENKRAIS METHOD
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Students will experience the Feldenkrais Method through the group learning modality of “Awareness Through Movement” in order to develop a practice that will serve to mitigate stress, reduce the likelihood of repetitive use injuries and create a more easeful presence in performance. Department Permission Required.

MUSI 533 - GRADUATE CONDUCTING SEMINAR
Short Title: GRADUATE CONDUCTING SEMINAR
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 534 - PROGRAM MUSIC IN THE 19TH CENTURY
Short Title: PROGRAM MUSIC
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will explore grammaticism in Western art music with a particular focus on orchestral repertoire of the nineteenth century (including works by Beethoven, Mendelssohn, Berlioz, Liszt, Tchaikovsky, Strauss, Mahler, and Debussy). Alongside formal issues, we will consider historical perspectives on this repertoire as well as long-lived aesthetic debates about music's capacity to represent the external world.

MUSI 535 - LEADERSHIP THROUGH THE ARTS
Short Title: LEADERSHIP THROUGH THE ARTS
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will explore ways individuals in varied disciplines can combine forces to developed launch a creative concept which will be performed of the public on campus. Instructor Permission Required.
MUSI 537 - SATIE, COCTEAU, & LES SIX: PARIS IN THE 1920s AND BEYOND
Short Title: SATIE, COCTEAU, AND LES SIX
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A study of the musical realization of Apollinaire’s "new spirit" in the works of Erik Satie, as promoted by Jean Cocteau circa 1918, and the attraction that this new aesthetic had for young composers known as Les Six. With special attention to the works of Francis Poulenc, especially those represented in the Lambiote Poulenc Archive housed in the Woodson Research Center.

MUSI 540 - APPLIED JAZZ IMPROVISATION: DEVELOPING SOLO IMPROVISATIONAL SKILLS IN THE JAZZ IDIOM
Short Title: APPLIED JAZZ IMPROVISATION
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The goal of this course is to introduce and develop Jazz improvisational skills for the classically trained musician. Students will use "swing style" accompaniment to learn to develop and perform improvised Jazz solos on a variety of harmonic formats. Department Permission Required.

MUSI 543 - MUSIC AND MODERNISM IN FRANCE
Short Title: FRENCH MODERNISM
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course considers musical culture in France around the turn of the twentieth century, particularly the music of Debussy, in light of contemporaneous "modernisms" in visual art and literature (Impressionism, Post-Impressionism, Decadence, Symbolism).

MUSI 545 - LITURGICAL ORGAN PLAYING
Short Title: LITURGICAL ORGAN PLAYING
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MUSI 483 (may be taken concurrently) or MUSI 683 (may be taken concurrently)
Description: A course devoted to the service-playing skills required of a parish organist. Students will study effective techniques of accompanying congregational song from the organ. Emphasis will be placed on introductions, interludes, modulations for hymns and appropriate choices of registration, repertoire and hymnody for ceremonial occasions and liturgical year. Concurrent enrollment in MUSI 483 or MUSI 683 is required.

MUSI 546 - ACCOMPANYING AT THE ORGAN
Short Title: ACCOMPANYING AT THE ORGAN
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MUSI 483 (may be taken concurrently) or MUSI 683 (may be taken concurrently)
Description: This course explores accompanying skills essential to the professional organist using a variety of choral literature customarily accompanied from the organ. Transcribed accompaniments will be mixed with original choral or vocal works scored for organ accompaniment from a variety of styles and periods. Concurrent enrollment in MUSI 483 or MUSI 683 is required.

MUSI 547 - CHURCH MUSIC SEMINAR I
Short Title: CHURCH MUSIC SEMINAR I
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MUSI 483 (may be taken concurrently) or MUSI 683 (may be taken concurrently)
Description: A course devoted to the musical and administrative skills required of church music programs serving persons of all ages. Students will develop choral conducting techniques in addition to a knowledge of choral literature, liturgy, and the musical and theological materials available to those who create worship. Concurrent enrollment in MUSI 483 or MUSI 683 is required.

MUSI 548 - CHURCH MUSIC SEMINAR II
Short Title: CHURCH MUSIC SEMINAR II
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MUSI 483 (may be taken concurrently) or MUSI 683 (may be taken concurrently)
Description: This course will further develop choral conducting techniques and provide instruction in vocal techniques appropriate for use in choral rehearsals. Large-scale choral works will be analyzed and discussed in order to refine systems of score study and rehearsal planning. Further discussion of liturgical traditions and appropriate repertoire selection. Concurrent enrollment in MUSI 483 or MUSI 683 is required.

MUSI 549 - VOCAL PHYSIOLOGY & FUNCTION
Short Title: VOCAL PHYSIOLOGY & FUNCTION
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to anatomy, physiology and function of the singing voice.
MUSI 551 - MUSIC OF RICHARD STRAUSS
Short Title: MUSIC OF RICHARD STRAUSS
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An examination of Strauss’s musical style and professional reputation in the context of changing aesthetic and political perspectives from the 1880s to the 1940s. Analysis of selected lieder, symphonic poems, and operas, including “Salome” and “Der Rosenkavalier”.

MUSI 552 - WORDS AND MUSIC
Short Title: WORDS AND MUSIC
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A study of the relationship between text and music in non-operatic solo vocal repertory drawn from a wide historical range. Topics will include: correspondences between musical and poetic forms, how a song transforms the text that it sets, how text expression has led composers to experiment with musical style.

MUSI 555 - APPRENTICESHIP
Short Title: APPRENTICESHIP
Department: Music
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 559 - WOODWIND PEDAGOGY
Short Title: WOODWIND PEDAGOGY
Department: Music
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 569 - BRASS PEDAGOGY
Short Title: BRASS PEDAGOGY
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

MUSI 570 - ADVANCED OPERA STUDIES
Short Title: ADVANCED OPERA STUDIES
Department: Music

Course Level: Graduate
Description: Advanced operatic techniques for the singer/actor, including acting, movement, stage combat, makeup and audition techniques and preparation. On occasion this course may require rehearsals and performances outside of class time. Repeatable for Credit.

MUSI 571 - VOCAL COACHING
Short Title: VOCAL COACHING
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 572 - GRADUATE OPERA PERFORMANCE
Short Title: GRADUATE OPERA PERFORMANCE
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 1-2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: After audition, Director of Opera Studies makes role assignments and grants credit to roles. Leading roles get 2 credits, small roles and chorus in Opera get 1 credit. Instructor Permission Required. Repeatable for Credit.

MUSI 573 - ITALIAN DICTION
Short Title: ITALIAN DICTION
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

MUSI 574 - GERMAN DICTION
Short Title: GERMAN DICTION
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

MUSI 575 - VOICE REPERTOIRE I
Short Title: VOICE REPERTOIRE I
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
MUSI 576 - VOICE REPERTOIRE II  
Short Title: VOICE REPERTOIRE II  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 2  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate

MUSI 577 - ENGLISH DICTION  
Short Title: ENGLISH DICTION  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hour: 1  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate

MUSI 578 - FRENCH DICTION  
Short Title: FRENCH DICTION  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hour: 1  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate

MUSI 579 - PERCUSSION PEDAGOGY  
Short Title: PERCUSSION PEDAGOGY  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 2  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate

MUSI 581 - ARIA REPERTOIRE  
Short Title: ARIA REPERTOIRE  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hour: 1  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate

MUSI 583 - INSTRUMENTAL ACCOMPANYING TECHNIQUES  
Short Title: INSTRUMENT ACCOMPANY TECHNQ  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate

MUSI 584 - VOCAL ACCOMPANYING TECHNIQUES FOR PIANISTS  
Short Title: VOCAL ACCOMP TECH FOR PIANISTS  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate

MUSI 585 - SONATA CLASS  
Short Title: SONATA CLASS  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hour: 1  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate

MUSI 587 - GRADUATE DICTION FOR SINGERS  
Short Title: GRADUATE DICTION FOR SINGERS  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hour: 1  
Restrictions: Enrollment limited to students with a class of Graduate.  
Course Level: Graduate

MUSI 588 - PIANO PEDAGOGY  
Short Title: PIANO PEDAGOGY  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate

MUSI 599 - STRING PEDAGOGY  
Short Title: STRING PEDAGOGY  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate

Description: A comprehensive survey of operatic arias from the standard repertoire for pianists. The survey will be structured according to vocal Fachs and stylistic/historical perspectives. Instructor Permission Required. Repeatable for Credit.

Description: A course for graduate piano chamber music majors, emphasizing practical skills of accompanying strings and wind instruments in a wide variety of repertoire. Instructor Permission Required.
MUSI 601 - COMPOSITION FOR MAJORS ADVANCED AND GRADUATES
Short Title: COMPOSITN FOR MAJORS ADV&GRAD
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 603 - GRADUATE COMPOSITION SEMINAR
Short Title: GRAD COMPOSITION SEMINAR
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 605 - ADVANCED ELECTRONIC AND COMPUTER MUSIC SYSTEMS
Short Title: ADV ELECT&COMP MUSIC SYSTEMS
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced topics and applications in computer and electronic music composition. Instructor Permission Required. Repeatable for Credit.

MUSI 606 - ADVANCED COMPUTER SOUND SYNTHESIS
Short Title: ADV COMPUTER SOUND SYNTHESIS
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MUSI 605
Description: Continuation of MUSI 605. Department Permission Required. Repeatable for Credit.

MUSI 608 - IMPROVISATION AT THE ORGAN
Short Title: IMPROVISATION AT THE ORGAN
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MUSI 483 (may be taken concurrently) or MUSI 683 (may be taken concurrently)
Description: A course devoted to advancing knowledge and developing skills of improvisation at the organ. Discussion and analysis of themes, modality vs. tonality, modulations, harmonizations of scales, modes, chorales and plainchant will lead to improvisations in such forms as the chorale partita, monothematic sonata, passacaglia, French suite, fugue, and other forms. Concurrent enrollment in MUSI 483 or MUSI 683 is required. Repeatable for Credit.

MUSI 611 - CLASSROOM PEDAGOGY
Short Title: CLASSROOM PEDAGOGY
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The practical application of various teaching methods, and an in depth study of college-level materials. Department Permission Required.

MUSI 613 - TONAL COUNTERPOINT
Short Title: TONAL COUNTERPOINT
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: 18th Century counterpoint in the style of J.S. Bach. Instructor Permission Required.

MUSI 614 - SPECIAL TOPICS IN MUSIC THEORY AND MUSIC THEORY COMPOSITION
Short Title: MUSIC THEORY & COMPOSITION
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: SECTION 1: This course focuses on chromatic harmony as it was developed during the long 19th century. The first half of the course deals with chromaticism as a supplement to diatonicism, the second half with chromatic space on its own terms. SECTION 2: A hands-on consideration of improvised or quasi-extemporized elements in 18th century repertoire. Coursework will focus equally on analysis (examining extant musical examples and treatises from the period) and practical application (composing examples and making realizations). Repeatable for Credit.

MUSI 615 - MUSIC OF RAVEL: MUSIC THEORY AND COMPOSTION
Short Title: MUSIC OF RAVEL
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An in-depth study of Ravel’s music using several approaches, including investigation of additive harmony, Ravel’s use of alternative scales, and the relationship between Ravel’s music and contemporary trend in poetry and psychology. Recommended prerequisite(s): Ability to read music well and some previous study in music theory.
A study of opera history from the beginning of the seventeenth Century through Mozart's early works of the 1770's. We will consider literary sources, versification, musical forms, and the periodic "reforms" within the first two centuries of opera.
MUSI 631 - MOCK AUDITION
Short Title: MOCK AUDITION
Department: Music
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Studio
Credit Hours: 0
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Department Permission Required.

MUSI 635 - ADVANCED ORCHESTRA
Short Title: ADVANCED ORCHESTRA
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Repeatable for Credit.

MUSI 636 - ADVANCED CHAMBER MUSIC
Short Title: ADVANCED CHAMBER MUSIC
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts.

MUSI 637 - ADVANCED CONDUCTING FOR MAJORS
Short Title: ADVANCED CONDUCTING FOR MAJORS
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 640 - RICE CHORALE - ADVANCED
Short Title: RICE CHORALE - ADVANCED
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Repeatable for Credit.

MUSI 641 - MASTER'S RECITAL I
Short Title: MASTER'S RECITAL I
Department: Music
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Studio
Credit Hours: 0
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Department Permission Required.

MUSI 642 - ACCOMPANYING
Short Title: ACCOMPANYING
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Accompanying a single student recital, including the preview, dress rehearsal, performance, their lessons with the soloist's teacher, and practice times mutually agreeable to soloist and accompanist. OR accompanying private lessons in studios as assigned for a total of four hours per week. On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Instructor Permission Required. Repeatable for Credit.

MUSI 645 - ORGAN LITERATURE BEFORE 1750
Short Title: ORGAN LITERATURE BEFORE 1750
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A historical study of organ literature coordinated with a study of the development of the organ as a musical instrument. Students will study and research organ music before 1750, developing familiarity with the period and national styles, an understanding of characteristic instruments, as well as practices of registration and performance. Concurrent enrollment in MUSI 483 or MUSI 683 is required.

MUSI 646 - ORGAN LITERATURE SINCE 1750
Short Title: ORGAN LITERATURE SINCE 1750
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MUSI 483 (may be taken concurrently) or MUSI 683 (may be taken concurrently)
Description: Students will develop an understanding of form, interpretation and characteristic national styles through study and research of representative works composed after 1750. Trends in organ construction in France, Germany, England and North America during the 19th through 21st centuries will be discussed in relation to the compositions these instruments inspired. Concurrent enrollment in MUSI 483 or MUSI 683 is required.
MUSI 647 - MASTER'S THESIS
Short Title: MASTER'S THESIS
Department: Music
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Composition majors are required to attend 3 hours of orchestra rehearsal per week to satisfy the course requirement. Repeatable for Credit.

MUSI 649 - GRADUATE INDEPENDENT STUDY
Short Title: GRAD INDEPENDENT STUDY
Department: Music
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 651 - FLUTE FOR MAJORS-ADVANCED
Short Title: FLUTE FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 653 - OBOE FOR MAJORS-ADVANCED
Short Title: OBOE FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 655 - CLARINET FOR MAJORS-ADVANCED
Short Title: CLARINET FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 656 - BASSOON FOR MAJORS-ADVANCED
Short Title: BASSOON FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 661 - HORN FOR MAJORS-ADVANCED
Short Title: HORN FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 663 - TRUMPET FOR MAJORS-ADVANCED
Short Title: TRUMPET FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 665 - TROMBONE FOR MAJORS-ADVANCED
Short Title: TROMBONE FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 667 - PERCUSSION FOR MAJORS-ADVANCED
Short Title: PERCUSSION FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 671 - VOICE FOR MAJORS-ADVANCED
Short Title: VOICE FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.
MUSI 677 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Music
Grade Mode: Standard Letter
Course Type: Internship/Practicum, Lecture, Laboratory, Seminar
Credit Hours: 1-4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics and credit hours may vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.

MUSI 681 - PIANO FOR MAJORS-ADVANCED
Short Title: PIANO FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 682 - ACCOMPANYING/VOCAL COACHING SEMINAR
Short Title: ACCOMP/VOCAL COACHING SEMINAR
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Intensive studies of both song art and solo opera repertoire that is limited to the individual singers who will be involved with each pianist. All facets related to preforming and coaching repertoire with upper level undergraduate and graduate level singers will be explored. Instructor Permission Required. Repeatable for Credit.

MUSI 683 - ORGAN FOR MAJORS-ADVANCED
Short Title: ORGAN FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 687 - HARP FOR MAJORS-ADVANCED
Short Title: HARP FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 689 - PIANO FOR CHAMBER MUSIC AND ACCOMPANYING MAJORS, ADVANCED/GRADUATE
Short Title: PIANO CHAMBER MUSIC&ACCOMP MAJ
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 690 - INDIVIDUAL INSTRUMENT COACHING FOR STRING QUARTET MAJORS
Short Title: IND INST COACH-STR QTET MAJ
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced individual instrumental coaching for students in the M.Mus. string quartet program. Repeatable for Credit.

MUSI 691 - VIOLIN FOR MAJORS-ADVANCED
Short Title: VIOLIN FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 693 - VIOLA FOR MAJORS-ADVANCED
Short Title: VIOLA FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 695 - VIOLONCELLO FOR MAJORS-ADVANCED
Short Title: VIOLONCELLO FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 697 - DOUBLE BASS FOR MAJORS-ADVANCED
Short Title: DOUBLE BASS FOR MAJORS-ADV
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

MUSI 698 - ADVANCED STRING QUARTETS
Short Title: ADVANCED STRING QUARTETS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Private lessons for graduate students enrolled in the M.Mus. string quartet program. Repeatable for Credit.
MUSI 700 - GRADUATE RESEARCH  
Short Title: GRADUATE RESEARCH  
Department: Music  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Research  
Credit Hours: 1-9  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Repeatable for Credit.

MUSI 705 - APPRENTICESHIP - ARTISTIC OUTREACH  
Short Title: APPRENTICESHIP ARTISTIC OUTRCH  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Independent Study  
Credit Hours: 2  
Restrictions: Enrollment is limited to Graduate level students.  
Corequisite: MUSI 698  
Description: Repeatable for Credit.

MUSI 707 - DOCTORAL INDEPENDENT STUDY, COMPOSITION  
Short Title: DOCTORAL IND.STUDY,COMPOSITION  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Independent project at the doctoral level. Instructor Permission Required.

MUSI 711 - ANALYTICAL APPROACHES  
Short Title: ANALYTICAL APPROACHES  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: In depth exploration of tonal and post-tonal analytical procedures. Required of all doctoral students. Instructor Permission Required. Recommended prerequisite(s): MUSI 512 or equivalent.

MUSI 712 - SEMINAR IN ADVANCED ANALYSIS  
Short Title: SEMINAR IN ADVANCED ANALYSIS  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): MUSI 711  
Description: This class will build on the concept and materials presented in MUSI 711. Students will do in-depth analyses of significant pieces from several style periods. Instructor Permission Required.

MUSI 713 - SPECIAL TOPICS IN ADVANCED ANALYSIS  
Short Title: SPECIAL TOPICS: ADV. ANALYSIS  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Special topics in Advanced Analysis will be presented by a resident scholar, reflecting current trends in music theory and analysis, and discussing his or her research in these areas. Instructor Permission Required. Repeatable for Credit.

MUSI 721 - MUSIC OF SCHOENBERG  
Short Title: MUSIC OF SCHOENBERG  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Study of the music of Arnold Schoenberg in the context of the major musical centers and artistic movements that colored his works: Vienna, Berlin, romanticism, expressionism and the New Objectivity.

MUSI 722 - MUSIC OF STRAVINSKY  
Short Title: MUSIC OF STRAVINSKY  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Study of Igor Stravinsky's major ballets.

MUSI 723 - AESTHETICS OF MUSIC  
Short Title: AESTHETICS OF MUSIC  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: An introduction to music aesthetics, focusing on contemporary theories and writings.

MUSI 725 - ORGAN LITERATURE SEMINAR  
Short Title: ORGAN LITERATURE SEMINAR  
Department: Music  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): MUSI 483 (may be taken concurrently) or MUSI 683 (may be taken concurrently)  
Description: This course is devoted to intensive study of an area of organ literature, design, or performance practice. Emphasis will be placed upon in-depth study or the works of a selected composer or genre. Concurrent enrollment in MUSI 483 or MUSI 683 is required.
MUSI 733 - DOCTORAL SEMINAR I: CAREER SKILLS
Short Title: DOC. SEMINAR I: CAREER SKILLS
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Practical training in digital recording, editing, and producing and preparation for academic jobs. Required of, and limited to, doctoral music majors. Department Permission Required.

MUSI 735 - DOCTORAL SEMINAR II: REPERTORY
Short Title: DOCTORAL SEM II: REPERTORY
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: In-depth study of chamber music and concert repertory. Required of, and limited to, all doctoral music students. Department Permission Required.

MUSI 736 - SOLO REPERTORY FOR DOCTORAL STUDENTS
Short Title: SOLO REP FOR DOC. STUDENTS
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: One semester required of all doctoral students in performance areas. Additional semesters may be taken at the discretion of the major teacher. Department Permission Required. Repeatable for Credit.

MUSI 738 - DOCTORAL INDIVIDUAL PROJECT
Short Title: DOCTORAL INDIVIDUAL PROJECT
Department: Music
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A substantial project in an area of the student's interest. Working with a faculty member, each doctoral music student will propose, carry out and then give a public report on the project. Proposals must be approved by the Graduate Studies Committee. Department Permission Required.

MUSI 739 - PEDAGOGY FOR DOCTORAL STUDENTS
Short Title: PEDAGOGY FOR DOCTORAL STUDENTS
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The study of methods and materials specific to each student's major, focusing on the teaching of private studio lessons and instrumental or vocal classes for college-level students. Includes practical training. Each student will work with their major teacher or a faculty member designated by their department. Section 001 - PIANO; 002 - VOICE; 003 - FLUTE; 004 - CLARINET; 005 - OBOE; 006 - VIOLIN; 007 - VIOLA; 008 - CELLO; 009 - DOUBLEBASS; 010 - PERCUSSION. Department Permission Required.

MUSI 741 - MASTER'S RECITAL II
Short Title: MASTER'S RECITAL II
Department: Music
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Studio
Credit Hours: 0
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Department Permission Required.

MUSI 742 - STRING QUARTET RECITAL
Short Title: STRING QUARTET RECITAL
Department: Music
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Studio
Credit Hours: 0
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Each recital will include a format chosen by the quartet and natural to them in which they relate to the general public in a meaningful, non-technical way (i.e., pre-concert question and answer session, etc.). These are not lecture-recitals in the traditional, academic sense: their aim is to give the quartet guidance and experience in how to impart substantive information that help non-musicians deepen their concert-going experience. On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Department Permission Required. Repeatable for Credit.

MUSI 747 - SURVEY-ORCHESTRAL REPERTOIRE
Short Title: SURVEY-ORCHESTRAL REPERTOIRE
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A survey of the techniques of orchestral playing with emphasis on preparation of orchestral excerpts for professional auditions.
MUSI 749 - VOCAL PHYSIOLOGY & FUNCTION FOR DOCTORAL STUDENTS
Short Title: VOCAL PHYSIOLOGY & FUNCTION
Department: Music
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to anatomy, physiology & function of the singing voice.

MUSI 750 - DOCTORAL DOCUMENT
Short Title: DOCTORAL DOCUMENT
Department: Music
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Supervised research and writing of doctoral document. Repeatable for Credit.

MUSI 751 - DOCTORAL RECITAL
Short Title: DOCTORAL RECITAL
Department: Music
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Studio
Credit Hours: 0
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Section 1, solo; section 2, chamber; section 3, concerto; section 4, lecture. On occasion this course may require weekend rehearsals and performances. Consult the instructor regarding possible conflicts. Department Permission Required. Repeatable for Credit.

MUSI 759 - INDIVIDUAL AND COMMITTEE INSTRUCTION FOR ARTIST DIPLOMA
Short Title: INDIV & COMMITTEE INSTR FOR AD
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Weekly lessons with principal teacher as well as periodically scheduled mentoring and coaching sessions with members of Diploma Committee. Will cover all areas of performance related to chosen field. Repeatable for Credit.

MUSI 760 - ARTIST DIPLOMA RECITAL
Short Title: ARTIST DIPLOMA RECITAL
Department: Music
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Studio
Credit Hours: 0
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Public performance exhibiting highest level of technical mastery and artistic interpretation. Department Permission Required. Repeatable for Credit.

MUSI 762 - ARTIST DIPLOMA SEMINAR
Short Title: ARTIST DIPLOMA SEMINAR
Department: Music
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Instruction of matters of musical style and historically informed performance practice. Performance within the class is expected. Survey performance practices ranging from the Baroque period through 21st century.

MUSI 763 - ARTIST DIPLOMA SPECIAL PROJECT
Short Title: ARTIST DIPLOMA SPECIAL PROJECT
Department: Music
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Application of both performance and career-building skills directly in the market place. Repeatable for Credit.

MUSI 764 - ARTIST DIPLOMA PERFORMANCE
Short Title: ARTIST DIPLOMA PERFORMANCE
Department: Music
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Participation in orchestra, chamber music, sinfonietta, opera or scenes programs as determined by individual track. Repeatable for Credit.

MUSI 800 - DISSERTATION
Short Title: DISSERTATION
Department: Music
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Students are required to write an original composition of substantial dimensions. The composition must be publicly defended and submitted, following the university's regulations and procedures for candidacy, oral examination, and thesis. Repeatable for Credit.
Natural Sciences (NSCI)

NSCI 111 - CONCEPTS IN PHYSICS AND ASTRONOMY

Short Title: CONCEPT IN PHYSICS & ASTRONOMY
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course is intended as an investigation of some of the major concepts in physics and astronomy that form the basis of our modern understanding of the universe. By focusing on scientific methodology and a few universal laws, the course will help students appreciate scientific discoveries and give them the conceptual understanding to form intelligent views of contemporary scientific issues. For non-science/engineering majors.

NSCI 120 - INTRODUCTION SCIENTIFIC RESEARCH CHALLENGES

Short Title: INTR SCIENTIFIC RES CHALLENGES
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Students in NSCI 120 will solve client-based problems that require the discovery or application of scientific knowledge, specifically in the fields of biology and chemistry. Students will work in interdisciplinary teams and be involved in shaping their project and implementing the scientific method to find solutions. This course is limited to first-year students only. Mutually Exclusive: Credit cannot be earned for NSCI 120 and BIOC 112.

NSCI 199 - INDEPENDENT STUDY

Short Title: INDEPENDENT STUDY
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Independent Study in an area of science with emphasis on scientific procedures and methods. Instructor Permission Required.

NSCI 230 - COMPUTATION IN SCIENCE AND ENGINEERING

Short Title: COMPUTATION IN SCI & ENGI
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course introduces basic techniques for problem solving and visualization using computational environments such as Mathematica and MATLAB. Class will consist of a mixture of traditional lectures held in classrooms and self-paced modules covering topics in science and engineering that will be completed in Symonds II. No previous experience is required or expected. Cross-list: COMP 110. Repeatable for Credit.

NSCI 305 - NEW VENTURE COMMUNICATION FOR SCIENCE AND ENGINEERING

Short Title: NEW VENTURE COMMUN FOR SCI&ENG
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Teaches students in science or engineering the skills needed to discover, communicate, and promote products and services based on technological innovation or scientific research. Students learn to innovate a product or service with social or commercial application, write an early-stage business plan, and give a 10-minute financing presentation.

NSCI 320 - PUBLIC SCIENCE COMMUNICATION SEMINAR

Short Title: PUBLIC SCIENCE COMM SEMINAR
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 201 or CHEM 121 or CHEM 151 or PHYS 101 or PHYS 111 or PHYS 125
Description: Scientists are increasingly expected to communicate with the public. In this course, students learn from people who regularly communicate about science with general audiences in order to gain an appreciation for the various types of public science communication, its importance to society, and techniques used in effective public science communication. Graduate/Undergraduate Equivalency: NSCI 520. Mutually Exclusive: Credit cannot be earned for NSCI 320 and NSCI 520. Repeatable for Credit.

NSCI 399 - MEDICAL PROFESSIONALISM AND OBSERVERSHIP

Short Title: MEDICAL PROFESSIONALISM
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: NSCI 399 consists of lectures to enhance your knowledge of medical professionalism, a writing experience aimed at reflecting on your experiences in both the lectures and clinical settings, and an opportunity to shadow a physician and/or observe in the operating room, intensive care unit or other clinical unit at Houston Methodist Hospital. Once enrolled, students will have the opportunity to review the experiences of past students to select a specialty that closely aligns with your goals and expectations. Please note, matching with physicians will not occur until students begin matriculating in NSCI 399. The physician selection process will be explained during class. The process and application deadlines can be found using the following link: https://goo.gl/HD7zsO. NOTE: Space is limited and registration for NSCI 009 DOES NOT GUARANTEE a seat in NSCI 399. Instructor Permission Required.

Course URL: goo.gl/HD7zsO (http://goo.gl/HD7zsO)
NSCI 410 - MEDICAL LEADERSHIP RESEARCH
Short Title: MEDICAL LEADERSHIP RESEARCH
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-5
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students will help in ongoing research in the health profession program with Dr. Gia Merlo. Additionally, students may conduct independent medical leadership/professionalism research upon approval. Instructor Permission Required. Repeatable for Credit.

NSCI 501 - PROFESSIONAL MASTER'S SEMINAR
Short Title: PROFESSIONAL MASTER'S SEMINAR
Department: Natural Sciences Division
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A weekly seminar which serves to provide exposure to local industry leaders from the areas of oil and gas exploration, nanotechnology, and environmental management; introduce career management and business relations tools; further develop written and oral communication skills; provide a forum for students to present internship project results. Repeatable for Credit.

NSCI 502 - SPACE STUDIES SEMINAR
Short Title: SPACE STUDIES SEMINAR
Department: Natural Sciences Division
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A weekly space seminar held by space industry leaders and organized by faculty providing exposure on "real-world" subjects, such as general, commercial and scientific aspects of space; mission planning and design; astrodynamics/orbital mechanics; spacecraft navigation; Payload definition; Space environment; propulsion and maneuvering; human factors; risk management; export control regulations and others.

NSCI 505 - ENVIRONMENTAL LAB
Short Title: ENVIRONMENTAL LAB
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Laboratory module offered in conjunction with CAAM 353 that illustrates applications of numerical analysis in the solutions of common environmental science and engineering problems. Instructor Permission Required.

NSCI 506 - ENVIRONMENTAL CASE STUDIES
Short Title: ENVIRONMENTAL CASE STUDIES
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar bringing in outside speakers from the community to address environmental issues.

NSCI 510 - PROFESSIONAL MS INTERNSHIP
Short Title: PROFESSIONAL MS INTERNSHIP
Department: Natural Sciences Division
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Internship/Practicum
Credit Hours: 12
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Supervised internship or project associated with pursued degree. Exclusively for students in the Professional Master's Program in Natural Sciences. Repeatable for Credit.

NSCI 511 - SCIENCE POLICY, AND ETHICS
Short Title: SCIENCE POLICY, AND ETHICS
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate or Senior. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An introduction to the policy, ethics, politics, and legal issues that relate to science and technology - discovery and application. This course presents a framework for analyzing ethical issues in business and professional work. The course then explores the ways in which government policy and business practices can promote or inhibit advances in science and technology while influencing the ethical choices of the professionals involved. Case studies will be used. Instructor Permission Required.

NSCI 512 - PROFESSIONAL MASTER'S PROJECT
Short Title: PROFESSIONAL MASTER'S PROJECT
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Professional master students present the results of their internship or independent project. Recommended Prerequisite(s): NSCI 510.
NSCI 520 - PUBLIC SCIENCE COMMUNICATION SEMINAR  
**Short Title:** PUBLIC SCIENCE COMM SEMINAR  
**Department:** Natural Sciences Division  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 1  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** BIOC 201 or CHEM 121 or CHEM 151 or PHYS 101 or PHYS 111 or PHYS 125  
**Description:** Scientists are increasingly expected to communicate with the public. In this course, students learn from people who regularly communicate about science with general audiences in order to gain an appreciation for the various types of public science communication, its importance to society, and techniques used in effective public science communication. Graduate/Undergraduate Equivalency: NSCI 320. Mutually Exclusive: Credit cannot be earned for NSCI 520 and NSCI 320. Repeatable for Credit.

NSCI 521 - WRITING AND PUBLISHING SCIENCE  
**Short Title:** WRITING AND PUBLISHING SCIENCE  
**Department:** Natural Sciences Division  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 2  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** To prepare graduate students for writing and publishing independent research, this course examines the genre of the primary literature article; analyzes successful writing; explores ways of managing references and avoiding plagiarism; and addresses issues of authorship, submission, and peer review. Students will receive peer feedback on documents in preparation.

NSCI 530 - THE SHAPING OF HEALTH POLICY  
**Short Title:** THE SHAPING OF HEALTH POLICY  
**Department:** Natural Sciences Division  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Study of how health-care policy decisions are made and implemented, using an interdisciplinary approach involving government, law, ethics, economics, and history. Includes case discussions of major policy problems by faculty experts in these disciplines and guest speakers who are leading national figures in the shaping of public policy. Mutually Exclusive: Credit cannot be earned for NSCI 530 and POST 430/POST 530/SOSC 430.

NSCI 550 - APPLIED MATHEMATICS AND SCIENCE FOR TEACHERS  
**Short Title:** APPLIED MATH FOR TEACHERS  
**Department:** Natural Sciences Division  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Rice office of STEM Engagement faculty and staff lead a discovery based course focused on 8th grade mathematics and science with a focus on the combined content of mathematics, science, and literacy (ELA) in addition to pedagogy leadership. Instructor Permission Required.
of all learners. Curriculum development using the RUSMP Learning Plan. Differentiated instruction, and questioning techniques to meet the needs of all learners. Curriculum development using the RUSMP Learning Plan.

NSCI 586 - CONTEMPORARY TOPICS IN K-12 SCIENCE AND MATHEMATICS
Short Title: CONT TOPICS IN K-12 SCI & MATH
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-6
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Contemporary topics in grades K-12 science and mathematics instruction and covers both content and pedagogy. Multiple sections are offered. Each section focuses on a specific area of instruction at specified grades. All sections include field studies, inquiry, curriculum development and implementation of instructional strategies in the classroom. Students may enroll in different sections for repeated credit. Instructor Permission Required. Repeatable for Credit.

NSCI 590 - CONTEMPORARY TOPICS IN SENIOR HIGH SCHOOL MATHEMATICS
Short Title: CONTEMP TOPICS HIGH SCHL MATH
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-6
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Mathematics topics related to and transcending high school mathematics. Active, student-centered, inquiry-based learning experiences using manipulatives and the latest technologies in a collaborative setting. Contemporary readings related to mathematics education. Problem-solving and motivational strategies, assessment, differentiated instruction, and questioning techniques to meet the needs of all learners. Curriculum development using the RUSMP Learning Plan.

NSCI 595 - TOPICS IN CONTEMPORARY ALGEBRA FOR IN-SERVICE TEACHERS
Short Title: TOPICS IN CONTEMP ALGEBRA
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-6
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Emphasis on function concepts through multiple representations and problem solving. Algebraic thinking and symbolic reasoning, underlying mathematical processes, and connections between algebra and the other mathematical strands. Active, student-centered, inquiry-based learning experiences using manipulatives and the latest technologies in a collaborative setting. Contemporary readings related to mathematics education.

NSCI 610 - MANAGEMENT FOR SCIENCE AND ENGINEERING
Short Title: MGT FOR SCIENCE/ENGINEERING
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is for graduate and undergraduate students who want to understand the basics of management in new and/or small technology-based businesses and is particularly relevant to students who are interested in careers in technology or entrepreneurial ventures. NSCI 610/ENGI 610 is team taught to provide insight into how technology-based businesses and is particularly relevant to students who want to understand the basics of management in new and/or small technology-based businesses and is particularly relevant to students who are interested in careers in technology or entrepreneurial ventures.

NSCI 585 - CONTEMPORARY TOPICS IN MIDDLE SCHOOL MATHEMATICS
Short Title: CONTEMP TOPICS IN MDL SCH MATH
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-6
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Mathematics topics related to and transcending middle school mathematics. Active, student-centered, inquiry-based learning experiences using manipulatives and the latest technologies in a collaborative setting. Contemporary readings related to mathematics education. Problem-solving and motivational strategies, assessment, differentiated instruction, and questioning techniques to meet the needs of all learners. Curriculum development using the RUSMP Learning Plan.

NSCI 592 - SEMINAR IN SCIENCE FOUNDATIONS
Short Title: SEMINAR IN SCIENCE FOUNDATIONS
Department: Natural Sciences Division
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar with a team of university faculty and community-based scientists (in fields such as medicine, space, energy, and the environment) to increase understanding of scientific principles as they are applied in the scientific community of Houston and as they relate to secondary school science.

NSCI 610/ENGI 610 is team taught to provide insight into how technology-based businesses and is particularly relevant to students who want to understand the basics of management in new and/or small technology-based businesses and is particularly relevant to students who are interested in careers in technology or entrepreneurial ventures. Student's active participation is essential. Students who take this course are eligible for MGMT 625. Please contact Dr. Harry Wilkinson: hewilkinson@sbcglobal.net. Cross-list: ENGI 610.

Naval Science (NAVA)

NAVA 100 - NAVAL SCIENCE LABORATORY
Short Title: NAVAL SCIENCE LABORATORY
Department: Naval Science
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Practical applications of leadership principles as a Junior Naval Officer. Repeatable for Credit.
NAVA 101 - NAVAL ORIENTATION
Short Title: NAVAL ORIENTATION
Department: Naval Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: An introduction to naval traditions and customs, seamanship, naval organization and missions, and the fundamental concepts of sea power.

NAVA 103 - SEA POWER AND MARITIME AFFAIRS
Short Title: SEA POWER
Department: Naval Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Readings, discussions, and research on selected topics related to the history, importance, and impact of sea power on modern civilization.

NAVA 203 - LEADERSHIP AND MANAGEMENT I
Short Title: LEADERSHIP AND MANAGEMENT I
Department: Naval Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: An introduction to the principles and concepts of management, organization, leadership, information systems, and decision making.

NAVA 301 - NAVIGATION I
Short Title: NAVIGATION I
Department: Naval Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Marine navigators and laws of vessel operations. Includes coastal piloting, navigational aids, nautical astronomy, satellite and inertial systems, and rules of the nautical road.

NAVA 302 - NAVAL OPERATIONS & SEAMANSHIP
Short Title: NAVAL OPERATIONS & SEAMANSHIP
Department: Naval Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: An analysis of ship movements, formations, and fleet operations; includes Rules of the Road, maneuvering board, tactical publications and communications.

NAVA 303 - EVOLUTION OF WARFARE
Short Title: EVOLUTION OF WARFARE
Department: Naval Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Historical survey of the evolution of the conduct of warfare. Strategy, tactics, weapons, organization, and military leaders/thinkers are studied. Course is taught in the NROTC Building.

NAVA 304 - NAVAL WEAPONS-NAVAL SHIP SYSTEMS II
Short Title: NAVAL WEAPONS
Department: Naval Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: The theory and employment of weapons systems. The student explores the processes of detection, evaluation, threat analysis, weapon selection, delivery, guidance, and explosives. The physical aspects of radar and underwater sound are described in detail.

NAVA 402 - LEADERSHIP AND ETHICS
Short Title: LEADERSHIP AND ETHICS
Department: Naval Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Leadership principles, with particular emphasis on ethics, human resources management, military law and discipline, and administration. The Capstone course for NROTC seniors. Recommended prerequisite(s): Spring semester of senior year.

NAVA 403 - NAVAL ENGINEERING
Short Title: NAVAL ENGINEERING
Department: Naval Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Ship propulsion systems, auxiliary systems, steering systems, electrical power distribution, ship design, ship stability and damage control measures.

NAVA 410 - AMPHIBIOUS WARFARE
Short Title: AMPHIBIOUS WARFARE
Department: Naval Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Study of the history of amphibious warfare, using case studies to examine doctrine tactics, and the factors necessary for successful operations.
Neuroscience (NEUR)

NEUR 111 - SCIENCE AND ART IN DIALOGUE: EXPERIMENT, IMAGINATION, AND THE INVENTION OF NEUROSCIENCE
Short Title: SCIENCE AND ART IN DIALOGUE
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: We will take up the argument that "Proust was right about memory, Cezanne was uncannily accurate about the visual cortex, and Woolf pierced the mystery of consciousness," as we discuss aspects of the brain revealed by the texts, paintings, dishes and compositions of eight modern artists.

NEUR 301 - ADVANCED COGNITIVE NEUROSCIENCE: ATTENTION AND PERCEPTION
Short Title: ATTENTION AND PERCEPTION
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Overview of neuropsychological and cognitive neuroscience approaches to higher mental functions including sensation and perception, attention, motor control, and neuroplasticity. Other topics include basic neuroanatomy, experimental and clinical investigative methods, and the historical and philosophical context of contemporary neuroscience. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 501. Mutually Exclusive: Credit cannot be earned for NEUR 301 and NEUR 501.
Course URL: www.ruf.rice.edu/~neurosci

NEUR 302 - ADVANCED COGNITIVE NEUROSCIENCE: HIGHER MENTAL FUNCTIONS
Short Title: ADV COGNITIVE NEUROSCIENCE
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Overview of neuropsychological and cognitive science approaches to higher mental functions including language, memory, executive functions, reasoning, and numerical processing. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 502. Mutually Exclusive: Credit cannot be earned for NEUR 302 and NEUR 502.
Course URL: www.ruf.rice.edu/~neurosci

NEUR 304 - CELLULAR NEUROPHYSIOLOGY I&II
Short Title: CELLULAR NEUROPHYSIOLOGY I&II
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PHYS 125 and MATH 101
Description: Properties of excitable nerve membranes and chemical synapses; theory of ions in solutions, ion conduction through membranes, ion transport, linear cable theory, nonlinear properties of neurons, + stochastic properties of single ion channels, synaptic transmission, the role of calcium and transmitter release, + postsynaptic mechanism. Taught at Baylor College of Medicine; check NEUR website. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 504. Mutually Exclusive: Credit cannot be earned for NEUR 304 and NEUR 504. Repeatable for Credit.
Course URL: www.ruf.rice.edu/~neurosci

NEUR 305 - OPTICAL IMAGING
Short Title: OPTICAL IMAGING
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course includes a theoretical portion which will introduce the fundamentals of optical imaging of neural activity, present the devices that are employed, and review applications and discuss their results. In addition, in a practical part, students will design, set up, and perform simple in vitro experiments to gain practical experience with this exciting and powerful technology. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 505. Mutually Exclusive: Credit cannot be earned for NEUR 305 and NEUR 505.
Course URL: www.ruf.rice.edu/~neurosci

NEUR 306 - CONCEPTS OF LEARNING AND MEMORY
Short Title: CONCEPT LEARNING&MEMORY
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is designed to introduce students to the field of learning and memory. This field has exploded in the last few years with the introduction of new techniques, new approaches, and new concepts. The course will introduce the student to classical and modern concepts of learning and memory across all levels at which learning and memory is studied, including behavioral, anatomical, cellular, molecular and genetic levels of analysis. The basic concepts of learning and memory will also be related to known diseases of learning and memory. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 506. Mutually Exclusive: Credit cannot be earned for NEUR 306 and NEUR 506.
Course URL: www.ruf.rice.edu/~neurosci
NEUR 308 - INTRODUCTION TO COGNITIVE NEUROSCIENCE  
Short Title: INTRO COGNITIVE NEUROSCIENCE  
Department: Neurosciences  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: An introductory graduate-level overview of cognitive neuroscience. The course will cover basics in history, neuroanatomy, methods of cognitive neuroscience, sensation and perception, control of action, learning and memory, emotion, language, attention, drugs and cognition, impulsivity, cognitive control, social cognition, and neurobiology of disease. This course is usually taught at the Texas Medical Center. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 508. Mutually Exclusive: Credit cannot be earned for NEUR 308 and NEUR 508.

NEUR 310 - INDEPENDENT RESEARCH FOR NEUROSCIENCE UNDERGRADUATES  
Short Title: IND RES FOR NEUR UNDERGRADS  
Department: Neurosciences  
Grade Mode: Standard Letter  
Course Type: Research  
Credit Hours: 1-4  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Independent research in Rice Neuroscience faculty laboratories (or other Texas Medical Center laboratories.) Students spend at least 3 hours per week in the laboratory for each semester hour of credit. If taken for 3 or more hours, counts as one required 300+ level lab course. Requires a proposal abstract, weekly reports, and a research paper (fall semester) or a proposal abstract, weekly reports, and a poster presentation (spring semesters). Students wishing to perform their research in an off-campus lab must submit a completed application to the NEUR 310 instructor at least 2 weeks prior to the start of classes and may not register for fewer than 3 credit hours. Students are strongly advised to secure research advisors and register for the class well in advance of the start of classes. Instructor Permission Required. Repeatable for Credit.

NEUR 318 - INTRO TO NEUROSCIENCE METHODS  
Short Title: INTRO TO NEUROSCIENCE METHODS  
Department: Neurosciences  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course provides an introduction to the recording of signals from live neurons using microscopic and electrophysiologic methods. The course introduces the basics of instrumentation in the recording of real time biologic signals. The course is designed to run in parallel with a lab course. Course taught at Baylor College of Medicine. Graduate/Undergraduate Equivalency: NEUR 518. Mutually Exclusive: Credit cannot be earned for NEUR 318 and NEUR 518.

NEUR 319 - INTRODUCTION TO NEUROSCIENCE METHODS LAB  
Short Title: NEUROSCIENCE METHODS LAB  
Department: Neurosciences  
Grade Mode: Standard Letter  
Course Type: Laboratory  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This is the laboratory course that is designed to run in parallel with the Introductory Neuroscience Methods lecture course. The Lab is designed to give students hands-on experience applying the ideas for real time recording of microscopic and neurophysiological signals. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 519. Mutually Exclusive: Credit cannot be earned for NEUR 319 and NEUR 519.

NEUR 321 - ANALYSES OF NEURONAL FUNCTION  
Short Title: ANALYSES OF NEURONAL FUNCTION  
Department: Neurosciences  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course will cover all basic aspects of the intrinsic electrophysiological properties of neurons and of synaptic transmission. It will also introduce principles of synaptic integration and plasticity. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 521. Mutually Exclusive: Credit cannot be earned for NEUR 321 and NEUR 521.

NEUR 322 - BRAIN CELL BIOLOGY AND DEVELOPMENT  
Short Title: BRAIN CELL BIOL & DEVELOPMENT  
Department: Neurosciences  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Anatomy and development of the nervous system is designed to introduce the student to the basic structure and function of the nervous system, and describe its rough development. It is intended for first year students without any specific advanced knowledge of neuroscience. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 522. Mutually Exclusive: Credit cannot be earned for NEUR 322 and NEUR 522. Repeatable for Credit.
NEUR 323 - GENETICS FOR NEUROSCIENCE
Short Title: GENETICS FOR NEUROSCIENCE
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course integrates genetics into neuroscience and is intended to teach neuroscience students how to tackle neurobiological problems using genetic strategies and tools. In the introduction, students will be exposed to the basic concepts in genetics. Strategies using model organisms from C. elegans to mice will be covered. Finally we will discuss genetic approaches in humans. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 523. Mutually Exclusive: Credit cannot be earned for NEUR 323 and NEUR 523.

NEUR 335 - CELLULAR NEUROPHYSIOLOGY
Short Title: CELLULAR NEUROPHYSIOLOGY
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course provides an upper level graduate treatment on the physiology and biophysics of nerve cell signaling. Topics to be covered include measurement and analysis of single events from ion channels to synaptic vesicle fusion, synaptic transmission and the relationship between calcium signaling and synaptic vesicle dynamics, short-term synaptic plasticity, and postsynaptic integration. This course is taught at the University of Texas Health Sciences Center. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 535. Mutually Exclusive: Credit cannot be earned for NEUR 335 and NEUR 535.

NEUR 350 - MOLECULAR NEUROBIOLOGY
Short Title: MOLECULAR NEUROBIOLOGY
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course covers the molecular, cellular, and biochemical events that underlie neuronal function. Emphasis is placed on the basic chemistry and biology of cells residing the nervous system. The course also covers the structure and function of receptors, channels and pumps necessary for neuronal function and the neurochemistry of specific transmitter systems. The unique demand of neurons as specialized secretory cells is also covered. This course is taught at UTHSC. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 550. Mutually Exclusive: Credit cannot be earned for NEUR 350 and NEUR 550. Repeatable for Credit.

NEUR 362 - COGNITIVE NEUROSCIENCE: EXPLORING THE LIVING BRAIN
Short Title: COGNITIVE NEUROSCIENCE
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 101 and PSYC 203
Description: The objective is to equip the students of PSYC/NEUR 362 with the tools on how to apply cognitive neuroscience techniques to health or clinical topics and to investigate sensorimotor and cognitive measures in a human model. The prerequisite may be taken the same semester as this class. Instructor Permission Required. Cross-list: PSYC 364. Graduate/Undergraduate Equivalency: NEUR 564. Mutually Exclusive: Credit cannot be earned for NEUR 364 and NEUR 564.

NEUR 364 - COGNITIVE NEUROSCIENCE LAB
Short Title: COGNITIVE NEUROSCIENCE LAB
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 362 (may be taken concurrently) or NEUR 362 (may be taken concurrently)
Description: Survey of theory and research on how mental processes are carried out by the human brain, with an emphasis on relating measures of brain activity to cognitive functioning, methods surveyed included electrophysiological recording techniques, functional imaging techniques and methods that involve lessoning or disrupting neural activity. Cross-list: PSYC 362.

NEUR 376 - NEUROBIOLOGY OF DISEASE
Short Title: NEUROBIOLOGY OF DISEASE
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 362.
Description: This course covers some of the most important disorders of nervous system function. Exposes students to incidence, clinical manifestations, pathophysiology, current scientific models of causes/mechanisms of disorders of the adult brain: stroke, Parkinson's disease, Alzheimer's disease, seizure disorders, brain tumors, multiple sclerosis, amyotrophic lateral sclerosis, brain/spinal cord injury, addiction, depression, and schizophrenia. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 576. Mutually Exclusive: Credit cannot be earned for NEUR 376 and NEUR 576.
NEUR 377 - NEUROANATOMY: FUNCTIONAL ORGANIZATION OF THE CENTRAL NERVOUS SYSTEM
Short Title: FUNCTIONAL NEUROANATOMY
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Anatomy and function of components of the nervous system with an emphasis on the central nervous system. This course is offered for Rice psychology graduate undergraduate students. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 377. Mutually Exclusive: Credit cannot be earned for NEUR 377 and NEUR 577.

NEUR 379 - NEUROBIOLOGY OF SENSATION AND MOVEMENT
Short Title: NEUROBIO OF SENSATION/MOVEMENT
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Overview of basic systems neuroscience. The course covers sensory transductions, development, and motor programming. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 379. Mutually Exclusive: Credit cannot be earned for NEUR 379 and NEUR 579.

NEUR 380 - FUNDAMENTAL NEUROSCIENCE SYSTEMS
Short Title: NEUROSYSTEMS
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will provide a broad overview of the brain's neural systems that subserve perception, learning, and behavior. The course will be highly integrative with thematic content including functional organization of the nervous system, neural encoding and decoding, sensory systems, motor systems, and high-level concept processing. Cross-list: BIOC 380, PSYC 380. Recommended Prerequisite(s): PSYC 101.

NEUR 381 - PHYSIOLOGY OF VISUAL SYSTEM
Short Title: PHYSIOLOGY OF VISUAL SYSTEM
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course provides an advanced level and comprehensive coverage of the physiology of the retina and visual cortex. Useful for graduate students and postdocs in neuroscience, physiology, biochemistry, cell biology, and molecular genetics who are interested in visual information processing and brain function. Offered every years only. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 580. Mutually Exclusive: Credit cannot be earned for NEUR 381 and NEUR 580.

NEUR 382 - INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE
Short Title: INTRO COMPUTATIONAL NEURSCI
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to methods and theories used to describe and understand neural information processing in the brain. Models covered will range from single neuron to networks for sensory, motor and learning tasks. Programming exercises will be done using Matlab. Cross-list: ELEC 382. Graduate/Undergraduate Equivalency: NEUR 582. Recommended Prerequisite(s): CAAM 210. Mutually Exclusive: Credit cannot be earned for NEUR 382 and NEUR 582.

NEUR 383 - INTRODUCTION TO NEUROENGINEERING: MEASURING AND MANIPULATING NEURAL ACTIVITY
Short Title: INTRO TO NEUROENGINEERING
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (PHYS 101 or PHYS 111 or PHYS 125 or PHYS 141) and (PHYS 102 or PHYS 112 or PHYS 126 or PHYS 142)
Description: This course will serve as an introduction to quantitative modeling of neural activity and the methods used to stimulate and record brain activity. Cross-list: BIOE 380, ELEC 380. Mutually Exclusive: Credit cannot be earned for NEUR 383 and BIOE 480/BIOE 590/ELEC 480/ELEC 580.

NEUR 385 - FUNDAMENTALS OF CELLULAR AND MOLECULAR NEUROSCIENCE
Short Title: FUNDAMENTALS OF NEUROSCIENCE
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Cellular, molecular, and integrative mechanisms of neural function, including membrane and axon physiology, synaptic transmission and plasticity, and sensory and motor systems. Cross-list: BIOC 385.
NEUR 411 - NEUROLINGUISTICS
Short Title: NEUROLINGUISTICS
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of language and the brain. Includes localization of speech, language, and memory functions, hemispheric dominance, pathologies of speech and language associated with brain damage, and hypotheses of the representation and operation of linguistic information in the cortex. Cross-list: ANTH 411, LING 411.

NEUR 416 - NEURAL COMPUTATION
Short Title: NEURAL COMPUTATION
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (NEUR 310 or NEUR 485) and NEUR 401
Corequisite: NEUR 402
Description: How does the brain work? Understanding the brain requires sophisticated theories to make sense of the collective actions of billions of neurons and trillions of synapses. Word theories are not enough; we need mathematical theories. The goal of this course is to provide an introduction to the mathematical theories of learning and computation by neural systems. These theories use concepts from dynamical systems (attractors, oscillations, chaos) and concepts from statistics (information, uncertainty, inference) to relate the dynamics and functions of neural networks. We will apply these theories to sensory computation, learning and memory, and motor control. Students will learn to formalize and mathematically answer questions about neural computations, including "what does a network compute?", "how does it compute?", and "why does it compute that way?" Prerequisites: knowledge of calculus, linear algebra, and probability and statistics. Cross-list: CAAM 415, ELEC 489.
NEUR 430 - FUNDAMENTALS OF HUMAN NEUROIMAGING
Short Title: HUMAN NEUROIMAGING
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A survey of methods and results for human brain imaging. Describes the physical and physiological mechanisms of image formation. Provides examples from clinical and basic research, particularly in visual cortex. Emphasis on magnetic resonance imaging, but surveys other imaging modalities including PET, optical, and EEG/MEG source localization. Course taught at Baylor College of Medicine.

NEUR 450 - ELECTRICAL SIGNALING IN THE BRAIN
Short Title: ELECTRICAL SIGNALING IN BRAIN
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Electrical Signaling in the Brain covers the basics concepts of electrical signaling from the proteins involved, biophysical principles and computational methods required to understand measure and characterize electrical signaling in the brain. Instructor Permission Required. Repeatable for Credit.

NEUR 481 - COMPUTATIONAL NEUROSCIENCE AND NEURAL ENGINEERING
Short Title: COMP/NEUROSCIENCE/NEURAL ENGNR
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An introduction to the anatomy and physiology of the brain. Includes basic electrophysiology of nerve and muscle. Develops mathematical models of neurons, synaptic transmission and natural neural networks. Leads to a discussion of neuromorphic circuits which can represent neuron and neural network behavior in silicon. Recommendation: Knowledge of electrical circuits, operational amplifier circuits and ordinary differential equations. Involves programming Matlab. Cross-list: BIOE 481, ELEC 481. Graduate/Undergraduate Equivalency: NEUR 583. Recommended Prerequisite(s): Knowledge of basic electrical and operational amplifier circuits; and ordinary differential equations. Mutually Exclusive: Credit cannot be earned for NEUR 481 and NEUR 583.

NEUR 501 - ADVANCED COGNITIVE NEUROSCIENCE: ATTENTION AND PERCEPTION
Short Title: ATTENTION AND PERCEPTION
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Overview of neuropsychological and cognitive neuroscience approaches to higher mental functions including sensation and perception, attention, motor control, and neuroplasticity. Other topics include basic neuroanatomy, experimental and clinical investigative methods, and the historical and philosophical context of contemporary neuroscience. Instructor Permission Required. Cross-list: PSYC 575. Graduate/Undergraduate Equivalency: NEUR 301. Mutually Exclusive: Credit cannot be earned for NEUR 501 and NEUR 301.
Course URL: www.ruf.rice.edu/~neurosci

NEUR 502 - ADVANCED COGNITIVE NEUROSCIENCE: HIGHER MENTAL FUNCTIONS
Short Title: HIGHER MENTAL FUNCTIONS
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Overview of neuropsychological and cognitive science approaches to higher mental functions, including language, memory, executive functions, reasoning, and numerical processing. Instructor Permission Required. Cross-list: PSYC 576. Graduate/Undergraduate Equivalency: NEUR 302. Mutually Exclusive: Credit cannot be earned for NEUR 502 and NEUR 302.
Course URL: www.ruf.rice.edu/~neurosci

NEUR 504 - CELLULAR NEUROPHYSIOLOGY I & II
Short Title: CELLULAR NEUROPHYSIOLOGY I&II
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): PHYS 125 and MATH 101
Description: Properties of excitable nerve membranes and chemical synapses; theory of ions in solutions, ion conduction through membranes, ion transport, linear cable theory, nonlinear properties of neurons, + stochastic properties of single ion channels, synaptic transmission, the role of calcium and transmitter release, + postsynaptic mechanism. Taught at Baylor College of Medicine; check NEUR website. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 304. Mutually Exclusive: Credit cannot be earned for NEUR 504 and NEUR 304. Repeatable for Credit.
NEUR 505 - OPTICAL IMAGING
Short Title: OPTICAL IMAGING
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course includes a theoretical portion which will introduce the fundamentals of optical imaging of neural activity, present the devices that are employed, and review applications and discuss their results. In addition, in a practical part, students will design, set up, and perform simple in vitro experiments to gain practical experience with this exciting and powerful technology. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 305. Mutually Exclusive: Credit cannot be earned for NEUR 505 and NEUR 305.
Course URL: www.ruf.rice.edu/~neurosci

NEUR 506 - CONCEPTS OF LEARNING AND MEMORY
Short Title: CONCEPT LEARNING&MEMORY
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is designed to introduce graduate students to the field of learning and memory. This field has exploded in the last few years with the introduction of new techniques, new approaches, and new concepts. The course will introduce the student to classical and modern concepts of learning and memory across all levels at which learning and memory is studied, including behavioral, anatomical, cellular, molecular and genetic levels of analysis. The basic concepts of learning and memory will also be related to known diseases of learning and memory. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 306. Mutually Exclusive: Credit cannot be earned for NEUR 506 and NEUR 306.
Course URL: www.ruf.rice.edu/~neurosci

NEUR 508 - INTRODUCTION TO COGNITIVE NEUROSCIENCE
Short Title: INTRO COGNITIVE NEUROSCIENCE
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An introductory graduate-level overview of cognitive neuroscience. The course will cover basics in history, neuroanatomy, methods of cognitive neuroscience, sensation and perception, control of action, learning and memory, emotion, language, attention, drugs and cognition, impulsivity, cognitive control, social cognition, and neurobiology of disease. This course is usually taught at the Texas Medical Center. Instructor Permission Required. Cross-list: PSYC 574. Graduate/Undergraduate Equivalency: NEUR 308. Mutually Exclusive: Credit cannot be earned for NEUR 508 and NEUR 308.

NEUR 510 - NEUROPHARMACOLOGY
Short Title: NEUROPHARMACOLOGY
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The objectives of this course are to examine how pharmacological agents have been used to elucidate the function of neurotransmitter systems in the central nervous system. In addition, the mechanism of some clinically effective drugs are reviewed in terms of the structure and function of the brain. Instructor Permission Required. Repeatable for Credit.
Course URL: www.ruf.rice.edu/~neurosci

NEUR 515 - NEURAL DEVELOPMENT
Short Title: NEURAL DEVELOPMENT
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An advanced graduate course focusing on molecular genetic studies. Integrates molecular patterning of nervous system development, and the molecular mechanism of growth core guidance and synapse formation. Course taught at Baylor College of Medicine. Instructor Permission Required.
Course URL: www.ruf.rice.edu/~neurosci

NEUR 516 - SENSORY SYSTEMS
Short Title: SENSORY SYSTEMS
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A two-part course covering sensory transduction in audition, touch, and the chemical senses, and a detailed coverage of the visual system, including retinal structures and central pathways, phototransduction, receptive fields, and functional organization in the cortex. Course taught at Baylor College of Medicine. Instructor Permission Required.
Course URL: www.ruf.rice.edu/~neurosci

NEUR 517 - MECHANISMS OF MEMORY
Short Title: MECHANISM OF MEMORY
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Synthesizes our understanding of the mechanism of higher-order memory formation covering learning theory, cellular physiology and biochemistry and discussing memory disorders. Instructor Permission Required.
Course URL: www.ruf.rice.edu/~neurosci
NEUR 518 - INTRODUCTION TO NEUROSCIENCE METHODS
Short Title: INTRO TO NEUROSCIENCE METHODS
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course provides an introduction to the recording of signals from live neurons using microscopic and electrophysiologic methods. The course introduces the basics of instrumentation in the recording of real-time biologic signals. The course is designed to run in parallel with a lab course. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 318. Mutually Exclusive: Credit cannot be earned for NEUR 518 and NEUR 318.

NEUR 519 - INTRODUCTION TO NEUROSCIENCE METHODS LAB
Short Title: NEUROSCIENCE METHODS LAB
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is the laboratory course that is designed to run in parallel with the Introductory Neuroscience Methods lecture course. The Lab is designed to give students hands-on experience applying the ideas for real-time recording of microscopic and neurophysiological signals. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 319. Mutually Exclusive: Credit cannot be earned for NEUR 519 and NEUR 319.

NEUR 520 - TEN UNSOLVED QUESTIONS IN NEUROSCIENCE
Short Title: TEN UNSOLVED QUESTIONS IN NEUR
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Neuroscience has yet to establish its general principles. This course introduces the major topics including memory, sleep, consciousness, information in neural activity, emotions, plasticity, and intelligence. Each week's lecture introduces a new problem, addressing why the question is important, its history, current thinking, and what we have learned. Course taught at Baylor College of Medicine. Instructor Permission Required.
Course URL: www.ruf.rice.edu/~neurosci

NEUR 521 - ANALYSES OF NEURONAL FUNCTION
Short Title: ANALYSES OF NEURONAL FUNCTION
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will cover all basic aspects of the intrinsic electrophysiological properties of neurons and of synaptic transmission. It will also introduce principles of synaptic integration and plasticity. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 321. Mutually Exclusive: Credit cannot be earned for NEUR 521 and NEUR 321.

NEUR 522 - BRAIN CELL BIOLOGY AND DEVELOPMENT
Short Title: BRAIN CELL BIOL & DEVELOPMENT
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Anatomy and development of the nervous system is designed to introduce the graduate student to the basic structure and function of the nervous system, and describe its rough development. It is intended for first year graduate students without any specific advanced knowledge of neuroscience. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 322. Mutually Exclusive: Credit cannot be earned for NEUR 522 and NEUR 322.

NEUR 523 - GENETICS FOR NEUROSCIENCE
Short Title: GENETICS FOR NEUROSCIENCE
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course integrates genetics into neuroscience and is intended to teach neuroscience students how to tackle neurobiological problems using genetic strategies and tools. In the introduction, students will be exposed to the basic concepts in genetics. Strategies using model organisms from C. elegans to mice will be covered. Finally we will discuss genetic approaches in humans. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 323. Mutually Exclusive: Credit cannot be earned for NEUR 523 and NEUR 323.
NEUR 525 - NEUROSCIENCE AND LAW
Short Title: NEUROSCIENCE AND LAW
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course addresses how the modern understanding of brain function will intersect with the making of law, the punishment of criminals, and the development of new rehabilitation strategies. The readings will bring together a unique conjunction of neurobiology, legal scholarship, and policy making. The goals of the course will be to facilitate an understanding of the neurobiological underpinnings of behaviors that are subject to legal consequences for individuals and groups, and using this emerging base of scientific information to design modern, evidence-based policy.

NEUR 530 - THEORY, CONTENT, AND EXECUTION IN COGNITIVE NEUROSCIENCE
Short Title: COGNITIVE NEUROSCIENCE THEORY
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is designed to provide students with the skills necessary to become successful cognitive neuroscientists. Students will receive instruction in designing experiments and analyzing data, selecting research topics, relating theory to their work and how to say up to date on current research. This course is taught at the University of Texas Health Sciences Center. Instructor Permission Required. Repeatable for Credit.

NEUR 535 - CELLULAR NEUROPHYSIOLOGY
Short Title: CELLULAR NEUROPHYSIOLOGY
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course provides an upper level graduate treatment on the physiology and biophysics of nerve cell signaling. Topics to be covered include measurement and analysis of single events from ion channels to synaptic vesicle fusion, synaptic transmission and the relationship between calcium signaling and synaptic vesicle dynamics, short-term synaptic plasticity, and postsynaptic integration. This course is taught at the University of Texas Health Sciences Center. Instructor Permission Required. Repeatable for Credit.

NEUR 540 - GRADUATE NEUROANATOMY
Short Title: GRADUATE NEUROANATOMY
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers a broad overview of the structure and function of the central nervous system. The general architecture of the nervous system and its function systems are present in a series of online exercise. MRIs of brain anatomy, as commonly presented in the scientific literature, will be presented using a computerized learning system. This course is taught at the University of Texas Health Sciences Center. Instructor Permission Required. Repeatable for Credit.

NEUR 550 - MOLECULAR NEUROBIOLOGY
Short Title: MOLECULAR NEUROBIOLOGY
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers the molecular, cellular, and biochemical events that underlie neuronal function. Emphasis is placed on the basic chemistry and biology of cells residing the nervous system. The course also covers the structure and function of receptors, channels and pumps necessary for neuronal function and the neurochemistry of specific transmitter systems. The unique demand of neurons as specialized secretory cells is also covered. This course is taught at UTHSC. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 350. Mutually Exclusive: Credit cannot be earned for NEUR 550 and NEUR 350. Repeatable for Credit.

NEUR 564 - COGNITIVE NEUROSCIENCE LAB
Short Title: COGNITIVE NEUROSCIENCE LAB
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The objective is to equip the students of PSYC/NEUR 362 the tools on how to apply cognitive neuroscience techniques to health or clinical topics and to investigate sensorimotor and cognitive measures in a human model. Instructor Permission Required. Cross-list: PSYC 564. Graduate/Undergraduate Equivalency: NEUR 364. Mutually Exclusive: Credit cannot be earned for NEUR 564 and NEUR 364.
NEUR 576 - NEUROBIOLOGY OF DISEASE
Short Title: NEUROBIOLOGY OF DISEASE
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Covers some of the most important disorders of nervous system function. Exposes students to incidence, clinical manifestations, pathophysiology, current scientific models of causes/mechanisms of disorders of the adult brain: stroke, Parkinson's disease, Alzheimer's disease, seizure disorders, brain tumors, multiple sclerosis, amyotrophic lateral sclerosis, brain/spinal cord injury, addiction, depression, and schizophrenia. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 376. Mutually Exclusive: Credit cannot be earned for NEUR 576 and NEUR 376.

NEUR 577 - NEUROANATOMY: FUNCTIONAL ORGANIZATION OF THE CENTRAL NERVOUS SYSTEM
Short Title: FUNCTIONAL NEUROANATOMY
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Anatomy and function of components of the nervous system with an emphasis on the central nervous system. This course is offered for Rice psychology graduate undergraduate students. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 377. Mutually Exclusive: Credit cannot be earned for NEUR 577 and NEUR 376.

NEUR 578 - HIGHER BRAIN FUNCTION
Short Title: HIGHER BRAIN FUNCTION
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Aspects of systems' neuroscience related to higher brain function: (1) role of limbic system in higher brain functions, (2) role of the extended amygdala and the mesolimbic system in reward and addiction, (3) discussion of human brain processes including decision making, goal directed learning and representation of self and others. Course taught at Baylor College of Medicine. Instructor Permission Required. Mutually Exclusive: Credit cannot be earned for NEUR 578 and NEUR 378.
Course URL: www.ruf.rice.edu/~neurosci

NEUR 579 - NEUROBIOLOGY OF SENSATION AND MOVEMENT
Short Title: NEUROBIO OF SENSATION/MOVEMENT
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Overview of basic systems neuroscience. The course covers sensory transductions, development, and motor programming. Course taught at Baylor College of Medicine. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 379. Mutually Exclusive: Credit cannot be earned for NEUR 579 and NEUR 379.

NEUR 580 - PHYSIOLOGY OF VISUAL SYSTEM
Short Title: PHYSIOLOGY OF VISUAL SYSTEM
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Course provides an advanced level and comprehensive coverage of the physiology of the retina and visual cortex. Useful for graduate students and postdocs in neuroscience, physiology, biochemistry, cell biology, and molecular genetics who are interested in visual information processing and brain function. Offered even years only. Instructor Permission Required. Graduate/Undergraduate Equivalency: NEUR 381. Mutually Exclusive: Credit cannot be earned for NEUR 580 and NEUR 381.

NEUR 582 - INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE
Short Title: INTRO COMPUTATIONAL NEURSCI
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to methods and theories used to describe and understand neural information processing in the brain. Models covered will range from single neuron to networks for sensory, motor and learning tasks. Programming exercises will be done using Matlab. Additional coursework required beyond the undergraduate course requirements. Graduate/Undergraduate Equivalency: NEUR 382. Mutually Exclusive: Credit cannot be earned for NEUR 582 and ELEC 382/NEUR 382.
NEUR 583 - COMPUTATIONAL NEUROSCIENCE AND NEURAL ENGINEERING
Short Title: COMP/NEUROSCIENCE/NEURAL ENGNR
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An introduction to the anatomy and physiology of the brain. Includes basic electrophysiology of nerve and muscle. Develops mathematical models of neurons, synaptic transmission and natural neural networks. Leads to a discussion of neuromorphic circuits which can represent neuron and neural network behavior in silicon. Recommendation: Knowledge of electrical circuits, operational amplifier circuits and ordinary differential equations. Involves programming Matlab. Cross-list: BIOE 583, ELEC 583. Graduate/Undergraduate Equivalency: NEUR 481. Recommended Prerequisite(s): Knowledge of basic electrical and operational amplifier circuits; and ordinary differential equations. Mutually Exclusive: Credit cannot be earned for NEUR 583 and NEUR 481.

NEUR 615 - THEORETICAL NEUROSCIENCE: FROM CELLS TO LEARNING SYSTEMS
Short Title: THEORETICAL NEUROSCIENCE
Department: Neurosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: We present the theoretical foundations of cellular and systems neuroscience from distinctly quantitative point of view. We develop the mathematical and computational tools as they are needed to model, analyze, visualize and interpret a broad range of experimental data. Additional course work required beyond the undergraduate course requirements. Cross-list: CAAM 615, ELEC 588. Graduate/Undergraduate Equivalency: NEUR 415. Mutually Exclusive: Credit cannot be earned for NEUR 615 and NEUR 415.

Philosophy (PHIL)

PHIL 100 - PROBLEMS OF PHILOSOPHY
Short Title: PROBLEMS OF PHILOSOPHY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An introduction to philosophy through such fundamental problems as the basis of morality, the foundation of state authority, determinism and freedom, and the possibility of knowledge.

PHIL 101 - CONTEMPORARY MORAL ISSUES
Short Title: CONTEMPORARY MORAL ISSUES
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Examination of moral issues surrounding such topics as abortion, euthanasia, war, capital punishment, justice, and equality.

PHIL 103 - PHILOSOPHICAL ASPECTS OF COGNITIVE SCIENCE
Short Title: PHIL ASPECT COGNITIVE SCIENCE
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An examination of current research in cognitive science and its philosophical implications. Topics include whether the mind is a computational system, how the mind is organized, what relations minds bear to brains.

PHIL 104 - INTRODUCTION TO PHILOSOPHY OF SCIENCE
Short Title: INTRO TO PHILOSOPHY OF SCIENCE
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines core features of scientific method and philosophical accounts of scientific knowledge. Topics include: discovery, explanation, evidence, theories and models.

PHIL 105 - HISTORICAL INTRODUCTION TO PHILOSOPHY
Short Title: HIST INTRO TO PHILOSOPHY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Study and discussion of central issues of Western philosophy as developed by its original thinkers from the ancient Greeks to the twentieth century.

PHIL 106 - LOGIC
Short Title: LOGIC
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to the formal theory of reasoning, which will be used to assess the validity of arguments in natural languages. Study of general properties of logical implication and logical truth.
PHIL 109 - PHILOSOPHY OF ART
Short Title: PHILOSOPHY OF ART
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An introduction to central issues in contemporary philosophy of art through the lens of artistic works and practice. Students investigate what constitutes a work of art, artistic representation, the nature of aesthetic qualities, and the relevance of artists' intentions to the evaluation of works art, with close attention to visual, performance, literary, and experimental art forms.

PHIL 111 - INTRODUCTION TO FEMINIST PHILOSOPHY
Short Title: INTRO TO FEMINIST PHILOSOPHY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Feminist philosophy both uses philosophical methods to investigate feminism, and critiques philosophy from a feminist perspective. This course introduces the student to feminist philosophy from historical and contemporary perspectives, investigating topics of both feminist and philosophical interest such as gender, sexuality, family, class, race, equality, justice, politics, science, and knowledge. Cross-list: SWGS 111.

PHIL 116 - INTRODUCTION TO THE PHILOSOPHY OF LAW
Short Title: INTRO TO THE PHILOSOPHY OF LAW
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course will discuss the nature of law in general as well as discrete topics in legal philosophy. How is a legal rule different from an order backed by a terrorist threat? Is retroactive legislation legal? What are legal rights? Is there a general moral duty to obey the law?

PHIL 201 - HISTORY OF PHILOSOPHY I
Short Title: HISTORY OF PHILOSOPHY I
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of the major philosophers and philosophical systems of ancient Greece, from Parmenides to the Stoics. Cross-list: CLAS 201, MDEM 201.

PHIL 202 - HISTORY OF PHILOSOPHY II
Short Title: HIST OF PHILOSOPHY II
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A survey of the history of philosophy from the 17th- to the 20th century. Leading philosophers discussed include Descartes, Locke, Hume, Kant, Mill, Nietzsche and Quine.

PHIL 301 - ANCIENT AND MEDIEVAL PHILOSOPHY
Short Title: ANCIENT & MEDIEVAL PHILOSOPHY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Topics in the history of philosophy from the 4th century B.C. through the 14th century. Graduate students require permission of instructor. Cross-list: CLAS 301, MDEM 301. Graduate/Undergraduate Equivalency: PHIL 501. Mutually Exclusive: Credit cannot be earned for PHIL 301 and MDEM 481. Repeatable for Credit.

PHIL 302 - MODERN PHILOSOPHY
Short Title: MODERN PHILOSOPHY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examination of themes or authors in 17th- and 18th- century philosophy. Topics vary from year to year. Normally offered every year. Graduate/Undergraduate Equivalency: PHIL 502. Recommended Prerequisite(s): Majors should take PHIL 202 before PHIL 302. For non-majors one previous course in philosophy is recommended. Mutually Exclusive: Credit cannot be earned for PHIL 302 and PHIL 502. Repeatable for Credit.

PHIL 303 - THEORY OF KNOWLEDGE
Short Title: THEORY OF KNOWLEDGE
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines the question: What is knowledge, and how is it possible that we have it? Topics include: analysis of knowledge, justification and evidence, skeptical challenges, and relativism.
PHIL 304 - METAPHYSICS  
Short Title: METAPHYSICS  
Department: Philosophy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Examination of metaphysical theories in the works of historical and contemporary thinkers. Topics may include: free will, the identity of persons over time, causation, possibility and necessity, design and chance, the nature of existence, the nature of time. Recommended prerequisite(s): A previous course in philosophy.

PHIL 305 - MATHEMATICAL LOGIC  
Short Title: MATHEMATICAL LOGIC  
Department: Philosophy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group III  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: We study formal languages and methods for assessing correctness of arguments, including a brief look at modal and many-valued logics. We also consider their relations to natural languages and reflect on the techniques required to prove theorems about languages. A previous logic course is helpful, though the course is self-contained. Graduate/Undergraduate Equivalency: PHIL 505. Mutually Exclusive: Credit cannot be earned for PHIL 305 and PHIL 505.

PHIL 306 - ETHICS  
Short Title: ETHICS  
Department: Philosophy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course deals with fundamental questions of value and morality-questions such as: What sort of life is best? What kind of person is it best to be? What does morality require of us? It also deals with important second-order questions about these fundamental questions-for example: Can morality be justified? How can we know what's right or good? Is there moral truth? What is the relation between morality and self-interest? Readings are drawn from both classical and contemporary sources.

PHIL 307 - SOCIAL AND POLITICAL PHILOSOPHY  
Short Title: SOCIAL & POLITICAL PHILOSOPHY  
Department: Philosophy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course examines some philosophical problems raised by society and the state. Topics to be discussed include the sources of political authority, the justification of punishment, the significance of national boundaries, and the distribution of wealth.

PHIL 308 - CONTINENTAL PHILOSOPHY  
Short Title: CONTINENTAL PHILOSOPHY  
Department: Philosophy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: An examination of philosophical movements in 20th-century European philosophy-including phenomenology, existentialism, hermeneutics, critical theory, deconstruction, and postmodernism. Repeatable for credit with consent of instructor. Graduate/Undergraduate Equivalency: PHIL 508. Repeatable for Credit.

PHIL 309 - AESTHETICS  
Short Title: AESTHETICS  
Department: Philosophy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: An approach to the philosophy of art drawing upon traditional and contemporary philosophical theories, artist's manifestos, and reflection upon exemplary art works. Topics include: What is a work of art? What is artistic genius? What makes an artwork good? What is the place of art within morality and society?

PHIL 310 - PHILOSOPHY OF BIOLOGY  
Short Title: PHILOSOPHY OF BIOLOGY  
Department: Philosophy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: The course examines philosophical issues that emerge in biological science, with emphasis on evolutionary theory, genetics and development, and systems biology. Recommended Prerequisite(s): BIOS 201 and BIOS 202.

PHIL 311 - PHILOSOPHY OF RELIGION  
Short Title: PHILOSOPHY OF RELIGION  
Department: Philosophy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Examination of God's existence, the problem of evil, the relation between faith and reason, the meaning of death, the relation between religion and morality, and tolerance/respect for differing religions.
problems in the allocation of health care resources. Other accounts of justice and health care. The second addresses specific Rawls’ “Theory of Justice”, Nozick’s “Anarchy, State, and Utopia”, and explanation in medicine’s models of disease and health. Other evaluations. This course explores the interplay of evaluation and defect in explanatory accounts, intermixing factual claims with moral and philosophy of science. We ask what makes something a scientific explanation, what is required for observations to support (confirm) scientific theories, the nature of evidence, and how experiments relate to theories and models of the world. Topics covered include logical empiricism, the problem of induction, theory-laden observation, relativism, and the role of social values in science. Repeatable for Credit. The relationship between theories of justice and accounts of the proper allocation of health care is explored. The first half examines Rawls’ “Theory of Justice”, Nozick’s “Anarchy, State, and Utopia”, and other accounts of justice and health care. The second addresses specific problems in the allocation of health care resources.
PHIL 326 - HISTORY OF ETHICS
Short Title: HISTORY OF ETHICS
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: An introduction to the major issues of ethical theory through the reading and discussion of such classical figures as Plato, Aristotle, the Stoics, the Epicureans, St. Augustine, St. Thomas, Maimonides, Bishop Butler, David Hume, Adam Smith, J.S. Mill, and I. Kant. Graduate/Undergraduate Equivalency: PHIL 526. Recommended Prerequisite(s): One previous course in Philosophy. Mutually Exclusive: Credit cannot be earned for PHIL 326 and PHIL 526.

PHIL 327 - HISTORY OF SOCIAL AND POLITICAL PHILOSOPHY
Short Title: HIST SOCIAL & POLITICAL PHILOS
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A survey of classic texts in the history of social and political philosophy, from Plato to Machiavelli to Mill.

PHIL 331 - MORAL PSYCHOLOGY
Short Title: MORAL PSYCHOLOGY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A philosophical examination of some of the fundamental issues in clinical ethics, including informed consent, competency, confidentiality, end of life decision making, the definition of death, allocating scarce medical resources, and the role of economic analysis in clinical decision making. Readings drawn from the clinical and philosophical literature. Graduate/Undergraduate Equivalency: PHIL 536. Mutually Exclusive: Credit cannot be earned for PHIL 331 and PHIL 536.

PHIL 334 - ACHIEVEMENT & MEANING OF LIFE
Short Title: ACHIEVEMENT & MEANING OF LIFE
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course looks at the value of achievements in a rigorous philosophical manner. We examine approaches to the meaning of life and the value of achievement in the works of great philosophers, current philosophy, and draw from literature, history, current events, and psychology.

PHIL 335 - ADVANCED TOPICS IN VALUE THEORY
Short Title: ADV TOPICS IN VALUE THEORY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Intensive examination of a topic of contemporary or historical interest in ethics or social and political philosophy. Graduate/Undergraduate Equivalency: PHIL 535. Recommended Prerequisite(s): One course in philosophy or permission of the instructor. Mutually Exclusive: Credit cannot be earned for PHIL 335 and PHIL 535.

PHIL 336 - TOPICS IN MEDICAL ETHICS
Short Title: TOPICS IN MEDICAL ETHICS
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Philosophy. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A philosophical examination of some of the fundamental issues in clinical ethics, including informed consent, competency, confidentiality, end of life decision making, the definition of death, allocating scarce medical resources, and the role of economic analysis in clinical decision making. Readings drawn from the clinical and philosophical literature. Graduate/Undergraduate Equivalency: PHIL 536. Mutually Exclusive: Credit cannot be earned for PHIL 336 and PHIL 536.

PHIL 337 - RESEARCH ETHICS
Short Title: RESEARCH ETHICS
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A philosophical and ethical examination of some of the major issues related to research on human and animal subjects. A general framework will be introduced and it will be applied to research on new technologies, research on special populations, and research in an international setting.

PHIL 338 - METAETHICS
Short Title: METAETHICS
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Metaethics studies higher-order questions about morality. Its questions include: What reasons do we have to do the right thing? What do claims about rightness and goodness mean? Can those claims be true or false? Are there objective moral truths, and if so, how can we know them?
PHIL 339 - DEATH AND DYING: METAPHYSICS AND ETHICS
Short Title: DEATH AND DYING
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: How are we to respond to the fact of death? This course examines the moral, metaphysical and personal issues surrounding the death of persons. Readings from analytic philosophy and the bioethics literature.

PHIL 341 - TOPICS IN PHILOSOPHY OF MIND
Short Title: TOPICS IN PHILOSOPHY OF MIND
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A focused examination of a selected topic in the philosophy of mind. Topics vary each semester and might include the nature of consciousness, mental representation, rationality, and/or the various interconnections between perception, emotion, thought and action. For details in a specific year, consult with the instructor and/or department. Repeatable for Credit.

PHIL 352 - PHILOSOPHY OF PSYCHOLOGY
Short Title: PHILOSOPHY OF PSYCHOLOGY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course covers a selection of central issues in the philosophy of psychology. Questions include: Can the mind be studied scientifically? What role, if any, does introspection play in gathering data? Are there any psychological laws? How does psychological evidence bear on philosophical issues - Such as the existence of free will and moral responsibility? Repeatable for Credit.

PHIL 353 - PHILOSOPHY OF LANGUAGE
Short Title: PHILOSOPHY OF LANGUAGE
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Philosophical investigation of relations among language, thought, and reality with emphasis on what makes a string of symbols and sounds meaningful. Recommended prerequisite(s): One course in philosophy or permission of the instructor.

PHIL 355 - PHILOSOPHICAL TOPICS IN ADVANCED LOGIC
Short Title: PHIL TOPICS IN ADVANCED LOGIC
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PHIL 305 or PHIL 505
Description: Various systems of formalization for modalities, tenses and other intentional concepts are studied syntactically and semantically. Students use and compare these systems and evaluate their strengths and limits. These provide examples for discussion of questions such as: What is a logical constant? What is the scope of logic?
Course URL: www.owlnet.rice.edu/~phil355

PHIL 357 - INCOMPLETENESS, UNDECIDABILITY, AND COMPUTABILITY
Short Title: INCOMPL, UNDECIDED&COMPUTBLTY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Proofs of Godel's Incompleteness Theorems for number theory in several forms and by various methods, as well as development of several definitions of computability for number-theoretic functions, which are then shown to be equivalent. Includes proof of the unsolvability of the Halting Problem and analysis of Church's thesis, as well as exploration of the extension of the concept of computability to real-valued functions. Frequent misunderstandings and misrepresentations of the theorems are analyzed.

PHIL 358 - PHILOSOPHY OF NEUROSCIENCE
Short Title: PHILOSOPHY OF NEUROSCIENCE
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores various philosophical questions raised by neuroscience. How do we investigate and explain the brain? Do psychological explanations ultimately 'reduce' to neuroscience? Are mental states nothing more than electro-chemical states of the brain? Does the brain literally perform computations on internal representations? Could neuroscience ever explain consciousness? Repeatable for Credit.

PHIL 359 - ANIMAL MINDS
Short Title: ANIMAL MINDS
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will examine various philosophical questions raised by the science of animal cognition: What is it to have a mind? How can we learn about animal minds? Are animals conscious? Do they have beliefs or concepts? What does this tell us about the nature and value of animal minds? Repeatable for Credit.
PHIL 412 - SENIOR THESIS  
Short Title: SENIOR THESIS  
Department: Philosophy  
Grade Mode: Standard Letter  
Course Type: Research  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Independent research course for undergraduate philosophy majors who wish to write a senior thesis and become eligible for honors in the major. Students may enroll in PHIL 412 only with consent of a faculty advisor and the department, and only if they intend to enroll in PHIL 411 as well. Senior Thesis is a year-long research course. Instructor Permission Required.

PHIL 411 - SENIOR THESIS  
Short Title: INDEPENDENT READING I  
Department: Philosophy  
Grade Mode: Standard Letter  
Course Type: Independent Study  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Topics may vary. Please consult with department for additional information. Repeatable for credit with consent of the instructor. Instructor Permission Required. Repeatable for Credit.

PHIL 407 - UNDERGRADUATE RESEARCH SEMINAR  
Short Title: UG RESEARCH SEMINAR  
Department: Philosophy  
Grade Mode: Standard Letter  
Course Type: Research  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: See PHIL 401. Instructor Permission Required. Repeatable for Credit.

PHIL 406 - INDEPENDENT READING II  
Short Title: INDEPENDENT READING II  
Department: Philosophy  
Grade Mode: Standard Letter  
Course Type: Research  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Emphasis is on the skills of critical reading, careful discussion, writing clear and well-argued essays, and making lucid and engaging oral presentations. The course is organized around a family of topics: students also, in consultation with the instructor, select issues for independent research, and produce a final essay and presentation. Repeatable for Credit.

PHIL 401 - INDEPENDENT READING I  
Short Title: INDEPENDENT READING I  
Department: Philosophy  
Grade Mode: Standard Letter  
Course Type: Independent Study  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Course for undergraduate students to pursue independent research projects under direction of a philosophy department faculty member. Instructor Permission Required. Repeatable for Credit.
PHIL 505 - MATHEMATICAL LOGIC
Short Title: MATHEMATICAL LOGIC
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Philosophy.
Description: A version of PHIL 305 for philosophy graduate students which includes further reading of material on philosophy of logic.
Graduate/Undergraduate Equivalency: PHIL 305. Mutually Exclusive: Credit cannot be earned for PHIL 505 and PHIL 305.

PHIL 506 - SEMINAR IN ETHICS
Short Title: SEMINAR IN ETHICS
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

PHIL 507 - SEMINAR IN SOCIAL AND POLITICAL PHILOSOPHY
Short Title: SEM SOCIAL &POLITICAL PHILO
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

PHIL 508 - SEMINAR IN CONTINENTAL PHILOSOPHY
Short Title: SEM CONTINENTAL PHILOSOPHY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

PHIL 509 - SEMINAR IN AESTHETICS
Short Title: SEMINAR IN AESTHETICS
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

PHIL 510 - SEMINAR IN PHENOMENOLOGY
Short Title: PHENOMENOLOGY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

PHIL 511 - SEMINAR PHILOSOPHY OF MIND
Short Title: SEMINAR PHILOSOPHY OF MIND
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

PHIL 513 - SEMINAR IN PHILOSOPHY OF SCIENCE
Short Title: SEMINAR IN PHILOSOPHY OF SCIENCE
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

PHIL 516 - SEMINAR IN PHILOSOPHY OF LAW
Short Title: SEMINAR IN PHILOSOPHY OF LAW
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

PHIL 522 - TOPICS IN MODERN PHILOSOPHY
Short Title: TOPICS IN MODERN PHILOSOPHY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
PHIL 523 - SEMINAR IN KANT
Short Title: SEMINAR IN KANT
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

PHIL 524 - SEMINAR IN HEGEL
Short Title: SEMINAR IN HEGEL
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

PHIL 526 - HISTORY OF ETHICS
Short Title: HISTORY OF ETHICS
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate version of PHIL 326. Special graduate student requirements include additional readings and the writing of a term research paper. Graduate/Undergraduate Equivalency: PHIL 326. Mutually Exclusive: Credit cannot be earned for PHIL 526 and PHIL 326.

PHIL 530 - SEMINAR IN HISTORY OF ANALYTIC PHILOSOPHY
Short Title: SEM HIST ANALYTIC PHILOSOPHY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Course URL: www.owlnet.rice.edu/~phil530

PHIL 531 - SEMINAR IN MORAL PSYCHOLOGY
Short Title: MORAL PSYCHOLOGY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A study of the philosophical issues raised by moral agency. Topics to be discussed may include reason and its relation to motivation and desire, character, responsibility, weakness of will, self-deception, and the nature of the self.

PHIL 534 - LIBERALISM
Short Title: LIBERALISM
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An examination of the philosophical foundations of liberalism, with emphasis on the thesis that government should be neutral toward competing conceptions of the good life.

PHIL 535 - ADVANCED TOPICS IN VALUE THEORY
Short Title: ADV TOPICS IN VALUE THEORY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

PHIL 536 - TOPICS IN MEDICAL ETHICS
Short Title: TOPICS IN MEDICAL ETHICS
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An examination of the theoretical foundations of bioethics emphasizing principality, utilitarianism, Kantianism, contractarianism, medicalism, post-modernism, and casuistry. Graduate/Undergraduate Equivalency: PHIL 336. Mutually Exclusive: Credit cannot be earned for PHIL 536 and PHIL 336.

PHIL 537 - SEMINAR IN RESEARCH ETHICS
Short Title: SEMINAR IN RESEARCH ETHICS
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An examination of the major issues of research ethics, including informed consent and IRB review, involvement and protection of special groups of subjects, fetal tissue and stem cell research, and genetic research.

PHIL 540 - SEMINAR ON RATIONAL PRACTICES
Short Title: RATIONAL PRACTICES
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course will examine what it is for a practice to be rational, from a broadly naturalistic perspective. Special focus on scientific inquiry and other epistemic practices.
PHIL 542 - TOPICS IN PHILOSOPHY OF MIND
Short Title: TOPICS IN PHILOSOPHY OF MIND
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Description: An in-depth look at different topics in contemporary philosophy of mind. Some sample topics: consciousness, mental representation, innateness, modularity, and the role of language in thought. Repeatable for credit with consent of the instructor. Repeatable for Credit.

PHIL 553 - SEMINAR IN PHILOSOPHY OF LANGUAGE
Short Title: SEM PHILOSOPHY LANGUAGE
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Description: Topics may vary. Please consult with the department for additional information. Repeatable for Credit.

PHIL 590 - TOPICS IN PHILOSOPHY
Short Title: TOPICS IN PHILOSOPHY
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Description: Directed reading and research. Repeatable for Credit.

PHIL 598 - ADVANCED INDEPENDENT READING
Short Title: ADVANCED INDEPENDENT READING
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Enrollment is limited to students with a major in Philosophy. Enrollment is limited to Graduate level students.
Description: Reading course in preparation for the comprehensive examination and thesis proposal defense. Repeatable for Credit.

PHIL 599 - ADVANCED INDEPENDENT READING
Short Title: ADVANCED INDEPENDENT READING
Department: Philosophy
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Enrollment is limited to students with a major in Philosophy. Enrollment is limited to Graduate level students.
Description: Reading course in preparation for the comprehensive examination and thesis proposal defense. Repeatable for Credit.

PHIL 651 - MASTERS THESIS RESEARCH
Short Title: MASTERS THESIS RESEARCH
Department: Philosophy
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to students with a major in Philosophy. Enrollment is limited to Graduate level students.
Description: Research course for graduate students preparing a masters thesis. Repeatable for Credit.

PHIL 701 - READING AND RESEARCH FOR QUALIFYING EXAMINATION AND THESIS PROPOSAL
Short Title: RESEARCH QUALIFYING & THESIS
Department: Philosophy
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to students with a major in Philosophy. Enrollment is limited to Graduate level students.
Description: Reading course in preparation for the comprehensive examination and thesis proposal defense. Repeatable for Credit.

PHIL 702 - READING AND RESEARCH FOR QUALIFYING EXAMINATION AND THESIS PROPOSAL
Short Title: RESEARCH QUALIFYING & THESIS
Department: Philosophy
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to students with a major in Philosophy. Enrollment is limited to Graduate level students.
Description: Reading course in preparation for the comprehensive examination and thesis proposal defense. Repeatable for Credit.

PHIL 800 - RESEARCH AND THESIS
Short Title: RESEARCH AND THESIS
Department: Philosophy
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to students with a major in Philosophy. Enrollment is limited to Graduate level students.
Description: Repeatable for Credit.
Photography (FOTO)

FOTO 200 - PHOTOGRAPHY IN THE COMMUNITY
Short Title: PHOTOGRAPHY IN THE COMMUNITY
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to black and white photography through exploration of light-sensitive materials, film and digital cameras, and computers. Assignments include viewing analysis, discussion, and writing about pictures to improve visual awareness, technical skills, and understanding of meaning in photography's continuing history. Final roster to be determined by the instructor on the first day of class. Enrollment in section 002 of this course is reserved for new matriculants only.

FOTO 205 - INTRODUCTION TO PHOTOGRAPHY
Short Title: INTRODUCTION TO PHOTOGRAPHY
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to black and white photography through exploration of light-sensitive materials, film and digital cameras, and computers. Assignments include viewing analysis, discussion, and writing about pictures to improve visual awareness, technical skills, and understanding of meaning in photography's continuing history. Final roster to be determined by the instructor on the first day of class. Enrollment in section 002 of this course is reserved for new matriculants only.

FOTO 206 - PHOTOGRAPHY II
Short Title: PHOTOGRAPHY II
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): ARTS 205 or FOTO 205
Description: Continued exploration of the basic materials and processes of the photographic medium. Includes viewing, analysis, and discussion of the medium's history and current trends. Space in studio class is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the instructor.

FOTO 210 - BEGINNING DIGITAL PHOTOGRAPHY
Short Title: BEGINNING DIGITAL PHOTOGRAPHY
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to digital photography through exploration of light, camera, and computer. Assignments include looking, taking, discussing, adjusting, printing and writing about photographs. The class is a balance of visual awareness, technical skills and meaning in the context of photography's continuing history. Primary software application is Adobe Lightroom which is provided on computer in the VADA Digital Lab in the Rice Media Center; students must provide their own digital camera. Instructor Permission Required. Cross-list: HART 209.

FOTO 216 - 35MM PHOTOGRAPHY
Short Title: 35MM PHOTOGRAPHY
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to 35mm photography. Space in studio class is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor.

FOTO 263 - EPISODES IN THE HISTORY OF PHOTOGRAPHY: FROM INVENTION TO THE PRESENT
Short Title: HISTORY OF PHOTOGRAPHY
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This class aims to examine the history of photography in the nineteenth century as it develops within a number of specific theamics, from medium's conception in the late eighteenth-century through to debates in the twentieth century about photography's relationship to artistic and social issues. Instructor Permission Required. Cross-list: HART 263. Mutually Exclusive: Credit cannot be earned for FOTO 263 and HART 363.

FOTO 295 - SPECIAL PROBLEMS IN PHOTOGRAPHY
Short Title: SPEC PROB PHOTOGRAPHY
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Study of problems at the introductory level in creative art. Topics may vary. Please consult with department for additional information. May be used in awarding transfer credit. Instructor Permission Required. Repeatable for Credit.
FOTO 304 - PHOTOGRAPHIC MEDIA FOR ARTISTS
Short Title: PHOTOGRAPHIC MEDIA FOR ARTISTS
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): FOTO 205 or ARTS 205 or ARTS 225 or ARTS 301
Description: Guided exploration of traditional and non-traditional photographic media for students with prior experience in drawing, painting, printmaking, sculpture, or photography. Photographic media open for students' exploration will include, but not limited to, black and white silver printing, traditional photographic color printing, digital printing, and oil pigment on photographic images. Space in studio classes is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor.

FOTO 305 - PHOTOGRAPHY III
Short Title: PHOTOGRAPHY III
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of advanced problems in photography, with emphasis on the independent pursuit of projects submitted by the students. Space in studio classes is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor. Instructor Permission Required.

FOTO 306 - PHOTOGRAPHY IV
Short Title: PHOTOGRAPHY IV
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of advanced problems in photography with emphasis on the independent pursuit of projects submitted by the students. Continuation of FOTO 305 (formerly ARTS 305). Space in studio classes is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor. Instructor Permission Required.

FOTO 310 - INTERMEDIATE DIGITAL PHOTOGRAPHY
Short Title: INTERMEDIATE DIGITAL PHOTO
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): FOTO 205 or FOTO 210
Description: A continuation of FOTO 210, which is a prerequisite for this course. The emphasis is on making photographs as distinct from taking them. The course explores the malleability of the digital medium through the use of digital tools in Adobe Photoshop, which is provided on the computers in the VADA Digital Lab in the Rice Media Center. Students must provide their own digital camera.

FOTO 332 - CRITICAL STUDIES OF MULTIMEDIA ARTS
Short Title: CRITICAL STU OF MULTIMEDIA ART
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Critical Studies for Multimedia Arts is a course designed to familiarize art and non-art majors with key theories and core concepts in modern and contemporary multimedia art. Students will examine a broad spectrum of specific topics in contemporary artwork related conceptually to: space/time; bodies and performance; “sculptural” studies in an expanded field and video & film space. This is a multi-dimensional class consisting of guest lectures, artist-speakers, and field trips to local museums, galleries and alternative art spaces. This course will include discussions on readings, writings and special projects. This promises to be a fun and thought-provoking class and is designed to enhance studio practice and encourage interest in the visual arts. Cross-list: ARTS 332, FILM 332, THEA 332.

FOTO 345 - COLOR PHOTOGRAPHY I
Short Title: COLOR PHOTOGRAPHY I
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ARTS 205 or FOTO 205) and (ARTS 206 or FOTO 206)
Description: Study in the fundamentals of color photography. Includes problems in exposing color negative and transparency film, as well as photographic and digital color printing. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor.
FOTO 346 - COLOR PHOTOGRAPHY II  
**Short Title:** COLOR PHOTOGRAPHY II  
**Department:** Visual and Dramatic Arts  
**Grade Mode:** Standard Letter  
**Course Type:** Studio  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** (ARTS 205 or FOTO 205) and (ARTS 206 or FOTO 206)  
**Description:** Study in the fundamental techniques of color photography. Includes special problems in color camera work, color negative and transparency processing, and color printing. Continuation of FOTO 345 (formerly ARTS 345). Space in studio class is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor.

FOTO 366 - THE ROAD AS EXPERIENCE AND METAPHOR IN PHOTOGRAPHIC PRACTICE  
**Short Title:** ROAD TRIP PHOTOGRAPHY  
**Department:** Visual and Dramatic Arts  
**Grade Mode:** Standard Letter  
**Course Type:** Studio  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** FOTO 205 or FOTO 210  
**Description:** A search for America and the self through the written and visual literature of moving through the American landscape. This course will search for motifs to emulate in small formats and short distances, as preface to the culmination recorded in a self-designed book of each personal odyssey. Repeatable for Credit.

FOTO 383 - PHOTOGRAPHY BOOKMAKING  
**Short Title:** PHOTOGRAPHY BOOKMAKING  
**Department:** Visual and Dramatic Arts  
**Grade Mode:** Standard Letter  
**Course Type:** Studio  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** ARTS 205 or FOTO 205 or FOTO 210 or HART 209 or FOTO 310  
**Description:** Intermediate problems in photography culminating in the production of an original book. Students will pursue a project involving either film-based or digital photography, edit, layout, and then produce their own book. Students will participate in scheduled critiques. Priority will be given to students who have taken two or more semesters of photography at Rice.

FOTO 385 - PHOTOGRAPHY SEMINAR  
**Short Title:** PHOTOGRAPHY SEMINAR  
**Department:** Visual and Dramatic Arts  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Advanced problems in photography including, but not limited to, color and black and white film-based photography, view camera, and alternative processes. Students will be given advanced assignments tailored to the format and medium they wish to pursue will participate in scheduled critiques of the full class. Space in the class is limited. Registration does not guarantee a place in the course. Priority will be given to students who have taken two or more semesters of photography at Rice. The class roster will be formulated by the instructor on the first day of class. Repeatable for Credit.

FOTO 388 - PHOTOGRAPHY IN CHINA  
**Short Title:** PHOTOGRAPHY IN CHINA  
**Department:** Visual and Dramatic Arts  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 3,4  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Open to all students within the university who are interested in deepening their understanding of China and improving their photography skills. This course will study China through the history of photography, looking at ways in which China has been viewed by both Chinese and visiting photographers. Students will learn documentary skills and travel to China during spring break to gather materials for their own projects. Instructor Permission Required. Cross-list: ASIA 388.

FOTO 390 - VISUALIZING NATURE  
**Short Title:** VISUALIZING NATURE  
**Department:** Visual and Dramatic Arts  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** An experimental course combining the scientific disciplines of the earth sciences with the artistic disciplines of creative photography to study the natural landscape and related ecosystems. The course will combine classroom lectures and laboratory demonstrations in geoscience with classes in the use of digital and film-based cameras and illustrated lectures on recognized achievements in landscape photography. Extensive field trips will be scheduled. Students will travel frequently, at times in pairs, other times in larger groups and as a full class, accompanied by one or both professors. The budget for the course includes funding both for travel and for photography expenses. Instructor Permission Required. Cross-list: ESCI 380.
FOTO 395 - SPECIAL PROBLEMS IN PHOTOGRAPHY  
Short Title: SPEC PROB:PHOTOGRAPHY  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Independent Study  
Credit Hours: 1-6  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Study of problems in creative art. Topics may vary. Please consult with the department for additional information. May be used in awarding transfer credit. Prerequisite: permission of instructor. Instructor Permission Required. Repeatable for Credit.  

FOTO 410 - ADVANCED DIGITAL PHOTOGRAPHY  
Short Title: ADVANCED DIGITAL PHOTOGRAPHY  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: A continuation of FOTO 310, this course offers advanced photo-art students a chance to develop a personal body of artwork supported by digital image processing. Student-driven projects will influence the choice of technical topics covered in class. For example, some techniques covered may include digital animation, digital painting, 3D compositing, or master printing. Students will be expected to critique their work and that of other artists shown on Rice campus and in Houston. Students entering the course should be proficient in the use of Adobe Photoshop. A semester-long project is due at the end of the class.  

FOTO 454 - SPECIAL PROBLEMS - PHOTOGRAPHY  
Short Title: SPECIAL PROBLEMS-PHOTOGRAPHY  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Independent Study  
Credit Hours: 1-6  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Study of advanced problems in creative art. Topics may vary. Please consult with the department for additional information. May be used in awarding transfer credit. Instructor Permission Required. Repeatable for Credit.  

Physics (PHYS)  

PHYS 100 - EXPLORING PHYSICS  
Short Title: EXPLORING PHYSICS  
Department: Physics and Astronomy  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Introduction to concepts, methods, debates, and discoveries of physics, with a theme to be chosen from one of many fields of modern physics research. Designed for students interested in understanding science. This includes both science and non-science majors.  

PHYS 101 - MECHANICS (WITH LAB)  
Short Title: MECHANICS (WITH LAB)  
Department: Physics and Astronomy  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Distribution Group: Distribution Group III  
Credit Hours: 4  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Corequisite: PHYS 103  
Description: A calculus-based introduction to mechanics. Includes classes and lab exercises on kinematics, Newton's Laws, work and energy, conservation laws and rotational motion. Primarily for physical science and engineering students. May receive credit for only one of PHYS 101, 111, 125, AP-Physics-B (Phys 141 and 142) and AP Physics-C MECH. Students must register for PHYS 103.  

PHYS 102 - ELECTRICITY & MAGNETISM (WITH LAB)  
Short Title: ELECTRICITY&MAGNETISM W/LAB  
Department: Physics and Astronomy  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Distribution Group: Distribution Group III  
Credit Hours: 4  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Corequisite: PHYS 104  
Description: A calculus-based introduction to electricity and magnetism. Includes classes and lab exercises on electric and magnetic fields, Maxwell's equations in integral form, and AC and DC circuits. Primarily for physical science and engineering students. May receive credit for only one of PHYS 102, 112, 126, AP Physics-B (PHYS 141 and 142) and AP Physics-C &M. Students must also register for PHYS 104.  

PHYS 103 - MECHANICS DISCUSSION  
Short Title: MECHANICS DISCUSSION  
Department: Physics and Astronomy  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Seminar  
Credit Hours: 0  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Corequisite: PHYS 101  
Description: Small group discussion section to extend and reinforce concepts presented in PHYS 101. Students must also register for PHYS 101.  

PHYS 104 - ELECTRICITY AND MAGNETISM DISCUSSION  
Short Title: E & M DISCUSSION  
Department: Physics and Astronomy  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Seminar  
Credit Hours: 0  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Corequisite: PHYS 102  
Description: Small group discussion section to extend and reinforce concepts presented in PHYS 102. Students must also register for PHYS 102.
PHYS 111 - HONORS MECHANICS (WITH LAB)
Short Title: HONORS MECHANICS (WITH LAB)
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A more intensive treatment of topics covered in PHYS 101, intended for physical science and engineering students with strong high school backgrounds in physics and particularly calculus. May receive credit for only one of PHYS 101, 111, 125, AP Physics-B (PHYS 141 and 142) and AP Physics-C MECH.

PHYS 112 - HONORS ELECTRICITY & MAGNETISM (WITH LAB)
Short Title: HONORS E&M (WITH LAB)
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A more intensive treatment of topics covered in PHYS 102, intended for physical science and engineering students with strong high school backgrounds in physics and particularly calculus. May receive credit for only one of PHYS 102, 112, 126, AP Physics-B (PHYS 141 and 142), and AP Physics-C MECH.

PHYS 125 - GENERAL PHYSICS (WITH LAB)
Short Title: GENERAL PHYSICS (WITH LAB)
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A calculus-based survey of mechanics primarily intended for bioscience and premedical students. Includes classes and lab exercises on kinematics, Newton's Laws, work and energy, rotational motion, fluids, oscillations and waves. May receive credit for only one of PHYS 101, 111, 125, AP Physics-B (PHYS 141 and 142), and AP Physics-C, MECH.

PHYS 126 - GENERAL PHYSICS II (WITH LAB)
Short Title: GENERAL PHYSICS II (WITH LAB)
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): PHYS 125 or PHYS 101 or PHYS 111 or PHYS 141
Description: A calculus-based survey of E&M and optics primarily intended for bioscience and premedical students. Includes classes and lab exercises on wave and ray optics, electric field and potential, magnetic fields and induction, and DC circuits. May receive credit for only one of PHYS 102, 112, 126, AP Physics B (PHYS 141 and 142), and AP Physics-C, E&M.

PHYS 411 - INTRODUCTION TO NUCLEAR & PARTICLE PHYSICS
Short Title: INTRO NUCLEAR&PARTIC PHYSICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PHYS 311
Description: Survey of history and current state of nuclear and particle physics. The emphasis is on experimental results and how they led to our current understanding of the strong and electroweak interactions. Some recent advances are discussed in detail. Graduate/Undergraduate Equivalency: PHYS 542. Mutually Exclusive: Credit cannot be earned for PHYS 411 and PHYS 542.

PHYS 412 - SOLID STATE PHYSICS
Short Title: SOLID STATE PHYSICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (PHYS 311 and PHYS 425) or ELEC 361
Description: Introduction to topics in solid state physics, including crystal structure, lattice vibrations, electronic band structure and transport.

PHYS 416 - COMPUTATIONAL PHYSICS
Short Title: COMPUTATIONAL PHYSICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Use of computational techniques to solve selected physics problems. Examine benefits and pitfalls of doing physics by computation. Graduate/Undergraduate Equivalency: PHYS 517. Mutually Exclusive: Credit cannot be earned for PHYS 416 and PHYS 517.

PHYS 425 - STATISTICAL & THERMAL PHYSICS
Short Title: STATISTICAL & THERMAL PHYSICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PHYS 301 and PHYS 311
Description: Includes classical thermodynamics; classical & quantum statistical mechanics; Fermi, Bose, and classical gases; magnetic systems; and phase equilibria.

PHYS 461 - INDEPENDENT RESEARCH
Short Title: INDEPENDENT RESEARCH
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Mentored research under the supervision of a Physics and Astronomy faculty member. To register, students must provide a research plan approved by the faculty mentor. Instructor Permission Required. Repeatable for Credit.

PHYS 462 - INDEPENDENT RESEARCH
Short Title: INDEPENDENT RESEARCH
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Mentored research under the supervision of a Physics and Astronomy faculty member. To register, students must provide a research plan approved by the faculty mentor. Instructor Permission Required. Repeatable for Credit.

PHYS 465 - REU RESEARCH IN PHYSICS AND ASTRONOMY
Short Title: REU RESEARCH IN PHYS & ASTR
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

PHYS 480 - INTRODUCTION TO PLASMA PHYSICS
Short Title: INTRODUCTION TO PLASMA PHYSICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PHYS 302
Description: Fundamental processes in cosmic and laboratory plasmas. Basic plasma characteristics, charged particle motion, waves in plasmas, magnetohydrodynamics, kinetic theory. Graduate/Undergraduate Equivalency: PHYS 580. Mutually Exclusive: Credit cannot be earned for PHYS 480 and PHYS 580.
PHYS 491 - UNDERGRADUATE RESEARCH
Short Title: UNDERGRADUATE RESEARCH
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 2
Restrictions: Enrollment limited to students with a class of Junior or Senior. Enrollment is limited to students with a major in Astronomy, Astrophysics, Chemical Physics or Physics. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PHYS 301 and PHYS 302 and PHYS 311
Description: Research projects conducted under supervision of departmentally approved faculty. Open to juniors and seniors majoring in physics and astronomy. May be repeated for credit. PHYS 493/494 must be taken concurrently with PHYS 491/492 when used in partial fulfillment of B.S. degree requirements. Repeatable for Credit.

PHYS 492 - UNDERGRADUATE RESEARCH
Short Title: UNDERGRADUATE RESEARCH
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 2
Restrictions: Enrollment limited to students with a class of Junior or Senior. Enrollment is limited to students with a major in Astronomy, Astrophysics, Chemical Physics or Physics. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PHYS 491
Description: Research projects conducted under supervision of departmentally approved faculty culminating in a thesis. Open to juniors and seniors majoring in physics and astronomy. May be repeated for credit. PHYS 493/494 must be taken concurrently with PHYS 491/492 when used in partial fulfillment of B.S. degree requirements. Repeatable for Credit.

PHYS 493 - UNDERGRADUATE RESEARCH SEMINAR
Short Title: UNDERGRADUATE RESEARCH SEMINAR
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment limited to students with a class of Junior or Senior. Enrollment is limited to students with a major in Astronomy, Astrophysics, Chemical Physics or Physics. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PHYS 301 and PHYS 302 and PHYS 311
Description: Weekly seminar for juniors and seniors in which presentations on research topics and/or topics in the scientific literature will be given. Open to juniors and seniors majoring in physics and astronomy. Repeatable for Credit.

PHYS 494 - UNDERGRADUATE RESEARCH SEMINAR
Short Title: UNDERGRADUATE RESEARCH SEMINAR
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment limited to students with a class of Junior or Senior. Enrollment is limited to students with a major in Astronomy, Astrophysics, Chemical Physics or Physics. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PHYS 493
Description: Weekly seminar for juniors and seniors in which presentations on research topics and/or topics in the scientific literature will be given. Open to juniors and seniors majoring in physics and astronomy. Repeatable for Credit.

PHYS 501 - PHYSICS OF THE RADIO
Short Title: PHYSICS OF HAM RADIO
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Fundamentals of electromagnetic waves and propagation, the ionosphere and space weather. Basic electronics, antenna design and safety, magnetism. Provides information necessary to pass the "Technician" level of ham radio license. Non-calculus mathematics. Other topics include: use of GPS, geocaching. Mutually Exclusive: Credit cannot be earned for PHYS 501 and PHYS 401.

PHYS 510 - MAGNETOSPHERIC PHYSICS
Short Title: MAGNETOSPHERIC PHYSICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Plasma physics of the earth's magnetosphere, including interactions of the magnetosphere with the solar wind and the ionosphere. The emphasis is on large-scale phenomena, but small scale (kinetic) physics is discussed in cases where it affects the large-scale phenomena.

PHYS 515 - CLASSICAL DYNAMICS
Short Title: CLASSICAL DYNAMICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Lagrangian and Hamiltonian mechanics.
PHYS 516 - MATHEMATICAL METHODS
Short Title: MATHEMATICAL METHODS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Survey of analytical methods used by research physicists and astronomers. Includes complex variables, ordinary differential equations, infinite series, evaluation of integrals, integral transforms, normal-mode analysis, special functions, partial differential equations, eigenfunctions, Green's functions, and variational calculus.

PHYS 517 - COMPUTATIONAL PHYSICS
Short Title: COMPUTATIONAL PHYSICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Use of computational techniques to solve selected physics problems. Examine benefits and pitfalls of doing physics by computation. Requires completion of project using a low-level programming language. Graduate/Undergraduate Equivalency: PHYS 416. Mutually Exclusive: Credit cannot be earned for PHYS 517 and PHYS 416.

PHYS 519 - PLASMA KINETIC THEORY
Short Title: PLASMA KINETIC THEORY
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Plasma kinetic equations (Klimontovich, Liouville, BBGY, Balescu-Lenard, Fokker-Planck, Vlasov), Vlasov theory of waves and instabilities, connections to fluid plasma models.

PHYS 521 - QUANTUM MECHANICS I
Short Title: QUANTUM MECHANICS I
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate level course on non-relativistic quantum mechanics. Topics include early quantum theory, one-dimensional systems, matrix formulation, quantum dynamics, symmetries and conservation laws, bound states, scattering, spin, and identical particles, perturbation theory.

PHYS 522 - QUANTUM MECHANICS II
Short Title: QUANTUM MECHANICS II
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Continuation of PHYS 521.

PHYS 526 - STATISTICAL PHYSICS
Short Title: STATISTICAL PHYSICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Selected topics in statistical mechanics, including phase transitions and transport phenomena.

PHYS 527 - CLASSICAL ELECTRODYNAMICS
Short Title: CLASSICAL ELECTRODYNAMICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Maxwell’s equations, wave propagation, special relativity and covariant formulation, charged-particle dynamics, and radiation.

PHYS 532 - CLASSICAL ELECTRODYNAMICS
Short Title: CLASSICAL ELECTRODYNAMICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Physics of structures and devices at the nanometer scale. After a review of solid state physics, topics include nanostructured materials, nanoelectronics, and nanomagnetism. Emphasis on relevance of nanophysics to current and future technologies.

PHYS 533 - NANOSTRUCTURE AND NANOTECHNOLOGY I
Short Title: NANOSTRUCTURE & NANOTECHNOLOGY I
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Physics of structures and devices at the nanometer scale. Topics include nanomechanics, bionanotechnology, advanced sensors and photonics. Continuation of PHYS 533.

PHYS 534 - NANOSTRUCTURE AND NANOTECHNOLOGY II
Short Title: NANOSTRUCTURE & NANOTECHNOLOGY II
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Physics of structures and devices at the nanometer scale. Topics include nanomechanics, bionanotechnology, advanced sensors and photonics. Continuation of PHYS 533.

PHYS 535 - CRYSTALLOGRAPHY AND DIFFRACTION
Short Title: CRYSTALLOGRAPHY & DIFFRACTION
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of crystals by diffraction techniques, focusing on x-ray, with an overview of electron and neutron diffraction as well as complementary techniques. Provides mathematical foundations and nomenclature for diffraction and related phenomena. Includes basics of crystallographic analysis and surface/point/group symmetry, experiment design (courses, geometry, detectors), and data analysis and interpretation. Required for undergraduate MSNE major. Meets with MSNE 435 (additional work for the graduate version). Cross-list: MSNE 535.
PHYS 537 - METHODS OF EXPERIMENTAL PHYSICS I
Short Title: METHODS EXPERIMENTAL PHYSICS I
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A course to familiarize students with basic experimental techniques that are common in academic and industrial laboratories. Topics will include lab safety, mechanical design, LabVIEW(TM) programming, statistics, laboratory electronics, particle detection and vacuum technology. PHYS 537 and PHYS 538 may be taken independently of each other.

PHYS 538 - METHODS OF EXPERIMENTAL PHYSICS II
Short Title: METH EXPERIMENTAL PHYSICS II
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A course to familiarize students with basic experimental techniques that are common in academic and industrial laboratories. Topic will include computer interfacing and data acquisition, charged particle optics, light optics, thermal measurement and control, and cryogenics. PHYS 537 and PHYS 538 may be taken independently of each other.

PHYS 539 - CHARACTERIZATION AND FABRICATION AT THE NANOSCALE
Short Title: CHARACTER&FABRICATN NANOSCALE
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to study and creation of nanoscale structures, emphasizing relevant physical principles. Techniques covered include optical, X-ray, electron-based and scanned-probe characterization, as well as patterning, deposition and removal of material.

PHYS 541 - RADIATIVE PROCESSES
Short Title: RADIATIVE PROCESSES
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Radiation processes and their applications to astrophysical phenomena and space science. The course treats radiative transfer, radiation from moving charges, relativistic covariance and kinematics, bremsstrahlung, synchrotron radiation, Compton scattering, some plasma effects, and radiative transitions in atoms and molecules.

PHYS 542 - INTRODUCTION TO NUCLEAR AND PARTICLE PHYSICS
Short Title: INTRO NUCLEAR&PARTIC PHYSICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): PHYS 311
Description: Survey of history and current state of nuclear and particle physics with the emphasis on experimental results and how they led to our current understanding of the strong and electroweak interactions. Some recent advances are discussed in detail. Requires completion of a Monte Carlo simulation project. Graduate/Undergraduate Equivalency: PHYS 411. Mutually Exclusive: Credit cannot be earned for PHYS 542 and PHYS 411.

PHYS 543 - PHYSICS OF QUARKS AND LEPTONS
Short Title: PHYSICS QUARKS AND LEPTONS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A continuation of PHYS 542.

PHYS 551 - BIOLOGICAL PHYSICS
Short Title: BIOLOGICAL PHYSICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

PHYS 552 - TOPICS IN BIOLOGICAL PHYSICS
Short Title: TOPICS IN BIOLOGICAL PHYSICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics will be selected based on special or current research interests.

PHYS 556 - GENERAL RELATIVITY
Short Title: GENERAL RELATIVITY
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): PHYS 532
Description: Study of Einstein's theory of gravitation, including cosmological models.
PHYS 563 - INTRODUCTION TO SOLID STATE PHYSICS I
Short Title: INTRO TO SOLID STATE PHYSICS I
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Fundamental concepts of crystalline solids, including crystal structure, band theory of electrons, and lattice vibration theory. Cross-list: ELEC 563.

PHYS 564 - INTRODUCTION TO SOLID STATE PHYSICS II
Short Title: INTRO SOLID STATE PHYSICS II
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Continuation of PHYS 563, including scattering of waves by crystals, transport theory, and magnetic phenomena. Cross-list: ELEC 564.

PHYS 566 - SURFACE PHYSICS
Short Title: SURFACE PHYSICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An introduction to surface- and low-dimensional physics covering experimental surface physics and ultra-high vacuum technology, crystal structure, chemical analysis, epitaxy, nanoscale electronic and magnetic structures and devices, elementary excitations, optical properties and nanoscale sensitive magnetic and non-magnetic spectroscopies.

PHYS 567 - QUANTUM MATERIALS
Short Title: QUANTUM MATERIALS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (PHYS 425 or PHYS 526) and (PHYS 311 or PHYS 521)
Description: This course uses real data on archetypal materials to illustrate the thermodynamic and transport properties of solids, and principles of materials synthesis. The goal is building a phenomenological understanding of topics including the origin of magnetism; interactions and long range order; phase transitions (magnetism; superconductivity); quantum oscillations and Landau levels.

PHYS 568 - QUANTUM PHASE TRANSITIONS
Short Title: QUANTUM PHASE TRANSITIONS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introductory course for graduate students. Topics include the concepts of classical and quantum phase transitions, mean field theory, renormalization group and quantum phase transitions in magnetic, fermionic, and bosonic systems.

PHYS 569 - ULTRAFAST OPTICAL PHENOMENA
Short Title: ULTRAFAST OPTICAL PHENOMENA
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers the generation, propagation, and measurement of short laser pulses, of duration less than one picosecond. Concepts include mode locking, the effects of dispersion, optical pulse amplification, and time-domain non-linear optical phenomena. Intended as an introduction to ultrafast phenomena for graduate students or advanced undergraduates; a basic understanding of electromagnetic waves and of quantum mechanics is assumed. Cross-list: ELEC 569.
Course URL: www.ece.rice.edu/~daniel/569/569files.html

PHYS 571 - MODERN ATOMIC PHYSICS
Short Title: MODERN ATOMIC PHYSICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is an introductory course at the graduate level. Topics to be discussed include: atomic structure, principles of lasers, fundamental interactions of atoms with electro-magnetic radiation, including coherent effects, laser spectroscopy, quantum optics, and laser cooling and trapping of atoms, and Bose-Einstein condensation.

PHYS 572 - FUNDAMENTALS OF QUANTUM OPTICS
Short Title: FUNDAMENTALS OF QUANTUM OPTICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Discussion of quantization and statistical properties of light fields; interaction between atoms and light; non-classical states; basic laser theory; quantum effects of nonlinear optics; introduction to atom optics.
PHYS 580 - INTRODUCTION TO PLASMA PHYSICS  
Short Title: INTRODUCTION TO PLASMA PHYSICS  
Department: Physics and Astronomy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Fundamental processes in cosmic and laboratory plasmas. Basic plasma characteristics, charged particle motion, waves in plasmas, magnetohydrodynamics, kinetic theory. Includes a substantial computational project related to plasma physics. Graduate/Undergraduate Equivalency: PHYS 480. Mutually Exclusive: Credit cannot be earned for PHYS 580 and PHYS 480.

PHYS 600 - ADVANCED TOPICS IN PHYSICS  
Short Title: ADVANCED TOPICS IN PHYSICS  
Department: Physics and Astronomy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Lecture/seminars which treat topics of departmental interest. Repeatable for Credit.

PHYS 601 - FRONTIERS IN CONDENSED MATTER PHYSICS  
Short Title: FRONTIERS IN CONDENSED MATTER  
Department: Physics and Astronomy  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Seminar  
Credit Hour: 1  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This seminar will serve as an introduction to current research topics in modern condensed matter physics. Lectures will be given by experts in condensed matter physics at Rice, Columbia University, and other international locations. Repeatable for Credit.

PHYS 605 - COMPUTATIONAL ELECTRODYNAMICS AND NANOPHOTONICS  
Short Title: ELECTROMAGNETIC FIELDS AND PROPAGATION  
Department: Physics and Astronomy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course covers computational and numerical methods for calculating electromagnetic fields and propagation in complex geometries on the nano and microscale. Methods include the finite difference time domain method, boundary element methods, Greens functions methods, finite element methods, the discrete dipole approximation and relaxation methods. Cross-list: ELEC 605. Repeatable for Credit.

PHYS 610 - BIOLOGICAL AND MOLECULAR SIMULATION  
Short Title: METHODS OF MOLECULAR SIMULATION  
Department: Physics and Astronomy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): CHEM 520 or PHYS 526  
Description: Modern simulation techniques for classical atomistic systems. Review of statistical mechanical systems. Monte Carlo and molecular dynamics simulation techniques. Extensions of the basic methods to various ensembles. Applications to simulations of large molecules such as proteins. Advanced techniques for simulation of complex systems, including constraint satisfaction, cluster moves, biased sampling, and random energy models. Cross-list: BIOE 610.

PHYS 622 - QUANTUM FIELD THEORY  
Short Title: QUANTUM FIELD THEORY  
Department: Physics and Astronomy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): PHYS 526  
Description: An introduction to relativistic quantum field theory. Topics include: quantization of scalar, spinor, and vector fields; Feynman diagrams; gauge theories, including QED and QCD; renormalization; and functional-integral methods.

PHYS 643 - CELL MECHANICS, MECHANOTRANSDUCTION AND THE CELL MICROENVIRONMENT  
Short Title: MECHANOTRANSDUCTION  
Department: Physics and Astronomy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): PHYS 610  
Description: Mechanotransduction is a fundamental process essential for living systems and plays a fundamental role in cell signaling, cancer metastasis and stem cell differentiation. Additionally, fundamental biological processes such as endocytosis cell fusion and cell migration are driven by a coordinated interplay of molecular interactions that drive membrane deformation. This course will survey the current understanding of mechanotransduction and the mechanical properties of cells and their microenvironment, including membrane and cytoskeletal mechanics. Experimental approaches for measuring and manipulating the material properties of cells and their environment; including optical, electrical and magnetic techniques will be covered. A variety of application will be covered, including manipulation in engineering of mechanotransduction pathways to drive cell migration and stem cell differentiation. Instructor Permission Required. Cross-list: BIOE 643, BIOE 643.
PHYS 663 - CONDENSED MATTER THEORY: APPLICATIONS  
Short Title: CONDENSED MATTER THRY:APLICATN  
Department: Physics and Astronomy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Applications of techniques developed in PHYS 664.

PHYS 664 - CONDENSED MATTER THEORY: MANY-BODY FORMALISM  
Short Title: COND MATTR THRY:MANY BODY FORM  
Department: Physics and Astronomy  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Formal structure of many-body theory as used in condensed matter physics.

PHYS 700 - TEACHING PRACTICUM  
Short Title: TEACHING PRACTICUM  
Department: Physics and Astronomy  
Grade Mode: Standard Letter  
Course Type: Internship/Practicum  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Supervised teaching for graduate students. Repeatable for Credit.

PHYS 710 - GRADUATE SEMINAR IN PHYSICS AND ASTRONOMY  
Short Title: GRAD SEMINAR IN PHYS & ASTR  
Department: Physics and Astronomy  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Seminar  
Credit Hour: 1  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Participation in department colloquia and additional sessions on topics of interest to entering graduate students. Required of all Physics and Astronomy graduate students during their first Fall semester at Rice.

PHYS 777 - VISITING RESEARCH TRAINEE  
Short Title: VISITING RESEARCH TRAINEE  
Department: Physics and Astronomy  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Research  
Credit Hours: 0  
Course Level: Graduate  

PHYS 800 - GRADUATE RESEARCH  
Short Title: GRADUATE RESEARCH  
Department: Physics and Astronomy  
Grade Mode: Standard Letter  
Course Type: Research  
Credit Hours: 1-15  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Thesis research under the supervision of department faculty. Repeatable for Credit.

Political Science (POLI)  

POLI 110 - AP/OTH CREDIT IN AMERICAN GOVERNMENT  
Short Title: AP/OTH CREDIT AMER GOVERNMENT  
Department: Political Science  
Grade Mode: Standard Letter  
Course Type: Transfer  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation.

POLI 112 - AP/OTH CREDIT IN COMPARATIVE GOVERNMENT  
Short Title: AP/OTH CREDIT COMPAR GOVERNMENT  
Department: Political Science  
Grade Mode: Standard Letter  
Course Type: Transfer  
Credit Hours: 3  
Course Level: Undergraduate Lower-Level  
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation.

POLI 209 - INTRODUCTION TO CONSTITUTIONALISM AND MODERN POLITICAL THOUGHT  
Short Title: INTRO TO CONST & POLI THOUGHT  
Department: Political Science  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group II  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Study of constitutionalism and authoritarianism from Machiavelli to Marx. Includes an introduction to contemporary ideologies. With POLI 210 meets state professional requirements for teachers.

POLI 210 - AMERICAN GOVERNMENT AND POLITICS  
Short Title: AMERICAN GOVT AND POLITICS  
Department: Political Science  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group II  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Major topics in American politics: public opinion, group politics, political parties, elections, congressional-presidential-bureaucratic politics, and judicial politics. Together with POLI 209 meets state professional requirements for teachers.
POLI 211 - INTRODUCTION TO INTERNATIONAL RELATIONS
Short Title: INTRO INTERNATIONAL RELATIONS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An introduction to the study of international relations. The course examines topics including the causes of war, political dimensions of the international economy, the role of international organizations, and cooperation to address contemporary global challenges.

POLI 212 - INTRODUCTION TO COMPARATIVE POLITICS
Short Title: INTRO TO COMPARATIVE POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An examination of political institutions and behavior in selected democratic and authoritarian countries. Examples will include wealthy as well as developing countries. One recurring theme will be the conditions under which democracy emerges and survives.

POLI 238 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Topics and credit hours vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.

POLI 250 - SEX, MONEY, AND POWER AROUND THE WORLD
Short Title: SEX, MONEY, AND POWER
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An interdisciplinary course exploring lives and well-being in the context of gendered international and domestic politics and economic processes. Emphasis on the implications of power relations at levels from the household to the global for women and men around the world (with particular attention to Asia). Cross-list: ASIA 251, SWGS 250.

POLI 260 - ADVOCATING FOR IDEAS TO CHANGE THE WORLD
Short Title: ADVOCATING FOR CHANGE
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Advocating for change is an experiential learning course that teaches students how to engage in issue advocacy as a method of social change. Students work in teams with faculty mentors to develop and implement an advocacy plan for a particular cause or policy of interest.

POLI 301 - STATE POLITICS
Short Title: STATE POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course comparatively examines state governments and political institutions in the U.S. states. We will also focus on how state political institutions and organizations influence the creation, adoption, and implementation of public policy.

POLI 305 - DIRECTED READING I
Short Title: DIRECTED READING I
Department: Political Science
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent reading under the supervision of a member of the department. Open to junior majors in the honors program and to others in special cases with the permission of the instructor. Instructor Permission Required. Repeatable for Credit.

POLI 306 - DIRECTED READING II
Short Title: DIRECTED READING II
Department: Political Science
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: See POLI 305. Instructor Permission Required. Repeatable for Credit.

POLI 307 - POLITICAL SCIENCE INTERNSHIP I
Short Title: POLITICAL SCIENCE INTERNSHIP I
Department: Political Science
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is the in-class component of the political science internship program. Students will read both a common set of materials and a set that is oriented to their forthcoming internship. A final paper is required. Instructor Permission Required.
POLI 308 - POLITICAL SCIENCE INTERNSHIP II
Short Title: POLI SCIENCE INTERNSHIP II
Department: Political Science
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 307
Description: This course is the work component of the political science internship program. Students will be required to submit weekly progress reports and a final portfolio. Instructor Permission Required.

POLI 310 - THE BIOLOGY OF POLITICS
Short Title: THE BIOLOGY OF POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is an interdisciplinary survey of the role that human biology plays in our political behavior. The biology covered ranges from genes to neural structures to neuro-chemistry, while the political behavior covered ranges from levels of participation to political beliefs to left/right ideology.

POLI 315 - ELECTIONS AND VOTING BEHAVIOR
Short Title: ELECTIONS AND VOTING BEHAVIOR
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Exploration of voting behavior and elections. Includes consideration of both individual level behavior and aggregate level patterns of election results.

POLI 317 - THE CONGRESS
Short Title: THE CONGRESS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examines the role of Congress in the American political system. Attention is given to the historical development of Congress, the current status of the Congress, and the functions of Congress in the American political system.

POLI 318 - THE PRESIDENCY
Short Title: THE PRESIDENCY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Analysis of presidential powers and behavior in the context of legal, electoral, personal, and other forces that shape and limit the actions of the President.

POLI 320 - THE LEGAL FRAMEWORK OF RELIGIOUS TOLERANCE
Short Title: LEGAL FRMWK RELI TOLERANCE
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The American Constitution embodies a complex experiment in religious tolerance, including the promise of "free exercise of religion" and the prohibition of laws "respecting an establishment of religion." In this class we will primarily seek a critical understanding of our tolerance-rich legal invocations of religious freedom and address fundamental issues such as how can we distinguish "religious" actions and commitments from other morally important beliefs and activities. Cross-list: RELI 320.

POLI 321 - AMERICAN CONSTITUTIONAL LAW
Short Title: AMER CONSTITUTIONAL LAW
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Course Level: Undergraduate Upper-Level
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Interpretation of the Constitution by the Supreme Court. (Juniors and Seniors preferred).

POLI 322 - POLITICS OF INFLUENCE IN THE UNITED STATES
Short Title: POLITICS OF INFLUENCE IN US
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The aim of this course is to acquaint students with the major influences upon who gets what, when and how from American government. Major issues (e.g., health care, immigration, agriculture) covered will vary by semester. One component of the course will be devoted to assessing the impact of money on elections and the policy process.

POLI 324 - FROM DECOLONIZATION TO GLOBALIZATION
Short Title: FROM DECOLONI TO GLOBALIZATION
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Taught in English. Novels, and films, from North and West Africa, and the immigrant population in France, from 1960 to 2010. Emphasis on the tensions between narratives of political emancipation, modernity, secularism, and religious fundamentalism and mysticism. Extra reading for graduate students in theories of colonialism, postcolonialism, globalization. Cross-list: FREN 324, RELI 476. Recommended Prerequisite(s): Any 200 level course or above in English or French, or HUMA 101 or HUMA 102, or a FWIS course.
POLI 325 - AFRICAN AMERICAN POLITICS
Short Title: AFRICAN AMERICAN POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examination of race in U.S. politics. Includes a discussion of the construction of black identity, historical and contemporary black political leaders and thinkers, and the influence of race in political attitudes and behaviors.

POLI 328 - LATINO POLITICS IN THE UNITED STATES
Short Title: LATINO POLITICS IN THE US
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Latinos and public policies affecting Latinos have become a major part of the discourse taking place in American politics as a result of current and projected demographic trends. After reviewing the demographic, historic, and social factors distinctive to the Latino population in the United States, this course examines how Latinos have interacted with political institutions to shape politics and public policy.

POLI 329 - HEALTH POLICY
Short Title: HEALTH POLICY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Applies an interdisciplinary approach to the study of health policy. Objectives are to provide students with a broad introduction to the healthcare system, identify stresses on the current system, and explore possible public policy decisions that may transform the healthcare system.

POLI 330 - MINORITY POLITICS
Short Title: MINORITY POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examination of the political and social position of minority groups (African Americans, Asian Americans, Native Americans, Latinos, and women) in the U.S. This course explores the political power and behavior of these groups. The key concepts include racism, discrimination, resources, political power, culture, leadership, class, and inequality.

POLI 331 - ENVIRONMENTAL POLITICS AND POLICY
Short Title: ENVIRONMENT POLITICS & POLICY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course considers the major issues in the increasingly important public policy area of the environment. It emphasizes the American experience, but also considers certain crucial international aspects of these issues. Cross-list: ENST 331.

POLI 332 - URBAN POLITICS
Short Title: URBAN POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Exploration of issues of political behavior and public policy in urban and metropolitan areas. Includes urban decline, regional governance, revitalization, and issues of ethnic and racial conflict.

POLI 333 - COMPARATIVE LEGISLATURES
Short Title: COMPARATIVE LEGISLATURES
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examination of similarities and differences of legislatures in different countries. Includes the causes and consequences of these differences.

POLI 334 - AMERICAN POLITICAL PARTIES
Short Title: AMERICAN POLITICAL PARTIES
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examination of the American political party system both historically and contemporarily, with important emphasis on the nomination, campaign, and election functions of political parties. Party organization in government will also be explored.

POLI 335 - POLITICAL ENVIRONMENT OF BUSINESS
Short Title: POLI ENVIRONMENT OF BUSINESS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of the foundation of government involvement in public policy and the institutional process guiding executive, legislative, and bureaucratic officials. Includes theories of collective action and their application in the political world.
POLI 336 - POLITICS OF REGULATION
Short Title: POLITICS OF REGULATION
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will focus principally on government regulation of business and the political factors that shape its content.

POLI 337 - PUBLIC POLICY
Short Title: PUBLIC POLICY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Exploration of the role that public bureaucracy plays in national policy making. Includes an examination of sources of agency power, which are linked to different policy outcomes.

POLI 338 - POLICY ANALYSIS
Short Title: POLICY ANALYSIS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Familiarizes students with the analytical tools necessary for evaluating and analyzing public policies. Cross-list: SOSC 301. Mutually Exclusive: Credit cannot be earned for POLI 338 and POST 338.

POLI 339 - SOUTHERN POLITICS
Short Title: SOUTHERN POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examination of selected political patterns and trends in the modern South. Includes political developments within the region and the impact of the South on American politics generally.

POLI 340 - ANCIENT AND MEDIEVAL POLITICAL THEORY
Short Title: ANCIENT & MEDIEVAL POLI THEORY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of the sources of ancient and medieval political thought, with emphasis on the historical analysis of political philosophy and mythology and the influence of Plato and Aristotle.

POLI 342 - POLITICS OF THE JUDICIARY
Short Title: POLITICS OF THE JUDICIARY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Explores the role of courts and judges in American politics. Will illustrate major characteristics of judicial institutions in the U.S. and provide understanding of forces influencing judicial decisions. Will cover federal and state organization of trial and appellate courts, judicial selection methods, and the politics of judicial decision-making.

POLI 343 - MEDIA AND POLITICS
Short Title: MEDIA AND POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examines the role of media in politics. Attention is given to the media as a quasi-political institution. It elaborates the role the media plays in elections and the policy process.

POLI 345 - URBAN LAB MIDDLE EAST
Short Title: URBAN LAB MIDDLE EAST
Department: Political Science
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 355 (may be taken concurrently) or POLI 362 (may be taken concurrently) or POLI 464 (may be taken concurrently) or POLI 562 (may be taken concurrently) or POLI 361 (may be taken concurrently)
Description: The course examines the dynamics of urban politics and policy in the Middle East. We will focus on social, political, and economic issues, as well as history, culture, architecture and the arts. Weekly classes will include case studies, guest lectures, and work on research projects. The lab also features a field research trip to one or more cities (Dubai, Abu Dhabi, Muscat, Doha, etc.) during Spring Break. Prerequisites may be taken the same semester with POLI 345/ASIA 345. Department Permission Required. Cross-list: ASIA 345.
POLI 347 - URBAN LAB SHANGHAI  
Short Title: URBAN LAB SHANGHAI  
Department: Political Science  
Grade Mode: Standard Letter  
Course Type: Laboratory  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): POLI 362 (may be taken concurrently) or POLI 562 (may be taken concurrently) or POLI 464  
Description: This course examines the dynamics of urban politics and policy in an emerging global city - Shanghai. In addition to social, political and economic issues, we will focus on history, culture, language, architecture and the arts. Weekly class sessions will include lectures, case studies, guest lectures, and group work on research projects. The lab also features an 8-day field research trip to Shanghai. Prerequisite(s) POLI 362 or POLI 562 may be taken concurrently. Instructor Permission Required. Cross-list: ASIA 347.

POLI 348 - URBAN LAB BUENOS AIRES  
Short Title: URBAN LAB BUENOS AIRES  
Department: Political Science  
Grade Mode: Standard Letter  
Course Type: Laboratory  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): POLI 362 (may be taken concurrently) or POLI 562 (may be taken concurrently) or POLI 464  
Description: This course examines the dynamics of urban politics and policy in an emerging global city - Buenos Aires. In addition to social, political and economic issues, we will also focus on history, culture, language, architecture and the arts. Weekly class sessions will include lectures, case studies, guest lectures, and group work on research projects. The lab also features an 8-day field research trip to Buenos Aires. Prerequisite(s) POLI 362 or POLI 562 may be taken concurrently. Instructor Permission Required.

POLI 349 - URBAN LAB ISTANBUL  
Short Title: URBAN LAB ISTANBUL  
Department: Political Science  
Grade Mode: Standard Letter  
Course Type: Laboratory  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): POLI 355 (may be taken concurrently) or POLI 362 (may be taken concurrently) or POLI 464 (may be taken concurrently) or POLI 562 (may be taken concurrently)  
Description: This course examines the dynamics of urban politics and policy in an emerging global city - Istanbul. In addition to social, political and economic issues, we will also focus on history, culture, language, architecture and the arts. Weekly class sessions will include lectures, case studies, guest lecturers, and group work on research projects. The lab also features an 8-day field research trip to Istanbul. Prerequisites may be taken the same semester as POLI 349/ASIA 349. Instructor Permission Required. Cross-list: ASIA 349.

POLI 350 - URBAN LAB HOUSTON  
Short Title: URBAN LAB HOUSTON  
Department: Political Science  
Grade Mode: Standard Letter  
Course Type: Laboratory  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): POLI 332 (may be taken concurrently) or POLI 337 may serve as a Co-Requisite for this course.  
Description: This course examines the dynamics of urban politics and policy in an emerging global city - Houston. The lab is project-based and allows students to engage in hands-on, policy-focused research under the guidance of the faculty instructor. Weekly sessions will include lectures, case studies, guest lecturers, site visits, and work on research projects. POLI 350 requires either POLI 332 as a pre-requisite, which can be taken concurrently. POLI 337 may serve as a Co-Requisite for this course. Department Permission Required.

POLI 352 - THE POLITICS AND CULTURE OF MEXICO  
Short Title: POLITICS & CULTURE OF MEXICO  
Department: Political Science  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Mexico entered the 21st Century as one of the most dynamic societies in Latin America. But Mexico’s fast-paced and chaotic transformation cannot be understood without a look at its past and its diverse cultural makeup. This course explores the weight of Mexico’s history and culture as it seeks to forge ahead economically, socially, and politically.

POLI 353 - EAST ASIAN DEMOCRACIES  
Short Title: EAST ASIAN DEMOCRACIES  
Department: Political Science  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course examines the functioning of the political system in the three principal East Asian democracies: Japan, South Korea, and Taiwan. Particular focus is paid to each country's democratic institutions, electoral politics, and political party system. Cross-list: ASIA 353.

POLI 354 - LATIN AMERICAN POLITICS  
Short Title: LATIN AMERICAN POLITICS  
Department: Political Science  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group II  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Study of the political process in contemporary Latin America, with emphasis on selected major countries.
POLI 355 - GOVERNMENT AND POLITICS OF THE MIDDLE EAST
Short Title: GOVERNMENT&POLITICS MID EAST
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Provides an introduction to politics in the Middle East. Brief historical overview is combined with detailed description of political systems in the area. The region is then used to examine empirically, critique, and revise theories of comparative politics. Emphasis on whether the region would be considered unique or exceptional.

POLI 356 - REPRESENTATION AND POLICY MAKING
Short Title: REPRESENTATION & POLICY MAKING
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The course seeks to understand the relationship between political institutions and the representation of social interests in the policy-making process across a variety of national contexts. The course focuses on the politics behind policy choices and how policy-makers are held accountable in democratic contexts. Case studies will draw upon examples in the United States, Latin America, Europe and Asia.

POLI 357 - DEMOCRACY AND DEMOCRATIZATION
Short Title: DEMOCRACY AND DEMOCRATIZATION
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will examine the theory of democracy and the functioning of democratic institutions around the world. Themes covered in the course will include: What is democracy? How does democracy arise? Can institutions influence the survival and consolidation of democracy?

POLI 358 - COMPARATIVE POLITICAL BEHAVIOR
Short Title: COMPARATIVE POLITICAL BEHAVIOR
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores the nature and sources of cross-national differences and similarities in mass political behavior. Topics include contextual and individual level factors that influence public opinion, voting behavior, and political participation. Graduate/Undergraduate Equivalency: POLI 567. Mutually Exclusive: Credit cannot be earned for POLI 358 and POLI 567.

POLI 359 - DEMOCRACY & DEMOCRATIZATION
Short Title: DEMOCRACY & DEMOCRATIZATION
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course offers a broad overview of urban politics and policies in cities around the world. We will examine how national, regional and local forces shape the processes and outcomes governance within and across cities and metropolitan areas, paying particular attention to critical problems and policies that affect urban centers: growth, immigration, class conflict, public order, service management, education, housing, transportation, environmental protection, sustainability, land-use planning and spatial competition.

POLI 360 - WESTERN EUROPEAN DEMOCRACIES
Short Title: WESTERN EUROPEAN DEMOCRACIES
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A survey of government and politics in Western European democracies, with primary emphasis on Great Britain, France, and Germany.

POLI 362 - COMPARATIVE URBAN POLITICS AND POLICY
Short Title: COMPARATIVE URBAN POL & PLCY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An examination of British politics and government, with emphasis on both the contemporary and historical setting. This course also emphasizes a comparison of the British political system with the American political system.

POLI 365 - BRITISH POLITICS
Short Title: BRITISH POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course offers a broad overview of urban politics and policies in cities around the world. We will examine how national, regional and local forces shape the processes and outcomes governance within and across cities and metropolitan areas, paying particular attention to critical problems and policies that affect urban centers: growth, immigration, class conflict, public order, service management, education, housing, transportation, environmental protection, sustainability, land-use planning and spatial competition.

POLI 367 - TRANSITIONS TO DEMOCRACY
Short Title: TRANSITIONS TO DEMOCRACY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines the nature and sources of mass political behavior. Topics include contextual and individual level factors that influence public opinion, voting behavior, and political participation. Graduate/Undergraduate Equivalency: POLI 567. Mutually Exclusive: Credit cannot be earned for POLI 358 and POLI 567.
POLI 371 - CIVIL WARS
Short Title: CIVIL WARS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: This course seeks to examine the origins and dynamics of civil war, including civil war onset, duration, outcome, termination, why people join rebellions, the effectiveness of various forms of civil war management and resolution, and more. It aims to impart to students a solid understanding of theories and empirical evidence regarding the causes, conduct, and termination of civil wars in general.

POLI 372 - AMERICAN FOREIGN POLICY
Short Title: AMERICAN FOREIGN POLICY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examination of internal and external aspects of foreign policy leadership, presidential initiative, congressional control, press, public opinion, and crisis management. Not a Managerial Studies elective.

POLI 373 - WAR AND POLITICS
Short Title: WAR AND POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Exploration of the theoretical basis of, and empirical evidence for, a number of explanations for interstate war. Includes contemporary theories dealing with dispute escalation, arms races, deterrence, crisis management, and low-intensity conflict.

POLI 374 - STRATEGIC INTERACTIONS IN INTERNATIONAL RELATIONS
Short Title: STRATEGIC INTERACT INTERN'L REL
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to the uses of game theory in the study of international relations.

POLI 375 - INTERNATIONAL ORGANIZATION
Short Title: INTERNATIONAL ORGANIZATION
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of the development and role of international organizations in world politics. Topics include the history and evolution of international organizations, the effects of international law on behavior, and the extent to which international cooperation has been effective at resolving global problems.

POLI 378 - POLITICS OF AMERICAN NATIONAL SECURITY
Short Title: POLITICS OF AMER NATL SECURITY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The primary focus on this course is the use of military force in pursuit of the national security of the US. A wide variety of topics are covered including the people in the military, weapons of mass destruction, and various types of conflict that have involved (or might involve) the United States.

POLI 379 - PROBLEMS IN INTERNATIONAL RELATIONS
Short Title: PROB INTERNATIONAL RELATIONS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Explores the relationship between politics and economics. The objective is to understand the historical development of trade and monetary relationships between the countries of the world. Instructor Permission Required. Repeatable for Credit.

POLI 380 - POLITICAL BEHAVIOR
Short Title: POLITICAL BEHAVIOR
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examines basic concepts in political behavior including political socialization, models of voting behavior, public opinion, and political participation.
**POLI 395 - INTRODUCTION TO STATISTICS**  
*Short Title: INTRO TO STATISTICS*  
*Department: Political Science*  
*Grade Mode: Standard Letter*  
*Course Type: Lecture*  
*Credit Hours: 3*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Description: Introduction to research design and quantitative methods used in contemporary political science research. Students will apply the tools of social science inquiry in a series of assignments designed to examine political attitudes and behavior, gaining experience with quantitative analysis in the R software package.*

**POLI 401 - STATE POLITICS RESEARCH SEMINAR**  
*Short Title: STATE POLITICS RESEARCH SEM*  
*Department: Political Science*  
*Grade Mode: Standard Letter*  
*Course Type: Seminar*  
*Credit Hours: 3*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Prerequisite(s): POLI 395*  
*Description: A research seminar in state politics and policy with an emphasis on state institutions.*

**POLI 405 - SENIOR THESIS**  
*Short Title: SENIOR THESIS*  
*Department: Political Science*  
*Grade Mode: Satisfactory/Unsatisfactory*  
*Course Type: Independent Study*  
*Credit Hours: 3*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Prerequisite(s): POLI 405*  
*Description: Open to senior honors majors with the permission of the department. Students must complete both POLI 405 and 406 to obtain credit. Instructor Permission Required.*

**POLI 406 - SENIOR THESIS**  
*Short Title: SENIOR THESIS*  
*Department: Political Science*  
*Grade Mode: Standard Letter*  
*Course Type: Independent Study*  
*Credit Hours: 3*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Prerequisite(s): POLI 395*  
*Description: See POLI 405. Instructor Permission Required.*

**POLI 416 - SURVEY RESEARCH IN AMERICAN POLITICS**  
*Short Title: SURVEY RSRC AMERICAN POLITICS*  
*Department: Political Science*  
*Grade Mode: Standard Letter*  
*Course Type: Seminar*  
*Credit Hours: 3*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Prerequisite(s): POLI 395*  
*Description: The major objectives of this course are to introduce students to the skills and resources needed to design and conduct a survey. The principle substantive focus of the course will be public opinion surveys on topics of politics, public policy and individual political behavior.*

**POLI 417 - CONGRESS AND THE CONSTITUTION**  
*Short Title: CONGRESS & THE CONSTITUTION*  
*Department: Political Science*  
*Grade Mode: Standard Letter*  
*Course Type: Seminar*  
*Credit Hours: 3*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Description: This course will examine the constitutional relationship between the Congress, the Executive branch, and the federal courts, evaluating constitutional challenges to current Congressional initiatives in health care, immigration reform, campaign financing, and authorizations for war. We will also discuss the role of congressional oversight and the influence of money and the media in determining the laws of the land.*

**POLI 418 - SEMINAR ON THE PRESIDENCY**  
*Short Title: SEMINAR ON THE PRESIDENCY*  
*Department: Political Science*  
*Grade Mode: Standard Letter*  
*Course Type: Seminar*  
*Credit Hours: 3*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Prerequisite(s): POLI 395*  
*Description: Provides students with a broad introduction to the presidency. Topics include a review of the executive's constitutional powers and their changes over time; processes and politics of presidential nomination and election; struggles between the president and other political elites and dynamics of White House decision-making.*

**POLI 419 - POLITICAL PARTIES AND INTEREST GROUPS IN AMERICAN POLITICS**  
*Short Title: PARTIES AND INTEREST GROUPS*  
*Department: Political Science*  
*Grade Mode: Standard Letter*  
*Course Type: Seminar*  
*Credit Hours: 3*  
*Restrictions: Graduate level students may not enroll.*  
*Course Level: Undergraduate Upper-Level*  
*Prerequisite(s): POLI 395*  
*Description: The goal of this seminar is to provide the student with knowledge of the formation, organization, activity, and impact of political parties and interest groups in the United States. Special attention will be given to changes in the operation of these two types of organizations over the last 20 years.*
POLI 420 - ELECTION SYSTEMS, TECHNIQUES, AND ADMINISTRATION
Short Title: ELECTION SYSTEMS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This multidisciplinary course will consider how elections are conducted to enhance participation, to accurately measure the will of the electorate, and to be sufficiently rigorous to convince all parties that the results are legitimate. This course will consider the design and evaluation of election technologies, ranging from voter registration through the polling booth and vote tabulation. This course will consider three questions: how do individual voters interact with the voting technology, how are voting technologies engineered to be accurate and secure, and how do the social aspects of voting fulfill democratic goals for elections? A central requirement for this course will be group research projects, many operating in our community, built around the November election. Cross-list: COMP 435, PSYC 420.

POLI 421 - CONTEMPORARY ISSUES IN AMERICAN POLITICS
Short Title: CONTMPRY ISSUES AMER POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: This seminar will focus on major issues (e.g., immigration, voting rights, budget deficits, healthcare) in American society. After examining the history of national and state policies, seminar participants will discuss social science contributions to the ongoing policy discussions. Specific topics covered will vary by semester.

POLI 429 - BIOLOGICAL FOUNDATIONS OF POLITICS
Short Title: BIOLOGICAL FOUNDATIONS OF POLI
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: This course is an introduction to the biological underpinnings of political behavior. The influence of genes and evolution are covered, as well as the relevance of neural structures, brain organization, and neuro-chemistry for both universal political traits and individual variation in political orientations. NOTE: This seminar is in the theory and methods field. It is not an American politics seminar.

POLI 430 - SEMINAR IN TEXAS POLITICS
Short Title: SEMINAR IN TEXAS POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Research seminar in the history of Texas politics. Instructor Permission Required.

POLI 431 - ELECTORAL CAMPAIGNS
Short Title: ELECTORAL CAMPAIGNS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Examines the role of campaigns in determining the outcome of political races.

POLI 432 - URBAN POLITICS
Short Title: URBAN POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Research seminar on political behavior and public policy in urban and metropolitan areas.

POLI 433 - COMPARATIVE LEGISLATURES
Short Title: COMPARATIVE LEGISLATURES
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course aims to understand current challenges related to the US Congress – such as party polarization and gridlock – using the experience of the policy-making processes of other nations. In addition to recent discourse on failures of representation in Congress, the course covers politics in Europe, Latin America and Asia.

POLI 434 - PUBLIC POLICY AND METROPOLITAN AREA GOVERNANCE
Short Title: PUBLIC POLICY&METRO AREA GOVT
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: This course will examine the market-like relationship among metropolitan area governments. It will address questions of urban/suburban relationships as well as policy topics such as education and local service provision.
POLI 435 - SEMINAR ON MONEY AND POLITICS
Short Title: SEMINAR ON MONEY AND POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: This course explores the possible ways money may affect American politics and public policy at the national, state, and local levels of government. In addition to discussing the strategies used in allocating money in campaigns, we will examine the impact of money on elections and on the legislative process.

POLI 436 - POLITICS OF REGULATION
Short Title: POLITICS OF REGULATION
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Study of the government’s regulation of business and the political factors that shape its content.

POLI 437 - EDUCATION POLICY
Short Title: EDUCATION POLICY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Examine educational politics and policy from micro and macro perspectives. We will focus on school governance, structure, and finance at the federal, state, and local levels and examine the design, implementation and effects of various school reform initiatives in U.S., and to a more limited extent in other countries.

POLI 438 - RACE AND PUBLIC POLICY
Short Title: RACE AND PUBLIC POLICY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Study of minority group politics and how race structures contemporary U.S. politics. Includes myths and realities of minority groups, symbolic politics and race, pluralism as a model of U.S. democracy, the intersection of class, race, and gender, civil rights movements, group consciousness, public opinion regarding minorities, and responses of national institutions to race issues.

POLI 439 - RESEARCH SEMINAR ON SOUTHERN POLITICS
Short Title: RSRCH SEM ON SOUTHERN POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Examination of political behavior and political institutions in the southern states, with emphasis on contemporary Texas politics.

POLI 440 - RESEARCH SEMINAR ON PUBLIC POLICY
Short Title: RESEARCH SEM ON PUBLIC POLICY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395 and (POLI 335 or POLI 336 or POLI 337 or POLI 338)
Description: This course provides students an opportunity to conduct original research on wide range of public policy questions. Students will be provided specific research questions to investigate over the course of the semester for which they will design and complete an original program of research.

POLI 441 - GOVERNING THE ENVIRONMENTAL COMMONS
Short Title: GOVERNING ENVIRONMNTL COMMONS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Common Property Resources (CPRs), such as fisheries, aquifers, and the Internet, appear in many guises and pose a fundamental problem for governing. Exploration of theoretical underpinnings for CPRs, their growing literature, and the political and economic institutions mediating CPR dilemmas. Included is an original research project in conjunction with the instructor. Cross-list: ENST 441.

POLI 442 - SUBNATIONAL POLITICS
Short Title: SUBNATIONAL POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Examines the role of subnational political institutions in the development and implementation of policy. It compares the myriad of subnational institutions.
POLI 444 - PRACTICUM IN LEGISLATIVE RESEARCH
Short Title: LEGISLATIVE RESEARCH
Department: Political Science
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: This course will teach students how to design and conduct original empirical research on US, state or world legislatures. Students will conduct original quantitative research and produce a research paper.

POLI 445 - SEMINAR IN JUDICIAL PROCESS AND BEHAVIOR
Short Title: SEM JUDICIAL PROCESS & BEHAVR
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Thinking about law school? This seminar explores social scientific literature in judicial process and behavior and examines selected controversies in the study of judicial processes. Learning is based on active participation in seminars covering assigned readings and a research project on a related topic selected by the student.

POLI 450 - ELECTIONS IN THE AMERICAS
Short Title: ELECTIONS IN THE AMERICAS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: This seminar will analyze authoritarian regimes from a comparative perspective. Latin American countries have elected surprisingly large numbers of women to presidencies, cabinets, and legislatures in recent years. This seminar explores how this happened in a region long known for its culture of cachismo and weak democracy and what the consequences of gender diversity are for politics.

POLI 454 - RESEARCH PRACTICUM IN COMPARATIVE POLITICS
Short Title: RESEARCH PRACTICUM-COMP POLI
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: This course will teach students how to design and conduct empirical research in political science with a focus on the major topics in comparative politics, including constitutional design, electoral systems, democratization, economic development, and political parties. Students will conduct their own original research and produce a research paper on a political science topic.

POLI 457 - CONDITIONS OF DEMOCRACY
Short Title: CONDITIONS OF DEMOCRACY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: This course starts with definitions and theories/ preconditions of democracy and then looks at specific cases of democratic transition throughout the world, democratic consolidation, reaction, and the prospects for the future.

POLI 458 - GENDER AND POLITICS IN THE MIDDLE EAST
Short Title: GENDER & POLITICS MIDDLE EAST
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Seminar will provide understanding of intertwined relationship between gender and politics in contemporary Middle East and North Africa. Will focus on the region’s historical, soci-political, and cultural contexts that have contributed to the current discourse on gender in the Arab World. Will explore the role of Arab women in the political processes across the Middle East. Concrete examples given.

POLI 459 - SEX, GENDER, AND POLITICAL REPRESENTATION IN LATIN AMERICA
Short Title: GENDER & REP IN LATIN AMERICA
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: This course will teach students how to design and conduct empirical research in political science with a focus on the major topics in comparative politics, including constitutional design, electoral systems, democratization, economic development, and political parties. Students will conduct their own original research and produce a research paper on a political science topic.
POLI 461 - POLITICS, RISK, AND ENERGY
Short Title: POLITICS, RISK, AND ENERGY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: This course develops various linkages between the concepts of risk identification and mitigation, the political realm and the energy sector. Building from mainstream literature, The Black Swan and Outliers, and distribution theory, the concept of risk is defined and applied to Political and Energy Markets using case studies and data analysis.

POLI 462 - COMPARATIVE PUBLIC POLICY
Short Title: COMPARATIVE PUBLIC POLICY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Seminar examining the process and substance of public policy across nations, with emphasis on social policy in industrialized democracies. Instructor Permission Required.

POLI 463 - COMPARATIVE POLITICAL ECONOMY
Short Title: COMPARATIVE POLITICAL ECONOMY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Seminar exploring the interrelationship of economics and politics in advanced industrial societies. Includes economic policy making, political behavior and economic conditions, and the role of institutions in channeling conflicts between democracy and capitalism.

POLI 464 - RESEARCH SEMINAR ON COMPARATIVE URBAN POLITICS AND POLICY
Short Title: SEM COMP URBAN POL & PLCY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course offers a broad overview of urban politics and policies in cities around the world. We will examine how national, regional and local forces shape the processes and outcomes governance within and across cities and metropolitan areas, paying particular attention to critical problems and policies that affect urban centers: growth, immigration, class conflict, public order, service management, education, housing transportation, environmental protection, sustainability, land-use planning and spatial competition. Instructor Permission Required. Graduate/Undergraduate Equivalency: POLI 562. Mutually Exclusive: Credit cannot be earned for POLI 464 and POLI 562. Repeatable for Credit.

POLI 466 - POLITICAL PARTIES AND VOTING BEHAVIOR IN WESTERN DEMOCRACIES
Short Title: PARTIES & VOTING BEHAVIOR
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Seminar on the determinants of party systems, the structure and functions of parties, and theories of voting behavior in Western democracies.

POLI 469 - CIVIL WAR AND TERRORISM
Short Title: CIVIL WAR AND TERRORISM
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Seminar on causes, consequences and dynamics of civil wars. Will analyze why they break out, how sustained, how ended, thinking conceptually, theoretically, empirically about conflict dynamics and processes. Explores transnational dynamics, terrorism, roles of groups, organizations, insurgency-counterinsurgency dynamics and how these affect the evolution of civil conflicts. Graduate/Undergraduate Equivalency. POLI 571. Mutually Exclusive: Credit cannot be earned for POLI 469 and POLI 571.

POLI 470 - INTERNATIONAL RELATIONS
Short Title: INTERNATIONAL RELATIONS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Topic varies from year to year. Instructor Permission Required. Repeatable for Credit.

POLI 471 - POLITICS OF THE UNITED NATIONS
Short Title: POLITICS OF UNITED NATIONS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Provide students with a broad introduction to the politics of the United Nations. Topics include roll-call voting, policy choices of the security council, and issues of membership and representation.
POLI 472 - AMERICAN FOREIGN POLICY
Short Title: AMERICAN FOREIGN POLICY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: The content of American foreign policy, its sources, and the process of policy formulation.

POLI 473 - THE CRAFT OF INTELLIGENCE ANALYSIS, PREDICTION AND CONNECTING THE DOTS
Short Title: THE CRAFT OF INTELLIGENCE
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is designed to introduce students to the problems faced by intelligence analysts. Students will study examples of intelligence analysis and hear from current and former analysts. Placed in multidisciplinary teams, students will monitor streams of actual events and provide assessments of these events. Instructor Permission Required.

POLI 474 - INTERNATIONAL ORGANIZATIONS: THEORIES AND PRACTICE
Short Title: INTERNATIONAL ORGANIZATIONS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: This course has two goals: First to introduce students to the current theoretical debates in the field of international organizations and to assess the value and limitations of these theories; second, to understand the working of important world organizations, including (but not limited to) the UN, the WTO, and IMF. The course assumes some basic knowledge of IR theory and previous debates about the origin and impact of international organizations on world politics. It is designed for students at an advanced stage in the study of political science and International Relations.

POLI 475 - INTERNATIONAL COOPERATION
Short Title: INTERNATIONAL COOPERATION
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Research seminar on theories and evidence of international cooperation. The course will explore conditions conducive to establishing and maintaining cooperation in international politics, the design of international agreements and institutions, and the influence of international agreements and institutions on international relations.

POLI 476 - INTERNATIONAL POLITICAL ECONOMY
Short Title: INTERNAT'L POLITICAL ECONOMY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: This course is designed to survey the theoretical and empirical analysis of the politics of international economic relations. In particular, the course is designed to examine the interrelationships of economics and politics by applying economic theory to the study of politics.

POLI 477 - US - CHINA: CONFLICT AND COOPERATION
Short Title: US-CHINA: CONFLICT & COOPRTN
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: This is a research seminar for advanced undergraduate students to read and discuss international relations theories in the context of US-China relations. Students are expected to read cutting edge IR research, follow current events, think critically of the applicability of the existing IR theories on the issues surrounding the bilateral relationship.

POLI 478 - SEMINAR IN QUANTITATIVE INTERNATIONAL RELATIONS
Short Title: SEM-QUANT INTERN'L RELATIONS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Seminar exploring the quantitative study of international relations, with a focus on the study of international conflict. Students will be required to write a quantitative research paper. Repeatable for Credit.

POLI 479 - SEMINAR IN POLITICAL BEHAVIOR
Short Title: SEM IN POLITICAL BEHAVIOR
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Undergraduate research seminar covering the field of political behavior with special emphasis on the application of social and cognitive psychology to the study of mass political behavior. Topics include political socialization, models of voting behavior, and political participation.
POLI 481 - UNDERSTANDING WAR AND PEACE
Short Title: UNDERSTANDING WAR AND PEACE
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395 or POLI 374
Description: Introduces students to current research on the causes and consequences of international conflict. Students are expected to identify a novel research question, develop an appropriate research design to address the question, and care out the research. The emphasis in on developing rigorous theory and using systematic evidence.

POLI 482 - THE CAUSES OF WAR AND THE WAR IN IRAQ
Short Title: CAUSES OF WAR / IRAQ
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Why do states fight wars? Moreover, what can existing theories of war tell us about the causes of modern conflicts such as the 2003 invasion of Iraq? We will begin this course by examining several prominent theories of the causes of war. We will then turn to a number of specific questions related to the recent war in Iraq.

POLI 483 - U.S.: MEXICO BORDER ISSUES IN COMPARATIVE PERSPECTIVE
Short Title: US: MEXICO BORDER ISSUES
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: This course is designed to explore the problems of bordering, debordering and rebordering today. Specifically, the course deals with the problem of borders in an increasingly integrated world, where borders represent the symbol of sovereignty at the edges of the nation-state in open contradiction to the growing desire for human, economic and technological mobility and the need to deal with globalized crises in fragmented spaces and policy processes. To understand these tensions the class explores the issues border flows, border security, immigration, human rights, and borders functions and processes.

POLI 489 - CHINESE POLITICS IN COMPARATIVE PERSPECTIVE
Short Title: CHINESE POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores the range of theories and empirical research methodologies from comparative political science, political-economy and Asian studies commonly applied to understanding Chinese politics: political participation, political organizations, collective action and popular protest, political culture and political institutional change. This course will be a seminar requiring weekly presentations extensive readings at the graduate level in social science, and an original research paper. There is no prerequisite for this course but participants are assumed to already possess extensive knowledge of Chinese history, culture and society. Cross-list: ASIA 489.

POLI 490 - POLITICS AND THE ARTS
Short Title: POLITICS AND THE ARTS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of the development of modern political theory and its relevance to contemporary problems. NOTE: This seminar is in the theory and methods field. It is not an American politics seminar.

POLI 500 - SOCIAL SCIENTIFIC THINKING I
Short Title: SOCIAL SCIENTIFIC THINKING I
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course introduces students to the practice of social science research including empirical description, theoretical development, and hypothesis generation and testing. It includes projects on the design and implementation of surveys, controlled experiments, archival data collection, fieldwork, case studies, and qualitative analysis.

POLI 501 - SOCIAL SCIENTIFIC THINKING II
Short Title: SOCIAL SCIENTIFIC THINKING II
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): POLI 500
Description: This course is a continuation of POLI 500. Students will plan and execute an original research project and write a paper reporting the results.
POLI 502 - INTRODUCTION TO STATISTICS
Short Title: INTRODUCTION TO STATISTICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course aims at providing students with a working knowledge of statistics in political science. It involves the study of descriptive and inferential statistics, as well as hands-on experience with computer statistical packages.

POLI 503 - TOPICS IN METHODS AND DATA ANALYSIS
Short Title: TOPICS METHODS & DATA ANALYSIS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Applications of least squares and general linear mode. Cross-list: STAT 503.

POLI 504 - INTRODUCTION TO MAXIMUM LIKELIHOOD ESTIMATION
Short Title: INTRO MAX LIKELIHOOD EST
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of applications of maximum likelihood estimation.

POLI 505 - ADVANCED MAXIMUM LIKELIHOOD ESTIMATION
Short Title: ADV MAXIMUM LIKELIHOOD EST
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): POLI 504
Description: Special topics in political methodology. Instructor Permission Required. Repeatable for Credit.

POLI 506 - ADVANCED TOPICS IN POLITICAL METHODOLOGY I
Short Title: ADV TOPICS POLI METHODS I
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): POLI 505
Description: Advanced topics in statistical methods, with an emphasis on Bayesian statistics and R-programming.

POLI 507 - ADVANCED TOPICS IN POLITICAL METHODOLOGY II
Short Title: ADV TOPICS POL METHODS II
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): POLI 505
Description: Advanced topics in political methodology, with an emphasis on non-parametric statistical models, causal inference, and machine learning techniques.

POLI 511 - MEASUREMENT AND RESEARCH DESIGN
Short Title: MEASUREMENT & RESEARCH DESIGN
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Core graduate course analyzing basic approaches to the study of comparative government.

POLI 527 - INSTITUTIONAL ANALYSIS
Short Title: INSTITUTIONAL ANALYSIS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Core graduate course analyzing basic approaches to the study of comparative government.
POLI 530 - APPROACHES TO AMERICAN GOVERNMENT
Short Title: APPROACHES TO AMERICAN GOVT
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Core graduate course. Includes an analysis of basic approaches to the study of American politics.

POLI 531 - STATE POLITICS
Short Title: STATE POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate research seminar in the subfields of state, local and national policymaking.

POLI 532 - COMPARATIVE LEGISLATURES
Short Title: COMPARATIVE LEGISLATURES
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Provides the student with the basic concepts and theories necessary to understand the functions and organization of legislatures/parliaments/assemblies in democratic societies. This course takes a broad-based perspective, including research that focuses on national and U. S. state legislatures.

POLI 533 - ADVANCED TOPICS IN POLITICAL BEHAVIOR
Short Title: ADV TOPIC POLITICAL BEHAVIOR
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate seminar in the subfield of political behavior. Content varies from year to year. Instructor Permission Required. Repeatable for Credit.

POLI 534 - INTEREST GROUPS AND POLITICAL PARTIES
Short Title: INTEREST GROUP&POLITICAL PARTY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate research seminar in the subfields of interest groups and political behavior.

POLI 535 - RACE, ETHNICITY, AND AMERICAN POLITICS
Short Title: RACE,ETHNICITY&AMER POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Core graduate course. Includes an analysis of basic approaches to the study of American politics.

POLI 536 - WOMEN AND MINORITY REPRESENTATION
Short Title: WOMEN & MINORITY REPRESENTATION
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate seminar that examines the role of race and ethnicity in American politics. This course provides an examination of the behavioral and electoral implications of racial and ethnic diversity.

POLI 537 - PUBLIC POLICY AND BUREAUCRACY
Short Title: PUBLIC POLICY AND BUREAUCRACY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of the administration and implementation of public policies across federal, state, and substate governments.

POLI 538 - POLITICAL ECONOMY OF POLICY CHANGE
Short Title: POL ECONOMY OF POLICY CHANGE
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate course. Includes an analysis of basic approaches to the study of American politics. This course takes a broad-based perspective, including research that focuses on national and U. S. state legislatures.

POLI 539 - POLITICAL PSYCHOLOGY
Short Title: POLITICAL PSYCHOLOGY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Broad survey of the theoretical and methodological approaches used in political psychology. Topics include political information processing, knowledge, attitudes, political trust, emotions, and personality.
POLI 540 - INTERNATIONAL RELATIONS
Short Title: INTERNATIONAL RELATIONS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Core graduate course. Includes an analysis of basic approaches to the study of international relations.

POLI 541 - INTERNATIONAL COOPERATION
Short Title: INTERNATIONAL COOPERATION
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate seminar on theories and evidence of international cooperation. Discussion of the difficulties in establishing cooperation under anarchy and the conditions under which international cooperation is most likely to occur.

POLI 542 - SUBNATIONAL POLITICS
Short Title: SUBNATIONAL POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Examines the role of subnational political institutions in the development and implementation of policy. It compares the myriad of subnational institutions.

POLI 544 - PRACTICUM IN LEGISLATIVE RESEARCH
Short Title: LEGISLATIVE RESEARCH
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will teach graduate students how to design and conduct original empirical research on U.S., state, or world legislatures. Students will conduct original quantitative research and produce a publishable research paper. Instructor Permission Required.

POLI 560 - RESEARCH SEMINAR ON COMPARATIVE URBAN POLITICS AND POLICY
Short Title: SEM COMP URBAN POL & PLCY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course offers a broad overview of urban politics and policies in cities around the world. We will examine how national, regional, and local forces shape the processes and outcomes of governance within and across cities and metropolitan areas, paying particular attention to critical problems and politics that affect urban centers: growth, immigration, class conflict, public order, service management, education, housing transportation, environmental protection, sustainability, land-use planning and spatial competition. Graduate/Undergraduate Equivalency: POLI 464. Mutually Exclusive: Credit cannot be earned for POLI 562 and POLI 464.

POLI 563 - COALITION POLITICS AND PARLIAMENTARY GOVERNMENT
Short Title: COALITION POLI & PRLMTY GOVT
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course examines the extensive scholarship on coalition politics in parliamentary democracies. Topics include coalition formation, the allocation of government ministries, coalition termination, coalition policymaking, and the interaction between coalition governance, party competition, and mass voting behavior.

POLI 564 - POLITICAL ECONOMY OF DEVELOPMENT
Short Title: POLI ECONOMY OF DEVELOPMENT
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A central priority developing nations face today concerns establishing economic growth; how best to achieve strong economic performance has both an economic and political dimension. This course seeks a rudimentary understanding of economic growth, concentrating on its political determinants.

POLI 565 - POLITICAL PROTEST
Short Title: POLITICAL PROTEST
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course looks at various theories of collective action and social movements. It will examine theoretical debates about why individuals and groups occasionally redress their grievances through protest and more often endure hardships passively. It will evaluate the relative merit of these theories in explaining cases of protest and passivity worldwide.
citizen preferences ultimately get translated into policy outcomes and
industrial democracies. The aim of the course is to understand how
executive and legislative institutions, policymaking and advance
empirical linkages between citizen preferences, electoral systems,
democracy and representation, and then examine the theoretical and

POLI 569 - REPRESENTATION IN CONTEMPORARY DEMOCRACIES
Short Title: REP. CONTEMPORARY DEMOCRACIES
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: In this course, we explore the conceptual meanings of
democracy and representation, and then examine the theoretical and
empirical linkages between citizen preferences, electoral systems,
executive and legislative institutions, policymaking and advance
industrial democracies. The aim of the course is to understand how
citizen preferences ultimately get translated into policy outcomes and
how political institutions shape this relationship.

POLI 570 - SEMINAR IN INTERNATIONAL CONFLICT
Short Title: SEM IN INTERNATIONAL CONFLICT
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar in international conflict. Emphasis on formal
theories and quantitative analysis of the causes of war.

POLI 571 - CIVIL WAR AND TERRORISM
Short Title: CIVIL WAR AND TERRORISM
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar on causes, consequences and dynamics of civil
wars. Will analyze why they break out, how sustained, how ended,
thinking conceptually, theoretically, empirically about conflict dynamics
and processes. Explores transnational dynamics, terrorism, roles of
groups, organizations, insurgency-counterinsurgency dynamics and how
these affect the evolution of civil conflicts. More work will be required
of the Graduate level. Graduate/Undergraduate Equivalency: POLI 469.
Mutually Exclusive: Credit cannot be earned for POLI 571 and POLI 469.

POLI 572 - FOREIGN POLICY DECISION MAKING
Short Title: FOREIGN POLICY DECISION MAKING
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of foreign policy, its sources, and the process of policy
formulation. Instructor Permission Required.

POLI 574 - COLLECTIVE SOCIAL CHOICE
Short Title: COLLECTIVE SOCIAL CHOICE
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to a growing body of literature on how and
why individual preferences dominate those of others. Includes the
relationship between decision-making structures and the nature of
decisional outcomes.
POLI 576 - INTERNATIONAL POLITICAL ECONOMY
Short Title: INTERNATL POLITICAL ECONOMY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Description: Seminar surveying some of the primary theoretical perspectives and analytical approaches for studying international political economy. Includes a survey of contemporary literature, with special emphasis on theory and research, as well as instructions in how to critically evaluate research and set up a research project.

POLI 577 - DOMESTIC POLITICS AND INTERNATIONAL RELATIONS
Short Title: DOMESTIC POLITICS & INT'L RELA
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Description: Graduate research seminar on the influence of domestic politics on international relations. The course will explore when, why, and how the political structures and conditions within countries affect foreign policy and international relations.

POLI 580 - SEMINAR IN AMERICAN POLITICS
Short Title: SEM IN AMERICAN POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Description: Topics vary from year to year. Instructor Permission Required. Repeatable for Credit.

POLI 581 - SEMINAR IN COMPARATIVE POLITICS
Short Title: SEMINAR IN COMPARATIVE POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Description: Topics vary from year to year. Instructor Permission Required. Repeatable for Credit.

POLI 591 - DIRECTED READING-METHODOLOGY
Short Title: DIRECTED READING-METHODOLOGY
Department: Political Science
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Description: Repeatable for Credit.
POLI 598 - DIRECTED READING-COMPARATIVE POLITICS
Short Title: DIR READ-COMPARATIVE POLITICS
Department: Political Science
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

POLI 599 - TEACHING POLITICAL SCIENCE
Short Title: TEACHING POLITICAL SCIENCE
Department: Political Science
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course prepares graduate students to design and teach classes at the college level. Repeatable for Credit.

POLI 600 - MA RESEARCH AND THESIS
Short Title: MA RESEARCH AND THESIS
Department: Political Science
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Research and thesis for resident students. Repeatable for Credit.

POLI 800 - PH.D. RESEARCH AND THESIS
Short Title: PH.D. RESEARCH AND THESIS
Department: Political Science
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

Politics, Law, Social Thought (PLST)

PLST 301 - MODERN POLITICAL THOUGHT: MACHIAVELLI TO RAWLS
Short Title: MODERN POLITICAL THOUGHT
Department: Politics Law Social Thought
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to political theory and political philosophy from the Renaissance to the present: Machiavelli, Hobbes, Pufendorf, Montesquieu, Kant, Hegel, Constant, Mill Marx, Nietzsche, Weber, Habermas, and Rawls. Topics include human rights, political power, citizenship, democracy, the modern state. Required core course for minor in Politics, Law, and Social Thought.

PLST 302 - CONTEMPORARY POLITICAL THEORY
Short Title: CONTEMPORARY POLITICAL THEORY
Department: Politics Law Social Thought
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to contemporary political theory. Topics include freedom, democracy, empire, citizenship, human rights, radical democracy, protest and civil disobedience, multiculturalism, cosmopolitanism, postcolonial political thought, transnational and global governance.

PLST 303 - HOW DEMOCRACY FAILS
Short Title: HOW DEMOCRACY FAILS
Department: Politics Law Social Thought
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course examines the conditions under which democracies and republics can fail. Draws on political theory, constitutional debates, and historical examples. Topics include: constitutional crises, states of emergency, popular sovereignty, populism, nationalism, revolution, political violence, civil disobedience, post-democracy, illiberal democracy, and neoliberalism.

PLST 316 - DEMOCRACY AND POLITICAL THEORY IN ANCIENT GREECE
Short Title: DEMOCRACY & POLITICAL THEORY
Department: Politics Law Social Thought
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The Greeks created political society and studied political society in order to understand and improve it. One particular form of political society, democracy, reached its pinnacle in Athens. We shall attempt to understand how ancient Greeks thought about politics from the rudimentary beginnings in Homer to the complex, incisive arguments of Aristotle. Cross-list: CLAS 316.

Portuguese (PORT)

PORT 106 - ACCELERATED FIRST YEAR PORTUGUESE FOR SPANISH SPEAKERS
Short Title: ACCEL FIRST YEAR PORTUGUESE
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Alternate first year Portuguese for students who have good command of Spanish. This is an intensive course covering the equivalents of PORT 141 and 142. Students will be prepared for PORT 263 upon completion of the course. Placement Test is required. Mutually Exclusive: Credit cannot be earned for PORT 106 and PORT 141 / PORT 142.
Course URL: clicportuguese.blogs.rice.edu
PORT 141 - FIRST YEAR PORTUGUESE I
Short Title: FIRST YEAR PORTUGUESE I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Development of interactional competence in Portuguese (sociolinguistic and sociocultural knowledge) to communicate and interact with speakers of Portuguese. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. No prior knowledge of this language is necessary. Placement Test is required. Mutually Exclusive: Credit cannot be earned for PORT 141 and PORT 106.
Course URL: clicportuguese.blogs.rice.edu

PORT 142 - FIRST YEAR PORTUGUESE II
Short Title: FIRST YEAR PORTUGUESE II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): PORT 141
Description: Continuation of PORT 141. Development of interactional competence in Portuguese (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Portuguese. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for PORT 142 and PORT 106/PORT 262.
Course URL: clicportuguese.blogs.rice.edu

PORT 206 - ACCELERATED SECOND YEAR PORTUGUESE FOR SPANISH SPEAKERS
Short Title: ACCEL SECOND YEAR PORTUGUESE
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): PORT 106
Description: Alternate second year Portuguese for students who have a very good command of Spanish. This intensive course covers the equivalent of PORT 263 and PORT 264. It will focus on the development of interactional competence in Portuguese to communicate satisfactorily with Portuguese speakers.
Course URL: clicportuguese.blogs.rice.edu

PORT 263 - SECOND YEAR PORTUGUESE I
Short Title: SECOND YEAR PORTUGUESE I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): PORT 142
Description: Continuation of PORT 142. Development of interactional competence in Portuguese (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Portuguese. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for PORT 263 and PORT 201.
Course URL: clicportuguese.blogs.rice.edu

PORT 264 - SECOND YEAR PORTUGUESE II
Short Title: SECOND YEAR PORTUGUESE II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): PORT 263
Description: Continuation of PORT 263. Development of interactional competence in Portuguese (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Portuguese. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for PORT 264 and PORT 202.
Course URL: clicportuguese.blogs.rice.edu

PORT 301 - THIRD YEAR PORTUGUESE I
Short Title: THIRD YEAR PORTUGUESE I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PORT 264
Description: Continuation of PORT 264. Emphasis on developing reading and writing ability as more authentic materials and socio-cultural topics are introduced.
Course URL: clicportuguese.blogs.rice.edu
PORT 302 - BRASIL: CULTURA E SOCIEDADE
Short Title: BRASIL: CULTURE AND SOCIETY
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PORT 202 or PORT 364
Description: The purpose of this course is to develop speaking, reading, and writing skills via the analysis of Brazilian literary and cultural texts. Through a multidisciplinary approach, students will be introduced to cultural analysis using a broad range of sources such as literature, film, and other audio-visual materials.

Psychology (PSYC)

PSYC 101 - INTRODUCTION TO PSYCHOLOGY
Short Title: INTRODUCTION TO PSYCHOLOGY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of topics, problems, and approaches in contemporary psychology. Includes the biological basis of behavior, sensation, perception, attention, learning and memory, thinking, language, abnormal behavior and therapies, personality, and individual differences. Required for psychology majors.

PSYC 102 - READINGS IN INTRODUCTORY PSYCHOLOGY
Short Title: READINGS IN INTRO PSYCHOLOGY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group II
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Corequisite: PSYC 101
Description: This is an accompaniment to PSYC 101 and provides the opportunity for students to delve deeper into various topics through reading and discussion of research. This course will expand on the topics discussed in PSYC 101 and help students to develop the skills necessary for reading, evaluating, and discussing psychological research.

PSYC 202 - INTRODUCTION TO SOCIAL PSYCHOLOGY
Short Title: INTRO TO SOCIAL PSYCHOLOGY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): PSYC 101
Description: Overview of topics in social psychology. Includes conformity and social influence, attitude formation and change, aggression, altruism, relationships, liking and loving, and prejudice and stereotyping, as well as applications to other disciplines (e.g. law, marketing, the workplace, etc.). Required for psychology majors.

PSYC 203 - INTRODUCTION TO COGNITIVE PSYCHOLOGY
Short Title: INTRO TO COGNITIVE PSYCHOLOGY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An introduction to topics in cognitive psychology, including perception, attention, language, memory, and decision making. Required for psychology majors.

PSYC 231 - INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY
Short Title: INDUS & ORGANIZATIONAL PSYC
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): PSYC 101
Description: An overview of the principles, techniques, and theories of psychology applied in the industrial setting.

PSYC 260 - UNDERGRADUATE PROFESSIONAL ISSUES IN PSYCHOLOGY
Short Title: UNDERGRAD PROF ISSUES IN PSYC
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This seminar will provide students interested in psychology with an opportunity to explore psychology as a major and a career. Through guest lecturers, group discussions, and class projects, students will learn about diverse fields and potential career paths in psychology. Instructor Permission Required.
PSYC 308 - MEMORY
Short Title: MEMORY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 203
Description: Critical review of traditional and contemporary approaches to the study of remembering and forgetting.

PSYC 309 - PSYCHOLOGY OF LANGUAGE
Short Title: PSYCHOLOGY OF LANGUAGE
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 203
Description: Study of human and other animal communication. Includes the structure of human language, word meaning and semantic memory, psychological studies of syntax, bilingualism, language and thought, and language errors and disorders. Cross-list: LING 309.

PSYC 315 - INTRODUCTION TO SEMANTICS
Short Title: INTRODUCTION TO SEMANTICS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 203
Description: Introduction to basic approaches to the study of meaning in linguistics and related fields. Includes the cognitive representation of meaning, lexical categorization, conceptual structures, metaphor/metonymy, meaning change, pragmatic inference, and the relation of language and mind. Cross-list: LING 315. Recommended Prerequisite(s): LING 200 or ANTH 200.

PSYC 321 - DEVELOPMENTAL PSYCHOLOGY
Short Title: DEVELOPMENTAL PSYCHOLOGY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 202 or PSYC 203
Description: Study of behavioral changes with age in both human and nonhuman species. Recommended Prerequisite(s): PSYC 202 and PSYC 203.

PSYC 325 - LANGUAGE ACQUISITION
Short Title: LANGUAGE ACQUISITION
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 101
Description: The aim of this course is to explore language development closely through a variety of theories and research findings. Students will become familiar with different theories concerning language development, and develop an understanding of relevant issues, theoretical positions and relevant methodologies in language development using critical thinking skills. Cross-list: LING 325.

PSYC 329 - PSYCHOLOGICAL TESTING
Short Title: PSYCHOLOGICAL TESTING
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 339
Description: Offers a detailed examination of psychological test development and analysis. Topics include an exploration of different forms of psychological tests (e.g. intelligence, attitudes, personality, clinical), reliability and validity of tests, and practical issues in testing such as test bias (e.g. gender differences).

PSYC 330 - PERSONALITY THEORY AND RESEARCH
Short Title: PERSONALITY THEORY & RESEARCH
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 340
Description: Examination of those aspects of personality emphasized by major theorists past and present.

PSYC 331 - PSYCHOLOGY OF GENDER
Short Title: PSYCHOLOGY OF GENDER
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 340
Description: Overview of research and theory on gender in psychology. Cross-list: SWGS 331.

PSYC 351 - PSYCHOLOGY OF PERCEPTION
Short Title: PERCEPTION
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 101 and PSYC 203
Description: An introductory survey of sensation and perception, both human and animal. Covers all sensory systems but focuses on vision and audition. Includes the philosophy of perception; measurement and methods; neuroanatomy of visual and auditory systems; computational models of vision, motion, depth, and color; illusions and perceptual organization; and perceptual development. Graduate/Undergraduate Equivalency: PSYC 521.

PSYC 353 - PSYCHOLOGY OF EMOTION AND MOTIVATION
Short Title: PSYC OF EMOTION & MOTIVATION
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 101 and PSYC 202
Description: Study of motives and emotions as causes of human behavior; includes biological motives, aggression, emotions and emotional expression, and individual differences in motivation. Recommended Prerequisite(s): PSYC 203.

PSYC 354 - INTRODUCTION TO SOCIAL AND AFFECTIVE NEUROSCIENCE
Short Title: INTRO TO SOC/AFFECTIVE NEURO
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 202
Description: Overview of social and affective neuroscience research, including examination of the neurobiological mechanisms supporting social cognition; inter-personal processes; emotion and motivation; and emotion regulation. These topics will be examined in both healthy and affectively-disordered populations, with links made to the fields of health psychology and clinical neuroscience.

PSYC 362 - COGNITIVE NEUROSCIENCE: EXPLORING THE LIVING BRAIN
Short Title: COGNITIVE NEUROSCIENCE
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 203
Description: Survey of theory and research on how mental processes are carried out by the human brain, with an emphasis on relating measures of brain activity to cognitive functioning, methods surveyed included electrophysiological recording techniques, functional imaging techniques and methods that involve lessening or disrupting neural activity. Cross-list: NEUR 362.

PSYC 364 - COGNITIVE NEUROSCIENCE LAB
Short Title: COGNITIVE NEUROSCIENCE LAB
Department: Psychology
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 362 (may be taken concurrently) or NEUR 362 (may be taken concurrently)
Description: The objective is to equip the students of PSYC/NEUR 362 the tools on how to apply cognitive neuroscience techniques to health or clinical topics and to investigate sensorimotor and cognitive measures in a human model. The prereq may be taken the same semester as this class. Instructor Permission Required. Cross-list: NEUR 364. Graduate/Undergraduate Equivalency: PSYC 564. Mutually Exclusive: Credit cannot be earned for PSYC 364 and PSYC 564.

PSYC 370 - INTRODUCTION TO HUMAN FACTORS AND ERGONOMICS
Short Title: INTRO TO HUMAN FACTORS & ERGO
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 101 and PSYC 203
Description: Application of principles of psychology and human performance to the design of modern systems.
PSYC 375 - NEUROPSYCHOLOGY OF LANGUAGE AND MEMORY
Short Title: NEUROPSYC OF LANGUAGE/MEMORY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 203 and (PSYC 309 or LING 309 or LING 200 or ANTH 200) and (PSYC 362 or NEUR 362 or NEUR 380 or BIOE 380 or PSYC 380)
Description: An introduction to the neural basis of language and memory, covering patient-based and neuroimaging approaches. Topics include the neural basis of speech perception, language comprehension, language production, short-term memory, working memory, semantic and episodic memory, and domain-specific memory (e.g., verbal, spatial, and emotional memory).

PSYC 380 - FUNDAMENTAL NEUROSCIENCE SYSTEMS
Short Title: NEUROSYSTEMS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will provide a broad overview of the brain's neural systems that subserve perception, learning, and behavior. The course will be highly integrative with thematic content including functional organization of the nervous system, neural encoding and decoding, sensory systems, motor systems, and high-level concept processing. Cross-list: BIOC 380, NEUR 380. Graduate/Undergraduate Equivalency: PSYC 584. Recommended Prerequisite(s): PSYC 101. Mutually Exclusive: Credit cannot be earned for PSYC 380 and PSYC 584.

PSYC 409 - METHODS IN HUMAN-COMPUTER INTERACTION
Short Title: METHODS HUMAN-COMP INTERACTION
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 101 and PSYC 203
Description: Introduction to methods for developing and testing user interfaces to computer systems. The focus is on web-based applications. Graduate/Undergraduate Equivalency: PSYC 609. Recommended Prerequisite(s): PSYC 370. Mutually Exclusive: Credit cannot be earned for PSYC 409 and PSYC 609.

PSYC 411 - HISTORY OF PSYCHOLOGY
Short Title: HISTORY OF PSYCHOLOGY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 101 and PSYC 202 and PSYC 203
Description: Survey of evolution of psychological theory from the Greeks to the present. Includes development of scientific approaches to the study of human thought and behavior. Graduate/Undergraduate Equivalency: PSYC 511. Mutually Exclusive: Credit cannot be earned for PSYC 411 and PSYC 511.

PSYC 420 - ELECTION SYSTEMS, TECHNOLOGIES, AND ADMINISTRATION
Short Title: ELECTION SYSTEMS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This multidisciplinary course will consider how elections are conducted to enhance participation, to accurately measure the will of the electorate, and to be sufficiently rigorous to convince all parties that the results are legitimate. This course will consider the design and evaluation of election technologies, ranging from voter registration through the polling booth and vote tabulation. This course will consider three questions: how do individual voters interact with the voting technology, how are voting technologies engineered to be accurate and secure, and how do the social aspects of voting fulfill democratic goals for elections? A central requirement for this course will be group research projects, many operating in our community, built around the November election. Cross-list: COMP 435, POLI 420.

PSYC 430 - COMPUTATIONAL MODELING OF COGNITIVE PROCESSES
Short Title: COMP MODELING OF COG PROCESSES
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A survey of computational approaches to modeling cognitive processes. The emphasis will be on recent production system models, but other approaches will also be covered. The course will involve evaluation of existing models and hands-on experience in modeling. Graduate/Undergraduate Equivalency: PSYC 543. Recommended Prerequisite(s): PSYC 203 and COMP 200 (or equivalent). Mutually Exclusive: Credit cannot be earned for PSYC 430 and PSYC 543.
PSYC 431 - ADVANCED INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Short Title: ADVANCED I/O PSYCHOLOGY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 231
Description: An emphasis on reading original published research. Topics covered include personnel selection, training, motivation, job attitudes, and groups. Instructor Permission Required. Mutually Exclusive: Credit cannot be earned for PSYC 431 and PSYC 530.

PSYC 432 - BRAIN AND BEHAVIOR
Short Title: BRAIN AND BEHAVIOR
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 101 and PSYC 203 and PSYC 362
Description: An in-depth examination of the neural basis of higher mental functions in humans, including perception, attention, memory, motor skill, and language. Claims and controversies in cognitive neuroscience will be discussed. Recommended Prerequisite(s): PSYC 339 and PSYC 340.

PSYC 435 - POLLUTION AND PSYCHOLOGICAL DEVELOPMENT
Short Title: POLLUTION & PSYCHOLOGICAL DEV
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: In this course, we will consider research on the effects of various pollutants and toxic substances on the cognitive, social, and emotional development of children. Expert guest speakers will contribute to the course as well. Recommended Prerequisite(s): PSYC 339 and PSYC 340.

PSYC 436 - ADVANCED ORGANIZATIONAL PSYCHOLOGY
Short Title: ADVANCED ORGANIZATIONAL PSYC
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 231 and PSYC 431
Description: Contemporary theory and research in organizational psychology, including topics such as motivation, leadership, job satisfaction, occupational stress, social cognition in work organizations, and group processes. Graduate/Undergraduate Equivalency: PSYC 636. Mutually Exclusive: Credit cannot be earned for PSYC 436 and PSYC 636.

PSYC 438 - GROUP DYNAMICS
Short Title: GROUP DYNAMICS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines current psychological theory and literature concerning intra- and inter-group phenomena within organizational contexts. This course will cover topics such as the unique methodological challenges of studying group-level phenomena; individual-, group-, and organizational-level inputs; group processes; and the assessment of group-level outcomes. Graduate/Undergraduate Equivalency: PSYC 551. Recommended Prerequisite(s): PSYC 339 and PSYC 340 and should be majoring in Psychology or Business. Mutually Exclusive: Credit cannot be earned for PSYC 438 and PSYC 551.

PSYC 439 - ADVANCED STATISTICAL METHODS FOR PSYCHOLOGY
Short Title: ADV STATISTICAL METHODS-PSYC
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 339
Description: This course is intended as a second course in statistics for psychology and the social sciences. It builds on PSYC 339. Advanced factorial ANOVA designs, mixed between- and within-subject designs, and multiple regression will be covered. This course is primarily for advanced psychology undergraduates contemplating enrollment in graduate school.

PSYC 440 - RESEARCH SEMINAR: INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Short Title: RESEARCH IN I/O PSYCHOLOGY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 231
Description: An examination of selected topics in industrial/organizational psychology, focusing on published and ongoing research by contemporary scholars. Topics will vary. Instructor Permission Required.

PSYC 441 - HUMAN-COMPUTER INTERACTION
Short Title: HUMAN-COMPUTER INTERACTION
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 203
Description: Study of the design and evaluation of interactive computing systems for human use and the major phenomena surrounding them. Graduate/Undergraduate Equivalency: PSYC 541. Mutually Exclusive: Credit cannot be earned for PSYC 441 and PSYC 541.
PSYC 445 - ADVANCED SEMINAR IN HEALTH PSYCHOLOGY  
Short Title: ADV SEM IN HEALTH PSYCHOLOGY  
Department: Psychology  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment limited to students with a class of Junior or Senior. Enrollment is limited to students with a major in Psychology. Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): PSYC 203 and (PSYC 339 or STAT 280 or STAT 300 or STAT 305 or STAT 310)  
Description: Study of the higher mental processes. Includes problem solving, judgment, decision making, and reasoning. Graduate/Undergraduate Equivalency: PSYC 527. Mutually Exclusive: Credit cannot be earned for PSYC 461 and PSYC 360/PSYC 527.

PSYC 445 - ADVANCED SEMINAR IN CLINICAL PSYCHOLOGY  
Short Title: ADV SEM IN CLINICAL PSYCHOLOGY  
Department: Psychology  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): PSYC 332  
Description: Topics will vary. Repeatable for credit with Permission of Department.

PSYC 452 - EMOTION REGULATION  
Short Title: EMOTION REGULATION  
Department: Psychology  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Consideration of research on psychological factors and health, with special consideration to the role of health beliefs in people's practice and nonpractice of health, illness, and sick-role behaviors. Topics will vary. Repeatable for credit with Permission of Department.

PSYC 462 - NON-TRADITIONAL INTERFACES  
Short Title: NON-TRADITIONAL INTERFACES  
Department: Psychology  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Advanced coverage of human computer interfaces that are not necessarily graphical in nature. The course covers haptic, gesture, locomotion, auditory, voice olfactory, taste interfaces. Impoverished GUIs (small screen) are investigated, as are interactive voice response systems and complex interfaces that are multi-model. Graduate/Undergraduate Equivalency: PSYC 662. Recommended Prerequisite(s): PSYC 370. Mutually Exclusive: Credit cannot be earned for PSYC 462 and PSYC 662.

PSYC 463 - MEDICAL HUMAN FACTORS  
Short Title: MEDICAL HUMAN FACTORS  
Department: Psychology  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Advanced coverage of the human factors that are specific to medical systems. Topics include medical decision making and diagnosis errors, surgical human factors, medical robots, surgical simulators, and general medical equipment design. Macro-ergonomics of hospital systems, electronic medical records and computerized physician order entry systems are also covered. Graduate/Undergraduate Equivalency: PSYC 663. Recommended Prerequisite(s): PSYC 370. Mutually Exclusive: Credit cannot be earned for PSYC 463 and PSYC 663.

PSYC 464 - USABILITY ASSESSMENT  
Short Title: USABILITY ASSESSMENT  
Department: Psychology  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course covers all of the aspects of specifying, planning, executing, and reporting usability assessments on products, services and systems. Formative and summative assessments are covered, as are "discount" usability methods. This course is project based, with students performing usability assessments as part of an engineering team that is developing products for deployment. Graduate/Undergraduate Equivalency: PSYC 664. Recommended Prerequisite(s): PSYC 370. Mutually Exclusive: Credit cannot be earned for PSYC 464 and PSYC 664.

**PSYC 502 - ADVANCED PSYCHOLOGICAL STATISTICS I**  
- **Short Title:** ADVANCED PSYC STATISTICS I  
- **Department:** Psychology  
- **Grade Mode:** Standard Letter  
- **Course Type:** Lecture  
- **Credit Hours:** 3  
- **Restrictions:** Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.  
- **Course Level:** Graduate  
- **Description:** Advanced treatment of a wide range of laboratory and computer statistics. Graduate level students only.  
- **Prerequisite(s):** PSYC 501 or STAT 508  
- **Equivalency:** PSYC 342.

**PSYC 503 - ADVANCED PSYCHOLOGICAL STATISTICS II**  
- **Short Title:** ADVANCED PSYC STATISTICS II  
- **Department:** Psychology  
- **Grade Mode:** Standard Letter  
- **Course Type:** Lecture  
- **Credit Hours:** 3  
- **Restrictions:** Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.  
- **Course Level:** Graduate  
- **Description:** A continuation of PSYC 502, focusing on multiple regression.  
- **Prerequisite(s):** PSYC 502 or STAT 509  
- **Equivalency:** PSYC 342.

**PSYC 504 - COMPUTER APPLICATIONS IN PSYCHOLOGY**  
- **Short Title:** COMPUTER APPLICATIONS IN PSYC  
- **Department:** Psychology  
- **Grade Mode:** Standard Letter  
- **Course Type:** Seminar  
- **Credit Hours:** 3  
- **Restrictions:** Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.  
- **Course Level:** Graduate  
- **Description:** An introductory survey of sensation and perception, both human and animal. Covers all sensory systems but focuses on vision and audition. Includes the philosophy of perception; measurement and methods; neuroanatomy of visual and auditory systems; computational models of vision, motion, depth, and color; illusions and perceptual organization; and perceptual development. Graduate/Undergraduate Equivalency: PSYC 351.  
- **Prerequisite(s):** PSYC 511 and PSYC 411.

**PSYC 505 - INFORMATION PROCESSING AND ATTENTION**  
- **Short Title:** RESEARCH METHODS  
- **Department:** Psychology  
- **Grade Mode:** Standard Letter  
- **Course Type:** Seminar  
- **Credit Hours:** 3  
- **Restrictions:** Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.  
- **Course Level:** Graduate  
- **Description:** Graduate-level treatment of a wide range of laboratory and field research methodologies.  
- **Prerequisite(s):** PSYC 504 or STAT 342.

**PSYC 511 - HISTORY AND SYSTEMS OF PSYCHOLOGY**  
- **Short Title:** HISTORY & SYSTEMS OF PSYC  
- **Department:** Psychology  
- **Grade Mode:** Standard Letter  
- **Course Type:** Lecture  
- **Credit Hours:** 3  
- **Restrictions:** Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.  
- **Course Level:** Graduate  
- **Description:** Survey of the evolution of psychological theory from the Greeks to the present. Includes development of scientific approaches to the study of human thought and behavior. Graduate/Undergraduate Equivalency: PSYC 411. Mutually Exclusive: Credit cannot be earned for PSYC 511 and PSYC 411.

**PSYC 520 - FOUNDATIONS OF COGNITIVE PSYCHOLOGY**  
- **Short Title:** FOUNDATIONS OF COGNITIVE PSYC  
- **Department:** Psychology  
- **Grade Mode:** Standard Letter  
- **Course Type:** Seminar  
- **Credit Hours:** 3  
- **Restrictions:** Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.  
- **Course Level:** Graduate  
- **Description:** An introduction to the basic topics in cognitive psychology, including perception, memory, psycholinguistics, concept formation, problem solving, and decision making.

**PSYC 521 - PSYCHOLOGY OF PERCEPTION**  
- **Short Title:** PERCEPTION  
- **Department:** Psychology  
- **Grade Mode:** Standard Letter  
- **Course Type:** Seminar  
- **Credit Hours:** 3  
- **Restrictions:** Enrollment is limited to Graduate level students.  
- **Course Level:** Graduate  
- **Description:** An introductory survey of sensation and perception, both human and animal. Covers all sensory systems but focuses on vision and audition. Includes the philosophy of perception; measurement and methods; neuroanatomy of visual and auditory systems; computational models of vision, motion, depth, and color; illusions and perceptual organization; and perceptual development. Graduate/Undergraduate Equivalency: PSYC 351.

**PSYC 522 - INFORMATION PROCESSING AND ATTENTION**  
- **Short Title:** INFO PROCESSING & ATTENTION  
- **Department:** Psychology  
- **Grade Mode:** Standard Letter  
- **Course Type:** Seminar  
- **Credit Hours:** 3  
- **Restrictions:** Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.  
- **Course Level:** Graduate  
- **Description:** An exploration of topics in attention, including information overload, selective attention, response conflict, and automatic/unconscious and controlled/conscious processes. The neural mechanisms underlying these processes will also be discussed.
PSYC 524 - MEMORY
Short Title: MEMORY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Overview of issues and research in remembering and forgetting.

PSYC 525 - PSYCHOLINGUISTICS
Short Title: PSYCHOLINGUISTICS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of the psychology of language. Includes the study of speech production, reading, syntax, meaning, bilingualism, language and thought, and language errors and disorders.

PSYC 527 - REASONING, DECISION MAKING, PROBLEM SOLVING
Short Title: DECISION MAKING/PROB SOLVING
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to Graduate level students.
Course Level: Graduate
Description: The study of higher mental processes. Includes problem solving, judgment, decision making, and reasoning. Graduate/Undergraduate Equivalency: PSYC 461. Mutually Exclusive: Credit cannot be earned for PSYC 527 and PSYC 461.

PSYC 529 - COGNITIVE RESEARCH SEMINAR
Short Title: COGNITIVE RESEARCH SEMINAR
Department: Psychology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A weekly student-staff seminar on current and recent research about mental phenomena. Repeatable for Credit.

PSYC 530 - FOUNDATIONS OF I/O PSYCHOLOGY
Short Title: FOUNDATIONS OF I/O PSYCHOLOGY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate-level introduction to the study of human behavior in the work setting. Instructor Permission Required. Mutually Exclusive: Credit cannot be earned for PSYC 530 and PSYC 431.

PSYC 531 - HF/HCI RESEARCH SEMINAR
Short Title: HF/HCI RESEARCH SEMINAR
Department: Psychology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A weekly student-staff seminar on various human factors and human-computer interaction topics. Repeatable for Credit.

PSYC 532 - HEALTH RESEARCH SEMINAR
Short Title: HEALTH RESEARCH SEMINAR
Department: Psychology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A weekly student-staff seminar on current and recent health and emotion-related research. Department Permission Required. Repeatable for Credit.

PSYC 533 - I/O PSYCHOLOGY RESEARCH SEMINAR
Short Title: I/O PSYCHOLOGY RESEARCH SEM
Department: Psychology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A weekly student-staff seminar on various industrial/organizational psychology topics. Repeatable for Credit.

PSYC 534 - FOUNDATIONS OF ENGINEERING PSYCHOLOGY
Short Title: ENGINEERING PSYCHOLOGY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is an advanced human factors course aimed at students who have taken a basic course in human factors or human-computer interaction and are looking for greater depth. Graduate/Undergraduate Equivalency: PSYC 470. Mutually Exclusive: Credit cannot be earned for PSYC 534 and PSYC 470.
PLAC 561 - TEACHING IN PSYCHOLOGY
Short Title: GROUP DYNAMICS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): PSYC 551 and PSYC 438.
Description: Practicum on oral psychology presentation.

PSYC 560 - PSYCHOLOGY PRESENTATIONS
Short Title: PSYCHOLOGY PRESENTATIONS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Practicum on oral psychology presentation.

PSYC 561 - TEACHING IN PSYCHOLOGY
Short Title: TEACHING IN PSYCHOLOGY
Department: Psychology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Internship/Practicum
Credit Hour: 1
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Assistance in the teaching of undergraduate and occasionally graduate courses in psychology. Repeatable for Credit.

PSYC 560 - PSYCHOLOGY PRESENTATIONS
Short Title: PSYCHOLOGY PRESENTATIONS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Practicum on oral psychology presentation.

PSYC 559 - GROUP DYNAMICS
Short Title: GROUP DYNAMICS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Practicum on oral psychology presentation.

PSYC 558 - EMOTION REGULATION
Short Title: EMOTION REGULATION
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Practicum on oral psychology presentation.

PSYC 557 - EMOTION REGULATION
Short Title: EMOTION REGULATION
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Practicum on oral psychology presentation.

PSYC 556 - PSYCHOLOGY PRESENTATIONS
Short Title: PSYCHOLOGY PRESENTATIONS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Practicum on oral psychology presentation.

PSYC 555 - PSYCHOLOGY PRESENTATIONS
Short Title: PSYCHOLOGY PRESENTATIONS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Practicum on oral psychology presentation.

PSYC 554 - PSYCHOLOGY PRESENTATIONS
Short Title: PSYCHOLOGY PRESENTATIONS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Practicum on oral psychology presentation.

PSYC 553 - PSYCHOLOGY PRESENTATIONS
Short Title: PSYCHOLOGY PRESENTATIONS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Practicum on oral psychology presentation.

PSYC 552 - EMOTION REGULATION
Short Title: EMOTION REGULATION
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Practicum on oral psychology presentation.

PSYC 551 - GROUP DYNAMICS
Short Title: GROUP DYNAMICS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Practicum on oral psychology presentation.

PSYC 550 - FOUNDATIONS OF SOCIAL PSYCHOLOGY
Short Title: FOUNDATIONS OF SOCIAL PSYC
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Review of theories of social psychology with an emphasis on current empirical research. Instructor Permission Required.
PSYC 563 - COGNITIVE PSYCHOLOGY INTERNSHIP
Short Title: COGNITIVE PSYCH INTERNSHIP
Department: Psychology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Internship/Practicum
Credit Hours: 1-9
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Supervised internship in cognitive psychology. Instructor Permission Required. Repeatable for Credit.

PSYC 564 - COGNITIVE NEUROSCIENCE LAB
Short Title: COGNITIVE NEUROSCIENCE LAB
Department: Psychology
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The objective is to equip the students of PSYC/NEUR 362 the tools on how to apply cognitive neuroscience techniques to health or clinical topics and to investigate sensorimotor and cognitive measures in a human model. Instructor Permission Required. Cross-list: NEUR 564. Graduate/Undergraduate Equivalency: PSYC 364. Mutually Exclusive: Credit cannot be earned for PSYC 564 and PSYC 364.

PSYC 565 - HUMAN OLFACTION
Short Title: HUMAN OLFACTION
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Overview of theories and research related to olfaction. Special topics include olfactory memory, the effect of emotion and cognition on olfaction, olfaction as a channel of communication, sensory integration, and ERP and fMRI studies on olfaction and its relationship with other sensory systems. Graduate/Undergraduate Equivalency: PSYC 465. Mutually Exclusive: Credit cannot be earned for PSYC 565 and PSYC 465.

PSYC 571 - FIRST-YEAR PROJECT
Short Title: FIRST-YEAR PROJECT
Department: Psychology
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Individual research project undertaken in the first year of the graduate program. Repeatable for Credit.

PSYC 572 - SECOND-YEAR PROJECT
Short Title: SECOND-YEAR PROJECT
Department: Psychology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Individual research project undertaken during the second year of the graduate program. Repeatable for Credit.

PSYC 573 - NON-THESIS GRADUATE RESEARCH
Short Title: NON-THESIS GRADUATE RESEARCH
Department: Psychology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-6
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Individual research not for first- or second-year project or thesis. Repeatable for Credit.

PSYC 574 - INTRODUCTION TO COGNITIVE NEUROSCIENCE
Short Title: INTRO COGNITIVE NEUROSCIENCE
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An introductory graduate-level overview of cognitive neuroscience. The course will cover basics in history, neuroanatomy, methods of cognitive neuroscience, sensation and perception, control of action, learning and memory, emotion, language, attention, drugs and cognition, impulsivity, cognitive control, social cognition, and neurobiology of disease. This course is usually taught at the Texas Medical Center. Instructor Permission Required. Cross-list: NEUR 508.

PSYC 575 - ADVANCED COGNITIVE NEUROSCIENCE: ATTENTION AND PERCEPTION
Short Title: ATTENTION AND PERCEPTION
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Overview of neuropsychological and cognitive neuroscience approaches to higher mental functions including sensation and perception, attention, motor control, and neuropsychology. Other topics include basic neuroanatomy, experimental and clinical investigative methods, and the historical and philosophical context of contemporary neuroscience. Instructor Permission Required. Cross-list: NEUR 501.
Course URL: www.ruf.rice.edu/~neurosci
PSYC 576 - ADVANCED COGNITIVE NEUROSCIENCE: HIGHER MENTAL FUNCTIONS
Short Title: HIGHER MENTAL FUNCTIONS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Overview of neuropsychological and neuroimaging approaches to higher mental functions, including language, memory, executive functions, reasoning, and numerical processing. Instructor Permission Required. Cross-list: NEUR 502.
Course URL: www.ruf.rice.edu/~neurosci

PSYC 577 - INTRODUCTION TO FUNCTIONAL NEUROANATOMY
Short Title: FUNCTIONAL NEUROANATOMY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2-3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Anatomy and function of components of the nervous system with an emphasis on the central nervous system. Usually taught at the Texas Medical Center. Instructor Permission Required.

PSYC 578 - COGNITIVE NEUROPSYCHOLOGY: THEORIES AND METHODS
Short Title: COGNEURO: THEORIES AND METHODS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course explores different approaches in the field of Cognitive Neuropsychology. Topics include single-case studies, case series, voxel-lesion symptom mapping and computational neuropsychology. We will discuss how to do research with each of these techniques, how to draw inferences from neuropsychological data and critiques of the methodology.

PSYC 580 - DEVELOPMENTAL COGNITIVE NEUROSCIENCE
Short Title: DEVELOPMENTAL COG NEUROSCIENCE
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar focusing on the neural/biological bases of both normal and abnormal human development through a survey of recent research in developmental cognitive neuroscience. Topics include perceptual, motive, cognitive, and language development as well as experimental research methods for studying the developing brain.

PSYC 581 - VISION SCIENCE
Short Title: VISION SCIENCE
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced graduate seminar in the psychology of vision, covering the neural, psychophysical, and phenomenological approaches to visual perception.

PSYC 582 - EARLY SENSORY, PERCEPTUAL AND ATTENTIONAL DEVELOPMENT
Short Title: EARLY SENSORY PERCEPTION
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is a survey course for graduate students interested in the development of sensory systems, perception, and attention. There will be original empirical and theoretical readings from the literature on the development of these functions primarily during infancy. Neurobiological underpinnings for these functions will be debated and discussed.

PSYC 583 - THEORY, CONTENT, AND EXECUTION IN COGNITIVE NEUROSCIENCE
Short Title: COGNEURO THEORY/CONTENT/EXECUT
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The particular combination of issues in cognitive neuroscience in any one course will vary depending on the background and needs of the students registered for that course and the nature of the important articles in journals covering these areas. Instructor Permission Required. Repeatable for Credit.

PSYC 584 - FUNDAMENTAL NEUROSCIENCE SYSTEMS
Short Title: NEUROSYSTEMS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will provide a broad overview of the brain's neural systems that subserve perception, learning, and behavior. This course will be highly integrative with thematic content including functional organization of the nervous system, neural encoding and decoding, sensory systems, motor systems, and high-level concept processing. Graduate/Undergraduate Equivalency: PSYC 380. Mutually Exclusive: Credit cannot be earned for PSYC 584 and PSYC 380.
PSYC 585 - FUNCTIONAL MAGNETIC RESONANCE IMAGING LABORATORY
Short Title: FMRI LABORATORY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Laboratory course that provides comprehensive introduction to the practical aspects of planning conducting and analyzing Blood Oxygen Dependent Functional Magnetic Resonance Imaging (BOLD fMRI) data. BOLD fMRI is a methodology that allows non-invasive measurements of the neural processing underlying human perception/cognition. Course taught at Baylor College of Medicine for Advanced fMRI.

PSYC 586 - SOCIAL AND AFFECTIVE NEUROSCIENCE
Short Title: SOCIAL AND AFFECTIVE NEURO
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Review of the field of social and affective neuroscience, including conceptual foundations and methodology. Review and discussion of contemporary research on the neurobiological supporting social cognition and emotion in both healthy and affectively-disordered populations.

PSYC 590 - ADVANCED TOPICS IN NEUROSCIENCE
Short Title: ADVANCED TOPICS - NEUROSCIENCE
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics will vary. Repeatable for Credit.

PSYC 601 - MULTIVARIATE STATISTICS
Short Title: MULTIVARIATE STATISTICS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course provides an overview of a wide range of concepts and skills for conducting data analysis on multivariate data sets encountered in psychology. Issues involve preparing the data set, selecting and conducting the appropriate analysis, interpreting the output from statistical programs, and presenting complex analyses and results in a clear manner.

PSYC 602 - PSYCHOMETRICS
Short Title: PSYCHOMETRICS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Test theory, including reliability, validity, item response theory, and generalizability theory. In addition, the course offers hands-on experience with analysis software and discussion of practical issues such as test bias, item writing, and scale construction.

PSYC 609 - METHODS IN HUMAN-COMPUTER INTERACTION
Short Title: METHODS HUMAN-COMP INTERACTION
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to methods for developing and testing user interfaces to computer systems. The focus is on web-based applications. Graduate/Undergraduate Equivalency: PSYC 409. Mutually Exclusive: Credit cannot be earned for PSYC 609 and PSYC 409.

PSYC 620 - ADVANCED TOPICS IN COGNITIVE PSYCHOLOGY
Short Title: ADV TOPICS - COGNITIVE PSYC
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics will vary. Repeatable for Credit.

PSYC 621 - TOPICS IN MEMORY
Short Title: TOPICS IN MEMORY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics will vary. Repeatable for Credit.

PSYC 622 - TOPICS IN PSYCHOLINGUISTICS
Short Title: TOPICS IN PSYCHOLINGUISTICS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to Graduate level students.
Course Level: Graduate
Description: In-depth, consideration of specialized topics in the psychology of language. Topics vary from year to year. Repeatable for Credit.
PSYC 624 - SOCIAL/ORGANIZATIONAL PSYCHOLOGY RESEARCH SEMINAR
Short Title: SOCIAL/ORG PSYC RESEARCH SEM
Department: Psychology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Weekly seminar to discuss recent research in social/organizational psychology. Instructor Permission Required. Repeatable for Credit.

PSYC 625 - COGNITIVE NEUROSCIENCE RESEARCH SEMINAR
Short Title: COGNEURO RESEARCH SEMINAR
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Weekly seminar to discuss recent research in cognitive neuroscience. Instructor Permission Required. Repeatable for Credit.

PSYC 626 - HUMAN FACTORS/HUMAN-COMPUTER INTERACTION RESEARCH SEMINAR
Short Title: HF/HCI RESEARCH SEMINAR
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Weekly seminar to discuss recent research in human factors/human-computer interaction. Instructor Permission Required. Repeatable for Credit.

PSYC 627 - INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY RESEARCH SEMINAR
Short Title: I/O PSYC RESEARCH SEMINAR
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Weekly seminar to discuss recent research in industrial/organizational psychology. Instructor Permission Required. Repeatable for Credit.

PSYC 628 - MEMORY RESEARCH SEMINAR
Short Title: MEMORY RESEARCH SEMINAR
Department: Psychology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Weekly seminar to discuss recent research in human memory. Repeatable for Credit.

PSYC 629 - PSYCHOLINGUISTICS RESEARCH SEMINAR
Short Title: PSYCHOLINGUISTICS SEMINAR
Department: Psychology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Weekly seminar to discuss recent research in psycholinguistics. Repeatable for Credit.

PSYC 630 - ADVANCED TOPICS IN I/O
Short Title: ADVANCED TOPICS IN I/O
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): PSYC 530
Description: Topics will vary. Repeatable for different topics. Repeatable for Credit.

PSYC 631 - FOUNDATIONS OF INDIVIDUAL DIFFERENCES
Short Title: INDIVIDUAL DIFFERENCES
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Applied psychologists attempt to build theoretical and empirical models that effectively explain how variation in individual differences (e.g., cognitive ability, personality, motivation, interests) relates to variation in practically relevant outcomes (e.g., training effectiveness, job performance, response to clinical treatment). This course covers major theoretical and methodological approaches to this end.
PSYC 632 - LEADERSHIP
Short Title: LEADERSHIP
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Examination of the major psychological approaches to the study of leadership. Emphasis is on theory and practice in formal organizations.

PSYC 634 - PERSONNEL PSYCHOLOGY
Short Title: PERSONNEL PSYCHOLOGY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): PSYC 530
Description: Examination of the theory, research, and applications in personnel selection, including job analysis, job performance, evaluation of performance, validation of selection methods, and training.

PSYC 635 - MULTILEVEL MODELING IN PSYCHOLOGICAL RESEARCH
Short Title: MULTILEVEL MODELING
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Psychological data often have a nested structure (e.g., students within classrooms, time points within individuals). Multilevel modeling of such data yields results that are more appropriate and interpretable than traditional statistical methods. Students will gain both practical and conceptual knowledge of this popular methodology.

PSYC 636 - ORGANIZATIONAL PSYCHOLOGY
Short Title: ORGANIZATIONAL PSYCHOLOGY
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): PSYC 530
Description: Contemporary theory and research in organizational psychology, including topics such as motivation, leadership, job satisfaction, occupational stress, social cognition in work organizations, and group processes. Graduate/Undergraduate Equivalency: PSYC 436. Mutually Exclusive: Credit cannot be earned for PSYC 636 and PSYC 436.

PSYC 637 - META-ANALYSIS IN PSYCHOLOGICAL RESEARCH
Short Title: META-ANALYSIS
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Meta-analysis is a popular tool for statistically aggregating effects across related psychological studies. Course topics traverse a wide range of issues, including developing and using a coding sheet, fixed- vs. random-effects models, analysis moderator effects, correcting for statistical artifacts, dealing with dependent outcomes and outliers, and detecting publication bias.

PSYC 638 - STRUCTURAL EQUATION MODELING
Short Title: STRUCTURAL EQUATION MODELING
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Structural equation modeling attempts to provide improved estimates of construct-level relationships. It also allows for complex hypothesis testing (e.g., mediation between groups, longitudinal) to find an appropriate balance between model parsimony and model fit. This course introduces students to basic concepts and applications of this popular research method.

PSYC 639 - INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY INTERNSHIP
Short Title: I/O PSYCHOLOGY INTERNSHIP
Department: Psychology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Internship/Practicum
Credit Hours: 1-9
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Supervised internship in organizational and/or personnel psychology. Instructor Permission Required. Repeatable for Credit.

PSYC 640 - TOPICS IN HUMAN-COMPUTER INTERACTION
Short Title: TOPICS IN HCI
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics will vary. Repeatable for Credit.
PSYC 662 - NON-TRADITIONAL INTERFACES
Short Title: NON-TRADITIONAL INTERFACES
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced coverage of human computer interfaces that are not necessarily graphical in nature. The course covers haptic, gesture, locomotion, auditory, voice olfactory, taste interfaces. Impoverished GUIs (small screen) are investigated, as are interactive voice response systems and complex interfaces that are multi-model. Graduate/Undergraduate Equivalency: PSYC 462. Recommended Prerequisite(s): PSYC 370. Mutually Exclusive: Credit cannot be earned for PSYC 662 and PSYC 462.

PSYC 664 - USABILITY ASSESSMENT
Short Title: USABILITY ASSESSMENT
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers all of the aspects of specifying, planning, executing, and reporting usability assessments on products, services and systems. Formative and summative assessments are covered, as are "discount" usability methods. This course is project based, with students performing usability assessments as part of an engineering team that is developing products for deployment. Graduate/Undergraduate Equivalency: PSYC 464. Recommended Prerequisite(s): PSYC 370. Mutually Exclusive: Credit cannot be earned for PSYC 664 and PSYC 464.

PSYC 665 - SEMINAR IN GENES AND COGNITION
Short Title: SEMINAR IN GENES AND COGNITION
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Discussion of selected topics on professional matters. Includes grant writing, licensing, and ethics in psychology.

PSYC 666 - PROFESSIONAL ISSUES
Short Title: PROFESSIONAL ISSUES
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Discussion of selected topics on professional matters. Includes grant writing, licensing, and ethics in psychology.
PSYC 671 - METHODS IN COGNITIVE NEUROSCIENCE
Short Title: METHODS COGNITIVE NEUROSCIENCE
Department: Psychology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Explores issues in functional neuroimaging and provides hands-on experience with experimental design, data acquisition, and analysis. Examines hemodynamic (PET, FMR), electrophysiologic (EEG, MEG), and other (e.g. neural stimulation, event-related optical) methods of measuring functional activation in the human brain related to cognitive operations. This course is usually offered at the University of Texas Medical School.

PSYC 681 - PERCEPTUAL ORGANIZATION
Short Title: PERCEPTUAL ORGANIZATION
Department: Psychology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): PSYC 581
Description: Advanced graduate course. Perceptual organization, primarily in human vision but in other senses too. We examine theoretical issues underlying perceptual organization; principal phenomena; methods used to reveal perception of structure; neural basis of perception organization; theories of perceptual organization; and remaining problems in the field.

PSYC 700 - THESIS RESEARCH
Short Title: THESIS RESEARCH
Department: Psychology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Research for the master’s thesis. Repeatable for Credit.

PSYC 800 - DISSERTATION RESEARCH
Short Title: DISSERTATION RESEARCH
Department: Psychology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Research for the doctoral dissertation. Repeatable for Credit.

Religion (RELI)

RELI 100 - ROMANCING RELIGION: NARRATIVES OF THE SACRED
Short Title: ROMANCING RELIGION
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines links between religious experience and romance narrative taking the grail as a focal point. We start with grail legends in the middle ages, explore historical associations of the grail with medieval Christianity, and end with quest narratives and grail motifs in modern occultism, fiction and film. This course is limited to first-year students only, any others will be removed from this course. Cross-list: FSEM 100, MDEM 100.

RELI 101 - INTRODUCTION TO THE STUDY OF RELIGION
Short Title: INTRO TO THE STUDY OF RELIGION
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Comparative and interdisciplinary analysis of key elements (including scripture, religious experience, ideas of the divine, religious art and practices) of two Western and two non-Western religions, of the scholarly study of religion, and of the role of religion in the contemporary world.

RELI 102 - BUDDHISM MEDITATION, ART AND US
Short Title: BUDDHISM MEDITATION, ART & US
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: How do you learn about another tradition? Its texts, practices, or art? Its conversations with the modern West? We will focus on all these as we enter ancient Buddhist worlds of India and Tibet, by reading ancient texts and modern treatments, including films and scientific inquiry. This course is limited to first-year students only, any others will be removed from this course. Cross-list: FSEM 102.
REL 109 - RELIGION AND LAW
Short Title: RELIGION AND LAW
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Law and religion: origins, differentiation, relation to legitimacy and stability of basic institutions. Law school, professional life, quest for a fitting career in the search for meaning and authentic selfhood. Required: willingness to share the personal roots of your interest in law and your take on the Big Picture.

REL 110 - INTRODUCTION TO JEWISH MYSTICISM
Short Title: INTRO TO JEWISH MYSTICISM
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Surveys the historical development and central themes of Jewish mysticism. From the Bible to ancient mysticism to medieval Kabbalah to modern expressions, we will critically reflect on the ideas such as divine presence in the world, the cultivation of insight and magical powers, contemplative and restorative practices, and charismatic authority. Cross-list: MDEM 103.

REL 111 - INTRODUCTION TO AFRICAN RELIGIONS
Short Title: INTRO AFRICAN RELIGIONS
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to the structures of African religions through readings. Topics include community, cosmology, ritual, ethical values, magic, witchcraft, spirit possession, contribution to nationalism, social change, religion and art, and transplantation of African Religions in the Americas.

REL 112 - COMPARING CHRISTIANITIES
Short Title: COMPARING CHRISTIANITIES
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course maps the pluralistic nature of early Christianity from its grassroots beginnings in a commune in Jerusalem to Rome and the conversion of Emperor Constantine. Different Christian movements include the Apostolic Christians, Ebionites, Marcionites, Thomaisians, Montanists, Monarchians, Modalists, Arians, and a variety of Gnostic Christians will be studied comparatively as well as historically.

REL 113 - INTRODUCTION TO CHRISTIANITY IN AFRICA
Short Title: INTRO TO CHRISTIANITY AFRICA
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines the historical development of Christianity in Africa. We will study the Apostolic Christians, Ebionites, Marcionites, Thomaisians, Montanists, Monarchians, Modalists, Arians, and a variety of Gnostic Christians will be studied comparatively as well as historically.

REL 114 - MYSTICISM THROUGHOUT THE AGES
Short Title: MYSTICISM THROUGHOUT THE AGES
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines the historical development of mysticism in Western thought, placing the Christian experiential traditions in comparison with Jewish developments. Through mystical texts, we will explore key concepts, such as visions of God and spiritual journeys, as developed during late antiquity, the middle-ages, and into the early modern period. Cross-list: MDEM 116.
RELI 125 - INTRODUCTION TO BIBLICAL HEBREW I
Short Title: INTRO TO BIBLICAL HEBREW I
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An introduction to Biblical Hebrew with emphasis on grammar and vocabulary. Cross-list: HEBR 125. Graduate/Undergraduate Equivalency: RELI 507. Mutually Exclusive: Credit cannot be earned for RELI 125 and RELI 507.

RELI 126 - INTRODUCTION TO BIBLICAL HEBREW II
Short Title: INTRO TO BIBLICAL HEBREW II
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Continuation of RELI 125. We will finish the grammar in the second half of this semester and then read selections from the Hebrew Bible. Cross-list: HEBR 126. Graduate/Undergraduate Equivalency: RELI 511. Mutually Exclusive: Credit cannot be earned for RELI 126 and RELI 511.

RELI 127 - INTERMEDIATE BIBLICAL HEBREW III
Short Title: INTERM BIBLICAL HEBREW III
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): RELI 125 and RELI 126
Description: Readings in the Hebrew Bible as well as in some unvocalized texts from the Dead Sea Scrolls. Review of grammar and vocabulary. Instructor Permission Required. Graduate/Undergraduate Equivalency: RELI 512. Mutually Exclusive: Credit cannot be earned for RELI 127 and RELI 512.

RELI 128 - INTERMEDIATE BIBLICAL HEBREW IV
Short Title: INTERM BIBLICAL HEBREW IV
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): RELI 125 and RELI 126
Description: Continuation of RELI 127 (RELI 127 is not a prerequisite). Cross-list: HEBR 128. Graduate/Undergraduate Equivalency: RELI 516. Mutually Exclusive: Credit cannot be earned for RELI 128 and RELI 516.

RELI 157 - RELIGION AND HIP HOP CULTURE IN AMERICA
Short Title: RELIGION AND HIP HOP
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Hip Hop culture has changed how life is discussed and conducted. However, one of the under-explored dimensions of Hip Hop culture involves its religious sensibilities. Using lectures, discussions, films, and video presentations, this course explores Hip Hop culture's religious dimensions through its musical language-rap music. Mutually Exclusive: Credit cannot be earned for RELI 157 and RELI 311.
RELI 158 - LIBERATION THEOLOGIES
Short Title: LIBERATION THEOLOGIES
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course seeks to acquaint students with examples of liberation theology, as they relate to the following issues: racism, sexism, classism, and environmental destruction. Attention is given to the context, construction, form, and aims of Latin American liberation theology, Black theology, Feminist theology, and Theology in the Intersections. Graduate/Undergraduate Equivalency: RELI 548. Mutually Exclusive: Credit cannot be earned for RELI 158 and RELI 548.

RELI 171 - THE BODY AND THE COSMOS IN THE MIDDLE AGES
Short Title: BODY & COSMOS IN MIDDLE AGES
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: What shaped medieval Christian notions of the body? How did common experiences of pain, sexuality, childbirth, and death refract the grasp of larger concepts - God, time, and the cosmos? This seminar will explore the issues connecting body to cosmos through close reading of medieval literary, mystical, and autobiographical texts. This course is limited to first-year students only, any others will be removed from this course. Cross-list: FSEM 171, MDEM 171. Mutually Exclusive: Credit cannot be earned for RELI 171 and FWIS 150.

RELI 203 - JUDAISM OF JESUS AND HILLEL
Short Title: JUDAISM OF JESUS AND HILLEL
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines the history and culture of Judaism during the Second Temple period, which produced such great religious leaders as Jesus and Hillel. Topics include: canonization, colonization, diaspora, economic and political instability, eschatology, Hellenization, imperialism, messianism, Pharisees, priesthood, Sadducees, Scribes, scriptures, sectarianism, synagogue and temple worship. Cross-list: HIST 201.

RELI 213 - THE PROPHET JEREMIAH: THE BIBLICAL BOOK AND ITS RECESSION IN JUDAISM AND CHRISTIANITY
Short Title: THE PROPHET JEREMIAH
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A seminar on the book of Jeremiah and its reception. Topics to be explored: ancient Near Eastern prophecy and Israel’s cultures of revelation; the composition, production, and transmission of a biblical book; the life of the prophet; the transformation of Jeremiah’s message in later, post-biblical texts attributed to him.

RELI 215 - MYSTIC CINEMA: KABBALAH IN FILM
Short Title: MYSTIC CINEMA
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course explores uses by the film industry of ideas drawn from Jewish mysticism. We will examine themes such as monsters, spirits, numerology and the paranormal, as portrayed in classic film and through to contemporary Hollywood. Emphasis will be placed on the medieval textual and folkloric traditions behind such portrayals. Cross-list: FILM 215. Mutually Exclusive: Credit cannot be earned for RELI 215 and FILM 114/FSEM 141/RELI 114.

RELI 217 - SHI'ISM: ASSASSINS AND AYATULLAH
Short Title: SHI'ISM: ASSASSINS & AYATULLAH
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Ranging from the violent disputes at the beginnings of Islam to the mysterious and misunderstood Assassins, Shi’ism is more than about Iran and Iraq. Ayatullahs rule, Alawis is Syria fight ISIS, Islamism in London are at the cutting edge of Muslim modernity—Shi'ism is much more than you would expect.

RELI 221 - THE LIFE OF THE PROPHET MUHAMMAD
Short Title: LIFE OF PROPHET MUHAMMAD
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will examine the life of the Prophet Muhammad, focusing on its significance for Muslims and for non-Muslims. Readings in The Qur’an, Ibn Hisham, and Haykal. Cross-list: ASIA 221.
Mutually Exclusive: Credit cannot be earned for RELI 232 and RELI 500.

Continuing global relevance, particularly in American history and culture.

This course will survey the religions of India, namely Hinduism, Buddhism, Taoism, and Jainism in America, from the colonial period to the present, with a special focus on American metaphysical religion, the counterculture, the New Age, and the history of Western colonialism, transcultural encounter, translation and immigration. Cross-list: ASIA 230.

Beginning with a historical survey of the American metaphysical tradition, this course turns to a close study of the psychological models of the unconscious, and contemporary scientific paradigms. Cross-list: ASIA 231. Graduate/Undergraduate Equivalency: RELI 505. Mutually Exclusive: Credit cannot be earned for RELI 233 and RELI 502.

A critical reading in English of the Book of Genesis with close attention to the narrative artistry and theological dimensions of the text. Compares pre-modern modes of interpretation and modern historical criticism.

This course will survey the religions of India, namely Hinduism, Buddhism, Jainism, Christianity, Islam, and Sikhism. Emphasis will be placed on the study of scriptures of these traditions and their continuing global relevance, particularly in American history and culture. Cross-list: ASIA 232. Graduate/Undergraduate Equivalency: RELI 500. Mutually Exclusive: Credit cannot be earned for RELI 232 and RELI 500.

Introducing the Tibetan alphabet and basics of grammar through reading section of a classic Tibetan text. In addition, readings in English in Indian and Tibetan Buddhist materials, also on the art, history, geography and/or modern era in those areas. Final includes a paper drawn from readings and class discussion. Cross-list: TIBT 233.

Survey of the major themes of the Qur'an and selected types of commentary on it from the early Islamic period until the present day.

This course provides an introduction into the history, thought, and worship of the major Black denominations.
RELI 271 - MEDIEVAL POPULAR CHRISTIANITY
Short Title: MEDIEVAL POPULAR CHRISTIANITY
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: For much of the Middle Ages, literacy was a luxury that ordinary people could not afford. How could peasants participate in Christian traditions? Course surveys devotional practices engaged by the laity, including penance, pilgrimage, plays, charms and spells, as well as traditions of lay interaction with dead saints and ghosts. Cross-list: MDEM 271.

RELI 282 - INTRODUCTION TO CHRISTIANITY
Short Title: INTRO TO CHRISTIANITY
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Multidisciplinary exploration of Christian religious experience, belief, and social reality with examples from Africa, the Americas, Asia, and Europe during the last two thousand years. Themes include search for lasting marks of identity amid change and diversity as well as the issue of Christianity's relation to processes of modernization and secularization. No prior background in religious studies required.

RELI 285 - GENDER AND POLITICIZED RELIGION
Short Title: GENDER & POLITICIZED RELIGION
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines the emergence of religion-based politics in various Asian countries - particularly Hindu and Muslim - focusing on the women participants in these movements as well as the movements' concerns with gender roles in society. We will investigate, for instance, the extent to which women participants have been willing or able to reshape the central ideas of such movements. Cross-list: ASIA 240, SWGS 240. Mutually Exclusive: Credit cannot be earned for RELI 285 and RELI 341.

RELI 294 - RELIGION IN FICTION AND FILM
Short Title: RELIGION IN FICTION AND FILM
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The sacred in interreligious, international, and interdisciplinary encounter, approached via social sciences, theology, theories of literature and mythology. Authors and directors can include Waugh, Mishima, Mann, Proust, Hesse, Percy, Gardner, Updike, Gibson, Sterling, Coupland, Ray, Resnais, Fellini, Bergman, Anderson, Bunnel, and Nutley. Graduate/Undergraduate Equivalency: RELI 514. Mutually Exclusive: Credit cannot be earned for RELI 294 and RELI 514.

RELI 300 - RELIGIONS IN AMERICA
Short Title: RELIGIONS IN AMERICA
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examines the religions and religious practices of America from colonial encounter with native peoples to the contemporary period with a special focus on the morphing natures and historical complexities of American Christianities, religious pluralism and secularism. Graduate/Undergraduate Equivalency: RELI 504. Mutually Exclusive: Credit cannot be earned for RELI 300 and RELI 504.

RELI 301 - NIETZSCHE AND RELIGIOUS THOUGHT
Short Title: NIETZSCHE & RELIGIOUS THOUGHT
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Nietzsche's thought and background: his impact on religious thinkers and cultural critics; his influence on understanding of God, faith, values, society; his connection with Schopenhauer, Wagner, Tillich, Mann, Barth, Buber, Freud, Jung, D.H. Lawrence, Heidegger, antibourgeois cultural criticism, environmentalism, feminism, and postmodernism. Graduate/Undergraduate Equivalency: RELI 515. Mutually Exclusive: Credit cannot be earned for RELI 301 and RELI 515.
RELI 302 - PEOPLE OF THE BOOK: JUDAISM AND SCRIPTURE  
**Short Title:** PEOPLE OF THE BOOK  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Examines Judaism as a "People of the Book," recognizing Judaism's dominant religious preoccupation for millennia to be the reading, study and performance of Jewish scripture, particularly the Torah or the first 5 books of the Hebrew Bible Topics: book culture, act of reading, canonization, revelation, and rabbinic, philosophical, mystical interpretations. RELI 304 - JESUS AND THE GOSPELS  
**Short Title:** JESUS AND THE GOSPELS  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Explores the various portraits of Jesus in the New Testament and extra-canonical gospels (including the gospels of Thomas, Philip, Mary and Judas) in order to reconstruct each gospel's Christological interpretation of Jesus as well as the "historical" Jesus himself.

RELI 305 - PAIN, ECSTASY AND EMBODIMENT IN RELIGIOUS EXPERIENCE  
**Short Title:** PAIN, ECSTASY AND EMBODIMENT  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** From exorcism to other worldly visions, we experience religion as embodied human beings. This course explores embodied religion by focusing on connections between pain and transcendence, looking at medieval Christianity as well as contemporary and cross-cultural examples. Cross-list: MDEM 305. Graduate/Undergraduate Equivalency: RELI 566. Mutually Exclusive: Credit cannot be earned for RELI 305 and RELI 566.

RELI 307 - BASIC COPTIC 1  
**Short Title:** BASIC COPTIC 1  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** A first semester introduction to Coptic grammar and vocabulary. Graduate/Undergraduate Equivalency: RELI 591. Mutually Exclusive: Credit cannot be earned for RELI 307 and RELI 591. Repeatable for Credit.

RELI 308 - BASIC COPTIC 2  
**Short Title:** BASIC COPTIC 2  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** RELI 307  
**Description:** Second semester introduction to Coptic grammar and vocabulary, with selected readings from the Coptic New Testament, Nag Hammadi, and monastic literature. Prerequisite: Introduction to Coptic Language I. Graduate/Undergraduate Equivalency: RELI 592. Mutually Exclusive: Credit cannot be earned for RELI 308 and RELI 592.

RELI 309 - BASIC COPTIC 3  
**Short Title:** BASIC COPTIC 3  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1-3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Varied readings in original language to include the New Testament, Nag Hammadi, and monastic literature. Prerequisite: Coptic 1 and 2. Graduate/Undergraduate Equivalency: RELI 593. Mutually Exclusive: Credit cannot be earned for RELI 309 and RELI 593. Repeatable for Credit.

RELI 311 - RELIGION AND HIP HOP CULTURE IN AMERICA  
**Short Title:** RELIGION AND HIP HOP  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Hip Hop culture has changed how life is discussed and conducted. However, one of the under-explored dimensions of Hip Hop culture involves its religious sensibilities. Using lectures, discussions, films, and video presentations, this course explores Hip Hop culture's religious dimensions through its musical language-rap music. RELI 311 requires additional work above the RELI 157 counterpart, including a term paper, etc. Mutually Exclusive: Credit cannot be earned for RELI 311 and RELI 157.
RELI 312 - THE RELIGIOUS THOUGHT OF MARTIN L. KING, JR. AND MALCOLM X
Short Title: MLK AND MALCOLM X
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Although many figures played a prominent role during the Civil Rights Movement, Martin L. King, Jr. and Malcolm X made unique contributions. Their work sparked important conversation concerning the methods, goals, and consequences of struggle toward liberation. This course examines their religiosity, theological sensibilities, and the major themes which surface in their writings and public work. Graduate/Undergraduate Equivalency: RELI 546. Mutually Exclusive: Credit cannot be earned for RELI 312 and RELI 546.

RELI 313 - INTRODUCTION TO SYRIAC
Short Title: INTRODUCTION TO SYRIAC
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An introduction to Syriac grammar and vocabulary. Graduate students are expected to write an exegetical paper on a Syriac text of their choice. Graduate/Undergraduate Equivalency: RELI 513. Mutually Exclusive: Credit cannot be earned for RELI 313 and RELI 513.

RELI 314 - DIVINE SEX: GENDER AND DIVINITY IN THE MIDDLE AGES
Short Title: DIVINE SEX
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will examine key medieval works, with special attention to women's writing, focusing on gender construction in mysticism and theology. Primary readings will include works by Hildegard of Bingen, Birgitta of Sweden, Margery Kempe, and others. Cross-list: MDEM 314, SWGS 314. Graduate/Undergraduate Equivalency: RELI 551. Mutually Exclusive: Credit cannot be earned for RELI 314 and RELI 551.

RELI 315 - GENDER AND ISLAM
Short Title: GENDER AND ISLAM
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Explores the lives of Muslim women in Asia, the Middle East, Europe, and North America; analyze constructions of gender in the Islamic world over time, the challenges faced from such diverse quarters as colonial administrators, Western feminists, and states, as well as movements and individuals within the Muslim world. Cross-list: ASIA 315, SWGS 315.
RELI 326 - ANGELS, POWERS, AND MONSTERS
Short Title: ANGELS, POWERS, & MONSTERS
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: "Every time a bell rings an angel gets its wings." Course examines the natures, roles, physical appearances, and functions ascribed to the intermediate beings (angels, powers, and monsters) in western thought from the Ancient Near East to the modern Period, in both academic and popular opinion. Graduate/Undergraduate Equivalency: RELI 508. Mutually Exclusive: Credit cannot be earned for RELI 326 and RELI 508.

RELI 328 - RELIGION AND GLOBAL POVERTY
Short Title: RELIGION & GLOBAL POVERTY
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Advanced study of religion and poverty in global context. Course materials will address religious, ethical anthropological theories of development, analyze specific themes economic and social development, examine the role of Faith Based Organizations and do specific case studies. Students will be graded on short reflections papers and a final term paper. Graduate/Undergraduate Equivalency: RELI 528. Mutually Exclusive: Credit cannot be earned for RELI 328 and RELI 528.

RELI 332 - ADVANCED TIBETAN LANGUAGE & CULTURE
Short Title: ADV TIBETAN LANGUAGE & CULTURE
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): RELI 132 or TIBT 132
Description: This class builds on RELI 232 and 234, now including more challenging material in Tibetan, and continuing the trajectory of gaining familiarity with Buddhist philosophical systems as these touch on epistemology, ontology, and contemplative practice. Cross-list: TIBT 332. Graduate/Undergraduate Equivalency: RELI 532. Mutually Exclusive: Credit cannot be earned for RELI 332 and RELI 532. Repeatable for Credit.

RELI 333 - KNOWING BODY/GLOWING MIND: BUDDHIST ARTS OF CONTEMPLATION AND ANALYSIS
Short Title: KNOWING BODY/GLOWING MIND
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Buddhism is a performing art engaging both mind and body. Our course investigates Buddhist and other literature, epistemology and rituals with an eye to how they speak to contemplative practice. Contemplative practice itself, in class and out, supplements our exploration of the interplay between traditional Asian and contemporary Western perspectives. Graduate/Undergraduate Equivalency: RELI 573. Recommended prerequisite(s): One course in Buddhism. Mutually Exclusive: Credit cannot be earned for RELI 333 and RELI 573. Repeatable for Credit.

RELI 334 - PSYCHOLOGY OF RELIGION
Short Title: PSYCHOLOGY OF RELIGION
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An overview of the basic approaches in the psychological understanding of religious belief and practice. Topics to be addressed in religious systems East and West include: sex, religious experience, ritual, myth, saintliness, guilt, God and meditation.

RELI 335 - MEDICINE AND THE MUSEUM: CLINICAL AESTHETICS AND THE MUSEUM OF FINE ARTS, HOUSTON
Short Title: MEDICINE AND THE MUSEUM
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Through weekly visits to the Museum of Fine Arts, Houston, this class develops key skills and engages relevant themes relating to medicine and caregiving, including observation and description, embodiment and motion, eros and suffering, vulnerable populations, grief and loss, human mortality and spiritual transcendence.
RELI 336 - RELIGION & THE SOCIAL SCIENCES

Short Title: RELIGION & THE SOCIAL SCIENCES
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Designed to introduce the student to classic and contemporary texts in the social scientific study of religion. Topics include: mysticism, the social construction of gender, the guru-disciple relationship, secularization, healing traditions East and West, cross-cultural debates. Mutually Exclusive: Credit cannot be earned for RELI 336 and RELI 260/RELI 609.

RELI 337 - SHAMANS, SAINTS, & SAGES

Short Title: SHAMANS, SAINTS, & SAGES
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Familiarize the student with diverse texts (secular and religious, East and West) found in mystical literature. Emphasis will be placed on psychological and comparative methods. Mutually Exclusive: Credit cannot be earned for RELI 337 and RELI 262.

RELI 338 - THE CHURCH OF AFRICA

Short Title: THE CHURCH OF AFRICA
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A reading course designed to examine Christianity in Africa. Course materials and readings will address the development of the church from the Patristic era to the present, paying attention to theological developments, missionization, colonialism, nationalism, prophetic movements, race relations, the role of women, and social issues. Graduate/Undergraduate Equivalency: RELI 540. Mutually Exclusive: Credit cannot be earned for RELI 338 and RELI 540.

RELI 339 - APOCALYPSE THEN AND NOW

Short Title: APOCALYPSE THEN AND NOW
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A close reading of some early Jewish apocalypses and a discussion of the apocalyptic worldview. Texts include the Book of Daniel, 1 Enoch, the Dead Sea Scrolls, and the Book of Revelation. Graduate/Undergraduate Equivalency: RELI 510. Mutually Exclusive: Credit cannot be earned for RELI 339 and RELI 510.

RELI 340 - THEOLOGY IN AFRICA

Short Title: THEOLOGY IN AFRICA
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introductory readings on theological thinking in Africa. Course will address methodological issues as well as constructive theological work on enculturation, social and economic justice, gender, health, and liberation. Read 5 major texts, write a major review, lead class discussions, discuss texts used, and write 20 page research paper. Graduate/Undergraduate Equivalency: RELI 539. Mutually Exclusive: Credit cannot be earned for RELI 340 and RELI 539.

RELI 342 - NEW RELIGIOUS MOVEMENTS IN AFRICA

Short Title: NEW RELIG MOVEMENTS IN AFRICA
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Discusses new religious movements and the religious, sociological, and political factors leading to their rise, also missionary and colonial reactions to them. Examines their relationship to indigenous religions, political praxis, and their focus on this-worldly salvation in the wake of political and economic marginality. Cross-list: ANTH 343.

RELI 343 - SEMINAR ON LOVE

Short Title: SEMINAR ON LOVE
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar explores the themes of love, sex, and spirit from the classical era through the postmodern age. We will examine literary, philosophical, and artistic expressions in painting, sculpture, cinema, novels, poetry, psychoanalysis, religion, and culture. Cross-list: HART 347.

RELI 344 - SEMINAR ON THE END OF LIFE

Short Title: END OF LIFE SEMINAR
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines themes associated with death and dying from the historical through the contemporary periods. The class will adopt highly multidisciplinary approach that combines the critical perspectives of biomedicine, religious studies, art history, philosophy, anthropology, bioethics, and cultural studies as we consider life at the end of life.
REL 348 - CHRISTIANITY AND ISLAM IN AFRICA
Short Title: CHRISTIANITY & ISLAM IN AFRICA
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Examines the growth of Christianity from its origins as a Jewish group to a religion in the mid-second century that distinguished itself from Judaism. Includes discussion of Acts, Paul’s letters, Johannine corpus, Gospel of Thomas, Pastoral, Catholic letters, Hebrews, and Revelation.

REL 350 - DEMONS, MENTAL ILLNESS AND MEDICINE
Short Title: DEMONS/MENTAL ILLNESS/MEDICINE
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Treats complex connections between religious beliefs/practices and formulation of human psychology in western tradition, through a historical reckoning with demonology. Consider the way demons are represented -- from semi-corporeal beings to marks of mental illness -- by looking at texts from the ancient world to modern psychiatry. Cross-list: MDEM 350. Mutually Exclusive: Credit cannot be earned for RELI 350 and RELI 605.

REL 356 - MAJOR ISSUES IN CONTEMPORARY ISLAM
Short Title: MAJ ISSUES CONTEMPORARY ISLAM
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: This course will focus on the major issues confronting contemporary Islam including Islamic unity, the place of the Qur’an and traditions, human rights, Islamic feminism, da’wa, education, science and Islam, globalization and medical ethics.

REL 357 - WHAT’S RELIGIOUS ABOUT BLACK RELIGION?
Short Title: IS BLACK RELIGION RELIGIOUS?
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: This course examines two questions: How is religion defined within the study of black religion? What constitutes the nature and meaning of blackness within black religion? These questions provide opportunity to explore how scholars explain what it has meant to be black and religious within the United States. Graduate/Undergraduate Equivalency. RELI 547. Mutually Exclusive: Credit cannot be earned for RELI 357 and RELI 547.

REL 359 - RELIGIOUS TOLERANCE IN THE CRUCIBLE OF GLOBALIZATION
Short Title: RELIGIOUS TOLERANCE
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Explores context and consequences of the concept of religious tolerance in the crucible of globalization politics. Background in settlement of Reformation-era religious wars; American attitudes; impetus for tolerance policies and their implementation, 1945 to present (including governmental and surveillance); results for historically Christian populations, esp. in US and Europe. Graduate/Undergraduate Equivalency. RELI 580. Mutually Exclusive: Credit cannot be earned for RELI 359 and RELI 580.

REL 361 - THE HUMANITIES OF CARE & END OF LIFE
Short Title: THE HUMANITIES OF CARE
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Pairing the perspectives of medicine, bioethics, and the medical humanities with thematic case studies in art, literature, cinema, and visual culture, the class examines the humanities of care and the end of life. Cross-list: HURC 361.

REL 363 - JEWISH PHILOSOPHY: GREAT THINKERS AND THEMES IN JEWISH THOUGHT
Short Title: JEWISH PHILOSOPHY
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: An introduction to the main figures and themes in Jewish philosophy. Topics to be discussed include reason vs faith and prophetic revelation; Israel’s chosenness vs human universalism; creation vs eternity; divine providence and necessity vs free will; evil, justice, and divine omnipotence; prayer, contemplation, and divine and human perfection.

REL 365 - PAUL AND THE NEW TESTAMENT
Short Title: PAUL & THE NEW TESTAMENT
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Examines the growth of Christianity from its origins as a Jewish group to a religion in the mid-second century that distinguished itself from Judaism. Includes discussion of Acts, Paul’s letters, Johannine corpus, Gospel of Thomas, Pastoral, Catholic letters, Hebrews, and Revelation.
RELI 368 - RISE OF THE NONES: HUMANISMS AND HUMANITIES
Short Title: RISE OF THE NONES
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will look at the rise of the “nones,” that is, individuals who affiliate with no religious tradition, through both a history of secular thought in the West and a close reading of key texts and figures. Atheism, humanism, secularism and the “spiritual but not religious” will all be treated as key categories. Graduate/Undergraduate Equivalency: RELI 568. Mutually Exclusive: Credit cannot be earned for RELI 368 and RELI 568. Repeatable for Credit.

RELI 369 - READING WRIGHT: THEISM AND ATHEISM IN THE WRITINGS OF RICHARD WRIGHT
Short Title: READING RICHARD WRIGHT
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Richard Wright’s fiction and nonfiction are important resources for understanding the nature of radicalized life in the United States. This course explores his writings for what they tell us about the role of religion in the development of identity and life meaning, and we will juxtapose the role of religion with Wright’s commentary on the nature and significance of atheism for countering injustice. Graduate/Undergraduate Equivalency: RELI 606. Mutually Exclusive: Credit cannot be earned for RELI 369 and RELI 606.

RELI 371 - CHRISTIANITY IN THE GLOBAL SOUTH
Short Title: CHRISTIANITY IN GLOBAL SOUTH
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Readings on Christianity in the Global South analyzing historical developments, mission and colonial encounters, growth and expansion; diversity of expression, the development of local initiated Churches, Pentecostalism, and public role of the Church. Graduate/Undergraduate Equivalency: RELI 561. Mutually Exclusive: Credit cannot be earned for RELI 371 and RELI 561.

RELI 375 - EPIPHANIES: SEEING IN A NEW LIGHT AND RECOGNIZING THE RADIANCE
Short Title: EPIPHANIES
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Epiphanies are events or objects that can note a striking appearance or manifestation, just as an epiphanic experience contains a significant moment of revelation. This course examines expressions of epiphanies in modernist art, literature, film, sacred experience, and in the mundane details of life itself. Cross-list: HART 328.

RELI 378 - MIND AND ART, FILM AND LITERATURE IN BUDDHISM
Short Title: BUDDHIST ART AND LITERATURE
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examines the historical origins of Messianism. The Hebrew Bible, the Dead Sea Scrolls, and other ancient texts reflect a surprising diversity of Messianic expectations in early Judaism. These form the background of early Christian depictions of Jesus of Nazareth.

RELI 381 - THE MESSIAH
Short Title: THE MESSIAH
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The biblical figures of the past. Seminar offers a close reading of some of these apocryphal/pseudepigraphic little known texts. Graduate/Undergraduate Equivalency: RELI 578. Mutually Exclusive: Credit cannot be earned for RELI 378 and RELI 578.

RELI 382 - LOST JUDAISMS: THE APOCRYPHAL WRITINGS
Short Title: LOST JUDAISMS
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: After the Hebrew Bible/Old Testament canon was closed, Jews and Christians continued to compose texts and attributed them to the biblical figures of the past. Seminar offers a close reading of some of these apocryphal/pseudepigraphic little known texts. Graduate/Undergraduate Equivalency: RELI 509. Mutually Exclusive: Credit cannot be earned for RELI 382 and RELI 509.
RELI 383 - THE DEAD SEA SCROLLS  
**Short Title:** THE DEAD SEA SCROLLS  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** A survey of the Dead Sea Scrolls as a window into the Second Temple period. A close reading of the scrolls will lead to a discussion of the theological and historical issues of the time, a period pivotal for the formation of Rabbinic Judaism and Early Christianity. Graduate/Undergraduate Equivalency: RELI 553. Mutually Exclusive: Credit cannot be earned for RELI 383 and RELI 553.

RELI 384 - PILGRIMAGE AND CRUSADE  
**Short Title:** PILGRIMAGE AND CRUSADE  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Focus on the pilgrimage to Jerusalem and Mecca by Jews, Christians, and Muslims within the context of the crusade period. Also covers the historical religious events of the crusades (approximately 1000-1300) from both a Muslim and a Christian perspective. Graduate/Undergraduate Equivalency: RELI 608. Mutually Exclusive: Credit cannot be earned for RELI 384 and RELI 608.

RELI 385 - GOD, TIME AND HISTORY  
**Short Title:** GOD, TIME AND HISTORY  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** How is the passage of time given meaning, and what role--if any--is assigned to divinity in shaping the direction of events? Course explores various forms of recording and interpreting events, drawing from ancient Mesopotamia, Israel, and the Greco-Roman world--the cultures in which modern ideas of history began. Cross-list: HIST 381. Graduate/Undergraduate Equivalency: RELI 585. Mutually Exclusive: Credit cannot be earned for RELI 385 and RELI 585.

RELI 387 - WESTERN ESOTERICISM: METHOD AND THEORY  
**Short Title:** WESTERN ESOTERICISM  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** This course explores the relation between esoteric texts and the idea of "Western Esotericism." We will look at primary writings from Agrippa to Madame Blavatsky and consider the historical and methodological approaches emerging as Esotericism is constructed as an academic area. Graduate/Undergraduate Equivalency: RELI 587. Mutually Exclusive: Credit cannot be earned for RELI 387 and RELI 587.

RELI 388 - THE PSALMS AND THEIR POETIC AFTERLIFE  
**Short Title:** PSALMS AND POETRY  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** A seminar on the biblical Psalms. This course will situate the Psalms in their ancient Near Eastern context, explore their original liturgical function in ancient Israel, and trace their afterlife in postbiblical poetry. All texts will be studied in translation. Counts for the Minor in Jewish Studies. RELI 612: Additional readings and longer paper. Graduate/Undergraduate Equivalency: RELI 612. Mutually Exclusive: Credit cannot be earned for RELI 388 and RELI 612.

RELI 390 - SEARCH FOR GOD IN THE POSTMODERN WORLD  
**Short Title:** SEARCH FOR GOD  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** On the Western Christian tradition; past and present cultural and philosophical challenges to traditional religious belief; the possibility of Christian faith and the struggle for justice and meaning. Mutually Exclusive: Credit cannot be earned for RELI 390 and RELI 280.

RELI 391 - THE REFORMATION & ITS RESULTS  
**Short Title:** THE REFORMATION & ITS RESULTS  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Theology and church-state issues from 16th-century Reformation to 17th-century; medieval background, Luther and Calvin, the Catholic Reformation; religious wars; Protestant orthodoxy; Pietist spirituality, Puritanism, and calls for toleration. Cross-list: MDEM 391. Mutually Exclusive: Credit cannot be earned for RELI 391 and RELI 286.

RELI 392 - JERUSALEM: HOLY CITY IN TIME AND IMAGINATION  
**Short Title:** JERUSALEM  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3,4  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** A course on Jerusalem's past and present, its religious meaning in Judaism, Christianity, and Islam, and its role in the modern conflict in the Middle East. Instructor Permission Required.
RELI 393 - MUTANTS AND MYSTICS: THE PARANORMAL AND POPULAR CULTURE
Short Title: MUTANTS AND MYSTICS
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Traces the "paranormal" from its elite origins around Cambridge and Harvard to its later pop-cultural expressions in pulp and science fiction, superhero comics, and film. Particular attention will be given to the role that the anomalous experiences of authors, artists, and scientists have played in this still emerging Super Story. Graduate/Undergraduate Equivalency: RELI 589. Mutually Exclusive: Credit cannot be earned for RELI 393 and RELI 589.

RELI 395 - LOSING YOUR RELIGION IN FILM & FICTION & MUSIC
Short Title: LOSING YOUR RELIGION IN FILM
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group 1
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Doubt, sex, despair, obsession, ecstasy in directors, writers, musicians wanting spiritual reboot, 1890-2015: such as Allen Ginsberg, Oscar Wilde, D.H. Lawrence, T.S. Eliot, H.P. Lovecraft, John Updike, and Ingmar Bergman. Graduate/Undergraduate Equivalency: RELI 503. Mutually Exclusive: Credit cannot be earned for RELI 395 and RELI 503.

RELI 396 - PENTECOSTALISM
Short Title: PENTECOSTALISM
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An introduction to Pentecostalism in a global context focusing historical developments, expansion in Europe, North America, Africa, Latin America and Asia. Graduate/Undergraduate Equivalency: RELI 595. Mutually Exclusive: Credit cannot be earned for RELI 396 and RELI 595.

RELI 399 - CONTEMPLATIVE PRACTICUM
Short Title: CONTEMPLATIVE PRACTICUM
Department: Religion
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Literary and artistic creativity, religious experience, and textual interpretation often draw on focused states of consciousness made possible by contemplative practices. The practicum will provide historical information about such practices and offer opportunities to participate in techniques ranging from meditation and observing breath to freeform writing and T’ai Chi. Graduate/Undergraduate Equivalency: RELI 597. Mutually Exclusive: Credit cannot be earned for RELI 399 and RELI 597. Repeatable for Credit.

RELI 400 - SENIOR THESIS
Short Title: SENIOR THESIS
Department: Religion
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Consisting of the writing of a thesis of considerable length, depth, and research, this course will function as the capstone course on writing in the discipline. Required of all majors.

RELI 401 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Religion
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Multiple sections of this course are offered. Repeatable for Credit.

RELI 402 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Religion
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Multiple sections of this course are offered. Repeatable for Credit.

RELI 405 - RELIGION AND THE NATURAL SCIENCES
Short Title: RELIGION & NATURAL SCIENCES
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This advanced seminar analyzes interdisciplinary efforts by scholars of religion to engage scientific research. We assess the possibilities for collaboration, as well as conflict, between humanistic and scientific disciplines, asking how the tools of interpretation and empiricism might enrich our understanding of religious phenomena. Graduate/Undergraduate Equivalency: RELI 610. Mutually Exclusive: Credit cannot be earned for RELI 405 and RELI 610.
RELI 406 - CHRISTIANITY AND LATE ANTIQUITY

Short Title: CHRISTIANITY & LATE ANTIQUITY

Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level

Description: This advanced seminar treats the formation of Christianity as an institutional power in relation to the Roman Empire. Starting with the Edict of Milan in 313 CE, which put an end to persecution of Christians, and closing with the Council of Chalcedon in 451 CE, which established normative Christian doctrine, we will move through this development in seven roughly chronological units. Graduate/Undergraduate Equivalency: RELI 506. Mutually Exclusive: Credit cannot be earned for RELI 406 and RELI 506.

RELI 415 - SECRET RELIGION

Short Title: SECRET RELIGION

Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level

Description: Examines religious currents that operate in the margins of traditional religion: the gnostic, esoteric and mystical. Covers how these categories were theorized. Explores how they continue to identify contemporary religious currents that are considered transgressive and are rejected by conventional religious authorities. Class is grounded in antiquity and historical method. Graduate/Undergraduate Equivalency: RELI 615. Mutually Exclusive: Credit cannot be earned for RELI 415 and RELI 615.

RELI 416 - BEGINNINGS OF CHRISTIANITY

Short Title: BEGINNINGS OF CHRISTIANITY

Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level

Description: How did Christianity emerge as a new religious movement in the Roman Empire? Covers the history and literature of the first five generations of Christians (10 BCE - 190 CE), focusing on Post-Temple developments, issues of authority and leadership, rise of regional forms of Christianity, and formation of distinct Christian identities. Graduate/Undergraduate Equivalency: RELI 616. Mutually Exclusive: Credit cannot be earned for RELI 416 and RELI 616.

RELI 421 - FOUCAULT & THE HERMENEUTICS OF SELF

Short Title: FOUCAULT & THE SELF

Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level

Description: Best known for analyzing domination and power, Michel Foucault shifts his attention to ethics and "technologies of the self" in 1976. In this advanced seminar, we study and critique Foucault's turn to western antiquity through his lectures and volumes of foregrounding resistance to power through religion, politics and ethics. Graduate/Undergraduate Equivalency: RELI 569. Mutually Exclusive: Credit cannot be earned for RELI 421 and RELI 569.

RELI 423 - AFRICAN MYTHS AND RITUALS

Short Title: AFRICAN MYTHS AND RITUALS

Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level

Description: Explore and analyze specific myths and rituals which provide legitimation for community ceremonies and that serve as a basis for the negotiation of power and ideology for members within that community. Readings from classic theorists: Durkheim, Levi-Strauss, Edmond Leach, Gennap and Turner, and contemporary theorists: Webner, Heusch, Comaroff, and Ray. Cross-list: ANTH 423. Graduate/Undergraduate Equivalency: RELI 537. Mutually Exclusive: Credit cannot be earned for RELI 423 and RELI 537.

RELI 424 - RELIGION AND POLITICS IN AFRICA

Short Title: RELIGION & POLITICS IN AFRICA

Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level

Description: Course explores interdisciplinary perspectives on religion and politics in Africa focusing on indigenous religious, Christianity, and Islam. Readings will reflect theoretical perspectives, historical developments, regional angels, and contemporary issues such as sharia, gender, and reconciliation as political options. Graduate/Undergraduate Equivalency: RELI 534. Mutually Exclusive: Credit cannot be earned for RELI 424 and RELI 534. Repeatable for Credit.
RELI 426 - RELIGION AND LITERATURE IN AFRICA
Short Title: RELIGION AND LITERATURE IN AFRICA
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A survey of the historical development of the psychology of religion and its conversation with theology, comparative studies, gender studies, sociology, and anthropology. Topics include: mysticism, eroticism, conversion, feminism, psychobiography. Examples drawn from a variety of religious traditions. Readings include: Freud, Jung, Tillich, Erikson, Kristeva, Kakar. Graduate/Undergraduate Equivalency: RELI 584. Mutually Exclusive: Credit cannot be earned for RELI 430 and RELI 584.

RELI 433 - TIBETAN LANGUAGE AND CULTURE
Short Title: RELIGION AND COGNITIVE SCIENCE
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A survey of the historical development of the psychology of religion and its conversation with theology, comparative studies, gender studies, sociology, and anthropology. Topics include: mysticism, eroticism, conversion, feminism, psychobiography. Examples drawn from a variety of religious traditions. Readings include: Freud, Jung, Tillich, Erikson, Kristeva, Kakar. Graduate/Undergraduate Equivalency: RELI 584. Mutually Exclusive: Credit cannot be earned for RELI 430 and RELI 584.
RELI 442 - CLASSICAL AND CONTEMPORARY ARABIC TEXTS
Short Title: ARABIC TEXTS
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study and read classical Arabic texts with the goal of learning the material as well as the syntax and grammar of Arabic. Repeatable for Credit.

RELI 443 - MAIMONIDES "GUIDE FOR THE PERPLEXED"
Short Title: MAIMONIDES GUIDE PERPLEXED
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will closely read the classic text of Judeo-Muslim thought, Maimonides Guide for the Perplexed, in its historical philosophical and literary context. It will draw upon additional Jewish and Muslim sources as well. Graduate/Undergraduate Equivalency: RELI 565. Mutually Exclusive: Credit cannot be earned for RELI 443 and RELI 565.

RELI 444 - VISIONS AND VISIONARY PRACTICES: MEDIEVAL TO MODERN
Short Title: VISIONS & VISIONARY PRACTICES
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines accounts of visions, comparing medieval and modern visionary techniques and processes and relating visionary writings to cultural and personal contexts. Includes some Christian theology along with other theoretical frameworks, but emphasis on praxis. Cross-list: MDEM 444. Graduate/Undergraduate Equivalency: RELI 644. Mutually Exclusive: Credit cannot be earned for RELI 444 and RELI 644.

RELI 449 - EARLY CHRISTIAN CONTROVERSIES
Short Title: EARLY CHRISTIAN CONTROVERSIES
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar examines controversies and debates among the early Christians as catholic Christianity emerged from a diversity of Christian movements. Literature reviewed will vary. Students will select to focus on one controversy and write a research paper (undergraduates, 5000 words; graduate students, 7500 words). Oral discussion and presentations will be required. Graduate/Undergraduate Equivalency: RELI 549. Mutually Exclusive: Credit cannot be earned for RELI 449 and RELI 549. Repeatable for Credit.

RELI 456 - HISTORY OF WESTERN CHRISTIANITY: REFORMATION TO THE PRESENT
Short Title: REFORMATION TO THE PRESENT
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A history of the development of the modern category of "mysticism" from the seventeenth century to today, with side studies of cognate terms like "spirituality," "metaphysical religion," and the "paranormal," as these forms of extreme religious experience are by social-scientific and humanistic methods. RELI 558: Additional readings and writing. Graduate/Undergraduate Equivalency: RELI 558. Mutually Exclusive: Credit cannot be earned for RELI 456 and RELI 558.

RELI 458 - MYSTICISM: THEORIES AND METHODS
Short Title: MYSTICISM
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A history of the development of the modern category of "mysticism" from the seventeenth century to today, with side studies of cognate terms like "spirituality," "metaphysical religion," and the "paranormal," as these forms of extreme religious experience are by social-scientific and humanistic methods. RELI 558: Additional readings and writing. Graduate/Undergraduate Equivalency: RELI 558. Mutually Exclusive: Credit cannot be earned for RELI 456 and RELI 558.

RELI 462 - ENGLISH SPIRITUALITY AFTER HENRY VIII: PROTESTANT, CATHOLIC, OR ANGLICAN?
Short Title: ENGLISH SPIRITUALITY
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines accounts of visions, comparing medieval and modern visionary techniques and processes and relating visionary writings to cultural and personal contexts. Includes some Christian theology along with other theoretical frameworks, but emphasis on praxis. Cross-list: MDEM 444. Graduate/Undergraduate Equivalency: RELI 644. Mutually Exclusive: Credit cannot be earned for RELI 444 and RELI 644.

RELI 470 - BUDDHIST WISDOM TEXTS
Short Title: BUDDHIST WISDOM TEXTS
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Reformations after death of Lhasa includes a reinterpretation of key topics, texts in spiritual practice, e.g.: ecclesiastical discipline; secularization; stylized and free-form intersections of English time and Christian eternity; King James Bible; Book of Common Prayer; "saintly revolution;" Thomas Cranmer; William Laud; William Shakespeare; Lancelot Andrewes; John Donne; J.H. Newman; hymnody; C.S. Lewis; T.S. Eliot. Cross-list: MDEM 462. Graduate/Undergraduate Equivalency: RELI 543. Mutually Exclusive: Credit cannot be earned for RELI 462 and RELI 543.
RELI 472 - KABBALAH SEMINAR
Short Title: KABBALAH SEMINAR
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar will delve into literature known as "kabbalah." through close readings of first-hand accounts of thinkers and mystics known as "kabbalists," will explore themes like secrecy and mystery, the nature of the divine, and religious ecstasy. Graduate/Undergraduate Equivalency: RELI 582. Mutually Exclusive: Credit cannot be earned for RELI 472 and RELI 582.

RELI 476 - FROM DECOLONIZATION TO GLOBALIZATION
Short Title: FROM DECOLONI TO GLOBALIZATION
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level

RELI 504 - RELIGIONS IN AMERICA
Short Title: RELIGIONS IN AMERICA
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Examines the religions and religious practices of America from colonial encounter with native peoples to the contemporary period with a special focus on the morphing natures and historical complexities of American Christianities, religious pluralism and secularism. Graduate students will be required to read a standard and well-known two-volume, 1,200-page collection of primary historical sources. They will also write a research paper (25-30 pages) that is approximately twice as long as the undergraduate paper. Graduate/Undergraduate Equivalency: RELI 300. Mutually Exclusive: Credit cannot be earned for RELI 504 and RELI 300.

RELI 505 - AMERICAN METAPHYSICAL RELIGION
Short Title: AMERICAN METAPHYSICAL RELIGION
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Beginning with a historical survey of the American metaphysical tradition, this course turns to a close study of the Esalen Institute in Big Sur, CA, as a unique window to some of the different ways tradition has appropriated Asian religions, psychological models of the unconscious, and contemporary scientific paradigms. Graduate/Undergraduate Equivalency: RELI 231. Mutually Exclusive: Credit cannot be earned for RELI 505 and RELI 231.

RELI 506 - CHRISTIANITY AND LATE ANTIQUITY
Short Title: CHRISTIANITY & LATE ANTIQUITY
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This advanced seminar treats the formation of Christianity as an institutional power in relation to the Roman Empire. Starting with the Edict of Milan in 313 CE, which put an end to persecution of Christians, and closing with the Council of Chalcedon in 451 CE, which established normative Christian doctrine, we will move through this development in seven roughly chronological units. Graduate/Undergraduate Equivalency: RELI 406. Mutually Exclusive: Credit cannot be earned for RELI 506 and RELI 406.

RELI 507 - INTRODUCTION TO BIBLICAL HEBREW I
Short Title: INTRO TO BIBLICAL HEBREW I
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An introduction to Biblical Hebrew with emphasis on grammar and vocabulary. Write an exegetical paper on a Hebrew text of your choice. Instructor Permission Required. Graduate/Undergraduate Equivalency: RELI 125. Mutually Exclusive: Credit cannot be earned for RELI 507 and RELI 125.

RELI 508 - ANGELS, POWERS, AND MONSTERS
Short Title: ANGELS, POWERS, & MONSTERS
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: "Every time a bell rings an angel gets its wings." Course examines the natures, roles, physical appearances, and functions ascribed to the intermediate beings (angels, powers, and monsters) in western thought from the Ancient Near East to the modern Period, in both academic and popular opinion. RELI 561 - CHRISTIANITY IN THE GLOBAL SOUTH  
**Short Title:** CHRISTIANITY IN GLOBAL SOUTH  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Readings on Christianity in the Global South analyzing historical developments, mission and colonial encounters, growth and expansion; diversity of expression, the development of local initiated Churches, Pentecostalism, and public role of the Church. Graduate students will lead class on a church in a country of their choice. Each graduate student will prepare and lead a seminar on one aspect of the region or country. Each graduate student will also present in class an in-depth study of a selected theme. Graduate students will read additional books selected from a list of texts discussed with instructor. They will also write a 25 page research paper on any topic in Global Christianity. Graduate/Undergraduate Equivalency: RELI 371. Mutually Exclusive: Credit cannot be earned for RELI 561 and RELI 371.

RELI 564 - TIBETAN LANGUAGE, LITERATURE AND CULTURE II  
**Short Title:** TIBETAN LANG LIT & CULTURE II  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Continued training in Tibetan language-extending vocabulary and facility with grammar. Final includes a paper drawn from readings and class discussion. RELI 564: Write a paper approximately one-third longer and complete a more substantial oral presentation. Graduate/Undergraduate Equivalency: RELI 234. Mutually Exclusive: Credit cannot be earned for RELI 564 and RELI 234. Repeatable for Credit.

RELI 565 - MAIMONIDES GUIDE FOR THE PERPLEXED"  
**Short Title:** MAIMONIDES GUIDE PERPLEXED  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course will closely read the classic text of Judeo-Muslim thought, Maimonides Guide for the Perplexed, in its historical philosophical and literary context. It will draw upon additional Jewish and Muslim sources as well. Graduate/Undergraduate Equivalency: RELI 443. Mutually Exclusive: Credit cannot be earned for RELI 565 and RELI 443.

RELI 560 - ADVANCED READINGS IN TIBETAN TEXTS  
**Short Title:** READING TIBETAN TEXTS  
**Department:** Religion  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 1-4  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course is to accommodate Grad students' requests to read more widely in Tibetan texts and genres. Our focus is reading and disciplined discussion of the texts. Repeatable for Credit.
RELI 566 - PAIN, ECSTASY AND EMBODIMENT IN RELIGIOUS EXPERIENCE
Short Title: PAIN, ECSTASY AND EMBODIMENT
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: From exorcism to other worldly visions, we experience religion as embodied human beings. This course explores embodied religion by focusing on connections between pain and transcendence, looking at medieval Christianity as well as contemporary and cross-cultural examples. Graduate students will do additional presentation, extra reading, and longer final essay. Graduate/Undergraduate Equivalency: RELI 305. Mutually Exclusive: Credit cannot be earned for RELI 566 and RELI 305.

RELI 568 - RISE OF THE NONES: HUMANISMS AND HUMANITIES
Short Title: RISE OF THE NONES
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will look at the rise of the “nones,” that is, individuals who affiliate with no religious tradition, through both a history of secular thought in the West and a close reading of key texts and figures. Atheism, humanism, secularism and the “spiritual but not religious” will all be treated as key categories. RELI 568 will require additional readings, 3 additional papers plus a longer research paper, leading discussions and teaching. Graduate/Undergraduate Equivalency: RELI 368. Mutually Exclusive: Credit cannot be earned for RELI 568 and RELI 368. Repeatable for Credit.

RELI 569 - FOUCAULT & THE HERMENEUTICS OF SELF
Short Title: FOUCAULT & THE SELF
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Best known for analyzing domination and power, Michel Foucault shifts his attention to ethics and “technologies of the self” in 1976. In this advanced seminar, we study and critique Foucault’s turn to western antiquity through his lectures and volumes of foregrounding resistance to power through religion, politics and ethics. Graduate/Undergraduate Equivalency: RELI 421. Mutually Exclusive: Credit cannot be earned for RELI 569 and RELI 421.

RELI 570 - BUDDHIST WISDOM TEXTS
Short Title: BUDDHIST WISDOM TEXTS
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Indo-Tibetan analyses of the mind and its functions, especially differing views on the role of reasoning and the nature of the “ultimate” in major philosophical schools of Tibet and India. RELI 570: More difficult readings and two longer papers required. Graduate/Undergraduate Equivalency: RELI 470. Mutually Exclusive: Credit cannot be earned for RELI 570 and RELI 470. Repeatable for Credit.

RELI 572 - INTRODUCTION TO BUDDHISM: ARTS FOR LIFE
Short Title: INTRODUCTION TO BUDDHISM
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Buddhist ideas, art, and meditation. Exploration of the Buddhism in India, China, and Japan and their impact in the USA today. Readings include Buddhists classics and contemporary responses from mediators and scientists. Additional readings, more writing. Graduate/Undergraduate Equivalency: RELI 322. Mutually Exclusive: Credit cannot be earned for RELI 572 and RELI 322.

RELI 573 - KNOWING BODY/GLOWING MIND: BUDDHIST ARTS OF CONTEMPLATION AND ANALYSIS
Short Title: KNOWING BODY/GLOWING MIND
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Buddhism is a performing art engaging both mind and body. Our course investigates Buddhist and other literature, epistemology and rituals with an eye to how they speak to contemplative practice. Contemplative practice itself, in class and out, supplements our exploration of the interplay between traditional Asian and contemporary Western perspectives. Graduate/Undergraduate Equivalency: RELI 333. Recommended prerequisite(s): One course in Buddhism. Mutually Exclusive: Credit cannot be earned for RELI 573 and RELI 333. Repeatable for Credit.

RELI 577 - THE KNOWING BODY: BUDDHISM, GENDER, AND THE SOCIAL WORLD
Short Title: BUDDHISM, GENDER, & SOCIETY
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: . Mutually Exclusive: Credit cannot be earned for RELI 577 and RELI 333.
RELI 578 - MIND AND ART, FILM AND LITERATURE IN BUDDHISM  
Short Title: BUDDHIST ART AND LITERATURE  
Department: Religion  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: What is mind? What is self? What can a human being become? Drawing on a wealth of Buddhist-related art, film, and literature, this course introduces you to Tibetan and other Buddhist approaches to these crucial questions. RELI 578 requires additional readings and research papers. Graduate/Undergraduate Equivalency: RELI 378. Mutually Exclusive: Credit cannot be earned for RELI 578 and RELI 378.  

RELI 580 - RELIGIOUS TOLERANCE IN THE CRUCIBLE OF GLOBALIZATION  
Short Title: RELIGIOUS TOLERANCE  
Department: Religion  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Explores context and consequences of the concept of religious tolerance in the crucible of globalization politics. Background in settlement of Reformation-era religious wars; American attitudes; impetus for tolerance policies and their implementation, 1945 to present (including governmentality and surveillance); results for historically Christian populations, esp. in US and Europe. Graduate/Undergraduate Equivalency: RELI 359. Mutually Exclusive: Credit cannot be earned for RELI 580 and RELI 359.  

RELI 581 - Gnosticism Seminar  
Short Title: GNOSTICISM SEMINAR  
Department: Religion  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: In depth examination of one (or more) Gnostic texts within its literary, social, historical, and religious landscapes. RELI 581 requires preparation and delivery of public presentations. Graduate/Undergraduate Equivalency: RELI 481. Mutually Exclusive: Credit cannot be earned for RELI 581 and RELI 481.  

RELI 582 - Kabbalah Seminar  
Short Title: KABBALAH SEMINAR  
Department: Religion  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This seminar will delve into literature known as “kabbalah.” through close readings of first-hand accounts of thinkers and mystics known as “kabbalists,” will explore themes like secrecy and mystery, the nature of the divine, and religious ecstasy. RELI 562 requirements: Additionally write a lengthy research paper and lead a session. Graduate/Undergraduate Equivalency: RELI 472. Mutually Exclusive: Credit cannot be earned for RELI 582 and RELI 472.  

RELI 584 - Religion, Psychology, and Culture  
Short Title: RELIGION, PSYCHOLOGY & CULTURE  
Department: Religion  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course explores the relation between esoteric texts and the idea of “Western Esotericism.” We will look at primary writings from Agrippa to Madame Blavatsky and consider the historical and methodological approaches emerging as Esotericism is constructed as an academic area. Extra readings and writing a longer essay is required in RELI 587. Graduate/Undergraduate Equivalency: RELI 387. Mutually Exclusive: Credit cannot be earned for RELI 580 and RELI 387.  

RELI 585 - God, Time and History  
Short Title: GOD, TIME AND HISTORY  
Department: Religion  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: An historical survey of the History of Religions School that emerged in the 1960s and 70s at the University of Chicago and came to play such an important role in the comparative study of religion. Graduate Students will have twice the reading and will require a longer paper. Graduate/Undergraduate Equivalency: RELI 385. Mutually Exclusive: Credit cannot be earned for RELI 580 and RELI 387.  

RELI 587 - Western Esotericism: Method and Theory  
Short Title: WESTERN ESOTERICISM  
Department: Religion  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course explores the relation between esoteric texts and the idea of “Western Esotericism.” We will look at primary writings from Agrippa to Madame Blavatsky and consider the historical and methodological approaches emerging as Esotericism is constructed as an academic area. Extra readings and writing a longer essay is required in RELI 587. Graduate/Undergraduate Equivalency: RELI 387. Mutually Exclusive: Credit cannot be earned for RELI 580 and RELI 387.  

RELI 588 - The History of Religions School  
Short Title: HISTORY OF RELIGIONS  
Department: Religion  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: An historical survey of the History of Religions School that emerged in the 1960s and 70s at the University of Chicago and came to play such an important role in the comparative study of religion. Graduate Students will have twice the reading and will require a longer paper. Graduate/Undergraduate Equivalency: RELI 488. Mutually Exclusive: Credit cannot be earned for RELI 580 and RELI 488.
RELI 589 - MUTANTS AND MYSTICS: THE PARANORMAL AND POPULAR CULTURE
Short Title: MUTANTS AND MYSTICS
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Traces the "paranormal" from its elite origins around Cambridge and Harvard to its later pop-cultural expressions in pulp and science fiction, superhero comics, and film. Particular attention will be given to the role that the anomalous experiences of authors, artists, and scientists have played in this still emerging Super Story. RELI 589 requires: Double the reading and a 30-page paper. Graduate/Undergraduate Equivalency: RELI 393. Mutually Exclusive: Credit cannot be earned for RELI 589 and RELI 393.

RELI 590 - AFRICAN AMERICAN LITERATURE AND RELIGION
Short Title: AF/AM LITERATURE & RELIGION
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: In this seminar students will read and analyze African American literature in order to explore the various ways in which African Americans have understood and articulated the nature and meaning of African American religious experience and practice. Graduate/Undergraduate Equivalency: RELI 490. Mutually Exclusive: Credit cannot be earned for RELI 590 and RELI 490.

RELI 591 - BASIC COPTIC 1
Short Title: BASIC COPTIC 1
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A first semester introduction to Coptic grammar and vocabulary. Select a Coptic text, read in its original language, and prepare a commentary or an exegesis on that text (5,000 words). Graduate/Undergraduate Equivalency: RELI 393. Mutually Exclusive: Credit cannot be earned for RELI 591 and RELI 393.

RELI 592 - BASIC COPTIC 2
Short Title: BASIC COPTIC 2
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): RELI 307
Description: Second semester introduction to Coptic grammar and vocabulary, with selected readings from the Coptic New Testament, Nag Hammadi, and monastic literature. Pre-requisite: Introduction to Coptic Language I RELI 592: Select a Coptic text, read in its original language, and prepare a commentary or an exegesis on that text (5,000 words). Graduate/Undergraduate Equivalency: RELI 308. Mutually Exclusive: Credit cannot be earned for RELI 592 and RELI 308.

RELI 593 - BASIC COPTIC 3
Short Title: BASIC COPTIC 3
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Varied readings in original language to include the New Testament, Nag Hammadi, and monastic literature. Pre-requisite: Coptic 1 and 2. RELI 593: Students will select a Coptic text, and in addition to reading it in its original language, prepare a commentary or an exegesis on that text (5,000 words). Graduate/Undergraduate Equivalency: RELI 309. Mutually Exclusive: Credit cannot be earned for RELI 593 and RELI 309. Repeatable for Credit.

RELI 595 - PENTECOSTALISM
Short Title: PENTECOSTALISM
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate study and analysis of introduction to Pentecostalism in a global context focusing historical developments, expansion in Europe, North America, Africa, Latin America and Asia. Graduate students will read 4 additional texts one from East, Central, West, and Southern Africa. Graduate students will write weekly reflections on the reading to the braded satisfactory or unsatisfactory. They will do two presentations during the semester. Each student will write a research paper that will be at least 25 double spaced pages. Graduate/Undergraduate Equivalency: RELI 396. Mutually Exclusive: Credit cannot be earned for RELI 595 and RELI 396.

RELI 596 - THE LEGAL FRAMEWORK OF RELIGIOUS TOLERANCE
Short Title: LEGAL FRMWK RELI TOLERANCE
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The American Constitution embodies a complex experiment in religious tolerance, including the promise of "free exercise of religion" and the prohibition of laws "respecting an establishment of religion". In this class we will primarily seek a critical understanding of our tolerance-rich legal invocations of religious freedom and address fundamental issues such as how can we distinguish "religious" actions and commitments from other morally important beliefs and activities. RELI 596: Write additional paper and more readings. Graduate/Undergraduate Equivalency: RELI 310. Mutually Exclusive: Credit cannot be earned for RELI 596 and RELI 320.
RELI 597 - CONTEMPLATIVE PRACTICUM  
Short Title: CONTEMPLATIVE PRACTICUM  
Department: Religion  
Grade Mode: Standard Letter  
Course Type: Internship/Practicum  
Credit Hour: 1  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Literary and artistic creativity, religious experience, and textual interpretation often draw on focused states of consciousness made possible by contemplative practices. The practicum will provide historical information about such practices and offer opportunities to participate in techniques ranging from meditation and observing breath to freeform writing and T'ai Chi. Graduate students would be expected to write a longer paper and/or to include a segment on contemplative practice in connection with whatever course they are taking. In either case this will involve readings and issues beyond what the undergraduates are responsible for, and which will be developed with each graduate student on an individual basis. Graduate/Undergraduate Equivalency: RELI 399. Mutually Exclusive: Credit cannot be earned for RELI 597 and RELI 399. Repeatable for Credit.

RELI 600 - GEM RESEARCH FORUM  
Short Title: GEM RESEARCH FORUM  
Department: Religion  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Research  
Credit Hour: 1  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: The GEM Research Forum meets regularly throughout the academic year to share and engage the ongoing research of the GEM faculty and students. The annual capstone experience of the Forum features an invited speaker. Evaluation is based on student participation, research and presentations.

RELI 602 - THE SACRED ARTS OF SECULAR MODERNISM  
Short Title: SACRED ARTS SECULAR MODERNISM  
Department: Religion  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course examines various representations of spirituality and the sacred in modernist and post modernist aesthetics, and their corresponding expressions in historical and contemporary museum practices. Special emphasis will be placed on the outstanding collections of the adjacent museum district, the Menil Collection, and the Museum of Fine Arts, Houston. RELI 602 will be expected to complete a larger-scale final project in consultation with the instructor. The final project will engage a broadened scope of critical methodologies which, in turn, reflect the ways in which both texts and artworks serve as primary objects of study. Graduate/Undergraduate Equivalency: RELI 394. Mutually Exclusive: Credit cannot be earned for RELI 602 and RELI 394.

RELI 606 - READING WRIGHT: THEISM AND ATHEISM IN THE WRITINGS OF RICHARD WRIGHT  
Short Title: READING RICHARD WRIGHT  
Department: Religion  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Richard Wright's fiction and nonfiction are important resources for understanding the nature of radicalized life in the United States. This course explores his writings for what they tell us about the role of religion in the development of identity and life meaning, and we will juxtapose the role of religion with Wright's commentary on the nature and significance of atheism for countering injustice. RELI 606 requires additional reflection papers, longer research paper and class presentations. Graduate/Undergraduate Equivalency: RELI 369. Mutually Exclusive: Credit cannot be earned for RELI 606 and RELI 369.

RELI 608 - PILGRIMAGE AND CRUSADE  
Short Title: PILGRIMAGE AND CRUSADE  
Department: Religion  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Focus on the pilgrimage to Jerusalem and Mecca by Jews, Christians, and Muslims within the context of the crusade period. Also covers the historical religious events of the crusades (approximately 1000-1300) from both a Muslim and a Christian perspective. RELI 608 requires additional readings, lengthy paper, and oral presentations. Graduate/Undergraduate Equivalency: RELI 384. Mutually Exclusive: Credit cannot be earned for RELI 608 and RELI 384.

RELI 610 - RELIGION AND THE NATURAL SCIENCES  
Short Title: RELIGION & NATURAL SCIENCES  
Department: Religion  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This advanced seminar analyzes interdisciplinary efforts by scholars of religion to engage scientific research. We assess the possibilities for collaboration, as well as conflict, between humanistic and scientific disciplines, asking how the tools of interpretation and empiricism might enrich our understanding of religious phenomena. RELI 610 requires additional reading and longer research paper. Graduate/Undergraduate Equivalency: RELI 405. Mutually Exclusive: Credit cannot be earned for RELI 610 and RELI 405.

RELI 611 - READINGS IN MEDIEVAL LATIN  
Short Title: READINGS IN MEDIEVAL LATIN  
Department: Religion  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Guided readings in Latin from a range of medieval genres, including medicine, theology, visionary literature. Repeatable for Credit.
RELI 612 - THE PSALMS AND THEIR POETIC AFTERLIFE
Short Title: PSALMS AND POETRY
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A seminar on the biblical Psalms. This course will situate the Psalms in their ancient Near Eastern context, explore their original liturgical function in ancient Israel, and trace their afterlife in postbiblical poetry. All texts will be studied in translation. Counts for the Minor in Jewish Studies. RELI 612: Additional readings and longer paper. Graduate/Undergraduate Equivalency: RELI 388. Mutually Exclusive: Credit cannot be earned for RELI 612 and RELI 388.

RELI 614 - THE RICE/LEIPZIG SEMINAR ON EARLY JUDAISM AND CHRISTIAN ORIGINS
Short Title: THE RICE/LEIPZIG SEMINAR
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate seminar on Early Judaism and Christian Origins taught jointly by Dr. Matthias Henze (Rice) and Dr. Jens Herzer (University of Leipzig, Germany). Participation is by invitation only. Instructor Permission Required.

RELI 615 - SECRET RELIGION
Short Title: SECRET RELIGION
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Examines religious currents that operate in the margins of traditional religion: the gnostic, esoteric and mystical. Covers how these categories were theorized. Explores how they continue to identify Christian theology along with other theoretical frameworks, but emphasis on praxis. Graduate work includes 10 additional readings (~200 pp), double the pages to be written, 30 more minutes presentation time. Graduate/Undergraduate Equivalency: RELI 444. Mutually Exclusive: Credit cannot be earned for RELI 644 and RELI 444.

RELI 616 - BEGINNINGS OF CHRISTIANITY
Short Title: BEGINNINGS OF CHRISTIANITY
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: How did Christianity emerge as a new religious movement in the Roman Empire? Covers the history and literature of the first five generations of Christians (10 BCE - 190 CE), focusing on Post-Temple developments, issues of authority and leadership, rise of regional forms of Christianity, and formation of distinct Christian identities. Graduate requirements: additional writings and presentations. Graduate/Undergraduate Equivalency: RELI 416. Mutually Exclusive: Credit cannot be earned for RELI 616 and RELI 416.

RELI 644 - VISIONS AND VISIONARY PRACTICES: MEDIEVAL TO MODERN
Short Title: VISIONS & VISIONARY PRACTICES
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course examines accounts of visions, comparing medieval and modern visionary techniques and processes and relating visionary writings to cultural and personal contexts. Includes some visionary writings to cultural and personal contexts. Includes some Christian theology along with other theoretical frameworks, but emphasis on praxis. Graduate work includes 10 additional readings (~200 pp), double the pages to be written, 30 more minutes presentation time. Graduate/Undergraduate Equivalency: RELI 444. Mutually Exclusive: Credit cannot be earned for RELI 644 and RELI 444.

RUSS 141 - FIRST YEAR RUSSIAN I
Short Title: FIRST YEAR RUSSIAN I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Development of interactional competence in Russian (sociolinguistic and sociocultural knowledge) to communicate and interact with speakers of Russian. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. No prior knowledge of this language is necessary. Placement Test is required.
Course URL: clicrussian.blogs.rice.edu
RUSS 142 - FIRST YEAR RUSSIAN II
Short Title: FIRST YEAR RUSSIAN II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): RUSS 141
Description: Continuation of RUSS 141. Development of interactional competence in Russian (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Russian. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for RUSS 142 and RUSS 262.
Course URL: clicrussian.blogs.rice.edu

RUSS 263 - SECOND YEAR RUSSIAN I
Short Title: SECOND YEAR RUSSIAN I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): RUSS 142
Description: Continuation of RUSS 142. Development of interactional competence in Russian (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Russian. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for RUSS 263 and RUSS 201.
Course URL: clicrussian.blogs.rice.edu

RUSS 264 - SECOND YEAR RUSSIAN II
Short Title: SECOND YEAR RUSSIAN II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): RUSS 263
Description: Continuation of RUSS 263. Development of interactional competence in Russian (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Russian. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for RUSS 264 and RUSS 202.
Course URL: clicrussian.blogs.rice.edu

RUSS 301 - THIRD YEAR RUSSIAN I
Short Title: THIRD YEAR RUSSIAN I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): RUSS 264
Description: Continuation of RUSS 264. Emphasis on developing reading and writing ability as more authentic materials and socio-cultural topics are introduced.
Course URL: clicrussian.blogs.rice.edu

RUSS 302 - THIRD YEAR RUSSIAN II
Short Title: THIRD YEAR RUSSIAN II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): RUSS 301
Description: Continuation of RUSS 301. Emphasis on developing reading and writing ability as more authentic materials and socio-cultural topics are introduced.
Course URL: clicrussian.blogs.rice.edu

Social Sciences (SOSC)

SOSC 221 - PROFESSIONAL EXCELLENCE FOR SOCIAL SCIENCES MAJORS
Short Title: PROF EXCELLENCE FOR SS MAJORS
Department: Social Sciences Division
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Internship/Practicum
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Guided professional internship course for social sciences majors. Instructor Permission Required.

SOSC 238 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Social Sciences Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Topics and credit hours vary each semester. Contact department for current semester’s topic(s). Repeatable for Credit.
SOSC 250 - THINKING DIFFERENTLY: NEW APPROACHES TO IDEAS, PEOPLE, SOLUTIONS AND PROBLEMS
Short Title: THINKING DIFFERENTLY
Department: Social Sciences Division
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This class meets select Wednesdays from 4-5 PM followed by small group discussion. The class explores changes in the economy and information technology that give rise to questions about the future of ideas, work and careers, identity and relationships, and solutions and problems. Repeatable for Credit.
Course URL: freestylerice.org (http://freestylerice.org)

SOSC 300 - BAKER INSTITUTE INTRODUCTION TO PUBLIC POLICY
Short Title: INTRODUCTION TO PUBLIC POLICY
Department: Social Sciences Division
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Taught by Baker Institute Fellow, this course is designed to introduce students to the field of public policy as well as to important policy issues. Topic areas include the Middle East, China, Mexico, energy security, environmental challenges, globalization, health policy, tax policy, and Texas and Houston politics.

SOSC 301 - POLICY ANALYSIS
Short Title: POLICY ANALYSIS
Department: Social Sciences Division
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Familiarizes students with the analytical tools necessary for evaluating and analyzing public policies. Cross-list: POLI 338. Mutually Exclusive: Credit cannot be earned for SOSC 301 and POST 338.

SOSC 322 - GATEWAY STUDY OF LEADERSHIP I
Short Title: GATEWAY STUDY OF LEADERSHIP I
Department: Social Sciences Division
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The Gateway Study of Leadership is a student-led research cohort based in the School of Social Sciences that focuses on leadership and power dynamics within academia as well as common themes in the professional development of faculty members. Students enrolled in the program will perform qualitative research through conducting and transcribing interviews with faculty members. Students will also develop their own leadership skills by attending breakfasts and lunches with prominent leaders in the Rice community and participating in retreats and workshops. Instructor Permission Required. Repeatable for Credit.

SOSC 323 - GATEWAY STUDY OF LEADERSHIP II
Short Title: GATEWAY OF LEADERSHIP II
Department: Social Sciences Division
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Continuation of the Gateway of Leadership from the fall semester. Students will continue to develop their own leadership skills by attending breakfasts and lunches with prominent leaders in the Rice community. After having conducted and transcribed interviews in the fall, students will code these interviews for common themes. Compiled research will be published as the "Turning Points" booklet series by the School of Social Sciences. Students will further produce a research paper and a poster to be presented at the Rice Undergraduate Research Symposium. Instructor Permission Required. Repeatable for Credit.

SOSC 330 - HEALTH CARE REFORM IN THE 50 STATES
Short Title: HEALTH CARE REFORM IN U.S.
Department: Social Sciences Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examination of those states that have undertaken comprehensive health system reform, have carried out more limited revisions, or have failed to even begin the process, assessing successes and failures. Includes general theories of state-federal relationships and the role of the federal government in state health reform.

SOSC 405 - LAW PRACTICUM
Short Title: LAW PRACTICUM
Department: Social Sciences Division
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students will participate in a semester-long "practicum" with a sitting judge (federal, or Texas appellate) in Houston. This program is designed to give select Rice undergraduates a broad and practical introduction to what lawyers do in court and how judges and the law clerks who work with them think about the questions they are asked to resolve. Instructor Permission Required. Repeatable for Credit.

SOSC 406 - JUDICIAL PRACTICUM
Short Title: JUDICIAL PRACTICUM
Department: Social Sciences Division
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students will participate in a semester-long "practicum" with a sitting judge (federal, or Texas appellate) in Houston. This program is designed to give select Rice undergraduates a broad and practical introduction to what lawyers do in court and how judges and the law clerks who work with them think about the questions they are asked to resolve. Instructor Permission Required.
SOSC 423 - FALL MEDICAL RESEARCH INTERNSHIP
Short Title: FALL MEDICAL RESEARCH INTERN
Department: Social Sciences Division
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Internship with a faculty member at Baylor College of Medicine (BCM) centering on a medical research topic involving the Social Sciences. Student-interns will spend up to 10 hours/week at BCM and will be required to submit a written report, evaluations and an example of research products (research posters, abstracts, paper drafts, manuscripts, etc.) both to their supervisor and the Office of the Dean of Social Sciences. Enrollment is limited to Rice undergraduate students who have declared a major within the School of Social Sciences and have been approved for participation in the internship partnership between Rice and BCM. Written approval of the research supervisor and the Dean of Undergraduates must be received by the Office of the Dean of Social Sciences at least 2 weeks prior to the start of classes. Instructor Permission Required.

SOSC 424 - SPRING MEDICAL RESEARCH INTERNSHIP
Short Title: SPRING MEDICAL RESEARCH INTERN
Department: Social Sciences Division
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Internship with a faculty member at Baylor College of Medicine (BCM) centering on a medical research topic involving the Social Sciences. Student-interns will spend up to 10 hours/week at BCM and will be required to submit a written report, evaluations and an example of research products (research posters, abstracts, paper drafts, manuscripts, etc.) both to their supervisor and the Office of the Dean of Social Sciences. Enrollment is limited to Rice undergraduate students who have declared a major within the School of Social Sciences and have been approved for participation in the internship partnership between Rice and BCM. Written approval of the research supervisor and the Dean of Undergraduates must be received by the Office of the Dean of Social Sciences at least 2 weeks prior to the start of classes. Instructor Permission Required.

SOSC 444 - CONSULTING PRACTICUM
Short Title: CONSULTING PRACTICUM
Department: Social Sciences Division
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students in the Applied Innovation Lab learn the elements of problem solving in the business environment. Project teams interact with businesses or non-profit organizations seeking creative solutions to challenges they face. The course offers experiential learning on all project phases from investigation and analysis through presentation of recommendations designed to meet real-world needs. Department Permission Required. Repeatable for Credit.

SOSC 464 - SOCIAL ENTREPRENEURSHIP
Short Title: SOCIAL ENTREPRENEURSHIP
Department: Social Sciences Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course introduces students to contemporary concepts, debates, and contexts necessary for analyzing and engaging in the sphere of social entrepreneurship. The course has five distinct parts: 1. social entrepreneurship overview; 2. social context and stakeholders; 3. private sector roles and motivations; 4. organizational forms and collaborations; and 5. measurement and impacts (private and public). Students will be exposed to various forms of social entrepreneurship, such as base of the pyramid/microenterprises, private-public partnerships, private-governmental partnerships, voluntary social codes, corporate social responsibility, and ethical consumerism. From this introductory foundation, students will undertake a social entrepreneurship project about a contemporary social problem in Houston: the urban food desert (https://apps.ams.usda.gov/fooddeserts/fooddeserts.aspx). Students will learn a range of research methods (e.g. quantitative data analysis, ethnography, focus groups). With these research tools and building from perspectives offered by earlier by readings, guest speakers, and field visits, students will problematize, propose, develop, and present competing solutions to the social problem during the final course meetings. Cross-list: BUSI 464, GLHT 464.

SOSC 477 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Social Sciences Division
Grade Mode: Standard Letter
Course Type: Internship/Practicum, Lecture, Laboratory, Seminar
Credit Hours: 1-4
Course Level: Undergraduate Upper-Level
Description: Topics and credit hours may vary each semester. Contact department for current semester’s topic(s). Repeatable for Credit.

Sociology (SOCI)

SOCI 101 - INTRODUCTION TO SOCIOLOGY
Short Title: INTRODUCTION TO SOCIOLOGY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to the principal concepts, theories and methods of sociology. Required (normally) for sociology majors and minors. Enrollment in section 003 of this course is reserved for new matriculants only.
SOCI 231 - SOCIAL PROBLEMS
Short Title: SOCIAL PROBLEMS
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will confront "social problems" in everyday life by focusing on contemporary issues, situations, behaviors, and ideas in national and international contexts. The course will focus primarily on case studies in contemporary issues including racism, religion, politics, classism, sexism, and heterosexism. Mutually Exclusive: Credit cannot be earned for SOCI 231 and SOCI 338.

SOCI 299 - EXPERIENTIAL EDUCATION IN SOCIOLOGY
Short Title: EXPERIENTIAL EDUCATION IN SOCI
Department: Sociology
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hour: 1
Restrictions: Enrollment is limited to students with a major in Sociology. Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course provides one hour of university credit for faculty-directed and approved internship. Students must obtain approval from a member of the department’s undergraduate committee and must submit a letter from the internship provider indicating completion and satisfactory performance. Department Permission Required. Repeatable for Credit.

SOCI 301 - SOCIAL INEQUALITY
Short Title: SOCIAL INEQUALITY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course investigates the causes and consequences of social inequality in the U.S., focusing on inequality by class, race, and gender. We will discuss different measures of inequality, the extent of inequality, as well as classical and modern theories for why it has been increasing since the 1970s. In addition, we will discuss how much inequality is justifiable and which redistributive programs work.

SOCI 304 - ENVIRONMENTAL ISSUES: RICE INTO THE FUTURE
Short Title: ENVIRON ISSUES: RICE IN FUTURE
Department: Sociology
Grade Mode: Standard Letter
Course Type: Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students use the campus as a laboratory for learning about sustainability through group projects to reduce Rice's environmental impact or resolve environmental issues. Cross-list: ENST 302.

SOCI 306 - SOCIOLOGY OF GENDER
Short Title: SOCIOLOGY OF GENDER
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Relationship between gender and social role. Development of the contemporary sexual division of labor and process of socialization with reference to family, education, media, and occupations. Cross-list: SWGS 324.

SOCI 308 - HOUSTON: THE SOCIOLOGY OF A CITY
Short Title: HOUSTON: SOCIOLOGY OF A CITY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Houston as an exemplar of contemporary urban change. The "golden buckle of the sunbelt"; recovery from the oil boom collapse of the 1980s into a restructuring economy and a demographic revolution; the changing politics of education, quality-of-life issues, and interethnic relations, as they interact to shape the urban future. Guest lectures, field trips.

SOCI 309 - RACE AND ETHNIC RELATIONS
Short Title: RACE & ETHNIC RELATIONS
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Historical and contemporary issues and theories of race and ethnic relations in the United States. The key groups covered will be European Americans, African Americans, Native Americans, Asian Americans, and Mexican Americans. Group patterns of assimilation and conflict inform a basic tenet that race and ethnicity are organizing features of society.

SOCI 310 - URBAN SOCIOLOGY
Short Title: URBAN SOCIOLOGY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of urban development, form, and heterogeneity; and the conditions of life associated with living in cities. Examines the rise of cities, their growth and purposes in the U.S. and internationally. Examines behavioral adaptations required by city life, and considers urban subcultures.
relations between work and family.

Inequalities between men and women, racial/ethnic inequalities, and changes over time. We will focus on understanding the lives of workers: work and work is structured in occupations and industries and how it changes over time. We will view and analyze a variety of genres, as well as reading in terms of justice, sustainability, and both expresses and shapes environmental issues (food, water, energy, waste, environmental justice, sustainability), and both expresses and shapes environmental values. We will view and analyze a variety of genres, as well as reading supplementary material. Cross-list: ENST 316.

SOCI 316 - ENVIRONMENTAL FILM

Description: Explores the ways film represents the environment and environmental issues (food, water, energy, waste, environmental justice, sustainability), and both expresses and shapes environmental values. We will view and analyze a variety of genres, as well as reading supplementary material. Cross-list: ENST 316.

SOCI 319 - SOCIOLOGY OF WORK AND OCCUPATIONS

Description: Work is a central part of our lives. We will examine how work is structured in occupations and industries and how it changes over time. We will focus on understanding the lives of workers: work and inequalities between men and women, racial/ethnic inequalities, and relations between work and family.
SOCI 329 - MULTIRACIAL AMERICA
Short Title: MULTIRACIAL AMERICA
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Multiracial America examines the phenomenon of race mixing (e.g. interracial interaction, multiracial identity) from a sociological perspective. The course covers the legal, political, and cultural contexts of interracial interaction and how these impact current understanding of what it means to be "mixed race." Recommended Prerequisite(s): SOCI 101

SOCI 333 - SOCIOLOGY OF RELIGION
Short Title: SOCIOLOGY OF RELIGION
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of religious beliefs, symbols, actions, organizations, roles, and various interrelationships between religion and society. Includes new religious movements, secularization, and fundamentalism. Field work required.

SOCI 334 - SOCIOLOGY OF THE FAMILY
Short Title: SOCIOLOGY OF THE FAMILY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will teach students the important influences and consequences of American family life. We will consider issues such as sex and sexualities, marriage and cohabitation, divorce, family structure, same-sex marriage, domestic violence, and household labor. We will also examine the role of social institutions and social inequality in shaping family norms and constraints on family behaviors. Cross-list: SWGS 325.

SOCI 340 - SOCIOLOGY OF IMMIGRATION
Short Title: SOCIOLOGY OF IMMIGRATION
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Sociology of Immigration traces the migration process from initiation through its long-term consequences using theories of initiation (e.g. economic and sociological models) and adaptation (e.g. segmented assimilation, new assimilation theory). It also explores the effects of immigration policies.

SOCI 341 - QUALITATIVE RESEARCH METHODS
Short Title: QUALITATIVE RESEARCH METHODS
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines qualitative methodological approaches for conducting social science research. Particularly, students will examine how qualitative methods allow social scientists to analyze the symbolic, religious, gendered, socio-economic, policies and historical forces and contexts that underlie and motivate beliefs, ideologies, practices and social change. Graduate/Undergraduate Equivalency: SOCI 541. Mutually Exclusive: Credit cannot be earned for SOCI 341 and SOCI 541.

SOCI 342 - SOCIOLOGY OF GLOBALIZATION
Short Title: SOCIOLOGY OF GLOBALIZATION
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores how the process of global integration transforms human life with specific emphasis on: the global economy and economic development; transnational political organizations; culture and social control. Social and economic stratification, including gender/race/ethnic inequalities; transnational migration; environmental change; and transnational social movements.

SOCI 343 - RACE, SOCIETY AND POPULATION CHANGE
Short Title: RACE, SOCIETY & POPULATION CHG
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course investigates the meaning and significance of what it means to be "mixed race." Recommended Prerequisite(s): SOCI 101

SOCI 344 - SOCIOLOGY OF MENTAL HEALTH
Short Title: SOCIOLOGY OF MENTAL HEALTH
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores the process of global integration transforms human life with specific emphasis on: the global economy and economic development; transnational political organizations; culture and social control. Social and economic stratification, including gender/race/ethnic inequalities; transnational migration; environmental change; and transnational social movements.

SOCI 345 - SOCIOLOGY OF MENTAL HEALTH
Short Title: SOCIOLOGY OF MENTAL HEALTH
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores the process of global integration transforms human life with specific emphasis on: the global economy and economic development; transnational political organizations; culture and social control. Social and economic stratification, including gender/race/ethnic inequalities; transnational migration; environmental change; and transnational social movements.

SOCI 346 - SOCIOLOGY OF MENTAL HEALTH
Short Title: SOCIOLOGY OF MENTAL HEALTH
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course investigates the meaning and significance of mental health, with heavy emphasis on the social construction of mental illness; positive psychology and psychological well-being; psychiatric epidemiology; stigma and labeling; and culture and social control. Social determinants of mental health are also discussed.
Moving people and goods within cities is the stuff of urban transportation. This course explores the relationship between social factors and health, illness, and mortality, with a heavy emphasis on the experiences of illness, the doctor-patient relationship, and the socialization of medical students and new doctors. Social determinants of health, cultural determinants of health, and the ethics surrounding conception, birth, and death will also be discussed.

SOCIO 363 - AFRICAN AMERICAN-JEWISH RELATIONS: RACE, RELIGION, POLITICAL, AND POPULAR CULTURE
Short Title: AFRICAN AMER-JEWISH RELATIONS
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines African American-Jewish relations in the United States from colonial times to the present day. Through readings, music, images, and films, we will explore constructions of racial identity, arenas of religious and cultural interaction, and the politics and policies that have shaped African American-Jewish relations in urban neighborhoods.

SOCIO 364 - MUSLIMS IN AMERICAN SOCIETY
Short Title: MUSLIMS IN AMERICAN SOCIETY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course unearths the history of Muslims in America from the 15th century to present-day. Students will have the opportunity to explore the experiences of African, Middle Eastern, European, South Asian, Hispanic, and black/white Muslims. In studying these communities, students will question what it means to be Muslim in America.

SOCIO 365 - POLITICS OF REPRESENTATION: HOW WE UNDERSTAND "WAR" AND "THE RACIAL OTHER"
Short Title: POLITICS OF REPRESENTATION
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines political representation, particularly in times of social mayhem, revolution, and war. Although we will focus primarily on cultural and political representations of the Israeli-Palestinian conflict, this class will also put this dispute in comparison with other global events. Cross-list: ANTH 365.
SOCI 367 - ENVIRONMENTAL SOCIOLOGY
Short Title: ENVIRONMENTAL SOCIOLOGY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course focuses on the foundations of environmental sociology and takes a social and historical approach to examine how humans affect the environment and the environment affects humans. Topics include: agricultural sustainability, resource extraction and climate changes; environmental racism/sexism; globalization and development; population, and consumption, and environmental movements. Cross-list: ENST 367.

SOCI 368 - SOCIOLOGY OF DISASTER
Short Title: SOCIOLOGY OF DISASTER
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will cover social dimensions of disasters stemming from natural and human hazards. Emphasis will focus on social, economic and political forces that put people unequally at risk as well as how vulnerable social groups experience and adjust to these risks and associated hazards.

SOCI 369 - ENVIRONMENTAL SOCIOLOGY
Short Title: ENVIRONMENTAL SOCIOLOGY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course focuses on the foundations of environmental sociology and takes a social and historical approach to examine how humans affect the environment and the environment affects humans. Topics include: agricultural sustainability, resource extraction and climate changes; environmental racism/sexism; globalization and development; population, and consumption, and environmental movements. Cross-list: ENST 367.

SOCI 370 - SOCIOLOGY OF DISASTER
Short Title: SOCIOLOGY OF DISASTER
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will cover social dimensions of disasters stemming from natural and human hazards. Emphasis will focus on social, economic and political forces that put people unequally at risk as well as how vulnerable social groups experience and adjust to these risks and associated hazards.

SOCI 371 - POVERTY, JUSTICE, AND HUMAN CAPABILITIES
Short Title: POVERTY, JUSTICE, CAPABILITIES
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course provides an overview of the study of poverty, justice, and human capabilities. The course considers theory and economic policy oriented towards improving human well-being in the US, Asia, Africa, and other regions. Readings address not just material deprivations but also gender, racial and ethnic disparities, health status, education, human rights, and political freedoms. To be considered for the course, please complete the brief questionnaire at pjhc.rice.edu/enrollment-questionnaire. Preference is given to those that have declared the PJHC minor. Formerly HUMA/SOCI 280. Instructor Permission Required. Cross-list: HUMA 371. Mutually Exclusive: Credit cannot be earned for SOCI 371 and HUMA 280/SOCI 280.

SOCI 374 - SOCIAL PSYCHOLOGY OF PREJUDICE
Short Title: SOCIAL PSYCHOLOGY OF PREJUDICE
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course investigates the meaning, durability and significance of prejudice based on social psychological literature addressing intergroup and interpersonal conflict and its resolution. Problems of relations between racial groups in contemporary society are also discussed.

SOCI 376 - ART AND ACTIVISM: CRITICAL STUDY OF HOPE IN TIMES OF CRISIS
Short Title: ART AND ACTIVISM
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores art and social change in times of mass displacement, racial oppression, and war. It surveys the efforts involved in achieving justice and the possible implications of remaining historically mute and hopeless. The class will host contemporary activists and artists concerned with radical visions of hope in Houston. Cross-list: ANTH 376.

SOCI 377 - HEALTH DISPARITIES IN THE UNITED STATES
Short Title: HEALTH DISPARITIES
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This class will explore patterns and explanations surrounding health disparities in the United States based on key status characteristics (socioeconomic status, race/ethnic identity, nativity, gender, and sexual orientation). We will draw on interdisciplinary scholarship covering diverse fields (e.g., medical sociology, social demography, public health, public policy) and methodologies.

SOCI 380 - SOCIAL THEORY
Short Title: SOCIAL THEORY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course engages and analyzes the foundational texts of social theory from its classical roots to its contemporary branches. Students will explore theoretical approaches that inform current sociological research and during the course will examine social phenomena of particular interest to them from the perspective of two major theorists.
people and groups mobilize to challenges laws perceived as unjust. Effects of immigration and border security policies, and tracing how individuals experience and respond to policing, examining the everyday lives – in the U.S. and elsewhere. Examples will include capabilities, including both the overall effects of such policies and their differential consequences for children, women and men. Cross-list: SWGS 394.

SOCI 396 - LAW AND RESISTANCE IN THE EVERYDAY
Short Title: LAW AND RESISTANCE
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will explore how people interact with the law in their everyday lives – in the U.S. and elsewhere. Examples will include how individuals experience and respond to policing, examining the effects of immigration and border security policies, and tracing how people and groups mobilize to challenges laws perceived as unjust.
SOCI 405 - ETHNOGRAPHIC RESEARCH
Short Title: ETHNOGRAPHIC RESEARCH
Department: Sociology
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Beginning with the theoretical frameworks for ethnographic and other qualitative research methods, the course will cover ethics, entry, observation, field notes, interviewing, data analysis, and writing reports. It will offer a hands-on approach combining lectures, research through lectures, readings, and fieldwork. Field projects can be conducted in group, classroom, campus, or community settings. Graduate/Undergraduate Equivalency: SOCI 505. Mutually Exclusive: Credit cannot be earned for SOCI 406 and SOCI 506.

SOCI 406 - BASIC DEMOGRAPHIC TECHNIQUES
Short Title: BASIC DEMOGRAPHIC TECHNIQUES
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The course provides a survey of basic demographic methods for assessing population change, fertility, mortality, and (im)migration and characteristics such with age, gender, race/ethnicity, household/family composition, marital status, economic, employment, and educational. Emphasis placed on the use of the methods in a variety of demographic and other settings. Graduate/Undergraduate Equivalency: SOCI 506. Mutually Exclusive: Credit cannot be earned for SOCI 406 and SOCI 506.

SOCI 407 - GENDER SEMINAR
Short Title: GENDER SEMINAR
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An overview of the construction and reproduction of gender as a social category. Course will compare various conceptualizations of gender and discuss structural, interactional, and individual-level processes that reproduce gender inequality. Will also explore interactions of gender with other axes of social difference, such as sexuality, race/ethnicity and social class. Instructor Permission Required. Graduate/Undergraduate Equivalency: SOCI 607. Mutually Exclusive: Credit cannot be earned for SOCI 407 and SOCI 607.

SOCI 408 - ETHNOGRAPHIC RESEARCH II
Short Title: ETHNOGRAPHIC RESEARCH II
Department: Sociology
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): SOCI 405
Description: Continuation of theoretical frameworks for ethnographic and other qualitative research methods including ethics, entry, observation, field notes, interviewing, data analysis and writing reports. Field projects can be conducted in group, classroom, campus or community settings. Instructor Permission Required.

SOCI 412 - PERSPECTIVES ON RELIGIOUS TOLERANCE IN AN INTOLERANT AGE
Short Title: UG SEMINAR RELIGIOUS TOLERANCE
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: How do we understand religious pluralism in the midst of religious traditions that seem inherently at odds? Is religion more likely to bring peace or conflict? Through readings form the humanities and the social sciences and short lectures, this weekly undergraduate seminar will address these issues and more. Graduate/Undergraduate Equivalency: SOCI 512. Mutually Exclusive: Credit cannot be earned for SOCI 412 and SOCI 512.

SOCI 415 - THE ENVIRONMENTAL MOVEMENT
Short Title: THE ENVIRONMENTAL MOVEMENT
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examines the environmental movement in the U.S. and globally. After a historical overview, we will use a social movement perspective to examine mobilization, organizations and tactics, ideologies and identities, as well as exploring aspects of contemporary environmentalism (e.g. green building and slow flood, wildlife management/biodiversity, sustainable development, environmental justice). Cross-list: ENST 415.

SOCI 422 - SOCIAL AUTOPSIES: HOW SOCIETY KILLS US
Short Title: SOCIAL AUTOPSIES
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores mortality, and how long we live, as a social process. Though we often reflect on the biological, physiological, and genetic conditions that play parts in the length of our lives, we will explore evidence suggesting that social conditions shape mortality prospects for all of us. Graduate/Undergraduate Equivalency: SOCI 522. Mutually Exclusive: Credit cannot be earned for SOCI 422 and SOCI 522.
SOCI 423 - SOCIOLOGY OF FOOD
Short Title: SOCIOLOGY OF FOOD
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines the production, distribution, and consumption of food as a medium to understand the relations between large social processes and the practices of everyday life. Topics include: food policy; commodification of food; food security and hunger; food, health and the body; cultural food practices; and alternative food systems. Graduate/Undergraduate Equivalency: SOCI 523. Mutually Exclusive: Credit cannot be earned for SOCI 423 and SOCI 523.

SOCI 424 - RACE AND ETHNICITY SEMINAR
Short Title: RACE AND ETHNICITY SEMINAR
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Overview of the sociological study of race and ethnic relations; identifying the major contributions made to the sociological study of race and the ethnicity; and the major areas in need of new thinking and research. Focus on theoretical formulations, historical understandings, and causes and consequences of race and technical relations globally. Graduate/Undergraduate Equivalency: SOCI 524. Mutually Exclusive: Credit cannot be earned for SOCI 424 and SOCI 524.

SOCI 425 - POPULATION HEALTH SEMINAR
Short Title: POPULATION HEALTH SEMINAR
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course is a graduate level overview of population health, including the social determinates of morbidity and mortality, fertility and birth outcomes, health disparities, and contextual determinants of health. Course will cover major theoretical perspectives in the field, including fundamental cause theory, life course theory, and theories of stress and resilience. Graduate/Undergraduate Equivalency: SOCI 525. Mutually Exclusive: Credit cannot be earned for SOCI 425 and SOCI 525.

SOCI 426 - CONTEMPORARY THEORY
Short Title: CONTEMPORARY THEORY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course builds foundational understanding of the diverse theoretical traditions of the last half-century that underlie much of the work currently being undertaken in sociology. Theories include: symbolic interactionism, critical theory, structuralism, power and social control, neo-institutionalism, feminist theory, and cultural theory. Evaluation based on papers, memos and seminar participation. Graduate/Undergraduate Equivalency: SOCI 526. Mutually Exclusive: Credit cannot be earned for SOCI 426 and SOCI 526.

SOCI 436 - RESEARCH SEMINAR: THE HOUSTON AREA SURVEY
Short Title: HOUSTON AREA SURVEY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Continuation of the series of annual surveys on how Houston residents are reacting to the ongoing economic and demographic changes. Includes sampling procedures, questionnaire construction, interviewing, data analysis, and the logic and skills of survey research. Culminates in a research report that develops empirical hypotheses and tests their validity with the survey findings. Graduate/Undergraduate Equivalency: SOCI 536. Recommended Prerequisite(s): SOCI 381 & SOCI 382. Mutually Exclusive: Credit cannot be earned for SOCI 436 and SOCI 536.

SOCI 437 - SOCIOLOGY OF EDUCATION
Short Title: SOCIOLOGY OF EDUCATION
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Analyzing educational inequality in the U.S. using concepts of educational equality and inequality and analysis of the factors that shape schooling outcomes. Addressing the role of students, families, neighborhoods, schools, school organizations and teachers. Special topics: education of immigrants, school segregation, accountability, higher education and the future of educational inequality. Graduate/Undergraduate Equivalency: SOCI 537. Mutually Exclusive: Credit cannot be earned for SOCI 437 and SOCI 337/SOCI 537.
SOCI 438 - FAMILY SEMINAR  
Short Title: FAMILY SEMINAR  
Department: Sociology  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course will cover the history of the family and key theoretical and empirical debates about family formation, stability, and dissolution. Ultimately, we will seek to answer the question: is the American family in decline? Instructor Permission Required. Graduate/Undergraduate Equivalency: SOCI 538. Mutually Exclusive: Credit cannot be earned for SOCI 438 and SOCI 538.

SOCI 451 - IMMIGRATION IN A GLOBAL WORLD  
Short Title: IMMIGRATION  
Department: Sociology  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course will compare 20th century immigration to the US (and other countries) with more recent migratory flows. Topics will be related to the transnational identities of immigrants, ethnic discrimination, and the impact of immigrants on civic and religious institutions. A central part of the course is a semester-long research project. Graduate/Undergraduate Equivalency: SOCI 551. Mutually Exclusive: Credit cannot be earned for SOCI 451 and SOCI 551.

SOCI 453 - RACE, MIGRATION, AND HEALTH SEMINAR  
Short Title: RACE, MIGRATION, AND HEALTH  
Department: Sociology  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: In this course we will examine the relationship between racial identity, nativity, and health status. Through readings and class discussion we will examine how racial identity and generational status shape health-related resources, stressors, behaviors, and supports. We will also consider how these factors relate to health care access and use. Graduate/Undergraduate Equivalency: SOCI 553. Mutually Exclusive: Credit cannot be earned for SOCI 453 and SOCI 553.

SOCI 459 - RELIGION AND PUBLIC LIFE  
Short Title: RELIGION AND PUBLIC LIFE  
Department: Sociology  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course will use the tools of social science to understand how religion shows up in public life, both in the US and around the globe. Topics include: epistemology and methodology of public religion; how religion shapes views on politics, gender, families, science, race, immigration, education, the workplace; the challenges of religious diversity and crossing sociopolitical divides. Instructor Permission Required. Graduate/Undergraduate Equivalency: SOCI 559. Mutually Exclusive: Credit cannot be earned for SOCI 459 and SOCI 559.

SOCI 465 - GENDER AND HEALTH  
Short Title: GENDER AND HEALTH  
Department: Sociology  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This seminar explores the relationship between gender and health (longevity, physical illness and functioning, mental health, and health behavior). Specific topics include masculinity, disease expression, medical research, health care use, stress and social relationships, and intersectionality (race/ethnicity and sexuality) as they relate shaping health outcomes among men and women. Instructor Permission Required. Cross-list: SWGS 465. Graduate/Undergraduate Equivalency: SOCI 665. Mutually Exclusive: Credit cannot be earned for SOCI 465 and SOCI 665.

SOCI 469 - COMMUNITY BRIDGES TRAINING  
Short Title: COMMUNITY BRIDGES TRAINING  
Department: Sociology  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Seminar  
Credit Hours: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course is the precursor for the spring course, SOCI 470, Inequality and Urban Life. Only students accepted into the Community Bridges Program may enroll in this course, where we do preparatory readings, trainings and workshops for the spring community internships. Instructor Permission Required.

SOCI 470 - INEQUALITY AND URBAN LIFE  
Short Title: INEQUALITY AND URBAN LIFE  
Department: Sociology  
Grade Mode: Standard Letter  
Course Type: Research  
Credit Hours: 4  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course combines classroom study with seven hours of fieldwork per week, working on projects with a local organization. We study how urban areas generate wealth and poverty, the experience of inequality, and issues of community development. Enrollment is by permission only. Instructor Permission Required.

SOCI 483 - DATA ANALYSIS  
Short Title: DATA ANALYSIS  
Department: Sociology  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This graduate course introduces students to multivariate regression methods. It assumes previous coursework in elementary statistics and the use of STATA. We will cover regression analysis for continuous dependent variables and move in to intermediate and some advance analysis for categorical dependent variables, commonly referred to as generalized linear models.
SOCI 485 - IDENTITIES IN A DIVERSE WORLD
Short Title: RACIAL IDENTITIES
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: How have shifts in ethnic and race diversity affected the way we answer the question, "who am I?" "Identities in a Diverse World" is a seminar dedicated to answering this core question by exploring the new frontiers of understanding race and ethnicity. Topics include: Racial Passing, Transracial adoption, Whiteness, and Immigration. Graduate/Undergraduate Equivalency: SOCI 585. Mutually Exclusive: Credit cannot be earned for SOCI 485 and SOCI 585.

SOCI 492 - DIRECTED HONORS RESEARCH
Short Title: DIRECTED HONORS RESEARCH
Department: Sociology
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Sociological research under faculty supervision. Includes first-semester review of relevant literature and the preparation of an outline for planned research, followed by second-semester research and the writing of an honors thesis. Open only to students in sociology honors program. Instructor Permission Required.

SOCI 493 - DIRECTED HONORS RESEARCH
Short Title: DIRECTED HONORS RESEARCH
Department: Sociology
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Sociological research under faculty supervision. Includes first-semester review of relevant literature and preparation of outline for planned research, followed by second-semester research and the writing of an honors thesis. Open only to students in sociology honors program. Instructor Permission Required.

SOCI 500 - SUMMER RESEARCH
Short Title: SUMMER RESEARCH
Department: Sociology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Sociological research for graduate students in sociology. Repeatable for Credit.

SOCI 501 - GRADUATE RELIGION SEMINAR
Short Title: GRADUATE RELIGION SEMINAR
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Sociology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A graduate level course that explores the theories, tools, concepts, and major debates that are central to the sociology of religion. Specific attention is devoted to religious practices, communities, and identities as well as how the sociology of religion relates to other sub-fields with the broader discipline. Graduate/Undergraduate Equivalency: SOCI 401. Mutually Exclusive: Credit cannot be earned for SOCI 501 and SOCI 401.

SOCI 502 - RACE AND FAMILY SEMINAR
Short Title: RACE AND FAMILY SEMINAR
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Sociology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: What features of family life are marked by race? This course examines the question and gauges whether differences are a matter of culture or do they reflect issues of structure (or access to opportunities) and what are the implications for race/ethnic inequality? Topics include racial socialization and ethnic identity. Graduate/Undergraduate Equivalency: SOCI 402. Mutually Exclusive: Credit cannot be earned for SOCI 502 and SOCI 402.

SOCI 503 - TEACHING SOCIOLOGY
Short Title: TEACHING SOCIOLOGY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Enrollment is limited to students with a major in Sociology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will examine different approaches to teaching sociology at the university level, including core curriculum, a syllabus, and different forms of presenting material and evaluating students at the undergraduate and graduate levels. Sociology department faculty will discuss their particular approaches to teaching sociology.
SOCI 505 - ETHNOGRAPHIC RESEARCH
Short Title: ETHNOGRAPHIC RESEARCH
Department: Sociology
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Beginning with the theoretical frameworks for ethnographic and other qualitative research methods, the course will cover ethics, entry, observation, field notes, interviewing, data analysis, and writing reports. It will offer a hands-on approach combining lectures, research through lectures, readings, and fieldwork. Field projects can be conducted in group, classroom, campus, or community settings. Graduate/Undergraduate Equivalency: SOCI 405. Mutually Exclusive: Credit cannot be earned for SOCI 505 and SOCI 405.

SOCI 506 - BASIC DEMOGRAPHIC TECHNIQUES
Short Title: BASIC DEMOGRAPHIC TECHNIQUES
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course provides a survey of basic demographic methods for assessing population change, fertility, mortality, and (im)migration and characteristics such with age, gender, race/ethnicity, household/family composition, marital status, economic, employment, and educational. Emphasis placed on the use of the methods in a variety of demographic and other settings. Graduate/Undergraduate Equivalency: SOCI 406. Mutually Exclusive: Credit cannot be earned for SOCI 506 and SOCI 406.

SOCI 510 - RELIGION AND SOCIETY
Short Title: RELIGION AND SOCIETY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar focuses on the ways in which religion is impacted by society, how society is shaped by religion, and the functions, uses, and meanings of religion in the modern world. We rely on the sociological perspective for understanding religion. Field work required.

SOCI 511 - COMMUNITY AND URBAN SOCIOLOGY
Short Title: COMMUNITY & URBAN SOCIOLOGY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of urban development, form, and heterogeneity; and the conditions of life associated with living in cities, their growth and purposes globally and locally.

SOCI 512 - PERSPECTIVES ON RELIGIOUS TOLERANCE IN AN INTOLERANT AGE
Short Title: GR SEMINAR RELIGIOUS TOLERANCE
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: How do we understand religious pluralism in the midst of religious traditions that seem inherently at odds? Is religion more likely to bring peace or conflict? Through readings form the humanities and the social sciences and short lectures, this weekly undergraduate seminar will address these issues and more. Graduate/Undergraduate Equivalency: SOCI 412. Mutually Exclusive: Credit cannot be earned for SOCI 512 and SOCI 412.

SOCI 513 - DEMOGRAPHY
Short Title: DEMOGRAPHY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of the dynamics of population change. Includes demographic data sources, components of population change, mortality patterns, family planning, the measurement of migration flows, and population-economic models. Graduate/Undergraduate Equivalency: SOCI 313. Mutually Exclusive: Credit cannot be earned for SOCI 513 and SOCI 313.

SOCI 522 - SOCIAL AUTOPSIES
Short Title: SOCIAL AUTOPSIES
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course explores mortality, and how long we live, as a social process. Though we often reflect on the biological, physiological, and genetic conditions that play parts in the length of our lives, we will explore evidence suggesting that social conditions shape mortality prospects for all of us. Graduate/Undergraduate Equivalency: SOCI 422. Mutually Exclusive: Credit cannot be earned for SOCI 522 and SOCI 422.

SOCI 523 - SOCIOLOGY OF FOOD
Short Title: SOCIOLOGY OF FOOD
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course examines the production, distribution, and consumption of food as a medium to understand the relations between large social processes and the practices of everyday life. Topics include: food policy; commodification of food; food security and hunger; food, health and the body; cultural food practices; and alternative food systems. Graduate/Undergraduate Equivalency: SOCI 423. Mutually Exclusive: Credit cannot be earned for SOCI 523 and SOCI 423.
SOCI 524 - RACE AND ETHNICITY SEMINAR
Short Title: RACE AND ETHNICITY SEMINAR
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Overview of the sociological study of race and ethnic relations; identifying the major contributions made to the sociological study of race and the ethnicity; and the major areas in need of new thinking and research. Focus on theoretical formulations, historical understandings, and causes and consequences of race and technical relations globally. Graduate/Undergraduate Equivalency: SOCI 424. Mutually Exclusive: Credit cannot be earned for SOCI 524 and SOCI 424.

SOCI 525 - POPULATION HEALTH SEMINAR
Short Title: POPULATION HEALTH SEMINAR
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Course is a graduate level overview of population health, including the social determinates of morbidity and mortality, fertility and birth outcomes, health disparities, and contextual determinants of health. Course will cover major theoretical perspectives in the field, including fundamental cause theory, life course theory, and theories of stress and resilience. Graduate/Undergraduate Equivalency: SOCI 425. Mutually Exclusive: Credit cannot be earned for SOCI 525 and SOCI 425.

SOCI 526 - CONTEMPORARY THEORY
Short Title: CONTEMPORARY THEORY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course builds foundational understanding of the diverse theoretical traditions of the last half-century that underlie much of the work currently being undertaken in sociology. Theories include: symbolic interactionism, critical theory, structuralism, power and social control, neo-institutionalism, feminist theory, and cultural theory. Evaluation based on papers, memos and seminar participation. Graduate/Undergraduate Equivalency: SOCI 426. Mutually Exclusive: Credit cannot be earned for SOCI 526 and SOCI 426.

SOCI 528 - GIS FOR SOCIAL SCIENCE RESEARCH
Short Title: GIS FOR SOCIAL SCIENCE RES
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will focus on integrating spatial concepts into social science research using GIS software. Topics include: data acquisition, structure and management; principles of exploratory data analysis and cartographic visualization; and exploratory spatial data analysis (spatial auto correlation).

SOCI 536 - RESEARCH SEMINAR: THE HOUSTON AREA SURVEY
Short Title: HOUSTON AREA SURVEY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Continuation of the series of annual surveys on how Houston residents are reacting to the ongoing economic and demographic changes. Includes sampling procedures, questionnaire construction, interviewing, data analysis, and the logic and skills of survey research. Culminates in a research report that develops empirical hypotheses and tests their validity with the survey findings. Graduate/Undergraduate Equivalency: SOCI 436. Mutually Exclusive: Credit cannot be earned for SOCI 536 and SOCI 436.

SOCI 537 - SOCIOLOGY OF EDUCATION
Short Title: SOCIOLOGY OF EDUCATION
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Sociology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Analyzing educational inequality in the U.S. using concepts of educational equality and inequality and analysis of the factors that shape schooling outcomes. Addressing the role of students, families, neighborhoods, schools, school organizations and teachers. Special topics: education of immigrants, school segregation, accountability, higher education and the future of educational inequality. Graduate/Undergraduate Equivalency: SOCI 437. Mutually Exclusive: Credit cannot be earned for SOCI 537 and SOCI 337/SOCI 437.

SOCI 538 - FAMILY SEMINAR
Short Title: FAMILY SEMINAR
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Sociology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will cover the history of the family and key theoretical and empirical debates about family formation, stability, and dissolution. Ultimately, we will seek to answer the question: is the American family in decline? Graduate/Undergraduate Equivalency: SOCI 438. Mutually Exclusive: Credit cannot be earned for SOCI 538 and SOCI 438.
SOCI 541 - QUALITATIVE RESEARCH METHODS
Short Title: QUALITATIVE RESEARCH METHODS
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course examines qualitative methodological approaches for conducting social science research. Particularly, students will examine how qualitative methods allow social scientists to analyze the symbolic, religious, gendered, socio-economic, policies and historical forces and contexts that underlie and motivate beliefs, ideologies, practices and social change. Graduate/Undergraduate Equivalency: SOCI 341. Mutually Exclusive: Credit cannot be earned for SOCI 541 and SOCI 341.

SOCI 543 - RACE, SOCIETY AND POPULATION CHANGE
Short Title: RACE, SOCIETY & POPULATION CHG
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The U.S. population is more diverse than ever before - how did that happen? This course looks at how race and ethnicity patterns demographic processes. This course explores demographic techniques and collection of racial data. Topics include: Roots of racial diversity, collecting racial data, immigration and population growth, and population polices. Graduate/Undergraduate Equivalency: SOCI 343. Mutually Exclusive: Credit cannot be earned for SOCI 543 and SOCI 343.

SOCI 551 - IMMIGRATION IN A GLOBAL AGE
Short Title: IMMIGRATION
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course compare 20th century immigration to the US (and other countries) with more recent migratory flows. Topics will be related to the transnational identities of immigrants, ethnic discrimination, and the impact of immigrants on civic and religious institutions. A central part of the course is a semester-long research project. Graduate/Undergraduate Equivalency: SOCI 451. Mutually Exclusive: Credit cannot be earned for SOCI 551 and SOCI 451.

SOCI 553 - RACE, MIGRATION, AND HEALTH SEMINAR
Short Title: RACE, MIGRATION, AND HEALTH
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: In this class we will examine the relationship between racial identity, nativity, and health status. Through readings and class discussion we will examine how racial identity and generational status shape health-related resources, stressors, behaviors, and supports. We will also consider how these factors relate to health care access and use. Graduate/Undergraduate Equivalency: SOCI 453. Mutually Exclusive: Credit cannot be earned for SOCI 553 and SOCI 453.

SOCI 559 - RELIGION AND PUBLIC LIFE
Short Title: RELIGION AND PUBLIC LIFE
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will use the tools of social science to understand how religion shows up on in public life, both in the US and around the globe. Topics include: epistemology and methodology of public religion; how religion shapes views on politics, gender, families, science, race, immigration, education, the workplace; the challenges of religious diversity and crossing sociopolitical divides. Instructor Permission Required. Graduate/Undergraduate Equivalency: SOCI 459. Mutually Exclusive: Credit cannot be earned for SOCI 559 and SOCI 459.

SOCI 580 - CLASSICAL THEORY
Short Title: CLASSICAL THEORY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Sociology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course engages and analyzes the foundational texts of social theory from its classical roots to its contemporary branches. Students will explore theoretical approaches that inform current sociological research and during the course will examine social phenomena of particular interest to them from the perspective of two major theorists.
SOCI 581 - QUANTITATIVE RESEARCH METHODS  
**Short Title:** QUANTITATIVE RESEARCH METHODS  
**Department:** Sociology  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to students with a major in Sociology. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Designed as a graduate level overview of quantitative research methods, with a focus on survey construction and design. The class moves through the stops of the research design process, and discusses mixed-methods and meta-analysis research. Class also includes a strong focus on writing, critique, peer review, and the publishing process.

SOCI 582 - QUANTITATIVE DATA ANALYSIS I  
**Short Title:** QUANTITATIVE DATA ANALYSIS I  
**Department:** Sociology  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to students with a major in Sociology. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** An introduction to statistics and data analysis for graduate students in sociology. Topics include descriptive statistics, visual representation of data, univariate and bivariate tests, as well as an introduction to multiple regression. Techniques for visualizing data will be discussed throughout. Familiarity with the statistical package Stata is assumed.

SOCI 583 - QUANTITATIVE DATA ANALYSIS II  
**Short Title:** QUANTITATIVE DATA ANALYSIS II  
**Department:** Sociology  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to students with a major in Sociology. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course introduces students to multiple regression methods - a set of models that relate an outcome (also referred to as response or dependent) variable to a set of explanatory or independent variables. Students should have a previous coursework on descriptive statistics, bivariate regression, as well as familiarity with Stata.

SOCI 584 - QUANTITATIVE ANALYSIS III  
**Short Title:** QUANTITATIVE ANALYSIS III  
**Department:** Sociology  
**Grade Mode:** Satisfactory/Unsatisfactory  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 1-3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** SOCI 582 and SOCI 583  
**Description:** The course will give an overview of several advanced statistical techniques commonly used in Sociology.

SOCI 585 - IDENTITIES IN A DIVERSE WORLD  
**Short Title:** RACIAL IDENTITIES  
**Department:** Sociology  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** How have shifts in ethnic and race diversity affected the way we answer the question, "who am I?" "Identities in a Diverse World" is a seminar dedicated to answering this core question by exploring the new frontiers of understanding race and ethnicity. Topics include: Racial Passing, Transracial adoption, Whiteness, and Immigration. Graduate/Undergraduate Equivalency: SOCI 485. Mutually Exclusive: Credit cannot be earned for SOCI 585 and SOCI 485.

SOCI 586 - MULTILEVEL MODELING  
**Short Title:** MULTILEVEL MODELING  
**Department:** Sociology  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** SOCI 582 and SOCI 583  
**Description:** This course is an introduction to multilevel modeling methods for data with complex clustering. The major topics include two-level models for continuous, categorical, and count outcomes, three-level models, multilevel models of change and models for imperfectly nested data. Instructor Permission Required.

SOCI 596 - STATISTICAL PROGRAMMING  
**Short Title:** STATISTICAL PROGRAMMING  
**Department:** Sociology  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hour:** 1  
**Restrictions:** Enrollment is limited to students with a major in Sociology. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course will provide a thorough introduction to the statistical software package Stata. The emphasis will be on important skills for quantitative research that are not typically covered in statistics classes. Topics will include: data management, creating graphs, presentation of results, workflow, and documenting one's work.
### SOCI 600 - GRADUATE INDEPENDENT STUDY
**Short Title:** GRADUATE INDEPENDENT STUDY  
**Department:** Sociology  
**Grade Mode:** Standard Letter  
**Course Type:** Independent Study  
**Credit Hours:** 3  
**Restrictions:** Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** SECTION ONE: This course focuses on the sociology of global cities, especially on their comparative study. It examines their rise and development as central nodes in the world system, the means to their centrality and the threats to maintaining their status. A required end product of the course will be a publishable research paper using a comparative analysis of global cities. SECTION TWO: This course explores the relationship between social factors and health, illness, and mortality, with a heavy emphasis on qualitative experiences of illness, the doctor-patient relationship, and the socialization of medical students and new doctors. SECTION THREE: This course examines the causes and consequences of societal stratification in different institutional spheres. Students will be expected to examine key theoretical perspectives as well as understand and critique different methodological approaches to the study of social stratification. SECTION FOUR: Designed to familiarize students with the historical and contemporary theoretical explanations of the formation of, identification with, and implications of racial and ethnic categories in the United States and globally. Additionally, this course will cover empirical studies that investigate the perpetuation of racial and ethnic inequality in comparative, international perspective. SECTION FIVE: This course focuses on the mechanisms that lead to and/or perpetuate marginalization of social groups (e.g. racial, socioeconomic, religious, etc...) in urban areas. In particular, this course examines policies (i.e. public housing, cash welfare, corporation tax breaks, zoning laws) that increase or decrease the generational marginalization of groups. SECTION SIX: This course will delve extensively into criminology. The course will cover four broad areas: 1) how crime is imagined and portrayed, 2) empirical patterns of crime, 3) theories of crime causation and victimization, and 4) societal responses to crime, encompassing studies of social control, policing, the legal system, and punishment. Instructor Permission Required. Repeatable for Credit.

### SOCI 601 - CLASSICAL THEORY II
**Short Title:** CLASSICAL THEORY II  
**Department:** Sociology  
**Grade Mode:** Satisfactory/Unsatisfactory  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** The student will go beyond the basic graduate level theory course, doing advanced readings in theories, related to a substantive area in which the student concentrates.

### SOCI 602 - QUANTITATIVE METHODS
**Short Title:** QUANTITATIVE METHODS  
**Department:** Sociology  
**Grade Mode:** Satisfactory/Unsatisfactory  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** The student will do advanced work in an area of statistical interest with a faculty member who specializes in the techniques.

### SOCI 603 - DIRECTED READING IN URBAN SOCIOLOGY
**Short Title:** URBAN SOCIOLOGY  
**Department:** Sociology  
**Grade Mode:** Standard Letter  
**Course Type:** Independent Study  
**Credit Hours:** 3  
**Restrictions:** Enrollment limited to students with a major in Sociology. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This reading course covers foundational readings in the area of urban sociology.

### SOCI 604 - MAXIMUM LIKELIHOOD ESTIMATION FOR GENERALIZED LINEAR MODELS
**Short Title:** GENERALIZED LINEAR MODELS  
**Department:** Sociology  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment limited to students with a major in Sociology. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course focuses on the mechanics that lead to and/or perpetuate marginalization of social groups (e.g. racial, socioeconomic, religious, etc...) in urban areas. In particular, this course examines policies (i.e. public housing, cash welfare, corporation tax breaks, zoning laws) that increase or decrease the generational marginalization of groups. SECTION SIX: This course will delve extensively into criminology. The course will cover four broad areas: 1) how crime is imagined and portrayed, 2) empirical patterns of crime, 3) theories of crime causation and victimization, and 4) societal responses to crime, encompassing studies of social control, policing, the legal system, and punishment. Instructor Permission Required. Repeatable for Credit.

### SOCI 605 - NON-THESIS GRADUATE RESEARCH
**Short Title:** NON-THESIS GRADUATE RESEARCH  
**Department:** Sociology  
**Grade Mode:** Standard Letter  
**Course Type:** Research  
**Credit Hours:** 1-9  
**Restrictions:** Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Individual research not for thesis credit. Repeatable for Credit.

### SOCI 606 - THESIS RESEARCH
**Short Title:** THESIS RESEARCH  
**Department:** Sociology  
**Grade Mode:** Standard Letter  
**Course Type:** Research  
**Credit Hours:** 3  
**Restrictions:** Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Sociology. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Repeatable for Credit.
SOCI 607 - GENDER SEMINAR
Short Title: GENDER SEMINAR
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Sociology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An overview of the construction and reproduction of gender as a social category. Course will compare various conceptualizations of gender and discuss structural-, interactional-, and individual-level processes that reproduce gender inequality. Will also explore interactions of gender with other axes of social difference, such as sexuality, race/ethnicity and social class. Graduate/Undergraduate Equivalency: SOCI 407. Mutually Exclusive: Credit cannot be earned for SOCI 607 and SOCI 407/SOCI 504.

SOCI 608 - GRADUATE RESEARCH DESIGN
Short Title: GRADUATE RESEARCH DESIGN
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This required graduate seminar in sociological research design focuses on the logic of inquiry within the discipline, including practices of advanced empirical and theoretical contribution. Topics will span state-of-the-art analyses and their exemplars. Department Permission Required.

SOCI 609 - GRADUATE INDEPENDENT STUDY
Short Title: GRADUATE INDEPENDENT STUDY
Department: Sociology
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-9
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Sociological independent study under faculty supervision. Only open to graduate students. Repeatable for Credit.

SOCI 610 - PROFESSIONALIZATION WORKSHOP
Short Title: PROFESSIONALIZATION WORKSHOP
Department: Sociology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This professionalization workshop is designed to introduce graduate students to professionalization topics such as: giving a conference presentation, writing a fellowship or grant proposal, and the reviewing process of journals. Repeatable for Credit.

SOCI 611 - CRAFTING A DISSERTATION
Short Title: CRAFTING A DISSERTATION
Department: Sociology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Sociology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will enable students to receive instructor and peer feedback on dissertation proposals and dissertation chapters. Topics covered will include how to write a dissertation, start to finish. Students must have successfully completed at least one comp exam by August 31st to be eligible.

SOCI 665 - GENDER AND HEALTH
Short Title: GENDER AND HEALTH
Department: Sociology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Sociology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar explores the relationship between gender and health (longevity, physical illness and functioning, mental health, and health behavior). Specific topics include masculinity, disease expression, medical research, health care use, stress and social relationships, and intersectionality (race/ethnicity and sexuality) as they relate shaping health outcomes among men and women. There are additional requirements for Graduate students. Graduate/Undergraduate Equivalency: SOCI 465. Mutually Exclusive: Credit cannot be earned for SOCI 665 and SOCI 465.

SOCI 700 - DISSERTATION RESEARCH
Short Title: DISSERTATION RESEARCH
Department: Sociology
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Sociology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Dissertation research credit. Repeatable for Credit.

Spanish & Portuguese (SPPO)

SPPO 158 - INTRODUCTION TO LATIN AMERICAN STUDIES
Short Title: INTRO LATIN AMERICAN STUDIES
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Formerly SPAN 158. This course immerses students into Caribbean and Latin American studies by introducing them to the history, society, politics, and culture of the region, through a cross-disciplinary and a multi-national approach. Taught in English. Open to all students. Cross-list: LASR 158.
SPPO 330 - HISPANIC WRITING SEMINAR
Short Title: HISPANIC WRITING SEMINAR
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: In this writing intensive seminar, students will learn the skills to think and write critically in Spanish about literary and cultural productions from the global Hispanic world. Recommended Prerequisite(s): SPAN 301 or SPAN 302 or SPAN 303 or SPAN 312 or Permission of Instructor.

SPPO 331 - BRASIL ATUAL
Short Title: BRASIL ATUAL
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly PORT 331. Course examines topics in contemporary Brazil as presented in media, literature, film, and music. Works address persistent race, class, and gender inequalities, national identity, urban life, and environmental issues, among other topics. Further development of speaking, writing and vocabulary enrichment emphasized through discussions and interactive activities. Taught in Portuguese. Recommended Prerequisite(s): PORT 302, placement test, or permission of instructor.

SPPO 332 - APPROACHES TO HISPANIC LITERATURES
Short Title: APPROACHES HISPANIC LITERATURE
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to Hispanic Literature where students will become familiar with the methodology of literary analysis to approach different genres and develop original and critical interpretation of texts. Course will give a wide and solid literary and analytical context for more advance courses in Spanish and Latin American literature. Recommended Prerequisite(s): SPAN 302 or Placement Test or Permission of Instructor.

SPPO 340 - INTRODUCTION TO SPANISH LINGUISTICS
Short Title: INTRO TO SPANISH LINGUISTICS
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 352. Introduction to the study of the Spanish language covering the following areas of research: history, phonetics/phonology, morphosyntactic system, lexicon, semantics, pragmatics, sociolinguistics, and language acquisition. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 341 - DIALECTS IN CONTACT: SEARCHING FOR THE "INTERNATIONAL" FORM OF SPANISH
Short Title: DIALECTS IN CONTACT
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 350. Course will analyze the essence of language against the essence of dialects to determine (i) the logical and linguistic rationale behind judgments about language, (ii) social and political factors that lead to various decisions, and (iii) the role of popular beliefs on traditional views of proper language use. Recommended Prerequisite(s): SPAN 301 or SPAN 302 or SPAN 303 or SPAN 312 or permission of instructor.

SPPO 344 - MAPPING LATIN AMERICAN CULTURE
Short Title: MAPPING LATIN AMER CULTURE
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 345. Explores key issues in Latin American culture. Important aspects of the contemporary situation in Latin America are also studied, including phenomena such as globalization, the rise of mega-cities, migration, authoritarianism, the impact of colonization and the rise of national states. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 345 - ART IN LATIN AMERICAN LITERATURE
Short Title: LATIN AMERICAN LITERATURE ART
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 343. This course explores important moments in the history of Latin American European and North American Art by reading literary works that dramatize the transformations of several key artistic movements. 19th century landscape painting, Post-impressionism, Surrealism, Muralism, and 1960s experimental art will be studied through the novels and poems of important Latin American authors. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.
SPPO 347 - INTRODUCTION TO MEDEIVAL AND EARLY MODERN SPANISH LITERATURE AND CULTURE
Short Title: MEDIEVAL&EARLY SPAN LIT&CULTUR
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course traces the literary history of Spain from the Medieval period to the 1700's. Students will analyze a wide range of masterpieces in poetry, prose, and drama that have marked the ideological and cultural development of the Iberian Peninsula. Recommended Prerequisite(s): SPAN 301 or SPAN 302 or SPAN 303 or SPAN 312 or Permission of the Instructor.

SPPO 348 - INTRODUCTION TO MODERN SPANISH LITERATURE AND CULTURE, 18TH-21ST CENTURY
Short Title: INTRO MODERN SPAN LIT&CULTURE
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 334. Course is a panoramic introduction to literary, ideological, cultural, and artistic trends from the Enlightenment to the present. Study will include a wide array of exceptional works, (novels, plays, essays, short stories and poems) from authors who have left milestones in modern Spanish literature. Taught in Spanish. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 350 - BRAZILIAN LITERATURE AND CULTURE
Short Title: BRAZILIAN LITERATURE & CULTURE
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 346. Course focuses on critical readings of key texts of the 20th century. Materials drawn from Brazilian literature in translation as well as other cultural productions such as film and art. Some of the topics will include questions of national identity, social-racial relations, gender representations, and urban life. Taught in English. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 351 - LITERATURES FROM THE SOUTHERN CONE
Short Title: LIT FROM THE SOUTHERN CONE
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 384. An introduction to the literature of the region known as "Cono Sur." Often considered the national literature of Argentina and Uruguay, the "gauchito literature" encompasses a wide variety of texts, from traditional ballads to novels, plays and poetry. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 353 - CARIBBEAN LITERATURE
Short Title: CARIBBEAN LITERATURE
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 391. This course will introduce you to major writers and theories of Caribbean literature, by focusing on the representation of places, peoples, and practices. Close attention will be paid to historical and cultural contexts, while conducting an in-depth analysis of literary texts from different genres. Taught in Spanish. Topics vary. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 354 - CHICANO/A LITERATURE
Short Title: CHICANO/A LITERATURE
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 396. A mixed-genre course focusing on the Chicano movement, the Chicano renaissance, and alternative literary and mythic traditions associated with them. Cross-list: ENGL 371, SWGS 354. Course URL: www.english.rice.edu

SPPO 360 - SECOND LANGUAGE ACQUISITION: LINGUISTIC, COGNITIVE AND SOCIAL DIMENSIONS
Short Title: SECOND LANGUAGE ACQUISITION
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 380. Second language acquisition seeks to describe the development of a second language. It also attempts to provide an explanatory account of the internal and external factors that guide this process. This course surveys various theoretical approaches to the analysis of second language (L2) acquisition. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.
SPPO 373 - THE MEXICAN RENAISSANCE: ART, LITERATURE AND THE REVOLUTION OF 1910
Short Title: THE MEXICAN RENAISSANCE
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 348. This course examines the history of the Mexican Revolution of 1910 through the cultural production that accompanied and was inspired by the political events and social transformations that marked the era. Literature (poetry, novels, short stories, essays), painting (murals), photography and other cultural manifestations (magazines, manifestos, and posters) of the first revolution of the 20th century will be studied. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 377 - BRAZILIAN MUSIC AND SOCIAL MOVEMENTS
Short Title: BRAZILIAN MUSIC & SOCIAL MOVEMENTS
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 374. Course will consider the social dimensions of various musical genres such as Bossa Nova, Tropicalia, and Hip-Hop. Through an interdisciplinary approach, will discuss music as a contextualized social activity and examine Brazilian social movements through the lens of music. Taught in English.

SPPO 380 - CURRENT ISSUES IN SPAIN
Short Title: CURRENT ISSUES IN SPAIN
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 392. This research seminar will explore contemporary trends in Cuban culture through literary texts, films, music and works of art. We will examine the ways in which politics and the practices of artistic representation intersect in post-revolutionary Cuba. A research trip to Cuba has been organized as part of this seminar. Course taught in Spanish. Instructor Permission Required. Cross-list: FILM 339, HART 304. Recommended Prerequisite(s): Third year Spanish or permission of instructor.

SPPO 365 - CONSTRUCTS AND CONTEXTS IN L2 LEARNING: RESEARCH ON STUDY ABROAD
Short Title: RESEARCH ON STUDY ABROAD
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The object of this course is to analyze the effect of context of learning on both the definition of second language competence and the process by which that competence is acquired. Both theoretical constructs (i.e., definition and process) may be categorically different depending on the context in which acquisition occurs. Recommended Prerequisite(s): SPAN 264.

SPPO 364 - SPANISH CREATIVE WRITING
Short Title: SPANISH CREATIVE WRITING
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 388. Latin American writers have achieved great distinction in the genre of the short story. This course will explore Spanish creative writings through an aesthetic experience. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor. Repeatable for Credit.

SPPO 368 - LATIN AMERICAN SHORT FICTION
Short Title: LATIN AMERICAN SHORT FICTION
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 383. This course will explore Spanish stories by some of the continent's best-known short-story writers, such as Cortazar, Borges, Monterroso, Rufio, Fuentes, Garcia Marquez, Elena Garro, Ana Lydia Vega, Clarice Lispector, Benedetti, Uslar Pietri, Massiani, Lemebel, Asis, and Carpentier. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

Short Title: THE MEXICAN RENAISSANCE
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 348. This course examines the history of the Mexican Revolution of 1910 through the cultural production that accompanied and was inspired by the political events and social transformations that marked the era. Literature (poetry, novels, short stories, essays), painting (murals), photography and other cultural manifestations (magazines, manifestos, and posters) of the first revolution of the 20th century will be studied. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 375 - A REVOLUTION FROM WITHIN: TRENDS IN CONTEMPORARY CUBAN CULTURE
Short Title: TRENDS IN CUBAN CULTURE
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 392. Exploration of diverse cultural aspects of today's Spain through films and newspaper articles. The topics discussed will serve as a springboard for further development of writing skills. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.
SPPO 381 - SPANISH CINEMA
Short Title: SPANISH CINEMA
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course will examine how Spanish film has represented the sociocultural and political life of the country – from the Francoist years, exposing the image of a Catholic and homogenous Spain, to a post-Francoist era open to reveal social problems from a more secular and global perspective. Recommended Prerequisite(s): (SPAN 263 and SPAN 264) or SPAN 303 or Placement Test.

SPPO 382 - THEATER AND PERFORMANCE WORKSHOP
Short Title: THEATER & PERFORMANCE WORKSHOP
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to a wide array of Spanish plays from the Early Modern period to the present. Participants will also have the opportunity to create a series of original scenes, that they will adapt, direct and perform as the final outcome of the seminar. Recommended Prerequisite(s): SPAN 301 or SPAN 302 or SPAN 303 or SPAN 312 or Permission of Instructor.

SPPO 384 - THE SPANISH AVANT-GARDE
Short Title: THE SPANISH AVANT-GARDE
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 377. This cross-genre, multimedia course examines the contributions of major figures (Picasso, Gris, Dali, Diego, Alberti, Lorca, Bunuel, Gomez de la Serna) to the Spanish avant-garde in the 20th century. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 385 - TRENDS IN HISPANIC CINEMA
Short Title: TRENDS IN HISPANIC CINEMA
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 390. This course examines the ways in which films in both Spain and Latin America have represented the cultural contexts of their countries. Focus is on the theme of power, and the consequences on social and individual lives. Cross-list: SWGS 390. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.
SPPO 411 - LITERATURE AND THE ENVIRONMENT IN LATIN AMERICA
Short Title: LATIN AMER LIT & ENVIRONMENT
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 403. This course aims to offer students a systematic contact with a representative sample of the literature and scholarship about the mutual relationships between human societies and their natural environments, particularly but not exclusively in Latin America. Taught in Spanish. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 412 - BOOM-BOOM-Crack: LATIN AMERICAN NOVEL
Short Title: BOOM-BOOM-Crack: LATIN AM NOVEL
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 462. Works by Asturias, Carpenter, Rulfo, Onetti, Vargas Llosa, Cortazar, Fuentes, and others. Examines how Spanish American novelists from the 1940s onward appropriated the techniques of European modernist literature and infused them with new cultural content. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 415 - BORDER NARRATIVES
Short Title: BORDER NARRATIVES
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 453. This course will analyze certain types of cultural productions (fiction, movies, etc.) produced in geographical contact zones, that generate hybrid languages and genres. These are products of migrations and nomadic people. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 420 - LATIN AMERICAN LITERATURE IN THE MOVIES
Short Title: LATIN AMER LIT IN THE MOVIES
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 405. This course analyzes the relation between literary texts and the movies, and establishes connections and adaptations of both. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 422 - LATIN AMERICAN CINEMA
Short Title: LATIN AMERICAN CINEMA
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 408. This course explores the national cinemas of various regions of Latin America. Special attention is given to the different periods of its development, to the close relationship between political contexts and filmmaking, to the understanding of Latin American cinema from cultural studies views, and to the current shaping of Latin America in light of globalization. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 430 - LATIN AMERICAN WOMEN'S CULTURE
Short Title: LATIN AMERICAN WOMEN'S CULTURE
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar

Description: Formerly SPAN 471. A variable topics course designed to build on student knowledge of chicano/a literature and culture gained earlier in the curriculum. Past topics have included the Chicano/a novel, and Transitions and Translations Chicano/a Autobiography. Cross-list: ENGL 471. Repeatable for Credit.

SPPO 462 - DON QUIJOTE
Short Title: DON QUIXOTE
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 412. Cervantes's masterpiece is studied in its relationship to the books of knight errantry, and to the picaresque and pastoral novels, with emphasis on the innovative techniques of Cervantes which contribute to the birth of the modern novel. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 466 - THE SPANISH CIVIL WAR
Short Title: THE SPANISH CIVIL WAR
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 375. Prelude to World War II and culmination of perennial struggles between the so-called "two Spains," the Spanish Civil War (1936-39) is a watershed moment in modern Spanish and European history. Interdisciplinary, multi-media approach: the war seen through Spanish and foreign novels, poetry, film, painting, journalism, songs, and posters. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 467 - 20TH-CENTURY SPANISH NOVEL
Short Title: 20TH-CENTURY SPANISH NOVEL
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 430. This course examines the evolution of the Spanish novel as a work of art while exploring how cultural issues are incorporated into fictional worlds. Recommended Prerequisite(s): SPAN 301, 302, 303, 312, or Permission of the Instructor.

SPPO 477 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Internship/Practicum, Lecture, Seminar
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Topics and credit hours may vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.

SPPO 490 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 471. A variable topics course designed to be in Spanish. 5-Week Summer Session Course. Instructor Permission Required.

SPPO 492 - SUMMER INTERNSHIP IN MADRID
Short Title: SUMMER INTERNSHIP IN MADRID
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course will offer the opportunity of an internship with Spanish companies or non-governmental organizations (NGO). In this professional practice, participants will be immersed in daily business activities and special projects associated with their particular area of interest. Nearly all interactions with supervisors and colleagues will be in Spanish. 5-Week Summer Session Course. Instructor Permission Required.

SPPO 495 - HONORS THESIS
Short Title: HONORS THESIS
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formerly SPAN 495. Independent research projects by outstanding Hispanic Studies majors leading to a substantial honors essay, undertaken in close cooperation with a departmental faculty member, who must first approve the thesis proposal. Department Permission Required.

SPPO 477 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Internship/Practicum, Lecture, Seminar
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Topics and credit hours may vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.
Spanish (SPAN)

SPAN 141 - FIRST YEAR SPANISH I
Short Title: FIRST YEAR SPANISH I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Development of interational competence in Spanish (sociolinguistic and sociocultural knowledge) to communicate and interact with speakers of Spanish. SPAN 222 - AP/OTH CREDIT IN SPANISH LANGUAGE
Short Title: AP/OTH CREDIT SPANISH LANGUAGE
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Transfer
Credit Hours: 3
Course Level: Undergraduate Lower-Level
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation. Mutually Exclusive: Credit cannot be earned for SPAN 222 and SPAN 101/SPAN 141/SPAN 161.

SPAN 255 - AP/OTH CREDIT IN INTERMEDIATE SPANISH
Short Title: AP/OTH CREDIT INTERM. SPAN
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Transfer
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation. Mutually Exclusive: Credit cannot be earned for SPAN 225 and SPAN 201/SPAN 263.

SPAN 263 - SECOND YEAR SPANISH I
Short Title: SECOND YEAR SPANISH I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): SPAN 142
Description: Continuation of SPAN 142. Development of interational competence in Spanish (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Spanish. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for SPAN 263 and SPAN 201/SPAN 225.
Course URL: clicspanish.blogs.rice.edu

SPAN 264 - SECOND YEAR SPANISH II
Short Title: SECOND YEAR SPANISH II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): SPAN 263
Description: Continuation of SPAN 263. Development of interational competence in Spanish (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Spanish. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for SPAN 264 and SPAN 202.
Course URL: clicspanish.blogs.rice.edu
SPAN 303 - ADVANCED SPANISH FOR BI-CULTURAL STUDENTS

Short Title: ADV SPAN Bi-CULTURAL STUDENTS
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): SPAN 264
Description: SPAN 303 aims to bring students to advanced proficiency in Spanish, enabling them to interact confidently in a wide variety of contexts, while providing them with cultural insights about the Hispanic world. It is designed for students who come with bi-cultural exposure and at least intermediate proficiency in Spanish.

SPAN 321 - SPECIAL TOPICS: ADVANCED SPANISH I

Short Title: SPECIAL TOPICS: ADV SPANISH I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): SPAN 264
Description: This course helps students develop an advanced level of proficiency in Spanish through the analysis and use of the target language in the context of specific topics of interest that will vary.

SPAN 322 - SPECIAL TOPICS: ADVANCED SPANISH II

Short Title: SPECIAL TOPICS: ADV SPANISH II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): SPAN 264
Description: This is a continuation of SPAN 321. This course helps students develop an advanced level of proficiency in Spanish through the analysis and use of the target language in the context of specific topics of interest that will vary.

SPAN 323 - SPANISH PROFESSIONAL APPRENTICESHIP I

Short Title: SPANISH PROFESSIONAL APPR I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): SPAN 322
Description: This hybrid course combines internship hours and course hours for students who are interested in using their Spanish-language skills in professional settings. Course meets on campus on Wednesdays; and on location during internship working hours, to be determined between student and instructor.

SPAN 324 - SPANISH PROFESSIONAL APPRENTICESHIP II

Short Title: SPANISH PROFESSIONAL APPR II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course provides experiential learning for student show are interested in expanding their interactional and intercultural competence in Spanish in professional settings. Students participate as apprentices which includes working in contextualized strategic scenarios (simulated and/or real) such as simulations, shadowing professionals, work-related tasks, and case studies. *Department:* Sport Management  
*Grade Mode:* Standard Letter  
*Course Type:* Internship/Practicum  
*Credit Hours:* 3  
*Restrictions:* Graduate level students may not enroll.  
*Course Level:* Undergraduate Upper-Level  
*Prerequisite(s):* (SMGT 260 or KINE 260) and (SMGT 276 or KINE 276)  
*Description:* Internship experience for upper-level students in sport management.

**SMGT 377 - SPORT MANAGEMENT INTERNSHIP 2**

*Short Title:* SPORT MANAGEMENT INTERNSHIP 2  
*Department:* Sport Management  
*Grade Mode:* Standard Letter  
*Course Type:* Internship/Practicum  
*Credit Hours:* 3  
*Restrictions:* Graduate level students may not enroll.  
*Course Level:* Undergraduate Upper-Level  
*Prerequisite(s):* (SMGT 260 or KINE 260) and (SMGT 276 or KINE 276)  
*Description:* Internship experience for upper-level students in sport management.

**SMGT 378 - SPORT MANAGEMENT INTERNSHIP 3**

*Short Title:* SPORT MANAGEMENT INTERNSHIP 3  
*Department:* Sport Management  
*Grade Mode:* Standard Letter  
*Course Type:* Internship/Practicum  
*Credit Hours:* 3  
*Restrictions:* Graduate level students may not enroll.  
*Course Level:* Undergraduate Upper-Level  
*Prerequisite(s):* (SMGT 260 or KINE 260) and (SMGT 276 or KINE 276)  
*Description:* Internship experience for upper-level students in sport management.

**SMGT 379 - SPORT MANAGEMENT INTERNSHIP 4**

*Short Title:* SPORT MANAGEMENT INTERNSHIP 4  
*Department:* Sport Management  
*Grade Mode:* Standard Letter  
*Course Type:* Internship/Practicum  
*Credit Hours:* 1-6  
*Restrictions:* Graduate level students may not enroll.  
*Course Level:* Undergraduate Upper-Level  
*Prerequisite(s):* (SMGT 260 or KINE 260) and (SMGT 276 or KINE 276)  
*Description:* Internship experience for upper-level students in sport management. Repeatable for Credit.

**SMGT 405 - RESEARCH IN SPORT MANAGEMENT**

*Short Title:* RESEARCH IN SPORT MANAGEMENT  
*Department:* Sport Management  
*Grade Mode:* Standard Letter  
*Course Type:* Research  
*Credit Hours:* 3  
*Restrictions:* Graduate level students may not enroll.  
*Course Level:* Undergraduate Upper-Level  
*Prerequisite(s):* (KINE 319 or STAT 280) and (SMGT 260 or KINE 260)  
*Description:* This class is designed to provide students with experience working on actual research projects, likely with one of the professional sport franchises in Houston. At the end of the semester, the class will present its findings to the organization's upper management.
and the measurement of change effectiveness. Unplanned changes and emphasizing development of change strategies will include an examination of the successful management of planning for and introducing change in sport organizations. This

SMGT 460 - BUSINESS ANALYSIS IN SPORT

Short Title: THEORIES-HIGH LVL PERFORMANCE

Department: Sport Management

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: This is a class designed for students who plan to go into coaching or training. It will provide the most current information available for training elite athletes in the area of strength, power, speed, and flexibility. Experts in the field of strength training, plyometrics, speed training, and flexibility will speak. The nature and basis of elite athlete training related to exercise physiology, biomechanics, motor learning, sport psychology, and nutrition will be explored.

SMGT 430 - INTRODUCTION TO SPORT ANALYTICS

Short Title: INTRO TO SPORT ANALYTICS

Department: Sport Management

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Prerequisite(s): SMGT 260 and STAT 280

Description: The focus of this course will be to provide the basics for understanding and applying analytical techniques to professional teams both on the sports side (predicting player performance and outcomes) and the business side (establishing business models). A survey into basic statistical techniques (multiple regression, discriminant analysis, etc.) will be the foundation of the class.

SMGT 440 - SPORT BUSINESS ANALYTICS

Short Title: SPORT BUSINESS ANALYTICS

Department: Sport Management

Grade Mode: Standard Letter

Course Type: Seminar

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Prerequisite(s): SMGT 260 and SMGT 430

Description: In this age of Big Data, employees must be tech savvy with a strong background in computer and statistical analysis. Sport Business Analytics calls for special approaches to marketing and pricing. This course is designed to introduce the students to techniques that will allow for productive sport business analytics. Instructor Permission Required.

SMGT 460 - BUSINESS ANALYSIS IN SPORT

Short Title: BUSINESS ANALYSIS IN SPORT

Department: Sport Management

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Prerequisite(s): SMGT 260 or KINE 260

Description: Students will be exposed to the aspects of effectively planning for and introducing change in sport organizations. This will include an examination of the successful management of organizational and behavioral changes, focusing on planned and unplanned changes and emphasizing development of change strategies and the measurement of change effectiveness.

SMGT 464 - ADVANCED SPORT LAW

Short Title: ADVANCED SPORT LAW

Department: Sport Management

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Prerequisite(s): SMGT 364

Description: This course examines legal issues impacting amateur and professional sports. Students will analyze sport cases and materials that cover multiple disciplines, including contracts, torts, constitutional law, labor and employment, and criminal law. Students will augment their learning through analysis and discussion of up-to-the-minute professional and collegiate sports law developments.

SMGT 465 - SPORT CONTRACTS AND NEGOTIATION

Short Title: SPORT CONTRACTS & NEGOTIATION

Department: Sport Management

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Prerequisite(s): SMGT 260 and SMGT 364

Description: This course introduces students to contracts and negotiations and how they are used in sport management. Students will develop an understanding of contract language, drafting, and negotiation, as well as practical experience applying those techniques through exercises and role-play designed to increase understanding and enhance learning.

SMGT 466 - SPORT PUBLIC RELATIONS

Short Title: SPORT PUBLIC RELATIONS

Department: Sport Management

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Prerequisite(s): (SMGT 260 or KINE 260) and (SMGT 362 or KINE 362)

Description: An applied study of media in business and sport with an emphasis on press conferences, news releases, media-athlete relations, communications, print journalism, and community relations. Recommended Prerequisite(s): HUMA 201 or LEAD 321.

SMGT 467 - SPORTS JOURNALISM

Short Title: SPORTS JOURNALISM

Department: Sport Management

Grade Mode: Standard Letter

Course Type: Seminar

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Prerequisite(s): SMGT 260 or KINE 260

Description: Successful journalists must be able to communicate through their writing, their spoken word, and also through video. Students in this class will learn all of the different journalism formats and techniques including writing short and long articles, blogging, videos, podcasts, interviews, PR writing, social media, etc. Students will complete assignments in each of these areas. When students finish the course, they will have an updated portfolio filled with examples of their work. Recommended Prerequisite(s): SMGT 466
SMGT 470 - SPORT MANAGEMENT SEMINAR  
**Short Title:** SPORT MANAGEMENT SEMINAR  
**Department:** Sport Management  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** (SMGT 260 or KINE 260) and (SMGT 276 or KINE 276)  
**Description:** The object of this course is to expose students to upper-level problem-solving methods in the sport management industry. Students will learn by writing and solving case studies as well as discussing current issues. This class is designed for students who are pursuing a career in the sport management industry. Students will also interact with a series of speakers from the industry. Students should have completed the majority of SMGT classes before considering taking this course. Instructor Permission Required. Repeatable for Credit.

SMGT 490 - SEMINAR IN SPORTS ANALYTICS  
**Short Title:** SEMINAR IN SPORTS ANALYTICS  
**Department:** Sport Management  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** SMGT 430 and COMP 140 and STAT 385 and STAT 405  
**Description:** This course is designed to be the culminating experience in the Sport Analytics Minor. It will involve working with a professional or college sports team researching a real problem. Also, selected speakers will discuss cutting edge research in the field of Sports Analytics. Instructor Permission Required.

SMGT 495 - INDEPENDENT STUDY  
**Short Title:** INDEPENDENT STUDY  
**Department:** Sport Management  
**Grade Mode:** Standard Letter  
**Course Type:** Independent Study  
**Credit Hours:** 1-3  
**Restrictions:** Enrollment limited to students with a class of Junior or Senior. Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Reading or research project to be determined by discussions between student(s) and faculty member(s). Must have the approval of the Chair of the Department of Sport Management and the participating faculty member. Instructor Permission Required.

SMGT 499 - TEACHING PRACTICUM  
**Short Title:** TEACHING PRACTICUM  
**Department:** Sport Management  
**Grade Mode:** Standard Letter  
**Course Type:** Internship/Practicum  
**Credit Hours:** 1-3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Advanced teaching experience for upper level students who have demonstrated a particular aptitude and interest in an area of sport management. Students assist in conducting a course in which they have previously excelled. The student will learn techniques in course management, instruction, and evaluation. The Chair of the Department of Sport Management must approve all teaching assistants. Prerequisites: declared Sport Management major. Student must have received at least an "A-" in the course serving as the practicum. Instructor Permission Required. Repeatable for Credit.

**Statistics (STAT)**

STAT 280 - ELEMENTARY APPLIED STATISTICS  
**Short Title:** ELEMENTARY APPLIED STATISTICS  
**Department:** Statistics  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Distribution Group:** Distribution Group III  
**Credit Hours:** 4  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Description:** Topics include basic probability, descriptive statistics, probability distributions, confidence intervals, significance testing, simple linear regression and correlation, association between categorized variables.  
**Course URL:** statistics.rice.edu/feed/Courses.aspx

STAT 281 - HISTORY OF NUMBERS AND GAMES OF CHANCE  
**Short Title:** NUMBER HISTORY/GAMES OF CHANCE  
**Department:** Statistics  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Description:** Starting with the colorful history of numbers, we discover their use to characterize chance or luck through probability; students will participate in one major project and submit a report-application areas include physics, computer science, sports, finance, etc. The course is accessible to sophomores and juniors in science, engineering or business. Cross-list: COMP 281, ELEC 281.
STAT 305 - INTRODUCTION TO STATISTICS FOR BIOSCIENCES
Short Title: INTRO TO STAT FOR BIOSCIENCES
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 101 and MATH 102
Description: An introduction to statistics for Biosciences with emphasis on statistical models and data analysis techniques. Computer-assisted data analysis and examples, are explored in laboratory sessions. Topics include descriptive statistics, correlation and regression, categorical data analysis, statistical inference through confidence intervals and significance testing, rates, and proportions. Real-world examples are emphasized. Recommended Prerequisite(s): MATH 212.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 310 - PROBABILITY AND STATISTICS
Short Title: PROBABILITY & STATISTICS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 102
Description: Probability and the central concepts and methods of statistics including probability, distributions of random variables, expectation, sampling distributions, estimation, confidence intervals, and hypothesis testing. Cross-list: ECON 307. Recommended prerequisite(s): MATH 212.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 312 - PROBABILITY & STATISTICS FOR ENGINEERS
Short Title: PROB & STAT FOR ENGINEERS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 102
Description: Probability and the central concepts and methods of statistics including probability, distributions of random variables, expectation, sampling distributions, estimation, confidence intervals, and hypothesis testing. Examples are predominantly from civil and environmental engineering. Recommended Prerequisite(s): MATH 212.

STAT 313 - UNCERTAINTY AND RISK IN URBAN INFRASTRUCTURES
Short Title: UNCERT & RISK IN URBAN INFRAST
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): STAT 312 or STAT 310 or ECON 307 or ECON 382 or STAT 331 or ELEC 331
Description: Practical applications and relevance of infrastructure risk are developed in the context of real engineering problems and phenomena, including unique systems and challenges of the gulf coast area. The course starts with a survey of the roles of probability in engineering and focuses on computer-based methods, the Bayesian approach, risk analysis tools, and infrastructure safety. Cross-list: CEVE 313. Repeatable for Credit.

STAT 317 - ECONOMETRICS
Short Title: ECONOMETRICS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 209 or ECON 309 or ECON 446) and (ECON 308 or ECON 401 or ECON 477)
Description: Survey of estimation and forecasting models. Includes multiple regression time series analysis. A good understanding of linear algebra is highly desirable. Cross-list: ECON 310. Mutually Exclusive: Credit cannot be earned for STAT 317 and ECON 409/STAT 400.

STAT 318 - METHODS OF DATA ANALYSIS AND SYSTEM OPTIMIZATION
Short Title: METHODS FOR DATA ANALYSIS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): STAT 280 or STAT 305 or STAT 310 or ECON 307 or STAT 312
Description: The three general topic areas covered in this methodology oriented course are statistical methods including regression, sampling, and experimental design; simulation based methods in statistics, queuing and inventory problems; and an introduction to optimization methods. Excel will serve as the basic computing software.
Course URL: statistics.rice.edu/feed/Courses.aspx
STAT 405 - R FOR DATA SCIENCE  
**Short Title:** R FOR DATA SCIENCE  
**Department:** Statistics  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Distribution Group:** Distribution Group III  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** STAT 305 or STAT 312 or (STAT 310 or ECON 307 or ECON 382) or STAT 385  
**Description:** Students will learn how to work through data science problems within the statistical programming language R. The course covers the complete analytical process, from getting your data into R, to applying appropriate exploratory and statistical analysis, and communicating the results. Important topics in data science (e.g. databases, web scraping, and big data) and efficient programming are integrated throughout the course. Graduate/Undergraduate Equivalency: STAT 605. Mutually Exclusive: Credit cannot be earned for STAT 405 and STAT 605.

STAT 410 - LINEAR REGRESSION  
**Short Title:** LINEAR REGRESSION  
**Department:** Statistics  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 4  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** STAT 310 or STAT 312 or ECON 307 or ECON 382  
**Description:** An introduction to linear regression and its applications. Topics include simple and multiple linear regression, least squares, analysis of variance, model selection, diagnostics, remedial measures. Applications to real data using statistical software are emphasized. Recommended Prerequisite(s): CAAM 335 or MATH 355.  
**Course URL:** statistics.rice.edu/feed/Courses.aspx

STAT 411 - ADVANCED STATISTICAL METHODS  
**Short Title:** ADVANCED STATISTICAL METHODS  
**Department:** Statistics  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** (STAT 310 or STAT 312 or ECON 307 or ECON 382) and (STAT 410 or STAT 615)  
**Description:** Advanced topics in statistical applications such as sampling, experimental design and statistical process control. STAT 411 will have assignments and examinations focusing more on basic concepts than on theoretical methods. Graduate/Undergraduate Equivalency: STAT 616. Mutually Exclusive: Credit cannot be earned for STAT 411 and STAT 616.  
**Course URL:** statistics.rice.edu/feed/Courses.aspx

STAT 413 - INTRODUCTION TO STATISTICAL MACHINE LEARNING  
**Short Title:** INTRO TO STAT MACHINE LEARNING  
**Department:** Statistics  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** STAT 410 and STAT 405 or CAAM 210 or COMP 140 or COMP 130  
**Description:** This course is an introduction to concepts, methods, and best practices in statistical machine learning. Topics covered include regularized regression, classification, kernels, dimension reduction, clustering, trees, and ensemble learning. Emphasis will be placed on applied data analysis and computation. Recommended Prerequisite(s): STAT 411 and CAAM 335 or MATH 354 or MATH 355.  

STAT 415 - DATA SCIENCE CONSULTING  
**Short Title:** DATA SCIENCE CONSULTING  
**Department:** Statistics  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** STAT 405 or COMP 140 or CAAM 210  
**Description:** Students in this course will advise clients from across this Rice community in a data science consulting clinic, learn best practices in consulting, and gain exposure to a variety of real data science problems. Instructor Permission Required. Recommended Prerequisite(s): STAT 413 or COMP 440 or COMP 540 or COMP 330 or STAT 411. Mutually Exclusive: Credit cannot be earned for STAT 415 and STAT 515. Repeatable for Credit.

STAT 418 - PROBABILITY  
**Short Title:** PROBABILITY  
**Department:** Statistics  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Topics include random variables, distributions, transformations, moment generating functions, common families of distributions, independence, sampling distributions, and basic stochastic processes. STAT 418 will have assignments and examinations focusing more on basic concepts than on theoretical methods. Graduate/Undergraduate Equivalency: STAT 518. Mutually Exclusive: Credit cannot be earned for STAT 418 and STAT 518.
STAT 419 - STATISTICAL INFERENCE
Short Title: STATISTICAL INFERENCE
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (MATH 354 or MATH 355 or CAAM 335) and STAT 418
Description: Topics include principles of data reduction, point estimation, hypothesis testing, interval estimation, Bayesian inference, Decision Theory, inference foundations of analysis of variance and regression. STAT 419 will have assignments and examinations focusing more on basic concepts than on theoretical methods. Graduate/Undergraduate Equivalency: STAT 519. Mutually Exclusive: Credit cannot be earned for STAT 419 and STAT 519.

STAT 421 - APPLIED TIME SERIES AND FORECASTING
Short Title: APPLIED TIME SERIES/FORECASTNG
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): STAT 410
Description: Applied time series modeling and forecasting, with applications to financial markets. STAT 621 is a graduate version of STAT 421 with advanced assignments. Graduate/Undergraduate Equivalency: STAT 621. Recommended Prerequisite(s): STAT 410.
Mutually Exclusive: Credit cannot be earned for STAT 421 and STAT 621.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 423 - PROBABILITY IN BIOINFORMATICS AND GENETICS
Short Title: PROB BIOINFORMATICS & GENETICS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): STAT 310 or STAT 312 or STAT 418
Description: Course introduces the student to modern biotechnology and genomic data. Statistical methods to analyze genomic data are covered, including probability models, basic stochastic processes, and statistical modeling. Biological topics include DNA sequence analysis, phylogenetic inference, gene finding, and molecular evolution. Graduate/Undergraduate Equivalency: STAT 623. Mutually Exclusive: Credit cannot be earned for STAT 423 and STAT 623.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 425 - INTRODUCTION TO BAYESIAN INFERENCE
Short Title: INTRO TO BAYESIAN INFERENCE
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): STAT 410 and STAT 405 or COMP 210 or COMP 140 or COMP 130
Description: This course is an introduction to Bayesian inference, with emphasis on concepts and methods for analyzing data. We will consider a variety of models, including MCMC algorithms and methods for linear regression and hierarchical models. Computational methods will be emphasized. Recommended Prerequisite(s): STAT 411 or CAAM 335 or MATH 355.

STAT 440 - STATISTICS FOR BIOENGINEERING
Short Title: STATISTICS FOR BIOENGINEERING
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 252 (may be taken concurrently)
Description: Course covers application of statistics to bioengineering. Topics include descriptive statistics, estimation, hypothesis testing, ANOVA, and regression. Offered first five weeks of the semester. BIOE 252 may be taken concurrently with STAT 440. BIOE 440/STAT 440 and BIOE 439 cannot both be taken for credit. Cross-list: BIOE 440. Mutually Exclusive: Credit cannot be earned for STAT 440 and BIOE 439.

STAT 449 - QUANTITATIVE FINANCIAL RISK MANAGEMENT
Short Title: QUAN FINANCIAL RISK MANAGEMENT
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 211 and MATH 212 and (ECON 400 or STAT 400 or ECON 409 or STAT 410) or STAT 310 or ECON 307 or STAT 312 or STAT 331 or ELEC 331
Description: This course covers the use of financial securities and derivatives to take or hedge financial risk positions. Most commonly used instruments, from simple forwards and futures to exotic options and swaptions are covered. The pricing of derivatives securities will also be studied, but the emphasis will be on the mechanics and uses of financial engineering methods. STAT 449 is mutually exclusive to ECON 449. Credit cannot be given for both. Graduate/Undergraduate Equivalency: STAT 649. Mutually Exclusive: Credit cannot be earned for STAT 449 and ECON 449.
STAT 450 - SENIOR CAPSTONE PROJECT
Short Title: SENIOR CAPSTONE PROJECT
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-3
Restrictions: Enrollment limited to students with a class of Senior. Enrollment is limited to students with a major in Statistics. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students engage in individual or team-oriented statistical projects to solve problems motivated by theory, computation, or application to real problems and data. Typical projects involve statistical modeling, data analysis, and computing to answer substantive questions in engineering or the physical, biological, or social sciences. Participants attend regular seminars addressing project development, research techniques and effective written and verbal communication skills in presenting statistical results. Repeatable for Credit.

STAT 453 - BIOSTATISTICS
Short Title: BIOSTATISTICS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): STAT 410
Description: An overview of statistical methodologies useful in the practice of Biostatistics. Topics include epidemiology, rates, and proportions, categorical data analysis, regression, and logistic regression, retrospective studies, case-control studies, survival analysis. Real biomedical applications serve as context for evaluating assumptions of statistical methods and models. R serves as the computing software. Graduate/Undergraduate Equivalency: STAT 553. Mutually Exclusive: Credit cannot be earned for STAT 453 and STAT 553.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 470 - FROM SEQUENCE TO STRUCTURE: AN INTRODUCTION TO COMPUTATIONAL BIOLOGY
Short Title: FROM SEQUENCE TO STRUCTURE
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Contemporary introduction to problems in computational biology spanning sequence to structure. The course has three modules: the first introduces students to the design and statistical analysis of gene expression studies; the second covers statistical machine learning techniques for understanding experimental data generated in computational biology; and the third introduces problems in the modeling of protein structure using computational methods from robotics. The course is project oriented with an emphasis on computation and problem-solving. Cross-list: BIOE 470, COMP 470. Recommended Prerequisite(s): COMP 280 and (STAT 310 or STAT 331).
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 482 - QUANTITATIVE FINANCIAL ANALYTICS
Short Title: QUANT FINANCIAL ANALYTICS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level

STAT 484 - ENVIRONMENTAL RISK ASSESSMENT & HUMAN HEALTH
Short Title: ENVIR RISK ASSESS&HUMAN HLTH
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): STAT 280 or STAT 305
Description: Learn and apply quantitative risk assessment methodology to estimate human health risk from environmental exposure to contamination in air, soil and water. Students will conduct a series of team projects focused on toxicology, risk based screening levels, exposure concentration estimation and risk characterization. Cross-list: CEVE 484. Graduate/Undergraduate Equivalency: STAT 684. Mutually Exclusive: Credit cannot be earned for STAT 484 and STAT 684.

STAT 485 - ENVIRONMENTAL STATISTICS AND DECISION MAKING
Short Title: ENVIR STAT & DECISION MAKING
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): STAT 305 or STAT 385
Description: A project oriented computer intensive course focusing on statistical and mathematical solutions and investigations for the purpose of environmental decisions. This course is the undergraduate version of STAT 685 with reduced requirements. Graduate/Undergraduate Equivalency: STAT 685. Recommended Prerequisite(s): STAT 305 and STAT 385. Mutually Exclusive: Credit cannot be earned for STAT 485 and STAT 685.
STAT 486 - MARKET MODELS
Short Title: MARKET MODELS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): STAT 310 or ECON 307 or ECON 382 or STAT 312
Description: This course takes the classical efficient market models and superimposes upon it models for other stochastic phenomena not generally accounted for in efficient market theory, showing how risk is lessened by portfolios and other mechanisms. This undergraduate course uses computer simulations as an alternative to closed form solutions.
Graduate/Undergraduate Equivalency: STAT 686. Mutually Exclusive: Credit cannot be earned for STAT 486 and STAT 686.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 490 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Statistics
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

STAT 491 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Statistics
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

STAT 496 - RTG CROSS-TRAINING IN DATA SCIENCE
Short Title: RTG CROSS-TRAINING IN DATA SCI
Department: Statistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to students with a major in Computer Science or Statistics. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A seminar course to introduce students to topics in Data Science at the interface between Statistics and Computer Science. Students participate in the process of preparing, delivering and critiquing talks. Topics change each semester. Instructor Permission Required.
Cross-list: COMP 496. Graduate/Undergraduate Equivalency: STAT 696. Mutually Exclusive: Credit cannot be earned for STAT 496 and STAT 696. Repeatable for Credit.

STAT 498 - RESEARCH THEMES IN THE MATHEMATICAL SCIENCES
Short Title: RESEARCH THEMES IN MATH. SCI.
Department: Statistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A seminar course that will cover selected theme of general research in the mathematical sciences from the perspectives of mathematics, computational and applied mathematics and statistics. The course may be repeated multiple times for credit. Cross-list: CAAM 498, MATH 498. Graduate/Undergraduate Equivalency: STAT 698. Mutually Exclusive: Credit cannot be earned for STAT 498 and STAT 698. Repeatable for Credit.

STAT 499 - MATHEMATICAL SCIENCES SEMINAR
Short Title: MATHEMATICAL SCIENCES
Department: Statistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course prepares a student for research in the mathematical sciences. Topics will change each semester. Current topics include bioinformatics, biomathematics, computational finance, and superimposes upon it models for other stochastic phenomena not generally accounted for in efficient market theory, showing how risk is lessened by portfolios and other mechanisms. This undergraduate course uses computer simulations as an alternative to closed form solutions.
Graduate/Undergraduate Equivalency: STAT 699. Repeatable for Credit.
Course URL: www.statistics.rice.edu

STAT 502 - NEURAL MACHINE LEARNING I
Short Title: NEURAL MACHINE LEARNING I
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Review of major neural machine learning (Artificial Neural Network) paradigms. Analytical discussion of supervised and unsupervised neural learning algorithms and their relation to information theoretical methods. Practical applications to data analysis such as pattern recognition, clustering, classification, function approximation/ regression, non-linear PCA, projection pursuit, independent component analysis, with lots of examples from image and digital processings. Details are posted at www.ece.rice.edu/~erzsebet/ANNcourse.html. Cross-list: COMP 502, ELEC 502.
Course URL: www.ece.rice.edu/~erzsebet/ANNcourse.html

STAT 503 - TOPICS METHODS AND DATA ANALYSIS
Short Title: TOPICS METHODS&DATA ANALYSIS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Applications of least squares and general linear mode. Cross-list: POLI 503.
STAT 509 - ADVANCED PSYCHOLOGICAL STATISTICS I
Short Title: ADVANCED PSYC STATISTICS I
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to students with a major in Psychology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to inferential statistics, with emphasis on analysis of variance. Students who do not meet registration requirements as Graduate and Psychology Majors must receive instructor permission to register. Cross-list: PSYC 502.

STAT 510 - ADVANCED PSYCHOLOGICAL STATISTICS II
Short Title: ADVANCED PSYC STATISTICS II
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): PSYC 502 or STAT 509
Description: A continuation of PSYC 502, focusing on multiple regression. Other multivariate techniques and distribution-free statistics are also covered. Cross-list: PSYC 503.

STAT 514 - INTRODUCTION TO BIOSTATISTICS
Short Title: INTRODUCTION TO BIOSTATISTICS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Bioengineering. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Presents basic and advanced methods of statistics as applied to problems in bioengineering. Demonstrates techniques for data organization, exploration, and presentation. Foundations of statistical estimation, inference, and testing are reviewed. Optimal planning of experiments is explored. Advanced techniques include multiple regression, variable selection, logistic regression, analysis of variance, survival analysis, multiple measurements and measurements over time. Additional topics, such as Bayesian methods, will be discussed as time allows. Labs will use the statistical software JMP and/or R. Cross-list: BIOE 514.

STAT 515 - DATA SCIENCE CONSULTING
Short Title: DATA SCIENCE CONSULTING
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 413 or COMP 440 or COMP 540 or COMP 330 or STAT 411.
Description: Students in this course will advise clients from across this Rice community in a data science consulting clinic, learn best practices in consulting, and gain exposure to a variety of real data science problems. Instructor Permission Required. Recommended Prerequisite(s): STAT 413 or COMP 440 or COMP 540 or COMP 330 or STAT 411. Mutually Exclusive: Credit cannot be earned for STAT 515 and STAT 415. Repeatable for Credit.

STAT 518 - PROBABILITY
Short Title: PROBABILITY
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics include random variables, distributions, transformations, moment generating functions, common families of distributions, independence, sampling distributions, and basic stochastic processes. STAT 518 will have more advanced assignments and examinations focusing on theoretical methods. Graduate/Undergraduate Equivalency: STAT 418. Mutually Exclusive: Credit cannot be earned for STAT 518 and STAT 418.

STAT 519 - STATISTICAL INFERENCE
Short Title: STATISTICAL INFERENCE
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 518
Description: Topics include principles of data reduction, point estimation, hypothesis testing, interval estimation, Bayesian inference, Decision Theory, inference foundations of analysis of variance and regression. STAT 519 will have more advanced assignments and examinations focusing on theoretical methods. Graduate/Undergraduate Equivalency: STAT 419. Mutually Exclusive: Credit cannot be earned for STAT 519 and STAT 419.

STAT 522 - ADVANCED BAYESIAN STATISTICS
Short Title: ADVANCED BAYESIAN STATISTICS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 422 or STAT 622
Description: Modern Topics in Bayesian Statistics.
STAT 525 - BAYESIAN STATISTICS
Short Title: BAYESIAN STATISTICS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers Bayesian Inference and methods for analyzing data. The emphasis will be on applied data analysis rather than theoretical development. We will consider a variety of models, including linear regression, hierarchical models, and models for categorical data. Recommended Prerequisite(s): STAT 519 and STAT 615 and STAT 605.

STAT 532 - FOUNDATIONS OF STATISTICAL INFERENCE I
Short Title: FOUNDATIONS OF STAT INF I
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 519
Description: The first semester in a two-semester sequence in mathematical statistics: random variables, distributions, small and large sample theorems of decision theory and Bayesian methods, hypothesis testing, point estimation, and confidence intervals; topics such as exponential families, univariate and multivariate linear models, and nonparametric inference will also be discussed. Required for graduate students in statistics.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 533 - FOUNDATIONS OF STATISTICAL INFERENCE II
Short Title: FOUNDATIONS OF STAT INF II
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 532
Description: A continuation of STAT 532. Required for Ph.D. students in statistics.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 540 - PRACTICUM IN STATISTICAL MODELING
Short Title: STATISTICAL MODELING
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment is limited to students with a major in Statistics. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course introduces current theoretical and applied problems encountered in statistical practice. The content changes each semester in response to contemporary topics. Designed for graduate students in statistics. Repeatable for Credit.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 541 - MULTIVARIATE ANALYSIS
Short Title: MULTIVARIATE ANALYSIS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 410 or STAT 615
Description: Study of multivariate data analysis and theory. Topics include normal theory, principal components, factor analysis, discrimination, estimation and hypothesis testing, multivariate analysis of variance and regression clustering.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 542 - SIMULATION
Short Title: SIMULATION
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 519 and (STAT 615 or STAT 410)
Description: Topics in stochastic simulation including; random number generators; Monte Carlo methods, resampling methods, Markov Chain Monte Carlo, importance sampling and simulation based estimation for stochastic processes.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 545 - GLM & CATEG'L DATA ANALYSIS
Short Title: GLM & CATEG'L DATA ANALYSIS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 410 or STAT 615
Description: Contingency tables, association parameters, chi-squared tests, general theory of generalized linear models, logistics regression, loglinear models, poisson regression.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 547 - SURVIVAL ANALYSIS
Short Title: SURVIVAL ANALYSIS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 519 or STAT 615 or STAT 410
Description: Contingency tables, association parameters, chi-squared tests, general theory of generalized linear models, logistics regression, loglinear models, poisson regression.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 554 - GLM & CATEG'L DATA ANALYSIS
Short Title: GLM & CATEG'L DATA ANALYSIS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 410 or STAT 615
Description: Contingency tables, association parameters, chi-squared tests, general theory of generalized linear models, logistics regression, loglinear models, poisson regression.
Course URL: statistics.rice.edu/feed/Courses.aspx
STAT 549 - FUNCTIONAL DATA ANALYSIS
Short Title: FUNCTIONAL DATA ANALYSIS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 533 and STAT 581
Description: Statistical methods for functional data; spaces of functions; pre-processing of functional data; probability models for functional data; basis representations including spline functions, orthogonal bases such as wavelets, and functional principal components; methods of inference for functional data including both frequentist and Bayesian methods.

STAT 550 - NONPARAMETRIC FUNCTION ESTIMATION
Short Title: NONPARAMETRIC FUNCTION EST
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Survey of topics in data analysis including data visualization, multivariate density estimation, and nonparametric regression. Advanced applications will include clustering, discrimination, dimension reduction, and bump-hunting using nonparametric density procedures.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 551 - ADVANCED TOPICS IN TIME SERIES
Short Title: ADVANCED TOPICS IN TIME SERIES
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 552 or STAT 621 or STAT 622
Description: The course will cover current topics in both modeling and forecasting discrete and continuous time series. A brief coverage will also be given to spatial and spatial-temporal processes.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 552 - APPLIED STOCHASTIC PROCESSES
Short Title: APPLIED STOCHASTIC PROCESSES
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 518
Description: This course covers the theory of some of the most frequently used stochastic processes in application; discrete and continuous time, Markov chains, Poisson and renewal processes, and Brownian motion.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 553 - BIOSTATISTICS
Short Title: BIOSTATISTICS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 615
Description: Same as STAT 453 with advanced problem sets. Graduate/Undergraduate Equivalency: STAT 453. Mutually Exclusive: Credit cannot be earned for STAT 553 and STAT 453.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 555 - INTRODUCTION TO RANDOM PROCESSES AND APPLICATIONS
Short Title: INTRO RANDOM PROCESSES & APPL
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 581
Description: Review of basic probability; Sequences of random variables; Random vectors and estimation; Basic concepts of random processes; Random processes in linear systems, expansions of random processes; Wiener filtering; Spectral representation of random processes, and white-noise integrals. Cross-list: CAAM 583, ELEC 553.

STAT 559 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Statistics
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.
STAT 601 - STATISTICS COLLOQUIUM
Short Title: STATISTICS COLLOQUIUM
Department: Statistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Students participate in the process of researching professional literature (journal articles, book chapters, dissertations), preparing, delivering and critiquing talks. Literature topics change each semester. Repeatable for Credit.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 602 - NEURAL MACHINE LEARNING AND DATA MINING II
Short Title: NEURAL MACHINE LEARNING II
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ELEC 502 or COMP 502 or STAT 502
Description: Advanced topics in ANN theories, with a focus on learning high-dimensional complex manifolds with neural maps (Self-Organizing Maps, Learning Vector Quantizers and variants). Application to data mining, clustering, classification, dimension reduction, sparse representation. The course will be a mix of lectures and seminar discussions with active student participation, based on most recent research publications. Students will have access to professional software environment to implement theories. Cross-list: COMP 602, ELEC 602. Repeatable for Credit.
Course URL: www.ece.rice.edu/~erzsebet/NMLcourseII.html

STAT 604 - COMPUTATIONAL ECONOMICS
Short Title: COMPUTATIONAL ECONOMICS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers numerical methods most commonly used in Economics, including solving systems of equations, numerical optimization, stochastic dynamic programming, numerical differentiation and integration, monte carlo methods, and solving ordinary and partial differential equations. Cross-list: ECON 504.

STAT 605 - R FOR DATA SCIENCE
Short Title: R FOR DATA SCIENCE
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Students will learn how to work through data science problems within the statistical programming language R. The course covers the complete analytical process, from getting your data into R, to applying appropriate exploratory and statistical analysis, and communicating the results. Important topics in data science (e.g. databases, web scraping, and big data) and efficient programming are integrated throughout the course. STAT 605 includes more advanced assignments and/or examinations than STAT 405. Graduate/Undergraduate Equivalency: STAT 405. Mutually Exclusive: Credit cannot be earned for STAT 605 and STAT 405.

STAT 606 - SAS STATISTICAL PROGRAMMING
Short Title: SAS STATISTICAL PROGRAMMING
Department: Statistics
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will cover the following: (1) DATA step including arrays, merging, do-loop processing, if then else statements, set statements importing and exporting, space optimization, (2) PROC TABULATE and PROC REPORT, (3) Brief functions survey, e.g. random number generators, character and mathematical functions, time and data functions etc., (4) Formats, (5) Brief survey of statistical PROC's, (6) SAS ODS (Output Delivery System) from statistical procedures, (7) Output datasets from statistical procedures, (8) PROC GRAPH and Statistical Graphics Procedures (SGPLOT, SGPANEL, SGSCATTER), (9) PROC SQL (includes built-in short course on basic SQL), (10) PROC IML including functions, subroutines and optimization etc., (11) Macro programming facility. Priority registration is given to STAT majors.
STAT 610 - ECONOMETRICS I
Short Title: ECONOMETRICS I
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is an advanced survey of econometrics. Topics include probability models, basic stochastic processes, and statistical inference. Emphasis is placed on the ability to analyze critically the literature. Cross-list: ECON 511.

STAT 611 - ECONOMETRICS II
Short Title: ECONOMETRICS II
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics in linear and nonlinear simultaneous equations estimation, including qualitative and categorical dependent variables models and duration analysis. Applied exercises use SAS and the Wharton Quarterly Econometric Model. Cross-list: ECON 511.

STAT 613 - STATISTICAL MACHINE LEARNING
Short Title: STAT MACHINE LEARNING
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is an advanced survey of statistical machine learning theory and methods. Emphasis will be placed methodological, theoretical, and computational aspects of tools such as regularized regression, classification, kernels, dimension reduction, clustering, graphical models, trees, and ensemble learning. Recommended Prerequisite(s): STAT 615 and STAT 431 may be taken concurrently with STAT 613.

STAT 615 - REGRESSION AND LINEAR MODELS
Short Title: REGRESSION AND LINEAR MODELS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A survey of regression, linear models, and experimental design. Topics include simple and multiple linear regression, single- and multi-factor studies, analysis of variance, analysis of covariance, model selection, diagnostics. Data analysis using statistical software is emphasized.
Course URL: ece.rice.edu/~erzsebet/STAT615.html

STAT 616 - ADVANCED STATISTICAL METHODS
Short Title: ADVANCED STATISTICAL METHODS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 615
Description: Advanced topics in statistical applications such as sampling, experimental design and statistical process control. STAT 616 will have more advanced assignments and examinations focusing on theoretical methods. Graduate/Undergraduate Equivalency: STAT 411. Mutually Exclusive: Credit cannot be earned for STAT 616 and STAT 411.

STAT 620 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar on advanced topics in Statistics. Repeatable for Credit.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 621 - APPLIED TIME SERIES AND FORECASTING
Short Title: APPLIED TIME SERIES/FORECASTING
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 615 (may be taken concurrently)
Description: Applied time series modeling and forecasting, with applications to financial markets with advanced problem sets. This is a graduate version of STAT 421 with advanced assignments. The courses STAT 615 and STAT 431 may be taken concurrently with STAT 621 if courses are not in history. Graduate/Undergraduate Equivalency: STAT 421. Mutually Exclusive: Credit cannot be earned for STAT 621 and STAT 421.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 623 - PROBABILITY IN BIOINFORMATICS AND GENETICS
Short Title: PROB BIOINFORMATICS & GENETICS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 310 or STAT 312 or ECON 307 or ECON 382) and (MATH 355 or CAAM 335)
Description: A survey of regression, linear models, and experimental design. Topics include simple and multiple linear regression, single- and multi-factor studies, analysis of variance, analysis of covariance, model selection, diagnostics. Data analysis using statistical software is emphasized.
Course URL: ece.rice.edu/~erzsebet/STAT615.html
STAT 625 - ADVANCED BAYESIAN INFERENCE  
Short Title: ADVANCED BAYESIAN INFERENCE  
Department: Statistics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): STAT 525  
Description: This course focuses on the Bayesian inference with emphasis on theory and applications. In this course, we will cover advancements and challenges in modern Bayesian inference, and illustrate a variety of theoretical and computational methods, simulation techniques, and hierarchical models that are suitable to analyze complex data. Repeatable for Credit.

STAT 630 - TOPICS IN CLINICAL TRIALS  
Short Title: TOPICS IN CLINICAL TRIALS  
Department: Statistics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): STAT 519 and STAT 615  
Description: This course deals with fundamental concepts in the design of clinical studies, ranging from early dose-finding studies (phase I) to screening studies (phase II) to randomized comparative studies (phase III). The goal is to prepare the student to read the clinical trial literature critically and to design clinical studies. Additionally, the faculty will introduce newer designs for clinical studies that incorporate prior knowledge and/or satisfy optimality considerations. Topics include protocol writing; randomization; sample size calculation; study design options; interim monitoring; adaptive designs; multiple end points; and writing up the results of a clinical trial for publication.  
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 648 - GRAPHICAL MODELS AND NETWORKS  
Short Title: GRAPH MODELS & NETWORKS  
Department: Statistics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): STAT 519  
Description: Graphical models – aka Bayes networks, Markov networks, Gaussian networks, etc. – have been widely used to represent complex phenomena with dependence. The course aims to stimulate interest in graphical models and covers directed and undirected graphical models, exponential-family representations of graphical models, statistical inference, finite-sample and large-sample properties, and applications.

STAT 649 - QUANTITATIVE FINANCIAL RISK MANAGEMENT  
Short Title: QUAN FINANCIAL RISK MANAGEMENT  
Department: Statistics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): STAT 519 or STAT 615  
Description: This course covers the use of financial securities and derivatives to take or hedge financial risk positions. Most commonly used instruments, from simple forwards and futures to exotic options and swaptions are covered. The pricing of derivatives securities will also be studied, but the emphasis will be on the mechanics and uses of financial engineering methods. Students receiving graduate credit in STAT 649 will be expected to address additional homework and test questions targeting a graduate level understanding of the material. Graduate/Undergraduate Equivalency: STAT 449.

STAT 650 - STOCHASTIC MODELS IN POPULATION DYNAMICS AND POPULATION GENETICS  
Short Title: STOCH CTRL & STOCH DIFF EQU  
Department: Statistics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): STAT 581  
Description: This course is devoted to stochastic models of biological phenomena at cell and molecular lever, using tools of probability and statistics. The course starts with a refresher on conditional expectations and martingale convergence, Markov and point processes, and generating functions and functionals. It continues with branching process models of proliferations and then with Markov chain models of population genetics. Most examples concern growth and mutation of biological cells, with particular emphasis on cancer.  
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 682 - QUANTITATIVE FINANCIAL ANALYTICS  
Short Title: QUANT. FINANCIAL ANALYTICS  
Department: Statistics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: A modern approach to fundamental analytics of securities, the classic works of Graham and Dodd. Deconstructing the Efficient Market Hypothesis Financial Statement Analysis, Capital Market Theory, CAPM, APT, Fama-French Empirical Financial Forecasting. Graduate/Undergraduate Equivalency: STAT 482. Mutually Exclusive: Credit cannot be earned for STAT 682 and STAT 482.
STAT 684 - ENVIRONMENTAL RISK ASSESSMENT & HUMAN HEALTH
Short Title: ENVIRON RISK ASSESS&HUMAN HLTH
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 518 and (STAT 615 or STAT 410)
Description: This course prepares a student for research in the mathematical sciences on a specific topic. Each section is dedicated to a different topic. Current topics include bioinformatics, biomathematics, computational finance, simulation driven optimization, and data simulation. The topics change each semester. Graduate/Undergraduate Equivalency: STAT 484. Mutually Exclusive: Credit cannot be earned for STAT 684 and STAT 484.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 685 - ENVIRONMENTAL STATISTICS AND DECISION MAKING
Short Title: ENVIR STAT & DECISION MAKING
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 305 or STAT 385
Description: A seminar course to introduce students to topics in Data Science at the interface between Statistics and Computer Science. Students participate in the process of preparing, delivering and critiquing talks. Topics change each semester. Instructor Permission Required. Cross-list: COMP 696. Graduate/Undergraduate Equivalency: STAT 485. Mutually Exclusive: Credit cannot be earned for STAT 685 and STAT 485.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 686 - MARKET MODELS
Short Title: MARKET MODELS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 518 and (STAT 615 or STAT 410)
Description: This course takes the classical efficient market models and superimposes upon it models for other stochastic phenomena not generally accounted for in efficient market theory, showing how risk is lessened by portfolios and other mechanisms. This graduate course uses computer simulations as an alternative to closed form solutions with advanced problem sets. Graduate/Undergraduate Equivalency: STAT 486. Mutually Exclusive: Credit cannot be earned for STAT 686 and STAT 486.
Course URL: statistics.rice.edu/feed/Courses.aspx

STAT 686 - RTG CROSS-TRAINING IN DATA SCIENCE
Short Title: RTG CROSS-TRAINING IN DATA SCI
Department: Statistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to students with a major in Computer Science or Statistics. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A seminar course to introduce students to topics in Data Science at the interface between Statistics and Computer Science. Students participate in the process of preparing, delivering and critiquing talks. Topics change each semester. Instructor Permission Required. Cross-list: COMP 696. Graduate/Undergraduate Equivalency: STAT 496. Mutually Exclusive: Credit cannot be earned for STAT 686 and STAT 496. Repeatable for Credit.

STAT 688 - RESEARCH THEMES IN THE MATHEMATICAL SCIENCES
Short Title: RESEARCH THEMES IN MATH. SCI.
Department: Statistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A seminar course that will cover selected theme of general research in the mathematical sciences from the perspectives of mathematics, computational and applied mathematics and statistics. The course may be repeated multiple times for credit. Cross-list: CAAM 698, MATH 698. Graduate/Undergraduate Equivalency: STAT 498. Mutually Exclusive: Credit cannot be earned for STAT 688 and STAT 498. Repeatable for Credit.

STAT 696 - RTG CROSS-TRAINING IN DATA SCIENCE
Short Title: RTG CROSS-TRAINING IN DATA SCI
Department: Statistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to students with a major in Computer Science or Statistics. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A seminar course to introduce students to topics in Data Science at the interface between Statistics and Computer Science. Students participate in the process of preparing, delivering and critiquing talks. Topics change each semester. Instructor Permission Required. Cross-list: COMP 696. Graduate/Undergraduate Equivalency: STAT 496. Mutually Exclusive: Credit cannot be earned for STAT 686 and STAT 496. Repeatable for Credit.

STAT 699 - MATHEMATICAL SCIENCES SEMINAR
Short Title: MATHEMATICAL SCIENCES
Department: Statistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course prepares a student for research in the mathematical sciences on a specific topic. Each section is dedicated to a different topic. Current topics include bioinformatics, biomathematics, computational finance, simulation driven optimization, and data simulation. The topics change each semester. Graduate/Undergraduate Equivalency: STAT 499. Repeatable for Credit.
Course URL: www.statistics.rice.edu

STAT 800 - THESIS
Short Title: THESIS
Department: Statistics
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.
SSPB 501 - PHYSICAL BIOLOGY
Short Title: PHYSICAL BIOLOGY
Department: Systems/Synthetic/Phys Biology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Basic introduction to a biophysical view of living systems, from the subcellular to the multicellular scales. Topics include: biomolecular dynamics, cellular biomechanics, cell motility and cell division, calcium signaling, action potential propagation, and tissue organization. Cross-list: BIOE 502.

SSPB 502 - INTRO COMPUTATIONAL SYSTEMS BIOLOGY: MODELING & DESIGN PRINCIPLES OF BIOCHEM NETWORKS
Short Title: INTRO SYSTEMS BIOLOGY MODELING
Department: Systems/Synthetic/Phys Biology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course summarizes techniques for quantitative analysis and simulations of basic circuits in genetic regulation, signal transduction and metabolism. We discuss engineering approaches adapted to computational systems biology and aim to formulate evolutionary design principles explaining organization of networks in terms of their physiological demands. We discuss biochemical simulation methodology and software as well as recent advances in the field. Topics include end-product inhibition in biosynthesis, optimality and robustness of the signaling networks and kinetic proofreading. More emphasis on recent advances in the field - paper reading and presentations. Cross-list: BIOE 552. Recommended Prerequisite(s): Basic knowledge of biochemistry, cell biology, linear algebra, and ordinary differential equations is expected.

SSPB 503 - SYNTHETIC BIOLOGY
Short Title: SYNTHETIC BIOLOGY
Department: Systems/Synthetic/Phys Biology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Design of biology at scales from molecules to multicellular organisms will be covered by lecture, primary literature, and student presentations. Students will write a research proposal at the end of the course. Cross-list: BIOE 508.

SSPB 550 - GRADUATE SEMINAR
Short Title: GRADUATE SEMINAR
Department: Systems/Synthetic/Phys Biology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to students with a major in Systems/Synthetic/Phys Biology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar course to introduce SSPB students to current research topics and activities in the systems, synthetic, and physical biology fields. Repeatable for Credit.

SSPB 575 - INTRODUCTION TO RESEARCH
Short Title: INTRODUCTION TO RESEARCH
Department: Systems/Synthetic/Phys Biology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 2
Restrictions: Enrollment is limited to students with a major in Systems/Synthetic/Phys Biology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction of first-year graduate students to the research programs and laboratories of individual faculty members. Repeatable for Credit.

SSPB 599 - GRADUATE TEACHING IN SSPB
Short Title: GRADUATE TEACHING IN SSPB
Department: Systems/Synthetic/Phys Biology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Internship/Practicum
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Supervised instruction in teaching systems, synthetic, and physical biology. Repeatable for Credit.

SSPB 800 - GRADUATE RESEARCH
Short Title: GRADUATE RESEARCH
Department: Systems/Synthetic/Phys Biology
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to students with a major in Systems/Synthetic/Phys Biology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate students will conduct independent research/thesis project under the direction of their advisor. Repeatable for Credit.

THEA 100 - STAGE CRAFT
Short Title: STAGE CRAFT
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to materials, tools, and standard theatre production techniques. Theory and practice of scenic building and painting techniques, creation of props, sound support requirements, and running crew during performance. No Lab hours required.
THEA 101 - THEATRE TECHNOLOGY: COSTUME CONSTRUCTION
Short Title: THEA TECH: COSTUME CONSTRUCTION
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to projection elements. No lab required.

THEA 102 - INTRODUCTION OF ACTING
Short Title: INTRODUCTION TO ACTING
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This is a class in the basic terminology and craft of acting. It will encompass voice and movement training, as well as basic technical theatre terminology and vocabulary for the actor. The course work will progress from ensemble/group work and individual exercises/monologues to scenes. Space in classes is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor.

THEA 103 - THEATRE TECHNOLOGY
Short Title: THEATRE TECHNOLOGY
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to lighting and sound equipment, tools, and board operation. Theory and practice of lighting and sound materials, hang and focus, programming both sound and lights boards as well as introduction to projection elements. No lab required.

THEA 202 - COSTUME AND PATTERN DRAFTING AND DRAPING FOR STAGE
Short Title: PATTERN DRAFTING AND DRAPING
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): THEA 101
Description: This course enables students to explore pattern-making, design, fit and alteration of costumes for the stage. The course will familiarize students with the draping method of pattern development and the flat-patterning method of pattern development in order to create three-dimensional period and contemporary costumes for the theatre based on two-dimensional research and theatrical designer drawings. Instructor Permission Required.

THEA 207 - MAKEUP FOR THE STAGE
Short Title: MAKEUP FOR THE STAGE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This is a hands-on class that explores the principals of stage makeup materials and skills, methods and techniques that are used in an actor’s transformation for the stage. This includes techniques for moderate and extreme aging, injuries and character roles and period styles. Class will use the application of analytical and research skills in the visual development of the character. Class size limited to 10.

THEA 270 - BIG PAINTING: MATERIALS AND TECHNIQUES FOR THEATRICAL PAINTING
Short Title: BIG PAINTING FOR THEATRE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Big Painting: Materials and Techniques for Theatrical Painting will examine the materials and techniques usually associated with scenic and theatrical painting but as applied to the context of 21st century contemporary art practices. Students will learn how to make big paintings. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster. Cross-list: ARTS 270.

THEA 300 - INTRODUCTION TO THEATRE DESIGN
Short Title: INTRODUCTION TO THEATRE DESIGN
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to the theory and practice of theatre design through exploration of the principles and elements of design as they apply to scenery, lighting, and costumes with an emphasis on text analysis and research. Students will complete and present a variety of projects.

THEA 301 - ACTING I
Short Title: ACTING I
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to the fundamentals of acting through the exploration of actor training techniques based on the theories of Stanislavsky, Strasburg, Adler, Meisner, and Hagen, emphasizing the actor's primary tools: voice, body, emotional life, and imagination.
THEA 302 - ACTING II
Short Title: ACTING II
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): THEA 301
Description: Text analysis for the actor with particular emphasis on a thorough investigation of given circumstances and dramatic action. Students will work on scenes from Ibsen to contemporary playwrights. Space in classes is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor.

THEA 303 - INTRODUCTION TO THEATRE
Short Title: INTRODUCTION TO THEATRE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A survey course of the art and theory of the theatre through an examination of dramatic literature from the Greeks through the modern era. The course will also explore the craft of the theatre as it is practiced today. Requires attending several theatre productions in local Houston venues. Cross-list: ENGL 390.
Course URL: www.english.rice.edu

THEA 304 - COSTUME DESIGN
Short Title: COSTUME DESIGN
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Exploration of costume design and the designers' role in the collaborative process. Students will read diverse plays then present design projects that explore character, storytelling, and the relationship between performer and audience. Students will experiment with rendering techniques to explore the visual language of period and contemporary clothing.

THEA 305 - LIGHTING DESIGN
Short Title: LIGHTING DESIGN
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): THEA 300
Description: Exploration of the role that lighting plays in a production and the lighting designer's place as an artist in the collaboration process. Emphasis on the practical application of the controllable properties of light as they apply to theatre. Students will be required to complete a variety of projects including light labs responding to music and culminating in a final lighting project.

THEA 306 - SCENIC DESIGN
Short Title: SCENIC DESIGN
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): THEA 300
Description: Advanced examination of the principles of scenic design including research, rendering, technical drawing, model construction, text analysis and the role of the scenic designer in collaboration with directors, actors, and other designers. Students will read and analyze a variety of plays in different periods and styles, and then, based on text analysis and research, complete and present design projects.

THEA 307 - HISTORY OF ARCHITECTURE, INTERIORS, AND CLOTHING FOR THEATRE DESIGNERS
Short Title: HIST FOR THEATER DESIGNERS
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: HISTORY OF ARCHITECTURE, INTERIORS, AND CLOTHING FOR THEATRE DESIGNERS ***** Survey of the major period styles of buildings, homes, furnishings, and clothing from ancient Egypt through the 20th century including a critical analysis of the interdependent nature of the evolution of design and the relationship to the cultures in which they were created. Repeatable for Credit.

THEA 308 - IMPROVISATION FOR STAGE AND SCREEN
Short Title: IMPROV FOR STAGE AND SCREEN
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This is a course in the practical training of comedic, long-form, improvisation. Students will learn how to craft scenes spontaneously using tools like character dynamic, status, comedic pattern, beat structuring, and agreement. Classic forms of scenic improv will be taught and the course will also examine the role of improvisation in comedy films, video, and the creation of sketch comedy. Students will get to practice their skills by crafting videos in the class' culmination run of improv shows. Cross-list: FILM 308.

THEA 309 - MUSICAL THEATRE STUDIO
Short Title: MUSICAL THEATRE STUDIO
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Practical training and experience in musical theatre performance. This course will focus on the particular challenges that musical theatre presents as distinct from non-musical theatre. Performance techniques will emphasize the skills necessary for successful presentation of a musical number by an actor, as well as how to prepare an effective audition.
THEA 310 - THE SPOKEN TEXT
Short Title: THE SPOKEN TEXT
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): THEA 301
Description: An exploration of language through voice, movement, and text as one of the actor’s primary means of communication and expression. The student will analyze, rehearse, and perform scenes from the work of William Shakespeare and his contemporaries. Recommended prerequisite(s): ENGL 321.

THEA 311 - HISTORY OF MUSICAL THEATRE
Short Title: HISTORY OF MUSICAL THEATRE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An introductory course exploring the tools and craft of the stage director. Students will learn how to analyze dramatic text and will gain a fundamental knowledge of the director’s basic skills, including composition, picture, movement, rhythm, and pantomime dramatization. Recommended prerequisite(s): THEA 303 or 300.

THEA 312 - DIRECTING I
Short Title: DIRECTING I
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): THEA 301
Description: This course is designed to familiarize students with the repertoire of a uniquely American art form that has had a widespread cultural influence. It will present a historical perspective of the decades of musical theatre from the 1920s to the present, with particular emphasis on representative innovative examples of change and the transition from musical comedy into musical theatre.

THEA 315 - THEATRE IN WESTERN CULTURE: A HISTORICAL INTRODUCTION
Short Title: INTRO TO THEATRE HISTORY
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Through reading and watching a selection of major plays and exploring other primary historical and critical sources, students in this course will study the development of the western dramatic tradition from ancient roots to modern day. Students will explore how the theatrical experience reflects and effects the society in which it exists and will consider how theater holds a mirror up to cultural power, taboos, and changes.

THEA 320 - GENDER, SEXUALITY AND THE ADAPTATION OF TRANSATIONAL LITERATURE TO PERFORMANCE
Short Title: GENDER AND PERFORMANCE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines the embodiment of gender and sexuality through the oral interpretation of transnational literature. Students will learn how to analyze and adapt to performance novels and short stories from various global and historical contexts that exemplify the genre of the “coming of age” narrative. Cross-list: SWGS 320.

THEA 322 - DIRECTING SHAKESPEARE
Short Title: DIRECTING SHAKESPEARE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): THEA 301
Description: Staging Shakespeare’s plays for modern audiences: learning to speak the lines “trippling off the tongue”, analyzing textual cues, and researching the period to find correlations to contemporary society in the process of active rehearsal. Students will work with THEA 310 to stage a final scene. Recommended prerequisite(s): THEA 310.

THEA 323 - VOICE AND SPEECH FOR THEATRE
Short Title: VOICE AND SPEECH FOR THEATRE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Development of an expressive speaking voice through awareness and overcoming physical and vocal habits and limitations, including alignment, relaxation, breath support, resonance, tone and projection. Recommended prerequisite(s): THEA 301.

THEA 324 - MOVEMENT FOR STAGE AND STAGE COMBAT
Short Title: COMBAT & MOVEMENT FOR STAGE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to body dynamics and stage combat through partner exercises, physical stretching and conditioning, ensemble movement, full body awareness, focus, action and counter-action, precision, and economy of effort. Recommended prerequisite(s): THEA 301.
THEA 325 - ACTING FOR FILM
Short Title: ACTING FOR FILM
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): THEA 102 or THEA 301
Description: This course provides an introduction to the art of acting on camera. It emphasizes specific techniques of speech, movement, character development, and the creation of relationships as they relate to the recorded medium (film, television, commercials, industrial films). The elements of study include proper voice placement, appropriate acting styles, and subtlety in performance. Student performances will be videotaped for study.

THEA 330 - CONTEMPORARY DRAMATIC LITERATURE
Short Title: CONTEMP DRAM LITERATURE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): THEA 301
Description: In this course we will examine contemporary American plays that have had a significant impact on theatrical form or that are highly reflective of contemporary society. Playwrights whose work will be studied will include Maimet, Guare, Lucas, Wilson and many others.

THEA 331 - THEATRE PRODUCTION
Short Title: THEATRE PRODUCTION
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Distribution Group: Distribution Group I
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Practical application of skills acquired in previous THEA courses in a realized Theatre Program production as a company member. Admission to class requires either an audition, interview, or portfolio review with the director and/or production manager. Possible roles include: actor, assistant director, stage manager, assistant stage manager, designer, and technical support in scenery, costumes, lighting, or sound. Prerequisites: permission of instructor. Instructor Permission Required. Repeatable for Credit.

THEA 332 - CRITICAL STUDIES OF MULTIMEDIA ARTS
Short Title: CRITICAL STU OF MULTIMEDIA ART
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Critical Studies for Multimedia Arts is a course designed to familiarize art and non-art majors with key theories and core concepts in modern and contemporary multimedia art. Students will examine a broad spectrum of specific topics in contemporary artwork related conceptually to: space/time; bodies and performance; "sculptural" studies in an expanded field and video & film space. This is a multi-dimensional class consisting of guest lectures, artist-speakers, and field trips to local museums, galleries and alternative art spaces. This course will include discussions on readings, writings and special projects. This promises to be a fun and thought-provoking class and is designed to enhance studio practice and encourage interest in the visual arts. Cross-list: ARTS 332, FILM 332, FOTO 332.

THEA 396 - THEATRE INTERNSHIP
Short Title: THEATRE INTERNSHIP
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is a field-based, supervised, professional learning experience designed to enhance classroom learning. Students will be responsible for identifying and securing internship positions and must obtain permission from the department chairman and have a department faculty sponsor. All interns are required to keep an internship journal recording duties and activities; the journal will be used as the basis of a five-page paper summarizing the internship experience. Documentation of the work produced during the internship is required, portfolio, CD, DVD, etc. Instructor Permission Required. Repeatable for Credit.

THEA 432 - SPECIAL PROBLEMS: DIRECTING AND DESIGN
Short Title: SPEC PROB: DIRECT & DESIGN
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent study. Instructor Permission Required. Repeatable for Credit.

THEA 435 - SPECIAL PROBLEMS: ADVANCED TOPICS
Short Title: SPEC PROB:ADVANCED TOPICS
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent study. Instructor Permission Required. Repeatable for Credit.
Tibetan (TIBT)

TIBT 233 - TIBETAN LANGUAGE, LITERATURE AND CULTURE I
Short Title: TIBETAN LANG LIT & CULTURE I
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introducing the Tibetan alphabet and basics of grammar through reading section of a classic Tibetan text. In addition, readings in English in Indian and Tibetan Buddhist materials, also on the art, history, geography and /or modern era in those areas. Final includes a paper drawn from readings and class discussion. Cross-list: RELI 233.

TIBT 234 - TIBETAN LANGUAGE, LITERATURE AND CULTURE II
Short Title: TIBETAN LANG LIT & CULTURE II
Department: Religion
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Continued training in Tibetan language-extending vocabulary and facility with grammar. Final includes a paper drawn from readings and class discussion. Cross-list: RELI 234. Repeatable for Credit.

TIBT 332 - ADVANCED TIBETAN LANGUAGE AND CULTURE
Short Title: ADV TIBETAN LANGUAGE & CULTURE
Department: Religion
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): RELI 132 or TIBT 132
Description: This class builds on RELI 232 and 234, now including more challenging material in Tibetan, and continuing the trajectory of gaining familiarity with Buddhist philosophical systems as these touch on epistemology, ontology, and contemplative practice. Cross-list: RELI 332. Repeatable for Credit.

University Courses (UNIV)

UNIV 101 - SCHOLARLY APPROACHES TO SCIENCE AND ENGINEERING
Short Title: SCHOLARLY APPROACHES TO S&E
Department: University Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Intensive Learning Experience
Credit Hours: 0
Course Level: Undergraduate Lower-Level
Description: A six-week, academically intensive, pre-college program for pre-matriculating students who intend to major in science or engineering. The program includes coursework in Calculus, Chemistry, and Physics, with a focus on the most challenging topics from the freshman curricula; daily homework and group-work; and complementary seminars on design, bioscience research, and discrete math. DepartmentPermission Required.

UNIV 105 - SCHOLARLY APPROACHES TO SCIENCE AND ENGINEERING
Short Title: SCHOLARLY APPROACHES TO S&E
Department: University Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Intensive Learning Experience
Credit Hours: 0
Course Level: Undergraduate Lower-Level
Description: A six-week, academically intensive, pre-college program for pre-matriculating students who intend to major in science or engineering. The program includes coursework in Calculus, Chemistry, and Physics, with a focus on the most challenging topics from the freshman curricula; daily homework and group-work; and complementary seminars on design, bioscience research, and discrete math. DepartmentPermission Required.

UNIV 110 - FOUNDATIONS FOR SELF-DISCOVERY AND LIFELONG LEARNING
Short Title: FIRST YEAR FOUNDATIONS
Department: University Courses
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course reviews the written and oral English skills needed by visiting international students to succeed in upper-division courses at Rice. Students will learn to express ideas effectively in individual and group conversations; to give academic presentations; to critique, report, and interpret research findings in writing; and to become better self-editors of their writing. Instructor Permission Required.

UNIV 181 - ACADEMIC ENGLISH SKILLS FOR VISITING STUDENTS
Short Title: ENGLISH FOR VISITING STUDENTS
Department: University Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course reviews the written and oral English skills needed by visiting international students to succeed in upper-division courses at Rice. Students will learn to express ideas effectively in individual and group conversations; to give academic presentations; to critique, report, and interpret research findings in writing; and to become better self-editors of their writing. Instructor Permission Required.

UNIV 194 - CTIS WORKSHOP
Short Title: CTIS WORKSHOP
Department: Dean of Undergraduates
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 0
Course Level: Undergraduate Lower-Level
Description: CTIS Workshop will draw from a public health model of violence prevention to teach Freshman and transfer students the dynamics of domestic and sexual violence, consent and bystander intervention. Students will understand the impacts of healthy relationships and consent, as well as successful models shown to increase gender equality, healthy sexual communication, and empathy. This course is only available to first-time matriculants.
UNIV 201 - CENTURY SCHOLARS PROGRAM
Short Title: CENTURY SCHOLARS PROGRAM
Department: University Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Repeatable for Credit.

UNIV 212 - CAREER AND LIFE OPTIONS
Short Title: CAREER AND LIFE OPTIONS
Department: University Courses
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Designed for freshmen and sophomores who are exploring careers and academic majors (juniors and seniors are also welcome to enroll). In the class, students will learn about career options that match their interests, personality, and values; become more familiar with the world of work and various career options; understand the connections between careers and major choice; learn about services that will enhance their marketability and academic experiences (internships, study abroad programs, scholarships/grants); and develop an action plan to reach their goals. This class is ideally suited for students who have no idea what they want to do after graduation.

UNIV 215 - ALTERNATIVE SPRING BREAK LEADERSHIP COURSE
Short Title: ASB LEADERSHIP COURSE
Department: University Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: UNIV 215 is required of all Alternative Spring Break student site leaders. This course consists of weekly 1.5 hour meetings that will include lectures, discussions, group activities, work sessions, and panel presentations. Instructor Permission Required. Repeatable for Credit.

UNIV 216 - ALTERNATIVE SPRING BREAK LEADERSHIP COURSE
Short Title: ASB LEADERSHIP COURSE
Department: University Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): UNIV 215
Description: The course aims to: 1) analyze service philosophy and mechanisms for implementing a mutually beneficial short-term service program. 2) equip students with the knowledge, skills, and confidence necessary to lead a group of their peers. 3) provide a platform for self-assessment and an opportunity for personal and professional development for student leaders. Instructor Permission Required. Repeatable for Credit.

UNIV 220 - ADVISING PRACTICUM
Short Title: ADVISING PRACTICUM
Department: University Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Internship/Practicum
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Designed for first year members of the PAA program. This course will focus on individually designed and faculty guided action plans. Students will design plans that enhance the role, effectiveness, and/or educational breath and depth of academic advising at the individual, college, or university level. Instructor Permission Required. Repeatable for Credit.

UNIV 250 - RICE HEALTH ADVISORS
Short Title: RICE HEALTH ADVISORS
Department: University Courses
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course is designed to introduce students to the principles of peer health education. Students will assess their own personal health status as well as major health risks among their peers. They will learn effective strategies for reducing these risks and promoting healthy lifestyles to college students. Enrollment is restricted, students must be in good academic and judicial standing and complete an application. This course is a pre-requisite to becoming a Rice Health Advisor. Instructor Permission Required.

UNIV 295 - EXPLORING CAREERS THROUGH AN INTERNSHIP
Short Title: CAREERS THRU INTERNSHIP
Department: University Courses
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Designed for currently enrolled undergraduate students from all areas of study to gain experience in a workplace setting, earn course credit, and further develop professional skills. Students meet individually with a career counselor to process their experience and complete an action plan to market their qualifications to potential employers and graduate schools. Students arrange internship, receive approval from the course instructor, and may not receive financial compensation while enrolled in the class. Instructor Permission Required.

UNIV 299 - SCIENTIA: LECTURES IN SCIENCE AND CULTURE
Short Title: SCIENTIA SCIENCE & CULTURE
Department: University Courses
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Annual lecture series, panel discussions and discussion talks on topics bridging science, culture and art. 4 lectures plus 2 discussion talks. Lectures are on specified dates, usually Tuesdays. Discussion talks scheduled at semester beginning. Topics vary year to year. Cross-list: COLL 299. Repeatable for Credit.

Course URL: ccl.rice.edu
UNIV 301 - UNDERGRADUATE RESEARCH

Short Title: UNDERGRADUATE RESEARCH  
Department: University Courses  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Research  
Credit Hours: 0  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This zero credit course enables students to have supervised research experience on and off campus recorded on their transcript. Students must register the name and contact of their PI in the UNIV 301 OWL-Space site by the end of the second week of classes or drop the class. Repeatable for Credit.

UNIV 304 - RESEARCH ETHICS IN THE COMMUNITY

Short Title: RESEARCH ETHICS  
Department: University Courses  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This class introduces students to a range of ethical issues that arise in community-based participatory research. Drawing on literature review and case studies, the class brings together students who will carry out CBR projects abroad on a Loewenstern Fellowship. We will also focus on cultural communication and how the international landscape influences the role of the researcher.

UNIV 305 - INTERNATIONAL SERVICE

Short Title: INTERNATIONAL SERVICE  
Department: University Courses  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course meets every other week. Objectives are to (1) examine the history of international service and service ethics, (2) develop broad knowledge of history, culture, and politics related to the country of service, and to (3) engage students in conversations about global society and international service work. Instructor Permission Required. Repeatable for Credit.

UNIV 306 - TRIP LOGISTICS

Short Title: TRIP LOGISTICS  
Department: University Courses  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Seminar  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Corequisite: UNIV 305  
Description: This course meets every other week. This course prepares students for trip logistics related to traveling and conducting service outside the U.S. Instructor Permission Required. Repeatable for Credit.

UNIV 307 - SYNthesizing Your Service Experience

Short Title: SYNTHESIZING YOUR EXPERIENCE  
Department: University Courses  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: UNIV 307 will focus on synthesizing the service experience. Students will: reflect on the host country's culture, the social issues being addressed, and personal learning and growth; articulate the experience in relation to students' academic, career, and personal goals; and, create a portfolio to showcase their service achievements. Instructor Permission Required. Recommended Prerequisite(s): UNIV 305 and UNIV 306. Repeatable for Credit.

UNIV 310 - RICE LEGAL LAB

Short Title: RICE LEGAL LAB  
Department: University Courses  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Seminar  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course provides hands-on exposure to the practical legal environment, including legal research, legal writing, and Texas court processes, with optional work placing the Texas legal environment into an international comparative context. Instructor Permission Required. Repeatable for Credit.

UNIV 311 - JUDICIAL INTERNSHIP - RICE LEGAL LAB

Short Title: JUDICIAL INTERNSHIP - RICE LEGAL LAB  
Department: University Courses  
Grade Mode: Standard Letter  
Course Type: Internship/Practicum  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Students will serve judicial internships with Texas state or federal judges; required travel component over spring break, with associated costs and lab fee. Instructor Permission Required. Repeatable for Credit.

UNIV 313 - INTRODUCTION TO RESEARCH ABROAD

Short Title: INTRO TO RESEARCH ABROAD  
Department: University Courses  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Seminar  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course is designed to help undergraduate students develop skills to design, refine, and carry out an individual research project in an international context. This is a preparatory course for students who plan to apply for international scholarships such as Fulbright, Thinkswiss, Wagoner, DAAD or for students who will design an international research project as part of their study abroad program or their honors thesis.
UNIV 320 - ADVANCED ACADEMIC ADVISING PRACTICUM
Short Title: ADVANCED ADVISING PRACTICUM
Department: University Courses
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Designed for current members of the PAA program. This course will focus on individually designed and faculty guided action plans. Students will design plans that enhance the role, effectiveness, and/or educational breadth and depth of academic advising at the individual, college, or university level. Instructor Permission Required. Repeatable for Credit.

UNIV 321 - ADVANCED ACADEMIC FELLOWS/MENTORS PRACTICUM
Short Title: ADV FELLOWS/MENTORS PRACTICUM
Department: University Courses
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Designed for current members of the Academic Fellows/Mentors program. This course will focus on individually designed and faculty guided action plans. Students will design plans that enhance the role and effectiveness of the academic support provided by Academic Fellows/Mentors at the individual, college, or university level. Instructor Permission Required. Repeatable for Credit.

UNIV 395 - RICE SCHOLARS ABROAD PREDEPARTURE
Short Title: RICE SCHOLARS ABROAD PREDEPART
Department: University Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This class is for students completing a Rice Scholars Abroad research project. It requires acceptance into that program and permission of the instructor. Instructor Permission Required. Repeatable for Credit.

UNIV 399 - RICE SCHOLARS ABROAD DIRECTED RESEARCH
Short Title: RICE SCHLARS ABROAD DIR RES
Department: University Courses
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This class is for students participating in the Rice Scholars Abroad program and is to be completed before the student goes abroad. Acceptance into that program and permission of the instructor are required. Instructor Permission Required. Repeatable for Credit.

UNIV 400 - STUDENT AFFAIRS INTERNSHIP
Short Title: STUDENT AFFAIRS INTERNSHIP
Department: University Courses
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Repeatable for Credit.

UNIV 401 - INDEPENDENT STUDY: INTERNATIONAL EDUCATION SURVEY
Short Title: IND STUDY: INTERNATIONAL ED
Department: University Courses
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The independent study is intended for upperclassmen who are considering working in the field of international education. Individualized meetings with the instructor and personalized coursework investigate ways to bridge current theoretical research in the field of international education with real-life practicalities in international education offices. Instructor Permission Required. Repeatable for Credit.

UNIV 402 - CIVIC LEADERSHIP CAPSTONE I
Short Title: CIVIC LEADERSHIP CAPSTONE I
Department: University Courses
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: UNIV 402 is a requirement for the Certificate in Civic Leadership. This course prepares students to develop and implement high-level, independent, community-based projects, and enhances students’ capacity to lead in diverse community settings. Students are required to develop a project proposal in collaboration with a community partner and faculty advisor. Instructor Permission Required.

UNIV 403 - CIVIC LEADERSHIP CAPSTONE II
Short Title: CIVIC LEADERSHIP CAPSTONE II
Department: University Courses
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): UNIV 402
Description: UNIV 403 is a requirement for the Certificate in Civic Leadership. This course requires students to implement and complete their capstone project, present their findings at a conference or symposium, and submit a final reflection paper. Students who enroll in 403 and do not graduate may be permitted to implement their project during the summer. Instructor Permission Required.

UNIV 420 - PRE-DEPARTURE STUDY ABROAD SEMINAR
Short Title: PRE-DEPARTURE STUDY ABR SEM
Department: University Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar provides a cultural introduction to study abroad students to help them maximize their international experience and engagement with host cultures. Students will acquire an introductory understanding of the prominent concepts in global citizenship, ethics, and responsibilities while abroad. The course will also introduce students to international research opportunities. Students may additional times outside the original posted time listed during the 2nd Half of Full Semester.
UNIV 500 - PRINCIPLES OF EFFECTIVE COLLEGE TEACHING
Short Title: PRINCIPLES EFFECTIVE TEACHING
Department: University Courses
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course provides an overview of essential, research-based methods used by college instructors to enhance the quality of student learning. Topics will include course and syllabus design, student engagement, classroom management, and more. This course will culminate with the development of a syllabus and a statement of teaching philosophy.

UNIV 501 - RESEARCH ON TEACHING AND LEARNING
Short Title: RESEARCH TEACHING & LEARNING
Department: University Courses
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course explores scholarship on teaching and learning in detail with special attention to the breadth of approaches and methodologies. The culminating project will be a literature review in an area of interest.

UNIV 502 - PRACTICUM IN COLLEGE TEACHING
Short Title: PRACTICUM IN COLLEGE TEACHING
Department: University Courses
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): UNIV 500 and UNIV 501
Description: This practicum allows students to design and deliver teaching demonstrations and to receive feedback on their work. The course will also focus on the place of teaching in the broader landscapes of higher education and the academic job market.

UNIV 505 - INTER-INSTITUTIONAL TRANSFER COURSE
Short Title: INTER-INSTITUTIONAL TRANSFER
Department: University Courses
Grade Mode: Transfer Courses
Course Type: Transfer
Credit Hours: 1-6
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is used when a Rice student transfers coursework taken through the inter-institutional program at UH, BCM, UTHSC, TAMHSC, UTMB-Galveston. The transfer course will carry the title of the course at the respective university. Department Permission Required. Repeatable for Credit.

UNIV 594 - RESPONSIBLE CONDUCT OF RESEARCH
Short Title: RESPONSIBLE CONDUCT - RESEARCH
Department: University Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Responsible conduct of research (RCR) is defined as the practice of scientific investigation with integrity. It involves the awareness and application of established professional norms and ethical principles in the performance of all activities related to scientific research. (Formerly BIOC/BIOE 594)

UNIV 599 - TEACHING PORTFOLIO
Short Title: TEACHING PORTFOLIO
Department: University Courses
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): UNIV 500 and UNIV 501
Description: This independent study serves as a capstone to the UNIV sequence on teaching and learning. Students will meet individually with the instructor to plan and complete a teaching portfolio.

UNIV 600 - INTRODUCTION TO ACADEMIC READING AND WRITING FOR INTERNATIONAL GRADUATE STUDENTS
Short Title: ACADEMIC READING AND WRITING
Department: University Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course teaches fundamental academic reading and writing skills to international graduate students in the first two years of their studies. Students will learn how scholars construct arguments and use evidence to support claims, and they will practice writing texts that are relevant to their own courses and careers.

UNIV 601 - ORAL COMMUNICATION SKILLS FOR INTERNATIONAL GRADUATE STUDENTS
Short Title: ORAL COMMUNICATION SKILLS
Department: University Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will introduce students to expectations and assumptions of North American audiences, strategies for expressing ideas in individual and group conversations, and oral and visual skills needed for academic presentations. Pronunciation challenges will be diagnosed for individual students; students will use appropriate speaking programs in the Rice Language Lab; and, final projects will be related to students’ studies or research.
UNIV 602 - ACADEMIC WRITING FOR INTERNATIONAL GRADUATE STUDENTS
Short Title: ACADEMIC WRITING
Department: University Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will address writing at both the macro- and micro-level, engaging students in such academic writing tasks as critiquing, reporting, and interpreting research findings, illustrating and justifying the significance of research, while also attending to mechanical topics. Writing assignments in the course will be linked to students’ studies, courses, or research. One-on-one conferences with instructors and CWOVC staff will be required.

Visual Arts (ARTS)

ARTS 101 - DRAWING FOR THE NON ART MAJOR
Short Title: DRAWING FOR THE NON ART MAJOR
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Drawing for the Non Art Major is intended to introduce basic, fundamental art practice to students not intending to major in art. This course will work to develop perceptive and interpretive skills - working both inside and outside traditional thought - to translate three-dimensional objects into two-dimensional work. Students will work in multiple black and white media and will be introduced to linear perspective and artistic composition. Students will be required to participate in class discussions and critiques. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster.

ARTS 103 - CREATIVE 2-D DESIGN
Short Title: CREATIVE 2-D DESIGN
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Study of the elements and principles of design and drawing using traditional and digital means. The emphasis in the class is on a foundation to culture practice and the critical approaches to art and technology. Students will be required to participate in class discussions and critiques. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster.

ARTS 165 - BEGINNING SCULPTURE
Short Title: BEGINNING SCULPTURE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to the concepts and forms of contemporary sculpture. Exploration of materials (including plaster, clay, cardboard, fabric, wood, and found objects) and sculpture techniques such as mold making and woodworking. Shop and studios are available days and evening throughout the week. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster.

ARTS 200 - SPECIAL PROBLEMS IN STUDIO ART I
Short Title: SPECIAL PROB IN STUDIO ART I
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Study of problems at the introductory level in creative art. Topics may vary. Please consult with your faculty advisor for additional information. This class may be used in awarding transfer credit. Instructor Permission Required. Repeatable for Credit.

ARTS 225 - BEGINNING DRAWING
Short Title: BEGINNING DRAWING
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course introduces students to the basic techniques, materials and processes of drawing. Students will explore line, tone, space, form, composition, and content through a variety of drawing assignments in dry and wet media. Students learn how to draw from direct observation. No previous drawing experience is required.
ARTS 230 - COMICS AND SEQUENTIAL ART
Short Title: COMICS AND SEQUENTIAL ART
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An introduction to the art of combining words and pictures: diverse applications such as storyboarding for stage and screen, comic books and graphic novels, and serial or multiples in a variety of media all fall under the umbrella of Sequential Art. Through instruction, demos, readings and practice, students will learn the history and implementation of linear visual narratives utilizing the Comics Art Teaching and Study Workshop as a resource. Students in this class will also participate in the construction and establishment of a permanent research center for the study of Comic Book Art within the Department of Visual and Dramatic Arts. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster. Cross-list: FILM 275.

ARTS 262 - ART OF DIY: PROBLEM SOLVING AND MAKING
Short Title: ART OF DIY: PROBLEM SOLVING
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The utilization of D.I.Y. (Do It Yourself) communities will be a centralized resource used to guide and complete audio work within the class. Keeping in mind the question: within contemporary society, how has the ability to produce and problem solve on an individual basis changed? The focuses of this class are to produce diverse technically proficient works of art that draw from and inform the student's current research. The class will also, during the course of the semester, build and implement a large, open-source DIY laser cutter. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster. Instructor Permission Required.

ARTS 263 - ART OF DIY: PROBLEM SOLVING AND MAKING II
Short Title: ART OF DIY: PROBLEM SOLVING II
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The focus of this class will be to first build a DIY 3-D printer. We will utilize the laser cutter built in the previous DIY course to make the necessary components for the printer. We will then focus our attention on utilizing these tools to construct works of art that draw from and inform the students current research and interests. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster. Instructor Permission Required.

ARTS 270 - BIG PAINTING: MATERIALS AND TECHNIQUES FOR THEATRICAL PAINTING
Short Title: BIG PAINTING FOR THEATRE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Big Painting: Materials and Techniques for Theatrical Painting will examine the materials and techniques usually associated with scenic and theatrical painting but as applied to the context of 21st century contemporary art practices. Students will learn how to make big paintings. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster. Cross-list: THEA 270.

ARTS 280 - HISTORY & AESTHETICS OF FILM
Short Title: HISTORY & AESTHETICS OF FILM
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to the art and aesthetics of film as an artifact produced within certain social contexts. Includes style, narration, mise-en-scene, editing, sound, and ideology in classical Hollywood cinema, as well as in independent, alternative, notification, and Third World cinemas. Cross-list: FILM 280, HART 280.

ARTS 294 - SPECIAL PROBLEMS IN STUDIO ART: JUNIOR FIELD TRIP
Short Title: JUNIOR FIELD TRIP
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Study of problems at the introductory level in creative art. Topics may vary. Please consult with department for additional information. May be used in awarding transfer credit. Instructor Permission Required. Repeatable for Credit.

ARTS 300 - SPECIAL PROBLEMS IN STUDIO ART II
Short Title: SPECIAL PROB IN STUDIO ART II
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of problems at the intermediate level in creative art. Topics may vary. Please consult with your faculty advisor for additional information. This class may be used in awarding transfer credit. Instructor Permission Required. Repeatable for Credit.
ARTS 301 - BEGINNING PAINTING
Short Title: BEGINNING PAINTING
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course introduces students to the basic language, tools, and materials of painting. Students will learn painting techniques and concepts, starting with painting from observation and ending with more student-directed projects. Lectures and filed trips will explore painting through an art historical context as well as a contemporary one.

ARTS 310 - COLLABORATIVE PRINTMAKING
Short Title: COLLABORATIVE PRINTMAKING
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is designed to interactively educate the student about the collaborative print process beyond artistic dialog, allowing each student to work as artist-printmaker, economist, and business planner. The course will examine the process of taking artwork from the beginning concept to the finished product to the marketplace -- all the while staying within a budget. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster.

ARTS 311 - BEGINNING PRINTMAKING
Short Title: BEGINNING PRINTMAKING
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will give an introduction to prints and printmaking through the study of original works on paper and the opportunity to produce printed works of art. Works will include etchings, lithograph, linocut, and monoprints. Enrollment is limited. The instructor will formulate the course roster and may allow additional majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster.

ARTS 312 - RELIEF I
Short Title: RELIEF I
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ARTS 225
Description: Instruction in black-and-white linoleum prints. Includes advanced color methods. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster.

ARTS 314 - SCREEN PRINTING I
Short Title: SCREEN PRINTING I
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ARTS 101 or ARTS 225
Description: Instruction in color screen-printing processes. Emphasis will be on figurative/narrative work with strong print experimentation. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster.

ARTS 315 - LINO + MONOPRINTING
Short Title: LINO + MONOPRINTING
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ARTS 101 or ARTS 225
Description: Introduction to Monotype. Includes black-and-white and color Monotype printing. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster.

ARTS 320 - MONOTYPE I
Short Title: MONOTYPE I
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Includes black-and-white, color, chine-colle, and additional monotype printing techniques to produce one of a kind prints. Creative and personal imagery is emphasized.

ARTS 322 - 3-D PRINTMAKING
Short Title: 3-D PRINTMAKING
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will produce 3-dimensional works utilizing the traditional and non-traditional print processes of linocut, photocopy, transfer, vinyl cutter, and monoprinting techniques. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster.

ARTS 323 - DRAWING STUDIO  
Short Title: DRAWING STUDIO  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): ARTS 101 or ARTS 225  
Description: This course introduces students to drawing from the model. Assignments will continue focusing on working from life while also offering opportunities to work more subjectively.  

ARTS 325 - LIFE DRAWING  
Short Title: LIFE DRAWING  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course introduces students to drawing from the model. Students will work from short and long poses on exercises emphasizing gesture, proportion, composition, and character. A variety of media and approaches will be introduced. Homework and required visits to museums and galleries will build on what students practice in class.  

ARTS 326 - COLLAGE  
Short Title: COLLAGE  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course introduces methods and theories of collage. Lectures, museum visits, and projects examine both the historical precedents for collage and its contemporary possibilities. Students explore collage through experimentation with diverse materials, approaches, and critiques. Students will work with frottage, photomontage, and assemblage, both independently and collaboratively.  

ARTS 327 - DOCUMENTARY PRODUCTION  
Short Title: DOCUMENTARY PRODUCTION  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Studio  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Study of the expressive possibilities of documentary production using digital systems. Space in studio classes is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor. Cross-list: ANTH 324, FILM 327.  

ARTS 328 - FILMMAKING I  
Short Title: FILMMAKING I  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Studio  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Dramatic film production class that requires the making of one digital video and one 16mm film. Space in studio classes is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor. Cross-list: FILM 328.  

ARTS 329 - FILM FORM  
Short Title: FILM FORM  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Viewing, analysis, and discussion of modern and classic films. Space in studio classes is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor. Cross-list: FILM 329.  

Short Title: INTERMEDIA STUDIES  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Pop Art whether American, British, or European, had and has as its underlying and unifying agenda - a commentary or critique concerning the impact of "popular" culture (film, television, advertising, music, fashion, etc.) on contemporary society, especially in creating a new synthesis of "popular" and "high" culture in the visual arts. This, in part, was a reaction against the lofty, idealistic aspirations of post-war abstraction. This course will examine the philosophical and aesthetic origins and development of what came to be known as Pop Art.  

ARTS 331 - POSTMODERNISM: ART FROM 1976 TO PRESENT  
Short Title: POSTMODERNISM:1976-PRSNT  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Several influences reenergized the art scene in the late 1970s. Among the most significant were a new presence of European art and a new generation of American artists, accompanied by a return to figurative painting, the growth of the Feminist art scene, and new tendencies in abstraction. This course examines the artists, forms, and terms that have emerged since Documenta VII, held in Kassell, Germany in 1982. Among the many artists covered are Baselitz, Beuys, Chia, Clemence, Cucchi, Fischl, Lucian, Freud, Gilbert and George, Kiefer, Longe, Marianni, Richter, Salle, Schnabel, and Sultan.
ARTS 332 - CRITICAL STUDIES OF MULTIMEDIA ARTS  
Short Title: CRITICAL STU OF MULTIMEDIA ART  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Critical Studies for Multimedia Arts is a course designed to familiarize art and non-art majors with key theories and core concepts in modern and contemporary multimedia art. Students will examine a broad spectrum of specific topics in contemporary artwork related conceptually to: space/time; bodies and performance; "sculptural" studies in an expanded field and video & film space. This is a multi-dimensional class consisting of guest lectures, artist-speakers, and field trips to local museums, galleries and alternative art spaces. This course will include discussions on readings, writings and special projects. This promises to be a fun and thought-provoking class and is designed to enhance studio practice and encourage interest in the visual arts. Cross-list: FILM 332, FOTO 332, THEA 332.

ARTS 349 - PRINTMAKING STUDIO  
Short Title: PRINTMAKING STUDIO  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): ARTS 225  
Description: Exploration of etching, lithography, photo gravure, and monoprinting. Enrollment is limited. The instructor will formulate the course roster and may allow additional majors and underclassmen to enroll.

ARTS 358 - GROTESQUE, IMPURE, AND HYBRID PRACTICES IN ART  
Short Title: MONSTER STUDIO  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course should be taken in conjunction with Monster (HUMA 368 or BIOC 368). Topics discussed in that seminar will act as prompts for studio projects. Students will work independently and in groups on assignments addressing the monstrous in art, culminating in a final exhibition. Intended for all skill and experience levels.

ARTS 366 - SCULPTURE STUDIO  
Short Title: SCULPTURE STUDIO  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): ARTS 165  
Description: Study of advanced problems in various sculptural media. Limited enrollment. The roster is formulated on the first day of class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster. Cross-list: ARCH 367.

ARTS 368 - PHYSICAL COMPUTING FOR ART  
Short Title: PHYSICAL COMPUTING FOR ART  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This class will explore how we relate to other humans and our environment through digital technology. We will begin constructing projects on traditional computers; however, the projects in the class will expand beyond these confines. The class will focus on a hands-on experience of making interactive art projects, performance installations, interactive moving images, and sound within the context of contemporary art. Space in studio class is limited. Registration does not guarantee a place in class. The class roster will be formulated on the first day of class by the individual instructor. Repeatable for Credit.

ARTS 370 - OUTSIDE CONTEXT: ART, ARTISTS AND AUDIENCES BEYOND THE WHITE CUBE  
Short Title: OUTSIDE CONTEXT  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Outside Context: Art, Artists, and Audiences beyond the White Cube concerns the history and practice of making artwork in mass media forms. Contexts that are traditionally the baliwick of advertising and entertainment, and now more often, a place where artists implement work that engages wider audiences. Combining lectures and practice, students will participate in the development of new artworks in mass media and public forms. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster.

ARTS 378 - EXHIBITION DESIGN  
Short Title: EXHIBITION DESIGN  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course will explore the world of museums and galleries through exhibition design. Students will study the curatorial process and exhibition preparation including concept development, educational goals, budget, installation, and publicity. Discussions, workshops, museum visits, and guest lectures will provide students the opportunity to gain practical experience in museum/gallery work.
ARTS 383 - STUDIO ART INTERNSHIP
Short Title: STUDIO ART INTERNSHIP
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is a field-based, supervised, professional learning experience designed to enhance classroom learning. Students will be responsible for identifying and securing internship positions and must obtain permission from the department chairman and have a department faculty sponsor. All interns are required to keep an internship journal recording duties and activities; the journal will be used as the basis of a five-page paper summarizing the internship experience. Documentation of the work produced during the internship is required, portfolio, CD, DVD, etc. Instructor Permission Required. Repeatable for Credit.

ARTS 384 - TEXT AND IMAGE
Short Title: TEXT AND IMAGE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This interdisciplinary course will explore the relationship between language, text, and the visual arts. The class will examine poet/artist collaborations, text-focused artistic movements such as Dada, Surrealism, and the early text-based works of the 1960s, along with contemporary artists and writers who push the boundaries of their fields. Field trips, readings, group discussions, and class critique will all be integral to this course. Students will develop projects, either through individual investigation or group collaboration, examining how words and images might intersect. The semester will culminate in a publication of these projects. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster. Instructor Permission Required. Repeatable for Credit.

ARTS 388 - CRITICAL STUDIES FOR STUDIO PRACTICE
Short Title: CRIT STUDIES STUDIO PRACTICE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Critical Studies for Studio Practice is a course designed to familiarize art and non-art majors with key theories and concepts in modern and contemporary art. This is a multi-dimensional class consisting of guest lectures, artist-speakers, and art field trips to local museums, galleries, and alternative art spaces. The course will include discussions on readings, writing, and special projects. This promises to be a fun and thought-provoking class and is designed to enhance studio practice and encourage interest in the visual arts.

ARTS 396 - SPEC PROBLEMS: MOBILE ARTS PROJECT
Short Title: SPEC PROB: MOBILE ARTS PROJECT
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The focus of this special problems/independent study class will be on the practical conversion of a 30’ transit bus into a multi-purpose mobile arts platform. Students will work one-on-one with Professor Sperandio and visiting artists on the development and fabrication of a variety of mechanical systems, including HVAC, electrical and plumbing. Participants will develop a more comprehensive understanding of alternative art practices through targeted readings and discussions, as well as participate in the development of new uses for this mobile arts space once it’s completed. This project is funded in part by the Humanities Research Center, Rice Office of Parking and Transportation, and the Department of Visual and Dramatic Arts. Instructor Permission Required. Repeatable for Credit.

ARTS 398 - SURVIVAL GUIDE FOR THE EMERGING ARTIST
Short Title: SURVL GUIDE EMERG ART
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Visual and Dramatic Arts. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The purpose of this course is to prepare undergraduate art majors to develop and cultivate behavior, habits, and methods through which to best represent themselves and their work in a professional environment within the contemporary art world. The course will focus on the curriculum vitae, photographic records, press releases, and project proposals related to grants and/or residencies. This course is intended for visual art majors. Instructor Permission Required.

ARTS 400 - SPECIAL PROBLEMS IN STUDIO ART III
Short Title: SPECIAL PROB IN STUDIO ART III
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of problems at the advanced level in creative art. Topics may vary. Please consult with your faculty advisor for additional information. This class may be used in awarding transfer credit. Instructor Permission Required. Repeatable for Credit.
### ARTS 401 - PAINTING STUDIO
**Short Title:** PAINTING STUDIO  
**Department:** Visual and Dramatic Arts  
**Grade Mode:** Standard Letter  
**Course Type:** Studio  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** ARTS 301  
**Description:** A continuation of practices and concepts introduced in Beginning Painting. Individual expression will be encouraged through a series of assignments that explore scale, subject matter, and process. Experimentation in different, painterly media will be encouraged. Students will continue to learn how to discuss painting through in-class critique. Mutually Exclusive: Credit cannot be earned for ARTS 401 and ARTS 303.

### ARTS 425 - ADVANCED DRAWING
**Short Title:** ADVANCED DRAWING  
**Department:** Visual and Dramatic Arts  
**Grade Mode:** Standard Letter  
**Course Type:** Studio  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** (ARTS 225 or ARTS 101) and ARTS 323  
**Description:** This advanced course uses students to further uncover and articulate the possibilities of drawing. Students will continue to learn drawing techniques while developing their own individual drawing vocabularies. Assignments will be more open in structure, allowing the opportunity for more individually driven projects, specific to each student's interests.

### ARTS 427 - ADVANCED FILMMAKING
**Short Title:** ADVANCED FILMMAKING  
**Department:** Visual and Dramatic Arts  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** (FILM 225 and (FILM 327 or ARTS 327) and (FILM 328 or ARTS 328)  
**Description:** Advanced documentary production using digital camera and editing systems. Continuation of ARTS 327. Space in studio class is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor. Cross-list: FILM 432.

### ARTS 428 - FILMMAKING II
**Short Title:** FILMMAKING II  
**Department:** Visual and Dramatic Arts  
**Grade Mode:** Standard Letter  
**Course Type:** Studio  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** 16mm film production course utilizing handmade cinema techniques. Space in class is limited. Registration does not guarantee a place in class. The class roster is formulated the first day of class by the individual instructor. Cross-list: FILM 428.

### ARTS 430 - ARTS RESEARCH AND PRACTICE
**Short Title:** ARTS RESEARCH AND PRACTICE  
**Department:** Visual and Dramatic Arts  
**Grade Mode:** Standard Letter  
**Course Type:** Research  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Independent Study with a faculty member in Visual and Dramatic Arts in a specified art practice and field of research. The student will devise and work upon a chosen artistic practice. Instructor Permission Required.

### ARTS 432 - FILM GENRE: THE WESTERN
**Short Title:** FILM GENRE: THE WESTERN  
**Department:** Visual and Dramatic Arts  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Survey of the essential American film experience spanning all the years of U.S. cinema, with emphasis on the western and its mythic function in society. Space in studio classes is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor. Cross-list: FILM 432.

### ARTS 435 - SEMINAR ON FILM AUTHORSHIP: THE NEW HOLLYWOOD
**Short Title:** SEMINAR ON FILM AUTHORSHIP  
**Department:** Visual and Dramatic Arts  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 4  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** This seminar covers the concept of authorship in Hollywood cinema since 1968. Filmmakers include Francis Ford Coppola, David Lynch, the Coen Brothers, and Charlie Kaufman. Cross-list: FILM 435, HART 480.

### ARTS 444 - HANDMADE FILM
**Short Title:** HANDMADE FILM  
**Department:** Visual and Dramatic Arts  
**Grade Mode:** Standard Letter  
**Course Type:** Studio  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** 16mm film production course utilizing handmade cinema techniques. 4 required 16mm films made using surface treatments, shooting with a 16mm film camera, hand developing, classic animation, crating soundtracks and digital editing. Space in class is limited. Registration does not guarantee a place in class. Cross-list: FILM 444.
ARTS 447 - SPECIAL PROBLEMS IN LIFE DRAWING
Short Title: SPECIAL PROBLEMS LIFE DRAWING
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of advanced problems in creative art. Topics may vary. Please consult with the department for additional information. May be used in awarding transfer credit. Prerequisite: permission of instructor. Instructor Permission Required. Repeatable for Credit.

ARTS 449 - PRINTMAKING STUDIO
Short Title: ADVANCED PRINTMAKING
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ARTS 311 and ARTS 349
Description: Advanced exploration of etching, lithography, photo gravure, and monoprinting. Enrollment is limited. The instructor will formulate the course roster and may allow additional majors and underclassmen to enroll.

ARTS 450 - SPECIAL PROBLEMS IN PRINTMAKING
Short Title: SPECIAL PROBLEMS PRINTMAKING
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of advanced problems in creative art. Topics may vary. Please consult with the department for additional information. May be used in awarding transfer credit. Instructor Permission Required. Repeatable for Credit.

ARTS 457 - SPECIAL PROBLEMS IN SCULPTURE
Short Title: SPECIAL PROBLEMS-SCULPTURE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of advanced problems in creative art. Topics may vary. Please consult with the department for additional information. May be used in awarding transfer credit. Prerequisite: permission of instructor. Instructor Permission Required. Repeatable for Credit.

ARTS 460 - ADVANCED COMPUTER GRAPHICS
Short Title: ADV COMPUTER GRAPHICS
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This project-based class involves teams of 2-4 CS and Visual Arts students designing and building computer games suitable for Xbox Live Arcade using C# and XNA. For CS students, COMP 160 or COMP 360 is recommended as a prerequisite. For Visual Arts students, previous experience in drawing using Photoshop is suggested. Instructor Permission Required. Cross-list: COMP 460.
Course URL: www.owlnet.rice.edu/~comp460

ARTS 465 - ADVANCED SCULPTURE
Short Title: ADVANCED SCULPTURE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ARTS 165 or ARTS 365
Description: Study of advanced problems in various sculptural media. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster.

ARTS 475 - ADVANCED PAINTING
Short Title: ADVANCED PAINTING
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ARTS 301 and (ARTS 303 or ARTS 401)
Description: Students will further advance their painting skills while beginning to develop a personal painting vocabulary. Students will have the opportunity to experiment with new materials, at new scales, and with new subject matter. Assignments will be more open in structure, allowing for more individually driven projects, specific to student interest.

ARTS 494 - SPECIAL PROBLEMS IN PRINTMAKING
Short Title: SPECIAL PROBLEMS PRINTMAKING
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of advanced problems in creative art. Topics may vary. Please consult with the department for additional information. May be used in awarding transfer credit. Prerequisite: permission of instructor. Instructor Permission Required. Repeatable for Credit.
ARTS 499 - SENIOR STUDIO
Short Title: SENIOR STUDIO
Department: Visual and Dramatic Arts
Course Type: Studio
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Senior. Enrollment is limited to students with a major in Visual and Dramatic Arts. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Required seminar for all studio track majors. This course is designed to guide the senior major in focused preparation of their work of the annual senior exhibition. Classes will consist of lectures, visits and critiques by artists and curators, and intensive independent studio work. Prerequisites: Students must receive permission from their faculty advisor or department chair to register for this class; only department majors who have senior academic standing will be allowed to register for this course. Department Permission Required. Repeatable for Credit.

Women, Gender, & Sexuality (SWGS)

SWGS 101 - INTRODUCTION TO WOMEN & GENDER
Short Title: INTRO WOMEN & GENDER
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to the Study of Women, Gender, and Sexuality- An introductory survey of issues in the study of gender, such as women's social, political, and legal status in the US and globally; feminist perspectives on sexuality; race, the body, globalization, labor, culture; and the implications of these perspectives for social and critical theory. The course also introduces the concept of engaged research and the public service components of feminist activity.

SWGS 111 - INTRODUCTION TO FEMINIST PHILOSOPHY
Short Title: INTRO TO FEMINIST PHILOSOPHY
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Feminist philosophy both uses philosophical methods to investigate feminism, and critiques philosophy from a feminist perspective. This course introduces the student to feminist philosophy from historical and contemporary perspectives, investigating topics of both feminist and philosophical interest such as gender, sexuality, family, class, race, equality, justice, politics, science, and knowledge. Cross-list: PHIL 111.

SWGS 130 - WOMEN AND NAZI GERMANY
Short Title: WOMEN AND NAZI GERMANY
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Through literature, art and filmmaking this course will explore how the Nazi dictatorship affected the lives of women. From “Aryan” women who participated in it, to how German women of Jewish descent were marginalized; analyzing women as victims and perpetrators of the Holocaust; and exploring the memory of Nazism. This course is limited to first-year students only, any others will be removed from this course. Cross-list: FSEM 130, GERM 130.

SWGS 201 - INTRODUCTION TO LESBIAN, GAY, BISEXUAL, AND TRANSGENDER STUDIES
Short Title: INTR LESBIAN, GAY, BISEX&TRAN
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An introduction to the interdisciplinary examination of sexual desires, sexual orientations, and the concept of sexuality, with a focus on the construction of lesbian, gay, bisexual, and transgender identities. The course looks at how identities interact with other social phenomena such as government, family, popular culture, scientific inquiry, and especially gender, and highlights the complexity and variability of sexualities of both across historical periods and in relation to race, class, ethnicity and nation. The course also introduces the concept of engaged research and the public service component of LGBT activity.

SWGS 205 - LANGUAGE AND SOCIETY
Short Title: LANGUAGE AND SOCIETY
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course treats language as a social phenomenon to show how language, personal identity and institutions of social control inter-relate. The course focuses on linguistic interaction in daily life and how gender, ethnic, class, activity, and geographic variation affect language use. Cross-list: LING 205.
SWGS 225 - WOMEN IN GREECE AND ROME
Short Title: WOMEN IN GREECE AND ROME
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of the depiction of women in Greek and Roman mythology, literature, and art. Includes a study of the lives of Greek and Roman women as evidenced by archaeological as well as literary materials. Cross-list: CLAS 225.
Course URL: classicallegacy.rice.edu

SWGS 234 - U.S. WOMEN'S HISTORY I: COLONIAL BEGINNINGS TO THE CIVIL WAR
Short Title: U.S. WOMEN'S HISTORY, I
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of American women's history examines the lives of elite, working, black, Indian and white women, and traces changes in women's legal, political, and economic status from the mid-17th century through the Civil War. Topics include slavery, suffrage, sexuality, and feminism. Cross-list: HIST 241.

SWGS 235 - U.S. WOMEN'S HISTORY II: CIVIL WAR TO THE PRESENT
Short Title: U.S. WOMEN'S HISTORY, II
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of American women's history examines the lives of elite, working, black, Indian and white women, and traces changes in women's legal, political, and economic status from the Civil War to the present. Topics include slavery, suffrage, sexuality, and feminism. Cross-list: HIST 242.

SWGS 240 - GENDER AND POLITICIZED RELIGION
Short Title: GENDER & POLITICIZED RELIGION
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines the emergence of religion-based politics in various Asian countries - particularly Hindu and Muslim - focusing on the women participants in these movements as well as the movements' concern with gender roles in society. We will investigate, for instance, the extent to which women participants have been willing or able to reshape the central ideas of such movements. Cross-list: ASIA 240, RELI 285. Mutually Exclusive: Credit cannot be earned for SWGS 240 and SWGS 340.

SWGS 250 - SEX, MONEY, AND POWER AROUND THE WORLD
Short Title: SEX, MONEY, AND POWER
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An interdisciplinary course exploring lives and well-being in the context of gendered international and domestic politics and economic processes. Emphasis on the implications of power relations at levels from the household to the global for women and men around the world (with particular attention to Asia). Cross-list: ASIA 251, POLI 250.

SWGS 273 - MEDICINE AND MEDIA
Short Title: MEDICINE AND MEDIA
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Examines visual media structure "ways of seeing" for physicians and for the public. Emphasis will be placed on developing media literacy skills. Cross-list: ENGL 273.
Course URL: www.english.rice.edu

SWGS 301 - ARTHURIAN LITERATURE
Short Title: ARTHURIAN LITERATURE
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A survey of the origins and development of the Arthurian legend from the earliest chronicles in the sixth century and later medieval French, Welsh, Irish, and English Arthurian poems to modern adaptations of Arthurian material, including films. Cross-list: ENGL 317, MDEM 317.

SWGS 303 - GENDER AND SCIENCE
Short Title: GENDER AND SCIENCE
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course introduces students to the historical, philosophical and social dimensions of science and technology through the lens of feminist and gender studies. It will explore the ways in which science has factored in producing cultural norms for gender and race, how gender figures in the authority of science, and the role of gender in scientific institutions.
SWGS 305 - CHAUCER  
Short Title: CHAUCER  
Department: Stdy of Women, Gender, & Sxltty  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: An introduction to Geoffrey Chaucer's The Canterbury Tales, Middle English, and the political and cultural climate of the fourteenth century. Cross-list: ENGL 316, MDEM 316.

SWGS 306 - HUMAN SEXUALITY  
Short Title: HUMAN SEXUALITY  
Department: Stdy of Women, Gender, & Sxltty  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course is designed to explore the physiological, psychological, and sociological parameters of human sexuality, while providing accurate information and helping students develop healthy attitudes toward sexuality. Cross-list: HEAL 306.

SWGS 308 - THE FUTURE OF FOOD: FEMINIST, QUEER, AND CRITICAL APPROACHES  
Short Title: FOOD FEMINIST QUEER APPROACHES  
Department: Stdy of Women, Gender, & Sxltty  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course examines food studies, food movements, and food politics through feminist, queer, and critical approaches, analyzing throughout the course food's relationships to gender, class, race, disability, sexuality, and geography. The course will include sharing food with one another, going on field trips, and participating in an engaged food justice project. Repeatable for Credit.

SWGS 314 - DIVINE SEX: GENDER AND DIVINITY IN THE MIDDLE AGES  
Short Title: DIVINE SEX  
Department: Stdy of Women, Gender, & Sxltty  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course will examine key medieval works, with special attention to women's writing, focusing on gender construction in mysticism and theology. Primary readings will include works by Hildegard of BinGen, Birgitta of Sweden, Margery Kempe, and others. Cross-list: MDEM 314, RELI 314.

SWGS 315 - GENDER AND ISLAM  
Short Title: GENDER AND ISLAM  
Department: Stdy of Women, Gender, & Sxltty  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Explores the lives of Muslim women in Asia, the Middle East, Europe, and North America; analyzes constructions of gender in the Islamic world overtime; the challenges faced from such diverse quarters as colonial administrators, Western feminists, and states; as well as movements and individuals within the Muslim world. Cross-list: ASIA 315, RELI 315.

SWGS 318 - ISRAELI WOMEN WRITERS  
Short Title: ISRAELI WOMEN WRITERS  
Department: Stdy of Women, Gender, & Sxltty  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Explores the lives of Muslim women in Asia, the Middle East, Europe, and North America; analyzes constructions of gender in the Islamic world overtime; the challenges faced from such diverse quarters as colonial administrators, Western feminists, and states; as well as movements and individuals within the Muslim world. Cross-list: ASIA 315, RELI 315.

SWGS 319 - FEMINIST PHILOSOPHY  
Short Title: FEMINIST PHILOSOPHY  
Department: Stdy of Women, Gender, & Sxltty  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course is an introduction to feminist philosophy, including texts by both historical and contemporary thinkers (e.g. Wollstonecraft, Mill, de Beauvoir, MacKinnon, Gilligan, Irigaray). We shall discuss both feminists' radical critiques of traditional values and beliefs, and feminist alternative views of justice, ethical judgment, and truth. Cross-list: JWST 318.

SWGS 320 - GENDER, SEXUALITY AND THE ADAPTATION OF TRANSNATIONAL LITERATURE TO PERFORMANCE  
Short Title: GENDER AND PERFORMANCE  
Department: Stdy of Women, Gender, & Sxltty  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course examines the embodiment of gender and sexuality through the oral interpretation of transnational literature. Students will learn how to analyze and adapt to performance novels and short stories from various global and historical contexts that exemplify the genre of the "coming of age" narrative. Cross-list: THEA 320.
SWGS 327 - TOPICS IN WOMEN WRITERS
Short Title: TOPICS IN WOMEN WRITERS
Department: Stdy of Women, Gender, & Sxltys
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This class investigates how sexuality has been constructed, avoided, celebrated, and suppressed in museums. In addition to studying a genealogy of sexual display and spectatorship in museums, students will also do the work of collectors, curators, and critics of artistic, historical, and scientific displays of sex and sexuality. Cross-list: HART 399.

SWGS 324 - SOCIOLOGY OF GENDER
Short Title: SOCIOLOGY OF GENDER
Department: Stdy of Women, Gender, & Sxltys
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course deals with masculinities in the West, concentrating on concepts of masculine protagonism and personhood. Cross-list: ANTH 325.

SWGS 325 - SOCIOLOGY OF THE FAMILY
Short Title: SOCIOLOGY OF THE FAMILY
Department: Stdy of Women, Gender, & Sxltys
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course investigates how sexuality has been constructed, avoided, celebrated, and suppressed in museums. In addition to studying a genealogy of sexual display and spectatorship in museums, students will also do the work of collectors, curators, and critics of artistic, historical, and scientific displays of sex and sexuality. Cross-list: HART 399.

SWGS 332 - SEX, SELF, AND SOCIETY IN ANCIENT GREECE
Short Title: SEX, SELF, AND SOCIETY IN ANCIENT GREECE
Department: Stdy of Women, Gender, & Sxltys
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Overview of research and theory on gender in psychology. Cross-list: PSYC 331.

SWGS 333 - PSYCHOLOGY OF GENDER
Short Title: PSYCHOLOGY OF GENDER
Department: Stdy of Women, Gender, & Sxltys
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Overview of research and theory on gender in psychology. Cross-list: PSYC 331.

SWGS 331 - THE AMERICAN WEST & ITS OTHERS
Short Title: THE AMERICAN WEST & ITS OTHERS
Department: Stdy of Women, Gender, & Sxltys
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course deals with masculinities in the West, concentrating on concepts of masculine protagonism and personhood. Readings explore identities constructed in realms such as law, politics, finances, art, the home, and war. Cross-list: ANTH 311.

SWGS 333 - MASCLINITIES
Short Title: MASCLINITIES
Department: Stdy of Women, Gender, & Sxltys
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Overview of research and theory on gender in psychology. Cross-list: PSYC 331.

Course URL: www.english.rice.edu
SWGS 335 - THE LIFE CYCLE: A BIOCULTURAL VIEW
Short Title: LIFE CYCLE: A BIOCULTURAL VIEW
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The human life cycle from conception to death. Focus is on the interaction between biological processes and culture. Cross-list: ANTH 388.

SWGS 336 - THE ANTHROPOLOGY OF THE HISTORICAL IMAGINATION
Short Title: THE HISTORICAL IMAGINATION
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Explores ideas of history and attitudes toward the past as culturally conditioned phenomena. Emphasizes history as a statement of cultural values as well as conceptualizations of cause, change, time, and reality. Cross-list: ANTH 308.

SWGS 338 - 19TH CENTURY WOMEN'S NARRATIVES
Short Title: 19TH C. WOMEN'S NARRATIVES
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines the experiences of women in the United States during the nineteenth century through first-hand accounts and scholarly readings. Students will ready a variety of materials to explore the social and legal status of women and consider the impact of race on women's lives. Cross-list: HIST 338.

SWGS 343 - JANE AUSTEN'S WORLDS
Short Title: JANE AUSTEN'S WORLDS
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An exploration of Jane Austen as Regency writer and contemporary icon. The course will focus both on Austen's writing her novels, her juvenilia and her letters and on visual and textual adaptations of her work. Cross-list: ENGL 343.

SWGS 345 - HISTORY OF FEMINISM
Short Title: HISTORY OF FEMINISM
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Explores feminism as political thought and social movement in various times and places. Readings will include classic as well as non-canonical texts. We will consider the historical contexts of feminist action, and examine controversies over and within feminisms. Cross-list: HIST 340.

SWGS 346 - SEMINAR ON LOVE: MAKING LOVE IN MODERN ART AND THOUGHT
Short Title: MAKING LOVE IN MODERN ART
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar explores various conceptions of love from the classical era to our postmodern age. Ranging from eros to philia to agape, we will examine literary, philosophical, and artistic expressions of love in painting, cinema, literature, psychoanalysis, philosophy, religion, and culture. Cross-list: HART 346.

SWGS 348 - SEX AND GENDER IN MODERN JEWISH CULTURE
Short Title: SEX & GENDER IN JEWISH CULTURE
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: How has Jewish identity historically been constructed as gendered, and how has that affected Jewish self-perception and representation as well as the representations of others? This course explores the intersection between gender and Jewishness from several different historical and cultural perspectives, using literature, film, and philosophy. Cross-list: JWST 348. Mutually Exclusive: Credit cannot be earned for SWGS 348 and RELI 347/SWGS 347.

SWGS 350 - GENDER AND SYMBOLISM
Short Title: GENDER AND SYMBOLISM
Department: Stdy of Women, Gender, & Sxltv
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examinations of beliefs concerning men, women, and gender in different cultures, including the West, relating to issues of symbolism, power, and the distribution of cultural models. Cross-list: ANTH 327.
SWGS 353 - ILLNESS, DISABILITY, AND THE GENDERED BODY
Short Title: DISABILITY AND GENDERED BODIES
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course draws on critical disability studies and medical anthropology to explore how gender and sexuality matter in contexts of illness and disability across a range of institutional, social, and national contexts. We pay particular attention to the ways illness and disability expose, disturb, or reenact normative arrangements of gender. Cross-list: ANTH 354. Graduate/Undergraduate Equivalency: SWGS 554. Mutually Exclusive: Credit cannot be earned for SWGS 353 and SWGS 554.

SWGS 354 - CHICANO/A LITERATURE
Short Title: CHICANO/A LITERATURE
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A mixed-genre course focusing on the Chicano movement, the Chicano renaissance, and alternative literary and mythic traditions associated with them. Cross-list: ENGL 370, SPPO 354.

Course URL: www.english.rice.edu

SWGS 358 - EUROPEAN WOMEN FILMMAKERS
Short Title: EUROPEAN WOMEN FILMMAKERS
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Filmmaking has celebrated its first hundred years. Women’s contributions were significant and deserve to widen the film canon for all filmgoers. This course will concentrate on films by European women directors, taking into account aesthetic particularities, gender commitment, and post-feminist attempts. Importance will also be given to the contexts and conditions of women's film production. All films subtitled in English. Taught in English. Cross-list: GERM 321, HART 385, HUMA 321.

SWGS 361 - NEW GERMAN FILM: HITLER’S CINEMATIC CHILDREN
Short Title: NEW GERM FILM: HITLER’S CINEMA
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: From the 1960 to 2000, Germany has developed a very distinct auteure cinema with independent filmmakers such as Fassbinder, Herzog, Wenders, Adlon, Trotta, Sander, Brueckner, Doerrie, Garnier, Tykwer, and others. The first 20 years of German film were oriented on coming to terms with the fascist past; the second 20 years focused on more contemporary issues. Film, critical reading and class discussion in English. All films are subtitled in English and will be assessed with podium technology. Taught in English. Cross-list: GERM 338, HUMA 373.

SWGS 364 - QUEER LITERARY CULTURES
Short Title: QUEER LITERARY CULTURES
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An introduction to queer literary theory by reading works in several genres, from Sappho to the present day, including Shakespeare, Dickinson, Tennyson, Whitman, Proust, Stein and Woolf. Cross-list: ENGL 354.

Course URL: www.english.rice.edu

SWGS 367 - LITERATURE AND CULTURE OF THE US-MEXICO BORDERLANDS
Short Title: LIT & CULT, US-MEX BORDERLANDS
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The course focuses on the cross-national cultures of the US-Mexico borderlands with attention to key issues in the history of the region: haunted modernities, organized resistance, migration, labor, and the traffic in bodies, drugs, and other goods. Readings include novels, short stories, critical essays, histories, film, and video. Cross-list: ENGL 367.

Course URL: www.english.rice.edu

SWGS 370 - AFRICAN AMERICAN LITERATURE
Short Title: AFRICAN AMERICAN LITERATURE
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A course that traces, through various genres and themes, African American literary history from the late eighteenth century to the present. Attention is given to theories and critiques of African American literature and culture. Cross-list: ENGL 370.

Course URL: www.english.rice.edu
SWGS 375 - CHICANA AND LATINA EXPERIENCE THRU FILM
Short Title: CHICANA/LATINA EXP THRU FILM
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar explores the Chicana and Latina experience in the U.S. We examine these women's response to each other and forces of conquest, capitalism, and patriarchy. Novels, oral life histories, film, and art will be used to interrogate these women's conceptualization and assertion of feminism, activism, and history. Cross-list: LASR 376.

SWGS 376 - RACE, POWER AND THE POLITICS OF PLACE
Short Title: RACE, POWER, PLACE
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines how the social construction of space informs processes of racial formation, gender, and sexuality by focusing largely on Latina communities in the Americas.

SWGS 377 - LITERATURE OF THE AMERICAS
Short Title: LITERATURE OF THE AMERICAS
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A mixed-genre variable topics course that examines literatures in English from North and South America, including the Caribbean. The focus of the course may vary from a survey of a specific geographical region or a group of writers, to a theme that incorporates more than one geographical region or national literature. Cross-list: ENGL 378. Repeatable for Credit.
Course URL: www.english.rice.edu

SWGS 378 - FEMINIST THEORY
Short Title: FEMINIST THEORY
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A course focusing on concepts that drive and divide social movements centered on gender equality, women's issues, and sexual identity in the two-thirds and one-third world, among them feminism; the body; race; labor; rights, needs, and desires. Cross-list: ENGL 382.
Course URL: www.english.rice.edu

SWGS 379 - SURVEY OF VICTORIAN FICTION
Short Title: VICTORIAN FICTION
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A survey of the many genres of the 19th-century novel, this course will try to come to terms with some of the consistent questions posed by and through the fiction of the period. Cross-list: ENGL 342.
Course URL: www.english.rice.edu

SWGS 373 - WOMEN'S SOCIAL MOVEMENTS IN LATIN AMERICA AND THE CARIBBEAN
Short Title: WOMEN'S SOCIAL MOVEMENTS
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The course will examine the historical development of women's social movements in Latin America and the Caribbean. We will explore how they are transforming the region through their diverse forms of political engagement. This is a lecture/seminar course that emphasizes writing and discussion. Cross-list: LASR 373.

SWGS 374 - FEMINIST AND QUEER THEORY IN THE AFRICAN DIASPORA
Short Title: FEM THEORY IN AFRICAN DIASPORA
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course provides an interdisciplinary overview of the body of Black feminist and queer theory that has emerged within the last forty years. We will examine these frameworks in order to understand how racial difference shapes gender and sexual identities. This is a seminar that emphasizes research and discussion. Cross-list: LASR 374.

SWGS 375 - LATINA AND AFRICAN AMERICAN WOMEN'S ACTIVISM IN THE URBAN METROPOLIS
Short Title: WOMEN'S ACTIVISM URBAN METRO
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will investigate the contemporary writings of Latina and African American women in urban spaces across the U.S. Understanding these women's experiences in relationship to each other will reveal the shared, yet distinct, trajectories that orient their struggle to resist poverty, racism, homophobia, and sexual and reproductive violence. Cross-list: LASR 375.
**SWGS 384 - MODERN GIRL AND ASIA IN THE WORLD**
Short Title: MOD GIRL & ASIA IN THE WORLD
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines the phenomenon of the so-called modern girl in Asia and the world, 1890-1949. Topics include: modernity, consumer culture, sexuality, and liberation. Cross-list: ASIA 328, HIST 384.

**SWGS 385 - SEXUAL DEBATES IN THE U.S.: SOCIAL AND CULTURAL CONTEXTS OF SUPREME COURTS DECISIONS**
Short Title: SEXUAL DEBATES IN U.S.
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: How do sex acts and sexualities enter public conversations over time? This course surveys a variety of sexual debates in the United States with a focus on the social and cultural contacts and the legacies of those debates. Topics vary, but examples include miscegenation, obscenity, abortion and sodomy.

**SWGS 389 - YOUTH STUDIES**
Short Title: YOUTH STUDIES
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A variable topics course exploring the cultural productions of youth, their social geographies, and youth as a critical field important to the theorization of activism, technology, law and incarceration, medicine, consumerism, citizenship, immigration, labor, posthumanism. Previous topics: Generation X, Third Wave Feminism, Obama and the Youth Vote, Twilight culture, Harry Potter & Gen Y. Cross-list: ENGL 389.
Course URL: www.english.rice.edu

**SWGS 390 - TRENDS IN HISPANIC CINEMA**
Short Title: TRENDS IN HISPANIC CINEMA
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines the ways in which films in both Spain and Latin America have represented the cultural contexts of their countries. Focus is on the theme of power, and the consequences on social and individual lives. Cross-list: SPPO 385. Recommended prerequisite(s): Third-year Spanish or permission of instructor.

**SWGS 393 - SCIENCE, FEMINISM AND CHRISTIANITY IN THE AMERICAN 20TH CENTURY**
Short Title: SCIENCE/FEMINISM/CHRISTIANITY
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines a history of sex and gender at the intersection of American science and American Christianity over the past century. Students will be invited to interrogate the boundaries between scientific and religious discourse as they investigate how these have interacted in producing sex and gender identity.

**SWGS 394 - HUMAN DEVELOPMENT IN GLOBAL AND LOCAL COMMUNITIES**
Short Title: HUMAN DEVELOPMENT
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): HUMA 371 or SOCI 371
Description: This course explores poverty and gender in local and global communities. Readings consider human deprivations and well-being in the context of social norms, gender relations, and governmental structures. Also examined are policies meant to improve human capabilities, including both the overall effects of such policies and their differential consequences for children, women and men. Cross-list: SOCI 394.

**SWGS 395 - FEMINIST KNOWLEDGES**
Short Title: FEMINIST KNOWLEDGES
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: In this course we will examine various methodologies used by feminist scholars in the social sciences and the humanities. Particular attention will be devoted to interdisciplinary feminist inquiries in science, ethnography, and epistemology.

**SWGS 398 - THE TEN MOST IMPORTANT SUPREME COURT DECISIONS IN U.S. HISTORY**
Short Title: TOPICS IN LEGAL HISTORY
Department: Stdy of Women, Gender, & Sxly
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course on selected topics in legal history. Cross-list: HIST 398.
SWGS 399 - WOMEN IN CHINESE LITERATURE  
Short Title: WOMEN IN CHINESE LITERATURE  
Department: Stdy of Women, Gender, & Sxltv  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course examines women's roles in Chinese literature as writers, scholars, and characters. Focusing particularly on the tension between women's lived bodily experiences and the cultural experiences inscribed on the female body and how, in the process, women have contrarily gendered patriarchal culture into their own. It will also touch on Chinese women's incorporation of the Western Tradition. Cross-list: ASIA 399, MDEM 379.

SWGS 400 - CONSTRUCTING IDENTITIES IN MODERN FICTION  
Short Title: CONSTR IDENTITY MODERN FICTION  
Department: Stdy of Women, Gender, & Sxltv  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course will explore the construction of racial, sexual, gendered, and ethnic identities in modern fiction, with a particular concern for the connections among identity, literary form, and social categories of meaning. Readings include Woolf, Colette, Duras, Djebar, Morisson, Winterson, Baraoui, and others.

SWGS 405 - AUSTEN ONLY: NOVELS & FILM  
Short Title: AUSTEN ONLY. NOVELS & FILM  
Department: Stdy of Women, Gender, & Sxltv  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: An in-depth exploration of Jane Austen as author and icon. Material will include all her fiction as well as portions of her letters and biography. Recent film and television adaptations of her novels will also be critically examined. Cross-list: ENGL 443.

Course URL: www.english.rice.edu

SWGS 407 - STUDIES IN FEMINIST LITERARY THEORY  
Short Title: STUDIES IN FEMINIST LIT THEORY  
Department: Stdy of Women, Gender, & Sxltv  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: A variable topics course designed to build on student knowledge of feminist theory gained earlier in the curriculum. Past topics have included sexualities, Marriage and Its Others, and Third Wave Feminism. Cross-list: ENGL 481.

Course URL: www.english.rice.edu

SWGS 412 - WOMEN, SEXUALITY & LITERARY  
Short Title: WOMEN, SEXUALITY & LITERARY  
Department: Stdy of Women, Gender, & Sxltv  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Introduction to women writers and to women as objects of representation in fiction and in poetry since the Revolution. Special attention to the body and to sexuality as these impinge both on writer and represented. Cross-list: FREN 360. Recommended Prerequisite(s): FREN 202 or Placement Test.

SWGS 415 - SOCIOLINGUISTICS  
Short Title: SOCIOLINGUISTICS  
Department: Stdy of Women, Gender, & Sxltv  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): LING 301 or ANTH 301 or LING 311 or ANTH 323 or LING 501 or ANTH 501 or LING 511 or ANTH 523  
Description: This course covers contemporary sociolinguistic theory and methodologies. We examine the linguistic consequences to speakers of their group memberships such as gender, race, class and sexuality. Cross-list: LING 415.

SWGS 424 - WOMEN IN FRANCE  
Short Title: WOMEN IN FRANCE  
Department: Stdy of Women, Gender, & Sxltv  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course studies women in education, the workplace, politics, and in social and cultural institutions in French society. The class explores the history of the French women's movement and analyzes French concepts of gender and feminism in comparison to American models. Cross-list: FREN 424. Recommended Prerequisite(s): FREN 202.

SWGS 430 - QUEER THEORY  
Short Title: QUEER THEORY  
Department: Stdy of Women, Gender, & Sxltv  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: An examination of key issues in queer theory that links those issues to other major literary and cultural theory of the past quarter century. As such the course will also serve as an introduction to psychoanalytic theory, postcolonial theory, deconstruction, postcolonial theory, film studies and recent work on the relationship between science and literature. Cross-list: ENGL 498. Repeatable for Credit.

Course URL: www.english.rice.edu
SWGS 434 - SEEING SEX IN EUROPEAN ART, 1400-1700  
Short Title: SEEING SEX IN EUROPEAN ART  
Department: Stdy of Women, Gender, & Sxlty  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course will examine the visual history of sexuality from 1400-1700. It will explore how imagery structured sexual desire; the role of erotic sacred art; the rise of pornography; the intersection of spatial topography and sexuality; the linkage of licit and illicit sexualities; and the sexuality of artist and patrons. Cross-list: HART 434, MDEM 434.  
Graduate/Undergraduate Equivalency: SWGS 534. Mutually Exclusive: Credit cannot be earned for SWGS 434 and SWGS 534.

SWGS 440 - WOMEN IN MUSIC  
Short Title: WOMEN IN MUSIC  
Department: Stdy of Women, Gender, & Sxlty  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Study of gender in music, including aesthetics and representation, and of the major roles women have assumed in music, especially as composers, performers, and patrons. While the course emphasizes the Western art tradition, other types of music are explored as well. Cross-list: MUSI 526.

SWGS 449 - CULTURES OF SEXUALITY  
Short Title: CULTURES OF SEXUALITY  
Department: Stdy of Women, Gender, & Sxlty  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: What is "sexuality" across cultural milieux? This course analyzes understandings and practices of sexuality from a global, comparative perspective, including different social configurations of gender and intimacy, reproduction, sensuality and the erotic. Case studies explore the complex relationships between sexuality and gender, ethnicity, nationalism, globalization, commodification, politics, media, health and medicine. Cross-list: ANTH 449.

SWGS 453 - STUDIES IN AFRICAN AMERICAN LITERATURE  
Short Title: AFRICAN AMERICAN STUDIES  
Department: Stdy of Women, Gender, & Sxlty  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: A variable topics course designed to build on student knowledge of African American literature gained earlier in the curriculum. Recent topics include Black Women Writers. Cross-list: ENGL 470. Repeatable for Credit.

SWGS 462 - 20TH-21ST CENTURY AMERICAN STUDIES  
Short Title: 20TH-21ST CENTURY AMER STUDIES  
Department: Stdy of Women, Gender, & Sxlty  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: A variable topics course designed to build on student knowledge of twentieth and twenty-first century U.S. literature and/or culture gained earlier in the curriculum. Recent topics have included social justice and contemporary fiction. Cross-list: ENGL 462. Repeatable for Credit.  
Course URL: www.english.rice.edu

SWGS 465 - GENDER AND HEALTH  
Short Title: GENDER AND HEALTH  
Department: Stdy of Women, Gender, & Sxlty  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course will examine the relationship between gender and health, both physical and mental. We will begin the semester by examining issues related to gender and health in the U.S. and spend the second half of the semester examining gender and health in an international context. Instructor Permission Required. Cross-list: SOCI 465.

SWGS 466 - LATIN AMERICAN WOMEN'S CULTURE  
Short Title: LATIN AMERICAN WOMEN'S CULTURE  
Department: Stdy of Women, Gender, & Sxlty  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Studies the cultural production (literary, artistic, cinematic) of intellectual women in Latin America. Examines the struggles for interpretive power in works by women from the colonial period to the present. Cross-list: SPPO 430.
SWGS 470 - ADVANCED SEMINAR IN POVERTY, JUSTICE, AND CAPABILITIES
Short Title: POVERTY, JUSTICE, CAPABILITIES
Department: Stdy of Women, Gender, & Sxltty
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ASIA 329 (may be taken concurrently) or SOCI 394 (may be taken concurrently) or SWGS 394 (may be taken concurrently) or SOCI 372 (may be taken concurrently) or SWGS 322 (may be taken concurrently)) and (HUMA 280 or SOCI 280 or HUMA 371 or SOCI 371)
Description: Through interdisciplinary readings, this seminar explores how global, national, and domestic structures and institutions influence the day-to-day lives and capabilities of different groups and individuals. We will study historical and contemporary efforts by activists and policymakers to confront social inequities. ASIA 329 or SOCI 372 or SWGS 322 or SOCI 394 or SWGS 394 may be taken concurrently with SWGS 470.

SWGS 472 - TOPICS IN RICHARDSON'S CLARISSA
Short Title: RICHARDSON'S CLARISSA
Department: Stdy of Women, Gender, & Sxltty
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A seminar-style course that reads and examines Richardson's 1500 page novel from a range of critical perspectives. Topics considered will include gender; economics; history of the novel; history of marriage; and philosophical perspectives on literature. Cross-list: ENGL 432. Repeatable for Credit.
Course URL: www.english.rice.edu

SWGS 480 - FEMINIST LITERARY THEORY
Short Title: FEMINIST LITERARY THEORY
Department: Stdy of Women, Gender, & Sxltty
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An introduction to the core concepts and writing of the field.

SWGS 485 - GENDER AND HOLLYWOOD CINEMA IN THE 1950'S
Short Title: GENDER AND HOLLYWOOD 1950'S
Department: Stdy of Women, Gender, & Sxltty
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines representations of gendered subjectivity in Hollywood cinema during the 1950s. Some of the topics to be addressed include the uneasy relationships between normative domesticity and heterosexual masculinity, and issues of voyeurism and eroticism, and the ongoing conflict between liberated individualism and social conformity in corporate culture and bourgeois society. Cross-list: HART 485.

SWGS 492 - GENDER HISTORIES OF MODERN CHINA
Short Title: GENDER HISTORIES: MODERN CHINA
Department: Stdy of Women, Gender, & Sxltty
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar with some lectures considers late imperial through 21st century China using conceptual tools (masculinity, femininity, gynotechnics, globalization, representation). Examines late Qing gender order, revolutionary era, party-state formation, and the Great Transformations of late 20th and early 21st centuries using visual culture, film, primary texts, and secondary histories. Cross-list: ASIA 492, HIST 492.

SWGS 494 - PRE-SEMINAR IN ENGAGED RESEARCH
Short Title: PRE-SEMINAR: ENGAGED RESEARCH
Department: Stdy of Women, Gender, & Sxltty
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course prepares students for the Spring semester and practicum sequence (496 and 497) by establishing a baseline of skills in research design and filing paperwork with the Institutional Review Board at Rice and elsewhere as needed.

SWGS 495 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Stdy of Women, Gender, & Sxltty
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Open to SWGS majors only. Instructor Permission Required.

SWGS 496 - ENGAGED RESEARCH PRACTICUM
Short Title: ENGAGED RESEARCH PRACTICUM
Department: Stdy of Women, Gender, & Sxltty
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An applied research complement to the Seminar consisting of six hours/week participating in a research-based project at a local public service agency that addresses the needs of women or is focused on gender and/or sexuality related work. Planning for the practicum takes place during the previous fall semester in consultation with the SWGS Director. Practicum projects are presented to a public audience. Permission of the instructor and some background in the study of women, gender or sexuality required.
SWGS 497 - ENGAGED RESEARCH SEMINAR
Short Title:  ENGAGED RESEARCH SEMINAR  
Department:  Stdy of Women, Gender, & Sxlty  
Grade Mode:  Standard Letter  
Course Type:  Seminar  
Credit Hours:  3  
Restrictions:  Graduate level students may not enroll.  
Course Level:  Undergraduate Upper-Level  
Description:  Taken in conjunction with SWGS 496, the Seminar develops students’ research skills and situates the practicum project within a range of perspectives on feminist theory and practice, grassroots organizing, and policy-making around the issues of women, gender, and sexuality, for example, domestic violence, gender and the prison industry, reproductive freedom, the feminization of AIDS. Permission of the instructor and some background in gender or sexuality studies are required.

SWGS 498 - RESEARCH IN THE STUDY OF WOMEN GENDER SEXUALITY
Short Title:  RES STUDY WOMEN GENDER SXLTY  
Department:  Stdy of Women, Gender, & Sxlty  
Grade Mode:  Standard Letter  
Course Type:  Research  
Credit Hours:  3  
Restrictions:  Graduate level students may not enroll.  
Course Level:  Undergraduate Upper-Level  
Description:  Research seminar for SWGS seniors to fulfill capstone requirement. Open to SWGS majors only.

SWGS 499 - RESEARCH IN THE STUDY OF WOMEN GENDER SEXUALITY
Short Title:  RES STUDY WOMEN GENDER SXLTY  
Department:  Stdy of Women, Gender, & Sxlty  
Grade Mode:  Standard Letter  
Course Type:  Research  
Credit Hours:  3  
Restrictions:  Graduate level students may not enroll.  
Course Level:  Undergraduate Upper-Level  
Description:  Research seminar for SWGS seniors to fulfill capstone requirement. Open to SWGS majors only. Instructor Permission Required.

SWGS 501 - FEMINIST DEBATES
Short Title:  FEMINIST DEBATES  
Department:  Stdy of Women, Gender, & Sxlty  
Grade Mode:  Standard Letter  
Course Type:  Lecture  
Credit Hours:  3  
Restrictions:  Enrollment is limited to Graduate level students.  
Course Level:  Graduate  
Description:  This course identifies and traces three streams of thought by debates about major issues in women's studies. While the content of these streams will vary-the course will always be attentive to the historical and theoretical context of the debates in question and to the intersection of these debates with others. Topics might include: public and private spheres; the relation between the local and the global links between gender and sexuality; the problem of identity; the relation between activist and academic feminism.

SWGS 502 - GENDER, THE DISCIPLINES, AND INTERDISCIPLINARITY
Short Title:  GENDER, DISCIPL, & INTERDISCIPLIP  
Department:  Stdy of Women, Gender, & INTERD  
Grade Mode:  Standard Letter  
Course Type:  Lecture  
Credit Hours:  3  
Restrictions:  Enrollment is limited to Graduate level students.  
Course Level:  Graduate  
Prerequisite(s):  SWGS 501  
Description:  Structured as a workshop, this course offers SWGS certificate students critically to engage cross-disciplinary feminist scholarship as they integrate the study of women, gender and/or sexuality into their doctoral writing by transforming existing papers into works that are of publishable quality.

SWGS 503 - DIRECTED READING
Short Title:  DIRECTED READING  
Department:  Stdy of Women, Gender, & Sxlty  
Grade Mode:  Standard Letter  
Course Type:  Independent Study  
Credit Hours:  1-3  
Restrictions:  Enrollment is limited to Graduate level students.  
Course Level:  Graduate  
Description:  Directed reading under the supervision of a SWGS faculty member with permission of the instructor. May count only once toward major requirements. Instructor Permission Required.

SWGS 517 - MEDIEVAL WOMEN WRITERS
Short Title:  MEDIEVAL WOMEN WRITERS  
Department:  Stdy of Women, Gender, & Sxlty  
Grade Mode:  Standard Letter  
Course Type:  Lecture  
Credit Hours:  3  
Restrictions:  Enrollment is limited to Graduate level students.  
Course Level:  Graduate  
Description:  An examination of the most significant medieval European women authors from the tenth through the seventeenth centuries, from the Byzantine Empire to France, Germany, Italy, England, Austria, Belgium, Bohemia, and Spain. See course web page for additional information. Cross-list: ENGL 517.

SWGS 520 - SHAKESPEARE AND DIFFERENCE
Short Title:  SHAKESPEARE AND DIFFERENCE  
Department:  Stdy of Women, Gender, & Sxlty  
Grade Mode:  Standard Letter  
Course Type:  Lecture  
Credit Hours:  3  
Restrictions:  Enrollment is limited to Graduate level students.  
Course Level:  Graduate  
Description:  Please consult the English department website for additional information. Cross-list: ENGL 520.

Course URL:  www.english.rice.edu
SWGS 522 - FEMINIST ECONOMICS
Short Title: FEMINIST ECONOMICS
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is an introductory course covering a range of theoretical and policy issues in contemporary feminist economics. Topics include: the social construction of economic knowledge; disciplinary debates; global economic issues relating to gender, race, ethnicity, and sexual orientation; economic justice; children and family policy; unpaid work; inequities in pay, wealth, and resources; and gender budgets. No prior training in economics is required.

SWGS 525 - SEX, SELF, AND SOCIETY IN ANCIENT GREECE
Short Title: SOCIETY IN ANCIENT GREECE
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An introductory venture into conducting fieldwork in the past. The course treats a wide range of artifacts, from philosophical essays to vase paintings. It derives its focus from a rich corpus of recent research into the ancient problematization of desire and self-control. Cross-list: ANTH 525.

SWGS 534 - SEEING SEX IN EUROPEAN ART, 1400-1700
Short Title: SEEING SEX IN EUROPEAN ART
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Cross-list: ANTH 534. Graduate/Undergraduate Equivalency: SWGS 434. Mutually Exclusive: Credit cannot be earned for SWGS 534 and SWGS 434.

SWGS 542 - VICTORIAN FICTION
Short Title: VICTORIAN FICTION
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A variable topics course. Please consult the English department website for additional information. Recent topics have included "The Victorian Marriage Plot", "The History of the Novel, Part II", and "Victorian and Modern Sexualities". Cross-list: ENGL 542. Repeatable for Credit.

Course URL: www.english.rice.edu

SWGS 545 - WOMEN AND GENDER: EUROPE AND BEYOND
Short Title: WOMEN & GENDER: EUR & BEYOND
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate seminar exploring recent work in key areas of research on women and gender; nationalisms; the modern welfare state; and the challenges which histories of working-class women have posed to definitions of politics, feminism, class, and family. Settings include colonial Britain, India, Africa, Netherlands, Indonesia, France, and Germany. Students can choose to take this course as either a reading or a research seminar. Cross-list: HIST 545.

SWGS 546 - SPECIAL TOPICS: 20TH CENTURY BRITISH LITERATURE
Short Title: SP. 20TH CENTURY BRITISH LIT
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A variable topics course. Cross-list: ENGL 546. Repeatable for Credit.

Course URL: www.english.rice.edu

SWGS 554 - ILLNESS, DISABILITY, AND THE GENDERED BODY
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will examine the concepts of social class and struggle, and the specific meanings of gender and sexuality in historical and contemporary contexts. The course will explore the ways in which gender, race, economics, and class intersect to shape individual and collective experiences of illness and disability. Cross-list: ANTH 554. Graduate/Undergraduate Equivalency: SWGS 353. Mutually Exclusive: Credit cannot be earned for SWGS 554 and SWGS 353.

SWGS 556 - SEMINAR IN SOCIOLINGUISTICS
Short Title: SEMINAR IN SOCIOLINGUISTICS
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate.
Course Level: Graduate
Prerequisite(s): LING 415
Description: This course will examine the concepts of social class and community of practice in depth as they relate to sociolinguistic variation. Specific attention will be paid to how these concepts are treated in the field of linguistics, as well as complimentary fields such as sociology and anthropology. Cross-list: LING 556.
SWGS 577 - THE KNOWING BODY: BUDDHISM, GENDER, AND THE SOCIAL WORLD
Short Title: BUDDHISM, GENDER, & SOCIETY
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Western thought tends to regard mind and body dualistically, a view with significant impact on religious, cultural, gendered, and social processes. This course juxtaposes received Western assumptions with Buddhist perspectives (especially Tibetan Buddhist), mapping Western and Buddhist categories onto each other to better understand the implications of each. Mutually Exclusive: Credit cannot be earned for SWGS 577 and SWGS 323.

SWGS 580 - SEXUALITY, SANCTITY, AND PSYCHOANALYSIS
Short Title: SEX, SANCTITY, PSYCHOANALYSIS
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An advanced mapping of the psychoanalytic study of religion through a close reading of psychoanalytically informed studies of saint, founding figures, and charismatic teachers, with a particular focus on sexuality and gender and their relationships to the expression and representation of holiness in the history of religions.

SWGS 581 - CULTURAL STUDIES: CONTEMPORARY LITERATURE, CULTURE AND POLITICS
Short Title: CONTEMPLIT., CULTURE & POLI
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A variable topics course. Please consult the English department website for additional course information. Recent topics have included Contemporary Issues in U.S. Culture and Studies in Sexuality: Thinking Sex Under Neo-Liberalism. Cross-list: ENGL 581. Repeatable for Credit.
Course URL: www.english.rice.edu

SWGS 583 - READING MATERIAL
Short Title: READING MATERIAL
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course considers the contesting claims made on the term "material" and their implications for how we read critically, with particular attention to the question of class; the material status of nature and the body; gender, race, and sexual identities. Cross-list: ENGL 583.

SWGS 584 - THINKING SEX UNDER NEO-LIBERALISM
Short Title: THINKING SEX UNDER NEO-LIB
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Taking as its historical period in the social crises defining the emergence of neo-liberal capitalism in the late twentieth century, this course focuses on new formations of gender and sexuality in US and transnational culture and inquires into critical concepts being forwarded to address it. Cross-list: ENGL 584.

SWGS 585 - POSTCOLONIALISM AND BEYOND
Short Title: POSTCOLONIALISM AND BEYOND
Department: Stdy of Women, Gender, & Sxlty
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A course that serves both as an introduction to postcolonial theory and as a reevaluation of its political and ethical ends vis-a-vis recent debates around globalization and cosmopolitanism. For additional course information please consult the English department website. Cross-list: ENGL 585.
Course URL: www.english.rice.edu

Baker, George C., 2012. Lecturer of Improvisation

Balabanlilar, Lisa A., 2007. Associate Professor of History

Ball, Zachary T., 2006. Associate Professor of Chemistry, Associate Department Chair of Chemistry for Undergraduate Studies

Ballesteros, Andrea, 2012. Assistant Professor of Anthropology

Bao, Gang, 2015. Foyt Family Professor of Bioengineering and Professor of Bioengineering
BS (1976) Shandong University; (1981) MSc, Shandong University; PhD (1987) Lehigh University

Baraniuk, Richard G., 1992. Victor E. Cameron Professor of Electrical and Computer Engineering

Baring, Matthew G., 2000. Professor of Physics and Astronomy

Barlow, Tani E., 2009. T. T. and W. F. Chao Professor of History
BA (1975) San Francisco State University; MA (1979), PhD (1985) University of California–Davis

Barrett, Deborah, 1998. Professor of the Practice of Professional Communication
BA (1972), MA (1977) University of Houston; PhD (1983) Rice University

Barnhill, Allen, 2010. Associate Professor of Trombone
BM (1977) Eastman School of Music

Barrera, Enrique V., 1991. Victor E. Cameron Professor of Mechanical and Materials Science and NanoEngineering
BS (1975), PhD (1981) Lehigh University

BS (1983), PhD (1986) Imperial College of Science and Technology, University of London

Bartel, Bonnie, 1995. Ralph and Dorothy Looney Professor of Biochemistry and Cell Biology

Bashor, Caleb, 2018. Assistant Professor of Bioengineering
BA (1999) Reed College; PhD (2010) University of California–San Francisco

Batsell, Richard R., 1980. Associate Professor of Marketing, Associate Professor of Psychology
BA, BBA (1971), PhD (1976) University of Texas–Austin

Bayazitoglu, Yildiz, 1977. Harry S. Cameron Professor of Mechanical Engineering and of Materials Science and NanoEngineering
BS (1967) Middle East Technological University; MS (1969), PhD (1974) University of Michigan

Beaird, Robert, 2015. Instructor of Physics and Astronomy
BS (2003) Centenary College of Louisiana; MS (2008), PhD (2011) Louisiana State University

Beaumay, Beth, 2001. Lecturer of Biochemistry and Cell Biology
Beachamp, Michael S., 2005. Adjunct Professor of Psychology

Beckingham, Kathleen M., 1980. Professor of Biochemistry and Cell Biology
BA (1967), MA (1968), PhD (1972) University of Cambridge

Bedient, Philip B., 1975. Herman Brown Professor of Engineering
BS (1969), MS (1972), PhD (1975) University of Florida

Bednar, J. Bee, 1997. Adjunct Professor of Computational and Applied Mathematics
BS (1962) Southwest Texas State University; MA (1964), PhD (1968) University of Texas–Austin

Begley, Charles E., 1989. Adjunct Associate Professor of Economics
BS (1969) Northern Arizona University; MA (1972), PhD (1978) University of Texas–Austin

Behringer, Richard, 2008. Adjunct Professor of Chemical and Biomolecular Engineering
PhD (1986) University of South Carolina

Belik, Katerina, 2013. Lecturer of the Program in Writing and Communication
BA (1993), PhD (1995) Kuban State University, Russia

Bengston, Sarah, 2017. Huxley Research Instructor of BioSciences
BS (2010) University of Tennessee; PhD (2015) University of Arizona

Bennett, George M., 1978. E. Dell Butcher Professor of Biochemistry and Cell Biology
BS (1968) University of Nebraska; PhD (1974) Purdue University

Bennett, Matthew, 2009. Associate Professor of Biochemistry and Cell Biology
BS (2000), PhD (2006) Georgia Institute of Technology

Bertiuloso, Roberto, 2013. Lecturer of Statistics

Besbris, Max, 2017. Assistant Professor of Sociology

Bharadwaj, Palash, 2016. Assistant Professor of Electrical and Computer Engineering

Bhat, Krishna, 2017. Adjunct Assistant Professor of Electrical and Computer Engineering

Bissada, K. K., 1996. Adjunct Professor of Earth, Environmental and Planetary Sciences
BSc (1962) University of Assiut, Egypt; MS (1965), PhD (1967) Washington University

Biswal, Shibani Lisa, 2006. Associate Professor of Chemical and Biomolecular Engineering and of Materials Science and NanoEngineering, Associate Department Chair of Chemical & Biomolecular Engineering

Blackburn, James B., 1981. Professor in the Practice of Environmental Law
BA (1969), JD (1972) University of Texas–Austin; MS (1974) Rice University

Blanch, Joakim O., 2010. Adjunct Associate Professor of Computational and Applied Mathematics

Blättler, Damian, 2013. Assistant Professor of Music Theory

Blumenthal-Barby, Martin, 2009. Associate Professor of German Studies
MA ,MPhil (2006), PhD (2008) Yale University

Bogiano, Aymara, 2015. Lecturer of Spanish
BA (1982), MA (1987) Ohio State University

Boles, John B., 1981. William Pettus Hobby Professor of History, Associate of Will Rice College
BA (1965) Rice University; PhD (1969) University of Virginia

Bondos, Sarah, 2004. Adjunct Assistant Professor of Biochemistry and Cell Biology

Bongmba, Elias K., 1995. Harry and Hazel Chavanne Professor of Christian Theology, Professor of Religion, Associate of Wiess College

Borik, Aladin, 1997. Adjunct Professor of Mechanical Engineering

Bosak, Sharad, 2003. Associate Professor of Marketing

Boshenitzan, Michael, 1982. Professor of Mathematics

**Bottero, Jean-Yves**, 1996. Adjunct Professor of Civil and Environmental Engineering
Docteur d’Etat es Sciences Physiques (1979) Université de Nancy, France

**Bowdoin, Natasha**, 2013. Assistant Professor in Visual and Dramatic Arts
BA (2003) Brandeis University; MFA (2007) Tyler School of Art

**Boyer, Dominic C.**, 2009. Professor of Anthropology

**Boylan, Richard Thomas**, 2005. Professor of Economics

**Braam, Janet**, 1990. Professor of Biochemistry and Cell Biology and Department Chair of BioSciences
BS (1980) Southern Illinois University; PhD (1985) Sloan-Kettering Division of Cornell Graduate School of Medical Sciences

**Brace, Paul**, 1996. Clarence L. Carter Professor of Political Science, Magister of Hanszen College

**Bradford, Gwendolyn M.**, 2010. Associate Professor of Philosophy

**Bradshaw, Stephen J.**, 2010. Associate Professor of Physics and Astronomy

**Brake, Matthew**, 2016. Assistant Professor of Mechanical Engineering

**Brandt, Anthony K.**, 1998. Professor of Composition and Theory

**Bratter, Jenifer L.**, 2006. Associate Professor of Sociology

**Breikjern, Heather**, 2010. Lecturer of Theatre

**Brennan, Marcia**, 2001. Professor of Religion and Art History, Faculty Fellow at Center for Teaching Excellence

**Brinkley, Douglas G.**, 2007. Professor of History

**Brody, Baruch**, 1975. Andrew W. Mellon Professor of Humanities, Professor of Philosophy
BA (1962) Brooklyn College; MA (1965), PhD (1967) Princeton University

**Broker, Karin L.**, 1980. Professor of Visual Arts
BFA (1972) University of Iowa; MFA (1980) University of Wisconsin–Madison

**Brooks, Philip R.**, 1964. Professor of Chemistry
BS (1960) California Institute of Technology; PhD (1964) University of California–Berkeley

BA (1969), MA (1972) Texas Tech University; PhD (1977) University of Pennsylvania

**Brown, James N.**, 1992. Professor of Economics
BA (1973) University of Redlands; MA (1975), PhD (1980) University of Chicago

**Brown, Richard**, 1984. Professor of Percussion, Chair of Percussion and Harp
BME (1969) Temple University; MMus (1971) Catholic University of America

**Brown, Tony N.**, 2016. Professor of Sociology

**Browning, Logan D.**, 1991. Professor of the Practice; Publisher, Executive Editor, SEL Studies in English Literature, 1500–1900
BA (1977) University of the South; MA (1980) Oxford University; PhD (1999) University of North Carolina–Chapel Hill

**Buchman, Rachel**, 2005. Lecturer of Music
BA (1978) Vassar College

**Butler, Alexander W.**, 2009. Professor of Finance

**Butler, Barbara**, 2013. Professor of Trumpet and Director of Artist Diploma Program
BMus (1974) Northwestern University

**Buyse, Leone**, 1997. Joseph and Ida Kirkland Mullen Professor of Flute, Chair of Woodwinds

**Byrd, Alexander X.**, 2001. Associate Professor of History

**Byrne, John H.**, 1994. Adjunct Professor of Psychology and Electrical and Computer Engineering
BS (1968), MA (1970), PhD (1973) New York University School of Engineering

**Byrne, Michael D.**, 1999. Professor of Psychology

**Calabrese, John**, 2013. G.C. Evans Instructor of Mathematics

**Caldwell, Peter C.**, 1994. Samuel G. McCann Professor of History, Department Chair of History

**Calvi, Rossella**, 2016. Assistant Professor of Economics
Campana, Jr., Joseph A., 2006. Alan Dugald McKillop Chair in English, Associate Professor of English Literature

Cannady, William Tillman, 1964. Professor of Architecture
BArch (1961) University of California–Berkeley; MArch (1962) Harvard University

Caprette, David R., 1992. Lecturer of Biochemistry and Cell Biology
BS (1974) Case Western Reserve University; MS (1979), PhD (1982) Cleveland State University

Carroll, Royce A., 2007. Associate Professor of Political Science

Carson, Daniel D., 2009. Schlumberger Chair of Advanced Studies and Research, Professor of Biochemistry and Cell Biology
BS (1975) University of Pennsylvania; PhD (1979) Temple University

Carter, Richard, 1997. Adjunct Professor of Computational and Applied Mathematics
BS (1979) Mississippi State University; PhD (1986) Rice University

Cartwright Jr, Robert S., 1980. Professor of Computer Science

BA (1969) Rice University; MFA (1971) California Institute of the Arts; BArch (1972) Rice University

Cates, Mary Susan, 2003. Lecturer of Biochemistry and Cell Biology

Cavallaro, Joseph R., 1988. Professor of Electrical and Computer Engineering and Computer Science

Chaguine, Petr, 2005. Assistant Research Professor of Physics and Astronomy
MS (1982) Institute for Physics and Technology, Moscow PhD (1991) Institute for High Energy Physics, Russia

Chambers, Gregory, 2017. Assistant Professor of Mathematics
BS, MS (2009), PhD (2014) University of Toronto

Chan, Anthony A., 1993. Professor of Physics and Astronomy

Chan, Jesse, 2013. Assistant Professor of Computational and Applied Mathematics
BA (2008) Rice University; PhD (2013) University of Texas–Austin

Chang, Michelle, 2017. Assistant Professor of Architecture

Chang-Diaz, Franklin R., 1998. Adjunct Professor of Physics and Astronomy
BS (1973) University of Connecticut; PhD (1977) Massachusetts Institute of Technology

Channing, Kathleen, 2018. Dean of the School of Humanities, Andrew W. Mellon Professor of History

Chapman, Walter G., 1990. William W. Akers Professor of Chemical and Biomolecular Engineering, Associate Dean for Energy in the George R. Brown School of Engineering

Chappell, James, 2017. Assistant Professor of BioSciences
BS (2008), PhD (2013) Imperial College, London

Chaudhuri, Swarat, 2011. Associate Professor of Computer Science

Chaudry, Divya, 2016. Lecturer of Hindi

Chavez, Sergio, 2010. Assistant Professor of Sociology

Chen, Ang, 2017. Assistant Professor of Computer Science
BEng (2009) Wuhan University; PhD (2017) University of Pennsylvania

Chen, Wei, 2005. Adjunct Professor of Civil and Environmental Engineering
BS (1992) Nankai University, Tianjin, China; MS (1997), PhD (2000) Rice University

Chiu, Wah, 2004. Adjunct Professor of Computer Science
BA (1969), PhD (1975) University of California–Berkeley

Cibor, Joseph, 2001. Adjunct Professor of the Practice in Civil Engineering Management
BS (1976), MS (1978) Purdue University

Citino, Nathan, 2015. Associate Professor of History

Ciufolini, Marco A., 2000. Adjunct Professor of Chemistry
BS (1978) Spring Hill College; PhD (1981) University of Michigan

Clark, Barbara, Associate Professor of Voice

 Clementi, Cecilia, 2001. Wiess Career Development Chair, Professor of Chemistry and of Chemical and Biomolecular Engineering

Clements, Niki, 2014. Watt and Lilly Jackson Assistant Professor of Biblical Studies, Assistant Professor of Religion
Cohën, Daniel, 2006. Associate Professor of Civil and Environmental Engineering  

Cohën, Dinah A., 2009. Assistant Professor of Marketing  
MA, MS (1999) Ulyanovsk State University, Russia; PhD (2009) Duke University

Cohen, G. Daniel, 2003. Samuel W. and Goldye Marian Spain Associate Professor of Jewish Studies, Associate of McMurtry College  

Cokar, Marya, 2016. Lecturer of Chemical and Biomolecular Engineering  
BS (2009), PhD (2013) University of Calgary

Colman, Scott, 2010. Assistant Professor of Architecture  

Colopy, Andrew, 2014. Assistant Professor of Architecture  

Comer, Krista, 1998. Professor of English, Magister of Brown College  

Conen, Michael, 2015. Instructor of Physics and Astronomy  
BA, BS (2003) Truman State University; PhD (2014) Texas A&M University

Connelly, Brian, 1984. Artist Teacher of Piano and Director of Piano Chamber Music and Accompanying Program  
BMus (1980), MMus (1983) University of Michigan

Cook, David, 2001. Associate Professor of Religion, Associate of Brown College  

Cooper, Keith D., 1990. L. John and Ann H. Doerr Chair in Computational Engineering, Professor of Computer Science, Professor of Electrical and Computer Engineering  
BS (1978), MA (1982), PhD (1983) Rice University

Cordero, Zachary, 2016. Assistant Professor of Material Science and NanoEngineering  
BSc (2010), PhD (2015) Massachusetts Institute of Technology

Cornwell, John M., 2007. Associate Vice President for Institutional Effectiveness, Adjunct Professor of Psychology  
BA (1977) Capital University; MS (1982) Georgia Institute of Technology; PhD (1987) University of Tennessee

Costello, Leo, 2005. Associate Professor of Art History  

Cowan, Kenneth, 2012. Associate Professor of Organ  

Cox, Alan L., 1991. Professor of Computer Science and of Electrical and Computer Engineering  

Cox, Dennis, 1992. Professor of Statistics  
BA (1972) University of Colorado; MS (1976) University of Denver; PhD (1980) University of Washington

Cox, Kenneth R., 2000. Professor in the Practice of Chemical and Biomolecular Engineering  
BS (1974) Ohio State University; MS (1977), PhD (1979) University of Illinois

Cran, Alan David, 2010. Assistant Professor of Finance  
BS (2002), BA (2002) Trinity University; PhD (2010) University of Texas–Austin

Crawford, Margaret, 2013. Lecturer of Education  
BS (1967) Northwestern University; MEd (1989) University of St. Thomas

Crear, Shelah, 2013. Lecturer of Education  
BA (1998), MEd (2001) University of Texas–Austin; PhD (2013) Texas A&M University

Creek, Jefferson L., 2007. Adjunct Professor of Chemical and Biomolecular Engineering  
BS (1967) Middle Tennessee State University; MS (1969), PhD (1975) Southern Illinois University–Carbondale

Crossey, Diane, 2015. Professor in the Practice of Sport Management  
BBA (1992), MS (1994) University of Massachusetts

Crotty, Kevin, 2012. Assistant Professor of Finance  

Crowell, Steven G., 1983. Joseph and Joanna Nazro Mullen Professor of Philosophy, Professor of Philosophy  

Cruz, Miguel, 2007. Adjunct Assistant Professor of Bioengineering  
BS (1983) University of Puerto Rico; PhD (1989) University of Puerto Rico–School of Medicine

Cummins-Muñoz, Elizabeth, 2015. Lecturer of the Program in Writing and Communication  

Cunha Flávio, 2014. Professor of Economics  

Cuthbertson, Gilbert Morris, 1963. Professor of Political Science  
BA (1959) University of Kansas; PhD (1963) Harvard University

Cutler, Scott E., 2001. Professor in the Practice of Computer Technology  
BS (1973), MS (1973), PhD (1976) Massachusetts Institute of Technology

Dabak, Anand, 2003. Adjunct Associate Professor of Electrical and Computer Engineering  

Dabney, James B., 2000. Adjunct Professor of Mechanical Engineering  
Dacso, Clifford C., 2010. Adjunct Professor of Electrical and Computer Engineering
BA (1972), MA (1972) University of Pennsylvania; MD (1975) Baylor College of Medicine; MPH (1980) University of Texas School of Public Health; MBA (1990) Pepperdine University

Dai, Pengcheng, 2013. Professor of Physics and Astronomy
dabney
BS (1984) Zhenzhou University, PhD (1993) University of Missouri

Damanik, David, 2006. Robert L. Moody, Sr. Chair of Mathematics, Professor of Mathematics

Dane, Erik, 2007. Associate Professor of Management

Dannemiller, James L., 2001. Associate Professor of English

Dasgupta, Rajdeep, 2008. Professor of Earth, Environmental and Planetary Sciences
BSc (1998), MSc (2000) Jadavpur University, India; PhD (2006) University of Minnesota

DeConick, April D., 2006. Isla Carroll Turner and Percy Turner Professor of Religion, Department Chair of Religion

Deem, Michael W., 2002. John W. Cox Professor of Biochemical and Genetic Engineering; Professor of Physics and Astronomy; Director of Graduate Program in Systems, Synthetic, and Physical Biology
BS (1991) California Institute of Technology; PhD (1994) University of California–Berkeley

de Hoop, Maarten V., 2015. Simons Chair in Computational and Applied Mathematics and Earth, Environmental and Planetary Sciences, Professor of Computational and Applied Mathematics, Professor of Earth, Environmental and Planetary Sciences

DeAngelis, David, 2012. Assistant Professor of Finance

Denny, Justin T., 2010. Associate Professor of Sociology

Denny, Bryan T., 2016. Assistant Professor of Psychology

DerHovsepyan, Joan, 2001. Artist Teacher of Viola
BM (1991), MM (1994) Eastman School of Music

Dermont, Amber, 2013. Gladys Louise Fox Associate Professor of English

Derrick, Scott S., 1990. Associate Professor of English
BA (1975) Albright College; MA (1978) University of Chicago; PhD (1987) University of Pennsylvania

DesRoches, Reginald, 2017. William and Stephanie Sick Dean of the George R. Brown School of Engineering and Professor of Civil and Environmental Engineering
BS (1990), MS, PhD (1998) University of California–Berkeley

Dholakia, Utpal, 2001. George R. Brown Chair of Marketing and Professor of Management

Diamond, John, 2006. Adjunct Assistant Professor of Economics and Lecturer of Economics

Diaz Montalvo, Thais, 2017. Lecturer of Spanish

Dib, Lina, 2014. Lecturer of the Program in Writing and Communication

Dick, Christopher H., 2005. Adjunct Professor of Electrical and Computer Engineering
BSci (1984), PhD (1996) La Trobe University, Melbourne, Australia

Dickens, Gerald R., 2001. Professor of Earth, Environmental and Planetary Sciences
BS (1989) University of California, Davis; MS (1993), PhD (1996) University of Michigan

Dickinson, Debra, 1993. Artist Teacher of Opera Studies
BS (1975) Northwestern University; MA (1991) Hunter College

Dickinson, Mary, 2006. Adjunct Professor of Bioengineering

Dickman, J. David, 2012. Adjunct Professor of Psychology, Director of the Neuroscience Program
BA (1979) University of Oklahoma; MS, PhD (1985) University of Wyoming

Diedel, Roberta M., 1985. Adjunct Assistant Professor and Lecturer of Psychology
BA (1976) Wesleyan University; PhD (1989) Boston University

Diehl, Michael, 2005. Associate Professor of Bioengineering and of Chemistry

Diep, Cassandra, 2017. Lecturer of Kinesiology
BA (2007) Rice University; MS (2009), PhD (2012) Texas A&M University

Disch, James G., 1973. Associate Professor of Sport Management
BS (1969), MEd (1970) University of Houston; PED (1973) Indiana University

Djerejian, Edward P., 1994. Edward A. and Hermena Hancock Kelly University Chair for Senior Scholars, Janice and Robert McNair Director of the James A. Baker III Institute for Public Policy
BS (1960), Doctor of Humanities (Hon) (1992) Georgetown University
Do, Kim-Anh. 1999. Adjunct Professor of Statistics  
BS (1983) Queensland University; MS (1985), PhD (1990) Stanford University

Dobelman, John. 2008. Professor in the Practice, Director of Professional  
Master’s Program  

Dodds, Stanley A. 1977. Associate Professor of Physics and Astronomy,  
Associate of Wiess College BS (1968) Harvey Mudd College; PhD (1975)  
Cornell University

Doerr, Harold K. 2004. Adjunct Assistant Professor of Psychology  
BA (1979) Rutgers University; MD (1987) University of Texas Health  
Science Center

Domínguez Da Silva, Daniel. 2017. Assistant Professor of History  
BA (2004), MA (2009), PhD (2011) Emory University

Dongarra, Jack. 1988. Adjunct Professor of Computer Science  
BS (1972) Chicago State University; MS (1973) Illinois Institute of  
Technology; PhD (1980) University of New Mexico

Professor, Professor of English  

Dove, Charles. 2001. Professor in the Practice of Film, Director of Rice  
Cinema  
University

Dow, David R. 2012. Rorschach Visiting Professor in History  
School

Dravis, Jeffrey, J. 1987. Adjunct Professor of Earth, Environmental and  
Planetary Sciences  
BS (1971) St. Mary's University; MS (1977) University of Miami; PhD (1980)  
Rice University

Drezek, Rebekah Anna. 2002. Professor of Bioengineering and of  
Electrical and Computer Engineering  
BSE (1996) Duke University; PhD (2001) University of Texas–Austin

Droxler, André W. 1987. Professor of Earth, Environmental and Planetary  
Sciences  
MS (1978) University of Neuchatel; PhD (1984) University of Miami

Du, Rui-Rui. 2004. Professor of Physics, Astronomy, and Nanoscale  
Physics  
BS (1982) Fudan University; PhD (1990) University of Illinois

Duarte, Jeffrey. 2008. Gerald D. Hines Associate Professor of Real  
State Finance  
BS (1991) Eng. Instituto Tecnologico de Aeronautica, Brazil; MBA (2000),  
PhD (2000) University of Chicago

Dudey, Marc Peter. 1990. Associate Professor of Economics  
BA (1980) University of Wisconsin at Madison; MS (1986) University of  
Southern California; PhD (1984) Princeton University

Dueñas-Osorio, Leonardo. 2006. Associate Professor of Civil and  
Environmental Engineering  
Universidad de los Andes, Bogotá, Colombia; MS (2000) Pontificia

Ellenzweig, Sarah, 2000. Associate Professor of English

Elliott, James, 2014. Professor of Sociology in the School of Social Sciences

Ellison, Paul V. H., 1975. Lynette S. Autrey Professor of Double Bass, Chair of Strings
BME (1965) Eastern New Mexico University; MM (1966) Northwestern University

Emami, Maryam, 2010. Lecturer of French

Emden, Christian, 2003. Professor of German Studies

Engel, Paul S., 1970. Professor of Chemistry
BS (1964) University of California at Los Angeles; PhD (1968) Harvard University

Engelhardt Jr., Hugo Tristram, 1982. Professor of Philosophy
BA (1963), PhD (1969) University of Texas–Austin; MD (1972) Tulane University School of Medicine

Englebretson, Robert, 2000. Associate Professor of Linguistics, Interim Department Chair of Linguistics

Ensor, Katherine Bennett, 1987. Professor of Statistics

Eraslan, Hülya, 2014. Ralph S. O’Connor Chair in Economics, Professor of Economics

Ernst, Philip A., 2014. Assistant Professor of Statistics

Esarey, Justin, 2012. Associate Professor of Political Science

Etropolksi, Anastassia, 2016. RTG Lovett Instructor of Mathematics
BA (2011) Bard College; PhD (2016) Emory University

Fagundes, Christopher P., 2015. Assistant Professor of Psychology
BA (2005) University of California, Davis; MS (2008), PhD (2010) University of Utah

Fang, Songying, 2009. Associate Professor of Political Science

Fanger, Claire, 2009. Associate Professor of Religion
BA (1979) Reed College; MA (1983) Boston University; MA (1987), PhD (1994) University of Toronto

Farahzadeh, Rouollah, 2015. Adjunct Associate Professor of Chemical and Biomolecular Engineering

Faujion, James D., 1993. Professor of Anthropology, Radoslav A. Tsanoff Chair of Public Affairs in the Department of Anthropology, Associate of Jones College

Fernández, Esther, 2015. Assistant Professor of Spanish, Portuguese and Latin American Studies
Dottore in Matematica (1985) Università di Padova, Italy; MS (1987), PhD (1989) University of California–Berkeley

Farnsworth, Heber, 2016. Visiting Assistant Professor of Finance & Economics
BA (1992) Brigham Young University; PhD (1997) University of Washington

Ferris, David, 1998. Associate Professor of Musicology

Festa, Elizabeth A., 2007. Lecturer of the Program in Writing and Communication

Fette, Julie, 2005. Associate Professor of French Studies

Finley, Dawn, 2001. Associate Professor of Architecture

Fischer, Jeannie K., 1992. Artist Teacher of Piano and Collaborative Skills

Fischer, Norman, 1992. Herbert S. Autrey Professor of Cello
BMus (1971) Oberlin College

Fischer-Baum, Simon J., 2012. Assistant Professor of Psychology

Fisher, Ronald E., 2002. Adjunct Assistant Professor of Psychology
BA (1982) Brandeis University; PhD (1990), MD (1991) Baylor College of Medicine

Fleck, Jonathan, 2016. Lecturer of Spanish and Portuguese
BA (2008) University of Chicago; PhD (2016) University of Texas–Austin

Fleischer, Alan, 2003. Senior Lecturer of Architecture
BA (1973) Oklahoma State University; JD (1976) University of Oklahoma

Fleisher, Jeffrey B., 2007. Associate Professor of Anthropology
Gao, Xue, BArch (1969) Louisiana State University

Furr, James, MS (2010), PhD (2014) University of Glasgow

Fullarton, Neil, BS (1971), MS (1973) Nagoya University; PhD (1977) Harvard University

Fukuyama, Tohru, MBA (2002) Miami University

University; MA (1999) Beijing University of Aeronautics and Astronautics;

Fu, Liang, PhD (2014) Texas A&M University

Gao, Zhiyong, BS (2005), MS (2007) Tianjin University; PhD (2013) University of California–Los Angeles

Gao, Zhiyong, 1986. Associate Professor of Mathematics

BA (1979) Fudan University; PhD (1984) State University of New York–Stony Brook

Geise, Reto, 2011. Wortham Assistant Professor of Architecture

MArch (2002), PhD (2010) ETH Zurich

George, Jennifer M., 1999. Mary Gibbs Jones Professor of Management,

Professor of Psychology

Georges, Eugenia, 1986. Professor of Anthropology, Department Chair of Anthropology

Geurts, Franciscus Johannes Maria, 2008. Associate Professor of Physics and Astronomy

Geyer, Charles, 2013. Professor of Trumpet, Chair of Brass

B.Music Education, Northwestern University, MM (1969) University of Maryland-College Park

Ghoreb, Fathi, 1994. Professor of Mechanical Engineering and Bioengineering

Ghosn, Bilal, 2014. Assistant Professor of Physics

Gilbertson, Michelle, 2009. Lecturer of Chemistry

BS (1990) Valparaiso University; MS (1992), PhD (1994) Northwestern University

Gilberti, M. Cristina, 2014. Lecturer of Italian

MA (2000) Universita’ degli Studi di Bari, Italy

Gillenwater, Ann M., 2006. Adjunct Professor of Bioengineering

BA (1983) Brown University; MD (1987) University of Virginia–Charlottesville

Gillman, Adrianna, 2014. Assistant Professor of Computational and Applied Mathematics

Glassberg, Jeffrey, 2007. Adjunct Professor of Ecology and Evolutionary Biology

BS (1969) Tufts University; PhD (1976) Rice University; JD (1993) Columbia University School of Law

AB (1975) University of Michigan; PhD (1981) University of California–Berkeley
Glowinski, Roland, 1986. Adjunct Professor of Computational and Applied Mathematics
Ecole Polytechnique (1958); Ecole Nationale Superieue das Telecommunications; PhD (1970) University of Paris

Goldman, Ronald N., 1990. Professor of Computer Science
BS (1968) Massachusetts Institute of Technology; MA, PhD (1973) Johns Hopkins University

Goldsmith, Kenneth, 1991. Professor of Violin
BM (1966) George Peabody College for Teachers; MA (1968) Leland Stanford University

Gonnermann, Helge, 2009. Associate Professor of Earth, Environmental and Planetary Sciences

Gonzalez, Ramon, 2005. Professor of Chemical and Biomolecular Engineering, Professor of Bioengineering
BS (1993) Central University of Las Villas, Cuba; MS (1999) Catholic University of Valparaiso, Chile; PhD (2001) University of Chile

González-Stephan, Beatriz, 2001. Lee Hage Jamail Chair of Latin American Literature, Spanish, Portuguese and Latin American Studies

Goodman, Wayne, 2017. Adjunct Professor of Electrical and Computer Engineering
BS (1974) Colombia University; MD (1981) Boston University School of Medicine; PhD (1986) Yale University

BA (1975) University of California–Santa Cruz; MS (1977), PhD (1979) Stanford University

Gorman, Bridget K., 2002. Professor of Sociology, Department Chair of Sociology, Magister of Will Rice College

Gottschalk, Arthur W., 1977. Professor of Composition and Theory

Grande-Allen, Kathryn Jane, 2003. Professor of Bioengineering, Department Chair of Bioengineering

Grandy, Richard E., 1980. Carolyn and Fred McManis Professor of Philosophy, Professor of Philosophy
BA (1963) University of Pittsburgh; MA (1965), PhD (1968) Princeton University

Greig, Nancy, 1991. Adjunct Assistant Professor of Ecology and Evolutionary Biology
BA (1980), PhD (1991) University of Texas–Austin

Greiner, John, 1997. Lecturer of Computer Science

Greitzer, Mary, 2013. Lecturer of Music

Grenader, Nonya S., 1995. Professor in the Practice of Architecture
BArch (1976) University of Texas; MArch (1994) Rice University

Griffin, Robert, J., 2008. Professor of Civil and Environmental Engineering, Department Chair of Civil and Environmental Engineering

Grullon, Gustavo, 1998. Jesse H. Jones Professor of Finance

Guerra, Rudy, 2001. Professor of Statistics

Guindani, Michele, 2011. Adjunct Professor of Statistics
BS (2001), MS (2001), PhD (2005) Universita Commerciale Luigi Bocconi

Gürcanlı, Özge, 2012. Lecturer of Psychology

Gurewitz, Omer, 2012. Adjunct Lecturer of Electrical and Computer Engineering

Gustin, Michael C., 1988. Professor of Biochemistry and Cell Biology
AB (1974) Johns Hopkins University; PhD (1981) Yale University

Guthrie Shimizu, Sayuri, 2014. Dunlevie Family Chair in History and Professor of History

Gutiérrez, Manuel, 2010. Assistant Professor of Spanish, Portuguese and Latin American Studies

Hafner, Jason H., 2001. Professor of Physics and Astronomy and of Chemistry, Magister of Jones College

Halas, Naomi J., 1989. Stanley C. Moore Professor of Electrical and Computer Engineering, Professor of Chemistry, of Bioengineering, of Physics and Astronomy, and of Materials Science and NanoEngineering

Halen, Eric, 2008. Artist Teacher of Violin Orchestral Repertoire
BA (1977) Central Missouri State University, MM (1979) University of Illinois

Hall, Randal L., 2008. Associate Professor of History

Hamm, Keith Edward, 1988. Thomas Cook and Mary Elizabeth Edwards Memorial Chair in American Government, Professor of Political Science
AB (1969) Franklin and Marshall College; MA (1972) Florida Atlantic University; PhD (1977) University of Wisconsin–Milwaukee

Hand, Paul, 2014. Assistant Professor of Computational and Applied Mathematics

Hefner, Ginella, 2009. Associate Professor of Spanish, Portuguese and Latin American Studies, Associate of Duncan College UBA (1997) Universidad de Buenos Aires; PhD (2007) Yale University

Hennessy, Rosemary, 2006. L.V. Fawr Chair in Humanities, Professor of English Literature, Department Chair of English Director of the Center for the Study of Women, Gender, and Sexuality BA (1972) University of Pennsylvania; MA (1976) Temple University; PhD (1990) Syracuse University

Higgs, Ill, C. Fred, 2016. Interim Vice Provost for Academic Affairs, John and Ann Doerr Professor in Mechanical Engineering, Professor of Mechanical Engineering, Faculty Director of RCEL BS (1995) Tennesse State University, MS (1997), PhD (2001) Rensselaer Polytechnic University

Hill, N. Ross, 2010. Adjunct Professor of Earth, Environmental and Planetary Sciences BS (1971) Louisiana State University; MS (1973) University of New Orleans; PhD (1978) University of Virginia

Hobby, William P., 1989. Radoslav A. Tsanoff Professor of Public Affairs
Huang, Xuelin, 2008. Adjunct Associate Professor of Statistics
BA (1953) Rice Institute

Hochberg, Scott, 2013. Lecturer of Education
BA (1975), MEE (1976) Rice University

Hochberg, Yael, 2013. Ralph S. O'Connor Professor in Finance and Entrepreneurship

Hoeffig, Desmond, 2008. Professor of Cello
BM (1982), MM (1983) The Juilliard School of Music

Hohl, Detlef, 2016. Adjunct Professor of Computational and Applied Mathematics
MS (1985) Technical University Munich, Germany; PhD (1989); Habilitation (1997) Technical University Aachen, Germany

Hopkins, John, 2013. Assistant Professor of Art History and Classical and European Studies
BS (2001) Northwestern University, MA (2004), PhD (2010) University of Texas–Austin

Hotez, Peter Jay, 2011. Adjunct Professor of Bioengineering

Hou, Jerry, 2014. Associate Conductor

Houchens, Brent C., 2005. Adjunct Assistant Professor of Materials Science and NanoEngineering

Houlik-Ritchey, Emily, 2015. Assistant Professor of English

House, Waylon V., 1986. Adjunct Associate Professor of Chemical and Biomolecular Engineering

Howe, A. Cymene, 2009. Associate Professor of Anthropology

Huang, Huey W., 1973. Sam and Helen Worden Chair of Physics and Astronomy
BS (1962) National Taiwan University; PhD (1967) Cornell University

Huang, Shih-Shan, Susan, 2006. Associate Professor of Art History
BA (1991) National Taiwan University; MA (1995) National University of Taiwan; PhD( 2002) Yale University

Huang, Wen, 2016. Pfeiffer Postdoctoral Instructor of Computational and Applied Mathematics
BS (2007) University of Science and Technology of China; MS (2011), PhD (2014) Florida State University

Huang, Xuelin, 2008. Adjunct Associate Professor of Statistics

BS (1994) Peking University, China; MS (1997) Texas A&M University; PhD (2002) University of Michigan

Huberman, Brian Michael, 1975. Associate Professor of Visual Arts
MFA Equivalent (1974) National Film School of Great Britain

Hudspeth, C. M., 1947. Lecturer of Political Science
BA (1940) Rice Institute; JD (1946) University of Texas–Austin

Hughes, Gordon, 2008. Mellon Associate Professor of Art History

Hughes, Thomas J. R., 2002. Adjunct Professor of Mechanical Engineering

Hulet, Randall G., 1987. Fayez Sarofim Professor of Physics and Astronomy
BS (1978) Stanford University; PhD (1984) Massachusetts Institute of Technology

Hunter, Allison, 2012. Artist in Residence in Visual and Dramatic Arts

Hutchinson, John S., 1983. Dean of Undergraduates, Professor of Chemistry
BS (1977), PhD (1981) University of Texas–Austin

Iammarino, Nicholas K., 1978. Professor of Kinesiology, Department Chair of Kinesiology
BS (1973) University of Dayton; MEd (1975) University of Toledo; PhD (1978) Ohio State University

Igoshin, Oleg A., 2006. Associate Professor of Bioengineering

Irish, Maya Soifer, 2010. Assistant Professor of History

Isella, Andrea, 2014. Assistant Professor of Physics and Astronomy
MS (2003), PhD (2006) Università degli Studi di Milano

Jaber, Thomas I., 1988. Professor of Music, Director of Choral Ensembles

Jackson, Pierre D., 1996. Professor of Composition and Theory

Jeaneret, P. Richard "Dick," 2003. Adjunct Professor of Psychology
BA (1962) University of Virginia; MA (1963) University of Florida; PhD (1969) Purdue University

Jermaine, Christopher M., 2009. Professor of Computer Science

Jimenez, Carlos, 1997. Professor of Architecture
John, Randy. 2015. Lecturer of Materials Science and NanoEngineering. BS (1976), MS (1977), PhD (1979) Ohio State University

Juntti, Markku, 2007. Adjunct Professor of Electrical and Computer Engineering. MS (1993), PhD (1997) University of Oulu, Finland

Kamins, Benjamin C., 1987. Professor of Bassoon

Keefe, Christina, 2008. Professor in the Practice in Theatre, Director of the Theatre Program. BFA (1979) New York University; MFA (1994) University of South Carolina

Kiang, Ching-Hwa, 2002. Associate Professor of Physics and Astronomy. BS (1987) National Taiwan University; PhD (1995) California Institute of Technology

Kieffer, Alexandra, 2015. Assistant Professor of Musicology. BA Grinnell College; MA (2009), MPhil (2011), PhD (2014) Yale University

Kim, Daniel, 2008. Adjunct Professor of Electrical and Computer Engineering. BS (1985) University of Oklahoma; MD (1989) Tulane University School of Medicine

Kimmel, Marek, 1990. Professor of Statistics
MS (1977), PhD (1980) Silesian Technical University

King, Eden, 2017. Associate Professor of Psychology

King, Stephen, 2003. Lynette S. Autrey Professor of Voice and Chair of Voice

Kincade, Kristi, 2016. Lecturer of Chemistry
BS (1998) University of California–Berkeley; PhD University of Colorado–Boulder

Kirchner, Stefan, 2009. Adjunct Assistant Professor of Physics and Astronomy

Kirienko, Natasha, 2015. Assistant Professor of BioSciences

Kirk, David E., 1982. Associate Professor of Tuba
BM (1982) Juilliard School of Music

Kiselev, Alexander, 2014. Professor of Mathematics
BS (1992) St. Petersburg State University; PhD (1996) California Institute of Technology

Klein, Andrew A., 2014. Lecturer of the Program in Writing and Communication

Klein, Anne C., 1989. Professor of Religion

Kley, Katharina, 2015. Lecturer of German

Klineberg, Stephen L., 1972. Professor of Sociology, Associate of Lovett College

Knepley, Matthew, 2015. Assistant Professor of Computational and Applied Mathematics
BS (1994) Case Western Reserve; MS (1996) University of Minnesota; PhD (2000) Purdue University

Knightly, Edward W., 1996. Professor of Electrical and Computer Engineering and Computer Science, Department Chair of Electrical and Computer Engineering

Kohn, Michael H., 2004. Associate Professor of Ecology and Evolutionary Biology
MSc (1994) University of Munich; PhD (2000) University of California–Los Angeles

Koka, Balaji, 2008. Associate Professor of Strategic Management

Kolomeisky, Anatoly B., 2000. Professor of Chemistry and of Chemical and Biomolecular Engineering

Kong, Yunmi, 2016. Assistant Professor of Economics

Kono, Junichiro, 2000. Professor of Electrical and Computer Engineering, of Physics and Astronomy, and of Materials Science and NanoEngineering
BS (1990), MS (1992) University of Tokyo; PhD (1995) State University of New York–Buffalo

Kortum, Philip T., 2005. Associate Professor of Psychology
BS (1985) University of Nebraska; MS (1990) Northeastern University; PhD (1994) University of Texas–Austin

Kowal, Daniel R., 2017. Assistant Professor of Statistics

Krippal, Jeffrey J., 2002. J. Newton Rayzor Professor of Religion, Associate of Brown College

Krouskop, Mark, 2013. Lecturer of Theater and Theater Production Manager
BA (2002), MFA (2012) University of Houston

Kürti, Lázló, 2015. Associate Professor of Chemistry

LaBove, Shannon, 2013. Lecturer of Forensics

Lairson, David R., 1977. Adjunct Professor of Economics
BA (1970), MA (1971), PhD (1975) University of Kentucky

Lamos, Colleen R., 1989. Associate Professor of English
BA (1978) State University of New York–Binghamton; PhD (1988) University of Pennsylvania

Landes, Christy F., 2009. Professor of Chemistry and of Electrical and Computer Engineering
BS (1998) George Mason University; PhD (2003) Georgia Institute of Technology

Lane, David M., 1977. Associate Professor of Psychology, Statistics, and Management
BA (1971) Clark University; MA (1973) Tufts University; PhD (1977) Tulane University

Lansford, Benjamin, 2014. Professor in the Practice of Accounting

Lapiniski, Lisa, 2014. Assistant Professor of Visual and Dramatic Arts

Larson, Abby, 2015. Lecturer of Management

Lavenda, Richard A., 1987. Professor of Composition and Theory
BA (1977) Dartmouth College; MMus (1979) Rice University; DMA (1983) University of Michigan

Lee, Cin-Ty, 2002. Professor of Earth, Environmental and Planetary Sciences, Department Chair of Earth, Environmental and Planetary Sciences

Leebron, David W., 2004. President and Professor of Political Science
BA (1976) Harvard University; JD (1979) Harvard Law School

Leeds, Brett Ashley, 2001. Professor of Political Science, Department Chair of Political Science
BA (1991), University of North Carolina at Chapel Hill; PhD (1998) Emory University

LeGrand, Thomas, 2003. Associate Professor of Clarinet
BMus (1980) Curtis Institute of Music

Lenardic, Adrian, 1999. Professor of Earth, Environmental and Planetary Sciences
BA (1986) University of Wisconsin; MS (1990), PhD (1995) University of California—Los Angeles

BArch (1968) University of California at Berkeley; MArch (1970) Harvard University

Levander, Alan R., 1984. Carey Croneis Professor of Earth, Environmental and Planetary Sciences
BS (1976) University of South Carolina; MS (1978), PhD (1984) Stanford University

Levander, Caroline F., 2000. Carlson Chair in the School of Humanities, Professor of English, Vice President for Digital Education and Strategic Initiatives

Levin, Harvey S., 2004. Adjunct Professor of Psychology
BA (1967) City University of New York; MA (1971), PhD (1972) University of Iowa

Levine, Herbert, 2012. Karl F. Hasselmann Professor of Bioengineering, Professor of Physics and Astronomy and of Biochemistry and Cell Biology

Levy, Eugene H., 2000. Andrew Hays Buchanan Professor of Physics and Astronomy
AB (1966) Rutgers University; PhD (1971) University of Chicago

Lewis, Steven W., 1996. Professor in the Practice, Research Fellow at the James A. Baker III Institute for Public Policy, Associate Director at the Chao Center for Asian Studies

Li, Haiyang, 2005. Professor of Strategic Management
BA (1991), MA (1994) University of China; PhD (1998) City University of Hong Kong

Li, Hui, 2002. Adjunct Associate Professor of Physics and Astronomy
BS (1990) Beijing University; PhD (1995) Rice University

Li, Meng, 2017. Noah Harding Assistant Professor in Statistics
BS (2010) Sun Yat-sen University, China; PhD (2015) North Carolina State University–Raleigh

Li, Qilin, 2006. Professor of Civil and Environmental Engineering and of Materials Science and NanoEngineering
BE (1995) Tsinghua University, Beijing, China; MS (1999), PhD (2002) University of Illinois–Urbana-Champaign

Li, Siran, 2017. G.C. Evans Instructor of Mathematics

Li, Wei, 2012. Assistant Professor of Physics and Astronomy
BS (2004) University of Science and Technology of China; PhD (2009) Massachusetts Institute of Technology

Liang, Edison P., 1991. Andrew Hays Buchanan Professor of Astrophysics
BA (1967), PhD (1971) University of California—Berkeley

Liberman-Aiden, Erez, 2013. Adjunct Assistant Professor of Computer Science and Computational and Applied Mathematics

Lichtarge, Olivier, 2008. Adjunct Professor of Biochemistry and Cell Biology

Lin, Cho-Liang, 2006. Professor of Violin
BMus (1981) The Juilliard School of Music

Link, Stephan, 2006. Professor of Chemistry, Professor of Electrical and Computer Engineering
MA (1996) Technical University of Braunschweig, Germany; PhD (2000) Georgia Institute of Technology

Little, Stephen H., 2010. Adjunct Associate Professor of Bioengineering
BS (1993) York University, Canada; MD (1997) McMaster University, Canada

Loch-Temzelides, Ted, 2008. Professor of Economics
BA (1988) University of Piraeus, Greece; PhD (1998) University of Minnesota

Loewen, Peter V., 2006. Associate Professor of Musicology
BMus (1987) University of Manitoba; MMus (1990), PhD (2000) University of Southern California

Logan, Jill “Thad,” 1982. Lecturer of English
BA (1973) University of California—Santa Barbara; PhD (1981) Rice University

Loos, Peter, 2014. Professor in the Practice of Materials Science and NanoEngineering
BA (1977); MS (1982), PhD (1986) Rice University

López-Durán, Fabiola, 2011. Assistant Professor of Art History
BA (1987) Universidad de los Andes School of Architecture; PhD (2009) Massachusetts Institute of Technology

Lopez Alonso, Moramay, 2009. Associate Professor of History

Lord, Tom F., 1992. Lecturer of Architecture
BA (1960) Southern Methodist University; MA (1965) Yale University

Lou, Jun, 2005. Professor of Materials Science and NanoEngineering, Associate Department Chair of Materials Science and NanoEngineering

Loveland, Katherine A., 1991. Adjunct Professor of Psychology
BA (1975) University of Virginia; PhD (1980) Cornell University

Ludwig, Joseph A., IV, 2007. Adjunct Assistant Professor of Bioengineering
BBA (1994) University of Iowa College of Business; MD (1998) University of Iowa College of Medicine

Lukic, Milivoje, 2016. Assistant Professor of Mathematics

Lundin, Robert, 2013. Lecturer of Education

Lurie, Susan, 1987. Associate Professor of English

Lwigale, Peter Y., 2008. Associate Professor of Biochemistry and Cell Biology
BS (1994), MS (1997) University of Northern Iowa; PhD (2001) Kansas State University

Ma, Jianpeng, 2000. Professor of Bioengineering, Professor of Biochemistry and Cell Biology
BS (1985) Fudan University P.R. China; PhD (1996) Boston University

Maas, Michael R., 1984. William Gaines Twyman Professor of History, Professor of History and of Classical and European Studies
BA (1973) Cornell University; MA (1975), PhD (1982) University of California–Berkeley

Mackie, Hilary S., 1993. Associate Professor of Classics

MacKintosh, Frederick C., 2016. Abercrombie Professor of Chemical and Biomolecular Engineering, Professor of Physics & Astronomy, and Professor of Chemistry

Mackwell, Stephen J., 2005. Adjunct Professor of Earth, Environmental and Planetary Sciences
BS (1978), MS (1979) University of Canterbury, Christchurch, NZ; PhD (1985) Australian National University

Maher, Lynn M., 2007. Adjunct Professor of Psychology

Makdisi, Ussama, 1997. Arab-American Educational Foundation Professor of Arab Studies in History, Professor of History

Manca, Joseph, 1989. Nina J. Cullinan Professor of Art History, Professor of Art History, Associate of Baker College

Marschall, Melissa J., 2003. Professor of Political Science
BA (1990) Florida State University; MA (1993) Bogazici University; PhD (1998) State University of New York—Stony Brook

Martí-Arbona, Angel A., 2008. Associate Professor of Chemistry, of Bioengineering, and of Materials Science and NanoEngineering

Martin, Lanny W., 2004. Professor of Political Science
BA (1990), MA (1997), PhD (2000) University of Rochester

Martin, Randi C., 1982. Elma Schneider Professor of Psychology
BA (1971) University of Oregon; MS (1977), PhD (1979) Johns Hopkins University

Martinez Calderon, Luz Maria, 2011. Adjunct Associate Professor of Chemistry

Masiello, Caroline A., 2004. Professor of Earth, Environmental and Planetary Sciences

Matsuda, Seiichi P. T., 1995. Dean of Graduate and Postdoctoral Studies, E. Dell Butcher Professor of Chemistry, Professor of Biochemistry and Cell Biology

Matthews, Kathleen Shive, 1972. Stewart Memorial Professor of Biochemistry and Cell Biology
BS (1966) University of Texas–Austin; PhD (1970) University of California–Berkeley

Matzakos, Andreas N., 2003. Adjunct Assistant Professor of Chemical and Biomolecular Engineering
Diploma of Chemical Engineering (1987) National Technical University; PhD (1992) Rice University

Mawlawi, Osama R., 2002. Lecturer of Electrical and Computer Engineering

McDaniel, W. Caleb, 2008. Associate Professor of History, Magister of Duncan College

McDavid, Carol, 2008. Adjunct Assistant Professor of Anthropology

McDevitt, John T., 2008. Brown-Wiess Professor of Bioengineering and Chemistry and of Materials Science and NanoEngineering
McGill, Scott, 2001. Professor of Classics, Department Chair of Classical and European Studies  
BA (1990) Salve Regina College; PhD (2001) Yale University

McGinley, Matthew, 2017. Adjunct Professor of Electrical and Computer Engineering  

McGovern, Patrick J., 2005. Adjunct Associate Professor of Earth, Environmental and Planetary Sciences  
SB (1986), PhD (1996) Massachusetts Institute of Technology

McIntosh, Susan Keech, 1980. Herbert S. Autrey Professor in Anthropology  
BA (1973) University of Pennsylvania; MA (1975) Girton College, Cambridge University; PhD (1979) University of California–Santa Barbara

McNeil, Caroline V., 2008. Laboratory Coordinator, Lecturer of Chemistry  

McNeil, Linda M., 1984. Professor of Education  
BA (1966) Texas Tech University; MA (1968) Baylor University; PhD (1977) University of Wisconsin–Madison

BS (1989) Texas A&M University; PhD (1994) University of Texas Southwestern Medical Center–Dallas

McPhail, S. Morton, 2003. Adjunct Associate Professor of Psychology  
BA (1972) Trinity University; MS (1975), PhD (1978) Colorado State University

Meade, Andrew, J., 1989. Professor of Mechanical Engineering  

Medlock, Kenneth, 2003. Lecturer of Economics and Adjunct Assistant Professor of Economics  
MA (1999), PhD (2000) Rice University

Mellor-Crummey, John M., 1989. Professor of Computer Science and Electrical and Computer Engineering  

Méryényi, Erzsébet, 2000. Research Professor of Statistics  
MSc (1975) Attila Jozsef University, Hungary; PhD (1980) Attila Jozsef University and Central Research Institute for Physics, Hungarian Academy of Sciences

Merlo, Antonio, 2014. Dean of the School of Social Sciences, George A. Peterkin Professor of Economics  

Messmer, David K., 2009. Lecturer of the Program for Writing and Communication  

Metcalf, Alida C., 2009. Harris Masterson Jr. Professor of History, Professor of History  
BA (1976) Smith College; MA (1978), PhD (1983) University of Texas–Austin

Metczer, Michael L., 2001. Adjunct Associate Professor of Chemistry  
BS (1984) University of California–Davis; PhD (1996) Baylor College of Medicine

Michie, Helena, 1990. Agnes Cullen Arnold Professor of Humanities, Professor of English  
BA (1979) Princeton University; PhD (1984) University of Pennsylvania

Mikos, Antonios G., 1991. Louis Calder Professor of Bioengineering and Chemical and Biomolecular Engineering, and of Materials Science and NanoEngineering  
Diploma (1983) Aristotle University of Thessaloniki, Greece; MS (1985), PhD (1988) Purdue University

Miller, Jordan, 2013. Assistant Professor of Bioengineering  

Miller, Thomas E. X., 2009. James and Deborah Godwin Assistant Professor of Ecology and Evolutionary Biology  
BA (2002) Colgate University; PhD (2007) University of Nebraska

Miranda, Marie Lynn, 2015. Howard R. Hughes Provost, Professor of Statistics, Professor of Bioengineering  

Mittal, Vikas, 2011. Adjunct Assistant Professor of Bioengineering and Chemical and Biomolecular Engineering, and of Materials Science and NanoEngineering  
Diploma (1983) Aristotle University of Thessaloniki, Greece; MS (1985), PhD (1988) Purdue University

Morgan, Alexander, 2015. Assistant Professor of Philosophy  

Morgan, Julia K., 1999. Professor of Earth, Environmental and Planetary Sciences, Associate of Hanszen College  

Morgan, T. Clifton, 1987. Albert Thomas Professor of Political Science  
BA (1978) University of Oklahoma; MA (1980), PhD (1986) University of Texas–Austin

Morones, Jessica, 2017. Lecturer of Spanish  
BA (2011) Universidad Autónoma de Tamaulipas; MA University of Massachusetts

Morosan, Emilia, 2007. Professor of Physics and Astronomy, of Chemistry, and of Materials Science and NanoEngineering
BS (1999) A. I. Cuza University; PhD (2005) Iowa State University

**Morris, Jeffrey.** 2011. Adjunct Professor of Statistics

**Morris, Wesley Abram.** 1968. Professor of English

BA (1961), MA (1963) University of Kentucky; PhD (1968) University of Iowa

**Morrison, Donald Ray.** 1988. Professor of Philosophy, Department Chair of Philosophy

**Morton, Scott A.** 2004. Adjunct Associate Professor of Computational and Applied Mathematics

**Morton, Timothy.** 2012. Rita Shea Guffey Chair in English, Professor of English

BA (1989) Oxford University; PhD (1992) Oxford University

**Motowidlo, Stephan J.** 2005. Herbert S. Autrey Professor of Psychology

BA (1969) Yale University; PhD (1976) University of Minnesota

**Muharemovic, Tarik.** 2011. Adjunct Professor in Electrical and Computer Engineering

**Mukamel, Ronin.** 2015. Assistant Professor of Mathematics

**Mulligan, John.** 2015. Lecturer of the Humanities

**Murdoch, Steve H.** 2007. Allyn and Gladys Cline Professor of Sociology

BA (1970) North Dakota State University; MA (1975), PhD (1975) University of Kentucky

**Musher, Lydia.** 2016. Lecturer of Communication

**Nagarajaiah, Satish.** 1999. Professor of Civil and Environmental Engineering and of Materials Science and NanoEngineering

BS (1980) Bangalore University, India; MS (1982) Indian Institute of Science, India; PhD (1990) State University of New York—Buffalo

**Naik, Gururaj.** 2016. Assistant Professor of Electrical and Computer Engineering

**Najafi, Bijan.** 2017. Adjunct Associate Professor of Electrical and Computer Engineering

**Nakhleh, Luay K.** 2004. Professor of Computer Science, Assistant Professor of Biochemistry and Cell Biology, Department Chair of Computer Science

**Naranjo, Patricia.** 2014. Assistant Professor of Accounting

BS (2003) Pontificia Universidad Católica de Chile; PhD (2014) Massachusetts Institute of Technology

**Natelson, Douglas.** 2000. Professor of Physics and Astronomy, of Electrical and Computer Engineering, and of Materials Science and NanoEngineering, Department Chair of Physics and Astronomy

**Neagley, Linda E.** 1993. Associate Professor of Art History

**Nelson-Campbell, Deborah.** 1974. Professor of French

**Nevidomskyy, Andriy.** 2010. Associate Professor of Physics and Astronomy

MSc (2001) Ivan Franko National State University of Lviv; PhD (2005) University of Cambridge

**Newell, Charles J.** 1993. Adjunct Professor of Civil and Environmental Engineering

**Newsome, Mary R.** 2001. Adjunct Assistant Professor of Psychology

**Ng, T. S. Eugene.** 2003. Professor of Computer Science and Electrical and Computer Engineering

**Nichol, Carolyn, A.** 2009. Assistant Research Professor of Chemistry

BS (1984) University of Massachusetts–Amherst; MS (1990), PhD (1992) University of Texas—Austin

**Nicolau, D. Colette.** 2012. Lecturer of Psychology

**Nicolau, K.C.** 2013. Harry C. and Olga K. Wiess Professor of Chemistry

B.Sc. (1969) Bedford College, University of London; PhD (1972) University College, University of London

**Niedzielski, Nancy A.** 1999. Associate Professor of Linguistics, Department Chair of Linguistics, Associate of Lovett College

**Nikonowicz, Edward P.** 1993. Professor of Biochemistry and Cell Biology

BS (1985) St. Louis University; PhD (1990) Purdue University

**Nittouer, Jeffrey.** 2012. Assistant Professor of Earth, Environmental and Planetary Sciences

**Niou, Fenglin.** 2002. Professor of Earth, Environmental and Planetary Sciences

BS (1988) University of Science and Technology of China; MS (1994), PhD (1997) University of Tokyo

**Nixon, Burke.** 2014. Lecturer of the Program in Writing and Communication
A base for building rice university's digital library

BA (2003) University of Texas–Austin; MFA (2011) University of Mississippi

Nordlander, Peter, 1989. Professor of Physics and Astronomy, of Electrical and Computer Engineering, and of Materials Science and NanoEngineering
BA (1977) Swedish Cavalry Officers' School; MS (1980), PhD (1985) Chalmers University of Technology, Gothenburg, Sweden

Novotny, Alma M., 2000. Lecturer of Biochemistry and Cell Biology
BS (1968) Duke University; PhD (1972) Purdue University

Obodaru, Otilia, 2012. Assistant Professor of Management

Oden, Z. Maria, 2004. Full Teaching Professor of Engineering Education in Bioengineering, Director of the Oshman Engineering Design Kitchen

Oesmann, Astrid, 2013. Associate Professor of German

Ogren, Brian, 2012. Assistant Professor of Religion, Associate of Hanszen College

Olgaard, David L., 2007. Adjunct Associate Professor of Earth, Environmental and Planetary Sciences
BS (1978) Cornell University; PhD (1985) Massachusetts Institute of Technology

Olson, John Steven, 1973. Ralph and Dorothy Looney Professor of Biochemistry and Cell Biology
BS (1968) University of Illinois; PhD (1972) Cornell University

O'Malley, Marcia K., 2001. Professor of Mechanical Engineering and Computer Science
BS (1996) Purdue University, MS (1999), PhD (2001) Vanderbilt University

Onuchic, Jose Nelson, 2011. Harry C. and Olga K. Wiess Chair of Physics and Professor of Physics and Astronomy, of Chemistry and of Biochemistry and Cell Biology, Magister of Lovett College

Orcan Ekmecki, Betul, 2011. G.C. Evans Instructor of Mathematics
BS (2003), MS (2005) Bosphorus University; PhD (2010) University of Texas–Austin

Orchard, Michael T., 2001. Professor of Electrical and Computer Engineering

Ortiz, Alexis, 2013. Lecturer of Kinesiology

Ostdiek, Barbara, 1994. Associate Professor of Finance and Statistics, Senior Associate Dean of Degree Programs
BA (1986) University of Nebraska; PhD (1994) Duke University

Ostner, Kirsten, 2002. Gladys Louise Fox Professor of English

O'Sullivan, Elizabeth, 2001. Senior Lecturer of Communications, Director of Communications Program

Ostdiek, Donald, 1995. Policy Studies Director, Associate Dean of Undergraduates

Oswald, Frederick L., 2008. Professor of Psychology
BA (1992) University of Texas–Austin; MA (1998), PhD (1999) University of Minnesota

Otemba, Paul, 2014. Assistant Professor of English

Oubre, Carroll, 1999. Adjunct Professor of Civil and Environmental Engineering
BS (1955) University of Southwestern Louisiana; MS (1956) Ohio State University; PhD (1966) Rice University

Oukaderova, Lida, 2008. Assistant Professor of Art History
BA (1997) Martin-Luther University; MA (1999), PhD (2005) University of Texas–Austin

Overall, John E., 1983. Adjunct Professor of Psychology
BS (1954) Trinity University; MA (1956), PhD (1958) University of Texas–Austin

Ozaki, Naoko, 2015. Lecturer of Japanese
BA (1997) University of Arizona; MS (2005), PhD (2011) Indiana University

Ozoguz, Arzu, 2015. Clinical Assistant Professor of Finance

Padgett, Jamie Ellen, 2007. Associate Professor of Civil and Environmental Engineering

Padley, B. Paul, 1996. Professor of Physics and Astronomy
BS (1981) York University; MS (1984), PhD (1987) University of Toronto

Page, Paula, 1985. Associate Professor of Harp
BMus (1969) Cleveland Institute of Music

Pai, Mallesh, 2016. Assistant Professor of Economics

Palem, Krishna, 2007. Ken and Audrey Kennedy Professor of Computer Science and Electrical and Computer Engineering, Professor of Statistics
MS (1981), PhD (1986) University of Texas

Palzkill, Timothy, 2008. Adjunct Professor of Biochemistry and Cell Biology
BS (1983) Creighton University; PhD (1988) University of Iowa

Panahi, Hesam, 2016. Lecturer of Management
BBA (2005) University of Houston; PhD (2010) University of Houston

Papadakis, Zacharias, 2015. Lecturer of Kinesiology
BSc (1998) University of Thessaloniki, Greece; MS (2005) Sheffield Hallam University

Papadopoulos, Pamela Constantinoou, 2010. Assistant Research Professor in Biosciences

Papageorgiou, Theodora Dorina, 2016. Adjunct Assistant Professor of Electrical and Computer Engineering
BA (1995) University of Georgia; MHSc (1997) Johns Hopkins University; PhD (2006) University of Texas, MD Anderson Cancer Center

Park, Sohyoung, 2005. Artist Teacher of Piano and Piano Pedagogy

Parker, Jon Kimura, 2000. Professor of Piano
BMus, MMus (1981), DMA (1989) Juilliard School of Music

Parsons, Sandra V., 2011. Lecturer of Psychology

Parsons, William B., 1993. Professor of Religion, Associate of Brown College
BA (1979) Brandeis University; MDiv (1982) Yale University; PhD (1993) University of Chicago

Pasquali, Matteo, 1999. Professor of Chemical and Biomolecular Engineering, of Materials Science and NanoEngineering, and of Chemistry, Department Chair of Chemistry
MS (1992) University of Bologna; PhD (1999) University of Minnesota

Pati, Debananda, Adjunct Assistant Professor of Biochemistry and Cell Biology
BSc (1986) Orissa University; MS (1988) University of Buckingham; PhD (1995) University of Calgary

Patel, Ankit, 2017. Assistant Professor of Electrical and Computer Engineering

Pazgal, Amit, 2006. Friedkin Chair in Management, Professor of Marketing
BS (1987), MS (1992) Tel Aviv University; PhD (1997) Northwestern University

Pearson, Deborah A., 1991. Adjunct Professor of Psychology
BA (1979) Wesleyan University; MA (1982), PhD (1986) Rice University

Pellis, Neil R., 1997. Adjunct Professor of Biochemistry and Cell Biology

Peres, S. Camille, 2007. Adjunct Associate Professor of Psychology

Perez, John T., 2013. Adjunct Lecturer of Chemical and Biomolecular Engineering
BS (1996), MBA (2012) Rice University

Perkins, Heidi, 2008. Lecturer of Kinesiology

BS (1985) Missouri State University; MEd (1992), PhD (2006) University of Houston

Perkins Ball, Amanda, 2017. Lecturer of Kinesiology

Perrigne, Isabelle, 2012. Professor of Economics

Petitt, B. Montgomery, 2010. Adjunct Professor of Chemistry
BS (1975), PhD (1980) University of Houston

Peyravan, Leila, 2016. Assistant Professor of Accounting
BA (2004), MBA (2007), PhD (2016) University of Toronto

Phillips, George, 2012. Ralph and Dorothy Looney Professor of Biochemistry and Cell Biology
BA (1974) Rice University; PhD (1976) Rice University

Pimpinelli, Alberto, 2014. Faculty Fellow in Materials Science and NanoEngineering
MS (Laurea, 1986) University of Milan, Italy; PhD (1989) University of Parma, Italy

Pinn, Anthony B., 2004. Agnes Cullen Arnold Professor of Humanities, Professor of Religion, Associate of Wiess College

Pitkow, Xaq, 2012. Assistant Professor of Electrical and Computer Engineering

Pitts, Timothy, 1992. Professor of Double Bass

Pollnitz, Aysha, 2016. Assistant Professor of History

Polo, Sara, 2015. Assistant Professor of Political Science
BA (2009) University of Sassari; MSc (2010), PhD (2015) University of Essex

Pomerantz, James R., 1988. Professor of Psychology
BA (1968) University of Michigan; PhD (1974) Yale University

Pope, Albert H., 1986. Gus Sessions Wortham Professor of Architecture

Porter, Constance Elise, 2011. Visiting Assistant Professor of Marketing

Protasov, Anastasiya, 2017. Lecturer of Computational and Applied Mathematics
BS (2005), MS (2007) Novosibirsk State University; PhD (2016) Rensselaer Polytechnic Institute

Pu, Han, 2003. Professor of Physics and Astronomy

Roof, Judith, 2010. William Shakespeare Chair in English, Professor of English
BA (1972) Ohio State University; MA (1973) University of Toronto; JD (1979), MA (1980), PhD (1984) Ohio State University

Rosenberg, Susan M., 2009. Adjunct Professor of Biochemistry and Cell Biology

Roxby, Peter, 2014. Harry C. and Olga K. Chair of Chemistry, Dean of Natural Sciences
BA (1971) Cornell University; MA (1972), PhD (1978) Harvard University

Rountree, Brian R., 2003. Associate Professor of Accounting

Roux, Robert, 1990. Professor of Piano, Chair of Keyboard
BMus (1970) Loyola University; MMus (1978), DMA (1980) University of Texas–Austin

Rudolf, Volker H. W., 2007. Associate Professor of Ecology and Evolutionary Biology

Rusin, Craig, 2013. Adjunct Assistant Professor of Computational and Applied Mathematics
BSE (2001) Princeton University; PhD (2009) University of Virginia

Rusk, Jerrold G., 2006. Professor of Political Science
BS (1963) Brigham Young University; PhD (1968) University of Michigan

Ryang, Sonia, 2014. T.T. and W.F. Chao Center Professor of Asian Studies, Director of the Chao Center for Asian Studies

Sabharwal, Ashutosh, 2001. Professor of Electrical and Computer Engineering

Salaberry, M. Rafael, 2013. Mary Gibbs Jones Professor of Humanities, Professor of Spanish, Director of the Center for Languages and Intercultural Communication

Salas, Eduardo, 2015. Allyn R. and Gladys M. Cline Chair of Psychology, Professor of Psychology, and Department Chair of Psychology
BA (1978) Florida International University; MS (1980) University of Central Florida; PhD (1984) Old Dominion University

Saltz, Julia, 2014. Assistant Professor of Ecology and Evolutionary Biology

Sams, Clarence F., 1997. Adjunct Assistant Professor of Biochemistry and Cell Biology
BA (1975), PhD (1983) Rice University

Samuels, Danny M., 1981. Professor in the Practice of Architecture
BArch (1971) Rice University

San, Ka-Yiu, 1984. E.D. Butcher Professor of Bioengineering, Professor of Chemical and Biomolecular Engineering

Sanders, Paula A., 1987. Professor of History, Interim Director of the Boniuk Institute

Sanders-Goldsberry, Betty M., 1988. Adjunct Assistant Professor of Psychology

Santos, Hélade, 2014. Lecturer of Spanish and Portuguese

Sarkar, Vivek, 2007. Professor of Computer Science, E.D. Butcher Chair in Engineering

Saterbak, Ann, 2002. Professor in the Practice of Bioengineering
BA (1990) Rice University; PhD (1995) University of Illinois

Sawyer, Dale S., 1988. Professor of Earth, Environmental and Planetary Sciences
BS (1976) Purdue University; PhD (1982) Massachusetts Institute of Technology

Sazynkin, Stanislav, 2005. Associate Research Professor of Physics and Astronomy
BS (1994) Utah State University; MS (1996) Moscow Institute of Physics and Technology; PhD (2000) Utah State University

Schaefer, Andrew J., 2015. Noah Harding Chair and Professor of Computational and Applied Mathematics, Magister of Wiess College

Schaefer, Laura, 2015. Burton J. and Ann M. McMurtry Chair in Engineering, Professor of Mechanical Engineering, Department Chair of Mechanical Engineering, Magister of Wiess College
BA, BS (1995) Rice University; MA (1997), PhD (2000) Georgia Institute of Technology

Schandling, G. Thomas, 2013. Lecturer of Education

Schaum, R. Troy, 2011. Assistant Professor in Architecture
Schell, Rick, 2006. Senior Lecturer of Management  
BA (1971) Eastern Michigan University; MA (1975), PhD (1976) Rice University

Schell, Wendy, 2008. Lecturer of Kinesiology  
BS (1994) Auburn University; BS (1996) Georgia State University; MS (2007) Texas Women's University

Schimmel, Ian, 2011. Lecturer of English  
BA (2005) Tufts University; MFA (2010) University of Houston

Schroeder, Timothy, 2015. Professor of Philosophy  

Schuler, Douglas A., 1992. Associate Professor of Business and Public Policy  
BS (1985) University of California–Berkeley; PhD (1992) University of Minnesota

Schwanauer, Stephen, 2011. Adjunct Professor in Electrical and Computer Engineering  
BS (1981), PhD (1986) Yale University

Schweinberger, Michael, 2013. Assistant Professor of Statistics  
MS (2002), PhD (2007) University of Groningen, the Netherlands

Schwindt-Bayer, Leslie A., 2013. Professor of Political Science  

Scott, David W., 1979. Noah Harding Professor of Statistics  
BA (1972), MA, PhD (1976) Rice University

Scuseria, Gustavo E., 1989. Robert A. Welch Professor of Chemistry, of Physics and Astronomy, and of Materials Science and NanoEngineering  
BS (1979), PhD (1983) University of Buenos Aires

Segatori, Laura, 2007. Associate Professor of Chemical and Biomolecular Engineering, of Bioengineering, and of Biochemistry and Cell Biology  
BS (2000), MS (2000) University of Bologna, Italy; PhD (2005) University of Texas–Austin

Segner III, Edmund, 1996. Professor of the Practice in Civil Engineering Management  
BS Rice University; MA University of Houston

Self, Bethany, 2014. Artist Teacher of Opera Studies  

Senftle, Thomas, 2017. Assistant Professor of Chemical and Biomolecular Engineering  

Serenó, Anne Bibiana, 2002. Adjunct Professor of Psychology  

Shahsavari, Rouzbeh, 2011. Assistant Professor of Civil and Environmental Engineering and of Materials Science and NanoEngineering  
BS (2002) Sharif University of Technology, Iran; MS (2005) McGill University, Canada; PhD (2010) Massachusetts Institute of Technology

Shamoo, Yousif, 1998. Vice Provost for Research, Professor of Biochemistry and Cell Biology  

Shaw, Chad A., 2004. Adjunct Assistant Professor of Statistics  

Sheafar, Stephen J., 2002. Adjunct Professor of Electrical and Computer Engineering  
BS (1972), MEE (1972), Rice University; PhD (1974) University of Illinois; MBA (1979) Santa Clara University

Shehabuddin, Elora, 2001. Associate Professor of Humanities and Political Science  

Shen, Yu, 2002. Adjunct Professor of Statistics  

Sher, George, 1991. Herbert S. Autrey Professor of Philosophy, Professor of Philosophy  
BA (1964) Brandeis University; PhD (1972) Columbia University

Shibatani, Masayoshi, 2002. Deedee McMurtry Professor of Humanities, Professor of Linguistics  
BA (1970), PhD (1973) University of California–Berkeley

Sinclair, James B., 1978. Lecturer of Electrical and Computer Engineering, Associate Dean of Engineering  
BSEE (1973), MEE (1974), PhD (1979) Rice University

Shipp, Stephanie S., 2000. Adjunct Assistant Professor of Earth, Environmental and Planetary Sciences  
BS (1988) University of Maine; PhD (1999) Rice University

Shouval, Harel, 2004. Adjunct Associate Professor of Computational and Applied Mathematics  
BSc (1987) Tel Aviv University; MSc (1990) Weizmann Institute; PhD (1994) Brown University

Shrivastava, Anshumali, 2015. Assistant Professor of Computer Science  

Shumway, Nicolas, 2010. Frances Moody Newman Professor of Humanities, Professor of Spanish, Portuguese and Latin American Studies  

Si, Qimiao, 1994. Harry C. and Olga K. Wiess Professor of Physics and Astronomy  
BS (1986) University of Science and Technology of China; PhD (1991) University of Chicago

Sickles, Robin, 1985. Reginald Henry Hargrove Chair in Economics and Professor of Statistics  
BS (1972) Georgia Institute of Technology; PhD (1976) University of North Carolina

Sidbury, James, 2011. Andrew W. Mellon Distinguished Professor of Humanities, Professor of History

Siefert, Janet, 2002. Associate Research Professor in Statistics
BS (1975) University of Central Arkansas; PhD (1997) University of Houston

Siemann, Evan, 1998. Harry C. and Olga K. Wiess Professor of Ecology and Evolutionary Biology
AB (1989) Cornell University; PhD (1997) University of Minnesota

Siewert, Charles, 2010. Robert Alan and Kathryn Dunlevie Hayes Chair of Humanities, Professor of Philosophy
BA (1983) Reed College; PhD (1994) University of California–Berkeley

Silberg, Jonathan J., 2004. Associate Professor of Biochemistry and Cell Biology

Simar, Ray, Jr., 2009. Professor in the Practice of Computer Architecture and Electrical and Computer Engineering
BS (1981) Texas A&M University; MS (1983) Rice University

Simoes Correa, Adrienne, 2012. Assistant Professor of BioSciences

Simpson, Robert, 2002. Adjunct Lecturer of Church Music
AB (1970) Brown University; SMM (1972) Union Theological Seminary

Simson, Julie, 2013. Professor of Voice

Sivaramakrishnan, K., 2012. Henry Gardner Symonds Professor of Accounting

Sizova, Natalia M., 2009. Assistant Professor of Economics

Skura, Meredith, 1978. Libby Shearn Moody Professor of English, Professor of English
BA (1965) Swarthmore College; PhD (1971) Yale University

Smith, Brinton Averil, 2005. Associate Professor of Cello

Smith, David Brent, 2000. Associate Professor of Management, Associate Professor of Psychology, Senior Associate Dean of Executive Education
BA (1992) University of Tulsa; MA (1996), PhD (1999) University of Maryland–College Park

Smith, Ian, 2000. Associate Research Professor in Physics and Astronomy

Snow, Edward A., 1981. Mary Gibbs Jones Chair for the Humanities, Professor of English
BA (1964) Rice University; MA (1966) University of California–Riverside; PhD (1969) State University of New York–Buffalo

Socaciu, Gheorghe-Ciprian, 2009. Lecturer of French

Solomon, Scott, 2009. Lecturer and Lab Coordinator
BS (2000) University of Illinois–Urbana-Champaign; PhD (2007) University of Texas–Austin

Somerville, Ted, 2008. Lecturer of Classical and European Studies
BA (1999) University of Texas–Austin; PhD (2007) Harvard University

Sonenshein, Scott, 2007. Henry Gardner Symonds Professor of Management

Song, Jayoung, 2016. Lecturer of Korean
BA (2005) Kyung Hee University; MA (2010), PhD (2014) University of Texas–Austin

Song, Yongcheng, 2009. Adjunct Assistant Professor of Chemistry
BS (1993) Nanjing University; PhD (2001) National University of Singapore/Institute of Molecular and Cell Biology

Sparagana, John, 1989. Grace Christian Vietti Chair in Visual Arts, Professor of Visual and Dramatic Arts, Department Chair of Visual and Dramatic Arts

Sperandio, Christopher, 2008. Associate Professor of Visual and Dramatic Arts

Spieler, Christof, 2000. Senior Lecturer of Architecture
BS (1997), MS (1999) Rice University

Stadler, Lauren, 2015. Assistant Professor of Civil and Environmental Engineering

Stallings, Tom, 2007. Professor in the Practice of Sport Management
BA (1991) University of Texas; MED (2008) University of Houston

Stallmann, Kurt, 2002. Associate Professor of Composition and Theory

Stanciulescu, Ilinca, 2009. Associate Professor of Civil and Environmental Engineering and of Mechanical Engineering

Stanley, Melinda A., 2010. Adjunct Professor of Psychology

Stasevicius, Maria Luján, 2016. Lecturer of Spanish

Stasney, C. Richard, 1999. Adjunct Professor of Performing Arts Medicine
BA (1965) Yale University; MD (1969) Baylor College of Medicine

Stein, Robert M., 1979. Lena Gohlman Fox Professor of Political Science
BA (1972) Ohio Wesleyan University; MA (1974), PhD (1977) University of Wisconsin–Milwaukee

Steiner, Uwe, 2001. Professor of German Studies, Associate of Wiess College

Stenson, Jared, 2013. Wiess Instructor of Physics and Astronomy
BS (2003), MS (2005) Brigham Young University; PhD (2010) Oregon State University

Stern, Michael, 1991. Professor of Biochemistry and Cell Biology
BS (1978) Stanford University; PhD (1985) University of California–San Francisco

Stevens, Sara, 2012. Lecturer of Architecture

Stevenson, Randolph T., 1997. Professor of Political Science

Stewart, Charles R., 1969. Professor of Biochemistry and Cell Biology
BS (1962) University of Wisconsin–Madison; PhD (1967) Stanford University

Stoll, Richard J., 1979. Albert Thomas Chair in Political Science, Professor of Political Science
AB (1974) University of Rochester; PhD (1979) University of Michigan

Stotts, Angela L., 2007. Adjunct Professor of Psychology

Strait, Richard B., 2007. Adjunct Professor of Chemical and Biomolecular Engineering
BS (1970) Ohio State University; MBA (1978) University of Tulsa

Strassmann, Diana, 2004. Carolyn & Fred McManis Distinguished Professor in the Practice of Humanities

Strauss, Matthew, 2015. Associate Professor of Percussion

Stringer, Tish, 2012. Lecturer of Film, Film Program Manager
BA (1997) University of Minnesota; PhD (2006) Rice University

Stroup, John M., 1988. Harry and Hazel Chavanne Professor of Religion, Professor of Religion
AB (1968) Washington University; MDiv (1972) Concordia Seminary; MPhil (1975), PhD (1980) Yale University

Studer, Christoph, 2013. Adjunct Assistant Professor of Electrical and Computer Engineering
MSc (2005), DrSc (2009) ETZ Zurich

St-Cyr, Amik, 2012. Adjunct Associate Professor of Computational and Applied Mathematics

St-Pierre, François, 2016. Assistant Professor of Electrical and Computer Engineering

Subramanian, Devika, 1995. Professor of Computer Science and of Electrical and Computer Engineering

Suh, Junghae, (2007). Associate Professor of Bioengineering

Summers, Carolyn, 1999. Adjunct Professor of Physics and Astronomy
BA (1970) Vanderbilt University; MEd (1977), EdD (1979) University of Houston

Swint, John Michael, 1977. Adjunct Professor of Economics
BA (1968) California State University–Humboldt; MA, PhD (1972) Rice University

Tabor, Jeffrey J., 2010. Associate Professor of Bioengineering
BA (2001), PhD (2006) University of Texas–Austin

Taghikhani, Vahid, 2015. Adjunct Professor of Chemical and Biomolecular Engineering

Takizawa, Kenji, 2011. Adjunct Associate Professor in Mechanical Engineering

Tandon, Nitin, 2012. Adjunct Professor of Electrical and Computer Engineering
MBBS (1992) Armed Forces Medical College

Tang, Ming, 2014. Assistant Professor of Materials Science and NanoEngineering

Tang, Xun, 2014. Professor of Economics

Tao, Yizhi Jane, 2002. Associate Professor of Biochemistry and Cell Biology
BS (1992) Peking University; PhD (1999) Purdue University

Tapia, Richard A., 1970. University Professor, Maxfield-Oshman Professor of Computational and Applied Mathematics
BA (1961), MA (1966), PhD (1967) University of California–Los Angeles

Tegduyar, Tayfun E., 1998. James F. Barbour Professor of Mechanical Engineering
MS (1978), PhD (1982) California Institute of Technology
Thall, Peter, 2017. Adjunct Professor of Statistics
BS (1971) Michigan State University; MS (1973) Florida State University; PhD (1975) Florida State University

Thomann, Isabell, 2012. Assistant Professor of Electrical and Computer Engineering and of Materials Science and NanoEngineering
MS (2001) Swiss Federal Institute of Technology; PhD (2009) University of Colorado at Boulder

Thomas, Edwin L., 2011. Professor of Materials Science and NanoEngineering and of Chemical and Biomolecular Engineering
BS (1969) University of Massachusetts; PhD (1974) Cornell University

Thompson, Ewa M., 1970. Research Professor of Slavic Studies
BA (1963) University of Warsaw; MFA (1963) Sopot Conservatory of Music, Poland; PhD (1967) Vanderbilt University

Tittel, Frank K., 1967. J. S. Abercrombie Professor of Electrical and Computer Engineering
BA (1955), MA, PhD (1959) Oxford University

Tkaczyk, Tomas, 2007. Associate Professor of Bioengineering

Tobin, David H., 2007. Senior Lecturer of Communications

Toffolotto, Frank R., 1996. Professor of Physics and Astronomy, Magister of Martel College
BS (1981) La Trobe University; PhD (1987) Rice University

Tolias, Andreas S., 2006. Adjunct Assistant Professor of Computational and Applied Mathematics and of Electrical and Computer Engineering

Tomson, Mason B., 1977. Professor of Civil and Environmental Engineering
BS (1967) Southwestern State College; PhD (1972) Oklahoma State University

Torres, Mark, 2017. Assistant Professor of Earth, Environmental and Planetary Sciences
BA (2010) Pitzer College; PhD (2015) University of Southern California

Tour, James M., 1999. T. T. and W. F. Chao Professor of Chemistry, Computer Science, and of Materials Science and NanoEngineering
BS (1981) Syracuse University; PhD (1986) Purdue University

Tran Lu, Lesa, 2012. Wiess Instructor of Chemistry
BS (2007), MA (2009), PhD (2012) Rice University

Tsai, Ah-Lim, 2007. Adjunct Professor of Biochemistry and Cell Biology
BS (1974) National Taiwan University; PhD (1983) Rice University

Turi, Luziris Pineda, 2010. Lecturer of Spanish
BA (2003), MA (2005), PhD (2012) University of Houston

Turley, Ruth N. Lopez, 2010. Professor of Sociology

Umar, Tarik, 2017. Assistant Professor of Finance
BA (2010) Harvard University; MBA, PhD (2017) University of Chicago

Uribe, Rosa, 2017. Assistant Professor of BioSciences
BS (2006) San Francisco State University; PhD (2012) University of Texas–Austin

Vajtai, Robert, 2008. Associate Research Professor in Materials Science and NanoEngineering
MSc (1986) Jate University; PhD (1997) Szeged University, Hungary

Van der Werff, Ivo-Jan, 2007. Professor of Viola
Associate Hons (1980) Royal College of Music

VanHorn, David, 2007. Associate Professor in the Practice of Operations Management
BS (1989); MEng (1990) Iowa State University; MBA (2000) Rice University

Vannucci, Marina, 2006. Noah Harding Professor of Statistics, Professor of Statistics, Department Chair of Statistics
BS (1982), PhD (1996) University of Florence, Italy

Vardi, Moshe, 1993. Karen Ostrum George Distinguished Service Professor of Computational Engineering, Professor of Computer Science
BS (1975) Bar-Ilau University; MS (1980) Feinberg Graduate School of the Weizmann Institute of Science; PhD (1982) Hebrew University

Vargas Arreola, Francisco M., 2013. Assistant Professor of Chemical and Biomolecular Engineering
BS (1999), MS (2002) Technologico de Monterrey, Mexico; PhD (2009) Rice University

Varilly-Alvarado, Anthony, 2009. Associate Professor of Mathematics

Varman, Peter J., 1983. Professor of Electrical and Computer Engineering and Computer Science
BTech (1978) Indian Institute of Technology, Kanpur; MSEE (1980), PhD (1983) University of Texas–Austin

Vassallo Fernando, Jesus, 2013. Assistant Professor of Architecture

Vasudevan, Venu, 2009. Adjunct Assistant Professor of Electrical and Computer Engineering
BS (1984) Indian Institute of Technology, New Delhi; PhD (1990) Ohio State University

Veeraraghavan, Ashok, 2010. Associate Professor of Electrical and Computer Engineering

Veiseh, Omid, 2017. Assistant Professor of Bioengineering

Verduzco, Rafael, 2009. Associate Professor of Chemical and Biomolecular Engineering, and of Materials Science and NanoEngineering

Verm, Karen Roethlisberger, 2016. Artist Teacher of Opera Studies
VerMeulen, William, 1990. Professor of French Horn

Videa, Marcelo Vargas, 2011. Adjunct Associate Professor of Chemistry
BSc (1993) Instituto Tecnologico y de Estudios Superiores de Monterrey; PhD (1999) Arizona State University

Vieux, Baxter, 2003. Adjunct Professor of Civil and Environmental Engineering

Volz, Tracy, 1999. Professor of the Practice in Professional Communication, Director of the Program for Writing and Communication

Wagner, Daniel S., 2003. Associate Professor of Biochemistry and Cell Biology
BA (1990) University of Texas; PhD (1997) University of Texas Health Science Center

Waligora-Davis, Nicole, 2008. Associate Professor of English

Wallach, Dan Seth, 1998. Professor of Computer Science and of Electrical and Computer Engineering

Wallach, Steve, 2010. Adjunct Professor of Computer Science
BSEE (1966) Polytechnic University; MSEE (1967) University of Pennsylvania; MBA (1973) Boston University

Wamble, Mark S., 1991. Professor in the Practice of Architecture

Wang, Sean, 2016. Visiting Assistant Professor of Finance

Wang, Stephen, 2015. Senior Instructor of Mathematics

Ward, Kerry R., 2001. Associate Professor of History, Associate of Lovett College

Warren, Joe D., 1986. Professor of Computer Science

Webster, Michael, 1997. Professor of Music
BM (1966), MM (1967), DMA (1975) Eastman School of Music

Weckstrom Kantor, Virginia, 2012. Artist Teacher of Piano Chamber Music and Accompanying
BA (1969) Western College of Women; MMus (1971) Yale University School of Music

Weininger, Melissa, 2015. Anna Smith Fine Lecturer of Jewish Studies
BA (1996) Harvard University; PhD (2010) University of Chicago

Weisman, R. Bruce, 1979. Professor of Chemistry and of Materials Science and NanoEngineering
BA (1971) Johns Hopkins University; PhD (1977) University of Chicago

Weissenberger, Klaus H. M., 1971. Professor of German Studies
MA (1965) University of Hamburg, Germany; PhD (1967) University of Southern California

Welch, Chapman, 2009. Lecturer of Music

Westbrook, Robert A., 1989. William Alexander Kirkland Professor of Marketing
AB (1969), MBA (1971), PhD (1975) University of Michigan

White, Frank S., 1982. Lecturer of Architecture
BS (1977) Rochester Institute of Technology

Whitford, Sheila, 2013. Lecturer of Education
BA (1970) Texas Woman's University; MBA (1983) University of Houston, Clear Lake

Whiting, Sarah, 2010. Dean of the School of Architecture, William Ward Watkin Professor of Architecture
BA (1986) Yale University; MArch (1990) Princeton University; PhD (2001) Massachusetts Institute of Technology

Whitmire, Kenton H., 1982. Associate Dean of the Wiess School of Natural Sciences, Professor of Chemistry, Department Chair of Kinesiology, Magister of Sid Richardson College

Whitmore, Mihriban, 1999. Adjunct Assistant Professor of Psychology

Whitson, Peggy, 1997. Adjunct Associate Professor of Biochemistry and Cell Biology
BS (1981) Iowa Wesleyan College; PhD (1986) Rice University

Wickham, Hadley, 2017. Adjunct Professor of Statistics

Wiener, Martin J., 1967. Mary Gibbs Jones Professor of History, Professor of History
BA (1962) Brandeis University; MA (1963), PhD (1967) Harvard University

Wildenthal, Lora, 2003. Associate Dean of Humanities, Professor of History, Associate of Will Rice College, Department Chair of History

Wilkinson, Harry E., 1990. Professor in Professional Sciences Masters Program
BA (1952), MBA (1957) Washington University, St. Louis; DBA (1960) Harvard Business School

Wilson, Jennifer S., 2012. Senior Lecturer, Program in Writing and Communication, Director of the Center for Written, Oral, and Visual Communication
Wilson, Lon J., 1973. Professor of Chemistry
BA (1966) Iowa State University; PhD (1971) University of Washington—Seattle

Wilson, Patrick “Burke”, 2015. Lecturer of Kinesiology
BA (2003) Texas A&M University; DPT (2012) UT Southwestern Medical Center

Wilson, Rick K., 1983. Herbert S. Autrey Professor of Political Science, Professor of Statistics and of Psychology
BA (1975), MA (1977) Creighton University; PhD (1982) Indiana University

Windsor, Duane, 1977. Lynette S. Autrey Professor of Management
BA (1969) Rice University; AM (1973), PhD (1978) Harvard University

Winer, Rachel T., 2004. Adjunct Assistant Professor of Psychology

Winkler, Kathleen, 1992. Dorothy Richard Starling Professor of Classical Violin
BMus (1972) Indiana University; MMus (1974) University of Michigan

Winningham, Geoffrey L., 1969. Lynette S. Autrey Professor of Humanities, Professor of Visual Arts, Honorary Associate of Wiess College
BA (1965) Rice University; MS (1968) Illinois Institute of Technology

Witte, Ron, 2010. Professor of Architecture

Wittenberg Jr, Gordon G., 1979. Professor of Architecture
BFA (1968) Trinity College, Connecticut; MArch (1972) Washington University

Woffinden, David, 2015. Adjunct Professor of Mechanical Engineering

Wolf, Michael, 1988. Professor of Mathematics, Department Chair of Mathematics
BS (1981) Yale University; PhD (1986) Stanford University

Wolfe, Cary E., 2003. Bruce and Elizabeth Dunlevie Professor of English, Professor of English

Wolfthal, Diane, 2008. David and Caroline Minter Professor of Humanities, Professor of Art History

Wolpin, Kenneth, 2014. Lay Family Chair in Economics and Distinguished Research Professor, Department Chair of Economics
BS (1967) City College of New York; PhD (1974) Graduate School of the City University of New York

Wolynes, Peter C., 2011. D.R.Bullard-Welch Foundation Professor of Science, Professor of Chemistry, of Biochemistry and Cell Biology, of Physics and Astronomy and of Materials Science and NanoEngineering
AB (1971) Indiana University; AM (1972) Harvard University; PhD (1976) Harvard University

Wong, Michael S., 2001. Professor of Chemical and Biomolecular Engineering, of Chemistry, and of Materials Science and NanoEngineering, of Civil and Environmental Engineering, Department Chair of Chemical and Biomolecular Engineering

Wong, Stephen B., 2001. Lecturer of Computer Science

Wood, Philip R., 1990. Associate Professor of French

Woods, Gary L., 2008. Professor in the Practice of Computer Technology and Electrical and Computer Engineering

Wool, Zoe, 2015. Assistant Professor of Anthropology
BA (2004) York University; MA (2005), PhD (2011) University of Toronto

Wooten, Kevin C., 1994. Adjunct Professor of Psychology
BA (1976), MA (1978) University of Houston—Clear Lake; PhD (1991) Tulane University

Worth, David S., 2002. Senior Lecturer of Humanities, Director of Forensics

Wright, Anthony A., 1980. Adjunct Professor of Psychology

Xiao, Han, 2017. Norman Hackerman-Welch Young Investigator and Assistant Professor of Chemistry
BS (2010) University of Science and Technology of China; PhD (2015) The Scripps Research Institute

Xing, Yuhang, 2003. Associate Professor of Finance, Faculty Director of the El Paso Finance Center

Yakobson, Boris I., 1999. Karl F. Hasselmann Professor of Materials Science and NanoEngineering and of Chemistry
MS (1978) Novosibirsk State University; PhD (1982) Russian Academy of Sciences

Yang, Kaiyuan, 2017. Assistant Professor of Electrical and Computer Engineering
BS (2012) Tsinghua University, China; MS (2014), PhD (2017) University of Michigan—Ann Arbor

Yao, Vida, 2016. Assistant Professor of Philosophy

Yarbrough, Fay, 2013. Associate Professor of History
Yeh, Meng, 2001. Teaching Professor of Chinese
BA (1986) Tamkang University; MA (1988), PhD (1993) University of Texas–Austin

Yekovich, Robert A., 2003. Dean of the Shepherd School of Music, Elma Schneider Professor of Music

Yepes, Pablo P., 1994. Associate Research Professor of Physics and Astronomy
BS (1982), MS (1983), PhD (1988) University of Santiago de Compostela

Yeung, Laurence, 2015. Assistant Professor of Earth, Environmental and Planetary Sciences

Yost, Julianne M., 2011. Wiess Instructor of Chemistry

Yu, Lam, 2012. Wiess Instructor of Physics and Astronomy

Yuan, Ying, 2010. Adjunct Associate Professor of Statistics
BS (1995) Huazhong University of Science and Technology, China; MA, MS (2000) Brandeis University; PhD (2005) University of Michigan

Yunis, Harvey E., 1987. Andrew W. Mellon Chair in Humanities, Professor of Classics

Zavyalova, Anastasiya, 2012. Assistant Professor of Strategic Management
BS (2006) Methodist University; PhD (2012) University of Maryland, College Park

BS (1955), MS (1957) University of Colorado; MBA (1960), PhD (1962) University of Michigan; Dr. Econ. (Hon.) (1990) Turku School of Economics and Business Administration, Finland; DLitt (Hon.) (2010) University of Waterloo, Canada; Dr. Econ. Mgmt Sci (Hon.) (2011) Universidad de Alcalá, Spain

BS (1984) University of Victoria; PhD (1989) University of British Columbia

Zhang, David, 2013. Assistant Professor of Bioengineering
BS (2005), PhD (2010) California Institute of Technology

Zhang, Yan Anthea, 2001. Fayez Sarofim Vanguard Professor of Management
BA (1992), MA (1995) Nanjing University; MA (1997) City University of Hong Kong; PhD (2001) University of Southern California

Zhang, Yin, 1996. Professor of Computational and Applied Mathematics

Zhong, Lin, 2005. Professor of Electrical and Computer Engineering

Zhong, Weiwei, 2008. Assistant Professor of Biochemistry and Cell Biology
BS (1997) University of Science and Technology of China; MS (2003), PhD (2002) University of Georgia

Zhou, Jing, 2003. Houston Endowment Professor of Organizational Behavior, Professor of Psychology

Zhu, Jian-Xin, 2010. Adjunct Associate Professor of Physics and Astronomy
BS (1990), MS (1993) Nanjing University; PhD (1997) University of Hong Kong

Zimmerman Espinosa, Carissa A., 2011. Lecturer of Psychology
BA (2005) Trinity University; MS (2008), PhD (2010) Florida State University

Zodrow, George, 1979. Professor of Economics
BA, MME (1973) Rice University; MA (1977), PhD (1980) Princeton University

Zubarev, Eugene, 2005. Associate Professor of Chemistry and of Materials Science and NanoEngineering
MS (1993) Moscow State University; PhD (1996) Russian Academy of Sciences

Zygourakis, Kyriacos, 1980. A.J. Hartsook Professor of Chemical and Biomolecular Engineering, Professor of Bioengineering
Diploma (1975) National Technical University of Athens; PhD (1981) University of Minnesota
EMERITUS FACULTY

Akers, William Walter, 1947–93. Professor Emeritus of Chemical and Biomolecular Engineering
BS (1943) Texas Technological College; MS (1944) University of Texas at Austin; PhD (1950) University of Michigan

BA (1953) Willamette University; MA (1954) Stanford University; Certificat d'études politiques (1955) University of Bordeaux; PhD (1964) University of California–Berkeley

BSCE (1951), MS (1954) University of Arkansas; PhD (1964) University of California–Berkeley

BA (1963) University of Michigan; MA (1965) Stanford University; PhD (1970) University of Michigan

Armeniades, Constantine D, 1969–2006. Professor Emeritus of Chemical and Biomolecular Engineering
BS (1961) Northeastern University; MS (1967) Case Institute of Technology; PhD (1969) Case Western Reserve University

Bale, Allen M., 1947–78. Athletic Director Emeritus
BS (1930) Rice Institute; MA (1939) Columbia University

Bally, Albert W., 1981–96. Harry Carothers Wiess Professor Emeritus of Geology
BA (1953) University of Zurich, Switzerland

Barker, J. R., 1949–86. Professor Emeritus of Health and Physical Education
BS (1949) Rice Institute; MEd (1954) University of Texas–Austin

BS (1968) University of California at Berkeley; MS (1971), PhD (1972) Cornell University

Black, Earl, 1993-2012. Herbert S. Autrey Professor Emeritus of Political Science
BA (1964) University of Texas–Austin; PhD (1968) Harvard University

BS (1961) Louisiana Polytechnic Institute; MA (1963), PhD (1965) Rice University

BA (1959) Kansas University; MFA (1965) Columbia University

BA (1967), MA, PhD (1970) Rice University

Bryant, John B., 1981-2016. Henry S. Fox, Sr. Professor Emeritus of Economics

BS (1966) Memphis State University; MA (1970), PhD (1972) Tulane University

BA (1957), BSEE (1958), Rice Institute; MS (1960) Rice University; PhD (1965) Stanford University

Burt, George, 1984–97. Professor Emeritus of Theory and Composition

AB (1957) Princeton University; MA (1961), PhD (1964) Yale University

Cason, Carolyn, 1956–74. Lecturer Emerita of Dietetics
BS (1934) University of Texas at Austin; MA (1939) Columbia University

BA (1967) Purdue University; MA (1968), PhD (1971) University of Illinois

Citron, Marcia J., 1976-2015. Martha and Henry Malcolm Lovett Distinguished Service Professor Emerita and Professor Emerita of Musicology and Music History
BA (1966) Brooklyn College; MA (1968), PhD (1971) University of North Carolina

Clark, Howard Charles, 1966–88. Professor Emeritus of Geology and Geophysics
BS (1959) University of Oklahoma; MA (1965), PhD (1967) Stanford University

Class, Calvin M., 1952–85. Professor Emeritus of Physics
AB (1943), PhD (1951) Johns Hopkins University

BS (1964) University of Southwestern Louisiana; PhD (1967) Rice University

Colvin, Vicki, 1996-2015. Professor Emerita of Chemistry
BS (1988) Stanford University; PhD (1994) University of California–Berkeley

BA (1961) University of Colorado; PhD (1965) Cornell University

Cox, Edward L., 1989-2016. Associate Professor Emeritus of History
BA (1970) University of the West Indies; MA (1973), PhD (1977) Johns Hopkins University

DAICHMAN, Graciela S., 1973–99. Lecturer Emerita of Spanish and Portuguese

DAITCHMAN, Evelyne D., 1987–2012. Senior Lecturer Emerita of French
Maîtrise de Philologie romane (1966) University of Ghent, Belgium; MA (1979) University of Houston; PhD (1987) Rice University

BA (1961) University of Texas at Austin; MA (1966), PhD (1969) Princeton University

BA (1961) University of Texas at Austin; PhD (1965) Cornell University

BA (1952), BS (1953) Rice Institute; ScD (1957) Massachusetts Institute of Technology

BS (1962), MS (1964) University of Miami; PhD (1966) University of Utah

BS (1952) California Institute of Technology; PhD (1956) Duke University

DHARAN, Bala G., 1982–2009. J. Howard Creekmore Professor Emeritus of Accounting

DREW, Katherine Fischer, 1950–96. Lynette S. Autrey Professor Emerita of History
BA (1944), MA (1945) Rice Institute; PhD (1950) Cornell University

BA (1961), MA (1968), PhD (1970) Rice University

BSCE (1968) Engineering University, Pakistan; MS (1975) Asian Institute of Technology, Thailand; PhD (1982) University of Michigan; MBA (1999) University of Houston

DYSON, Derek C., 1966–2000. Professor Emeritus of Chemical and Biomolecular Engineering
BA (1955) University of Cambridge; PhD (1966) University of London

BA (1962), MA (1964), PhD (1969) University of California–Berkeley

ETNYRE, Bruce, 1984. Professor Emeritus of Kinesiology
BA (1954) Rice Institute; PhD (1957) University of California–Berkeley

PhD (1979) University of Illinois

FARWELL, Joyce, 1994–2005. Professor Emerita of Voice
BME (1956), MME (1958) University of Oklahoma; DMA (1976) College Conservatory of Music, University of Cincinnati

BS (1962) Southwestern University; MBS (1965) University of Colorado; PhD (1969) Rice University

BA (1953) Hanover College; MS (1958), PhD (1961) Purdue University

FULTZ, Lucille P., 1990–2007. Associate Professor Emeritus of English
AB (1959) Spellman College; MA (1968) University of Iowa; PhD (1990) Emory University

BS (1948) Trinity College, Dublin; MSc (1949) Carnegie Mellon University; PhD (1953) Princeton University

BA (1962), MA (1963) University of Florida; PhD (1968) University of Illinois

BA (1963) Brooklyn College; MS (1964), PhD (1966) Syracuse University

BS (1959) Birmingham University, England; PhD (1963) Cambridge University

BE (1962) Yale University; MS (1963) University of California–Berkeley; PhD (1967) Massachusetts Institute of Technology

BA (1952) Universidad de la Republica; MS (1987) Rice University

BS (1967) Michigan State University; PhD (1973) Yale University

BS, MA (1963) Carnegie Institute of Technology; PhD (1966) Stanford University
BA (1956) Rice Institute; MA (1959) Indiana University

Haymes, Robert C., 1968–98. Professor Emeritus of Space Physics and Astronomy
BA (1952), MS (1953), PhD (1959) New York University

Hempel, John, 1964-2013. Milton B. Porter Professor of Mathematics
BS (1957) University of Utah; MS (1959), PhD (1962) University of Wisconsin at Madison

Heymann, Dieter, 1966–98. Professor Emeritus of Geology and Geophysics, Adjunct Professor of Chemistry
MS (1954), PhD (1957) University of Amsterdam, The Netherlands

Hirasaki, George J., 1959–2013. A. J. Hartsook Professor Emeritus of Chemical and Biomolecular Engineering
BS (1963) Lamar University; PhD (1967) Rice University

Hodges, Lee, 1930–71. Professor Emeritus of French
BS (1930) Harvard University; MA (1934) Rice Institute

SB (1945), SM (1947) Massachusetts Institute of Technology; PhD (1956) Pennsylvania State University

BS (1973), MA (1975) Brigham Young University; PhD (1984) University of California—Irvine

Hudde, Donald L., 1964–92. Professor Emeritus of Economics
BS (1959), MA (1960) University of California—Los Angeles; PhD (1964) Vanderbilt University

BA (1961) Wesleyan University; MA (1964), PhD (1966) Yale University

BA (1948) University of California—Los Angeles; MA (1950), PhD (1952) Columbia University

Jitcoff, Andrew N., 1950–72. Professor Emeritus of Russian
Bachelor (1928), Master (1931) Prague Institute of Technology, Czechoslovakia

BA (1957) Millsaps College; MA (1958), PhD (1960) Eastman School of Music, University of Rochester

BS (1960), MS (1962) University of Cincinnati; MS (1965), PhD (1968) University of Michigan

BS (1966) City College of New York; PhD (1971) University of Kansas; PhD (1978) Johns Hopkins University

Kauffmann, Robert Lane, 1976–2015. Professor Emeritus of Spanish

Kaun, Kathleen, 1998–2013. Lynette S. Autrey Professor Emerita of Voice
BM (1966) Indiana University; MM (1970) University of Texas–Austin

Keeton, Darra, 1994-2012. Professor Emerita of Visual Arts
BFA (1974) Miami University, Ohio; MFA (1979) Queens College, New York

Kiperman, Anita, 1976–98. Lecturer Emerita of Spanish
BA (1957) Universidad Nacional de Buenos Aires; MA (1971) University of Houston

BS (1963), Providence College; PhD (1968) University of Wisconsin

Kulstad, Mark, 1975–2015. Professor Emeritus of Philosophy
BA (1969) Macalester College; PhD (1975) University of Michigan

BA (1951) Yale University; PhD (1958) University of California—Berkeley

Lane, Neal F., 1996–2014. Malcolm Gillis University Professor Emeritus, Professor Emeritus of Physics and Astronomy
BS (1960), MS (1962), PhD (1964) University of Oklahoma

BS (1957), MS (1959), PhD (1961) Carnegie Mellon University

Leal, Maria Teresa, 1965–96. Professor Emerita of Spanish and Portuguese
BA (1946) Pontificia Universidade Católica, Brazil; PhD (1963) Universidade Federal de Rio de Janeiro, Brazil

Lecuyer, Maurice Antoine, 1962–79. Professor Emeritus of French
Baccalauréat es lettres (1937), Licence es lettres (1943), Diplôme d'études supérieures (1944) Universite de Paris, France; PhD (1954) Yale University

BS (1962) North Texas State University; ME (1967) Sam Houston State University; EdD (1974) Louisiana State University

Leeds Jr, J. Venn, 1964–89. Professor Emeritus of Electrical and Computer Engineering
BA (1955), BSEE (1956) Rice Institute; MSEE (1960), PhD (1963) University of Pittsburgh; JD (1972) University of Houston

Long, Elizabeth, 1978-2014. Professor Emerita of Sociology, Department Chair of Sociology, Associate of Baker College
BA (1966) Stanford University; MA (1974), PhD (1979) Brandeis University

Lütte, Andreas, 1999-2013. Professor Emeritus of Earth, Environmental and Planetary Sciences, Professor Emeritus of Chemistry, Associate of Will Rice College

Marcus, George E., 1975–2006. Professor Emeritus of Anthropology
BA (1968) Yale University; PhD (1976) Harvard University

Matusow, Allen J., 1963–2015. William Gaines Twyman Professor Emeritus of History, Associate Director Emeritus for Academic Programs of the James A. Baker III Institute for Public Policy; Research Professor in History
BA (1958) Ursinus College; MA (1959), PhD (1963) Harvard University

BA (1963) University of Cincinnati; MA (1965) University of Washington; MA (1968) University of Cincinnati

McIntosh, Roderick J., 1980. Professor Emeritus of Anthropology
BA (1973) Yale University; MLITT (1975), PhD (1979) Trinity College, University of Cambridge

BMet (1957) Sheffield University; PhD (1962) Leeds University

McLendon, George, 2010-2016. Professor Emeritus of Chemistry
BS (1972) University of Texas–El Paso; PhD (1976) Texas A&M University

BS (1957), MA (1959) McGill University; PhD (1963) Johns Hopkins University

BA, BS (1961) Rice University; PhD (1969) University of Minnesota

BA (1957), MA (1959) North Texas State University; BD (1961), PhD (1965) Yale University

BA (1956) Adelphi University; Certificate (1958) Universita de Perugia; Certificate (1958) Yale University School of Languages; Certificate (1960) Goethe Institute, Blaubeuren, Germany

BA (1966), MBA (1968), PhD (1971) University of Texas–Austin

BA (1942) George Peppardine University; BD (1946), PhD (1951) Yale University

BS (1957), MS (1958) University of Michigan; PhD (1962) University of California–Berkeley

O’Dell, Charles Robert, 1982–2000. Andrew Hays Buchanan Professor Emeritus of Astrophysics
BSEE (1959) Illinois State University; PhD (1962) University of Wisconsin–Madison

BS (1957), PhD (1962) University of Sheffield

BA (1964) Occidental College; PhD (1968) Brandeis University

Parsons, Spencer W., 1969-2015. Associate Professor Emeritus of Architecture
BA (1953) University of Michigan; MArch (1963) Harvard University

Patten, Robert L., 1969–2012. Lynette S. Autry Professor Emeritus in Humanities, Professor Emeritus of English
BA (1960) Swarthmore College; MA (1962), PhD (1965) Princeton University

BSEE (1958), MSEE (1959) University of Arkansas; PhD (1962) Purdue University

Philpott, Charles William, 1964–96. Professor Emeritus of Ecology and Evolutionary Biology
BA (1957), MS (1958) Texas Technological College; PhD (1962) Tulane University

BA (1951) Harvard University; MA (1952) Columbia University; PhD (1958) University of Wisconsin–Madison

BS (1956) University of Notre Dame; MS (1961), PhD (1966) University of Chicago

BFA (1965) Atlanta School of Art; MFA (1968) Tulane University

BA (1976) University of Illinois; PhD (1982) University of Michigan

Rachford Jr, Henry H., 1964–82. Professor Emeritus of Mathematical Sciences
BS (1945), MA (1947) Rice Institute; ScD (1950) Massachusetts Institute of Technology

Rau, Carl, 1983. Professor Emeritus of Physics and Astronomy
BS (1963), MS (1967), PhD (1970) Technical University, Munich

BA (1954) New York University; MA (1964) University of Houston; PhD (1970) University of Texas–Austin

ACCREDITATION

Rice University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award baccalaureate, masters, and doctorate degrees.

Please contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 (http://www.sacscoc.org) or call 404-679-4500 for questions about the accreditation of Rice University or allegations of significant non-compliance with a requirement or standard. All other inquiries should be addressed directly to the appropriate office at Rice University.
COMPLAINTS PROCESS

Rice University’s Student Complaint Process (compliant with DOE “Program Integrity” Regulations)

The Texas Higher Education Coordinating Board (THECB) and the Texas Administrative Code (19 TAC § 1.110-1.120) require Rice University – and all other Texas universities – to provide a student complaint procedure that complies with the U.S. Department of Education’s “Program Integrity” regulations as part of the university’s eligibility for Title IV federal funds.

The requisite complaint process must inform current, former or prospective students who have exhausted Rice’s grievance, complaint or appeal processes how to initiate a complaint outside of Rice with THECB. The THECB’s procedures for such complaints are found here: http://www.thecb.state.tx.us/index.cfm?objectid=AC6FA0BC-F5DB-16DE-6B66-C083DFB5B998. Students wishing to use this outside process should ensure they have first addressed their complaint to the appropriate Rice University complaint process. If Rice is unable to resolve the matter after the student has exhausted internal complaint and appeal processes, the student may then file a complaint with THECB according to the following:

1. The THECB’s complaint process can be found here: http://www.thecb.state.tx.us/index.cfm?objectid=AC6FA0BC-F5DB-16DE-6B66-C083DFB5B998. Students start THECB complaint process by sending the first three forms linked below either by electronic mail to StudentComplaints@thecb.state.tx.us (StudentComplaints@thecb.state.tx.us?subject=Student Complaint) or by regular mail to the Texas Higher Education Coordinating Board, Office of General Counsel, P.O. Box 12788, Austin, TX 78711-2788 (fax forms are not accepted). The fourth form must also be included for complaints regarding a student with a disability.
   a. THECB Student Complaint Form (http://www.thecb.state.tx.us/download.cfm?downloadfile=053424CA-C5EC-31B3-CF15B237DD49A4FF&type=dmFile&fieldname=filename)
   b. FERPA Consent and Release Form (http://www.thecb.state.tx.us/download.cfm?downloadfile=053630E5-F098-7B70-BDFD98FAE5A06072&type=dmFile&fieldname=filename)
   c. THECB Consent and Agreement Form (http://www.thecb.state.tx.us/download.cfm?downloadfile=053630E5-F098-7B70-BDFD98FAE5A06072&type=dmFile&fieldname=filename)

2. Complainants should understand that the THECB does not handle, investigate, or attempt to resolve complaints concerning actions that occurred more than two years prior to the filing of a student complaint form with the THECB (unless the delay in filing the THECB complaint was caused by the complainant exhausting Rice’s grievance procedures). The THECB also does not handle the various types of complaints listed in 19 TAC § 1.113.

3. Former students must file a complaint with the THECB no later than one year after the student’s last date of attendance at Rice, or within 6 months of discovering the grounds for complaint, unless the delay in filing the THECB complaint was caused by the complainant exhausting Rice’s grievance procedures.

4. The THECB will refer complaints alleging that Rice has violated state consumer protection laws to the Consumer Protection Division of the Office of the Attorney General of Texas for investigation and resolution. If THECB determines that a complaint is appropriate for investigation and resolution by Rice’s accrediting agency (SACSCOC – the Southern Associations of Colleges and Schools Commission on Colleges) or an educational association such as ICUT (Independent Colleges & Universities of Texas), the THECB may refer the complaint to the appropriate entity and may terminate the referral of the complaint to those entities at any time and proceed to investigate and adjudicate the complaint.

5. If a person wishes to file a complaint against Rice through the university’s accrediting agency, SACSCOC, that agency’s complaint process can be found here: http://www.sacscoc.org/FAQTOC.asp. A complainant should complete SACSCOC’s Complaint Form and send two print copies to the President, Southern Association of Colleges and Schools Commission on Colleges, 1866 Southern Lane, Decatur, GA 30033-4097. The details of the agency’s complaint process explain that it is intended to address significant, documented, alleged non-compliance with SACSCOC accreditation standards, policies or procedures. Complainants are expected to have attempted to resolve the issue through Rice’s complaint processes before filing a complaint with SACSCOC.

6. If the complaint concerns compliance with statutes or regulations administered by the THECB and the complaint has not been referred to another entity, the THECB Office of General Counsel staff, often assisted by other staff of THECB, will initiate an investigation. The student must provide documentation that all Rice grievance, complaint, or appeal procedures have been exhausted.

7. The THECB, as part of its investigation, may request a Rice response, and may also contact other persons or entities named in the complaint or in Rice’s response, in order to ascertain relevant facts. The THECB will also, where appropriate, attempt to facilitate an informal resolution acceptable to both the student and Rice. When this is not feasible, the THECB will evaluate investigation results and recommend action by the Commissioner of the THECB, who after considering any recommendations will render a written determination dismissing the complaint or requiring Rice to take specific actions to remedy the complaint. The Commissioner may also request the THECB to review and decide issues regarding institutional integrity.
CONTACT INFORMATION

DISCLAIMER

This publication represents the most accurate information available at the time of its posting. The university reserves the right, in its discretion, to correct or otherwise change any information without notice. The information contained in this publication is not intended to, and does not, confer any contractual rights on any individual. Regarding course offerings, the departments have attempted to anticipate which courses will be offered and by whom and when. However, course offerings may be affected by various factors, including changes in faculty, student demand, and funding. Although efforts have been made to indicate these uncertainties, course offerings are subject to change without notice.
ETHICAL CONCERNS

Rice University pursues excellence at all levels and strives to practice the highest standards of ethical conduct. Rice students are encouraged, as are all community members, to communicate ethical concerns or questions to officials in their schools or departments, to the dean of undergraduates, or to the dean of graduate and postdoctoral studies. They may also contact the offices of Human Resources, Internal Audit, General Counsel, Equal Employment Opportunity Programs/Affirmative Action, or Risk Management, all of which are listed in the university directory and on its website.

The University also provides an ethics reporting mechanism through the EthicsPoint website (a third-party agent) that allows students and other community members a simple, risk-free way to report activities that may involve potential criminal conduct, ethical breaches, or violations of university policies. (Follow the EthicsPoint link at http://internalaudit.rice.edu/) Persons making reports through EthicsPoint may elect not to provide their names in making a complaint or raising a concern. Rice treats the investigation of any report as a confidential matter. Reports submitted to EthicsPoint are forwarded to the proper university officials for appropriate action. No person will be subjected to retaliation or reprisal for making a report or inquiry in good faith or for seeking guidance on dealing with potential or suspected improper behavior.
Rice University is committed to equal opportunity in education and employment. It is the policy of Rice University to attract qualified individuals of diverse backgrounds to its faculty, staff, and student body. Rice University does not discriminate against any individual on the basis of race, color, religion, sex, sexual orientation, gender identity, national or ethnic origin, ancestry, age, disability, or veteran status in its admissions, educational programs, or employment. In employment, the university seeks to recruit, hire, and advance qualified candidates, including women, members of underrepresented minority groups, individuals with disabilities, and certain protected classes of military veterans specified by law.
FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT (FERPA)

Notification of Rights under the Family Educational Rights and Privacy Act (FERPA)
The Family Educational Rights and Privacy Act (FERPA) is a federal law designed to protect the privacy of, and limit access to, student education records. The law affords students the following rights with respect to their education records:

1. the right to inspect and review the student’s education records within 45 days after the date Rice University (“Rice”) receives a request for access;
2. the right to seek amendment of the student’s education records that the student believes are inaccurate, misleading, or otherwise in violation of the student’s privacy rights under FERPA;
3. the right to provide written consent to disclosures of personally identifiable information (“PII,” as defined by law) contained in the student’s education records, except to the extent FERPA authorizes disclosure without consent;
4. the right to file a complaint with the U.S. Department of Education concerning alleged failures by Rice to comply with the requirements of FERPA. The name and address of the federal office that administers FERPA is:

   Family Policy Compliance Office
   U.S. Department of Education
   400 Maryland Ave. S.W.
   Washington, DC 20202

Inspect and Review Records
A student should make written request to any offices that maintain student education records, identifying the record(s) the student wishes to inspect. Though not exhaustive, as a guide for students, this is a list of the primary offices that maintain student education records: Office of the Registrar, Office of the Dean of Undergraduates, Office of Graduate and Postdoctoral Studies, Office of Student Judicial Programs, Office of Admission, Office of Financial Aid, Center for Career Development, Office of Student Activities, Office of Academic Advising, Office of International Students and Scholars, Cashier’s Office, and departmental offices. The appropriate Rice official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the Rice official to whom the request is submitted, that Rice official will advise the student of the correct official to whom the request should be addressed.

Amendment of Records
Any questions, problems, or written requests for amendment of records should be submitted to the Office of the Registrar. A student requesting to amend a record should clearly identify the part of the record the student wants changed and specify why it should be changed. If Rice decides not to amend the record as requested, Rice will notify the student in writing of the decision and of the student’s right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when the student is notified of the right to a hearing.

Disclosure of Information
As permitted by FERPA, Rice reserves the right to publish or release the following directory information without prior consent:

1. Name, permanent, local, mailing, and campus address, residential college affiliation, telephone and mobile number(s), campus email address(es), and Net ID
2. Date and place of birth
3. Classification and major and minor fields of study
4. Participation in officially recognized activities and sports
5. Weight and height of members of athletic teams
6. Dates of attendance, degrees, honors, and awards received
7. The most recent previous educational agency or institution attended by the student
8. Photograph

Students who would like Rice to withhold this directory information may do so by logging in to ESTHER, clicking Personal Information, clicking Release or Withhold Directory Information, and indicating that the information should be withheld. Thereafter, Rice will withhold access to, or release of, the student’s directory information until further written instruction is received. For more information regarding FERPA, please visit the U.S. Department of Education’s website (https://www2.ed.gov/policy/gen/guid/fpco/ferpa).

FERPA permits the disclosure of PII from students’ education records, without consent of the student, if the disclosure meets certain conditions found in 34 C.F.R. §99.31 of the FERPA regulations. Except for disclosures to school officials, disclosures related to some judicial orders or lawfully issued subpoenas, disclosures of directory information, and disclosures to the student, Section 99.32 of the FERPA regulations requires the institution to record the disclosure. Eligible students have a right to inspect and review the record of disclosures. A postsecondary institution may disclose PII from the education records without obtaining prior written consent of the student –

- To other school officials, within Rice whom Rice has determined have legitimate educational interests and require this information in order to perform instructional, supervisory, advisory, administrative, or other duties for Rice. These school officials include faculty, research personnel, staff (including law enforcement unit personnel and health staff), trustees, or students serving on official committees (such as disciplinary or grievance committees) or assisting another school official. A school official has a legitimate educational interest if the official needs to review an educational record in order to fulfill his or her professional responsibility to Rice. This includes contractors, consultants, auditors, attorneys, collection agents, volunteers, or other parties to whom Rice has outsourced institutional services or functions, provided that the conditions listed in §99.31(a)(1)(i)(B)(1) - (a)(1)(i)(B)(2) are met. (§99.31(a)(1))
- To officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student’s enrollment or transfer, subject to the requirements of §99.34. (§99.31(a)(2))
- To authorized representatives of the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or State and local educational authorities, such as a State postsecondary authority that is responsible for supervising the university’s State-supported education programs. Disclosures under this provision may be made, subject to the requirements of §99.35, in connection with an audit or evaluation of Federal- or State-supported education...
programs, or for the enforcement of, or compliance with, Federal
legal requirements that relate to those programs. These entities may
make further disclosures of PII to outside entities that are designated
by them as their authorized representatives to conduct any audit,
evaluation, or enforcement or compliance activity on their behalf.
(§§99.31(a)(3) and 99.35)
• In connection with financial aid for which the student has applied
or which the student has received, if the information is necessary
to determine eligibility for the aid, determine the amount of the
aid, determine the conditions of the aid, or enforce the terms and
conditions of the aid. (§99.31(a)(4))
• To organizations conducting studies for, or on behalf of, the school,
in order to: (a) develop, validate, or administer predictive tests;
(b) administer student aid programs; or (c) improve instruction.
(§99.31(a)(6))
• To accrediting organizations to carry out their accrediting functions.
(§99.31(a)(7))
• To parents of an eligible student if the student is a dependent for IRS
tax purposes, though Rice limits such information to financial details
of the student's enrollment. (§99.31(a)(8))
• To comply with a judicial order or lawfully issued subpoena.
(§99.31(a)(9))
• To appropriate officials in connection with a health or safety
emergency, subject to §99.36. (§99.31(a)(10))
• Information the school has designated as "directory information"
above and pursuant to §99.37. (§99.31(a)(11))
• To a victim of an alleged perpetrator of a crime of violence or a
non-forcible sex offense, subject to the requirements of §99.39.
The disclosure may only include the final results of the disciplinary
proceeding with respect to that alleged crime or offense, regardless
of the finding. (§99.31(a)(13))
• To the general public, the final results of a disciplinary proceeding,
subject to the requirements of §99.39, if the school determines the
student is an alleged perpetrator of a crime of violence or non-forcible
sex offense and the student has committed a violation of the school's
rules or policies with respect to the allegation made against him or
her. (§99.31(a)(14))
• To parents of a student regarding the student's violation of any
Federal, State, or local law, or of any rule or policy of the school,
governing the use or possession of alcohol or a controlled substance
if the school determines the student committed a disciplinary
violation and the student is under the age of 21. (§99.31(a)(15))

For further information regarding Rice's policy on student education
records, please contact the Office of the Registrar.

Rice University
Office of the Registrar–MS 57
6100 Main Street
Houston, TX 77005-1892
Email: registrar@rice.edu
MESSAGE FROM THE PRESIDENT

Now barely into our second century, Rice University has changed a tremendous amount since 59 students and 12 faculty members participated in the first matriculation in the early fall of 1912. We have remained true to our founding ideals and ambitions, building over the course of a century one of the great universities of America. Rice’s mission and aspirations are captured in our mission statement:

As a leading research university with a distinctive commitment to undergraduate education, Rice University aspires to pathbreaking research, unsurpassed teaching and contributions to the betterment of our world. It seeks to fulfill this mission by cultivating a diverse community of learning and discovery that produces leaders across the spectrum of human endeavor.

We are indeed an unusual university. While we are among the renowned research universities of the world, we also are among the smallest. And although comparatively small, we are committed to a wide spectrum of endeavors ranging across our eight schools and many inter-disciplinary institutes and centers. Our success is built on the contributions of every part of our community: graduate and undergraduate students, faculty and staff, alumni and other supporters across our city and around the world.

Our ambition and our standards are not constrained by our size. We strive to be bold in our aspirations and entrepreneurial in our approach. We seek to make a distinctive contribution to our home city of Houston while achieving a global impact through education, research, and service. We are committed to enriching understanding, creating opportunity, discovering knowledge, and improving our world.

The General Announcements of the University sets forth the immense array of opportunities for our students, as well as the rules and policies which govern their participation as students in the university. But we demand more of each other than just adherence to rules and policies. We expect that all members of our community will be guided in all their endeavors by the core Rice values: Responsibility, Integrity, Community and Excellence. These values are just as important as the academic offerings and rules included in these announcements. If you have questions about how rules and policies may apply to you, we urge you to seek advice from one of the many sources available to you.

We take great pride in the diversity of our community. Our success requires thoughtfulness and respect in every interaction on our campus, whether with members of the Rice community or the visitors we welcome. Our “culture of care” demands not only that we not cause harm to others, but also that we look out for each other and provide or seek help when needed.

We are pleased that you have chosen to become a part of this dynamic university as it embarks on its second century of excellence and achievement. On behalf of our faculty and staff, I wish you every success as you pursue your educational endeavors. We take pride in the special community of Rice, and look forward to working with you as you seize the opportunities of Rice to achieve your aspirations and dreams.

David W. Leebron
President
Rice University
