- **Description:** With a focus on the modern period, this seminar will examine iconoclastic theory and practice from antiquity to the present. Why, we will ask, have people so incessantly felt compelled to ban or destroy images, and what can this compulsion tell us about the nature of visual representation itself? Graduate/Undergraduate Equivalency: HART 606. Mutually Exclusive: Credit cannot be earned for HART 406 and HART 606.

### HART 407 - POP ART
- **Short Title:** POP ART
- **Department:** Art History
- **Grade Mode:** Standard Letter
- **Course Type:** Seminar
- **Credit Hours:** 3
- **Restrictions:** Graduate level students may not enroll.
- **Course Level:** Undergraduate Upper-Level
- **Description:** This seminar will examine the history of Pop art by looking in detail at three or four primary figures associated with the term; likely subjects include Andy Warhol, Gerhard Richter, Ed Ruscha, Richard Hamilton, and others. Visits to local museum collections and attention to theoretical writings on art and mass culture are planned. Graduate/Undergraduate Equivalency: HART 607. Mutually Exclusive: Credit cannot be earned for HART 407 and HART 607.
HART 410 - ARCHITECTURE AND DYNASTIC ASPIRATION IN THE EARLY ROMAN EMPIRE
Short Title: ARCH AND DYNASTIC ASPIRATIONS
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Nero is often remembered as the tyrannical emperor who let the city burn and gorged on ill-gotten luxury; his successors are conceived as good emperors who built the Coliseum, Imperial Palace and the vast majority of Rome's remaining monuments. In this course you will question whether things were so straightforward. Cross-list: CLAS 417. Graduate/Undergraduate Equivalency: HART 510. Mutually Exclusive: Credit cannot be earned for HART 410 and HART 510.

HART 412 - ADVANCED SEMINAR IN ARCHITECTURE
Short Title: ADV SEMINAR IN ARCHITECTURE
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Small, focused, advanced discussion, workshop and/or design based courses on topics of recent research in architecture, delivered by RSA full time or visiting faculty. This seminar is open to RSA undergraduate students junior-level and above, and RSA graduate students. Students from other departments may enroll in the course with instructor permission. See the RSA website for more information: arch.rice.edu/courses. Cross-list: ARCH 412. Graduate/Undergraduate Equivalency: HART 612. Mutually Exclusive: Credit cannot be earned for HART 412 and HART 612. Repeatable for Credit.

HART 413 - MURDER AND MODERNISM
Short Title: MURDER AND MODERNISM
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: "Murder, George Orwell lamented in his 1946 essay "Decline of the English Murder," isn't what it used to be. Unlike what he calls "our great period in murder" - roughly 1850 to the beginning of the Second World War - contemporary murder has lost its aesthetic appeal. "There is," he writes, "no depth of feeling in it." This class will examine the modernist fascination with murder, asking not only why it became a topic of such particular interest to artists, writers, and filmmakers during this time, but what it can tell us about modernist aesthetics more broadly. Graduate/Undergraduate Equivalency: HART 507. Mutually Exclusive: Credit cannot be earned for HART 413 and HART 507.

HART 414 - VISUAL CULTURE OF MEDIEVAL PILGRIMAGE
Short Title: MEDIEVAL PILGRIMAGE
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar explores the rich visual culture associated with Medieval pilgrimage between the fourth and fifteenth centuries. The experience of pilgrimage was shaped by symbols, images, and places encountered along the roads to sites of sacred significance, especially the roads to Jerusalem, Rome, Santiago, and Canterbury. We will examine the theological, practical, visual, and experiential aspects of pilgrimage in Western Europe and the Holy Land as understood through visual culture and contemporary texts. Instructor Permission Required. Mutually Exclusive: Credit cannot be earned for HART 427 and HART 527.

HART 420 - ARTISTIC ENCOUNTERS: EUROPE AND THE ISLAMIC WORLD IN THE EARLY MODERN AND MODERN PERIODS
Short Title: EUROPE & THE ISLAMIC WORLD
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar aims to assess the mutual impact of the visual cultures of Europe and the Islamic world through history. Focusing on 15th-19th-century material including architecture, painting, photography, textiles, and sartorial fashion, it examines channels of interaction, forms of influence, and modes of representation in aesthetic, cultural, philosophical, and political terms, and in light of concurrent theoretical debates.

HART 427 - VISUAL CULTURE OF MEDIEVAL PILGRIMAGE
Short Title: MEDIEVAL PILGRIMAGE
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar explores the rich visual culture associated with Medieval pilgrimage between the fourth and fifteenth centuries. The experience of pilgrimage was shaped by symbols, images, and places encountered along the routes to sites of sacred significance, especially the roads to Jerusalem, Rome, Santiago, and Canterbury. We will examine the theological, practical, visual, and experiential aspects of pilgrimage in Western Europe and the Holy Land as understood through visual culture and contemporary texts. Instructor Permission Required. Mutually Exclusive: Credit cannot be earned for HART 427 and HART 527.

HART 430 - THE GROTESQUE
Short Title: THE GROTESQUE
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: "Murder, George Orwell lamented in his 1946 essay "Decline of the English Murder," isn't what it used to be. Unlike what he calls "our great period in murder" - roughly 1850 to the beginning of the Second World War - contemporary murder has lost its aesthetic appeal. "There is," he writes, "no depth of feeling in it." This class will examine the modernist fascination with murder, asking not only why it became a topic of such particular interest to artists, writers, and filmmakers during this time, but what it can tell us about modernist aesthetics more broadly. Graduate/Undergraduate Equivalency: HART 507. Mutually Exclusive: Credit cannot be earned for HART 413 and HART 507.

HART 430 - THE GROTESQUE
Short Title: THE GROTESQUE
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: "Murder, George Orwell lamented in his 1946 essay "Decline of the English Murder," isn't what it used to be. Unlike what he calls "our great period in murder" - roughly 1850 to the beginning of the Second World War - contemporary murder has lost its aesthetic appeal. "There is," he writes, "no depth of feeling in it." This class will examine the modernist fascination with murder, asking not only why it became a topic of such particular interest to artists, writers, and filmmakers during this time, but what it can tell us about modernist aesthetics more broadly. Graduate/Undergraduate Equivalency: HART 507. Mutually Exclusive: Credit cannot be earned for HART 413 and HART 507.
HART 431 - ARCHITECTURE OF THE GOTHIC CATHEDRAL FROM THE MIDDLE AGES TO THE TWENTIETH CENTURY

Short Title: ARCH OF GOTHIC CATHEDRAL
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will focus on one of the most important contributions to the history of western architecture--the Gothic cathedral. The course will approach the material from a number of different perspectives--the formal and technical development of Gothic architecture; the Medieval architect and the design of Gothic buildings, the social, economic, and political history of "big church" building in the Middle Ages; Gothic architecture as experience and metaphor; and the afterlife of the Gothic cathedral from Vasari to the National Cathedral in Washington, D.C. Cross-list: MDEM 431.

HART 434 - SEEING SEX IN EUROPEAN ART, 1400-1700

Short Title: SEEING SEX IN EUROPEAN ART
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will examine the visual history of sexuality from 1400-1700. It will explore how imagery structured sexual desire; the role of erotic sacred art; the rise of pornography; the intersection of spatial topography and sexuality; the linkage of licit and illicit sexualities; and the sexuality of artist and patrons. Cross-list: MDEM 434, SWGS 434.
Graduate/Undergraduate Equivalency: HART 534. Mutually Exclusive: Credit cannot be earned for HART 434 and HART 534.

HART 435 - MULTICULTURAL EUROPE, 1400-1700

Short Title: MULTICULTURAL EUROPE, 1400-1700
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The art of Europe was never the product of a single culture working in isolation. This seminar will explore the multicultural aspects of medieval and early modern Europe by focusing on the visual culture of groups who defined themselves or are today defined by nationality, race, or religion. Cross-list: HIST 443, MDEM 435. Graduate/Undergraduate Equivalency: HART 535. Mutually Exclusive: Credit cannot be earned for HART 435 and HART 535.

HART 437 - VISUAL CULTURE OF MEDIEVAL PILGRIMAGE

Short Title: MEDIEVAL PILGRIMAGE
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar explores the rich visual culture associated with medieval pilgrimage between the 4th and 15th centuries. The experience of pilgrimage was shaped by symbols, images, and places encountered along the routes to sites of sacred significance, especially the Jerusalem, Rome, Santiago, and Canterbury. We will examine the theological, practical, visual, and experiential aspects of pilgrimage in Western Europe and the Holy Land as understood through material culture. Instructor Permission Required. Cross-list: FREN 437, MDEM 437. Graduate/Undergraduate Equivalency: HART 537. Recommended Prerequisite(s): Completion of one 300-level course or Permission of Instructor. Mutually Exclusive: Credit cannot be earned for HART 437 and HART 537.

HART 440 - ISSUES IN THE HISTORY OF PRINTS, PRE-MODERN TO PRESENT

Short Title: ISSUES IN HISTORY OF PRINTS
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: With their distinctive technical, social, and commercial associations, prints are often sidelined in traditional art histories. This course will introduce recent scholarship on the multiple image from the late middle ages to the present, with stress on the transformations of printmaking from the development of photography into our digital age. Graduate/Undergraduate Equivalency: HART 640. Mutually Exclusive: Credit cannot be earned for HART 440 and HART 640.

HART 450 - EARLY MODERN ART

Short Title: EARLY MODERN ART
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course introduces the major developments, key figures and works of early modernism, a trajectory whose beginnings are now generally located in the late-nineteenth century. Covering a period from roughly 1900 - 1945, we will trace Modernism's unfolding in the avant-garde practices of the first three decades of the 20th century, as well as the first anti-modernist critiques, ending with Modernism's eventual destruction in the authoritarian politics of the 1930s, World War II, and the Holocaust.
HART 451 - MODELS OF ABSTRACTION
Short Title: MODELS OF ABSTRACTION
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will examine a range of different models of abstract painting and sculpture as they appear throughout the twentieth century. Looking closely at the historical contexts that gave rise to abstraction particular attention will be paid to how apparently similar forms of abstraction can denote very different kinds of meaning. Graduate/Undergraduate Equivalency: HART 551. Mutually Exclusive: Credit cannot be earned for HART 451 and HART 551.

HART 452 - MANET(S) AND MODERNISM(S)
Short Title: MANET(S) AND MODERNISM(S)
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar considers the pivotal figure of Edouard Manet. Combining a study of paintings from throughout his career, with close readings of primary sources, we will assess the key aspects of his style and subject matter. We will also consider art historical to his work and relationship to modernity. Graduate/Undergraduate Equivalency: HART 552. Mutually Exclusive: Credit cannot be earned for HART 452 and HART 552.

HART 454 - THE ARTIST AS ETHNOGRAPHER - THE ETHNOGRAPHER AS ARTIST
Short Title: THE ETHNOGRAPHER AS ARTIST
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will examine the intersections between the historical avant-garde, contemporary art, and anthropology. Developing on the so-called "ethnographic turn" within contemporary art - what Hal Foster has famously termed "the artist as ethnographer" - we will look at the way that this tendency within artistic production has doubled back onto the field of anthropology, leading to what could be called "the ethnographer as artist." Particular attention will be paid to the role of the art museum and international art exhibitions. Cross-list: ANTH 454.

HART 457 - VIDEO AND EXPANDED CINEMA
Short Title: VIDEO AND EXPANDED CINEMA
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar explores the emergence of video and "expanded cinema" as a primary field of artistic practice over the course of the 1960s and 1970s. We will examine seminal works by artists including Andy Warhol, Dan Graham, and Robert Whitman as well as the shifting aesthetic, political, and media landscapes in which this work emerged. Cross-list: FILM 455. Graduate/Undergraduate Equivalency: HART 557. Mutually Exclusive: Credit cannot be earned for HART 457 and HART 557.

HART 460 - MASS CULTURE & THE AVANT-GARDE
Short Title: MASS CULTURE & THE AVANT-GARDE
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar will explore the close relationship between mass culture and avant-garde art from the mid-nineteenth century to the present day. In particular, we will examine how artists have both borrowed from and reacted against mass cultural forms—from comic books to television—as a means to renew their practice. Artists to be considered include Gustave Courbet, Pablo Picasso, Kurt Schwitters, Andy Warhol, Cindy Sherman and others. Graduate/Undergraduate Equivalency: HART 564. Mutually Exclusive: Credit cannot be earned for HART 460 and HART 564.

HART 461 - ART OF THE 60s AND 70s
Short Title: ART OF THE 60s AND 70s
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar will explore the close relationship between mass culture and avant-garde art from the mid-nineteenth century to the present day. In particular, we will examine how artists have both borrowed from and reacted against mass cultural forms—from comic books to television—as a means to renew their practice. Artists to be considered include Gustave Courbet, Pablo Picasso, Kurt Schwitters, Andy Warhol, Cindy Sherman and others. Graduate/Undergraduate Equivalency: HART 564. Mutually Exclusive: Credit cannot be earned for HART 460 and HART 564.
HART 463 - PRACTICING UTOPIA: ARCHITECTURE, EUGENICS AND THE MODERN LATIN CITY
Short Title: PRACTICING UTOPIA
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar will explore the alliance between aesthetics, science, and ideology at the core of French and Latin American modernism. Focusing on early twentieth-century scientific and cultural dialogues between France and Latin America, this seminar will have as main territories of exploration: Paris, Rio de Janeiro, Buenos Aires, Havana, and Caracas. Cross-list: ARCH 452. Graduate/Undergraduate Equivalency: HART 563. Mutually Exclusive: Credit cannot be earned for HART 463 and HART 563.

HART 465 - LATIN AMERICAN BODIES: ON MODERNISM
Short Title: LATIN AMER BODIES:ON MODERNISM
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar will examine theories and practices of modernism and modernization within Latin America-Europe dialogues. Designed as a laboratory of ideas and forms, this seminar will probe critical perspectives on art and architecture’s relation to society and science. Each week, we will examine a theorist, an artist, and an architect. Graduate/Undergraduate Equivalency: HART 566. Mutually Exclusive: Credit cannot be earned for HART 465 and HART 566.

HART 467 - NATURE IN-VITRO: BODIES, GARDENS AND BUILT FORMS
Short Title: NATURE IN-VITRO
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar considers theories and narratives of nature in the crafting of modern and contemporary art and architecture in the Americas. We will travel from Humboldt’s re-imagined geographies, Jean-Baptiste Lamarck’s re-formulated notions of milieu, and Xavier Bichat’s re-conceptualized human body to 20th century earthworks and current obsessions with ecology and sustainability. Cross-list: ARCH 462. Graduate/Undergraduate Equivalency: HART 567. Mutually Exclusive: Credit cannot be earned for HART 467 and HART 567.

HART 481 - AUTEUR FILM: CASE STUDIES OF THREE AUTEURS
Short Title: AUTEUR FILM
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will explore the tradition of auteur filmmaking, with an emphasis on how this particular artistic mode situates itself within the evolving system of Hollywood institutional film. The auteur, in contrast to other filmmakers, exhibits unparalleled control over the production and post-production processes and is uniquely identifiable through the notable conventions of aesthetics, style, theme, content, atmosphere, etc. FILM 485/HART 481 (4 Credit Hours) will require completion of additional coursework for the additional credit than the FILM 285/HART 283 (3 Credit Hours). Credit may not be received for more than one of FILM 285 or FILM 485 or Hart 283 or HART 481. Cross-list: FILM 485. Equivalency: HART 283. Mutually Exclusive: Credit cannot be earned for HART 481 and HART 283.

HART 485 - GENDER AND HOLLYWOOD CINEMA IN THE 1950’S
Short Title: GENDER AND HOLLYWOOD 1950’S
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines representations of gendered subjectivity in Hollywood cinema during the 1950s. Some of the topics to be addressed include the uneasy relationship between normative domesticity and heterosexual masculinity, issues of voyeurism, and eroticism, and the ongoing conflict between liberated individualism and social conformity in corporate culture and bourgeois society. Cross-list: SWGS 485.
HART 486 - STUDIES IN FILM
Short Title: STUDIES IN FILM
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Topics will vary from year to year.

HART 487 - LITERATURE, ART AND COLONIALITY
Short Title: LITERATURE, ART & COLONIALITY
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This is the undergraduate senior version of the graduate level seminar FREN/HART 587. Both the course’s reading list and the length of the research are adjusted to accommodate undergraduate needs. How do concepts like coloniality, exoticism, primitivism, the modern baroque apply to texts and artifacts produced at the crossroads of (post)colonial and transnational encounters? Focus on Orientalists, Matisse, Djebar, Simon, Boudjedra, Borduas, Atlant, Khadda, and Glissant. Taught in English. Choice of reading materials and assignments in either English or French. Cross-list: FREN 487. Mutually Exclusice: Credit cannot be earned for HART 487 and HART 587.

HART 493 - WALTER BENJAMIN, MEDIA & MODERNITY
Short Title: WALTER BENJAMIN
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar will examine the key theoretical writings on media and modernity by Walter Benjamin, one of the first twentieth-century critics to place new forms of visual experience and technology at the center of his understanding of modern life. The course will pay particular attention to Benjamin’s writings on urbanism, film and photography, and the ways in which these relate to avant-garde practices such as Dada, Surrealism, and New Objectivity (Neue Sachlichkeit). Taught in English. Choice of reading materials and assignments in either English or French. Credit cannot be earned for HART 493 and HART 593.

HART 498 - SPECIAL TOPICS IN ART THEORY AND CRITICISM
Short Title: SPECIAL TOPICS
Department: Art History
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent study, reading, or special research in art history. Instructor Permission Required. Repeatable for Credit.

HART 500 - INTERNSHIP PROGRAM I
Short Title: INTERNSHIP PROGRAM I
Department: Art History
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate level course that will provide select students a practicum in museum work accompanied by an introduction to a history of museums, including varieties of museums, their role in society, and significant issues in museums today. Instructor Permission Required.

HART 501 - INTERNSHIP PROGRAM II
Short Title: MUSEUM INTERNSHIP
Department: Art History
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate credit for work as museum intern at a variety of museums. Instructor Permission Required. Repeatable for Credit.

HART 503 - INDEPENDENT STUDY (SPRING)
Short Title: INDEPENDENT STUDY (SPRING)
Department: Art History
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate research paper. Must take HART 502 and HART 503 to receive credit.

HART 504 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Art History
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3-6
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate independent study, reading and research on variable topics. Instructor Permission Required. Repeatable for Credit.
HART 506 - HISTORY AND THEORY III - 1890-1968
Short Title: HISTORY & THEORY III 1890-1968
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ARCH 345 or HART 345 or ARCH 645 or HART 645
Description: This course surveys the history and theory of architecture and urbanism between 1890 and 1968, tracing the critical shifts in architectural thought and practice that inaugurated, constituted, and questioned architectural modernism. In particular, the course considers the development of architectural knowledge as the field engaged and contributed to the great social, political, cultural, and technological changes of the period. Organized around a series of significant case studies considered particular designed responses to their material, intellectual, and sociopolitical context, the course elucidates the influence of contingent conditions on architectural design, but emphasizes the designer’s efforts to reinforce, reform, or transform those conditions. The course charts the ongoing attempt to account for this activity historically and theoretically and the operative role of these accounts both during the period and subsequently. Cross-list: ARCH 646.

HART 507 - MURDER AND MODERNISM
Short Title: MURDER AND MODERNISM
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: “Murder, George Orwell lamented in his 1946 essay “Decline of the English Murder,” isn’t what it used to be. Unlike what he calls “our great period in murder” - roughly 1850 to the beginning of the Second World War - contemporary murder has lost its aesthetic appeal. “There is,” he writes, “no depth of feeling in it.” This class will examine the modernist fascination with murder, asking not only why it became a topic of such particular interest to artists, writers, and filmmakers during this time, but what it can tell us about modernist aesthetics more broadly.” Graduate/Undergraduate Equivalency: HART 413. Mutually Exclusive: Credit cannot be earned for HART 507 and HART 413.

HART 508 - LIVING IN THE CITY IN THE OTTOMAN EMPIRE
Short Title: LIVING IN THE CITY
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar combines primary and secondary sources to explore the urban experiences of Ottoman men and women in the 18th and early 19th centuries. Looking at several cities including Istanbul, Izmir, Salonika, Damascus, Aleppo and Alexandria, we will discuss such issues as neighborhood and community life, public spaces and recreational culture perceptions of space, urban institutions, Muslim and non-Muslim relations, migration and marginality, violence and death. Reading knowledge of French and /or Turkish helpful but not necessary. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Cross-list: ARCH 518. Graduate/Undergraduate Equivalency: HART 308. Mutually Exclusive: Credit cannot be earned for HART 508 and HART 308.

HART 509 - THE DAWN OF ROME: GENERATING THE URBAN, SOCIAL AND POLITICAL LIFE OF THE ETERNAL CITY
Short Title: THE DAWN OF ROME
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: In this course you will uncover the roots of the Eternal City, Rome. Through analysis of archaeological remains, art historical methodologies and theories of social space, intentionality, structuration and agency, you will question how and why Rome became a city and a culture the reshaped the world. The course will focus on the first 500 years of Roman art and society, ca. 800-300 BCE, looking closely at the kingship of Rome, the genesis of the Roman Republic, and the ability to understand a distant culture through artistic manufacture, materiality and philosophical shift. Graduate students will be expected to complete all the requirements of this class in addition to writing a substantial research paper at the end of the semester. Graduate/Undergraduate Equivalency: HART 309. Mutually Exclusive: Credit cannot be earned for HART 509 and HART 309.
HART 510 - ARCHITECTURE AND DYNASTIC ASPIRATION IN THE EARLY ROMAN EMPIRE
Short Title: ARCH AND DYNASTIC ASPIRATIONS
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Nero is often remembered as the tyrannical emperor who let the city burn and gorged on ill-gotten luxury; his successors conceived as good emperors who built the Coliseum, Imperial Palace and the vast majority of Rome's remaining monuments. In this course you will question whether things were so straightforward. Graduate students will be expected to complete additional readings and write a substantial research paper, due at the end of the semester. Graduate/Undergraduate Equivalency: HART 410. Mutually Exclusive: Credit cannot be earned for HART 510 and HART 410.

HART 511 - ART AND ARCHAEOLOGY OF THE ANCIENT NEAR EAST
Short Title: ANCIENT NEAR EAST
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An in-depth examination of the art and archaeology of ancient Mesopotamia, Syria, Anatolia and Persia. Beginning in the Neolithic period, we will examine the development of Near Eastern art and architecture through the study of ancient sites and their associated material culture. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 311. Mutually Exclusive: Credit cannot be earned for HART 511 and HART 311.

HART 513 - THE HELLENISTIC AGE: ALEXANDER TO AUGUSTUS
Short Title: THE HELLENISTIC AGE
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: We examine the art, architecture, and cultural history of the Hellenistic Age, from Alexander the Great (d. 323 BC) until the death of Cleopatra (31 BC). During this period a brilliant Greek-based culture developed from the Mediterranean to the Indus Valley, transforming Greeks, Persians, Jews, Romans and many others. Graduate students will be assigned additional readings and a research paper will be due at the end of the semester.

HART 515 - OTTOMAN EMPIRE
Short Title: OTTOMAN EMPIRE
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This graduate seminar examines different approaches to study of modernity and modernization in the Ottoman Empire from the onset of the Tanzimat reforms in 1839 until after WWI and the empire's demise. By engaging equally the social and spatial dimensions of the major societies, including Istanbul, Damascus, Beirut, Cairo, and Izmir we will explore the various meanings of modernity and modernization as these reflect at the urban architectural scales, in urban life, in localized discourses on the city, through such emerging institutions as the museum, and the context of expanding migration and global works.

HART 516 - CITY & FESTIVAL: CULT PRACTICES & THE ARCHITECTURAL PRODUCTION IN THE ANCIENT GRECO-ROMAN WORLD
Short Title: CITY AND FESTIVAL
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: How do social events, festivals, cult practices, public spectacles shape a city? The course will explore what makes a city in the first place, and attempt to make sense of the fragmentary archaeological evidence from the ancient Greco-Roman world in understanding, reconstructing cities. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester.

HART 518 - LITERATURE AND VISUAL ART
Short Title: LITERATURE AND VISUAL ART
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course examines the relationship between literature and visual art. It covers a variety of textual and visual sources; theoretical materials will include works from literary studies, visual culture, art history, critical theory and aesthetics. Cross-list: ENGL 525. Repeatable for Credit.
Course URL: www.english.rice.edu
HART 520 - ISTANBUL - LIFE OF AN IMPERIAL CITY
Short Title: ISTANBUL: IMPERIAL CITY
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate Equivalent of HART 220. Additional requirements will include 3 - 7 to 8 page papers. These will include limited research, based on bibliography. The 3 papers will be in lieu of the 1 hours midterm and 1 hour final tests required for the 200 class. Cross-list: ARCH 520.

HART 521 - IMPERIAL CITY: ISTANBUL 1453-1922
Short Title: ISTANBUL IMPERIAL CITY
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This thematic seminar examines significant historical moments in the architectural and urban cultural of the Ottoman imperial capital from the moment it was conquered until the demise of the Ottoman Empire. Weekly readings and discussions will cover a range of topics including building patronage, architectural decorum, the Byzantine legacy, artistic relations with Persia, India and Europe, cultural pluralism, neighborhood and public life, law and urban order, modernity and modernization. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these reading to be turned in at the end of the semester. We will meet at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Cross-list: ARCH 521. Graduate/Undergraduate Equivalency: HART 321. Mutually Exclusive: Credit cannot be earned for HART 521 and HART 321.

HART 522 - JERUSALEM TO ISFAHAN
Short Title: JERUSALEM TO ISFAHAN
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A seminar on key topics of the study of visual cultures in the medieval and early modern Muslim world focused on specific works of art. Politics of architectural patronage, dissemination of visual languages, calligraphy, "ornament" and figural representation in Islam, cross-cultural exchanges and trans-religious iconographies are among the topics discussed. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these reading to be turned in at the end of the semester. We will meet at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Cross-list: ARCH 522. Graduate/Undergraduate Equivalency: HART 322. Mutually Exclusive: Credit cannot be earned for HART 522 and HART 322.

HART 523 - THE MEDITERRANEAN WORLD
Short Title: THE MEDITERRANEAN WORLD
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate seminar focused on significant moments of the history of cultural exchanges around the Mediterranean. Explores questions of reception, adoption and adaptation of artistic and architectural vocabularies, shifting secular and religious iconographic meanings, circulation of aesthetics and channels of exchange from the vantage point of medieval and early modern Muslim empires.

HART 525 - LOOKING AT PRINTS 1400-1700
Short Title: LOOKING AT PRINTS 1400-1700
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The class has several goals: to gain a thorough historical understanding of prints by major masters as Schongauer, Mantegna, Durer, and Rembrandt as well as more popular prints, explore key issues in the study of prints, such as how they revolutionized European culture, their patronage, markets, functions, and techniques; and to examine the prints first-hand. Graduate students are expected to complete all the requirements in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 333. Mutually Exclusive: Credit cannot be earned for HART 525 and HART 333.

HART 526 - BRAZIL BUILT: THE CLINIC, THE TROPICAL AND THE AESTHETIC
Short Title: BRAZIL BUILT
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: From Brazil Builds, MOMA's 1943 celebrated exhibition to Brasilia, the supermodern capital created ex-nihilo in the middle of nowhere, to today's worldwide attention on Brazil, this seminar examines the built environment - natural and architectural - as the main transmitter of modernism in Brazil. This is a seminar on Brazilian modernism and its discontents. Cross-list: ARCH 515. Graduate/Undergraduate Equivalency: HART 310. Mutually Exclusive: Credit cannot be earned for HART 526 and HART 310.
HART 527 - VISUAL CULATURE OF MEDIEVAL PILGRIMAGE
Short Title: MEDIEVAL PILGRIMAGE
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar explores the rich visual culture associated with Medieval pilgrimage between the fourth and fifteenth centuries. The experience of pilgrimage was shaped by symbols, images, and places encountered along the routes to sites of sacred significance, especially the roads to Jerusalem, Rome, Santiago, and Canterbury. We will examine the theological, practical, visual, and experiential aspects of pilgrimage in Western Europe and the Holy Land as understood through visual culture and contemporary texts. Graduate students will meet with the professor every other week to discuss 16 additional recommended readings - beyond those assigned to the undergraduates - and to discuss the progress of their 20-25 page research paper. Instructor Permission Required. Mutually Exclusive: Credit cannot be earned for HART 527 and HART 427.

HART 528 - MIDDLE EASTERN CITIES - SPACE, MODERNITY AND MEMORY (1840-1945)
Short Title: MIDDLE EASTERN CITIES
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar engages in debates about urban modernity focusing on three cities Istanbul, Cairo and Beirut. We examine these cities during the period of rapid modernization brought about by the Ottoman reforms of the 1840s and their post-Ottoman period. We will explore innovative methodologies to the study of Mediterranean cities by reflecting on the everyday life, the multiplicity of processes inherent to the shaping of urban space, questions of identities and concepts of citizenship, and the tensions playing out in the making of a modern urban order. Cross-list: ARCH 528.

HART 529 - STREETS AND URBAN LIFE: PARIS TO ISTANBUL
Short Title: STREETS AND URBAN LIFE
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Cross-list: ARCH 529. Graduate/Undergraduate Equivalency: HART 329. Mutually Exclusive: Credit cannot be earned for HART 529 and HART 329.

HART 530 - EARLY MEDIEVAL ART
Short Title: EARLY MEDIEVAL ART
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 330. Mutually Exclusive: Credit cannot be earned for HART 530 and HART 330.

HART 531 - GOTHIC ART
Short Title: GOTHIC ART
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 331. Mutually Exclusive: Credit cannot be earned for HART 531 and HART 331.

HART 532 - ART OF THE COURTS
Short Title: ART OF THE COURTS
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 332. Mutually Exclusive: Credit cannot be earned for HART 532 and HART 332.
HART 534 - SEEING SEX IN EUROPEAN ART, 1400-1700
Short Title: SEEING SEX IN EUROPEAN ART
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Cross-list: SWGS 534. Graduate/Undergraduate Equivalency: HART 434. Mutually Exclusive: Credit cannot be earned for HART 534 and HART 434.

HART 535 - MULTICULTURAL EUROPE, 1400-1700
Short Title: MULTICULTURAL EUROPE,1400-1700
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The art of Europe was never the product of a single culture working in isolation. This seminar will explore the multicultural aspects of medieval and early modern Europe by focusing on the visual culture of groups who defined themselves or are today defined by nationality, race, or religion. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all the readings to be turned in at the end of the semester. We will meet for an additional two or three weeks to discuss the interpretive and methodological problems and ideas associated with the readings. Graduate students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Cross-list: HURC 508. Graduate/Undergraduate Equivalency: HART 435. Mutually Exclusive: Credit cannot be earned for HART 535 and HART 435.

HART 536 - CINEMA AND THE CITY
Short Title: CINEMA AND THE CITY
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Cross-list: HURC 508. Graduate/Undergraduate Equivalency: HART 336. Mutually Exclusive: Credit cannot be earned for HART 536 and HART 336.

HART 538 - RENAISSANCE GOTHIC ARCHITECTURE
Short Title: RENAISSANCE GOTHIC ARCHITECTR
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar will examine the architecture constructed in northern Europe between 1450 and 1550 bridging the gap between the end of the Middle Ages and the Early Modern Period. The ambiguous term of “Renaissance Gothic” has been coined to describe a form of architecture that straddles two fundamentally different periods with radically different approaches to the meaning, function and form of architecture. We will explore why and how Gothic architecture, the dominant style of church building for almost 350 years, was abandoned in favor of a new imported form.

HART 539 - AMERICAN ART AND ARCHITECTURE I: 1620-1800
Short Title: AMERICAN ART: 1620-1800
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Painting, architecture, urban design, and the decorative arts in the colonies and early United States. Highlights will include design at Monticello and Mount Vernon; the portraiture of John Singleton Copley; Georgian and Federal-period architecture in Boston, New York, Williamsburg, and Philadelphia; and Spanish and Dutch colonial art and architecture. Graduate/Undergraduate Equivalency: HART 339. Mutually Exclusive: Credit cannot be earned for HART 539 and HART 339.

HART 540 - ADVANCED STUDY IN MUSEUMS AND HERITAGE: ARTS OF ANCIENT MEDITERRANEAN AT THE MENIL COLLECTION
Short Title: ADV STUDY IN MUSEUMS/HERITAGE
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course introduces students to advanced ethical, legal and practical issues facing museums as they acquire and maintain collections from areas prone to looting and destruction, especially the Ancient Mediterranean. We will examine the civic engagement and operation of the Menil Collection through close, on-site archival and object study. Cross-list: HURC 508. Graduate/Undergraduate Equivalency: HART 312. Mutually Exclusive: Credit cannot be earned for HART 540 and HART 312.
HART 541 - EARLY RENAISSANCE ART IN ITALY
Short Title: EARLY RENAISSANCE ART IN ITALY
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of Italian art and architecture from Giotto to Botticelli, with emphasis on painting and sculpture in the 15th century. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 341. Mutually Exclusive: Credit cannot be earned for HART 541 and HART 341.

HART 542 - THE HIGH RENAISSANCE AND MANNERISM IN ITALY
Short Title: HIGH RENAISSANCE&MANNERISM ITALY
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of the High Renaissance, with emphasis on its leading masters (e.g., Leonardo, Raphael, Bramante, Michelangelo, and Titian). Includes a study of mannerism, the stylistic art produced after the first quarter of the 16th century. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 342. Mutually Exclusive: Credit cannot be earned for HART 542 and HART 342.

HART 543 - MASTERS OF THE BAROQUE ERA
Short Title: MASTERS OF THE BAROQUE ERA
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of the works of the greatest painters and sculptors in Europe during the Baroque period. Includes Rembrandt, Rubens, Caravaggio, Poussin, Claude, and Velazquez. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 343. Mutually Exclusive: Credit cannot be earned for HART 543 and HART 343.

HART 544 - CAPITALISM AND CULTURE
Short Title: CAPITALISM AND CULTURE
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar will examine the way European culture, especially art, was shaped by the rise of the monetary economy and capitalism, beginning in the late Middle Ages and continuing into modern times. Faculty will meet separately on a bi-weekly basis with graduate students in the class who will also be assigned extra readings. Graduate work will be evaluated on a more challenging scale, with particular attention to methodological and interpretive rigor. Graduate/Undergraduate Equivalency: HART 344. Mutually Exclusive: Credit cannot be earned for HART 544 and HART 344.

HART 545 - HISTORY & THEORY I (INTRODUCTION)
Short Title: HISTORY & THEORY I (INTRO)
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This introductory course exposes student's issues and debates that have driven architects and theorists from the early twentieth century to the present. The course is structured around a sequence of fourteen themes that have recurred as major issues throughout architectural history. Focusing on topics, ranging from representation, to media, to politics, urbanity, or the environment, teach theme is presented as a debate between differing viewpoints, in order to expose the positions that have motivated both theory and practice. In weekly discussion sections, we will be analyzing buildings and discussing canonical texts. These sections provide opportunities for students to develop their own positions on the issues debated, and to refine their ability to make arguments. Cross-list: ARCH 525. Graduate/Undergraduate Equivalency: HART 225. Mutually Exclusive: Credit cannot be earned for HART 545 and HART 225.

HART 546 - PICASSO, POLLOCK, WARHOL
Short Title: PICASSO, POLLOCK, WARHOL
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar will examine the way European culture, especially art, was shaped by the rise of the monetary economy and capitalism, beginning in the late Middle Ages and continuing into modern times. Faculty will meet separately on a bi-weekly basis with graduate students in the class who will also be assigned extra readings. Graduate work will be evaluated on a more challenging scale, with particular attention to methodological and interpretive rigor. Graduate/Undergraduate Equivalency: HART 334. Mutually Exclusive: Credit cannot be earned for HART 546 and HART 334.
HART 547 - CONSTABLE AND TURNER
Short Title: CONSTABLE AND TURNER
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar will explore critical issues surrounding the careers of John Constable and J.M.W. Turner, arguably the greatest landscape painters of the early 19th century. We will look at both similarities and differences in the work of these two rivals, while considering their work in the context of great historical change in England. Graduate students will be required to do additional reading in addition to those already assigned. Graduate/Undergraduate Equivalency: HART 357. Mutually Exclusive: Credit cannot be earned for HART 547 and HART 357.

HART 548 - A REVOLUTION FROM WITHIN: TRENDS IN CONTEMPORARY CUBAN CULTURE
Short Title: TRENDS IN CUBAN CULTURE
Department: Art History
Grade Mode: Standard Letter
Course Type: Research
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This research seminar will explore contemporary trends in Cuban culture through literary texts, films, music and works of art. We will examine the ways in which politics and the practices of artistic representation intersect in post-revolutionary Cuba. A research trip to Cuba has been organized as part of this seminar. This course is taught in Spanish. Graduate students will be required to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. This is the credit for the actual trip to Cuba. Graduate/Undergraduate Equivalency: HART 348. Mutually Exclusive: Credit cannot be earned for HART 548 and HART 348.

HART 549 - TECHNICAL ART HISTORY: STUDYING THE TECHNIQUES OF WESTERN PAINTING, 13TH-20TH CENTURIES
Short Title: TECHNICAL ART HISTORY
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Art historians, especially in the United States, tend to rely on photographs, but a study of the actual object is invaluable in studying works of art. This course aims to inform students about the technical study of art, which in the last fifty years has become a major field of research. Most classes will be held at the Museum of Fine Arts, Houston, or other Houston collections. Graduate/Undergraduate Equivalency: HART 307. Mutually Exclusive: Credit cannot be earned for HART 549 and HART 307.

HART 551 - MODELS OF ABSTRACTION
Short Title: MODELS OF ABSTRACTION
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will examine a range of different models of abstract painting and sculpture as they appear throughout the twentieth century. Looking closely at the historical contexts that gave rise to abstraction particular attention will be paid to how apparently similar forms of abstraction can denote very different kinds of meaning. Graduate students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 451. Mutually Exclusive: Credit cannot be earned for HART 551 and HART 451.

HART 552 - MANET(S) AND MODERNISM(S)
Short Title: MANET(S) AND MODERNISM(S)
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar considers the pivotal figure of Edouard Manet. Combining a study of paintings from throughout his career, with close readings of primary sources, we will assess the key aspects of his style and subject matter. We will also consider art historical to his work and relationship to modernity. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideals associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 452. Mutually Exclusive: Credit cannot be earned for HART 552 and HART 452.

HART 553 - NORTHERN RENAISSANCE ART
Short Title: NORTHERN RENAISSANCE ART
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate/Undergraduate Equivalency: HART 340. Mutually Exclusive: Credit cannot be earned for HART 553 and HART 340.
HART 554 - AGE OF ROMANTICISM IN EUROPE
Short Title: AGE OF ROMANTICISM IN EUROPE
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will consider the emergence and flourishing of Romanticism in the visual arts in Europe. We will consider artists from France, Germany and Britain, including Eugene Delacroix, J.M.W. Turner, John Constable and Caspar David Friedrich. We will combine study of paintings with readings of contemporaneous philosophers and writers, including Hegel and Byron. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 354. Mutually Exclusive: Credit cannot be earned for HART 554 and HART 354.

HART 555 - JACQUES-LOUIS DAVID: REVOLUTION
Short Title: JACQUES-LOUIS DAVID: REVOLUTION
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 355. Mutually Exclusive: Credit cannot be earned for HART 555 and HART 355.

HART 557 - VIDEO AND EXPANDED CINEMA
Short Title: VIDEO AND EXPANDED CINEMA
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar explores the emergence of video and "expanded cinema" as a primary field of artistic practice over the course of the 1960s and 1970s. We will examine seminal works by artists including Andy Warhol, Dan Graham, and Robert Whitman as well as the shifting aesthetic, political, and media landscapes in which this work emerged. For each lecture, Graduate Students will be assigned readings. They will write an annotated bibliography of all the readings to be turned in at the end of the semester. We will meet for an additional two or three weeks to discuss the interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 457. Mutually Exclusive: Credit cannot be earned for HART 557 and HART 457.

HART 558 - IMPRESSIONISM AND POST-IMPRESSIONISM
Short Title: IMPRESSIONISM/POST-IMP
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This class will explore painting in France from approximately 1865 to 1900. Mixing lectures and classroom discussion, we will focus on individual artists including Claude Monet, Edgar Degas, Mary Cassatt, Georges Seurat, Vincent van Gogh, and Paul Czanne. We will also consider and discuss a set of critical issues surrounding these painters, including the politics of gender and class within the changing urban setting of Paris. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 358. Mutually Exclusive: Credit cannot be earned for HART 558 and HART 358.

HART 559 - ART OF THE 60s AND 70s
Short Title: ART OF THE 60s AND 70s
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Using a variety of readings now considered classics as our guide, this class will look closely at a broad range of films and film movements discussed by critics and theorists such as Rudolf Amheim, Jean Epstein, Sergei Eisenstein, Walter Benjamin and Andre Bazin. Graduate students will be assigned additional readings and will be required to write a substantial research paper (20-25 pages). Graduate/Undergraduate Equivalency: HART 461. Mutually Exclusive: Credit cannot be earned for HART 559 and HART 461.

HART 561 - WHAT IS CINEMA? CLASSIC READINGS OF CLASSIC FILMS
Short Title: WHAT IS CINEMA?
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Using a variety of readings now considered classics as our guide, this class will look closely at a broad range of films and film movements discussed by critics and theorists such as Rudolf Amheim, Jean Epstein, Sergei Eisenstein, Walter Benjamin and Andre Bazin. Graduate students will be assigned additional readings and will be required to write a substantial research paper (20-25 pages). Graduate/Undergraduate Equivalency: HART 361. Mutually Exclusive: Credit cannot be earned for HART 561 and HART 361.
HART 562 - UPCYCLING: MEANINGFUL REUSE IN ART AND MONUMENTS FROM ANTIQUITY TO TODAY

Short Title: UPCYCLING
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

Course Level: Graduate
Description: In this seminar, we will explore the phenomenon of upcycling - intentionally meaningful reuse - by investigating the intersection of reuse and memory in the art and monuments of many different times, places, and people, from prehistory to the modern art that surrounds us on the Rice campus. Graduate students will be assigned up to 10 additional readings over the semester and complete a 15-20 page final paper. Mutually Exclusive: Credit cannot be earned for HART 562 and HART 362.

HART 563 - PRACTICING UTOPIA: ARCHITECTURE, EUGENICS AND THE MODERN LATIN CITY

Short Title: PRACTICING UTOPIA
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

Course Level: Graduate
Description: This seminar will explore the alliance between aesthetics, science, and ideology at the core of French and Latin American modernism. Focusing on early twentieth-century scientific and cultural dialogues between France and Latin America, this seminar will have as main territories of exploration: Paris, Rio de Janeiro, Buenos Aires, Havana, and Caracas. Graduate/Undergraduate Equivalency: HART 463. Mutually Exclusive: Credit cannot be earned for HART 563 and HART 463.

HART 565 - A REVOLUTION FROM WITHIN: TRENDS IN CONTEMPORARY CUBAN CULTURE

Short Title: TRENDS IN CUBAN CULTURE
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

Course Level: Graduate
Description: This research seminar will explore contemporary trends in Cuban culture through literary texts, films, music and works of art. We will examine the ways in which politics and the practices of artistic representation intersect in post-revolutionary Cuba. A research trip to Cuba has been organized as part of this seminar. Course taught in Spanish. Graduate students will be expected to complete all the requirements of the course in addition to writing a research paper at the end of the semester. Instructor Permission Required. Graduate/Undergraduate Equivalency: HART 304. Mutually Exclusive: Credit cannot be earned for HART 565 and HART 304.

HART 566 - LATIN AMERICAN BODIES: ON MODERNISM

Short Title: LATIN AMER BODIES:ON MODERNISM
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

Course Level: Graduate
Description: This seminar will examine theories and practices of modernism and modernization within Latin America-Europe Dialogues. Designed as a laboratory of ideas and forms, this seminar will probe critical perspectives on art and architecture's relation to society and science. Each week, we will examine a theorist, an artist, and an architect. Graduate students will be expected to complete all the requirements in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 465. Mutually Exclusive: Credit cannot be earned for HART 566 and HART 465.

HART 568 - FROM THE SUBLIME TO THE SUSTAINABLE: ART, ARCHITECTURE AND NATURE

Short Title: ART, ARCHITECTURE AND NATURE
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

Course Level: Graduate
Description: This seminar will probe critical perspectives on art and architecture's relation to society and science. Each week, we will examine a theorist, an artist, and an architect. Graduate students will be expected to complete all the requirements in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 302. Mutually Exclusive: Credit cannot be earned for HART 568 and HART 302.

HART 569 - (RE)DEFINING (CLASSICAL) ART HISTORY: DIVISION, CONNECTIVITY AND SHIFT IN THE ANCIENT MEDITERRANEAN

Short Title: REDEFINING CLASSICAL ART HIST
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

Course Level: Graduate
Description: For 500 years scholars have cleaved Roman and Greek art from one another in order to define the heart of antiquity. The scholarship that created such division is the very scholarship that created the discipline of Art History and redefined it through iconographical, social historical and broadly theoretical analysis: Windelmann, Droysen, Brendel, Deleuze, Gell. In this seminar, we will question the disciplinary paradigm. Looking at art from around the Mediterranean and reading the very scholarship that has both created these definitions and questioned them, we will work toward a new way of conceiving the art of the Ancient Mediterranean world. Graduate/Undergraduate Equivalency: HART 369. Mutually Exclusive: Credit cannot be earned for HART 569 and HART 369.
HART 570 - TRENDS IN CONTEMPORARY ART
Short Title: TRENDS IN CONTEMPORARY ART
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar will map the terrain of contemporary art as it has developed in the wake of political and theoretical engagements of the 1990's. For many critics, Contemporary Art practice has given way to the worst aspects of spectacular culture losing sight of the political, theoretical, and artistic rigor that characterized the historical and neo-antique periods. Graduate/Undergraduate Equivalency: HART 365. Mutually Exclusive: Credit cannot be earned for HART 570 and Hart 365.

HART 571 - CHINESE PAINTING
Short Title: CHINESE PAINTING
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course examines Chinese painting from ancient times to the early twentieth century. Issues of examination include themes, styles, and functions of Chinese painting; the interpretive relationship between paintings and the intended viewers; regionalism; images and words; foreign elements in Chinese painting. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 369. Mutually Exclusive: Credit cannot be earned for HART 571 and HART 369.

HART 572 - CHINESE ART AND VISUAL CULTURE
Short Title: CHINESE ART AND VISUAL CULTURE
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: In this course, we will study how various artistic styles developed in historical, social, and cultural contexts from the ancient period to the present day. Through the careful examination of architecture, calligraphy, painting, sculpture, ceramics, bronze, and film, students will gain a deeper understanding of Chinese art and visual culture. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all the readings to be turned in at the end of the semester. We will meet for an additional two or three times to discuss the interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 372. Mutually Exclusive: Credit cannot be earned for HART 572 and HART 372.

HART 573 - ART BETWEEN THE WARS: EUROPEAN MODERNISM, 1918-1940
Short Title: ART BETWEEN WARS
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course explores a series of issues that are critically important for the medieval art of both China and northern Europe. Topics include materials and techniques; public and private art: commerce, technology and prints; art and motion; archaeology, paradise and hell; maps and space; the gaze; erotica; patronage; and multiculturalism. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional hour every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 375. Mutually Exclusive: Credit cannot be earned for HART 575 and HART 375.

HART 574 - EAST & WEST: MEDIEVAL VISUAL CULTURE IN CHINA AND NORTHERN EUROPE
Short Title: EAST AND WEST
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar explores illuminated European manuscripts from late antiquity through the early sixteenth century. It examines manuscripts' functions, patrons, makers, and materials and technique, as well as such issues as the relationship between text and image and the manuscript's ideological stance. Students have the opportunity to study original medieval illuminations. Graduate/Undergraduate Equivalency: HART 377. Mutually Exclusive: Credit cannot be earned for HART 577 and HART 377.
HART 578 - DUTCH ART IN THE AGE OF REMBRANDT
Short Title: DUTCH ART IN AGE OF REMBRANDT
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will examine Dutch and Flemish seventeenth-century art, including major masters, such as Rembrandt, Rubens, and Vermeer, and major developments, such as the rise of still life, genre, and landscape painting. It will also explore women artists, Delft tiles, doll's houses, and multicultural aspects of art production. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. Graduate/Undergraduate Equivalency: HART 378. Mutually Exclusive: Credit cannot be earned for HART 578 and HART 378.

HART 581 - COLLAGE AND ITS HISTORIES
Short Title: COLLAGE AND ITS HISTORIES
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This class will explore the centrality of collage to the development of the 20th century art and film. Beginning with the seminal achievements of Picasso and Braque, we will examine works across geographical and medium boundaries, including Dada photomontage, early avant-garde film, 1960s happenings, and the reformulation of collage aesthetics in 1980s postmodernism. For each lecture, Graduate students will be assigned additional readings. They will write an annotated bibliography of all the readings to be turned in at the end of the semester. We will meet for an additional two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 381. Mutually Exclusive: Credit cannot be earned for HART 581 and HART 381.

HART 582 - CAESAR'S PALACE: AUTHOR(ITY) AND MEANING IN THE ROMAN IMPERIAL RESIDENCE
Short Title: CAESAR'S PALACE
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Described as both a “Hall of Despotism” and a “Citadel of Majesty” the palace of the Roman emperors is one of the great enigmas of antiquity. Its vast remains (larger than Versailles) are relatively well preserved, but it is poorly understood as part of the concept of emperorship. In this course we will examine the palace within the context of Imperial Roman art and politics; then we will dissect its meaning(s), the intentions of those who created it, and generally deconstruct it, brick by brick, to question agency and spatial experience from a macro-historical perspective. Graduate students will have additional readings. Graduate/Undergraduate Equivalency: HART 482. Mutually Exclusive: Credit cannot be earned for HART 582 and HART 482.

HART 584 - THE RISE OF CAPITALISM AND LATE MEDIEVAL AND EARLY MODERN ART
Short Title: CAPITALISM & ART, 1300-1700
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: . Graduate/Undergraduate Equivalency: HART 364. Mutually Exclusive: Credit cannot be earned for HART 584 and HART 364.

HART 586 - DADA
Short Title: DADA
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Inaugurated against the calamitous backdrop of the First World War, “Dada,” the artist Francis Picabia claimed, “smells of nothing, it is nothing, nothing, nothing.” This seminar will examine the aesthetics of shock and nihilism (literally, ‘nothingness’), developed by Dada in six cities: Zurich, Berlin, Colgne, Hannover, New York, and Paris. For each lecture Graduate Students will be assigned additional readings. They will write an annotated bibliography of all the readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 386. Mutually Exclusive: Credit cannot be earned for HART 586 and HART 386.
HART 588 - POST WAR EUROPEAN CINEMA  
Short Title: POST WAR EUROPEAN CINEMA  
Department: Art History  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This class surveys major developments in European cinema from the late 1940s to the late 1960s. Our study will include such movements as Italian Neorealism, German Rubble Films, French New Wave, and Soviet cinema in the Thaw. Particular attention will be paid to such issues as cinema and post-war reconstruction, memory and nation, and body and space. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional hour every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 388.  
Mutually Exclusive: Credit cannot be earned for HART 588 and HART 388.

HART 590 - METHODS OF ART HISTORY  
Short Title: METHODS OF ART HISTORY  
Department: Art History  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This seminar surveys approaches the study of art and visual culture from art history's origins as a discipline to the present day. We will study a range of works of art and interrogate many of the essential terms of art historical study. Frequent guest lectures will be featured. Instructor Permission Required.  

HART 593 - WALTER BENJAMIN  
Short Title: WALTER BENJAMIN  
Department: Art History  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This seminar will examine the key theoretical writings on media and modernity by Walter Benjamin, one of the first twentieth-century critics to place new forms of visual experience and technology at the center of his understanding of modern life. The course will pay particular attention to Benjamin's writings on urbanism, film and photography, and the ways in which these relate to avant-garde practices such as Dada, Surrealism, and New Objectivity (Neue Sachlichkeit). For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional hour every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate Students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 493.  
Mutually Exclusive: Credit cannot be earned for HART 593 and HART 493.

HART 594 - STUDIES IN CONTEMPORARY LITERATURE AND CULTURE  
Short Title: CONTEMP. LIT AND CULTURE  
Department: Art History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: A variable topics course. Please consult the English department website for additional course information. Recent topics have included Global English; Globalization and its Discontents; and Critical Regionalisms. Cross-list: ENGL 594. Repeatable for Credit.  
Course URL: www.english.rice.edu

HART 596 - FROM EXPRESSIONISM TO FASCISM: ART AND FILM IN GERMANY  
Short Title: FROM EXPRESSIONISM TO FASCISM  
Department: Art History  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Focusing on the tumultuous years of the Weimar Republic, this class will examine art and film in Germany from the birth of Expressionism through the end of the Nazi dictatorship. Topics covered will include Expressionism, Dada, the Bauhaus, and Fascist aesthetics. Particular attention will be paid to the relations between aesthetics and politics and art and everyday life, all central concerns of the art and criticism of the period. For each lecture, Graduate Students will be assigned additional readings. They will write an annotated bibliography of all these readings to be turned in at the end of the semester. We will meet for an additional every two or three weeks to discuss interpretive and methodological problems and ideas associated with the readings. Graduate students will be expected to complete all the requirements of the class in addition to writing a substantial research paper due at the end of the semester. Graduate/Undergraduate Equivalency: HART 398.  
Mutually Exclusive: Credit cannot be earned for HART 596 and HART 398.

HART 597 - SPECIAL TOPICS IN MUSEUM CURATORIAL STUDIES  
Short Title: SPECIAL TOPICS: MUSEUM STUDIES  
Department: Art History  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: A variable topics course. Please consult the English department website for additional course information. Recent topics have included Global English; Globalization and its Discontents; and Critical Regionalisms. Cross-list: ENGL 594. Repeatable for Credit.  
Course URL: www.english.rice.edu

HART 597 and HART 297.
HART 600 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Art History
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3-12
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Preparation for candidacy exams.

HART 601 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Art History
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3-12
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Prospectus research and writing.

HART 603 - BAYOU BEND GRADUATE INTERNSHIP I
Short Title: BAYOU BEND GRAD INTERNSHIP I
Department: Art History
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate Internship at Bayou Bend, the American Decorative Arts Center of the Museum of Fine Arts, Houston. Must be a Jameson Fellowship recipient to enroll. Instructor Permission Required. Graduate/Undergraduate Equivalency: HART 403. Mutually Exclusive: Credit cannot be earned for HART 603 and HART 400. Repeatable for Credit.

HART 604 - BAYOU BEND GRADUATE INTERNSHIP II
Short Title: BAYOU BEND GRAD INTERNSHIP II
Department: Art History
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate Internship at Bayou Bend and The American Decorative Arts Center of the Museum of Fine Arts, Houston. Must be a Jameson Fellowship recipient to enroll. Instructor Permission Required. Graduate/Undergraduate Equivalency: HART 403. Mutually Exclusive: Credit cannot be earned for HART 604 and HART 401. Repeatable for Credit.

HART 606 - ICONOCLASMS: THE DESTRUCTION OF IMAGES
Short Title: ICONOCLASMS
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: With a focus on the modern period, this seminar will examine iconoclastic theory and practice from antiquity to the present. Why, we will ask, have people so incessantly felt compelled to ban or destroy images, and what can this compulsion tell us about the nature of visual representation itself? Graduate/Undergraduate Equivalency: HART 406. Mutually Exclusive: Credit cannot be earned for HART 606 and HART 406.

HART 607 - POP ART
Short Title: POP ART
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar will examine the history and significance of Pop art by looking in detail at three or four primary figures associated with the term; likely subjects include Andy Warhol, Gerhard Richter, Ed Ruscha, Richard Hamilton, and others. Visits to local museum collections and attention to theoretical writings on art and mass culture are planned. Graduate/Undergraduate Equivalency: HART 407. Mutually Exclusive: Credit cannot be earned for HART 607 and HART 407.

HART 609 - ADVANCED SEMINAR IN ARCHITECTURE
Short Title: ADV SEMINAR IN ARCHITECTURE
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Small, focused, advanced discussion, workshop and/or design based courses on topics of recent research in architecture, delivered by RSA full time or visiting faculty. This seminar is open to RSA undergraduate students junior-level and above, and RSA graduate students. Students from other departments may enroll in the course with instructor permission. See the RSA website for more information: arch.rice.edu/courses. Space is limited and registration does not guarantee a space in this course. The final course roster is formulated on the first day class by the individual instructor. Cross-list: ARCH 412.

HART 612 - RELIGIOUS VISUAL CULTURES IN TRADITIONAL CHINA
Short Title: CHINESE RELIGIOUS ART
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar explores the visual materials and their context that shed light on pre-modern China's Buddhist, Daoist, funeral, and other diverse religious and ritual practices. Topics of discussion include iconic and aniconic traditions; breathing, meditation, and visualization; paradise and hell; body; ritual performance; patronage; Buddhist grottoes; tombs; multi-ethnic; printing. Graduate Students will be assigned additional readings and be required to write a substantial research paper (20-25 pages, excluding footnotes). Graduate/Undergraduate Equivalency: HART 323. Mutually Exclusive: Credit cannot be earned for HART 623 and HART 323.
HART 626 - MATERIAL, FORM, SPACE, TIME: CONCRETE AND THE REVOLUTION OF SPACE IN ANCIENT ROME
Short Title: MATERIAL, FORM, SPACE, TIME
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: "Architectural Revolution" has been tied to Le Corbusier, the Eiffel Tower, the Louvre, Brunelleschi and to towering Gothic cathedrals. At the foundation of all these endeavors is the Concrete Revolution in Roman Architecture. In this course we'll look at the four essential elements of this revolution from the fourth century BCE to the fifth century CE, and we'll investigate how shifts in application and experience created a background that informs design to this day. Cross-list: ARCH 626. Graduate/Undergraduate Equivalency: HART 326. Mutually Exclusive: Credit cannot be earned for HART 626 and HART 326.

HART 627 - THE GENESIS OF ROMAN ART
Short Title: THE GENESIS OF ROMAN ART
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course explores the roots of the art and architecture of ancient Rome (ca. 600-200 BCE). In it we will examine the earliest vestiges of sculpture, painting and architecture from the Archaic and Classical periods to the twisted forms of Hellenistic conquest. You will grapple with the questions of cultural agency, connoisseurship, cultural interaction, network and object theories and spatial imagination to question standard narratives that divide Rome in this time from neighboring Greek polities. Graduate/Undergraduate Equivalency: HART 327. Mutually Exclusive: Credit cannot be earned for HART 627 and HART 327.

HART 630 - INDEPENDENT STUDY - FOURTEENTH CENTURY GOTHIC ARCHITECTURE
Short Title: INDEPENDENT STUDY
Department: Art History
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Individual readings in 14th century gothic art and architecture. Instructor Permission Required.

HART 640 - ISSUES IN THE HISTORY OF PRINTS, PRE-MODERN TO PRESENT
Short Title: ISSUES IN HISTORY OF PRINTS
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: With their distinctive technical, social, and commercial associations, prints are often sidelined in traditional art histories. This course will introduce recent scholarship on the multiple image from the late middle ages to the present, with stress on the transformations of printmaking from the development of photography into our digital age. Graduate/Undergraduate Equivalency: HART 440. Mutually Exclusive: Credit cannot be earned for HART 640 and HART 440.

HART 645 - HISTORY AND THEORY II - PRE 1890
Short Title: HISTORY & THEORY II - PRE 1890
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An in-depth exploration as to why select monuments from Antiquity through the 19th century were 'canonized' in popular imagination and given referential status. Following a case study format, each week will focus on a particular building, built or unbuilt, from both Western and Eastern traditions. Graduate students are expected to complete all the requirements of class in addition to writing a substantial research paper due at the end of the semester. Cross-list: ARCH 645.

HART 651 - ART, REVOLUTION, WAR: MODERN ART IN VIOLENT TIMES
Short Title: ART, REVOLUTION, WAR
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar examines the ambition (or lack thereof) of modern art to play an active role during periods of violent conflict. From the French Revolution to the recent disastrous American engagements in the Middle East wars to the never-ending war on terror, artists have produced images that attempt to actively engage in these conflicts. This class will examine the relative successes and failures of art during times of violent revolution and war within the modern era. Graduate/Undergraduate Equivalency: HART 351. Mutually Exclusive: Credit cannot be earned for HART 651 and HART 351.
HART 659 - CINEMAS OF URBAN ALIENATION
Short Title: CINEMAS OF URBAN ALIENATION
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar will examine the role played by emotion in our response to works of art. What is the relationship of emotion to the specific formal properties of a given work of art, such as color, texture, shape, line quality, sound, and so on? What role does our cognitive faculties play in determining our emotional response to art? Are there political stakes to emotional affect? These and other questions will be examined. Graduate/Undergraduate Equivalency: HART 353. Mutually Exclusive: Credit cannot be earned for HART 653 and HART 353.

HART 658 - SPECIAL TOPICS: THE POLITICAL HISTORY OF ART BETWEEN THE WORLD WARS
Short Title: SPECIAL TOPIC: ART BETWEEN WARS
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course focuses on art and architecture that intersected with the struggles between democracy, communism, and fascism. It will deal with prominent architects and artists who worked for or critiqued specific regimes. We will engage with fundamental political events in modern society - such as the Soviet Revolution, the rise of fascism in Italy, Hitler and the Jewish genocide, and democratic struggles of the Popular Front in France. Graduate students will be expected to complete all the requirements for the class in addition to writing a substantial research paper at the end of the semester.

HART 653 - ART AND EMOTION
Short Title: ART AND EMOTION
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar will examine the role played by emotion in our response to works of art. What is the relationship of emotion to the specific formal properties of a given work of art, such as color, texture, shape, line quality, sound, and so on? What role does our cognitive faculties play in determining our emotional response to art? Are there political stakes to emotional affect? These and other questions will be examined. Graduate/Undergraduate Equivalency: HART 353. Mutually Exclusive: Credit cannot be earned for HART 653 and HART 353.

HART 665 - A VISUAL CULTURE TRAVELOGUE: ART AND POLITICS IN MODERN LATIN AMERICA
Short Title: ART/ POLITICS MOD LATIN AMER
Department: Art History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course challenges our pre-conceived maps of the world, highlighting Latin America's place within our understanding of modernity as a product of transnational interconnections. Transversing the Atlantic, this course traces the interactions of capitalism and culture, science and aesthetics, and the ideologies that informed and formed the urban fabric and spatial politics of important cities in the modern Latin world - Paris, Rio de Janeiro, Rome, Buenos Aires, Barcelona, Havana, and Brasilia. Cross-list: ARCH 675. Graduate/Undergraduate Equivalency: HART 375. Mutually Exclusive: Credit cannot be earned for HART 665 and HART 375.

HART 675 - LATIN-EUROPE/LATIN-AMERICA: THE AESTHETICS AND POLITICS OF MODERN CITIES
Short Title: LATIN-EUROPE/LATIN-AMERICA
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course focuses on art and architecture that intersected with the struggles between democracy, communism, and fascism. It will deal with prominent architects and artists who worked for or critiqued specific regimes. We will engage with fundamental political events in modern society - such as the Soviet Revolution, the rise of fascism in Italy, Hitler and the Jewish genocide, and democratic struggles of the Popular Front in France. Graduate students will be expected to complete all the requirements for the class in addition to writing a substantial research paper at the end of the semester.

HART 689 - INDEPENDENT STUDY IN FILM AND MEDIA STUDIES
Short Title: INDEPENDENT STUDY
Department: Art History
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Independent study, reading, or special research in film & media studies on the graduate level. Repeatable for Credit.
HART 691 - MIDDLE EASTERN EUROPEAN CINEMA
Short Title: MEMORY AND PLACE IN CINEMA
Department: Art History
Grade Mode: Audit
Course Type: Seminar
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Focuses on cinematic explorations of and preoccupations with the notion of place. Screenings include iconic and lesser-known films from Europe and the Middle East that offer diverse lenses and contexts (love, family, landscapes, borders, trauma, exile) through which we will examine questions of real and imagined place and the politics of memory. Cross-list: ANTH 578. Graduate/Undergraduate Equivalency: HART 391. Mutually Exclusive: Credit cannot be earned for HART 691 and HART 391.

HART 695 - ROMAN ARCHAEOLOGY FIELD SCHOOL
Short Title: ROMAN ARCHAEOLOGY FIELD SCHOOL
Department: Art History
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is a traditional archaeological field course, taught in the Roman Forum. Techniques and advanced technologies for processing, conserving, and recording archeological materials are emphasized. Students will become familiar with procedures for ceramics, metals, plant and animal remains and building materials. Course work include lectures, hands-on excavation, and informal discussion. Instructor Permission Required. Recommended Prerequisite(s): HART 201 or ANTH 205 or ANTH 303. Mutually Exclusive: Credit cannot be earned for HART 695 and HART 395.

HART 697 - SPECIAL TOPICS: HART IN THE WORLD
Short Title: SPECIAL TOPICS - FIELD STUDY
Department: Art History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Through lectures, seminar discussions, museum visits, architectural itineraries, and field trips, this course will explore the complex political, social, and cultural histories of each country visited; locations are Brazil (2017), London (2018), Berlin (2019), China (2020). More information available at http://arthistory.rice.edu/hart-world. Instructor Permission Required. Graduate/Undergraduate Equivalency: HART 397. Mutually Exclusive: Credit cannot be earned for HART 697 and HART 397.
Course URL: arhistory.rice.edu/hart-world

HART 800 - Ph.D. RESEARCH
Short Title: DISSERTATION RESEARCH
Department: Art History
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Dissertation Research for Ph.D. candidates. Repeatable for Credit.

Asian Studies (ASIA)

ASIA 211 - INTRODUCTION TO ASIAN CIVILIZATIONS
Short Title: INTRO TO ASIAN CIVILIZATIONS
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3

ASIA 218 - HISTORY THROUGH FILM IN EAST AND NORTHEAST ASIA
Short Title: EAST/NORTHEAST ASIA FILM HIST
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level

ASIA 219 - MODERN JAPAN
Short Title: MODERN JAPAN
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will examine the modern history of Japan, roughly 1600 to the present. Through readings, discussion, exams and a research paper, students will engage with modern Japanese history, including warrior culture, engagement with the west, modernization and industrialization, empire, the role of women, democracy and popular protest, war, occupation, and economic growth.
ASIA 221 - THE LIFE OF THE PROPHET MUHAMMAD  
Short Title: LIFE OF PROPHET MUHAMMAD  
Department: Asian Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: This course will examine the life of the Prophet Muhammad, focusing on its significance for Muslims and for non-Muslims. Readings in The Qur’an, Ibn Hisham, and Haykal. Cross-list: RELI 221.

ASIA 222 - THE WORLD AND SOUTH ASIA  
Short Title: WORLD AND SOUTH ASIA  
Department: Asian Studies  
Grade Mode: Standard Letter  
Course Type: Seminar  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Introduction to important 20th and 21st-century writers in English from South Asia - the region that includes India, Pakistan, Bangladesh and Sri Lanka. Readings include award-winning and bestselling works (fiction and non-fiction) by writers who address a wide range of issues including national and cultural identity, colonialism, sexuality, religion, globalization and political violence. Cross-list: ENGL 222.

Course URL: www.english.rice.edu

ASIA 227 - MODERN KOREA: HISTORY, CULTURE, AND SOCIETY  
Short Title: MODERN KOREA  
Department: Asian Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: This course aims to introduce students to modern Korean culture and society from a historical perspective. The course will map the historical and geopolitical elements that have shaped the national identity and mentalities to help students better understand the transformation of Korean society as the world order changed. Counts as HIST credit.

ASIA 228 - THE WORLD AND SOUTH ASIA  
Short Title: WORLD AND SOUTH ASIA  
Department: Asian Studies  
Grade Mode: Standard Letter  
Course Type: Internship/Practicum, Lecture, Seminar  
Credit Hours: 1-4  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Topics and credit hours may vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.

ASIA 230 - ASIAN RELIGIONS IN AMERICA  
Short Title: ASIAN RELIGIONS IN AMERICA  
Department: Asian Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: A survey course on Hinduism, Buddhism, Taoism, and Jainism in America, from the colonial period to the present, with a special focus on American metaphysical religion, the counterculture, the New Age, and the history of Western Colonialism, transcultural encounter, translation and immigration. Short Title: SPECIAL TOPICS  
Department: Asian Studies  
Grade Mode: Standard Letter  
Course Type: Internship/Practicum, Lecture, Seminar  
Credit Hours: 1-4  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Topics and credit hours may vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.

ASIA 240 - GENDER AND POLITICIZED RELIGION  
Short Title: GENDER & POLITICIZED RELIGION  
Department: Asian Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: This course examines the emergence of religion-based politics in various Asian countries-particularly Hindu and Muslim-focusing on the women participants in these movements as well as the movements’ concern with gender roles in society. We will investigate, for instance, the extent to which women participants have been willing or able to reshape the central ideas of such movements. Cross-list: RELI 285, SWGS 240. Mutually Exclusive: Credit cannot be earned for ASIA 240 and ASIA 340.
ASIA 251 - SEX, MONEY, AND POWER AROUND THE WORLD
Short Title: SEX, MONEY, AND POWER
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An interdisciplinary course exploring lives and well-being in the context of gendered international and domestic politics and economic processes. Emphasis on the implications of power relations at levels from the household to the global for women and men around the world (with particular attention to Asia). Cross-list: POLI 250, SWGS 250.

ASIA 295 - INTRODUCTION TO TRANSNATIONAL ASIAN STUDIES
Short Title: INTRO TO TRANSNATIONAL ASIA
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An interdisciplinary course exploring lives and well-being in the context of gendered international and domestic politics and economic processes. Emphasis on the implications of power relations at levels from the household to the global for women and men around the world (with particular attention to Asia). Cross-list: POLI 250, SWGS 250.

ASIA 299 - DISCOVER ASIA IN HOUSTON
Short Title: DISCOVER ASIA IN HOUSTON
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: As a gateway course for the Asian Studies major, Introduction to Transnational Asia is designed to give students diverse perspectives of learning about Asia. The course combines lecture, historical and contemporary textual analysis, group study, mini research project, and presentation.

ASIA 315 - GENDER AND ISLAM
Short Title: GENDER AND ISLAM
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level

Short Title: CROSS-CULTURAL ASIAN MUSIC
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will focus on traditional and contemporary art music from Asia. The classroom lectures are designed to introduce and accompany one or two events which will include live performances, workshops, lectures by invited performers and scholars. This course may be repeated since each year the countries and invited guest performers/scholars will represent different geographical areas. Cross-list: MUSI 378. Repeatable for Credit.

ASIA 380 - ASIAN AMERICAN EXPERIENCES
Short Title: ASIAN AMERICAN EXPERIENCES
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This interdisciplinary course will investigate the diverse cultural traditions and shared experiences of Asian Americans in the United States. By analyzing historical works, literary texts, and films, we will explore a range of topics including Asian immigration, gender roles, identity formation, and ethnic media. Cross-list: ANTH 387.

ASIA 387 - ASIAN AMERICAN CONTEMPORARY COMMUNITIES
Short Title: ASIAN AMERICAN COMMUNITIES
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This interdisciplinary course will investigate the diverse cultural traditions and shared experiences of Asian Americans in the United States. By analyzing historical works, literary texts, and films, we will explore a range of topics including Asian immigration, gender roles, identity formation, and ethnic media. Cross-list: ANTH 387.

ASIA 388 - PHOTOGRAPHY IN CHINA
Short Title: PHOTOGRAPHY IN CHINA
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3,4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Open to all students within the university who are interested in deepening their understanding of China and improving their photography skills. This course will study China through the history of photography, looking at ways in which China has been viewed by both Chinese and visiting photographers. Students will learn documentary skills and travel to China during spring break to gather materials for their own projects. Instructor Permission Required. Cross-list: FOTO 388.

ASIA 389 - MIGRATIONS AND DIASPORAS IN THE INDIAN OCEAN WORLD
Short Title: THE INDIAN OCEAN WORLD
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The Indian Ocean World presents an enormously varied arena of cultural exchange and interaction spanning coastal regions of Africa, the Middle East, South and Southeast Asia and Australia. Course introduces the region by examining societies and empires shaped by voyages of exploration, religious pilgrimages, trading diasporas and forced migration. Cross-list: HIST 389.

ASIA 390 - THE LANGUAGES OF ASIA
Short Title: THE LANGUAGES OF ASIA
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): LING 200 or ANTH 200
Description: This course surveys the remarkable linguistic diversity of the Pacific Rim Asia covering important grammatical features, including word origins, tones and sounds, writing systems, characteristic syntactic patterns, language families, cultural keywords and communicative styles of the major, as well as some minority languages of the region. Cross-list: LING 390. Recommended Prerequisite(s): Prerequisites as listed or 3 courses in Chinese, Japanese or Korean with special permission.
ASIA 399 - WOMEN IN CHINESE LITERATURE  
Short Title: WOMEN IN CHINESE LITERATURE  
Department: Asian Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course examines women's roles in Chinese literature as writers, readers, and characters, focusing particularly on the tension between women's lived bodily experiences and the cultural experiences inscribed on the female body and how, in the process, women have contrarily gendered patriarchal culture into their own. It will also touch on Chinese women's incorporation of the Western Tradition. Cross-list: MDEM 379, SWGS 399.

ASIA 401 - INDEPENDENT STUDY  
Short Title: INDEPENDENT STUDY  
Department: Asian Studies  
Grade Mode: Standard Letter  
Course Type: Independent Study  
Credit Hours: 1-15  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Reading or research project to be determined by discussions between student(s) and faculty member(s). Department Permission Required.

ASIA 402 - INDEPENDENT STUDY  
Short Title: INDEPENDENT STUDY  
Department: Asian Studies  
Grade Mode: Standard Letter  
Course Type: Independent Study  
Credit Hours: 1-15  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Reading or research project to be determined by discussions between student(s) and faculty member(s). Department Permission Required.

ASIA 422 - THE ORIGINAL BEAUTY OF CHINESE LITERATURE  
Short Title: ORIGINAL BEAUTY OF CHINESE LIT  
Department: Asian Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: The course will expose students to the best literary works created in the Chinese tradition, both classical and modern, and give them a general introduction to different genres, including poetry, fiction, drama, and philosophical essays. It will improve their language proficiency through reading original texts of Chinese literature. Cross-list: CHIN 422.

ASIA 441 - MAGIC AND POPULAR RELIGION  
Short Title: MAGIC & POPULAR RELIGION  
Department: Asian Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course will examine the popular religion in the Middle East from Late Antiquity until the 19th century, focusing on healing practices, astrology, protection, amulets, seasoned/life-cycle rituals, and other popular beliefs common to Islam, Judaism, and Christianity. Cross-list: RELI 441.

ASIA 488 - ASIA AND ENERGY  
Short Title: ASIA AND ENERGY  
Department: Asian Studies  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Multi-disciplinary study of Asian countries and cultures as a way to explain production, exchange, consumption and influence of energy on political, economic and social/cultural institutions, including energy security and energy policy formation and resource use theories. Assumes basic knowledge of history and politics of Asian societies and economies.

ASIA 489 - CHINESE POLITICS IN COMPARATIVE PERSPECTIVE  
Short Title: CHINESE POLITICS  
Department: Asian Studies  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course explores the range of theories and empirical research methodologies from comparative political science, political-economy and Asian studies commonly applied to understanding Chinese politics: political participation, political organizations, collective action and popular protest, political culture and political institutional change. This course will be a seminar requiring weekly presentations extensive readings at the graduate level in social science, and an original research paper. There is no prerequisite for this course but participants are assumed to already possess extensive knowledge of Chinese history, culture and society. Cross-list: POLI 489.

ASIA 490 - COLONIAL MODERNITY IN EAST ASIA  
Short Title: COLONIAL MODERNITY: EAST ASIA  
Department: Asian Studies  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: History of ideas, treaties, market and corporate strategies in imperialist and anti-imperialist movements in East Asia in 19th, 20th centuries. Uses theories of colonialism and specific case studies of fashion, architecture, mass media, urban planning, etc., to define colonial modernity transnationally. Three analytic essays and one research paper. Cross-list: HIST 490.
ASIA 495 - ASIAN STUDIES RESEARCH SEMINAR
Short Title: ASIAN STUDIES RESEARCH SEM
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar with some lectures considers late imperial through 21st century China using conceptual tools (masculinity, femininity, gynotechnics, globalization, representation). Examines late Qing gender order, revolutionary era, party-state formation, and the Great Transformations of late 20th and early 21st centuries using visual culture, film, primary texts, and secondary histories. Cross-list: HIST 492, SWGS 492.

ASIA 494 - SPECIAL TOPICS IN ASIAN STUDIES
Short Title: SPECIAL TOPICS ASIAN STUDIES
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar course explores various cultural topics, not covered in other Asia courses, in Asian studies. The fields may include history, film, linguistics, sociology as well as other fields in the humanities and social sciences. Department Permission Required. Repeatable for Credit.

ASIA 695 - ASIAN STUDIES RESEARCH SEMINAR
Short Title: ASIAN STUDIES RESEARCH SEM
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is designed to elevate the knowledge on Asia acquired by Asian Studies majors in their first two years of study to a higher level and to train them in executing their original research an producing a substantial research paper. Department Permission Required. Mutually Exclusive: Credit cannot be earned for ASIA 495 and ASIA 695. Repeatable for Credit.

ASIA 695 - ASIAN STUDIES RESEARCH SEMINAR
Short Title: ASIAN STUDIES SEMINAR
Department: Asian Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: To elevate the knowledge on Asia acquired by AS majors in their undergraduate years to a graduate level with more depth and focus, and to train AS majors in designing and executing their original research and offer them an opportunity to produce a substantial research paper based on bibliographic research and other forms of data-gathering. In 695 (vs. 495), students will be assigned one additional reading per week throughout the semester. Department Permission Required. Mutually Exclusive: Credit cannot be earned for ASIA 495 and ASIA 495. Repeatable for Credit.

Astronomy (ASTR)

ASTR 100 - EXPLORING THE COSMOS
Short Title: EXPLORING THE COSMOS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An introductory course for students in academic programs. Introduction to concepts, methods and discoveries of astronomy and astrophysics, with a theme to be chosen from the frontier topics of modern astrophysics. Will emphasize student presentations. Designed for first year students interested in science or engineering, but other majors are welcome.

ASTR 201 - STARS, GALAXIES, AND THE UNIVERSE
Short Title: STARS, GALAXIES & THE UNIVERSE
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An introductory course for students in academic programs. The formation, evolution, and death of stars; the composition and evolution of galaxies; the structure and evolution of the universe.

ASTR 202 - EXPLORATION OF THE SOLAR SYSTEM
Short Title: EXPLORATN OF THE SOLAR SYSTEM
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The physical processes governing the nature and behavior of the various Solar System bodies are discussed with a focus on the origins, evolution and fate of the Solar System and its parts. This broader context leads to a deeper understanding of the Earth as a life-supporting planet.

ASTR 221 - OBSERVING THE NIGHT SKY
Short Title: OBSERVING THE NIGHT SKY
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An introduction to the celestial sphere and movements of the sun, moon, and planets. Students will gain hands-on experience using computerized telescopes, binoculars, digital imagers, and planetarium software to study astronomical objects. Intended for students in all types of academic programs.
ASTR 230 - ASTRONOMY LAB
Short Title: ASTRONOMY LAB
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A hands-on introduction to modern techniques of observational astronomy. Students use telescopes, CCDs, and computers to obtain and analyze their own images and spectra of solar system, galactic, and extragalactic objects. The course employs the campus observatory, dark sky observing sites, and state of the art data analysis software. Instructor Permission Required.

ASTR 243 - LIVING WITH A STAR: THE PHYSICS OF THE SUN-EARTH CONNECTION
Short Title: LIVING WITH A STAR
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): MATH 102 and PHYS 102 or PHYS 126
Description: Introduction to astrophysical processes, particularly the effect of the Sun on the Earth. Possible effects of solar variability will be considered, especially global warming. The observational and theoretical basis of our current understanding will be presented.

ASTR 350 - INTRODUCTION TO ASTROPHYSICS-STARS
Short Title: INTRO ASTROPHYSICS-STARS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 211 and PHYS 202 (may be taken concurrently)
Description: Introduction to astrophysical processes, particularly the evolution of the universe, including nucleosynthesis, cosmic background opacities, curves of growth, spectral line theory and observation. Polytropes, nucleosynthesis, radiative transfer, convection, oscillations, opacities, curves of growth, spectral line theory and observation.

ASTR 360 - INTRODUCTION TO ASTROPHYSICS-GALAXY AND COSMO
Short Title: INTRO ASTROPHYSIC-GALAXY&COSMO
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 211 and PHYS 202 (may be taken concurrently)
Description: Morphology, kinematics, and dynamics of the Milky Way and external galaxies, including interstellar matter and evidence for dark matter. Peculiar and active galaxies, including interacting systems and evidence for super massive black holes in active galactic nuclei such as quasars. Large-scale structure and expansion of the universe, including various cosmologies ranging from the inflationary big bang theory to steady state and anthropic concepts. Either ASTR 350 or 360 may be taken first. PHYS 202 may be taken as a prereq or concurrently with ASTR 360.

ASTR 400 - UNDERGRADUATE RESEARCH SEMINAR
Short Title: UNDERGRADUATE RESEARCH SEMINAR
Department: Physics and Astronomy
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar on current research topics in astronomy, astrophysics, and space physics for juniors and seniors. Students will be expected to give one oral presentation each semester. Graduate/Undergraduate Equivalency: ASTR 500. Repeatable for Credit.

ASTR 451 - ASTROPHYSICS I: SUN AND STARS
Short Title: ASTROPHYSICS I: SUN AND STARS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ASTR 350 or ASTR 360) and (PHYS 301 and PHYS 302)
Description: Physics of stellar atmospheres, interiors and evolution. Peculiar and active galaxies, including interacting systems and evidence for super massive black holes in active galactic nuclei such as quasars. Large-scale structure and expansion of the universe, including various cosmologies ranging from the inflationary big bang theory to steady state and anthropic concepts. Either ASTR 350 or 360 may be taken first. PHYS 202 may be taken as a prereq or concurrently with ASTR 360.

ASTR 452 - ASTROPHYSICS II: GALAXIES AND COSMOLOGY
Short Title: ASTROPHYSII:GALAXY&COSMO
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ASTR 350 or ASTR 360) and (PHYS 301 and PHYS 302)
Description: Study of physical cosmology models. Description of the evolution of the universe, including nucleosynthesis, cosmic background radiation, large-scale structure, galaxy formation and evolution, and high redshift phenomena.
ASTR 470 - SOLAR SYSTEM PHYSICS  
**Short Title:** SOLAR SYSTEM PHYSICS  
**Department:** Physics and Astronomy  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** PHYS 301 and PHYS 302  
**Description:** The Sun, solar-terrestrial relationships, solar wind; planetary atmospheres, ionospheres and magnetospheres. Graduate/Undergraduate Equivalency: ASTR 570. Mutually Exclusive: Credit cannot be earned for ASTR 470 and ASTR 570.  

ASTR 500 - GRADUATE RESEARCH SEMINAR  
**Short Title:** GRADUATE RESEARCH SEMINAR  
**Department:** Physics and Astronomy  
**Grade Mode:** Satisfactory/Unsatisfactory  
**Course Type:** Seminar  
**Credit Hour:** 1  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** A presentation of current research programs in the department. Graduate/Undergraduate Equivalency: ASTR 400. Repeatable for Credit.  

ASTR 502 - TEACHING EARTH AND SPACE SCIENCE  
**Short Title:** TEACHING EARTH & SPACE SCIENCE  
**Department:** Physics and Astronomy  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Overview of the Earth and the solar system: structure, evolution, and dynamics. Includes non-calculus mathematics: algebra, logarithms and simple trigonometry, including Kepler's laws. Observing sessions at campus observatory and George Observatory TBD. Designed for inservice and preservice science teachers (grades 4-12), but open to undergraduates considering a teaching career. Mutually Exclusive: Credit cannot be earned for ASTR 502 and ASTR 402.  

ASTR 503 - ASTRONOMY FOR TEACHERS  
**Short Title:** ASTRONOMY FOR TEACHERS  
**Department:** Physics and Astronomy  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Overview of the Sun, stars, galaxies, and the Universe at a non-calculus level. Methods to help students master content, including lab activities suitable for K-12. Observing sessions at Rice campus observatory and George Observatory TBD. Designed for inservice and preservice teachers (grades 5-12), but open to undergraduates considering a teaching career.  

ASTR 505 - PROCESSES IN COSMIC PLASMAS  
**Short Title:** PROCESSES IN COSMIC PLASMAS  
**Department:** Physics and Astronomy  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** ASTR 470 and PHYS 480  
**Description:** Study of plasma phenomena that occur widely in nature. May include quasi-static equilibrium, magnetic equilibrium, magnetic reconnection, particle acceleration, plasma winds and jets, and interchange instabilities.  

ASTR 530 - TEACHING ASTRONOMY LABORATORY  
**Short Title:** TEACHING ASTRONOMY LABORATORY  
**Department:** Physics and Astronomy  
**Grade Mode:** Standard Letter  
**Course Type:** Laboratory  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** ASTR 230 or ASTR 350 or ASTR 360 or ASTR 402 or ASTR 403 or ASTR 502 or ASTR 503  
**Description:** Methods of observational astronomy for public education: telescopes, astronomical binoculars, portable planetariums, digital cameras, and photography (still, 3D, and time lapse). Students will train beginners in the use of telescopes and carry out a modest observational program. The course requires one public presentation. Topics vary with each offering. Mutually Exclusive: Credit cannot be earned for ASTR 530 and ASTR 430.  

ASTR 542 - NEBULAR ASTROPHYSICS  
**Short Title:** NEBULAR ASTROPHYSICS  
**Department:** Physics and Astronomy  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** ASTR 451  
**Description:** Analysis of physical processes at work in the sun, such as heliosseismology, solar variability, solar activity, magnetic reconnection, heliosphere interactions and modern observational techniques.
ASTR 600 - ADVANCED TOPICS IN ASTROPHYSICS
Short Title: ADV TOPICS IN ASTROPHYSICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Lecture/seminars which treat topics of departmental interest. Not offered every year. Repeatable for Credit.

ASTR 570 - SOLAR SYSTEM PHYSICS
Short Title: SOLAR SYSTEM PHYSICS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The Sun, solar-terrestrial relationships, solar wind; planetary atmospheres, ionospheres and magnetospheres. Includes a research paper and presentation on a physical process in the solar system. Graduate/Undergraduate Equivalency: ASTR 470. Mutually Exclusive: Credit cannot be earned for ASTR 570 and ASTR 470.

ASTR 565 - COMPACT OBJECTS
Short Title: COMPACT OBJECTS
Department: Physics and Astronomy
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Selected topics involving white dwarfs, neutron stars, black holes and their environments, e.g., pulsars, supernova remnants, and accretion disks.

Biochemistry & Cell Biology (BIOC)

BIOC 112 - INTRODUCTORY BIOLOGICAL RESEARCH CHALLENGES
Short Title: INTRO BIOL RESEARCH CHALLENGES
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Teams of students work on investigative, client-based projects with opportunities to design experiments, analyze data, and communicate their findings. This course is recommended for students interested in the Biosciences major who have very limited practical laboratory experience. Only first year students may enroll. Mutually Exclusive: Credit cannot be earned for BIOC 112 and BIOC 111/NSCI 120.

BIOC 115 - FRESHMAN SEMINAR IN LOCAL BIOLOGY RESEARCH (BCB)
Short Title: FRESHMAN BIOLOGY SEMINAR (BCB)
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A 7-week seminar course to introduce freshmen prospective biologists to the excitement of research at Rice and the Medical Center and to provide context with which to think about facts presented in biosciences textbooks. Small groups will meet weekly with a graduate student or postdoctoral researcher to explore a published research article by a local lab, gaining background information about the subject and exposure to the research techniques. In the final session, the group will tour the lab that produced the featured article. Additional tours and activities TBA. All first-year non-transfer students are eligible to enroll in BIOC 115/FSEM 115 regardless of AP credit. This course meets in the second half of the semester and features research in the Program of Biochemistry and Cell Biology. Cross-list: FSEM 115.
Course URL: www.bioc.rice.edu/bioc115/

BIOC 122 - CURRENT TOPICS IN BIOLOGY
Short Title: BIOLOGY FOR VOTERS
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Students cannot enroll who have a major in Biochemistry and Cell Biology, Biological Sciences or Ecology & Evolutionary Biology. Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Designer babies, climate change, the anti-vaccine movement, gender identity, evolution...exploring these and other socially relevant topics will provide a context for learning essential concepts in biology and ways to distinguish science truth from science fiction.
Course URL: www.ruf.rice.edu/~bioslabs/bioc122/
BIOC 212 - INTERMEDIATE EXPERIMENTAL CELLULAR AND MOLECULAR NEUROSCIENCE
Short Title: EXPERIMENTAL NEUROSCIENCE
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): BIOC 201 (may be taken concurrently) and
Description: Introduction to the scientific method, principles of experimental design, selected research strategies, record keeping, and technical communication as related to neuroscience. This course is primarily intended for prospective and declared NEUR majors. The pre-req BIOC 201 may be taken concurrently with BIOC 212. Instructor Permission Required. Mutually Exclusive: Credit cannot be earned for BIOC 212 and BIOC 211.

BIOC 215 - BIO SCIENCES LAB TEACHING
Short Title: BIOC LAB TEACHING
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Undergraduate teaching in a biosciences laboratory. Provide group and individual instruction and feedback to undergraduates during and outside of laboratory classes. Instructor Permission Required. Repeatable for Credit.

BIOC 216 - DISCUSSION SECTION TEACHING
Short Title: DISCUSSION SECTION TEACHING
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In this course, undergraduates who have previously excelled in a BIOC course, as approved by the Department Chair for this activity, will develop teaching skills by leading discussion sections or serving as writing mentors. These activities are designed to benefit students presently taking the relevant BIOC course and will be performed under the guidance of the professor teaching the course. Instructor Permission Required. Repeatable for Credit.

BIOC 220 - FORENSIC BIOLOGY AND CRIMINALISTICS
Short Title: FORENSIC BIOL & CRIMINALISTICS
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): BIOC 201
Description: This course will introduce students to certain areas of forensic science including - crime scene analysis, forensic serology, molecular genetics (DNA), forensic toxicology; drugs, and the identification of biological fluids such as blood, saliva, and semen, with case studies and a potential field trip. The course is designed for biology and chemistry students, for students interested in the application of biosciences in DNA and crime scene analysis.
BIOC 300 - PARADIGMS IN BIOCHEMISTRY AND CELL BIOLOGY
Short Title: PARADIGMS IN BIOCHM & CELL BIO
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examination of paradigms in Biochemistry and Cell Biology with a focus on the "central dogma" of molecular biology. Recommended strongly for students with Advanced Placement in Biology and designed for prospective BIOC majors. This course is strongly recommended as preparation for BIOC 341 (Cell Biology). Enrollment is restricted to students who have not yet taken BIOC 301 or BIOC 341. Recommended Prerequisite(s): Recommended strongly for students with Advanced Placement in Biology and designed for prospective BIOC majors. For students with AP credit for BIOS/BIOC 201, this course is strongly recommended as preparation for BIOC 341 (Cell Biology).

BIOC 301 - BIOCHEMISTRY I
Short Title: BIOCHEMISTRY I
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 211 and BIOC 201
Description: The second in an integrated sequence of three courses (BIOC 201, 301, 302). Structure and function of proteins, enzymes, and nucleic acids; enzyme kinetics; glycolysis, aerobic metabolism, and energy coupling. Recommended Prerequisite(s): CHEM 212.

BIOC 302 - BIOCHEMISTRY II
Short Title: BIOCHEMISTRY II
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 301
Description: The final in an integrated sequence of three courses (BIOC 201, 301, 302). In depth study of carbohydrate, amino acid, and lipid metabolic pathways, hormone regulation of metabolic path ways, key cell signaling mechanisms, and the structural biology of DNA replication, transcription, and translation into proteins. Course also involves analysis of primary scientific literature. Recommended Prerequisite(s): CHEM 212 or CHEM 320.

BIOC 305 - INVESTIGATIVE BIOCHEMISTRY
Short Title: INVESTIGATIVE BIOCHEMISTRY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Enrollment limited to students with a class of Junior or Senior. Students cannot enroll who have a major in Biochemistry and Cell Biology, Biological Sciences or Ecology & Evolutionary Biology. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 301 (may be taken concurrently)
Description: In this course designed for premedical students not majoring in the Biosciences, students work in teams to complete part of a research project. In addition to gaining practical laboratory experience in biochemistry, students maintain a laboratory notebook, generate and analyze data, and write a research paper. The prerequisite BIOC 301 may be taken concurrently with BIOC 305.

BIOC 310 - INDEPENDENT RESEARCH FOR BIOCHEMISTRY AND CELL BIOLOGY UNDERGRADUATES
Short Title: IND RES FOR BIOC UNDERGRADS
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 111 or BIOC 211 or BIOC 112 or NSCI 120
Description: Independent research in Rice BCB faculty laboratories (sections 2 and above) or other Texas Medical Center laboratories (sections 1). Students spend at least 3 hours per week in the laboratory for each semester hour of credit. If taken for 3 or more hours, counts as one required 300+ level lab course (not BIOC 311). Requires a proposal abstract, weekly reports, and a research paper (fall semester) or a proposal abstract, weekly reports, and a poster presentation (spring semester). Students wishing to perform their research in an off-campus lab must submit a completed application to the BIOC 310 instructor at least 2 weeks prior to the start of classes and may not register for fewer than 3 credit hours. Instructor Permission Required. Recommended Prerequisite(s): Students are strongly advised to secure research advisors and register for the class well in advance of the start of classes. Repeatable for Credit.
Course URL: www.bioc.rice.edu/bioc310

BIOC 311 - ADVANCED EXPERIMENTAL BIOSCIENCES
Short Title: ADV EXPERIMENTAL BIOSCIENCES
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 211 and BIOC 301 (may be taken concurrently)
Description: Advancement of biochemical laboratory methods, record keeping, technical communication skills, and research strategies. Students will maintain a research quality laboratory notebook and will submit a paper in the style of a journal article. Pre-req BIOC 301 may be taken concurrently with BIOC 311.
BIOC 313 - INTRODUCTORY SYNTHETIC BIOLOGY
Short Title: INTRODUCTORY SYNTHETIC BIO
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOS 211 or BIOC 211
Description: Students learn molecular biological procedures commonly used to build and characterize synthetic genetic circuits. Teams of students work on a research project in the interdisciplinary field of synthetic biology. Students continue to develop technical communication skills.
Course URL: www.owlnet.rice.edu/~bios311/bios311/bios313/bios313.html

BIOC 318 - MICROBIOLOGY LABORATORY
Short Title: MICROBIOLOGY LABORATORY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 211
Description: Team projects focusing on water analysis and isolation, culture, observation, assay, and identification of bacteria. Offered in the second half of each semester, self-scheduled after the first formal meetings.
Course URL: www.ruf.rice.edu/~bioslabs/bios318/

BIOC 320 - LABORATORY IN TISSUE CULTURE
Short Title: LABORATORY IN TISSUE CULTURE
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 440 or STAT 440 or BIOC 311
Description: Introduction to tissue culture techniques, including cell passage, cell viability, and cell attachment and proliferation assays. Students complete quantitative analysis of their data. Engineering design and applications are featured in graded work. Sections 1 and 2 are taught during the first half of the semester. Sections 3 and 4 are taught during the second half of the semester. Students may be required to attend lab on a university holiday. Instructor Permission Required. Cross-list: BIOE 342.

BIOC 329 - ANIMAL BIOLOGY AND PHYSIOLOGY
Short Title: ANIMAL BIOLOGY AND PHYSIOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 201 or EBIO 202
Description: This course gives a broad overview of the biology of infectious diseases using examples from humans, plants, and animals. Topics include diversity of diseases, mechanisms of disease transmission, epidemiology, population regulation, evolution of virulence, disease dynamics in natural communities and disease invasion and conservation biology. Cross-list: EBIO 329. Mutually Exclusive: Credit cannot be earned for BIOC 329 and EBIO 529.

BIOC 331 - BIOLOGY OF INFECTIOUS DISEASES
Short Title: BIOLOGY OF INFECTIOUS DISEASES
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): EBIO 213
Description: The evolution and systematics of the animal kingdom with consideration of functional anatomy, comparative physiology, behavior, medical implications and resource management. Cross-list: EBIO 331.

BIOC 332 - SYSTEMS PHYSIOLOGY
Short Title: SYSTEMS PHYSIOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 201 and (PHYS 101 and PHYS 102) or (PHYS 125 and PHYS 126)
Description: This course will teach the fundamentals of human physiology with a specific focus on the nervous, cardiovascular, respiratory, and urinary systems. Basic introductory engineering principles will be applied to the study of physiological systems. The course is aimed to be accessible to students with non-engineering backgrounds. Students may receive credit for only one of BIOE 302, BIOE 322, and BIOC 332. Cross-list: BIOE 302. Mutually Exclusive: Credit cannot be earned for BIOC 332 and BIOE 322.
**BIOC 341 - CELL BIOLOGY**
Short Title: CELL BIOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 201
Description: Molecular mechanisms of eukaryotic cell function. Structure, function, and biogenesis of all subcellular organelles. Cell-cell communication, cytoskeleton assembly and function, cell cycle control, and cell-cell adhesions. Emphasis will be on cytoplasmic events; molecular studies of transcription are taught in BIOL 302 and BIOL 344. RECOMMENDATION: BIOL 300 is recommended for students using advanced placement credit for BIOL 201 and students preferring additional foundational background prior to enrollment in BIOL 341.

**BIOC 344 - MOLECULAR BIOLOGY AND GENETICS**
Short Title: MOLECULAR BIOLOGY & GENETICS
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOL 201
Description: Mendelian genetics, population genetics, mapping, gene expression and regulation, genetic engineering, DNA replication and recombination, human genetics, genetic disease and gene therapy. Recommended Prerequisite(s): BIOL 201.

**BIOL 334 - EVOLUTION**
Short Title: EVOLUTION
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): EBIO 202
Description: Principles of biological evolution. Topics include natural selection, adaptation, molecular evolution, formation of new species, the fossil record, biogeography, and principles of classification. Cross-list: EBIO 334.

Course URL: www.ruf.rice.edu/~queller/Bios334/

**BIOL 335 - CELLULAR AND MOLECULAR ANIMAL PHYSIOLOGY**
Short Title: CELL & MOL ANIMAL PHYSIOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 201
Description: This course takes a functional approach to investigate animal physiology from a cellular and molecular perspective. Using an integrated and comparative approach, students learn how animals maintain homeostasis, including how they meet their energy needs, take up and transport oxygen, and maintain hydration and salt balance. Students will read primary literature to explore physiological adaptations for survival in extreme environments. Graduate/Undergraduate Equivalency: BIOC 536. Mutually Exclusive: Credit cannot be earned for BIOC 335 and BIOC 536.

**BIOL 336 - CONCEIVING AND MISCONCEIVING THE MONSTROUS IN FICTION AND IN ART, IN MEDICINE AND IN BIOSCIENCE**
Short Title: MONSTER
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (BIOE 362 or GLHT 362) and (PHYS 126 or PHYS 102 or PHYS 112 or PHYS 142) and MATH 102
Description: Importance of nutritional and pharmaceutical compounds, impact of cost of compounds on global health; Overview of biochemical pathways; metabolite analysis; Genetic engineering and molecular biology tools for ME; Pharmaceuticals and drug discovery approaches (antibiotics, antivirals; anti-parasite compounds); anti-diarrhea treatments; vaccines. Cross-list: BIOE 361, GLHT 361.
Course URL: www.btb.rice.edu
Biochemistry & Cell Biology (BIOC)

BIOC 371 - SEMINAR IN CONTEMPORARY BIOLOGICAL AND BIOMEDICAL RESEARCH
Short Title: BIOMEDICAL RESEARCH SEMINAR
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 341 (may be taken concurrently) or BIOC 301 (may be taken concurrently)
Description: This course will offer students a close-up look at an area of contemporary biological and biomedical research in a small-group seminar setting. Each seminar will focus on a different area of research through reading and discussion of recent research articles in that focus area. The faculty discussion leader for each seminar will be drawn from Baylor College of Medicine, UT Health Science Center, MD Anderson Cancer Center, Rice and others. Please consult the course website for a complete listing of seminars offered each semester. Please refer to the following link for additional information: http://www.bioc.rice.edu/bioc371. Instructor Permission Required. Recommended Prerequisite(s): Students should check the courses website for additional prerequisites, notes from the instructor, and other information specific to each section. Repeatable for Credit.
Course URL: www.bioc.rice.edu/bioc371

BIOC 372 - IMMUNOLOGY
Short Title: IMMUNOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 201
Description: Cellular and molecular basis of innate and adaptive immune function in mammals. Graduate/Undergraduate Equivalency: BIOC 573. Recommended Prerequisite(s): BIOC 301 and BIOC 341. Mutually Exclusive: Credit cannot be earned for BIOC 372 and BIOC 573/BIOS 372.

BIOC 385 - FUNDAMENTALS OF CELLULAR AND MOLECULAR NEUROSCIENCE
Short Title: FUNDAMENTALS OF NEUROSCIENCE
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Cellular, molecular, and integrative mechanisms of neural function, including membrane and axon physiology, synaptic transmission and plasticity, sensory transduction and processing. Cross-list: NEUR 385. Graduate/Undergraduate Equivalency: BIOC 585. Recommended Prerequisite(s): BIOC 201. Mutually Exclusive: Credit cannot be earned for BIOC 385 and BIOC 585.

BIOC 390 - TRANSFER CREDIT IN BIOCHEMISTRY AND CELL BIOLOGY
Short Title: TRAN CREDIT BIOCHEM&CELL BIO
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Transfer
Credit Hours: 3
Course Level: Undergraduate Upper-Level
Description: For transfer of courses which have no current equivalent in the Rice curriculum, but which can be counted as 300 level BIOC lecture courses, in satisfying requirements for majors in Biosciences. Repeatable for Credit.

BIOC 393 - LABORATORY TRANSFER CREDIT IN BIOCHEMISTRY AND CELL BIOLOGY
Short Title: LAB TRANSFER CREDIT
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Transfer
Credit Hour: 1
Course Level: Undergraduate Upper-Level
Description: For transfer of an advanced laboratory course in the Biochemistry and Cell Biology that has no current equivalent in the Rice curriculum. Any student may receive a maximum of one credit of BIOC 393.
BIOC 401 - UNDERGRADUATE HONORS RESEARCH
Short Title: UNDERGRADUATE HONORS RESEARCH
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 5
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The Biochemistry and Cell Biology Honors Research Program is a suite of courses offering our seniors and advanced juniors the opportunity to perform a two-semester, individual research project in a research laboratory in Biochemistry & Cell Biology. Students having performed BIOS/BIOC 310 research in an off-campus laboratory in the Texas Medical Center will also be eligible to apply to perform honors research in that laboratory. The Honors Research Program courses function as a set and must all be taken in the same academic year. Registration for any of the courses requires a commitment to register for all three. Requires at least 15 hours of laboratory research per week, a proposal (revised from application), monthly reports, and a formal progress report (abstract, aims, progress toward aims, discussion of results, plans for the spring semester). Prerequisites: strong performance in (BIOC 310, or HONS 470/471) and BIOC 211 and either BIOC 301 or BIOC 341. Research professor recommendation required. Application for admission required (BCB Honors Program OwlSpace Resources). Department Permission Required. Repeatable for Credit.

BIOC 402 - UNDERGRADUATE HONORS RESEARCH
Short Title: UNDERGRADUATE HONORS RESEARCH
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 5
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 401
Corequisite: BIOC 412
Description: The Biochemistry and Cell Biology Honors Research Program is a suite of courses offering our seniors and advanced juniors the opportunity to perform a two-semester, individual research project in a research laboratory in Biochemistry & Cell Biology. Students having performed BIOS/BIOC 310 research in an off-campus laboratory in the Texas Medical Center will also be eligible to apply to perform honors research in that laboratory. Registration for any of the courses requires a commitment to register for all three. Requires at least 15 hours of laboratory research per week, monthly reports, a thesis (substantial research paper) and a poster presentation at the Rice Undergraduate Research Symposium. Repeatable for Credit.

BIOC 403 - UNDERGRADUATE RESEARCH SEMINAR
Short Title: UNDERGRADUATE RESEARCH SEMINAR
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 401
Corequisite: BIOC 402
Description: This companion seminar requires attendance at course meetings and a formal scientific presentation of research performed while enrolled in the Honors Research Program. Repeatable for Credit.

BIOC 413 - EXPERIMENTAL MOLECULAR BIOLOGY
Short Title: EXPERIMENTAL MOLECULAR BIOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 311
Description: Application of strategies in molecular biology to investigate gene expression and function with an emphasis on experimental design, data analysis, and data interpretation. Students will prepare a scientific poster. Offered second half of spring semester.

BIOC 414 - EXPERIMENTAL PHYSIOLOGY
Short Title: EXPERIMENTAL PHYSIOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 311
Description: Laboratory studies in membrane, nerve, and muscle physiology, with emphasis on experimental design, data analysis, and data interpretation. Course URL: www.ruf.rice.edu/~bioslabs/bios415

BIOC 415 - EXPERIMENTAL MOLECULAR BIOLOGY
Short Title: ADV EXPERIMENTAL NEUROSCIENCE
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): EBIO 202 and BIOC 212 and CAAM 210 and (STAT 305 or STAT 310 or STAT 312) and (BIOC 385 or NEUR 385)
Description: Students will explore the molecular properties of neurons and related cells using standard techniques in the field. Experiments will include manipulating exocytosis, examining protein expression levels in different brain regions of mice, and culturing primary neurons. Lessons will also include a brief lecture/discussion on fundamental principles within cellular and molecular neuroscience.

BIOC 424 - MICROBIOLOGY AND BIOTECHNOLOGY
Short Title: MICROBIOLOGY & BIOTECHNOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 201
Description: Structure and functions of microorganisms with emphasis on their environmental, industrial and medical importance. Graduate/Undergraduate Equivalency: BIOC 524. Recommended Prerequisite(s): BIOC 301 or Instructor Permission. Mutually Exclusive: Credit cannot be earned for BIOC 424 and BIOC 524.
BIOC 425 - PLANT MOLECULAR GENETICS AND DEVELOPMENT  
Short Title: PLANT MOLECULAR GENETICS  
Department: Biosciences  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): BIOC 301 or BIOC 341  
Description: Novel aspects of plant biology and development with emphasis on molecular and genetic mechanisms. Plant responses to the environment and the use of bioengineering and other means to develop new plant products will also be covered. Graduate/Undergraduate Equivalency: BIOC 525. Mutually Exclusive: Credit cannot be earned for BIOC 425 and BIOC 525.

BIOC 442 - MOLECULES, MEMORY AND MODEL ANIMALS: METHODS IN BEHAVIORAL NEUROSCIENCE  
Short Title: BEHAVIORAL NEUROSCIENCE  
Department: Biosciences  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (BIOC 380 or NEUR 380 or PSYC 380 or BIOC 385 or NEUR 385) and (PSYC 203 or EBIO 321) and (STAT 305 or STAT 310 or STAT 312)  
Description: This will be a combined lecture/discussion course on historical and current methods in behavioral neuroscience using primary literature. Topics will include the molecular basis of memory, genetic impacts on cognition, and possible epigenetic influences on behavior. Special emphasis will be placed on discussing different model organism and their benefits/drawbacks in neuroscience research.

BIOC 443 - ADVANCED CONCEPTS AND CRITICAL ANALYSIS IN MODERN DEVELOPMENTAL BIOLOGY  
Short Title: DEVELOPMENT  
Department: Biosciences  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): BIOC 341 or BIOC 301 or BIOC 344  
Description: An advanced undergraduate and graduate level course, dedicated to analysis and evaluation of scientific inquiry into animal development. Textbook based lectures and discussions based on primary scientific literature are used to exemplify and evaluate concepts and methodology. Writing assignments, quizzes, midterm and final exam will be used to evaluate performance. Graduate/Undergraduate Equivalency: BIOC 544. Mutually Exclusive: Credit cannot be earned for BIOC 443 and BIOC 544.

BIOC 445 - ADVANCED MOLECULAR BIOLOGY AND GENETICS  
Short Title: ADV MOLECULAR BIOL & GENETICS  
Department: Biosciences  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): BIOC 301 or BIOC 344  
Description: Molecular and genetic aspects of the regulation of gene expression as seen in simple prokaryotic systems and the model eukaryotic systems used for studies of development. Graduate/Undergraduate Equivalency: BIOC 545. Mutually Exclusive: Credit cannot be earned for BIOC 445 and BIOC 545.

BIOC 447 - EXPERIMENTAL BIOLOGY AND THE FUTURE OF MEDICINE  
Short Title: BIOLOGY AND MEDICINE  
Department: Biosciences  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): BIOC 301 or BIOC 341 or BIOC 344  
Description: Current biological methods offer the potential to transform health care. We will examine the biology and methodology of emergent health care technologies such as stem cell therapy and personal genome sequencing to understand their potential to impact human health. Graduate/Undergraduate Equivalency: BIOC 547.

BIOC 449 - ADVANCED CELL AND MOLECULAR NEUROSCIENCE  
Short Title: ADV CELL AND MOLECULAR NEURO  
Department: Biosciences  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): NEUR 380 or BIOC 380 or PSYC 380  
Description: This course will be an overview of advanced principles and techniques in cell and molecular neuroscience; subjects will include bioelectricity, cellular signaling, and the molecular mechanics of neuronal plasticity. The class will primarily be lecture driven. However, there will be seminar component – students will review primary scientific literature, discuss it in small groups, and present their findings. Recommended Prerequisite(s): NEUR 380 or BIOC 380 or PSYC 380.
BIOC 460 - VIRUSES AND INFECTIOUS DISEASES  
**Short Title:** VIRUSES & INFECTIOUS DISEASES  
**Department:** Biosciences  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** BIOC 201 and BIOC 301 and BIOC 341  
**Description:** Animal viruses, especially those relevant to human health, will be discussed. Topics primarily focus on virus structure and the molecular biology of the virus life cycle. Practical issues such as the history of viral diseases, clinical manifestations, laboratory diagnosis, management and prevention will also be discussed. Graduate/Undergraduate Equivalency: BIOC 550. Mutually Exclusive: Credit cannot be earned for BIOC 450 and BIOC 550.  

BIOC 455 - COMPUTATIONAL SYNTHETIC BIOLOGY  
**Short Title:** COMP SYNTHETIC BIOLOGY  
**Department:** Biosciences  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** MATH 211  
**Description:** Mathematical and computational techniques of cell biology and synthetic biology. Topics include deriving and implementing mathematical and computational models of cellular growth and division, evolution, gene regulation, synthetic gene circuits, enzymatic processing, and stochastic processes in biology. Graduate/Undergraduate Equivalency: BIOC 555. Recommended Prerequisite(s): CAAM 210  

BIOC 460 - CANCER BIOLOGY  
**Short Title:** CANCER BIOLOGY  
**Department:** Biosciences  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** BIOC 301 and BIOC 341  
**Description:** Provides an integrated lecture series summarizing current knowledge in cancer biology and integrating current literature with basic concepts. Topics include: statistics of incidence/survival, types of cancer, pathology, the process of carcinogenesis and sources of carcinogens, genetic and epigenetic mechanisms and consequences, cancer progression, metastasis and current treatment options. Students will learn to use online databases to develop independent strategies for analyzing datasets. There will be several writing assignments and in class oral presentations of research articles. Graduate/Undergraduate Equivalency: BIOC 560. Mutually Exclusive: Credit cannot be earned for BIOC 460 and BIOC 560.  

BIOC 464 - EXTRACELLULAR MATRIX  
**Short Title:** EXTRACELLULAR MATRIX  
**Department:** Biosciences  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** BIOC 301 or BIOC 341  
**Description:** Focus on principles of common biophysical methods used for study of conformations and dynamics of biological macromolecules and assemblies. Topics cover spectroscopic methods (absorption, fluorescence, circular dichroism, epr, NMR), transport processes, sedimentation, calorimetry, mass spectrometry, crystallography, cryoelectron microscopy, atomic force microscopy, ligand-protein interactions, protein folding, single molecule detection, computer simulations, functional genomics and laboratory evolution. Biological examples will be used to demonstrate merits and complementarity in each of the biophysical methods. Graduate/Undergraduate Equivalency: BIOC 551.
**BIOC 482 - STRUCTURAL BIOLOGY**
**Short Title:** STRUCTURAL BIOLOGY  
**Department:** Biosciences  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** BIOC 301 and (PHYS 101 or PHYS 125) and (PHYS 102 or PHYS 126)  
**Description:** Structural biology plays an important role in defining atomic structures of biomolecules and understanding relationships between structure, dynamics and function in living systems. This course will give an introduction to techniques of determining biomolecular structures, X-ray crystallography, NMR, and cryoelectron microscopy and discuss striking examples of the power of structural biology. Graduate/Undergraduate Equivalency: BIOC 552. Mutually Exclusive: Credit cannot be earned for BIOC 482 and BIOC 552.

**BIOC 523 - EXTRACELLULAR MATRIX**
**Short Title:** EXTRACELLULAR MATRIC  
**Department:** Biosciences  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course will address the biology, organization, mechanics, and turnover of extracellular matrix. There will be an emphasis on cells and cell-matrix interactions, matrix distribution within and design of connective tissues and organs techniques for quantitative analysis of matrix, techniques for measurement and modeling of connective tissue biomechanics, changes with growth and aging and tissue/matrix degradation. Additional projects will be required of graduate level students. Cross-list: BIOE 524. Graduate/Undergraduate Equivalency: BIOC 464. Recommended Prerequisite(s): BIOE 372, BIOC/BIOE 341. Mutually Exclusive: Credit cannot be earned for BIOC 523 and BIOC 464.

**BIOC 524 - MICROBIOLOGY & BIOTECHNOLOGY**
**Short Title:** MICROBIOLOGY & BIOTECHNOLOGY  
**Department:** Biosciences  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Structure and functions of microorganisms with emphasis on their environmental, industrial and medical importance. Graduate/Undergraduate Equivalency: BIOC 424. Mutually Exclusive: Credit cannot be earned for BIOC 524 and BIOC 424.

**BIOC 525 - PLANT MOLECULAR GENETICS AND DEVELOPMENT**
**Short Title:** PLANT MOLECULAR GENETICS  
**Department:** Biosciences  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Novel aspects of plant biology and development with emphasis on molecular and genetic mechanisms. Plant responses to the environment and the use of bioengineering and other means to develop new plant products will also be covered Graduate/Undergraduate Equivalency: BIOC 425. Mutually Exclusive: Credit cannot be earned for BIOC 525 and BIOC 425.

**BIOC 530 - LAB MODULE IN NMR SPECTROSCOPY AND MOLECULAR MODELING**
**Short Title:** LAB MOD NMR SPECTROSCOPY&MOLEC  
**Department:** Biosciences  
**Grade Mode:** Standard Letter  
**Course Type:** Laboratory  
**Credit Hour:** 1  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** BIOC 481 or BIOC 482 (may be taken concurrently) or BIOC 552 (may be taken concurrently) or BIOC 551  
**Description:** The students will learn to set up, acquire, and process one-dimensional and basic two-dimensional NMR experiments. Spectral interpretation (3D molecular modeling of proteins and nucleic acids) for nucleic acids and proteins using homonuclear and heteronuclear data. Enrollment limited to 12, with priority to graduate students. Offered first half of the semester. BIOC 482/552 may be taken concurrently with BIOC 530.

**BIOC 532 - LABORATORY MODULE IN OPTICAL SPECTROSCOPY AND KINETICS**
**Short Title:** LAB MOD OPTICAL SPECTROSCOPY  
**Department:** Biosciences  
**Grade Mode:** Standard Letter  
**Course Type:** Laboratory  
**Credit Hours:** 2  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Students learn the principles behind fluorescence, circular dichroism, analytical ultracentrifugation, spectroscopy and rapid kinetics by carrying out experiments with genetically engineered proteins and state-of-the-art equipment. Data will be interpreted and manipulated using curve-fitting and graphics software. Offered second half of the semester. Recommended Prerequisite(s): BIOE 352 or equivalent. Concurrent or previous enrollment in BIOC 481 or BIOC 551.
BIOC 533 - BIOINFORMATICS & COMPUTATIONAL BIOLOGY
Short Title: BIOLINFOMATICS
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An introduction to the emerging field of bioinformatics. Current biological methods offer the potential to transform health care. We will examine the biology and methodology of emergent health care technologies such as stem cell therapy and personal genome sequencing to understand their potential to impact human health. Graduate/Undergraduate Equivalency: BIOC 447. Recommended Prerequisite(s): BIOC 301 or BIOC 341 or BIOC 344.

BIOC 535 - PRACTICAL X-RAY CRYSTALLOGRAPHY
Short Title: PRACT X-RAY CRYSTALLOGRAPHY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Prerequisite(s): BIOC 552 (may be taken concurrently) or BIOC 482 (may be taken concurrently)
Description: This is an introduction to macromolecular crystallography with emphasis on crystalization methods, data acquisition, processing and molecular model-building. Approaches to solving structures will be discussed, as well as refinement of molecular models. Offered second half of the semester. Prerequisites are concurrent and may be taken the same semester.

BIOC 536 - CELLULAR AND MOLECULAR ANIMAL PHYSIOLOGY
Short Title: CELL & MOL ANIMAL PHYSIOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course investigates animal physiology from a cellular and molecular perspective. Using an integrated and comparative approach, students learn how animals maintain homeostasis. Students will read primary literature to explore physiological adaptations for survival in extreme conditions. Graduate/Undergraduate Equivalency: BIOC 335. Mutually Exclusive: Credit cannot be earned for BIOC 536 and BIOC 335.

BIOC 537 - ADVANCED CRYSTALLOGRAPHY SEMINAR
Short Title: ADV CRYSTALLOGRAPHY SEMINAR
Department: Biosciences
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: One hour seminar course in theoretical and practical aspects of crystallography, primarily as it applies to macromolecular crystallography. Presentations will be given by instructors and students on advanced topics based on published works or original research. Repeatable for Credit.

BIOC 540 - METABOLIC ENGINEERING
Short Title: METABOLIC ENGINEERING
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

BIOC 544 - ADVANCED CONCEPTS AND CRITICAL ANALYSIS IN MODERN DEVELOPMENTAL BIOLOGY
Short Title: DEVELOPMENT
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): BIOC 341 or BIOC 301 or BIOC 344
Description: An advanced undergraduate and graduate level course, dedicated to analysis and evaluation of scientific inquiry into animal development. Textbook based lectures and discussions based on primary scientific literature are used to exemplify and evaluate concepts and methodology. Writing assignments, quizzes, midterm and final exam will be used to evaluate performance. Graduate/Undergraduate Equivalency: BIOC 443. Mutually Exclusive: Credit cannot be earned for BIOC 544 and BIOC 443.

BIOC 545 - ADVANCED MOLECULAR BIOLOGY AND GENETICS
Short Title: ADV MOLECULAR BIOL & GENETICS
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Molecular and genetic aspects of the regulation of gene expression as seen in simple prokaryotic systems and the model eukaryotic systems used for studies of development. Graduate/Undergraduate Equivalency: BIOC 445. Mutually Exclusive: Credit cannot be earned for BIOC 545 and BIOC 445.

BIOC 547 - EXPERIMENTAL BIOLOGY AND THE FUTURE OF MEDICINE
Short Title: BIOLOGY AND MEDICINE
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Current biological methods offer the potential to transform health care. We will examine the biology and methodology of emergent health care technologies such as stem cell therapy and personal genome sequencing to understand their potential to impact human health. Graduate/Undergraduate Equivalency: BIOC 447. Recommended Prerequisite(s): BIOC 301 or BIOC 341 or BIOC 344.
BIOC 550 - VIRUSES AND INFECTIOUS DISEASES
Short Title: VIRUSES & INFECTIOUS DISEASES
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): BIOC 201 and BIOC 301 and BIOC 341
Description: Animal viruses, especially those relevant to human health, will be discussed. Topics primarily focus on virus structure and the molecular biology of the virus life cycle. Practical issues such as the history of viral diseases, clinical manifestations, laboratory diagnosis, management and prevention will also be discussed. Graduate/Undergraduate Equivalency: BIOC 450. Mutually Exclusive: Credit cannot be earned for BIOC 550 and BIOC 450.

BIOC 551 - MOLECULAR BIOPHYSICS
Short Title: MOLECULAR BIOPHYSICS I
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): BIOC 301 or BIOC 352
Description: Focus on principles of common biophysical methods used for study of conformations and dynamics of biological macromolecules and assemblies. Topics cover spectroscopic methods (absorption, fluorescence, circular dichroism, epr, NMR), transport processes, sedimentation, calorimetry, mass spectrometry, crystallography, cryo-electron microscopy, atomic force microscopy, ligand-protein interactions, protein folding, single molecule detection, computer simulations, functional genomics and laboratory evolution. Biological examples will be used to demonstrate merits and complementarity in each of the biophysical methods. Graduate/Undergraduate Equivalency: BIOC 481.

BIOC 552 - STRUCTURAL BIOLOGY
Short Title: STRUCTURAL BIOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (PHYS 101 or PHYS 125) and (PHYS 102 or PHYS 126)
Description: Structural biology plays an important role in defining atomic structures of biomolecules and understanding relationships between structure, dynamics and function in living systems. This course will give an introduction to techniques of determining biomolecular structures, X-ray crystallography, NMR, and cryoelectron microscopy and discuss striking examples of the power of structural biology. Graduate/Undergraduate Equivalency: BIOC 482. Recommended prerequisite(s): BIOC 301. Mutually Exclusive: Credit cannot be earned for BIOC 552 and BIOC 482.

BIOC 555 - COMPUTATIONAL SYNTHETIC BIOLOGY
Short Title: COMP SYNTH BIOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Mathematical and computational techniques of cell biology and synthetic biology. Topics include deriving and implementing mathematical and computational models of cellular growth and division, evolution, gene regulation, synthetic gene circuits, enzymatic processing, and stochastic processes in biology. Graduate/Undergraduate Equivalency: BIOC 455.

BIOC 558 - ADVANCES IN NUCLEASE-MEDIATED GENOME ENGINEERING
Short Title: ADV NUCLEASE-MEDIATED GEN ENG
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course provides a comprehensive understanding of advances in the nuclease-mediated genome engineering field. Past and current stages of genome-editing technologies, the fundamental mechanisms of different classes of genome-editing nucleases, and cutting-edge strategies for engineering novel genome-editing agents and their applications in synthetic biology and therapeutics. Cross-list: CHBE 558.

BIOC 560 - CANCER BIOLOGY
Short Title: CANCER BIOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Provides an integrated lecture series summarizing current knowledge in cancer biology and integrating current literature with basic concepts. Topics include: statistics of incidence/survival, types of cancer, pathology, the process of carcinogenesis and sources of carcinogens, genetic and epigenetic mechanisms and consequences, cancer progression, metastasis and current treatment options. Students will learn to use online databases to develop independent strategies for analyzing datasets. There will be several writing assignments and in class oral presentations of research articles. This course requires instructor permission to enroll. Please fill out the special registration form from https://registrar.rice.edu/student/special_registration. All requests will be reviewed and you will be notified of an enrollment decision. Instructor Permission Required. Cross-list: BIOE 560. Graduate/Undergraduate Equivalency: BIOC 460. Mutually Exclusive: Credit cannot be earned for BIOC 560 and BIOC 460.
BIOSC 573 - IMMUNOLOGY
Short Title: IMMUNOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The cellular and molecular basis of innate and adaptive immunity function in mammals. Graduate students will be required to do all the usual assignments associated with the undergraduate section of the course but in addition will write a substantial paper on some aspects of the field that is relevant to their planned careers in biomedical research/biotechnology. Graduate/Undergraduate Equivalency: BIOC 372. Recommended Prerequisite(s): BIOC 301 AND BIOC 341. Mutually Exclusive: Credit cannot be earned for BIOC 573 and BIOC 372.

BIOSC 575 - INTRODUCTION TO RESEARCH
Short Title: INTRODUCTION TO RESEARCH
Department: Biosciences
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction of first-year graduate students to the research programs and laboratories of individual faculty members. Open only to BCB graduate students.

BIOSC 576 - FOUNDATIONS OF BIOTECHNOLOGY
Short Title: FOUNDATIONS OF BIOTECHNOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate level introduction to a wide range of research methods in biosciences and bioengineering. Individual faculty members from the Biosciences and Bioengineering will each present practices and techniques for their areas of expertise. A web-based methods database will be constructed, with student involvement, from the library of lectures. Cross-list: BIOC 576.

BIOSC 577 - FOUNDATIONS OF BIOTECHNOLOGY
Short Title: FOUNDATIONS OF BIOTECHNOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate level introduction to a wide range of research methods in biosciences and bioengineering. Individual faculty members from the biosciences and Bioengineering will each present practices and techniques for their areas of expertise. A web-based methods database will be constructed, with student involvement, from the library of lectures. Cross-list: BIOC 577.

BIOSC 578 - BIOTECHNOLOGY PRACTICUM
Short Title: BIOTECHNOLOGY PRACTICUM
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is part of the NIH Biotechnology Training Program and is limited to program participants. Students will receive exposure and training in cutting edge concepts and technologies. Cross-list: BIOC 578.
BIOC 580 - PROTEIN ENGINEERING
Short Title: PROTEIN ENGINEERING
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Manipulation of gene expression in prokaryotic and eukaryotic cells. Rational design and directed solutions for cell and protein engineering. Selection and screening technologies and process optimization. Synthetic Biology: engineering and application of gene circuits. Molecular biotechnology applications: Diagnosis, Therapeutics and Vaccines. Cross-list: BIOE 580, CHBE 580. Recommended Prerequisite(s): CHBE 310/510 or equivalent is highly recommended.

BIOC 581 - GRADUATE SEMINAR IN BIOCHEMISTRY AND CELL BIOLOGY
Short Title: GRAD SEM BIOCHEM & CELL BIOL
Department: Biosciences
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A discussion of selected research topics. Required of all Biochemistry and Cell Biology graduate students. Open only to BCB graduate students. Repeatable for Credit.

BIOC 582 - GRADUATE SEMINAR IN BIOCHEMISTRY AND CELL BIOLOGY
Short Title: GRAD SEM/BIOCHEM & CELL BIOL
Department: Biosciences
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A discussion of selected research topics. Required of all Biochemistry and Cell Biology graduate students. Open only to BCB graduate students. Repeatable for Credit.

BIOC 583 - MOLECULAR INTERACTIONS
Short Title: MOLECULAR INTERACTIONS
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Enrollment is limited to students with a major in Biochemistry and Cell Biology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: First of two integrated classes taken by first-year graduate students in BCB (to be followed by BIOC 588, Cellular Interactions). Covers advanced topics in genetics, cell biology, and developmental biology, focusing on cellular, tissue, and organismal structure and function with an emphasis on fundamental principles, research methodologies, problem solving, and critical analysis of primary literature. Enrollment limited to BCB graduate students.

BIOC 585 - FUNDAMENTALS OF CELLULAR AND MOLECULAR NEUROSCIENCE
Short Title: FUNDAMENTALS OF NEUROSCIENCE
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Cellular, molecular, and integrative mechanisms of neural function, including membrane and axon physiology, synaptic transmission and plasticity, sensory transduction and processing. Graduate/Undergraduate Equivalency: BIOC 385. Recommended Prerequisite(s): BIOC 201. Mutually Exclusive: Credit cannot be earned for BIOC 585 and BIOC 385.

BIOC 587 - RESEARCH DESIGN, PROPOSAL WRITING, AND PROFESSIONAL DEVELOPMENT
Short Title: PROPOSAL WRITING
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Preparation for professional scientific communication with an emphasis on writing research proposals, describing work in progress, and presenting data in context of research goals.

BIOC 588 - CELLULAR INTERACTIONS
Short Title: CELLULAR INTERACTIONS
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Enrollment is limited to students with a major in Biochemistry and Cell Biology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Second of two integrated classes taken by first-year graduate students in BCB (following BIOC 583, Molecular Interactions). Covers advanced topics in genetics, cell biology, and developmental biology, focusing on cellular, tissue, and organismal structure and function with an emphasis on fundamental principles, research methodologies, and critical analysis of primary literature.
BIOC 589 - COMPUTATIONAL MOLECULAR BIOENGINEERING/BIPHYSICS
Short Title: COMP MOLECULAR BIOENG/BIPHYS
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is a course designed for students in computationally-oriented biomedical and bioengineering majors to introduce the principles and methods used for the simulations and modeling of macromolecules of biological interest. Protein conformation and dynamics are emphasized. Empirical energy function and molecular dynamics calculations, as well as other approaches, are described. Specific biological problems are discussed to illustrate the methodology. Cross-list: BIOE 589. Recommended Prerequisite(s): MATH 212, BIOC 301, BIOE 332.

BIOC 590 - SPECIAL TOPICS IN BIOCHEMISTRY AND CELL BIOLOGY
Short Title: SPEC TOPCS BIOCHEM&CELL BIO
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Development of specific topic areas at the graduate level. Instructor Permission Required.

BIOC 591 - RESEARCH SEMINAR IN BIOCHEMISTRY AND CELL BIOLOGY
Short Title: RESEARCH SEMINAR
Department: Biosciences
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Discussion of individual research or current topics in particular areas. Intended for students conducting research projects in the lab of the instructor. Repeatable for Credit.

BIOC 592 - TOPICS IN QUANTITATIVE BIOLOGY AND BIOMEDICAL INFORMATICS (KECK SEMINAR)
Short Title: TOPICS QUANT BIO & BIOMED INFO
Department: Biosciences
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A discussion of selected research topics in quantitative biology and biomedical informatics. Cross-list: KECK 592. Repeatable for Credit.

BIOC 593 - CURRENT TOPICS IN PLANT BIOLOGY
Short Title: TOPICS IN PLANT BIOLOGY
Department: Biosciences
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to students with a major in Biochemistry and Cell Biology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Discussion of selected research topics in current plant biology literature. Repeatable for Credit.

BIOC 599 - GRADUATE TEACHING IN BIOCHEMISTRY AND CELL BIOLOGY
Short Title: GRADUATE TEACHING IN BIOCHEM
Department: Biosciences
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Independent Study
Credit Hour: 1
Restrictions: Enrollment is limited to students with a major in Biochemistry and Cell Biology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Supervised instruction in teaching biochemistry and cell biology. Repeatable for Credit.

BIOC 611 - RESEARCH SEMINAR IN BIOCHEMISTRY AND CELL BIOLOGY
Short Title: RESEARCH SEMINAR
Department: Biosciences
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Discussion of individual research or current topics in particular areas. Intended for students conducting research projects in the lab of the instructor. Repeatable for Credit.

BIOC 643 - CELL MECHANICS, MECHANOTRANSDUCTION AND THE CELL MICROENVIRONMENT
Short Title: MECHANOTRANSDUCTION
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Mechanotransduction is a fundamental process essential for living systems and plays a fundamental role in cell signaling, cancer metastasis and stem cell differentiation. Additionally, fundamental biological processes such as endocytosis cell fusion and cell migration are driven by a coordinated interplay of molecular interactions that drive membrane deformation. This course will survey the current understanding of mechanotransduction and the mechanical properties of cells and their microenvironment, including membrane and cytoskeletal mechanics. Experimental approaches for measuring and manipulating the material properties of cells and their environment; including optical, electrical and magnetic techniques will be covered. A variety of application will be covered, including manipulation in engineering of mechanotransduction pathways to drive cell migration and stem cell differentiation. Instructor Permission Required. Cross-list: BIOE 643, PHYS 643.

BIOC 701 - GRADUATE LAB RESEARCH I
Short Title: GRADUATE LAB RESEARCH I
Department: Biosciences
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 2-4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate research in Biochemistry and Cell Biology. Designed for short term laboratory projects for first year graduate students. Recommended prerequisite(s): Graduate standing in Biochemistry and Cell Biology. Repeatable for Credit.
Bioengineering (BIOE)

Bioengineering (BIOE)

BIOL 702 - GRADUATE LAB RESEARCH II
Short Title: GRADUATE LAB RESEARCH II
Department: Biosciences
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 2-4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate research in Biochemistry and Cell Biology. Designed for short term laboratory projects for first year graduate students. Recommended prerequisite(s): Graduate standing in Biochemistry and Cell Biology. Repeatable for Credit.

BIOL 800 - BIOCHEMISTRY & CELL BIOLOGY GRADUATE RESEARCH
Short Title: BCB GRADUATE RESEARCH
Department: Biosciences
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to students with a major in Biochemistry and Cell Biology. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

Bioengineering (BIOE)

BIOE 202 - CAREERS IN BIOENGINEERING
Short Title: CAREERS IN BIOENGINEERING
Department: Bioengineering
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This seminar is suitable for freshman, sophomores, and non-majors. A series of guest lectures will introduce students to a variety of career options in bioengineering. Students will participate in at least one field trip to an industry partner or hospital to learn more about careers in bioengineering.

BIOE 252 - BIOENGINEERING FUNDAMENTALS
Short Title: BIOENGINEERING FUNDAMENTALS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): MATH 101 and MATH 102 and MATH 211 (may be taken concurrently) and CHEM 122 and CAAM 210 and (PHYS 101 or PHYS 125 or PHYS 111) and (PHYS 102 or PHYS 126 or PHYS 112)
Description: Introduction to material, energy, charge, and momentum balances in biological systems. Steady state and transient conservation equations for mass, energy, charge and momentum will be derived and applied using basic mathematical principles, physical laws, stoichiometry, and thermodynamic properties. Problem based learning groups will solve open-ended problems. Required for students intending to major in bioengineering. MATH 211 is a concurrent prerequisite and may be taken the same semester.

BIOE 302 - SYSTEMS PHYSIOLOGY
Short Title: SYSTEMS PHYSIOLOGY
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 201 and (PHYS 101 and PHYS 102) or (PHYS 125 and PHYS 126)
Description: This course will teach the fundamentals of human physiology with a specific focus on the nervous, cardiovascular, respiratory, and urinary systems. Basic introductory engineering principles will be applied to the study of physiological systems. The course is aimed to be accessible to students with non-engineering backgrounds. Students may receive credit for only one of BIOE 302, BIOE 322, and BIO 332. Cross-list: BIOC 332. Mutually Exclusive: Credit cannot be earned for BIOE 302 and BIOE 322.

BIOE 307 - SYSTEMS BIOLOGY OF BLOOD VESSELS
Short Title: SYS BIOLOGY OF BLOOD VESSELS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 252
Description: How blood vessels respond to hypoxia is a process critical to the progression of many diseases and conditions including cardiovascular disease, cancer, cerebrovascular disease, diabetes, obesity and arthritis. Physiological processes such as exercise, aging, and wound healing also depend on hypoxia-induced microvessel changes. This course introduces engineering concepts of hypoxic response, angiogenesis, and capillary remodeling - from the effects at the intracellular level to the whole body. Topics covered include computational systems biology modeling of hypoxia and angiogenesis, the use of angiogenesis in tissue engineering and regenerative medicine, imaging of blood vessel dynamics, capillaries of the brain, and the design of new blood vessels. Graduate/Undergraduate Equivalency: BIOE 507. Mutually Exclusive: Credit cannot be earned for BIOE 307 and BIOE 507.

BIOE 320 - SYSTEMS PHYSIOLOGY LAB MODULE
Short Title: SYSTEMS PHYSIOLOGY LAB MODULE
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 252 and (BIOS 332 or BIOE 322 (may be taken concurrently) or BIOE 322 (may be taken concurrently))
Description: Exploration of physiologic systems through measurement of biologic signals. EEG, ECG, EMG pulmonary function tests, etc. are performed and analyzed. Students will explore physiologic concepts through computer simulations, data collection, and analysis. Enrollment in or completion of BIOE 322/BIO 332 is expected and maybe taken the same semester as BIOE 320. For students intending to major in Bioengineering. Instructor Permission Required.
BIOE 330 - BIOREACTION ENGINEERING
Short Title: BIOREACTION ENGINEERING
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 252
Description: Introduction to engineering principles and modeling regulation and circuitry at the cellular level. Topics include genetic metabolic networks and cell surface interactions.

BIOE 322 - FUNDAMENTALS OF SYSTEMS PHYSIOLOGY
Short Title: FUND OF SYSTEMS PHYSIOLOGY
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 252 and MATH 211
Description: This course will teach the fundamentals of human physiology from an engineering perspective, with specific focus on the nervous, cardiovascular, respiratory and urinary systems. Lectures, assignments and exams will be quantitative and will introduce engineering principles, such as conservation of mass and energy, controls and system analysis, thermodynamics and mass transport, and apply them to the study of physiologic systems. This course is limited to undergraduates. Students may receive credit for only one of BIOE 302, BIOE 322, and BIOC 332 Mutually Exclusive: Credit cannot be earned for BIOE 322 and BIOC 332/BIOE 302.

BIOE 332 - BIOENGINEERING THERMODYNAMICS
Short Title: BIOENGINEERING THERMODYNAMICS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 252 and MATH 212
Description: This course provides a mathematically rigorous and quantitative coverage of the fundamentals of thermodynamics with applications drawn from contemporary bioengineering problems. Fundamental topics will include the Zeroth, First and Second Law, Entropy Inequality, Gibbs and Helmholtz Free Energies, The Third Law, Maxwell Relations, chemical potential, equilibrium, phase transitions, solution thermodynamics, protein-ligand binding and statistical mechanics. Advanced topics will include transcription factor-DNA binding, nucleic acid hybridization, translation initiation and genetic circuits. The course will cover the role that thermodynamics plays in molecular engineering and synthetic biology.

BIOE 342 - LABORATORY IN TISSUE CULTURE
Short Title: LABORATORY IN TISSUE CULTURE
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 440 or STAT 440 or BIOC 311 or BIOS 311
Description: Introduction to tissue culture techniques, including cell passage, cell viability, and cell attachment and proliferation assays. Students complete quantitative analysis of their data. Engineering design and applications are featured in graded work. Sections 1 and 2 are taught during the first half of the semester. Sections 3 and 4 are taught during the second half of the semester. Students may be required to attend lab on a university holiday. Instructor Permission Required. Cross-list: BIOC 320.

BIOE 348 - MOLECULAR TECHNIQUES IN BIOENGINEERING
Short Title: MOLECULAR TECHNIQUES IN BIOE
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 252 and (BIOC 201 or BIOS 201)
Description: Application of engineering principles to biological processes. Mathematical and experimental techniques for quantitative descriptions of enzyme kinetics, metabolic and genetic networks, cell growth kinetics, bioreactor design and operation.
BIOE 360 - APPROPRIATE DESIGN FOR GLOBAL HEALTH
Short Title: APPRO DESIGN FOR GLOBAL HEALTH
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): GLHT 201
Description: Seminar-style introductory design course covering epidemiology, pathophysiology, health systems, health economics, medical ethics, humanitarian emergencies, scientific and engineering design methods, and appropriate health technology case studies. To register, you must be enrolled in the GLHT minor and submit a 250 statement to beyondtraditionalborders@rice.edu by Monday of preregistration. The minor and course prerequisite is waived for students majoring in Bioengineering. Instructor Permission Required. Cross-list: GLHT 360.

BIOE 361 - METABOLIC ENGINEERING FOR GLOBAL HEALTH ENVIRONMENTS
Short Title: METAB ENG GLOBAL HEALTH ENVMNT
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (BIOE 362 or GLHT 362) and (PHYS 126 or PHYS 102 or PHYS 112 or PHYS 142) and MATH 102
Description: Importance of nutritional and pharmaceutical compounds, impact of cost of compounds on global health; Overview of biochemical pathways; metabolite analysis; Genetic engineering and molecular biology tools for ME; Pharmaceuticals and drug discovery approaches (antibiotics, antivirals; anti-parasite compounds); anti-diarrhea treatments; vaccines. Cross-list: BIOC 361, GLHT 361.
Course URL: www.btb.rice.edu

BIOE 365 - SUSTAINABLE WATER PURIFICATION FOR THE DEVELOPING WORLD
Short Title: SUST WTR PURIF FOR DEV WORLD
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is an overview of sustainable strategies for safe water supply in off-the-grid, low-income regions. Topics covered include water quality and treatment, sustainability and WASH (water, sanitation and hygiene). A major element of the course is a project to solve a water-related issue in a real-world context. Cross-list: CEVE 314, GLHT 314. Repeatable for Credit.

BIOE 370 - BIOMATERIALS
Short Title: BIOMATERIALS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 252 and CHEM 211 and (MECH 211 (may be taken concurrently) or CEVE 211 (may be taken concurrently))
Description: This course will introduce both basic materials science and biological concepts with an emphasis on application of basic quantitative engineering principles to understanding the interactions between materials and biological systems. Topics covered include chemical structure of biomaterials, physical, mechanical, and surface properties of biomaterials, biomaterial degradation, and biomaterial processing. Additional topics include protein and cell interactions with biomaterials, biomaterial implantation, and acute inflammation, wound healing and the presence of biomaterials immune responses to biomaterials, biomaterials, immune responses to biomaterials, biomaterials and thrombosis, as well as infection, tumorigenesis, and calcification of biomaterials that can collectively apply to design of biomaterials for myriad applications. MECH 211 or CEVE 211 may be taken concurrently with BIOE 370.

BIOE 372 - BIOMECHANICS
Short Title: BIOMECHANICS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 252 and MATH 212 and (MECH 211 or CEVE 211)
Description: This course will introduce both basic materials science and biological concepts with an emphasis on application of basic quantitative engineering principles to understanding the interactions between materials and biological systems. Topics covered include chemical structure of biomaterials, physical, mechanical, and surface properties of biomaterials, biomaterial degradation, and biomaterial processing. Additional topics include protein and cell interactions with biomaterials, biomaterial implantation, and acute inflammation, wound healing and the presence of biomaterials immune responses to biomaterials, biomaterials, immune responses to biomaterials, biomaterials and thrombosis, as well as infection, tumorigenesis, and calcification of biomaterials that can collectively apply to design of biomaterials for myriad applications. MECH 211 or CEVE 211 may be taken concurrently with BIOE 370.

BIOE 380 - INTRODUCTION TO NEUROENGINEERING: MEASURING AND MANIPULATING NEURAL ACTIVITY
Short Title: INTRO TO NEUROENGINEERING
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (PHYS 101 or PHYS 111 or PHYS 125 or PHYS 141) and (PHYS 102 or PHYS 112 or PHYS 126 or PHYS 142)
Description: This course will serve as an introduction to quantitative modeling of neural activity and the methods used to stimulate and record brain activity. Cross-list: ELEC 380, NEUR 383. Mutually Exclusive: Credit cannot be earned for BIOE 380 and BIOE 480/BIOE 590/ELEC 480/ELEC 580.
BIOE 385 - BIOMEDICAL INSTRUMENTATION LAB
- Short Title: BIOMEDICAL INSTRUMENTATION LAB
- Department: Bioengineering
- Grade Mode: Standard Letter
- Course Type: Laboratory
- Credit Hour: 1
- Restrictions: Graduate level students may not enroll.
- Course Level: Undergraduate Upper-Level
- Corequisite: BIOE 383
- Description: Students will gain hands on experience with building biomedical instrumentation circuits and systems. Students will learn the basics of lab view programming and signal analysis. Instructor Permission Required.

BIOE 401 - UNDERGRADUATE RESEARCH
- Short Title: UNDERGRADUATE RESEARCH
- Department: Bioengineering
- Grade Mode: Standard Letter
- Course Type: Research
- Credit Hours: 1-4
- Restrictions: Graduate level students may not enroll.
- Course Level: Undergraduate Upper-Level
- Description: Independent investigation of a specific topic or problem in modern bioengineering research under the direction of a selected faculty member. Research project has a strong engineering component. Repeatable for Credit.

BIOE 400 - ENGINEERING UNDERGRADUATE RESEARCH
- Short Title: ENGINEERING UG RESEARCH
- Department: Bioengineering
- Grade Mode: Standard Letter
- Course Type: Research
- Credit Hours: 1-4
- Restrictions: Graduate level students may not enroll.
- Course Level: Undergraduate Upper-Level
- Description: Independent investigation of a specific topic or problem in modern bioengineering research under the direction of a selected faculty member. Research project has a strong engineering component. Repeatable for Credit.
BIOE 403 - ADVANCES IN BIONANOTECHNOLOGY
Short Title: ADVANCES IN BIONANOTECHNOLOGY
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 370 (may be taken concurrently)
Description: This course covers nanotechnology applications in bioengineering. Students learn about cutting edge research that uses the tools of nanotechnology to tackle medical problems. Topics include bionanotechnology-related research for diagnosis, detection, and treatment of disease; cell targeting; drug design and delivery; gene therapy; prostheses and implants and tissue regeneration. (REGISTRATION NOTE: The prerequisite BIOE 370 can also be taken concurrently with BIOE 403)

BIOE 408 - SYNTHETIC BIOLOGY
Short Title: SYNTHETIC BIOLOGY
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 332
Description: Design of biology at scales from molecules to multicellular organisms will be covered by lecture, primary literature, and student presentations. Students will execute a team based design challenge. Graduate/Undergraduate Equivalency: BIOE 508. Mutually Exclusive: Credit cannot be earned for BIOE 408 and BIOE 508.

BIOE 419 - INNOVATION LAB FOR MOBILE HEALTH
Short Title: INNOVATION LAB - MOBILE HEALTH
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will be an innovation lab for mobile health products. The students will organize themselves in groups with complementary skills and work on a single project for the whole semester. The aim will be to develop a product prototype which can then be demonstrated to both medical practitioners and potential investors. For successful projects with an operational prototype, the next steps could be applying for OWLspark (Rice accelerator program) or crowd sourcing (like Kickstarter) and/or work in Scalable Health Labs over summer. ELEC Juniors can also continue the project outcomes as a starting point for their senior design. Cross-list: ELEC 419. Graduate/Undergraduate Equivalency: BIOE 534. Mutually Exclusive: Credit cannot be earned for BIOE 419 and BIOE 534. Repeatable for Credit.
Course URL: www.ece.rice.edu/~ashu/ELEC419.html

BIOE 420 - TRANSPORT PHENOMENA IN BIOENGINEERING
Short Title: TRANSPORT PHENOMENA IN BIOE
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 211 and MATH 212 and (BIOE 332 or CHBE 411) and BIOE 391
Description: BIOE/CHBE 420 covers transport phenomena as applied to biological systems and biomedical devices. Conservation of momentum and mass equations are first derived and then used to analyze transport of momentum and mass in biology, physiology, and in biomedical devices. This course is designed for senior bioengineering students. Cross-list: CHBE 420.

BIOE 421 - MICROCONTROLLER APPLICATIONS
Short Title: MICROCONTROLLER APPLICATIONS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 385
Description: This class covers the usage of microcontrollers in a laboratory setting. We will start with basic electronics and, in the lab component, design, program, and build systems utilizing widely-available microcontrollers (e.g. Arduino, Raspberry Pi). Units in motion control, sensors (light, temperature, humidity, UV/Vis absorbance), and actuation (pneumatics, gears, and motors) will provide students with functional knowledge to design and prototype their own experimental systems for laboratory-scale automation. Instructor Permission Required. Graduate/Undergraduate Equivalency: BIOE 521. Mutually Exclusive: Credit cannot be earned for BIOE 421 and BIOE 521.

BIOE 422 - GENE THERAPY
Short Title: GENE THERAPY
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Senior. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 211 and (BIOS 201 or BIOC 201)
Description: This course will examine the gene therapy field, with topics ranging from gene delivery to vectors to ethics of gene therapy. The design principles for engineering improved gene delivery vectors, both viral and nonviral, will be discussed. The course will culminate in a design project focused on engineering a gene delivery device for a specific therapeutic application. Graduate/Undergraduate Equivalency: BIOE 522. Mutually Exclusive: Credit cannot be earned for BIOE 422 and BIOE 522.
BIOE 431 - BIOMATERIALS APPLICATIONS
Short Title: BIOMATERIALS APPLICATIONS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (CHEM 211 or CHEM 251) and BIOE 370
Description: Emphasis will be placed on issues regarding the design, synthesis, evaluation, regulation and clinical translation of biomaterials for specific applications. An overview of significant biomaterials engineering applications will be given, including topics such as ophthalmologic, orthopedic, cardiovascular and drug delivery applications, with attention to specific case studies. Regulatory issues concerning biomaterial will also be addressed. Assignments for this class will include frequent readings of the scientific literature with occasional homework questions, one midterm and cumulative final, a group project, a seminar report and individual presentations. Graduate/Undergraduate Equivalency: BIOE 631. Mutually Exclusive: Credit cannot be earned for BIOE 431 and BIOE 631.

BIOE 439 - APPLIED STATISTICS FOR BIOENGINEERING AND BIOTECHNOLOGY
Short Title: APPLIED STAT FOR BIOE BIOTECH
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 252 (may be taken concurrently)
Description: Course will cover fundamentals of probability and statistics with emphasis on application to biomedical problems and experimental design. Recommended for students pursuing careers in medicine or biotechnology. BIOE 439 and BIOE 440/STAT 440 cannot both be taken for credit. Prerequisite BIOE 252 may be taken concurrently. Graduate/Undergraduate Equivalency: BIOE 539. Mutually Exclusive: Credit cannot be earned for BIOE 439 and BIOE 440/BIOTECH 539/STAT 440.

BIOE 440 - STATISTICS FOR BIOENGINEERING
Short Title: STATISTICS FOR BIOENGINEERING
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 252 (may be taken concurrently)
Description: Course covers application of statistics to bioengineering. Topics include descriptive statistics, estimation, hypothesis testing, ANOVA, and regression. Offered first five weeks of the semester. BIOE 252 may be taken concurrently with BIOE 440. BIOE 440/STAT 440 and BIOE 439 cannot both be taken for credit. Cross-list: STAT 440. Mutually Exclusive: Credit cannot be earned for BIOE 440 and BIOE 439.

BIOE 442 - TISSUE ENGINEERING LAB MODULE
Short Title: TISSUE ENGINEERING LAB MODULE
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (BIOE 342 or BIOC 320 or BIOS 320) and (BIOE 440 or STAT 440)
Description: Students design and conduct a series of experiments to synthesize PLLA, characterize PLLA and PLGA, monitor PLLA and PLGA degradation, and assess the viability, attachment, and proliferation of HDF cells on PLLA films. The experiments include many of the basic types of experiments that would be required to do a preliminary investigation of a tissue engineered product. Sections 1 and 2 will be taught during the first half of the semester and sections 3 and 4 will be taught during the second half of the semester. In addition sections 1 and 3 will need to come into lab on 2-3 Fridays and sections 2 and 4 will need to come into lab on 2-3 Saturdays. Section sign-up is required by the instructor in Keck 108 during preregistration week.

BIOE 443 - BIOPROCESSING LAB MODULE
Short Title: BIOPROCESSING LAB MODULE
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (BIOE 342 or BIOC 320 or BIOS 320) and (BIOE 440 or STAT 440)
Description: Students design and conduct a series of experiments to observe the growth of E. coli under different conditions, including agar plates, shake flasks, and a small-scale bioreactor. The E. coli has been transformed with a plasmid that produces beta-galactosidase. Engineering applications are emphasized. Some work "off hours" (early evening) is required. Sections 1 and 2 are taught in the first half of the semester and Sections 3 and 4 are taught in the second half of the semester. Section sign-up is required by the instructor in Keck 108 during preregistration week.

BIOE 444 - MECHANICAL TESTING LAB MODULE
Short Title: MECHANICAL TESTING LAB MODULE
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 372 (may be taken concurrently) and (BIOE 440 or STAT 440)
Description: Students design and conduct a series of experiments to elucidate the mechanical and material properties of animal tissue using the Instron. BIOE 372 may be taken concurrently with BIOE 444.

<tr>
<td>BIOE 446 - COMPUTATIONAL MODELING LAB</td>
<td>1</td>
<td>Laboratory</td>
<td>Graduate level students may not enroll.</td>
<td>BIOE 391</td>
<td>This course offers a hands-on application to systems biology modeling. Students will learn a range of modeling methods, and apply them directly in class to current bioengineering problems. Weekly tutorials will be offered, and a laptop is required (or can be loaned). Topics covered include in silico drug delivery and design studies, integrating multiscale models with high-resolution imaging, experimental design via computer modeling, and patient-specific simulations. Modeling methods include protein-protein interaction networks, biocircuits, stochastic differential equations, agent-based modeling, computational fluid dynamics, and finite element modeling.</td>
</tr>
<tr>
<td>BIOE 447 - DIGITAL DESIGN &amp; VISUALIZATION</td>
<td>1</td>
<td>Laboratory</td>
<td>Graduate level students may not enroll.</td>
<td></td>
<td>Students will acquire basic to intermediate-level digital design proficiency for bioengineering-related applications. Programs for the design of patient-specific therapies including image reconstruction, computer aided design, and parameter modeling will be used to create models. Section sign up is required during pre-registration week.</td>

</table>
BIOE 460 - BIOCHEMICAL ENGINEERING
Short Title: BIOCHEMICAL ENGINEERING
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 252
Description: Design, operation, and analysis of processes in the biochemical industries. Topics include enzyme kinetics, cell growth kinetics, energetics, recombinant DNA technology, microbial, tissue and plant cell cultures, bioreactor design and operation, and down stream processing. Cross-list: CHBE 460.

BIOE 464 - EXTRACELLULAR MATRIX
Short Title: EXTRACELLULAR MATRIX
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOS 341 or BIOC 341
Description: This course will address the biology, organization, mechanics, and turnover of extracellular matrix. There will be an emphasis on cells and cell-matrix interactions, matrix distribution within and design of connective tissues and organs techniques for quantitative analysis of matrix, techniques for measurement and modeling of connective tissue biomechanics, changes with growth and aging and tissue/matrix degradation. Cross-list: BIOE 464. Graduate/Undergraduate Equivalency: BIOE 524. Recommended Prerequisite(s): BIOE 372, BIOC/ BIOE 341. Mutually Exclusive: Credit cannot be earned for BIOE 464 and BIOE 524.

BIOE 470 - FROM SEQUENCE TO STRUCTURE: AN INTRODUCTION TO COMPUTATIONAL BIOLOGY
Short Title: FROM SEQUENCE TO STRUCTURE
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Contemporary introduction to problems in computational biology spanning sequence to structure. The course has three modules: the first introduces students to the design and statistical analysis of gene expression studies; the second covers statistical machine learning techniques for understanding experimental data generated in computational biology; and the third introduces problems in the modeling of protein structure using computational methods from robotics. The course is project oriented with an emphasis on computation and problem-solving. Cross-list: COMP 470, STAT 470. Recommended Prerequisite(s): COMP 280 and (STAT 310 or STAT 331).

BIOE 481 - COMPUTATIONAL NEUROSCIENCE AND NEURAL ENGINEERING
Short Title: COMP/NEUROSCIENCE/NEURAL ENGNR
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An introduction to the anatomy and physiology of the brain. Includes basic electrophysiology of nerve and muscle. Develops mathematical models of neurons, synaptic transmission and natural neural networks. Leads to a discussion of neuromorphic circuits which can represent neuron and neural network behavior in silicon. Recommendation: Knowledge of electrical circuits, operational amplifier circuits and ordinary differential equations. Involves programming Matlab. Cross-list: ELEC 481, NEUR 481. Graduate/Undergraduate Equivalency: BIOE 583. Recommended Prerequisite(s): Knowledge of basic electrical and operational amplifier circuits; and ordinary differential equations. Mutually Exclusive: Credit cannot be earned for BIOE 481 and BIOE 583.

BIOE 482 - PHYSIOLOGICAL CONTROL SYSTEMS
Short Title: PHYSIOLOGICAL CONTROL SYSTEMS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A study of the somatic and autonomic nervous system control of biological systems. Simulation methods, as well as, techniques common to linear and nonlinear control theory are used. Also included is an introduction to sensors and instrumentation techniques. Examples are taken from the cardiovascular, respiratory, and visual systems. Cross-list: ELEC 482. Graduate/Undergraduate Equivalency: BIOE 582. Recommended Prerequisite(s): Knowledge of basic electrical and operational amplifier circuits: and ordinary differential equations. Mutually Exclusive: Credit cannot be earned for BIOE 482 and BIOE 582.
**BIOE 484 - BIOPHOTONICS INSTRUMENTATION AND APPLICATIONS**

*Short Title:* BIOPHOTONICS INSTRUMENTATION  
*Department:* Bioengineering  
*Grade Mode:* Standard Letter  
*Course Type:* Lecture  
*Credit Hours:* 3  
*Restrictions:* Graduate level students may not enroll.  
*Course Level:* Undergraduate Upper-Level  
*Prerequisite(s):* BIOE 383  
*Description:* This course is an introduction to the fundamentals of Biophotonics instrumentation related to coherent light generation, transmission by optical components such as lenses and fibers, and modulation and detection. Interference and polarization concepts and light theories including ray and wave optics will be covered. A broad variety of optical imaging and detection techniques including numerous microscopy techniques, spectral imaging, polarimetry, OCT and others will be covered. The course will guide through the principles and concepts used in a variety of optical instruments and point to special requirements for Biomedical applications with emphasis on principles and concepts used in a variety of optical instruments and point to special requirements for Biomedical applications with emphasis on principles and concepts used in a variety of optical instruments and point out special requirements for bio-medical applications in optical sensing, diagnosis, and biomedical applications. Graduate/Undergraduate Equivalency: BIOE 512. Mutually Exclusive: Credit cannot be earned for BIOE 484 and BIOE 512.

**BIOE 485 - FUNDAMENTALS OF MEDICAL IMAGING I**

*Short Title:* FUND MEDICAL IMAGING I  
*Department:* Bioengineering  
*Grade Mode:* Standard Letter  
*Course Type:* Lecture  
*Credit Hours:* 3  
*Restrictions:* Graduate level students may not enroll.  
*Course Level:* Undergraduate Upper-Level  
*Description:* This course will introduce basic principles of image acquisition, formation and processing of several medical imaging modalities such as X-Ray, CT, MRI, and US that are used to evaluate the human anatomy. The course also includes visits to a clinical site to gain experience with the various imaging modalities covered in class. Cross-list: COMP 485, ELEC 485. Graduate/Undergraduate Equivalency: BIOE 591. Recommended Prerequisite(s): MATH 211 and MATH 212. Mutually Exclusive: Credit cannot be earned for BIOE 485 and BIOE 591.

**BIOE 486 - FUNDAMENTALS OF MEDICAL IMAGING II**

*Short Title:* FUND MEDICAL IMAGING II  
*Department:* Bioengineering  
*Grade Mode:* Standard Letter  
*Course Type:* Lecture  
*Credit Hours:* 3  
*Restrictions:* Graduate level students may not enroll.  
*Course Level:* Undergraduate Upper-Level  
*Prerequisite(s):* ELEC 485 or BIOE 485 or COMP 485  
*Description:* This course focuses on functional imaging modalities used specifically in nuclear medicine such as Gamma cameras, SPECT, and PET imaging. The course will introduce the basic principles of image acquisition, formation, processing and the clinical applications of these imaging modalities and lays the foundations for understanding the principles of radiotracer kinetic modeling. A trip to a clinical site in also planned to gain experience with nuclear medicine imaging. Cross-list: COMP 486, ELEC 486. Graduate/Undergraduate Equivalency: BIOE 596. Mutually Exclusive: Credit cannot be earned for BIOE 486 and BIOE 596.

**BIOE 490 - INTRO COMPUTATIONAL SYSTEMS BIOLOGY: MODELING & DESIGN PRINCIPLES OF BIOCHEM NETWORKS**

*Short Title:* INTRO SYSTEMS BIOLOGY MODELING  
*Department:* Bioengineering  
*Grade Mode:* Standard Letter  
*Course Type:* Lecture  
*Credit Hours:* 3  
*Restrictions:* Graduate level students may not enroll.  
*Course Level:* Undergraduate Upper-Level  
*Prerequisite(s):* (MATH 212 or MATH 213) and (BIOE 252 or CHBE 310) and BIOC 341 and CAAM 210  
*Description:* The course summarizes techniques for quantitative analysis and simulations of basic circuits in genetic regulation, signal transduction and metabolism. We discuss engineering approaches adapted to computational systems biology and aim to formulate evolutionary design principles explaining organization of networks in terms of their physiological demands. We discuss biochemical simulation methodology and software as well as recent advances in the field. Topics include end-product inhibition in biosynthesis, optimality and robustness of the signaling networks and kinetic proofreading. Graduate/Undergraduate Equivalency: BIOE 552. Mutually Exclusive: Credit cannot be earned for BIOE 490 and BIOE 552.

**BIOE 492 - SENSORY NEUROENGINEERING**

*Short Title:* SENSORY NEUROENGINEERING  
*Department:* Bioengineering  
*Grade Mode:* Standard Letter  
*Course Type:* Seminar  
*Credit Hours:* 3  
*Restrictions:* Graduate level students may not enroll.  
*Course Level:* Undergraduate Upper-Level  
*Prerequisite(s):* BIOE 332  
*Description:* This course will explore how bioengineering techniques and principles are applied to understand and model sensory systems, with a focus on the auditory, vestibular, and visual systems. The interaction between the electrical, mechanical and optical aspects of these systems, and ways to modulate these interactions, will be explored. The course will also cover the design of current auditory, visual and somato-sensory neuroprosthetics (i.e. cochlear implants, retinal implants and brain-machine interfaces), as well as emerging technologies for neural stimulation. Graduate/Undergraduate Equivalency: BIOE 592. Mutually Exclusive: Credit cannot be earned for BIOE 492 and BIOE 592.

**BIOE 500 - GRADUATE RESEARCH**

*Short Title:* GRADUATE RESEARCH  
*Department:* Bioengineering  
*Grade Mode:* Satisfactory/Unsatisfactory  
*Course Type:* Research  
*Credit Hours:* 1-15  
*Restrictions:* Enrollment is limited to Graduate level students.  
*Course Level:* Graduate  
*Description:* Repeatable for Credit.
BIOE 502 - PHYSICAL BIOLOGY
Short Title: PHYSICAL BIOLOGY
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Basic introduction to a biophysical view of living systems, from the subcellular to the multicellular scales. Topics include: biomolecular dynamics, cellular biomechanics, cell motility and cell division, calcium signaling, action potential propagation, and tissue organization. Cross-list: SSPB 501.

BIOE 504 - FIRST YEAR GRADUATE STUDENT LAB ROTATION
Short Title: GRADUATE LAB ROTATION
Department: Bioengineering
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course provides students the opportunity to experience different research projects and assists first-year students in choosing an advisor and a lab for conduction thesis research. Students must successfully complete rotations in three labs to receive a satisfactory grade. All new BIOE PhD students must take this course during their first semester.

BIOE 506 - GRADUATE INDEPENDENT STUDY
Short Title: GRADUATE INDEPENDENT STUDY
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Independent investigation of a specific topic in modern bioengineering research under the direction of a faculty member. Department Permission Required. Repeatable for Credit.

BIOE 507 - SYSTEMS BIOLOGY OF BLOOD VESSELS
Short Title: SYS BIOLOGY OF BLOOD VESSELS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): BIOE 252
Description: How blood vessels respond to hypoxia is a process critical to the progression of many diseases and conditions including cardiovascular disease, cancer, cerebrovascular disease, diabetes, obesity and arthritis. Physiological processes such as exercise, aging, and wound healing also depend on hypoxia-induced microvessel changes. This course introduces engineering concepts of hypoxic response, angiogenesis, and capillary remodeling - from the effects at the intracellular level to the whole body. Topics covered include computational systems biology modeling of hypoxia and angiogenesis, the use of angiogenesis in tissue engineering and regenerative medicine, imaging of blood vessel dynamics, capillaries of the brain, and the design of new blood vessels. Graduate students will be required to complete a term research project and present a related short seminar. Graduate/Undergraduate Equivalency: BIOE 307. Mutually Exclusive: Credit cannot be earned for BIOE 507 and BIOE 307.

BIOE 508 - SYNTHETIC BIOLOGY
Short Title: SYNTHETIC BIOLOGY
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Design of biology at scales from molecules to multicellular organisms will be covered by lecture, primary literature, and student presentations. Students will write a research proposal at the end of the course. Cross-list: SSPB 503. Graduate/Undergraduate Equivalency: BIOE 408. Mutually Exclusive: Credit cannot be earned for BIOE 508 and BIOE 408.

BIOE 509 - POINT-OF-CARE DIAGNOSTICS
Short Title: POINT-OF-CARE DIAGNOSTICS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course provides an overview of diagnostic technologies that can be used at the point-of-care, including lateral flow assays, 2- and 3-D paper-based assays, and imaging based assays. Topics include the principles of assay design, validation and commercial development, with a focus on diagnostics for low-resource settings. The course includes a lecture and laboratory component, along with a team-based design project. Only graduate students may register for this course.
BIOE 510 - SEMINAR IN TROPICAL MEDICINE
Short Title: SEMINAR IN TROPICAL MEDICINE
Department: Bioengineering
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: 8 week lecture series on topics in global health. The theme for this offering is one health; integrating efforts to obtain optimal health for humans, animals, and the environment. Offered in conjunction with the new National School of Tropical Medicine, the course will feature lectures by various experts on the public health issues most pressing in poor populations in the world today. Course open to all undergraduates and graduate students. Cross-list: GLHT 510. Repeatable for Credit.

BIOE 512 - BIOPHOTONICS INSTRUMENTATION AND APPLICATIONS
Short Title: BIOPHOTONICS INSTRUMENTATION
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is an introduction to the fundamentals of Biophotonics instrumentation related to coherent light generation, transmission by optical components such as lenses and fibers, and modulation and detection. Interference and polarization concepts and light theories including ray and wave optics will be covered. A broad variety of optical imaging and detection techniques including numerous microscopy techniques, spectral imaging, polarimetry, OCT and others will be covered. The course will guide through the principles and concepts used in a variety of optical instruments and point to special requirements for Biomedical applications with emphasis on principles and concepts used in a variety of optical instruments and point to special requirements for Biomedical applications with emphasis on principles and concepts used in a variety of optical instruments and point out special requirements for bio-medical applications in optical sensing, diagnosis, and biomedical applications. In addition to the undergraduate requirements in BIOE 484, graduate students will be required to complete more complex problems on both homework and tests. Graduate students will also be required to submit a research paper with oral presentations. Graduate/Undergraduate Equivalency: BIOE 484. Mutually Exclusive: Credit cannot be earned for BIOE 512 and BIOE 484.

BIOE 514 - INTRODUCTION TO BIOSTATISTICS
Short Title: INTRODUCTION TO BIOSTATISTICS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Bioengineering. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Presents basic and advanced methods of statistics as applied to problems in bioengineering. Demonstrates techniques for data organization, exploration, and presentation. Foundations of statistical estimation, inference, and testing are reviewed. Optimal planning of experiments is explored. Advanced techniques include multiple regression, variable selection, logistic regression, analysis of variance, survival analysis, multiple measurements and measurements over time. Additional topics, such as Bayesian methods, will be discussed as time allows. Labs will use the statistical software JMP and/or R. Cross-list: STAT 514.

BIOE 516 - MECHANICS, TRANSPORT, AND CELLULAR SIGNALING
Short Title: MECHANICS/TRANSPORT/SIGNALING
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will cover the fundamental principles of mechanics, thermodynamics, and transport in the context of classical and contemporary bioengineering problems. An overall goal will be to expose students to the integrated approaches that are necessary to solve complex research problems. Topics covered will include membrane transport, cell signaling, and mechanotransduction. This course is intended for first year BIOE PhD students only.

BIOE 517 - INSTRUMENTATION AND MOLECULAR ANALYSIS
Short Title: INSTRUMENT/MOLECULAR ANALYSIS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will cover the basic principles of optics, optical instrumentation, microscopy and molecular detection technologies. Emphasis will be placed on the application of advance microscopy techniques to imaging problems in biology and medicine. This course is intended for first year BIOE PhD students only.
BIOE 521 - MICROCONTROLLER APPLICATIONS

Short Title: MICROCONTROLLER APPLICATIONS

Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): BIOE 385
Description: This class covers the usage of microcontrollers in a laboratory setting. We will start with basic electronics and, in the lab component, design, program, and build systems utilizing widely-available microcontrollers (e.g. Arduino, Raspberry Pi). Units in motion control, sensors (light, temperature, humidity, UV/Vis absorbance), and actuation (pneumatics, gears, and motors) will provide students with functional knowledge to design and prototype their own experimental systems for laboratory-scale automation. BIOE 521 students will be expected to complete a final research paper. Instructor Permission Required. Graduate/Undergraduate Equivalency: BIOE 421. Mutually Exclusive: Credit cannot be earned for BIOE 521 and BIOE 421.

BIOE 518 - INTRODUCTION TO COMPUTATIONAL BIOLOGY

Short Title: INTRO TO COMPUTATION BIOLOGY

Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Provides students with the ability to use computational methods to understand and analyze biological data. This course will introduce students to advances in computational cell biology from an engineering perspective, and equip them with a suite of tools emerging from systems biology. Topics covered include computational cell engineering, high-throughput analysis, modeling of signaling pathways, network analysis, imaging coupled to modeling, and multi scale modeling. This course is intended for first year BIOE PhD students only.

BIOE 519 - BIOMATERIALS SYNTHESIS

Short Title: BIOMATERIALS SYNTHESIS

Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Biomaterials covers the design and synthesis of materials which interact with biologic phenomena such as cell-free, microbial, and mammalian systems. Topics covered include: surfaces and surface fractionalization, biomedical implants and them immune response, three dimensional cell culture systems, and regulatory hurdles (e.g., FDA clearance). The class will be rooted in a historical perspective, with a particular emphasis on the latest techniques in synthetic chemistry relating to biomaterials. This course is intended for first year BIOE PhD students only.

BIOE 522 - GENE THERAPY

Short Title: GENE THERAPY

Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CHEM 212 and (BIOS 201 or BIOC 201)
Description: This course will examine the gene therapy field, with topics ranging from gene delivery to vectors to ethics of gene therapy. The design principles for engineering improved gene delivery vectors, both viral and nonviral, will be discussed. The course will culminate in a design project focused on engineering a gene delivery device for a specific therapeutic application. Graduate/Undergraduate Equivalency: BIOE 422. Mutually Exclusive: Credit cannot be earned for BIOE 522 and BIOE 422.

BIOE 523 - BIOENGINEERING SYSTEMS AND CONTROL

Short Title: BIOENG SYSTEMS & CONTROLS

Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to basic principles of control theory and applications of these methods and tools to analyze the dynamics of biological systems with examples from metabolic pathway control, synthetic biology and physiological systems. Cross-list: CHBE 523.

BIOE 524 - EXTRACELLULAR MATRIX

Short Title: EXTRACELLULAR MATRIC

Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will address the biology, organization, mechanics, and turnover of extracellular matrix. There will be an emphasis on cells and cell-matrix interactions, matrix distribution within and design of connective tissues and organs techniques for quantitative analysis of matrix, techniques for measurement and modeling of connective tissue biomechanics, changes with growth and aging and tissue/matrix degradation. Additional projects will be required of graduate level students. Cross-list: BIO 523. Graduate/Undergraduate Equivalency: BIOE 464. Recommended Prerequisite(s): BIOE 372, BIOC/ BIOE 341. Mutually Exclusive: Credit cannot be earned for BIOE 524 and BIOE 464.
Bioengineering (BIOE)

BIOE 525 - NANOBIOTECHNOLOGY AND NANOMEDICINE
Short Title: NANOBIENGA AND NANOMEDICINE
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Covers broad range of topics in nanobiotechnology and nanomedicine, including synthesis characterization and fractionalization of nanomaterials and nanostructures, nanoparticle-based molecular imaging probes, nanocarriers, drug/gene delivery, and nanomachines for gene editing and regulation. Examples will be given to illustrate the applications of nanobiotechnology and nanomedicine.

BIOE 526 - PRECISION GENOME EDITING
Short Title: PRECISION GENOME EDITING
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is a course for graduate students who are interested in learning the emerging field of precision genome editing and its applications in biology and medicine. This is a lecture course consisting of classes that meet weekly for 3 hours; instruction is delivered both in a lecture setting and through projects.

BIOE 527 - MEDICAL TECHNOLOGY DESIGN I
Short Title: MEDICAL TECHNOLOGY DESIGN I
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Students apply principles in engineering, business and medicine to develop new products and services in healthcare. Design projects are team-based, involving clinical immersion to identify needs, concepts generation, prototype creation, and the development of business strategies. This course is limited to MBE-BMI students only. Instructor Permission Required.

BIOE 528 - MEDICAL TECHNOLOGY IMPLEMENTATION I
Short Title: MEDICAL TECH IMPLEMENTATION I
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Students focus on implementing strategies for manufacturing, regulatory, quality, and clinical trials with products that have already been through at least one cycle of design. Students are exposed to multiple projects at various levels of maturity in a team setting. This course is limited to MBE-GMI students only. Instructor Permission Required.

BIOE 529 - MEDICAL TECHNOLOGY DESIGN 2
Short Title: MEDICAL TECHNOLOGY DESIGN 2
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Corequisite: BIOE 629
Description: This is a companion course to BIOE 629 and concurrent enrollment is required. Students will apply the principles learned in BIOE 629 in emerging-market design projects. Design projects are team-based and each student will be involved in multiple projects at different levels of maturity. This course is limited to MBE-GMI students only. Instructor Permission Required.

BIOE 530 - MEDICAL TECHNOLOGY IMPLEMENTATION 2
Short Title: MEDICAL TECH IMPLEMENTATION 2
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Corequisite: BIOE 630
Description: This is the companion course to BIOE 630 and concurrent enrollment is required. Students will apply the principles learned in BIOE 630 in emerging market design projects. Design projects are team-based, and each student will be involved in multiple projects at different levels of maturity. This course is limited to MBE-BMI students only. Instructor Permission Required.

BIOE 534 - INNOVATION LAB FOR MOBILE HEALTH
Short Title: INNOVATION LAB - MOBILE HEALTH
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will be an innovation lab for mobile health products. The students will organize themselves in groups with complementary skills and work on a single project for the whole semester. The aim is to develop a product prototype which can then be demonstrated to both medical practitioners and potential investors. For successful projects with an operational prototype, the next steps could be applying for OWLspark (Rice accelerator program) or crowd sourcing (like Kickstarter) and/or work in Scalable Health Labs over summer. ELEC Juniors can also continue the project outcomes as a starting point for their senior design. Additional course work required beyond the undergraduate course requirements. Cross-list: ELEC 559. Graduate/Undergraduate Equivalency: BIOE 419. Mutually Exclusive: Credit cannot be earned for BIOE 534 and BIOE 419. Repeatable for Credit.
Course URL: www.ece.rice.edu/~ashu/ELEC419.html
BIOE 539 - APPLIED STATISTICS FOR BIOENGINEERING AND BIOTECHNOLOGY
Short Title: APPLIED STAT FOR BIOE BIOTECH
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Course will cover fundamentals of probability and statistics with emphasis on application to biomedical problems and experimental design. Recommended for students pursuing careers in medicine or biotechnology. Graduate/Undergraduate Equivalency: BIOE 439. Recommended Prerequisite(s): BIOE 252 Mutually Exclusive: Credit cannot be earned for BIOE 539 and BIOE 439.

BIOE 543 - DNA BIOTECHNOLOGY, BIOPHYSICS, AND MODELING
Short Title: DNA BIOTECHNOLOGY
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Semester-long course on fundamental properties of DNA, and their role in DNA biotechnology. Students will develop, analyze, and simulate simple biophysical models of DNA reactions, as well as learn and model methods of modern DNA biotechnology. Proficiency with MATLAB required.

BIOE 548 - MACHINE LEARNING AND SIGNAL PROCESSING FOR NEURO ENGINEERING
Short Title: NEURAL SIGNAL PROCESSING
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The activity of a complex network of billions of interconnected neurons underlies our ability to sense, represent and store the details of experienced life, and enables us to interact with our environment and other organisms. Modern neuroscience techniques enable us to access this activity, and thus to begin to understand the processes whereby individual neurons enable complex behaviors. In order to increase this understanding and to design biomedical systems which might therapeutically interact with neural circuits, advanced statistical signal processing and machine learning approaches are required. This class will cover a range of techniques and their application to basic neuroscience and neural interfaces. Topics include latent variable models, point processes, Bayesian inference, dimensionality reduction, dynamical systems, and spectral analysis. Neuroscience applications include modeling neural firing rates, spike sorting, decoding, characterization of neural systems, and field potential analysis. Cross-list: ELEC 548.

BIOE 552 - INTRO COMPUTATIONAL SYSTEMS BIOLOGY: MODELING & DESIGN PRINCIPLES OF BIOCHEM NETWORKS
Short Title: INTRO SYSTEMS BIOLOGY MODELING
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course summarizes techniques for quantitative analysis and simulations of basic circuits in genetic regulation, signal transduction and metabolism. We discuss engineering approaches adapted to computational systems biology and aim to formulate evolutionary design principles explaining organization of networks in terms of their physiological demands. We discuss biochemical simulation methodology and software as well as recent advances in the field. Topics include end-product inhibition in biosynthesis, optimality and robustness of the signaling networks and kinetic proofreading. Same as 490 but with more emphasis on recent advances in the field - paper reading and presentations. Cross-list: SSPB 502. Graduate/Undergraduate Equivalency: BIOE 490. Recommended Prerequisite(s): Basic knowledge of biochemistry, cell biology, linear algebra, and ordinary differential equations is expected. Mutually Exclusive: Credit cannot be earned for BIOE 552 and BIOE 490.

BIOE 553 - SYSTEMS BIOLOGY AND NEUROENGINEERING
Short Title: SYS BIOLOGY & NEUROENGINEERING
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will introduce students to advances in computational biology relevant to neuroengineering, and equip them with a suite of tools emerging from systems biology to student neurological processes. Example class topics include: decoding multineuron activity, models for optogenetic control, and optimization of neuro-generative therapies.

BIOE 554 - COMPUTATIONAL FLUID MECHANICS
Short Title: COMPUTATIONAL FLUID MECHANICS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MECH 371 (may be taken concurrently) or CEVE 363 (may be taken concurrently) or CHBE 401 (may be taken concurrently)
Description: Additional work required. Cross-list: CEVE 554, MECH 554. Graduate/Undergraduate Equivalency: BIOE 454. Mutually Exclusive: Credit cannot be earned for BIOE 554 and BIOE 454.
BIOE 560 - CANCER BIOLOGY
Short Title: CANCER BIOLOGY
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Description: Provides an integrated lecture series summarizing current knowledge in cancer biology and integrating current literature with basic concepts. Topics include: statistics of incidence/survival, types of cancer, pathology, the process of carcinogenesis and sources of carcinogens, genetic and epigenetic mechanisms and consequences, cancer progression, metastasis and current treatment options. Students will learn to use online databases to develop independent strategies for analyzing datasets. There will be several writing assignments and in class oral presentations of research articles. This course requires instructor permission to enroll. Please fill out the special registration form from https://registrar.rice.edu/student/special_registration. All requests will be reviewed and you will be notified of an enrollment decision. Instructor Permission Required. Cross-list: BIOC 580, CHBE 580. Recommended
Course Level: Graduate
Restrictions: Enrollment is limited to Graduate level students.
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Description: This course is part of the NIH Biotechnology Training Program and is limited to program participants. Students will receive exposure and training in cutting edge concepts and technologies. Cross-list: BIOC 578.
Course Level: Graduate
Restrictions: Enrollment is limited to Graduate level students.
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Prerequisite(s): CHBE 310/510 or equivalent is highly recommended.
BIOE 581 - CARDIOVASCULAR AND RESPIRATORY SYSTEM DYNAMICS
Short Title: CARDIO - RESP SYSTEM DYNAMICS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Autonomic nervous system control of the cardiovascular and respiratory systems. Development of models of neuron and cardiac cell activity; models of ventricular and vascular system mechanics; models of pulmonary mechanics and gas transport. Includes a study of instrumentation and techniques used in the cardiac catheterization laboratory. Discussions of different types of ventricular assist devices is also included. The course serves as an introduction to engineering in cardiovascular and respiratory system diagnosis and critical care medicine. Cross-list: ELEC 581. Recommended Prerequisite(s): Knowledge of ordinary differential equations; electricity and magnetism, and solid mechanics form elementary physics; linear control theory and elementary physiology of the cardiovascular and respiratory systems. Repeatable for Credit.

BIOE 582 - PHYSIOLOGICAL CONTROL SYSTEMS
Short Title: PHYSIOLOGICAL CONTROL SYSTEMS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A study of the somatic and autonomic nervous system control of biological systems. Simulation methods, as well as, techniques common to linear and nonlinear control theory are used. Also included is an introduction to sensors and instrumentation techniques. Examples are taken from the cardiovascular, respiratory, and visual systems. Additional coursework required beyond the undergraduate course requirements. Cross-list: ELEC 582. Graduate/Undergraduate Equivalency: BIOE 482. Mutually Exclusive: Credit cannot be earned for BIOE 582 and BIOE 482.

BIOE 583 - COMPUTATIONAL NEUROSCIENCE AND NEURAL ENGINEERING
Short Title: COMP/NEUROSCIENCE/NEURAL ENGNR
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An introduction to the anatomy and physiology of the brain. Includes basic electrophysiology of nerve and muscle. Develops mathematical models of neurons, synaptic transmission and natural neural networks. Leads to a discussion of neuromorphic circuits which can represent neuron and neural network behavior in silicon. Recommendation: Knowledge of electrical circuits, operational amplifier circuits and ordinary differential equations. Involves programming Matlab. Cross-list: ELEC 583, NEUR 583. Graduate/Undergraduate Equivalency: BIOE 481. Recommended Prerequisite(s): Knowledge of basic electrical and operational amplifier circuits; and ordinary differential equations. Mutually Exclusive: Credit cannot be earned for BIOE 583 and BIOE 481.

BIOE 586 - RESPIRATORY SYSTEM MECHANICS
Short Title: RESPIRATORY SYSTEM MECHANICS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Mechanics of ventilation, respiratory muscle mechanics, rib cage mechanics, mechanical coupling between the respiratory muscles and the rib cage, and inferences on mechanics from respiratory muscle anatomy. The class will meet in the Pulmonary Division at Baylor College of Medicine in the Texas Medical Center. Cross-list: MECH 586.

BIOE 587 - OPTICAL IMAGING AND NANOBIPHOTONICS
Short Title: OPTIC IMAGING/NANOBIPHOTONICS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course focuses on diagnostic and therapeutic applications of photonics-based technologies with particular emphasis on nanotechnology enabled optical approaches. This course emphasizes biomedical applications of optics and complements BIOE 484 which introduces fundamental principles of optics to bioengineers.

BIOE 589 - COMPUTATIONAL MOLECULAR BIOENGINEERING/BIOPHYSICS
Short Title: COMP MOLECULAR BIOENG/BIOPHYS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is a course designed for students in computationally-oriented biomedical and bioengineering majors to introduce the principles and methods used for the simulations and modeling of macromolecules of biological interest. Protein conformation and dynamics are emphasized. Empirical energy function and molecular dynamics calculations are described. Specific biological problems are discussed to illustrate the methodology. Classic examples such as the cooperative mechanism of hemoglobin and more frontier topics such as the motional properties of molecular motors and ion channels as well as results derived from the current literature are covered. Cross-list: BIOL 589. Recommended Prerequisite(s): MATH 212, (BIOS 301 or BIOL 301), BIOE 322.
BIOE 591 - FUNDAMENTALS OF MEDICAL IMAGING I
Short Title: FUND MEDICAL IMAGING I
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will introduce basic principles of image acquisition, formation and processing of several medical imaging modalities such as X-Ray, CT, MRI, and US that are used to evaluate the human anatomy. The course also includes visits to a clinical site to gain experience with the various imaging modalities covered in class. Additional coursework required beyond the undergraduate course requirements. Cross-list: ELEC 585. Graduate/Undergraduate Equivalency: BIOE 485. Mutually Exclusive: Credit cannot be earned for BIOE 591 and BIOE 485.

BIOE 592 - SENSORY NEUROENGINEERING
Short Title: SENSORY NEUROENGINEERING
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): BIOE 332 and BIOE 384
Description: This course will explore how bioengineering techniques and principles are applied to understand and model sensory systems, with a focus on the auditory, vestibular, and visual systems. The interaction between the electrical, mechanical and optical aspects of these systems, and ways to modulate these interactions, will be explored. The course will also cover the design of current auditory, visual and somato-sensory neuroprosthetics (i.e. cochlear-implants, retinal implants and brain-machine interfaces), as well as emerging technologies for neural stimulation. Graduate/Undergraduate Equivalency: BIOE 492. Mutually Exclusive: Credit cannot be earned for BIOE 592 and BIOE 492.

BIOE 595 - MODELING TISSUE MECHANICS
Short Title: MODELING TISSUE MECHANICS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Independent study and seminar course which focuses on modeling the mechanical properties of biological tissues. Data from experiments will be used to refine the predictions of nonlinear mathematical computer models. Aimed at juniors, seniors, and graduate students. Laboratory work performed at Baylor College of Medicine, computer work at Rice University. Cross-list: MECH 595.

BIOE 596 - FUNDAMENTALS OF MEDICAL IMAGING II
Short Title: FUND MEDICAL IMAGING II
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course focuses on functional imaging modalities used specifically in nuclear medicine such as Gamma cameras, SPECT, and PET imaging. The course will introduce the basic principles of image acquisition, formation, processing and the clinical applications of these imaging modalities and lays the foundations for understanding the principles of radiotracers kinetic modeling. A trip to a clinical site in also planned to gain experience with nuclear medicine imaging. Additional coursework required beyond the undergraduate course requirements. Cross-list: ELEC 586. Graduate/Undergraduate Equivalency: BIOE 486. Mutually Exclusive: Credit cannot be earned for BIOE 596 and BIOE 486.

BIOE 600 - GRADUATE BIOENGINEERING INDUSTRY INTERNSHIP
Short Title: GRAD BIOE INDUSTRY INTERNSHIP
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3-6
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Students will participate in an industry internship or industry-sponsored project under the direction of Bioengineering faculty. This course may be taken in the summer for six credits or in the fall and spring for three credits each semester. Enrollment is limited to students in the Global Medical Innovation track of the MBE degree. Instructor permission is required. Instructor Permission Required. Repeatable for Credit.

BIOE 610 - METHODS OF MOLECULAR SIMULATION
Short Title: METHODS OF MOLECULAR SIMUL
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CHBE 611 or BIOC 589 or BIOE 589 or BIOS 589 or CHEM 520 or PHYS 526
Description: Modern simulation techniques for classical atomistic systems. Review of statistical mechanical systems. Monte Carlo and molecular dynamics simulation techniques. Extensions of the basic methods to various ensembles. Applications to simulations of large molecules such as proteins. Advanced techniques for simulation of complex systems, including constraint satisfaction, cluster moves, biased sampling, and random energy models. Cross-list: PHYS 610.
BIOE 615 - BIOENGINEERING AND CARDIAC SURGERY  
**Short Title:** BIOENGINEERING/CARDIAC SURGERY  
**Department:** Bioengineering  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course will address biomaterials and medical devices relevant to cardiac and vascular surgery and interventional cardiology in adult and pediatric patients. Mechanical and design considerations, notable successes and failures, and ethical issues will also be discussed, as will differences in cardiac disease and care due to health disparities.

BIOE 620 - TISSUE ENGINEERING  
**Short Title:** TISSUE ENGINEERING  
**Department:** Bioengineering  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Study of cell-cell interactions and the role of the extracellular matrix in the structure and function of normal and pathological tissues. Includes strategies to regenerate metabolic organs and repair structural tissues, as well as cell-based therapies to deliver proteins and other therapeutic drugs, with emphasis on issues related to cell and tissue transplantation such as substrate properties, angiogenesis, growth stimulation, cell differentiation, and immunoprotection. Cross-list: CHBE 620.

BIOE 621 - BIOVENTURES  
**Short Title:** BIOVENTURES  
**Department:** Bioengineering  
**Grade Mode:** Satisfactory/Unsatisfactory  
**Course Type:** Seminar  
**Credit Hours:** 2  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** MGMT 633 or BIOE 633  
**Description:** A hands-on immersion into life science entrepreneurship through practical lessons that are applied to students' group projects throughout the course. This practical course will provide the skills and resources to facilitate scientist-driven entrepreneurship in conceiving new life science ventures and translating research ideas into commercial ventures. This course will be taught in conjunction w/UTMB faculty on the Rice campus (BRC) and will meet from Feb 26 - April 30, 2015. To apply for the course, Rice students should fill out the online application located on the URL site listed above. Instructor Permission Required. Repeatable for Credit.  
**Course URL:** goo.gl/forms/pJ0UMeJItO (http://goo.gl/forms/pJ0UMeJItO)

BIOE 627 - MEDICAL TECHNOLOGY DESIGN SEMINAR 1  
**Short Title:** MED TECH DESIGN SEMINAR 1  
**Department:** Bioengineering  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course will expose students to a variety of career paths in the medical technology industry through guest lectures, case studies, and informational interviews. Instructor Permission Required.

BIOE 628 - MEDICAL TECHNOLOGY DESIGN SEMINAR 2  
**Short Title:** MED TECH DESIGN SEMINAR 2  
**Department:** Bioengineering  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Corequisite:** BIOE 528  
**Description:** Students will learn to address unmet clinical needs thru methodical design. Concept generation principles & proof-of-concept prototyping will be discussed. Screening techniques will be taught that not only weigh technical merit of a concept, but regulatory, reimbursement, IP & business strategies. Students will participate in industry case studies & guest lectures from industry professionals. Instructor Permission Required.

BIOE 631 - BIOMATERIALS APPLICATIONS  
**Short Title:** BIOMATERIALS APPLICATIONS  
**Department:** Bioengineering  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Emphasis will be placed on issues regarding the design, synthesis, evaluation, regulation and clinical translation of biomaterials for specific applications. An overview of significant biomaterials engineering applications will be given, including topics such as ophthalmologic, orthopedic, cardiovascular and drug delivery applications, with attention to specific case studies. Regulatory issues concerning biomaterial will also be addressed. Assignments for this class will include frequent readings of the scientific literature with occasional homework questions, one midterm and cumulative final, a group project, a seminar report and individual presentations. In addition, graduate students in BIOE 631 will have additional exam problems and an additional research paper. Graduate/Undergraduate Equivalency: BIOE 431. Mutually Exclusive: Credit cannot be earned for BIOE 631 and BIOE 431.
BIOE 633 - LIFE SCIENCE ENTREPRENEURSHIP AND THE ROLES OF FOUNDERS AND VENTURE CAPITAL ON HIGH TECH STARTUP
Short Title: LIFE SCIENCE ENTREPRENEURSHIP
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The roles of physicians, scientists, engineers, and MBA’s in biotech, medical device, and other life science companies will be described and characterized. The major trends and innovations driving the creation of new products in large established companies and venture-capital-backed startup companies are discussed. This pragmatic, experienced-based course describes the venture capital process, formation, and capitalization of high-tech companies, sources of technologies, role of tech transfer at universities and medical schools, startup operational issues, role of VCs and board members, execution time frames, liquidity process, IPOs and mergers, and payout prospects for founders and investors. Live, ongoing case studies are presented by guest entrepreneurs. These case studies of ongoing biotech, medical device, and healthcare informatics companies are presented by many notable M.D. and Ph.D. founders and CEOs. Rules of professional and ethical conduct of M.D.s, Ph.D.s, scientific advisory boards, clinical advisory boards, and boards of directors are reviewed. In the final classes, a high-tech, career-planning guide is discussed, plus a special lecture on leadership, intelligence, and entrepreneurship will be presented. Insider secrets and success stories from decades of highly successful VC practice in medical, biotech and infotech companies will be shared. Cross-list: MGMT 633. Repeatable for Credit.

BIOE 643 - CELL MECHANICS, MECHANOTRANSDUCTION AND THE CELL MICROENVIRONMENT
Short Title: MECHANOTRANSDUCTION
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Mechanotransduction is a fundamental process essential for living systems and plays a fundamental role in cell signaling, cancer metastasis and stem cell differentiation. Additionally, fundamental biological processes such as endocytosis cell fusion and cell migration are driven by a coordinated interplay of molecular interactions that drive membrane deformation. This course will survey the current understanding of mechanotransduction and the mechanical properties of cells and their microenvironment, including membrane and cytoskeletal mechanics. Experimental approaches for measuring and manipulating the material properties of cells and their environment, including optical, electrical and magnetic techniques will be covered. A variety of application will be covered, including manipulation in engineering of mechanotransduction pathways to drive cell migration and stem cell differentiation. Instructor Permission Required. Cross-list: BIOL 643, PHYS 643.

BIOE 654 - ADVANCED COMPUTATIONAL MECHANICS
Short Title: ADV COMPUTATIONAL MECHANICS
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): BIOE 554 or CEVE 554 or MECH 554 or BIOE 454 or CEVE 454 or MECH 454

BIOE 680 - NANO-NEUROTECHNOLOGY
Short Title: NANO-NEUROTECHNOLOGY
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will review current nanofabricated technologies for measuring, manipulating, and controlling neural activity. The course will be based on reviewing current academic literature and topics will include nano-electronic, -photonic, -mechanical, and -fluidic neural devices. Cross-list: ELEC 680.

BIOE 682 - SYSTEMS BIOLOGY OF HUMAN DISEASES
Short Title: SYS BIO OF HUMAN DISEASES
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to concepts necessary for application of systems - Biology Approaches to Human Diseases. Topics include transcriptional and metabolic design principles, introduction to various regulatory network motifs in diseases and potential treatments using embryonic stem cells. Analysis of complex diseases using engineering concepts such as optimality, nonequilibrium thermodynamics, multiscale analysis and spatiotemporal transport. Cross-list: CHBE 682.

BIOE 690 - PROFESSIONAL DEVELOPMENT FOR BIOENGINEERS
Short Title: PROF DEVELOPMENT FOR BIOE
Department: Bioengineering
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Professional development topics relevant to academic careers including applying for faculty positions, interviewing, negotiating offers, building a lab, obtaining funding and balancing professional obligations. Designed for graduate students planning academic careers in research-intensive bioengineering departments.
BUSI 220 - LILIE E-TEAMS EXPERIENCE
Description: In this course, students will form teams and collaborate on a project contributed by a startup company. Using design thinking, students will take a human-centered approach towards crafting an innovative solution by developing empathy for the users, articulating the problem, brainstorming possibilities, prototyping for communication, and testing and iterating.

BUSI 221 - NEW ENTERPRISES
Description: In this course, students will learn and experience a process for innovation-based venture development. During the semester, students will form teams and create a plan for a new venture. Mutually Exclusive: Credit cannot be earned for BUSI 221 and BUSI 462.
BUSI 310 - LEADING PEOPLE IN ORGANIZATIONS
Short Title: LEADING IN ORGANIZATIONS
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduces the psychological and sociological processes underlying human behavior in organizational settings (e.g., companies, schools, sports clubs). Topics include motivation, decision making, principles of fairness and justice, cross-cultural differences, working in teams, and tactics of influence. Space is limited. Registration does not guarantee a space in class. The Jones School will conduct a lottery for over-enrolled classes to create the course roster for the semester. The Jones School will communicate the results within a week after the close of the registration period.
Course URL: business.rice.edu/

BUSI 343 - FINANCIAL MANAGEMENT
Short Title: FINANCIAL MANAGEMENT
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (STAT 280 or STAT 305 or STAT 310 or STAT 331 or STAT 339 or ELEC 303 or POLI 395 or PSYC 339 or SOCI 298 or ECON 307 or ECON 382 or ECON 331) and (ECON 100 or ECON 201 or ECON 301)
Description: Introduces the role of marketing in organizations and the principal marketing decisions facing management. Topics include marketing planning and strategy; buyer behavior; development and management of products and services; branding; channels of distribution; sales, advertising and promotional methods; pricing strategy; and the development of integrated marketing strategies and programs.
Course URL: business.rice.edu/

BUSI 390 - STRATEGIC MANAGEMENT
Short Title: STRATEGIC MANAGEMENT
Department: Business
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BUSI 305
Description: Examines the strategic management of businesses in market and non-market environments. Key topics include competitive and industry analysis, strategy formulation and implementation, and strategic planning. Case discussions of real companies are combined with readings. Recommended Prerequisite(s): ECON 100 or 201 or 301. Mutually Exclusive: Credit cannot be earned for BUSI 390 and BUSI 471.
Course URL: business.rice.edu/
BUSI 405 - ISSUES IN FINANCIAL REPORTING I
Short Title: ISSUES IN FINANCIAL REPORTING I
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BUSI 305
Description: Building on subject matter introduced in BUSI 305, this course provides students with a deeper knowledge of generally accepted accounting principles and procedures so that they properly account for and present information in financial statements prepared for external users. The student will acquire an understanding of the accounting issues relating to complex revenue recognition issues, inventory costing, long-lived tangible and intangible assets, and discontinued operations. The student should be able to evaluate alternative accounting methods and choose the methods which will best convey the financial information related to the above areas. The student should be able to demonstrate an understanding of the transaction analysis, recording, classification, summarization, and reporting procedures in the accounting cycle, and an understanding of the information contained in the financial statements. Finally, students should be able to demonstrate written communication skills required of accountants. BUSI 305 Financial Accounting is a prerequisite for this course.

BUSI 430 - MANAGERIAL ACCOUNTING
Short Title: MANAGERIAL ACCOUNTING
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BUSI 305
Description: This course emphasizes the use of accounting information for internal purposes, as opposed to the external reporting focus of financial accounting. The course covers the design of management accounting systems for planning and controlling operations and for motivating personnel. The course integrates accounting with ideas from data analysis, decision analysis, finance, microeconomics, and operations management. Among the topics covered are the use of cost information for short- and long-term decision making, cost-volume-profit analysis, budgetary control, cost allocation, capital budgeting, and performance evaluation. It is suggested that students enrolled in this course have completed BUSI 305 or ECON 201.

BUSI 440 - AUDITING
Short Title: AUDITING
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BUSI 305
Description: The principles and procedures used by public accountants and internal auditors in examining financial statements and supporting data to verify the accuracy and fairness of the information presented. Specific topics covered include: financial statement, regulatory and contract compliance, internal and operational audits, professional standards and ethical conduct; statistical and judgmental sampling; the audit-impact of information technology; audit risk and internal control structure evaluation; application of procedures in transaction cycles; audit reporting; the importance of professional skepticism; role of the PCAOB in setting and enforcing auditing standards for U.S. publicly traded companies, as well as the issue of mandatory audit firm rotation; role of the International Auditing and Assurance Standards Board in setting International Standards of Auditing.

BUSI 460 - FOUNDATIONS OF ENTREPRENEURSHIP: STRATEGY AND FUNDING
Short Title: FOUNDATIONS OF ENT: STRATEGY
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course provides an integrated strategy framework for entrepreneurs. The course is structured to provide a deep understanding of the core strategic challenges facing start-up innovators, and a synthetic framework for choosing and implementing entrepreneurial strategy in dynamic environments. A central theme of the course is that, to achieve competitive advantage, technology entrepreneurs must balance the process of experimentation and learning inherent to entrepreneurship with the selection and implementation of a strategy that establishes competitive advantage. The course identifies the types of choices that entrepreneurs must make to take advantage of a novel opportunity and the logic of particular strategic commitments and positions that allow entrepreneurs to establish competitive advantage. Course is taught either 1st or 2nd Half of Full Term. Repeatable for Credit.
BUSI 461 - FOUNDATIONS OF ENTREPRENEURSHIP II: FINANCING
Short Title: FOUNDATIONS OF ENT II: FINANCING
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The goal of the course is to provide students with a general understanding of the financing options for early stage startups, including angel investment, accelerators, crowdfunding and the venture capital industry. This includes an in-depth overview of the organization, operation and economics of different funding sources; venture capital and angel investment term sheets and deal structures; startup investment methodology – deal sourcing, monitoring and liquidation; the role of VCs as key advisors and board members; and current issues in early stage financing as a result of a changing global and economic environment.

The course combines interactive lectures, speakers and case analyses. The cases and assignments offer an opportunity to integrate and apply the principles taught in the course in a practical way, and draws from a diverse range of industries and settings. Repeatable for Credit.

BUSI 463 - FOUNDATIONS OF ENTREPRENEURSHIP: STRATEGY AND FUNDING
Short Title: ENTREPRENEURSHIP STRATEG & FUND
Department: Business
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course provides an integrated strategy framework for entrepreneurs. The course is structured to provide a deep understanding of the core strategic challenges facing start-up innovators, and a synthetic framework for choosing and implementing entrepreneurial strategy in dynamic environments, as well as a general understanding of the financing options for early stage startups, including angel investment, accelerators, crowdfunding and the venture capital industry. A central theme of the course is that, to achieve competitive advantage, technology entrepreneurs must balance the process of experimentation and learning inherent to entrepreneurship with the selection and implementation of a strategy that establishes competitive advantage. The course identifies the types of choices that entrepreneurs must make to take advantage of a novel opportunity and the logic of particular strategic commitments and positions that allow entrepreneurs to establish competitive advantage. The course includes an in-depth overview of the organization, operation and economics of different funding sources; venture capital and angel investment term sheets and deal structures; startup investment methodology – deal sourcing, monitoring and liquidation; the role of VCs as key advisors and board members; and current issues in early stage financing as a result of a changing global and economic environment. The course combines interactive lectures, speakers and case analyses. The cases and assignments offer an opportunity to integrate and apply the principles taught in the course in a practical way, and draws from a diverse range of industries and settings.

BUSI 464 - SOCIAL ENTREPRENEURSHIP
Short Title: SOCIAL ENTREPRENEURSHIP
Department: Business
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course introduces students to contemporary concepts, debates, and contexts necessary for analyzing and engaging in the sphere of social entrepreneurship. The course has five distinct parts: 1. social entrepreneurship overview; 2. social context and stakeholders; 3. private sector roles and motivations; 4. organizational forms and collaborations; and 5. measurement and impacts (private and public). Students will be exposed to various forms of social entrepreneurship, such as base of the pyramid/microenterprises, private-public partnerships, private-governmental partnerships, voluntary social codes, corporate social responsibility, and ethical consumerism. From this introductory foundation, students will undertake a social entrepreneurship project about a contemporary social problem in Houston: the urban food desert (https://apps.ams.usda.gov/fooddeserts/fooddeserts.aspx). Students will learn a range of research methods (e.g. quantitative data analysis, ethnography, focus groups). With these research tools and building from perspectives offered by earlier by readings, guest speakers, and field visits, students will problematize, propose, develop, and present competing solutions to the social problem during the final course meetings. Cross-list: GLHT 464, SOSC 464.

BUSI 469 - LILIE NEW VENTURE CHALLENGE
Short Title: LILIE NEW VENTURE CHALLENGE
Department: Business
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: In this capstone project-based experiential learning course, students work on their own startup ideas in teams using the frameworks taught in the E&I framework courses (financing and strategy for startups, new enterprises, business modeling for entrepreneurs, human and social context in entrepreneurship). To apply for this course visit http://hpanahi.web.rice.edu/nvc/ Instructor Permission Required.
BUSI 491 - ACCOUNTING THEORY  
**Short Title:** ACCOUNTING THEORY  
**Department:** Business  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** BUSI 405  
**Description:** The aim of this seminar is to impart an understanding of the historical evolution of the literature on financial accounting theory and accounting principles, as well as emerging developments in accounting research. A companion objective is to come to understand the evolving dynamic of the standard-setting process for financial reporting in the United States and at the international level, including consideration of the "political" intrusions into this process. Readings will be drawn from the periodical literature, books and monographs, and reports. A term paper will be required. The prerequisite for undergraduates is BUSI 405, but the course will also be open also to a small number of other students who have taken just BUSI 305. MBA students: Prerequisite is MGMT 601. PhD students: no prerequisites. All students must obtain the prior permission of the instructor. Course may not be taken pass/fail and may not be audited. Enrollment will be limited. Mutually Exclusive: Credit cannot be earned for BUSI 491 and MACC 591/MGMT 591.

BUSI 499 - UNDERGRADUATE BUSINESS INDEPENDENT STUDY  
**Short Title:** UG BUSINESS INDEPENDENT STUDY  
**Department:** Business  
**Grade Mode:** Standard Letter  
**Course Type:** Independent Study  
**Credit Hours:** 1-3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Repeatable for Credit.

BUSI 500 - INDEPENDENT STUDY  
**Short Title:** INDEPENDENT STUDY  
**Department:** Business  
**Grade Mode:** Standard Letter  
**Course Type:** Independent Study  
**Credit Hours:** 1.5-3  
**Restrictions:** Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Repeatable for Credit.

BUSI 501 - DOCTORAL MARKETING RESEARCH SEMINAR  
**Short Title:** DOCTORAL MARK. RES. SEMINAR  
**Department:** Business  
**Grade Mode:** Satisfactory/Unsatisfactory  
**Course Type:** Research  
**Credit Hours:** 3  
**Restrictions:** Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Repeatable for Credit.

BUSI 503 - SEMINAR IN JUDGEMENT AND DECISION MAKING  
**Short Title:** SEM IN JDGMT & DECISION MAKING  
**Department:** Business  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate

BUSI 504 - GAME THEORY  
**Short Title:** GAME THEORY  
**Department:** Business  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Game theory is a discipline that provides a mathematical methodology for modeling and analyzing interactive decisions among multiple agents. Game theory has a wide range of applications in economics, political science, but most importantly (in my opinion) business. The approach of this course will be somewhere between that of a typical economics class (i.e. very mathematical) and that of a typical business seminar (applied and paper based.) Definitions will be stated formally, and arguments will be developed rigorously. At the same time, much of the course will be devoted to using game theory to understand applications in economics and business. Taking these applications as a starting point, we will develop an understanding of what constitutes a good mathematical model for addressing a business question. Repeatable for Credit.

BUSI 505 - SEMINAR IN CONSUMER BEHAVIOR  
**Short Title:** SEMINAR IN CONSUMER BEHAVIOR  
**Department:** Business  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Repeatable for Credit.

BUSI 506 - ADVANCED TOPICS IN MARKETING RESEARCH  
**Short Title:** ADVANCED TOPICS IN MARKT. RES.  
**Department:** Business  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** The purpose of this seminar is to examine recent work in, or relevant to, consumer research. We will select a set of topics to be considered over the semester, often triggered by a new article of particular interest or student interests. For each topic considered, a few articles will be chosen, and we will read and discuss those. Our goals will be to gain exposure to the latest ideas in consumer research and to develop research ideas. In particular, each week we should generate in class the design/idea for at least one new study in the focal topic area. Repeatable for Credit.
BUSI 507 - BAYESIAN APPLICATIONS IN MARKETING LITERATURE
Short Title: BAYESIAN APPS IN MARKETING LIT
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course aims to develop an understanding of Bayesian empirical applications in the Marketing literature. The course starts with a brief theoretical foundation to Bayesian inference and subsequently focuses on empirical applications in the Marketing literature. The aim of this course is not to equip students with the methodological tools of Bayesian inference. It is assumed that students are familiar with these methodologies. Academic papers from the Marketing literature are assigned to the class and discussed in class. Repeatable for Credit.

BUSI 510 - ANALYTICAL MODELS IN MARKETING
Short Title: ANALYTICAL MODELS IN MARKETING
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

BUSI 511 - SELECTED TOPICS IN MARKETING
Short Title: SELECT TOPICS IN MARKETING
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate

BUSI 515 - MICRO FOUNDATIONS OF ORGANIZATION AND MANAGEMENT
Short Title: MICRO FOUNDATIONS - ORG & MGMT
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

BUSI 521 - FINANCIAL ECONOMICS I
Short Title: FINANCIAL ECONOMICS I
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ECON 501 and ECON 502
Description: Introduction at the graduate level to asset pricing and portfolio choice theory. Covers single-period and dynamic models, including pricing by arbitrage, mean-variance analysis, factor models, dynamic programming, recursive utility, and an introduction to continuous-time finance. Cross-list: ECON 505.

BUSI 522 - CORPORATE FINANCE
Short Title: CORPORATE FINANCE
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will prepare students for a career as a scholar in finance. To do so, we will read and discuss key scholarly papers in the field. Our focus will be on classic and recent research papers in the field of corporate finance. The course is structured to introduce students to selected areas of research and research methods, rather than to be encyclopedic in its coverage. Repeatable for Credit.

BUSI 523 - EMPIRICAL METHODS IN FINANCE
Short Title: EMPIRICAL METHODS IN FINANCE
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is intended to get students up to speed with a toolbox and working facility of methods commonly used in empirical finance research. For each method, we will follow a three-step learning process. We first cover the econometrics from a mathematical (but light and intuitive) approach. Then we will observe researchers using the method in the wild. Then you will use it yourself through exercises and problem sets. Repeatable for Credit.
BUSI 524 - FINANCE: SPECIAL TOPICS I
Short Title: FINANCE: SPECIAL TOPICS I
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the PHD-BUSI program.
Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course provides a brief review of the literature on derivative pricing and the term structure of interest rates. If we have time we may also read some papers on the financial crisis. The objective is to prepare students to critically think about the current research in each of these areas and, at the same time, give some basic knowledge about each of these research areas. The course is intended for Ph.D. students. This course is very quantitative and requires basic familiarity with asset pricing theory (BUSI 521). Even though, the course is very quantitative, emphasis is given to intuition instead to mathematical rigor. Repeatable for Credit.

BUSI 525 - FINANCE: SPECIAL TOPICS II
Short Title: FINANCE: SPECIAL TOPICS II
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the PHD-BUSI program.
Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

BUSI 526 - FINANCE: SPECIAL TOPICS III
Short Title: FINANCE: SPECIAL TOPICS III
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the PHD-BUSI program.
Enrollment is limited to Graduate level students.
Course Level: Graduate

BUSI 527 - FINANCE: SPECIAL TOPICS IV
Short Title: FINANCE: SPECIAL TOPICS IV
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the PHD-BUSI program.
Enrollment is limited to Graduate level students.
Course Level: Graduate

BUSI 530 - INTRODUCTION TO ACCOUNTING RESEARCH
Short Title: INTRO TO ACCT. RESEARCH
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the PHD-BUSI program.
Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course offers a thorough and broad-ranging introduction to accounting theory and research. It covers origins and evolution of key relevant accounting institutions, thought, paradigms and methods. Repeatable for Credit.

BUSI 531 - EMPIRICAL METHODS IN ACCOUNTING
Short Title: EMPIRICAL METHODS IN ACCOUNTING
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the PHD-BUSI program.
Enrollment is limited to Graduate level students.
Course Level: Graduate

BUSI 532 - ANALYTICAL RESEARCH IN ACCOUNTING
Short Title: ANALYTICAL RESEARCH IN ACCT
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the PHD-BUSI program.
Enrollment is limited to Graduate level students.
Course Level: Graduate

BUSI 533 - CONTEMPORARY ACCOUNTING: RESEARCH TOPICS
Short Title: CONTEMPORARY ACCT. RES. TOPICS
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the PHD-BUSI program.
Enrollment is limited to Graduate level students.
Course Level: Graduate

BUSI 540 - STRATEGY I
Short Title: STRATEGY I
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the PHD-BUSI program.
Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course provides a Ph.D. level seminar focused on seminal theory and recent theoretical approaches in the strategic management literature. The literature in strategic management attempts to explain the differences in the performance and survival of firms by analyzing the effects of a variety of factors at multiple levels, including countries, industries, organizational networks, firms, teams, and individuals. The intent of this seminar is to provide a foundation for conducting and publishing original research in strategic management. The seminar will cover several topics in the field along with relevant theoretical perspectives developed in economics, finance, organization theory, psychology, and sociology. Over the course of the semester, you will: • Read a large amount of articles published in the leading journals of the field; • Evaluate different theoretical perspectives; • Constructively critique empirical research; • Formulate novel research ideas that advance the field of strategic management; • Professionally present research ideas and respond to comments; and • Develop ideas into a research paper that provides the foundations for a future theoretical paper or empirical study. Repeatable for Credit.
BUSI 541 - STRATEGY II
Short Title: STRATEGY II
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Strategic management research attempts to explain the differences in firm behaviors and outcomes by analyzing the effects of a variety of factors at multiple levels, including countries, industries, firms, teams, and individuals. This seminar is the second part of the strategic management seminar series (The first part is Business 540: Strategic Management Theory). While Business 540 focuses on seminal theory and recent theoretical approaches in the strategic management literature, this seminar focuses on phenomena and research topics in strategy research. It provides an overview of classic and current research topics including innovation and technology strategy, strategic alliances and networks, international strategy, product diversification, corporate governance, executive leadership, strategic decision processes, change and adaptation. Specific topics and phenomena will be examined from both theoretical and empirical perspectives. From the theoretical perspective, we will discuss how the various theories discussed in Business 540 are used to explain these phenomena. From the empirical perspective, we will discuss various research designs and methods used to in research on these topics. Overall, the intent of this seminar is to provide students a foundation for conducting and publishing original research in strategic management. Repeatable for Credit.

BUSI 542 - ORGANIZATIONAL CHANGE
Short Title: ORGANIZATIONAL CHANGE
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

BUSI 543 - EXECUTIVE LEADERSHIP AND CORPORATE GOVERNANCE
Short Title: EXEC LEADERSHIP & CORP GOV
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

BUSI 544 - CONTEMPORARY MANAGEMENT THOUGHT
Short Title: COMTEMPORARY MGMT THOUGH
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate

BUSI 545 - STRATEGY RESEARCH IN CORPORATE DEVELOPMENT
Short Title: STRATEGY RESEARCH IN CORP DEV.
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate

BUSI 546 - EMERGING MARKET STRATEGY
Short Title: EMERGING MARKET STRATEGY
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate

BUSI 547 - INNOVATION AND KNOWLEDGE SPILLOVERS IN EMERGING MARKETS
Short Title: INNOVATION & KNOWLEDGE
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate

BUSI 548 - CORPORATE STRATEGY
Short Title: CORPORATE STRATEGY
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate

BUSI 549 - STRATEGY PRO-SEMINAR
Short Title: STRATEGY PRO-SEMINAR
Department: Business
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will expose you to the research areas of the entire strategy and organizational behavior faculty at the Jones School and possible invited guests. Repeatable for Credit.

BUSI 550 - CORPORATE SOCIAL RESPONSIBILITY
Short Title: CORP SOCIAL RESPONSIBILITY
Department: Business
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate
BUSI 551 - STRATEGY RESEARCH IN CORPORATE DEVELOPMENT: STRATEGIC ALLIANCES AND ACQUISITIONS
Short Title: STRATEGY RESEARCH IN CORP DEV
Department: Business
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate

BUSI 800 - PHD RESEARCH
Short Title: PHD RESEARCH
Department: Business
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-12
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

BUSI 801 - PHD RESEARCH II
Short Title: PHD RESEARCH II
Department: Business
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-12
Restrictions: Enrollment limited to students in the PHD-BUSI program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

Center for Civic Leadership (LEAD)

LEAD 102 - INTRODUCTION TO CIVIC LEADERSHIP
Short Title: INTRO TO CIVIC LEADERSHIP
Department: Center for Civic Leadership
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: LEAD 102 will increase students' understanding of civic leadership in theory and practice. Simulations and case studies will examine how public leaders effect societal change while projects on campus and in the community will provide the opportunity to work in small groups to analyze and address leadership challenges and present findings to stakeholders.
Course URL: ccl.rice.edu

LEAD 150 - LEADERSHIP IN PROFESSIONAL CONTEXT
Short Title: LEADERSHIP IN PROF. CONTEXT
Department: Center for Civic Leadership
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course prepares students for self-selected internships by familiarizing them with essential leadership concepts and keys to success in professional contexts. Approval required by Leadership Rice. Pre-requisite: Leading Edge Workshop. Instructor Permission Required. Repeatable for Credit.
Course URL: leadership.rice.edu

LEAD 238 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Center for Civic Leadership
Grade Mode: Standard Letter
Course Type: Internship/Practicum, Seminar, Lecture
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Topics and credit hours vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.
LEAD 250 - LEADERSHIP AND PROFESSIONAL EXCELLENCE
Short Title: LEADERSHIP AND PROF EXCELLENCE
Department: Center for Civic Leadership
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course develops knowledge and skills to exercise civic leadership in professional settings. Students will strengthen capacities for recognizing how values, skills, and interests relate to the capacity to exercise effective leadership; for establishing meaningful relationships with mentors, co-workers, and cohort peers and for understanding the interconnectedness of civic leadership in professional contexts. Required of and limited to Leadership Rice Mentorship Experience Fellows placed in mandatory associated internship. Instructor Permission Required.
Course URL: leadership.rice.edu

LEAD 301 - HISTORICAL AND INTELLECTUAL FOUNDATIONS OF LEADERSHIP
Short Title: FOUNDATIONS OF LEADERSHIP
Department: Center for Civic Leadership
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The focus of this course is to construct a historically informed philosophy of leadership that encompasses not just what leadership is but why it is valued, when it is legitimate, what its moral purpose is, and how it both shapes and reflects societal norms. Cross-list: HUMA 312.
Course URL: leadership.rice.edu
LEAD 309 - LEADERSHIP: THEORY TO PRACTICE
Short Title: LEADERSHIP: THEORY TO PRACTICE
Department: Center for Civic Leadership
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is designed to help students develop a conceptual, practical, and personal understanding of leadership. By reviewing research and case studies, students will learn leadership skills such as building self-knowledge, dealing with ethical challenges, developing networks, and leading change. Students will also explore their own leadership capabilities and potential.
Course URL: leadership.rice.edu

LEAD 311 - LEADERSHIP AND CREATIVITY
Short Title: LEADERSHIP AND CREATIVITY
Department: Center for Civic Leadership
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Do creative people become leaders? Does the process of leadership require creativity? We will explore these questions by reviewing research and case studies and by engaging in experiential exercises. Students will also learn about the role of leadership in fostering creativity in groups, organizations, and within their own decision making.
Course URL: leadership.rice.edu

LEAD 313 - ENTREPRENEURIAL LEADERSHIP
Short Title: ENTREPRENEURIAL LEADERSHIP
Department: Center for Civic Leadership
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Entrepreneurial Leadership provides students with a survey of leadership issues and practices in an entrepreneurial business and social context, along with an understanding of fundamental business elements of importance to entrepreneurs and social entrepreneurs. Through discussions with established entrepreneurial leaders in the Houston community, ongoing readings, group discussions, and special presentations, students experience the challenging interplay between business demands and effective leadership. Delano Brissett is the Founder and CEO of Wynston, an online career and technical education start-up. He was recently named one of 50 under 40 emerging social entrepreneurs by the Social Enterprise Alliance and American Express.

LEAD 320 - RHETORIC OF LEADERSHIP
Short Title: RHETORIC OF LEADERSHIP
Department: Center for Civic Leadership
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores leadership theories as they relate to persuasive and informative communication strategies deployed by leaders. The class will focus on analyzing speeches, advertisement campaigns, political campaigns, and other leadership-oriented material in order to understand the rhetorical construction of leadership. Cross-list: HUMA 311.

LEAD 321 - LEADERSHIP COMMUNICATION
Short Title: LEADERSHIP COMMUNICATION
Department: Center for Civic Leadership
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Powerful communication skills are essential for effective leadership, and LEAD 321 equips students to articulate ideas with poise, confidence, and clarity. Students develop written, oral, interpersonal, and team skills while developing an understanding of leadership communication in different contexts, including specific fields of study. The Leadership Communication class gives students the opportunity to practice the types of communication that will be required of them in the workplace and that will be crucial for their success.

LEAD 325 - APPLIED LEADERSHIP: POWER; INFLUENCE, AND PERSUASION
Short Title: APPLIED LEADERSHIP
Department: Center for Civic Leadership
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This leadership skills development course focuses on practical applications in negotiations, consulting, and professional communication with the goal of helping students to motivate and collaborate with divergent stakeholders in nonprofit or for profit organizations. Students practice conflict management, change management, and group facilitation. Recommended for Certificate in Civic Leadership.
LEAD 330 - LEADERSHIP IN HIGHER EDUCATION  
Short Title: LEADERSHIP IN HIGHER EDUCATION  
Department: Center for Civic Leadership  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hour: 1  
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Higher education is a challenging environment for leaders - when transformative changes are desired, the process of leadership offers the only possibility for change that is viewed as legitimate. This course uses a case study approach to understand leadership through the lenses of strategic choice, governance, organizational change, culture and values, leader transitions, and the crisis.

LEAD 335 - CRISIS LEADERSHIP  
Short Title: CRISIS LEADERSHIP  
Department: Center for Civic Leadership  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hour: 1  
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: It feels like we live in perpetual whitewater these days. We lurch from crisis to crisis, many of which might have been avoided. This course examines major public crises resulting from low-probability, high-consequence events. The core premise is that effective leadership improves the likelihood of avoiding or mitigating the consequences of crises, and allows us to take advantage of the opportunities that disasters create.

LEAD 340 - PHILANTHROPY IN THEORY AND PRACTICE  
Short Title: PHILANTHROPY T & L  
Department: Center for Civic Leadership  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Study of the history, philosophy, and practice of philanthropy in addressing public need with an introduction to ethics and importance of financial giving and community investment. Students will spend substantial time working with local nonprofits in order to select a recipient for a grant awarded by the class.

LEAD 350 - ADVANCED LEADERSHIP PRACTICUM  
Short Title: ADVANCED LEADERSHIP PRACTICUM  
Department: Center for Civic Leadership  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): LEAD 150  
Description: This course prepares teaching assistants to mentor and coach students enrolled in LEAD 150. TA's will develop a deep understanding of current leadership literature, analyze challenges facing young leaders today, develop ways to apply leadership concepts to build skills, and apply strategies for coaching and mentoring. Approval required by Leadership Rice. Instructor Permission Required.  
Course URL: leadership.rice.edu

LEAD 545 - STRATEGIC THINKING FOR COMPLEX PROBLEM SOLVING  
Short Title: STRATEGIC THINKING  
Department: Center for Civic Leadership  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course shows how to solve complex, ill-defined, non-immediate problems. It explains how to combine innovative and critical thinking to: -1- frame the problem, -2- diagnose the problem, -3- identify potential solutions, and -4- choose a solution and implement it. The approach is based on cases, each student will work on a project of their choosing. The course is equally applicable to academic and non-academic projects (such as consulting) in an industry; as such, it is open to students from all schools and departments. It is a part of a larger professional development initiative at Rice to equip students with skills that employers are specifically asking for. Cross-list: ENGR 545.

Chemical & Biomolecular Eng (CHBE)  

CHBE 100 - INTRODUCTION TO CHEMICAL AND BIOMOLECULAR ENGINEERING  
Short Title: INTRO TO CHEM&BIOMOLECULAR ENG  
Department: Chemical & Biomolecular Engr  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Seminar  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: A series of lectures for freshman that outline how chemical and biomolecular engineers tackle today's major energy, health, environmental and economic challenges by working to provide sustainable and affordable energy, by designing new materials, biological products or medical therapeutics, and by developing production methods that are friendly to our environment.

CHBE 281 - ENGINEERING SUSTAINABLE COMMUNITIES  
Short Title: ENGRG SUSTAINABLE COMMUNITIES  
Department: Chemical & Biomolecular Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group III  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Students will work in teams to develop sustainable solutions for energy or environmental problems affecting our Houston and Rice communities. Emphasis will be placed on the integration of engineering fundamentals with societal issues, environmental and safety considerations, sustainability and professional communications. Prerequisites: Introductory Engineering Courses, or Permission of Instructor. Cross-list: ENST 281.

CHBE 401 - TRANSPORT PHENOMENA I
Short Title: TRANSPORT PHENOMENA I
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (CHBE 305 and MATH 211) and MATH 212 or MATH 222 and (PHYS 101 and PHYS 102) or (PHYS 112 and PHYS 111)
Description: Fundamental principles of energy, mass, and momentum transport applied to the continuum; analysis of macroscopic physical systems based on the continuum equations; applications in chemical engineering practice.

CHBE 402 - TRANSPORT PHENOMENA II
Short Title: TRANSPORT PHENOMENA II
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHBE 401 and CAAM 336 (may be taken concurrently)
Description: Continuation of CHBE 401. Emphasis on energy and mass transport applied to the continuum. CAAM 336 and MATH 381 may be taken concurrently with CHBE 402.

CHBE 403 - DESIGN FUNDAMENTALS
Short Title: DESIGN FUNDAMENTALS
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHBE 390 and CHBE 402 and CHBE 412
Description: Design principles as applied to chemical engineering systems. Engineering economic principles. Costs of equipment, feedstocks, and utilities. Equipment design. Use of modern simulation tools. Graduate/Undergraduate Equivalency: CHBE 503. Mutually Exclusive: Credit cannot be earned for CHBE 403 and CHBE 503.

CHBE 404 - CHEMICAL ENGINEERING DESIGN
Short Title: CHEMICAL ENGINEERING DESIGN
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHBE 403
Description: Strategies for conceptual design of complex chemical engineering systems. Components include sustainability, heat and power integration, Students tackle engineering design projects in small groups.

CHBE 411 - THERMODYNAMICS I
Short Title: THERMODYNAMICS I
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHBE 301 and CHBE 305 and MATH 211 and MATH 212
Description: Development and application of the first and second laws of thermodynamics.

CHBE 412 - THERMODYNAMICS II
Short Title: THERMODYNAMICS II
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHBE 411
Description: Advanced treatment of chemical and phase equilibria in multicomponent systems. Includes a detailed study of nonideal solutions.

CHBE 420 - TRANSPORT PHENOMENA IN BIOENGINEERING
Short Title: TRANSPORT PHENOMENA BIOENG
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 211 and MATH 212 and (BIOE 332 or CHBE 411) and BIOE 391
Description: BIOE 420/CHBE 420 covers transport phenomena as applied to biological systems and biomedical devices. Conservation of momentum and mass equations are first derived and then used to analyze transport of momentum and mass in biology, physiology, and in biomedical devices. This course is designed for senior bioengineering students. Cross-list: BIOE 420.

CHBE 443 - CHEMICAL ENGINEERING LAB II
Short Title: CHEMICAL ENGINEERING LAB II
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 211 and MATH 212 and (BIOE 332 or CHBE 411) and BIOE 391
Description: BIOE 420/CHBE 420 covers transport phenomena as applied to chemical engineering courses including transport phenomena, thermodynamics, and process control professionalism and engineering ethics.
CHBE 450 - PETROLEUM PHASE BEHAVIOR AND FLOW ASSURANCE  
Short Title: PETRO PHASE BEHAV & FLOW ASSUR  
Department: Chemical & Biomolecular Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): CHBE 305 and CHBE 412  
Description: Reviews fundamentals of phase and chemical equilibrium thermodynamics focusing on the application of experimental and advanced modeling techniques to characterize reservoir fluids and predict their phase behavior and thermo-physical properties. Intended for students who wish to develop expertise on PVT modeling and gain understanding of common petroleum flow assurance problems. Graduate/Undergraduate Equivalency: CHBE 550. Mutually Exclusive: Credit cannot be earned for CHBE 450 and CHBE 550.

CHBE 455 - TWO PHASE FLOW/MULTIPHASE FLOW IN PIPES  
Short Title: TWO PHASE FLOW/MULTIPHASE FLOW  
Department: Chemical & Biomolecular Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment limited to students with a class of Senior. Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course addresses the basics concepts, fundamentals, mathematical modeling and practical issues in multiphase fluid flow containing oil, water, gas and suspended solid particles in the oil and gas well columns, offshore and onshore production systems and pipelines. This course will have both an undergraduate and graduate level. Graduate/Undergraduate Equivalency: CHBE 555. Mutually Exclusive: Credit cannot be earned for CHBE 455 and CHBE 555.

CHBE 460 - BIOCHEMICAL ENGINEERING  
Short Title: BIOCHEMICAL ENGINEERING  
Department: Chemical & Biomolecular Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): BIOE 252  
Description: Design, operation, and analysis of processes in the biochemical industries. Topics include enzyme kinetics, cell growth kinetics, energetics, recombinant DNA technology, microbial, tissue and plant cell cultures, bioreactor design and operation, downstream processing. Cross-list: BIOE 460.

CHBE 465 - STATISTICAL PHYSICS WITH APPLICATIONS TO MOLECULAR NANOSCIENCE AND TECHNOLOGY  
Short Title: STAT PHY W/MOL NANO SCI & TECH  
Department: Chemical & Biomolecular Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course explains the foundations of modern statistical physics, including the renormalization group theory, and describes applications to phenomena at the molecular ("nano") scale in various disciplines including chemical engineering, physics, chemistry, electrical engineering, and material science. No knowledge of statistical physics is required, but fundamentals of thermodynamics are useful. Graduate/Undergraduate Equivalency: CHBE 565. Mutually Exclusive: Credit cannot be earned for CHBE 465 and CHBE 565.

CHBE 470 - PROCESS DYNAMICS AND CONTROL  
Short Title: PROCESS DYNAMICS & CONTROL  
Department: Chemical & Biomolecular Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): CHBE 390 and CHBE 402 and CHBE 412  

CHBE 490 - CHEMICAL CAR ENGINEERING AND DESIGN  
Short Title: CHEM CAR ENG AND DESIGN  
Department: Chemical & Biomolecular Engr  
Grade Mode: Standard Letter  
Course Type: Laboratory  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: An engineering design course focused on the design and fabrication of a car powered by a chemical reaction. Repeatable for Credit.

CHBE 495 - SPECIAL TOPICS  
Short Title: SPECIAL TOPICS  
Department: Chemical & Biomolecular Engr  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 1-6  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Discussion of advanced topics of interest. Students will spend time exploring special topics chosen with their advisor, and will participate in weekly discussion groups. The number of credits will vary and are awarded based on total time required to explore the chosen project. Instructor Permission Required. Repeatable for Credit.
CHBE 499 - UNDERGRADUATE RESEARCH
Short Title: UNDERGRADUATE RESEARCH
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent investigation of a specific topic or problem in modern chemical engineering research under the direction of a selected faculty member. Department Permission Required. Repeatable for Credit.

CHBE 501 - FLUID MECHANICS AND TRANSPORT PROCESSES
Short Title: FLUID MECH & TRANSPORT PROCES
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced study in fluid mechanics and transport processes including analytical and numerical approximation methods, boundary layer theory, and potential flow theory.

CHBE 503 - DESIGN FUNDAMENTALS
Short Title: DESIGN FUNDAMENTALS
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Design principles as applied to chemical engineering systems. Engineering economic principles. Costs of equipment, feedstocks, and utilities. Equipment design. Use of modern simulation tools. Graduate level course will include an advanced project as a separate requirement. Department Permission Required. Graduate/Undergraduate Equivalency: CHBE 403. Mutually Exclusive: Credit cannot be earned for CHBE 503 and CHBE 403.

CHBE 523 - BIOENGINEERING SYSTEMS AND CONTROL
Short Title: BIOENG SYSTEMS & CONTROLS
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to basic principles of control theory and applications of these methods and tools to analyze the dynamics of biological systems with examples from metabolic pathway control, synthetic biology and physiological systems. Cross-list: BIOE 523.

CHBE 550 - PETROLEUM PHASE BEHAVIOR AND FLOW ASSURANCE
Short Title: PETRO PHASE BEHAV & FLOW ASSUR
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (CHBE 305 and CHBE 412)
Description: Reviews fundamentals of phase and chemical equilibria thermodynamics focusing on the application of experimental and advanced modeling techniques to characterize reservoir fluids and predict their phase behavior and thermo-physical properties. Intended for students who wish to develop expertise on PVT modeling and gain understanding of common petroleum flow assurance problems. At the graduate level (CHBE 550), a final project will be required. Graduate/Undergraduate Equivalency: CHBE 450. Mutually Exclusive: Credit cannot be earned for CHBE 550 and CHBE 450.

CHBE 555 - TWO PHASE FLOW/MULTIPHASE FLOW IN PIPES
Short Title: TWO PHASE FLOW/MULTIPHASE FLOW IN PIPES
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course addresses the basics concepts, fundamentals, mathematical modeling and practical issues in multiphase fluid flow containing oil, water, gas and suspended solid particles in the oil and gas well columns, offshore and onshore production systems and pipelines. This course will have both an undergraduate and graduate level. Graduate/Undergraduate Equivalency: CHBE 455. Mutually Exclusive: Credit cannot be earned for CHBE 555 and CHBE 455.

CHBE 558 - ADVANCES IN NUCLEASE-MEDIATED GENOME ENGINEERING
Short Title: ADV NUCLEASE-MEDIATED GEN ENG
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course provides a comprehensive understanding of advances in the nuclease-mediated genome engineering field. Past and current stages of genome-editing technologies, the fundamental mechanisms of different classes of genome-editing nucleases, and cutting-edge strategies for engineering novel genome-editing agents and their applications in synthetic biology and therapeutics. Cross-list: BIOC 558.
CHBE 560 - COLLOIDAL AND INTERFACIAL PHENOMENA
Short Title: COLLOIDAL & INTERFACIAL PHENOM
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course will provide knowledge into the fundamentals of colloid interactions (e.g., stabilisation, adsorption, self-assembly) and the techniques currently applied for their assessment. Apart from the theoretical background, the course will also provide applicable knowledge by covering current and emerging applications involving these phenomena. Interfacial tension, wetting and spreading, contact angle hysteresis, interaction between colloid particles, stability of interfaces, flow and transport near interfaces will be covered. NOTE: Offered in alternative year with MSNE 594/CHBE 594. Cross-list: MSNE 560.

CHBE 565 - STATISTICAL PHYSICS WITH APPLICATIONS TO MOLECULAR NANOSCIENCE AND TECHNOLOGY
Short Title: STAT PHY W/MOL NANOSCI & TECH
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course explains the foundations of modern statistical physics, including the renormalization group theory, and describes applications to phenomena at the molecular (“nano”) scale in various disciplines including chemical engineering, physics, chemistry, electrical engineering, and material science. No knowledge of statistical physics is required, but fundamentals of thermodynamics are useful. Graduate/Undergraduate Equivalency: CHBE 465. Mutually Exclusive: Credit cannot be earned for CHBE 565 and CHBE 465.

CHBE 560 - PROTEIN ENGINEERING
Short Title: PROTEIN ENGINEERING
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Manipulation of gene expression in prokaryotic and eukaryotic cells. Rational design and directed solutions for cell and protein engineering. Selection and screening technologies and process optimization. Synthetic Biology: engineering and application of gene circuits. Molecular biotechnology applications: Diagnosis, Therapeutics and Vaccines. Cross-list: BIOE 580, BIOE 580. Recommended Prerequisite(s): CHBE 310/510 or equivalent is highly recommended.

CHBE 560 - COLLOIDAL AND INTERFACIAL PHENOMENA
Short Title: COLLOIDAL & INTERFACIAL PHENOM
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course will provide knowledge into the fundamentals of colloid interactions (e.g., stabilisation, adsorption, self-assembly) and the techniques currently applied for their assessment. Apart from the theoretical background, the course will also provide applicable knowledge by covering current and emerging applications involving these phenomena. Interfacial tension, wetting and spreading, contact angle hysteresis, interaction between colloid particles, stability of interfaces, flow and transport near interfaces will be covered. NOTE: Offered in alternative year with MSNE 594/CHBE 594. Cross-list: MSNE 560.

CHBE 565 - STATISTICAL PHYSICS WITH APPLICATIONS TO MOLECULAR NANOSCIENCE AND TECHNOLOGY
Short Title: STAT PHY W/MOL NANOSCI & TECH
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course explains the foundations of modern statistical physics, including the renormalization group theory, and describes applications to phenomena at the molecular (“nano”) scale in various disciplines including chemical engineering, physics, chemistry, electrical engineering, and material science. No knowledge of statistical physics is required, but fundamentals of thermodynamics are useful. Graduate/Undergraduate Equivalency: CHBE 465. Mutually Exclusive: Credit cannot be earned for CHBE 565 and CHBE 465.

CHBE 560 - COLLOIDAL AND INTERFACIAL PHENOMENA
Short Title: COLLOIDAL & INTERFACIAL PHENOM
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course will provide knowledge into the fundamentals of colloid interactions (e.g., stabilisation, adsorption, self-assembly) and the techniques currently applied for their assessment. Apart from the theoretical background, the course will also provide applicable knowledge by covering current and emerging applications involving these phenomena. Interfacial tension, wetting and spreading, contact angle hysteresis, interaction between colloid particles, stability of interfaces, flow and transport near interfaces will be covered. NOTE: Offered in alternative year with MSNE 594/CHBE 594. Cross-list: MSNE 560.

CHBE 560 - COLLOIDAL AND INTERFACIAL PHENOMENA
Short Title: COLLOIDAL & INTERFACIAL PHENOM
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course will provide knowledge into the fundamentals of colloid interactions (e.g., stabilisation, adsorption, self-assembly) and the techniques currently applied for their assessment. Apart from the theoretical background, the course will also provide applicable knowledge by covering current and emerging applications involving these phenomena. NOTE: Offered in alternative year with MSNE 594/CHBE 594. Cross-list: MSNE 560.

CHBE 560 - COLLOIDAL AND INTERFACIAL PHENOMENA
Short Title: COLLOIDAL & INTERFACIAL PHENOM
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course will provide knowledge into the fundamentals of colloid interactions (e.g., stabilisation, adsorption, self-assembly) and the techniques currently applied for their assessment. Apart from the theoretical background, the course will also provide applicable knowledge by covering current and emerging applications involving these phenomena. Interfacial tension, wetting and spreading, contact angle hysteresis, interaction between colloid particles, stability of interfaces, flow and transport near interfaces will be covered. NOTE: Offered in alternative year with MSNE 594/CHBE 594. Cross-list: MSNE 560.
CHBE 593 - INTRODUCTION TO POLYMER PHYSICS AND ENGINEERING  
Short Title: POLYMER PHYSICS  
Department: Chemical & Biomolecular Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): CHM 211 and CHM 212  
Description: The course focuses on demonstrating how the physical properties of polymers can be understood from simple models. Students will be introduced to the terminology and mathematics involved in the physical understanding of polymer systems. The course is intended for students who would like to gain an understanding of modern approaches to polymer physics. NOTE: Not offered every year. Cross-list: MSNE 593.

CHBE 594 - PROPERTIES OF POLYMERS  
Short Title: PROPERTIES OF POLYMERS  
Department: Chemical & Biomolecular Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): CHEM 211 or CHEM 251 and (MATH 211 or MATH 221)  
Description: The course will introduce basic concepts in polymer science including the synthesis and chemical modification of polymers as well as physical properties of polymers. Topics include approaches to polymer synthesis, processing and characterization of polymer materials, and an introduction to mathematical models applied to describe the structure and dynamics of polymeric materials. NOTE: Offered in alternative year with MSNE 560/CHBE 560. Cross-list: MSNE 594. Repeatable for Credit.

CHBE 600 - MASTER OF CHEMICAL ENGINEERING RESEARCH  
Short Title: MASTER CHEM ENGINEER RESEARCH  
Department: Chemical & Biomolecular Engr  
Grade Mode: Standard Letter  
Course Type: Research  
Credit Hours: 1-12  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Independent investigation of a topic or problem in modern chemical engineering research under the direction of a selected faculty member. Department Permission Required. Repeatable for Credit.

CHBE 602 - PHYSICO-CHEMICAL HYDRODYNAMICS  
Short Title: PHYSICO-CHEMICAL HYDRODYNAMICS  
Department: Chemical & Biomolecular Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Topics in hydrodynamics including areas such as waves on liquid surfaces, convection and diffusion in liquids, motion of drops and bubbles, and electrophoresis.

CHBE 603 - RHEOLOGY  
Short Title: RHEOLOGY  
Department: Chemical & Biomolecular Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  

CHBE 605 - TEACHING ASSISTANT  
Short Title: TEACHING ASSISTANT  
Department: Chemical & Biomolecular Engr  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Internship/Practicum  
Credit Hour: 1  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Registration for this class is required for all graduate students assigned as teaching assistants within the Department of Chemical and Biomolecular Engineering. Repeatable for Credit.

CHBE 606 - DEAN'S TEACHING ASSISTANT  
Short Title: DEAN'S TEACHING ASSISTANT  
Department: Chemical & Biomolecular Engr  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Internship/Practicum  
Credit Hour: 1  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Registration for this class is required for all graduate students assigned as Dean's teaching assistants within the Department of Chemical and Biomolecular Engineering. Repeatable for Credit.

CHBE 609 - RISK ASSESSMENT AND ASSET INTEGRITY IN OIL AND GAS PRODUCTION AND REFINING OPERATIONS I  
Short Title: OIL AND GAS ASSET INTEGRITY I  
Department: Chemical & Biomolecular Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: The course integrates risk assessment and mitigation, asset integrity management, corrosion control and materials selection across the oil and gas value chain, from production to refining and retail. The full course covers 2 semesters. Session "I", to be delivered in the Spring 2017 semester. Session "II" will be delivered in the Fall 2017 semester. Instructor Permission Required. Cross-list: MSNE 609.
CHBE 610 - THERMODYNAMICS AND APPLICATIONS TO HYDROCARBON PRODUCTION AND CHEMICAL ENGINEERING PHENOMENA
Short Title: THERMO APP TO OIL PRODUCTION
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Students will learn how thermodynamics can be used to gain insights into hydrocarbon energy production processes. Classical thermo is covered in bulk phase equilibrium and stability, interfaces, and then liquid films areas. Some statistical thermo and molecular simulations. Effect of nano-size and charge on material properties, nucleation, species distribution, climate change, and shale gas/oil.

CHBE 611 - ADVANCED TOPICS-THERMODYNAMICS
Short Title: ADVANCED TOPICS-THERMODYNAMICS
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An advanced treatment of the thermodynamics of pure and multicomponent systems. Topics range from classical thermodynamics to a discussion of modern developments, and include an introduction to statistical thermodynamics.

CHBE 615 - APPLICATION OF MOLECULAR SIMULATION AND STATISTICAL MECHANICS
Short Title: APPL MOLEC SIMULATN&STAT MECH
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to molecular simulation techniques and applications of statistical mechanics-based theory to engineering problems. Projects involve topics of current research interest. Students are expected to know thermodynamics and to have had some introduction to statistical mechanics.

CHBE 618 - RISK ASSESSMENT AND ASSET INTEGRITY IN OIL AND GAS PRODUCTION AND REFINING OPERATIONS II
Short Title: OIL AND GAS ASSET INTEGRITY II
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course integrates risk assessment and mitigation, asset integrity management, corrosion control and materials selection across the oil and gas value chain, from production to refining and retail. The full course covers 2 semesters. Session "I" to be delivered in the Spring 2017 semester. Session "II" will be delivered in the Fall 2017 semester. Instructor Permission Required. Cross-list: MSNE 618.

CHBE 620 - TISSUE ENGINEERING
Short Title: TISSUE ENGINEERING
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will focus on cell-cell interactions and the role of the extracellular matrix in the structure and function of normal and pathological tissues. Includes strategies to regenerate metabolic organs and repair structural tissues, as well as cell-based therapies to deliver proteins and other therapeutic drugs, with emphasis on issues related to cell and tissue transplantation such as substrate properties, angiogenesis, growth stimulation, cell differentiation, and immunoprotection. Cross-list: BIOE 620.

CHBE 630 - CHEMICAL ENGINEERING OF NANOSTRUCTURED MATERIALS
Short Title: CHEM ENG NANOSTRUCTURE MATRLS
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An overview of materials with structural features on the nanometer scale. Discussion of general concepts of synthesis, characterization and applications. Highlight advances found in recent literature.

CHBE 633 - SPECIAL TOPICS ON THE STATISTICAL FOUNDATIONS OF NON-EQUILIBRIUM MOLECULAR NANOSYSTEMS
Short Title: SPEC TOPICS:STAT FNDT MOL NANO
Department: Chemical & Biomolecular Engr
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Selected topics in the foundations of the statistical physics of soft condensed matter, including colloidal, nanoscale, and macromolecular systems. Foundations of transport phenomena statistical theory; stochastic processes in macromolecular and colloidal systems; course-graining; modeling and simulation of intramolecular forces; stochastic differential equations; simulation techniques. Instructor Permission Required.

CHBE 640 - METABOLIC ENGINEERING
Short Title: METABOLIC ENGINEERING
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
CHBE 655 - THERMODYNAMICS AND APPLICATIONS TO HYDROCARBON PRODUCTION AND CHEMICAL ENGINEERING PHENOMENA
Short Title: THERMODYNAMICS & APPS HC PROD
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: How thermodynamics can be used to gain fundamental insights into many chem-e problems and hydrocarbon energy production processes. Course covers classical thermodynamics in the broad context of bulk phase equilibrium and stability, bulk phase irreversible phenomena, interfacial thermodynamics, and thermodynamics of thin liquid films; some statistical thermodynamics and molecular simulations.

CHBE 661 - GRADUATE SEMINAR
Short Title: GRADUATE SEMINAR
Department: Chemical & Biomolecular Engr
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

CHBE 662 - GRADUATE SEMINAR
Short Title: GRADUATE SEMINAR
Department: Chemical & Biomolecular Engr
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

CHBE 671 - FLOW AND TRANSPORT THROUGH POROUS MEDIA II
Short Title: FLOW&TRANSPORT POROUS MEDIA II
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Calculation of multicomponent-multiphase transport in one to three dimensions using finite difference methods. Includes development of multidimensional models of systems and representation and estimation of geological heterogeneity.

CHBE 677 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Internship/Practicum, Lecture, Laboratory, Seminar
Credit Hours: 1-4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics and credit hours may vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.

CHBE 682 - SYSTEMS BIOLOGY OF HUMAN DISEASES
Short Title: SYS BIO OF HUMAN DISEASES
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to concepts necessary for application of systems - Biology Approaches to Human Diseases. Topics include transcriptional and metabolic design principles, introduction to various regulatory network motifs in diseases and potential treatments using embryonic stem cells. Analysis of complex diseases using engineering concepts such as optimality, nonequilibrium thermodynamics, multiscale analysis and spatiotemporal transport. Cross-list: BIOE 682.

CHBE 692 - APPLIED MATHEMATICS FOR CHEMICAL ENGINEERING
Short Title: APPL MATHEMATICS FOR CHEM ENG
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The class focuses on the numerical analysis of various times integration techniques for ordinary differential equations, as well as spatial and temporal discretization methods for hyperbolic and parabolic partial differential equations that describe processes in engineering and biology. Homework and projects aim at the comparative evaluation of the various schemes discussed in class. Recommended prerequisite(s): Knowledge of a programming language (Fortran preferably) elementary P.D.E.'s, basic concepts of calculus.

CHBE 695 - MCHE INDEPENDENT STUDY
Short Title: MCHE INDEPENDENT STUDY
Department: Chemical & Biomolecular Engr
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Students will do research and/or carry out independent study on a particular problem as agreed by the student and advisor. The number of credit hours granted will be determined in each case based upon work load. Students will be provided an outline (syllabus) of the expectations for hours and product that will be reviewed periodically with the advisor and course instructor. Instructor Permission Required.

CHBE 700 - M.S. RESEARCH AND THESIS
Short Title: M.S. RESEARCH AND THESIS
Department: Chemical & Biomolecular Engr
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.
**CHBE 720 - SPECIAL TOPICS IN CHEMICAL ENGINEERING I**
**Short Title:** SPECIAL TOPICS CHEM ENGRG I
**Department:** Chemical & Biomolecular Engr
**Grade Mode:** Standard Letter
**Course Type:** Seminar
**Credit Hours:** 1-15
**Restrictions:** Enrollment is limited to Graduate level students.
**Course Level:** Graduate
**Description:** A course which covers various special topics in chemical engineering. Offered at irregular intervals on demand. Instructor Permission Required. Repeatable for Credit.

**CHBE 760 - BAYLOR/RICE MD/PHD PROGRAM**
**Short Title:** BAYLOR/RICE MD/PHD PROGRAM
**Department:** Chemical & Biomolecular Engr
**Grade Mode:** Standard Letter
**Course Type:** Internship/Practicum
**Credit Hours:** 1-15
**Restrictions:** Enrollment is limited to Graduate level students.
**Course Level:** Graduate
**Description:** Repeatable for Credit.

**CHBE 800 - GRADUATE RESEARCH**
**Short Title:** GRADUATE RESEARCH
**Department:** Chemical & Biomolecular Engr
**Grade Mode:** Satisfactory/Unsatisfactory
**Course Type:** Research
**Credit Hours:** 1-15
**Restrictions:** Enrollment is limited to Graduate level students.
**Course Level:** Graduate
**Description:** Repeatable for Credit.

**CHBE 801 - SPECIAL TOPICS IN CHEMICAL ENGINEERING II**
**Short Title:** SPECIAL TOPICS CHEM ENGRG II
**Department:** Chemical & Biomolecular Engr
**Grade Mode:** Standard Letter
**Course Type:** Independent Study
**Credit Hour:** 1
**Restrictions:** Enrollment is limited to Graduate level students.
**Course Level:** Graduate
**Description:** Summer internship in an area related to thesis research or professional broadening. Permission of thesis advisor and department chair required. Repeatable for Credit.

**Chemistry (CHEM)**

**CHEM 101 - INTRODUCTION TO SCIENTIFIC RESEARCH**
**Short Title:** INTRO SCIENTIFIC RESEARCH
**Department:** Chemistry
**Grade Mode:** Satisfactory/Unsatisfactory
**Course Type:** Research
**Credit Hours:** 5
**Restrictions:** Graduate level students may not enroll.
**Course Level:** Undergraduate Lower-Level
**Description:** This course is for high school students of the classes 2016 and 2017. As visiting students, the students will conduct scientific research in the laboratories of Rice faculty in the areas of Nanotechnology, Chemistry, Materials, and Engineering. Two applications need to be submitted for enrollment into this course. First, the Research Experience in Chemistry application (see course URL for link to application below) should be emailed, along with all required documents as indicated in the application, to CHEM101@rice.edu. Upon confirmation of acceptance from the Chemistry department, students must then complete the visiting student application process for high school students. Instructions to do this can be found in the Application Checklist at summer.rice.edu. Instructor Permission Required. Repeatable for Credit.

**CHEM 110 - FRESHMAN CHEMISTRY SEMINAR**
**Short Title:** FRESHMAN CHEMISTRY SEMINAR
**Department:** Chemistry
**Grade Mode:** Satisfactory/Unsatisfactory
**Course Type:** Seminar
**Credit Hour:** 1
**Restrictions:** Graduate level students may not enroll.
**Course Level:** Undergraduate Lower-Level
**Description:** This half-semester course introduces freshmen to chemical research at Rice and in Houston. The course is offered both semesters, and although some of the same material is covered in both semesters, the fall course emphasizes material for students interested in the PhD track towards academic and industrial chemistry careers, while the spring semester places greater emphasis on research in the Texas Medical Center (TMC) for students who plan to pursue the health professions. Additional tours and activities TBA. All first-year non-transfer students are eligible to enroll in CHEM 110 regardless of AP credit.

**CHEM 121 - GENERAL CHEMISTRY I**
**Short Title:** GENERAL CHEMISTRY I
**Department:** Chemistry
**Grade Mode:** Standard Letter
**Course Type:** Lecture/Laboratory
**Distribution Group:** Distribution Group III
**Credit Hours:** 3
**Restrictions:** Graduate level students may not enroll.
**Course Level:** Undergraduate Lower-Level
**Description:** Introduction of chemical phenomena emphasizing problems and methods in Chemistry. Either CHEM 121 or CHEM 151 may be taken as a prerequisite for higher study in chemistry, but only one of these may be taken for credit. Students must also register for CHEM 123 General Chemistry Laboratory I. The course and the co-requisite lab are graded jointly.
CHEM 122 - GENERAL CHEMISTRY II
Short Title: GENERAL CHEMISTRY II
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): CHEM 121
Description: A continuation of CHEM 121. Either CHEM 122 or CHEM 152 may be taken as prerequisites for higher study in chemistry, but only one may be taken for credit. Students must also register for CHEM 124 General Chemistry Laboratory II. The course and the co-requisite lab are graded jointly.

CHEM 123 - GENERAL CHEMISTRY LABORATORY I
Short Title: GENERAL CHEMISTRY LAB I
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Laboratory
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Required laboratory component of CHEM 121. Students must also register for CHEM 121. Credit may only be received for either CHEM 123 or CHEM 153 but not both. The course and the co-requisite lab are graded jointly.

CHEM 124 - GENERAL CHEMISTRY LABORATORY II
Short Title: GENERAL CHEMISTRY LAB II
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Laboratory
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): CHEM 123 or CHEM 153
Description: Required laboratory component of CHEM 122. Students must also register for CHEM 122. Credit may not be received for both CHEM 124 and CHEM 154. The course and the co-requisite lab are graded jointly.

CHEM 151 - HONORS CHEMISTRY I
Short Title: HONORS CHEMISTRY I
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Corequisite: CHEM 153
Description: An accelerated introduction to chemical phenomena emphasizing principles and theories in chemistry. Recommended strongly for students who plan to major in chemistry or have a strong high school background. Students with AP credit in Chemistry who intend to pursue advanced study in Chemistry are strongly encouraged to take CHEM 151 and CHEM 152. Students must also register for CHEM 153, which is a laboratory that meets once per week. Either CHEM 121 or CHEM 151 may be taken as a prerequisite for higher study in chemistry, but only one of these may be taken for credit. The course and the co-requisite lab are graded jointly. Recommended prerequisite(s): high school chemistry and physics.

CHEM 152 - HONORS CHEMISTRY II
Short Title: HONORS CHEMISTRY II
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): CHEM 151
Corequisite: CHEM 154
Description: A continuation of CHEM 151. Students with AP credit in Chemistry who intend to pursue advanced study in Chemistry are strongly encouraged to take CHEM 151 and CHEM 152. Students must also register for CHEM 154 which is a laboratory that meets once per week. Either CHEM 122 or CHEM 152 may be taken as a prerequisite for higher study in chemistry, but only one of these may be taken for credit. The course and the co-requisite are graded jointly.

CHEM 153 - HONORS CHEMISTRY LABORATORY I
Short Title: HONORS CHEMISTRY LABORATORY I
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Laboratory
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Corequisite: CHEM 151
Description: Required laboratory component of CHEM 151. Students must also register for CHEM 151. The course and the co-requisite lab are graded jointly.
CHEM 101 or 111 is expected.

Completion of AP Calculus or concurrent enrollment in Math 101 or 111 is expected.

CHEM 176 - THE CHEMISTRY OF ART
Short Title: THE CHEMISTRY OF ART
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Course Level: Undergraduate Lower-Level
Restrictions: Graduate level students may not enroll.
Credit Hours: 3
Prerequisite(s): CHEM 153 or CHEM 123
Corequisite: CHEM 152
Description: Required laboratory component of CHEM 152. Students must also register for CHEM 152. The course and the co-requisite lab are graded jointly.

CHEM 177 - THE CHEMISTRY OF COOKING
Short Title: THE CHEMISTRY OF COOKING
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Course Level: Undergraduate Lower-Level
Restrictions: Graduate level students may not enroll.
Credit Hours: 3
Prerequisite(s): CHEM 122 or CHEM 152
Corequisite: CHEM 213
Description: The chemistry of the materials and methods used to create, conserve and authenticate art objects will be presented. Topics will include sculpture, painting, photography, textiles, jewelry, furniture, etc. Taught in conjunction with the Conservation Department and Staff of the MFAH. Some classes will be held at the MFAH or HMNS.

CHEM 178 - THE CHEMISTRY OF COOKING
Short Title: THE CHEMISTRY OF COOKING
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Course Level: Undergraduate Lower-Level
Restrictions: Graduate level students may not enroll.
Credit Hours: 3
Prerequisite(s): CHEM 122 or CHEM 152
Corequisite: CHEM 213
Description: The chemistry of the materials and methods used to create, conserve and authenticate art objects will be presented. Topics will include sculpture, painting, photography, textiles, jewelry, furniture, etc. Taught in conjunction with the Conservation Department and Staff of the MFAH. Some classes will be held at the MFAH or HMNS.

CHEM 179 - THE CHEMISTRY OF ART
Short Title: THE CHEMISTRY OF ART
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Course Level: Undergraduate Lower-Level
Restrictions: Graduate level students may not enroll.
Credit Hours: 3
Prerequisite(s): CHEM 122 or CHEM 152
Corequisite: CHEM 213
Description: The chemistry of the materials and methods used to create, conserve and authenticate art objects will be presented. Topics will include sculpture, painting, photography, textiles, jewelry, furniture, etc. Taught in conjunction with the Conservation Department and Staff of the MFAH. Some classes will be held at the MFAH or HMNS.

CHEM 201 - ADVANCED TOPICS IN GENERAL CHEMISTRY
Short Title: ADV TOPICS IN GEN CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: CHEM 201 is a one-semester lecture course intended for 1st-year undergraduates who have completed a high school AP Chem course (or equivalent) and wish to reinforce or deepen their understanding of challenging core topics. Focus areas include: quantum descriptions of atoms and molecules, chemical thermodynamics, and reaction kinetics and dynamics. Completion of AP Calculus or concurrent enrollment in Math 101 or 111 is expected.

CHEM 210 - WILD TOPICS IN CHEMISTRY AND NANOTECHNOLOGY
Short Title: WILD TOPICS CHEM AND NANO TECH
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A variety of topics related to chemistry and nanotechnology will be discussed. Some topics are classical while others are current. Topics may include nanocars, molecular electronics, how to form a startup company. Grades will be based upon attendance and quizzes. Crosslist: CEVE 210, MSNE 210. Repeatable for Credit.

CHEM 211 - ORGANIC CHEMISTRY I
Short Title: ORGANIC CHEMISTRY I
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): CHEM 152
Corequisite: CHEM 214
Description: Organic chemistry of aliphatic and aromatic compounds with emphasis on structure, functional groups, bonding, stereochemistry, and reaction mechanisms. CHEM 211 may be taken as a prerequisite for higher study in chemistry. CHEM 211 and CHEM 213 are co-requisites and must be taken together in the same semester.

CHEM 212 - ORGANIC CHEMISTRY II
Short Title: ORGANIC CHEMISTRY II
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): CHEM 211
Corequisite: CHEM 214
Description: Continuation of CHEM 211 with an emphasis on aromatic compounds, reactivity and biologically relevant molecules. Either CHEM 212 or CHEM 320 may be taken as a prerequisite for higher study in chemistry, but only one of these may be taken for credit. CHEM 212 and CHEM 214 are co-requisites and must be taken together in the same semester. Mutually Exclusive: Credit cannot be earned for CHEM 212 and CHEM 320.

CHEM 213 - ORGANIC CHEMISTRY DISCUSSION
Short Title: ORGANIC CHEMISTRY DISCUSSION
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 0
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Corequisite: CHEM 211
Description: CHEM 211 and CHEM 213 are co-requisites and must be taken together in the same semester.
CHEM 214 - ORGANIC CHEM DISCUSSION II  
Short Title: ORGANIC CHEM DISCUSSION II  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 0  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Corequisite: CHEM 212  
Description: CHEM 212 and CHEM 214 are co-requisites and must be taken together in the same semester. Repeatable for Credit.

CHEM 215 - ORGANIC CHEMISTRY LAB  
Short Title: ORGANIC CHEMISTRY LAB  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Laboratory  
Credit Hours: 2  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Prerequisite(s): CHEM 211  
Description: Synthesis, purification, and characterization of organic compounds. Experiments related to topics covered in CHEM 211, 212. Includes identification of unknown organic compounds. One lab per week.

CHEM 217 - ORGANIC LABORATORY FOR CHEMICAL ENGINEERS  
Short Title: ORGANIC LAB CHEM ENGINEERS  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Laboratory  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Prerequisite(s): CHEM 211  
Description: Organic laboratory designed for chemical engineering majors. Emphasis placed on the synthesis and the characterization of organic compounds. This laboratory does not satisfy requirements for science majors or premedical students. CRN 14447: Section 001 will start on Wed, Aug 24th and will meet every other Wednesday for 7 total lab periods. CRN 14448: Section 002 will start on Wed, Aug 31st and will meet every other Wednesday for 7 total lab periods.

CHEM 220 - UNDERGRADUATE CHEMISTRY SEMINAR  
Short Title: UNDERGRADUATE CHEMISTRY SEM  
Department: Chemistry  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Seminar  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: An introduction to modern chemical research through seminars and/or directed reading.

CHEM 311 - PHYSICAL CHEMISTRY I  
Short Title: PHYSICAL CHEMISTRY I  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (CHEM 122 or CHEM 152) and MATH 212  
Description: An introduction to the principles of thermodynamics, statistical thermodynamics, kinetic theory of gases, chemical kinetics and the statistical mechanics.

CHEM 312 - PHYSICAL CHEMISTRY II  
Short Title: PHYSICAL CHEMISTRY II  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (CHEM 122 or CHEM 152) and MATH 212  
Description: An introduction to fundamental principles in quantum chemistry, chemical bonding and molecular spectroscopy.

CHEM 320 - ORGANIC CHEMISTRY II  
Short Title: ORGANIC CHEMISTRY II  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Prerequisite(s): CHEM 211 and (CHEM 232 (may be taken concurrently) or CHEM 365 (may be taken concurrently))  
Description: A continuation of CHEM 211 that is in greater depth than CHEM 212. Primarily for chemistry majors and science or engineering students with a strong interest in chemistry research. Either CHEM 212 or CHEM 320 completes the two-semester organic chemistry sequence and may be taken as a prerequisite for higher study in chemistry, but only one may be taken for credit. The pre-req CHEM 232 or CHEM 365 may be taken concurrently with CHEM 320. For registration instructions and additional course information, please see the course web page in Owlspace. Instructor Permission Required. Mutually Exclusive: Credit cannot be earned for CHEM 320 and CHEM 212.

CHEM 330 - ANALYTICAL CHEMISTRY  
Short Title: ANALYTICAL CHEMISTRY  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): CHEM 211  
Description: A treatment of modern analytical chemistry with an emphasis on instrumentation. Applications of analytical chemistry as applied to areas of medicine, forensics, and material. Taught in the Fall.
CHEM 360 - INORGANIC CHEMISTRY
Short Title: INORGANIC CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Corequisite: CHEM 362
Description: Survey of the periodic table; atomic and molecular structure; bonding in covalent, ionic, and electron deficient systems; thermochemical principles and experimental techniques for analysis, structure determination, and synthesis.

CHEM 362 - INORGANIC CHEMISTRY DISCUSSION
Short Title: INORGANIC CHEMISTRY DISCUSSION
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 0
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Corequisite: CHEM 360
Description: Independent chemical research at Rice or in other Texas Medical Center groups. Students spend at least 3 hours per week in the laboratory for each semester hour of credit, in addition to other requirements. If taken for 3 or more hours, counts toward the CHEM 391 requirement for the BS degree in chemistry. Instructor permission required. Students are expected to complete CHEM 391 before the end of their junior year; permission is not normally granted for students in their final year of undergraduate study. Prior to enrollment, students must secure a position in a laboratory. Application materials found on the department website must be submitted by August 1st for Fall term and December 1st for the Spring term. Instructor Permission Required.

CHEM 365 - ORGANIC CHEMISTRY LAB
Short Title: ORGANIC CHEMISTRY LAB
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 211
Description: Experiments illustrating techniques in synthetic organic chemistry and instrumental methods of analysis. Normally taken in conjunction with CHEM 212 or CHEM 320. NOTE: only one of CHEM 232 and CHEM 365 may be taken for credit.

CHEM 366 - INORGANIC CHEMISTRY LAB
Short Title: INORGANIC CHEMISTRY LAB
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Various porphyrin and metalloporphyrin compounds are synthesized, purified and characterized by modern research techniques such as infrared spectroscopy, mass spectrometry, proton magnetic resonance spectroscopy, and magnetic measurements. Data analysis to determine molecular structure is by student group tutorials. NOTE: only one of CHEM 231 and CHEM 366 may be taken for credit. Mutually Exclusive: Credit cannot be earned for CHEM 366 and CHEM 231.

CHEM 367 - MATERIALS CHEMISTRY LAB
Short Title: MATERIALS CHEMISTRY LAB
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Provides a hands-on experience for undergraduate student interested in the synthesis and structural characterization of nanostructured materials. Synthetic methods will include wet chemistry techniques and lithographic preparation of nanostructures. The course will provide understanding of and exposure to modern analysis and characterization techniques, including spectroscopy, X-ray methods, and microscopy.

CHEM 368 - CHEMICAL MEASUREMENT LAB
Short Title: CHEMICAL MEASUREMENT LAB
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to Experimental Physical Chemistry. NOTE: only one of CHEM 381 and CHEM 368 may be taken for credit. Mutually Exclusive: Credit cannot be earned for CHEM 368 and CHEM 381.

CHEM 369 - ADVANCED INORGANIC SYNTHESIS
Short Title: ADVANCED INORGANIC SYNTHESIS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Advanced techniques in inorganic and organometallic synthesis will be covered including air sensitive manipulations using Schlenk line, vacuum lines and dry box. Graduate students may register with an approved Special Registration form.

CHEM 391 - RESEARCH FOR UNDERGRADUATES
Short Title: RESEARCH FOR UNDERGRADUATES
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-5
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent chemical research at Rice or in other Texas Medical Center groups. Students spend at least 3 hours per week in the laboratory for each semester hour of credit, in addition to other requirements. If taken for 3 or more hours, counts toward the CHEM 391 requirement for the BS degree in chemistry. Instructor permission required. Students are expected to complete CHEM 391 before the end of their junior year; permission is not normally granted for students in their final year of undergraduate study. Prior to enrollment, students must secure a position in a laboratory. Application materials found on the department website must be submitted by August 1st for Fall term and December 1st for the Spring term. Instructor Permission Required.
CHEM 398 - ADVANCED MODULE: DEVELOPMENT OF EXPERIMENTS FOR UNDERGRADUATE CHEMISTRY LABS
Short Title: ADV MOD DEV EXP UG CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An advanced laboratory module open to exceptional majors to develop laboratory experiments under the supervision of a chemistry faculty member. Each student will design an experiment to be included in an undergraduate teaching lab. Required is a written document, which should include an experimental protocol, background information and possible pre- and post-lab questions. Instructor Permission Required.

CHEM 401 - ADVANCED ORGANIC CHEMISTRY
Short Title: ADVANCED ORGANIC CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 212 or CHEM 320
Description: The principles of structure and bonding are used to explain and predict reactivity in organic chemistry. Extensive practice with reaction mechanism and curved-arrow formalism. Topics include conformational analysis, acidity/basicity, functional group preparation, stereoselective synthesis, and organo-element chemistry. Graduate/Undergraduate Equivalency: CHEM 501. Mutually Exclusive: Credit cannot be earned for CHEM 401 and CHEM 501.

CHEM 415 - CHEMICAL KINETICS AND DYNAMICS
Short Title: CHEMICAL KINETICS & DYNAMICS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 212 and (PHYS 102 or PHYS 112) and CHEM 310 or (CHEM 312 and MATH 212)
Description: A survey course of research techniques used in modern inorganic chemistry. Topics covered will include X-ray diffraction, mass spectrometry, magnetism, and various spectroscopies (IR, Raman, UV-Vis, NMR, EPR, XPS, and Mossbauer). Graduate/Undergraduate Equivalency: CHEM 575. Mutually Exclusive: Credit cannot be earned for CHEM 475 and CHEM 575.

CHEM 420 - CLASSICAL AND STATISTICAL THERMODYNAMICS
Short Title: CLASSICAL & STAT THERMODYNAMIC
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 212 and (PHYS 102 or PHYS 112) and CHEM 310 or (CHEM 311 and CHEM 312)
Description: An advanced laboratory module open to exceptional majors to develop laboratory experiments under the supervision of a chemistry faculty member. Each student will design an experiment to be included in an undergraduate teaching lab. Required is a written document, which should include an experimental protocol, background information and possible pre- and post-lab questions. Instructor Permission Required.

CHEM 425 - ORGANIC GEOCHEMISTRY
Short Title: ORGANIC GEOCHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course covers the organic geochemistry of the natural environment. Topics include: production, transport, decomposition, and storage of organic matter in the marine and terrestrial environments, use of isotopes to track biogeochemical processes, and natural and perturbed carbon cycle issues, including past and recent climate shifts. Cross-list: ENST 425, ESCI 425.

CHEM 430 - QUANTUM CHEMISTRY
Short Title: QUANTUM CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (CHEM 310 or CHEM 312) and MATH 212 and (PHYS 102 or PHYS 112)
Description: The purpose of this course is to provide the student with a working knowledge of the basic concepts and mathematical formalism of quantum mechanics. Topics include the mathematics of quantum mechanics, one-dimensional problems, central field problems, the harmonic oscillator, angular momentum, perturbation theory, spin, and introduction to methods of modern electronic structure theory, with applications in atomic and molecular structures, spectroscopy, and chemical bonding. Graduate/Undergraduate Equivalency: CHEM 530. Mutually Exclusive: Credit cannot be earned for CHEM 430 and CHEM 530.

CHEM 475 - PHYSICAL METHODS IN INORGANIC CHEMISTRY
Short Title: PHYS METH INORGANIC CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 360
Description: A survey course of research techniques used in modern inorganic chemistry. Topics covered will include X-ray diffraction, mass spectrometry, magnetism, and various spectroscopies (IR, Raman, UV-Vis, NMR, EPR, XPS, and Mossbauer). Graduate/Undergraduate Equivalency: CHEM 575. Mutually Exclusive: Credit cannot be earned for CHEM 475 and CHEM 575.
CHEM 491 - RESEARCH FOR UNDERGRADUATES
Short Title: RESEARCH FOR UNDERGRADUATES
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-5
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 391
Description: Independent chemical research at Rice or in other Teams Medical Center groups. Ordinarily taken by students who have taken CHEM 391. Students spend at least 3 hours per week in the laboratory for each semester hour of credit, in addition to other requirements. Instructor permission required. Prior to enrollment, students must secure a position in a laboratory. Application materials, found on the department website, must be submitted by August 1st for Fall term, December 1st for Spring term, or April 1st for Summer term. Instructor Permission Required. Repeatable for Credit.

CHEM 492 - UNDERGRADUATE HONORS RESEARCH
Short Title: UNDERGRADUATES HONORS RESEARCH
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 5
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 391
Description: The 1st half of the Honors Research Program. CHEM 492 and CHEM 493 function as a pair and must be taken in the same academic year. Registration for CHEM 492 requires a commitment to register for CHEM 493. Requirements include at least 15 hours of laboratory research per week and written and/or oral progress reports. The sequence will culminate in the completion of a thesis (research report) in the spring term. Instructor permission required; for approved students only. Applications must be submitted to the course instructor February 1 - August 1. Students are encouraged to apply early. Students who complete the Chemistry Honors Research Program are given primary consideration for “Distinction in Research and Creative Work,” a university award for select undergraduates, chosen by the department and granted at commencement, which appears on the transcript and diploma. Ordinarily offered Fall term. Instructor Permission Required.

CHEM 493 - UNDERGRADUATE HONORS RESEARCH
Short Title: UNDERGRADUATES HONORS RESEARCH
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 5
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 492
Description: The 2nd half of the Honors Research Program. CHEM 492 and CHEM 493 function as a pair and must be taken in the same academic year. Requirements include at least 15 hours or laboratory research per week and a thesis (research report). Students who complete the Chemistry Honors Research Program are given primary consideration for “Distinction in Research and Creative Work,” a university award for select undergraduates, chosen by the department and granted at commencement, which appears on the transcript and diploma. Ordinarily offered in Spring. Instructor Permission Required.

CHEM 495 - TRANSITION METAL CHEMISTRY
Short Title: TRANSITION METAL CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 211 and CHEM 360
Description: Structure, bonding and reactivity of coordination and organometallic compounds; ligand field theory; electronic spectroscopy; magnetism; reaction mechanisms; catalysis. Graduate/Undergraduate Equivalency: CHEM 595. Mutually Exclusive: Credit cannot be earned for CHEM 495 and CHEM 595.

CHEM 501 - ADVANCED ORGANIC CHEMISTRY
Short Title: ADVANCED ORGANIC CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students. 
Course Level: Graduate
Description: The principles of structure and bonding are used to explain and predict reactivity in organic chemistry. Extensive practice with reaction mechanism and curved-arrow formalism. Topics include conformational analysis, acidity/basicity, functional group preparation, stereoselective synthesis, and organo-element chemistry. Graduate/Undergraduate Equivalency: CHEM 401. Mutually Exclusive: Credit cannot be earned for CHEM 501 and CHEM 401.

CHEM 511 - SPECTRAL METHODS IN ORGANIC CHEMISTRY
Short Title: SPECTRAL METHODS ORGANIC CHEM
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CHEM 212 or CHEM 320
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. Elucidation of organic structures by physical techniques. Interpretation of infrared, ultraviolet, nuclear magnetic resonance, and mass spectral.

CHEM 515 - CHEMICAL KINETICS AND DYNAMICS
Short Title: CHEMICAL KINETICS & DYNAMICS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Description and analysis of the rates of unimolecular, bimolecular, and composite chemical reactions in gas and solution phases. Both macroscopic kinetics and microscopic reaction dynamics are covered. Graduate/Undergraduate Equivalency: CHEM 415. Mutually Exclusive: Credit cannot be earned for CHEM 515 and CHEM 415.
CHEM 520 - CLASSICAL AND STATISTICAL THERMODYNAMICS  
Short Title: CLASSICAL & STAT THERMODYNAMIC  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): CHEM 310 or (CHEM 311 or CHEM 312) and MATH 212 and (PHYS 102 or PHYS 112)  
Description: A review of the principles of classical thermodynamics and an introduction to the theories and methods of statistical thermodynamics with applications to problems in chemistry. Graduate/Undergraduate Equivalency: CHEM 420. Mutually Exclusive: Credit cannot be earned for CHEM 520 and CHEM 420.

CHEM 523 - ADVANCED ANALYSIS METHODS FOR MOLECULAR DYNAMICS FROM STATISTICAL MECHANICS TO MACHINE LEARNING  
Short Title: MOLECULAR DYNAMICS METHODS  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. Modern methods to extract physical and chemical information from molecular dynamics simulation will be presented, including the determination of reaction coordinates, free energies calculations, and estimation of experimentally measurable observables. The theoretical background and different applications will be discussed. The students will apply the methods on practical examples.

CHEM 525 - FUNDAMENTAL PHOTOLUMINESCENCE SPECTROSCOPY  
Short Title: FUND PHOTOLUM SPECT  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. A hands-on approach to the methods of computational quantum chemistry and their application.

CHEM 527 - QUANTUM CHEMISTRY  
Short Title: QUANTUM CHEMISTRY  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: The purpose of this course is to provide the student with a working knowledge of the basic concepts and mathematical formalism of quantum mechanics. Topics include the mathematics of quantum mechanics, one-dimensional problems, central field problems, the harmonic oscillator, angular momentum, perturbation theory, spin, and introduction to methods of modern electronic structure theory, with applications in atomic and molecular structures, spectroscopy, and chemical bonding. Graduate/Undergraduate Equivalency: CHEM 430. Mutually Exclusive: Credit cannot be earned for CHEM 530 and CHEM 430.

CHEM 533 - NANOSCIENCE AND NANOTECHNOLOGY I  
Short Title: NANOSCIENCE & NANOTECHNOLOGY  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. An introduction to the basic principles of nanoscience and nanotechnology. Size dependent physical properties of nanoscopic solids will be described using solid state physics and molecular orbital theory as a foundation. Wet chemical techniques that produce nanoscale materials (e.g. carbon nanotubes, semiconductor and metallic nanocrystals, dendrimers...) will be introduced in the second half of the semester. Expected to be taught Spring 2019. Cross-list: CEVE 533, MSNE 534.
and synthesis of nanostructured materials.

organization, crystallization and applications of the above for the design

recognition, protein folding and structure, nucleic acid structure, polymer
chemistry, and engineering. Topics will include self-assembly, molecular

examination of noncovalent interactions and their impact in biology,

modify and use them to our advantage in what areas were not formerly
envisioned. Undergraduates may register for the course by filling out a
special registration form. These forms can be brought to DBH 243 for
processing.

special registration form. These forms can be brought to DBH 243 for

CHEM 557 - NANOCARBONS
Short Title: NANOCARBONS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. This course will survey the chemistry, physics, and selected applications of carbon nanostructures. Fullerenes, carbon nanotubes, and graphene will be the main focus. Students are expected to have a solid background in physical chemistry. Undergraduate students may register for this course by Special Registration form.

CHEM 558 - NANOCRYSTALS
Short Title: NANOCRYSTALS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will provide a detailed investigation into the chemical and physical principles of inorganic nanocrystals. Topics will include nucleation and growth, crystal faceting, surface ligand chemistry, size-dependent properties and scaling relationships, interparticle forces, and nanoparticle self-assembly. Proficiency in physical chemistry and inorganic materials is strongly encouraged.

CHEM 559 - SPECTROSCOPY AT THE SINGLE MOLECULE/PARTICLE LIMIT
Short Title: SPEC SINGLE MOLECULE/PARTICLE LIMIT
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CHEM 310 or (CHEM 311 and CHEM 312)
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. This course will cover principles of electronic spectroscopy of molecules and nanoparticles with emphasis on single molecule/particle spectroscopy methods and analysis techniques.

CHEM 570 - NANOTECHNOLOGY FOR TEACHERS, TEACHING CHEMICAL CONCEPTS VIA INQUIRY I
Short Title: TEACHING CHEMICAL CONCEPTS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Using the Concept Development Approach, this course will teach teachers how to engage students in inquiry science and provide teachers with in depth conceptual knowledge about chemical fundamentals. The course will include hands-on activities and discussions about chemical concepts that include atomic molecular theory, atomic structure, quantum energy levels, thermodynamics, equilibrium, and bonding. Nanotechnology research with environmental applications will be highlighted throughout the course. Instructor Permission Required.

CHEM 571 - TEACHING CHEMICAL CONCEPTS VIA INQUIRY II, NANOTECHNOLOGY FOR TEACHERS
Short Title: CHEMICAL CONCEPTS - INQUIRY II
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Using the Concept Development Approach, this course will teach teachers how to engage students in inquiry science and provide teachers with in depth conceptual knowledge about chemical fundamentals. The course will include hands-on activities and discussions about chemical concepts that include gas laws, kinetic molecular theory, acid base equilibrium, and phase equilibrium. Nanotechnology research with biological applications will be highlighted throughout the course. Instructor Permission Required. Recommended Prerequisite(s): CHEM 570.

CHEM 575 - PHYSICAL METHODS IN INORGANIC CHEMISTRY
Short Title: PHYS METH INORGANIC CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A survey course of research techniques used in modern inorganic chemistry. Topics covered will include X-ray diffraction, matrix isolation, mass spectrometry, magnetism, electrochemistry, and various spectroscopies (IR, Raman, UV-Vis, NMR, EPR, XPS, EXAFS, and Mossbauer). Graduate/Undergraduate Equivalency: CHEM 475. Mutually Exclusive: Credit cannot be earned for CHEM 575 and CHEM 475.
CHEM 580 - MICROSCOPY METHODS IN MATERIALS SCIENCE
Short Title: MICROSCOPY METHODS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers theory and applications of electron microscopy techniques with an emphasis on transmission and scanning transmission electron microscopy (TEM, STEM). Topics include modern instrumentation and hardware, electron diffraction, imaging modes, tomography, and spectroscopy (energy dispersive x-ray spectroscopy (EDS), electron-energy loss spectroscopy (EELS), cathodoluminescence (CL)). Previous experience with electron microscopes recommended. Can be taken alone or concurrently with lab course MSNE 582. Instructor Permission Required. Cross-list: MSNE 580.

CHEM 582 - ELECTRON MICROSCOPY CENTER LAB
Short Title: ELECTRON MICROSCOPY CENTER LAB
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Corequisite: CHEM 580
Description: Hands-on laboratory using the instruments in the electron microscopy center. The students will gain the knowledge necessary to operate the instruments and analyze data independently. Must be taken concurrently with CHEM 580. Instructor Permission Required. Cross-list: MSNE 582.

CHEM 586 - CHEMICAL TOOLS FOR BIOLOGY
Short Title: CHEMICAL TOOLS FOR BIOLOGY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. Selected topics in modern chemical biology. The development and application of chemical methods to probe, perturb, and understand biological systems. Topics include protein and DNA chemistry, classical and quantum phase transitions in condensed matter will be presented. The energy landscape theory of the dynamics of glasses and protein folding will also be covered. Expected to be taught Fall 2018. Mutually Exclusive: Credit cannot be earned for CHEM 580 and CHEM 450.

CHEM 595 - TRANSITION METAL CHEMISTRY
Short Title: TRANSITION METAL CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Structure, bonding and reactivity of coordination and organometallic compounds; ligand field theory; electronic spectroscopy; magnetism; reaction mechanisms; catalysis. Graduate/Undergraduate Equivalency: CHEM 495. Mutually Exclusive: Credit cannot be earned for CHEM 595 and CHEM 495. Repeatable for Credit.

CHEM 600 - GRADUATE SEMINAR
Short Title: GRADUATE SEMINAR
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Section 1: PHYSICAL CHEMISTRY-NANO Section 2: ORGANIC AND BIOLOGICAL CHEMISTRY Section 3: NANO CHEMISTRY Section 4: CARBON NANO CHEMISTRY. This seminar series is open to all chemistry graduate students or graduate students whose home department is chemistry. Students from other departments may audit the course with instructor permission. Repeatable for Credit.

CHEM 650 - CHEMICAL PHYSICS OF CONDENSED AND BIOLOGICAL MATTER
Short Title: CHEM PHYS CONDENSED&BIO MATTER
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The principles underlying the structure and dynamics of condensed phase and biological matter. Both experimental phenomenology and theoretical approaches will be used. Starting with a review of intermolecular forces, the course will describe the structure and thermodynamics of clusters, crystalline solids, metals, liquids, glasses and biomolecules. A unified picture of reactions and classical and quantum phase transitions in condensed matter will be presented. The energy landscape theory of the dynamics of glasses and protein folding will also be covered. Expected to be taught Fall 2018. Mutually Exclusive: Credit cannot be earned for CHEM 650 and CHEM 450.

CHEM 656 - CLASSICS IN TOTAL SYNTHESIS
Short Title: CLASSICS IN SYNTHESIS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (CHEM 211 and CHEM 212 and CHEM 401 and CHEM 442)
Description: Selected total synthesis will be discussed. Special emphasis will be placed on retro-synthetic analysis, synthetic strategies and technologies, asymetric synthesis and catalysis.

CHEM 700 - TEACHING PRACTICUM
Short Title: TEACHING PRACTICUM
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Open to graduate students in chemistry and only in exceptional circumstances to undergraduates. Repeatable for Credit.

CHIN 141 - FIRST YEAR CHINESE I
Short Title: FIRST YEAR CHINESE I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): CHIN 141
Description: Development of interactional competence in Chinese (sociolinguistic and sociocultural knowledge) to communicate and interact with speakers of Chinese. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. No prior knowledge of this language is necessary. Recommended Prerequisite(s): Placement Test. Mutually Exclusive: Credit cannot be earned for CHIN 141 and CHIN 101/CHIN 222.

CHIN 142 - FIRST YEAR CHINESE II
Short Title: FIRST YEAR CHINESE II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): CHIN 141
Description: Continuation of CHIN 141, for students whose home language is not Chinese. Development of interactional competence in Chinese, (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Chinese. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition.

CHIN 211 - ACCELERATED ELEMENTARY CHINESE I
Short Title: ACCEL ELEMENTARY CHINESE I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): CHIN 211
Description: Increasing attention paid to more formal narrative texts. Writing focused on personal needs, with some attention to social correspondence. Students will be familiar with approximately 500 characters at the end of the course, and able to perform communicative tasks appropriate to this range of characters. Mutually Exclusive: Credit cannot be earned for CHIN 222 and CHIN 101/CHIN 141.

CHIN 222 - AP/OTH CREDIT IN CHINESE LANGUAGE
Short Title: AP/OTH CREDIT CHINESE LANGUAGE
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Transfer
Credit Hours: 3
Course Level: Undergraduate Lower-Level
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation. Mutually Exclusive: Credit cannot be earned for CHIN 222 and CHIN 101/CHIN 141.

CHIN 263 - SECOND YEAR CHINESE I
Short Title: SECOND YEAR CHINESE I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): CHIN 211
Description: Continuation of CHIN 142, for students whose home language is not Chinese. Development of interactional competence in Chinese, (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Chinese. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for CHIN 263 and CHIN 201.

Course URL: clicchinese.blogs.rice.edu
CHIN 264 - SECOND YEAR CHINESE II
Short Title: SECOND YEAR CHINESE II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): CHIN 263
Description: Continuation of CHIN 263, for students whose native language is not Chinese. Development of interactional competence in Chinese (sociolinguistic and sociocultural knowledge) to communicate and interact with speakers of Chinese. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for CHIN 264 and CHIN 202.

Course URL: clicchinese.blogs.rice.edu

CHIN 301 - THIRD YEAR CHINESE I
Short Title: THIRD YEAR CHINESE I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHIN 264
Description: Continuation of CHIN 264, for students whose home language is not Chinese. Emphasis on developing reading and writing ability as more authentic materials and socio-cultural topics are introduced. Upon completion students are expected to be able to write approximately 650 characters and be able to perform communicative tasks appropriate to this range of tasks.

Course URL: clicchinese.blogs.rice.edu

CHIN 302 - THIRD YEAR CHINESE II
Short Title: THIRD YEAR CHINESE II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHIN 301
Description: Continuation of CHIN 301, for students whose home language is not Chinese. Emphasis on developing reading and writing ability as more authentic materials and socio-cultural topics are introduced. Upon completion, students expected to be able to write approximately 800 characters and perform communicative tasks appropriate to this range of characters.

Course URL: clicchinese.blogs.rice.edu

CHIN 301 - ACCELERATED INTERMEDIATE CHINESE I
Short Title: ACCEL INTERMEDIATE CHINESE I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHIN 212
Description: Emphasis on reading narrative texts, and understanding authentic oral texts. Writing assignments stress skills necessary for basic personal needs and tasks necessary for writing social correspondence. At the completion of 311, students will be able to write approximately 800 Chinese characters, and be able to perform communicative tasks appropriate to this range of characters.

CHIN 312 - ACCELERATED INTERMEDIATE CHINESE II
Short Title: ACCEL INTERMEDIATE CHINESE II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHIN 311
Description: Continuation of CHIN 311. More emphasis on reading narratives, comprehending authentic oral texts, and speaking in more formal contexts. Writing assignments stress skills necessary for expressing arguments on socio-cultural topics. At the completion of CHIN 312, students will be able to write approximately 1000 Chinese characters. Repeatable for Credit.

CHIN 319 - SPECIAL TOPICS: ADVANCED CHINESE I
Short Title: SPECIAL TOPICS: ADV CHINESE I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHIN 301 or CHIN 311
Description: This course helps students develop an advanced level of proficiency in Chinese through the analysis and use of the target language in the context of specific topics of interest that will vary.

CHIN 320 - SPECIAL TOPICS: ADVANCED CHINESE II
Short Title: SPECIAL TOPICS: ADV CHINESE II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHIN 319
Description: This is a continuation of CHIN 319. This course helps students develop an advanced level of proficiency in Chinese through the analysis and use of the target language in the context of specific topics of interest that will vary.
CHIN 330 - INTRODUCTION TO TRADITIONAL CHINESE POETRY
Short Title: INTRO TO TRAD CHINESE POETRY
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course seeks to decode enchanting features of traditional Chinese poetry by examining the transformation of poetic genres, the interaction between poetic creation and political, social, and cultural changes, and the close association of poetry with art. Thus, this course also serves to understand Chinese culture and history through poetic perspectives. All readings are in English translation. Cross-list: ASIA 330, MDEM 370.

CHIN 332 - CHINESE LITERATURE AND ITS MOVIE ADAPTATIONS
Short Title: FILM & CHINESE LITERATURE
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Exploration of modern Chinese literature through the visual imagery of Chinese films to show how and why different time periods and different media affect the theme of a story. One third covers movie adaptations of classical Chinese literature. Films subtitled in English, shown outside of class. All readings in English translation. Cross-list: ASIA 332.

CHIN 334 - TRADITIONAL CHINESE TALES AND SHORT STORIES
Short Title: TRADITIONAL CHINESE TALES
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Learning Chinese literature and culture through reading vernacular stories, fantastic tales, biographies, and philosophical parables. Discussion topics: literature and Confucianism, Taoism and Buddhism; literature and history; self and other; fantastic world and reality; women as domestic aliens and aliens portrayed as women, etc. Readings are in English translation. Cross-list: ASIA 334.

CHIN 335 - INTRODUCTION TO CLASSICAL CHINESE NOVELS
Short Title: CLASSICAL CHINESE NOVELS
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examination of the basic characteristics of classical Chinese novels, primarily through six important works from the 16th to 18th centuries: Water Margin, Monkey, Golden Lotus, Scholars, Romance of the Three Kingdoms, and Dream of the Red Chamber. Cross-list: ASIA 335, MDEM 375.

CHIN 399 - CHINESE TEACHING PRACTICUM
Short Title: CHINESE TEACHING PRACTICUM
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course gives students with advanced proficiency in Chinese the opportunity to acquire teaching experience in tutorial format. For each credit hour registered, the student must tutor for two hours. Regular meetings with supervising faculty members. Must be familiar with the Pinyin system. Instructor Permission Required. Repeatable for Credit.

CHIN 401 - FOURTH YEAR CHINESE I
Short Title: FOURTH YEAR CHINESE I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHIN 302
Description: Continuation of CHIN 301, emphasis on developing oral fluency at the discourse level and cultivating advanced writing skills. Students will read and discuss a variety of social, political, and economic issues. Upon completion, students are expected to be able to write approx. 1000 characters.

CHIN 402 - FOURTH YEAR CHINESE II
Short Title: FOURTH YEAR CHINESE II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHIN 401
Description: Continuation of CHIN 401, emphasis on strengthening speaking and writing skills at the advance level with more authentic readings selected from newspapers, literary works, and academic texts. Upon completion, students are expected to be able to write approx. 1200 characters.

CHIN 422 - THE ORIGINAL BEAUTY OF CHINESE LITERATURE
Short Title: ORIGINAL BEAUTY OF CHINESE LIT
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The course will expose students to the best literary works created in the Chinese tradition, both classical and modern, and give them a general introduction to different genres, including poetry, fiction, drama, and philosophical essays. It will improve their language proficiency through reading original texts of Chinese literature. Cross-list: ASIA 422.
Civil and Environmental Eng (CEVE)

CEVE 100 - AP/OTH CREDIT IN ENVIRONMENTAL SCIENCE
- Short Title: AP/OTH CR ENVIRONMENTAL SCIENCE
- Department: Civil & Environmental Engr
- Grade Mode: Standard Letter
- Course Type: Transfer
- Credit Hours: 3
- Course Level: Undergraduate Lower-Level
- Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation.

CEVE 101 - FUNDAMENTALS OF CIVIL AND ENVIRONMENTAL ENGINEERING
- Short Title: FUNDAMENTAL OF CIVIL & ENVIRONMENTAL ENGINEERING
- Department: Civil & Environmental Engr
- Grade Mode: Standard Letter
- Course Type: Lecture
- Credit Hours: 3
- Course Level: Undergraduate Lower-Level
- Restrictions: Graduate level students may not enroll.
- Description: This introduction will cover the essential topics and quantitative techniques in civil and environmental engineering. General engineering, engineering math, fluid mechanics, hydrology, statistics, and mass balance techniques will be presented followed by applications.

CEVE 201 - ENGINEERING PROJECT MANAGEMENT AND ECONOMICS
- Short Title: ENG ECONOMICS & PROJECT MANAGEMENT
- Department: Civil & Environmental Engr
- Grade Mode: Standard Letter
- Course Type: Lecture
- Credit Hours: 3
- Course Level: Undergraduate Lower-Level
- Restrictions: Graduate level students may not enroll.
- Prerequisite(s): CEVE 101
- Description: Life cycle economics analysis to project development, project economic analysis, contracting, network scheduling, risk management, organizational structures and cases. Mutually Exclusive: Credit cannot be earned for CEVE 201 and CEVE 479/CEVE 505/ENGI 505.

CEVE 210 - WILD TOPICS IN CHEMISTRY AND NANOTECHNOLOGY
- Short Title: WILD TOPICS CHEM AND NANOTECHNOLOGY
- Department: Civil & Environmental Engr
- Grade Mode: Standard Letter
- Course Type: Lecture
- Credit Hour: 1
- Restrictions: Graduate level students may not enroll.
- Description: A variety of topics related to chemistry and nanotechnology will be discussed. Some topics are classical while others are current. Topics may include nanocars, molecular electronics, how to form a startup company. Grades will be based upon attendance and quizzes. Cross-list: CHEM 210, MSNE 210. Repeatable for Credit.

CEVE 211 - ENGINEERING MECHANICS
- Short Title: ENGINEERING MECHANICS
- Department: Civil & Environmental Engr
- Grade Mode: Standard Letter
- Course Type: Lecture
- Credit Hours: 3
- Restrictions: Graduate level students may not enroll.
- Prerequisite(s): (PHYS 101 or PHYS 111 or PHYS 125 or PHYS 141) and MATH 101 and MATH 102
- Description: The study of equilibrium of static systems, the dynamics of a particle and particle systems, and rigid-body dynamics. Required for mechanical engineering and materials science and engineering majors. Cross-list: MECH 211.

CEVE 302 - SUSTAINABLE DESIGN
- Short Title: SUSTAINABLE DESIGN
- Department: Civil & Environmental Engr
- Grade Mode: Standard Letter
- Course Type: Laboratory
- Credit Hours: 3
- Course Level: Undergraduate Upper-Level
- Restrictions: Graduate level students may not enroll.
- Description: The objective of this course is to develop skills in formulating and solving problems of societal development and advancement in light of increasing material, energy and water demands and decreasing resource availability. Sustainable design requires balancing economic, ecological/environmental and social issues to create physical as well as social structures that will work for current and future generations. In addition to learning to apply sustainable design principles to individual engineering and developing projects, students will be challenged to understand the application of sustainable design thinking at the municipal and corporate level. Cross-list: ENGI 302. Graduate/Undergraduate Equivalency: CEVE 502. Mutually Exclusive: Credit cannot be earned for CEVE 302 and CEVE 502.

CEVE 304 - STRUCTURAL ANALYSIS I
- Short Title: STRUCTURAL ANALYSIS I
- Department: Civil & Environmental Engr
- Grade Mode: Standard Letter
- Course Type: Lecture
- Credit Hours: 3
- Restrictions: Graduate level students may not enroll.
- Prerequisite(s): CEVE 211 or MECH 211
- Description: Analysis of statically determinate structures; stability and determinacy; influence lines and deflections. Introduction to analysis of indeterminate structures by force and displacement methods.
CEVE 307 - ENERGY AND THE ENVIRONMENT
Short Title: ENERGY AND THE ENVIRONMENT
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores the physical principles of energy use and its impacts on Earth's environment and climate. Topics will include energy mechanics, climate change, and the environmental impacts and future prospects of various fossil fuel and alternative energy sources. Cross-list: ENST 307, ESCI 307. Graduate/Undergraduate Equivalency: CEVE 507. Mutually Exclusive: Credit cannot be earned for CEVE 307 and CEVE 507.

CEVE 308 - INTRODUCTION TO AIR POLLUTION CONTROL
Short Title: INTRO TO AIR POLLUTION CONTROL
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (CHEM 122 or CHEM 152) and MATH 102 and (PHYS 101 or PHYS 111 or PHYS 125 or PHYS 141)
Description: This course will discuss the history of air pollution and its effects as motivation for control of anthropogenic emissions to the atmosphere. Topics will include air pollution control strategies and regulations, predictive pollution concentration models, general ideas to reduce air pollution, and specific technologies to limit emissions of criteria pollutants and their precursors. Graduate/Undergraduate Equivalency: CEVE 508. Mutually Exclusive: Credit cannot be earned for CEVE 308 and CEVE 508.

CEVE 310 - PRINCIPLES OF ENVIRONMENTAL ENGINEERING
Short Title: PRINCIPLES OF ENVI ENGINEERING
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course covers principles of water quality engineering, air pollution control and solid and hazardous waste management. Elements of risk assessment, global atmospheric change, and pollution prevention are also addressed to contribute to adequate-level competency in Environmental Engineering. Graduate students will write a term paper and prepare a lecture. Graduate/Undergraduate Equivalency: CEVE 510. Mutually Exclusive: Credit cannot be earned for CEVE 310 and CEVE 510.

CEVE 311 - MECHANICS OF SOLIDS AND STRUCTURES
Short Title: MECHANICS OF SOLIDS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CEVE 211 or MECH 211
Description: Analysis of stress and the deformation of solids with applications to beams, circular shafts, and columns. Open only to mechanical engineering and civil engineering majors. Required for mechanical engineering majors. Cross-list: MECH 311.

CEVE 312 - STRENGTH OF MATERIALS LAB
Short Title: STRENGTH OF MATERIALS LAB
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CEVE 304 (may be taken concurrently) and (CEVE 311 (may be taken concurrently) or MECH 311 (may be taken concurrently))
Description: Instruction in standard tension, compression, and torsion tests of ferrous and nonferrous metals. Includes experimental techniques and the behavior of structural elements. Prerequisites may be taken concurrently.

CEVE 313 - UNCERTAINTY AND RISK IN URBAN INFRASTRUCTURES
Short Title: UNCERT & RISK IN URBAN INFRAST
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): STAT 312 or STAT 310 or ECON 307 or ECON 382 or STAT 331 or ELEC 331
Description: This course explores methods for practical risk-based decision support, particularly for infrastructure systems. Uncertainty quantification (UQ) to external events including natural hazards is at the core of risk-informed design, operation, and mitigation actions. UQ will also guide engineering practice in the future as established by ASCE. The course emphasizes decision theory, Bayesian approaches, risk analysis tools, and infrastructure safety. Cross-list: STAT 313. Repeatable for Credit.
CEVE 314 - SUSTAINABLE WATER PURIFICATION FOR THE DEVELOPING WORLD
Short Title: SUST WTR PURIF FOR DEV WORLD
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is an overview of sustainable strategies for safe water supply in off-the-grid, low-income regions. Topics covered include water quality and treatment, sustainability and WASH (water, sanitation and hygiene). A major element of the course is a project to solve a water-related issue in a real-world context. Cross-list: BIOE 365, GLHT 314. Repeatable for Credit.

CEVE 320 - ETHICS AND ENGINEERING LEADERSHIP
Short Title: ETHICS & ENGINRNG LEADERSHIP
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Civil & Environmental Engineer, Civil Engineering or Environment Analysis&Decisions. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CEVE 101
Description: Seminar introduces students to a framework for discussing and making ethical engineering and professional decisions. Using case studies and exercises, students will look at their own profession and its Engineering Code of Ethics as well as at the issues and risks they may face as managers and executives. Cross-list: ENGI 320. Graduate/Undergraduate Equivalency: CEVE 529. Mutually Exclusive: Credit cannot be earned for CEVE 320 and CEVE 529.

CEVE 322 - ENGINEERING ECONOMICS
Short Title: ENGINEERING ECONOMICS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CEVE 400 and CEVE 529.
Description: Credit cannot be earned for CEVE 322 and CEVE 523.

CEVE 323 - APPLIED SUSTAINABLE PLANNING AND DESIGN
Short Title: APPL. SUST. PLANNNG & DESIGN
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CEVE 302 or CEVE 502
Description: This course applies principles learned in CEVE 302/502 to real-world sustainability projects. Three to four case studies will comprise the class. These case studies will involve development of design solutions for (1) carbon neutral design, (2) ecosystem services transactions, (3) sustainable industrial applications and/or (4) air pollution and environmental justice. Graduate/Undergraduate Equivalency: CEVE 523. Mutually Exclusive: Credit cannot be earned for CEVE 323 and CEVE 523.

CEVE 363 - APPLIED FLUID MECHANICS
Short Title: APPLIED FLUID MECHANICS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 212 and (PHYS 101 or PHYS 111 or PHYS 125 or PHYS 141)
Description: Study of fluid properties, fluid statics, and incompressible fluid steady flow. Includes energy and momentum equations with many applications, similitude and dimensional analysis, and viscous fluid flow in pipe networks. Required for B.S.C.E.

CEVE 400 - ADVANCED MECHANICS OF MATERIALS
Short Title: ADV MECHANICS OF MATERIALS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (MECH 211 or CEVE 211) and (MECH 311 or CEVE 311)
Description: Advanced topics in solid mechanics and strength of materials including energy methods, principle of virtual work, conservation laws, constitutive modeling, aspects of elasticity theory, stability and fracture mechanics with application to the analysis and design of reliable structures. Cross-list: MECH 400. Graduate/Undergraduate Equivalency: CEVE 500. Mutually Exclusive: Credit cannot be earned for CEVE 400 and CEVE 500.

CEVE 412 - HYDROLOGY AND WATER RESOURCES ENGINEERING
Short Title: HYDROLOGY & WATER RESOURCES ENG
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Fundamentals of the hydrologic cycle, meteorology, rainfall-runoff, flood routing, urban system design, and open channel flow are covered. Topics in ground water flow and well mechanics are also included. Applications include computational hydrology, floodplain analysis, watershed behavior, and low impact development. Group presentations are required. Graduate/Undergraduate Equivalency: CEVE 509. Mutually Exclusive: Credit cannot be earned for CEVE 412 and CEVE 509.

CEVE 417 - FINITE ELEMENT ANALYSIS
Short Title: FINITE ELEMENT ANALYSIS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (MATH 212 or MATH 222) and (CAAM 210 or CAAM 211)
Description: An introduction to finite element analysis by Galerkin's method and the method of least squares as applied to both ordinary and partial differential equations common in engineering applications. Element interpolations, numerical integration, computational considerations for efficient solution and post-processing methods. Application of the commercial codes to ANSYS and Cosmosworks. Cross-list: MECH 417.

CEVE 418 - QUANTITATIVE HYDROGEOLOGY
Short Title: QUANTITATIVE HYDROGEOLOGY
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Advanced course that will provide a quantitative overview of groundwater hydrology. Emphasis will be placed on mastering concepts in fluid mechanics and applying these concepts to water supply, environmental, and geological problems. Cross-list: ESCI 418.

CEVE 420 - ENVIRONMENTAL REMEDIATION RESTORATION
Short Title: ENVIRONMENTAL REMEDIATION RESTORATION
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Remediation principles and application of full-scale remediation technologies for restoration of contaminated soil, groundwater, and surface water. Topics include mass balances and distribution of chemicals in environmental media; development of remediation goals through risk assessment; treatment technology selection criteria and costs; groundwater, soil, and surface water restoration technologies; and regulatory considerations. Graduate/Undergraduate Equivalency: CEVE 520. Mutually Exclusive: Credit cannot be earned for CEVE 420 and CEVE 520.

CEVE 424 - TIME-DEPENDENT SYSTEM RELIABILITY METHODS AND APPLICATIONS
Short Title: SYSTEM RELIABILITY METHODS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students will learn computational simulation and theoretical techniques for the reliability assessment of engineered systems as a function of their component failure probabilities. We will explore time-dependent and algorithmic system reliability, and will use modern structural infrastructure systems as case studies, including power systems, wind turbines, bridges, and buildings. Graduate/Undergraduate Equivalency: CEVE 524. Mutually Exclusive: Credit cannot be earned for CEVE 424 and CEVE 524.

CEVE 427 - COMPUTATIONAL STRUCTURAL MECHANICS AND FEM
Short Title: COMPUTATIONAL STR MECH & FEM
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CEVE 311 or MECH 311
Description: Introduction to matrix structural analysis, trusses, beams, frames. Use of computer programs for structural analysis of Civil, Mechanical, and Aerospace Structures. Cross-list: MECH 427.
CEVE 434 - FATE AND TRANSPORT OF CONTAMINANTS IN THE ENVIRONMENT
Short Title: FATE/TRANSPORT OF CONTAMINANTS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Physical and chemical principles governing the fate and transport of contaminants in the aqueous environment, and the applications of such principles in environmental engineering. Emphasis is put on mass transport and transportation processes in natural and engineered systems. Previous course work in fluid mechanics and calculus through differential equations is strongly suggested. Graduate/Undergraduate Equivalency: CEVE 534. Mutually Exclusive: Credit cannot be earned for CEVE 434 and CEVE 534.

CEVE 442 - WATER REUSE AND RESOURCE RECOVERY
Short Title: WATER REUSE AND RESOURCE RECOV
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will focus on concepts of resource recovery and water reuse from wastewater and associated processes treatment needs. Students will understand the function and design of key biological, physical, and chemical treatment processes for wastewater treatment and resource recovery and water reuse applications.

CEVE 444 - ENVIRONMENTAL MICROBIOLOGY AND MICROBIAL ECOLOGY
Short Title: ENVIRON MICROBIOL & ECOLOGY
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Fundamentals of microbiology and the ecology of microbes, highlighting their interactions with each other and the environment, and integration of these principles in the context of important natural and engineered environmental systems. Graduate/Undergraduate Equivalency: CEVE 544. Mutually Exclusive: Credit cannot be earned for CEVE 444 and CEVE 544.

CEVE 450 - REMOTE SENSING
Short Title: REMOTE SENSING
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to electromagnetic remote sensing of the earth and other planets using passive and active methods. The course includes a computer lab component involving processing and interpretation of remote sensing imagery, and an individual project. Cross-list: ESCI 450.

CEVE 452 - URBAN TRANSPORTATION SYSTEMS
Short Title: URBAN TRANSPORTATION SYSTEMS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Survey of operation characteristics of transport modes the elements of transportation planning, and the design of stationary elements.

CEVE 453 - GEOGRAPHIC INFORMATION SCIENCE
Short Title: GEOGRAPHIC INFORMATION SCIENCE
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to geographic information systems (GIS) technology, mapping sciences, and spatial analysis. The course will include extensive computer use and the completion of a major individual project on a topic selected by the student. Cross-list: ESCI 454.

CEVE 454 - COMPUTATIONAL FLUID MECHANICS
Short Title: COMPUTATIONAL FLUID MECHANICS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MECH 371 (may be taken concurrently) or CEVE 363 (may be taken concurrently) or CHBE 401 (may be taken concurrently)
Description: Fundamental concepts of finite element methods in fluid mechanics, including spatial discretization and numerical integration in multi-dimensions, time-integration, and solution of nonlinear ordinary differential equation systems. Advanced numerical stabilization techniques designed for fluid mechanics problems. Strategies for solution of complex, real-world problems. Topics in large-scale computing, parallel processing, and visualization. Prerequisites may be taken concurrently. Cross-list: BIOE 454, MECH 454. Graduate/Undergraduate Equivalency: CEVE 554. Mutually Exclusive: Credit cannot be earned for CEVE 454 and CEVE 554.

CEVE 460 - BRIDGE ENGINEERING AND EXTREME EVENTS
Short Title: BRIDGE ENG. & EXTREME EVENTS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MECH 371 (may be taken concurrently) or CEVE 363 (may be taken concurrently) or CHBE 401 (may be taken concurrently)
Description: Introduction to geographic information systems (GIS) technology, mapping sciences, and spatial analysis. The course will include extensive computer use and the completion of a major individual project on a topic selected by the student. Cross-list: ESCI 454, MECH 454. Graduate/Undergraduate Equivalency: CEVE 554. Mutually Exclusive: Credit cannot be earned for CEVE 454 and CEVE 554.

CEVE 460 - BRIDGE ENGINEERING AND EXTREME EVENTS
Short Title: BRIDGE ENG. & EXTREME EVENTS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MECH 371 (may be taken concurrently) or CEVE 363 (may be taken concurrently) or CHBE 401 (may be taken concurrently)
Description: Introduction to geographic information systems (GIS) technology, mapping sciences, and spatial analysis. The course will include extensive computer use and the completion of a major individual project on a topic selected by the student. Cross-list: ESCI 454, MECH 454. Graduate/Undergraduate Equivalency: CEVE 554. Mutually Exclusive: Credit cannot be earned for CEVE 454 and CEVE 554.
CEVE 470 - PRINCIPLES OF SOIL MECHANICS
Short Title: PRINCIPLES OF SOIL MECHANICS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Description: Index and classification properties of soil including soil classification systems; clay minerals and soil structure; compaction theory; engineering behavior and properties of soils including permeability, compressibility and strength; design considerations. Required for B.S.C.E.

CEVE 476 - STRUCTURAL DYNAMIC SYSTEMS
Short Title: STRUCTURAL DYNAMIC SYSTEMS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Prerequisite(s): CEVE 311 or MECH 311
Description: Introduction to structural dynamic systems. Linear SDOF and MDOF discrete systems, undamped and damped systems, free and forced vibration, dynamic response to periodic and arbitrary excitations, numerical evaluation of dynamic response, response spectrum and modal analysis. Additional topics for graduate version 576: Linear systems theory, transform methods, state space methods, feedback control, observers and identification. Applications using MATLAB. Demonstrations and laboratory examples. Students will be required to do more advanced assignments and a project. Graduate/Undergraduate Equivalency: CEVE 576. Mutually Exclusive: Credit cannot be earned for CEVE 476 and CEVE 576.

CEVE 479 - ENGINEERING PROJECT MANAGEMENT AND ECONOMICS
Short Title: ENGINEERING PROJ MGMT & ECON
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Life cycle economic analysis approach to project development and management, project planning, and project economic analysis, contracting network scheduling techniques, risk management, organizational structures, and cases. Graduate/Undergraduate Equivalency: CEVE 505. Mutually Exclusive: Credit cannot be earned for CEVE 479 and CEVE 201.

CEVE 480 - SENIOR DESIGN
Short Title: SENIOR DESIGN
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: The capstone designed course in the Spring Semester will provide senior engineering students with a complete designed experience including fundamental design issues in the major areas of the curriculum, small team experiences, project proposals, progress reports and presentations, design software and computations, major report writing, and a final presentation to the CEE faculty and an external jury of professional engineers. An established local firm will assist in teaching practical design methods and consultation with other faculty is required as part of the overall experience.

CEVE 481 - INTRODUCTION TO SENIOR DESIGN
Short Title: INTRODUCTION TO SENIOR DESIGN
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Description: Semester. Lectures will focus on various engineering design topics and CAD training. Potential design projects will be introduced and students will form interdisciplinary design teams. Design teams will present before jury to win their design projects.

CEVE 484 - ENVIRONMENTAL RISK ASSESSMENT & HUMAN HEALTH
Short Title: ENVIRON RISK ASSESS&HUMAN HLTH
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Prerequisite(s): STAT 280 or STAT 305
Description: Learn and apply quantitative risk assessment methodology to estimate human health risk from environmental exposure to contamination in air, soil and water. Students will conduct a series of team projects focused on toxicology, risk based screening levels, exposure concentration estimation and risk characterization. Cross-list: STAT 484. Graduate/Undergraduate Equivalency: CEVE 684. Mutually Exclusive: Credit cannot be earned for CEVE 484 and CEVE 684.
CEVE 492 - MODELING AND ANALYSIS OF NETWORKED SYSTEMS
Short Title: MODELING & ANALYSIS OF NET SYS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Graduate Upper-Level
Description: This course introduces methods for modeling, characterizing and predicting the behavior of complex infrastructure and technological systems. The discussed analysis methods rely on network science optimization, and computational complexity principles so as to unravel the emergent features of structural and infrastructure systems. Topological properties, ranking tools, dynamic processes, and percolation-based resilience are studied from analytical, algorithmic, and numerical simulation perspectives. The course also explores interdependencies and mitigation actions for spatially and temporally evolving systems. The graduate level course involves advanced exercises in homework and exams, as well as a research-oriented final project. Graduate/Undergraduate Equivalency: CEVE 592. Mutually Exclusive: Credit cannot be earned for CEVE 492 and CEVE 592. Repeatable for Credit.

CEVE 496 - OFFSHORE AND MARINE SYSTEMS
Short Title: OFFSHORE AND MARINE SYSTEMS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Graduate Upper-Level
Description: Introduction to dynamics of offshore and marine systems, structures, drill strings, marine risers, fluid forces, hydrodynamic forces, wind and earthquake forces. MATLAB programming and use of computer software. Demonstrations and laboratory examples. Graduate/Undergraduate Equivalency: CEVE 596. Mutually Exclusive: Credit cannot be earned for CEVE 496 and CEVE 596.

CEVE 499 - SPECIAL PROBLEMS
Short Title: SPECIAL TOPICS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-12
Restrictions: Graduate level students may not enroll.
Course Level: Graduate Upper-Level
Description: Study of selected topics including individual investigations special lectures, and seminars. Offered upon mutual agreement of faculty and student. Repeatable for Credit.

CEVE 500 - ADVANCED MECHANICS OF MATERIALS
Short Title: ADV MECHANICS OF MATERIALS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (MECH 211 or CEVE 211) and (MECH 311 or CEVE 311)
Description: Advanced topics in solid mechanics and strength of materials including energy methods, principle of virtual work, conservation laws, constitutive modeling, aspects of elasticity theory, stability and fracture mechanics with application to the analysis and design of reliable structures. Cross-list: MECH 500. Graduate/Undergraduate Equivalency: CEVE 400. Mutually Exclusive: Credit cannot be earned for CEVE 500 and CEVE 400.

CEVE 501 - CHEMISTRY FOR ENVIRONMENTAL ENGINEERING AND SCIENCE
Short Title: ENVIRONMENTAL CHEMISTRY
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics include: introductory concepts of general chemistry; applied physical chemistry; and organic and biochemical concepts as used in the profession. Graduate students are required to write and present an advanced paper. Graduate/Undergraduate Equivalency: CEVE 401. Mutually Exclusive: Credit cannot be earned for CEVE 501 and CEVE 401.

CEVE 502 - SUSTAINABLE DESIGN
Short Title: SUSTAINABLE DESIGN
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The objective of this course is to develop skills in formulating and solving problems of societal development and advancement in light of increasing material, energy and water demands and decreasing resource availability. Sustainable design requires balancing economic, ecological/environmental and social issues to create physical as well as social structures that will work for current and future generations. In addition to learning to apply sustainable design principles to individual engineering and developing projects, students will be challenged to understand the application of sustainable design thinking a the municipal and corporate level. Graduate students will be required to undertake additional assignments relative to sustainable design. Graduate/Undergraduate Equivalency: CEVE 302. Mutually Exclusive: Credit cannot be earned for CEVE 502 and CEVE 302.
CEVE 503 - NONLINEAR FINITE ELEMENT ANALYSIS
Short Title: NONLINEAR FEM
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

CEVE 504 - ATMOSPHERIC PARTICULATE MATTER
Short Title: ATMOSPHERIC PARTICULATE MATTER
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (CHEM 122 or CHEM 152) and MATH 102 and (PHYS 101 or PHYS 111 or PHYS 125 or PHYS 141)
Description: Description and examination of the processes determining the chemical and physical characteristics of atmospheric aerosol particles. Important focal points include aerosol measurements and control techniques and aerosol climate effects. Most attention will be paid to processes active in the troposphere, but important differences between the troposphere and stratosphere are addressed. Extra work required for graduate students. Graduate/Undergraduate Equivalency: CEVE 404. Mutually Exclusive: Credit cannot be earned for CEVE 504 and CEVE 404.

CEVE 505 - ENGINEERING PROJECT MANAGEMENT AND ECONOMICS
Short Title: ENGINEERING PROJ MGMT & ECON
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Life cycle economic analysis approach to project development and management, project planning, and project economic analysis, contracting network scheduling techniques, risk management, organizational structures, and cases. 505 requires an additional paper. Cross-list: ENGI 505. Graduate/Undergraduate Equivalency: CEVE 479. Mutually Exclusive: Credit cannot be earned for CEVE 505 and CEVE 201.

CEVE 507 - ENERGY AND THE ENVIRONMENT
Short Title: ENERGY AND THE ENVIRONMENT
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course explores the physical principles of energy use and its impacts on Earth's environment and climate. Topics will include energy mechanics, climate change, and the environmental impacts and future prospects of various fossil fuel and alternative energy sources. Additional problems will be assigned to Graduate students. Graduate/Undergraduate Equivalency: CEVE 307. Mutually Exclusive: Credit cannot be earned for CEVE 507 and CEVE 307.

CEVE 508 - INTRODUCTION TO AIR POLLUTION CONTROL
Short Title: INTRO TO AIR POLLUTION CONTROL
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will discuss the history of air pollution and its effects as motivation for control of anthropogenic emissions to the atmosphere. Topics will include air pollution control strategies and regulations, predictive pollution concentration models, general ideas to reduce air pollution, and specific technologies to limit emissions of criteria pollutants and their precursors. Additional paper is required for graduate students. Graduate/Undergraduate Equivalency: CEVE 308. Mutually Exclusive: Credit cannot be earned for CEVE 508 and CEVE 308.

CEVE 509 - HYDROLOGY AND WATER RESOURCES ENGINEERING
Short Title: HYDROLOGY & WATER RESOURCES ENG
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Fundamentals of the hydrologic cycle, meteorology, rainfall-runoff, flood routing, urban system design, and open channel flow are covered. Topics in ground water flow and well mechanics are also included. Applications include computational hydrology, floodplain analysis, watershed behavior, and low impact development. Group presentations are required. The graduate level course includes an extra paper. Graduate/Undergraduate Equivalency: CEVE 412. Mutually Exclusive: Credit cannot be earned for CEVE 509 and CEVE 412.
CEVE 510 - PRINCIPLES OF ENVIRONMENTAL ENGINEERING  
Short Title: PRINCIPLES OF ENVI ENGINEERING  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course covers principles of water quality engineering, air pollution control and solid and hazardous waste management. Elements of risk assessment, global atmospheric change, and pollution prevention are also addressed to contribute to adequate-level competency in Environmental Engineering. Graduate students will write a term paper and prepare a lecture. Graduate/Undergraduate Equivalency: CEVE 310. Mutually Exclusive: Credit cannot be earned for CEVE 510 and CEVE 310.  

CEVE 511 - ATMOSPHERIC PROCESSES  
Short Title: ATMOSPHERIC PROCESSES  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): CHEM 121 and CHEM 122 and MATH 101 and MATH 102 and (PHYS 101 or PHYS 111 or PHYS 125 or PHYS 141)  
Description: Study of the chemical and physical processes that govern the formation, transformation, and transport of gases and particles in the atmosphere. Overview of urban and regional air pollution, including tropospheric ozone formation and particulate matter; stratospheric chemistry; and global climate change. Extra work required for graduate students. Graduate/Undergraduate Equivalency: CEVE 411. Mutually Exclusive: Credit cannot be earned for CEVE 511 and CEVE 411.  

CEVE 512 - ADVANCED HYDROLOGY AND HYDRAULICS  
Short Title: ADV HYDROLOGY & HYDRAULICS  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): CEVE 302 or CEVE 502  
Description: This course covers principles and applications of the GIS programs, theory and implementation of advanced hydrologic and hydraulic models, and the linkage of these models to engineering analysis of important water problems. GIS software is covered in detail. Each class consists of an advanced theory lecture followed by modeling tutorials using Hec-HMS, VFLO, and Hec-RA5 codes. A semester group project addresses a full watershed analysis with class presentations and engineering reports required.  

CEVE 518 - CONTAMINANT HYDROGEOLOGY  
Short Title: CONTAMINANT HYDROGEOLOGY  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Groundwater hydrology, well mechanics, hydraulics. Contaminant transport issues in aquifer systems, numerical models, of large aquifers. Topics in water resources engineering and aquifer water management. Use of major computer models is covered in detail.  

CEVE 519 - ELASTICITY, PLASTICITY AND DAMAGE MECHANICS  
Short Title: ELASTICITY/PLASTICITY/DAMAGE  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: An overview of phenomena that determine the response of solids to deformation and loading: elasticity, plasticity, damage mechanics and cracking. Review of continuum mechanics with emphasis on the physical mechanisms of deformation and fracture. Classification of the behavior of solids. Modeling of different types of material behavior. The physics underlying the phenomena and methods for the numerical analysis of the resulting equations are discussed. Cross-list: MECH 519.  

CEVE 520 - ENVIRONMENTAL REMEDIATION RESTORATION  
Short Title: ENVI REMEDIATION RESTORATION  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): CEVE 323  
Description: Remediation principles and application of full-scale remediation technologies for restoration of contaminated soil, groundwater, and surface water. Topics include mass balances and distribution of chemicals in environmental media; development of remediation goals through risk assessment; treatment technology selection criteria and costs; groundwater, soil, and surface water restoration technologies; and regulatory considerations. Graduate students receive additional, more challenging assignments. Graduate/Undergraduate Equivalency: CEVE 420. Mutually Exclusive: Credit cannot be earned for CEVE 520 and CEVE 420.  

CEVE 523 - APPLIED SUSTAINABLE PLANNING AND DESIGN  
Short Title: APPL. SUST. PLANNING & DESIGN  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): CEVE 302 or CEVE 502  
Description: This course applies principles learned in CEVE 302/502 to real-world sustainability projects. Three to four case studies will comprise the class. These case studies will involve development of design solutions for (1) carbon neutral design, (2) ecosystem services transactions, (3) sustainable industrial applications and/or (4) air pollution and environmental justice. Graduate/Undergraduate Equivalency: CEVE 323. Mutually Exclusive: Credit cannot be earned for CEVE 523 and CEVE 323.
CEVE 524 - TIME-DEPENDENT SYSTEM RELIABILITY METHODS AND APPLICATIONS
Short Title: SYSTEM RELIABILITY METHODS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Students will learn computational simulation and theoretical techniques for the reliability assessment of engineered systems as a function of their component failure probabilities. We will explore time-dependent and algorithmic system reliability, and will use modern structural infrastructure systems as case studies, including power systems, wind turbines, bridges, and buildings. Extra provisions for graduate students in assignments, exams, and projects. Graduate/Undergraduate Equivalency: CEVE 424. Mutually Exclusive: Credit cannot be earned for CEVE 524 and CEVE 424.

CEVE 527 - COMPUTATIONAL STRUCTURAL MECHANICS AND FEM
Short Title: COMPUTATIONAL STR MECH & FEM
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to differential and integral formulations, minimum principles, variational principles, weighted residuals, energy principles, and principle of virtual work. Boundary, initial, and eigenvalue problems. Finite element and finite difference methods for structural mechanics. Applications to static and dynamic truss beams and frame problems. MATLAB programming and use of computer software. Students in CEVE 527 (GR version) will be required to do more advanced assignments and a project. Cross-list: MECH 527.

CEVE 528 - ENGINEERING ECONOMICS
Short Title: ENGINEERING ECONOMICS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the evaluation of alternative investment opportunities with emphasis on engineering projects and capital infrastructure. Time value of money concepts are developed in the context of detailed project evaluation and presentations. In addition, concepts and applications of risk analysis and investment under uncertainty are developed. Requires oral and written presentations by students. Grad students will have an additional case study to perform beyond CEVE 322 requirements. Cross-list: ENGI 528. Graduate/Undergraduate Equivalency: CEVE 322. Mutually Exclusive: Credit cannot be earned for CEVE 528 and CEVE 322.

CEVE 529 - ETHICS AND ENGINEERING LEADERSHIP
Short Title: ETHICS & ENGINEERING LEADERSHIP
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Civil & Environmental Engineer, Civil Engineering or Environment Analysis & Decisions. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar introduces students to a framework for discussing and making ethical engineering and professional decisions. Using case studies and exercises, students will look at their own profession and its Engineering Code of Ethics as well as at the issues and risks they may face as managers and executives. Graduate students will do an extra paper. Instructor Permission Required. Cross-list: ENGI 529. Graduate/Undergraduate Equivalency: CEVE 320. Mutually Exclusive: Credit cannot be earned for CEVE 529 and CEVE 320.

CEVE 530 - CONCRETE BUILDING DESIGN
Short Title: CONCRETE BUILDING DESIGN
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Design of reinforced concrete building structures and floor slab systems. Case histories will be discussed.

CEVE 533 - NANOSCIENCE AND NANOTECHNOLOGY
Short Title: NANOSCIENCE & NANO TECHNOLOGY
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the basic principles of nanoscience and nanotechnology. Size dependent physical properties of nanoscopic solids will be described using solid state physics and molecular orbital theory as a foundation. Wet chemical techniques that produce nanoscale materials (e.g. carbon nanotubes, semiconductor and metallic nanocrystals, dendrimers...) will be introduced in the second half of the semester. Expected to be taught Spring 2019. Cross-list: CHEM 533, MSNE 534.
CEVE 534 - FATE AND TRANSPORT OF CONTAMINANTS IN THE ENVIRONMENT  
Short Title: FATE/TRANSPORT OF CONTAMINANTS  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Physical and chemical principles governing the fate and transport of contaminants in the aqueous environment, and the applications of such principles in environmental engineering. Emphasis is put on mass transport and transportation processes in natural and engineered environmental systems. Previous course work in fluid mechanics and calculus through differential equations is strongly suggested. Extra work required, for Graduate Students. Graduate/Undergraduate Equivalency: CEVE 434. Mutually Exclusive: Credit cannot be earned for CEVE 534 and CEVE 434. Repeatable for Credit.

CEVE 535 - PHYSICAL CHEMICAL PROCESSES FOR WATER QUALITY CONTROL  
Short Title: PHYS CHEM PROC WATER QUAL CTRL  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Principles, modeling and design aspects of physical chemical treatment processes in drinking water, wastewater and groundwater remediation applications. Modern treatment technologies such as membrane separation, advanced oxidation, and photocatalysis will be covered.

CEVE 536 - ENVIRONMENTAL BIOTECHNOLOGY AND BIOREMEDIATION  
Short Title: ENVIRONMENTAL BIOTECHNOLOGY  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Theory and application of biochemical processes in environmental engineering.

CEVE 538 - COMPUTATIONAL NANOSCIENCE FOR GREEN INFRASTRUCTURE  
Short Title: COMPUTATIONAL NANOSCIENCE  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Computational methods such as first principles, kinetic Monte Carlo (KMC), classical MC (in Canonical, Grand Canonical, and isobaric-isothermal ensembles), and classic MD in predicting materials formation and properties. Case studies include cementitious materials, metals, and thermolectric materials. Other case studies are possible depending on the student's background and instructor's approval. Cross-list: MSNE 538.

CEVE 540 - STEEL BUILDING DESIGN  
Short Title: STEEL BUILDING DESIGN  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): CEVE 405  
Description: Exploration of practical design form conceptual stage to final analysis. Includes design parameters and serviceability limitations.

CEVE 544 - ENVIRONMENTAL MICROBIOLOGY AND MICROBIAL ECOLOGY  
Short Title: ENVIRON MICROBIOL & ECOLOGY  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Fundamentals of microbiology and the ecology of microbes, highlighting their interactions with each other and the environment, and integration of these principles in the context of important natural and engineered environmental systems. Graduate/Undergraduate Equivalency: CEVE 444. Mutually Exclusive: Credit cannot be earned for CEVE 544 and CEVE 444.

CEVE 550 - ENVIRONMENTAL ORGANIC CHEMISTRY  
Short Title: ENVIRONMENTAL ORGANIC CHEM  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: A course covering parameter estimation methods, thermodynamics, and kinetic needed to predict the fate, transports, and reactivity of organic compounds in air, water, and soils. Topics: volatilization, solubility, sorption, partitioning, diffusion, aquatic reactivity, photochemistry, and transport modeling.

CEVE 554 - COMPUTATIONAL FLUID MECHANICS  
Short Title: COMPUTATIONAL FLUID MECHANICS  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): CEVE 454. Mutually Exclusive: Credit cannot be earned for CEVE 554 and CEVE 454.

CEVE 550 - ENVIRONMENTAL ORGANIC CHEMISTRY  
Short Title: ENVIRONMENTAL ORGANIC CHEM  
Department: Civil & Environmental Engr  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): CEVE 454. Mutually Exclusive: Credit cannot be earned for CEVE 554 and CEVE 454.

MECH 371 (may be taken concurrently) or CEVE 363 (may be taken concurrently) or CHBE 401 (may be taken concurrently)  
Description: Additional work required. Cross-list: BICE 554, MECH 554. Graduate/Undergraduate Equivalency: CEVE 454. Mutually Exclusive: Credit cannot be earned for CEVE 554 and CEVE 454.
CEVE 555 - NUMERICAL METHODS FOR PARTIAL DIFFERENTIAL EQUATIONS
Short Title: NUMERICAL METHODS FOR PDES
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers various numerical methods for solving partial differential equations: aspects of finite difference methods, finite element methods, finite volume methods, mixed methods, discontinuous Galerkin methods, and meshless methods. Both theoretical convergence and practical implementation of the methods are studied for elliptic and parabolic problems. May receive credit for only one of the following courses: CAAM 452/CEVE 455/CAAM 536/CEVE 555. Cross-list: CAAM 536. Recommended Prerequisite(s): CAAM 336 Mutually Exclusive: Credit cannot be earned for CEVE 555 and CEVE 455.

CEVE 560 - BRIDGE ENGINEERING AND EXTREME EVENTS
Short Title: BRIDGE ENG. & EXTREME EVENTS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course integrates information from various engineering and scientific disciplines to provide a rational basis for bridge design under regular and extreme loading. It provides an introduction to bridge engineering, including bridge systems, construction material, loading, and reliability-based design. Design, analysis, and retrofit for seismic and coastal threats will be introduced. Graduate/Undergraduate Equivalency: CEVE 460. Recommended Prerequisite(s): CEVE 304 and CEVE 311. Mutually Exclusive: Credit cannot be earned for CEVE 560 and CEVE 460.

CEVE 565 - NANOTECHNOLOGY ENVIRONMENTAL ENGINEERING FOR TEACHERS (NEET)
Short Title: NANOENVIRONMENTL ENGR-TEACHERS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The Nano-Environmental Engineering for Teachers (NEET) course is designed to serve AP environmental science teachers. The purpose of the program is to increase the current knowledge of educators to empower them in implementing rigorous project-based engineering activities on the topic of water sustainability. Instructor Permission Required.

CEVE 570 - FOUNDATION ENGINEERING
Short Title: FOUNDATION ENGINEERING
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CEVE 470
Description: Subsurface exploration methods and techniques; lateral earth pressures and design of retaining walls; bearing capacity and shallow foundation design; settlement considerations; design of deep foundations; temporary excavations and dewatering.

CEVE 576 - STRUCTURAL DYNAMIC SYSTEMS
Short Title: STRUCTURAL DYNAMIC SYSTEMS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to structural dynamic systems. Linear SDOF and MDOF discrete systems, undamped and damped systems, free and forced vibration, dynamic response to periodic and arbitrary excitations, numerical evaluation of dynamic response, response spectrum and modal analysis. Additional topics for graduate version 576: Linear systems theory, transform methods, state space methods, feedback control, observers and identification. Applications using MATLAB. Demonstrations and laboratory examples. Students will be required to do more advanced assignments and a project. Cross-list: MECH 576. Graduate/Undergraduate Equivalency: CEVE 476. Mutually Exclusive: Credit cannot be earned for CEVE 576 and CEVE 476.

CEVE 578 - EARTHQUAKE ENGINEERING
Short Title: EARTHQUAKE ENGINEERING
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Characteristics of ground motion, analysis methods for linear and nonlinear base excited structures, and principles of seismic design including case studies and performance based engineering concepts. Probabilistic methods in earthquake engineering including seismic hazard analysis, fragility modeling, and risk assessment and mitigation. Recommended Prerequisite(s): CEVE 576 or equivalent course in Structural Dynamics.

CEVE 590 - MCEE SPECIAL STUDY
Short Title: MCEE SPECIAL STUDY
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 2-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Professional master Project course involves the following (1) a project of practical relevance to the practice of Civil and Environmental Engineering, and (2) detailed project report. Students need to work with a faculty advisor. Instructor Permission Required. Repeatable for Credit.
CEVE 592 - MODELING AND ANALYSIS OF NETWORKED SYSTEMS
Short Title: MODELING & ANALYSIS OF NET SYS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course introduces methods for modeling, characterizing and predicting the behavior of complex infrastructure and technological systems. The discussed analysis methods rely on network science optimization, and computational complexity principles so as to unravel the emergent features of structural and infrastructure systems. Topological properties, ranking tools, dynamic processes, and percolation-based resilience are studied from analytical, algorithmic, and numerical simulation perspectives. The course also explores interdependencies and mitigation actions for spatially and temporally evolving systems. The graduate level course includes advanced exercises in homework and exams, as well as a research-oriented final project. Graduate/Undergraduate Equivalency: CEVE 492. Mutually Exclusive: Credit cannot be earned for CEVE 592 and CEVE 492. Repeatable for Credit.

CEVE 596 - OFFSHORE AND MARINE SYSTEMS
Short Title: OFFSHORE AND MARINE SYSTEMS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to dynamics of offshore and marine systems, structures, drill strings, marine risers, fluid forces, hydrodynamic forces, wind and earthquake forces. MATLAB programming and use of computer software. Students in CEVE 596 (GR version) will be required to do more advanced assignments and a project. Graduate/Undergraduate Equivalency: CEVE 496. Mutually Exclusive: Credit cannot be earned for CEVE 596 and CEVE 496.

CEVE 599 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Civil & Environmental Engr
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

CEVE 601 - SEMINAR
Short Title: SEMINAR
Department: Civil & Environmental Engr
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Continuing seminar on Civil and Environmental research. Repeatable for Credit.

CEVE 602 - SEMINAR
Short Title: SEMINAR
Department: Civil & Environmental Engr
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: See CEVE 601. Repeatable for Credit.

CEVE 603 - NANOTECHNOLOGY-ENABLED WATER TREATMENT (NEWT) CORE CONCEPTS SEMINAR
Short Title: NEWT CORE COURSE
Department: Civil & Environmental Engr
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar will introduce NEWT graduate students to the basic scientific concepts behind NEWT research. It is also intended to develop a common language for NEWT students in different research areas, and to contribute to the development of a center culture. Instructor Permission Required. Repeatable for Credit.

CEVE 635 - ADVANCED TOPICS: WATER CHEMISTRY
Short Title: ADV TOPICS: WATER CHEMISTRY
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-12
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Formal lecture and assigned reading in topics such as redox kinetics and thermodynamics, absorption and desorption, and the associated mathematics. An advanced topics course. Repeatable for Credit.

CEVE 636 - ADVANCED TOPICS IN BIOREMEDIATION
Short Title: ADV TOPICS IN BIOREMEDIATION
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Basic principles of Microbial Physiology, Metabolism, Stoichiometry, Thermodynamics and Kinetics applied to the selection, design and performance evaluation of engineered and intrinsic bioremediation systems. Repeatable for Credit.

CEVE 640 - ADVANCED TOPICS IN ENVIRONMENTAL ENGINEERING SCIENCES
Short Title: ADV TOPICS/ENVIRONMENTAL ENG
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-12
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Special topics in Graduate Study.
CEVE 641 - ADVANCED TOPICS IN ENVIRONMENTAL ENGINEERING
Short Title: ADV TOPICS/ENVIRONMENTAL ENG
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-12
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced topics in Graduate Study.

CEVE 651 - M.S. RESEARCH AND THESIS
Short Title: M.S. RESEARCH AND THESIS
Department: Civil & Environmental Engr
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

CEVE 652 - M.S. RESEARCH AND THESIS
Short Title: M.S. RESEARCH AND THESIS
Department: Civil & Environmental Engr
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

CEVE 654 - ADVANCED COMPUTATIONAL MECHANICS
Short Title: ADV COMPUTATIONAL MECHANICS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CEVE 554 or BIOE 554 or MECH 554 or BIOE 454 or MECH 454

CEVE 678 - ADVANCED STOCHASTIC MECHANICS
Short Title: ADV STOCHASTIC MECHANICS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Nonlinear random vibrations, Statistical Linearization, ARMA filters modeling, Monte Carlo Simulation, Wiener-Volterra series, time-variant structural reliability, and Stochastic Finite Elements are presented from a perspective of usefulness to aerospace, civil, marine, and mechanical applications. Cross-list: MECH 678.

CEVE 679 - APPLIED MONTE CARLO ANALYSIS
Short Title: APPLIED MONTE CARLO ANALYSIS
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Probability density and power spectrum based simulation concepts and procedures are discussed. Scalar and vectorial simulation are addressed. Spectral decomposition and digital filter algorithms are presented. Applications from aerospace, earthquake, marine, and wind engineering, and from other applied science disciplines are included. Cross-list: MECH 679.

CEVE 684 - ENVIRONMENTAL RISK ASSESSMENT & HUMAN HEALTH
Short Title: ENVIRON RISK ASSESS & HUMAN HLTH
Department: Civil & Environmental Engr
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 280 or STAT 305
Description: Learn and apply quantitative risk assessment methodology to estimate human health risk from environmental exposure to contamination in air, soil and water. Students will conduct a series of team projects focused on toxicology, risk based screening levels, exposure concentration estimation and risk characterization. Cross-list: STAT 684. Graduate/Undergraduate Equivalency: CEVE 484. Mutually Exclusive: Credit cannot be earned for CEVE 684 and CEVE 484.

CEVE 736 - ADVANCED RESEARCH TOPICS: ENVIRONMENTAL BIOTECHNOLOGY AND NANO TECHNOLOGY
Short Title: ADV TOPICS: ENVIR BIOTECH & NAN
Department: Civil & Environmental Engr
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Research oriented presentations and discussions of landmark papers and experimental methods for doctoral students in the Alvarez research group. Repeatable for Credit.

CEVE 800 - PH.D. RESEARCH AND THESIS
Short Title: PH.D. RESEARCH AND THESIS
Department: Civil & Environmental Engr
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

CEVE 801 - PH.D. RESEARCH AND THESIS
Short Title: PH.D. RESEARCH AND THESIS
Department: Civil & Environmental Engr
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.
**Classical Studies (CLAS)**

**CLAS 101 - FRESHMAN SEMINAR: SOCRATES: THE MAN AND HIS PHILOSOPHY**
- **Short Title:** FRESHMAN SEMINAR: SOCRATES
- **Department:** Classical and European Studies
- **Grade Mode:** Standard Letter
- **Course Type:** Seminar
- **Distribution Group:** Distribution Group I
- **Credit Hours:** 3
- **Restrictions:** Graduate level students may not enroll.
- **Course Level:** Undergraduate Lower-Level
- **Description:** This discussion-style seminar will consider how Socrates practiced philosophy, how Plato represented Socrates and Socratic philosophy in writing, and what effect Socrates had on Athens and his fellow Athenians. Readings will consist mainly of Plato's Socratic dialogues, with emphasis on the "Apology" and "Gorgias." In addition to papers, each participant will make one presentation and lead one discussion. This course is limited to first-year students only; any others will be removed from this course. Cross-list: FSEM 101.

**CLAS 102 - INTRODUCTION TO THE HISTORY OF WESTERN ART I: PREHISTORIC TO GOTHIC**
- **Short Title:** INTRO TO HIST OF WESTERN ART I
- **Department:** Classical and European Studies
- **Grade Mode:** Standard Letter
- **Course Type:** Lecture
- **Distribution Group:** Distribution Group I
- **Credit Hours:** 4
- **Restrictions:** Graduate level students may not enroll.
- **Course Level:** Undergraduate Lower-Level
- **Description:** A survey of painting, sculpture, and architecture from Antiquity through the 15th century. Students will also attend a one-hour weekly tutorial with a teaching assistant. Cross-list: HART 101, MDEM 111.

**CLAS 103 - THE PARTHENON AND PERIKLEAN ATHENS**
- **Short Title:** THE PARTHENON
- **Department:** Classical and European Studies
- **Grade Mode:** Standard Letter
- **Course Type:** Seminar
- **Distribution Group:** Distribution Group I
- **Credit Hours:** 3
- **Restrictions:** Graduate level students may not enroll.
- **Course Level:** Undergraduate Lower-Level
- **Description:** In this course, we will trace the history and mythology of the Parthenon. We begin with the dawn of sacred tradition on the Acropolis, then explore the classical recreation of the city, the conversion of the Parthenon into a church, its subsequent destruction and the current debate over restoration. This course is limited to first-year students only, any others will be removed from this course. Cross-list: ARCH 110, FSEM 113, HART 110.

**CLAS 107 - GREEK CIVILIZATION AND ITS LEGACY**
- **Short Title:** GREEK CIVILIZATION & LEGACY
- **Department:** Classical and European Studies
- **Grade Mode:** Standard Letter
- **Course Type:** Seminar
- **Distribution Group:** Distribution Group I
- **Credit Hours:** 3
- **Restrictions:** Graduate level students may not enroll.
- **Course Level:** Undergraduate Lower-Level
- **Description:** This course will investigate central aspects of Roman civilization: politics, religion, law, oratory, private life, public entertainment, literature, and visual art and architecture. We will also examine the place of ancient Rome in the western imagination, and the influence of ancient Rome on later politics, literature, and art. Cross-list: HUMA 111.

**CLAS 108 - ROMAN CIVILIZATION AND ITS LEGACY**
- **Short Title:** ROMAN CIVILIZATION &ITS LEGACY
- **Department:** Classical and European Studies
- **Grade Mode:** Standard Letter
- **Course Type:** Seminar
- **Distribution Group:** Distribution Group I
- **Credit Hours:** 3
- **Restrictions:** Graduate level students may not enroll.
- **Course Level:** Undergraduate Lower-Level
- **Description:** This course will investigate central aspects of Roman civilization: politics, religion, law, oratory, private life, public entertainment, literature, and visual art and architecture. We will also examine the place of ancient Rome in the western imagination, and the influence of ancient Rome on later politics, literature, and art. Cross-list: HUMA 111.

**CLAS 179 - ROMAN VS GREEK: QUESTIONING THE DEFINITION OF ART IN THE ANCIENT MEDITERRANEAN WORLD**
- **Short Title:** ROMAN VS GREEK
- **Department:** Classical and European Studies
- **Grade Mode:** Standard Letter
- **Course Type:** Seminar
- **Distribution Group:** Distribution Group I
- **Credit Hours:** 3
- **Restrictions:** Graduate level students may not enroll.
- **Course Level:** Undergraduate Lower-Level
- **Description:** What's in a name? Apparently a lot. For 500 years--since the Renaissance--scholars have cleaved Roman and Greek art from one another and this division has defined how we think about art in antiquity. In this freshman seminar, we will question this paradigm. Looking at art from around the Mediterranean and reading the very scholarship that has both created these definitions and questioned them, we will work toward a new way of conceiving the art of the Ancient Mediterranean world. This course is limited to first-year students only, any others will be removed from this course. Cross-list: FSEM 179, HART 179.
CLAS 201 - HISTORY OF PHILOSOPHY I
Short Title: HISTORY OF PHILOSOPHY I
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of the major philosophers and philosophical systems of ancient Greece, from Parmenides to the Stoics. Cross-list: MDEM 201, PHIL 201.

CLAS 205 - GREEK TRAGEDY IN TRANSLATION
Short Title: GREEK TRAGEDY IN TRANSLATION
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Participants draft short papers (3 pp. double-spaced) weekly and read them aloud in class to receive constructive criticism. A different Greek play provides the focus for discussion and writing each week. No secondary literature, exams or quizzes. The final paper is a revised and extended version of a previously written draft.

CLAS 207 - LOVE LIFE IN CLASSICAL ANTiquITY
Short Title: LOVE LIFE IN ANTiquITY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Love, sex, marriage and eroticism were important aspects of ancient Greek and Roman culture as they are of our own, though they were sometimes conceived of very differently. In this course we will consider the evidence for various aspects of sexual relationships in poetry, art, inscriptions, philosophy, and more.

CLAS 210 - HOMER AND VIRGIL AND THEIR RECEPTION
Short Title: HOMER AND VIRGIL
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course reads Homer’s ILLIAD and ODYSSEY and Virgil’s AENEID in translation. Topics include the nature of oral poetry, the history of the epic genre, Virgilian intertextuality, the cultural and political contexts in which the poems arose, and case studies in the poets’ reception.
Course URL: classicallegacy.rice.edu

CLAS 218 - CITIES, SANCTUARIES, CIVILIZATIONS: INTRODUCTION TO GREEK ART AND ARCHAEOLOGY
Short Title: GREEK ART AND ARCHAEOLOGY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An introduction to the art and archaeology of the ancient Greek world. Artistic media, such as sculpture and vase painting will be examined in a broad range of the material culture ancient Greeks created and used. Consideration of these materials within their cultural, social and religious contexts will be discussed. Cross-list: HART 216.

CLAS 219 - OLD ENGLISH: READINGS IN BEOWULF
Short Title: OLD ENGLISH
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: We will read selections from Beowulf in the original Old English, and discuss its literary and historical importance. No prior knowledge of Old English required.

CLAS 225 - WOMEN IN GREECE AND ROME
Short Title: WOMEN IN GREECE AND ROME
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of the depiction of women in Greek and Roman mythology, literature, and art. Includes a study of the lives of Greek and Roman women as evidenced by archaeological as well as literary materials. Cross-list: SWGS 225.
Course URL: classicallegacy.rice.edu/

CLAS 235 - CLASSICAL MYTHOLOGY: INTERPRETATION, ORIGINS, AND INFLUENCE
Short Title: CLASSICAL MYTHOLOGY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: We will read and analyze some of the most influential Greek myths (including their parallels and permutations in other cultures). Employing insights from a variety of theoretical approaches to myth, we will identify typical story patterns, characters, and events, and the values, anxieties, and aspirations for which they stand.
Course URL: classicallegacy.rice.edu
CLAS 236 - ART AND POLITICS IN ANCIENT ROME
Short Title: ART & POLITICS IN ANCIENT ROME
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In this course, you will learn to navigate the testy waters of artistic and political design in ancient Rome, when monumental architecture and exquisite art was often created for personal gain. Throughout the semester we will explore how would-be rulers used visual culture for professional self-aggrandizement. Cross-list: HART 214.

CLAS 237 - ARISTOTLE'S POETICS IN ANCIENT GREEK TRAGEDY AND MODERN FILM
Short Title: ARISTOTLE'S POETICS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Aristotle's seminal account of tragic drama still intrigues screenwriters, theatre students, and literary scholars - who often disagree about its interpretation and relevance. In this discussion-based course we will read the Poetics closely (in translation), compare specific Greek tragedies with Aristotle's model, and evaluate the model's usefulness for modern film criticism.

CLAS 238 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Internship/Practicum, Lecture, Seminar
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Topics and credit hours may vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.

CLAS 301 - ANCIENT AND MEDIEVAL PHILOSOPHY
Short Title: ANCIENT & MEDIEVAL PHILOSOPHY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Topics in the history of philosophy from the 4th century B.C. through the 14th century. Graduate students require permission of instructor. Cross-list: MDEM 301, PHIL 301. Mutually Exclusive: Credit cannot be earned for CLAS 301 and MDEM 481. Repeatable for Credit.

CLAS 309 - THE DAWN OF ROME: GENERATING THE URBAN, SOCIAL AND POLITICAL LIFE OF THE ETERNAL CITY
Short Title: THE DAWN OF ROME
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This interdisciplinary course examines the development of the concept of "paganism" in the Roman empire during the first through seventh centuries AD. We will examine the mutually tolerant character of the many religions of the Roman world and see how the category of paganism was invented and applied by Christians to all the polytheists of the empire and beyond. Cross-list: HIST 316.

CLAS 316 - DEMOCRACY AND POLITICAL THEORY IN ANCIENT GREECE
Short Title: DEMOCRACY & POLITICAL THEORY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The Greeks created political society and studied political society in order to understand and improve it. One particular form of political society, democracy, reached its pinnacle in Athens. We shall attempt to understand how ancient Greeks thought about politics from the rudimentary beginnings in Homer to the complex, incisive arguments of Aristotle. Cross-list: PLST 316.

CLAS 317 - THE SELF IN GREEK AND ROMAN THOUGHT
Short Title: SELF IN GREEK&ROMAN THOUGHT
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores conceptions of the self from Homer to Augustine of Hippo, focusing especially on views of the mind or soul and its relation to the body, thought or reason and its relation to desire, human agency and responsibility, and the individual self in relation to others.

CLAS 318 - THE INVENTION OF PAGANISM IN THE ROMAN EMPIRE
Short Title: INVENTION OF PAGANISM
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This interdisciplinary course examines the development of the concept of "paganism" in the Roman empire during the first through seventh centuries AD. We will examine the mutually tolerant character of the many religions of the Roman world and see how the category of paganism was invented and applied by Christians to all the polytheists of the empire and beyond. Cross-list: HIST 316.

</table>
CLAS 417 - ARCHITECTURE AND DYNASTIC ASPIRATION IN THE EARLY ROMAN EMPIRE
Short Title: ARCH AND DYNASTIC ASPIRATIONS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Nero is often remembered as the tyrannical emperor who let the city burn and gorged on ill-gotten luxury; his successors are conceived as good emperors who built the Coliseum, Imperial Palace and the vast majority of Rome's remaining monuments. In this course you will question whether things were so straightforward. Cross-list: HART 410.

CLAS 477 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Internship/Practicum, Lecture, Laboratory, Seminar
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Topics and credit hours may vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.

CLAS 482 - CAESAR'S PALACE: AUTHOR(ITY) AND MEANING IN THE ROMAN IMPERIAL RESIDENCE
Short Title: CAESAR'S PALACE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Described as both a "Hall of Despotism" and a "Citadel of Majesty," the palace of the Roman emperors is one of the great enigmas of antiquity. Its vast remains (larger than Versailles) are relatively well preserved, but it is poorly understood as part of the concept of emperorsip. In this course we will examine the palace within the context of Imperial Roman art and politics; then we will dissect its meaning(s), the intentions of those who created it, and generally deconstruct it, brick by brick, to question agency and spatial experience from a macro-historical perspective. Cross-list: HART 410.

CLAS 492 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Open to Classical Studies majors in their final year. Thesis, approximately 7,500-15,000 words (30-60 pages), on a topic of the student's choice in consultation with a faculty member. CLAS 493 and CLAS 494 form a two semester sequence. Requirements for 493 include a detailed prospectus with annotated bibliography. Instructor Permission Required.

CLAS 494 - SENIOR THESIS
Short Title: SENIOR THESIS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Senior.
Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CLAS 493
Description: Continuation of CLAS 493. Open to Classical Studies majors in their final year. Thesis, approximately 7,500-15,000 words (30-60 pages), on a topic of the student's choice in consultation with a faculty member. Instructor Permission Required.

Cntr Lang & Intercultural Comm (CLIC)

CLIC 369 - INTERCULTURAL COMMUNICATION:IC LANGUAGE INTERACTION
Short Title: IC LANGUAGE IN INTERACTION
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ARAB 264 or CHIN 264 or FREN 264 or GERM 264 or HEBR 264 or HIND 264 or ITAL 264 or JAPA 264 or KORE 264 or PORT 264 or RUSS 264 or SPAN 264
Description: This course centers on the development of intercultural communicative competence in the context of learning a L2 with special focus on language uses, sociolinguistic strategies and structures of interactional discourses in spoken and written languages. This course is taught in English.
CLIC 385 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students will engage in an in depth study of topics related to language study and intercultural communication under the guidance of CLIC faculty. Topics will vary but will develop the students’ ability to communicate in the target language. Department Permission Required.

CLIC 399 - TEACHING PRACTICUM
Short Title: TEACHING PRACTICUM
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Gives students with advanced proficiency in a language taught at the Rice in Country programs the opportunity to acquire teaching and research experience in a study abroad setting. Students will facilitate class discussions in Rice in Country courses; collect, analyze and classify samples of interactional and sociolinguistic data in various settings. Meet regularly with supervising faculty member. Instructor Permission Required. Recommended Prerequisite(s): Experience in Rice in Country Progam. Repeatable for Credit.

Cognitive Sciences (CSCI)

CSCI 390 - SUPERVISED RESEARCH IN COGNITIVE SCIENCES
Short Title: SUPERV RESRCH COGNITIVE SCI
Department: Cognitive Sciences
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Supervised research on topics relevant to the cognitive sciences. Limited to majors in Cognitive Sciences. Instructor Permission Required. Repeatable for Credit.

CSCI 481 - HONORS PROJECT
Short Title: HONORS PROJECT
Department: Cognitive Sciences
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent directed research toward preparation of an undergraduate honors project or thesis. Instructor Permission Required. Repeatable for Credit.

College Course (COLL)

COLL 108 - SURVIVOR: STRATEGIES AND SOCIAL IMPLICATION (SID RICH)
Short Title: SURVIVOR: SOCIAL STRATEGIES
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survivor: Strategies and Social Implications asks students to reflect back on the successful and unsuccessful strategies used in the show “Survivor” and relevant scholarly psychological papers and apply them in practicing social interaction and interpreting world conflicts and solutions in real life.

COLL 116 - INTRO TO CANTONESE AND CULTURE (MARTEL)
Short Title: INTRO TO CANTO AND CULTURE
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will teach students the fundamentals of Cantonese, including basic expressions, greetings, grammar patterns and essential words used by the native speakers. This course will primarily focus on the speaking of Cantonese.

COLL 117 - WIKIPEDIA EMPOWERMENT KNOWLEDGE (MARTEL)
Short Title: WIKIPEDIA EMPOWERMENT KNOWLGD
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will teach students about the politics of information and allow them a first-hand opportunity to use Wikipedia to expand informational access for the world while simultaneously researching an individual academic passion. Students will learn about the roots of inequalities in access to information and write several reflective papers.

COLL 125 - VITICULTURE AND VINICULTURE: THE SHAPING FORCES BEHIND WINE (MCMURTRY)
Short Title: VITICULTURE AND VINICULTURE
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course addresses the impact of viticulture and viniculture on wine. To ground our discussions in real-world examples, we will taste and compare important regionally distinct wines. As we explore the choices involved in winemaking, students will also determine how a wine’s attributes suit it to pairing with certain foods. Students must be 21+.
COLL 126 - INTERNSHIPS, INTERVIEWS AND MORE: COMMUNICATION FOR YOUR CAREER (HANSZEN)
Short Title: INTERNSHIPS, INTERVIEWS & MORE
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course focuses on basic career skills. The majority of class time is dedicated for students to practice career skills with their peers. Students will conduct mock interviews and developed their resumes. This course is intended for students without previous experience going through the interview process.

COLL 127 - SEAFOOD FOR THOUGHT: A FISHY INVESTIGATION OF MARINE RESOURCE USE (MCMURTRY)
Short Title: SEAFOOD FOR THOUGHT
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will examine contemporary issues in marine science as they relate to the seafood industry and associated resource use sectors. In other words, what kind of relationships do individuals and societies have to the ocean through diet, and how does that translate to effective conservation efforts?

COLL 128 - BOARD GAME THEORY (DUNCAN)
Short Title: BOARD GAME THEORY
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will focus on becoming a beatboxer, and will include a brief history of beatbox and the basic music theory behind it. Students will study the social and musical contexts of beatbox, analyze old school, new school, and battle beatbox, and learn beatbox techniques.

COLL 129 - WHAT'S THE CRAIC: CULTURAL LANDSCAPES OF IRELAND (JONES)
Short Title: INTRO TO IRISH CULTURE
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course is an introduction to how cultural landscapes define Ireland. Topics will include music, mythology, language, food, and pubs, among others. The course will help students develop a framework to evaluate the anthropological concept of culture, specifically through studying the Emerald Isle.

COLL 130 - THE LANGUAGE AND CULTURE OF THE CHINESE RESTAURANT IN THE UNITED STATES (LOVETT)
Short Title: RESTAURANT CHINESE
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will develop the reading and speaking skills necessary to read, understand and order most common items on a Chinese restaurant's menu, as well as understand the cultural background of regional cuisines, festival foods. No prior experience Chinese experience required. Includes trip to a Chinatown restaurant.

COLL 131 - NARRATIVE IN INTERACTIVE MEDIA: THE MECHANICS OF STORYTELLING IN VIDEO GAMES (MCMURTRY)
Short Title: NARRATIVE IN INTERACTIVE MEDIA
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: How does one convey narrative in an inherently interactive medium? In this course, students will engage with video games through an analytical lens to explore how game designers use mechanics, content, and the mind of the player to shape a game's central thesis.

COLL 132 - BEATS BY YOU: AN INTRODUCTION TO BEATBOXING (BROWN)
Short Title: INTRO TO BEATBOX
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will focus on becoming a beatboxer, and will include a brief history of beatbox and the basic music theory behind it. Students will study the social and musical contexts of beatbox, analyze old school, new school, and battle beatbox, and learn beatbox techniques.

COLL 133 - HOW THE WEB WORKS: AN INTRODUCTION TO INTERNET TECHNOLOGIES (MARTEL)
Short Title: HOW THE WEB WORKS
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This class will present modern internet technologies in the context of a user, rather than a developer. The skills and knowledge learned in the class will culminate in the design and publication of a resume website. The course is designed for students with no prior experience and limited knowledge.
Students will analyze the reality television show The Bachelor, and recognize how this idealized vision of romance influences an individual's journey to find love. Students will consider and think critically about the question: How do modern ideals of romance, as portrayed by the media, influence everyday dating patterns?
COLL 144 - WEB APP DEVELOPMENT FOR NON-MAJORS (DUNCAN)
Short Title: WEB DEV FOR NON-MAJORS
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course explores topics in web-based app development with an emphasis on front-end. By the end of the course, students will have an understanding of how web-based applications function and the knowledge necessary to build simple applications. This course is only for students not intending to major in CS/ECE.

COLL 145 - FROM RENT TO HAMILTON: SOCIAL ISSUES IN MODERN MUSICALS (BROWN)
Short Title: SOCIAL ISSUES MODERN MUSICALS
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Through analysis of recent productions (such as Next to Normal, Billy Elliot, and Hamilton), students will explore how the Broadway musical's storytelling conventions and contemporary cultural and commercial contexts inform its representation of race, class, gender, disability, and social change. No previous music or theater experience needed.

COLL 146 - HUMAN CENTERED DESIGN FOR SOCIAL IMPACT: CREATING IMPACTFUL CHANGE IN HOUSTON, TX (BROWN)
Short Title: DESIGN FOR SOCIAL IMPACT
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will provide students with biological information on stem cells, furthering their knowledge of human biology. Students will also be introduced to current research and clinical trials being done in the field, through guest lectures from TMC, and encouraged to analyze the validity of sensationalist news articles.

COLL 147 - UNDERSTANDING THE FEDERALIST PAPERS (DUNCAN)
Short Title: THE FEDERALIST PAPERS
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The object of this course is to read the papers, understand the context in which they were written, and the significance that the work has in a broader sense. Really, all we want to know is, what were the Federalist Papers and in how are they applicable to government today?

COLL 148 - THE MEMES OF PRODUCTION: INVESTIGATING THE SOCIAL PHENOMENON OF INTERNET MEMES (DUNCAN)
Short Title: THE MEMES OF PRODUCTION
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Internet culture has largely adopted meme usage as an avenue of communication, a rallying point for communities, and a way to express personal humor. In this course, we will bridge the gap between academic and popular discourse on internet memes by studying the interdependence between meme culture and society.

COLL 149 - INTRODUCTION TO STAND-UP COMEDY (HANSZEN)
Short Title: INTRO TO STAND UP
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: We will be studying famous comedians such as Aziz Ansari, Bo Burnham, and Sarah Silverman to analyze their technical aspects and their critical analysis of society. We will ask: What does it mean to be funny? We will apply what we learn to create our own stand-up comedy sets.

COLL 150 - STEM CELL BIOLOGY AND RESEARCH (HANSZEN)
Short Title: STEM CELL BIOLOGY & RESEARCH
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will provide students with biological information on stem cells, furthering their knowledge of human biology. Students will be introduced to current research and clinical trials being done in the field, through guest lectures from TMC, and encouraged to analyze the validity of sensationalist news articles.

COLL 151 - REALITY TV AND THE MODERN MIND (HANSZEN)
Short Title: REALITY TV AND THE MODERN MIND
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Are reality TV shows merely mindless entertainment, or can we use them to better understand our own desires, actions, and motivations? This course delves into ten reality TV shows, supplemented by class discussions and short academic articles. Students will become critical consumers of reality TV and the ideas it purports.
COLL 152 - MAPPING DANCE ACROSS SOUTH ASIA (HANSZEN)
Short Title: DANCE ACROSS SOUTH ASIA
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will study dance vignettes across South Asia and how dance reflects historical alterations in South Asian society. Students will analyze the intricate political and economic history of South Asians portrayed in a dance framework through case studies of regional dances from both a performer and audience standpoint.

COLL 153 - SOCIALIZATION THROUGH SPORTS: HOW SPORTS SHAPE WHO WE ARE (HANSZEN)
Short Title: SOCIALIZATION THROUGH SPORTS
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This seminar investigates the social function of sports, its importance to society, and how sports shape our understanding of self and others. Readings and viewings address sports as it relates to social theory, youth and aging, identity formation, high school and college, race, class, gender, deviance, bodily capital, activism.

COLL 154 - INSIGHTS INTO MODERN ANIME: A CHARACTER STUDY (HANSZEN)
Short Title: INSIGHTS INTO MODERN ANIME
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will study dance vignettes across South Asia and how dance reflects historical alterations in South Asian society. Students will analyze the intricate political and economic history of South Asians portrayed in a dance framework through case studies of regional dances from both a performer and audience standpoint.

COLL 155 - PERFORMING THE CLASSICAL ARTS OF SOUTH INDIA (WIESS/LOVETT)
Short Title: SOUTH INDIAN PERFORMING ARTS
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Performing arts are part of a long-standing tradition in South Indian communities for expressing identity, faith, mythology, and social issues. This course examines the performance of classical arts, specifically Carnatic music and bharathanatyam dance. Students will choose avenues of performance (dance/vocal/instrumental) to develop, culminating in a short group piece.

COLL 156 - KNITS AND PIECES (JONES)
Short Title: KNITS AND PIECES
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Ready, set, cast on! Through beginner projects, tutorials, and knitting circles, master the basic components of knitting and learn how to tackle any pattern. Weekly practice, along with discussions on the cultural relevance and benefits of knitting, will build your skills and appreciation for this yarn art.

COLL 157 - THE ART OF MAKING A VISUAL NOVEL (MCMURTRY)
Short Title: VISUAL NOVEL ANALYSIS
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Visual novels are the chimera children of books, comics, movies, and choose-your-own-adventures. Through playing a variety of visual novels, students will analyze the anatomy of the visual novel for how components work together to seize the reader’s attention and make it stand out among others.

COLL 158 - HOW MUSIC PLAYS THE BRAIN - THE NEUROSCIENCE OF A UNIVERSAL HUMAN OBSESSION (LOVETT)
Short Title: HOW MUSIC PLAYS THE BRAIN
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: What can music teach us about the human brain? In this course, students will examine music through the lens of neuroscience by studying how music influences human behavior and brain function. Students will constantly be engaged in dialogues between an age-old art and a budding field of science.

COLL 159 - POLICY AND THE PATIENT: UNDERSTANDING AND CRAFTING HEALTH POLICY (WILL RICE)
Short Title: POLICY AND THE PATIENT
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: What differentiates an effective health policy from a failed one? How does policy drive decisions in medicine at the local, state and national levels? Students will explore contemporary health policies across the world, and craft their own policy proposal to address a specific issue in healthcare. No prior knowledge necessary!
COLL 160 - SCREWTAPE AND THE ART OF SELF-REFLECTION
(HANSZEN)
Short Title: SCREWTAPE AND SELF-REFLECTION
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Why do I do the things I do, and how does it affect who I am and who I will be? In this class, students interact with C.S. Lewis’ The Screwtape Letters, short articles, classmates, and pens on a self-reflective, psychological, and spiritual journey into their own minds and souls.

COLL 161 - TAELOA’S DECLASSIFIED, FITNESS SURVIVAL GUIDE (HANSZEN)
Short Title: FITNESS PROGRAMMING
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Students will acquire the knowledge necessary for creating effective workout and nutrition programs intended to achieve various fitness goals including general health, endurance improvement, muscle gain, and strength gain.

COLL 162 - NARRATIVE THEORY OF DISNEY (BAKER)
Short Title: DISNEY & NARRATIVE THEORY
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to narrative theory using Disney films as explanatory texts. Each week we will examine the narrative inner-workings of a different Disney animated film, discussed in conjunction with the history of the corporation, our experiences with the Disney brand, and our own storytelling intuitions.

COLL 163 - CONTEMPORARY SOCIAL MOVEMENTS (MCMURTRY)
Short Title: CONTEMPORARY SOCIAL MOVEMENTS
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course is about the social and political conditions recent social movements respond to, and how they respond using legal, media, or protest tactics.

COLL 164 - CRITICISM AND PROFESSIONAL WRESTLING (SID RICH)
Short Title: CRITICISM AND PRO WRESTLING
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will introduce students to professional wrestling from an academic standpoint. Students will learn to think and write critically about wrestling through various academic lenses, including philosophy, psychology, race, gender, sexuality, and drama.

COLL 165 - SKATEBOARDING ON FILM (MARTEL)
Short Title: SKATEBOARDING ON FILM
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will explore the intersections of skateboarding and film through watching skate films from the past 30 years and learning how to skate (with optional skate park field trips). Films will explore themes of gender, coming of age, invention, creativity, and counter culture. Final project will be an original skate film.

COLL 166 - X-MEN AS SOCIAL COMMENTARY (MCMURTRY)
Short Title: X-MEN AS SOCIAL COMMENTARY
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: X-Men is a Marvel comic book series featuring allegorical depictions of discrimination and "otherness", such as the 60's Civil Rights Movement, the Holocaust, and homophobia. Students will read highlights from X-Men's 50 years of publication and related essays, as well as contemplate the ethics and occasional hypocrisy of such depictions.

COLL 167 - ISSA CLASS: HISTORY OF HIP HOP (JONES)
Short Title: THE HISTORY OF HIP HOP
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will examine the development of hip-hop and its power to create counternarratives to the prevailing misrepresentations of oppressed groups. Students will analyze primary and secondary sources to examine the arc of hip hop in America.
COLL 175 - DREAMWORK THROUGH DOTA (WILL RICE)
Short Title: DREAMWORK THROUGH DOTA
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Dreamwork through Dota presents a long-term group project that focuses on building a team dynamic, and offering numerous opportunities for teams to test what they have learned. Students will be assigned to teams of five and learn, as a team, to play Dota 2, an arena free-to-play "e-sport" that is conceptually very similar to traditional sports like soccer and basketball. This course will provide a low-pressure environment for all students (regardless of prior gaming experience) to become comfortable communicating with others and working in groups.

COLL 179 - GETTING SCHOOLED: COLLEGE SOCIAL CULTURE (WILL RICE)
Short Title: COLLEGE SOCIAL CULTURE
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This class will study the college social experience primarily through the disciplines of sociology and history. Students will examine how perceptions and reality of college life differ. The class will ultimately seek to help students understand their own experiences better by discovering the context behind them in an academic manner.

COLL 187 - AN INTRODUCTION TO THE MODERN GREEK LANGUAGE (MCMURTRY)
Short Title: INTRODUCTION TO MODERN GREEK
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course is designed to teach students the fundamentals of speaking, reading, and writing Modern Greek. The course will cover the Greek alphabet, pronunciation, and basic expressions. Further, it will cover useful vocabulary for various situations including family, food, restaurants, shopping, etc. Simple grammatical concepts will also be discussed.

COLL 189 - CRITICAL THINKING IN FEMALE SEXUALITY (WILL RICE)
Short Title: FEMALE SEXUALITY
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: While sex and sexuality are ubiquitous, female sexuality remains less understood. This class integrates biology, psychology, history and sociology to explore the nuances of female sexuality. Students will be encouraged to think critically about female sexuality by applying their findings across various disciplines.

COLL 193 - LEARNING THE GUITAR - THEORY, TECHNIQUE, AND PRACTICE (MARTEL)
Short Title: GUITAR THEORY
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The guitar is one of the most popular and versatile instruments and is used extensively in popular music. Students will learn the basic essentials in theory and technique necessary to play modern popular music, write original music, and solo over diatonic chord progressions.

COLL 198 - HANDS-ON ELECTRONICS (BROWN)
Short Title: HANDS-ON ELECTRONICS
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: What is inside an electronic device and how does it work? Upon completion, students will be able to interpret electronic datasheets and design and fabricate their own simple electronic devices. Students will work on an electronic device disassembly project and a final creative reconstruction project. No prior electronics experience required.

COLL 199 - APPLIED PEER LEADERSHIP AND ORGANIZATIONAL DEVELOPMENT
Short Title: APPLIED PEER LEADERSHIP
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Course Level: Undergraduate Lower-Level
Description: This class is designed to assist O-Week Coordinators in the critique, design, development and execution of a comprehensive presentation and new student transition program for freshmen and transfer students. Instructor Permission Required.

COLL 200 - TEACHING PRACTICUM
Short Title: TEACHING PRACTICUM
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Internship/Practicum
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Student instructors gain mastery of their subject of interest by practical application in teaching a course. Students are supervised by the faculty sponsor as approved by the Dean of Undergraduates. Students must have taken COLL 300 in developing the course. Instructor Permission Required. Repeatable for Credit.
COLL 201 - INTRODUCTION TO LAW (LOVETT)
Short Title: INTRODUCTION TO LAW
Department: College Courses
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This class is to introduce students to the legal system. This class should give them a preview of what life is like for first year law students. It will include classes from first year law, including the basic principles of Tort, Contract, Criminal, and Criminal Procedure Law.

COLL 202 - COOKING WITH CHEF ROGER (DUNCAN)
Short Title: COOKING WITH CHEF ROGER
Department: College Courses
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Cooking with Chef Roger teaches the students the fundamentals of cooking and help them to cook healthy delicious meals. The class also gives the students a clear idea about shopping for fresh ingredients and how to host successful parties. Students must pay a $50.00 fee on the first day of class. The second week of classes is the last day to withdraw with a refund.

COLL 203 - CYBERCRIME (LOVETT)
Short Title: CYBERCRIME
Department: College Courses
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This class will introduce students to the current issues in cybercrime. It will include topics such as auction fraud, hacking, and identity theft. Students will read and discuss the statutes and cases that govern each area. Each class will have a fact scenario that will be analyzed using Federal and State law.

COLL 204 - PRACTICAL APPROACH TO PERSONAL FINANCE (HANSZEN)
Short Title: PERSONAL FINANCE
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Basic introduction to the framework for making informed personal financial decisions. Prior knowledge of accounting or finance is not required. The course will provide a practical approach to personal finance. Topics will include budgeting, tax issues, banking services, use of credit, housing selection and ownership, investments, insurance, retirement planning and legal documents.

COLL 212 - BLACK MEN WRITING ABOUT THEIR WORLD: DU BOIS, BALDWIN, AND THEIR HEIRS (WIESS)
Short Title: BLACK MEN WRITING
Department: College Courses
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: For Black men, what good are essays? This course explores the writerly activism, historical imagination, and the consequence of some of the best known work of W.E.B. Du Bois, James Baldwin, and several of their 21st century heirs. Taking cues from the subjects of the course, students will also get ample practice using the essay as a way to describe, analyze, and affect the contemporary black male condition. Permission of Instructor required. Instructor Permission Required.

COLL 217 - BUSINESS WORKSHOP FOR HUMANITIES STUDENTS (BAKER)
Short Title: BUSINESS WRKSHP F HUM STUDENTS
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Companies are looking for candidates with the skills that Humanities students develop at Rice. This workshop provides an overview of how businesses work, which career prospects provide the most opportunity, and how to interview successfully.

COLL 218 - TO SERVE: LIVING A LIFE OF PUBLIC AND CIVIC SERVICE (BAKER)
Short Title: TO SERVE:PUBLIC &CIVIC SERVICE
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level

COLL 299 - SCIENTIA: LECTURES IN SCIENCE AND CULTURE
Short Title: SCIENTIA SCIENCE & CULTURE
Department: College Courses
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Course Level: Undergraduate Lower-Level
Description: Annual lecture series, panel discussions and discussion talks on topics bridging science, culture and art. 4 lectures plus 2 discussion talks. Lectures are on specified dates, usually Tuesdays. Discussion talks scheduled at semester beginning. Topics vary year to year. Cross-list: UNIV 299. Repeatable for Credit.
**Communication (COMM)**

**COLL 300 - PEDAGOGY FOR STUDENT INSTRUCTORS**
*Short Title:* PEDAGOGY FOR STDNT INSTRUCTORS  
*Department:* College Courses  
*Grade Mode:* Standard Letter  
*Course Type:* Lecture/Laboratory  
*Credits Hours:* 1  
*Restrictions:* Graduate level students may not enroll.  
*Description:* In the first three weeks we will guide each student in the development of a proposal for a Student Taught Course. In the remaining four weeks we will learn and practice techniques of effective instruction.  
*Course URL:* [www.caam.rice.edu/~cox/coll300](http://www.caam.rice.edu/~cox/coll300)

**COMM 300 - COMMUNICATION IN THE DIGITAL AGE**
*Short Title:* COMMUNICATION IN DIGITAL AGE  
*Department:* Ctr Communication Excellence  
*Grade Mode:* Standard Letter  
*Course Type:* Lecture  
*Credits Hours:* 3  
*Restrictions:* Graduate level students may not enroll.  
*Description:* Students will develop writing skills by maintaining a blog, generating Webpage content, and using social media. We will also produce video and audio content while remaining aware of how the form of the work impacts its content.

**COMM 415 - MEDICAL COMMUNICATION**
*Short Title:* MEDICAL COMMUNICATION  
*Department:* Ctr Communication Excellence  
*Grade Mode:* Standard Letter  
*Course Type:* Lecture  
*Credits Hours:* 3  
*Restrictions:* Enrollment limited to students with a class of Junior or Senior. Graduate level students may not enroll.  
*Description:* This course introduces students to key issues, theories, and debates related to medical communication, while also helping students develop and reflect on their own communication strategies, and skills as future health care professionals. Sophomores and Freshmen who have fulfilled Rice’s First-year Writing-Intensive Seminar requirement for graduation may register by a Special Registration Form. Recommended Prerequisite(s): Successfully completed one course, FWIS 101 to 199, to fulfill the Rice’s First-year Writing-Intensive Seminar requirement for graduation.

**Comp. & Applied Mathematics (CAAM)**

**CAAM 210 - INTRODUCTION TO ENGINEERING COMPUTATION**
*Short Title:* INTRO TO ENG COMPUTATION  
*Department:* Computational & Applied Math  
*Grade Mode:* Standard Letter  
*Course Type:* Lecture/Laboratory  
*Credit Hours:* 3  
*Restrictions:* Graduate level students may not enroll.  
*Description:* Modeling, Simulation, and Visualization via MATLAB. Numerical methods: Newton’s method in one and several dimensions. Gaussian elimination and optimization. Application to problems in science and engineering. Lectures are held Monday and Wednesdays. In a laboratory component held on Fridays, students work in small groups on computational projects led by a Rice Learning Assistant. Recommended Prerequisite(s): MATH 101.

**CAAM 335 - MATRIX ANALYSIS**
*Short Title:* MATRIX ANALYSIS  
*Department:* Computational & Applied Math  
*Grade Mode:* Standard Letter  
*Course Type:* Lecture  
*Credit Hours:* 3  
*Restrictions:* Graduate level students may not enroll.  
*Description:* Equilibria and the solution of linear systems and linear least squares problems. Dynamical systems and the eigenvalue problem with the Jordan form and Laplace transform via complex integration. Recommended Prerequisite(s): (MATH 212 or MATH 222) AND CAAM 210.

**CAAM 336 - DIFFERENTIAL EQUATIONS IN SCIENCE AND ENGINEERING**
*Short Title:* DIFF EQUATIONS SCI & ENG  
*Department:* Computational & Applied Math  
*Grade Mode:* Standard Letter  
*Course Type:* Lecture  
*Credit Hours:* 3  
*Restrictions:* Graduate level students may not enroll.  
*Description:* Classical and numerical solution techniques for ordinary and partial differential equations. Fourier series and the finite element method for initial and boundary value problems arising in diffusion and wave propagation phenomena. Recommended Prerequisite(s): (MATH 212 or MATH 222) AND CAAM 210.
CAAM 378 - INTRODUCTION TO OPERATIONS RESEARCH AND OPTIMIZATION
Short Title: INTRO TO O.R. AND OPTIMIZATION
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Formulation and solution of mathematical models in management, economics, engineering and science applications in which one seeks to minimize or maximize an objective function subject to constraints, including models in linear, nonlinear and integer programming; basic solution methods for these optimization models; problem solving using a modeling language and optimization software. Recommended Prerequisite(s): MATH 212 and (CAAM 335 OR MATH 211 OR MATH 355).

CAAM 415 - THEORETICAL NEUROSCIENCE: FROM CELLS TO LEARNING SYSTEMS
Short Title: THEORETICAL NEUROSCIENCE
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: We present the theoretical foundations of cellular and systems neuroscience from distinctly quantitative point of view. We develop the mathematical and computational tools as they are needed to model, analyze, visualize and interpret a broad range of experimental data. Cross-list: ELEC 488, NEUR 415. Graduate/Undergraduate Equivalency: CAAM 615. Recommended Prerequisite(s): CAAM 210 or MATH 211 or CAAM 335 or MATH 355. Mutually Exclusive: Credit cannot be earned for CAAM 415 and CAAM 615.

CAAM 416 - NEURAL COMPUTATION
Short Title: NEURAL COMPUTATION
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: How does the brain work? Understanding the brain requires sophisticated theories to make sense of the collective actions of billions of neurons and trillions of synapses. Word theories are not enough; we need mathematical theories. The goal of this course is to provide an introduction to the mathematical theories of learning and computation by neural systems. These theories use concepts from dynamical systems (attractors, oscillations, chaos) and concepts from statistics (information, uncertainty, inference) to relate the dynamics and functions of neural networks. We will apply these theories to sensory computation, learning and memory, and motor control. Students will learn to formalize and mathematically answer questions about neural computations, including "what does a network compute?", "how does it compute?", and "why does it compute that way?" Prerequisites: knowledge of calculus, linear algebra, and probability and statistics. Cross-list: ELEC 489, NEUR 416.

CAAM 423 - PARTIAL DIFFERENTIAL EQUATIONS I
Short Title: PARTIAL DIFFERENTIAL EQNS I
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level

CAAM 435 - DYNAMICAL SYSTEMS
Short Title: DYNAMICAL SYSTEMS
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Existence and uniqueness for solutions of ordinary differential equations and difference equations, linear systems, nonlinear systems, stability, periodic solutions, bifurcation theory. Theory and theoretical examples are complemented by computational, model driven examples from biological and physical sciences. Cross-list: MATH 435. Recommended Prerequisite(s): CAAM 210 AND MATH 212 AND (CAAM 335 OR MATH 355) AND (MATH 302 OR MATH 321).

CAAM 436 - PARTIAL DIFFERENTIAL EQUATIONS OF MATHEMATICAL PHYSICS
Short Title: PDE OF MATH PHYSICS
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Derivation and properties of solutions of the partial differential equations of continuum physics. Basic concepts of continuum mechanics, ideal fluids, Navier-Stokes equations, linear elasticity, acoustics, basic principles of thermodynamics, Newtonian heat flow, porous flow, Maxwell's equations, electrical circuits. Recommended Prerequisite(s): CAAM 336.
CAAM 440 - APPLIED MATRIX ANALYSIS
Short Title: APPLIED MATRIX ANALYSIS
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A second course in matrix analysis that presents advanced theoretical results alongside motivating applications. Topics include: properties of Hermitian, positive definite, nonnegative and stochastic matrices; Perron-Frobenius Theorem; spectral perturbation theory; singular value inequalities; generalized eigenvalue problems; functions of matrices; Lyapunov, Sylvester, and Riccati matrix equations. Applications include dynamical systems, control theory, and Markov chains.

CAAM 453 - NUMERICAL ANALYSIS I
Short Title: NUMERICAL ANALYSIS I
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CAAM 335 and CAAM 336
Description: Construction and application of numerical algorithms for root finding, interpolation and approximation of functions, quadrature, and the solution of differential equations; fundamentals of computer arithmetic; solution of linear systems, linear least squares problems, and eigenvalue problems via matrix factorizations; Newton and Newton-like methods for nonlinear systems of equations. Computer programming in MATLAB is required. Graduate/Undergraduate Equivalency: CAAM 450. Mutually Exclusive: Credit cannot be earned for CAAM 453 and CAAM 455.

CAAM 454 - NUMERICAL ANALYSIS II
Short Title: NUMERICAL ANALYSIS II
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Iterative methods for linear systems of equations including Krylov subspace methods; Newton and Newton-like methods for nonlinear systems of equations; Gradient and Newton-like methods for unconstrained optimization and nonlinear least squares problems; techniques for improving the global convergence of these algorithms; linear programming duality and primal-dual interior-point methods. Graduate/Undergraduate Equivalency: CAAM 554. Recommended Prerequisite(s): CAAM 453. Mutually Exclusive: Credit cannot be earned for CAAM 454 and CAAM 554.

CAAM 471 - LINEAR AND INTEGER PROGRAMMING
Short Title: LINEAR AND INTEGER PROGRAMMING
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Linear and integer programming involve formulating and solving fundamental optimization models widely used in practice. This course introduces the basic theory, algorithms, and software of linear and integer programming. Topics studied in the linear programming part include polyhedron concepts, simplex methods, duality, sensitivity analysis and decomposition techniques. Building on linear programming, the second part of this course introduces modeling with integer variables and solution methodologies in integer programming including branch-and-bound and cutting-plane techniques. This course will provide a basis for further studies in convex and combinatorial optimization. Graduate/Undergraduate Equivalency: CAAM 571. Recommended Prerequisite(s): CAAM 335 and CAAM 378 Mutually Exclusive: Credit cannot be earned for CAAM 471 and CAAM 571.

CAAM 480 - PEDAGOGY FOR CAAM 210 RICE LEARNING ASSISTANTS
Short Title: PEDAGOGY FOR RLAs
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is designed to support Rice Learning Assistants (RLAs) as they instruct their own lab sections of CAAM 210. Topics include analysis of computational science and engineering concepts, issues of problem-based learning (PBL), theories of learning, and fundamental teaching skills. Required for CAAM 210 RLAs. Instructor Permission Required. Repeatable for Credit.

CAAM 490 - UNDERGRADUATE RESEARCH PROJECTS
Short Title: UNDERGRAD RESEARCH PROJECTS
Department: Computational & Applied Math
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Semester-long undergraduate-level research on a topic in Computational and Applied Mathematics. Instructor Permission Required. Repeatable for Credit.
CAAM 495 - SENIOR DESIGN PROJECT I
Short Title: SENIOR DESIGN PROJECT I
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students engage in team-oriented year-long design projects that utilize modeling, analysis, and scientific computing skills to solve a problem motivated by an application in engineering or the physical, biological, or social sciences. Participants attend regular seminars addressing research techniques and effective written and verbal presentation of mathematics.

CAAM 496 - SENIOR DESIGN PROJECT II
Short Title: SENIOR DESIGN PROJECT II
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CAAM 495
Description: Continuation of CAAM 495. Seminars focus on the presentation of results from design groups and provide guidance on the composition of a substantial project report.

CAAM 498 - RESEARCH THEMES IN THE MATHEMATICAL SCIENCES
Short Title: RESEARCH THEMES IN MATH. SCI.
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A seminar course that will cover a selected theme of general research in the mathematical sciences from the perspectives of mathematics, computational and applied mathematics and statistics. The course may be repeated multiple times for credit. Cross-list: MATH 498, STAT 498. Graduate/Undergraduate Equivalency: CAAM 698. Mutually Exclusive: Credit cannot be earned for CAAM 498 and CAAM 698. Repeatable for Credit.

CAAM 501 - ANALYSIS I
Short Title: ANALYSIS I
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Real numbers, completeness, sequences and convergence, compactness, continuity, the derivative, the Riemann integral, fundamental theorem of calculus. Vector spaces, dimension, linear maps, inner products and norms, derivatives in R^d, inverse function theorem, implicit function theorem, multiple integration, change of variable theorem. Instructor Permission Required. Recommended Prerequisite(s): CAAM 501 Mutually Exclusive: Credit cannot be earned for CAAM 501 and CAAM 401.

CAAM 502 - ANALYSIS II
Short Title: ANALYSIS II
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Vector spaces of functions, sequences and series, convergence. Continuity and differentiability of functions of several variables, the derivative as a linear map, the contraction mapping principle, fundamental theorems on differential equations, multivariable integration, Stoke's theorem and relatives. Instructor Permission Required. Recommended Prerequisite(s): CAAM 501. Mutually Exclusive: Credit cannot be earned for CAAM 502 and CAAM 402.

CAAM 508 - NONLINEAR SYSTEMS: ANALYSIS AND CONTROL
Short Title: NONLINEAR SYSTEMS
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
CAAM 519 - COMPUTATIONAL SCIENCE I
Short Title: COMPUTATIONAL SCIENCE I
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Scientific programming using high level languages, including C, Fortran, and C++. Emphasis on use of numerical libraries. Basic techniques of project planning, source management, documentation, program construction, i/o, visualization. Object-oriented design for numerical computing. Recommended Prerequisite(s): (CAAM 210 and CAAM 335) or CAAM 453. Mutually Exclusive: Credit cannot be earned for CAAM 519 and CAAM 420.

CAAM 520 - COMPUTATIONAL SCIENCE II
Short Title: COMPUTATIONAL SCIENCE II
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CAAM 420 or CAAM 519
Description: Theory and application of the message passing interface for programming scientific computing applications. Introduction to the architecture and programming of multicore and massively parallel processors, including general purpose graphics processing units, Insight for designing efficient numerical algorithms to improve parallelization of memory access and utilization of non-uniform memory architectures. Application interfaces include OpenMP, MPI, CUDA, OpenCL, and parallel numerical algorithm libraries. Instructor Permission Required. Recommended Prerequisite(s): CAAM 420.

CAAM 523 - PARTIAL DIFFERENTIAL EQUATIONS I
Short Title: PARTIAL DIFFERENTIAL EQNS I
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

CAAM 536 - NUMERICAL METHODS FOR PARTIAL DIFFERENTIAL EQUATIONS
Short Title: NUMERICAL METHODS FOR PDES
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers various numerical methods for solving partial differential equations: aspects of finite difference methods, finite element methods, finite volume methods, mixed methods, discontinuous Galerkin methods, and meshless methods. Both theoretical convergence and practical implementation of the methods are studied for elliptic and parabolic problems. May receive credit for only one of the following courses: CAAM 452/CEVE 455/CAAM 536/CEVE 555. Cross-list: CEVE 555. Recommended Prerequisite(s): CAAM 336 Mutually Exclusive: Credit cannot be earned for CAAM 536 and CAAM 452.

CAAM 540 - APPLIED FUNCTIONAL ANALYSIS
Short Title: APPLIED FUNCTIONAL ANALYSIS
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CAAM 402 or CAAM 502
Description: Hilbert spaces, Banach spaces, spectral theory, and weak topologies with applications to signal processing, control, and partial differential equations. Biennial; Offered in Odd Years. Recommended Prerequisite(s): CAAM 402 and MATH 322.

CAAM 550 - NUMERICAL ANALYSIS I
Short Title: NUMERICAL ANALYSIS I
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CAAM 402 or CAAM 502
Description: This course covers various numerical methods for solving partial differential equations: aspects of finite difference methods, finite element methods, finite volume methods, mixed methods, discontinuous Galerkin methods, and meshless methods. Both theoretical convergence and practical implementation of the methods are studied for elliptic and parabolic problems. May receive credit for only one of the following courses: CAAM 452/CEVE 455/CAAM 536/CEVE 555. Cross-list: CEVE 555. Recommended Prerequisite(s): CAAM 336 Mutually Exclusive: Credit cannot be earned for CAAM 536 and CAAM 452.
CAAM 553 - ADVANCED NUMERICAL ANALYSIS I
Short Title: ADV NUMERICAL ANALYSIS I
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Prerequisite(s): CAAM 401 (may be taken concurrently) or CAAM 501 (may be taken concurrently)
Description: Construction and analysis of numerical algorithms for root finding, interpolation and approximation of functions, quadrature, and the solution of differential equations; fundamentals of computer arithmetic; solution of linear systems, least squares problems, and eigenvalue problems via matrix factorizations; the singular value decomposition (SVD) and basic sensitivity analysis. Computer programming in MATLAB is required. This course covers fewer topics than CAAM 453 with greater theoretical depth. Prerequisite CAAM 501 may be taken concurrently with CAAM 553. Instructor Permission Required.

CAAM 554 - NUMERICAL ANALYSIS II
Short Title: NUMERICAL ANALYSIS II
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers the same lecture material as CAAM 454, but fosters greater theoretical sophistication through more challenging problem sets and exams. Graduate/Undergraduate Equivalency: CAAM 454. Recommended Prerequisite(s): CAAM 550 or CAAM 553. Mutually Exclusive: Credit cannot be earned for CAAM 554 and CAAM 454.

CAAM 560 - OPTIMIZATION THEORY
Short Title: OPTIMIZATION THEORY
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Derivation and application of necessity conditions and sufficiency conditions for constrained optimization problems.

CAAM 564 - NUMERICAL OPTIMIZATION
Short Title: NUMERICAL OPTIMIZATION
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Numerical algorithms for constrained optimization problems in engineering and sciences, including simplex and interior-point methods for linear programming, penalty, barrier, augmented Lagrangian and SQP methods for nonlinear programming. Recommended Prerequisite(s): CAAM 560 (may be taken concurrently) and CAAM 454.

CAAM 565 - CONVEX OPTIMIZATION
Short Title: CONVEX OPTIMIZATION
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Convex optimization problems arise in communication, system theory, VLSI, CAD, finance, inventory, network optimization, computer vision, learning, statistics, etc., even though oftentimes convexity may be hidden and unrecognized. Recent advances in interior-point methodology have made it much easier to solve these problems and various solvers are now available. This course will introduce the basic theory and algorithms for convex optimization, as well as its many applications to computer science, engineering, management science and statistics. Biennial; Offered in Odd Years. Recommended Prerequisite(s): CAAM 335 and MATH 321.
CAAM 567 - SIGNAL RECOVERY: THEORY AND SIMULATION
Short Title: SIGNAL RECOVERY
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course introduces the theory and numerical algorithms for several fundamental signal recovery tasks. Topics include L1 minimization, sparse regression, compressed sensing, orthogonal matching pursuit, proximal operators, ADMM algorithms, Iterative Reweighted Least Squares. Nuclear norm minimization, matrix completion, robust Principal Component Analysis. Recommended Prerequisite(s): CAAM 378 or MATH 302 or STAT 310.

CAAM 570 - GRAPH THEORY
Short Title: GRAPH THEORY
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of the structure and properties of graphs, together with a variety of applications. Includes paths, cycles, trees, connectivity, matchings, colorings, planarity, directed graphs, and algorithms. Some knowledge of linear algebra is recommended. Mutually Exclusive: Credit cannot be earned for CAAM 570 and CAAM 470.

CAAM 571 - LINEAR AND INTEGER PROGRAMMING
Short Title: LINEAR AND INTEGER PROGRAMMING
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers the same lecture material as CAAM 471, but fosters greater theoretical sophistication through more challenging problem sets and exams. Graduate/Undergraduate Equivalency: CAAM 471. Mutually Exclusive: Credit cannot be earned for CAAM 571 and CAAM 471.

CAAM 574 - COMBINATORIAL OPTIMIZATION
Short Title: COMBINATIONAL OPTIMIZATION
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: General theory and approaches for solving combinatorial optimization problems are studied. Specific topics include basic polyhedral theory, minimum spanning trees, shortest paths, network flow, matching and matroids. The course also covers the traveling salesman problem. A student may not receive credit for both CAAM 474 and CAAM 574. Mutually Exclusive: Credit cannot be earned for CAAM 574 and CAAM 474.

CAAM 583 - INTRODUCTION TO RANDOM PROCESSES AND APPLICATIONS
Short Title: INTRO RANDOM PROCESSES & APPL
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Review of basic probability; Sequences of random variables; Random vectors and estimation; Basic concepts of random processes; Random processes in linear systems, expansions of random processes; Wiener filtering; Spectral representation of random processes, and white-noise integrals. Cross-list: STAT 581.
Course URL: statistics.rice.edu/feed/Courses.aspx

CAAM 585 - STOCHASTIC OPTIMIZATION
Short Title: STOCHASTIC OPTIMIZATION
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Corequisite: CAAM 571
Course Level: Graduate
Description: Stochastic optimization models arise in many contexts. This course focuses on stochastic programs, including stochastic integer programs and multi-stage stochastic programs. It will emphasize the interplay between theory and computational approaches.

CAAM 590 - INDEPENDENT STUDY
Short Title: GRADUATE RESEARCH PROJECTS
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Semester-long graduate-level research on a topic in Computational and Applied Mathematics. Instructor Permission Required. Repeatable for Credit.

CAAM 591 - GRADUATE RESEARCH PROJECTS
Short Title: GRADUATE RESEARCH PROJECTS
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Semester-long graduate-level research on a topic in Computational and Applied Mathematics. Instructor Permission Required. Repeatable for Credit.
CAAM 600 - THESIS WRITING
Short Title: THESIS WRITING
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Assists the student in preparation of the CAAM MA/PhD thesis and in other writing projects. Structure of a scientific paper, effective approaches to technical writing, building literature review, results, and discussion sections, how to write a good abstract, oral presentation skills. Prerequisite: Advisor approval of topic and consent of the instructor(s). Instructor Permission Required. Repeatable for Credit.

CAAM 615 - THEORETICAL NEUROSCIENCE: FROM CELLS TO LEARNING SYSTEMS
Short Title: THEORETICAL NEUROSCIENCE
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: We present the theoretical foundations of cellular and systems neuroscience from distinctly quantitative point of view. We develop the mathematical and computational tools as they are needed to model, analyze, visualize and interpret a broad range of experimental data. Additional course work required beyond the undergraduate course requirements. Cross-list: ELEC 588, NEUR 615. Graduate/Undergraduate Equivalency: CAAM 415. Mutually Exclusive: Credit cannot be earned for CAAM 615 and CAAM 415.

CAAM 620 - TOPICS IN COMPUTATIONAL SCIENCE
Short Title: TOPICS IN COMPUTATIONAL SCIENCE
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Content varies from year to year. Instructor Permission Required. Repeatable for Credit.

CAAM 640 - OPTIMIZATION WITH SIMULATION CONSTRAINTS
Short Title: OPTIMIZATION W/SIM CONSTRAINTS
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Content varies from year to year. Recommended Prerequisite(s): CAAM 564. Repeatable for Credit.

CAAM 641 - TOPICS IN INVERSE PROBLEMS
Short Title: TOPICS IN INVERSE PROBLEMS
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Theoretical, computational and practical issues for inverse problems in science and engineering. Selected topics will vary depending on instructor and student interests. Instructor Permission Required. Repeatable for Credit.

CAAM 642 - TOPICS IN SEISMIC IMAGING
Short Title: TOPICS IN SEISMIC IMAGING
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Content varies from year to year. Instructor Permission Required. Repeatable for Credit.

CAAM 643 - TOPICS IN GEOMATHEMATICS
Short Title: TOPICS IN GEOMATHEMATICS
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Content varies from year to year. Instructor Permission Required. Cross-list: ESCI 643. Recommended Prerequisite(s): CAAM 335 and CAAM 336 Repeatable for Credit.

CAAM 651 - TOPICS IN NUMERICAL LINEAR ALGEBRA
Short Title: TOPICS IN NUM LINEAR ALGEBRA
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Selected topics will vary depending on instructor and student interests. Derivation and analysis of Krylov and subspace iteration methods for large eigenvalue problems (Lanczos, Arnoldi, Jacobi-Davidson algorithms); preconditioning for linear systems and eigenvalue problems (complete LU, domain decomposition, multigrid); convergence analysis including potential theory and pseudospectra. Applications: regularization of discrete inverse problems; dimension reduction for large dynamical control systems; effects on non-normality on behavior of dynamical systems and iterative processes. Recommended Prerequisite(s): CAAM 551. Repeatable for Credit.
CAAM 699 - COMPUTATIONAL AND APPLIED MATHEMATICS SEMINAR
Short Title: TOPICS IN COMPUTATIONAL AND APPLIED MATHEMATICS
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Content varies from year to year. Instructor Permission Required. Repeatable for Credit.

CAAM 654 - TOPICS IN OPTIMIZATION
Short Title: TOPICS IN OPTIMIZATION
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Content varies from year to year. Instructor Permission Required. Repeatable for Credit.

CAAM 652 - TOPICS IN NONLINEAR PROGRAMMING
Short Title: TOPICS IN NONLINEAR PROGRAMMING
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Content varies from year to year.

CAAM 698 - RESEARCH THEMES IN THE MATHEMATICAL SCIENCES
Short Title: RESEARCH THEMES IN THE MATHEMATICAL SCIENCES
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A seminar course that will cover a selected theme of general research in the mathematical sciences from the perspectives of mathematics, computational and applied mathematics and statistics. The course may be repeated multiple times for credit. Cross-list: MATH 698, STAT 698. Graduate/Undergraduate Equivalency: CAAM 498. Mutually Exclusive: Credit cannot be earned for CAAM 698 and CAAM 498. Repeatable for Credit.

CAAM 699 - COMPUTATIONAL AND APPLIED MATHEMATICS SEMINAR
Short Title: COMP & APPLIED MATH SEMINAR
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course prepares a student for research in the mathematical sciences on a specific topic. Each section is dedicated to a different topic. Current topics include bioinformatics, biomathematics, computational finance, simulation driven optimization, data simulation, and spectral optimization in rational mechanics. The topics may vary each semester. Instructor Permission Required. Graduate/Undergraduate Equivalency: CAAM 499. Mutually Exclusive: Credit cannot be earned for CAAM 699 and CAAM 499. Repeatable for Credit.

CAAM 800 - RESEARCH AND THESIS
Short Title: RESEARCH AND THESIS
Department: Computational & Applied Math
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is for CAAM MA or PhD students working on their thesis research. Repeatable for Credit.

Computer Science (COMP)

COMP 100 - INTRODUCTION TO COMPUTING AND INFORMATION SYSTEMS
Short Title: INTRO COMPUTING & INFO SYS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An introduction to organizing, analyzing, and presenting information using databases and spreadsheets. No programming involved, and no computing background expected.
Course URL: www.clear.rice.edu/comp100/

COMP 110 - COMPUTATION IN SCIENCE AND ENGINEERING
Short Title: COMPUTATION IN SCI & ENGI
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course introduces basic techniques for problem solving and visualization using computational environments such as Mathematica and MATLAB. Class will consist of a mixture of traditional lectures held in classrooms and self-paced modules covering topics in science and engineering that will be completed in Symonds II. No previous experience is required or expected. Cross-list: NSCI 230. Repeatable for Credit.
Course URL: www.owlnet.rice.edu/~comp110

COMP 130 - ELEMENTS OF ALGORITHMS AND COMPUTATION
Short Title: ELEMENTS OF ALGORITHMS & COMP
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An introduction to computation taught by solving real-world problems in architecture, statistics, linguistics, social networks, visual pattern recognition, and the simulation of complex systems in ecology. Technical topics include how to model computational artifacts operating in the world, how to design and implement algorithmic solutions in Python, and how to experimentally test and evaluate computational systems.
COMP 140 - COMPUTATIONAL THINKING
Short Title: COMPUTATIONAL THINKING
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An integrated introduction to computation taught by solving real-world problems in audio, video and text processing, physical robotics, control and simulation of complex systems in nature, and swarm intelligence. Technical topics include how to model computational artifacts operating in the world; how to design and implement algorithmic solutions in Python; and how to experimentally test and evaluate performance of computational systems. Open to Fall 2017 and Fall 2016 matric
Course URL: www.clear.rice.edu/comp140

COMP 160 - INTRODUCTION TO GAME PROGRAMMING IN PYTHON
Short Title: INTRO TO GAME PROG IN PYTHON
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Students with a class of Junior or Senior may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This class covers the basics of Python Programming with a focus on building simple games in a web-based environment. The class includes an introduction to event-driven programming and trains the students in the specifics of a Python GUI system designed to support creating applications that run in a web browser. This course is limited to first-year students only. Continuing Students may register with an approved Special Registration Form. Recommended Prerequisite(s): Java Experience.
Course URL: www.clear.rice.edu/comp160/

COMP 162 - INTRODUCTION TO GAME CONTENT CREATION
Short Title: INTRO TO GAME CONTENT CREATION
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Explore how modern game content is created, and how it interacts with the underlying technology. Beginning with an explanation of how games are developed and what role content plays in the process, the class will learn to use 3D Studio Max, Photoshop, and game-native scripting as they create working content for an established game project.
Course URL: www.owlnet.rice.edu/~comp162

COMP 180 - PRINCIPLES OF COMPUTING
Short Title: PRINCIPLES OF COMPUTING
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): COMP 130 or COMP 140 or COMP 160
Description: This class is designed for non-majors interested in a broader understanding of Computer Science and focuses on intermediate-level programming in Python as well as the basics of discrete math. The class concludes with an introduction to the process of Algorithmic Thinking. Note that COMP 180 cannot be substituted for COMP 182 as a prerequisite for upper level CS classes. Instructor Permission Required.

COMP 182 - ALGORITHMIC THINKING
Short Title: ALGORITHMIC THINKING
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): COMP 130 or COMP 140 or COMP 160
Description: Algorithms are the engines of a great majority of systems, natural and artificial alike. This course introduces algorithmic thinking as a discipline for reasoning about systems, taming their complexities, and elucidating their properties. Algorithmic techniques, along with their correctness and efficiency, will be taught through reasoning about systems of interactions, such as markets, that are ubiquitous in our highly connected world.

COMP 200 - ELEMENTS OF COMPUTER SCIENCE
Short Title: ELEMENTS OF COMPUTER SCIENCE
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Broad introduction to major topics in computer science. Includes algorithms, mathematical models of computation, machine organization and design, programming languages, communication, and artificial intelligence. This course is intended for majors outside of Science and Engineering.
Course URL: www.clear.rice.edu/comp200/
COMP 215 - INTRODUCTION TO PROGRAM DESIGN
Short Title: INTRODUCTION TO PROGRAM DESIGN
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): COMP 182
Description: This course covers the principles of programming and program design. The course is organized around a number of individual programming assignments that fit together to complete a significant, real-world application. Each assignment emphasizes one or more of the basic principles of software design, including: encapsulation, abstraction, test-driven development, and functional and object-oriented programming. The Java programming language will be used. An introduction to the basics of the Java language itself (including Java syntax and semantics) will be provided.

COMP 281 - HISTORY OF NUMBERS AND GAMES OF CHANCE
Short Title: NUMBER HISTORY/GAMES OF CHANCE
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Starting with the colorful history of numbers, we discover their use to characterize chance or luck through probability; students will participate in one major project and submit a report-application areas include physics, computer science, sports, finance, etc. The course is accessible to sophomores and juniors in science, engineering or business. Cross-list: ELEC 281, STAT 281.

COMP 290 - COMPUTER SCIENCE PROJECTS
Short Title: COMPUTER SCIENCE PROJECTS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Theoretical and experimental investigations under staff direction. Credit cannot be received for both COMP 290 and COMP 390. Instructor Permission Required. Equivalency: COMP 390. Mutually Exclusive: Credit cannot be earned for COMP 290 and COMP 390. Repeatable for Credit.

COMP 300 - SOCIETY IN THE INFORMATION AGE
Short Title: SOCIETY IN THE INFORMATION AGE
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: We will review the remarkable technology of the Information Age and examine its effects on the ways in which we live, work and think about the world around us. We will consider, for example, how the pervasive use of computers and networks is changing our ideas about property, privacy, authority, social relations, knowledge and identity. And we will discuss what further changes we might see as technology continues to advance.

COMP 310 - ADVANCED OBJECT - ORIENTED PROGRAMMING AND DESIGN
Short Title: ADV OBJECT-ORIENTED PROG
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 211 or COMP 215
Description: Discover how state-of-the-art object-orient programming and design techniques can create globe-spanning software systems that are both flexible and scalable. Learn how software design patterns are used in multiple programming paradigms. Explore highly decoupled systems with dynamically configurable behaviors. Highly recommended for anyone interested in building large systems and software engineering. Mutually Exclusive: Credit cannot be earned for COMP 310 and COMP 504.

Course URL: www.clear.rice.edu/comp310

COMP 311 - FUNCTIONAL PROGRAMMING
Short Title: FUNCTIONAL PROGRAMMING
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 211 or COMP 215
Description: An introduction to concepts, principles, and approaches of functional programming. Functional programming is a style of programming where the key means of computation is the application of functions to arguments (which themselves might be functions). This style of programming has become increasingly popular in recent years because it offers important advantages in designing, maintaining, and reasoning about programs in many modern contexts such as web services, multicores, and cluster computing. Course work consists of a series of programming assignments in the Scala programming language and various library extensions such as Apache Spark.

Course URL: wiki.rice.edu/confluence/display/PARPROG/COMP311
COMP 314 - APPLIED ALGORITHMS AND DATA STRUCTURES
Short Title: APPL ALGORITHMS&DATA STRUCTURE
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 211 and COMP 280 (may be taken concurrently)
Description: Design analysis of computer algorithms and data structures useful for applied problems. Laboratory assignments will use these techniques in conjunction with advanced programming methods. COMP 280 may be taken concurrently with COMP 314. Cross-list: ELEC 322.

COMP 316 - VIRTUAL RECONSTRUCTION OF HISTORICAL CITIES
Short Title: VRTL RECONSTR HISTORCL CITIES
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course, part of the HRC's Digital Humanities Initiative, is devoted to the virtual reconstruction of ancient urban landscapes with focus on individual buildings in their urban settings. All course activities will be based around interdisciplinary student teams who will work together through the semesters to complete a virtual reconstruction project. Instructor Permission Required. Cross-list: ANTH 346, ARCH 310, HART 316.

COMP 321 - INTRODUCTION TO COMPUTER SYSTEMS
Short Title: INTRO TO COMPUTER SYSTEMS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 220 and (COMP 211 or COMP 215)
Description: This course introduces computer systems from the programmer's perspective. Topics include data representation, the compilation process, and system-level programming concepts such as interrupts and concurrency. Formerly COMP 221. Mutually Exclusive: Credit cannot be earned for COMP 321 and COMP 221.

COMP 322 - PRINCIPLES OF PARALLEL PROGRAMMING
Short Title: FUNDAMENTALS OF PARALLEL PROG
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 211 or COMP 215
Description: Fundamentals of parallel programming: abstract models of parallel computers, parallel algorithms and data structures, and common parallel programming patterns including task parallelism, undirected and directed synchronization, data parallelism, divide-and-conquer parallelism, and map-reduce. Laboratory assignments will explore these topics through the use of parallel extensions to the Java language. Cross-list: ELEC 323.

COMP 326 - DIGITAL LOGIC DESIGN
Short Title: DIGITAL LOGIC DESIGN
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 220
Description: Study of gates, flip-flops, combinational and sequential switching circuits, registers, logical and arithmetic operations, introduction to the Verilog hardware description language. Cross-list: ELEC 326.

COMP 327 - INTRODUCTION TO COMPUTER SECURITY
Short Title: INTRO TO COMPUTER SECURITY
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 310 or COMP 314 or ELEC 322
Description: This elective course covers a wide variety of topics in computer security, including hands-on experience with breaking software and engineering software to be harder to break. For example, students will perform buffer overflow attacks and exploit web application vulnerabilities, while also learning how to defend against them. Grades will be based on a series of in-class projects. Graduate/Undergraduate Equivalency: COMP 427, COMP 541. Mutually Exclusive: Credit cannot be earned for COMP 327 and COMP 427/COMP 541.

COMP 330 - TOOLS AND MODELS FOR DATA SCIENCE
Short Title: TOOLS & MODELS - DATA SCIENCE
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (MATH 211 or MATH 221) and COMP 215
Description: This course is an introduction to modern data science. Data science is the study of how to extract actionable, non-trivial knowledge from data. The proposed course will focus both on the software tools used by practitioners of modern data science, as well as the mathematical and statistical models that are employed in conjunction with such software tools. On the tools side, we will cover the basics of relational database systems, as well as modern systems for distributed computing based on MapReduce. On the models side, the course will cover standard supervised and unsupervised models for data analysis and pattern discovery. Mutually Exclusive: Credit cannot be earned for COMP 330 and COMP 543.
COMP 360 - COMPUTER GRAPHICS
Short Title: COMPUTER GRAPHICS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (COMP 221 or COMP 321) and (COMP 182 or COMP 280) and (MATH 211 or MATH 212 or MATH 221 or MATH 222) and (MATH 354 or MATH 355)
Description: 2D graphics techniques including fast line and curve drawing and polygon filling, 3D graphics problems including representation of solids, shading, and hidden surface elimination. Fractals, graphics standards. Graduate/Undergraduate Equivalency: COMP 560. Mutually Exclusive: Credit cannot be earned for COMP 360 and COMP 560.
Course URL: www.owlnet.rice.edu/~comp360/

COMP 361 - GEOMETRIC MODELING
Short Title: GEOMETRIC MODELING
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 101 and MATH 102 and COMP 182 and COMP 215
Description: Exploration of curves and surfaces (e.g. parametric form, implicit form, and conversion between forms), the representation of solid (e.g., wireframes, octrees, boundary representations, and constructive solid geometry), and applications (e.g., graphics, motion planning, simulation, and finite element mesh generation. Graduate/Undergraduate Equivalency: COMP 561. Repeatable for Credit.

COMP 370 - EVOLUTIONARY BIOINFORMATICS
Short Title: EVOLUTIONARY BIOINFORMATICS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Large accessible data sets have opened new frontiers in evolutionary biology, and many fields. Learn to write computer programs to test hypotheses and discover patterns in diverse data. Understand the most common strategies in evolutionary bioinformatics, including dynamic programming, hidden Markov models, and graphical algorithms. No previous programming experience required. Cross-list: EBIO 333. Recommended Prerequisite(s): MATH 101 and MATH 102.

COMP 382 - REASONING ABOUT ALGORITHMS
Short Title: REASONING ABOUT ALGORITHMS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 182
Description: Writing algorithms is fun, but how are you sure that the algorithm you wrote is flawless? Are there computing tasks for which it is impossible to produce an efficient algorithm, or, for that matter, any algorithm? To answer these questions, you have to learn to perform mathematical reasoning about algorithmic problems and solutions. COMP 382 is an introduction to such reasoning techniques. Topics covered would include elementary logic, analysis of the correctness and efficiency of algorithms, and formal computational models like finite automata and Turing machines. On the way, you are also going to learn some new algorithm design techniques.

COMP 390 - COMPUTER SCIENCE PROJECTS
Short Title: COMPUTER SCIENCE PROJECTS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Theoretical and experimental investigations under staff direction. Credit cannot be received for both COMP 290 and COMP 390. Instructor Permission Required. Equivalency: COMP 290. Mutually Exclusive: Credit cannot be earned for COMP 390 and COMP 290. Repeatable for Credit.

COMP 402 - PRODUCTION PROGRAMMING
Short Title: PRODUCTION PROGRAMMING
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 310 or COMP 411 or COMP 510 or COMP 511
Description: This course focuses on the principles and practices of test-driven software development, which have been popularized under the banner of "Extreme Programming." To provide students with practical experience, the course engages students in the development of open source production programs written in JAVA or C#. The DRJAVA programming courses was developed by students in this course. Some of the major topics covered in course lectures include design patterns for controlling concurrency and refactoring transformations to improve legacy code. Graduate/Undergraduate Equivalency: COMP 501. Mutually Exclusive: Credit cannot be earned for COMP 402 and COMP 501.
COMP 403 - REASONING AND SOFTWARE
Short Title: REASONING ABOUT SOFTWARE
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (COMP 382 and COMP 215) or COMP 482 or COMP 409 or COMP 509
Description: Our reliance on software of all forms is increasing by the day. As a result, it is more important than ever to ensure that programs function correctly and cannot be exploited by hostile adversaries. The field of formal methods takes on this challenge, developing algorithms and programming methodologies that can be used to formally reason about what happens when software executes on arbitrary inputs, often without actually executing the program. Such reasoning can be used, for example, to identify subtle bugs and vulnerabilities in programs, or to give mathematical proofs of program correctness. This is a hands-on introduction to the field of formal methods. In this class, you will learn the theoretical foundations of these systems; you will also implement a series of systems that can be used to reason about the correctness of C programs. Mutually Exclusive: Credit cannot be earned for COMP 403 and COMP 503.

COMP 405 - ADVANCED TOPICS IN OBJECT-ORIENTED DESIGN
Short Title: ADV TOP OBJECT/ORIENTED DESIGN
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 310
Description: A topics-driven exploration of cutting-edge object oriented design issues and concepts including mutable recursive data frameworks, design patterns for sorting, parsing and games, service-oriented architectures and cloud computing. Detailed knowledge and practice in abstract structure and behavioral representations, delegation model programming, design patterns and Java are required. Graduate/Undergraduate Equivalency: COMP 505. Mutually Exclusive: Credit cannot be earned for COMP 405 and COMP 505.

COMP 409 - ADVANCED LOGIC IN COMPUTER SCIENCE
Short Title: ADV. LOGIC IN COMPUTER SCIENCE
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (COMP 211 or COMP 215) and (COMP 182 or COMP 280)
Description: Set theoretical concepts. Propositional and first-order logic. Soundness and completeness, incompleteness, undecidability. Logical issues in computer science. Graduate/Undergraduate Equivalency: COMP 509. Mutually Exclusive: Credit cannot be earned for COMP 409 and COMP 509.
Course URL: www.cs.rice.edu/~vardi/comp409/

COMP 410 - SOFTWARE ENGINEERING METHODOLOGY
Short Title: SOFTWARE ENGINEER METHODOLOGY
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 310 or COMP 314
Description: COMP 410 is a pure discovery-based learning course designed to give students real-life, hands-on training in a wide variety of software engineering issues that arise in creating large-scale, state-of-the-art software systems. The class forms a small software development "company" that works to deliver a product to a customer. The topics encountered include and are not limited to, dealing with new technologies (e.g. C#, .NET, distributed computing), advanced object-oriented programming and design, interacting with customers, problem specification and testing, individual and group communications, human resource management, group leadership, testing, integration and documentation. Traditional development cycle methodologies will be compared to recent, "agile" techniques. Graduate/Undergraduate Equivalency: COMP 539. Mutually Exclusive: Credit cannot be earned for COMP 410 and COMP 539.
Course URL: www.bandgap.cs.rice.edu/classes/comp410

COMP 411 - PRINCIPLES OF PROGRAMMING LANGUAGES
Short Title: PRINCIPLES OF PROG LANGUAGES
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 211 or COMP 310
Description: The design, definition and abstract implementation of programming languages including methods for precisely specifying syntax and semantics. Graduate/Undergraduate Equivalency: COMP 511. Mutually Exclusive: Credit cannot be earned for COMP 411 and COMP 511.

COMP 412 - COMPILER CONSTRUCTION FOR UNDERGRADUATE STUDENTS
Short Title: COMPILER CONSTRUCTION - UG
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (COMP 314 or ELEC 322 or COMP 310 or COMP 215) and (COMP 221 or COMP 321)
Description: Topics in the design of programming language translators, including parsing, run-time storage management, error recovery, code generation and optimization. Graduate/Undergraduate Equivalency: COMP 506. Recommended Prerequisite(s): COMP 412 or COMP 506. Mutually Exclusive: Credit cannot be earned for COMP 412 and COMP 506.
Course URL: www.cs.rice.edu/comp412
COMP 413 - DISTRIBUTED PROGRAM CONSTRUCTION  
**Short Title:** DISTRIB PROGRAM CONSTRUCTION  
**Department:** Computer Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 4  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** COMP 310  
**Description:** This course focuses on modern principles for the construction of distributed programs, with an emphasis on design patterns, modern programming tools, and distributed object systems. The material will be applied in a substantial software design/construction project.

COMP 415 - REAL-WORLD SOFTWARE DEVELOPMENT  
**Short Title:** REAL-WORLD SOFTWARE DEVELOPMENT  
**Department:** Computer Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 4  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** COMP 410  
**Description:** Experience real customers, software, and situations. The class will be contracted by an industrial customer to design, build, and deliver a product. Negotiate to finalize specifications, updates, and delivery schedules. Encounter real-life issues such as team management, intellectual property, and vagueness and specification changes while developing a state-of-the-art software application.

COMP 420 - INTRODUCTION TO DISTRIBUTED COMPUTER SYSTEMS  
**Short Title:** INTRO TO DISTRIBUTED COMP SYS  
**Department:** Computer Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 4  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** COMP 421  
**Description:** Introduction to distributed computer systems. The course covers concepts, architecture, algorithms, protocols, and implementation, focusing on distribution, scale, robustness in the face of failure, and security. Graduate/Undergraduate Equivalency: COMP 532. Mutually Exclusive: Credit cannot be earned for COMP 420 and COMP 532.

COMP 421 - OPERATING SYSTEMS AND CONCURRENT PROGRAMMING  
**Short Title:** OP SYS/CONCURRENT PROGRAMMING  
**Department:** Computer Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 4  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** COMP 215 and (COMP 221 or COMP 321)  
**Description:** Introduction to the design, construction, and analysis of concurrent programs with an emphasis on operating systems, including file systems, schedulers, and memory allocators. Specific attention is devoted to process synchronization and communication within concurrent programs. Cross-list: ELEC 421. Graduate/Undergraduate Equivalency: COMP 521. Mutually Exclusive: Credit cannot be earned for COMP 421 and COMP 521.

COMP 422 - PARALLEL COMPUTING  
**Short Title:** PARALLEL COMPUTING  
**Department:** Computer Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 4  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** COMP 211 and (COMP 221 or COMP 321)  
**Description:** COMP 422 is an undergraduate version of this course. COMP 422 students will have four programming assignments. COMP 534 students will have five. As part of their assignments, both COMP 422 and COMP 534 students will analyze the scalability and parallel efficiency of parallel programs they write. COMP 534 students will additionally use tools to qualify the root causes of scaling losses in their programs and document their findings. Mutually Exclusive: Credit cannot be earned for COMP 422 and COMP 534.

COMP 424 - MOBILE AND EMBEDDED SYSTEM DESIGN AND APPLICATION  
**Short Title:** MOBILE & EMBEDDED SYSTEM  
**Department:** Computer Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 4  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** ELEC 220  
**Description:** ELEC 424 introduces mobile and embedded system design and applications to undergraduate students and provides them hands-on design experience. It consists of three interlearning parts: lectures, student project, and student presentations. Cross-list: ELEC 424.
COMP 425 - COMPUTER SYSTEMS ARCHITECTURE
Short Title: COMPUTER SYSTEMS ARCHITECTURE
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 326 or COMP 326
Description: Evolution of key architecture concepts found in advanced uniprocessor systems. Fundamental and advanced pipelining techniques and associated issues for improving processor performance. Illustrated with RISC processors such as the ARM processor. Examine several metrics for processor performance, such as Amdahl’s law. Key concepts of data and program memory systems found in modern systems with memory hierarchies and cashes. Perform experiments in cache performance analysis. Influence of technology trends, such as Moore’s law, on processor implementation Approaches for exploiting instruction level parallelism, such as VLIW. Introduction to parallel and multicore architectures. Introduction to processor architectures targeted for imbedded applications. Cross-list: ELEC 425. Graduate/Undergraduate Equivalency: COMP 554. Mutually Exclusive: Credit cannot be earned for COMP 425 and COMP 554.

COMP 427 - INTRODUCTION TO COMPUTER SECURITY
Short Title: INTRO TO COMPUTER SECURITY
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 310 and COMP 321
Description: This elective course covers a wide variety of topics in computer security, including hands-on experience with software & engineering software to be harder to break. For example, students will perform buffer overflow attacks & exploit web application vulnerabilities, while also learning how to defend against them. Graduate/Undergraduate Equivalency: COMP 327, COMP 541. Mutually Exclusive: Credit cannot be earned for COMP 427 and COMP 327/COMP 541.

COMP 429 - INTRODUCTION TO COMPUTER NETWORKS
Short Title: INTRO TO COMPUTER NETWORKS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 221 or COMP 321
Course URL: www.clear.rice.edu/comp429/

COMP 430 - INTRODUCTION TO DATABASE SYSTEMS
Short Title: INTRO TO DATABASE SYSTEMS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (COMP 211 or COMP 215) and (COMP 182 or COMP 280)
Description: Introduction to relational and other database systems, SQL programming, Database application programming, and Database design. Graduate/Undergraduate Equivalency: COMP 533. Mutually Exclusive: Credit cannot be earned for COMP 430 and COMP 533.

COMP 431 - WEB DEVELOPMENT
Short Title: WEB DEVELOPMENT
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 326 or COMP 326
Description: In this project-based course, students create multi-user Web applications involving all aspects of application development from front-end and back-end programming to interfacing client-server communications technologies. Class time includes discussions of topics in Web development, structural frameworks, test driven development, and time for students to develop their Web applications. Graduate/Undergraduate Equivalency: COMP 531. Recommended Prerequisite(s): COMP 310 or COMP 321 Mutually Exclusive: Credit cannot be earned for COMP 431 and COMP 531.

COMP 435 - ELECTION SYSTEMS, TECHNOLOGIES, AND ADMINISTRATION
Short Title: ELECTION SYSTEMS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This multidisciplinary course will consider how elections are conducted to enhance participation, to accurately measure the will of the electorate, and to be sufficiently rigorous to convince all parties that the results are legitimate. This course will consider the design and evaluation of election technologies, ranging from voter registration through the polling booth and vote tabulation. This course will consider three questions: how do individual voters interact with the voting technology, how are voting technologies engineered to be accurate and secure, and how do the social aspects of voting fulfill democratic goals for elections? A central requirement for this course will be group research projects, many operating in our community, built around the November election. Cross-list: POLI 420, PSYC 420.
COMP 440 - ARTIFICIAL INTELLIGENCE
Short Title: ARTIFICIAL INTELLIGENCE
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 310 and (STAT 310 or ECON 307 or ECON 382 or STAT 312 or STAT 331 or ELEC 331 or ELEC 303) and (MATH 354 or MATH 355 or CAAM 335)
Description: This is a foundational course in artificial intelligence, the discipline of designing intelligent agents. The course will cover the design and analysis of agents that do the right thing in the face of limited information and computational resources. The course revolves around two main questions: how agents decide what to do, and how they learn from experience. Tools from computer science, probability theory, and game theory will be used. Interesting examples of intelligent agents will be covered, including poker playing programs, bots for various games (e.g. WoW), DS1 – the spacecraft that performed an autonomous flyby of Comet Borrely in 2001, Stanley – the Stanford robot car that won the Darpa Grand Challenge, Google Maps and how it calculates driving directions, face and handwriting recognizers, Fedex package delivery planners, airline fare prediction sites, and fraud detectors in financial transactions. Cross-list: ELEC 440. Graduate/Undergraduate Equivalency: COMP 557. Mutually Exclusive: Credit cannot be earned for COMP 440 and COMP 557.
Course URL: www.owlnet.rice.edu/~comp440

COMP 446 - MOBILE DEVICE APPLICATIONS
Short Title: MOBILE DEVICE APPLICATIONS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 440 or ELEC 440
Description: Connected mobile devices require updated programming models and design concepts to take advantage of their capabilities. We will explore applications primarily on the Apple iPhone and iPad but will also cover smart watches, Google Android and intelligent voice assistants like Amazon Echo and Google Home. We will briefly touch on the development of web services to support mobile applications. The course culminates with a large project taking up most of the second half of the semester. Although the curriculum centers around and teaches iOS and Xcode, final projects may be completed in any major mobile system including Android and Alexa, etc. Cross-list: ELEC 446. Recommended Prerequisite(s): COMP 310 or prior Object Oriented Programming experience highly recommended.

COMP 447 - INTRODUCTION TO COMPUTER VISION
Short Title: INTRO TO COMPUTER VISION
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 301 or ELEC 475 or COMP 314 or ELEC 322 or COMP 330
Description: An introduction to the basic concepts, algorithms and applications in computer vision. Topics include: cameras, camera models and imaging pipeline, low-level vision/image processing methods such as filtering and edge detection; mid-level vision topics such as segmentation and clustering; shape reconstruction from stereo, introduction to high-level vision tasks such as object recognition and face recognition. The course will involve programming and implementing basic computer vision algorithms in Matlab. Cross-list: ELEC 447. Graduate/Undergraduate Equivalency: COMP 546. Mutually Exclusive: Credit cannot be earned for COMP 447 and COMP 345/COMP 546.
COMP 450 - ALGORITHMIC ROBOTICS

Short Title: ALGORITHMIC ROBOTICS

Department: Computer Science

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 4

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Prerequisite(s): (COMP 221 or COMP 321) and COMP 215

Description: Robots have fascinated people for generations. Today, robots are built for applications as diverse as exploring remote planets, de-mining war zones, cleaning toxic waste, assembling cars, inspecting pipes in industrial plants and mowing lawns. Robots are also interacting with humans in a variety of ways: robots are museum guides, robots assist surgeons in life threatening operations, and robotic cars can drive us around. The field of robotics studies not only the design of new mechanisms but also the development of artificial intelligence frameworks to make these mechanisms useful in the physical world, integrating computer science, engineering, mathematics and more recently biology and sociology, in a unique way. This class will present fundamental algorithmic advances that enable today's robots to move in real environments and plan their actions. It will also explore fundamentals of the field of Artificial Intelligence through the prism of robotics. The class involves a significant programming project.

Cross-list: ELEC 450, MECH 450. Graduate/Undergraduate Equivalency: COMP 550. Mutually Exclusive: Credit cannot be earned for COMP 450 and COMP 550.

COMP 451 - DESIGN AND ANALYSIS OF CYBER-PHYSICAL SYSTEMS

Short Title: DESIGN&ANALYSIS CYBER/PHYSICAL

Department: Computer Science

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 4

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: This course is an introduction to cyber-physical systems, engineering artifacts in which computational components interact with and typically control physical components. Some common examples of cyber-physical systems include robots, Segways and lane-departure warning, LDW, systems in automobiles. Graduate/Undergraduate Equivalency: COMP 555. Mutually Exclusive: Credit cannot be earned for COMP 451 and COMP 555.

COMP 460 - ADVANCED COMPUTER GAME CREATION

Short Title: ADV COMPUTER GRAPHICS

Department: Computer Science

Grade Mode: Standard Letter

Course Type: Lecture/Laboratory

Credit Hours: 4

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: This project-based class involves teams of 2-4 CS and Visual Arts students designing and building computer games suitable for Xbox Live Arcade using C# and XNA. For CS students, Comp 160 or Comp 360 is recommended as a prerequisite. For Visual Arts students, previous experience in drawing using Photoshop is suggested. Instructor Permission Required. Cross-list: ARTS 460. Repeatable for Credit.

Course URL: www.owlnet.rice.edu/~comp460

COMP 470 - FROM SEQUENCE TO STRUCTURE: AN INTRODUCTION TO COMPUTATIONAL BIOLOGY

Short Title: FROM SEQUENCE TO STRUCTURE

Department: Computer Science

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 4

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: Contemporary introduction to problems in computational biology spanning sequence to structure. The course has three modules: the first introduces students to the design and statistical analysis of gene expression studies; the second covers statistical machine learning techniques for understanding experimental data generated in computational biology; and the third introduces problems in the modeling of protein structure using computational methods from robotics. The course is project oriented with an emphasis on computation and problem-solving. Cross-list: BIOE 470, STAT 470. Recommended Prerequisite(s): COMP 280 and (STAT 310 or STAT 331).

COMP 477 - SPECIAL TOPICS

Short Title: SPECIAL TOPICS

Department: Computer Science

Grade Mode: Standard Letter

Course Type: Internship/Practicum, Lecture, Laboratory, Seminar

Credit Hours: 1-4

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: Topics/requirements/credit hours may vary each semester. Contact Department for current semester's topic(s). Repeatable for Credit.

COMP 481 - AUTOMATA, FORMAL LANGUAGES, AND COMPUTABILITY

Short Title: AUTOMATA/FORMAL LANG/COMPUTING

Department: Computer Science

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: Finite automata, regular expressions, regular languages, pushdown automata, context-free languages, Turing machines, recursive languages, computability, and solvability. It is strongly recommended that students complete three semesters of Mathematics before enrolling in this course. Graduate/Undergraduate Equivalency: COMP 581. Mutually Exclusive: Credit cannot be earned for COMP 481 and COMP 581.

COMP 485 - FUNDAMENTALS OF MEDICAL IMAGING I

Short Title: FUND MEDICAL IMAGING I

Department: Computer Science

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: Everything is involved in the study of modern medical imaging techniques, including quantum mechanics, linear algebra, convolution, partial differentiation, inverse problems, and computer algorithms. Cross-list: BIOE 485, ELEC 485. Recommended Prerequisite(s): MATH 211 and MATH 212.
COMP 486 - FUNDAMENTALS OF MEDICAL IMAGING II
Short Title: FUND MEDICAL IMAGING II
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOE 485 or ELEC 485 or COMP 485
Description: This course focuses on functional imaging modalities used specifically in nuclear medicine such as Gamma cameras, SPECT, and PET imaging. The course will introduce the basic principles of image acquisition, formation, processing and the clinical applications of these imaging modalities and lays the foundations for understanding the principles of radiotracer kinetic modeling. A trip to a clinical site in also planned to gain the experience with nuclear medicine imaging. Cross-list: BIOE 486, ELEC 486.

COMP 487 - COMPUTATIONAL COMPLEXITY
Short Title: COMPUTATIONAL COMPLEXITY
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 382 or COMP 409 or COMP 509 or COMP 481 or COMP 581
Description: In Computational Complexity we study the computational resources (time, space, communication, etc.) that are required to solve computational problems via various computational needs. Specifically, we are interested in classifying computational problems with classes of other problems that require similar amount of resources to solve. Graduate/Undergraduate Equivalency: COMP 587. Mutually Exclusive: Credit cannot be earned for COMP 487 and COMP 587.

COMP 488 - PRODUCTION PROGRAMMING
Short Title: PRODUCTION PROGRAMMING
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 310 or COMP 411 or COMP 510 or COMP 511
Description: This course focuses on the principles and practices of test-driven software development, which have been popularized under the banner of “Extreme Programming.” To provide students with practical experience, the course engages students in the development of open-source production programs written in JAVA or C#. The DRJAVA programming courses was developed by students in this course. Some of the major topics covered in course lectures include design patterns for controlling concurrency and refactoring transformations to improve legacy code. Graduate/Undergraduate Equivalency: COMP 402. Mutually Exclusive: Credit cannot be earned for COMP 501 and COMP 402.
COMP 502 - NEURAL MACHINE LEARNING I  
Short Title: NEURAL MACHINE LEARNING I  
Department: Computer Science  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Review of major neural machine learning (Artificial Neural Network) paradigms. Analytical discussion of supervised and unsupervised neural learning algorithms and their relation to information theoretical methods. Practical applications to data analysis such as pattern recognition, clustering, classification, function approximation/regression, non-linear PCA, projection pursuit, independent component analysis, with lots of examples from image and digital processing. Details are posted at www.ece.rice.edu/~erzsebet/ANNcourse.html. Cross-list: ELEC 502, STAT 502. Recommended Prerequisite(s): ELEC 430 and ELEC 431 or equivalent or permission of instructor.  
Course URL: www.ece.rice.edu/~erzsebet/ANNcourse.html

COMP 503 - REASONING AND SOFTWARE  
Short Title: REASONING ABOUT SOFTWARE  
Department: Computer Science  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): (COMP 382 and COMP 215) or COMP 482 or COMP 409 or COMP 509  
Description: Our reliance on software of all forms is increasing by the day. As a result, it is more important than ever to ensure that programs function correctly and cannot be exploited by hostile adversaries. The field of formal methods takes on this challenge, developing algorithms and programming methodologies that can be used to formally reason about what happens when software executes on arbitrary inputs, often without actually executing the program. Such reasoning can be used, for example, to identify subtle bugs and vulnerabilities in programs, or to give mathematical proofs of program correctness. This is a hands-on introduction to the field of formal methods. In this class, you will learn the theoretical foundations of these systems; you will also implement a series of systems that can be used to reason about the correctness of C programs. Mutually Exclusive: Credit cannot be earned for COMP 503 and COMP 403.

COMP 504 - GRADUATE OBJECT-ORIENTED PROGRAMMING AND DESIGN  
Short Title: GR OBJ-ORIENTED PROG & DESIGN  
Department: Computer Science  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 4  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Discover how stat-of-the-art object-orient programming and design techniques can create globe-spanning software systems that are both flexible and scalable. Learn how software design patterns are used in multiple programming paradigms. Explore highly decoupled systems with dynamically configurable behaviors. Highly recommended for anyone interested in building large systems and software engineering. Basic proficiency in Java is required. Students may not receive credit for both COMP 310/510 and COMP 404/504. Mutually Exclusive: Credit cannot be earned for COMP 504 and COMP 310/COMP 404/COMP 510.

COMP 505 - ADVANCED TOPICS IN OBJECT-ORIENTED DESIGN  
Short Title: ADV TOP OBJECT/ORIENTED DESIGN  
Department: Computer Science  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 4  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): COMP 404 or COMP 504 or COMP 310  
Description: A topics-driven exploration of cutting-edge object oriented design issues and concepts including mutable recursive data frameworks, design patterns for sorting, parsing and games, service-oriented architectures and cloud computing. Detailed knowledge and practice in abstract structure and behavioral representations, delegation model programming, design patterns and Java are required. Graduate/Undergraduate Equivalency: COMP 405. Mutually Exclusive: Credit cannot be earned for COMP 505 and COMP 405.

COMP 506 - COMPILER CONSTRUCTION FOR GRADUATE STUDENTS  
Short Title: COMPILER CONSTRUCTION - GR  
Department: Computer Science  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 4  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): (COMP 482 or ELEC 420) or COMP 481  
Description: This course is a graduate-level introduction to computer-aided program design, a field that studies logical and algorithmic techniques for formally verifying programs, and mechanized derivation of programs that are correct by construction. Topics covered will include classical automated program verification in particular abstract interpretation and model checking - as well as recent developments in algorithmic program synthesis.
COMP 508 - DESIGN AND ANALYSIS OF SECURE EMBEDDED SYSTEMS FOR IoT ERA

Short Title: SECURE EMBEDDED SYS FOR IoT
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course emphasizes the security of small embedded devices that are central to the Internet of Things (IoT) Era. We discuss the practical security attacks, challenges, constraints, and opportunities that arise in the IoT domain. Covered topics include security engineering, real world attacks, practical and side channel attacks, and hands-on lab/projects. Cross-list: ELEC 511. Repeatable for Credit.

COMP 509 - ADVANCED LOGIC IN COMPUTER SCIENCE

Short Title: ADV LOGIC IN COMPUTER SCIENCE
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Set theoretical concepts. Propositional and first-order logic. Soundness and completeness, incompleteness, undecidability. Logical issues in computer science. A final project is required. Graduate/Undergraduate Equivalency: COMP 409. Mutually Exclusive: Credit cannot be earned for COMP 509 and COMP 409.

COMP 511 - PRINCIPLES OF PROGRAMMING LANGUAGES

Short Title: PRINCIPLES OF PROG LANGUAGES
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 211 or COMP 310
Description: The design, definition and abstract implementation of programming languages including methods for precisely specifying syntax and semantics. Graduate/Undergraduate Equivalency: COMP 411. Mutually Exclusive: Credit cannot be earned for COMP 511 and COMP 411.

COMP 512 - ADVANCED COMPILER CONSTRUCTION

Short Title: ADVANCED COMPILER CONSTRUCTION
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced topics in the design of an optimizing compiler. This course will focus on analysis and optimization of programs for uniprocessor machines, including program analysis (data-flow analysis, construction of static single-assignment form) and program transformation (redundancies, constant values, strength reduction, etc.). The course uses a variety of readings from the literature and includes an implementation project. Recommended Prerequisite(s): COMP 412 or COMP 506.

Course URL: www.cs.rice.edu/~keith/512

COMP 513 - COMPLEXITY IN MODERN SYSTEMS

Short Title: COMPLEXITY IN MODERN SYSTEMS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A modern computer is a system with enormous complexity in both software and hardware. The course presents the principles for managing such complexity using examples from modern computing systems. It covers emergent issues from system complexity such as energy efficiency, bug finding, and heterogeneous hardware. It also covers designing experiments and writing systems papers. The course consists of lectures, student presentation of classic papers, and a final project. Cross-list: ELEC 513.

COMP 514 - SUSTAINABILITY, ENERGY, AND INFORMATION TECHNOLOGY: AN INTERDISCIPLINARY APPROACH

Short Title: SUSTAINABILITY & ENERGY
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate.
Course Level: Graduate
Description: An interdisciplinary course addressing the energy issues facing computing in the coming decade and beyond. In a student research-driven format we will ask how IT may address its power consumption problem and serve as a vehicle for energy efficiency, sustainability, and reduced carbon emissions across all human activity. Cross-list: ELEC 514.

Course URL: www.cs.rice.edu/~kvpl/spring2008/comp514.htm

COMP 515 - ADVANCED COMPILATION FOR VECTOR PARALLEL PROCESSORS

Short Title: ADV COMPILATION VECTOR PARALLEL
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 412
Description: Advanced compilation techniques for vector and parallel computer systems, including the analysis of program dependence, program transformations to enhance parallelism, compiler management of the memory hierarchy, interprocedural data flow analysis, and parallel debugging. Recommended Prerequisite(s): COMP 412.
COMP 516 - CLOUD COMPUTING PRACTICUM
Short Title: CLOUD COMPUTING PRACTICUM
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 413 or COMP 420 or (COMP 520 or ELEC 520)
Description: This is a project-based class that provides students with the opportunity to apply their knowledge of distributed computing principles to designed and develop a single, large distributed application that utilizes the public cloud. Students will learn about the basic services for computing, storage, and commination that are supported by the new generation of "public utilities" that provide the infrastructure for the public cloud, and how to utilize these services to engineer a robust, scalable application.

COMP 518 - ENERGY EFFICIENCY IN MODERN SYSTEMS
Short Title: ENERGY EFFICIENCY MODERN SYS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Energy efficiency has become critically important for modern computing systems, from battery-powered mobile devices to wall-powered high-performance servers. The course presents the fundamentals of energy characteristics of modern systems, and introduces basic energy-saving mechanisms and methodologies for system energy characterization. It also covers emerging technologies in energy-efficient design. Instructor Permission Required. Cross-list: ELEC 518.
Course URL: www.ruf.rice.edu/~mobile/elec518/

COMP 519 - NETWORK SYSTEMS ARCHITECTURE
Short Title: NETWORK SYSTEMS ARCHITECTURE
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Design and implementation of network systems, including hardware and software architectures of network routers and servers. Students will design and implement wither the hardware or software components of a network system, depending on their experience and preferences. This course is suitable for students with expertise in either software or hardware. Cross-list: ELEC 519. Recommended Prerequisite(s): COMP 221

COMP 520 - DISTRIBUTED SYSTEMS
Short Title: DISTRIBUTED SYSTEMS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Course URL: www.cs.rice.edu/~alc/comp520/

COMP 521 - OPERATING SYSTEMS AND CONCURRENT PROGRAMMING
Short Title: OP SYS/CONCURRENT PROGRAMMING
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 215 and (COMP 221 or COMP 321)
Description: Introduction to the design, construction, and analysis of concurrent programs with an emphasis on operating systems, including filing systems, schedulers, and memory allocators. Specific attention is devoted to process synchronization and communication within concurrent programs. Additional coursework required beyond the undergraduate course requirements. Cross-list: ELEC 552. Graduate/Undergraduate Equivalency: COMP 421. Mutually Exclusive: Credit cannot be earned for COMP 521 and COMP 421.

COMP 522 - MULTI-CORE COMPUTING
Short Title: MULTI-CORE COMPUTING
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (COMP 221 or COMP 321) and COMP 425
Description: Multi-core microprocessors are becoming the norm. The course will focus on emerging multi-core processor architectures and challenges to using them effectively. Topics include multi-core microprocessors, memory hierarchy, synchronization, programming systems, scheduling, and transactional memory.
Course URL: www.cs.rice.edu/~johnmc/comp522/
COMP 523 - COMPUTER-AIDED DESIGN FOR VLSI
Short Title: COMPUTER-AIDED DESIGN FOR VLSI
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Fundamental topics in computer-aided design for VLSI: logic synthesis and formal verification, timing analysis and optimization, technology mapping, logic and fault simulation, testing, and physical design will be covered. Relevant topics in algorithms and data structures, generic programming, and the C++ standard template library will also be covered. Cross-list: ELEC 523.

COMP 524 - MOBILE AND WIRELESS NETWORKING
Short Title: MOBILE AND WIRELESS NETWORKING
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 429 or ELEC 429
Description: Study of network protocols for mobile and wireless networking, particularly at the media access control, network, and transport protocol layers. Focus is on the unique problems and challenges presented by the properties of wireless transmission and host or router mobility. Cross-list: ELEC 524. Recommended Prerequisite(s): COMP 421 OR ELEC 421.

COMP 525 - VIRTUALIZATION AND CLOUD RESOURCE MANAGEMENT
Short Title: VIRTUAL & CLOUD RESOURCE MGMT
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (ELEC 425 or COMP 425)

COMP 526 - HIGH PERFORMANCE COMPUTER ARCHITECTURE
Short Title: HIGH PERFORM COMPUTER ARCH
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 425 or ELEC 425
Description: Design of high performance computer systems, including shared-memory and message-passing multiprocessors and vector systems. Hardware and software techniques to tolerate and reduce memory and communication latency. Case studies and performance simulation of high-performance systems. Cross-list: ELEC 526.

COMP 527 - COMPUTER SYSTEMS SECURITY
Short Title: COMPUTER SYSTEMS SECURITY
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This class will focus on computer security in real systems. We will cover theory and practice for the design of secure systems (formal modeling, hardware and compiler-enforced safety, software engineering processes, tamper-resistant and tamper-reactive hardware, firewalls, cryptography, and more). Recommended Prerequisite(s): (COMP 311 or COMP 412) and (COMP 421 or COMP 429).
Course URL: seclab.cs.rice.edu/comp527/

COMP 528 - INTRODUCTION TO VIRTUALIZATION
Short Title: INTRODUCTION TO VIRTUALIZATION
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 421 or COMP 521
Description: System-level virtualization is an integral part of modern computer systems, spanning both hardware and software. This course will explore the various types of system-level virtualization and the hardware and software mechanisms that support them. The course will explore the interplay among hypervisors, operating systems, processors, memory, and I/O devices in modern virtualized systems.

COMP 529 - ADVANCED COMPUTER NETWORKS
Short Title: ADVANCED COMPUTER NETWORKS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 429 or ELEC 429
Description: This course explores advanced solutions in computer networks that are driven by the need to go beyond the best-effort capabilities of the Internet. Topics include network fault tolerance, traffic engineering, scalable data center network architectures, network support for big data processing, network support for cloud computing, extensible network control via software defined networking, denial-of-service-attack defense mechanisms. Readings from original research papers. Also include design project and oral presentation components. This course assumes students already have a good understanding of the best-effort Internet. Cross-list: ELEC 529.
Course URL: www.clear.rice.edu/comp529/
COMP 530 - DATABASE SYSTEM IMPLEMENTATION
Short Title: DATABASE SYSTEM IMPLEMENTATION
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3-4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 321 and COMP 430
Description: This course covers database management system architecture, query processing and optimization, transaction processing, concurrent control and recover, storage, indexing structures and related topics. Students will build a database system from the ground up. Graduate students who have not had an introductory database course should enroll for 4 credits: all others should enroll for 3 credits.

COMP 531 - WEB DEVELOPMENT AND DESIGN
Short Title: WEB DEVELOPMENT AND DESIGN
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This project-based course explores Web application creation and design. Students are involved in the development of front-end and back-end systems while interfacing client-server communications technologies. Students will evaluate Web structural frameworks, Web development technologies, apply test driven development, and create multi-user Web applications. Graduate/Undergraduate Equivalency: COMP 431. Recommended Prerequisite(s): COMP 310 or COMP 321. Mutually Exclusive: Credit cannot be earned for COMP 531 and COMP 431.

COMP 532 - INTRODUCTION TO DISTRIBUTED COMPUTER SYSTEMS
Short Title: INTRO TO DISTRIBUTED COMP SYS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 421 or COMP 521
Description: Introduction to distributed computer systems. The course covers concepts, architecture, algorithms, protocols, and implementation, focusing on distribution, scale, robustness in the face of failure, and security. Additional coursework required beyond the UG course requirements. Graduate/Undergraduate Equivalency: COMP 420. Mutually Exclusive: Credit cannot be earned for COMP 532 and COMP 420.
Course URL: www.clear.rice.edu/comp420

COMP 533 - INTRODUCTION TO DATABASE SYSTEMS
Short Title: INTRO TO DATABASE SYSTEMS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to relational and other database systems, SQL programming, Database application programming, and Database design. Graduate/Undergraduate Equivalency: COMP 430. Mutually Exclusive: Credit cannot be earned for COMP 533 and COMP 430.

COMP 534 - PARALLEL COMPUTING
Short Title: PARALLEL COMPUTING
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (COMP 211 and (COMP 221 or COMP 321))
Description: Survey this radical concept of approximate (or inexact) computing with the goal of understanding both of the challenges and opportunities at all layers of the computing system ranging over programming languages, compilers and run-time, and architecture.

COMP 535 - APPROXIMATE COMPUTING SYSTEM FOR BIG DATA, SUPERCOMPUTING AND EMBEDDED SYSTEMS
Short Title: APPROX COMP SYS FOR BIG DATA
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course covers wide range of topics pertaining to security of Hardware Embedded system, including cryptographic processors, secure memory access, hardware IT protection by monitoring and watermarking FPGA security, physical and side-charmed attacks, Trojan horses. Cross-list: ELEC 528. Repeatable for Credit.
COMP 539 - SOFTWARE ENGINEERING METHODOLOGY
Short Title: SOFTWARE ENGINEER METHODOLOGY
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 404 or COMP 504
Description: COMP 539 is a pure discovery-based learning course designed to give students real-life, hands-on training in a wide variety of software engineering issues that arise in creating large-scale, state-of-the-art software systems. The class forms a small software development "company" that works to deliver a product to a customer. The topics encountered include and are not limited to, dealing with new technologies (e.g. C#, .NET, distributed computing), advanced object-oriented programming and design, interacting with customers, problem specification and tasking, individual and group communications, human resource management, group leadership, testing, integration and documentation. Traditional development cycle methodologies will be compared to recent, "agile" techniques. Graduate/Undergraduate Equivalency: COMP 410. Recommended Prerequisite(s): COMP 505
Mutually Exclusive: Credit cannot be earned for COMP 539 and COMP 410.
Course URL: www.banggap.cs.rice.edu/classes/comp410

COMP 540 - STATISTICAL MACHINE LEARNING
Short Title: STATISTICAL MACHINE LEARNING
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (STAT 331 or STAT 310) and (MATH 355 or CAAM 335)
Description: COMP 540 is about learning models from data. The course is designed to give students a foundational understanding of modern algorithms in learning and data mining, as well as hands-on experience with its applications in science and engineering.

COMP 541 - INTRODUCTION TO COMPUTER SECURITY
Short Title: INTRO TO COMPUTER SECURITY
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 310
Description: This elective course covers a wide variety of topics in computer security, including hands-on experience w/ breaking software & engineering software to be harder to break. For example, students will perform buffer overflow attacks & exploit web application vulnerabilities, while also learning how to defend against them. Graduate/Undergraduate Equivalency: COMP 327, COMP 427. Mutually Exclusive: Credit cannot be earned for COMP 541 and COMP 327/COMP 427.

COMP 542 - LARGE-SCALE MACHINE LEARNING
Short Title: LARGE-SCALE MACHINE LEARNING
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Learning from large dataset is becoming a ubiquitous phenomena in all applications spanning robotics, medical decisions, internet, communication, biology, etc. Designed to give senior UG students a thorough grounding in the theory and algorithms needed for research and practical applications in machine learning for modern massive datasets. Topics draw from machine learning, classical statistics, algorithms and information theory. Graduate/Undergraduate Equivalency: COMP 441. Mutually Exclusive: Credit cannot be earned for COMP 542 and COMP 441.

COMP 543 - GRADUATE TOOLS AND MODELS - DATA SCIENCE
Short Title: GR TOOLS & MODELS - DATA SCI
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is an introduction to modern data science. Data science is the study of how to extract actionable, non-trivial knowledge from data. The course will focus on the software tools used by practitioners of modern data science, the mathematical and statistical models that are employed in conjunction with such software tools and the applications of these tools and systems to different problems and domains. On the tools side, we will cover the basics of relational database systems, as well as modern systems for manipulating large data sets such as Hadoop MapReduce, Apache Spark, and Google's TensorFlow. On the model side, the course will cover standard supervised and unsupervised models for data analysis and pattern discovery. Mathematical sophistication (calculus, statistics) and programming skills that would be acquired in an undergraduate computer science program are expected. Most programming will be in Python and SQL. (SQL is covered in the course) with some Java. Instructor Permission Required. Mutually Exclusive: Credit cannot be earned for COMP 543 and COMP 330.

COMP 546 - INTRODUCTION TO COMPUTER VISION
Short Title: INTRO TO COMPUTER VISION
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An introduction to the basic concepts, algorithms and applications in computer vision. Topics include: cameras, camera models and imaging pipeline, low-level vision/image processing methods such as filtering and edge detection; mid-level vision topics such as segmentation and clustering; shape reconstruction from stereo, introduction to high-level vision tasks such as object recognition and face recognition. The course will involve programming and implementing basic computer vision algorithms in Matlab. Additional coursework required beyond the undergraduate course requirements. Cross-list: ELEC 546. Graduate/Undergraduate Equivalency: COMP 447. Mutually Exclusive: Credit cannot be earned for COMP 546 and COMP 345/COMP 447.
This course is an introduction to cyber-physical systems, engineering artifacts in which computational components interact with and typically control physical components. Some common examples of cyber-physical systems include robots, Segways and lane-departure warning, LDW, systems in automobiles.

Graduate/Undergraduate Equivalency: COMP 450. Mutually Exclusive: Credit cannot be earned for COMP 550 and COMP 450.

COMP 552 - DESIGN AND ANALYSIS OF CYBER-PHYSICAL SYSTEMS

Short Title: DESIGN&ANALYSIS CYBER-PHYS SYS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is an introduction to cyber-physical systems, engineering artifacts in which computational components interact with and typically control physical components. Some common examples of cyber-physical systems include robots, Segways and lane-departure warning, LDW, systems in automobiles.

Graduate/Undergraduate Equivalency: COMP 450. Mutually Exclusive: Credit cannot be earned for COMP 550 and COMP 450.

COMP 554 - COMPUTER SYSTEMS ARCHITECTURE

Short Title: COMPUTER SYSTEMS ARCHITECTURE
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Evolution of key architecture concepts found in advanced uniprocessor systems. Fundamental and advanced pipelining techniques and associated issues for improving processor performance. Illustrated with RISC processors such as the ARM processor. Examine several metrics for processor performance, such as Amdahl’s law. Key concepts of data and program memory systems found in modern systems with memory hierarchies and cashes. Perform experiments in cache performance analysis. Influence of technology trends, such as Moore’s law, on processor implementation Approaches for exploiting instruction level parallelism, such as VLIW. Introduction to parallel and multicore architectures. Introduction to processor architectures targeted for imbedded applications. Additional coursework required beyond the undergraduate course requirements. Cross-list: ELEC 554. Graduate/Undergraduate Equivalency: COMP 425. Mutually Exclusive: Credit cannot be earned for COMP 554 and COMP 425.

COMP 555 - DESIGN AND ANALYSIS OF CYBER-PHYSICAL SYSTEMS

Short Title: DESIGN&ANALYSIS CYBER-PHYSICAL
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is an introduction to cyber-physical systems, engineering artifacts in which computational components interact with and typically control physical components. Some common examples of cyber-physical systems include robots, Segways and lane-departure warning, LDW, systems in automobiles. Graduate/Undergraduate Equivalency: COMP 451. Mutually Exclusive: Credit cannot be earned for COMP 555 and COMP 451.

COMP 556 - INTRODUCTION TO COMPUTER NETWORKS

Short Title: INTRO TO COMPUTER NETWORKS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 221 or COMP 321
**COMP 557 - ARTIFICIAL INTELLIGENCE**  
**Short Title:** ARTIFICIAL INTELLIGENCE  
**Department:** Computer Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 4  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** COMP 310 and (STAT 310 or ECON 307 or ECON 382 or STAT 312 or STAT 331 or ELEC 331 or ELEC 303) and (MATH 354 or MATH 355 or CAAM 335)  
**Description:** This is a foundational course in artificial intelligence, the discipline of designing intelligent agents. The course will cover the design and analysis of agents that do the right thing in the face of limited information and computational resources. The course revolves around two main questions: how agents decide what to do, and how they learn from experience. Tools from computer science, probability theory, and game theory will be used. Interesting examples of intelligent agents will be covered, including poker playing programs, bots for various games (e.g. WoW), DS1 – the spacecraft that performed an autonomous flyby of Comet Borrely in 2001, Stanley – the Stanford robot car that won the Darpa Grand Challenge, Google Maps and how it calculates driving directions, face and handwriting recognizers, Fedex package delivery planners, airline fare prediction sites, and fraud detectors in financial transactions. Additional coursework required beyond the undergraduate course requirements. Cross-list: ELEC 557. Graduate/Undergraduate Equivalency: COMP 440. Mutually Exclusive: Credit cannot be earned for COMP 557 and COMP 440.  
**Course URL:** www.owlnet.rice.edu/~comp440

**COMP 560 - COMPUTER GRAPHICS AND GEOMETRIC MODELING**  
**Short Title:** COMPUTER GRAPHICS  
**Department:** Computer Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 4  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** A survey of core topics in Computer Graphics and Geometric Modeling, including fractals, ray tracing, hidden surface Algorithmic, Bézier, B-spline, blossoming techniques and subdivision procedures. Graduate/Undergraduate Equivalency: COMP 360. Mutually Exclusive: Credit cannot be earned for COMP 560 and COMP 360.  
**Course URL:** www.cs.rice.edu/~nakhleh/COMP572/

**COMP 561 - GEOMETRIC MODELING**  
**Short Title:** GEOMETRIC MODELING  
**Department:** Computer Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 4  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Exploration of curves and surfaces (e.g. parametric form, implicit form, and conversion between forms), the representation of solid (e.g., wireframes, octrees, boundary representations, and constructive solid geometry), and applications (e.g., graphics, motion planning, simulation, and finite element mesh generation. Graduate/Undergraduate Equivalency: COMP 361. Repeatable for Credit.

**COMP 571 - BIOINFORMATICS: SEQUENCE ANALYSIS**  
**Short Title:** BIOINFORMATICS: SEQUENCE  
**Department:** Computer Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Pairwise and multiple sequence alignment, Markov chains and HMMs, Phylogenetic reconstruction, Haplotype inference, Computational models of RNA structure, Gene finding, Genome rearrangements, and comparative genomics. Cross-list: BIOC 571.  
**Course URL:** www.cs.rice.edu/~nakhleh/COMP571/

**COMP 572 - BIOINFORMATICS: NETWORK ANALYSIS**  
**Short Title:** BIOINFORMATICS: NETWORKS  
**Department:** Computer Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course covers computational aspects of biological network analysis, a major theme in the area of systems biology. The course addresses protein-protein interaction networks, signaling, and metabolic networks, and covers issues related to reconstructing, analyzing, and integrating various types of networks. Cross-list: BIOC 572, BIOE 564.  
**Course URL:** www.cs.rice.edu/~nakhleh/COMP572/

**COMP 573 - PROFESSIONAL DEVELOPMENT FOR BIOMEDICAL INFORMATICS**  
**Short Title:** BIOMEDICAL INFORMATICS  
**Department:** Computer Science  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1-3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This seminar introduces pre- and postdoctoral students in biomedical informatics to topics relevant to professional development in the discipline, which is no longer concentrated in labs as it was in its early days, but is now important in hospitals, outpatient clinics, companies and even the community. In these settings, researchers and practitioners are likely to encounter not only difficult technical challenges, but vexing problems of organizational change and development as well. We will consider some of these challenges, drawing on the insights of experts in psychology, organizational change, management and communications along with industry representatives and entrepreneurs. The seminar mixes lectures and readings with group and individual exercises. Instructor Permission Required. Repeatable for Credit.
COMP 576 - A PRACTICAL INTRODUCTION TO DEEP MACHINE LEARNING
Short Title: INTRODUCTION TO DEEP LEARNING
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Deep Machine Learning has recently made many advances in difficult perceptual tasks, including object and phoneme recognition, and natural language processing. However, the field has a steep learning curve, both conceptually and practically. The point of this course is to engage students by jumping into the deep end, and building their own architectures and algorithms. Cross-list: ELEC 576.

COMP 581 - AUTOMATA, FORMAL LANGUAGES, AND COMPUTABILITY
Short Title: AUTOMATA/FORMAL LANG/COMPUTING
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Finite automata, regular expressions, regular languages, pushdown automata, context-free languages, Turing machines, recursive languages, computability, and solvability. It is strongly recommended that students complete three semesters of Mathematics before enrolling in this course. Graduate/Undergraduate Equivalency: COMP 481. Mutually Exclusive: Credit cannot be earned for COMP 581 and COMP 481.

COMP 582 - GRADUATE DESIGN AND ANALYSIS OF ALGORITHMS
Short Title: GR DESGN ANALY OF ALGORITHMS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 310 or ECON 307 or STAT 331 or ELEC 331 or ELEC 303 or STAT 312
Description: Methods for designing and analyzing computer algorithms and data structures. The focus of this course will be on the theoretical and mathematical aspects of algorithms and data structures. Cross-list: ELEC 512.

COMP 587 - COMPUTATIONAL COMPLEXITY
Short Title: COMPUTATIONAL COMPLEXITY
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 382 or COMP 409 or COMP 509 or COMP 481 or COMP 581
Description: In Computational Complexity we study the computational resources (time, space, communication, etc.) that are required to solve computational problems via various computational needs. Specifically, we are interested in classifying computational problems with classes of other problems that require similar amount of resources to solve. Graduate/Undergraduate Equivalency: COMP 487. Mutually Exclusive: Credit cannot be earned for COMP 587 and COMP 487.

COMP 590 - COMPUTER SCIENCE PROJECTS
Short Title: COMPUTER SCIENCE PROJECTS
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced theoretical and experimental investigations under staff direction. Instructor Permission Required. Repeatable for Credit.

COMP 591 - GRADUATE SEMINAR IN COMPUTER SCIENCE
Short Title: GRAD SEMINAR IN COMPUTER SCIENCE
Department: Computer Science
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Methods for designing and analyzing computer algorithms and data structures. The focus of this course will be on the theoretical and mathematical aspects of algorithms and data structures. Cross-list: ELEC 598, MECH 598. Graduate/Undergraduate Equivalency: COMP 498. Mutually Exclusive: Credit cannot be earned for COMP 598 and COMP 498.

COMP 598 - GRADUATE SEMINAR IN ROBOTICS
Short Title: GRAD SEMINAR IN ROBOTICS
Department: Computer Science
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Methods for designing and analyzing computer algorithms and data structures. The focus of this course will be on the theoretical and mathematical aspects of algorithms and data structures. Cross-list: ELEC 598, MECH 598. Graduate/Undergraduate Equivalency: COMP 498. Mutually Exclusive: Credit cannot be earned for COMP 598 and COMP 498.

COMP 600 - GRADUATE SEMINAR IN COMPUTER SCIENCE
Short Title: GRAD SEMINAR IN COMPUTER SCIENCE
Department: Computer Science
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students. Enrollment limited to students in a Doctor of Philosophy or Master of Science degrees.
Course Level: Graduate
Description: The seminar course meets weekly to discuss current research results by graduate students in the Computer Science Department. Senior Ph.D. Students are expected to present their research results. This course is open ONLY to MS and Ph.D. Students. MCS students may NOT take this course for credit without the consent of the instructor. Repeatable for Credit.
Course URL: www.clear.rice.edu/comp600/
COMP 601 - WRITING AND EDITING CONFERENCE PAPERS
Short Title: WRITING & EDITING CONF PAPERS
Department: Computer Science
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is a seminar on technical writing and preparing publications for peer review. The focus is on conference papers, around 6-10 pages in length. The main topics are: 1) The structure of a conference publication, with guest lectures from the faculty. 2) Good daily writing habits with a group accountability system. 3) Editing techniques and the development of a departmental "writing community" with interactive editing sessions. This course will cover a few topics from ENGI 600, but the main focus will be on short computer science conference documents and interactive peer editing. ENGI 600 is still the correct course to take for writing in general, thesis preparation, or journal publications. This course will complement COMP 600, and to develop the same community for writing as this class does for presentations. Repeatable for Credit.

COMP 602 - NEURAL MACHINE LEARNING AND DATA MINING II
Short Title: NEURAL MACHINE LEARNING II
Department: Computer Science
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ELEC 502 or COMP 502 or STAT 502
Description: Advanced topics in ANN theories, with a focus on learning high-dimensional complex manifolds with neural maps (Self-Organizing Maps, Learning Vector Quantizers and variants). Application to data mining, clustering, classification, dimension reduction, sparse representation. The course will be a mix of lectures and seminar discussions with active student participation, based on most recent research publications. Students will have access to professional software environment to implement theories. Cross-list: ELEC 602, STAT 602. Repeatable for Credit.
Course URL: www.ece.rice.edu/~rzsebet/NMLcourseII.html

COMP 607 - AUTOMATED PROGRAM VERIFICATION
Short Title: AUTOMATED PROGRAM VERIFICATION
Department: Computer Science
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Methods, tools and theories for reasoning about problems with physical constraints. The student may elect to perform a project at the end of the class on a potential project idea; for students that choose to do a semester-long project, they will also submit a six-page report on their project, in addition to giving a final presentation. Instructor Permission Required. Repeatable for Credit.

COMP 608 - PHYSICAL COMPUTING
Short Title: PHYSICAL COMPUTING
Department: Computer Science
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Methods, tools and theories for reasoning about problems with physical constraints. The student may elect to perform a project to receive more than 1 credit hour. Instructor Permission Required. Repeatable for Credit.
Course URL: www.cs.rice.edu/~vardi/comp607/

COMP 620 - GRADUATE SEMINAR IN DISTRIBUTED COMPUTING
Short Title: GRAD SEMINAR DIST COMPUTING
Department: Computer Science
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Content varies at discretion of instructor. Repeatable for Credit.
COMP 693 - ADVANCED TOPICS-COMPUTER SYSTEMS  
**Short Title:** ADV TOPICS - COMPUTER SYSTEMS  
**Department:** Computer Science  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 1-3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course is a discussion based seminar about state of the art embedded and digital signal processing systems, with emphasis on both hardware architectures as well as software tools, programming models, and compilers. The seminar focuses on state of the art academic and commercial offerings in these areas. Cross-list: ELEC 693. Repeatable for Credit.

COMP 694 - HOW TO BE A CHIEF TECHNOLOGY OFFICER  
**Short Title:** HOW TO BE A CTO  
**Department:** Computer Science  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Survey of the component and standards trends that are the basis of personal computers and digital appliances with the aim of predicting technologies, solutions, and new products five years into the future. Examples of these technologies are dual Core processors, iPods and their evolution, mobile wireless data devices, and even Google vs. Microsoft. Students will each pick a topic important to the digital lifestyle and through a series of one-on-one sessions develop a depth of understanding that is presented to the class. Formerly "Future Personal Computing Technologies." Cross-list: ELEC 694.  
**Course URL:** [www.ece.rice.edu/Courses/694.html/](http://www.ece.rice.edu/Courses/694.html/)

COMP 696 - RTG CROSS-TRAINING IN DATA SCIENCE  
**Short Title:** RTG CROSS-TRAINING IN DATA SCI  
**Department:** Computer Science  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hour:** 1  
**Restrictions:** Enrollment is limited to students with a major in Computer Science or Statistics. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** A seminar course to introduce students to topics in Data Science at the interface between Statistics and Computer Science. Students participate in the process of preparing, delivering and critiquing talks. Topics change each semester. Instructor Permission Required. Cross-list: STAT 696. Graduate/ Undergraduate Equivalency: COMP 496. Mutually Exclusive: Credit cannot be earned for COMP 696 and COMP 496. Repeatable for Credit.

Dissertation/Thesis Submission (DSRT)  
**DSRT 100 - FINDING YOUR WAY OUT**  
**Short Title:** FINDING YOUR WAY OUT  
**Department:** Dean of Undergraduates  
**Grade Mode:** Standard Letter  
**Course Type:** Independent Study  
**Credit Hours:** 3  
**Course Level:** Undergraduate Lower-Level  
**Description:** Study of the nature of the Earth and its processes. Cross-list: ENST 101. Mutually Exclusive: Credit cannot be earned for ESCI 101 and ESCI 115/ESCI 301.

Earth Science (ESCI)  
**ESCI 101 - THE EARTH**  
**Short Title:** THE EARTH  
**Department:** Earth/Environmnt/Planetary Sci  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group III  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Description:** Study of the nature of the Earth and its processes. Cross-list: ENST 101. Mutually Exclusive: Credit cannot be earned for ESCI 101 and ESCI 115/ESCI 301.

**ESCI 102 - HISTORY OF THE EARTH AND LIFE**  
**Short Title:** HISTORY OF THE EARTH & LIFE  
**Department:** Earth/Environmnt/Planetary Sci  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group III  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Description:** Study of Earth's systems over the past 4.6 billion years. Topics include evolution of life, continents, ocean basins and climate. Cross-list: ENST 102.

**ESCI 103 - FIELD TRIPS FOR THE EARTH**  
**Short Title:** FIELD TRIPS FOR THE EARTH  
**Department:** Earth/Environmnt/Planetary Sci  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Distribution Group:** Distribution Group III  
**Credit Hour:** 1  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Description:** Three evening lectures of two hours each; one weekend long field trip.
ESCI 106 - INVESTIGATING EARTH'S SURFACE
Short Title: INVESTIGATING EARTH'S SURFACE
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will be investigation-based course covering processes on Earth's surface, such as carbon cycling, ocean and atmospheric circulation, and climate change. Lectures will be minimal. Most work will be in-class assignments.

ESCI 107 - OCEANS AND GLOBAL CHANGE
Short Title: OCEANS AND GLOBAL CHANGE
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Overview of the impact of the ocean and ocean evolution on the Earth's climate. Includes geological, physical, chemical, and biological aspects of change.

ESCI 108 - CRISES OF THE EARTH
Short Title: CRISES OF THE EARTH
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Geological and environmental crises have affected Earth throughout history. Included are meteorite impacts, global extinctions, volcanic eruptions, earthquakes, tsunamis, effect of humans on environment, as well as an overview of historical perspectives, scientific background, and development of these processes, the development of predictive scenarios, and society's adaptations to such hazards.

ESCI 109 - OCEANOGRAPHY
Short Title: OCEANOGRAPHY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to the oceans, with an emphasis on how the physics, chemistry, geology, and biology of the oceans are linked.

ESCI 110 - ENERGY, THE ENVIRONMENT, AND SOCIETY
Short Title: ENERGY, ENVIRONMENT, & SOCIETY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Undergraduate seminar on current issues in energy used by industrial society, energy resources and their impact on the environment. Offered on demand.

ESCI 113 - ENVIRONMENTAL CRISIS SEMINAR
Short Title: ENVIRONMENTAL CRISIS SEMINAR
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Discussion of environmental crises. Topics vary annually. Cross-list: EBIO 113, ENST 113. Repeatable for Credit.

ESCI 114 - NATURAL DISASTER SEMINAR
Short Title: NATURAL DISASTER SEMINAR
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Discussion of natural disasters. Topics vary annually. Cross-list: ENST 114. Repeatable for Credit.

ESCI 115 - INTRODUCTION TO THE EARTH
Short Title: INTRODUCTION TO THE EARTH
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course provides a comprehensive introduction to the Earth, its origins and composition, and the processes that change it, covering rock and mineral identification, geologic maps, plate tectonics and its causes, Earth structure and geophysics, sedimentology and stratigraphy, and surface processes. Mutually Exclusive: Credit cannot be earned for ESCI 115 and ESCI 101/ESCI 301.
ESCI 201 - THE SCIENCE BEHIND EARTH GLOBAL WARMING AND CLIMATE CHANGE
Short Title: SCIENCE BEHIND GLOBAL WARMING
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course will introduce the students to the science behind last century Earth global warming in the context of the past records of global Earth climate variability and forecast of Earth climate in the next century. Cross-list: ENST 201.

ESCI 214 - THE PLANETS
Short Title: THE PLANETS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The physical, chemical, and geological development of the solar system from 4.6 billion years ago until today. All planets, their major satellites, comets, and asteroids will be discussed.

ESCI 307 - ENERGY AND THE ENVIRONMENT
Short Title: ENERGY AND THE ENVIRONMENT
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores the physical principles of energy use and its impact on Earth's environment and climate. Topics will include energy mechanics, climate change, and the environmental impacts and future prospects of various fossil fuel and alternative energy sources. Cross-list: CEVE 307, ENST 307.

ESCI 321 - EARTH SYSTEM EVOLUTION AND CYCLES
Short Title: EARTH SYSTEM EVOLUTION/CYCLES
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ESCI 101 (may be taken concurrently) or ESCI 115 (may be taken concurrently) or ESCI 301 (may be taken concurrently)
Description: This course introduces the systems and processes that shape Earth's surface including weathering, sediment transport, ocean and atmosphere circulation, accumulation of sedimentary material and organisms, including man. This course requires a once-a-week 3-hour lab. Prerequisites ESCI 101 or ESCI 115 or ESCI 301 can be taken concurrently or with permission of instructor. Recommended Prerequisite(s): MATH 101, 102, PHYS 101 or 111, CHEM 121 or 151.

ESCI 322 - EARTH CHEMISTRY AND MATERIALS
Short Title: EARTH CHEMISTRY & MATERIALS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ESCI 101 (may be taken concurrently) or ESCI 115 (may be taken concurrently) or ESCI 301 (may be taken concurrently)
Description: This course introduces rock-forming processes related to the chemical and physical differentiation of the solid Earth into its main reservoirs: continental crust, oceanic crust, mantle, and core. Beginning with the bulk Earth and an overview of the chemical and petrologic properties of the rocks that make up each of these reservoirs. The basic principles of igneous, metamorphic and sedimentary petrology will be presented in the context of the rock cycle, plate tectonics, as well as the origin of economically and societally important ore deposits. A laboratory and field trip, where students will see petrologic principles applied, will be required. Prerequisites ESCI 101, ESCI 115 or ESCI 301 can be taken concurrently or with permission of instructor. Recommended prerequisite(s): MATH 101 and MATH 102, CHEM 121 or CHEM 151.

ESCI 323 - EARTH STRUCTURE & DEFORMATION
Short Title: EARTH STRUCTURE & DEFORMATION
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ESCI 101 (may be taken concurrently) or ESCI 115 (may be taken concurrently) or ESCI 301 (may be taken concurrently)
Description: Introduction to the mechanics and deformation of the Earth's crust and lithosphere, emphasizing rock strength and rheology, earthquakes and faulting, brittle and ductile deformation mechanisms and processes, and an introduction to tectonic systems. Lab will develop skills for recognition, interpretation, and analysis of deformation structures and processes on maps, cross-sections and seismograms. Prerequisites ESCI 101 or ESCI 115 or ESCI 301 can be taken concurrently or with permission of instructor. Recommended Prerequisite(s): MATH 101 and (PHYS 101 or PHYS 111). These may be taken concurrently. Mutually Exclusive: Credit cannot be earned for ESCI 323 and ESCI 333.
ESCI 324 - EARTH'S INTERIOR
Short Title: EARTH'S INTERIOR
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ESCI 101 (may be taken concurrently) or ESCI 115 (may be taken concurrently) or ESCI 301 (may be taken concurrently)
Description: Introduction to the mechanics and deformation of Earth's crust and lithosphere, emphasizing rock strength and rheology, earthquakes and faulting, brittle and ductile deformation mechanism and processes, and an introduction to tectonic systems. Lab will develop skills for recognition, interpretation and analysis of deformation structures and processes on maps, cross-sections and seismograms. Prerequisites ESCI 101 or ESCI 115 or ESCI 301 may be taken concurrently or with permission of instructor. Recommended Prerequisite(s): MATH 211 and (PHYS 101 or PHYS 111 or PHYS 125 or PHYS 141) and (PHYS 102 or PHYS 112 or PHYS 126 or PHYS 142) and MATH 212 - may be taken concurrently.

ESCI 330 - GEOARCHAEOLOGY
Short Title: GEOARCHAEOLOGY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Anthropology or Earth Science. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Overview of the basics of the analysis of soils and sediments as related to archaeological deposits, and introducing the key concepts of surficial geology, site formation, landscape evolution, and the scope of depositional environments. Includes practical methods for describing stratigraphy, sediments and soil profiles in the field. Cross-list: ANTH 330.

ESCI 334 - GEOLOGICAL TECHNIQUES
Short Title: GEOLOGICAL TECHNIQUES
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Earth Science. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ESCI 322 and ESCI 323 (may be taken concurrently) and (ESCI 101 or ESCI 115 or ESCI 301)
Description: An introduction to the basic methods of description, recording, and interpretation of geologic features in the field, including rock and outcrop description, geologic mapping and cross-section construction. The course includes one or two required field trips during Saturdays, as well as a required seven day excursion either during Spring Break or during the semester. Taught every Spring. ESCI 323 may be taken concurrently with ESCI 334.

ESCI 340 - GLOBAL BIOGEOCHEMICAL CYCLES
Short Title: GLOBAL BIOGEOCHEMICAL CYCLES
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course introduces students to the coupled nature of the biosphere, atmosphere and hydrosphere using as focal points elemental cycles such as those of carbon and nitrogen. This is a writing-intensive class, and will include 3 required Saturday field trips. Cross-list: EBIO 340, ENST 340.

ESCI 380 - VISUALIZING NATURE
Short Title: VISUALIZING NATURE
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An experimental course combining the scientific disciplines of the earth sciences with the artistic disciplines of creative photography to study the natural landscape and related ecosystems. The course will combine classroom lectures and laboratory demonstrations in geoscience with classes in the use of digital and film-based cameras and illustrated lectures on recognized achievements in landscape photography. Extensive field trips will be scheduled. Students will travel frequently, at times in pairs, other times in larger groups and as a full class, accompanied by one or both professors. The budget for the course includes funding both for travel and for photography expenses. Instructor Permission Required. Cross-list: FOTO 390.

ESCI 390 - GEOLOGY FIELD CAMP
Short Title: GEOLOGY FIELD CAMP
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Field course typically involving geologic mapping in one or more of sedimentary, metamorphic, igneous rocks and structures. Not offered by Rice University. Students must take an approved field camp from another university and transfer credit to Rice University. Recommended Prerequisite(s): ESCI 334.

ESCI 391 - EARTH SCIENCE FIELD EXPERIENCE
Short Title: EARTH SCIENCE FIELD EXPERIENCE
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Comprises participating in an earth science expedition or research experience, follow-up analysis of some aspect of the data acquired, and a written report. Must be approved in advance by one of the department undergraduate advisors. Instructor Permission Required.
ESCI 401 - SEMINAR: UNDERGRADUATE HONORS THESIS
Short Title: SEM: UG HONORS THESIS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to and presentation of original undergraduate research for Earth Science Undergraduate Honors Thesis candidates. Students will be introduced to basic research protocols and approaches, and will learn how to give presentations on their research, and gain experience presenting their research. Repeatable for Credit.

ESCI 403 - SEMINAR: DEPARTMENT RESEARCH
Short Title: SEM: DEPARTMENT RESEARCH
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to current research in the Earth Science department. Students will learn how to give a presentation and will get experience presenting their research. Graduate/Undergraduate Equivalency: ESCI 603. Repeatable for Credit.

ESCI 404 - SEMINAR: DEPARTMENT RESEARCH
Short Title: SEM: DEPARTMENT RESEARCH
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to current research in the Earth Science department. Students will learn how to give a presentation and will get experience presenting their research. Graduate/Undergraduate Equivalency: ESCI 604. Repeatable for Credit.

ESCI 405 - SEMINAR: CURRENT RESEARCH IN EARTH SCIENCE
Short Title: SEM: CURR RESRCH EARTH SCIENCE
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A series of lectures and paper discussions in various areas of Earth science. Graduate/Undergraduate Equivalency: ESCI 605. Repeatable for Credit.

ESCI 406 - SEMINAR: CURRENT RESEARCH IN EARTH SCIENCE
Short Title: SEM: CURR RESRCH EARTH SCIENCE
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A series of lectures and paper discussions in various areas of Earth science. Graduate/Undergraduate Equivalency: ESCI 606. Repeatable for Credit.

ESCI 407 - INTRODUCTION TO BIOGEOCHEMISTRY II
Short Title: INTRO TO BIOGECHEM II
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The interaction between (micro) organisms, minerals, rocks, and aqueous solutions is an important new field of research that requires an interdisciplinary approach between (micro) biology, organic chemistry, and geochemistry. This course provides an introduction and insight into this exciting new field and puts an emphasis on quantitative strategies. Taught every other Fall. Instructor Permission Required. Graduate/Undergraduate Equivalency: ESCI 607. Mutually Exclusive: Credit cannot be earned for ESCI 407 and ESCI 607.

ESCI 409 - INTRODUCTION TO MATLAB AND NUMERICAL METHODS FOR EARTH SCIENCE
Short Title: INTRO TO PROGRAMMING IN MATLAB
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 102
Description: The course introduces students to the Matlab programming language and topics may include: importing and exporting data; working with vectors and matrices; curve fitting; data smoothing and filtering; data regression; data visualization; optimization; solving differential equations. The course is built around progressive programming assignments. Graduate/Undergraduate Equivalency: ESCI 609. Recommended Prerequisite(s): Undergrad math through calculus. Mutually Exclusive: Credit cannot be earned for ESCI 409 and ESCI 609.

ESCI 410 - OPTICAL MINERALOGY AND PETROGRAPHY
Short Title: OPTICAL MINERALOGY & PETROGRPH
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ESCI 322
Description: This is a lab course focused on the identification of minerals with petrographic microscopy. Principles of crystallography, mineral optics, and mineral chemistry will be covered in the first third of the course. The second third of the course will focus on the identification of minerals in igneous, metamorphic, and sedimentary rocks with emphasis on petrogenetic interpretation. The last third of the course will involve each student working on specific petrologic themes in the context of regional tectonics or magmatic processes. Taught every other Fall. Graduate/Undergraduate Equivalency: ESCI 610. Mutually Exclusive: Credit cannot be earned for ESCI 410 and ESCI 610.
ESCI 411 - ADVANCED PETROLOGY II
Short Title: ADVANCED PETROLOGY II
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will bring together constraints from field geology, petrography, petrology, geochemistry, and geodynamics to tackle advanced A87 research questions of whole Earth processes that are relevant in the 21st century. The topics that may be covered include, but are not limited to, interplay between magmatic and tectonic processes, magma generation, migration, extraction, and dynamic stability in various settings, magmatic differentiation, volatiles and fluids exchange between various reservoirs and effects on long-term climate, ore genesis, and formation and modification of continents. Graduate/Undergraduate Equivalency: ESCI 611. Mutually Exclusive: Credit cannot be earned for ESCI 411 and ESCI 611.

ESCI 412 - ADVANCED PETROLOGY
Short Title: ADVANCED PETROLOGY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ESCI 322
Description: Evaluation of the evolution of igneous rocks in the Earth's crust and mantle. Topics will include phase equilibria, experimental studies, and geochemistry. Labs will stress thin section petrography. Graduate/Undergraduate Equivalency: ESCI 612. Mutually Exclusive: Credit cannot be earned for ESCI 412 and ESCI 612. Repeatable for Credit.

ESCI 415 - DECISION MAKING AND ECONOMICS IN THE ENERGY INDUSTRY
Short Title: DECISION MAKING AND ECONOMICS IN THE ENERGY INDUSTRY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will provide students with an understanding of how energy projects are evaluated. Topics include resource-size determination, geologic and economic risk, discounted cash-flow economics, and other common methods used in decision making. Emphasis will be placed on working in teams to understand basic concepts and sensitivities. Graduate/Undergraduate Equivalency: ESCI 615. Recommended Prerequisite(s): ESCI 321 and ESCI 323. Mutually Exclusive: Credit cannot be earned for ESCI 415 and ESCI 615.

ESCI 416 - ECONOMIC GEOLOGY MINERAL DEPOSITS
Short Title: ECON GEOL MINERAL DEPOSITS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Advanced course that will provide a quantitative overview of groundwater hydrology. Emphasis will be placed on mastering concepts in fluid mechanics and applying these concepts to water supply, environmental, and geological problems. Cross-list: CEVE 418. Graduate/Undergraduate Equivalency: ESCI 618. Mutually Exclusive: Credit cannot be earned for ESCI 418 and ESCI 618.

ESCI 417 - PETROLEUM INDUSTRY ECONOMICS AND MANAGEMENT
Short Title: PETROLEUM IND ECONOMICS MGMT
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An overview of metallic and nonmetallic mineral deposits, theories of their origin, and classification. The impact of government regulation, economics, production practices, and exploration will be considered. Graduate/Undergraduate Equivalency: ESCI 616. Mutually Exclusive: Credit cannot be earned for ESCI 416 and ESCI 616.

ESCI 418 - QUANTITATIVE HYDROGEOLOGY
Short Title: QUANTITATIVE HYDROGEOLOGY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Topics covered include resource size determination; geologic chance factors; the concepts of present worth, investment efficiency, rates of return. Price forecasting, cost inflation are discussed. Graduate/Undergraduate Equivalency: ESCI 617. Recommended Prerequisite(s): ESCI 415. Mutually Exclusive: Credit cannot be earned for ESCI 417 and ESCI 617.

ESCI 419 - MATERIALS CHARACTERIZATION
Short Title: MATERIALS CHARACTERIZATION
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 121 or CHEM 151
Description: This course will provide an overview of various characterization methods used in geological, chemical, material science and other natural science and engineering research. The techniques that will be discussed include but not limited to electron beam methods (imaging and spectroscopy), X-ray methods, ion-beam analysis, vibrational spectroscopies, and Synchrotron-based techniques. Graduate/Undergraduate Equivalency: ESCI 619. Mutually Exclusive: Credit cannot be earned for ESCI 419 and ESCI 619.
ESCI 421 - PALEOCEANOGRAPHY
Short Title: PALEOCEANOGRAPHY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ESCI 321
Description: Introduction to the physical processes governing deep-sea sedimentation. Graduate/Undergraduate Equivalency: ESCI 621. Recommended Prerequisite(s): ESCI 109. Mutually Exclusive: Credit cannot be earned for ESCI 421 and ESCI 621.

ESCI 422 - PALEOCLIMATE AND MODERN CLIMATE CHANGE
Short Title: PALEOCLIMATE
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ESCI 101 or ESCI 115 or ESCI 301 or ESCI 321
Description: Climate change is a widely discussed and, often, debated topic in society today. This course will focus on scientific observations of Earth's climate in the past, records of modern climate variability, and projections of future climate change as well as geologic and instrumental records of climate change and science communication. Graduate/Undergraduate Equivalency: ESCI 622. Mutually Exclusive: Credit cannot be earned for ESCI 422 and ESCI 622.

ESCI 423 - ANTARCTIC MARINE GEOLOGY
Short Title: ANTARCTIC MARINE GEOLOGY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ESCI 321
Description: The study of marine geologic principles and processes using examples from the Southern Oceans. Graduate/Undergraduate Equivalency: ESCI 623. Recommended prerequisite(s): ESCI 321. Mutually Exclusive: Credit cannot be earned for ESCI 423 and ESCI 623.

ESCI 424 - ORGANIC GEOCHEMISTRY
Short Title: ORGANIC GEOCHEMISTRY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course covers the organic geochemistry of the natural environment. Topics include: production, transport, decomposition, and storage of organic matter in the marine and terrestrial environments, use of isotopes to track biogeochemical processes and natural and perturbed carbon cycle issues, including past and recent climate shifts. Cross-list: CHEM 425, ENST 425. Graduate/Undergraduate Equivalency: ESCI 625. Mutually Exclusive: Credit cannot be earned for ESCI 425 and ESCI 625.

ESCI 425 - INTERPRETATION OF REGIONAL 2-D SEISMIC DATA
Short Title: INTER REGIONAL 2D SEISMIC DATA
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will introduce students to analysis of sub-regional structural and stratigraphic frameworks. We will utilize the interpretation of 2D seismic profiles to reconstruct basin history and discuss implications for petroleum systems. Students will gain an understanding of a variety of structural and stratigraphic styles, as expressed on seismic data. Instructor Permission Required. Graduate/Undergraduate Equivalency: ESCI 626. Mutually Exclusive: Credit cannot be earned for ESCI 426 and ESCI 626.

ESCI 427 - SEQUENCE STRATIGRAPHY
Short Title: SEQUENCE STRATIGRAPHY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ESCI 321
Description: This course will introduce students to the concepts of sequence stratigraphy and the power behind this correlation technique. The course is divided between classic sequence stratigraphy using cores, well-logs, and outcrop examples and seismic sequence stratigraphy. Graduate/Undergraduate Equivalency: ESCI 627. Mutually Exclusive: Credit cannot be earned for ESCI 427 and ESCI 627.

ESCI 428 - MAGMATIC, VOLCANIC AND HYDROTHERMAL PROCESSES
Short Title: VOLCANIC PROCESSES
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will introduce students to analysis of sub-regional structural and stratigraphic frameworks. We will utilize the interpretation of 2D seismic profiles to reconstruct basin history and discuss implications for petroleum systems. Students will gain an understanding of a variety of structural and stratigraphic styles, as expressed on seismic data. Instructor Permission Required. Graduate/Undergraduate Equivalency: ESCI 626. Mutually Exclusive: Credit cannot be earned for ESCI 426 and ESCI 626.
ESCI 430 - TRACE-ELEMENT AND ISOTOPE GEOCHEMISTRY FOR EARTH AND ENVIRONMENTAL SCIENCE

Short Title: TRACE-ELEMENT& ISOTOPE GEOCHEM
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to the principles of trace-element and isotope geochemistry and their applications to high and low temperature processes in the earth. Topics to be covered are trace-element partitioning, basic quantum physics, radiogenic isotopic systems and stable isotope fractionation. Graduate/Undergraduate Equivalency: ESCI 630. Recommended Prerequisite(s): ESCI 322. Mutually Exclusive: Credit cannot be earned for ESCI 430 and ESCI 630.

ESCI 431 - GEOMORPHOLOGY

Short Title: GEOMORPHOLOGY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ESCI 321
Description: This course will investigate physical, chemical, and biological processes that contribute to the development and shaping of Earth’s surface across a continuum of subaerial and subaqueous environments. Mandatory 4-day field trip is associated with this class. Instructor Permission Required. Graduate/Undergraduate Equivalency: ESCI 631. Repeatable for Credit.

ESCI 435 - MECHANICS OF SEDIMENT TRANSPORT

Short Title: MECHANICS-SEDIMENT TRANSPORT
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Evaluation of sedimentary transport dynamics: physical interaction between fluid flow and sediment mobility, from grain to bedform scale; exploration of environments including rivers, estuaries, deltas, coastlines, and deserts. Examination of sediment transport for geology, environmental, and engineering applications; formation of diagnostic sedimentary features recognized in the stratigraphic record. Instructor Permission Required. Graduate/Undergraduate Equivalency: ESCI 635. Mutually Exclusive: Credit cannot be earned for ESCI 435 and ESCI 635.

ESCI 436 - WELL LOGGING AND PETROPHYSICS

Short Title: WELL LOGGING AND PETROPHYSICS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of the principles and procedures involved in geophysical exploration. Includes acquisition, processing, and interpretation of seismic, ground-penetrating radar, gravity, magnetic, and electrical data. Graduate/Undergraduate Equivalency: ESCI 642. Mutually Exclusive: Credit cannot be earned for ESCI 436 and ESCI 636.

ESCI 440 - GEOPHYSICAL DATA ANALYSIS: DIGITAL SIGNAL PROCESSING

Short Title: GEOPHYSICAL DATA ANALYSIS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 101 and MATH 102
Description: Data sampling, aliasing, discrete Fourier transform, digital filter design techniques, z-transform, and discrete Hilbert transform are introduced. Deconvolution, velocity filters, polarization filter, stacking, beam forming and migration techniques will be taught together with their application in geophysical studies. Graduate/Undergraduate Equivalency: ESCI 640. Mutually Exclusive: Credit cannot be earned for ESCI 440 and ESCI 640.

ESCI 441 - GEOPHYSICAL DATA ANALYSIS: INVERSE METHODS

Short Title: GEOPHYSICAL DATA ANALYSIS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 211
Description: Review of linear algebra and probability. Data fitting, model parameter estimation, inverse theory, linear and nonlinear methods, and global optimization. Graduate/Undergraduate Equivalency: ESCI 641. Mutually Exclusive: Credit cannot be earned for ESCI 441 and ESCI 641.

ESCI 442 - EXPLORATION GEOPHYSICS

Short Title: EXPLORATION GEOPHYSICS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 101 and (PHYS 101 or PHYS 102 or PHYS 111 or PHYS 112)
Description: Study of the principles and procedures involved in geophysical exploration. Includes acquisition, processing, and interpretation of seismic, ground-penetrating radar, gravity, magnetic, and electrical data. Graduate/Undergraduate Equivalency: ESCI 642. Mutually Exclusive: Credit cannot be earned for ESCI 442 and ESCI 642.
ESCI 444 - REFLECTION SEISMIC DATA PROCESSING
Short Title: REFLEC SEISMIC DATA PROCESSING
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ESCI 442
Description: Experience with processing reflection seismic data. Includes seismic data organization, velocity analysis, stacking, filtering, deconvolution, migration, and display, using the Center for Computational Geophysics facility's seismic processing system(s). Recommended
Prerequisite(s): ESCI 442. Mutually Exclusive: Credit cannot be earned for ESCI 444 and ESCI 564.

ESCI 450 - REMOTE SENSING
Short Title: REMOTE SENSING
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to electromagnetic remote sensing of the earth and other planets using passive and active methods. The course includes a computer lab component involving processing and interpretation of remote sensing imagery, and an individual project. Cross-list: CEVE 450. Graduate/Undergraduate Equivalency: ESCI 650. Mutually Exclusive: Credit cannot be earned for ESCI 450 and ESCI 650.

ESCI 452 - GIS FOR SCIENTISTS AND ENGINEERS
Short Title: GIS FOR SCIENTISTS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ESCI 321 or ESCI 322 or ESCI 323 or ESCI 324) and (ESCI 321 or ESCI 322 or ESCI 323 or ESCI 324)
Description: Basic principles of Geographic Information Systems, with a focus on effectively applying the technology to the geosciences. Main platform of the class will be ESRI's ArcGIS, but a wide array of other tools will also be introduced. Material will be delivered via a blend of lecture and hands-on exercises. Graduate/Undergraduate Equivalency: ESCI 652. Mutually Exclusive: Credit cannot be earned for ESCI 452 and ESCI 652.

ESCI 454 - GEOGRAPHIC INFORMATION SCIENCE
Short Title: GEOGRAPHIC INFORMATION SCIENCE
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to Geographic Information Systems (GIS) technology, mapping sciences, and spatial analysis. The course will include extensive computer use and the completion of a major individual project on a topic selected by the student. Cross-list: CEVE 453. Graduate/Undergraduate Equivalency: ESCI 654. Mutually Exclusive: Credit cannot be earned for ESCI 454 and ESCI 654.

ESCI 456 - PLANETARY VOLCANISM
Short Title: PLANETARY VOLCANISM
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar will cover the broad range of volcanic phenomena in the solar system, via weekly readings of, and student presentations on, classic and recent papers. Topics include: Composition (basaltic, silicic, unusual, carbonatite), cryovolcanism, structure (caldera, rift zones, volcanic spreading radiating dike systems, magma chambers, and sill complexes), and dynamics (eruption mechanism, effusive vs. explosive, volatiles and atmospheres/oceans). The planetary settings to be considered include Earth, Venu, Mars, Mercury, Moon, large asteroids and outer planet satellites. Graduate/Undergraduate Equivalency: ESCI 656. Mutually Exclusive: Credit cannot be earned for ESCI 456 and ESCI 656.

ESCI 460 - GEOLOGICAL AND GEOPHYSICAL FLUID DYNAMICS
Short Title: GEOL & GEOPHYS FLUID DYNAMICS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 211 and MATH 212
Description: Advanced course in the foundations of fluid mechanics and its application to Earth science. Aspects of continuum mechanics, heat and mass transfer, and the rheologic behavior of materials will be covered in developing the fundamental laws that describe fluid motion. Applications include atmospheric dynamics, mantle and lithospheric dynamics, and hydrogeology. Graduate/Undergraduate Equivalency: ESCI 660. Mutually Exclusive: Credit cannot be earned for ESCI 460 and ESCI 660.

ESCI 461 - SEISMOLOGY I
Short Title: SEISMOLOGY I
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Principles of elastic wave propagation, the determination of Earth structure, and the understanding of earthquake physics. Graduate/Undergraduate Equivalency: ESCI 661. Mutually Exclusive: Credit cannot be earned for ESCI 461 and ESCI 661.
ESCI 462 - TECTONOPHYSICS
Short Title: TECTONOPHYSICS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 102 or PHYS 102 or PHYS 112
Description: Applications of continuum physics to the deformation, flexure, heat transfer, and gravity field of the lithosphere. Graduate/Undergraduate Equivalency: ESCI 662. Recommended Prerequisite(s): MATH 212. Mutually Exclusive: Credit cannot be earned for ESCI 462 and ESCI 662.

ESCI 463 - STRUCTURE AND EVOLUTION OF TECTONIC SYSTEMS
Short Title: TECTONIC SYSTEMS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ESCI 323
Description: The distribution, origin, and evolution of various tectonic systems, and characterization of their structural and geophysical signatures, emphasizing crustal and lithospheric processes associated with tectonic deformation. Review of representative global examples of convergent and collisional margins, divergent and passive margins, and transform margins. Graduate/Undergraduate Equivalency: ESCI 663. Mutually Exclusive: Credit cannot be earned for ESCI 463 and ESCI 663.

ESCI 464 - GLOBAL TECTONICS
Short Title: GLOBAL TECTONICS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 121 or PHYS 101 or PHYS 102
Description: Geometrical aspects of plate tectonics, the 3 traditional types of plate boundaries, instantaneous plate motions, earthquakes and faulting, space geodesy, geomagnetic reversals, paleomagnetic poles, hotspots, "absolute" plate motion, true polar wander, driving forces, diffuse plate boundaries, plate nonrigidity, and rheology of the lithosphere. Graduate/Undergraduate Equivalency: ESCI 664. Mutually Exclusive: Credit cannot be earned for ESCI 464 and ESCI 664.

ESCI 467 - GEOMECHANICS
Short Title: GEOMECHANICS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An examination of deformation and failure processes within the Earth's shallow crust, with a focus on rock and sediment mechanics, and associated fluid processes. Emphasis will be on geologic applications, including sediment consolidation, slope stability, fault mechanics, and earthquake nucleation and rupture. Graduate/Undergraduate Equivalency: ESCI 667. Mutually Exclusive: Credit cannot be earned for ESCI 467 and ESCI 667.

ESCI 471 - EARTH SYSTEMS MODELING I: PHILOSOPHY AND FUNDAMENTALS
Short Title: EARTH SYSTEMS MODELING I
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 121 or PHYS 101 or PHYS 102
Description: Introduction to numerical methods with applications in Earth Science using Matlab and COMSOL. Much of the class is spent in the computer lab learning Matlab and COMSOL, followed by hands-on exercises. Graduate/Undergraduate Equivalency: ESCI 671. Recommended Prerequisite(s): MATH 211. Mutually Exclusive: Credit cannot be earned for ESCI 471 and ESCI 671. Repeatable for Credit.

ESCI 472 - EARTH SYSTEMS MODELING: NUMERICAL TECHNIQUES AND APPLICATIONS
Short Title: NUMERICAL METHODS EARTH SYSTEM
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 121 or PHYS 101 or PHYS 102
Description: Introduction to numerical methods with applications in Earth Science using Matlab and COMSOL. Much of the class is spent in the computer lab learning Matlab and COMSOL, followed by hands-on exercises. Graduate/Undergraduate Equivalency: ESCI 671. Recommended Prerequisite(s): MATH 211. Mutually Exclusive: Credit cannot be earned for ESCI 471 and ESCI 671. Repeatable for Credit.

ESCI 481 - UNDERGRADUATE RESEARCH IN EARTH SCIENCE
Short Title: UNDERGR RESEARCH EARTH SCIENCE
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Advanced work adapted to the needs of the individual undergraduate student reading. Instructor Permission Required. Repeatable for Credit.

ESCI 491 - SPECIAL STUDIES FOR UNDERGRADUATES
Short Title: SPECIAL STUDY FOR UNDERGRADS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Work in Earth Science adapted to the needs of individual undergraduate research. Instructor Permission Required. Repeatable for Credit.
ESCI 499 - GRAPHIC AND VISUAL DESIGN FOR SCIENTISTS
Short Title: VISUAL DESIGN FOR SCIENTISTS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A significant portion of a scientist's time is spent solving visual design problems (graphics for papers, visual layouts for seminars, posters, teaching). Effective communication of scientific information is part of a scientist's skill set. This class is designed to enhance that skill set in terms of presenting visual information clearly, simply, and effectively. Instructor Permission Required. Graduate/Undergraduate Equivalency: ESCI 699. Mutually Exclusive: Credit cannot be earned for ESCI 499 and ESCI 699. Repeatable for Credit.

ESCI 501 - SPECIAL STUDIES FOR GRADUATE STUDENTS
Short Title: SPECIAL STUDIES GRAD STUDENTS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Independent Study
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced work in Earth science adapted to the needs of individual graduate students. Instructor Permission Required. Repeatable for Credit.

ESCI 502 - FIELD TRIP FOR ADVANCED GEOLOGY AND PETROLOGY
Short Title: FIELD TRIP-ADV GEOL & PETROL
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ESCI 322 and ESCI 334
Description: A field trip course centered on weekly readings and several mapping projects carried out over the course of 1 week. The course will focus on western North American geology with emphasis on igneous and metamorphic petrology and structural geology in the context of regional tectonics. Field studies will be accompanied by quantitative data collection and analysis. Each student will be responsible for a small field-based project. Instructor Permission Required. Repeatable for Credit.

ESCI 503 - CRYOSPHERE
Short Title: CRYOSPHERE
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ESCI 321
Description: The growth and decay of glaciers play a large role in modulating Earth's climate system. This course focuses on physical glaciology, glacial geomorphology, the geologic record of glaciation, and glacier-climate interactions in the past, present, and future.

ESCI 504 - SILICICLASTIC DEPOSITIONAL SYSTEMS
Short Title: SILICICLASTIC DEPOSITION SYST
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Characterization of modern and ancient shallow and deep sedimentary environments and facies. Includes examination of different depositional models in relation both to climate and to hydrographic and geographic settings, as well as three field trips. Meeting times will be determined after registration.

ESCI 505 - APPLIED SEDIMENTOLOGY II
Short Title: APPLIED SEDIMENTOLOGY II
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ESCI 504
Description: Advanced field studies in sedimentary geology. This course is intended to provide graduate students with experience working in sedimentary rocks by working on projects of their own design.

ESCI 506 - CARBONATE DEPOSITIONAL SYSTEMS
Short Title: CARBONATE DEPOSITIONAL SYSTEMS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ESCI 321
Description: Examination of modern and ancient carbonate sedimentary environments and facies. Includes examination of different depositional models in relation both to climate and to hydrographic and geographic settings, as well as three field trips.

ESCI 507 - SEMINAR: DEPARTMENT TYPE-LOCALE FIELD TRIPS
Short Title: SEM:DEPT-LOCALE-FIELD TRIPS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for Credit.

ESCI 508 - SEMINAR: GLOBAL SEISMOLOGY
Short Title: SEM:GLOBAL SEISMOLOGY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for Credit.

ESCI 509 - SEMINAR: DEPARTMENT TYPE-LOCALE FIELD TRIPS
Short Title: SEM:DEPT-LOCATE-FIELD TRIPS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for Credit.
ESCI 511 - PUTTING EARTH SCIENCE INTO ACTION
Short Title: SEM: EARTH SCIENCE INTO ACTION
Department: Earth/Environmt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for Credit.

ESCI 512 - SEMINAR: CARIBBEAN
Short Title: SEM: CARIBBEAN
Department: Earth/Environmt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for Credit.

ESCI 514 - ADVANCED BIOGEOCHEMISTRY
Short Title: ADVANCED BIOGEOCHEMISTRY
Department: Earth/Environmt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 1-4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will explore carbon, nitrogen, and water cycling at the advanced level. Instructor Permission Required. Repeatable for Credit.

ESCI 515 - GEOPHYSICAL FIELD WORK FOR EDUCATORS
Short Title: GEOPHYS FLD WK FOR EDUCATORS
Department: Earth/Environmt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course consists of 2 weeks of geophysical field work and is designated for in-service K-12 teachers. Instructor Permission Required. Repeatable for Credit.

ESCI 516 - TOPICS ON CARBONATES
Short Title: TOPICS ON CARBONATES
Department: Earth/Environmt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics may vary. 7-day field trip to Belize is required. Recommended Prerequisite(s): MATH 211. Repeatable for Credit.

ESCI 519 - SEMINAR: SEISMOLOGY
Short Title: SEM: SEISMOLOGY
Department: Earth/Environmt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for Credit.

ESCI 520 - SEMINAR: SEISMOLOGY
Short Title: SEM: SEISMOLOGY
Department: Earth/Environmt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for Credit.

ESCI 521 - SEMINAR: TECTONICS OF CONTINENTAL MARGINS
Short Title: SEM:TECTONICS-CONTINEN-MARGINS
Department: Earth/Environmt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for Credit.

ESCI 522 - SEMINAR: ADVANCED TOPICS IN GEFLUIDS, GEOTHERMICS, AND PLANETARY EVOLUTION
Short Title: SEM:GEFLUIDS/GEOTHERMICS, PLANET
Department: Earth/Environmt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for Credit.

ESCI 523 - SEMINAR: SEISMIC MODELING AND INVERSE METHODS
Short Title: SEM:SEISMICMODEL&INVERSEMETHOD
Department: Earth/Environmt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for Credit.

ESCI 524 - SEMINAR: ADVANCED TOPICS IN EARTH STRUCTURE AND DEFORMATION
Short Title: SEM:ADV TOPICS EARTH STRUCTURE
Department: Earth/Environmt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2,3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for credit. Please note there are two sections: Section 1 is a seminar with discussion for 2 credits. Section 2 is the seminar with discussion and a mandatory 1-week field trip for 3 credits. Instructor permission is required for Section 2. Repeatable for Credit.

ESCI 526 - SEMINAR: DEVELOPMENTS IN STRUCTURAL GEOLOGY
Short Title: SEM:DEVELOPSTRUCTURALGEOLOGY
Department: Earth/Environmt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for Credit.
ESCI 527 - SEMINAR: QUANTITATIVE PETROLEUM SYSTEMS ANALYSIS
Short Title: QUANT PETROLEUM SYS ANALYSIS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Course taught at the University of Houston. Repeatable for Credit.

ESCI 528 - SEMINAR: ADVANCED TOPICS IN HYDROGEOLOGY
Short Title: SEM:ADV TOPICS HYDROGEOLOGY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for Credit.

ESCI 529 - THE MOON: ORIGIN AND EVOLUTION OF EARTH’S COMPANION
Short Title: THE MOON: ORIGIN & EVOLUTION
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar course addresses fundamental issues in the origin and evolution of the Moon, spanning the disciplines of geology, geophysics, geochemistry and petrology. Sources range from classic studies to recent results from orbiting spacecraft and laboratory analysis. Readings will be supplemented by guest presentations from active researchers in the field. Repeatable for Credit.

ESCI 531 - ADVANCED TECTONOPHYSICS/GLOBAL TECTONICS
Short Title: ADV TECTONOPHY/GLOBL TECTONICS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar course addresses fundamental issues in the origin and evolution of the Moon, spanning the disciplines of geology, geophysics, geochemistry and petrology. Sources range from classic studies to recent results from orbiting spacecraft and laboratory analysis. Readings will be supplemented by guest presentations from active researchers in the field. Repeatable for Credit.

ESCI 532 - SEMINAR: TOPICS IN SEDIMENTOLOGY
Short Title: SEM:TOPICS-SEDIMENTOLOGY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for Credit.

ESCI 534 - CLASTIC DEPOSITIONAL SYSTEMS FIELD TRIP
Short Title: FIELD TRIP CLASTIC DEP SYSTEMS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ESCI 504
Description: This is a five day trip that takes place in northwestern New Mexico. The trip is intended for students with strong interests in sedimentology and stratigraphy and focuses on field methods in interpretation of clastic sedimentary deposits in terms of their depositional environment, sequence stratigraphic occurrence and reservoir and source rock potential. The field area includes four different basins, which provides further opportunity for discussion of sedimentary basin evolution. The course also includes reading assignments and class presentations on topics related to the trip. Repeatable for Credit.

ESCI 536 - SEMINAR: DEPARTMENT TYPE - LOCALE FIELD TRIP
Short Title: SEM: LOCALE FIELD TRIP
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2-4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (ESCI 321 (may be taken concurrently) and ESCI 322 (may be taken concurrently) and ESCI 323 (may be taken concurrently) and ESCI 324 (may be taken concurrently))
Description: Seminar topics vary depending on location of field trip. This is a Seminar/Trip type course combination. Undergraduates are required to take prerequisites to register for this course. Prerequisites do not apply for graduate students. Prerequisites may be taken concurrently. Additional fee may be required for this course. Instructor Permission Required. Repeatable for Credit.

ESCI 537 - ADVANCED TOPICS IN THE SOLID EARTH I
Short Title: ADV TOPICS - SOLID EARTH I
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary.

ESCI 538 - ADVANCED TOPICS IN THE SOLID EARTH II
Short Title: ADV TOPICS - SOLID EARTH II
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for Credit.
ESCI 539 - SEMINAR: TOPICS IN VOLCANOLOGY, MAGMATIC, AND HYDROTHERMAL PROCESSES  
Short Title: SEM: PHYSICAL VOLCANOLOGY  
Department: Earth/Environmnt/Planetary Sci  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Seminar  
Credit Hour: 1  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Seminar topics may vary. Reading and discussions about current topics related to magma generation, migration, accumulation and eruption, as well as hydrothermal systems. Repeatable for Credit.

ESCI 540 - EARTH'S ATMOSPHERE  
Short Title: EARTH'S ATMOSPHERE  
Department: Earth/Environmnt/Planetary Sci  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course will investigate the processes that lead to the development of sedimentary stratigraphy across a continuum of depositional environments, including: fluvial, deltaic, coastal near-shore, continental shelf and slope and abyssal settings. Material will include transport linkages based on studies from modern settings, and will also cover the unique stratigraphic signatures preserved in ancient depositional systems. Instructor Permission Required.

ESCI 542 - SEISMOLOGY II  
Short Title: SEISMOLOGY II  
Department: Earth/Environmnt/Planetary Sci  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Review of elastodynamics. Calculation of synthetic seismograms using asymptotic and finite-difference methods, wave propagation in layered and random media. Seismic migration and inversion using finite-difference. Kirchoff, and frequency-wave number methods.

ESCI 543 - INTRODUCTION TO THE DYNAMICS AND PHYSICAL PROPERTIES OF THE EARTH'S INTERIOR  
Short Title: DYNAMICS OF EARTH'S INTERIOR  
Department: Earth/Environmnt/Planetary Sci  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This seminar addresses fundamental issues in Mars science, spanning the disciplines of geology, geophysics, geochemistry and petrology. Sources range over six decades of data from flybys and orbiting spacecraft, landed stations and rovers, and laboratory analysis of meteorites and experiments. Readings will be supplemented by presentations from active Mars researchers. Instructor Permission Required.

ESCI 544 - HYDROCARBON EXPLORATION  
Short Title: HYDROCARBON EXPLORATION  
Department: Earth/Environmnt/Planetary Sci  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Overview of the Earth's deep interior with an emphasis on dynamical processes and physical properties of the Earth's mantle. Topics include: global energy budget; convective heat transfer; thermal evolution of the Earth; constitutive laws; rheology; seismic velocities; composition, density structure; thermal expansion; thermal conductivity. Taught every other Fall. Mutually Exclusive: Credit cannot be earned for ESCI 543 and ESCI 413.

ESCI 545 - HYDROCARBON SYSTEMS ANALYSIS  
Short Title: HYDROCARBON SYSTEMS ANALYSIS  
Department: Earth/Environmnt/Planetary Sci  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 4  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course has lecture, lab, and field components. Students will learn about the components of the hydrocarbon system and how to rank areas of a basin for prospectively. Activities will be organized on a class and small group basis. Recommended Prerequisite(s): ESCI 323 or ESCI 427/627.

ESCI 546 - ADVANCED TOPICS IN BASIN SEDIMENTOLOGY AND STRATIGRAPHY  
Short Title: ADV TOPICS: BASIN SEDIM & STRAT  
Department: Earth/Environmnt/Planetary Sci  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Review of elastodynamics. Calculation of synthetic seismograms using asymptotic and finite-difference methods, wave propagation in layered and random media. Seismic migration and inversion using finite-difference. Kirchoff, and frequency-wave number methods.
ESCI 548 - ADVANCED TOPICS IN FLUVIAL-DELTAIC SEDIMENTOLOGY AND STRATIGRAPHY  
**Short Title:** ADV TOPICS FLUVIAL-DELTAIC  
**Department:** Earth/Environmnt/Planetary Sci  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course will investigate physical and biological processes that contribute to the development of fluvial-deltaic environments. Materials will include deriving physical erosion, transport, and deposition laws, in order to evaluate modern processes that shape deltas and coastlines. The course will also focus on sedimentary deposits of fluvial-deltaic systems and preservation potential of the stratigraphy, by examining ancient depositional systems that are preserved in the rock record. The course will explore these topics by reviewing science literature that utilizes numerical, experimental, and field studies, to further theory on the development of fluvial-deltaic systems. Instructor Permission Required. Repeatable for Credit.

ESCI 550 - MODERN EXPLORATION TECHNOLOGY  
**Short Title:** MODERN EXPLORATION TECHNOLOGY  
**Department:** Earth/Environmnt/Planetary Sci  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** ESCI 442 or ESCI 642  
**Corequisite:** ESCI 564  
**Description:** Modern petroleum exploration techniques using geology, geophysics, and information technology methods. As new techniques emerge, the course will change to ensure that the course material mirrors the exploration industry. Mutually Exclusive: Credit cannot be earned for ESCI 550 and ESCI 420.

ESCI 552 - MARINE GEOLOGY SYSTEMS  
**Short Title:** MARINE GEOLOGY SYSTEMS  
**Department:** Earth/Environmnt/Planetary Sci  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course examines areas of the seafloor recently targeted by large-scale science projects, such as the ocean drilling program. The purpose is to understand current ocean geoscience problems, the research being conducted to address these problems, and preliminary results. Mutually Exclusive: Credit cannot be earned for ESCI 552 and ESCI 432.

ESCI 555 - MOUNTAINS, CLIMATE AND GLOBAL CARBON CYCLING  
**Short Title:** CARBON CYCLE  
**Department:** Earth/Environmnt/Planetary Sci  
**Grade Mode:** Satisfactory/Unsatisfactory  
**Course Type:** Seminar  
**Credit Hours:** 2  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** The purpose of this course is to discuss the origins of high elevations, such as mountains and epeirogenic uplifts, and their impacts of climate, global carbon cycling, and sedimentary processes. We will discuss the physics and chemistry of building mountains by magmatism and tectonic thickening as well as destroying them by erosion, chemical weathering, and delamination. We will explore perspectives from the deep Earth to the atmosphere. The seminar will meet once a week for two hours with the first hour being a thematic overview given by faculty or students and the second hour devoted to discussion of assigned papers. Recommended Prerequisite(s): ESCI 321 and ESCI 322. Repeatable for Credit.

ESCI 557 - SPECIAL TOPICS IN EARTH SCIENCE  
**Short Title:** SPECIAL TOPICS - EARTH SCIENCE  
**Department:** Earth/Environmnt/Planetary Sci  
**Grade Mode:** Satisfactory/Unsatisfactory  
**Course Type:** Seminar  
**Credit Hour:** 1  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This is an overview of Petroleum Geoscience, including standard industry datasets and their use, petroleum system elements, and the components of petroleum plays, prospects and fields. The course will be comprised of lectures, short exercises, and exercise discussions. Priority will be given to students enrolling in ESCI 544 Hydrocarbon Exploration Repeatable for Credit.

ESCI 558 - 3D SEISMIC REFLECTION DATA INTERPRETATION  
**Short Title:** 3D SEISMIC REFLECTION DATA  
**Department:** Earth/Environmnt/Planetary Sci  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Workstation-based geologic interpretation of 3D seismic reflection data. The course will focus on interpreting horizons and faults tying interpretation to well data, analyzing seismic attributes, and other relevant topics. Emphasis will be placed on workflows utilized in hydrocarbon exploration. Mutually Exclusive: Credit cannot be earned for ESCI 558 and ESCI 428.

ESCI 559 - SPECIAL TOPICS IN GEOCHEMISTRY  
**Short Title:** SPECIAL TOPICS IN GEOCHEMISTRY  
**Department:** Earth/Environmnt/Planetary Sci  
**Grade Mode:** Satisfactory/Unsatisfactory  
**Course Type:** Lecture  
**Credit Hour:** 1  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** CHEM 121 or CHEM 151  
**Description:** This course deals with miscellaneous special topics not covered in other courses. Please contact the Earth Science department for the specific topics. Topics change each semester. SPRING 2016 topic: X-Ray Based Characterization of Earth Materials. Repeatable for Credit.
ESCI 562 - ADVANCED TOPICS IN GEOPHYSICS
Short Title: ADV TOPICS IN GEOPHYSICS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Repeatable for Credit.

ESCI 564 - SEISMIC REFLECTION DATA PROCESS
Short Title: SEISMIC REFLECTN DATA PROCESS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ESCI 442 or ESCI 642
Description: Mutually Exclusive: Credit cannot be earned for ESCI 564 and ESCI 444.

ESCI 565 - JOINT INVERSION OF EXPLORATION GEOPHYSICAL DATA
Short Title: JNT INVERSN OF EXPLOR GEO DATA
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: By jointly inverting several different kinds of exploration geophysical measurements at a site we avoid some of the ambiguity inherent in the individual methods. *Students review papers (one-half of course) Recommended Prerequisite(s): ESCI 442 and (ESCI 444 or 564) and ESCI 436. Mutually Exclusive: Credit cannot be earned for ESCI 565 and ESCI 445.

ESCI 566 - ROCK DEFORMATION AND RHEOLOGY
Short Title: ROCK DEFORMATION AND RHEOLOGY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The mechanisms of deformation and rheology of Earth’s crust and mantle. Mutually Exclusive: Credit cannot be earned for ESCI 566 and ESCI 466.

ESCI 567 - UNCONVENTIONAL ENERGY EXPLORATION
Short Title: UNCONV ENERGY EXPLORATION
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topical presentations on the exploration and production of unconventional energy resources, including sources, techniques, and prospects. Intent is to cover all non-traditional energy targets, including shale oil/gas, oil sands/heavy oil, geothermal, coalbed methane, methane clathrates (seafloor hydrates) and more. Instructor Permission Required. Mutually Exclusive: Credit cannot be earned for ESCI 567 and ESCI 447.

ESCI 580 - PITCHING YOUR SCIENCE
Short Title: PITCHING YOUR SCIENCE
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is designed for senior level graduate students who will be facing high-stakes professional speaking opportunities, such as impromptu job conversations, formal academic and professional presentations, conversations with journalists, and/or industrial job interviews. Students will construct and practice 90-second, 5-minute, and 15-minute presentations. Most assignments will take place in-class, with limited work occurring outside of the classroom. Requirement: Participation in the Rice University 90-second thesis competition. Instructor Permission Required.

ESCI 581 - TOPICS IN PLANETARY DYNAMICS AND MAGMATIC PROCESSES
Short Title: TOPICS IN PLANETARY DYNAMICS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Instructor Permission Required. Repeatable for Credit.

ESCI 603 - SEMINAR: DEPARTMENT RESEARCH
Short Title: SEM: DEPARTMENT RESEARCH
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to current research in the Earth Science department. Students will learn how to give a presentation and will get experience presenting their research. Graduate/Undergraduate Equivalency: ESCI 403. Repeatable for Credit.

ESCI 604 - SEMINAR: DEPARTMENT RESEARCH
Short Title: SEM: DEPARTMENT RESEARCH
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to current research in the Earth Science department. Students will learn how to give a presentation and will get experience presenting their research. Graduate/Undergraduate Equivalency: ESCI 404. Repeatable for Credit.
ESCI 605 - SEMINAR: CURRENT RESEARCH IN EARTH SCIENCE
Short Title: SEM:CURR RESRCH EARTH SCIENCE
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A series of lectures and paper discussions in various areas of Earth science. Graduate/Undergraduate Equivalency: ESCI 405. Repeatable for Credit.

ESCI 606 - SEMINAR: CURRENT RESEARCH IN EARTH SCIENCE
Short Title: SEM:CURR RESRCH EARTH SCIENCE
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A series of lectures and paper discussions in various areas of Earth science. Graduate/Undergraduate Equivalency: ESCI 406. Repeatable for Credit.

ESCI 607 - INTRODUCTION TO BIOGEOCHEMISTRY II
Short Title: INTRO TO BIOECHEM II
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The interaction between (micro) organisms, minerals, rocks, and aqueous solutions is an important new field of research that requires an interdisciplinary approach between (micro) biology, organic chemistry, and geochemistry. This course provides an introduction and insight into this exciting new field and puts an emphasis on quantitative strategies. Taught every other Fall. Instructor Permission Required. Graduate/Undergraduate Equivalency: ESCI 407. Mutually Exclusive: Credit cannot be earned for ESCI 607 and ESCI 407.

ESCI 609 - INTRODUCTION TO MATLAB AND NUMERICAL METHODS FOR EARTH SCIENCE
Short Title: INTRO TO PROGRAMMING IN MATLAB
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course introduces students to the Matlab programming language and topics may include: importing and exporting data; working with vectors and matrices; curve fitting; data smoothing and filtering; data regression; data visualization; optimization; solving differential equations. The course is built around progressive programming assignments. Graduate/Undergraduate Equivalency: ESCI 409. Mutually Exclusive: Credit cannot be earned for ESCI 609 and ESCI 409.

ESCI 610 - OPTICAL MINERALOGY AND PETROGRAPHY
Short Title: OPTICAL MINERALOGY & PETROGRAPHY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is a lab course focused on the identification of minerals with petrographic microscopy. Principles of crystallography, mineral optics, and mineral chemistry will be covered in the first third of the course. The second third of the course will focus on the identification of minerals in igneous, metamorphic, and sedimentary rocks with emphasis on petrogenetic interpretation. The last third of the course will involve each student working on specific petrologic themes in the context of regional tectonics or magmatic processes. Taught every other Fall. Graduate/Undergraduate Equivalency: ESCI 410. Mutually Exclusive: Credit cannot be earned for ESCI 610 and ESCI 410.

ESCI 611 - ADVANCED PETROLOGY II
Short Title: ADVANCED PETROLOGY II
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will bring together constraints from field geology, petrography, petrology, geochemistry, and geodynamics to tackle advanced A87 research questions of whole Earth processes that are relevant in the 21st century. The topics that may be covered include, but are not limited to, interplay between magmatic and tectonic processes, magma generation, migration, extraction, and dynamic stability in various settings, magmatic differentiation, volatiles and fluids exchange between various reservoirs and effects on long-term climate, ore genesis, and formation and modification of continents. Graduate/Undergraduate Equivalency: ESCI 411. Mutually Exclusive: Credit cannot be earned for ESCI 611 and ESCI 411.

ESCI 612 - ADVANCED PETROLOGY
Short Title: ADVANCED PETROLOGY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Evaluation of the evolution of igneous rocks in the Earth's crust and mantle. Topics will include phase equilibria, experimental studies, and geochemistry. Labs will stress thin section petrography. Graduate/Undergraduate Equivalency: ESCI 412. Mutually Exclusive: Credit cannot be earned for ESCI 612 and ESCI 412. Repeatable for Credit.
ESCI 615 - DECISION MAKING AND ECONOMICS IN THE ENERGY INDUSTRY
Short Title: DECISION MAKING AND ECONOMICS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will provide students with an understanding of how energy projects are evaluated. Topics include resource-size determination, geologic and economic risk, discounted cash-flow economics, and other common methods used in decision making. Emphasis will be placed on working in teams to understand basic concepts and sensitivities. Graduate/Undergraduate Equivalency: ESCI 415. Recommended Prerequisite(s): ESCI 321 and ESCI 323. Mutually Exclusive: Credit cannot be earned for ESCI 615 and ESCI 415.

ESCI 616 - ECONOMIC GEOLOGY MINERAL DEPOSITS
Short Title: ECON GEOL MINERAL DEPOSITS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An overview of metallic and nonmetallic mineral deposits, theories of their origin, and classification. The impact of government regulation, economics, production practices, and exploration will be considered. Graduate/Undergraduate Equivalency: ESCI 416. Mutually Exclusive: Credit cannot be earned for ESCI 616 and ESCI 416.

ESCI 617 - PETROLEUM INDUSTRY ECONOMICS AND MANAGEMENT
Short Title: PETROLEUM IND ECONOMICS MGMT
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics covered include resource size determination; geologic risk analysis; establishing minimum economic thresholds; economic chance factors; the concepts of present worth, investment efficiency, rates of return. Price forecasting, cost inflation are discussed. Graduate/Undergraduate Equivalency: ESCI 417. Mutually Exclusive: Credit cannot be earned for ESCI 617 and ESCI 417.

ESCI 618 - QUANTITATIVE HYDROGEOLOGY
Short Title: QUANTITATIVE HYDROGEOLOGY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced course that will provide a quantitative overview of groundwater hydrology. Emphasis will be placed on mastering concepts in fluid mechanics and applying these concepts to water supply, environmental, and geological problems. Graduate/Undergraduate Equivalency: ESCI 418. Mutually Exclusive: Credit cannot be earned for ESCI 618 and ESCI 418.

ESCI 619 - MATERIALS CHARACTERIZATION
Short Title: MATERIALS CHARACTERIZATION
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will provide an overview of various characterization methods used in geological, chemical, material science and other natural science and engineering research. The techniques that will be discussed include but not limited to electron beam methods (imaging and spectroscopy), X-ray methods, ion-beam analysis, vibrational spectroscopies, and Synchrotron-based techniques. Graduate/Undergraduate Equivalency: ESCI 419. Mutually Exclusive: Credit cannot be earned for ESCI 619 and ESCI 419.

ESCI 621 - PALEOCLIMATE AND MODERN CLIMATE CHANGE
Short Title: PALEOCLIMATE
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The evolution of the ocean, climate and the global carbon cycle over the last 100 million years as recorded by the biology, chemistry and composition of deep-sea sediment. Graduate/Undergraduate Equivalency: ESCI 421. Mutually Exclusive: Credit cannot be earned for ESCI 621 and ESCI 421.

ESCI 622 - PALEOCLIMATE AND MODERN CLIMATE CHANGE
Short Title: PALEOCLIMATE
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Climate change is a widely discussed and, often, debated topic in society today. This course will focus on scientific observations of Earth's climate in the past, records of modern climate variability, and projections of future climate change as well as geologic and instrumental records of climate change and science communication. Graduate/Undergraduate Equivalency: ESCI 422. Mutually Exclusive: Credit cannot be earned for ESCI 622 and ESCI 422.

ESCI 632 - ANTARCTIC MARINE GEOLOGY
Short Title: ANTARCTIC MARINE GEOLOGY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The study of marine geologic principles and processes using examples from the Southern Oceans. Graduate/Undergraduate Equivalency: ESCI 423. Mutually Exclusive: Credit cannot be earned for ESCI 623 and ESCI 423.
ESCI 625 - ORGANIC GEOCHEMISTRY
Short Title: ORGANIC GEOCHEMISTRY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

Course Level: Graduate

Description: This course covers the organic geochemistry of the natural environment. Topics include: production, transport, decomposition, and storage of organic matter in the marine and terrestrial environments, use of isotopes to track biogeochemical processes and natural and perturbed carbon cycle issues, including past and recent climate shifts. Graduate/Undergraduate Equivalency: ESCI 425. Mutually Exclusive: Credit cannot be earned for ESCI 625 and ESCI 425.

ESCI 626 - INTERPRETATION OF REGIONAL 2-D SEISMIC DATA
Short Title: INTER REGIONAL 2D SEISMIC DATA
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

Course Level: Graduate

Description: This course will introduce students to analysis of sub-regional structural and stratigraphic frameworks. We will utilize the interpretation of 2D seismic profiles to reconstruct basin history and discuss implications for petroleum systems. Students will gain an understanding of a variety of structural and stratigraphic styles, as expressed on seismic data. Instructor Permission Required. Graduate/Undergraduate Equivalency: ESCI 426. Mutually Exclusive: Credit cannot be earned for ESCI 626 and ESCI 426.

ESCI 627 - SEQUENCE STRATIGRAPHY
Short Title: SEQUENCE STRATIGRAPHY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

Course Level: Graduate

Description: This course will introduce students to the concepts of sequence stratigraphy and the power behind this correlation technique. The course is divided between classic sequence stratigraphy using cores, well-logs, and outcrop examples and seismic sequence stratigraphy. Graduate/Undergraduate Equivalency: ESCI 427. Mutually Exclusive: Credit cannot be earned for ESCI 627 and ESCI 427.

ESCI 629 - VOLCANIC PROCESSES
Short Title: VOLCANIC PROCESSES
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

Course Level: Graduate

Description: Introduction to the physical processes governing magmatic hydrothermal and volcanic systems. Conceptual and quantitative discussion of topics such as magma generation, accumulation, dike propagation, magma chambers, volcano deformation, volcanic eruptions, magmatic gases, magma rheology and fragmentation, hydrothermal systems. A 3-6 day field trip may be required. Graduate/Undergraduate Equivalency: ESCI 429. Mutually Exclusive: Credit cannot be earned for ESCI 629 and ESCI 429.

ESCI 630 - TRACE-ELEMENT AND ISOTOPE GEOCHEMISTRY FOR EARTH AND ENVIRONMENTAL SCIENCE
Short Title: TRACE-ELEMENT& ISOPOE GEOCHEM
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

Course Level: Graduate

Description: Graduate/Undergraduate Equivalency: ESCI 430. Mutually Exclusive: Credit cannot be earned for ESCI 630 and ESCI 430.

ESCI 631 - GEOMORPHOLOGY
Short Title: GEOMORPHOLOGY
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

Course Level: Graduate

Description: This course will investigate physical, chemical, and biological processes that contribute to the development and shaping of Earth's surface across a continuum of subaerial and subaqueous environments. Mandatory 4-day field trip is associated with this class. Graduate students will be assigned exercises more challenging than those assigned to undergraduate students. Instructor Permission Required. Graduate/Undergraduate Equivalency: ESCI 431. Repeatable for Credit.

ESCI 635 - MECHANICS OF SEDIMENT TRANSPORT
Short Title: MECHANICS-SEDIMENT TRANSPORT
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

Course Level: Graduate

Description: Evaluation of sedimentary transport dynamics: physical interaction between fluid flow and sediment mobility, from grain to bedform scale; exploration of environments including rivers, estuaries, deltas, coastlines, and deserts. Examination of sediment transport for geology, environmental, and engineering applications; formation of diagnostic sedimentary features recognized in the stratigraphic record. Instructor Permission Required. Graduate/Undergraduate Equivalency: ESCI 435. Mutually Exclusive: Credit cannot be earned for ESCI 635 and ESCI 435.
ESCI 636 - WELL LOGGING AND PETROPHYSICS
Short Title: WELL LOGGING AND PETROPHYSICS
Department: Earth/Environment/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Basics of wireline logging and logging while drilling including borehole environment, resistivity, radiation, thermal, and elastic wave measurements and measuring tools. Building from this introduction, basic interpretation of logging data and formation evaluation will be studied. Graduate/Undergraduate Equivalency: ESCI 436. Mutually Exclusive: Credit cannot be earned for ESCI 636 and ESCI 436.

ESCI 640 - GEOPHYSICAL DATA ANALYSIS: DIGITAL SIGNAL PROCESSING
Short Title: GEOPHYSICAL DATA ANALYSIS
Department: Earth/Environment/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

ESCI 641 - GEOPHYSICAL DATA ANALYSIS: INVERSE METHODS
Short Title: GEOPHYSICAL DATA ANALYSIS
Department: Earth/Environment/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Review of linear algebra and probability. Data fitting, model parameter estimation, inverse theory, linear and nonlinear methods, and global optimization. Graduate/Undergraduate Equivalency: ESCI 441. Mutually Exclusive: Credit cannot be earned for ESCI 641 and ESCI 441.

ESCI 642 - EXPLORATION GEOPHYSICS
Short Title: EXPLORATION GEOPHYSICS
Department: Earth/Environment/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of the principles and procedures involved in geophysical exploration. Includes acquisition, processing, and interpretation of seismic, ground-penetrating radar, gravity, magnetic, and electrical data. Graduate/Undergraduate Equivalency: ESCI 442. Mutually Exclusive: Credit cannot be earned for ESCI 642 and ESCI 442.

ESCI 643 - TOPICS IN GEOMATHEMATICS
Short Title: TOPICS IN GEOMATHEMATICS
Department: Earth/Environment/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Content varies from year to year. Instructor Permission Required. Cross-list: CAAM 643. Recommended Prerequisite(s): CAAM 335 and CAAM 336 Repeatable for Credit.

ESCI 650 - REMOTE SENSING
Short Title: REMOTE SENSING
Department: Earth/Environment/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to electromagnetic remote sensing of the Earth and other planets using passive and active methods. The course includes a computer lab component involving processing and interpretation of remote sensing imagery, and an individual project. Instructor Permission Required. Graduate/Undergraduate Equivalency: ESCI 450. Mutually Exclusive: Credit cannot be earned for ESCI 650 and ESCI 450.

ESCI 652 - GIS FOR SCIENTISTS AND ENGINEERS
Short Title: GIS FOR SCIENTISTS
Department: Earth/Environment/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Basic principles of Geographic Information Systems, with a focus on effectively applying the technology to the geosciences. Main platform of the course will be ESRI's ArcGIS, but a wide array of other tools will also be introduced. Material will be delivered via a blend of lecture and hands-on exercises. Instructor Permission Required. Graduate/Undergraduate Equivalency: ESCI 452. Mutually Exclusive: Credit cannot be earned for ESCI 652 and ESCI 452.

ESCI 654 - GEOGRAPHIC INFORMATION SCIENCE
Short Title: GEOGRAPHIC INFORMATION SCIENCE
Department: Earth/Environment/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to Geographic Information Systems (GIS) technology, mapping sciences, and spatial analysis. The course will include extensive computer use and the completion of a major individual project on a topic selected by the student. Graduate/Undergraduate Equivalency: ESCI 454. Mutually Exclusive: Credit cannot be earned for ESCI 654 and ESCI 454.
ESCI 662 - PLANETARY VOLCANISM
Short Title: PLANETARY VOLCANISM
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar will cover the broad range of volcanic phenomena in the solar system, via weekly readings of, and student presentations on, classic and recent papers. Topics include: Composition (basaltic, silicic, unusual, carbonatite), cryovolcanism, structure (caldera, rift zones, volcanic spreading radiating dike systems, magma chambers, and sill complexes), and dynamics (eruption mechanism, effusive vs. explosive, volatiles and atmospheres/oceans). The planetary settings to be considered include Earth, Venu, Mars, Mercury, Moon, large asteroids and outer planet satellites. Graduate/Undergraduate Equivalency: ESCI 464. Mutually Exclusive: Credit cannot be earned for ESCI 662 and ESCI 464.

ESCI 660 - GEOLOGICAL AND GEOPHYSICAL FLUID DYNAMICS
Short Title: GEOL & GEOPHYS FLUID DYNAMICS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced course in the foundations of fluid mechanics and its application to Earth science. Aspects of continuum mechanics, heat and mass transfer, and the rheologic behavior of materials will be covered in developing the fundamental laws that describe fluid motion. Applications include atmospheric dynamics, mantle and lithospheric dynamics, and hydrogeology. Graduate/Undergraduate Equivalency: ESCI 460. Mutually Exclusive: Credit cannot be earned for ESCI 660 and ESCI 460.

ESCI 661 - SEISMOLOGY I
Short Title: SEISMOLOGY I
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Principles of elastic wave propagation, the determination of Earth structure, and the understanding of earthquake physics. Graduate/Undergraduate Equivalency: ESCI 461. Mutually Exclusive: Credit cannot be earned for ESCI 661 and ESCI 461.

ESCI 662 - TECTONOPHYSICS
Short Title: TECTONOPHYSICS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Applications of continuum physics to the deformation, flexure, heat transfer, and gravity field of the lithosphere. Graduate/Undergraduate Equivalency: ESCI 462. Mutually Exclusive: Credit cannot be earned for ESCI 662 and ESCI 462.

ESCI 663 - STRUCTURE AND EVOLUTION OF TECTONIC SYSTEMS
Short Title: TECTONIC SYSTEMS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The distribution, origin, and evolution of various tectonic systems, and characterization of their structural and geophysical signatures, emphasizing crustal and lithospheric processes associated with tectonic deformation. Review of representative global examples of convergent and collisional margins, divergent and passive margins, and transform margins. Graduate/Undergraduate Equivalency: ESCI 463. Mutually Exclusive: Credit cannot be earned for ESCI 663 and ESCI 463.

ESCI 664 - GLOBAL TECTONICS
Short Title: GLOBAL TECTONICS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Geometrical aspects of plate tectonics, the 3 traditional types of plate boundaries, instantaneous plate motions, earthquakes and faulting, space geodesy, geomagnetic reversals, paleomagnetic poles, hotspots, "absolute" plate motion, true polar wander, driving forces, diffuse plate boundaries, plate nonrigidity, and rheology of the lithosphere. Instructor Permission Required. Graduate/Undergraduate Equivalency: ESCI 464. Mutually Exclusive: Credit cannot be earned for ESCI 664 and ESCI 464.

ESCI 667 - GEOMECHANICS
Short Title: GEOMECHANICS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An examination of deformation and failure processes within the Earth’s shallow crust, with a focus on rock and sediment mechanics, and associated fluid processes. Emphasis will be on geologic applications, including sediment consolidation, slope stability, fault mechanics, and earthquake nucleation and rupture. Graduate/Undergraduate Equivalency: ESCI 467. Mutually Exclusive: Credit cannot be earned for ESCI 667 and ESCI 467.
ESCI 671 - EARTH SYSTEMS MODELING I: PHILOSOPHY AND FUNDAMENTALS
Short Title: EARTH SYSTEMS MODELING I
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A model is a simplified representation of something. Scientific models range from conceptual to physical to mathematical. In Earth and planetary science, one is often concerned with modeling interactions between physical, chemical, and biological components, i.e., with modeling systems. This class will cover the fundamentals of scientific modeling with a focus on Earth systems. Graduate/Undergraduate Equivalency: ESCI 471. Mutually Exclusive: Credit cannot be earned for ESCI 671 and ESCI 471. Repeatable for Credit.

ESCI 672 - EARTH SYSTEMS MODELING: NUMERICAL TECHNIQUES AND APPLICATIONS
Short Title: NUMERICAL METHODS EARTH SYSTEM
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to numerical methods with applications in Earth Science using Matlab and COMSOL. Much of the class is spent in the computer lab learning Matlab and COMSOL, followed by hands-on exercises. Instructor Permission Required. Graduate/Undergraduate Equivalency: ESCI 472. Repeatable for Credit.

ESCI 699 - GRAPHIC AND VISUAL DESIGN FOR SCIENTISTS
Short Title: VISUAL DESIGN FOR SCIENTISTS
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A significant portion of a scientist's time is spent solving visual design problems (graphics for papers, visual layouts for seminars, posters, teaching). Effective communication of scientific information is part of a scientist's skill set. This class is designed to enhance that skill set in terms of presenting visual information clearly, simply, and effectively. Instructor Permission Required. Graduate/Undergraduate Equivalency: ESCI 499. Mutually Exclusive: Credit cannot be earned for ESCI 699 and ESCI 499. Repeatable for Credit.

ESCI 800 - THESIS RESEARCH
Short Title: THESIS RESEARCH
Department: Earth/Environmnt/Planetary Sci
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Recommended Prerequisite(s): Students must pass the preliminary exam before taking this course. Repeatable for Credit.

ESCO 111 - INTRODUCTION TO ECOLOGY AND EVOLUTIONARY BIOLOGY
Short Title: INTRO TO EEB
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course provides a short introduction to the science of ecology and evolutionary biology. The topics covered include the mechanisms of evolution, the origin of species, the history of life on earth, biodiversity, animal behavior, population and community ecology, ecosystems, and conservation biology.

EBIO 113 - ENVIRONMENTAL CRISIS SEMINAR
Short Title: ENVIRONMENTAL CRISIS SEMINAR
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Discussion of environmental crises. Topics vary annually. Cross-list: ENST 113, ESCI 113. Repeatable for Credit.

EBIO 116 - FRESHMAN SEMINAR ON LOCAL BIOLOGY RESEARCH (EEB)
Short Title: FRESHMAN BIOLOGY SEMINAR (EEB)
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A 7-week seminar course to introduce freshmen prospective biologists to the excitement of research at Rice and the Medical Center and to provide context with which to think about facts presented in biosciences textbooks. Small groups will meet weekly with a graduate student or postdoctoral researcher to explore a published research article by a local lab, gaining background information about the subject and exposure to the research techniques. In the final session, the group will tour the lab that produced the featured article. Additional tours and activities TBA. All first-year, non-transfer students are eligible to enroll in EBIO 116/EEB 116 regardless of AP credit. This course meets in the first half of the semester and features research in the Program of Ecology and Environmental Biology. Cross-list: FSEM 116.

EBIO 124 - INTRODUCTION TO ECOLOGY AND EVOLUTIONARY BIOLOGY
Short Title: INTRO TO EEB
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course provides a short introduction to the science of ecology and evolutionary biology. The topics covered include the mechanisms of evolution, the origin of species, the history of life on earth, biodiversity, animal behavior, population and community ecology, ecosystems, and conservation biology.
EBIO 202 - INTRODUCTORY BIOLOGY II
Short Title: INTRODUCTORY BIOLOGY II
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): BIOC 201
Description: The second in a series of two introductory biology courses (BIOC 201, EBIO 202). This course examines the diversity of life, comparative animal physiology, evolution, ecology, and conservation. An emphasis is placed on evolution as a central framework necessary for a complete understanding of modern biology. Group discussions allow students to explore topics in more detail and discover how they are relevant to our everyday lives.

EBIO 204 - ENVIRONMENTAL SUSTAINABILITY: THE DESIGN & PRACTICE OF COMMUNITY AGRICULTURE
Short Title: COMMUNITY GARDEN
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course introduces the fundamentals of community garden design and practice. Responsibilities will center on developing and improving the Rice Community Garden. A strong emphasis will be on learning and applying ecological principles to the practice of community agriculture. Class has required meetings outside of regular class time. Cross-list: ENST 204. Repeatable for Credit.

EBIO 213 - INTRO EXPERIMENTAL ECOLOGY AND EVOLUTIONARY BIOLOGY
Short Title: INTRO EXP ECOL & EVOL BIOL
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Experimental, laboratory, and field studies of natural history, ecology, evolution, and animal behavior. Class has required meetings outside of regular class time.

EBIO 214 - BIOS LAB TEACHING
Short Title: BIOS LAB TEACHING
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Undergraduate teaching in a biosciences laboratory. Participate in meetings and selected seminars; supervise students in one or more laboratory sections. Provide group and individual instruction to undergraduates during and outside of laboratory classes. Instructor Permission Required. Repeatable for Credit.

EBIO 216 - DISCUSSION SECTION TEACHING
Short Title: DISCUSSION SECTION TEACHING
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In this course, undergraduates who have previously excelled in EBIO courses will develop teaching skills by leading discussion sections for the benefit of students presently taking EBIO courses under the guidance of the professor teaching the course. Instructor Permission Required.

EBIO 270 - ECOSYSTEM MANAGEMENT
Short Title: ECOSYSTEM MANAGEMENT
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will focus on applied ecosystem topics including relations with state and federal agencies, filed studies, wetland delineations, permitting compliance, and environmental regulations. Graduate/Undergraduate Equivalency: EBIO 570. Mutually Exclusive: Credit cannot be earned for EBIO 270 and EBIO 570.

EBIO 280 - SUSTAINABILITY DEVELOPMENT AND REPORTING
Short Title: SUSTAINABILITY DEVELOPMENT
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Sustainable development is an approach to development based on interacting social, economic, and environmental forces. It is intended as methodology for planning, and a guiding principle for Environmental Health and safety compliance (EHSs) and Corporate Sustainability (CSRs). Students will learn compliance guidelines, risk management, and assessment considerations. Graduate/Undergraduate Equivalency. EBIO 580. Mutually Exclusive: Credit cannot be earned for EBIO 280 and EBIO 580.

EBIO 306 - INDEPENDENT RESEARCH FOR ECOLOGY & EVOLUTIONARY BIOLOGY UNDERGRADUATES
Short Title: EEB UNDERGRADUATES IND RES
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): EBIO 213
Description: Program of independent research for students with previous training in the biosciences. Includes a research paper. Students are expected to spend at least three hours per week in the laboratory for each semester hour of credit. If receiving two or more credits, students will be required to participate in the university annual undergraduate symposium in the spring semesters. Instructor Permission Required. Repeatable for Credit.
EBIO 316 - LAB MODULE IN ECOLOGY
Short Title: LAB MODULE IN ECOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): EBIO 323 or EBIO 325
Description: Field and lab experiments in ecology. Class has required meetings outside of regular class time.

EBIO 317 - LAB MODULE IN BEHAVIOR
Short Title: LAB MODULE IN BEHAVIOR
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): EBIO 321 and EBIO 213
Description: Field experiments in behavior. Learn to formulate and test hypotheses on bird behavior using mockingbirds, grackles, and herons nesting on campus. Class has required meetings outside of regular class time.

EBIO 319 - TROPICAL FIELD BIOLOGY
Short Title: TROPICAL FIELD BIOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Distribution Group: Distribution Group III
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examine first-hand the two most diverse ecosystems on earth - the coral reef and the tropical rainforest in this 2-week summer course in the Central American country of Belize. Topics will include the diversity of tropical organisms and habitats, the formation of coral reefs, rainforest ecology, historical biogeography, symbiosis, and conservation of tropical biodiversity. While a background in biology is desirable, individuals lacking this background but having a special interest in the tropics are encouraged to enroll. Students will be responsible for their own transportation and accommodation cost (exact price TBD). Instructor Permission Required.

EBIO 320 - ECOCOLOGY AND CONSERVATION OF BRAZILIAN WETLANDS LABORATORY
Short Title: BRAZILIAN WETLANDS LAB
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course consists of a 2-week trip to Brazil to examine first-hand the ecology of the largest wetland ecosystem on earth - the Pantanal. Days will be spent in the field making observations and collecting data; lectures in the evenings will cover topics including freshwater ecology, seasonal flooding dynamics, community ecology of wetland species, symbiosis, geology, environmental management, ecotourism, and conservation biology. Recommended Prerequisite(s): EBIO 213

EBIO 321 - ANIMAL BEHAVIOR
Short Title: ANIMAL BEHAVIOR
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 201 and EBIO 202
Description: Evolutionary theory is used to evaluate behavioral adaptations of organisms to their environment.

EBIO 323 - CONSERVATION BIOLOGY
Short Title: CONSERVATION BIOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 201 and EBIO 202
Description: The course is designed to give students a broad overview of conservation biology. Lecture and discussions will focus on conservation issues such as biodiversity, extinction, management, sustained yield, invasive species and preserve design. Cross-list: ENST 323. Graduate/Undergraduate Equivalency: EBIO 523. Mutually Exclusive: Credit cannot be earned for EBIO 323 and EBIO 523.
EBIO 324 - CONSERVATION BIOLOGY LAB  
Short Title: CONSERVATION BIOLOGY LAB  
Department: Biosciences  
Grade Mode: Standard Letter  
Course Type: Laboratory  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): EBIO 213 and EBIO 323 (may be taken concurrently)  
Description: This course will give students hands-on experiences in the practice of conservation biology through authentic projects related to prioritization and design of nature preserves, restoration of natural environments, and for monitoring threatened and endangered species in the Houston area. EBIO 323 may be taken concurrently with EBIO 324. Graduate/Undergraduate Equivalency: EBIO 524. Mutually Exclusive: Credit cannot be earned for EBIO 324 and EBIO 524.

EBIO 325 - ECOLOGY  
Short Title: ECOLOGY  
Department: Biosciences  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group III  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): BIOC 201 and EBIO 202  
Description: Study of population dynamics, species interactions, plant and animal community organization, and ecosystem function. Graduate/Undergraduate Equivalency: EBIO 525. Mutually Exclusive: Credit cannot be earned for EBIO 325 and EBIO 525.

EBIO 326 - INSECT BIOLOGY  
Short Title: INSECT BIOLOGY  
Department: Biosciences  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group III  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): BIOC 201 and EBIO 202  
Description: This course addresses contemporary issues in ecology and evolution through the lens of insect diversity. Readings span a broad literature (popular to technical). Writing and oral reports develop proficiency in scientific communication.

EBIO 327 - BIOLOGICAL DIVERSITY  
Short Title: BIOLOGICAL DIVERSITY  
Department: Biosciences  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): BIOC 201 and EBIO 202 and EBIO 213  
Description: The lecture/laboratory course in field ecology focuses on the theory and practice of estimating biodiversity. The goals are to acquaint students with basic techniques for field sampling and quantifying biodiversity as well as some aspects of the natural history of south and east Texas. These will be accomplished through four field trips during the first half of the semester and an independent research project to be completed by the end of the semester. Class has required meetings outside of regular class time.

EBIO 328 - EVOLUTION OF GENES & GENOMES  
Short Title: EVOLUTION OF GENES & GENOMES  
Department: Biosciences  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group III  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): BIOC 201 and EBIO 202  
Description: The course provides an overview of the evolution of genes and genomes. Using many examples, the course introduces databases and the Worldwide Web, and molecular and statistical methods used to study the evolution of genes and genomes. Broad-scale evolutionary patterns and medical applications based on genome analyses are presented.

EBIO 329 - ANIMAL BIOLOGY AND PHYSIOLOGY  
Short Title: ANIMAL BIOLOGY AND PHYSIOLOGY  
Department: Biosciences  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group III  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): BIOC 201 and EBIO 202  
Description: The evolution and systematics of the animal kingdom with consideration of functional anatomy, comparative physiology, behavior, medical implications and resource management. Cross-list: BIOC 329. Graduate/Undergraduate Equivalency: EBIO 529. Mutually Exclusive: Credit cannot be earned for EBIO 329 and EBIO 529.

EBIO 330 - INSECT BIOLOGY LAB  
Short Title: INSECT BIOLOGY LAB  
Department: Biosciences  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): BIOC 201 and EBIO 202 and EBIO 213  
Description: Lectures will address contemporary issues in ecology and evolution through the lens of insect diversity. Labs will provide hands-on experiences with collection and curation of insects.

EBIO 331 - BIOLOGY OF INFECTIOUS DISEASES  
Short Title: BIOLOGY OF INFECTIOUS DISEASES  
Department: Biosciences  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group III  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): BIOC 201 and EBIO 202  
Description: This course gives a broad overview of the biology of infectious diseases using examples from humans, plants, and animals. Topics include diversity of diseases, mechanisms of disease transmission, epidemiology, population regulation, evolution of virulence, disease dynamics in natural communities and disease invasion and conservation biology. Cross-list: BIOC 331.
EBIO 332 - EVOLUTION OF GENES & GENOMES LAB
Short Title: EVOLUTION GENES & GENOMES LAB
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): EBIO 328
Description: The laboratory course is designed to demonstrate concepts and approaches introduced in the lecture course EBIO 328. The text book remains the same, but the course will heavily rely on the computational exercises provided in the text (called Weblems). Students will be shown how to conduct analysis of sequence data, search databases, literature, and how to synthesize such data. Students will conduct their own projects, some suggested by the text, some by the instructor, some perhaps ideas of their own. Students present and defend their results in writing and in form of presentations and posters. The course would be useful for graduate student education, with added requirements for graduate students.

EBIO 333 - EVOLUTIONARY BIOINFORMATICS
Short Title: EVOLUTIONARY BIOINFORMATICS
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Large accessible data sets have opened new frontiers in evolutionary biology, and many fields. Learn to write computer programs to test hypotheses and discover patterns in diverse data. Understand the most common strategies in evolutionary bioinformatics, including dynamic programming, hidden Markov models, and graphical algorithms. No previous programming experience required. Cross-list: COMP 370. Recommended Prerequisite(s): MATH 101 and MATH 102.

EBIO 334 - EVOLUTION
Short Title: EVOLUTION
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): EBIO 202
Description: Principles of biological evolution. Topics include natural selection, adaptation, molecular evolution, formation of new species, the fossil record, biogeography, and principles of classification. Cross-list: BIOC 334.

EBIO 335 - EVOLUTIONARY BIOINFORMATICS LAB
Short Title: EVOLUTION BIOINFORMATICS LAB
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): EBIO 333 (may be taken concurrently) or COMP 370 (may be taken concurrently)
Description: Computer lab section for Evolutionary Bioinformatics. Students must enroll in EBIO 333.

EBIO 336 - PLANT DIVERSITY
Short Title: PLANT DIVERSITY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): EBIO 202
Description: The evolution, systematics, and ecology of plants, with emphasis on flowering plants and biodiversity.

EBIO 337 - FIELD BIRD BIOLOGY LAB
Short Title: FIELD BIRD BIOLOGY LAB
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): EBIO 213
Description: This course centers on a series of five field trips to diverse habitats for observing birds both immigrants and residents. Each will be preceded by a lecture and students will do two projects. Class has required meetings outside of regular class time.

EBIO 338 - DESIGN AND ANALYSIS OF BIOLOGICAL EXPERIMENTS
Short Title: DESIGN & ANALYSIS OF BIOL EXP
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): EBIO 213
Description: This course addresses how to set up and how to draw conclusions from biological experiments. It introduces basic theories in statistics, interwoven with data analysis using software packages. Students will learn to design statistically sound data collection in observational or experimental studies. To answer given research questions, students will choose among modern statistical tools and analyze data using software. Students will also learn to effectively present results using statistical graphics. This class particularly focuses on ecological and environmental data.
EBIO 340 - GLOBAL BIOGEOCHEMICAL CYCLES
Short Title: GLOBAL BIOGEOCHEMICAL CYCLES
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course provides an overview of coupled elemental cycles such as those of carbon and nitrogen. It introduces students to the coupled nature of the biosphere, atmosphere, and hydrosphere using as focal points the nutrient cycles of carbon and nitrogen. This is a writing-intensive class, and will include 3 required Saturday field trips. Cross-list: ENST 340, ESCI 340. Graduate/Undergraduate Equivalency: EBIO 540. Mutually Exclusive: Credit cannot be earned for EBIO 340 and EBIO 540.

EBIO 365 - INTRODUCTORY PHYCOLOGY
Short Title: INTRODUCTORY PHYCOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 201 and EBIO 202
Description: This course provides an overview of the biology of algae and introduces students to the coupled nature of the biosphere, atmosphere, and hydrosphere using as focal points the nutrient cycles of carbon and nitrogen. It introduces students to the coupled nature of the biosphere, atmosphere, and hydrosphere using as focal points the nutrient cycles of carbon and nitrogen. This is a writing-intensive class, and will include 3 required Saturday field trips. Cross-list: ENST 340, ESCI 340. Graduate/Undergraduate Equivalency: EBIO 540. Mutually Exclusive: Credit cannot be earned for EBIO 340 and EBIO 540.

EBIO 366 - APPLIED PHYCOLOGY
Short Title: APPLIED PHYCOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 201 and EBIO 202
Description: This course provides an overview of the biology of algae and introduces students to the coupled nature of the biosphere, atmosphere, and hydrosphere using as focal points the nutrient cycles of carbon and nitrogen. It introduces students to the coupled nature of the biosphere, atmosphere, and hydrosphere using as focal points the nutrient cycles of carbon and nitrogen. This is a writing-intensive class, and will include 3 required Saturday field trips. Cross-list: ENST 340, ESCI 340. Graduate/Undergraduate Equivalency: EBIO 540. Mutually Exclusive: Credit cannot be earned for EBIO 340 and EBIO 540.

EBIO 367 - INTRODUCTION PHYCOLOGY LAB
Short Title: INTRODUCTION PHYCOLOGY LAB
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 201 and EBIO 202
Corequisite: EBIO 365
Description: This lab course provides an introduction to techniques of isolation, culturing, measuring of growth and identification of algae.

EBIO 368 - APPLIED PHYCOLOGY LAB
Short Title: APPLIED PHYCOLOGY LAB
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 201 and EBIO 202
Corequisite: EBIO 366
Description: In this course students will learn methods of algal strain selection and mass cultivation together with analyses of algal characteristics including their lipid composition, enzymes and pigments.

EBIO 372 - CORAL REEF ECOSYSTEMS
Short Title: CORAL REEF ECOSYSTEMS
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 201
Description: This three credit lecture course introduces students to a complex, dynamic and sensitive ecosystem: coral reefs. We will explore the biotic and abiotic components of coral reefs; how reef organisms interact with each other and the environment, and the factors that contribute to reef construction and decline over time and space. Graduate/Undergraduate Equivalency: EBIO 572. Mutually Exclusive: Credit cannot be earned for EBIO 372 and EBIO 572.

EBIO 379 - LAB MODULE IN AQUATIC ECOLOGY WITH SCUBA
Short Title: LAB MOD AQU ECOLOGY WITH SCUBA
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students will learn some fundamentals of aquatic ecosystems and conduct lab exercises that involve SCUB-based fieldwork in a nationally recognized freshwater dive site. Course has required meetings outside of regular class time. Prerequisites: LPAP 194 or proof of Open Water Scuba certification from a professional organization (e.g., PADI, NAUI). A course fee ranging from $300 to $535 is associated with the class. Please send all enrollment requests to Mariah McClarty, mam22@rice.edu and include the following information: major, year, scuba certification level and issuing professional organization, and a brief statement about why you want to take the course. You will be notified of enrollment decisions by December 5th. Department Permission Required. Cross-list: ENST 379. Graduate/Undergraduate Equivalency: EBIO 579. Recommended Prerequisite(s): EBIO 213 and LPAP 194. Mutually Exclusive: Credit cannot be earned for EBIO 379 and EBIO 579.
EBIO 391 - TRANSFER CREDIT IN ECOLOGY AND EVOLUTIONARY BIOLOGY
Short Title: TRAN CREDIT ECOL&EVOLUTION
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Transfer
Credit Hours: 1
Course Level: Undergraduate Upper-Level
Description: For transfer of courses which have no current equivalent in the Rice curriculum, but which can be counted as Group B Biosciences courses in satisfying requirements for majors in the Biosciences. Repeatable for Credit.

EBIO 393 - LABORATORY TRANSFER CREDIT IN BIOSCIENCES
Short Title: LAB TRANSFER CREDIT
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Transfer
Credit Hour: 1
Course Level: Undergraduate Upper-Level
Description: For transfer of an advanced laboratory course in the biosciences that has no current equivalent in the Rice Biosciences curriculum. Any student may receive a maximum of one credit of EBIO 393.

EBIO 403 - UNDERGRADUATE HONORS RESEARCH IN ECOLOGY AND EVOLUTIONARY BIOLOGY
Short Title: UNDERGRADUATE HONORS RESEARCH
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 5
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Open only to undergraduate majors who meet specific requirements and with permission of the research supervisor and chair. Registration for EBIO 403/404 implies a commitment to participate in research for at least 2 semesters. Department Permission Required.

EBIO 404 - UNDERGRADUATE HONORS RESEARCH IN ECOLOGY AND EVOLUTIONARY BIOLOGY
Short Title: UNDERGRADUATE HONORS RESEARCH
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 5
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Open only to undergraduate majors who meet specific requirements and with permission of the research supervisor and chair. Registration for EBIO 403/404 implies a commitment to participate in research for at least 2 semesters. Department Permission Required.

EBIO 412 - ADVANCED COMMUNICATION IN THE BIOLOGICAL SCIENCES
Short Title: ADV COMMUNICATION IN BIOL SCI
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Intended primarily for seniors majoring in the biological sciences, this course will focus on improving students' written and oral communication skills. Emphasis will be placed on communication of scientific topics for audiences ranging from experts to the general public through weekly assignments. Instructor Permission Required. Repeatable for Credit.

EBIO 433 - ADVANCED ECOLOGY
Short Title: ADVANCED ECOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOL 201 and EBIO 202 and EBIO 325
Description: Students will develop a critical understanding of the discipline of ecology through a combination of lectures and discussion that span a range of topics. With the instructor's help, students will use current papers to stimulate debate on the theories, philosophies and methods of the study of populations, communities, and ecosystems. Instructor Permission Required.

EBIO 520 - STUDENT SEMINAR IN ECOLOGY AND EVOLUTIONARY BIOLOGY
Short Title: STUDENT SEMINAR IN EEB
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Student-led presentations of work in progress, research ideas, and topics of research interest. Designed to enhance oral presentation skills and facilitate discussion of research ideas. Open to upper-level undergraduates and graduate students. Recommended Prerequisite(s): Graduate Status or current enrollment in EBIO 403. Repeatable for Credit.

EBIO 523 - CONSERVATION BIOLOGY
Short Title: CONSERVATION BIOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (BIOL 201 and EBIO 202)
Description: The course is designed to give students a broad overview of conservation biology. Lecture and discussions will focus on conservation issues such as biodiversity, extinction, management, sustained yield, invasive species and preserve design. Graduate/Undergraduate Equivalency: EBIO 323. Mutually Exclusive: Credit cannot be earned for EBIO 523 and EBIO 323.
EBIO 540 - GLOBAL BIOGEOCHEMICAL CYCLES
Short Title: GLOBAL BIOGEOCHEMICAL CYCLES
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): EBIO 201 or EBIO 329 (may be taken concurrently)
Description: This course will give students hands-on experiences in the practice of conservation biology through authentic projects related to prioritization and design of nature preserves, restoration of natural environments, and for monitoring threatened and endangered species in the Houston area. Graduate/Undergraduate Equivalency: EBIO 524. Mutually Exclusive: Credit cannot be earned for EBIO 524 and EBIO 324.

EBIO 529 - ANIMAL BIOLOGY AND PHYSIOLOGY
Short Title: ANIMAL BIOLOGY AND PHYSIOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): BIOC 201 and EBIO 202
Description: Study of population dynamics, species interactions, plant and animal community organization, and ecosystem function. Graduate/Undergraduate Equivalency: EBIO 325. Mutually Exclusive: Credit cannot be earned for EBIO 525 and EBIO 325.

EBIO 555 - CURRENT TOPICS IN WOLF CONSERVATION
Short Title: CURRENT TOPICS IN WOLF CONSERVATION
Department: Biosciences
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will provide an overview of the biology of wolves, their effects on ecosystems, the history of their management, and the current state of their conservation in the United States. Instructor Permission Required.

EBIO 560 - ENVIRONMENTAL IMPACT STATEMENTS AND PERMITTING
Short Title: EIS AND PERMITTING
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is an exciting review of the methodologies involved in conduction Environmental Impact Statements for project Permitting under the National Environmental Policy Act (NEPA). EISs have to be conducted before permitting is secured for large infrastructure projects, such as power plants, highways, pipelines, dams, mines, airports, incinerators and landfills. Department Permission Required.
Course URL: profms.rice.edu

EBIO 561 - TOPICS IN EVOLUTION
Short Title: TOPICS IN EVOLUTION
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Review and discussion of the literature on current research in evolution. Repeatable for Credit.
EBIO 562 - TOPICS IN BEHAVIORAL BIOLOGY
Short Title: TOPICS IN BEHAVIORAL ECOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Review and discussion of the literature on current research in animal behavior and evolution. Recommended prerequisite(s): Graduate standing or permission of chair or instructor. Repeatable for Credit.

EBIO 563 - TOPICS IN ECOLOGY
Short Title: TOPICS IN ECOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Review and discussion of the literature on current research in ecology. Repeatable for Credit.

EBIO 566 - APPLIED PHYCOLOGY
Short Title: APPLIED PHYCOLOGY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course provides an overview of methods of algal strain selection and cultivation for food, fodder, fertilizers, biofuels, pharmaceuticals, and cosmetics. Graduate/Undergraduate Equivalency: EBIO 366. Mutually Exclusive: Credit cannot be earned for EBIO 566 and EBIO 366.

EBIO 568 - TOPICS IN BIOLOGICAL DIVERSITY
Short Title: TOPICS IN BIOLOGICAL DIVERSITY
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Review and discussion of literature on current research in biological diversity. Repeatable for Credit.

EBIO 570 - ECOSYSTEM MANAGEMENT
Short Title: ECOSYSTEM MANAGEMENT
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will focus on applied ecosystem topics including relations with state and federal agencies, field studies, wetland delineations, permitting compliance, and environmental regulations. Graduate/Undergraduate Equivalency: EBIO 270. Mutually Exclusive: Credit cannot be earned for EBIO 570 and EBIO 270.

EBIO 572 - CORAL REEF ECOSYSTEMS
Short Title: CORAL REEF ECOSYSTEMS
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): EBIO 202
Description: This three credit lecture course introduces students to a complex, dynamic and sensitive ecosystem: coral reefs. We will explore the biotic and abiotic components of coral reefs; how reef organisms interact with each other and the environment, and the factors that contribute to reef construction and decline over time and space. Graduate/Undergraduate Equivalency: EBIO 372. Mutually Exclusive: Credit cannot be earned for EBIO 572 and EBIO 372.

EBIO 579 - LAB MODULE IN AQUATIC ECOLOGY WITH SCUBA
Short Title: LAB MOD AQU ECOLOGY WITH SCUBA
Department: Biosciences
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Students will learn some fundamentals of aquatic ecosystems and conduct lab exercises that involve SCUB-based fieldwork in a nationally recognized freshwater dive site. Course has required meetings outside of regular class time. Prerequisites: LPAP 194 or proof of Open Water Scuba certification from a professional organization (e.g., PADI, NAUI). A course fee ranging from $300 to $535 is associated with the class. Please send all enrollment requests to Mariah McClarty, mam22@rice.edu. You will be notified of enrollment decisions by December 5th. Department Permission Required. Graduate/Undergraduate Equivalency: EBIO 379. Recommended Prerequisite(s): EBIO 213 and LPAP 194. Mutually Exclusive: Credit cannot be earned for EBIO 579 and EBIO 379.

<td>Sustainable development is an approach to development based on interacting social, economic, and environmental forces. It is intended as methodology for planning, and a guiding principle for Environmental Health and safety compliance (EHSs) and Corporate Sustainability (CSRs). Students will learn compliance guidelines, risk management, and assessment considerations. Graduate/Undergraduate Equivalency: EBIO 280. Mutually Exclusive: Credit cannot be earned for EBIO 580 and EBIO 280/EBIO 480.</td>

<td>Introduction to the basic concepts of microeconomics and macroeconomics. Microeconomics component includes analysis of supply and demand, consumer and producer behavior, and competitive and noncompetitive market equilibria, with applications to current policy issues. Macroeconomics component provides an overview of the determination of national output, employment, interest rates, and inflation, and analyzes monetary fiscal policies and international trade. Designed for both non-majors and majors. Mutually Exclusive: Credit cannot be earned for ECON 100 and ECON 201/ECON 211.</td>

ECON 103 - INTRODUCTION TO MACROECONOMICS

Short Title: INTRODUCTION TO MACROECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to macroeconomic analysis at a level suitable for non-majors. Applies only for transfer credit and requires departmental approval. Approved credit counts toward total credit hours required for graduation and for distribution, but does not count toward the ECON or MTEC majors. Students may not receive credit for ECON 103 if credit for ECON 212 has already been awarded. Mutually Exclusive: Credit cannot be earned for ECON 103 and ECON 112/ECON 113.

ECON 111 - AP/OTH CREDIT IN MICROECONOMICS

Short Title: AP/OTH CREDIT MICROECONOMICS
Department: Economics
Grade Mode: Transfer Courses
Course Type: Transfer
Credit Hours: 1-6
Course Level: Undergraduate Lower-Level
Description: Provides transfer credit based on student performance on approved examinations in microeconomics, such as the Advanced Placement microeconomics exam or the International Baccalaureate higher-level economics exams, or for an approved introductory microeconomics course. Approved credit counts toward total credit hours required for graduation, but does not count for distribution or toward the ECON or MTEC majors. Students may not receive credit for ECON 111 if credit for ECON 201/211 has already been awarded. Mutually Exclusive: Credit cannot be earned for ECON 103 and ECON 201/ECON 211.

ECON 113 - AP/OTH CREDIT IN MACROECONOMICS

Short Title: AP/OTH CREDIT MACROECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Transfer
Credit Hours: 1-6
Course Level: Undergraduate Lower-Level
Description: Provides transfer credit based on student performance on approved examinations in macroeconomics, such as the Advanced Placement macroeconomics exam or the International Baccalaureate higher-level economics exams, or for an approved introductory macroeconomics course. Approved credit counts toward total credit hours required for graduation, but does not count for distribution or toward the ECON or MTEC majors. Students may not receive credit for ECON 113 if credit for 212 has already been awarded. Mutually Exclusive: Credit cannot be earned for ECON 113 and ECON 103/ECON 212.

ECON 200 - MICROECONOMICS

Short Title: MICROECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group II
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): (ECON 100 or ECON 201 or ECON 211) and MATH 102 (may be taken concurrently)
Description: Intermediate level analysis of theories of household behavior, including demand for consumer goods, labor supply, and savings/investment decisions, and producer behavior including the supply of output and demands for labor, capital and other production inputs. Emphasizes individual and interactive decision making under resource constraints. Analyzes equilibria in competitive and noncompetitive markets, and discusses topics in welfare economics. MATH 102 may be taken concurrently with ECON 200. Mutually Exclusive: Credit cannot be earned for ECON 200 and ECON 301.

ECON 203 - MACROECONOMICS

Short Title: MACROECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): ECON 200 or ECON 301 or ECON 370
Description: Analyzes aggregate performance of the national economy including output, inflation, interest rates, employment, the business cycle, monetary and fiscal policy, and more generally the appropriate role of government in influencing aggregate economic performance. Introduces both the traditional aggregative only approach to Macroeconomics and the more recent New Classical and New Keynesian micro-foundations approaches. Mutually Exclusive: Credit cannot be earned for ECON 203 and ECON 303.

ECON 209 - APPLIED ECONOMETRICS

Short Title: APPLIED ECONOMETRICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group II
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): (ECON 200 or ECON 301 or ECON 370) and (ECON 307 or ECON 382 or STAT 310)
Description: Applied econometric methods: econometric theory with practical emphasis on modeling, estimation, and hypothesis testing. A computer lab one day a week focuses on empirical implementation of econometric methods using STATA software. Credit may be given for only one of ECON 309 or ECON 209. Mutually Exclusive: Credit cannot be earned for ECON 209 and ECON 309/ECON 446.
ECON 210 - BEHAVIORAL ECONOMICS
Short Title: BEHAVIORAL ECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): ECON 100 or ECON 201 or ECON 211
Description: Examines behavioral economics, which seeks to insert more behavioral realism into economic theory by incorporating into economic models insights based on empirical observations from psychology, sociology, and neuroscience. Emphasizes attempts by behavioral economists to explain anomalies that depart from the predictions of standard economic theory. Topics include temptation and self-control, fairness and reciprocity, reference dependence, bounded rationality and choice under risk and uncertainty.

ECON 239 - LAW AND ECONOMICS
Short Title: LAW AND ECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): ECON 100 or ECON 201 or ECON 211
Description: Exploration of the law using economic tools based on microeconomic theory. Focuses on legal issues most applicable to business. Mutually Exclusive: Credit cannot be earned for ECON 239 and ECON 438.

ECON 260 - MICROECONOMICS AND PUBLIC POLICY
Short Title: MICROECONOMICS & PUBLIC POLICY
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): ECON 100 or ECON 201
Description: Applies insights learned from the microeconomic component of ECON 100 to the analysis of public policy issues, stressing economic intuition rather than mathematical formulations. Designed for students who do not wish to major in ECON or MTEC, and does not apply toward ECON or MTEC major requirements.

ECON 265 - MICROECONOMICS AND PUBLIC POLICY TOWARDS BUSINESS
Short Title: MICRO & PUBLIC POLICY/BUSINESS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): ECON 100 or ECON 201
Description: Applies insights learned from the microeconomic component of ECON 100 to the analysis of issues related to public policy toward business, stressing economic intuition rather than mathematical formulations. Designed for students who do not wish to major in ECON or MTEC, and does not apply toward ECON or MTEC major requirements.

ECON 270 - MACROECONOMICS AND PUBLIC POLICY
Short Title: MACROECONOMICS & PUBLIC POLICY
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): ECON 100 or ECON 201
Description: Applies insights learned from the macroeconomic component of ECON 100 to the analysis of public policy issues, stressing economic intuition rather than mathematical formulations. Designed for students who do not wish to major in ECON or MTEC, and does not apply toward ECON or MTEC major requirements.

ECON 275 - INTERNATIONAL MACROECONOMICS AND PUBLIC POLICY
Short Title: INT MACRO & PUBLIC POLICY
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): ECON 100 or ECON 201
Description: Applies insights learned from the macroeconomic component of ECON 100 to the analysis of issues related to international public policy, stressing economic intuition rather than mathematical formulations. Designed for students who do not wish to major in ECON or MTEC, and does not apply toward ECON or MTEC major requirements.
ECON 299 - EXPERIENTIAL EDUCATION IN ECONOMICS
Short Title: EXPERIENTIAL EDUC IN ECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1
Restrictions: Enrollment is limited to students with a major in Economics or Mathematical Economic Analysis. Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): ECON 200
Description: This course provides one hour of university credit for faculty-directed and approved internship. Students must obtain approval from a member of the department’s undergraduate committee and must submit a letter from the internship provider indicating completion and satisfactory performance. Department Permission Required. Repeatable for Credit.

ECON 300 - GAME THEORY AND OTHER MICRO TOPICS FOR ECON MAJORS
Short Title: GAME THEORY, MICRO TOPICS/ECON
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 200 or ECON 301 or ECON 370) and (ECON 307 or STAT 310)
Description: Advanced level analysis of topics in microeconomics designed for students in the ECON major. Topics include the foundations and applications of game theory, the economics of choice under uncertainty, and information economics including issues of asymmetric information. Additional topics may include auction theory, mechanism design and behavioral economics. Open to all majors other than MTEC. Mutually Exclusive: Credit cannot be earned for ECON 300 and ECON 205.

ECON 305 - GAME THEORY AND OTHER MICRO TOPICS FOR MTEC MAJORS
Short Title: GAME THEORY, MICRO TOPICS/MTEC
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 307 or STAT 310) and (ECON 308 or ECON 401 or ECON 477)
Description: Advanced level analysis of topics in microeconomics, focusing on mathematical modeling and designed for students in the MTEC major. Topics include the foundations and applications of game theory, general equilibrium theory and applications, the economics of choice under uncertainty, and information economics including issues of asymmetric information. Additional topics may include auction theory, mechanism design, and behavioral economics. Open to all majors. Mutually Exclusive: Credit cannot be earned for ECON 305 and ECON 405.

ECON 307 - PROBABILITY AND STATISTICS
Short Title: PROBABILITY & STATISTICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 102
Description: Probability and the central concepts and methods of statistics including probability, distributions of random variables, expectation, sampling distributions, estimation, confidence intervals, and hypothesis testing. Cross-list: STAT 310. Recommended Prerequisite(s): MATH 212.
Course URL: statistics.rice.edu/courses.cfm

ECON 308 - MATHEMATICAL ECONOMICS
Short Title: MATHEMATICAL ECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 200 or ECON 301 or ECON 370) and (MATH 212 or MATH 221)
Description: Coverage of mathematical topics used in economics, such as linear algebra, optimization, and real analysis, with applications to fundamental topics in economic theory, constrained optimization, labor market dynamics, game theory and Leontief input-output model. Emphasizes logical clarity and mathematical rigor, along with the ability to follow and construct mathematical proofs. Credit may be earned for only one of the following courses: ECON 308 or ECON 401 or ECON 477. Mutually Exclusive: Credit cannot be earned for ECON 308 and ECON 401/ ECON 477.

ECON 310 - ECONOMETRICS
Short Title: ECONOMETRICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 209 or ECON 309 or ECON 446) and (ECON 308 or ECON 401 or ECON 477)
Description: Survey of estimation and forecasting models. Includes multiple regression time series analysis. A good understanding of linear algebra is highly desirable. Cross-list: STAT 376. Mutually Exclusive: Credit cannot be earned for ECON 310 and ECON 409/STAT 400.
ECON 343 - CORPORATE FINANCE
Short Title: CORPORATE FINANCE
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Prerequisite(s): (ECON 100 or ECON 201 or ECON 211) and (STAT 280 or STAT 305 or STAT 310 or ECON 307 or STAT 312 or POLI 395 or PSYC 339) and BUSI 305
Description: Corporate financial management including tools used to evaluate and select investment projects and the method of financing those investments. The influence of corporate control on investment decisions. The valuation of stocks, bonds and options using the time value of money, the trade-off between risk and return, and arbitrage. BUSI 343 and ECON 343 are Mutually Exclusive; therefore students may not receive credit for both courses. Recommended Prerequisite(s): ECON 200 or ECON 301 or ECON 370. Mutually Exclusive: Credit cannot be earned for ECON 343 and BUSI 343.

ECON 355 - FINANCIAL MARKETS
Short Title: FINANCIAL MARKETS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ECON 200 or ECON 301 or ECON 370
Description: Principles governing U.S. and international equity and debt markets, and the interactions between such markets and national monetary and exchange rate policies. Focuses on the role of financial markets and institutions in the allocation and transfer of credit and risk, and examines various existing and suggested regulatory frameworks.

ECON 365 - WORLD ECONOMIC HISTORY
Short Title: WORLD ECONOMIC HISTORY
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 100 or ECON 201 or ECON 211) and (STAT 280 or STAT 305 or STAT 310 or ECON 307 or STAT 312 or POLI 395 or PSYC 339) and BUSI 305
Description: Study and analysis of world economy focusing on the economic expansion of Western countries between the 14th and 21st centuries. Emphasis on contextual changes in economy, geography, history, society, culture, religion and politics in determining economic leadership of certain economies, such as Italy, Portugal, Spain, the United Kingdom, Belgium, the Netherlands, France, Germany, Sweden, the United States and Japan. Cross-list: HIST 365.

ECON 399 - INDEPENDENT RESEARCH
Short Title: INDEPENDENT RESEARCH
Department: Economics
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 100 or ECON 201 or ECON 211) or (ECON 200 or ECON 301 or ECON 370) and (ECON 203 or ECON 303 or ECON 375) and (ECON 209 or ECON 309 or ECON 446) and (ECON 300 or ECON 305 or ECON 405) and (ECON 307 or STAT 310) and MATH 101 or (MATH 111 or MATH 112) and MATH 102
Description: Independent research project under the supervision of a faculty member who must approve the topic, consult the department website under "Independent Research" for additional details. Students must have a GPA of 3.0 or higher in the prerequisite courses. Faculty advisors may require additional prerequisites. Instructor and department permission required. Not offered during the summer. Instructor Permission Required.

ECON 415 - LABOR ECONOMICS
Short Title: LABOR ECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ECON 200 or ECON 301 or ECON 370
Description: Empirical evidence and theories relating to several features of labor markets. Topics covered may include fertility, health, criminal behavior, labor force participation, hours of work, education and training, geographical and inter-firm labor mobility, static and dynamic labor demand, unions, discrimination, government intervention in labor markets, and "hedonic" equilibria in labor markets. Graduate/Undergraduate Equivalency: ECON 515. Mutually Exclusive: Credit cannot be earned for ECON 415 and ECON 515.

ECON 418 - ECONOMIC FORECASTING
Short Title: ECONOMIC FORECASTING
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ECON 300 or ECON 303 or ECON 375
Description: Application of econometric techniques to problems in macroeconomics and financial economics. The course focuses on macroeconomic forecasting and test of economic theories using stationary and non-stationary time-series data. Methods include predictive regressions, vector autoregressions, impulse response functions, and variance decomposition. Tests and comparisons of forecast accuracy are also included. Projects will be completed in STATA.
ECON 419 - ADVANCED TOPICS IN ECONOMETRICS
Short Title: ADV TOPICS IN ECONOMETRICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ECON 310 or ECON 409 or ECON 400 or STAT 376 or STAT 400
Description: Introduction to advanced econometrics, with an emphasis on methods used in microeconomic applications. Methods covered are used in the estimation of the demand for goods and services, production functions, and for analyzing the impact of social programs.

ECON 420 - INTERNATIONAL TRADE
Short Title: INTERNATIONAL TRADE
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ECON 203 or ECON 303 or ECON 375
Description: Studies the economic relationships between countries. This course explores the concept of comparative advantage, and it analyzes why countries trade. It includes trade theory, tariffs and other trade restrictions, trade and development, and current policy issues.

ECON 421 - INTERNATIONAL FINANCE
Short Title: INTERNATIONAL FINANCE
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ECON 203 or ECON 303 or ECON 375
Description: Analysis of foreign exchange and international capital markets and linkages between exchange rates, interest rates, and prices, interest rates, and aggregate outputs, including international transmission of business cycles and economic growth. Includes an overview of historical and institutional developments, and current policy issues.

ECON 422 - INTERNATIONAL ECONOMICS AND FINANCE
Short Title: INTERNATIONAL ECON & FINANCE
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 200 or ECON 301 or ECON 370) and (ECON 203 or ECON 303 or ECON 375)
Description: Studies the economic relationships among countries. Explores the sources of comparative advantage and reasons for trade policies. Examines foreign exchange and international capital markets and linkages between exchange rates, interest rates, and prices. Includes trade theory, tariffs, and other trade restrictions, an overview of historical and institutional developments, and current policy issues.

ECON 423 - POLITICAL ECONOMY
Short Title: POLITICAL ECONOMY
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 200 or ECON 301 or ECON 370) and (ECON 205 or ECON 300 (may be taken concurrently) or ECON 305 (may be taken concurrently) or ECON 405)
Description: Analyzes income redistribution, taxation, the production of public goods, and other actions of the public sector as determined by a political process simultaneously with the economic process of exchange and production. Investigates the connection between public policies and the political forces that shape them. ECON 300 or ECON 305 may be taken concurrently with ECON 432.

ECON 435 - INDUSTRIAL ORGANIZATION
Short Title: INDUSTRIAL ORGANIZATION
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 300 or ECON 305) and (ECON 209 or ECON 309 or ECON 310)
Description: Covers topics in industrial organization and market design, including oligopoly, mergers, demand, matching and auctions.

ECON 437 - ENERGY ECONOMICS
Short Title: ENERGY ECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 300 or ECON 305) and (ECON 209 or ECON 309 or ECON 310) taken concurrently with ECON 432.

ECON 439 - ADVANCED TOPICS IN LAW AND ECONOMICS
Short Title: ADV TOPICS IN LAW AND ECON
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 200 or ECON 301 or ECON 370) and ECON 400 or ENST 437. Graduate/Undergraduate Equivalency: ECON 601. Mutually Exclusive: Credit cannot be earned for ECON 437 and ECON 601.
**ECON 441 - EMPIRICAL METHODS FOR INDUSTRIAL ORGANIZATION**  
Short Title: EMPIRICAL METHODS FOR IO  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): ECON 200 and ECON 209  
Description: Covers empirical methods for the analysis of markets and industries.

**ECON 443 - FINANCIAL ECONOMICS**  
Short Title: FINANCIAL ECONOMICS  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (ECON 305 or ECON 405) and (ECON 307 or STAT 310 or ECON 382)  
Description: Economic analysis of the operation of financial markets from a mathematical and theoretical perspective. Topics include asset pricing, risk management, portfolio theory, arbitrage theory, and market efficiency. Emphasizes the application of the financial concepts to decisions faced by households and firms.

**ECON 444 - MANAGERIAL ECONOMICS**  
Short Title: MANAGERIAL ECONOMICS  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): ECON 200 or ECON 301 or ECON 370  
Description: Application of economics to the determination of the profitability of the firm. Includes organization theory and problems of control. A student may not receive credit for ECON 445 and ECON 245/POLI 245.

**ECON 445 - PRINCIPLES OF FINANCIAL ENGINEERING**  
Short Title: FINANCIAL ENGINEERING  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (ECON 308 or MATH 211) and MATH 212 and (ECON 310 or ECON 400 or STAT 376 or STAT 400 or ECON 409)  
Description: Covers the use of financial securities and derivatives to take or hedge financial risk positions, including most commonly used instruments, from simple forwards and futures to exotic options and swaptions. Studies the pricing of derivative securities with emphasis on the mechanics and uses of financial engineering methods. ECON 449 and STAT 449 are Mutually Exclusive, so students may not receive credit for both courses. Mutually Exclusive: Credit cannot be earned for ECON 449 and STAT 449.

**ECON 446 - EMPIRICAL METHODS FOR IO**  
Short Title: EMPIRICAL METHODS FOR IO  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (ECON 200 or ECON 301 or ECON 370) and (ECON 203 or ECON 303 or ECON 375)  
Description: This course covers different dimensions of economic development, focusing on poverty, inequality, demography, and health. It provides an overview of the economies of less developed countries, the lives of the poor, and the theories for why some countries are rich and others are poor. It also describes how labor and credit markets function in poor countries, the consequences for health and education, and the role of institutions.

**ECON 449 - PRINCIPLES OF FINANCIAL ENGINEERING**  
Short Title: FINANCIAL ENGINEERING  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (ECON 200 or ECON 301 or ECON 370) and (ECON 203 or ECON 303 or ECON 375)  
Description: This course covers different dimensions of economic development, focusing on poverty, inequality, demography, and health. It provides an overview of the economies of less developed countries, the lives of the poor, and the theories for why some countries are rich and others are poor. It also describes how labor and credit markets function in poor countries, the consequences for health and education, and the role of institutions.

**ECON 450 - ECONOMIC DEVELOPMENT**  
Short Title: ECONOMIC DEVELOPMENT  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (ECON 200 or ECON 301 or ECON 370) and (ECON 203 or ECON 303 or ECON 375)  
Description: This course covers different dimensions of economic development, focusing on poverty, inequality, demography, and health. It provides an overview of the economies of less developed countries, the lives of the poor, and the theories for why some countries are rich and others are poor. It also describes how labor and credit markets function in poor countries, the consequences for health and education, and the role of institutions.

**ECON 455 - MONEY AND BANKING**  
Short Title: MONEY AND BANKING  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (ECON 200 or ECON 301 or ECON 370) and (STAT 310 or ECON 307)  
Description: Review economic models of the demand, supply, and markets for religion, including the effects of economic conditions on religious choice and vice versa. Students will write term paper on topics of their choosing, subject to professor's approval. Recommended Prerequisite(s): ECON 209 or ECON 309 or ECON 446, or ECON 310 or STAT 376 or ECON 400 or ECON 409.

**ECON 456 - RELIGION, ETHICS, AND ECONOMICS**  
Short Title: RELIGION, ETHICS, & ECONOMICS  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (ECON 200 or ECON 301 or ECON 370) and (STAT 310 or ECON 307)  
Description: Review economic models of the demand, supply, and markets for religion, including the effects of economic conditions on religious choice and vice versa. Students will write term paper on topics of their choosing, subject to professor's approval. Recommended Prerequisite(s): ECON 209 or ECON 309 or ECON 446, or ECON 310 or STAT 376 or ECON 400 or ECON 409.
ECON 460 - ADVANCED TOPICS IN ECONOMIC DEVELOPMENT  
Short Title: ADV TOPICS ECON DEVELOPMENT  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): ECON 200 or ECON 301 or ECON 370  
Description: Focuses on role of taxation, finance and international trade, foreign investment and foreign aid in economic development.

ECON 462 - ECONOMICS OF HUMAN CAPITAL  
Short Title: ECONOMICS OF HUMAN CAPITAL  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 4  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (ECON 200 or ECON 301 or ECON 370) and (ECON 209 or ECON 309 or ECON 446)  
Description: This course covers theory that describes the central role of human capital in determining economic growth and inequality, uses advanced econometric techniques to test if the theory is consistent with data, and presents insights for public policy that can improve human capital formation, increase economic growth and reduce social inequality.

ECON 470 - MARKET DESIGN  
Short Title: MARKET DESIGN  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (ECON 200 or ECON 301 or ECON 370) and (ECON 307 or STAT 310)  
Description: Regulators, entrepreneurs and economists have recently been involved in the design of novel markets for radio spectrum, kidnneys, on-line advertising, school choice, etc. This course utilizes game theory to provide the theoretical underpinning of such markets via real world examples, including the study of institutional details that can determine the success or failure of a market.

ECON 479 - ECONOMIC MODELING AND PUBLIC POLICY  
Short Title: ECONOMIC MODLG & PUBLIC POLICY  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): ECON 200 or ECON 301 or ECON 370  
Description: Examines the use of computable general equilibrium (CGE) models to analyze the economic effects of public policy reforms. Reviews theoretical aspects of general equilibrium modeling, introduces computational methods, constructs some basic CGE models, and shows how the models are used to analyze the efficiency, distributional, and transitional effects of various policy reforms. Federal tax reform in the U.S. is the primary policy application; other issues examined may include Social Security, environmental policy, and international trade.

ECON 480 - ENVIRONMENTAL ECONOMICS  
Short Title: ENVIRONMENTAL ECONOMICS  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): ECON 200 or ECON 301 or ECON 370  
Description: Uses economic theories of externalities and common property resources to analyze how markets, legal institutions, regulations, taxes and subsidies, and voluntary activity can affect the supply of environmental amenities, such as clean air, clean water, and wilderness areas. Also discusses methods for determining the demand for environmental amenities. Cross-list: ENST 480.

ECON 481 - HEALTH ECONOMICS  
Short Title: HEALTH ECONOMICS  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): ECON 209 or ECON 309 or ECON 446 or ECON 310 or ECON 400 or STAT 400 or ECON 409 or STAT 376  
Description: Study of determinants of health, including behavioral, economic and social factors and access to health care. Application of economics to understand health insurance, the hospital and physician markets, pharmaceuticals, and the health care system. Effects of regulation and methods of payment. Graduate/Undergraduate Equivalency. ECON 565. Mutually Exclusive: Credit cannot be earned for ECON 481 and ECON 565.

ECON 483 - PUBLIC FINANCE  
Short Title: PUBLIC FINANCE  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): ECON 200 or ECON 301 or ECON 370  
Description: Provides an economic analysis of tax policy, focusing on the current national debate regarding the relative merits of income and consumption-based taxes in terms of equity, efficiency, and simplicity. Analyzes tax effects on individual and business behavior and discusses general equilibrium modeling of the economic and distributional effects of alternative tax reforms. Special topics include optimal taxation, taxation of the family, estate taxation, taxation of electronic commerce, and state and local public finance.
ECON 484 - PUBLIC ECONOMICS
Short Title: PUBLIC ECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 200 or ECON 301 or ECON 370) and MATH 212
Description: Theory and evidence on government expenditure policy. Topics include the theory of public goods, education; state and local public goods; redistribution and welfare policy; cost-benefit analysis; social insurance programs such as social security and unemployment insurance; and health care policy.

ECON 497 - RESEARCH IN ECONOMETRICS
Short Title: RESEARCH IN ECONOMETRICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 203 or ECON 303 or ECON 375) and (ECON 310 or STAT 376 or ECON 400 or STAT 400 or ECON 409) and (ECON 305 or ECON 405)
Description: Capstone course for MTEC majors whose primary interest is in econometrics. Review and analysis of seminal and current research in econometrics, including independent analysis by the student. Topics vary from year to year. (Note: In 2015-2016, pre-requisite of ECON 305/405 may be waived or required as a co-requisite; see instructor.)

ECON 489 - ECONOMICS OF SOCIAL NETWORKS
Short Title: ECONOMICS OF SOCIAL NETWORKS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ECON 200 and ECON 209
Description: This course introduces research on social networks and analyzes how these networks affect our choices: the products we buy, the careers we follow, whom we marry, how we raise our children. Students will learn about network measurement and formation and the influence of social networks on our decisions.

ECON 498 - HONORS PROGRAM IN ECONOMICS-I
Short Title: HONORS PROGRAM IN ECONOMICS-I
Department: Economics
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 203 or ECON 303 or ECON 375) and (ECON 209 or ECON 310) and (ECON 300 or ECON 305 or ECON 405)
Description: Research workshop open to ECON and MTEC majors. GPA of at least 3.67 in all ECON courses and all courses required for major, and must have taken all ECON courses directly related to the topic of their research. Students develop a research idea, construct an economic model with testable hypotheses, test those hypotheses, and write and present in the workshop an academic quality paper. Econometrics pre-requisite is ECON 209 for ECON majors and ECON 310 for MTEC majors. Instructor may impose additional prerequisites. (In 2015-2016, prerequisite of ECON 300/305/405 may be waived or required as a co-requisite; see instructor.) Instructor Permission Required.

ECON 499 - HONORS PROGRAM IN ECONOMICS-II
Short Title: HONORS PROGRAM IN ECONOMICS-II
Department: Economics
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ECON 498
Description: Continuation of ECON 498. University credit only. Instructor Permission Required.

ECON 501 - MICROECONOMICS I
Short Title: MICROECONOMICS I
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Consumer theory including choice under certainty, producer theory, partial and general equilibrium analysis.
ECON 502 - MACROECONOMICS
Short Title: MACROECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Intertemporal general equilibrium models, dynamic programming, search theory, monetary models.

ECON 504 - COMPUTATIONAL ECONOMICS
Short Title: COMPUTATIONAL ECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers numerical methods most commonly used in Economics, including solving systems of equations, numerical optimization, stochastic dynamic programming, numerical differentiation and integration, Monte Carlo methods, and solving ordinary and partial differential equations. Cross-list: STAT 604.

ECON 505 - FINANCIAL ECONOMICS I
Short Title: FINANCIAL ECONOMICS I
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ECON 501 and ECON 502
Description: Introduction to asset pricing and portfolio choice theory. Covers single-period and dynamic models, including pricing by arbitrage, mean-variance analysis, factor models, dynamic programming, recursive utility, and an introduction to continuous-time finance. Cross-list: BUSI 521.

ECON 507 - MATHEMATICAL ECONOMICS I
Short Title: MATHEMATICAL ECONOMICS I
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The purpose of this course is to provide the first-year PhD students in Economics with the essential mathematical tools. The course covers topics in real analysis, topology, linear algebra, etc. Aside from providing the mathematical tools, a primary aim of this course is to develop the level of mathematical sophistication necessary to conduct research in modern economics. The course will therefore emphasize logical clarity and mathematical rigor, along with the ability to follow and construct mathematical proofs.

ECON 508 - MICROECONOMICS II
Short Title: MICROECONOMICS II
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ECON 501 and MATH 321
Description: Game theory, imperfect competition, information economics, voting and social choice, mechanism design.

ECON 509 - TOPICS IN MICROECONOMICS
Short Title: TOPICS IN MICROECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ECON 508
Description: Discussion of selected topics of current interest. Varies year to year. Repeatable for Credit.

ECON 510 - ECONOMETRICS I
Short Title: ECONOMETRICS I
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ECON 501 and MATH 321
Description: Estimation and inference in single equation regression models, multicollinearity, autocorrelated and heteroskedastic disturbances, distributed lags, asymptotic theory, and maximum likelihood techniques. Emphasis is placed on the ability to analyze critically the literature. Cross-list: STAT 610.

ECON 511 - ECONOMETRICS II
Short Title: ECONOMETRICS II
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics in linear and nonlinear simultaneous equations estimation, including panel data, qualitative and categorical dependent variable models, duration analysis, simulation based estimation, treatment effects, stochastic production frontier estimation. Cross-list: STAT 611.

ECON 512 - INTERNATIONAL TRADE THEORY
Short Title: INTERNATIONAL TRADE THEORY
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Exploration of classical, neoclassical, and modern trade theory. Includes welfare aspects of trade such as the theory of commercial policy, with emphasis on applications.
ECON 514 - INDUSTRIAL ORGANIZATION AND CONTROL
Short Title: INDUST'L ORGANIZATION&CONTROL
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Core topics include monopoly, price discrimination, vertical control, short-run price competition, dynamic price competition and tacit collusion, price and non-price competition with differentiated products, entry barriers, information and strategic behavior (e.g. limit pricing, auctions), and research and development.

ECON 515 - LABOR ECONOMICS
Short Title: LABOR ECONOMIC
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate-level analysis of empirical evidence and theories relating to several features of labor markets. Topics covered may include fertility, health, criminal behavior, labor force participation, hours of work, education and training, geographical and inter-firm labor mobility, static and dynamic labor demand, unions, discrimination, government intervention in labor markets, and "hedonic" equilibria in labor markets. Graduate/Undergraduate Equivalency: ECON 415. Mutually Exclusive: Credit cannot be earned for ECON 515 and ECON 415.

ECON 516 - EMPIRICAL MICROECONOMICS
Short Title: EMPIRICAL MICROECONOMIC
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ECON 508
Description: Overview of methods used in empirical microeconomic research. Examples are drawn from health economics, law and economics, and business economics. Emphasis is placed on designing econometric and statistical analyses to test economic hypotheses. Class projects will expand on analyses from previously published studies.

ECON 517 - EMPIRICAL INDUSTRIAL ORGANIZATION
Short Title: EMPIRICAL INDUSTRIAL ORG
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ECON 508 and ECON 510
Description: This field course aims to expose students to recent developments in the empirical structural analysis of data in industrial organization. Topics include demand, games and dynamics.

ECON 518 - INTERNATIONAL MACROECONOMICS
Short Title: INTERNATIONAL MACROECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate.
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Effects of fiscal and monetary policies on exchange rates and the current account and balance of payments. Includes exchange market efficiency, exchange rates and prices, LDC debt, and policy coordination.

ECON 519 - ECONOMIC GROWTH AND DEVELOPMENT
Short Title: ECONOMIC GROWTH & DEVELOPMENT
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate.
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Analysis of theory and policy questions relating to the level and rate of economic development.

ECON 522 - PUBLIC ECONOMICS: TAX POLICY
Short Title: PUBLIC ECONOMICS: TAX POLICY
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of the effects of taxation on individual and firm behavior; general equilibrium tax incidence analysis; optimal taxation theory; optimal implementation of tax reform; analysis of comprehensive income, and consumption taxes.

ECON 523 - DYNAMIC OPTIMIZATION
Short Title: DYNAMIC OPTIMIZATION
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of dynamic optimization in discrete and continuous time, including numerical methods and applications to macroeconomics, finance and resource and energy economics.
ECON 547 - ADVANCED TOPICS IN ENERGY ECONOMICS
Short Title: ADV TOPICS IN ENERGY ECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (ECON 301 or ECON 370) and (ECON 309 or ECON 446 or ECON 409 or ECON 400 or STAT 400) and ECON 437
Description: A detailed development and analysis of topics in energy modeling. Topics include optimal extraction of depletable resources, models of storable energy commodities, energy demand by end-use sector, models of non-competitive behavior, energy security and the relationship between energy and commodity prices. ECON 547 requires an additional assignment in addition to the assignments of ECON 447. Recommended Prerequisite(s): ECON 477 or ECON 401. Mutually Exclusive: Credit cannot be earned for ECON 547 and ECON 447/ ECON 604.

ECON 565 - HEALTH ECONOMICS
Short Title: HEALTH ECONOMICS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of economic aspects of health. Includes production, cost, demand and supply factors; methods of payment and effects of regulation. Graduate/Undergraduate Equivalence: ECON 481. Mutually Exclusive: Credit cannot be earned for ECON 565 and ECON 447/ ECON 604.

ECON 577 - TOPICS IN ECONOMIC THEORY I
Short Title: TOPICS IN ECONOMIC THEORY I
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Discussion of topics in advanced economic theory. Repeatable for Credit.

ECON 578 - TOPICS IN ECONOMETRICS I
Short Title: TOPICS IN ECONOMETRICS I
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Discussion of selected topics in advanced econometrics. Repeatable for Credit.

ECON 579 - TOPICS IN ECONOMETRICS II
Short Title: TOPICS IN ECONOMETRICS II
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ECON 511
Description: Discussion of selected topics in advanced econometrics. Repeatable for Credit.

ECON 552 - TOPICS IN POLICY AND APPLIED ECONOMICS
Short Title: TOP-POLICY&APPL'D ECON
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Discussion of selected topics and applied economics. Repeatable for Credit.

ECON 592 - WORKSHOP IN MICROECONOMICS
Short Title: WORKSHOP IN ECONOMICS
Department: Economics
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminars on advanced topics in macroeconomics, microeconomics, econometrics and applied microeconomic theory, presented through guest lectures by leading researchers. Repeatable for Credit.
ECON 594 - WORKSHOP IN ECONOMICS I
Short Title: WORKSHOP IN ECONOMICS I
Department: Economics
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Continuation of ECON 593. Repeatable for Credit.

ECON 596 - RESEARCH SEMINAR
Short Title: RESEARCH SEMINAR
Department: Economics
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Research presentations by graduate students. Students are expected to attend class when not presenting their work. Repeatable for Credit.

ECON 597 - READINGS IN ADVANCED TOPICS
Short Title: READINGS IN ADVANCED TOPICS
Department: Economics
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

ECON 598 - READINGS IN ADVANCED TOPICS
Short Title: READINGS IN ADVANCED TOPICS
Department: Economics
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

ECON 601 - ENERGY ECONOMICS I
Short Title: ENERGY ECONOMICS I
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students. Enrollment limited to students in a Master of Energy Economics degree.
Course Level: Graduate
Description: Introduces the energy sector to students, discusses key aspects of energy supply, demand and pricing, and is foundational for the MEECON degree. Topics include optimal extraction of depletable resources, trade of energy commodities, storage, end-use demand and energy efficiency, and the relationship between economic activity, energy and the environment. Graduate/Undergraduate Equivalency: ECON 437. Mutually Exclusive: Credit cannot be earned for ECON 601 and ECON 437.

ECON 602 - MICROECONOMICS OF THE ENERGY SECTOR
Short Title: MICROECONOMICS - ENERGY SECTOR
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students. Enrollment limited to students in a Master of Energy Economics degree.
Course Level: Graduate
Description: Covers basic microeconomic concepts and applies them to contemporary issues in the energy sector. Topics covered include demand and supply analysis, market equilibrium and different market structures, international trade, investment and capacity expansion, risk and investment finance, and economic analysis of energy policy including environmental policy.

ECON 603 - APPLIED ECONOMETRICS FOR ENERGY MARKETS
Short Title: APPLIED ECONOMETRICS ENGY MKTS
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students. Enrollment limited to students in a Master of Energy Economics degree.
Course Level: Graduate
Description: Students will be introduced to basic concepts in statistical analysis and how to use statistical tools to analyze economic data and test economic theories. The course includes a laboratory session where students practice using the tools discussed in lectures with data that is particularly relevant to the energy industry.

ECON 604 - ENERGY ECONOMICS II
Short Title: ENERGY ECONOMICS II
Department: Economics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students. Enrollment limited to students in a Master of Energy Economics degree.
Course Level: Graduate
Description: Explores a variety of topics in energy modeling and energy data analysis. Topics include optimal extraction of depletable resources, game theoretic approaches to OPEC behavior, national oil company behavior, models of storable energy commodities, energy demand by end-use sector, energy security and fundamental drivers of commodity prices. Credit may be earned by only one of the following courses: ECON 604 or ECON 547. Mutually Exclusive: Credit cannot be earned for ECON 604 and ECON 547.
ECON 605 - TAXATION IN THE ENERGY SECTOR  
Short Title: TAXATION IN THE ENERGY SECTOR  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 4  
Restrictions: Enrollment is limited to Graduate level students. Enrollment limited to students in a Master of Energy Economics degree.  
Course Level: Graduate  
Description: Introduces basic principles of taxation, and general equilibrium modeling of the economic effects of taxes, and applies them to federal and state taxes on the energy sector. Topics include royalties resource rent taxes, corporate income taxes including international tax issues such as transfer pricing and income shifting, excess profit taxes, production-sharing agreements, and environmental taxes.

ECON 606 - CORPORATE FINANCE FOR THE ENERGY SECTOR  
Short Title: CORP FINANCE - ENERGY SECTOR  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 4  
Restrictions: Enrollment is limited to Graduate level students. Enrollment limited to students in a Master of Energy Economics degree.  
Course Level: Graduate  
Description: Examines the investment decisions of corporations, the valuation of stock, bonds and options investments by individual investors. The implications of investor decisions for corporations, and specifically the manner in which they evaluate investment projects and finance investments are a core focus. Examples and case studies focus on the energy sector.

ECON 607 - THE ECONOMICS OF ENERGY AND THE ENVIRONMENT  
Short Title: ECON OF ENERGY & ENVIRONMENT  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 4  
Restrictions: Enrollment is limited to Graduate level students. Enrollment limited to students in a Master of Energy Economics degree.  
Course Level: Graduate  
Description: Focuses on environmental issues of relevance to the energy sector. It examines how markets, legal institutions, especially government policy in the form of environmental taxes and emissions quotas can all be used to affect the supply of amenities such as clean air, clean water and wilderness areas.

ECON 608 - RISK MANAGEMENT IN THE ENERGY INDUSTRY  
Short Title: RISK MANAGEMENT/ENERGY INDUSTRY  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 4  
Restrictions: Enrollment is limited to Graduate level students. Enrollment limited to students in a Master of Energy Economics degree.  
Course Level: Graduate  
Description: This course introduces quantitative risk management techniques often employed in the energy industry. It covers topics such as real options, value at risk, conditional value at risk, and expected shortfall, as well as the use of derivatives for trading and hedging various risk exposures. The course is methodologically self-contained and provides students with hands-on experience with state-of-the-art software to measure and manage risk-adjusted returns of heterogeneous asset portfolios.

ECON 610 - ENERGY AND THE MACROECONOMY  
Short Title: ENERGY & THE MACROECONOMY  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 4  
Restrictions: Enrollment is limited to Graduate level students. Enrollment limited to students in a Master of Energy Economics degree.  
Course Level: Graduate  
Description: Discusses connections between energy and economic activity at the regional, national, and international level, and especially the role of energy shocks in economic fluctuations, innovations in energy supply as drivers of regional economic growth, and the role of energy commodities in transportation and international trade.

ECON 611 - GEOPOLITICS OF ENERGY  
Short Title: GEOPOLITICS OF ENERGY  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 4  
Restrictions: Enrollment is limited to Graduate level students. Enrollment limited to students in a Master of Energy Economics degree.  
Course Level: Graduate  
Description: Explores the geopolitical issues around energy security and trade by focusing on role of energy as the world's largest business and a strategic requirement of the modern nation-state, a source of power in international relations, and a major influence on national politics and institutions.

ECON 612 - MANAGEMENT OF PUBLIC POLICY ISSUES BY ENERGY COMPANIES  
Short Title: MGMT OF PUBLIC POLICY ISSUES  
Department: Economics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 4  
Restrictions: Enrollment is limited to Graduate level students. Enrollment limited to students in a Master of Energy Economics degree.  
Course Level: Graduate  
Description: This course discusses how to achieve best practices in government, media, and community relations, and interaction with NGOs. It uses case studies as a springboard to demonstrate how energy companies can set up processes to identify and manage public policy issues that can have significant impacts on the energy industry.
The course will discuss monopoly, oligopoly, and the determinants of the amount of trade between countries in energy commodities, and the role of international capital flows in financing energy projects, in particular. It will also discuss the many ways that governments can alter international trade through various policies.

ECON 614 - POLITICAL ECONOMY OF OIL IN DEVELOPING COUNTRIES

Description: This course explores the effects of international trade and the determinants of the amount of trade between countries in energy commodities, and the role of international capital flows in financing energy projects, in particular. It will also discuss the many ways that governments can alter international trade through various policies.

ECON 615 - SOCIAL STUDIES OF ENERGY

Description: This course evaluates the political and economic determinants of oil and gas policies in developing countries and their impact on world markets, the interaction between states and oil companies, the challenges of oil wealth management, and the causal links between resource dependency, development, institutions, and political regimes. Although the main focus is on oil production, natural gas is also analyzed, and both are compared to other natural resources. Must be in Masters of Energy Economics Program.

ECON 621 - THE ECONOMICS OF THE ELECTRICITY INDUSTRY

Description: Discusses the determinants of the cost of electricity, the effects of organizing the industry in different ways, the need to encourage sufficient investment in reserve capacity, and the use of information technology to allow for new ways of pricing electricity, operating the network and coordinating supply and demand.

ECON 622 - TRANSPORTATION ECONOMICS

Description: Discusses transportation as a major source of energy demand in modern post-industrial economies and of future demands in emerging economies. Emphasizes that the demand for energy use in the transportation sector involves modeling household choices, economic growth and demographic transition, government decisions to support transportation infrastructure development, and the introduction of new technologies.

ECON 699 - PRACTICUM

Description: Projects developed by an industry advisory group to be researched and presented to participating industry at completion of all course work. Internships with an approved employer may be substituted.

ECON 800 - GRADUATE RESEARCH

Description: Repeatable for Credit.
Education (EDUC)

EDUC 202 - CONTEMPORARY ISSUES IN EDUCATION
Short Title: CONTEMPORARY ISSUES IN EDUC
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The course examines the way globalization, immigration, privatization and the increasing diversity in our student population is shaping, and being shaped, by America’s schools. An exploration of these and other issues from both micro- (student) and macro- (systemic) levels, will be the mainstay of the course. The lenses of sociology, psychology and political economy will be used throughout the semester. The course is open to students in these fields and to students exploring a career in teaching, and is recommended for students entering the teacher education program. This course requires five hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 502. Mutually Exclusive: Credit cannot be earned for EDUC 202 and EDUC 502.

EDUC 301 - PHILOSOPHICAL, HISTORICAL, AND SOCIAL FOUNDATIONS OF EDUCATION
Short Title: PHIL,HIST,&SOC FOUNDTN OF EDUC
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: In this course students analysis events and ideas that have shaped the philosophy and practice of American schools today. It is appropriate for all students interested in the influences and stresses that have created a unique educational system in our culturally diverse country. This course requires five hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 501. Mutually Exclusive: Credit cannot be earned for EDUC 301 and EDUC 501.

EDUC 304 - RACE, CLASS, GENDER IN EDUCATION
Short Title: RACE, CLASS, GENDER IN EDUC
Department: Education
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines the complex ways in which race, ethnicity, gender, and class intersect and influence the educational experience of students in American schools. By employing an interdisciplinary approach centered both on individuals’ lived experiences and educational system as a whole; EDUC 304 explores and critiques these critical issues and their impact on student learning. Likely topics include the historical foundations of race, class and gender in education, segregation, Title IX, and other contemporary topics. Graduate/Undergraduate Equivalency: EDUC 504. Mutually Exclusive: Credit cannot be earned for EDUC 304 and EDUC 504.

EDUC 305 - EDUCATIONAL PSYCHOLOGY
Short Title: EDUCATIONAL PSYCHOLOGY
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The goal of this course is to introduce students to a psychological understanding of teaching and learning through an overview of principles, issues, and related research in educational psychology. Students in this course will examine theories of learning, complex cognitive processes, cognitive and emotional development, and motivation. These constructs will be applied to effective instruction, the design of optimum learning environments, assessment of student learning, and teaching in diverse classrooms. Required for those seeking teacher certification. This course requires five hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 505. Mutually Exclusive: Credit cannot be earned for EDUC 305 and EDUC 505.

EDUC 310 - INTRODUCTION TO SPECIAL EDUCATION
Short Title: INTRODUCTION SPECIAL EDUCATION
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will introduce and expose students to the field of Special Education. Students will learn about the various individuals who receive special education as well as other types of exceptionality, including giftedness. Controversial issues in this field will be examined along with pertinent legislation. This course will familiarize students with instructional approaches in special education and the social issues impacting the field. Students will visit area schools. This course requires five hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 510. Mutually Exclusive: Credit cannot be earned for EDUC 310 and EDUC 510.

EDUC 315 - ADOLESCENT DEVELOPMENT
Short Title: ADOLESCENT DEVELOPMENT
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The goal of this course is to introduce students to basic theories of adolescent development and cognition. The course will examine principles and concepts in the areas of physical, emotional and psychological development, identity formation, sexuality, and family and peer relations. Other ‘hot topics’ such as substance abuse, eating disorders, and teenagers and the media will also be examined. This course requires five hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 515. Mutually Exclusive: Credit cannot be earned for EDUC 315 and EDUC 515.
EDUC 320 - TEACHING DIVERSE LEARNERS
Short Title: TEACHING DIVERSE LEARNERS
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course offers pedagogies for learners who have different ways of seeing the world, different experiences, and different learning needs. A variety of teaching methods and strategies help special needs students, gifted and talented students and English language learners succeed in the classroom. This course also addresses effective communication in ARDS, LPACS, and staffing within classrooms. Students learn about the support personnel who can assist the classroom teacher. Required for certification. This course requires five hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 520. Mutually Exclusive: Credit cannot be earned for EDUC 320 and EDUC 520.

EDUC 323 - CREATIVE WRITING IN THE CLASSROOM
Short Title: CREATIVE WRITING IN CLASSROOM
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Rice students enrolled in this intensive summer internship will work alongside master teachers and professional writers to promote creative thinking and writing with middle and high school students. Students in this course will explore arts integration pedagogy, engage in the classroom planning process, lead lessons, facilitate student writing, and develop anthologies to showcase student voices. Instructor Permission Required. Graduate/Undergraduate Equivalency: EDUC 523. Mutually Exclusive: Credit cannot be earned for EDUC 323 and EDUC 523. Repeatable for Credit.

EDUC 325 - ADOLESCENT LITERATURE
Short Title: ADOLESCENT LITERATURE
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The nature of adolescence in an increasingly complex and diverse society is examined through literature written for and about adolescents and young adults. This study of the cultural, literary and developmental issues in adolescent literature is relevant to students of literature, psychology, child development, anthropology and sociology, and is recommended for students preparing to become teachers. This course requires five hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 525. Mutually Exclusive: Credit cannot be earned for EDUC 325 and EDUC 525.

EDUC 330 - THE AMERICAN HIGH SCHOOL
Short Title: THE AMERICAN HIGH SCHOOL
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Historically one of the few universally experienced institutions in the U.S., the American high school has been an essential rite of passage for youth and an essential building block of democracy. Students in this course will study the historical origins of the high school and examine its roles in the economy, culture, and the lives of youth. Using field study of an urban high school (15 hours of observation required for undergraduates), students will analyze the contemporary high school and debate about its future. Graduate/Undergraduate Equivalency: EDUC 530. Mutually Exclusive: Credit cannot be earned for EDUC 330 and EDUC 530.
EDUC 335 - URBAN EDUCATION: ISSUES, POLICY, AND PRACTICE
Short Title: URBAN ED:ISSUES, POLICY & PRAC
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course focuses on the major issues facing urban education, including poverty, the implications of racial and ethnic diversity for educational institutions, and strategies for improving academic achievement in urban schools. Students will examine sociological, political, cultural and educational research and theory, as well as explore strategies for improvement of urban education at the classroom, school and policy levels. This course requires five hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 535. Mutually Exclusive: Credit cannot be earned for EDUC 335 and EDUC 535.

EDUC 345 - EDUCATIONAL TECHNOLOGIES & DIGITAL LEARNING
Short Title: EDUC TECH & DIGITAL LRNING
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The primary purposes of this course is to prepare teachers to identify and evaluate effective, appropriate data and curriculum management systems/programs that improve student achievement; to determine how technologies can personalize and accelerate learning goals for students; and understand how technology can be used to change communication and pedagogical practices in the classroom. This course is required for certification. This course requires five hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 545. Mutually Exclusive: Credit cannot be earned for EDUC 345 and EDUC 545.

EDUC 350 - EDUCATION POLICY: FROM LEGISLATURES TO CLASSROOMS
Short Title: EDUCATION POLICY
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Policy issues in this course include school funding, curriculum decisions, accountability systems, discipline policies, and other areas. What are the major policy discussions affecting K-12 education today, and how are they resolved in the political arena? Where do policy decisions come from? How do they affect classroom instruction? And who can influence the process? This course requires five hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 550. Mutually Exclusive: Credit cannot be earned for EDUC 350 and EDUC 550/POST 340.

EDUC 421 - CURRICULUM DEVELOPMENT
Short Title: CURRICULUM DEVELOPMENT
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Senior. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is the first of a two-part series for preservice teachers. It offers a reflective study of classroom practice through seventy-five (75) hours of observation in secondary schools and teaching activities under the guidance of cooperating teachers and education team members in an actual classroom setting. This course includes opportunities to structure lessons for diverse student populations with whole group and small group lessons. This course is required for certification. Instructor Permission Required. Graduate/Undergraduate Equivalency: EDUC 521. Mutually Exclusive: Credit cannot be earned for EDUC 421 and EDUC 521.

EDUC 422 - LITERACY ACROSS THE CURRICULUM
Short Title: LITERACY ACROSS THE CURRICULUM
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: How students are taught to read and write in all academic and elective disciplines is critical to the academic development of adolescents. In this course multiple literacies will be discussed in terms of theory and practice. Students will examine reading, writing, listening, speaking and thinking strategies across the curriculum and their impact on learning. Additionally students will investigate, plan, and practice the skills of using literacy strategies for the specific discipline. Required for certification. This course requires five hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 522. Mutually Exclusive: Credit cannot be earned for EDUC 422 and EDUC 522.

EDUC 460 - THEORY AND METHODS: ART
Short Title: THEORY AND METHODS: ART
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course involves the study and integration of theory and methods with observation and practice in the classroom through the facilitation of student-led, student-centered activities. ..
EDUC 461 - THEORY AND METHODS: ENGLISH LANGUAGE ARTS & READING (ELAR)
Short Title: THEORY AND METHODS: ELAR
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course involves the study and integration of theory and methods with observation and practice in the classroom through the facilitation of student-led, student-centered activities. Under the guidance of education support team members, the course offers methods for implementing curriculum with diverse students. Required for certification. This course includes a minimum of 5 hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 561. Mutually Exclusive: Credit cannot be earned for EDUC 461 and EDUC 561.

EDUC 462 - THEORY AND METHODS: LOTE
Short Title: THEORY AND METHODS: LOTE
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course involves the study and integration of theory and methods with observation and practice in the classroom through the facilitation of student-led, student-centered activities. Under the guidance of education support team members, the course offers methods for implementing curriculum with diverse students. Required for certification. This course includes a minimum of 5 hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 562. Mutually Exclusive: Credit cannot be earned for EDUC 462 and EDUC 562.

EDUC 463 - THEORY AND METHODS: MATHEMATICS
Short Title: THEORY AND METHODS: MATHEMATICS
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 1-3
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course involves the study and integration of theory and methods with observation and practice in the classroom through the facilitation of student-led, student-centered activities. Under the guidance of education support team members, the course offers methods for implementing curriculum with diverse students. Required for certification. This course includes a minimum of 5 hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 563. Mutually Exclusive: Credit cannot be earned for EDUC 463 and EDUC 563.

EDUC 464 - THEORY AND METHODS: PHYSICAL EDUCATION
Short Title: THEORY AND METHODS: PHYSICAL ED
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course involves the study and integration of theory and methods with observation and practice in the classroom through the facilitation of student-led, student-centered activities. Under the guidance of education support team members, the course offers methods for implementing curriculum with diverse students. Required for certification. This course includes a minimum of 5 hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 564. Mutually Exclusive: Credit cannot be earned for EDUC 464 and EDUC 564.

EDUC 465 - THEORY AND METHODS: SCIENCE
Short Title: THEORY AND METHODS: SCIENCE
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 1-3
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course involves the study and integration of theory and methods with observation and practice in the classroom through the facilitation of student-led, student-centered activities. Under the guidance of education support team members, the course offers methods for implementing curriculum with diverse students. Required for certification. This course includes a minimum of 5 hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 565. Mutually Exclusive: Credit cannot be earned for EDUC 465 and EDUC 565.

EDUC 466 - THEORY AND METHODS: SOCIAL STUDIES
Short Title: THEORY AND METHODS: SOCIAL STUD
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Students with a class of Freshman may not enroll. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course involves the study and integration of theory and methods with observation and practice in the classroom through the facilitation of student-led, student-centered activities. Under the guidance of education support team members, the course offers methods for implementing curriculum with diverse students. Required for certification. This course includes a minimum of 5 hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 566. Mutually Exclusive: Credit cannot be earned for EDUC 466 and EDUC 566.
EDUC 467 - PRACTICUM FOR PRESERVICE TEACHERS  
Short Title: PRACT FOR PRESERVICE TEACHERS  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Internship/Practicum  
Credit Hours: 6  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (EDUC 460 or EDUC 461 or EDUC 462 or EDUC 463 or EDUC 464 or EDUC 465 or EDUC 466) and EDUC 421  
Description: This is the second course in the two-part series for preservice teachers. In this field-based practicum, the preservice teacher will have a concentrated experience in student teaching based on the lesson development, pedagogical explorations, and field-based work of the previous semester. Students are expected to follow the assigned district/campus academic calendar for the semester of student teaching. This course is required for certification. Graduate/Undergraduate Equivalency: EDUC 567. Mutually Exclusive: Credit cannot be earned for EDUC 467 and EDUC 567.

EDUC 470 - FIELD-BASED STUDIES IN TEACHING AND LEARNING  
Short Title: FLD-BASED STDY TEACH & LRNG  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 1-3  
Restrictions: Students with a class of Freshman or Sophomore may not enroll. Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: The study of critical issues in urban education uses ethnographic research methods to study a wide range of educational subjects, from policy impact to classroom practice, from curriculum and pedagogy to the cultures of the children. The course includes a seminar on research methodologies, with a focus on ethnography; independent research projects in a local school setting; and directed case studies. It is open particularly to students in education, sociology, psychology, anthropology and cultural studies. Graduate/Undergraduate Equivalency: EDUC 570. Mutually Exclusive: Credit cannot be earned for EDUC 470 and EDUC 570.

EDUC 501 - PHILOSOPHICAL, HISTORICAL, AND SOCIAL FOUNDATIONS OF EDUCATION  
Short Title: PHIL,HIST,&SOC FOUNDTN OF EDUC  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: In this course students analysis events and ideas that have shaped the philosophy and practice of American schools today. It is appropriate for all students interested in the influences and stresses that have created a unique educational system in our culturally diverse country. This course requires five hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 301. Graduate/Undergraduate Equivalency: EDUC 301. Mutually Exclusive: Credit cannot be earned for EDUC 501 and EDUC 301.

EDUC 502 - CONTEMPORARY ISSUES IN EDUCATION  
Short Title: CONTEMPORARY ISSUES IN EDUC  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: The course examines the way globalization, immigration, privatization and the increasing diversity in our student population is shaping, and being shaped, by America's schools. An exploration of these and other issues from both micro- (student) and macro- (systemic) levels, will be the mainstay of the course. The lenses of sociology, psychology and political economy will be used throughout the semester. The course is open to students in these fields and to students exploring a career in teaching, and is recommended for students entering the teacher education program. This course requires five hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 202. Graduate/Undergraduate Equivalency: EDUC 202. Mutually Exclusive: Credit cannot be earned for EDUC 502 and EDUC 202.

EDUC 504 - RACE, CLASS, GENDER IN EDUCATION  
Short Title: RACE, CLASS, GENDER IN EDUC  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course examines the complex ways in which race, ethnicity, gender, and class intersect and influence the educational experience of students in American schools. By employing an interdisciplinary approach centered both on individuals’ lived experiences and educational system as a whole, EDUC 504 explores and critiques these critical issues and their impact on student learning. Likely topics include the historical foundations of race, class and gender in education, segregation, Title IX, and other contemporary topics. This graduate equivalent of EDUC 304 requires additional assignments. Graduate/Undergraduate Equivalency: EDUC 304. Mutually Exclusive: Credit cannot be earned for EDUC 504 and EDUC 304.
EDUC 505 - EDUCATIONAL PSYCHOLOGY  
Short Title: EDUCATIONAL PSYCHOLOGY  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: The goal of this course is to introduce students to a psychological understanding of teaching and learning through an overview of principles, issues, and related research in educational psychology. Students in this course will examine theories of learning, complex cognitive processes, cognitive and emotional development, and motivation. These constructs will be applied to effective instruction, the design of optimum learning environments, assessment of student learning, and teaching in diverse classrooms. Required for those seeking teacher certification. This course requires five hours of observation in a local secondary school. Graduate/Undergraduate Equivalency: EDUC 305. Mutually Exclusive: Credit cannot be earned for EDUC 505 and EDUC 305.

EDUC 510 - INTRODUCTION TO SPECIAL EDUCATION  
Short Title: INTRODUCTION SPECIAL EDUCATION  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course will introduce and expose students to the field of Special Education. Students will learn about the various individuals who receive special education as well as other types of exceptionality, including giftedness. Controversial issues in this field will be examined along with pertinent legislation. This course will familiarize students with instructional approaches in special education and the social issues impacting the field. Students will visit area schools. This course requires five hours of observation in a local secondary school. Recommended for certification. Additional assignments are required beyond those for EDUC 310. Graduate/Undergraduate Equivalency: EDUC 310. Mutually Exclusive: Credit cannot be earned for EDUC 510 and EDUC 310.

EDUC 515 - ADOLESCENT DEVELOPMENT  
Short Title: ADOLESCENT DEVELOPMENT  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: The goal of this course is to introduce students to basic theories of adolescent development and cognition. The course will examine principles and concepts in the areas of physical, emotional and psychological development, identity formation, sexuality, and family and peer relations. Other 'hot topics' such as substance abuse, eating disorders, and teenagers and the media will also be examined. This course requires five hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 315. Graduate/Undergraduate Equivalency: EDUC 315. Mutually Exclusive: Credit cannot be earned for EDUC 515 and EDUC 315.

EDUC 516 - ASSESSMENT  
Short Title: ASSESSMENT  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: In this course, students will use formative and summative assessment to drive instructional decisions. Disaggregation of student data growth in the classroom and on standardized tests will foster academic achievement. Additional requirements are required beyond those for EDUC 316. Graduate/Undergraduate Equivalency: EDUC 316. Mutually Exclusive: Credit cannot be earned for EDUC 516 and EDUC 316.

EDUC 519 - TEACHING AND LEARNING WITH INQUIRY  
Short Title: TEACHING & LEARNING W/INQUIRY  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Education for the 21st Century of change and innovation demands problem-solving and critical thinking skills. This course approaches the teaching of context areas with a student-focused lens that engages inquiring minds with the small group exploration of open-ended problems. Lesson structure, activities, and assessment will be integral to the course. This course requires five hours of observation in a local secondary school. Additional assignments are required beyond those of EDUC 319. Graduate/Undergraduate Equivalency: EDUC 319. Mutually Exclusive: Credit cannot be earned for EDUC 519 and EDUC 319.

EDUC 520 - TEACHING DIVERSE LEARNERS  
Short Title: TEACHING DIVERSE LEARNERS  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course offers pedagogies for learners who have different ways of seeing the world, different experiences, and different learning needs. A variety of teaching methods and strategies help special needs students, gifted and talented students and English language learners succeed in the classroom. This course also addresses effective communication in ARDS, LPACS, and staffing within classrooms. Students learn about the support personnel who can assist the classroom teacher. Required for certification. This course requires five hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 320. Graduate/Undergraduate Equivalency: EDUC 320. Mutually Exclusive: Credit cannot be earned for EDUC 520 and EDUC 320.
EDUC 521 - CURRICULUM DEVELOPMENT
Short Title: CURRICULUM DEVELOPMENT
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

Description: This course is the first of a two-part series for preservice teachers. It offers a reflective study of classroom practice through seventy-five (75) hours of observation in secondary schools and teaching activities under the guidance of cooperating teachers and education team members in an actual classroom setting. This course includes opportunities to structure lessons for diverse student populations with whole group and small group lessons. This course is required for certification. Additional assignments are required beyond those for EDUC 421. Instructor Permission Required. Graduate/Undergraduate Equivalency: EDUC 421. Mutually Exclusive: Credit cannot be earned for EDUC 521 and EDUC 421.

EDUC 522 - LITERACY ACROSS THE CURRICULUM
Short Title: LITERACY ACROSS THE CURRICULUM
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

Description: How students are taught to read and write in all academic and elective disciplines is critical to the academic development of adolescents. In this course multiple literacies will be discussed in terms of theory and practice. Students will examine reading, writing, listening, speaking and thinking strategies across the curriculum and their impact on learning. Additionally students will investigate, plan, and practice the skills of using literacy strategies for the specific discipline. Required for certification. This course requires five hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 422. Graduate/Undergraduate Equivalency: EDUC 422. Mutually Exclusive: Credit cannot be earned for EDUC 522 and EDUC 422.

EDUC 523 - CREATIVE WRITING IN THE CLASSROOM
Short Title: CREATIVE WRITING IN CLASSROOM
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

Description: The nature of adolescence in an increasingly complex and diversity society is examined through literature written for and about adolescents and young adults. This study of the cultural, literary and developmental issues in adolescent literature is relevant to students of literature, psychology, child development, anthropology and sociology, and is recommended for students preparing to become teachers. This course requires five hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 325. Graduate/Undergraduate Equivalency: EDUC 325. Mutually Exclusive: Credit cannot be earned for EDUC 525 and EDUC 325.

EDUC 525 - ADOLESCENT LITERATURE
Short Title: ADOLESCENT LITERATURE
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

Description: The nature of adolescence in an increasingly complex and diversity society is examined through literature written for and about adolescents and young adults. This study of the cultural, literary and developmental issues in adolescent literature is relevant to students of literature, psychology, child development, anthropology and sociology, and is recommended for students preparing to become teachers. This course requires five hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 325. Graduate/Undergraduate Equivalency: EDUC 325. Mutually Exclusive: Credit cannot be earned for EDUC 525 and EDUC 325.

EDUC 535 - URBAN EDUCATION: ISSUES, POLICY, AND PRACTICE
Short Title: URBAN ED:ISSUES, POLICY & PRAC
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate

Description: This course focuses on the major issues facing urban education, including poverty, the implications of racial and ethnic diversity for educational institutions, and strategies for improving academic achievement in urban schools. Students will examine sociological, political, cultural and educational research and theory, as well as explore strategies for improvement of urban education at the classroom, school and policy levels. This course requires five hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 335. Graduate/Undergraduate Equivalency: EDUC 335. Mutually Exclusive: Credit cannot be earned for EDUC 535 and EDUC 335.
EDUC 540 - SEMINAR FOR FIRST-YEAR TEACHERS  
Short Title: SEMINAR FOR FIRST-YR TEACHERS  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Internship/Practicum  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: In this single-year internship, first year teachers will be supported in their work by field supervisors. In a weekly seminar, teachers will analyze their practice with current theories in education. Teachers will also develop and defend portfolios of their work. This course is required for stand certification and for the Master of Arts in Teaching. Repeatable for Credit.

EDUC 545 - EDUCATIONAL TECHNOLOGIES & DIGITAL LEARNING  
Short Title: EDUC TECH & DIGITAL LRNING  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: The primary purposes of this course is to prepare teachers to identify and evaluate effective, appropriate data and curriculum management systems/programs that improve student achievement; to determine how technologies can personalize and accelerate learning goals for students; and understand how technology can be used to change communication and pedagogical practices in the classroom. This course is required for certification. This course requires five hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 345. Graduate/Undergraduate Equivalency: EDUC 345. Mutually Exclusive: Credit cannot be earned for EDUC 545 and EDUC 345.

EDUC 550 - EDUCATION POLICY: FROM LEGISLATURES TO CLASSROOMS  
Short Title: EDUCATION POLICY  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Policy issues in this course include school funding, curriculum decisions, accountability systems, discipline policies, and other areas. What are the major policy discussions affecting K-12 education today, and how are they resolved in the political arena? Who drives policy in each of these areas and what role can or does research-based analysis play? We will answer these questions and more as we explore the political arena of educational policy. This class requires five hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 350. Graduate/Undergraduate Equivalency: EDUC 350. Mutually Exclusive: Credit cannot be earned for EDUC 550 and EDUC 350/POST 340.

EDUC 560 - THEORY AND METHODS: ART  
Short Title: THEORY AND METHODS: ART  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course involves the study and integration of theory and methods with observation and practice in the classroom through the facilitation of student-led, student-centered activities. Under the guidance of education support team members, the course offers multiple methods for implementing curriculum with diverse students. Required for certification. This course includes a minimum of 5 hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 460. Graduate/Undergraduate Equivalency: EDUC 460. Mutually Exclusive: Credit cannot be earned for EDUC 560 and EDUC 460.

EDUC 561 - THEORY AND METHODS: ENGLISH LANGUAGE ARTS & READING (ELAR)  
Short Title: THEORY AND METHODS: ELAR  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course involves the study and integration of theory and methods with observation and practice in the classroom through the facilitation of student-led, student-centered activities. Under the guidance of education support team members, the course offers multiple methods for implementing curriculum with diverse students. Required for certification. This course includes a minimum of 5 hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 461. Graduate/Undergraduate Equivalency: EDUC 461. Mutually Exclusive: Credit cannot be earned for EDUC 561 and EDUC 461.

EDUC 562 - THEORY AND METHODS: LOTE  
Short Title: THEORY AND METHODS: LOTE  
Department: Education  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course involves the study and integration of theory and methods with observation and practice in the classroom through the facilitation of student-led, student-centered activities. Under the guidance of education support team members, the course offers multiple methods for implementing curriculum with diverse students. Required for certification. This course includes a minimum of 5 hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 462. Graduate/Undergraduate Equivalency: EDUC 462. Mutually Exclusive: Credit cannot be earned for EDUC 562 and EDUC 462.
EDUC 563 - THEORY AND METHODS: MATHEMATICS
Short Title: THEORY AND METHODS: MATHEMATICS
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course involves the study and integration of theory and methods with observation and practice in the classroom through the facilitation of student-led, student-centered activities. Under the guidance of education support team members, the course offers multiple methods for implementing curriculum with diverse students. Required for certification. This course includes a minimum of 5 hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 463. Graduate/Undergraduate Equivalency: EDUC 463. Mutually Exclusive: Credit cannot be earned for EDUC 563 and EDUC 463.

EDUC 564 - THEORY AND METHODS: PHYSICAL EDUCATION
Short Title: THEORY AND METHODS: PHYSICAL ED
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Students with a class of Freshman may not enroll. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course involves the study and integration of theory and methods with observation and practice in the classroom through the facilitation of student-led, student-centered activities. Under the guidance of education support team members, the course offers multiple methods for implementing curriculum with diverse students. Required for certification. This course includes a minimum of 5 hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 464. Graduate/Undergraduate Equivalency: EDUC 464. Mutually Exclusive: Credit cannot be earned for EDUC 564 and EDUC 464.

EDUC 565 - THEORY AND METHODS: SCIENCE
Short Title: THEORY AND METHODS: SCIENCE
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course involves the study and integration of theory and methods with observation and practice in the classroom through the facilitation of student-led, student-centered activities. Under the guidance of education support team members, the course offers multiple methods for implementing curriculum with diverse students. Required for certification. This course includes a minimum of 5 hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 465. Graduate/Undergraduate Equivalency: EDUC 465. Mutually Exclusive: Credit cannot be earned for EDUC 565 and EDUC 465.

EDUC 566 - THEORY AND METHODS: SOCIAL STUDIES
Short Title: THEORY AND METHODS: SOCIAL STUD
Department: Education
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course involves the study and integration of theory and methods with observation and practice in the classroom through the facilitation of student-led, student-centered activities. Under the guidance of education support team members, the course offers multiple methods for implementing curriculum with diverse students. Required for certification. This course includes a minimum of 5 hours of observation in a local secondary school. Additional assignments are required beyond those for EDUC 466. Graduate/Undergraduate Equivalency: EDUC 466. Mutually Exclusive: Credit cannot be earned for EDUC 566 and EDUC 466.

EDUC 567 - PRACTICUM FOR PRESERVICE TEACHERS
Short Title: PRACT FOR PRESERVICE TEACHERS
Department: Education
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 6
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (EDUC 560 or EDUC 561 or EDUC 562 or EDUC 563 or EDUC 564 or EDUC 565 or EDUC 566) and EDUC 521
Description: This is the second course in the two-part series for preservice teachers. In this field-based practicum. The preservice teacher will have a concentrated experience in student teaching based on the lesson development, pedagogical explorations, and field-based work of the previous semester. Students are expected to follow the assigned district/campus academic calendar for the semester of student teaching. This course is required for certification. Additional assignments are required beyond those for EDUC 467. Graduate/Undergraduate Equivalency: EDUC 467. Mutually Exclusive: Credit cannot be earned for EDUC 567 and EDUC 467. Repeatable for Credit.

EDUC 570 - FIELD-BASED STUDIES IN TEACHING AND LEARNING
Short Title: FLD-BASED STDY & LRNG
Department: Education
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The study of critical issues in urban education uses ethnographic research methods to study a wide range of educational subjects, from policy impact to classroom practice, from curriculum and pedagogy to the cultures of the children. The course includes a seminar on research methodologies, with a focus on ethnography; independent research projects in a local school setting; and directed case studies. It is open particularly to students in education, sociology, psychology, anthropology and cultural studies. Additional assignments are required beyond those for EDUC 470. Graduate/Undergraduate Equivalency: EDUC 470. Mutually Exclusive: Credit cannot be earned for EDUC 570 and EDUC 470.
EDUC 590 - INSTRUCTIONAL LEADERSHIP  
*Short Title:* INSTRUCTIONAL LEADERSHIP  
*Department:* Education  
*Grade Mode:* Standard Letter  
*Course Type:* Seminar  
*Credit Hours:* 3  
*Restrictions:* Enrollment is limited to Graduate level students.  
*Course Level:* Graduate  
*Prerequisite(s):* EDUC 516 and EDUC 519 and EDUC 520 and EDUC 522 and EDUC 545  
*Description:* A focus on professional student-centered coaching techniques empowers students in this course to become catalysts for instructional improvement and student achievement. As current practitioners in the field, students use their personal experiences while adding foundational and progressive research, advanced methodologies, and curriculum tools to enhance the capacity of leaders in the educational arena. Repeatable for Credit.

EDUC 591 - INDEPENDENT STUDY AND RESEARCH  
*Short Title:* INDEPENDENT STUDY AND RESEARCH  
*Department:* Education  
*Grade Mode:* Standard Letter  
*Course Type:* Research  
*Credit Hours:* 1-3  
*Restrictions:* Enrollment is limited to Graduate level students.  
*Course Level:* Graduate  
*Description:* This course uses ethnographic and quantitative research methods to study a specific issue in education. Independent research projects may include literature reviews and analysis, and/or case studies in school settings. Additional assignments are required beyond those for EDUC 491. Instructor Permission Required. Graduate/Undergraduate Equivalency: EDUC 491. Mutually Exclusive: Credit cannot be earned for EDUC 591 and EDUC 491. Repeatable for Credit.

EDUC 595 - CAPSTONE  
*Short Title:* CAPSTONE  
*Department:* Education  
*Grade Mode:* Standard Letter  
*Course Type:* Seminar  
*Credit Hours:* 3  
*Restrictions:* Enrollment is limited to Graduate level students.  
*Course Level:* Graduate  
*Description:* The Capstone Project is the culmination of the program as the student melds the MAT course of study specialization with classroom experience. The work in this two-semester course is showcased in a portfolio to be defended before an academic committee. Repeatable for Credit.

EDUC 596 - ORGANIZATIONAL LEADERSHIP  
*Short Title:* ORGANIZATIONAL LEADERSHIP  
*Department:* Education  
*Grade Mode:* Standard Letter  
*Course Type:* Seminar  
*Credit Hours:* 3  
*Restrictions:* Students with a class of Freshman, Junior, Sophomore or Senior may not enroll. Enrollment is limited to Graduate level students.  
*Course Level:* Graduate  
*Corequisite:* EDUC 590  
*Description:* Students will be challenged in workshops that test a leader’s ability to solve problems that include school finance management, student demographics and test scores, teachers’ effectiveness, and the community’s needs. Department Permission Required.

EDUC 597 - PRACTICUM FOR PRINCIPALS  
*Short Title:* PRACTICUM FOR PRINCIPALS  
*Department:* Education  
*Grade Mode:* Standard Letter  
*Course Type:* Internship/Practicum  
*Credit Hours:* 3  
*Restrictions:* Enrollment is limited to Graduate level students.  
*Course Level:* Graduate  
*Prerequisite(s):* EDUC 504 and EDUC 516 and EDUC 590 and EDUC 596  
*Description:* During this two-semester course students will be implementing the knowledge gained from classroom experiences into tasks in their home schools under guidance of a school mentor and a field supervisor. Department Permission Required. Repeatable for Credit.

**Electrical & Comp. Engineering (ELEC)**

**ELEC 101 - ELEMENTS OF ELECTRICAL ENGINEERING**  
*Short Title:* ELEMENTS OF ELECT ENGINEERING  
*Department:* Electrical & Computer Eng.  
*Grade Mode:* Standard Letter  
*Course Type:* Lecture/Laboratory  
*Credit Hours:* 3  
*Restrictions:* Enrollment is limited to students with a class of Freshman or Sophomore. Graduate level students may not enroll.  
*Course Level:* Undergraduate Lower-Level  
*Description:* Introduction to fundamentals of electrical engineering through the hands-on design of a micro-controlled model electric car. Topics from fields of circuits, signals, computing, and sensing are covered as needed to support the student in designing systems to power, monitor, and control the vehicle’s speed, and to guide its trajectory, in order to pass a series of vehicle tests. Instructor Permission Required.

**ELEC 207 - MATHEMATICAL TOOLS AND METHODS IN ELECTRICAL AND COMPUTER ENGINEERING**  
*Short Title:* MATH TOOLS AND METHODS IN ECE  
*Department:* Electrical & Computer Eng.  
*Grade Mode:* Standard Letter  
*Course Type:* Lecture  
*Credit Hours:* 3  
*Restrictions:* Graduate level students may not enroll.  
*Course Level:* Undergraduate Lower-Level  
*Prerequisite(s):* MATH 101 and MATH 102  
*Description:* This course is based on matrix theory and linear algebra, with emphasis given to useful topics in Electrical and Computer Engineering. These topics include the evaluation of systems of equations (algebraic and differential), vector spaces, determinants, eigenvalues, similarity, and positive definite matrices. Numerical methods for solving ordinary and partial differential equations are also included.
ELEC 220 - FUNDAMENTALS OF COMPUTER ENGINEERING
Short Title: FUND COMPUTER ENGINEERING
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to students with a major in Computer Science, Engineering Division, Electrical & Computer Eng. or Electrical Engineering. Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An overview of computer engineering, starting with fundamental building blocks including transistors, bits, data representation, logic and state machines, progressing to computer organization, instruction sets, interrupts, input/output, assembly language programming, and linkage conventions, and ending with an introduction to architectural performance enhancements and computing services.
Course URL: www.owlnet.rice.edu/~elec220

ELEC 240 - FUNDAMENTALS OF ELECTRICAL ENGINEERING I
LABORATORY
Short Title: FUND EE I LAB
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): MATH 101 and MATH 102
Corequisite: ELEC 241
Description: Laboratory course that introduces basic electronic measurement techniques and demonstrates the principles of information management by electronic means. Lectures supplement the laboratory experiments.

ELEC 241 - FUNDAMENTALS OF ELECTRICAL ENGINEERING I
Short Title: FUND ELECTRICAL ENGINEERING I
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): MATH 101 and MATH 102
Corequisite: ELEC 240
Description: The creation, manipulation, transmission, and reception of information by electronic means, elementary signal theory; time and frequency-domain analysis; sampling theorem. Digital information theory; digital transmission of analog signals; error-correcting codes.

ELEC 242 - FUNDAMENTALS OF ELECTRICAL ENGINEERING II
Short Title: FUND ELEC ENGINEERING II
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): ELEC 241
Corequisite: ELEC 244
Description: Formulation and solution of equations describing electric circuits and electromechanical systems. Behavior of dynamic systems in the time and frequency domains. Basic electronic devices and circuits, including diodes, transistors, optoelectronics, gates, and amplifiers. Introduction to feedback control and digital systems. Students must register for both ELEC 242 and ELEC 244.

ELEC 243 - ELECTRONIC MEASUREMENT SYSTEMS
Short Title: ELECTRONIC MEASUREMENT SYSTEMS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): MATH 101 and MATH 102 and PHYS 102
Description: The course will give students the skills to design, construct, and assess electronic systems to measure, monitor, and control physical properties and events; spans the areas of circuits, signals, systems, and digital processing. Intended for non-ECE majors.
Course URL: www.owlnet.rice.edu/~elec243

ELEC 244 - FUNDAMENTALS OF ELECTRICAL ENGINEERING II
LABORATORY
Short Title: FUND ELEC ENGINEERING II LAB
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Corequisite: ELEC 242
Description: Lab skills covered including breadboarding, use of oscilloscopes, and circuit debugging. Topics covered include design, construction, and testing of basic electronic circuits; RLC networks; diodes; transistors; operational amplifiers; comparators; interfacing digital and analog circuits; pulse width modulation; motors; and feedback control. Students must register for both ELEC 242 and ELEC 244.
ELEC 261 - ELECTRONIC MATERIALS AND QUANTUM DEVICES
Short Title: ELECTRONIC MATERIALS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): MATH 102 and (PHYS 102 or PHYS 112)
Description: An overview of fundamental topics in physical electronics including a semiclassical approach to the electrical, magnetic, and optical properties of materials as well as an introduction to quantum mechanics, atomic physics, crystal lattices, and electronic band structure.

ELEC 262 - INTRODUCTION TO WAVES AND PHOTONICS
Short Title: INTRO TO WAVES AND PHOTONICS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): (PHYS 101 or PHYS 111 or PHYS 125 or PHYS 141) and (PHYS 102 or PHYS 112 or PHYS 126 or PHYS 142)
Description: Introduction to the concepts of waves and oscillatory motion with a particular focus on electromagnetic waves and their interaction with dielectric materials, and on the use of these ideas in the fields of optical fiber communications, laser design, non-linear optics, and Fourier optics.

ELEC 281 - HISTORY OF NUMBERS AND GAMES OF CHANCE
Short Title: NUMBER HISTORY/GAMES OF CHANCE
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Starting with the colorful history of numbers, we discover their use to characterize chance or luck through probability; students will participate in one major project and submit a report application areas include physics, computer science, sports, finance, etc. The course is accessible to sophomores and juniors in science, engineering or business. Cross-list: COMP 281, STAT 281.

ELEC 301 - SIGNALS, SYSTEMS, AND LEARNING
Short Title: SIGNALS, SYSTEMS, AND LEARNING
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 241
Corequisite: ELEC 303
Description: Analytical framework for analyzing signals and systems. Time and frequency domain analysis of continuous and discrete time signals and systems, convolution, and the Laplace and Z transforms. Introduction to algorithms for machine learning on signals, including clustering, regression, and classification. Instructor Permission Required. Recommended Prerequisite(s): CAAM 335 or MATH 355

ELEC 302 - INTRODUCTION TO SYSTEMS
Short Title: INTRODUCTION TO SYSTEMS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 301 or MATH 355 or CAAM 335
Description: In many applications one is faced with the task of simulating or controlling complex dynamical systems. Such applications include for instance, weather prediction, air quality management, VLSI chip design, molecular dynamics, active noise reduction, chemical reactors, etc. In all these cases complexity manifests itself as the number of first order differential equations which arise. For the above examples, depending on the level of modeling detail required, complexity may range anywhere from a few thousand to a few million first order equations, and above. Simulating (controlling) systems of such complexity becomes a challenging problem, irrespective of the computational resources available. In this course we will set the foundations for model of linear systems. For this, state space representation will be introduced and analyzed. One of the main conclusions will be that certain appropriately defined singular values will provide the trade-off between accuracy and complexity of these dynamical systems.

ELEC 303 - RANDOM SIGNALS IN ELECTRICAL ENGINEERING SYSTEMS
Short Title: RANDOM SIGNALS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 301 (may be taken concurrently)
Description: An introduction to probability theory and statistics with applications to electrical engineering problems in signal processing, communications and control; probability spaces, conditional probability, independence, random variables, distribution and density functions, random vectors, signal detection and parameter estimation.

ELEC 305 - INTRODUCTION TO PHYSICAL ELECTRONICS
Short Title: INTRO PHYSICAL ELECTRONICS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 261
Description: Survey of devices and physical principles that are used in modern electronic systems such as cellphones: diodes, transistors, integrated circuits; scaling and Moore's Law; transmission lines; signal integrity; antennas.
ELEC 306 - APPLIED ELECTROMAGNETICS
Short Title: APPLIED ELECTROMAGNETICS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 241 and MATH 212 and PHYS 102
Description: An introduction to the theory of static and dynamic electromagnetic fields with a focus on engineering applications. Principles will be illustrated with applications in various areas. Topics include computational electromagnetics, transmission lines, antennas, electromagnetic interference, and signal propagation in high speed circuits.

ELEC 322 - APPLIED ALGORITHMS AND DATA STRUCTURES
Short Title: APPL ALGORITHMS&DATA STRUCTURE
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 211 and COMP 280 (may be taken concurrently)
Description: Design analysis of computer algorithms and data structures useful for applied problems. Laboratory assignments will use these techniques in conjunction with advanced programming methods. Cross-list: COMP 314. Recommended Prerequisite(s): COMP 280 or may be taken the same semester.

ELEC 323 - PRINCIPLES OF PARALLEL PROGRAMMING
Short Title: FUNDAMENTALS OF PARALLEL PROG
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 211 or COMP 215
Description: Fundamentals of parallel programming: abstract models of parallel computers, parallel algorithms and data structures, and common parallel programming patterns including task parallelism, undirected and directed synchronization, data parallelism, divide-and-conquer parallelism, and map-reduce. Laboratory assignments will explore these topics through the use of parallel extensions to the Java language. Cross-list: COMP 322. Recommended Prerequisite(s): COMP 221.

ELEC 326 - DIGITAL LOGIC DESIGN
Short Title: DIGITAL LOGIC DESIGN
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 220
Description: Study of gates, flip-flops, combinational and sequential switching circuits, registers, logical and arithmetic operations, introduction to the Verilog hardware description language. Cross-list: COMP 326.

ELEC 327 - IMPLEMENTATION OF DIGITAL SYSTEMS
Short Title: IMPLEMENTATION OF DIGITAL SYS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 326
Description: Embedded microsystems are widely employed to provide intelligence to sensors and actuators throughout our daily life. In this course, we learn the software and hardware frameworks which underly embedded systems design. Students will learn the fundamentals of embedded system programming and feel competent to design, build, and manufacture their own embedded devices. In particular, we focus on principles of low-power design and interface with external peripherals. In addition, students will learn how to design their own manufacturable hardware and discover how application-specific blocks enable modern commercial devices to function. There are weekly lab assignments and two projects. Instructor Permission Required.

ELEC 332 - ELECTRONIC SYSTEMS PRINCIPLES AND PRACTICE
Short Title: ELEC SYS PRINCIPLES & PRACTICE
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 242
Description: This course covers the theory and techniques necessary to realize modern, high performance electronic systems. Design considerations for systems utilizing high speed, high frequency analog and digital integrated circuits will be covered. SECTION 001: Topics will include measurement and simulation techniques, signal integrity, printed circuit layout, mixed signal systems, rf circuits, and EMI/EMC considerations. Topics will be lectured and illustrated by a series of laboratory exercises. SECTION 002: Students develop a microcontroller system for controlling the functions of a model electric car. Power and sensor circuits will be designed to monitor and control the vehicle’s speed, and to guide its trajectory, in order to pass a series of vehicle tests. Instructor Permission Required.

ELEC 342 - ANALOG ELECTRONIC CIRCUITS
Short Title: ANALOG ELECTRONIC CIRCUITS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 242 or ELEC 243
Description: The course starts with a review of 1st order and 2nd order linear circuits. It emphasizes time-domain techniques and discusses step and impulse responses, reviews basic device physics of a CMOS transistor, followed by a derivation of current-voltage equations. The course also covers an in-depth analysis of large-signal behavior, linearization, and small signal models. Furthermore, it discusses single-stage and multi-stage amplifiers as well as differential amplifiers, common mode rejection ratio (CMRR), and techniques for increasing gain and improving linearity.
ELEC 361 - QUANTUM MECHANICS FOR ENGINEERS
Short Title: QUANTUM MECHANICS FOR ENGINEER
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course provides the background in quantum mechanics and solid state physics necessary for further studies in semiconductor optoelectronic devices, quantum electronics, nanoscience, and photonics. Examples include: electronic energy levels in semiconductor quantum wells and superlattices; tunneling phenomena in semiconductor devices; the Kronig-Penney model; crystal momentum, effective mass, and Bloch oscillations; band structure of graphene and carbon nanotubes; and introduction to quantum information science.
Course URL: www.ece.rice.edu/~kono/ELEC361.html

ELEC 364 - PHOTONICS MEASUREMENTS: PRINCIPLES AND PRACTICE
Short Title: PHOTONICS MEASUREMENTS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 262 or PHYS 201
Description: After completing this course, students will have the knowledge and experimental skills to design and apply a photonic measurement system to monitor an environment, process, device, or system. The course will combine predefined labs to develop skills with application projects. Instructor Permission Required.

ELEC 365 - NANOMATERIALS FOR ENERGY
Short Title: NANOMATERIALS FOR ENERGY
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will introduce students to the fundamental science of nanomaterials. Many of the concepts will be explained by drawing from applications in sustainability (photovoltaics, solar-to-fuel conversion thermionic, thermolectric, fuel cells). Students will design a lab demo from scratch using amongst others the infrastructure provided by the photonics measurement lab. Cross-list: MSNE 365.

ELEC 380 - INTRODUCTION TO NEUROENGINEERING: MEASURING AND MANIPULATING NEURAL ACTIVITY
Short Title: INTRO TO NEUROENGINEERING
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (PHYS 101 or PHYS 111 or PHYS 125 or PHYS 141) and (PHYS 102 or PHYS 112 or PHYS 126 or PHYS 142)
Description: This course will serve as an introduction to quantitative modeling of neural activity and the methods used to stimulate and record brain activity. Cross-list: BIOE 380, NEUR 383. Mutually Exclusive: Credit cannot be earned for ELEC 380 and BIOE 480/BIOE 590/ELEC 480/ELEC 580.

ELEC 381 - FUNDAMENTALS OF NERVE AND MUSCLE ELECTROPHYSIOLOGY
Short Title: FUND OF ELECTROPHYSIOLOGY
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 261
Description: An introduction to cellular electrophysiology. Includes development of whole-cell models for neurons and muscle (cardiac and skeletal muscle) cells, based on ion channel currents obtained from whole-cell voltage-clamp experiments. Material balance equations are developed for various ions and chemical signaling agents (e.g., second messengers). Numerical methods are introduced for solving the ordinary and partial differential equations associated with these models. Several types of cell models are discussed ranging from neurons and muscle cells to sensory cells of mechanoreceptors, auditory hair cells and photoreceptor cells. Volume conductor boundary-value problems frequently encountered in electrophysiology are posed. Course provides a cellular basis for the interpretation of macroscopic bioelectric signals such as the electrocardiogram (ECG), electromyogram (EMG), electroretinogram (ERG) and electroencephalogram. Cross-list: BIOE 381.

ELEC 382 - INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE
Short Title: INTRO COMPUTATIONAL NEURSCI
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to methods and theories used to describe and understand neural information processing in the brain. Models covered will range from single neuron to networks for sensory, motor and learning tasks. Programming exercises will be done using Matlab. Cross-list: NEUR 382. Recommended Prerequisite(s): CAAM 210. Mutually Exclusive: Credit cannot be earned for ELEC 382 and NEUR 582.
ELEC 421 - OPERATING SYSTEMS AND CONCURRENT PROGRAMMING

Short Title: OP SYS/CONCURRENT PROGRAMMING
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 215 and (COMP 221 or COMP 321)
Description: Introduction to the design, construction, and analysis of concurrent programs with an emphasis on operating systems, including filing systems, schedulers, and memory allocators. Specific attention is devoted to process synchronization and communication within concurrent programs. Cross-list: COMP 421. Graduate/Undergraduate Equivalency: ELEC 552. Mutually Exclusive: Credit cannot be earned for ELEC 421 and ELEC 552.
Course URL: www.clear.rice.edu/comp421/

ELEC 422 - VLSI SYSTEMS DESIGN

Short Title: VLSI SYSTEMS DESIGN
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 326
Description: A study of VLSI technology and design. MOS devices, Characteristics and fabrication. Logic design and implementation. VLSI design methodology, circuit simulation and verification. Graduate/Undergraduate Equivalency: ELEC 552. Mutually Exclusive: Credit cannot be earned for ELEC 422 and ELEC 552.

ELEC 424 - MOBILE AND EMBEDDED SYSTEM DESIGN AND APPLICATION

Short Title: MOBILE & EMBEDDED SYSTEM
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 220
Description: ELEC 424 introduces mobile and embedded system design and applications to undergraduate students and provides them hands-on design experience. It consists of three interlearning parts: lectures, student project, and student presentations. Cross-list: COMP 424.
Graduate/Undergraduate Equivalency: ELEC 553. Mutually Exclusive: Credit cannot be earned for ELEC 424 and ELEC 553.
Course URL: www.ruf.rice.edu/~mobile/elec424/

ELEC 425 - COMPUTER SYSTEMS ARCHITECTURE

Short Title: COMPUTER SYSTEMS ARCHITECTURE
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 326 or COMP 326
Description: Evolution of key architecture concepts found in advanced uniprocessor systems. Fundamental and advanced pipelining techniques and associated issues for improving processor performance. Illustrated with RISC processors such as the ARM processor. Examine several metrics for processor performance, such as Amdahl's law. Key concepts of data and program memory systems found in modern systems with memory hierarchies and caches. Perform experiments in cache performance analysis. Influence of technology trends, such as Moore's law, on processor implementation Approaches for exploiting instruction level parallelism, such as VLIW. Introduction to parallel and multicore architectures. Introduction to processor architectures targeted for embedded applications. Cross-list: COMP 425. Graduate/Undergraduate Equivalency: ELEC 554. Mutually Exclusive: Credit cannot be earned for ELEC 425 and ELEC 554.
ELEC 427 - ADVANCED DIGITAL HARDWARE DESIGN, IMPLEMENTATION, AND OPTIMIZATION
Short Title: ADV DIGITAL DESIGN & IMPLEMENT
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 326 or COMP 326
Description: This senior level course will investigate design and implementation of modern digital signal processing, machine learning, and security algorithms in hardware (including FPGAs and ASICs). Along with learning the principals of design, students will acquire hands-on experience in hardware implementation and the use of the hardware in modern applications including but not limited to mobile phones, biomedical devices, and smart cards. Emphasis is on digital processors, design implementation on FPGA/ASIC fabrics and testing real systems on board, architectures, control, functional units, and circuit topologies for increased performance and reduced circuit size and power dissipation. Graduate/Undergraduate Equivalency: ELEC 555. Mutually Exclusive: Credit cannot be earned for ELEC 427 and ELEC 555. Repeatable for Credit.

ELEC 429 - INTRODUCTION TO COMPUTER NETWORKS
Short Title: INTRO TO COMPUTER NETWORKS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 221 or COMP 321
Course URL: www.clear.rice.edu/comp429/

ELEC 430 - DIGITAL COMMUNICATION
Short Title: DIGITAL COMMUNICATION
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 301 and ELEC 303
Description: Course in digital communications, designed to prepare students for engineering work in high-tech industries and for graduate work in communications, signal processing, and computer systems. Covers basic concepts and useful tools for design and performance analysis of transmitters and receivers in the physical layer of a communication system. Graduate/Undergraduate Equivalency: ELEC 551. Mutually Exclusive: Credit cannot be earned for ELEC 430 and ELEC 551.

ELEC 431 - DIGITAL SIGNAL PROCESSING
Short Title: DIGITAL SIGNAL PROCESSING
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 301
Description: Methods for analysis of discrete-time signals and design of discrete-time systems including topics of: discrete-time linear systems, difference equations, z-transforms, discrete convolution, stability, discrete-time Fourier transforms, analog-to-digital and digital-to-analog conversion, digital filter design, discrete Fourier transforms, fast Fourier transforms, multi-rate signal processing, filter banks, and spectral analysis. Graduate/Undergraduate Equivalency: ELEC 558. Mutually Exclusive: Credit cannot be earned for ELEC 431 and ELEC 558.

ELEC 432 - MOBILE BIO-BEHAVIORAL SENSING
Short Title: MOBILE BIO-BEHAVIORAL SENSING
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 301
Description: In the next-generation of devices, designed for diverse fields as healthcare and education, the devices will understand the human user. At the core of this understanding will be data that is gathered from a new class of sensors, that can measure both biological and behavioral markers. This course introduces the fundamentals of bio- and behavioral sensing. Graduate/Undergraduate Equivalency: ELEC 534. Mutually Exclusive: Credit cannot be earned for ELEC 432 and ELEC 534.

ELEC 433 - ARCHITECTURE FOR WIRELESS COMMUNICATIONS
Short Title: ARCH - WIRELESS COMMUNICATIONS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 301 and ELEC 326
Description: This is an FPGA laboratory course in which students will embark upon a detailed study and implementation of digital communications systems. Major functional blocks of end-to-end wireless communication systems will be discussed, built, tested in hardware. Students will work in groups on weekly lab assignments and a major semester project. Mutually Exclusive: Credit cannot be earned for ELEC 433 and ELEC 536.
ELEC 435 - INTRODUCTION TO ENERGY-EFFICIENT MECHATRONICS
Short Title: INTRO TO MECHATRONICS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 303 or ELEC 242 or ELEC 243
Description: Introduction to electromechanical systems, focusing on motor mechanics, electric drives & electronics, & modern digital control algorithms. Covers basic principles of electromechanical energy conversion & motor control. Students are introduced to energy efficiency considerations of modern electric drives. Includes hands-on laboratory projects involving digital computer control of various motor types.
Mutually Exclusive: Credit cannot be earned for ELEC 435 and ELEC 532.

ELEC 436 - FUNDAMENTALS OF CONTROL SYSTEMS
Short Title: FUNDAMENTALS OF CONTROL SYST
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MECH 343 or (ELEC 242 and ELEC 244) or (CAAM 335 or MATH 355)
Description: Linear systems and the fundamental principles of classical feedback control, state variable analysis of linear dynamic systems, stability of linear control systems, time-domain analysis and control of linear systems, root-locus analysis and design and pole-zero synthesis, frequency domain techniques for the analysis and design of control systems. Cross-list: MECH 420.

ELEC 437 - INTRODUCTION TO COMMUNICATION NETWORKS
Short Title: INTRO TO COMMUNICATION NETWORK
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 303
Description: Introduction to design and analysis of communication networks. Topics include wireless networks, media access, routing traffic modeling, congestion control, and scheduling. Graduate/Undergraduate Equivalency: ELEC 539. Mutually Exclusive: Credit cannot be earned for ELEC 437 and ELEC 539.

ELEC 438 - WIRELESS NETWORKING FOR UNDER-RESOURCED URBAN COMMUNITIES
Short Title: WIRELESS NETWG UNDER-RESRC'D
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The Rice Networks Group and the non-profit organization Technology For All have recently deployed a state-of-the-art wireless network in one of Houston's most economically disadvantaged neighborhoods. The objective of this network is to empower under-resourced communities with access to technology and educational and work-at-home tools. In this course project teams will perform measurement studies both in the Rice Networks Lab and in the East End neighborhood to characterize the system capacity, optimize placement of wireless nodes; study the effects of traffic and channel characteristics on system-wide performance; and plan deployment of additional nodes to extend the coverage area.

ELEC 440 - ARTIFICIAL INTELLIGENCE
Short Title: ARTIFICIAL INTELLIGENCE
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): COMP 310 and (STAT 310 or ECON 307 or ECON 382 or STAT 312 or STAT 331 or ELEC 331 or ELEC 303) and (MATH 354 or MATH 355 or CAAM 335)
Description: This is a foundational course in artificial intelligence, the discipline of designing intelligent agents. The course will cover the design and analysis of agents that do the right thing in the face of limited information and computational resources. The course revolves around two main questions: how agents decide what to do, and how they learn from experience. Tools from computer science, probability theory, and game theory will be used. Interesting examples of intelligent agents will be covered, including poker playing programs, bots for various games (e.g. WoW), DS1 -- the spacecraft that performed an autonomous flyby of Comet Borrely in 2001, Stanley -- the Stanford robot car that won the Darpa Grand Challenge, Google Maps and how it calculates driving directions, face and handwriting recognizers, Fedex package delivery planners, airline fare prediction sites, and fraud detectors in financial transactions. Cross-list: COMP 440. Graduate/Undergraduate Equivalency: ELEC 557. Mutually Exclusive: Credit cannot be earned for ELEC 440 and ELEC 557.
Course URL: www.owlnet.rice.edu/~comp440
ELEC 447 - INTRODUCTION TO COMPUTER VISION
Short Title: INTRO TO COMPUTER VISION
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An introduction to the basic concepts, algorithms and applications in computer vision. Topics include: cameras, camera models and imaging pipeline, low-level vision/image processing methods such as filtering and edge detection; mid-level vision topics such as segmentation and clustering; shape reconstruction from stereo, introduction to high-level vision tasks such as object recognition and face recognition. The course will involve programming and implementing basic computer vision algorithms in Matlab. Cross-list: COMP 447. Graduate/Undergraduate Equivalency: ELEC 546. Mutually Exclusive: Credit cannot be earned for ELEC 447 and ELEC 345/ELEC 546.

ELEC 450 - ALGORITHMIC ROBOTICS
Short Title: ALGORITHMIC ROBOTICS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (COMP 221 or COMP 321) and COMP 215
Description: Robots have fascinated people for generations. Today, robots are built for applications as diverse as exploring remote planets, de-mining war zones, cleaning toxic waste, assembling cars, inspecting pipes in industrial plants and mowing lawns. Robots are also interacting with humans in a variety of ways: robots are museum guides, robots assist surgeons in life threatening operations, and robotic cars can drive us around. The field of robotics studies not only the design of new mechanisms but also the development of artificial intelligence frameworks to make these mechanism useful in the physical world, integrating computer science, engineering, mathematics and more recently biology and sociology, in a unique way. This class will present fundamental algorithmic advances that enable today's robots to move in real environments and plan their actions. It will also explore fundamentals of the field of Artificial Intelligence through the prism of robotics. The class involves a significant programming project. Cross-list: COMP 450, MECH 450. Graduate/Undergraduate Equivalency: ELEC 550. Mutually Exclusive: Credit cannot be earned for ELEC 450 and ELEC 550.

ELEC 462 - OPTOELECTRONIC DEVICES
Short Title: OPTOELECTRONIC DEVICES
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 305
Description: This course provides an introduction to the fundamental principles of semiconductor optoelectronic devices. After reviewing the basic elements of quantum mechanics of electrons and photons, light-matter interaction (including laser oscillations), and semiconductor physics (band structure, heterostructures and alloys, optical processes), we will study the details of modern semiconductor devices for the generation, detection, and modulation of light. Graduate/Undergraduate Equivalency: ELEC 562. Mutually Exclusive: Credit cannot be earned for ELEC 462 and ELEC 562.
Course URL: www.ece.rice.edu/~kono/ELEC462.html
ELEC 475 - LEARNING FROM SENSOR DATA
Short Title: LEARNING FROM SENSOR DATA
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The first half of this course develops the basic machine learning tools for signals images, and other data acquired from sensors. Tools covered include principal components analysis, regression, support vector machines, neural networks, and deep learning. The second half of this course overviews a number of applications of sensor data science in neuroscience, image and video processing, and machine vision.
Graduate/Undergraduate Equivalency: ELEC 575. Mutually Exclusive: Credit cannot be earned for ELEC 475 and ELEC 575.

ELEC 481 - COMPUTATIONAL NEUROSCIENCE AND NEURAL ENGINEERING
Short Title: COMP/NEUROSCIENCE/NEURAL ENGNR
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An introduction to the anatomy and physiology of the brain. Includes basic electrophysiology of nerve and muscle. Develops mathematical models of neurons, synaptic transmission and natural neural networks. Leads to a discussion of neuromorphic circuits which can represent neuron and neural network behavior in silicon. Recommendation: Knowledge of electrical circuits, operational amplifier circuits and ordinary differential equations. Involves programming Matlab. Cross-list: BIOE 481, NEUR 481. Graduate/Undergraduate Equivalency: ELEC 583. Recommended Prerequisite(s): Knowledge of basic electrical and operational amplifier circuits; and ordinary differential equations. Mutually Exclusive: Credit cannot be earned for ELEC 481 and ELEC 583.

ELEC 482 - PHYSIOLOGICAL CONTROL SYSTEMS
Short Title: PHYSIOLOGICAL CONTROL SYSTEMS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A study of the somatic and autonomic nervous system control of biological systems. Simulation methods, as well as, techniques common to linear and nonlinear control theory are used. Also included is an introduction to sensors and instrumentation techniques. Examples are taken from the cardiovascular, respiratory, and visual systems. Cross-list: BIOE 482. Graduate/Undergraduate Equivalency: ELEC 582. Recommended Prerequisite(s): Knowledge of basic electrical and operational amplifier circuits; and ordinary differential equations. Mutually Exclusive: Credit cannot be earned for ELEC 482 and ELEC 582.

ELEC 485 - FUNDAMENTALS OF MEDICAL IMAGING I
Short Title: FUND MEDICAL IMAGING I
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will introduce basic principles of image acquisition, formation and processing of several medical imaging modalities such as X-Ray, CT, MRI, and US that are used to evaluate the human anatomy. The course also includes visits to a clinical site to gain experience with the various imaging modalities covered in class. Cross-list: BIOE 485, COMP 485. Graduate/Undergraduate Equivalency: ELEC 585. Recommended Prerequisite(s): MATH 211 and MATH 212. Mutually Exclusive: Credit cannot be earned for ELEC 485 and ELEC 585.

ELEC 486 - FUNDAMENTALS OF MEDICAL IMAGING II
Short Title: FUND MEDICAL IMAGING II
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 485 or BIOE 485 or COMP 485
Description: This course focuses on functional imaging modalities used specifically in nuclear medicine such as Gamma cameras, SPECT, and PET imaging. The course will introduce the basic principles of image acquisition, formation, processing and the clinical applications of these imaging modalities and lays the foundations for understanding the principles of radiotracer kinetic modeling. A trip to a clinical site in also planned to gain experience with nuclear medicine imaging. Cross-list: BIOE 486, COMP 486. Graduate/Undergraduate Equivalency: ELEC 586. Mutually Exclusive: Credit cannot be earned for ELEC 486 and ELEC 586.

ELEC 488 - THEORETICAL NEUROSCIENCE: FROM CELLS TO LEARNING SYSTEMS
Short Title: THEORETICAL NEUROSCIENCE
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: We present the theoretical foundations of cellular and systems neuroscience from distinctly quantitative point of view. We develop the mathematical and computational tools as they are needed to model, analyze, visualize and interpret a broad range of experimental data. Cross-list: CAAM 415, NEUR 415. Graduate/Undergraduate Equivalency: ELEC 588. Recommended Prerequisite(s): CAAM 210 or MATH 211 or CAAM 335 or MATH 355. Mutually Exclusive: Credit cannot be earned for ELEC 488 and ELEC 588.
ELEC 489 - NEURAL COMPUTATION
Short Title: NEURAL COMPUTATION
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: How does the brain work? Understanding the brain requires sophisticated theories to make sense of the collective actions of billions of neurons and trillions of synapses. Word theories are not enough; we need mathematical theories. The goal of this course is to provide an introduction to the mathematical theories of learning and computation by neural systems. These theories use concepts from dynamical systems (attractors, oscillations, chaos) and concepts from statistics (information, uncertainty, inference) to relate the dynamics and functions of neural networks. We will apply these theories to sensory computation, learning and memory, and motor control. Students will learn to formalize and mathematically answer questions about neural computations, including “what does a network compute?”, “how does it compute?”, and “why does it compute that way?” Prerequisites: knowledge of calculus, linear algebra, and probability and statistics. Cross-list: CAAM 416, NEUR 416. Graduate/Undergraduate Equivalency: ELEC 589. Mutually Exclusive: Credit cannot be earned for ELEC 489 and ELEC 589.

ELEC 490 - UNDERGRADUATE ELECTRICAL ENGINEERING RESEARCH PROJECTS
Short Title: UG ELEC ENG'G RES PROJECTS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Theoretical and experimental investigations under staff direction. A research project plan should be prepared and approved by the faculty member advising the project. Information about ELEC 490 project plans is available on the ECE Web site on the Academics section under ECE forms. May be repeated for a total of 6 credit hours for undergraduates. Instructor Permission Required. Repeatable for Credit.
Course URL: www.ece.rice.edu/uploadedFiles/ECE/ECE_Home/Academics/ECE_forms/ELEC%20490.pdf

ELEC 491 - UNDERGRADUATE ELECTRICAL ENGINEERING RESEARCH PROJECTS-VERTICALLY INTEGRATED PROJECTS
Short Title: UG ELEC ENG'G RESEARCH VIP
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Vertically Integrated Projects (VIP) teams include students from multiple years working on one larger, multi-year project defined by the instructor. Students participating in VIP for 3 or more semesters may be eligible for the Distinction in Research and Creative Work graduation award. Instructor Permission Required. Graduate/Undergraduate Equivalency: ELEC 591. Mutually Exclusive: Credit cannot be earned for ELEC 491 and ELEC 591. Repeatable for Credit.
ELEC 497 - DESIGN OF ANALOG PRINTED CIRCUIT BOARDS
Course Title: ANALOG PRINTED CIRCUIT BOARDS
Department: Electrical & Computer Eng.
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture/Laboratory
Credit Hours: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 494 (may be taken concurrently) or BIOE 451 (may be taken concurrently) or MECH 407 (may be taken concurrently)
Description: This course covers the basics of designing, fabricating, and testing daughter cards for microcontrollers such as the Arduino. Using PCB design software such as Eagle, students will design, fabricate, and test their printed circuit board.

ELEC 498 - INTRODUCTION TO ROBOTICS
Course Title: INTRODUCTION TO ROBOTICS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 354 or MATH 355 or CAAM 335
Description: The course will provide the student with a mathematical introduction to many of the key ideas used in today's intelligent robot systems. The focus of the course is on the analysis and control of manipulators. The course will also give an overview of common approaches to building intelligent robot systems. Cross-list: COMP 498, MECH 498. Graduate/Undergraduate Equivalency: ELEC 598. Mutually Exclusive: Credit cannot be earned for ELEC 498 and ELEC 598.

ELEC 501 - DATA DRIVEN APPROXIMATION OF DYNAMICAL SYSTEMS
Course Title: APPROXIMATION OF DYNAMICAL SYSTEMS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Model reduction seeks to replace a large-scale system described in terms of differential or difference equations by a system of much lower dimension that has nearly the same response characteristics. Model (order) reduction (MOR) is commonly used in the simulation and control of complex physical process. The systems that inevitably arise in such cases are often too complex to meet the expediency requirements of interactive design, optimization, or real time control. MOR has been advised as a means to reduce the dimensionality of these complex systems to a level that is amendable to such requirements. The ensuing methods have been an indispensable tool for speeding up the simulations arising in various engineering applications involving large-scale dynamical systems. In this course we will develop the underlying approximation theory paying particular attention to its data-driven aspects.

ELEC 502 - NEURAL MACHINE LEARNING I
Course Title: NEURAL MACHINE LEARNING I
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Review of major neural machine learning (Artificial Neural Network) paradigms. Analytical discussion of supervised and unsupervised neural learning algorithms and their relation to information theoretical methods. Practical applications to data analysis such as pattern recognition, clustering, classification, function approximation/regression, non-linear PCA, projection pursuit, independent component analysis, with lots of examples from image and digital processing. Details are posted at www.ece.rice.edu/~erzsebet/ANNcourse.html. Cross-list: COMP 502, STAT 502. Recommended Prerequisite(s): ELEC 430 and ELEC 431 or equivalent or permission of instructor.
Course URL: www.ece.rice.edu/~erzsebet/ANNcourse.html

ELEC 507 - NON LINEAR DYNAMIC SYSTEMS ANALYSIS
Course Title: NONLINEAR DYNAMIC SYSTEMS ANALYSIS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Analytical methods for the study of nonlinear systems are introduced, including singular point and phase plane analysis, the describing function technique, Lyapunov and Lagrangian state functions, stability analysis, bifurcation analysis, and chaotic behavior in nonlinear dynamic systems. As a substrate for the study of nonlinear systems, numerical analysis of ordinary and partial differential equations, boundary value problems, simulation methods, parameter estimation and sensitivity analysis methods are also included.

ELEC 509 - NONLINEAR SYSTEMS: ANALYSIS AND CONTROL
Course Title: NONLINEAR SYSTEMS: ANALYSIS AND CONTROL
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
ELEC 511 - DESIGN AND ANALYSIS OF SECURE EMBEDDED SYSTEMS FOR IoT ERA
Short Title: SECURE EMBEDDED SYS FOR IoT
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course emphasizes the security of small embedded devices that are central to the Internet of Things (IoT) Era. We discuss the practical security attacks, challenges, constraints, and opportunities that arise in the IoT domain. Covered topics include security engineering, real world attacks, practical and side channel attacks, and hands-on lab/projects. Cross-list: COMP 508. Repeatable for Credit.

ELEC 512 - GRADUATE DESIGN AND ANALYSIS OF ALGORITHMS
Short Title: GR DESGN ANALY OF ALGORITHMS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): STAT 310 or ECON 307 or STAT 331 or ELEC 331 or ELEC 303 or STAT 312
Description: Methods for designing and analyzing computer algorithms and data structures. The focus of this course will be on the theoretical and mathematical aspects of algorithms and data structures. Cross-list: COMP 582.

ELEC 513 - COMPLEXITY IN MODERN SYSTEMS
Short Title: COMPLEXITY IN MODERN SYSTEMS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A modern computer is a system with enormous complexity in both software and hardware. The course presents the principles for managing such complexity using examples from modern computing systems. It covers emergent issues from system complexity such as energy efficiency, bug finding, and heterogeneous hardware. It also covers designing experiments and writing systems papers. The course consists of lectures, student presentation of classic papers, and a final project. Cross-list: COMP 513.

ELEC 514 - SUSTAINABILITY, ENERGY, AND INFORMATION TECHNOLOGY: AN INTERDISCIPLINARY APPROACH
Short Title: SUSTAINABILITY & ENERGY
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate.
Course Level: Graduate
Description: An interdisciplinary course addressing the energy issues facing computing in the coming decade and beyond. In a student research-driven format we will ask how IT may address its power consumption problem and serve as a vehicle for energy efficiency, sustainability, and reduced carbon emissions across all human activity. Cross-list: COMP 514.
Course URL: www.cs.rice.edu/~kvp1/spring2008/comp514.htm

ELEC 516 - ANALOG INTEGRATED CIRCUITS
Short Title: ANALOG INTEGRATED CIRCUITS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ELEC 342
Description: This course starts with an in-depth study of physics of P-N junctions and CMOS transistors. It covers transistor level analysis and design of analog circuits, with emphasis on intuitive design methods, quantitative performance measures, and practical circuit limitations. Students use hand calculations and computer simulations to compare the results. This course discusses low-frequency behavior of single-stage and multistate amplifiers, current sources, active loads, operational amplifiers, as well as supply and temperature and independent biasing. It also covers high-frequency response of amplifiers, feedback in electronic circuits, stability feedback amplifiers, and noise in electronic circuits.

ELEC 517 - ARCHITECTING MODERN LEARNING ALGORITHMS
Short Title: ARCHITECTING ALGORITHMS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course focuses on architecture development and hardware realization of contemporary learning algorithms. A multitude of new learning algorithms have been recently developed, in particular in the sparse approximation domain. Thus far, the basic functionality of the new algorithms have been mostly verified and evaluated in simulation packages such as Matlab and software implementation. Application-specific customization and hardware implementation would bring orders-of-magnitude energy-performance efficiency improvement to important learning methods. The course will include FPGA reconfigurable fabric architecture and design flow, high analysis of multimedia processing VLSI architectures, and prototyping on FPGA. The focus of the project will be implementation of the state-of-the-art signal processing and learning algorithms on FPGA. Recommended Prerequisite(s): A digital logic design course and hands-on experience such as ELEC 326/ELEC 327. Background in VLSI, computer architecture, and signal processing/learning is also very useful, but the course is designed to be self-contained.
ELEC 518 - ENERGY EFFICIENCY IN MODERN SYSTEMS
Short Title: ENERGY EFFICIENCY MODERN SYS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Energy efficiency has become critically important for modern computing systems, including hardware and software architectures of networks routers and servers. Students will design and implement wither the hardware or software components of a network system, depending on their experience and preferences. This course is suitable for students with expertise in either software or hardware. Cross-list: COMP 519. Recommended Prerequisite(s): COMP 320 or ELEC 326.
Course URL: www.ruf.rice.edu/~mobile/elec518/

ELEC 519 - NETWORK SYSTEMS ARCHITECTURE
Short Title: NETWORK SYSTEMS ARCHITECTURE
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 320 or ELEC 326
Description: Design and Implementation of network systems, including hardware and software architectures of network routers and servers. Students will design and implement wither the hardware or software components of a network system, depending on their experience and preferences. This course is suitable for students with expertise in either software or hardware. Cross-list: COMP 519. Recommended Prerequisite(s): COMP 221

ELEC 520 - DISTRIBUTED SYSTEMS
Short Title: DISTRIBUTED SYSTEMS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Course URL: www.cs.rice.edu/~alc/comp520/

ELEC 521 - ADVANCED DIGITAL INTEGRATED CIRCUITS DESIGN
Short Title: ADV DIGITAL IC DESIGN
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course addresses advanced issues in custom digital IC design. Topics range from physical-level analysis and modeling of new devices, interconnect, and power supply, to circuit-level design techniques for low power and high performance, to application-oriented digital circuits/systems for security and machine learning. Recommended Prerequisite(s): ELEC 326/COMP 326 or ELEC 342 or Digital Circuit Courses.

ELEC 522 - ADVANCED VLSI DESIGN
Short Title: ADV VLSI DESIGN
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Design and analysis of algorithm-specific VLSI processor architectures. Topics include the implementation of pipelined and systolic processor arrays. Techniques for mapping numerical algorithms onto custom processor arrays. Course includes design project using high-level VLSI synthesis tools.
Course URL: www.owlnet.rice.edu/~elec522

ELEC 523 - COMPUTER-AIDED DESIGN FOR VLSI
Short Title: COMPUTER-AIDED DESIGN FOR VLSI
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Fundamental topics in computer-aided design for VLSI-Logic synthesis and formal verification, timing analysis and optimization, technology mapping, logic and fault simulation, testing, and physical design will be covered. Relevant topics in algorithms and data structures, generic programming, and the C++ standard template library will also be covered. Cross-list: COMP 523.

ELEC 524 - MOBILE AND WIRELESS NETWORKING
Short Title: MOBILE AND WIRELESS NETWORKING
Department: Mobile AND WIRELESS NETWORKING
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 429 or ELEC 429
Description: Study of network protocols for mobile and wireless networking, particularly at the media access control, network, and transport protocol layers. Focus is on the unique problems and challenges presented by the properties of wireless transmission and host or router mobility. Cross-list: COMP 524. Recommended Prerequisite(s): COMP 421 OR ELEC 421.
ELEC 525 - VIRTUALIZATION AND CLOUD RESOURCE MANAGEMENT
Short Title: VIRTUAL & CLOUD RESOURCE MGMT
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (ELEC 425 or COMP 425)

ELEC 526 - HIGH PERFORMANCE COMPUTER ARCHITECTURE
Short Title: HIGH PERFORMANCE COMPUTER ARCH
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 425 or ELEC 425
Description: Design of high performance computer systems, including shared-memory and message-passing multiprocessors and vector systems. Hardware and software techniques to tolerate and reduce memory and communication latency. Case studies and performance simulation of high-performance systems. Cross-list: COMP 526.

ELEC 527 - VLSI SYSTEMS DESIGN
Short Title: VLSI SYSTEMS DESIGN
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A study of VLSI technology and design. MOS devices, Characteristics and fabrication. Logic design and implementation. VLSI design methodology, circuit simulation and verification. Additional course work required beyond the undergraduate course requirement. Graduate/Undergraduate Equivalency: ELEC 422. Mutually Exclusive: Credit cannot be earned for ELEC 527 and ELEC 422.

ELEC 528 - SECURITY TOPICS OF EMBEDDED SYSTEMS
Short Title: EMBEDDED HW SYSTEMS SECURITY
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course covers wide range of topics pertaining to security of Hardware Embedded systems, including cryptographic processors, secure memory access, hardware IT protection by monitoring and watermarking FPGA security, physical and side-channel attacks, Trojan horses. Cross-list: COMP 538. Repeatable for Credit.
Course URL: www.ece.rice.edu/~fk1/

ELEC 529 - ADVANCED COMPUTER NETWORKS
Short Title: ADVANCED COMPUTER NETWORKS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 429 or ELEC 429
Description: This course explores advanced solutions in computer networks that are driven by the need to go beyond the best-effort capabilities of the Internet. Topics include network fault tolerance, traffic engineering, scalable data center network architectures, network support for big data processing, network support for cloud computing, extensible network control via software defined networking, denial-of-service-attack defense mechanisms. Readings from original research papers. Also include design project and oral presentation components. This course assumes students already have a good understanding of the best-effort Internet. Cross-list: COMP 529.

ELEC 530 - DETECTION THEORY
Short Title: DETECTION THEORY
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Classic and modern methods of optimal decisions in communications and signal processing. Continuous- and discrete-time methods. Gaussian and non-Gaussian problems.

ELEC 531 - STATISTICAL SIGNAL PROCESSING
Short Title: STATISTICAL SIGNAL PROCESSING
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ELEC 431

ELEC 532 - INTRODUCTION TO ENERGY-EFFICIENT MECHATRONICS
Short Title: INTRO TO MECHATRONICS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to electromechanical systems, focusing on motor mechanics, electric drives & electronics, & modern digital control algorithms. Covers basic principles of electromechanical energy conversion & motor control. Students are introduced to energy efficiency considerations of modern electric drives. Includes hands-on laboratory projects involving digital computer control of various motor types. Additional coursework required beyond the undergraduate course requirements. Cross-list: MECH 535. Graduate/Undergraduate Equivalency: ELEC 435. Mutually Exclusive: Credit cannot be earned for ELEC 532 and ELEC 435.
ELEC 533 - INTRODUCTION TO RANDOM PROCESSES AND APPLICATIONS
Short Title: INTRO RANDOM PROCESSES & APPL
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Review of basic probability; Sequences of random variables; Random vectors and estimation; Basic concepts of random processes; Random processes in linear systems, expansions of random processes; Wiener filtering; Spectral representation of random processes, and white-noise integrals. Cross-list: CAAM 583, STAT 583.

ELEC 534 - MOBILE BIO-BEHAVIORAL SENSING
Short Title: MOBILE BIO-BEHAVIORAL SENSING
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: In the next generation of devices, designed for diverse fields as healthcare and education, the devices will understand the human user. At the core of this understanding will be data that is gathered from a new class of sensors, that can measure both biological and behavioral markers. This course introduces the fundamentals of bio- and behavioral sensing. Additional coursework required beyond the undergraduate course requirements. Graduate/Undergraduate Equivalency: ELEC 432. Mutually Exclusive: Credit cannot be earned for ELEC 534 and ELEC 432.

ELEC 535 - INFORMATION THEORY
Short Title: INFORMATION THEORY
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to information theory concepts; basic theorems of channel coding and source coding with a fidelity criterion. The course material requires background of a first course in probability, like Rice ELEC 303.

ELEC 536 - ARCHITECTURE FOR WIRELESS COMMUNICATIONS
Short Title: ARCH - WIRELESS COMMUNICATIONS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is an FPGA laboratory course in which students will embark upon a detailed study and implementation of digital communications systems. Major functional blocks of end-to-end wireless communication systems will be discussed, built, tested in hardware. Students will work in groups on weekly lab assignments and a major semester project. Mutually Exclusive: Credit cannot be earned for ELEC 536 and ELEC 433.

ELEC 537 - COMMUNICATION NETWORKS
Short Title: COMMUNICATION NETWORKS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate-level introduction to design and analysis of communication networks. Topics include wireless networks, medium access, routing, traffic modeling, congestion control, and scheduling. Cross-list: MECH 537.

ELEC 538 - ADVANCED TOPICS IN COMPUTER NETWORKING
Short Title: ADV TOP COMPUTER NETWORKING
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced topics in next generation mobile and wireless networks.

ELEC 539 - INTRODUCTION TO COMMUNICATION NETWORKS
Short Title: INTRO TO COMMUNICATION NETWORKS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to design and analysis of communication networks. Topics include wireless networks, medium access, routing, traffic modeling, congestion control, and scheduling. Additional coursework required beyond the undergraduate course requirements. Graduate/Undergraduate Equivalency: ELEC 437. Mutually Exclusive: Credit cannot be earned for ELEC 539 and ELEC 437.

ELEC 540 - ADVANCED WIRELESS COMMUNICATIONS
Short Title: ADVANCED WIRELESS COMM
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Course will teach advanced techniques in wireless, e.g. MIMO, Massive MIMO, Full-duplex and Coordinated Multi-point. The focus will be on both the theoretical foundations and practical use in actual systems, explored with a combination of lectures, homeworks, data-driven evaluations and mini-projects. Recommended Prerequisite(s): ELEC 430 or ELEC 551 or ELEC 535.
ELEC 541 - ERROR CORRECTING CODES
Short Title: ERROR CORRECTING CODES
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ELEC 430
Description: Introductory course on error correcting codes. Topics covered include linear block codes, convolutional codes, turbo codes and LDPC codes.

ELEC 542 - THE APPLICATION OF VECTOR SPACE METHODS AND OTHER ADVANCED TECHNIQUES TO DSP
Short Title: VECTOR SPACES AND DSP
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ELEC 430 (may be taken concurrently)
Description: The course will introduce the application of vector space methods to digital signal processing. This includes topics such as representing a signal using basis expansions, Gram-Schmidt orthogonalization, linear inverse problems, gradient-descent, the use of regularization in approximation, and other advanced topics. The course may be taken in the same semester as ELEC 431.

ELEC 543 - HIGH-SPEED DSP AND ANALOG SYSTEM DESIGN
Short Title: HS DSP & ANALOG SYS DESIGN
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (ELEC 342 or ELEC 332)
Description: This course is intended for seniors and graduate students in Electrical Engineering. It covers practical aspects of high-speed DSP system design, and highlights system design and simulation challenges, and demonstrates common pitfalls and how to prevent them. Students learn how to design, simulate, and apply good high-speed and analog design practices that minimize both component and system noise and ensure system design success.

ELEC 544 - ADVANCED DSP
Short Title: ADVANCED DSP
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course will cover advanced topics in FIR and IIR digital filter design, advanced topics in signal processing algorithms, especially in FFTs and high speed convolution and correlation, and in wavelet based signal processing and the discrete wavelet transform. The course will be one-half lecture based and one-half project based.

ELEC 545 - THIN FILMS
Short Title: THIN FILMS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Deposition methods, structure, properties, performance and failure mechanisms of thin solid films for various applications. Deposition methods include sputtering, plating, evaporation and chemical vapor deposition. Material types include crystalline and amorphous metals as well as semiconductors and insulators. Applications are primarily in microelectronics; data storage; micro-electro-mechanical systems, wear and corrosion prevention and thermal barriers. NOTE: Not offered every year. Cross-list: MSNE 545.

ELEC 546 - INTRODUCTION TO COMPUTER VISION
Short Title: INTRO TO COMPUTER VISION
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An introduction to the basic concepts, algorithms and applications in computer vision. Topics include: cameras, camera models and imaging pipeline, low-level vision/image processing methods such as filtering and edge detection; mid-level vision topics such as segmentation and clustering; shape reconstruction from stereo, introduction to high-level vision tasks such as object recognition and face recognition. The course will involve programming and implementing basic computer vision algorithms in Matlab. Additional coursework required beyond the undergraduate course requirements. Additional coursework required beyond the undergraduate requirements. Cross-list: COMP 546. Graduate/Undergraduate Equivalency: ELEC 447. Mutually Exclusive: Credit cannot be earned for ELEC 546 and ELEC 447.

ELEC 547 - COMPUTER VISION
Short Title: COMPUTER VISION
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The goal of computer vision is to make sense of the three dimensional world from captured images and videos. This requires understanding how light interacts with objects in the environment and then captured by a camera. The goal is to solve problems such as estimating 3D shape of an environment (How does Kinect work?), how to detect and recognize people (How to build your own iPhoto?), detect and track how things move. The course provides an introduction to solving such problems using vision tools such as feature detection, image segmentation, motion estimation, image mosaics, 3D shape reconstruction, and object recognition.
ELEC 549 - MACHINE LEARNING AND SIGNAL PROCESSING FOR NEURO ENGINEERING
Short Title: NEURAL SIGNAL PROCESSING
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The activity of a complex network of billions of interconnected neurons underlies our ability to sense, represent and store the details of experienced life, and enables us to interact with our environment and other organisms. Modern neuroscience techniques enable us to access this activity, and thus to begin to understand the processes whereby individual neurons enable complex behaviors. In order to increase this understanding and to design biomedical systems which might therapeutically interact with neural circuits, advanced statistical signal processing and machine learning approaches are required. This class will cover a range of techniques and their application to basic neuroscience and neural interfaces. Topics include latent variable models, point processes, Bayesian inference, dimensionality reduction, dynamical systems, and spectral analysis. Neuroscience applications include modeling neural firing rates, spike sorting, decoding, characterization of neural systems, and field potential analysis. Cross-list: BIOE 548.

ELEC 549 - COMPUTATIONAL PHOTOGRAPHY
Short Title: COMPUTATIONAL PHOTOGRAPHY
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Computational photography is an emerging field that aims to overcome the limitations of conventional digital imaging and display devices by using novel optics, signal processing and computer vision to perform more efficient and accurate measurement as well as produce more compelling and meaningful visualizations of the world around us. It is a convergence of many areas, such as optics, computer vision, computer graphics, image processing, photography, and so on. We will cover topics such as computational sensors with assorted pixel, mobile camera control, light field capture and rendering, computational flash photography, computational illumination for appearance acquisition and 3D reconstruction, reflectance transformation imaging, light transport analysis and novel displays.

ELEC 550 - ALGORITHMIC ROBOTICS
Short Title: ALGORITHMIC ROBOTICS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (COMP 221 or COMP 321) and COMP 215
Description: Robots have fascinated people for generations. Today, robots are built for applications as diverse as exploring remote planets, de-mining war zones, cleaning toxic waste, assembling cars, inspecting pipes in industrial plants and mowing lawns. Robots are also interacting with humans in a variety of ways: robots are museum guides, robots assist surgeon sin life threatening operations, and robotic cars can drive us around. The field of robotics studies not only the design of new mechanisms but also the development of artificial intelligence frameworks to make these mechanism useful in the physical world, integrating computer science, engineering, mathematics and more recently biology and sociology, in a unique way. This class will present fundamental algorithmic advances that enable today’s robots to move in real environments and plan their actions. It will also explore fundamentals of the field of Artificial Intelligence through the prism of robotics. The class involves a significant programming project. Graduate/Undergraduate Equivalency: ELEC 450. Mutually Exclusive: Credit cannot be earned for ELEC 550 and ELEC 450.

ELEC 551 - DIGITAL COMMUNICATION
Short Title: DIGITAL COMMUNICATION
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Course in digital communications, designed to prepare students for engineering work in high-tech industries and for graduate work in communications, signal processing, and computer systems. Covers basic concepts and useful tools for design and performance analysis of transmitters and receivers in the physical layer of a communication system. Additional coursework required beyond the undergraduate course requirements. Graduate/Undergraduate Equivalency: ELEC 430. Mutually Exclusive: Credit cannot be earned for ELEC 551 and ELEC 430.

ELEC 552 - OPERATING SYSTEMS AND CONCURRENT PROGRAMMING
Short Title: OP SYS/CONCURRENT PROGRAMMING
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 215 and (COMP 221 or COMP 321)
Description: Introduction to the design, construction, and analysis of concurrent programs with an emphasis on operating systems, including filing systems, schedulers, and memory allocators. Specific attention is devoted to process synchronization and communication within concurrent programs. Additional coursework required beyond the undergraduate course requirements. Cross-list: COMP 521. Graduate/Undergraduate Equivalency: ELEC 421. Mutually Exclusive: Credit cannot be earned for ELEC 552 and ELEC 421.
Course URL: www.clear.rice.edu/comp421/
ELEC 553 - MOBILE AND EMBEDDED SYSTEM DESIGN AND APPLICATION
Short Title: MOBILE & EMBEDDED SYSTEM
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: ELEC 553 introduces mobile and embedded system design and applications to students and provides them hands-on design experience. It consists of three interlearning parts: lectures, student project, and student presentations. Additional coursework required beyond the undergraduate course requirements. Graduate/Undergraduate Equivalency: ELEC 424. Mutually Exclusive: Credit cannot be earned for ELEC 553 and ELEC 424.
Course URL: www.ruf.rice.edu/~mobile/elec424/

ELEC 554 - COMPUTER SYSTEMS ARCHITECTURE
Short Title: COMPUTER SYSTEMS ARCHITECTURE
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Evolution of key architecture concepts found in advanced uniprocessor systems. Fundamental and advanced pipelining techniques and associated issues for improving processor performance. Illustrated with RISC processors such as the ARM processor. Examine several metrics for processor performance, such as Amdahl’s law. Key concepts of data and program memory systems found in modern systems with memory hierarchies and cashes. Perform experiments in cache performance analysis. Influence of technology trends, such as Moore’s law, on processor implementation Approaches for exploiting instruction level parallelism, such as VLIW. Introduction to parallel and multicore architectures. Introduction to processor architectures targeted for embedded applications. Additional coursework required beyond the undergraduate course requirements. Cross-list: COMP 554. Graduate/Undergraduate Equivalency: ELEC 425. Mutually Exclusive: Credit cannot be earned for ELEC 554 and ELEC 425.

ELEC 555 - ADVANCED DIGITAL HARDWARE DESIGN, IMPLEMENTATION, AND OPTIMIZATION
Short Title: ADV DIGITAL DESIGN & IMPLEMENT
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This graduate level course will investigate design and implementation of modern digital signal processing, machine learning, and security algorithms in hardware (including FPGAs and ASICs). Along with learning the principals of design, students will acquire hands-on experience in hardware implementation and the use of the hardware in modern applications including but not limited to mobile phones, biomedical devices, and smart cards. Emphasis is on digital processors, design implementation on FPGA/ASIC fabrics and testing real systems on board, architectures, control, functional units, and circuit topologies for increased performance and reduced circuit size and power dissipation. Additional coursework required beyond the undergraduate course requirements. Graduate/Undergraduate Equivalency: ELEC 427. Mutually Exclusive: Credit cannot be earned for ELEC 555 and ELEC 427. Repeatable for Credit.

ELEC 556 - INTRODUCTION TO COMPUTER NETWORKS
Short Title: INTRO TO COMPUTER NETWORKS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 221 or COMP 321
ELEC 557 - ARTIFICIAL INTELLIGENCE
Short Title: ARTIFICIAL INTELLIGENCE
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): COMP 310 and (STAT 310 or ECON 307 or ECON 382 or STAT 312 or STAT 331 or ELEC 331 or ELEC 303) and (MATH 354 or MATH 355 or CAAM 335)
Description: This is a foundational course in artificial intelligence, the discipline of designing intelligent agents. The course will cover the design and analysis of agents that do the right thing in the face of limited information and computational resources. The course revolves around two main questions: how agents decide what to do, and how they learn from experience. Tools from computer science, probability theory, and game theory will be used. Interesting examples of intelligent agents will be covered, including poker playing programs, bots for various games (e.g. WoW), DS1 – the spacecraft that performed an autonomous flyby of Comet Borrely in 2001, Stanley – the Stanford robot car that won the Darpa Grand Challenge, Google Maps and how it calculates driving directions, face and handwriting recognizers, Fedex package delivery planners, airline fare prediction sites, and fraud detectors in financial transactions. Additional coursework required beyond the undergraduate course requirements. Cross-list: COMP 557. Graduate/Undergraduate Equivalency: ELEC 440. Mutually Exclusive: Credit cannot be earned for ELEC 557 and ELEC 440.
Course URL: www.owlnet.rice.edu/~comp440

ELEC 558 - DIGITAL SIGNAL PROCESSING
Short Title: DIGITAL SIGNAL PROCESSING
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Methods for analysis of discrete-time signals and design of discrete-time systems including topics of: discrete-time linear systems, difference equations, z-transforms, discrete convolution, stability, discrete-time Fourier transforms, analog-to-digital and digital-to-analog conversion, digital filter design, discrete Fourier transforms, fast Fourier transforms, multi-rate signal processing, filter banks, and spectral analysis. Additional coursework required beyond the undergraduate course requirements. Graduate/Undergraduate Equivalency: ELEC 431. Mutually Exclusive: Credit cannot be earned for ELEC 558 and ELEC 431.

ELEC 559 - INNOVATION LAB FOR MOBILE HEALTH
Short Title: INNOVATION LAB - MOBILE HEALTH
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will be an innovation lab for mobile health products. The students will organize themselves in groups with complementary skills and work on a single project for the whole semester. The aim will be to develop a product prototype which can then be demonstrated to both medical practitioners and potential investors. For successful projects with an operational prototype, the next steps could be applying for OWLspark (Rice accelerator program) or crowd sourcing (like Kickstarter) and/or work in Scalable Health Labs over summer. ELEC Juniors can also continue the project outcomes as a starting point for their senior design. Additional coursework required beyond the undergraduate course requirements. Cross-list: BIOE 534. Graduate/Undergraduate Equivalency: ELEC 419. Mutually Exclusive: Credit cannot be earned for ELEC 559 and ELEC 419. Repeatable for Credit.
Course URL: www.ece.rice.edu/~ashu/ELEC419.html

ELEC 562 - OPTOELECTRONIC DEVICES
Short Title: OPTOELECTRONIC DEVICES
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course provides an introduction to the fundamental principles of semiconductor optoelectronic devices. After reviewing the basic elements of quantum mechanics of electrons and photons, light-matter interaction (including laser oscillations), and semiconductor physics (band structure, heterostructures and alloys, optical processes), we will study the details of modern semiconductor devices for the generation, detection, and modulation of light. Additional coursework required beyond the undergraduate course requirements. Graduate/Undergraduate Equivalency: ELEC 462. Mutually Exclusive: Credit cannot be earned for ELEC 562 and ELEC 462.

ELEC 563 - INTRODUCTION TO SOLID STATE PHYSICS I
Short Title: INTRO TO SOLID STATE PHYSICS I
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Fundamental concepts of crystalline solids, including crystal structure, band theory of electrons, and lattice vibration theory. Cross-list: PHYS 563.
ELEC 564 - SOLID-STATE PHYSICS II
Short Title: INTRO SOLID STATE PHYSICS II
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Continuation of PHYS 563, including scattering of waves by crystals, transport theory, and magnetic phenomena. Cross-list: PHYS 564.

ELEC 565 - MATERIALS FOR ENERGY AND PHOTOCATALYSIS
Short Title: MATERIALS FOR ENERGY&CATALYSIS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will cover the basic physics and chemistry of solar energy conversion and storage devices, and the current state of the art and future challenges in materials for energy and photocatalysis. In addition, physical and chemical characterization techniques will be covered.

ELEC 566 - NANOPHOTONICS AND METAMATERIALS
Short Title: NANOPHOTONICS & METAMATERIALS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course will discuss basic concepts of nanophotonics and focus on what metamaterials are, how they work and how to build them. The course will conclude with applications of various meta-devices and upcoming research topics.

ELEC 567 - NANO-OPTICS
Short Title: NANO-OPTICS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The goal of this course is to understand concepts of light localization and light-matter interactions on the nanoscale, and to familiarize the students with the state-of-the-art research in the field of nano-optics.

ELEC 568 - LASER SPECTROSCOPY
Short Title: LASER SPECTROSCOPY
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the theory and practice of laser spectroscopy as applied to atomic and molecular systems. The course covers fundamentals of spectroscopy, lasers and spectroscopic light sources, high resolution and time resolved laser spectroscopy with applications in atmospheric chemistry, environmental science and medicine. Repeatable for Credit.

ELEC 569 - ULTRAFAST OPTICAL PHENOMENA
Short Title: ULTRAFAST OPTICAL PHENOMENA
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers the generation, propagation, and measurement of short laser pulses, of duration less than one picosecond. Concepts include mode locking, the effects of dispersion, optical pulse amplification, and time-domain non-linear optical phenomena. Intended as an introduction to ultrafast phenomena for graduate students or advanced undergraduates; a basic understanding of electromagnetic waves and of quantum mechanics is assumed. Cross-list: PHYS 569.
Course URL: www.ece.rice.edu/~daniel/569/569files.html

ELEC 570 - PHOTOmetry
Short Title: PHOTOmetry
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A survey of the techniques used in imaging micron and nanometer structures with an emphasis on applications in chemistry, physics, biology, and engineering. The course includes an introduction to scanning probe, submicron optical, and electron microscopies, as well as discussions on the fundamental and practical aspects of image acquisition, artifacts, filtering, and machine learning analysis of such data. Homeworks will involve some familiarity and proficiency with Matlab. The final project will include analysis of the student's own research data.

ELEC 571 - IMAGING AT THE NANOSCALE
Short Title: IMAGING AT THE NANOSCALE
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An introduction to the theory and applications of nanophotonic devices built with high refractive index contrast. Topics include waveguides, couplers, resonators, photonic crystals and nonlinear optical devices. Both analytical and numerical techniques for devices design will be discussed.
ELEC 575 - LEARNING FROM SENSOR DATA
Short Title: LEARNING FROM SENSOR DATA
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The first half of this course develops the basic machine learning tools for signals images, and other data acquired from sensors. Tools covered include principal components analysis, regression, support vector machines, neural networks, and deep learning. The second half of this course overviews a number of applications of sensor data science in neuroscience, image and video processing, and machine vision. Additional course work required beyond the undergraduate course requirements. Graduate/Undergraduate Equivalency: ELEC 475. Mutually Exclusive: Credit cannot be earned for ELEC 575 and ELEC 475. Repeatable for Credit.

ELEC 576 - A PRACTICAL INTRODUCTION TO DEEP MACHINE LEARNING
Short Title: INTRODUCTION TO DEEP LEARNING
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Deep Machine Learning has recently made many advances in difficult perceptual tasks, including object and phoneme recognition, and natural language processing. However, the field has a steep learning curve, both conceptually and practically. The point of this course is to engage students by jumping into the deep end, and building their own architectures and algorithms. Cross-list: COMP 576.

ELEC 577 - ALGORITHMS AND OPTIMIZATION FOR DATA SCIENCE
Short Title: OPTIMIZATION FOR DATA SCIENCE
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: In this course, we study algorithms for analyzing data with provable performance, statistical, and computational guarantees. We focus on applications in machine learning and signal processing. Topics include: efficient algorithms for convex optimization, inverse problem, low-rank and sparse models, dimensionality reduction, and randomized algorithms. Recommended Prerequisite(s): MATH 355 and (ECON 307 or STAT 310) or digital circuit courses.

ELEC 578 - COMPUTATIONAL NEUROSCIENCE AND NEURAL ENGINEERING
Short Title: COMP/NEUROSCIENCE/NEURAL ENGNR
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An introduction to the anatomy and physiology of the brain. Includes basic electrophysiology of nerve and muscle. Develops mathematical models of neurons, synaptic transmission and natural neural networks. Leads to a discussion of neuromorphic circuits which can represent neuron and neural network behavior in silicon. Recommendation: Knowledge of electrical circuits, operational amplifier circuits and ordinary differential equations. Involves programming Matlab. Cross-list: BIOE 583, NEUR 583. Graduate/Undergraduate Equivalency: ELEC 481. Recommended Prerequisite(s): Knowledge of basic electrical and operational amplifier circuits; and ordinary differential equations. Mutually Exclusive: Credit cannot be earned for ELEC 583 and ELEC 481.
ELEC 588 - FUNDAMENTALS OF MEDICAL IMAGING I
Short Title: FUND MEDICAL IMAGING I
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will introduce basic principles of image acquisition, formation and processing of several medical imaging modalities such as X-Ray, CT, MRI, and US that are used to evaluate the human anatomy. The course also includes visits to a clinical site to gain experience with the various imaging modalities covered in class. Additional coursework required beyond the undergraduate course requirements. Cross-list: BIOE 591. Graduate/Undergraduate Equivalency: ELEC 485. Mutually Exclusive: Credit cannot be earned for ELEC 585 and ELEC 485.

ELEC 586 - FUNDAMENTALS OF MEDICAL IMAGING II
Short Title: FUND MEDICAL IMAGING II
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course focuses on functional imaging modalities used specifically in nuclear medicine such as Gamma cameras, SPECT, and PET imaging. The course will introduce the basic principles of image acquisition, formation, processing and the clinical applications of these imaging modalities and lays the foundations for understanding the principles of radiotracer kinetic modeling. A trip to a clinical site in also planned to gain experience with nuclear medicine imaging. Additional coursework required beyond the undergraduate course requirements. Cross-list: BIOE 596. Graduate/Undergraduate Equivalency: ELEC 486. Mutually Exclusive: Credit cannot be earned for ELEC 586 and ELEC 486.

ELEC 588 - THEORETICAL NEUROSCIENCE I: BIOPHYSICAL MODELING OF CELLS AND CIRCUITS
Short Title: THEORETICAL NEUROSCIENCE
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: We present the theoretical foundations of cellular and systems neuroscience from distinctly quantitative point of view. We develop the mathematical and computational tools as they are needed to model, analyze, visualize and interpret a broad range of experimental data. Additional course work required beyond the undergraduate course requirements. Cross-list: CAAM 615, NEUR 615. Graduate/Undergraduate Equivalency: ELEC 488. Mutually Exclusive: Credit cannot be earned for ELEC 588 and ELEC 488.

ELEC 589 - NEURAL COMPUTATION
Short Title: NEURAL COMPUTATION
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: How does the brain work? Understanding the brain requires sophisticated theories to make sense of the collective actions of billions of neurons and trillions of synapses. Word theories are not enough; we need mathematical theories. The goal of this course is to provide an introduction to the mathematical theories of learning and computation by neural systems. These theories use concepts from dynamical systems (attractors, oscillations, chaos) and concepts from statistics (information, uncertainty, inference) to relate the dynamics and functions of neural networks. We will apply these theories to sensory computation, learning and memory, and motor control. Students will learn to formalize and mathematically answer questions about neural computations, including "what does a network compute?", "how does it compute?", and "why does it compute that way?" Prerequisites: knowledge of calculus, linear algebra, and probability and statistics. Graduate/Undergraduate Equivalency: ELEC 489. Mutually Exclusive: Credit cannot be earned for ELEC 589 and ELEC 489.

ELEC 590 - GRADUATE NON-THESIS RESEARCH PROJECTS
Short Title: GR NON-THESIS RES PROJECTS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-6
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Theoretical and experimental investigations under staff direction. Instructor Permission Required. Repeatable for Credit.

ELEC 591 - GRADUATE ELECTRICAL ENGINEERING RESEARCH PROJECTS-VERTICALLY INTEGRATED PROJECTS
Short Title: GRAD ELEC ENG'G RESEARCH VIP
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-6
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Vertically Integrated Projects (VIP) teams include students from multiple years working on one larger, multi-year project defined by the instructor. Instructor Permission Required. Graduate/Undergraduate Equivalency: ELEC 491. Mutually Exclusive: Credit cannot be earned for ELEC 591 and ELEC 491. Repeatable for Credit.
ELEC 598 - INTRODUCTION TO ROBOTICS
Short Title: INTRODUCTION TO ROBOTICS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will introduce the key building blocks in network information theory: multiple access, broadcast, relay and interference channels. Further topics will be explored as part of projects.
Course URL: www.ece.rice.edu/~erzsebet/NMLcourseII.html

ELEC 599 - FIRST YEAR GRAD STUDENT PROJECTS
Short Title: 1ST YEAR GRAD STUDENTS PROJECT
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 6
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Supervised project required of all first-year graduate students in the Ph.D. program.

ELEC 602 - NEURAL MACHINE LEARNING AND DATA MINING II
Short Title: NEURAL MACHINE LEARNING II
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ELEC 502 or COMP 502 or STAT 502
Description: Advanced topics in ANN theories, with a focus on learning high-dimensional complex manifolds with neural maps (Self-Organizing Maps, Learning Vector Quantizers and variants), Application to data mining, clustering, classification, dimension reduction, sparse representation. The course will be a mix of lectures and seminar discussions with active student participation, based on most recent research publications. Students will have access to professional software environment to implement theories. Cross-list: COMP 602, STAT 602. Repeatable for Credit.

ELEC 603 - TOPICS IN NANOPHOTONICS
Short Title: TOPICS IN NANOPHOTONICS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is designed as a cornerstone for the NSF funded Integrative Graduate Research and Educational Training (IGERT) program in nanophotonics. It is also an official “home” for the Laboratory for Nanophotonics (LANP) seminars that serve as a forum for the interaction between researchers in nanophotonics at Rice. The conversational atmosphere of the seminar continues the relatively unstructured spirit of the interaction that has been the hallmark of past LANP meetings and collaboration. The course is open to graduate students who are interested in pursuing research in Nanophotonics. Repeatable for Credit.

ELEC 604 - NANO-OPTICS
Short Title: NANO-OPTICS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The goal of this seminar is to understand concepts of light localization and light-matter interactions on the nanoscale, and to familiarize the students with the state-of-the-art research in the field of nano-optics through student-led research paper presentations and discussions.

ELEC 605 - COMPUTATIONAL ELECTRODYNAMICS AND NANOPHOTONICS
Short Title: ELECTRODYNAMICS & NANOPHOTONIC
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: See PHYS 605. Cross-list: PHYS 605. Repeatable for Credit.

ELEC 631 - ADVANCED TOPICS IN SIGNAL PROCESSING
Short Title: TOPICS IN SIGNAL PROCESSING
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (ELEC 531 and ELEC 533)
Description: Topic vary from semester to semester. Repeatable for Credit.

ELEC 632 - ADVANCED TOPICS IN IMAGE AND VIDEO PROCESSING
Short Title: ADV TOPIC IMAGE&VIDEO PROCESS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar on topics of current research interest in image and video processing. Students participate in selecting and presenting papers from technical literature. Discussions aim at identifying common themes and important trends in the field.

ELEC 635 - NETWORK INFORMATION THEORY
Short Title: NETWORK INFORMATION THEORY
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): ELEC 535
Description: This course will introduce the key building blocks in network information theory: multiple access, broadcast, relay and interference channels. Further topics will be explored as part of projects.
ELEC 638 - INFO-GAP THEORY AND ITS APPLICATIONS
Short Title: INFO-GAP THEORY & ITS APPS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Course Level: Graduate

ELEC 661 - NANOPHOTONICS, SPECTROSCOPY, AND MATERIALS FOR SUSTAINABILITY
Short Title: NANOPHOTONICS & SUSTAINABILITY
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will cover the contributions that nanophotonic concepts and advanced spectroscopy techniques can make to the development and characterization of novel materials for energy and sustainability. Students will cover nanophotonic concepts for novel materials and characterization techniques, ultrafast and nanoscale spectroscopy techniques, and applications in energy and sustainability. For each topic, background information will be provided about the relevant science and engineering aspects, as well as examining the state-of-the-art in the topic, via student-presentations and literature reviews. Cross-list: CHEM 661, MSNE 661.

ELEC 677 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture, Seminar, Internship/Practicum, Laboratory
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics and credit hours vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.

ELEC 680 - NANO-NEUROTECHNOLOGY
Short Title: NANO-NEUROTECHNOLOGY
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will review current nanofabricated technologies for measuring, manipulating, and controlling neural activity. The course will be based on reviewing current academic literature and topics will include nano-electronic, -photonic, -mechanical, and -fluidic neural devices. Cross-list: BIOE 680.

ELEC 681 - FUNDAMENTALS OF MACHINE LEARNING
Short Title: FUNDAMENTALS MACHINE LEARNING
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course examines the fundamentals of machine learning, including supervised learning, unsupervised learning, and reinforcement learning. This course will provide the student with the formal concepts and the basic intuition for the different topics of machine learning, from artificial neural networks to value function approximation. Because of the shared problems of machine learning, statistical inference, and signal processing, a focus of the course will be on share solution, e.g., dimensionality reduction, of these three fields. Repeatable for Credit.

ELEC 692 - ADVANCED TOPICS IN DISTRIBUTED SYSTEMS
Short Title: ADV TOPICS IN DISTRIBUTED SYST
Department: Electrical & Computer Eng.
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: We will learn about and discuss recent advances in various areas in computer systems, including topics on security, distributed systems, networking, operating systems, and databases. The seminar will be divided into several sections, with each section focusing on one research trend. In each class, students will read one classic paper on the topic, and present two recent papers that describe the state of the art. Students can also team up and do a semester-long research project on any relevant topics. All students will need to make a final presentation at the end of the class on a potential project idea; for students that choose to do a semester-long project, they will also submit a six-page report on their project, in addition to giving a final presentation. Instructor Permission Required. Repeatable for Credit.
ELEC 693 - ADVANCED TOPICS-COMPUTER SYSTEMS
Short Title: ADV TOPICS - COMPUTER SYSTEMS
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is a discussion based seminar about state of the art embedded and digital signal processing systems, with emphasis on both hardware architectures as well as software tools, programming models, and compilers. The seminar focuses on state of the art academic and commercial offerings in these areas. Cross-list: COMP 693. Repeatable for Credit.

ELEC 694 - HOW TO BE A CHIEF TECHNOLOGY OFFICER
Short Title: HOW TO BE A CTO
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Survey of the component and standards trends that are the basis of personal computers and digital appliances with the aim of predicting technologies, solutions, and new products five years into the future. Examples of these technologies are dual Core processors, iPods and their evolution, mobile wireless data devices, and even Google vs. Microsoft. Students will each pick a topic important to the digital lifestyle and through a series of one-on-one sessions develop a depth of understanding that is presented to the class. Formerly "Future Personal Computing Technologies." Cross-list: COMP 694. Repeatable for Credit.

Course URL: www.ece.rice.edu/Courses/694/

ELEC 695 - ADVANCED TOPICS IN COMMUNICATIONS AND STATISTICAL SIGNAL PROCESSING
Short Title: INNOVATIONS IN MOBILE HEALTH
Department: Electrical & Computer Eng.
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Graduate, Junior, Sophomore or Senior.
Course Level: Graduate
Description: Section 1: - Innovations in Mobile Health - In this seminar, we will study the merging area of mobile health, enabled by prevalent data connectivity, highly portable medical sensors, smart-phones and inexpensive cloud computing. The seminar will involve a mix of lectures, paper reading, case studies and group projects. The course is suitable for both undergraduate (junior and seniors) and graduate students. The course is part of the new ECE initiative on scalable health (http://sh.rice.edu). Open to both undergraduate and graduate students. Section 2: - This is a graduate seminar class focused on the role of information theory in engineering wireless networks. Students will survey, read, and present both classic as well as recent papers in the area. Repeatable for Credit.

ELEC 698 - ECE PROFESSIONAL MASTERS SEMINAR SERIES
Short Title: ECE PROFESSIONAL MASTER SEM
Department: Electrical & Computer Eng.
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students. Enrollment limited to students in a Master of Electrical Eng degree.
Course Level: Graduate
Description: The Professional Masters Seminar Series presents a combination of seminars on emerging research topics in the many areas of ECE and industry-focused professional development. This course includes attendance and reports based on the seminars, colloquia, and distinguished lectures held each semester. Repeatable for Credit.

ELEC 699 - FRONTIERS OF ELECTRICAL AND COMPUTER ENGINEERING
Short Title: FRONTIERS OF ECE
Department: Electrical & Computer Eng.
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to students with a major in Electrical & Computer Eng.. Enrollment is limited to Graduate level students. Enrollment limited to students in a Doctor of Philosophy or Master of Electrical Eng degrees.
Course Level: Graduate
Description: Frontiers of Electrical and Computer Engineering presents emerging research topics in the many areas of ECE. This course includes attendance and reports based on the seminars, colloquia, and distinguished lectures held each semester. Repeatable for Credit.

ELEC 800 - RESEARCH AND THESIS
Short Title: RESEARCH AND THESIS
Department: Electrical & Computer Eng.
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

Emergency Med Studies/Practice (EMSP)

EMSP 281 - EMT-B: INTRODUCTION TO EMERGENCY CARE
Short Title: EMT-B INTRO TO EMERGENCY CARE
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course is a state-sanctioned EMT-B Certification course which includes practical and didactic exploration into pre-hospital care. This course will discuss anatomy, body systems, and the biochemical basis of emergency intervention in addition to practical application of EMT-B skills. Formerly HEAL 308 and BIOS 281 and NSCI 281. Instructor Permission Required.
EMSP 282 - ADVANCED EMT
Short Title: ADVANCED EMT
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Continuation of EMSP 281, Emergency Care. Formerly BIOS 282, HEAL 310, and NSCI 282. Instructor Permission Required.

EMSP 375 - EMS INCHARGE LEADERSHIP COURSE
Short Title: EMS INCHARGE LEADERSHIP COURSE
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students preparing to hold leadership positions in EMS will expand their competency in emergency services, including emergency management and incident response, in addition to improving patient care and leadership skills. Participants will achieve certification in national emergency services courses, and will work as a team to manage a major event. Formerly UNIV 275. Instructor Permission Required.

EMSP 491 - EMERGENCY MEDICAL SERVICES RESEARCH COURSE
Short Title: EMS RESEARCH COURSE
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: EMSP 491 is an independent program of study for students interested in research in prehospital medicine. All students will complete a research project under the supervision of a physician faculty member from Baylor College of Medicine. Projects may vary based on each student's interest and faculty projects. Formerly NSCI 491. Instructor Permission Required. Repeatable for Credit.

EMSP 492 - EMERGENCY MEDICAL SERVICES RESEARCH COURSE
Short Title: EMS RESEARCH COURSE
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: EMSP 492 is an independent program of study for students interested in research in prehospital medicine. All students will complete a research project under the supervision of a physician faculty member from Baylor College of Medicine. Projects may vary based on each student's interest and faculty projects. Formerly NSCI 492. Instructor Permission Required. Repeatable for Credit.

EMSP 499 - EMT TEACHING PRACTICUM
Short Title: EMT TEACHING PRACTICUM
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is open to an undergraduate student who serves as an instructor for the Emergency Medical Technician course. As an instructor, he/she would need to participate in course planning, course assignments, and student evaluation. They would also be expected to present course material through preparing and delivering lectures, presentations, and practical skills instructions. Grade would be assigned based on student self-evaluation, class evaluation, and primary instructor assessment. Formerly NSCI 289. Instructor Permission Required. Repeatable for Credit.

Engineering (ENGI)

ENGI 100 - INTRODUCTION TO SPATIAL VISUALIZATION
Short Title: INTRO SPATIAL VISUALIZATION
Department: Engineering Division
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The ability to mentally visualize in three dimensions is an important skill for engineers and scientists. In this course, students will move through ten different modules that will strengthen spatial reasoning and visualization skills. All assigned work will be completed during the scheduled class time. Only students scoring <70% on the PSVT:R will be allowed into the course. Course is limited to new first time matriculants only. Instructor Permission Required.

ENGI 120 - INTRODUCTION TO ENGINEERING DESIGN
Short Title: INTRO TO ENGINEERING DESIGN
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Students learn the engineering design process and use it to solve meaningful problems drawn from the community and around the world. Teams of students evaluate design requirements and construct innovative solutions in the Oshman Engineering Design Kitchen. Students develop teaming and communication skills. Only first year students may enroll. Non-first year students wishing to take introductory engineering design may enroll in ENGI 220. ENGI 120 does not fulfill the FWIS requirement or carry D3 credit. Mutually Exclusive: Credit cannot be earned for ENGI 120 and FWIS 188.
ENGI 128 - INTRODUCTION TO ENGINEERING SYSTEMS
Short Title: INTRO TO ENGINEERING SYSTEMS
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will be a fun, hands-on introduction to the key concepts of electrical/mechanical/computational systems. Each student will use a small mobile robot to learn about block diagrams, abstraction and modularity, energy storage and conservation, feedback and control, digital communications, and software design. All interested freshman are welcome, no previous experience or prerequisites are required. The course will conclude with a multi-robot final project.

ENGI 140 - ENGINEERING LEADERSHIP DEVELOPMENT
Short Title: ENG’G LEADERSHIP DEVELOPMENT
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The purpose of this course is to prepare students to begin developing the skills, knowledge, and motivations needed to become an engineering leader. Learning methods for the class include assessments of current leadership skills, skill-learning via lectures and discussions, skill-practice and feedback via experiential exercises, and skill development via self-directed action planning. Major deliverables for the class include an autobiographical paper, an engineering leadership portfolio, and a leadership development plan.

Course URL: rcel.rice.edu

ENGI 150 - SURVEY OF ENGINEERING DISCIPLINES
Short Title: SURVEY OF ENGR DISCIPLINES
Department: Engineering Division
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This seminar provides a survey of practice of engineering, including traditional and non-traditional career paths; graduate and professional options; and introductions to ethics, intellectual property, and written and oral communication. Engineering departments will provide overviews of their specific disciplines. Assignments include team presentations. Instructor Permission Required.

ENGI 200 - ENGINEERING DESIGN STUDIO
Short Title: ENGINEERING DESIGN STUDIO
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 2-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): ENGI 120
Description: Graduates of ENGI 120 and ENGI 220 will have the opportunity to gain a more in-depth knowledge of the engineering design process by furthering progress on specific engineering design projects. Students may extend their project work by completing advanced prototyping for their designs and conduct testing. Students will be held accountable through technical mentorship, weekly meetings, and prototype evaluations. Students will only work in design teams. Student teams wishing to continue their projects from ENGI 120/220 may apply.
For application contact the instructor. Instructor Permission Required.

ENGI 210 - PROTOTYPING AND FABRICATION
Short Title: PROTOTYPING & FABRICATION
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): ENGI 120
Description: Students in ENGI 210 will learn and practice advanced prototyping and fabrication skills useful in the construction of physical objects for engineering design projects. The course is structured as a lecture and demonstration of basic and advanced prototyping techniques and out-of-class work practicing and honing the application of these techniques. Example techniques include low fidelity prototyping, 2D and 3D Computer Aided Design, electronics, foam cutting, laser cutting, plasma cutting, 3D printing, and molding/casting methods. Students will individually apply these techniques to create physical objects.
Course URL: engi210.blogs.rice.edu

ENGI 218 - ENGINEERING LEADERSHIP LAB I
Short Title: ENGINEERING LEADERSHIP LAB I
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Students develop a variety of leadership skills and abilities by solving weekly engineering challenges in small teams. Students practice various roles as team members and leaders, then receive rapid performance assessments and mentoring from fellow students and staff.
ENGI 219 - ENGINEERING LEADERSHIP LAB II  
**Short Title:** ENGINEERING LEADERSHIP LAB II  
**Department:** Engineering Division  
**Grade Mode:** Standard Letter  
**Course Type:** Laboratory  
**Credit Hour:** 1  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Prerequisite(s):** ENGI 218  
**Description:** Students develop a variety of leadership skills and abilities by solving weekly engineering challenges in small teams. Students practice various roles as team members and leaders, then receive rapid performance assessments and mentoring from fellow students and staff. Instructor Permission Required.  
**Course URL:** [rcel.rice.edu/courses](http://rcel.rice.edu/courses)  

ENGI 220 - INTRODUCTION TO ENGINEERING DESIGN II  
**Short Title:** INTRO TO ENGINEERING DESIGN II  
**Department:** Engineering Division  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 3  
**Restrictions:** Students with a class of Freshman may not enroll. Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Description:** Students learn the engineering design process and use it to solve meaningful problems drawn from the community and around the world. Teams of students evaluate design requirements and construct innovative solutions in the Oshman Engineering Design Kitchen. Students develop teaming and communication skills. Students may not be in their first year of school. First year students wishing to take introductory engineering design may enroll in ENGI 120. ENGI 220 is taught as the same time as ENGI 120.  

ENGI 221 - NEW ENTERPRISES  
**Short Title:** NEW ENTERPRISES  
**Department:** Engineering Division  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Description:** Students develop a variety of leadership skills and abilities by solving weekly engineering challenges in small teams. Students practice various roles as team members and leaders, then receive rapid performance assessments and mentoring from fellow students and staff. Instructor Permission Required.  

ENGI 241 - PROFESSIONAL EXCELLENCE FOR ENGINEERS  
**Short Title:** PROF EXCELLENCE FOR ENGINEERS  
**Department:** Engineering Division  
**Grade Mode:** Standard Letter  
**Course Type:** Internship/Practicum  
**Credit Hour:** 1  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Description:** Guided career and professional development course for engineering students, which includes required practicum and workplace experience. Instructor Permission Required.  
**Course URL:** [rcel.rice.edu/courses](http://rcel.rice.edu/courses)  

ENGI 242 - COMMUNICATION FOR ENGINEERS: BUILDING A PRACTICAL TOOLBOX  
**Short Title:** COMMUNICATION FOR ENGINEERS  
**Department:** Engineering Division  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture/Laboratory  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Description:** Students develop communication skills starting with critical thinking about communication strategy and how to best organize a message for different audiences. They will build skills in oral presentations, writing, data visualization, and interpersonal communication to communicate clearly and confidently in a variety of professional situations. Graduate/Undergraduate Equivalency: ENGI 542. Mutually Exclusive: Credit cannot be earned for ENGI 242 and ENGI 542.  
**Course URL:** [rcelconnect.org](http://rcelconnect.org)  

ENGI 300 - ENGINEERING DESIGN WORKSHOP  
**Short Title:** ENGINEERING DESIGN WORKSHOP  
**Department:** Engineering Division  
**Grade Mode:** Standard Letter  
**Course Type:** Independent Study  
**Credit Hours:** 2-3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Advanced design students will have the opportunity to further their design projects in an independent study course. Students will work with faculty to develop their own schedule, set their own deadlines, goals, and expectations to be met for grading purposes. Students may complete advanced prototyping for their designs, conduct tests, perform safety evaluations with external committee and/or write up their work for publication. The specific tasks that will be completed are dependent on the project needs. Students will be held accountable through technical mentorship, weekly meetings, and prototype evaluations. To be eligible for ENGI 300 students must have taken ENGI 120 (or equivalent), ENGI 210, and ENGI 200. Instructor Permission Required. Repeatable for Credit.  

ENGI 301 - INTRODUCTION TO PRACTICAL ELECTRICAL ENGINEERING  
**Short Title:** INTRO TO PRACTICAL EE  
**Department:** Engineering Division  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Students will acquire intermediate-level proficiency in the tools (both physical and software) used to design, build and debug embedded hardware designs. Students will learn the basics of electronic components and how to use those components in a successful embedded hardware design.
ENGI 302 - SUSTAINABLE DESIGN
Short Title: SUSTAINABLE DESIGN
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The objective of this course is to develop skills in formulating and solving problems arising from emerging technologies for the energy and water industries, such as green construction or renewable energy technologies, in the context of sustainable design. Students will be challenged to examine the economic, social, and environmental dimensions of emerging challenges and opportunities, by identifying the relevant objectives, constraints, and decision variables as viewed by various stakeholders. Grad students will have extra research assignments involving some aspect of a design solution. Cross-list: CEVE 302.

ENGI 303 - ENGINEERING ECONOMICS
Short Title: ENGINEERING ECONOMICS
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to the evaluation of alternative investment opportunities with emphasis on engineering projects and capital infrastructure. Time value of money concepts are developed in the context of detailed project evaluation and presentations. In addition, concepts and applications of risk analysis and investment under uncertainty are introduced. Requires oral and written presentations by students. Cross-list: CEVE 322. Graduate/Undergraduate Equivalency: ENGI 528. Mutually Exclusive: Credit cannot be earned for ENGI 303 and ENGI 528.

ENGI 315 - LEADING TEAMS AND INNOVATION
Short Title: LEADING TEAMS AND INNOVATION
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students learn the principles of engineering leadership, strategies for launching and leading engineering teams, and methods for utilizing creativity and innovation in engineering environments. Learning methods include case studies, simulations, group projects, and interactions with industry professionals. Graduate/Undergraduate Equivalency: ENGI 515. Mutually Exclusive: Credit cannot be earned for ENGI 315 and ENGI 515.
Course URL: recel.rice.edu

ENGI 317 - LEADERSHIP ACTION LEARNING
Short Title: LEADERSHIP ACTION LEARNING
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course allows students to practice leadership skills in an applied context as the leader of a team or project with a defined scope, schedule, and goal. Students will identify areas of leadership growth, and receive guided mentorship and feedback as they develop these skills through practice.

ENGI 318 - LEADING ENGINEERING LEADERSHIP LAB I
Short Title: LEADING ENG LEADERSHIP LAB I
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ENGI 315
Description: Students organize, execute, and debrief the leadership development activities completed by novice students in ENGI 218 (Engineering Leadership Lab I). ENGI 318 students learn advanced leadership and communication skills; get frequent practice delivering feedback; and receive intensive mentoring from course staff.

ENGI 319 - LEADING ENGINEERING LEADERSHIP LAB II
Short Title: LEADING ENG LEADERSHIP LAB II
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ENGI 315
Description: Students organize, execute, and debrief the leadership development activities completed by novice students in ENGI 219 (Engineering Leadership Lab II). ENGI 319 students learn advanced leadership and communication skills; get frequent practice delivering feedback; and receive intensive mentoring from course staff. This course is a continuation of ENGI 318. Instructor Permission Required.

ENGI 320 - ETHICS AND ENGINEERING LEADERSHIP
Short Title: ETHICS & ENGINRNG LEADERSHIP
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Civil & Environmental Engineer, Civil Engineering or Environment Analysis&Decisions. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CEVE 101
Description: Seminar introduces students to a framework for discussing and making ethical engineering and professional decisions. Using case studies and exercises, students will look at their own profession and its Engineering Code of Ethics as well as at the issues and risks they may face as managers and executives. Cross-list: CEVE 320. Graduate/Undergraduate Equivalency: ENGI 529. Mutually Exclusive: Credit cannot be earned for ENGI 320 and ENGI 529.
ENGI 330 - ENGINEERING PRACTICUM  
Short Title: ENGINEERING PRACTICUM  
Department: Engineering Division  
Grade Mode: Satisfactory/Unsatisfactory  
Course Type: Internship/Practicum  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This undergraduate course is designed to supplement technical coursework in the school of engineering with practical application and reflection on the challenges and value of applying knowledge to real-world problems in professional settings. Student undertakes a work internship and writes a report under supervision of a faculty member. NOTE: Instructor permission required, and must be obtained prior to the start of the internship. Instructor Permission Required. Repeatable for Credit.

ENGI 350 - NEEDS IDENTIFICATION AND DESIGN IMPLEMENTATION  
Short Title: NEEDS ID & DESIGN IMPLEMENT  
Department: Engineering Division  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): ENGI 120 or ENGI 200 or FWIS 188  
Description: Students in this course will identify needs situated in two or more environments, and learn to ask questions that elucidate the problem, needed features and criteria for success. Students also develop implementation plans and conduct testing for refined design solutions that may include standards and safety compliance, patent applications, and manufacturing and user documents.

ENGI 355 - DIGITAL DESIGN AND VISUALIZATION  
Short Title: DIGITAL DESIGN & VISUALIZATION  
Department: Engineering Division  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): ENGI 120 or ENGI 220 or FWIS 188  
Description: Students will acquire intermediate-level proficiency in the creation of virtual models and engineering drawings using computer aided design. Emphasis will be placed on best modeling strategies for launching and leading engineering teams, and methods for utilizing creativity and innovation in engineering environments. Learning methods include case studies, simulations, group projects, and interactions with industry professionals. Graduate students are required to complete an additional paper focusing on leadership development. Instructor Permission Required. Repeatable for Credit.

ENGI 428 - ENTREPRENEURSHIP INDEPENDENT STUDY  
Short Title: ENTREPRENEURSHIP IND STUDY  
Department: Engineering Division  
Grade Mode: Standard Letter  
Course Type: Independent Study  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Students who have completed entrepreneurship coursework/training may use this course to learn the process of developing startups or launching new ventures. Students will meet weekly with course instructors and complete periodic assignments on advancing ventures. Instructor Permission Required.

ENGI 505 - ENGINEERING PROJECT MANAGEMENT AND ECONOMICS  
Short Title: ENGINEERING PROJ MGMT & ECON  
Department: Engineering Division  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Life cycle economic analysis approach to project development and management, project planning, and project economic analysis, contracting network scheduling techniques, risk management, organizational structures, and cases. 505 requires an additional paper. Cross-list: CEVE 505. Mutually Exclusive: Credit cannot be earned for ENGI 505 and CEVE 201.

ENGI 510 - TECHNICAL AND MANAGERIAL COMMUNICATIONS  
Short Title: TECHNICAL AND MANAGERIAL COMM  
Department: Engineering Division  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: In this communications course designed for Professional Masters students, the approach will be experiential and interactive, with in-class exercises, analyses and numerous presentations. The focus will be on your practicing and refining the oral and written presentation skills you will need in your professional career. You should be prepared to participate in class and must be very comfortable speaking and writing English. You should not take this course in your first semester at Rice. Preference will be given to PM students.

ENGI 515 - LEADING TEAMS AND INNOVATION  
Short Title: LEADING TEAMS AND INNOVATION  
Department: Engineering Division  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Students learn the principles of engineering leadership, strategies for launching and leading engineering teams, and methods for utilizing creativity and innovation in engineering environments. Learning methods include case studies, simulations, group projects, and interactions with industry professionals. Graduate students are required to complete an additional paper focusing on leadership development. Instructor Permission Required. Graduate/Undergraduate Equivalency: ENGI 315. Mutually Exclusive: Credit cannot be earned for ENGI 515 and ENGI 315.  
Course URL: rcel.rice.edu
ENGI 528 - ENGINEERING ECONOMICS
Short Title: ENGINEERING ECONOMICS
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the evaluation of alternative investment opportunities with emphasis on engineering projects and capital infrastructure. Time value of money concepts are developed in the context of detailed project evaluation and presentations. In addition, concepts and applications of risk analysis and investment under uncertainty are developed. Requires oral and written presentations by students. Grad students will have an extra case study to perform. Cross-list: CEVE 528. Graduate/Undergraduate Equivalency: ENGI 320. Mutually Exclusive: Credit cannot be earned for ENGI 528 and ENGI 303.

ENGI 529 - ETHICS AND ENGINEERING LEADERSHIP
Short Title: ETHICS & ENGINEERING LEADERSHIP
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Civil & Environmental Engineer, Civil Engineering or Environment Analysis & Decisions. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar introduces students to a framework for discussing and making ethical engineering and professional decisions. Using case studies and exercises, students will look at their own profession and its Engineering Code of Ethics as well as at the issues and risks they may face as managers and executives. Graduate students will do an extra paper. Instructor Permission Required. Cross-list: CEVE 529. Graduate/Undergraduate Equivalency: ENGI 320. Mutually Exclusive: Credit cannot be earned for ENGI 529 and ENGI 320.

ENGI 530 - ENGINEERING PRACTICUM
Short Title: ENGINEERING PRACTICUM
Department: Engineering Division
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Internship/Practicum
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This graduate course is designed to supplement technical coursework in the school of engineering with practical application and reflection on the challenges and value of applying knowledge to real-world problems in professional settings. Students undertake a work internship and write a report under supervision of a faculty member. NOTE: Instructor permission required, and must be obtained prior to the start of the internship. Instructor Permission Required. Repeatable for Credit.

ENGI 542 - COMMUNICATION FOR ENGINEERS: BUILDING A PRACTICAL TOOLBOX
Short Title: COMMUNICATION FOR ENGINEERS
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Students develop communication skills starting with critical thinking about communication strategy and how to best organize a message for different audiences. They will build skills in oral presentations, writing, data visualization, and interpersonal communication to communicate clearly and confidently in a variety of professional situations. Additional assignments apply for grad students. Instructor Permission Required. Graduate/Undergraduate Equivalency: ENGI 242. Mutually Exclusive: Credit cannot be earned for ENGI 542 and ENGI 242.

Course URL: rcelconnect.org

ENGI 545 - STRATEGIC THINKING FOR COMPLEX PROBLEM SOLVING
Short Title: STRATEGIC THINKING
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course shows how to solve complex, ill-defined, non-immediate problems. It explains how to combine innovative and critical thinking to: -1- frame the problem, -2- diagnose the problem, -3- identify potential solutions, and -4- choose a solution and implement it. The approach is based on cases, each student will work on a project of their choosing. The course is equally applicable to academic and non-academic projects (such as consulting) in an industry, as such, it is open to students from all schools and departments. It is a part of a larger professional development initiative at Rice to equip students with skills that employers are specifically asking for. Cross-list: LEAD 545.

ENGI 600 - WRITTEN AND ORAL COMMUNICATION SEMINAR FOR ENGINEERING GRADUATE STUDENTS
Short Title: GRADUATE COMMUNICATIONS SEM
Department: Engineering Division
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 0
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: You have important research results, but unless you can explain them clearly and persuasively, you won't advance in your field. This interactive seminar is open to engineers actively writing a paper for publication, an extended PhD proposal, a Master's thesis, or a PhD dissertation. The written and oral assignments will help you present your research findings to a wide range of audiences - whether expert, interdisciplinary, international, or general. Topics include content and organization, plagiarism and paraphrase, crafting a persuasive abstract and literature review, effective visuals, and giving feedback to others. Apply directly to jhewitt@rice.edu. Instructor Permission Required.
ENGI 610 - MANAGEMENT FOR SCIENCE AND ENGINEERING
Short Title: MGT FOR SCIENCE/ENGINEERING
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is for graduate and undergraduate students who want to understand the basics of management in new and/or small technology-based businesses and is particularly relevant to students who are interested in careers in technology or entrepreneurial ventures. NSCI 610/ENGI 610 is team taught to provide insight into how technology oriented firms manage people, projects, accounting, marketing, strategy, intellectual property, organizations and entrepreneurship. Student's active participation is essential. Students who take this course are eligible for MGMT 625. Please contact Dr. Harry Wilkinson: hewilkinson@sbcglobal.net. Cross-list: NSCI 610.

ENGI 614 - LEARNING HOW TO INNOVATE?
Short Title: LEARNING HOW TO INNOVATE?
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Innovation has become a buzzword. Many of us aspire to be successful innovators, but how? There is ample attention for entrepreneurship, but less is available to support your innovation ambition. This course aims to give you an unconventional innovation experience. Repeatable for Credit.

ENGI 615 - LEADERSHIP COACHING FOR ENGINEERS
Short Title: LEADERSHIP COACHING FOR ENGR
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Leadership coaching is a professional skill that leaders use to enhance another person's ability to achieve their goals. Students will learn how to lead others in their own professional development through the use of coaching. This course emphasizes experiential learning and some graduates will be selected to become coaches to Rice engineering undergraduates. Repeatable for Credit.

ENGI 779 - BUSINESS AND URBAN ANALYTICS
Short Title: BUSINESS & URBAN ANALYTICS
Department: Engineering Division
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The project based class offers the unique opportunity for students from distinct fields of business and engineering to solve a real world data driven problem in a collaborative way. The data and the problem statement will come from the Rice University's Administrative Center for Sustainability and Energy Management (ACSEM) at the start of the semester. Instructor Permission Required. Cross-list: MGMT 779.

English (ENGL)

ENGL 100 - INTRODUCTION TO LITERATURE
Short Title: INTRODUCTION TO LITERATURE
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course is designed to introduce students from a variety of academic backgrounds to the major literary genres of fiction, poetry, drama, and creative non-fiction. Students will learn and practice the skills of close reading, interpretation, and literary analysis through discussion and critical writing about literature and language. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 121 - AP/OTH CREDIT IN ENGLISH
Short Title: AP/OTH CREDIT IN ENGLISH
Department: English
Grade Mode: Standard Letter
Course Type: Transfer
Credit Hours: 3
Course Level: Undergraduate Lower-Level
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation.
Course URL: www.english.rice.edu

ENGL 122 - AP/OTH CREDIT IN ENGLISH
Short Title: AP/OTH CREDIT IN ENGLISH
Department: English
Grade Mode: Standard Letter
Course Type: Transfer
Credit Hours: 3
Course Level: Undergraduate Lower-Level
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation.
Course URL: www.english.rice.edu

ENGL 175 - GLOBAL LITERATURES IN ENGLISH
Short Title: GLOBAL LITERATURES IN ENGLISH
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An introduction to global literary studies and critical writing in which students study a range of literatures in English. The subject is twentieth-century modernism and its successors; postmodernism; and postcolonialism.
Course URL: www.english.rice.edu
ENGL 200 - CRITICAL READING AND WRITING
Short Title: CRITICAL READING AND WRITING
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: A course designed for and required of all prospective English majors. Emphasis is on close reading, literary interpretation, and critical writing. Attention is paid to the major genres (poetry, drama, and fiction) across a range of historical periods.
Course URL: www.english.rice.edu

ENGL 201 - INTRODUCTION TO CREATIVE WRITING
Short Title: INTRO TO CREATIVE WRITING
Department: English
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: A course designed for and required of all prospective English majors. Emphasis is on close reading, literary interpretation, and critical writing. Attention is paid to the major genres (poetry, drama, and fiction) across a range of historical periods.
Course URL: www.english.rice.edu

ENGL 202 - THE CREATIVE CULTURAL ESSAY
Short Title: THE CULTURAL ESSAY
Department: English
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: A course dedicated to the study and craft of fiction, nonfiction, and poetry. Through engaged reading and creative exercises, students will analyze the use of various elements of creative writing - including image, voice, tension, character, setting, and story. Students will develop a writing portfolio as well as a sense of the possibilities inherent in and unique to each genre.
Course URL: www.english.rice.edu

ENGL 203 - TOPICS IN CREATIVE WRITING
Short Title: TOPICS IN CREATIVE WRITING
Department: English
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: An introductory, variable topics workshop in creative writing that asks students to work in multiple genres (fiction, non-fiction, poetry, reviewing, etc.). Topics will vary from semester to semester and may include "Food Writing," "Writing Green," "Persona," and more. Repeatable for Credit.
Course URL: english.rice.edu

ENGL 204 - FORMS OF POETRY
Short Title: FORMS OF POETRY
Department: English
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: A course dedicated to the study and craft of fiction, nonfiction, and poetry. Through engaged reading and creative exercises, students will analyze the use of various elements of creative writing - including image, voice, tension, character, setting, and story. Students will develop a writing portfolio as well as a sense of the possibilities inherent in and unique to each genre.
Course URL: www.english.rice.edu

ENGL 210 - BEGINNINGS: BRITISH LITERATURE TO 1800
Short Title: BRITISH LITERATURE TO 1800
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: A survey of representative British authors of the Middle Ages, the Renaissance, and the 18th century for both majors and non-majors.
Course URL: www.english.rice.edu

ENGL 211 - MAJOR BRITISH WRITERS: 1800 TO PRESENT
Short Title: MAJOR BRIT WRITERS:1800-PRESENT
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: A survey of representative British authors of the 19th and 20th centuries for both majors and non-majors.
Course URL: www.english.rice.edu

ENGL 212 - SURVEY OF OLD ENGLISH
Short Title: SURVEY OF OLD ENGLISH
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: An introduction to Old English Literature, this course will focus on the following: Anglo-Saxon literature and culture, especially the tradition of oral poetry, the textuality of manuscripts, and the relationship between the spoken and written word.
Course URL: www.english.rice.edu
ENGL 222 - THE WORLD AND SOUTH ASIA  
Short Title: WORLD AND SOUTH ASIA  
Department: English  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Introduction to important 20th and 21st-century writers in English from South Asia - the region that includes India, Pakistan, Bangladesh and Sri Lanka. Readings include award-winning and bestselling works (fiction and non-fiction) by writers who address a wide range of issues including national and cultural identity, colonialism, sexuality, religion, globalization and political violence. Cross-list: ASIA 222.  
Course URL: www.english.rice.edu  

ENGL 250 - HISTORY OF THE NOVEL  
Short Title: HISTORY OF THE NOVEL  
Department: English  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Course designed to introduce first and second year students to significant works of the poetic tradition, from ancient to contemporary, and from American and English masterworks to world poetry in translation.  
Course URL: www.english.rice.edu  

ENGL 260 - WHAT IS AMERICAN LITERATURE  
Short Title: WHAT IS AMERICAN LITERATURE  
Department: English  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: A survey of representative U.S. authors from the 18th century to the present designed for both majors and non-majors.  
Course URL: www.english.rice.edu  

ENGL 265 - JEWISH-AMERICAN LITERATURE AND CULTURE  
Short Title: JEWISH-AMERICAN LITERATURE  
Department: English  
Grade Mode: Standard Letter  
Course Type: Lecture

**Course Description**

ENGL 368 - LITERATURE AND THE ENVIRONMENT

Short Title: LITERATURE & THE ENVIRONMENT

Department: English

Grade Mode: Standard Letter

Course Type: Lecture

Distribution Group: Distribution Group I

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: A course that asks the question: How does literature express or shape environmental values? In this class we will read American fiction and nonfiction exploring the relationship between human and nonhuman nature. Cross-list: ENST 368.

Course URL: www.english.rice.edu

ENGL 369 - THE AMERICAN WEST AND ITS OTHERS

Short Title: THE AMERICAN WEST & ITS OTHERS

Department: English

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: Survey of a body of literature, film, and critical theory about the American West and the concept of regionalism. Explores region in relation to the nation and its borders, global media, coloniality, indigeneity and race, gender, and an ethics of place. Cross-list: SWGS 329.

Course URL: www.english.rice.edu

ENGL 370 - AFRICAN AMERICAN LITERATURE

Short Title: AFRICAN AMERICAN LITERATURE

Department: English

Grade Mode: Standard Letter

Course Type: Lecture

Distribution Group: Distribution Group I

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: A course that traces, through various genres and themes, African American literary history from the late eighteenth century to the present. Attention is given to theories and critiques of African American literature and culture. Cross-list: SWGS 370.

Course URL: www.english.rice.edu

ENGL 371 - CHICANO/A LITERATURE

Short Title: CHICANO/A LITERATURE

Department: English

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: A mixed-genre course focusing on the Chicano movement, the Chicano renaissance, and alternative literary and mythic traditions associated with them. Cross-list: SPPO 354, SWGS 354.

Course URL: www.english.rice.edu

ENGL 372 - THE AMERICAN WEST/AMERICAS

Short Title: THE AMERICAN WEST/AMERICAS

Department: English

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: An investigation of U.S. Western concerns as they encounter the cultures, literatures, economies, ecologies, languages, and peoples of the Americas. Comparative study of notions of frontier, borders, the state, the Other. Attention to knowledges traveling south to north via immigration, narco-culture, and Latin Americanist scholarship.

Course URL: www.english.rice.edu

ENGL 373 - SURVEY OF AMERICAN FILM AND CULTURE

Short Title: SURVEY OF AMER FILM & CULTURE

Department: English

Grade Mode: Standard Letter

Course Type: Seminar

Credit Hours: 4

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: A course that explores the history of cinema in the U.S. from its origins to the present day. Cross-list: FILM 373, HART 380.

Course URL: www.english.rice.edu

ENGL 374 - CINEMA STUDIES

Short Title: CINEMA STUDIES

Department: English

Grade Mode: Standard Letter

Course Type: Seminar

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: A variable topics course central to the study of cinema theory, criticism, and history. Repeatable for Credit.

ENGL 375 - FILM AND LITERATURE

Short Title: FILM AND LITERATURE

Department: English

Grade Mode: Standard Letter

Course Type: Seminar

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Upper-Level

Description: An exploration of twelve masterpieces of world cinema, with special attention to the texts (when applicable) on which they are based. Some of the filmmakers covered: Akira Kurosawa, Jean Renoir, Bernardo Bertolucci, Jean-Luc Godard, Roberts Bresson, Ingmar Bergman, Howard Hawks, and Kar Wai Wong.

Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A variable topics course that may focus on such areas as film genres, national cinemas, world cinema, directors or other thematically organized topics. Cross-list: FILM 385. Graduate/Undergraduate Equivalency: ENGL 589. Mutually Exclusive: Credit cannot be earned for ENGL 385 and ENGL 589. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 386 - MEDICAL MEDIA ARTS LAB
Short Title: MEDICAL MEDIA ARTS LAB
Department: English
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group I
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students will collaborate with health professionals to create solutions to real-world medical communication, visualization and design problems. Working individually and in teams, students will apply critical thinking and theory to hands-on design. Projects may include production of short videos, infographics, app development, 3-D virtual models, creative writing, and other media arts. Cross-list: FILM 381.
Course URL: www.english.rice.edu

ENGL 387 - CULTURAL STUDIES
Short Title: CULTURAL STUDIES
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3,4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A variable topics course that may focus on one or more theorist, on a genre or theme, or on debates within the field of cultural studies. Recent topics have included film, mass culture, Marx, and contemporary ethnic studies. Not limited in period, scope, or geography. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 388 - MEDIA STUDIES
Short Title: MEDIA STUDIES
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A variable topics course that addresses interdisciplinary approaches to studying the relationships between film, photography, television, and digital technologies such as the internet and computer-generated imaging. Cross-list: FILM 386. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 389 - YOUTH STUDIES
Short Title: YOUTH STUDIES
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A variable topics course exploring the cultural productions of youth, their social geographies, and youth as a critical field important to the theorization of activism, technology, law and incarceration, medicine, consumerism, citizenship, immigration, labor, posthumanism. Previous topics: Generation X, Third Wave Feminism, Obama and the Youth Vote, Twilight culture, Harry Potter & Gen Y. Cross-list: SWGS 389.
Course URL: www.english.rice.edu

ENGL 390 - INTRODUCTION TO THEATRE
Short Title: INTRODUCTION TO THEATRE
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A survey course of the art and theory of the theatre through an examination of dramatic literature from the Greeks through the modern era. The course will also explore the craft of the theatre as it is practiced today. Requires attending several theatre productions in local Houston venues. Cross-list: THEA 303.
Course URL: www.english.rice.edu

ENGL 392 - CONTEMPORARY POETRY
Short Title: CONTEMPORARY POETRY
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An in-depth analysis of contemporary poetry and poetics, from a variety of national traditions that raises questions about tradition and innovation, the personal and the political, aesthetics, technique, and experience. Readings will focus on the rich variety of work written in English between the last decades of the twentieth century and the present.
Course URL: www.english.rice.edu

ENGL 393 - BLACK MANHATTAN: 1915-1940
Short Title: BLACK MANHATTAN: 1915-1940
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An examination of the key figures, political movements, and black radicalisms and nationalisms that are remembered as part of the Harlem Renaissance. We will focus on the effects of WWI, the Depression, and segregation on black cultural expression.
Course URL: www.english.rice.edu
ENGL 396 - LITERARY GENRES
Short Title: LITERARY GENRES
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A variable topics course that offers an in-depth look at a particular literary genre or subgenre over a range of historical periods. Topics may include detective fiction, romance, the novel, magical realism, the lyric, or melodrama. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 397 - TOPICS IN LITERATURE AND CULTURE
Short Title: TOPICS IN LITERATURE & CULTURE
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Course URL: www.english.rice.edu

ENGL 398 - SLAVERY IN 20TH CENTURY FILM AND FICTION
Short Title: SLAVERY IN 20TH C. FILM & FICT
Department: English
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course studies how twentieth century reconstructions of slavery in American literature and film engage contemporary anxieties regarding race, gender, sexuality, and national identity. These neo-slave narratives often critique modernity; challenge how we think about history, evidence, memory, and trauma; and trouble narrative conventions.
Course URL: www.english.rice.edu

ENGL 399 - THE BLACK IMAGINARY: 1775-PRESENT
Short Title: THE BLACK IMAGINARY
Department: English
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course addresses some of the leading questions that shaped black writings and expressive culture in the United States from the late 18th century forward. Our readings will include Wheatley, Walker, Delany, Douglass, Du Bois, Ellison, Baldwin, King, Malcolm X, Morrison, Percival Everett, and early and contemporary films and music.
Course URL: www.english.rice.edu

ENGL 400 - SEMINAR FOR MAJORS
Short Title: SEMINAR FOR MAJORS
Department: English
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Junior or Senior. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A special seminar that focuses on the development of advanced research, presentation, and writing skills for intermediate to advanced level students. Topics will vary. Not offered every semester. Contact English department for further information. Recommended Prerequisite(s): ENGL 200 and ENGL 300. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 401 - ADVANCED FICTION WRITING
Short Title: ADVANCED FICTION WRITING
Department: English
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ENGL 301
Description: A course conducted mostly as a workshop. It will also include some assigned writing exercises and weekly reading of published short stories to deepen students' understanding of narrative technique. Additional time will be spent on special film viewings, reviews, and critiques and readings as directed. Procedures for entrance into this course may vary by semester and/or instructor. Consult English department website for more information. Instructor Permission Required. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 402 - WRITING LONGER FICTION: NARRATIVE DESIGN
Short Title: WRITING LONGER FICTION
Department: English
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A course for advanced fiction writers who wish to expand their knowledge of narrative design and work in longer forms. Students will write a proposal for a longer project at the start of the semester and complete no fewer than sixty pages (a novel excerpt, a complete novella, 2-3 linked stories) by the end.
Course URL: www.english.rice.edu
ENGL 404 - ADVANCED POETRY WRITING
Short Title: ADV POETRY WRITING
Department: English
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ENGL 304
Description: An in-depth study of contemporary poetry, this course emphasizes the careful analysis of books by six to eight contemporary poets, the reading of selected essays on poetic technique, and the writing of poems with a view toward finding a personal voice. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 405 - ADVANCED PERSONAL ESSAY WRITING
Short Title: ADV PERSONAL ESSAY WRITING
Department: English
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An advanced reading and writing workshop for writers who have some familiarity with the nonfiction genre. Published works will be read as blueprints for the construction of student work. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 412 - INTRODUCTION TO OLD ENGLISH LANGUAGE
Short Title: INTRO TO OLD ENGLISH LANGUAGE
Department: English
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An introduction to the language, prose and shorter poems. Cross-list: MDEM 412. Graduate/Undergraduate Equivalency: ENGL 512. Mutually Exclusive: Credit cannot be earned for ENGL 412 and ENGL 512.
Course URL: www.english.rice.edu

ENGL 413 - BEOWULF IN OLD ENGLISH
Short Title: BEOWULF IN OLD ENGLISH
Department: English
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ENGL 412 or MDST 412
Description: A course in the study of Beowulf in Old English. Cross-list: MDEM 413. Repeatable for Credit.

ENGL 418 - RENAISSANCE DRAMA
Short Title: RENAISSANCE DRAMA
Department: English
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Junior or Senior. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ENGL 200 and ENGL 300
Description: A variable topics course designed to build on student knowledge gained earlier in the curriculum. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 419 - TOPICS IN SHAKESPEARE
Short Title: TOPICS IN SHAKESPEARE
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A variable topics course that provides an opportunity to explore some dimension of Shakespeare's work with specialized focus. Please consult English department for specific details. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 422 - 18TH CENTURY BRITISH STUDIES
Short Title: 18TH CENTURY BRITISH STUDIES
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A variable topics course designed to build on student knowledge of eighteenth-century literature and/or culture gained earlier in the curriculum. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 424 - 20TH CENTURY BRITISH STUDIES
Short Title: 20TH CENTURY BRITISH STUDIES
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A variable topics course designed to build on student knowledge of twentieth-century literature and/or culture gained earlier in the curriculum. Repeatable for Credit.
Course URL: www.english.rice.edu
ENGL 430 - EMPIRE AND BRITISH LITERATURE 1700-1950
Short Title: EMPIRE & BRITISH LITERATURE
Department: English
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ENGL 200 and ENGL 300
Description: This course provides detailed knowledge of a diverse range of eighteenth and nineteenth-century texts that engaged the realities, possibilities, fantasies and pitfalls of the British Empire. Course also includes historical and archival material as well as recent critical and historical approaches to the study of empire and its relationship to cultural identity. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 432 - TOPICS IN RICHARDSON'S CLARISSA
Short Title: RICHARDSON'S CLARISSA
Department: English
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ENGL 200 and ENGL 300
Description: A seminar-style course that reads and examines Richardson's 1500 page novel from a range of critical perspectives. Topics considered will include gender; economics; history of the novel; history of marriage; and philosophical perspectives on literature. Cross-list: SWGS 472. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 438 - THE GROTESQUE
Short Title: THE GROTESQUE
Department: English
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines the grotesque in literature and art. It covers a variety of textual and visual sources across periods; theoretical materials will include works from literary studies, visual culture, art history, critical theory and aesthetics. Cross-list: HART 430.
Course URL: www.english.rice.edu

ENGL 605 - THIRD-YEAR WRITING WORKSHOP  
**Short Title:** THIRD-YEAR WRITING WORKSHOP  
**Department:** English  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** A workshop required of third-year students designed to help transform seminar papers into works of publishable quality.  
**Course URL:** [www.english.rice.edu](http://www.english.rice.edu)  

ENGL 606 - FALL TEACHING PRACTICUM  
**Short Title:** FALL TEACHING PRACTICUM  
**Department:** English  
**Grade Mode:** Satisfactory/Unsatisfactory  
**Course Type:** Internship/Practicum  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** A workshop required of third-year students designed to help transform seminar papers into works of publishable quality.  
**Course URL:** [www.english.rice.edu](http://www.english.rice.edu)  

ENGL 607 - TOPICS IN LITERARY STUDIES PART 2  
**Short Title:** TOPICS IN LITERARY STUDIES  
**Department:** English  
**Grade Mode:** Satisfactory/Unsatisfactory  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** ENGL 600  
**Description:** The second in a two-semester sequence of courses designed to introduce first-year graduate students to different methods and theoretical approaches, to the history and culture of the university as an institution, and to professional genres.  
**Course URL:** [english.rice.edu](http://english.rice.edu)
ENGL 621 - FALL DIRECTED READING
Short Title: FALL DIRECTED READING
Department: English
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A course designed for students who want to pursue intensive semester-long study of a particular topic not included in the curriculum. Students must identify and receive the approval on an English department faculty member. Instructor and Department approval must be granted prior to registration. Instructor Permission Required. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 622 - SPRING DIRECTED READING
Short Title: SPRING DIRECTED READING
Department: English
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A course designed for students who want to pursue intensive semester-long study of a particular topic not included in the curriculum. Students must identify and receive the approval of an English department faculty member. Instructor and Department approval must be granted prior to registration. Instructor Permission Required. Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 703 - FALL RESEARCH LEADING TO CANDIDACY
Short Title: RESEARCH LEADING TO CANDIDACY
Department: English
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 704 - SPRING RESEARCH LEADING TO CANDIDACY
Short Title: RESEARCH LEADING TO CANDIDACY
Department: English
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-9
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.
Course URL: www.english.rice.edu

ENGL 705 - SUMMER RESEARCH LEADING TO CANDIDACY
Short Title: RESEARCH LEADING TO CANDIDACY
Department: English
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 6
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course provides for graduate students to continue their research leading to candidacy during summer session. Repeatable for Credit.
Course URL: www.english.rice.edu

Environmental Studies (ENST)

ENST 100 - ENVIRONMENT, CULTURE AND SOCIETY
Short Title: ENVIRONMENT, CULTURE & SOCIETY
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This introductory course in environmental studies helps students to better understand the complex interrelationship between human cultures and their social and physical environments. Lectures and assignments draw upon the methods and expertise of architecture, the humanities and the social sciences. This is a core course of Rice's Environmental Studies minor. Cross-list: ARCH 105.

ENST 101 - THE EARTH
Short Title: THE EARTH
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Freshman, Junior, Sophomore or Senior. Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
ENST 102 - HISTORY OF THE EARTH AND LIFE
Short Title: HISTORY OF THE EARTH & LIFE
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Study of earth's systems over the past 4.6 billion years. Topics include evolution of life, continents, ocean basins and climate. Cross-list: ESCI 112.

ENST 113 - ENVIRONMENTAL CRISIS SEMINAR
Short Title: ENVIRONMENTAL CRISIS SEMINAR
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Discussion of environmental crises. Topics vary annually. Cross-list: EBIO 113, ESCI 113. Repeatable for Credit.

ENST 114 - NATURAL DISASTER SEMINAR
Short Title: NATURAL DISASTER SEMINAR
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Seminar topics vary by term. Cross-list: ESCI 114. Repeatable for Credit.

ENST 117 - FRESHMAN SEMINAR IN LOCAL ENVIRONMENTAL SCIENCE RESEARCH
Short Title: FRESHMAN ENVIRONMENTAL SEMINAR
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A 7-week seminar course to introduce freshmen perspective environmental science researches to the excitement of research at Rice and in the broader Houston area, and to provide context with which to think about facts presented in textbooks. Small groups will meet weekly with a graduate student or postdoctoral researcher to explore a published research article by a local team of researchers, gaining background information about the subject and exposure to the research techniques. In the final session, the group will tour the lab that produced the feature article. Additional tours and activities TBA. All first year non-transfer students are eligible to enroll in ENST 117 regardless of AP credit. This course meets in the second half of the semester and features research in the Environmental Science Major.

ENST 201 - THE SCIENCE BEHIND EARTH GLOBAL WARMING AND CLIMATE CHANGE
Short Title: SCIENCE BEHIND GLOBAL WARMING
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course will introduce the students to the science behind last century Earth global warming in the context of the past records of global Earth climate variability and forecast of Earth climate in the next century. Cross-list: ESCI 201.

ENST 202 - CULTURE, ENERGY, AND THE ENVIRONMENT: AN INTRODUCTION TO ENERGY HUMANITIES
Short Title: CULTURE ENERGY & ENVIRONMENT
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Humanity faces extraordinary challenges in an era of climate change and energy transition. These challenges are not only technological but also questions of value, power, behavior, and understanding. This course draws upon new research across the arts, humanities and social sciences to help students better understand the cultural and social dimensions of our current patterns of energy use, their environmental impacts, and the possibility of new energy futures. Intended for both STEM majors and humanities and social science students. Cross-list: HUMA 202.

ENST 204 - ENVIRONMENTAL SUSTAINABILITY: THE DESIGN & PRACTICE OF COMMUNITY AGRICULTURE
Short Title: COMMUNITY GARDEN
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course introduces the fundamentals of community garden design and practice. Responsibilities will center on developing and improving the Rice Community Garden. A strong emphasis will be on learning and applying ecological principles to the practice of community agriculture. Class has required meetings outside of regular class time. Cross-list: EBIO 204. Repeatable for Credit.
ENST 265 - GREEN WORLDS: SCIENCE FICTION AND THE ENVIRONMENT
Short Title: SCI FI AND THE ENVIRONMENT
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Examines the ways that science fiction has expressed and challenged ideas about nature, culture, society and politics to imagined alternative 'green' worlds. Will focus on authors such as Margaret Atwood, Octavia Butler and Paolo Bacigalupi: films such as "Wall-E" and "Avatar": and accessible secondary criticism. Cross-list: ENGL 269.

ENST 281 - ENGINEERING SOLUTIONS FOR SUSTAINABLE COMMUNITIES
Short Title: ENGRG SUSTAINABLE COMMUNITIES
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Students will work in teams to develop sustainable solutions for energy or environmental problems affecting our Houston and Rice communities. Emphasis will be placed on the integration of engineering fundamentals with societal issues, environmental and safety considerations, sustainability and professional communications. Prerequisites: introductory engineering courses, or permission of instructor. Cross-list: CHBE 281.

ENST 302 - ENVIRONMENTAL ISSUES: RICE INTO THE FUTURE
Short Title: ENVIRON ISSUES: RICE IN FUTURE
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students use the campus as a laboratory for learning about sustainability through group projects to reduce Rice's environmental impact or resolve environmental issues. Cross-list: SOCI 304.

ENST 307 - ENERGY AND THE ENVIRONMENT
Short Title: ENERGY AND THE ENVIRONMENT
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores the physical principles of energy use and its impacts on Earth's environment and climate. Topics will include energy mechanics, climate change, and the environmental impacts and future prospects of various fossil fuel and alternative energy sources. Cross-list: CEVE 307, ESCI 307. Recommended Prerequisite(s): MATH 101 and PHYS 101 or PHYS 111.

ENST 313 - SUSTAINABLE DESIGN
Short Title: CASE STUDIES IN SUSTAIN DESIGN
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will explore sustainable design from initial sustainable facility concepts and team organizations, to enlisting community support and process assessment. The course will develop into details about sustainable design, lessons learned, processes and outcomes. Space is limited and registration does not guarantee a space in this course. The final course roster is formulated on the first day class by the individual instructor. Cross-list: ARCH 313. Graduate/Undergraduate Equivalency: ENST 613. Mutually Exclusive: Credit cannot be earned for ENST 313 and ENST 613.

ENST 315 - ENVIRONMENTAL HEALTH
Short Title: ENVIRONMENTAL HEALTH
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (BIOS 201 or BIOC 201) and (BIOS 202 or EBIO 202)
Description: An overview of environmental health issues including discussion of epidemiologic methods, illnesses caused or exacerbated by environmental exposures, and the role of research in driving effective policies to protect and promote public health. The class includes numerous guest lectures by area experts (physicians, researchers, community activists, policymakers and others); a bus tour featuring disproportionately affected neighborhoods as well as cutting-edge "green" initiatives; original student research projects; and an opportunity to address the Houston City Council. The dynamic between research and action, i.e., “making a difference,” is stressed. FORMERLY ENST 314.

ENST 316 - ENVIRONMENTAL FILM
Short Title: ENVIRONMENTAL FILM
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Explores the ways film represents the environment and environmental issues (food, water, energy, waste, environmental justice, sustainability), and both expresses and shapes environmental values. We will view and analyze a variety of genres, as well as reading supplementary material. Cross-list: SOCI 316.
ENST 321 - CASE STUDIES IN SUSTAINABILITY: THE HIGH PERFORMANCE BUILDING
Short Title: SUSTAINABILITY CASE STUDIES
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will explore application of high performance, sustainable design to specific Rice University building and facility targets. In partnership with Rice University leadership, the team effort will develop "regenerative redesign" approaches based on investigation of other campuses' case study. Space is limited and registration does not guarantee a space in this course. The final course roster is formulated on the first day of class by the individual instructor. Cross-list: ARCH 321. Graduate/Undergraduate Equivalency: ENST 621. Mutually Exclusive: Credit cannot be earned for ENST 321 and ENST 621.

ENST 322 - CASE STUDIES IN SUSTAINABILITY: THE REGENERATIVE REPOSITIONING OF NEW OR EXISTING RICE CAMPUS BUILDINGS
Short Title: CASE STUDIES IN SUSTAINABILITY
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The project-based seminar will provide a means by which all those with an interest in the building science entailed in the design of commercial, institutional, and residential structures can investigate common issues, obtain information, discuss local strategies, and otherwise address subjects relating to building or campus performance over its lifecycle. To develop an approach of taking an existing Rice University building an optimizing its use via "repositioning" or redesign the class will create an interdisciplinary forum where students of architecture, engineering (structural, mechanical, etc.), and human sciences will potentially collaborate with professional building consultants, materials manufacturers, contractors, developers, owners, and Rice campus facility managers Cross-list: ARCH 321. Graduate/Undergraduate Equivalency: ENST 621. Mutually Exclusive: Credit cannot be earned for ENST 321 and ENST 621.

ENST 323 - CONSERVATION BIOLOGY
Short Title: CONSERVATION BIOLOGY
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): BIOC 201 and EBIO 202
Description: The course is designed to give students a broad overview of conservation biology. Lecture and discussions will focus on conservation issues such as biodiversity, extinction, management, sustained yield, invasive species and preserve design. Cross-list: EBIO 323.

ENST 331 - ENVIRONMENTAL POLITICS AND POLICY
Short Title: ENVIRONMENT POLITICS & POLICY
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course considers the major issues in the increasingly important public policy area of the environment. It emphasizes the American experience, but also considers certain international aspects of these issues. Cross-list: POLI 331.

ENST 332 - THE SOCIAL LIFE OF CLEAN ENERGY
Short Title: SOCIAL LIFE OF CLEAN ENERGY
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course considers the phenomenon of renewable energy, using a social scientific approach to analyze the various forces and interests involved in the development of renewable energy projects (such as hydropower, solar and wind) in both the global North and South. No prerequisites required. Cross-list: ANTH 332.

ENST 333 - GLOBAL BIOGEOCHEMICAL CYCLES
Short Title: GLOBAL BIOGEOCHEMICAL CYCLES
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course introduces students to the coupled nature of the biosphere, atmosphere and hydrosphere using as focal points elemental cycles such as those of carbon and nitrogen. This is a writing-intensive class, and will include 3 required Saturday field trips. Cross-list: EBIO 340, ESCI 340.

ENST 334 - THE SOCIAL LIFE OF CLEAN ENERGY
Short Title: SOCIAL LIFE OF CLEAN ENERGY
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course considers the major issues in the increasingly important public policy area of the environment. It emphasizes the American experience, but also considers certain international aspects of these issues. Cross-list: POLI 331.

ENST 350 - ENVIRONMENTAL INTERNSHIP
Short Title: ENVIRONMENTAL INTERNSHIP
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Provides enrollment credit for approved internships with environmental organizations or agencies. Students must seek approval prior to beginning the internship. Weekly progress reports and a final paper are required. Instructor Permission Required.
ENST 367 - ENVIRONMENTAL SOCIOLOGY
Short Title: ENVIRONMENTAL SOCIOLOGY
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course focuses on the foundations of environmental sociology and takes a social and historical approach to examine how humans affect the environment and the environment affects humans. Topics include: agricultural sustainability, resource extraction and climate changes; environmental racism/sexism; globalization and development; population, and consumption, and environmental movements. Cross-list: SOCI 367.

ENST 368 - LITERATURE AND THE ENVIRONMENT
Short Title: LITERATURE & THE ENVIRONMENT
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A course that asks the question: How does literature express or shape environmental values? In this class we will read American fiction and nonfiction exploring the relationship between human and nonhuman nature. Cross-list: ENGL 368.

ENST 379 - LAB MODULE IN AQUATIC ECOLOGY WITH SCUBA
Short Title: LAB MOD AQU ECOLOGY WITH SCUBA
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students will learn some fundamentals of aquatic ecosystems and conduct lab exercises that involve SCUBA-based fieldwork in a nationally recognized freshwater dive site. Course has required meetings outside of regular class time. Prerequisites: LPAP 194 or proof of Open Water Scuba certification from a professional organization (e.g., PADI, NAUI). A course fee ranging from $300 to $535 is associated with the class. Please send all enrollment requests to Mariah McClarty, mam22@rice.edu and include the following information: major, year, scuba certification level and issuing professional organization, and a brief statement about why you want to take the course. You will be notified of enrollment decisions by December 5th. Department Permission Required. Cross-list: EBIO 379. Recommended Prerequisite(s): EBIO 213 and LPAP 194.

ENST 391 - SPECULATIVE FUTURES
Short Title: SPECULATIVE FUTURES
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Drawing from “CliFi,” “Speculative Fiction,” and global anthropological case studies, this course analyzes a series of potential futures as earthly conditions continue to be altered by human activity. Students will develop speculative future models through assessing climate conditions, population displacement, ethics, ecological transformations and human practices and values. Cross-list: ANTH 391.

ENST 400 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level

ENST 406 - INTRODUCTION TO ENVIRONMENTAL LAW
Short Title: INTRO TO ENVIRONMENTAL LAW
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level

ENST 415 - THE ENVIRONMENTAL MOVEMENT
Short Title: THE ENVIRONMENTAL MOVEMENT
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examines the environmental movement in the U.S. and globally. After a historical overview, we will use a social movement perspective to examine mobilization, organizations and tactics, ideologies and identities, as well as exploring aspects of contemporary environmentalism (e.g. green building and slow food, wildlife management/biodiversity, sustainable development, environmental justice). Cross-list: SOCI 415.
ENST 425 - ORGANIC GEOCHEMISTRY
Short Title: ORGANIC GEOCHEMISTRY
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course covers the organic geochemistry of the natural environment. Topics include: production, transport, decomposition, and storage of organic matter in the marine and terrestrial environments, use of isotopes to track biogeochemical processes and natural and perturbed carbon cycle issues, including past and recent climate shifts. Cross-list: CHEM 425, ESCI 425.

ENST 437 - ENERGY ECONOMICS
Short Title: ENERGY ECONOMICS
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ECON 301 or ECON 370
Description: Discussion of key aspects in the supply and demand of energy. Topics include optimal extraction of depletable resources, transportation, storage, end-use and efficiency, and the relationship between economic activity, energy, and the environment. Cross-list: ECON 437.

ENST 441 - GOVERNING THE ENVIRONMENTAL COMMONS
Short Title: GOVERNING ENVIRONMNTL COMMONS
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): POLI 395
Description: Common Property Resources (CPRs), such as fisheries, aquifers, and the Internet, appear in many guises and pose a fundamental problem for governing. Exploration of theoretical underpinnings for CPRs, their growing literature, and the political and economic institutions mediating CPR dilemmas. Included is an original research project in conjunction with the instructor. Cross-list: POLI 441.

ENST 477 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Internship/Practicum, Lecture, Laboratory, Seminar
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Topics and credit hours may vary each semester. Contact Department for current semester’s topic. Repeatable for Credit.

ENST 480 - ENVIRONMENTAL AND ENERGY ECONOMICS
Short Title: ENVIRONMENTAL ECONOMICS
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ECON 200 or ECON 301 or ECON 370
Description: Uses economic theories of externalities and common property resources to analyze how markets, legal institutions, regulations, taxes and subsidies, and voluntary activity can affect the supply of environmental amenities, such as clean air, clean water, and wilderness areas. Also discusses methods for determining the demand for environmental amenities. Cross-list: ECON 480.

ENST 513 - SEMINAR: TOPICS RELATED TO THE EARTH'S DEEP INTERIOR
Short Title: SEM: EARTH'S DEEP INTERIOR
Department: Environmental Studies
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar topics may vary. Readings and discussions about current topics related to the processes governing the Earth's deep interior. General themes include mantle convection, thermal evolution, and volatiles. Repeatable for Credit.

ENST 613 - CASE STUDIES IN SUSTAINABLE DESIGN
Short Title: SUSTAINABLE DESIGN
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Cross-list: ARCH 613. Graduate/Undergraduate Equivalency: ENST 313. Mutually Exclusive: Credit cannot be earned for ENST 613 and ENST 313.
ENST 621 - CASE STUDIES IN SUSTAINABILITY: THE HIGH PERFORMANCE BUILDING
Short Title: SUSTAINABILITY CASE STUDIES
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The project-based seminar will provide a means by which all those with an interest in the building science entailed in the design of commercial, institutional, and residential structures can investigate common issues, obtain information, discuss local strategies, and otherwise address subjects relating to building or campus performance over its lifecycle. To develop an approach of taking an existing Rice University building an optimizing its use via "repositioning" or redesign the class will create an interdisciplinary forum where students of architecture, engineering (structural, mechanical, etc.), and human sciences will potentially collaborate with professional building consultants, materials manufacturers, contractors, developers, owners, and Rice campus facility managers. Cross-list: ARCH 621. Graduate/Undergraduate Equivalency: ENST 321. Mutually Exclusive: Credit cannot be earned for ENST 621 and ENST 321.

ENST 622 - CASE STUDIES IN SUSTAINABILITY: THE REGENERATIVE REPOSITIONING OF NEW OR EXISTING RICE CAMPUS BUILDING
Short Title: CASE STUDIES IN SUSTAINABILITY
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will explore application of high performance, sustainable design to specific Rice University campus and facility targets. In partnership with Rice University leadership, the team effort will develop "regenerative redesign" approaches based on investigation of other campuses' case study. Space is limited and registration does not guarantee a space in this course. The final course roster is formulated on the first day of class by the individual instructor. Cross-list: ARCH 622. Graduate/Undergraduate Equivalency: ENST 322. Mutually Exclusive: Credit cannot be earned for ENST 622 and ENST 322.

ENST 646 - ADVANCED TOPICS IN BIOMEDICAL ANTHROPOLOGY
Short Title: ADV BIOMEDICAL ANTHROPOLOGY
Department: Environmental Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar on contemporary research on the biomedical aspects of human health and disease. Includes topics from medical ecology and epidemiology. Cross-list: ANTH 646. Recommended Prerequisite(s): ANTH 381 or ANTH 581.

Executive Management (EMBA)
EMBA 911 - EXECUTIVE SEMINAR I
Short Title: EXECUTIVE SEMINAR I
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.

EMBA 912 - EXECUTIVE SEMINAR II
Short Title: EXECUTIVE SEMINAR II
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

EMBA 913 - EXECUTIVE SEMINAR III
Short Title: EXECUTIVE SEMINAR III
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.

EMBA 914 - EXECUTIVE SEMINAR IV
Short Title: EXECUTIVE SEMINAR IV
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.

EMBA 920 - MANAGING THE GLOBAL FIRM: MICRO FOUNDATIONS
Short Title: MNG GLOBAL FIRM: FOUNDATIONS
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.

EMBA 921 - GLOBAL MARKETS AND INSTITUTIONS
Short Title: GLOBAL MARKETS & INSTITUTIONS
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.

EMBA 922 - MANAGING THE GLOBAL FIRM: STRATEGY
Short Title: MANAGING GLOBAL FIRM: STRATEGY
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.

EMBA 991 - EXECUTIVE FORUM I: STRATEGY AND LEADERSHIP FOUNDATIONS
Short Title: EXEC FORUM I: STRAT & LEADERSHIP
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
FILM 114/FSEM 141/RELI 114.

list: RELI 215. Mutually Exclusive: Credit cannot be earned for FILM 215

medieval textual and folkloric traditions behind such portrayals. Cross-

through to contemporary Hollywood. Emphasis will be placed on the

spirits, numerology and the paranormal, as portrayed in classic film and

from Jewish mysticism. We will examine themes such as monsters,

FILM 215 - MYSTIC CINEMA: KABBALAH IN FILM

Short Title: MYSTIC CINEMA

Department: Visual and Dramatic Arts

Grade Mode: Standard Letter

Course Type: Seminar

Distribution Group: Distribution Group I

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Lower-Level

Description: This course explores uses by the film industry of ideas drawn

from Jewish mysticism. We will examine themes such as monsters,

spirits, numerology and the paranormal, as portrayed in classic film and

through to contemporary Hollywood. Emphasis will be placed on the

medieval textual and folkloric traditions behind such portrayals. Cross-

list: RELI 215. Mutually Exclusive: Credit cannot be earned for FILM 215

and FILM 114/FSEM 141/RELI 114.

FILM 218 - HISTORY THROUGH FILM IN EAST AND NORTHEAST ASIA

Short Title: EAST/NORTHEAST ASIA FILM HIST

Department: Visual and Dramatic Arts

Grade Mode: Standard Letter

Course Type: Lecture

Distribution Group: Distribution Group I

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Lower-Level

Description: Can we learn history by analyzing movies? Using
documentary and feature films from Asian film culture's beginnings,
we view 19th-20th century Chinese, Japanese, and Korean history.
Collective in-class film viewing, discussion and reading required. Cross-
list: ASIA 218, HIST 218.

FILM 225 - INTRODUCTION TO FILMMAKING AND EDITING

Short Title: INTRO TO FILMMAKING & EDITING

Department: Visual and Dramatic Arts

Grade Mode: Standard Letter

Course Type: Lecture/Laboratory

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Lower-Level

Description: This course introduces the student to filmmaking in general
through specific techniques of digital video production. The emphasis in
this class will be the medium as a means of effective storytelling through
the craft of filmmaking. All aspects of production will be discussed,
including preproduction and postproduction. Core topics will include
the basic principles and operation of digital video cameras, lighting
instruments, and audio recording gear; concepts and practical use of
nonlinear digital editing gear, planning and scripting using applications of
various filmmaking techniques; and delivery of a finished project.

FILM 250 - CONTEMPORARY EUROPEAN CINEMA

Short Title: CONTEMPORARY EUROPEAN CINEMA

Department: Visual and Dramatic Arts

Grade Mode: Standard Letter

Course Type: Seminar

Credit Hours: 4

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Lower-Level

Description: This class examines trends in European cinema of the
last fifteen years. Particular attention will be given to the issues of
history, memory and national identity in Europe’s shifting geopolitical
climate, and to the formal and aesthetic concerns with which filmmakers
responded to these shifts. The discussion will include films by Michael

FILM 273 - FILM CRITICISM

Short Title: FILM CRITICISM

Department: Visual and Dramatic Arts

Grade Mode: Standard Letter

Course Type: Seminar

Credit Hours: 4

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Lower-Level

Description: This course focuses on the concepts and techniques
necessary to write film criticism and interpretation. Each two-week
section will concentrate on a film, sample critical essays on that film
and writing about the film to develop their skills, analytic techniques,
and strategies for effective critical contribution. This course will draw on
films in Hollywood, avant-garde, contemporary and international cinema.
Cross-list: ENGL 275, HART 285.
FILM 275 - COMICS AND SEQUENTIAL ART
Short Title: COMICS AND SEQUENTIAL ART
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An introduction to the art of combining words and pictures: diverse applications such as storyboarding for stage and screen, comic books and graphic novels, and serial or multiples in a variety of media all fall under the umbrella of Sequential Art. Through instruction, demos, readings and practice, students will learn the history and implementation of linear visual narratives utilizing the Comics Art Teaching and Study Workshop as a resource. Students in this class will also participate in the construction and establishment of a permanent research center for the study of Comic Book Art within the Department of Visual and Dramatic Arts. This course has limited enrollment. The roster is formatted on the first day class by the instructor, who may allow additional registration for majors and underclassmen. It is necessary to attend the first class meeting to confirm your place on the class roster. Cross-list: ARTS 230.

FILM 280 - HISTORY & AESTHETICS OF FILM
Short Title: HISTORY & AESTHETICS OF FILM
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to the art and aesthetics of film as an artifact produced within certain social contexts. Includes style, narrative, mise-en-scene, editing, sound, and ideology in classical Hollywood cinema, as well as in independent, alternative, nonfiction, and Third World cinemas. Cross-list: ARTS 280, HART 280.

FILM 281 - THE BEGINNINGS OF CINEMA
Short Title: THE BEGINNINGS OF CINEMA
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This class studies the emergence of cinema in the context of cultural developments at the turn of the 20th century. Early films will be examined together with such contemporaneous issues as technologies of vision, modern mass culture, urban expansion and consumerism. Cross-list: HART 281.

FILM 284 - NONFICTION FILM
Short Title: NONFICTION FILM
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to the history and aesthetics of nonfiction film as both a social artifact and as a work of art. Includes discussions of actualities, the city film, the social documentary, surrealist cinema, propaganda, ethnography, the essay film, and the contemporary nonfiction film from around the world. Cross-list: HART 284.

FILM 285 - AUTEUR FILM: CASE STUDIES OF THREE AUTEURS
Short Title: AUTEUR FILM
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will explore the tradition of auteur filmmaking, with an emphasis on how this particular artistic mode situates itself within the evolving system of Hollywood institutional film. The auteur, in contrast to other filmmakers, exhibits unparalleled control over the production and post-production processes and is uniquely identifiable through the notable conventions of aesthetics, style, theme, content, atmosphere, etc. FILM 485/HART 481 (4 Credit Hours) will require completion of additional coursework for the additional credit than the FILM 285/HART 283 (3 Credit Hours). Credit may not be received for more than one of FILM 285 or FILM 485 or Hart 283 or HART 481. Cross-list: HART 283. Equivalency: FILM 485. Mutually Exclusive: Credit cannot be earned for FILM 285 and FILM 485.

FILM 287 - INTRODUCTION TO EXPERIMENTAL VIDEO AND INSTALLATION ART
Short Title: INTRO TO VIDEO AND INSTALL ART
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Learn to create unique experiences by sculpting time and space. With an emphasis on production and practice, this course introduces students to installation art and non-traditional, experimental uses of video. Students will learn the basic tools and techniques of digital video production using Adobe Premiere and After Effects.
Course URL: www.arts.rice.edu/
FILM 308 - IMPROVISATION FOR STAGE AND SCREEN
Short Title: IMPROV FOR STAGE AND SCREEN
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This is a course in the practical training of comedic, long-form, improvisation. Students will learn how to craft scenes spontaneously using tools like character dynamic, status, comedic pattern, beat structuring, and agreement. Classic forms of scenic improv will be taught and the course will also examine the role of improvisation in comedy films, video, and the creation of sketch comedy. Students will get to practice their skills by crafting videos in the class’ culmination run of improv shows. Cross-list: THEA 308.

FILM 321 - LIFE IN REAL-TIME
Short Title: LIFE IN REAL-TIME
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores digital video as a contemporary art medium rich with possibilities of cultural critique. We will examine how artists deploy the speed of time-based media to underscore the urgency of specific environmental issues and offer observations on serious issues through the use of metaphor, irony, and humor. We will compare and contrast these ways through reading, films, and presentations.

FILM 323 - EXPERIMENTAL SOUND AND VIDEO
Short Title: EXPERIMENTAL SOUND AND VIDEO
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The purpose of this course is to create experimental, collaborative digital media artworks. Students will learn the basic tools and techniques of digital video and audio production. Students will engage in experiment with sound and moving images by working to complete a number of short projects. Pre-registration of this course is limited to 8 students. 4 additional places will be reserved for VADA and Shepherd School of Music majors. Cross-list: MUSI 316. Repeatable for Credit.

FILM 327 - DOCUMENTARY PRODUCTION
Short Title: DOCUMENTARY PRODUCTION
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of the expressive possibilities of documentary production using digital systems. Space in studio classes is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor. Cross-list: ANTH 324, ARTS 327.

FILM 328 - FILMMAKING I
Short Title: FILMMAKING I
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Dramatic film production class that requires the making of one digital video and one 16mm film. Space in studio classes is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor. Cross-list: ARTS 328.

FILM 329 - FILM FORM
Short Title: FILM FORM
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Viewing, analysis, and discussion of modern and classic films. Space in studio classes is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor. Cross-list: ARTS 329.

FILM 332 - CRITICAL STUDIES OF MULTIMEDIA ARTS
Short Title: CRITICAL STU OF MULTIMEDIA ART
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Critical Studies for Multimedia Arts is a course designed to familiarize art and non-art majors with key theories and core concepts in modern and contemporary multimedia art. Students will examine a broad spectrum of specific topics in contemporary artwork related conceptually to: space/time; bodies and performance; “sculptural” studies in an expanded field and video & film space. This is a multi-dimensional class consisting of guest lectures, artist-speakers, and field trips to local museums, galleries and alternative art spaces. This course will include discussions on readings, writings and special projects. This promises to be a fun and thought-provoking class and is designed to enhance studio practice and encourage interest in the visual arts. Cross-list: ARTS 332, FOTO 332, THEA 332.

FILM 334 - FILM LITERATURE
Short Title: FILMING LITERATURE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course engages a wide range of filmic adaptations of literary texts, with close attention to the specificity of the medium, genre and sub-genre, narrative and point of view.
FILM 336 - CINEMA AND THE CITY
Short Title: CINEMA AND THE CITY
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This class explores representations of the city in 20th and 21st century world cinema. Central concerns will include the city as cinematic protagonist, parallels between urban and cinematic space and the intertwined histories of both film and urban design over the last century. Cross-list: ASIA 355, HART 336.

FILM 339 - A REVOLUTION FROM WITHIN: TRENDS IN CONTEMPORARY CUBAN CULTURE
Short Title: TRENDS IN CUBAN CULTURE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This research seminar will explore contemporary trends in Cuban culture through literary texts, films, music and works of art. We will examine the ways in which politics and the practices of artistic representation intersect in post-revolutionary Cuba. A research trip to Cuba has been organized as part of this seminar. Course taught in Spanish. Instructor Permission Required. Cross-list: HART 304, SPPO 375.

FILM 351 - HOLOCAUST REPRESENTATION IN LITERATURE, ART, AND FILM
Short Title: HOLOCAUST REPRESENTATION
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will address the representation of the Holocaust in literature, art, and film. Is the Holocaust representable? What literary and artistic techniques and devices have been employed to represent the unrepresentable? Through Holocaust narrative, poetry, fiction, art, memorials, documentary and narrative film, we will explore these questions. Cross-list: JWST 351. Mutually Exclusive: Credit cannot be earned for FILM 351 and FILM 349/RELI 349.

FILM 359 - CINEMAS OF URBAN ALIENATION
Short Title: CINEMAS OF URBAN ALIENATION
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar examines cinematic engagements with urban spaces and experiences around the world spanning the last two centuries. Particular attention will be paid to issues of migration, marginality, colonialism, war and post-war, nostalgia and memory, race and gender. Cities of focus include Berlin, Istanbul, Moscow, Algiers, Beirut and Paris. Our weekly discussions of individual films will be grounded in critical writings of the cities’ histories and theories of space and film. Cross-list: ARCH 359, HART 359.

FILM 361 - WHAT IS CINEMA? CLASSIC READINGS OF CLASSIC FILMS
Short Title: WHAT IS CINEMA?
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Using a variety of readings now considered classics as our guide, this class will look closely at a broad range of films and film movements discussed by critics and theorists such as Rudolf Arnheim, Jean Epstein, Sergei Fisenstein, Walter Benjamin and Andre Bazin. Cross-list: ARCH 359, HART 361.

FILM 373 - SURVEY OF AMERICAN FILM AND CULTURE
Short Title: SURVEY OF AMER FILM & CULTURE
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A course that explores the history of cinema in the U.S. from its origins to the present day. Cross-list: ENGL 373, HART 380.
Course URL: www.english.rice.edu

FILM 378 - PLACE AND MEMORY IN MIDDLE EASTERN AND EUROPEAN CINEMA
Short Title: MEMORY AND PLACE IN CINEMA
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Focuses on cinematic explorations of and preoccupations with the notion of place. Screenings include iconic and lesser - known films from Europe and the Middle East that offer diverse lenses and contexts (love, family, landscapes, borders, trauma, exile) through which we will examine questions of real and imagined place and the politics of memory. Cross-list: ANTH 378, HART 391.
FILM 380 - RIPPED, RECYCLED AND REMADE CINEMA
Short Title: RIPPED CINEMA
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This hybrid seminar/production class investigates the practice of cinematic quoting in media works. We will look at how the appropriation process critiques political and cultural concerns between the source and reworked material, new conversations it introduces, and these works in relation to fair-using, hijacking, open sourcing, and stealing.

FILM 381 - MEDICAL MEDIA ARTS LAB
Short Title: MEDICAL MEDIA ARTS LAB
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group I
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students will collaborate with health professionals to create solutions to real-world medical communication, visualization and design problems. Working individually and in teams, students will apply critical thinking and theory to hands-on design. Projects may include production of short videos, infographics, app development, 3-D virtual models, creative writing, and other media arts. Cross-list: ENGL 386.
Course URL: www.english.rice.edu

FILM 382 - MODALITIES OF CINEMA
Short Title: MODALITIES OF CINEMA
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: In this course we will survey the range of organizing principles of cinema- the differing and combative ways cinema arranges its images and sounds. We will look at classicism, modernism, postmodernism and many other modes. The films will range from early silent pictures, to experimental shorts, to commercial blockbusters. Cross-list: HART 382.

FILM 383 - GLOBAL CINEMA
Short Title: GLOBAL CINEMA
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course introduces students to cinema as a global enterprise. It explores the relationship between nations, identities, races, concepts, and genres. It inquires into the question of globalization as it relates to the motion picture audience, corporations, and the commerce of ideas. Cross-list: HART 383.

FILM 384 - AMERICAN INDEPENDENT CINEMA
Short Title: AMERICAN INDEPENDENT CINEMA
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Explores the history of filmmaking outside of Hollywood in the United States throughout the 20th century, emphasizing the period from 1959 to the present. Special attention to the contributions of marginalized communities and the art world, innovative film styles, and the interdependence of alternative and mainstream media cultures. Cross-list: ENGL 384.
Course URL: www.english.rice.edu

FILM 385 - FILM STUDIES
Short Title: FILM STUDIES
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A variable topics course that addresses interdisciplinary approaches to studying the relationships between film, photography, television, and digital technologies such as the internet and computer-generated imaging. Cross-list: ENGL 388. Repeatable for Credit.
Course URL: www.english.rice.edu

FILM 386 - MEDICAL MEDIA ARTS LAB
Short Title: MEDIA STUDIES
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A variable topics course that addresses interdisciplinary approaches to studying the relationships between film, photography, television, and digital technologies such as the internet and computer-generated imaging. Cross-list: ENGL 388. Repeatable for Credit.
Course URL: www.english.rice.edu

FILM 387 - POST WAR EUROPEAN CINEMA
Short Title: POST WAR EUROPEAN CINEMA
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This class surveys major developments in European cinema from the late 1940s to the late 1960s. Our study will include such movements as Italian Neorealism, German Rubble Films, French New Wave, and Soviet cinema in the Thaw. Particular attention will be paid to such issues as cinema and post-war reconstruction, memory and nation, and body and space. Cross-list: HART 388.
FILM 395 - FILM INTERNSHIP  
Short Title: FILM INTERNSHIP  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Internship/Practicum  
Credit Hours: 1-6  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course is a field-based, supervised, professional learning experience designed to enhance classroom learning. Students will be responsible for identifying and securing internship positions and must obtain permission from the department chairman and have a department faculty sponsor. All interns are required to keep an internship journal recording duties and activities; the journal will be used as the basis of a five-page paper summarizing the internship experience. Documentation of the work produced during the internship is required portfolio, CD, DVD, etc. Instructor Permission Required. Repeatable for Credit.

FILM 396 - SPECIAL PROBLEMS IN FILM & VIDEOTAPE MAKING  
Short Title: SPEC. PROB: FILM & VIDEO  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Independent Study  
Credit Hours: 1-6  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Study of problems in film and film production. Topics may vary. Please consult with the department for additional information. May be used in awarding transfer credit. Prerequisite: permission of instructor. Instructor Permission Required. Repeatable for Credit.

FILM 420 - FILM STUDIO  
Short Title: FILM STUDIO  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): FILM 327 and FILM 328  
Description: A class for advanced filmmaking students working independently, but meeting as a group to participate in discussions about a variety of filmmaking topics. Instructor Permission Required. Repeatable for Credit.

FILM 427 - ADVANCED FILMMAKING  
Short Title: ADVANCED FILMMAKING  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Lecture/Laboratory  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): FILM 225 and (FILM 327 or ARTS 327) and (FILM 328 or ARTS 328)  
Description: Advanced documentary production using digital camera and editing systems. Continuation of FILM 327. Space in studio classes is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor. Cross-list: ARTS 427.

FILM 428 - FILMMAKING II  
Short Title: FILMMAKING II  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: 16mm film production course utilizing handmade cinema techniques. Space in class is limited. Registration does not guarantee a place in class. The class roster is formulated the first day of class by the individual instructor. Cross-list: ARTS 428.

FILM 430 - ADVANCED METHODS IN SOUND, CINEMATOGRAPHY, AND EDITING  
Short Title: ADVANCED METHODS IN SOUND, CINEMATOGRAPHY, AND EDITING  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Studio  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): FILM 327  
Description: This class will prepare students for more rigorous work in professional media. Building on the basic understanding of sound, image, and editing, students will focus on the controlled and strategic use of techniques and equipment. We will explore visual representation theory, psychoacoustics and narrative sound design, and the use of editing as a storytelling mechanism. Students will gain valuable and realistic crew experience and learn to anticipate and understand many aspects of film production.

FILM 432 - FILM GENRE: THE WESTERN  
Short Title: FILM GENRE: THE WESTERN  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Seminar  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): FILM 327  
Description: Survey of the essential American film experience spanning all the years of U.S. cinema, with emphasis on the western and its mythic function in society. Space in studio classes is limited. Registration does not guarantee a place in class. The class roster is formulated on the first day of class by the individual instructor. Cross-list: ARTS 432.

FILM 433 - FILM GENRE: SCIENCE FICTION CINEMA  
Short Title: FILM GENRE: SCIENCE FICTION CINEMA  
Department: Visual and Dramatic Arts  
Grade Mode: Standard Letter  
Course Type: Seminar  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: In this course we will trace the history and elements of the popular film genre of science fiction, from early silents to recent configurations. We will look at the links between the genre cinema itself. Topics for the Film Genre courses will vary and will include the uncanny, transhumanism, utopia and dystopia, and technology.
FILM 435 - SEMINAR ON FILM AUTHORSHIP: THE NEW HOLLYWOOD
Short Title: SEMINAR ON FILM AUTHORSHIP
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level

FILM 444 - HANDMADE FILM
Short Title: HANDMADE FILM
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Studio
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: 16mm film production course utilizing handmade cinema techniques, 4 required 16mm films made using surface treatments, shooting with a 16mm film camera, hand developing, classic animation, crating soundtracks and digital editing. Space in class is limited. Registration does not guarantee a place in class. Cross-list: ARTS 444.

FILM 455 - VIDEO AND EXPANDED CINEMA
Short Title: VIDEO AND EXPANDED CINEMA
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar explores the emergence of video and "expanded cinema" as a primary field of artistic practice over the course of the 1960s and 1970s. We will examine seminal works by artists including Andy Warhol, Dan Graham, and Robert Whitman as well as the shifting aesthetic, political, and media landscapes in which this work emerged. Cross-list: ARTS 455.

FILM 485 - AUTEUR FILM: CASE STUDIES OF THREE AUTEURS
Short Title: AUTEUR FILM
Department: Visual and Dramatic Arts
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will explore the tradition of auteur filmmaking, with an emphasis on how this particular artistic mode situates itself within the evolving system of Hollywood institutional film. The auteur, in contrast to other filmmakers, exhibits unparalleled control over the production and post-production processes and is uniquely identifiable through the notable conventions of aesthetics, style, theme, content, atmosphere, etc. FILM 485/HART 481 (4 Credit Hours) will require completion of additional coursework for the additional credit than the FILM 285/HART 283 (3 Credit Hours). Credit may not be received for more than one of FILM 285 or FILM 485 or Hart 283 or HART 481. Cross-list: HART 481. Equivalency: FILM 285. Mutually Exclusive: Credit cannot be earned for FILM 485 and FILM 285.

First-Yr Writing Intensive Sem (FWIS)

FWIS 100 - FUNDAMENTALS OF ACADEMIC COMMUNICATION
Short Title: FUNDAMENTALS OF ACADEMIC COMM
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Designed to prepare students who need more time and practice in reading and writing to meet the more advanced communication demands of an FWIS, this course will provide an introduction to the expectations of academic readers as well as practice with the rhetorical and linguistic structures common to academic writing. Students will also review grammatical points relevant to the course material and assignments and learn to self-edit their own work. This course does not fulfill the Composition Requirement.
Course URL: pwc.rice.edu/
FWIS 101 - THE BIBLE IN POPULAR CULTURE
Short Title: THE BIBLE IN POPULAR CULTURE
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: We will introduce various ways in which the Bible plays a significant role in contemporary popular culture. By analyzing biblical references found in music, film, art, and the media, students will discover that even in today's seemingly secular culture, the Bible continues to influence our artistic, social, and political landscapes.
Course URL: pwc.rice.edu/

FWIS 102 - READING AND WRITING CHILDREN'S LITERATURE
Short Title: CHILDREN'S LITERATURE
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In this course we will read and write about children's literature. Students will begin with the oral tradition of fairy tales and proceed to picture books and junior novels. Students will analyze children's literature as a genre and will create and write their own story books.
Course URL: pwc.rice.edu/

FWIS 103 - HISTORICAL DEBATES OVER THE CONFEDERATE FLAG
Short Title: DEBATES OVER CONFEDERATE FLAG
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The Confederate Flag is one of America's most contentious symbols. This course will study points in time when the flag's meaning has come up for debate. We will read and discuss primary and secondary readings covering certain points in history when the flag became a flashpoint.
Course URL: pwc.rice.edu/

FWIS 104 - GLOBAL TEXTS AS INTERCULTURAL COMMUNICATION
Short Title: TEXTS AS INTERCULTURAL COMM
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: When aesthetic texts cross cultural boundaries, they bring with them complex histories, codes, and experiences from their place of origin. This course introduces fiction, non-fiction, and multimedia works from a wide array of global perspectives, as students analyze how authors present the foreign and the unfamiliar.
Course URL: pwc.rice.edu/

FWIS 105 - GREEK MYTH IN WORDS: HESIOD AND THE HOMERIC HYMNS
Short Title: GREEK MYTH IN WORDS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Presents texts fundamental to understanding Greek myth through the regular practice of reading, writing, and oral communication. Emphasizing textual interpretation and writing as process and practice, this course clarifies the purpose and conventions of the academic argumentative essay. Frequent brief writing assignments. Peer review plays an integral role. No exams.
Course URL: pwc.rice.edu/

FWIS 106 - MARRIAGE, INC.
Short Title: MARRIAGE, INC.
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course looks at literary and cultural representations of marriage in the Anglo-American tradition: from Renaissance marriage bed poetry, to marriage plot novels and films, to present-day debates about the status of marriage as an institution. We will also explore cross-cultural and historical conceptions of marriage. This course is eligible for credit toward the major in English.
Course URL: pwc.rice.edu/

FWIS 107 - IN THE MATRIX: ON HUMAN BONDAGE AND LIBERATION
Short Title: IN THE MATRIX
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Using the film "The Matrix" as the point of reference, this course presents celebrated explorations of servitude and emancipation - from religious mysticism to Marxism and artistic modernism. Texts by Lao Tzu, Farid ud-Din Attar, Plato, Freud, Marx, Baudelaire, J.S. Mill, Proust, de Beauvoir, Malcolm X, Marcuse, Baudrillard.
Course URL: pwc.rice.edu/

FWIS 108 - GRAPHIC NOVELS AND THE ART OF COMMUNICATION
Short Title: GRAPHIC NOVELS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: From their inception, graphic novels have always showed a deep connection to the historical events, anxieties, and struggles that surrounded their creation. In this course, we will examine graphic novels from a variety of perspectives, including the historical, the political, the social, and the literary.
Course URL: pwc.rice.edu/
FWIS 109 - CONTEMPORARY ART AND ENVIRONMENT
Short Title: ART AND ENVIRONMENT
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course delves into questions of environment, ecology, and sustainability through the lens of contemporary art. From earthworks, to performance, to land art, activist art, and community-based practices, participants engage critically and creatively with contemporary practices. This course is eligible for credit toward the Environmental Studies minor.
Course URL: pwc.rice.edu/

Short Title: BIRTH OF GODS/JUSTICE ORIGINS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Participants draft short papers weekly. Writing and class discussion are based on Hesiod's Theogony (creation myth) and Works and Days (early Greek wisdom literature). Each participant also leads one class discussion of secondary literature. No exams or quizzes. Final paper is a revised and extended version of a previous draft. This course is eligible for credit toward the major in Classical Studies.
Course URL: pwc.rice.edu/

FWIS 111 - THE FIRST 200 YEARS OF CHRISTIANITY
Short Title: FIRST 200 YRS OF CHRISTIANITY
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines the growth of Christianity from Jesus to the end of the second century. The class will consider the theological, ecclesiological, and social debates of the competing Catholic and Non-Catholic churches and how these different movements connected themselves to Jesus and the disciples.
Course URL: pwc.rice.edu/

FWIS 112 - MODERN FAMILIES
Short Title: MODERN FAMILIES
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: What does "family" mean today when debates over gay marriage, blended families, and America's declining birth rates seem to ring the death knell for the nuclear family? This course will examine the myth of the nuclear family by looking at representations of the family in novels, films, television shows, etc.
Course URL: pwc.rice.edu/

FWIS 113 - RACE, PUBLIC POLICY, AND RACIAL CHANGE IN AMERICA
Short Title: RACE, POLICY, & RACIAL CHANGE
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines conceptual and historical features of race and representation in the U.S., how race has shaped public policy development in the 20th century, and how American political institutions have affected outcomes for different racial groups. It also examines the causes and consequences of political mobilization for racial minorities.
Course URL: pwc.rice.edu/

FWIS 114 - LITERARY PROVOCATIONS
Short Title: LITERARY PROVOCATIONS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In section 001 of this course, we will examine representative works of drama, poetry and fiction, ranging from ancient Greece to modern times. Students will write - four essays - about some of these important works. They will also keep journals in which they will write for ten minutes about every reading assignment. Section 002 of this course is designed to introduce first-year students from a wide variety of academic backgrounds to the major literary genres of fiction, poetry, and drama. Students will learn and practice the skills of close reading, interpretation, and literary analysis through discussion and critical writing about literature and language. This course is eligible for credit toward the major in English.
Course URL: pwc.rice.edu/

FWIS 115 - WELLBEING
Short Title: WELLBEING
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: How to live a good life? This course critically evaluates different conceptions of wellbeing proposed by philosophers and encourages students to form their own conception of wellbeing with persuasive arguments.
Course URL: pwc.rice.edu/
FWIS 116 - AMERICAN JOURNEYS
Short Title: AMERICAN JOURNEYS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The narratives of travelers in the US are a window into history. Drawing on authors like Crevecoeur, Tocqueville, Trollope, and Kerouac, the class will discuss and write about themes such as Indian life and territorial expansion, democracy, slavery, civil war, western settlement, and 20th-cent. social movements. This course is eligible for credit toward the major in History.
Course URL: pwc.rice.edu/

FWIS 117 - ART IN PLACE AND PLACES FOR ART
Short Title: ART IN PLACE & PLACES FOR ART
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Students will look closely at a curated selection of influential, Houston-based works of art, installations, and architecture from the past century to understand the context and ideas behind the emergence of modern and contemporary art and design. They will observe, analyze, and describe these primary sources using both words and images.
Course URL: pwc.rice.edu/

FWIS 118 - MUSIC, MYTH AND MADNESS: STUDIES IN MUSICAL BIOGRAPHY
Short Title: MUSIC, MYTH AND MADNESS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A study of biographical narratives about musicians, including Bach, Bob Dylan, Thelonius Monk, Mozart, and Schumann. Considers the nature of creativity and inspiration. Examines the extent to which biography borrows from mythology and literary fiction. Material includes memoirs, letters, novels and films.
Course URL: pwc.rice.edu/

FWIS 119 - BEYOND THE BURQINI: MUSLIM WOMEN, FEMINISM, AND GLOBAL POLITICS
Short Title: MUSLIM WOMEN & GLOBAL POLITICS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Traces history of Western interest in Muslim women, paying particular attention to how the figure of the Muslim women has been used by western feminist to make their own case for gender equality. Readings include writings by different English and American feminists and by Muslim authors from around the world.
Course URL: pwc.rice.edu

FWIS 120 - FICTION AND EMPATHY
Short Title: FICTION AND EMPATHY
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This writing-intensive course explores the possible link between reading literary fiction and empathizing with others. We’ll read short stories, novel excerpts, and literary criticism in an effort to scrutinize and more deeply understand the specific elements of fiction that might provoke empathy.
Course URL: pwc.rice.edu/

FWIS 121 - TIME TRAVEL NARRATIVES: FICTION, FILM, SCIENCE
Short Title: TIME TRAVEL NARRATIVES
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: From an aesthetic perspective, time travel has existed as long as there have been stories. Narrative introduces alien temporalities, transporting listeners and readers into different temporal landscapes. This writing-intensive course investigates the historical, aesthetic, and scientific connections between the authorial and scientific co-creation of time travel.
Course URL: pwc.rice.edu/

FWIS 122 - LEADERS AND LEADERSHIP: WHAT WE KNOW, WHAT WE BELIEVE
Short Title: LEADERS AND LEADERSHIP
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: For over a hundred years social scientists have studied leaders and leadership. The popular press and media pundits continue to expound on the topic with conflicting views. Students will explore what they believe and what science informs us about leaders and leadership and share their analyses through discussions, writing, and oral presentations.
Course URL: pwc.rice.edu/

FWIS 123 - STAR WARS AND THE WRITING OF POPULAR CULTURE
Short Title: STAR WARS & WRITING CULTURE
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will unpack the cultural legacy of the Star Wars films through traditional literary analysis and close reading, by situating the films historically, and by considering the ways that the films reflect attitudes towards a variety of social issues, such as spirituality/religion, philosophy, race, gender, class, nationality, and imperialism.
Course URL: pwc.rice.edu
FWIS 124 - WITNESSING THE HOLOCAUST  
Short Title: WITNESSING THE HOLOCAUST  
Department: First-Year Writing Intensive  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: This course will examine selected testimony given by Holocaust survivors. Their testimony varies according to time and the circumstance in which it was given and also according to the genre (film, memoir, drama) in which it is presented.  
Course URL: pwc.rice.edu/  

FWIS 125 - YOUR ARABIAN NIGHTS  
Short Title: YOUR ARABIAN NIGHTS  
Department: First-Year Writing Intensive  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: The Arabian Nights is one of the best known yet poorly understood literary masterpieces. It has been passed down orally in wiring, in performance and film; in multiple languages, and with different collections of stories. What is your Arabian Nights? We will consider stories of the Nights through both a literary and historical lens, and we will consider stories, films, and works of art that were inspired by the Nights in different cultures.  
Course URL: pwc.rice.edu/  

FWIS 126 - THE NOBEL PRIZE IN LITERATURE  
Short Title: THE NOBEL PRIZE IN LITERATURE  
Department: First-Year Writing Intensive  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: This course will interrogate the five most recent winners of the Nobel Prize in Literature. We will see what patterns we notice in the Swedish Academy's selections while paying attention to both aesthetic merit and the roles that social justice and cultural diversity might play in the awards process.  
Course URL: pwc.rice.edu/  

FWIS 127 - HOW POEMS WORK  
Short Title: HOW POEMS WORK  
Department: First-Year Writing Intensive  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Poems start from the meaning of the words and build up through the lines and sentences--and the tension between them--through the play of the vowels and consonants, and the differences between the images and metaphors. When these relationships are understood, a conversation about what the poem means can begin.  
Course URL: pwc.rice.edu/  

FWIS 128 - PERSONALITY TRAITS AND TYPES OF INTELLIGENCE THROUGH THEIR LINGUISTIC MANIFESTATION  
Short Title: INNER DIMENSIONS  
Department: First-Year Writing Intensive  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Exploring theories on personality traits and types of intelligence, students will learn more about themselves and others. We will discuss how our verbal behavior reflects our personality.  
Course URL: pwc.rice.edu/  

FWIS 129 - CHINGIS KHAN AND THE EMPIRE OF THE MONGOLS  
Short Title: THE EMPIRE OF THE MONGOLS  
Department: First-Year Writing Intensive  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: In the thirteenth century, the Mongols conquered China, Eastern Europe and Middle East. This class explores empire building, warfare, government and stepp culture, through reading the letters and memoirs of Mongols, merchants, travelers and adventurers. The students will work closely with primary sources to develop analytical writing skills.  
Course URL: pwc.rice.edu/  

FWIS 130 - WRITING EVERYDAY LIFE  
Short Title: WRITING EVERYDAY LIFE  
Department: First-Year Writing Intensive  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: This course is dedicated to the poetics of everyday life. It draws from the forms and colors of what surrounds us day-to-day, from landscapes, to bodies and objects. Students develop research and writing skills through creative fieldwork assignments and workshops. This course is eligible for credit toward the major in Anthropology.  
Course URL: pwc.rice.edu/  

FWIS 131 - RUINS, LANDMARKS, AND MONUMENTS  
Short Title: RUINS, LANDMARKS, MONUMENTS  
Department: First-Year Writing Intensive  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: This seminar investigates ruins, landmarks, and monuments across genres and periods from the nineteenth century to the present. It explores how cultures map identity onto physical objects and how these markers of identity endure or shift meaning over time. Through cultural analysis, this seminar cultivates effective written and oral communication.  
Course URL: pwc.rice.edu/
FWIS 132 - WOMEN IN THE CIVIL RIGHTS MOVEMENT
Short Title: WOMEN IN THE CIVIL RIGHTS MVMNT
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will explore women's contributions to the Civil Rights Movement. We'll examine how through formal and informal leadership roles, grassroots organizing, performative arts and theoretical contributions, women negotiated the complex terrain of place, race, gender and class within the Civil Rights Movement and American society.
Course URL: pwc.rice.edu/

FWIS 133 - WOMEN AND THE HOLOCAUST: VICTIMS AND PERPETRATORS
Short Title: WOMEN AND THE HOLOCAUST
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will examine the Third Reich and the Holocaust from the perspective of women as perpetrators and as victims.
Course URL: pwc.rice.edu/

FWIS 134 - COLLECTING ART: PERSPECTIVES OF ARTISTS, PATRONS, AND MUSEUMS
Short Title: ARTISTS, PATRONS, AND MUSEUMS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course explores the interconnected roles of artists, the individuals who buy artwork, and the institutions charged with preserving and displaying it. The history of art collecting and patronage will be discussed as students explore the function of museums, the art market, and public and private collections.
Course URL: pwc.rice.edu/

FWIS 135 - CHILDHOOD ON FILM
Short Title: CHILDHOOD ON FILM
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This seminar examines the filmic representation of childhood across diverse historical periods and places. Of concern will be issues including children's relations to nature, language and sexuality; modern systems of education; children's perception of race; and childhood as a cinematic metaphor. Meetings will be based in discussion of films and critical texts.
Course URL: pwc.rice.edu/

FWIS 136 - THE WORLD ACCORDING TO PIXAR
Short Title: THE WORLD ACCORDING TO PIXAR
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In this course, we will be investigating films from the Pixar studio, which critics have hailed for their strong writing and powerful commentary, through a variety of writing assignments. We will pay attention both to the films' narratives and to their technical elements as we explore the meanings they create.
Course URL: pwc.rice.edu/

FWIS 137 - POP MUSIC AND AMERICAN CULTURE
Short Title: POP MUSIC & AMERICAN CULTURE
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Recent cultural movements encourage a more serious exploration of popular music. This course will participate by taking a critical look at what songs mean, what songs/albums/genres express, what our interest in music expresses, and how writing about music can lead us to great insights.
Course URL: pwc.rice.edu/

FWIS 138 - FROM LEO TOLSTOY TO CORNEL WEST, ART CRITICISM IN CONTEXT
Short Title: ART CRITICISM IN CONTEXT
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: You will develop a rich understanding of art criticism as a genre and learn to write your own concise and insightful analysis of art. The class will think through challenges of visual interpretation through close looking at art in galleries, museums, artist studios, and on Rice campus.
Course URL: pwc.rice.edu/

FWIS 139 - BEYOND POCAHONTAS: NATIVES IN 19TH CENTURY AMERICA
Short Title: NATIVES IN 19TH C. AMERICA
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines the dramatic change and upheaval experienced by American Indian nations during the nineteenth century; the removal of Southeastern tribes to Indian Territory; the American Civil War, in which several Indian nations experienced their own civil wars as a result of their divided loyalties; and American expansion.
Course URL: pwc.rice.edu/
FWIS 140 - WRITING ARCHAEOLOGY: INTERPRETING THE PAST FOR THE ACADEMY AND THE PUBLIC

Short Title: WRITING ARCHAEOLOGY
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course introduces academic and popular forms of archaeological writing and the evidence and arguments they use. It will focus on crucial skills to both analyze the quality of popular presentations of archaeology and explore the challenges that archaeologists face in making the research understandable to a broader audience.

Course URL: pwc.rice.edu/

FWIS 141 - WRITING ABOUT MUSIC

Short Title: WRITING ABOUT MUSIC
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course studies how we write about music and the effects music has as a subject in art and on the page. Situated in the twentieth century, this course will look at poetry and fiction as well as essays, reviews, and historical sketches to build a repertoire of approaches.

Course URL: pwc.rice.edu/

FWIS 142 - CITIZENSHIP, PATRIOTISM, AND GLOBALISM: CITIZENS OF THE POLIS OR THE WORLD?

Short Title: CITIZENSHIP ETHICS & IDENTITY
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will explore central ethical and identity challenges posed by our increasingly globalized world, including citizenship duties, the relationship between citizenship and identity, and the ethical implications for a variety of political issues, including trade agreements, international intervention, duties to the far-away poor, and immigration.

Course URL: pwc.rice.edu/

FWIS 143 - BRAZIL MODERN: ART AND ARCHITECTURE BETWEEN THE NATION AND THE METROPOLE

Short Title: BRAZIL MODERN
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This FWIS course introduces students to the artistic and architectural theories and practices of modernism in Brazil. This interdisciplinary course offers an exploration of the complex political, social and cultural histories that shaped the built environment of modern Brazil. This is a seminar on Brazilian modernism and its discontents.

Course URL: pwc.rice.edu/

FWIS 144 - WRITING ABOUT GREEK DRAMA

Short Title: WRITING ABOUT GREEK DRAMA
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course introduces texts that are integral to ancient Greek culture, and core texts in the Western literary tradition. Students receive frequent regular practice at close reading, writing, and oral communication. The assigned primary texts are Aristotle's Poetics and tragedies by Aeschylus, Sophocles, and Euripides (all read in English translation).

Course URL: pwc.rice.edu/

FWIS 145 - SEX AT RICE: THE GOOD THE BAD AND THE AWKWARD

Short Title: SEXUAL ETHICS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will ask students to think critically about how they have conceptualized sexuality and the ethical norms governing their sexual practices. Readings will include sociological, historical, philosophical, and religious texts. Issues to be covered: The Rice Purity Test, NOD, Theme Parties, Hooking-Up, Pornography, Objectification, Gender, and Same-Sex Relationships.

Course URL: pwc.rice.edu/

FWIS 146 - TO EAT OR NOT TO EAT GMO'S? THAT IS THE QUESTION

Short Title: TO EAT OR NOT TO EAT GMO's?
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: How does genetically-modified (GM) food impact our world? Through written and oral assignments, we will explore the ethical controversies behind genetically-modified organisms (GMOs) and how they impact our health and society. Students will debate relevant case studies on G-EO research and perform a food-related research project.

Course URL: pwc.rice.edu/
FWIS 150 - THE WORLD OF MEDIEVAL MEDICINE
Short Title: THE WORLD OF MEDIEVAL MEDICINE
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: How did medieval Christians understand and treat mental and bodily illness? How did their experiences of pain, sex, childbirth, and death interact with larger concepts of God, nature, and the heavens? What role did angels and demons play? This seminar will explore these issues through close reading of medieval texts. Mutually Exclusive: Credit cannot be earned for FWIS 150 and FSEM 171/MDEM 171/RELI 171.
Course URL: pwc.rice.edu/

FWIS 151 - MODERN CASTAWAYS: ISOLATION, ALIENATION, SURVIVAL
Short Title: MODERN CASTAWAYS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course challenges us to think about isolation, alienation, and survival in a global age. What happens to those left behind, those cast out, and those seemingly misplaced? Topics such as colonialism, immigration, feminist history, and the anthropocene guide our discussion of the moral and political dimensions of "castaways."
Course URL: pwc.rice.edu/

FWIS 152 - NUTRITIONAL SUPPLEMENTS: REAL REMEDIES OR SHADY SCIENCE?
Short Title: THE SCIENCE OF SUPPLEMENTS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This writing-intensive seminar examines evidence for the use of nutritional supplements in promoting health. Topics include the role of vitamins, herbs and food-based supplements in medicine; the biology of illnesses such as cancer and depression; and the molecular mechanisms of supplements in disease prevention and management.
Course URL: pwc.rice.edu/

FWIS 153 - THE LEWIS AND CLARK EXPEDITION
Short Title: THE LEWIS AND CLARK EXPEDITION
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course will explore the reasons for this expedition in 1804-1806, examine the participants' reaction to the plants, animals, geology, and Native Americans they encountered, and ponder how they survived the ordeal of going up the Missouri River and crossing the Rocky Mountains.
Course URL: pwc.rice.edu/

FWIS 154 - THE GOOD, THE BAD AND THE BORDER
Short Title: THE GOOD, THE BAD & THE BORDER
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will explore portrayals of morality in film, literature and music produced in the US-Mexico borderlands. As we examine conflicting and converging moral codes in these cultural texts, students will use writing as a tool for exploring ideas and refining understanding.
Course URL: pwc.rice.edu/
FWIS 155 - FAKES, FORGERIES, AND STOLEN ART
Short Title: FAKES, FORGERIES, & STOLEN ART
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In 1990, two men stole 13 paintings worth an estimated $300 million dollars from the Gardner Museum. The crime remains unsolved, and an estimated 40% of artwork on the market today is either faked or forged. This course will analyze these and other high-profile issues through essays, literature, and film.
Course URL: pwc.rice.edu/

FWIS 156 - EXTREME SPORTS: PUSHING THE LIMITS OF THE HUMAN
Short Title: EXTREME SPORTS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This FWIS explores humanity's fascination with pushing our bodies beyond their limits. We'll specifically explore how Western culture depicts high-risk athletic endeavors – like mountaineering and ultrarunning – and the individuals who perform the, historically and in the present, by examining concepts for articulating limitlessness: transcendence, endurance, freedom, and the sublime.
Course URL: pwc.rice.edu/

FWIS 157 - FOOD AND CULTURE
Short Title: FOOD AND CULTURE
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Food and Culture asks students to investigate the cultural meaning of food practices as an important part of the human experience. This involves questions primarily aimed at archaeological cultures, but we will also consider relevant issues in our society and others in our world today. Through this topic, our primary goal is to identify ways to become better communicators and improve writing skills by building compelling and well-supported arguments appropriate for the social sciences.
Course URL: pwc.rice.edu/

FWIS 158 - PROPAGANDA, DECEPTION, AND FORGERY IN THE ROMAN EMPIRE
Short Title: PROPAGANDA IN THE ROMAN EMPIRE
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines ancient Roman political propaganda as a form of historical "forgery." Drawing connections to modern debates about "fake news," it examines how three of Rome's emperors – Augustus, Septimius Severus, and Constantine – used the literature and art of their reigns to promote biased narratives concerning their rise to power.
Course URL: pwc.rice.edu/

FWIS 159 - THE IMMIGRANT EXPERIENCE IN 20TH AND 21ST CENTURY AMERICAN FICTION
Short Title: IMMIGRANT EXPERIENCE FICTION
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course considers 20th/21st century American literature on the experiences of immigrant populations. Limning this literary history from early narratives of alienation and assimilation to contemporary fiction's negotiations of identity within a global context, we will examine not only how these texts resemble and depart from one another, but how they have shaped the broader literary tradition.
Course URL: pwc.rice.edu/

FWIS 160 - LIFE NARRATIVE
Short Title: LIFE NARRATIVE
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will survey the American legal system, discussing the structure of the courts and role of the judiciary in American politics. Major topics will include criminal and civil law, differentiating the states' and federal court systems, and comparing Texas's legal system to other states' courts.
Course URL: pwc.rice.edu/

FWIS 161 - EXPLORING THE AMERICAN LEGAL SYSTEM
Short Title: THE AMERICAN LEGAL SYSTEM
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Course will survey the American legal system, discussing the structure of the courts and role of the judiciary in American politics. Major topics will include criminal and civil law, differentiating the states' and federal court systems, and comparing Texas's legal system to other states' courts.
Course URL: pwc.rice.edu/
FWIS 162 - CRITICAL THINKING IN DEMOCRACY
Short Title: CRITICAL THINKING IN DEMOCRACY
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Critical thinking runs counter to inherent tendencies toward confirmation bias in decision making. In the political realm, this conflict is often exploited by governmental leaders and media to control specific outcomes. Students in this class will learn to develop their critical thinking and analytical skills in the context of a democratic society.
Course URL: pwc.rice.edu/

FWIS 163 - MEDICAL HUMANITIES: LITERATURE, MEDICINE, AND THE PRACTICE OF EMPATHY
Short Title: MEDICAL HUMANITIES
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course provides an introduction to the medical humanities, focusing particularly on narrative medicine and the role narrative can play in illness and the clinical encounter. Readings will include formative theoretical texts in the field, as well as medical-themed short stories by writers such as Chekhov, Hemingway, and Garcia Marquez.
Course URL: pwc.rice.edu/

FWIS 164 - WAYS OF WALKING IN LITERATURE AND CULTURE
Short Title: WAYS OF WALKING
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course explores the act of walking, in theory and in practice. Through readings, discussions, writing assignments, and group and individual walks, it examines questions about the body and its movements; the construction and navigation of space; the tradition of travel writing; and the relationship between walking and thinking.
Course URL: pwc.rice.edu/

FWIS 165 - SCIENCE FICTION AND WILLIAM SHAKESPEARE
Short Title: SCIENCE FICTION & SHAKESPEARE
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will explore the intersection between William Shakespeare’s works and science fiction. By reading graphic novels and short stories and watching film and television adaptations, this course will examine what this fascination reveals about Shakespeare’s plays and the pursuits of science fiction.
Course URL: pwc.rice.edu/

FWIS 166 - BEYOND THE MELTING POT: U.S. MIGRATION HISTORY
Short Title: U.S. MIGRATION HISTORY
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In this course, students will analyze the experience of different migrant groups in the United States over the past two centuries. The course traces the evolution of immigration policy alongside changing perceptions of citizenship, nationalism, race, and ethnicity.
Course URL: pwc.rice.edu/

FWIS 167 - THE FIVE GOSPELS: HOW WERE THEY WRITTEN?
Short Title: JESUS AND PAUL IN ANTIQUITY
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines the growth of Christianity from its origins as a Jewish group to a religion in the mid-second century that distinguished itself from Judaism. The focus of the course is on the development of Jesus and Paul in Early Christianity as leaders and founders of religious movements. This class will be taught thematically to evaluate Jesus and Paul in their Jewish contexts and roles in the early church. The class will consider both canonical and non-canonical materials, as well as appropriate secondary literature.
Course URL: pwc.rice.edu/

FWIS 168 - CASE STUDIES OF BUILDING DESIGN PROBLEMS
Short Title: BUILDING DESIGN PROBLEMS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: We will analyze buildings that ended up in legal battles. Problems include structural failures, design blunders and near disasters. You will write about what went wrong and why, who saved that day and who should have acted differently. You will learn to write critically and present a convincing argument.
Course URL: pwc.rice.edu/

FWIS 169 - WHAT ARE HUMAN RIGHTS?
Short Title: WHAT ARE HUMAN RIGHTS?
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: We hear and talk about “human rights” frequently, but few of us have an easy time defining ideas so inherently contested and pitted against one another. This class will read, discuss, and write about the history and future of human rights in the United States and elsewhere in the world.
Course URL: pwc.rice.edu/
FWIS 170 - PHILOSOPHY AND SCIENCE FICTION
Short Title: PHILOSOPHY AND SCIENCE FICTION
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Read classic and contemporary philosophy texts alongside those science fiction novels and films that explore the same philosophical themes, such as the nature of consciousness, reality vs. virtual reality, the ethics of cyborg enhancement, and other questions involving what it means to be human in a technologically advanced future.
Course URL: pwc.rice.edu/

FWIS 171 - WORD MAGIC
Short Title: WORD MAGIC
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: People use language to create inner models of the world to represent their experience and guide their behavior. Students will be introduced to a sensitive interdependence of language, thought, emotion, and behavior in personal and social contexts.
Course URL: pwc.rice.edu/

FWIS 172 - HEALTH POLICY DEBATES
Short Title: HEALTH POLICY DEBATES
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will interrogate current U.S. health and healthcare policy debates from a sociological perspective. These debates explore how social conditions and policies structure the patterning of health and illness across the nation.
Course URL: pwc.rice.edu/

FWIS 173 - LEGENDARY AMERICANS
Short Title: LEGENDARY AMERICANS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Exploration of popular myths surrounding larger-than-life figures like Davy Crockett and Harriet Tubman. Specific figures vary. Though scholarly readings and analysis of cultural artifacts like songs and films, we will consider why and how such figures become iconic and explore the relations between history, biography, and memory. This course is eligible for credit toward the major in History. Mutually Exclusive: Credit cannot be earned for FWIS 173 and FSEM 159/HIST 159.
Course URL: pwc.rice.edu/

FWIS 174 - SCIENCE/FICTION AND THE FUTURE OF MEDICINE
Short Title: THE FUTURE OF MEDICINE
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The possibilities we imagine for the future of medicine tell us much about our present culture’s priorities, as well as its pitfalls. Paying close attention to the rhetoric that masks - or does not - the social commentary embedded in contemporary science fiction novels and films, this course places a strong focus on close reading and purposeful writing.
Course URL: pwc.rice.edu/

FWIS 175 - ENTREPRENEURIAL LEADERSHIP
Short Title: ENTREPRENEURIAL LEADERSHIP
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This seminar provides a survey of leadership issues in an entrepreneurial business context, along with an understanding of fundamental business elements and economic concepts of importance to entrepreneurs and their organizations. Through discussions with leaders in the Houston community, group projects, and frequent writing and oral presentation assignments, students will experience and develop an understanding of the interplay between structure, operations, and leadership.
Course URL: pwc.rice.edu/

FWIS 176 - AUTOBIOGRAPHICAL DOCUMENTARY FILM
Short Title: AUTOBIOGRAPHICAL DOCUMENTARY
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In this course, we will explore how the intimate and subjective narratives of autobiographical documentary film creatively interpret broader historical, cultural, and social issues. We will view a variety of genres, including home movies, video diaries, poetic and performance pieces, and reflexive films that offer meta-commentaries on this art form. This FWIS focuses on building confidence in responding to visual media forms.

FWIS 185 - CONTEMPORARY AMERICAN POETRY
Short Title: CONTEMPORARY AMERICAN POETRY
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This class will delve into contemporary American poetry by exploring outstanding poetry books of the previous year. Students will study American poetry in literary and historical contexts, develop the ability to analyze how poems "work," develop the ability to create clear, effective prose, and build framework for exploring other types of poetry.
Course URL: pwc.rice.edu/

FWIS 186 - WRITING THE DRONE
Short Title: WRITING THE DRONE
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will offer an anthropological perspective on unmanned aircraft or drones, introducing students to a disciplinary tradition of studying technical objects and our investments in them. In the process, students will develop the communication skills to be successful in their coursework at Rice.
Course URL: pwc.rice.edu/

FWIS 187 - EXPLORING THE SCIENCE AND HISTORY OF HOUSTON'S BAYOUS
Short Title: SCIENCE/HIST HOUSTON'S BAYOUS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This discussion- and field-based class will explore Houston's watersheds from the perspective of biogeochemistry, working to understand the roles of our bayous in our 21st century community.
Course URL: pwc.rice.edu/

FWIS 188 - INTRODUCTION TO ENGINEERING DESIGN AND COMMUNICATION
Short Title: ENG DESIGN & COMMUNICATION
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Architecture Division, Architecture or Engineering Division. Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Students learn the engineering design process to solve real-world problems by evaluating design requirements and constructing innovative solutions in the OEDK. Several communication assignments will be completed by individuals rather than teams. Fall limited to ENGI and NSCI students; spring open for engineering and architecture students. Mutually Exclusive: Credit cannot be earned for FWIS 188 and ENGI 120.
Course URL: pwc.rice.edu/

FWIS 189 - POST-APOCALYPTIC LITERATURE AND FILM
Short Title: POST-APOCALYPTIC LIT AND FILM
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Our culture is fascinated with its own destruction. From zombies to nuclear war, ecological disasters, aliens, disease and killer machines, Armageddon takes many forms. Structured around ways in which we have imagined the world ending, this course charts the cultural consciousness of apocalypse.

FWIS 190 - YOUTH REBELLION: SIXTIES MUSIC AND THE MAKING OF A COUNTER-CULTURE
Short Title: YOUTH REBELLION
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In fundamental ways the sixties were about youth culture. Popular music, probably more than any other cultural form, served as this culture’s mode of self-expression. Sixties popular music, both US and British, will be at the center of a multi-media course that also makes use of materials in television, visual art, fiction, and film.

FWIS 191 - LITERATURE AND PUBLIC HEALTH
Short Title: LITERATURE AND PUBLIC HEALTH
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: How do realities of public health correspond with popular conceptions of it? How do depictions of public health affect our understanding of it in our contemporary world? This course will explore the concept of public health and its gendered, racial, class, and global connotations through analyses of novels, films, etc.

FWIS 192 - THE ROARING TWENTIES
Short Title: THE ROARING TWENTIES
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The 1920s were about new possibilities, aesthetic experimentation, and frenzied expression. We’ll examine iconic ‘20s literature by Hemingway, Fitzgerald, Woolf, and others, as well as the linchpins of ‘20s culture: jazz, Prohibition, the Harlem Renaissance, and modern art. Highlights include lessons on the Charleston and a Roaring Twenties soiree.
Course URL: pwc.rice.edu

**FWIS 193 - BANNED BOOKS AND OTHER DANGERS**
Short Title: BANNED BOOKS AND OTHER DANGERS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In this class, we will read, discuss, and write about literary works made infamous by their appearance on the American banned books list. Central to our examination of these texts will be the overarching question of the role of censorship in public education, and American culture at large.
Course URL: pwc.rice.edu

**FWIS 194 - EMPIRES**
Short Title: EMPIRES
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Is the United States of America an empire? This course will examine civilizations from Ancient Rome and Han Dynasty China to the superpowers of the twentieth century in order to identify the nature and mechanisms of imperial power. It will investigate imperial literature, architecture art, dress, rituals and technology.
Course URL: pwc.rice.edu

**FWIS 195 - WANDERLUST: TRAVEL AND MODERN CULTURE**
Short Title: WANDERLUST
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In this first-year writing-intensive seminar, students explore the world through the medium of film. Students will be exposed to various writers and filmmakers explore the subject of family. Students will read fiction by Kafka, Baldwin, and Munro, among others, and view films such as Boyhood and Tokyo Story. Writing tasks will include analytical essays and arguments that join scholarly or cultural debates.

**FWIS 196 - GROWING PAINS: COMING OF AGE IN LITERATURE AND CULTURE**
Short Title: GROWING PAINS
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will explore the modern Jewish life around the world through the medium of film. Students will be exposed to diverse Jewish communities and their cinematic representations. The course will consider modern Jewish identity through the lens of various themes including race, gender, religion, nationalism, assimilation and secularization.

**FWIS 197 - UNDERSTANDING HEALTH DISPARITIES: THE SOCIAL DETERMINANTS OF HEALTH AND MORALITY IN THE U.S.**
Short Title: HEALTH DISPARITIES IN THE U.S.
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course explores patterns and explanations of unequal health outcomes in the U.S. across five characteristics: socioeconomic status, race/ethnicity, nativity, gender identity and sexual orientation.
Course URL: pwc.rice.edu

**FWIS 198 - FAMILY IN FICTION AND FILM**
Short Title: FAMILY IN FICTION AND FILM
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This writing-intensive course examines the ways that various writers and filmmakers explore the subject of family. Students will read fiction by Kafka, Baldwin, and Munro, among others, and view films such as Boyhood and Tokyo Story. Writing tasks will include analytical essays and arguments that join scholarly or cultural debates.

**FWIS 199 - JEWS ON FILM: CINEMATIC REPRESENTATIONS OF JEWISH LIFE**
Short Title: JEWS ON FILM
Department: First-Year Writing Intensive
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will explore the modern Jewish life around the world through the medium of film. Students will be exposed to diverse Jewish communities and their cinematic representations. The course will consider modern Jewish identity through the lens of various themes including race, gender, religion, nationalism, assimilation and secularization.

---

**French Studies (FREN)**

**FREN 141 - FIRST YEAR FRENCH I**
Short Title: FIRST YEAR FRENCH I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Development of interactional competence in French (sociolinguistic and sociocultural knowledge) to communicate and interact with speakers of French. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. No prior knowledge of this language is necessary. Placement Test is required. Mutually Exclusive: Credit cannot be earned for FREN 141 and FREN 101/FREN 222.
Course URL: clicfrench.blogs.rice.edu
FREN 142 - FIRST YEAR FRENCH II  
**Short Title:** FIRST YEAR FRENCH II  
**Department:** Cntr Lang & Intercultural Comm  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Prerequisite(s):** FREN 202 or FREN 264 or Placement Test.  
**Description:** Continuation of FREN 141. Development of interactional competence in French (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of French. The course is based on a student-centered, critical-thinking approach to language analysis/ acquisition. Mutually Exclusive: Credit cannot be earned for FREN 142 and FREN 262.  
**Course URL:** clicfrench.blogs.rice.edu  

FREN 222 - AP/OTH CREDIT FRENCH LANGUAGE  
**Short Title:** AP/OTH CREDIT FRENCH LANGUAGE  
**Department:** Cntr Lang & Intercultural Comm  
**Grade Mode:** Standard Letter  
**Course Type:** Transfer  
**Credit Hours:** 3  
**Course Level:** Undergraduate Lower-Level  
**Description:** This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation. Mutually Exclusive: Credit cannot be earned for FREN 222 and FREN 101/FREN 141.  

FREN 263 - SECOND YEAR FRENCH I  
**Short Title:** SECOND YEAR FRENCH I  
**Department:** Cntr Lang & Intercultural Comm  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Prerequisite(s):** FREN 142  
**Description:** Continuation of FREN 142. Development of interactional competence in French (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of French. The course is based on a student-centered, critical-thinking approach to language analysis/ acquisition. Mutually Exclusive: Credit cannot be earned for FREN 263 and FREN 201.  
**Course URL:** clicfrench.blogs.rice.edu  

FREN 264 - SECOND YEAR FRENCH II  
**Short Title:** SECOND YEAR FRENCH II  
**Department:** Cntr Lang & Intercultural Comm  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Lower-Level  
**Prerequisite(s):** FREN 263  
**Description:** Continuation of FREN 263. Development of interactional competence in French (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of French. The course is based on a student-centered, critical-thinking approach to language analysis/ acquisition. Mutually Exclusive: Credit cannot be earned for FREN 264 and FREN 202.  
**Course URL:** clicfrench.blogs.rice.edu  

FREN 301 - ADVANCED GRAMMAR AND ITS LITERARY AND CULTURAL APPLICATIONS  
**Short Title:** ADV GRAM & Lit & CULTURAL APP  
**Department:** Classical and European Studies  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Offered every semester, this course is an integrated study of literary and cultural texts as a springboard for advanced level refinements of grammar. Recommended Prerequisite(s): FREN 202 or 264 or Placement Test.  

FREN 302 - WRITING WORKSHOP  
**Short Title:** WRITING WORKSHOP  
**Department:** Classical and European Studies  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** This course, offered annually and required of all majors, builds naturally on FREN 301. It emphasizes composition and exposition through the practice of such genres as narration, description, portrait, essay, and commentaire compose. Formerly FREN 336. Recommended Prerequisite(s): FREN 202 or FREN 264 or Placement Test. Mutually Exclusive: Credit cannot be earned for FREN 302 and FREN 336.  

FREN 305 - LITERARY AND CULTURAL ANALYSIS: THE ART OF READING  
**Short Title:** LITERARY AND CULTURAL ANALYSIS  
**Department:** Classical and European Studies  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Introduction to the unique critical skills necessary for reading and analysis across the arts and social sciences. Recommended Prerequisite(s): FREN 202 or FREN 264 or Placement Test.
FREN 307 - THE MANY FACETS OF FRENCH CULTURAL IDENTITY
Short Title: FRENCH CULTURAL IDENTITY I
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: With the help of nine French films and selected readings, we will discuss what it means to be French today. Recommended Prerequisite(s): FREN 202 or FREN 264 or Placement Test.

FREN 311 - MAJOR LITERARY WORKS AND ARTIFACTS OF PRE-REVOLUTIONARY FRANCE
Short Title: PRE-REV FRENCH LIT
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of French culture, literature, and artifacts from the Middle Ages until the Revolution. Recommended Prerequisite(s): FREN 202 or FREN 264 or Placement Test.

FREN 312 - MAJOR LITERARY WORKS AND ARTIFACTS OF POST-REVOLUTIONARY FRANCE
Short Title: MAJ LIT WORKS POST-REV FRANCE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of 19th and 20th century poetry, fiction, and cinema through the major literary and artistic movements: romanticism, realism, symbolism, Dada, surrealism, and existentialism. Recommended Prerequisite(s): FREN 202 or FREN 264 or Placement Test.

FREN 313 - MAJOR LITERARY WORKS AND ARTIFACTS OF THE FRANCOPHONE WORLD
Short Title: MAJ LITERARY WORKS & ARTIFACTS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will explore the artistic, historical, and philosophical textures of French cultures outside Europe, focusing especially on Africa North and South of the Sahara, the Caribbean, North America, and on the evolution of the concept of "francophonie" since World War II. Recommended Prerequisite(s): FREN 202 or FREN 264 or Placement Test.

FREN 321 - INTRODUCTION TO FRENCH SOCIETY AND CULTURE
Short Title: INTRO FRENCH SOCIETY & CULTURE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course provides grounding in social, political, cultural, and economic aspects of contemporary France. The course will focus on themes such as youth culture, Europeanization, immigration, and gender debates. Recommended Prerequisite(s): FREN 202 or FREN 264 or Placement Test.

FREN 322 - FROM EXISTENTIALISM TO CYBERPUNK
Short Title: EXISTENTIALISM TO CYBERPUNK
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Films and novels. Investigations of human consciousness, subjectivity and identity -- from Sartre's existentialism of the "absurd", through Robbe-Grillet's "anti-humanism", to the cyberpunk science-fictional stories of "post-humanity", genetic manipulation, environmental collapse and post-religious mysticism, by contemporary figures like Dantec and Houellebecq. Recommended Prerequisite(s): FREN 202 or FREN 264 or Placement Test.

FREN 324 - FROM DECOLONIZATION TO GLOBALIZATION
Short Title: FROM DECOLONI TO GLOBALIZATION
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Taught in English. Novels, and films, from North and West Africa, and the immigrant population in France, from 1960 to 2010. Emphasis on the tensions between narratives of political emancipation, modernity, secularism, and religious fundamentalism and mysticism. Extra reading for graduate students in theories of colonialism, postcolonialism, globalization. Cross-list: POLI 324, RELI 476. Graduate/Undergraduate Equivalency: FREN 524. Recommended Prerequisite(s): Any 200 level course or above in English or French, or HUMA 101 or HUMA 102, or a FWIS course. Mutually Exclusive: Credit cannot be earned for FREN 324 and FREN 524/RELI 604.
FREN 332 - FRENCH PHONETICS
Short Title: FRENCH PHONETICS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Acquisition of French phonetic system through intensive class and laboratory practice. Contrast analysis of the French and English phonetic systems. Minimal use of technical terminology. Recommended Prerequisite(s): FREN 202 or FREN 264 or Placement Test.

FREN 350 - PARIS
Short Title: PARIS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3,4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Overview of the history of Paris as a cultural, intellectual, and economic center through texts, music and films. Students earn 3 credits for the course, or 4 credits if participating in a supplementary 10-day study trip to France at the end of the semester in May. Recommended Prerequisite(s): FREN 202 or FREN 264 or Placement Test.

FREN 351 - PROVINCES OF FRANCE
Short Title: PROVINCES OF FRANCE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3,4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Overview of the amazing diversity in the history, languages, economic bases, traditions, and cultures of the original provinces in order to arrive at a better understanding of France as it exists today. For an additional credit hour, students may participate in a two week on site visit to Anjou, and Poitou. Recommended Prerequisite(s): FREN 202 or FREN 264 or Placement Test.

FREN 355 - MODERN SHORT STORY: TOWARDS AN ETHICS OF FICTION
Short Title: MODERN SHORT STORY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of great modern short fiction with emphasis on reading as an ethical enterprise. Selected critical essays complement works from Melville to Maupassant, Flaubert to Kafka to O’Connor as we talk about alienation and solitude, death and violence and the vicissitudes of family. Does not count toward French major. Cross-list: ENGL 355. Recommended Prerequisite(s): Any 200-level course or above in English or French Studies, or HUMA 101 or 102.

FREN 356 - TRANSLATION AS INTERPRETATION: CLOSE ENCOUNTERS WITH POETS OF THE MODERN AGE
Short Title: TRANSLATION AS INTERPRETATION
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A course dedicated, to reading closely some of the great poets of the modern period - from Hugo to Baudelaire to Prevert - and, to the art of translation as a tool for reflecting on the subtleties of the French language and the special shape of the poetic. Recommended Prerequisite(s): FREN 202 or FREN 264 or Placement Test.

FREN 360 - WOMEN, SEXUALITY, AND THE LITERARY
Short Title: WOMEN, SEXUALITY & LITERARY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction to women writers and to women as objects of representation in fiction and in poetry since the Revolution. Special attention to the body and to sexuality as these impinge both on writer and represented. Cross-list: SWGS 412. Recommended Prerequisite(s): FREN 202 or FREN 264 or Placement Test.

FREN 370 - WOMEN IN TALES OF THE FANTASTIC
Short Title: WOMEN IN TALES OF FANTASTIC
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Taking up that rich 19th-century form we call "fantastic narrative" --and such writers as Gautier, Nobler, Maupassant, and Villiers de l’Isle-Adam -- this course will explore this genre’s anxieties not just about madness, machines, and misbehaving objects but also about women (both dead and alive) and their bodies. Recommended Prerequisite(s): FREN 202 or FREN 264 or Placement Test.

FREN 380 - FLAUBERT AND THE ART OF TRANSLATION: EXPERIMENTS WITH POETS OF THE MODERN AGE
Short Title: WRITING FLAUBERT
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Flaubert was both a romantic and a realist who achieved the acutely modern through legend and myth in prose that was poetic. This will be a course in which he anchors our study of short, innovative prose works of the 19th century, encountered, each one, through the imaginative art of translation.
FREN 401 - TRANSLATION
Short Title: TRANSLATION
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Exploration of the theory and practice of translation. Includes translation of modern texts from and into English. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor

FREN 403 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-5
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Topics may vary. Please consult with the department for additional information. Taught in French. Instructor Permission Required. Repeatable for Credit.

FREN 404 - BEGINNINGS OF THE LANGUAGE AND LITERATURE OF FRANCE
Short Title: THE LANG AND LIT OF FRANCE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course includes and external history of the French language, an examination of hagiographic literature and the chanson de geste in their cultural and artistic contexts, as well as bibliographic component to acquaint the students with library tools available for research emphasizing medieval resources but not excluding those for later periods. Student will acquire a reading knowledge of Old French. Course taught in French. Cross-list: MDEM 404. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor

FREN 407 - INTRODUCTION TO CINEMA IN FRENCH
Short Title: INTRODUCTION TO CINEMA IN FREN
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction To Cinema In French -- In France and the French-speaking world (especially Africa): both the canon of "auteurs" of "high culture" and commercial "mere entertainment." Discussion of this distinction, and introduction to critical and theoretical discourse in film studies. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor

FREN 409 - NOVELS AND FILMS
Short Title: NOVELS AND FILMS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Comparison between French novels from the 16th to the 20th centuries and movies that have been based on them, in some cases more than one movie based on a given novel. The class will read each novel in question and then examine how the director perceived it when making the film. For example, La Reine Margot, Tous les Matins du Monde, Liaisons Dangereuses, Madame Bovary, Cyrano de Bergerac, Hiroshima mon amour. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor

FREN 411 - THE LEGACY OF COURTLY LITERATURE
Short Title: LEGACY OF COURTLY LITERATURE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of the Occitan and Old French poetry that served as the source of the kind of love that came to be called "Amour courtois" in the nineteenth century. Cross-list: MDEM 425. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor

FREN 415 - COURTLY LOVE IN MEDIEVAL FRANCE
Short Title: COURTLY LOVE MEDIEVAL FRANCE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of the Occitan and Old French poetry that served as the source of the kind of love that came to be called "Amour courtois" in the nineteenth century. Cross-list: MDEM 425. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor

FREN 417 - INTRODUCTION TO CINEMA IN FRENCH
Short Title: INTRODUCTION TO CINEMA IN FREN
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Introduction To Cinema In French -- In France and the French-speaking world (especially Africa): both the canon of "auteurs" of "high culture" and commercial "mere entertainment." Discussion of this distinction, and introduction to critical and theoretical discourse in film studies. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor
FREN 416 - LITERATURE AND CULTURE OF THE MIDDLE AGES: KING ARTHUR
Short Title: LIT & CULTURE OF MIDDLE AGES
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examination of the origins of the legend of King Arthur and reasons for its popularity, particularly in literature of the French Middle Ages but also in other medieval literatures of Western Europe. Includes discussion of the legend's influence in diverse areas even in modern times. Cross-list: MDEM 436. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor

FREN 424 - WOMEN IN FRANCE
Short Title: WOMEN IN FRANCE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course studies women in education, the workplace, politics, and in social and cultural institutions in French society. The class explores the history of the French women's movement and analyzes French concepts of gender and feminism in comparison to American models. Cross-list: SWGS 424.

FREN 430 - 17TH CENTURY
Short Title: 17TH CENTURY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Thematic approach to examining the main political, religious, philosophical, and literary discourses of the golden age of absolutism. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor

FREN 450 - READING CLOSELY THE GREAT POETS OF THE 19TH CENTURY
Short Title: READING GREAT POETS 19TH CENT
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of the poetry and prose poetry of the 19th century from the Romantic period to the Symbolist era, through such writers as Desbordes-Valmore, Lamartine, Musset, Vigny, Hugo, Baudelaire, Verlaine, Rimbaud, and Mallarme. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor

FREN 451 - FRANCE - AMERICA: IMAGE AND EXCHANGE
Short Title: FRANCE-AMER: IMAGE & EXCHANGE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This undergraduate course analyzes French and American culture and identity through transatlantic encounters. We study French intellectuals (Tocqueville, Beauvoir, Baudrillard) who traveled to the US, and images of America in French novels, comic strips, films. We also examine American gazes toward the French. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor

FREN 453 - IMMIGRATION AND CITIZENSHIP IN CONTEMPORARY FRANCE
Short Title: IMMIGRATION AND CITIZENSHIP
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines the impact of immigration on contemporary French society and analyzes debates over citizenship, integration, and multiculturalism. Taught in French. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor

FREN 459 - THE BATTLES OF ALGIERS: FROM CHARLES X TO CHARLIE-HEBDO
Short Title: THE BATTLES OF ALGIERS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Historical, literary, and visual materials form the 19th century to the present will illustrate the global perception of a war that left an indelible inscription in contemporary debates on democracy and reform. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor.
FREN 487 - LITERATURE, ART AND COLONIALITY
Short Title: LITERATURE, ART & COLONIALITY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This is the undergraduate senior version of the graduate level seminar FREN/ARCR 578. Both the course's reading list and the length of the research are adjusted to accommodate undergraduate needs. The seminar examines the history, political writings, literature and the arts of the French Caribbean from the beginning of colonization to the present. It will include figures such as Saint-John Perse, Roumain, Césaire, Fanon, Depestre, Schwarz-Bart, Warner-Vieyra, Glissant, Conde, Chamoiseau, Laferriere, as well as the Caribbean arts and film. Taught in English. Cross-list: ARCR 478. Mutually Exclusive: Credit cannot be earned for FREN 478 and FREN 578.

FREN 482 - DISCOURSES OF DISSIDENCE
Short Title: DISCOURSES OF DISSIDENCE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course centers on dissidence as a concept and a practice, both ideological and esthetic. Covers a selection of figures, genres, media, and movements of "French" expression from Montaigne to present. Limited enrollment to 12. French Studies majors will read works and write papers in French. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor. Mutually Exclusive: Credit cannot be earned for FREN 482 and FREN 582.

FREN 487 - LITERATURE, ART AND COLONIALITY
Short Title: LITERATURE, ART & COLONIALITY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This is the undergraduate senior version of the graduate level seminar FREN/HART 587. Both the course's reading list and the length of the research are adjusted to accommodate undergraduate needs. How do concepts like coloniality, exoticism, primitivism, the modern baroque apply to texts and artifacts produced at the crossroads of (post)colonial and transnational encounters? Focus on Orientalists, Matisse, Djebbar, Simon, Boujedra, Borduas, Atlas, Khadda, and Glissant. Taught in English. Choice of reading materials and assignments in either English or French. Cross-list: HART 487. Mutually Exclusive: Credit cannot be earned for FREN 487 and FREN 587.

FREN 495 - THE FRENCH AVANT-GARDE: SYMBOLISM, DADAISM, SURREALISM, CONTEMPORARY CINEMA
Short Title: THE FRENCH AVANT-GARDE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Short texts and films by Baudelaire, Verlaine, Rimbaud, Mallarme, Jarry, Apollinaire, Breton, Artaud, Bataille, Robbe-Grillet, Catherine Breillat, Virginie Despentes. Recommended Prerequisite(s): Completion of one 300-level course or permission of instructor.

Freshman Seminar (FSEM)

FSEM 100 - ROMANCING RELIGION: NARRATIVES OF THE SACRED
Short Title: ROMANCING RELIGION
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines links between religious experience and romance narrative taking the grail as a focal point. We start with grail legends in the middle ages, explore historical associations of the grail with medieval Christianity, and end with quest narratives and grail motifs in modern occultism, fiction and film. This course is limited to first-year students only, any others will be removed from this course. Cross-list: MDEM 100, RELI 100.

FSEM 101 - FRESHMAN SEMINAR: SOCRATES: THE MAN AND HIS PHILOSOPHY
Short Title: FRESHMAN SEMINAR: SOCRATES
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This discussion-style seminar will consider how Socrates practiced philosophy, how Plato represented Socrates and Socratic philosophy in writing, and what effect Socrates had on Athens and his fellow Athenians. Readings will consist mainly of Plato's Socratic dialogues, with emphasis on the "Apology" and "Gorgias." In addition to papers, each participant will make one presentation and lead one discussion. This course is limited to first-year students only; any others will be removed from this course. Cross-list: CLAS 101.
FSEM 102 - BUDDHISM MEDITATION, ART AND US
Short Title: BUDDHISM MEDITATION, ART & US
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: How do you learn about another tradition? Its texts, practices, or art? Its conversations with the modern West? We will focus on all these as we enter ancient Buddhist worlds of India and Tibet, by reading ancient texts and modern treatments, including films and scientific inquiry. This course is limited to first-year students only, any others will be removed from this course. Cross-list: RELI 102.

FSEM 108 - LANGUAGE IN THE MEDIA
Short Title: LANGUAGE IN THE MEDIA
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In this course, we examine the effect language use in the media has on an American and global culture. Students will collect data to contribute to a class data set, which they will then use to complete their own original research projects. This course is limited to first-year students only. Cross-list: LING 107.

FSEM 109 - BIZARRE BIBLICAL STORIES
Short Title: BIZARRE BIBLICAL STORIES
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will examine some of the more bizarre stories of the Hebrew Bible, which deal with such ideas as fratricide, seduction and incest. We will see how such stories have been interpreted, and been afforded meaning, throughout the ages. All texts will be read in English translation. This course is limited to first-year students only.

FSEM 113 - THE PARTHENON AND PERIKLÉAN ATHENS
Short Title: THE PARTHENON
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In this course, we will trace the history and mythology of the Parthenon. We begin with the dawn of sacred tradition on the Acropolis, then explore the classical recreation of the city, the conversion of the Parthenon into a church, its subsequent destruction and the current debate over restoration. This course is limited to first-year students only, any others will be removed from this course. Cross-list: ARCH 110, CLAS 103, HART 110.

FSEM 115 - FRESHMAN SEMINAR ON LOCAL BIOLOGY RESEARCH (BCB)
Short Title: FRESHMAN BIOLOGY SEMINAR (BCB)
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A 7-week seminar course to introduce freshmen prospective biologists to the excitement of research at Rice and the Medical Center and to provide context with which to think about facts presented in biosciences textbooks. Small groups will meet weekly with a graduate student or postdoctoral researcher to explore a published research article by a local lab, gaining background information about the subject and exposure to the research techniques. In the final session, the group will tour the lab that produced the featured article. Additional tours and activities TBA. All first-year non-transfer students are eligible to enroll in BIOC 115/FSEM 115 regardless of AP credit. This course meets in the second half of the semester and features research in the Program of Biochemistry and Cell Biology. Cross-list: BIOC 115.
Course URL: www.bioc.rice.edu/bioc115/

FSEM 116 - FRESHMAN SEMINAR ON LOCAL BIOLOGY RESEARCH (EEB)
Short Title: FRESHMAN BIOLOGY SEMINAR (EEB)
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group III
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A 5-week seminar course to introduce freshmen prospective biologists to the excitement of research at Rice and the Medical Center and to provide context with which to think about facts presented in biosciences textbooks. Small groups will meet weekly with a graduate student or postdoctoral researcher to explore a published research article by a local lab, gaining background information about the subject and exposure to the research techniques. In the final session, the group will tour the lab that produced the featured article. Additional tours and activities TBA. All first-year, non-transfer students are eligible to enroll in EBIO 116/FSEM 116 (formerly BIOS 116) regardless of AP credit. This course meets in the first half of the semester and features research in the Program of Ecology and Environmental Biology. Cross-list: EBIO 116.

FSEM 117 - FROM FREUD TO LECORBUSIER: PSYCHOANALYSIS, ART AND ARCHITECTURE
Short Title: FROM FREUD TO LECORBUSIER
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This seminar presents a selected range of key psychoanalytic concepts, which have been used by artists and architects to develop their practices and by theoreticians and critics to explain the production or experience of art and architecture. A typical week pairs a theoretical text with a work of art or architecture. This course is limited to first-year students only, any others will be removed from this course. Cross-list: HART 117.
FSEM 121 - FROM KAFKA TO THE HOLOCAUST: DISCOURSE IN ALIENATION
Short Title: FROM KAFKA TO HOLOCAUST
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The beginnings of modernity have to be seen in the context of the sociopolitical and intellectual upheavals at the end of the 19th century. Whereas extreme reactionism eventually led to fascism, progressive literature advocated artistic experimentation as manifested in a discourse of alienation (expressionism, dada, Kafka). Holocaust literature reflects the ultimate clash between progressiveness and reactionism. The primary readings will be from Wedekind, Trakl, Kaiser, Kafka, Hesse, Remarque, Brecht, Celan, Werfel. Taught in English. This course is limited to first-year students only, any others will be removed from this course. Cross-list: GERM 121.

FSEM 122 - HISTORY THROUGH GERMAN CINEMA
Short Title: HIST THROUGH GERMAN CINEMA
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course presents an overview of German history via contemporary German feature films from World War I, through the Weimar and Nazi periods, the postwar years as a Divided Germany into East and West and finally a look at the new generation in Post-unification Germany. Taught in English. All films are subtitled in English. This course is limited to first-year students only, any others will be removed from this course. Cross-list: GERM 122.

FSEM 123 - THROUGH TIME AND SPACE: EUROPEAN TRAVEL STORIES
Short Title: THROUGH TIME AND SPACE
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A travel story stands at the beginning of European Literature: Homer's Odyssey. Since ancient times, literary travel accounts of all sorts, to all destinations, by all means and undertaken with a wide range of different purposes have kept Europeans on the move. First attracted by the exotic and the unknown in the far distance, the interest moved ever closer to the self, and the exploration of the human mind became the most exotic and intriguing journey. Readings include Homer, Swift, Voltaire, Goethe, Heine, Twain, and Verne. Taught in English. This course is limited to first-year students only, any others will be removed from this course. Cross-list: GERM 123.

FSEM 124 - MORALITY AND POLITICS IN MODERN THOUGHT
Short Title: MORALITY & POLITICS
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An historic introduction to central themes of legal and political thought in the Western tradition. Taught in English. Course is limited to first-year students. Cross-list: GERM 124.

FSEM 128 - THE CULTURE OF WAR: VIOLENCE, CONFLICT AND REPRESENTATION
Short Title: THE CULTURE OF WAR
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Focusing on the experience and representation of war in German and European literature, theory, and visual arts. Covers the period from 17th-20th century. Special emphasis on the First World War. Not for the faint-hearted, topics included: destruction, ruins, refugees, massacres, terrorism, victims, spaces of battle, the logic of war. Taught in English. This course is limited to first-year students only, any others will be removed from this course. Cross-list: GERM 128.

FSEM 129 - LITERARY LOVE AFFAIRS: LOVE AND PASSION IN EUROPEAN LITERATURE
Short Title: LITERARY LOVE AFFAIRS
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: According to the German philosopher Hegel, love-stories are usually about a young man who seeks the ideal girl, finally gets her, and becomes as good a Philistine as others. Students examine this philosophical wisdom by reading stories and theoretical texts about love and passion by European authors from the time of Shakespeare to the present. Taught in English. This course is limited to first-year students only, any others will be removed from this course. Cross-list: GERM 129.
FSEM 130 - WOMEN AND NAZI GERMANY
Short Title: WOMEN AND NAZI GERMANY
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Through literature, art and filmmaking this course will explore how the Nazi dictatorship affected the lives of women. From "Aryan" women who participated in it, to how German women of Jewish descent were marginalized; analyzing women as victims and perpetrators of the Holocaust; and exploring the memory of Nazism. This course is limited to first-year students only, any others will be removed from this course. Cross-list: GERM 130, SWGS 130.

FSEM 132 - NATIONAL SOCIALISM AND FILM
Short Title: NATIONAL SOCIALISM AND FILM
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course explores films made in Nazi Germany as well as films about Nazi Germany and the corresponding crisis of justice in the mid-twentieth century. We will analyze cinematic responses to the rise of the fascist movement, World War II, the Holocaust, and the post-war years. Particular attention will be paid to the value of film as a propagandistic tool, ways in which it can configure and contest our image of national identity, and the relation between mass manipulation and mass murder. Taught in English. This course is limited to first year students only, any others will be removed from this course. Cross-list: GERM 132. Mutually Exclusive: Credit cannot be earned for FSEM 132 and GERM 336.

FSEM 134 - MODERN MEDIA
Short Title: MODERN MEDIA
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Critical introduction to the history and theory of modern media—including photography, film, and radio—with a focus on problems of representation, cultural perception, and the simulation of reality. What are media? How are media linked to the experience of modernity and postmodernity? How do media construct "reality?" Do modern media generate a crisis of perception? How has the emergency of modern visual culture shaped the social and political imaginary? This course is limited to first-year students only, any others will be removed from this course. Cross-list: GERM 134.

FSEM 136 - GERMAN FILM
Short Title: GERMAN FILM
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: "From Caligari to Hitler"—and beyond. In the vein of the title of a well-known study on German film during the Weimar Republic the course offers a cinematographic history of German and European politics and culture from the early Expressionist silent movies on the award winning "Life of Others." Taught in English. This course is limited to first-year students only, any others will be removed from this course. Cross-list: GERM 136.

FSEM 142 - CRITICAL APPROACHES TO THE ISRAELI-PALESTINIAN CONFLICT
Short Title: SHARED FATES: ISRAEL-PALESTINE
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course surveys the cultural and political dimensions of the Israeli-Palestinian conflict. In this class, we explore the origins of Zionism and Palestinian nationalism, the varieties of Zionism in relation to Colonialism and Orientalism, and the construction of racial, economic, and gender inequalities in the face of this contemporary dispute. This course is limited to first-year students only.

FSEM 144 - THE ARAB-ISRAELI CONFLICT
Short Title: ARAB-ISRAELI CONFLICT
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Seminar traces the history and politics of the Arab-Israeli conflict, delving into both Palestinian and Israeli understandings of the past and present using books, documentaries, and films. The course seeks to understand how and at what costs Israeli and Palestinian nationalisms have been constructed and analyzes U.S. involvement in the conflict. This course is limited to first-year students only, any others will be removed from this course. Cross-list: HIST 144.
FSEM 151 - THE HERO AND HIS COMPANION FROM GILGAMESH TO SAM SPADE
Short Title: THE HERO & HIS COMPANION
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: How does presentation of heroic action illustrate the basic values of society? Historical sources including ancient texts, modern mystery stories, and two "western" movies, show the development of a style of community service linking heroism with alienation. The extent to which women participate will be traced. This course is limited to first-year students only; any others will be removed from this course. Cross-list: HIST 151.

FSEM 171 - THE BODY AND THE COSMOS IN THE MIDDLE AGES
Short Title: BODY & COSMOS IN MIDDLE AGES
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: What shaped medieval Christian notions of the body? How did common experiences of pain, sexuality, childbirth, and death refract the grasp of larger concepts - God, time, and the cosmos? This seminar will explore the issues connecting body to cosmos through close reading of medieval literary, mystical, and autobiographical texts. This course is limited to first-year students only; any others will be removed from this course. Cross-list: MDEM 171, RELI 171. Mutually Exclusive: Credit cannot be earned for FSEM 171 and FWIS 150.

FSEM 178 - THE THIRD REICH IN LITERATURE
Short Title: THE THIRD REICH IN LITERATURE
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Freshman seminar introduces students to the interpretation of drama, poetry, prose, and film on German fascism and its consequences in and outside of Germany before, during, and after World War II. In addition, students will examine theoretical approaches to fascist culture and memory of the Holocaust. Limited to first-year students only. Cross-list: GERM 178.

FSEM 179 - ROMAN VS GREEK: QUESTIONING THE DEFINITION OF ART IN THE ANCIENT MEDITERRANEAN WORLD
Short Title: ROMAN VS GREEK
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: What's in a name? Apparently a lot. For 500 years--since the Renaissance--scholars have cleaved Roman and Greek art from one another and this division has defined how we think about art in antiquity. In this freshman seminar, we will question this paradigm. Looking at art from around the Mediterranean and reading the very scholarship that has both created these definitions and questioned them, we will work toward a new way of conceiving the art of the Ancient Mediterranean world. This course is limited to first-year students only, any others will be removed from this course. Cross-list: CLAS 179, HART 179. Mutually Exclusive: Credit cannot be earned for FSEM 179 and FSEM 159.

FSEM 181 - CINEMA AND MODERNITY
Short Title: CINEMA AND MODERNITY
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This class focuses on cinema as a primary cultural product of industrial capitalism, whose processes of mechanization and urbanization fundamentally changed everyday life. Classes will focus on films by Chaplin, Lang, Eisenstein, Hitchcock, and others, and encompass issues of technology and representation, shock and trauma, and crime and the city. This course is limited to first-year students only. Cross-list: HART 120.

FSEM 182 - TRIAL BY FIRE: AMERICAN JEWS AND THE CIVIL WAR
Short Title: AMERICAN JEWS & THE CIVIL WAR
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will offer new perspectives on the Civil War by examining the conflict from the viewpoint of the American Jewish community. Sermons, diaries, memoirs, and other primary sources will be used to examine Jews and the slave trade, Jewish traditions during wartime, Jewish women's experience and leadership roles during the war and other topics.
German (GERM)

GERM 106 - ACCELERATED FIRST YEAR GERMAN
Short Title: ACCEL 1ST YEAR GERMAN
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Alternate first-year German course for students with some background in German or related language. This is an intensive course covering the equivalents of GERM 141 and GERM 142. Students will be prepared for GERM 263 upon completion of the course. Mutually Exclusive: Credit cannot be earned for GERM 106 and GERM 141/GERM 142.

GERM 121 - FROM KAFKA TO THE HOLOCAUST: DISCOURSE IN ALIENATION
Short Title: FROM KAFKA TO HOLOCAUST
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The beginnings of modernity have to be seen in the context of the sociopolitical and intellectual upheavals at the end of the 19th century. Whereas extreme reactionism eventually led to fascism, progressive literature advocated artistic experimentation as manifested in a discourse of alienation (expressionism, dada, Kafka). Holocaust literature reflects the ultimate clash between progressiveness and reactionism. The primary readings will be from Wedekind, Trakl, Kaiser, Kafka, Hesse, Remarque, Brecht, Celan, Werfel. Taught in English. This course is limited to first-year students only, any others will be removed from this course. Cross-list: FSEM 121.

GERM 122 - HISTORY THROUGH GERMAN CINEMA
Short Title: HIST THROUGH GERMAN CINEMA
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course presents an overview of German history via contemporary German feature films from World War I, through the Weimar and Nazi periods, the postwar years as a Divided Germany into East and West and finally a look at the new generation in Post-unification Germany. Taught in English. All films are subtitled in English. This course is limited to first-year students only, any others will be removed from this course. Cross-list: FSEM 122.

GERM 123 - THROUGH TIME AND SPACE: EUROPEAN TRAVEL STORIES
Short Title: THROUGH TIME AND SPACE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A travel story stands at the beginning of European Literature: Homer’s Odyssey. Since ancient times, literary travel accounts of all sorts, to all destinations, by all means and undertaken with a wide range of different purposes have kept Europeans on the move. First attracted by the exotic and the unknown in the far distance, the interest moved ever closer to the self, and the exploration of the human mind became the most exotic and intriguing journey. Readings include Homer, Swift, Voltaire, Goethe, Heine, Twain, and Verne. Taught in English. This course is limited to first-year students only, any others will be removed from this course. Cross-list: FSEM 123.

GERM 124 - MORALITY AND POLITICS IN MODERN THOUGHT
Short Title: MORALITY & POLITICS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An historic introduction to central themes of legal and political thought in the Western tradition. Taught in English. Course is limited to first-year students. Cross-list: FSEM 124.

GERM 128 - THE CULTURE OF WAR: VIOLENCE, CONFLICT AND REPRESENTATION
Short Title: THE CULTURE OF WAR
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Focusing on the experience and representation of war in German and European literature, theory, and visual arts. Covers the period from 17th-20th century. Special emphasis on the First World War. Not for the faint-hearted, topics included: destruction, ruins, refugees, massacres, terrorism, victims, spaces of battle, the logic of war. Taught in English. This course is limited to first-year students only, any others will be removed from this course. Cross-list: FSEM 128.
GERM 129 - LITERARY LOVE AFFAIRS: LOVE AND PASSION IN EUROPEAN LITERATURE
Short Title: LITERARY LOVE AFFAIRS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: According to the German philosopher Hegel, love-stories are usually about a young man who seeks the ideal girl, finally gets her, and becomes as good a Philistine as others. Students examine this philosophical wisdom by reading stories and theoretical texts about love and passion by European authors from the time of Shakespeare to the present. Taught in English. This course is limited to first-year students only, any others will be removed from this course. Cross-list: FSEM 129.

GERM 130 - WOMEN AND NAZI GERMANY
Short Title: WOMEN AND NAZI GERMANY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Through literature, art and filmmaking this course will explore how the Nazi dictatorship affected the lives of women. From "Aryan" women who participated in it, to how German women of Jewish descent were marginalized; analyzing women as victims and perpetrators of the Holocaust; and exploring the memory of Nazism. This course is limited to first-year students only, any others will be removed from this course.

GERM 132 - NATIONAL SOCIALISM AND FILM
Short Title: NATIONAL SOCIALISM AND FILM
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course explores films made in Nazi Germany as well as films about Nazi Germany and the corresponding crisis of justice in the mid-twentieth century. We will analyze cinematic responses to the rise of the fascist movement, World War II, the Holocaust, and the post-war years. Particular attention will be paid to the value of film as propagandistic tool, ways in which it can configure and contest our image of national identity, and the relation between mass manipulation and mass murder. Taught in English. This course is limited to first year students only, any others will be removed from this course. Cross-list: FSEM 132. Mutually Exclusive: Credit cannot be earned for GERM 132 and GERM 336.

GERM 134 - MODERN MEDIA
Short Title: MODERN MEDIA
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Critical introduction to the history and theory of modern media--including photography, film, and radio--with a focus on problems of representation, cultural perception, and the simulation of reality. What are media? How are media linked to the experience of modernity and post modernity? How do media construct "reality?" Do modern media generate a crisis of perception? How has the emergency of modern visual culture shaped the social and political imaginary? This course is limited to first-year students only, any others will be removed from this course.

GERM 136 - GERMAN FILM
Short Title: GERMAN FILM
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: "From Caligari to Hitler" - and beyond. In the vein of the title of a well-known study on German film during the Weimar Republic the course offers a cinematographic history of German and European politics and culture from the early Expressionist silent movies to the award winning "Life of Others." Taught in English. This course is limited to first-year students only, any others will be removed from this course.

GERM 141 - FIRST YEAR GERMAN I
Short Title: FIRST YEAR GERMAN I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Development of interactional competence in German (sociolinguistic and sociocultural knowledge) to communicate and interact with speakers of German. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. No prior knowledge of this language is necessary. Placement Test is required. Mutually Exclusive: Credit cannot be earned for GERM 141 and GERM 101/GERM 106/GERM 222.
Course URL: clicgerman.blogs.rice.edu
GERM 141
Short Title: GERM 141
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): GERM 140
Description: Continuation of GERM 140. Development of interactional competence in German (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of German. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for GERM 142 and GERM 106/GERM 262.
Course URL: clicgerman.blogs.rice.edu

GERM 142 - FIRST YEAR GERMAN II
Short Title: FIRST YEAR GERMAN II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): GERM 141
Description: Continuation of GERM 141. Development of interactional competence in German (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of German. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for GERM 142 and GERM 106/GERM 262.
Course URL: clicgerman.blogs.rice.edu

GERM 178 - THE THIRD REICH IN LITERATURE
Short Title: THE THIRD REICH IN LITERATURE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Freshman seminar introduces students to the interpretation of drama, poetry, prose, and film on German fascism and its consequences in and outside of Germany before, during, and after World War II. In addition, students will examine theoretical approaches to fascist culture and memory of the Holocaust. Limited to first year students only. Cross-list: FSEM 178.

GERM 222 - AP/OTH CREDIT IN GERMAN LANGUAGE
Short Title: AP/OTH CREDIT GERMAN LANGUAGE
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Transfer
Credit Hours: 3
Course Level: Undergraduate Lower-Level
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation. Mutually Exclusive: Credit cannot be earned for GERM 222 and GERM 141.

GERM 263 - SECOND YEAR GERMAN I
Short Title: SECOND YEAR GERMAN I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): GERM 142
Description: Continuation of GERM 262. Development of interactional competence in German (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of German. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for GERM 263 and GERM 201.
Course URL: clicgerman.blogs.rice.edu

GERM 264 - SECOND YEAR GERMAN II
Short Title: SECOND YEAR GERMAN II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): GERM 263
Description: Continuation of GERM 263. Development of interactional competence in German (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of German. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for GERM 264 and GERM 202.
Course URL: clicgerman.blogs.rice.edu

GERM 280 - HISTORY OF CINEMA AND MEDIA I: INVENTION TO 1945
Short Title: HISTORY OF CINEMA AND MEDIA I
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This seminar will introduce students to the history of cinema from its inception to 1945 by considering individual cinematic artifacts in their technological, economic, aesthetic, political, and social contexts. Cross-list: CMST 201.

GERM 301 - THIRD YEAR GERMAN I
Short Title: THIRD YEAR GERMAN I
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course introduces students to contemporary German speaking cultures through the use of authentic materials (film, media, literature). Recommended Prerequisite(s): GERM 264 or Instructor Permission.
GERM 302 - THIRD YEAR GERMAN II
Short Title: THIRD YEAR GERMAN II
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course focuses on complex topics in contemporary German speaking cultures through the use of authentic materials (film, media, literature). Recommended Prerequisite(s): GERM 301 or Permission of Instructor.

GERM 305 - ENLIGHTENMENT AND ROMANTICISM (1750-1850)
Short Title: ENLIGHTENMENT (1750-1850)
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An introduction to the major social, political and cultural developments in the period between 1700-1850, which contributed to the emergence of modern German cultural identity within the European context. Covers wide range of theoretical and literary works by Kant, Lessing, Schiller, Goethe, Eichendorff, Hoffmann, Heine, and others. Taught in German.

GERM 306 - REALISM TO MODERNITY (1850-PRESENT)
Short Title: REALISM TO MODERNITY (1850-PRES)
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: German history and culture during the late 19th and the 20th century have been rather turbulent. From Wilhelminian empire to Weimar democracy to Hitler fascism to socialist division to German reunification to entry into the European Union. All these political changes will be commented on by cultural reflections in textual and filmic forms. Literary texts will include Fontane, Mann, Kafka, Boll, Grass, Wolf and Maron. Taught in German.

GERM 307 - FOLK AND FAIRY TALE IN GERMAN: TRADITION, STRUCTURE, ARTISTRY
Short Title: FOLK & FAIRY TALE IN GERMAN
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The folk tales collected by the Brothers Grimm still exhibit all the principle characteristics and functions of oral literature, i.e. the reproduction of an audience's cultural identity and the securing of that identity. Nevertheless, these characteristics are still preserved in fairy tales written by specific authors for a reading audience. Examples of the latter are mainly from authors of Romanticism and Realism. Taught in German.

GERM 309 - GERMAN POETRY
Short Title: GERMAN POETRY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: "If the soul speaks out, alas! it is no longer the soul that speaks" - in Schiller's famous line one of the many fascinating paradoxes of lyric poetry is expressed. With the tradition of the "Lied," poems set to music, German poetry of the Classical-Romantic epoch was soon to become the epitome of lyric poetry as such. There were, however, poems of quite different kinds before and after Goethe, Eichendorff, and Heine. Without neglecting the Classical-Romantic period, the course will explore the history of lyric expression in German literature from the early modern period to the present in both poems and theoretical texts. Taught in German.

GERM 311 - BERLIN: PAST AND PRESENT
Short Title: BERLIN: PAST AND PRESENT
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The course introduces students to German history and culture as mirrored in the history of the city that is "always in progress and never accomplished." With an emphasis on the period from the 1920's to the present, class discussions encompass literature and theory, politics and social life, as well as architecture, fine arts and film. Taught in German.
GERM 321 - EUROPEAN WOMEN FILMMAKERS
Short Title: EUROPEAN WOMEN FILMMAKERS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Filmmaking has celebrated its first hundred years. Women's contributions were significant and deserve to widen the film canon for all filmgoers. This course will concentrate on films by European women directors, taking into account aesthetic particularities, gender commitment, and post-feminist attempts. Importance will also be given to the contexts and conditions of women's film production. All films subtitled in English. Taught in English. Cross-list: HART 385, HUMA 321, SWGS 358.

GERM 322 - MARX, FREUD, EINSTEIN: FOREBEARERS OF MODERNITY
Short Title: MARX, FREUD, EINSTEIN
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Like no others, these three thinkers of the 19th and 20th centuries have influenced the intellectual, historical, social and cultural development not only of Germany, but of the entire world. The course examines the works of these authors in the context of their own time as well as their continued importance in the present. Works by Brecht, Christa Wolf, Schnitzler, Kafka will also be considered. Taught in English. Cross-list: HUMA 322.

GERM 324 - BERLIN: RESIDENCE, METROPOLIS, CAPITAL
Short Title: BERLIN:RESIDENCE,METRO,CAPITAL
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The course offers an introduction to German history, politics, and culture as mirrored in the history of the old and new German capital. Berlin has always been a city of contradictions: from imperial glamour to proletarian slums, from the Roaring Twenties to Hitler's seizure of power. Emerging from the ruins of WWII Berlin became both the capital of Socialism and the display window of the Free World. After the fall of the wall, Berlin is still looking for its role in the center of a reshaped Europe. Readings and discussions encompass fine arts and literature from the 18th century to the present, including film. Taught in English. Cross-list: HUMA 324.

GERM 325 - MODERN GERMAN WRITERS: KAFKA
Short Title: MODERN GERMAN WRITERS; KAFKA
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Goethe's vision of "world-literature" came true in the twentieth century. German authors, among them Kafka, transcended the confines of national traditions and redefined the concepts of literature and authorship in view of a modern globally dispersed audience. Topics may vary. Taught in English. Cross-list: HUMA 325. Repeatable for Credit.

GERM 326 - THE GERMAN FAIRY TALE: OLD AND NEW
Short Title: GERMAN FAIRY TALE: OLD & NEW
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Discussion of several prototypes from the fairy-tale collection of the Brothers Grimm and the subsequent development of the "literary" fairy tale from Goethe and the Romantics to the 20th century. Taught in English. Cross-list: HUMA 372.

GERM 327 - GERMAN EXPRESSIONISM IN EUROPEAN CONTEXT:
HISTORY, LITERATURE AND FINE ARTS
Short Title: GERMAN EXPRESSIONISM
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The literature, fine arts and film of German Expressionism represent the most concentrated breakthrough of modernity. In addition to focusing on this accomplishment in its European context, the course will also discuss Nietzsche's influence, the movement's ambivalent reaction to WWI and its misappropriation by communism and nationalism. Taught in English.

GERM 328 - GERMAN ADAPTATIONS: TEXT TO FILM
Short Title: GERMAN ADAPTATIONS: TEXT-FILM
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Prominent novels of the 20th century will be studied for their possibilities or impossibilities of rendition from print medium to cinematic medium. From the myriad of adaptations we will concentrate on Thomas Mann: Tod in Venedig; Franz Kafka: Das Schloss; Klaus Mann: Mephisto; Gunter Grass: Die Blechtrommel; H. Boll: Katharina Blum; Jurek Becker: Jacob der Lugner. All films are subtitled in English. Taught in English. Cross-list: HUMA 328.
GERM 329 - LITERATURE OF THE HOLOCAUST AND EXILE
Short Title: LIT OF HOLOCAUST & EXILE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Most of the authors from Germany and Austria, who were persecuted and fled into exile, used literature to search for meaning in life that apparently had been stripped of all meaning. Among these authors are the most distinguished writers of the time, i.e., Th. and H. Mann, Brecht, Benjamin, Werfel, Doblin, J. Roth, S. Zweig, N. Sachs, Celan, Auslander. Taught in English. Cross-list: HUMA 329.

GERM 330 - LITERATURE AND FILM IN EAST GERMANY: BEHIND THE IRON CURTAIN
Short Title: LIT AND FILM: EAST GERMANY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This seminar will introduce students to the literature and filmic culture of East Germany, as well as to its social, political, and cultural context. It will also ask how literature and film not only reflect history but also respond to history by mobilizing their own political force.

GERM 333 - NIETZSCHE: PHILOSOPHY, POLITICS, HISTORY
Short Title: NIETZSCHE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Situates Nietzsche's thought on language, history, and the body within its historical context, and examines the validity of his arguments in a world increasingly challenged by scientific knowledge. Focuses on Nietzsche's views on truth, genealogy, nihilism, morality, and science, which continue to be relevant for current debates within the humanities. Taught in English.

GERM 334 - NATIONALISM AND CITIZENSHIP
Short Title: NATIONALISM AND CITIZENSHIP
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Critical review of modern concepts of nationalism and citizenship. Topics include: theories of nationalism and citizenship, space and territory, identity, monuments, the emergence of nation states, multicultural democracy, transnationalism, and political belonging. Course provides links between political theory, public policy, literature, visual culture, architecture, and historical anthropology.

GERM 336 - NATIONAL SOCIALISM AND FILM
Short Title: NATIONAL SOCIALISM AND FILM
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores films made in Nazi Germany as well as films about Nazi Germany and the corresponding crisis of justice in the mid-twentieth century. We will analyze cinematic responses to the rise of the fascist movement, World War II, the Holocaust, and the post-war years. Particular attention will be paid to the value of film as a propagandistic tool, ways in which it can configure and contest our image of national identity, and the relation between mass manipulation and mass murder. Taught in English. Mutually Exclusive: Credit cannot be earned for GERM 336 and FSEM 132/GERM 132.

GERM 338 - NEW GERMAN FILM: HITLER'S CINEMATIC CHILDREN
Short Title: NEW GERMAN FILM: HITLER'S CINEMA
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: From the 1960 to 2000, Germany has developed a very distinct auteur cinema with independent filmmakers such as Fassbinder, Herzog, Wenders, Adlon, Trotta, Sander, Brueckner, Doerr, Garnier, Tykwer, and others. The first 20 years of German film were oriented on coming to terms with the fascist past; the second 20 years focused on more contemporary issues. Film, critical reading and class discussion in English. All films are subtitled in English and will be assessed with podium technology. Taught in English. Cross-list: HUMA 373, SWGS 361.

GERM 339 - FROM EXPRESSIONISM TO FASCISM: ART AND FILM IN GERMANY
Short Title: FROM EXPRESSIONISM TO FASCISM
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Focusing on the tumultuous years of the Weimar Republic, this class will examine art and film in Germany from the birth of Expressionism through the end of the Nazi dictatorship. Topics covered will include Expressionism, Dada, the Bauhaus, and Fascist aesthetics. Particular attention will be paid to the relations between aesthetics and politics and art and everyday life, all central concerns of the art and criticism of the period. Cross-list: HART 398.
GERM 340 - WALTER BENJAMIN: AESTHETICS, HISTORY AND POLITICS
Short Title: WALTER BENJAMIN
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Benjamin has been celebrated as a revolutionary Marxist, a theologian of Jewish Messianism, and as an essayist and literary critic. The course offers an introduction to his writings by way situating them in the historical background of the Weimar Republic and the crises of European society on the eve of WWII. Taught in English. Cross-list: HUMA 340.

GERM 341 - A SHORT HISTORY OF GERMAN THOUGHT ON HISTORY
Short Title: GERMAN THOUGHT ON HISTORY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: From early modern times onward history has played and still plays a crucial role in German thought. Why? An answer to this question is to be sought in history; in authors such as Lessing, Kant, Hegel, Marx, and Nietzsche who contributed to what in German is called “Philosophy of History.”

GERM 344 - GERMAN HISTORY, 1648-1890
Short Title: GERMAN HISTORY, 1648-1890
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Survey of "Germanies" from the rise of absolutist state following the Thirty Years' War to the unification of Germany in 1871. Includes the development of the bureaucratic and military institutions of the modern state, changing conceptions of state and society, and the major social and economic changes of the period. Taught in English. Cross-list: HIST 354.

GERM 345 - FROM DEMOCRACY TO DICTATORSHIP: GERMAN HISTORY, 1890-1945
Short Title: GERMAN HISTORY, 1890-1945
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: From 1890-1945, Germans experienced dramatic changes in their political environment. This lecture class will examine these changes, taking into account not only political history, but also attempts to come to terms with the challenges posed by organized capitalism, the rise and fall of socialism, the development of an interventionist state, cultural critique, and political culture, the Nazi social revolution, and the Holocaust. Taught in English. Cross-list: HIST 355.

GERM 349 - GERMAN POLITICAL THOUGHT
Short Title: GERMAN POLITICAL THOUGHT
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Advanced seminar in political thought. Traces the development and influence of one of the most important traditions of modern political thought from the Enlightenment to the present. Topics include: natural law, public sphere, intellectuals and the modern state, civil society, mass democracy. Reading intensive and research oriented. Taught in English.

GERM 351 - HOLOCAUST MEMORY IN MODERN GERMANY
Short Title: HOLOCAUST MEMORY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course traces and examines forms of Holocaust memory and memorialization in film, literature, art, architecture, city planning, museums, and memorials in Germany. For an additional credit hour, students will participate in a week-long trip to Berlin. Instructor Permission Required. Cross-list: HART 387.

GERM 352 - POLITICS OF THE FLESH IN GERMAN LITERATURE, THOUGHT AND FILM
Short Title: THE POLITICS OF THE FLESH
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will introduce students to the complex relation between the sphere of politics and the human body as negotiated in German literature, thought and film. We will examine the practices of power that states wield toward the maximization of “life” and discuss such pressing issues as biopower, eugenics, racism, sexism and genocide. Taught in English.
GERM 361 - THE AGE OF GOETHE: POETRY AND TRUTH
Short Title: AGE OF GOETHE: POETRY & TRUTH
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The "Age of Goethe" is generally referred to as the "classical" decade of German literature and culture. It was, however, by no means exclusively the age of Goethe and Schiller, but also of Kant and Herder, Holderlin and Kleist, and the beginning of the Romantic movement. While German intellectuals debated revolution in the lofty realm of letters, their French contemporaries took to the streets and staged a political revolution that culminated in the execution of their king. Germany as the "land of the poets and philosophers" is a myth indeed, and a rather ambivalent one, too. The course explores the age of Goethe, its "poetry" and its "truth," by way of reading key texts of that period in their intellectual, historical, and political contexts. Taught in German.

GERM 362 - NEW REALITIES: LITERATURE AND POLITICS IN THE 19TH CENTURY
Short Title: 19TH C. LITERATURE & POLITICS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: In German arts and letters, the nineteenth century is usually referred to as the age of Realism. As a reaction to Neo-Classicism, Romanticism, and Idealism, intellectual life turned towards the new realities in the sciences as well as society and politics. Industrialization, urbanization, the social question, women's liberation and the founding of the "Reich" created a new sense of reality and gave way to new forms of expression in literature and the arts. While optimism regarding the process of mankind prevailed, pessimism spread amongst the more thoughtful. Readings include texts by Heine, Fontaine, Keller, Hauptmann, Marx, Schopenhauer and Nietzsche. Taught in German.

GERM 363 - THE WEIMAR REPUBLIC, 1919-1933
Short Title: THE WEIMAR REPUBLIC, 1919-1933
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar in Germany's first democracy and one of the most formative moments of modernity. Covers political culture, constitutional conflict, literary and intellectual movements and urban visual culture from the end of the First World War and the spectacular modernity of 1920s Berlin to the rise of the Nazis. Taught in German.

GERM 364 - THE EXPRESSIONIST VISION OF "NEW MAN"
Short Title: EXPRESSIONIST VISION
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Inspired by Nietzsche's concept of the "Superman," the Expressionist writers and artists (roughly between 1910 and 1920) strived towards a total renewal of society. They attached its patriarchal foundation, blamed the anonymity of the metropolitan mass society with the newly formed proletariat on hand and the materialistic life-style on the other for the general dissociation of individuals. The major literary forms were poetry and drama, which were either activist or experimenting with newly created metaphors. The prose employs the genre of the grotesque. The visual artists are influenced by van Gogh. As a totally new medium, the film incorporates all these aspects and elements. Taught in German.

GERM 399 - THE GERMAN STUDIES INTERNSHIP
Short Title: THE GERMAN STUDIES INTERNSHIP
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The Office of the Dean of Humanities and relevant faculty from German Studies match students individually with one of a variety of projects in the areas of diplomacy, engineering, pedagogy, public culture. Students conduct research or related activities under the guidance of on-site supervisor and the section instructor on record. Instructor Permission Required.

GERM 401 - TOPICS IN GERMAN LITERATURE AND CULTURE
Short Title: TOPICS IN GERMAN
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will work with sophisticated texts to enable students to bring their proficiency in the various modalities of German to the advanced level. Taught in German. Repeatable for Credit.

GERM 402 - GERMAN TRANSLATION
Short Title: GERMAN TRANSLATION
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Advanced seminar on German-English translations. With stylistic exercises covering a broad range of genres: poetry, novels, essays, historical documents, legal documents, journalism, etc. Taught in German.
GERM 405 - THE MAKING OF MODERN GERMANY
Short Title: MODERN GERMANY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Germany nowadays seems to have found her place in the center of Europe. In both Weimar Republic and Hitler's Reich, BRD and GDR, the experience of and struggle with modernity was essential for recent German history. Discussions encompass select texts both fictitious and theoretical, architecture, fine arts, and film. Taught in German.

GERM 411 - THE POETICS OF JUSTICE IN GERMAN LITERATURE, THOUGHT, AND FILM
Short Title: THE POETICS OF JUSTICE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar will introduce students to the ongoing concern with law and its relation to justice in German literature, thought, and film. We will examine works that stage actual and figurative trials, and will ask how these enactments serve as a catalyst for civilization's most pressing normative questions.

GERM 420 - GERMAN POLITICS/CULTURE AFTER 1945
Short Title: GERMAN POLITICS/CULTURE AFTER 1945
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Advanced seminar on German culture and politics after the Second World War -- from the foundation of the Federal Republic, the separation of the two Germanys, and the student revolts of 1968 to 1970s terrorism, the fall of the Berlin Wall, and Germany's present role in the international community. Taught in German.

GERM 425 - VIENNA AND ITS PEOPLE
Short Title: VIENNA AND ITS PEOPLE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: In this course we will look at the people of Vienna from the turn of the century to the present. Our readings, film viewings and discussions will introduce us to the Viennese as people of all classes and ethnic and national groups. Taught in German. Recommended Prerequisite(s): Intermediate high proficiency (speaking & writing).

GERM 430 - GERMAN INTELLECTUAL HISTORY
Short Title: GERMAN INTELLECTUAL HISTORY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Advanced Seminar on key topics in modern German intellectual history, including history of science and scholarship, from 1700 to the present. Ideal preparation for graduate school in the humanities. Taught in German.

GERM 435 - CONCEPTS OF HISTORY FROM G.E. LESSING TO W. BENJAMIN
Short Title: CONCEPTS OF HISTORY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The twentieth-century Italian philosopher Benedetto Croce called philosophy of history (Geschichtsphilosophie) a "German discipline." There is indeed a long and rich tradition of texts in German thought that focus on making sense of the seemingly senseless, on speculating about the origin, the course, the aim, or, quite generally, the "meaning" of history. Based on selected texts by Lessing, Kant, Heine, Hegel, Nietzsche, Ranke, Burckhardt, Benjamin, and others, the course discusses different concepts of history from the early eighteenth to the twentieth century. Taught in German.

GERM 491 - FALL - INDEPENDENT WORK IN GERMAN LITERATURE
Short Title: FALL-IND WRK GERM LITERATURE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Qualified students work on projects of their choice under the supervision of individual instructors with approval of the undergraduate advisor. Department Permission Required. Repeatable for Credit.

GERM 492 - SPRING - INDEPENDENT WORK IN GERMAN LITERATURE
Short Title: SPRING-IND WRK GERM LITERATURE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Qualified students work on projects of their choice under the supervision of individual instructors with approval of the undergraduate advisor. Department Permission Required. Repeatable for Credit.
GERM 493 - FALL HONOR THESIS  
Short Title: FALL HONOR THESIS  
Department: Classical and European Studies  
Grade Mode: Standard Letter  
Course Type: Research  
Credit Hours: 3-6  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Independent research projects by outstanding German majors leading to a substantial honors thesis, undertaken in close cooperation with a departmental faculty member. Department Permission Required.

GERM 494 - SPRING HONORS THESIS  
Short Title: SPRING HONOR THESIS  
Department: Classical and European Studies  
Grade Mode: Standard Letter  
Course Type: Research  
Credit Hours: 3-6  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Independent research projects by outstanding German majors leading to a substantial honors thesis, undertaken in close cooperation with a department faculty member. Department Permission Required.

GERM 677 - SPECIAL TOPICS  
Short Title: SPECIAL TOPICS  
Department: Cntr Lang & Intercultural Comm  
Grade Mode: Standard Letter  
Course Type: Internship/Practicum, Lecture, Laboratory, Seminar  
Credit Hours: 1-4  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Topics and credit hours may vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.

Global Affairs (GLBL)  
GLBL 501 - GLOBAL SYSTEMS I  
Short Title: GLOBAL SYSTEMS I  
Department: Global Affairs  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Designed to help students think theoretically and analytically about leading issues in international affairs by introducing them to social science methods and scholarship, and exposes them to the uses of such concepts in practice, through examination of contemporary problems and relations between nation states. Introduces central concepts and approaches from a variety of social science perspectives, particularly comparative politics and international relations used to explain, analyze and evaluate international politics and economics. Master of Global Affairs students only.

GLBL 502 - INSTITUTIONS & DEVELOPMENT  
Short Title: INSTITUTIONS & DEVELOPMENT  
Department: Global Affairs  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course will explore a broad, multidisciplinary range methodologies and requisite analytical tools needed to identify, measure, and assess the determinants and effects of international development, the nature of change in the development process, and of the associated role of policy and institutional design. This will include the normative analysis of change (applying various concepts of well-being, efficiency, social justice and poverty), the application of economic concepts (to the interpretation of household and firm behavior, strategic interactions and economy-wide patterns), and the role of political, governmental and social behavior in shaping the possibilities for, drivers of and resistance to change. This will be undertaken through a mixture of discussion of overall patterns backed by a strong focus on case studies in particular country settings. Master of Global Affairs students only.

GLBL 503 - INTRODUCTION TO STATISTICS FOR MASTERS STUDENTS  
Short Title: INTRODUCTION TO STATISTICS  
Department: Global Affairs  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course familiarizes students with basic concepts of research design and statistical methodology that used in policy analysis. It covers (1) fundamental concepts of scientific inference and barriers to inference in observational data, (2) the implementation and evaluation of experimental and observational research designs in policy analysis, (3) descriptive and graphical statistics, (4) statistical hypothesis testing, (5) elementary use and interpretation of the generalized linear model, and (6) using the R statistical software environment for data organization and analysis. It is strongly recommended that students complete this course in the fall semester of their first year; in all cases, it must be completed before the end of the first year. Master of Global Affairs students only.

GLBL 504 - QUANTITATIVE APPLICATIONS IN GLOBAL POLITICS AND POLICY  
Short Title: GLOBAL POLITICS AND POLICY  
Department: Global Affairs  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: The course takes a problem-driven approach to practical applications of quantitative research methods in political and policy studies. Using a series of international and domestic policy topics, students will learn to apply and extend their knowledge of research design and statistics as part of developing a systematic approach to the study of global affairs. Student assignments will involve research related to the practice of global affairs, including comparative policy-making, political economy and security. Master of Global Affairs students only.
GLBL 505 - MACROECONOMICS AND THE GLOBAL ECONOMY
Short Title: MACROECONOMICS & GLOBAL ECONOMY
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course develops our foundations on topics such as national product and income concepts, measurements, and relationships; interrelationships of the major segments of the national economy; forces affecting the general level of economic activity. Here we study how the major markets (those for labor, capital, and goods) operate. These markets are first studied in isolation. Why some countries have rapid economic development, and others low growth and pervasive poverty?

GLBL 506 - MACROECONOMICS FOR THE GLOBAL ECONOMY
Short Title: MACROECONOMICS FOR GLOBAL ECON
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The second part of the course puts the markets studied in the first part together and studies their interactions. The key issues here are: (a) how macroeconomic variables behave and (b) how can policy affect these outcomes both domestically and internationally. Students will engage in a short team project to explore the role of economic development in international settings, including topics such as energy supply, labor and employment, population, education, health and nutrition. International economics: balance of payments, foreign exchange markets, international trade theory, tariffs, quotas, and exchange controls. The course will focus on the relationship between international policy and economics. North-South relations, including the US-Mexico economic relation will be discussed. Master of Global Affairs students only. Mutually Exclusive: Credit cannot be earned for GLBL 505 and GLBL 524.

GLBL 507 - DECISION MAKING UNDER UNCERTAINTY
Short Title: DECISION MAKING UNDER UNCERTAINTY
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course examines how leaders on the world stage-those in governments, international organizations, and non-state actors-make decisions that alter the course of international affairs. These decisions are made under conditions of uncertainty with limited information, elements of surprise about what will happen next, and often carry high degrees of risk. The course considers key theoretical models of uncertainty in decision making and examines specific foreign policy decisions that managed the uncertainty toward a successful outcome and those that ended in failure or expensive mistakes. Master of Global Affairs students only.

GLBL 510 - CULTURAL DIRECTIONS IN INTERNATIONAL AFFAIRS
Short Title: CULTURAL DIRECTIONS
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Investigates the cultural and social dimensions of the development and implementation of international policy; emphasizes historical and ethnographic case studies to understand the variable impacts of policy implementation in different contexts. Master of Global Affairs students only.

GLBL 512 - INTERNATIONAL CONFLICT
Short Title: INTERNATIONAL CONFLICT
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduces to a broad range of areas related to the analysis and resolution of conflict, focusing on the interdisciplinary study of defining, understanding, and addressing conflict. International and community conflict, characteristics, negotiation, collaborative problem solving, processes. Students will learn international conflict escalation, stalemate, de-escalation, settlement, resolution, or management; mediation skills to facilitate the resolution of disputes and differences, techniques of third party intervention with individuals and groups. Learning approach includes lectures, simulations, modeling and practice mediations. Master of Global Affairs students only.

GLBL 513 - INTERNATIONAL COOPERATION
Short Title: INTERNATIONAL COOPERATION
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of theories and best practices from academia and governments/NGO's related to international cooperation, including international law and treaties, international coalitions and sanctions, international and transnational organizations, translocal city and NGO partnerships, government and business partnerships, transnational governance and public diplomacy, including soft power and collective action for global public goods. Master of Global Affairs students only.

GLBL 514 - THE MIDDLE EAST CAULDRON AND UNITED STATES POLICY
Short Title: M. EAST CAULDRON & U.S. POLICY
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course examines the expanding public dimension of diplomacy by investigating the growing global interests and trends in the 21st century's diplomatic environment. This course also examines the underlying political, socio-economic, and cultural trends and surveys US national security interests, foreign policy, and public diplomacy around the world. For Master of Global Affairs Students Only.
GLBL 515 - INTERNATIONAL SECURITY IN A MULTIPOLAR WORLD
Short Title: INTERNATIONAL SECURITY
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The post-Cold War international order is moving from a unipolar system to one characterized by strong interstate competition. Concepts once associated with 19th century Europe, like “the balance of power”, are demonstrating their continued relevance. Interstate conflict has been in decline, but its likelihood might increase within this more unstable system of states. This course will review the main intellectual currents in the international security subfield, with particular emphasis on the work of Barry Buzan and the English school of international relations. Students will critically apply theory to case studies on contemporary wars, nuclear proliferation, and violent state actors such as terrorist organizations, humanitarian intervention, and peacekeeping operations. Master of Global Affairs students only.

GLBL 519 - MASTER OF GLOBAL AFFAIRS INTERNSHIP
Short Title: MASTER GLOBAL AFFAIRS INTERNSHIP
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-6
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The Master of Global Affairs internship is a graduate-level supervised field experience for students in the MGA program. All internships must be preapproved and must be conducted after the student has completed a minimum of 18 credit hours in the program. Master of Global Affairs students only. Repeatable for Credit.

GLBL 520 - MASTER OF GLOBAL AFFAIRS CAPSTONE
Short Title: MASTER GLOBAL AFFAIRS CAPSTONE
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The Master of Global Affairs capstone course is the culmination of all graduate coursework and internship experience in the program; it is a significant piece of work than what is normally expected of a term paper. The capstone project must reflect a scholarly and professional analysis informed by the application of analytical strategies that address a real-world problem or public policy issue. All MGA students must complete the capstone in their final semester. Master of Global Affairs students only.

GLBL 523 - QUANTITATIVE APPLICATIONS IN GLOBAL AFFAIRS
Short Title: QUANTITATIVE APPLICATIONS
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MAGA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course takes a problem-driven approach to practical applications of quantitative research methods in political and policy studies. Using a series of international domestic policy topics, students will learn to apply and extend their knowledge of research design and statistics as part of developing a systematic approach to the study of global affairs. Student assignments will involve research related to the practice of global affairs, including comparative policy-making, political economy and security.

GLBL 524 - MACROECONOMICS IN A GLOBAL ECONOMY
Short Title: MACROECONOMICS GLOBAL ECONOMY
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MAGA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course develops our foundations of aggregate economic analysis; use of the aggregate demand/aggregate supply model for the determination of output, employment, and prices. The focus will be on topics such as national product and income concepts, measurements, and relationships; interrelationships of the major segments of the national economy; forces affecting the general level of economic activity. Here we study how the major markets (those for labor, capital, and goods) operate. These fundamental concepts will be used to analyze international economic policy. Mutually Exclusive: Credit cannot be earned for GLBL 524 and GLBL 505/506.

GLBL 525 - INTERNATIONAL SECURITY
Short Title: INTERNATIONAL SECURITY
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MAGA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers two general areas in International Security: (1) traditional (i.e., “state-centered”) and (2) non-traditional security issues. The first half of the course is devoted to recent developments in the study of interstate security. We will contemplate unipolarity. American security policy, the rise of some peer competitors, and the changing nature of interstate relations in the 21st century. The second half of the course will explore the growing significance of a number of emerging non-traditional security concerns. In this portion, we will discuss counterinsurgency, civil war, terrorism, humanitarian intervention, among other developing issues.
GLBL 531 - WORLD POLITICS AND GLOBAL GOVERNANCE
Short Title: CHANGE IN WORLD POLITICS
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course has three parts: First, it will engage cutting edge research on the causes and dynamics of interstate conflict and civil war. Second, it will discuss theories and practices of international organizations such as the UN, IMF, and WID. Finally, with the background knowledge from the first parts, the course will discuss how China's rise may bring changes to both dimensions.

GLBL 532 - INTERNATIONAL BUSINESS ENVIRONMENT AND GLOBAL ECONOMIC GOVERNANCE
Short Title: INT'L BUSINESS DEVELOPMENT
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MAGA program.
Course Level: Graduate
Description: This is a comprehensive course in how governance of the global economy affects business and investment decisions. It is designed to provide students with an understanding of the main international economic institutions that have been developed to oversee the global economy, and how these institutions affect the international business and investment climate. Lectures and class discussions will focus on real world examples of the impact of the international trade and financial institutions (the G-8, G-20, WTO, IMF, and World Bank) on global and individual country economic environments, with particular emphasis on non-OECD countries.

GLBL 542 - INTERNATIONAL MACROECONOMIC POLICY FOR MASTER'S STUDENTS
Short Title: INT'L MACROECONOMIC POLICY
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: How does exchange rate policy fit into a country's macroeconomic environment? How do international capital markets constrain policy space? Students will model the linkages between exchange rates, interest rates, capital flows, and prices. The course will emphasize emerging economies.

GLBL 543 - ENERGY POLICY
Short Title: ENERGY POLICY
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MAGA program.
Course Level: Graduate
Description: Energy is credited with many contradictory properties. It is a curse that enables dictatorship and war, undermines the work ethic, and taints our environment. It is also the world's largest business and a chief ingredient of state power, stitching together disparate countries in webs of mutual dependence. Energy shapes our physical landscapes and personal habits, providing services that make us comfortable and secure, while producing waste that threatens this way of life. These are the areas where energy and politics intersect, the topics of concern to this course. Mutually Exclusive: Credit cannot be earned for GLBL 543 and GLBL 541/POST 401/POST 501.

GLBL 551 - CYBERPOLITIK: INTERNATIONAL AFFAIRS IN TECHNOLOGY AND INFORMATION
Short Title: CYBERPOLITIK
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: How are the evolving cases of cyber-attack and breach as well as the actions of government and corporations shaping how cyberspace is governed? What object lessons are there in security cases such as those involving WikiLeaks and the Snowden affair? This course examines the widely pervasive and enormously effective nature of cyber threats today, explaining why cyber-attacks happen, how they matter, and how they may be managed.

GLBL 552 - INTERNATIONAL SECURITY: DE-RISKING NATIONAL THREATS AND BUSINESS THREATS
Short Title: INTERNATIONAL SECURITY
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course seeks to define the risks and risk-mitigation strategies employed by both nation-states and multinational businesses. We will examine how businesses control their risks by following compliance laws around the world. We will also examine what a superpower is within the context of the geopolitical challenges America is facing (fracturing of national institutions/will/consensus, our potential relative decline, shifting alliances, China's rise, the European Union stagnation and diminution, and Russian aggression) as we look to answer the following question: who would even want to be a superpower.
GLBL 553 - INTERNATIONAL CRISIS MANAGEMENT IN A MULTI-RISK, INTER-CONNECTED WORLD
Short Title: INTERNATIONAL CRISIS MGMT
Department: Global Affairs
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Approximately 85% of the nation’s critical infrastructure (water, electricity, food/agriculture, energy, finance, IT, communication, medical, transportation, chemical, etc.), and nearly all of the global banking system is owned and operated by private corporations. How do these corporations prepare for a crisis even that impacts national security, national economic issues, or public order/safety/health, and therefore requires an integrated joint partnership with the government or other organization(s) to plan for and manage the crisis incident?

GLBL 573 - NON-THESIS GRADUATE RESEARCH
Short Title: NON-THESIS GRADUATE RESEARCH
Department: Global Affairs
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment limited to students in the MAGA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Individual research for graduate students in the Master of Global Affairs.

Global Health Technologies (GLHT)

GLHT 201 - INTRODUCTION TO GLOBAL HEALTH
Short Title: INTRO TO GLOBAL HEALTH
Department: Global Health Technologies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course provides an overview of contemporary challenges and advances to improve human health. The course opens with an introduction to the epidemiology and physiology of the major human health problems throughout the world. With this introduction, we examine medical technologies to prevent infection, detect cancer and treat heart disease. The course is designed for non-engineering / non-science majors.

GLHT 314 - SUSTAINABLE WATER PURIFICATION FOR THE DEVELOPING WORLD
Short Title: SUST WTR PURIF FOR DEV WORLD
Department: Global Health Technologies
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is an overview of sustainable strategies for safe water supply in off-the-grid, low-income regions. Topics covered include water quality and treatment, sustainability and WASH (water, sanitation and hygiene). A major element of the course is a project to solve a water-related issue in a real-world context. Cross-list: BIOE 365, CEVE 314. Repeatable for Credit.

GLHT 360 - APPROPRIATE DESIGN FOR GLOBAL HEALTH
Short Title: APPRO DESIGN FOR GLOBAL HEALTH
Department: Global Health Technologies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): GLHT 201
Description: Seminar-style introductory design course covering epidemiology, pathophysiology, health systems, health economics, medical ethics, humanitarian emergencies, scientific and engineering design methods, and appropriate health technology case studies. To register, you must be enrolled in the GLHT minor and submit a 250 statement to beyondtraditionalborders@rice.edu by Monday of preregistration. The minor and course prerequisite is waived for students majoring in Bioengineering. Instructor Permission Required. Cross-list: BIOE 360.

GLHT 361 - METABOLIC ENGINEERING FOR GLOBAL HEALTH ENVIRONMENTS
Short Title: METAB ENG GLOBAL HEALTH ENVMT
Department: Global Health Technologies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (BIOE 362 or GLHT 362) and (PHYS 126 or PHYS 102 or PHYS 112 or PHYS 142) and MATH 102
Description: Importance of nutritional and pharmaceutical compounds, impact of cost of compounds on global health; Overview of biochemical pathways; metabolite analysis; Genetic engineering and molecular biology tools for ME; Pharmaceuticals and drug discovery approaches (antibiotics, antivirals; anti-parasite compounds); anti-diarrhea treatments; vaccines. Cross-list: BIOC 361, BIOE 361.
Course URL: www.btb.rice.edu
GLHT 392 - NEEDS FINDING AND DEVELOPMENT IN BIOENGINEERING
Short Title: NEEDS FINDING & DEV IN BIOE
Department: Global Health Technologies
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students in this course will learn and develop the engineering skill of needs finding in the field of bioengineering focused on designing for disabilities. Students will work in groups with patients with disabilities to identify daily needs and develop design criteria to meet those needs including preliminary prototype development. Instructor Permission Required. Cross-list: BIOE 392.

GLHT 400 - GLOBAL HEALTH TECHNOLOGIES INDEPENDENT RESEARCH PROJECTS
Short Title: GLHT INDEPENDENT RESEARCH
Department: Global Health Technologies
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course enables undergraduates pursuing the Global Health Technologies Minor to perform independent research on a specific design challenge in global health technology and innovation. Students are advised by the faculty and often mentored by a graduate student/post-doc. Instructor Permission Required. Repeatable for Credit.
Course URL: www.btb.rice.edu

GLHT 401 - GLHT RESEARCH PAPER WRITING AND SUBMISSION
Short Title: GLHT RESEARCH REPORTING
Department: Global Health Technologies
Grade Mode: Standard Letter
Course Type: Research
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students in this course will work in the preparation of a paper reporting a previously completed design project. Instructor Permission Required. Repeatable for Credit.

GLHT 411 - INTERGRADED APPROACHES TO SUSTAINABLE DEVELOPMENT
Short Title: SUSTAINABLE DEVELOPMENT
Department: Global Health Technologies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This is a multidisciplinary course in which students explore the origins, connections and consequence of social and political tensions arising from the expansion of commercial energy resources in unique and rapidly changing Arctic and sub-Arctic environments. The challenge for the class will be to understand that in matters of sustainable development systemic complexities often give rise to a disconnect between analysis and decision-making. Topics will include the impacts of commercial energy development and drilling in rapidly changing Arctic environments, as well as strategies that can promote sustainable development and improved conditions for indigenous populations in the context of environmental challenges associated with the Arctic meltdown and drilling activities for oil and gas. Methodologies for structuring the analysis to be applied to enhance systemic resilience of the Alaska environment will be presented. Students will learn explore the barriers to sustainable development and discuss cost-effective, culturally appropriate solutions to energy related issues by integrating technical, organizational, and personal perspectives. Each class will have formal lectures(s) by Rice faculty or guest lecturer. Registered students are eligible to apply for a summer internship in Alaska. Recommended Prerequisite(s): POST 401 Mutually Exclusive; Credit cannot be earned for GLHT 411 and POST 411. Repeatable for Credit.

GLHT 448 - TECHNOLOGY COMMERCIALIZATION IN DEVELOPING COUNTRIES FOR ENGINEERING
Short Title: TECH COMM IN DEV CTY FOR ENGS
Department: Global Health Technologies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This is a unique opportunity for engineering students to 1) collaborate with graduate business students to design and disseminate global health technologies; 2) learn about the sustainable distribution of health products in developing countries; 3) have a once-in-a-lifetime trip to Africa that tourism can never duplicate; and 4) help the poor. Working alongside advanced MBA students, engineering students will apply their skills to developing business plans for student-designed global health technologies that may influence dissemination and business plans. Interested students should email beyondtraditionalborders@rice.edu for an application. Instructor Permission Required.
GLHT 449 - TROUBLESHOOTING WORKSHOP FOR CLINICALLY-RELEVANT BIOMEDICAL EQUIPMENT
Short Title: MED BIOENGINEERING WORKSHOP
Department: Global Health Technologies
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ELEC 243
Description: Bioengineering course in the troubleshooting, repair, and maintenance of standard biomedical equipment used in hospitals in the developed and developing worlds. Cross-list: BIOE 449. Repeatable for Credit.

GLHT 451 - GLOBAL HEALTH DESIGN CHALLENGES I
Short Title: GLOBAL HEALTH DESIGN I
Department: Global Health Technologies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): GLHT 201 and (BIOE 360 or GLHT 360) and (GLHT 363 or BIOS 363 or PSYC 480 or SOCI 345)
Description: Students in this course will work on design projects to address global health disparities. Students will work in teams and partner with bioengineering students to develop solutions to particular problems in delivering healthcare in the developing world. Students must take GLHT 452 in the spring semester to complete their projects. Instructor Permission Required.
Course URL: www.btb.rice.edu

GLHT 452 - GLOBAL HEALTH DESIGN CHALLENGES II
Short Title: GLOBAL HEALTH DESIGN II
Department: Global Health Technologies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): GLHT 451
Description: Students in this course will work on design projects to address global health disparities. Students will work in teams and partner with bioengineering students to develop solutions to particular problems in delivering healthcare in the developing world. Students must have taken GLHT 451 in the fall semester to initiate their projects.
Course URL: www.btb.rice.edu

GLHT 464 - SOCIAL ENTREPRENEURSHIP
Short Title: SOCIAL ENTREPRENEURSHIP
Department: Global Health Technologies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course introduces students to contemporary concepts, debates, and contexts necessary for analyzing and engaging in the sphere of social entrepreneurship. The course has five distinct parts: 1. social entrepreneurship overview; 2. social context and stakeholders; 3. private sector roles and motivations; 4. organizational forms and collaborations; and 5. measurement and impacts (private and public). Students will be exposed to various forms of social entrepreneurship, such as base of the pyramid/microenterprises, private-public partnerships, private-governmental partnerships, voluntary social codes, corporate social responsibility, and ethical consumerism. From this introductory foundation, students will undertake a social entrepreneurship project about a contemporary social problem in Houston: the urban food desert (https://apps.ams.usda.gov/fooddeserts/fooddeserts.aspx). Students will learn a range of research methods (e.g. quantitative data analysis, ethnography, focus groups). With these research tools and building from perspectives offered by earlier by readings, guest speakers, and field visits, students will problematize, propose, develop, and present competing solutions to the social problem during the final course meetings. Cross-list: BUSI 464, SOSC 464.

GLHT 510 - SEMINAR IN TROPICAL MEDICINE
Short Title: SEMINAR IN TROPICAL MEDICINE
Department: Global Health Technologies
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: 8 week lecture series on topics in global health. The theme for this offering is one health; integrating efforts to obtain optimal health for humans, animals, and the environment. Offered in conjunction with the new National School of Tropical Medicine, the course will feature lectures by various experts on the public health issues most pressing in poor populations in the world today. Course open to all undergraduates and graduate students. Cross-list: BIOE 510. Repeatable for Credit.

Greek (GREE)

GREE 101 - ELEMENTARY GREEK I
Short Title: ELEMENTARY GREEK I
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Reading-based introduction to ancient Greek. Readings include passages from classical and New Testament authors. Explanation and analysis of basic grammar, including comparison with English grammar. Besides translating Greek to English (and vice versa), we will consider the language and literature in their historical context, and practice reading ancient Greek aloud.
GREE 102 - ELEMENTARY GREEK II
Short Title: ELEMENTARY GREEK II
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Continuation of GREE 101.

GREE 201 - INTERMEDIATE GREEK I: PROSE
Short Title: INTERMEDIATE GREEK I: PROSE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Review of forms and syntax. Readings from Plato.

GREE 202 - INTERMEDIATE GREEK: EURIPIDES MEDEA/BIBLICAL KOINE
Short Title: INTERMEDIATE GREEK
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Section 1 reads Euripides or Sophocles. Section 2 reads excerpts from New Testament, Septuagint, and Early Christian writers. Includes review of forms and syntax.

GREE 302 - HOMER
Short Title: HOMER
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Open to third and fourth year undergraduates. An opportunity to read the Iliad/Odyssey in the original Greek. Includes review of forms and syntax as well as discussion of Homeric dialect, meter, poetics, and oral tradition. May be repeated (once) for credit. Graduate/Undergraduate Equivalency: GREE 502. Mutually Exclusive: Credit cannot be earned for GREE 302 and GREE 502. Repeatable for Credit.

GREE 305 - PLATO, ARISTOTLE, OR NEW TESTAMENT GREEK
Short Title: PLATO, ARISTOTLE, NEW TESTAMENT GREEK
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Greek prose for third or fourth year undergraduates. Choice of texts flexible depending on the needs and interests of those enrolled. Includes review of forms and syntax. Continuation of GREE 301, with additional texts. May be repeated for credit. Graduate/Undergraduate Equivalency: GREE 505. Mutually Exclusive: Credit cannot be earned for GREE 305 and GREE 505. Repeatable for Credit.

GREE 306 - ADVANCED GREEK: POETRY
Short Title: ADVANCED GREEK: POETRY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is intended for students with at least two prior years of Greek. The course will focus on Greek poetic texts, with an emphasis on Attic tragedy. The course will emphasize poetic vocabulary and grammar, meter, and performance contexts. Texts change each semester. Repeatable for Credit.

GREE 307 - ADVANCED GREEK: PROSE
Short Title: ADVANCED GREEK: PROSE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course is intended for students with at least two prior years of Greek. The course will focus on prose texts, with an emphasis on fifth- and fourth-century authors. The course will emphasize vocabulary, grammar, and historical contexts. Texts change each semester, repeatable for credit. Repeatable for Credit.

GREE 491 - DIRECTED READING
Short Title: DIRECTED READING
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Independent Study
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent work for qualified juniors and seniors in genres or authors not presented in other courses. Instructor Permission Required. Repeatable for Credit.
GREE 492 - DIRECTED READING
Short Title: DIRECTED READING
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Independent Study
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent work for qualified juniors and seniors in genres or authors not presented in other courses. Instructor Permission Required. Repeatable for Credit.

GREE 502 - HOMER
Short Title: HOMER
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Open to graduate students. Read the Iliad/Odyssey in the original Greek. Review of forms and syntax. Discussion of Homeric dialect, meter, poetic forms, and oral tradition. Requirement beyond GREE 302: oral presentation analyzing diction and poetic formulas in a specific passage. Repeatable (once) for credit. Graduate/Undergraduate Equivalency: GREE 302. Mutually Exclusive: Credit cannot be earned for GREE 502 and GREE 302. Repeatable for Credit.

GREE 503 - DIRECTED READING FOR GRADUATE STUDENTS
Short Title: DIRECTED READING GRAD STUDENTS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate level, independent reading course. Topics vary. Repeatable for Credit.

GREE 504 - DIRECTED READING FOR GRADUATE STUDENTS
Short Title: GR STUDENTS DIRECTED READING
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate level, independent reading course. Topics vary. Offered in the spring semester. Repeatable for Credit.

GREE 505 - PLATO, ARISTOTLE, OR NEW TESTAMENT GREEK
Short Title: PLATO,ARISTOTLE,NEW TSTMNT GRK
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Greek prose for graduate students in related disciplines. Choice of texts flexible depending on the needs and interests of those enrolled. Includes review of forms and syntax. Continuation of GREE 501, with additional texts. Additional work required beyond GREE 305, in the form of an oral presentation analyzing the language and style of one or more text in terms of its historical, social, and generic context. May be repeated for credit. Graduate/Undergraduate Equivalency: GREE 305. Mutually Exclusive: Credit cannot be earned for GREE 505 and GREE 305. Repeatable for Credit.

Health Sciences (HEAL)

HEAL 103 - NUTRITION
Short Title: NUTRITION
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Concepts underlying the science of nutrition: food composition, calories and needs for energy, special nutrients, and nutritional deficiencies.

HEAL 119 - INTRODUCTION TO HEALTH AND WELLNESS
Short Title: INTRO TO HEALTH & WELLNESS
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Freshman. Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Designed to help students develop a greater understanding and appreciation of health and well being, as it relates to themselves and others around them, and for students to apply health and wellness knowledge in their personal life to improve their health.

HEAL 132 - MEDICAL TERMINOLOGY
Short Title: MEDICAL TERMINOLOGY
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course introduces the student interested in medical and health professions to a large vocabulary of medical language which develops skills in understanding and remembering new words. It describes word origins, basic terms in anatomy and terms pertaining to each body system as well as pharmacology and medical equipment, and many frequently used medical terms, abbreviations and symbols.
HEAL 208 - CHEMICAL ALTERATIONS OF BEHAVIOR
Short Title: CHEM ALTERATIONS OF BEHAVIOR
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Examination of social, cultural psychological, physiological causes and effects of drug use and abuse. Individual, family, and community factors related to prevention and treatment will be addressed.

HEAL 212 - CONSUMER HEALTH AND THE MEDIA
Short Title: CONSUMER HEALTH AND THE MEDIA
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.

HEAL 222 - PRINCIPLES OF PUBLIC AND COMMUNITY HEALTH
Short Title: PRIN PUBLIC&COMMHEALTH
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Principles of Public & Community Health examines aspects of the community that relate to health including health issues within community subgroups; identification and analysis of community health programs; organizational patterns and functions of voluntary and governmental health agencies and coordination of community health programs.

HEAL 306 - HUMAN SEXUALITY
Short Title: HUMAN SEXUALITY
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Designed to explore the physiological, psychological, and sociological parameters of human sexuality, while providing accurate information and helping students develop healthy attitudes toward sexuality. Cross-list: SWGS 306.

HEAL 313 - FOUNDATIONS OF HEALTH PROMOTION AND EDUCATION
Short Title: FOUNDATIONS HEALTH PROMO&EDUC
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Kinesiology. Graduate level students may not enroll.

HEAL 350 - UNDERSTANDING CANCER
Short Title: UNDERSTANDING CANCER
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: Examination of cancer from a biological, psychological and sociological perspective with emphasis on cancer epidemiology, prevention, and early detection.

HEAL 360 - VIOLENCE IN AMERICA: A PUBLIC HEALTH PERSPECTIVE
Short Title: VIOLENCE IN AMERICA
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Description: This course presents an overview of issues concerning violence using a public health perspective. Information will be presented and discussed concerning several domains pertinent to violence, including family violence, intimate partner violence, community violence, and workplace harassment.

HEAL 379 - INTERNSHIP IN HEALTH SCIENCES
Short Title: INTERNSHIP IN HEALTH SCIENCES
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.

Description: Internship experience for upper-level health sciences majors only. Department Permission Required. Repeatable for Credit.
HEAL 380 - DISPARITIES IN HEALTH IN AMERICA
Short Title: DISPARITIES IN HEALTH IN AMER
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores the aspects of race and ethnicity that influence health, public health policy, and the management and practice of healthcare, as well as, the trends which drive ethnic demographic transition including an aging white population, declining white birth rate, immigration of non-whites, and the higher birth rate of minority groups. Graduate/Undergraduate Equivalency: HEAL 580. Mutually Exclusive: Credit cannot be earned for HEAL 380 and HEAL 580.

HEAL 407 - EPIDEMIOLOGY
Short Title: EPIDEMIOLOGY
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of communicable, noncommunicable, and behavioral diseases with emphasis on the disease process and basic epidemiologic methods. Graduate/Undergraduate Equivalency: HEAL 507. Mutually Exclusive: Credit cannot be earned for HEAL 407 and HEAL 507.

HEAL 422 - THEORIES AND MODELS OF HEALTH BEHAVIOR
Short Title: THEORY&MODELS HLTH BEHAVIOR
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): HEAL 222
Description: Theories & Models of Health Behavior is designed for the student interested in public and community health or health psychology. This course examines the current theories and models of health behavior and their application to the field of health promotion/health education. Graduate/Undergraduate Equivalency: HEAL 522. Mutually Exclusive: Credit cannot be earned for HEAL 422 and HEAL 522.

HEAL 460 - PLANNING AND EVALUATION OF HEALTH PROMOTION AND EDUCATION
Short Title: PLAN/EVAL: HEALTH PROGRAMS
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Junior or Senior. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): HEAL 222
Description: Planning & Evaluation of Health Promotion provides the student with the technical skills for planning and evaluation of health promotion, health education, and disease prevention programs including collection and analysis of both qualitative and quantitative data. Graduate/Undergraduate Equivalency: HEAL 560. Mutually Exclusive: Credit cannot be earned for HEAL 460 and HEAL 560.

HEAL 495 - INDEPENDENT STUDIES IN HEALTH SCIENCES
Short Title: INDEPENDENT STUDIES
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-3
Restrictions: Enrollment limited to students with a class of Junior or Senior. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent study or directed reading on an approved project under faculty supervision. Department Permission Required. Repeatable for Credit.

HEAL 496 - INDEPENDENT STUDIES IN HEALTH SCIENCES
Short Title: INDEPENDENT STUDY
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-3
Restrictions: Enrollment limited to students with a class of Junior or Senior. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent study or directed reading on an approved project under faculty supervision. Instructor Permission Required. Repeatable for Credit.

HEAL 498 - SPECIAL TOPICS IN HEALTH SCIENCES
Short Title: SPECIAL TOPICS
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Topics vary from semester to semester. Repeatable for Credit.

HEAL 499 - TEACHING PRACTICUM IN HEALTH SCIENCES
Short Title: TEACH PRACTICUM HEALTH SCIENCE
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Advanced teaching experience for upper level students who have demonstrated particular aptitude and interest in one area of kinesiology. Students will assist in conducting a course in which they have previously excelled. The student will learn techniques in course management, instruction, and evaluation. Department Permission Required. Recommended prerequisite(s): Junior or Senior standing, declared major in Health Sciences, and at least an "A-" in the course serving as the practicum. Repeatable for Credit.
**HEAL 507 - EPIDEMIOLOGY**
Short Title: EPIDEMIOLOGY  
Department: Kinesiology  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Study of communicable, noncommunicable, and behavioral diseases with emphasis on the disease process and basic epidemiologic methods. Graduate level students only. Instructor Permission Required. Graduate/Undergraduate Equivalency: HEAL 407. Mutually Exclusive: Credit cannot be earned for HEAL 507 and HEAL 407.

**HEAL 522 - THEORIES AND MODELS OF HEALTH BEHAVIOR**
Short Title: THEORY&MODELS HLTH BEHAVIOR  
Department: Kinesiology  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Theories & Models of Health Behavior is designed for the student interested in public and community health or health psychology. This course examines the current theories and models of health behavior and their application to the field of health promotion/health education. Graduate level students only. Instructor Permission Required. Graduate/Undergraduate Equivalency: HEAL 422. Mutually Exclusive: Credit cannot be earned for HEAL 522 and HEAL 422.

**HEAL 560 - PLANNING AND EVALUATION OF HEALTH PROMOTION AND EDUCATION**
Short Title: PLAN/EVAL: HEALTH PROGRAMS  
Department: Kinesiology  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Planning & Evaluation of Health Promotion provides the student with the technical skills for planning and evaluation of health promotion, health education, and disease prevention programs including collection and analysis of both qualitative and quantitative data. Graduate level students only. Instructor Permission Required. Graduate/Undergraduate Equivalency: HEAL 460. Mutually Exclusive: Credit cannot be earned for HEAL 560 and HEAL 460.

**HEAL 580 - DISPARITIES IN HEALTH IN AMERICA**
Short Title: DISPARITIES IN HEALTH IN AMER  
Department: Kinesiology  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course explores the aspects of race and ethnicity that influence health, public health policy, and the management and practice of healthcare, as well as, the trends which drive ethnic demographic transition including an aging white population, declining white birth rate, immigration of non-whites, and the higher birth rate of minority groups. Graduate level students only. Instructor Permission Required. Graduate/Undergraduate Equivalency: HEAL 380. Mutually Exclusive: Credit cannot be earned for HEAL 580 and HEAL 380.

**Hebrew (HEBR)**

**HEBR 125 - INTRODUCTION TO BIBLICAL HEBREW I**
Short Title: INTRO TO BIBLICAL HEBREW I  
Department: Cntr Lang & Intercultural Comm  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: An introduction to Biblical Hebrew with emphasis on grammar and vocabulary. Cross-list: RELI 125.

**HEBR 126 - INTRODUCTION TO BIBLICAL HEBREW II**
Short Title: INTRO TO BIBLICAL HEBREW II  
Department: Cntr Lang & Intercultural Comm  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Continuation of RELI 125. We will finish the grammar in the second half of this semester and then read selections from the Hebrew Bible. Cross-list: RELI 126.

**HEBR 128 - INTERMEDIATE BIBLICAL HEBREW IV**
Short Title: INTERM BIBLICAL HEBREW IV  
Department: Cntr Lang & Intercultural Comm  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Continuation of RELI 127 (RELI 127 is not a prerequisite). Cross-list: RELI 128.

**HEBR 141 - FIRST YEAR HEBREW I**
Short Title: FIRST YEAR HEBREW I  
Department: Cntr Lang & Intercultural Comm  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Development of interactional competence in Hebrew (sociolinguistic and sociocultural knowledge) to communicate and interact with speakers of Hebrew. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. No prior knowledge of this language is necessary. Recommended Prerequisite(s): Placement Test. Mutually Exclusive: Credit cannot be earned for HEBR 141 and HEBR 161.
HEBR 142 - FIRST YEAR HEBREW II
Short Title: FIRST YEAR HEBREW II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Continuation of HEBR 141. Development of interactional competence in Hebrew (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Hebrew. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Recommended Prerequisite(s): HEBR 101 or HEBR 141 or Placement Test. Mutually Exclusive: Credit cannot be earned for HEBR 142 and HEBR 262.

HEBR 263 - SECOND YEAR HEBREW I
Short Title: SECOND YEAR HEBREW I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Continuation of HEBR 142. Development of interactional competence in Hebrew (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Hebrew. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Recommended Prerequisite(s): HEBR 201 or HEBR 142 or Placement Test. Mutually Exclusive: Credit cannot be earned for HEBR 263 and HEBR 201.

Course URL: clichewishblogs.rice.edu

HEBR 264 - SECOND YEAR HEBREW II
Short Title: SECOND YEAR HEBREW II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Continuation of HEBR 263. Development of interactional competence in Hebrew (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Hebrew. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Recommended Prerequisite(s): HEBR 202 or HEBR 263 or Placement Test. Mutually Exclusive: Credit cannot be earned for HEBR 264 and HEBR 202.

Course URL: clichewishblogs.rice.edu

Hindi (HIND)

HIND 106 - ACCELERATED FIRST YEAR HINDI
Short Title: ACCEL FIRST YEAR HINDI
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Alternate first year Hindi for students who have some knowledge of spoken Hindi. This is an intensive course covering the equivalents of HIND 141 and 142. Students will be prepared for HIND 263 upon completion of the course. Placement Test is required.

Course URL: clichinidiblogs.rice.edu

HIND 141 - FIRST YEAR HINDI I
Short Title: FIRST YEAR HINDI I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Development of interactional competence in Hindi (sociolinguistic and sociocultural knowledge) to communicate and interact with speakers of Hindi. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. No prior knowledge of this language is necessary. Placement Test is required. Mutually Exclusive: Credit cannot be earned for HIND 141 and HIND 161.

Course URL: hindiclicblogs.rice.edu

HIND 142 - FIRST YEAR HINDI II
Short Title: FIRST YEAR HINDI II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): HIND 141
Description: Continuation of HIND 141. Development of interactional competence in Hindi (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Hindi. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for HIND 142 and HIND 262.

Course URL: hindiclicblogs.rice.edu
HIND 263 - SECOND YEAR HINDI I
Short Title: SECOND YEAR HINDI I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): HIND 142
Description: Continuation of HIND 142. Development of interactional competence in Hindi (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Hindi. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition.
Course URL: clichindi.blogs.rice.edu

HIND 264 - SECOND YEAR HINDI II
Short Title: SECOND YEAR HINDI II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): HIND 263
Description: Continuation of HIND 263. Development of interactional competence in Hindi (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Hindi. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition.
Course URL: clichindi.blogs.rice.edu

HIND 301 - THIRD YEAR HINDI I
Short Title: THIRD YEAR HINDI I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): HIND 264
Description: Continuation of HIND 264. Emphasis on developing reading and writing ability as more authentic materials and socio-cultural topics are introduced.
Course URL: clichindi.blogs.rice.edu

HIND 302 - THIRD YEAR HINDI II
Short Title: THIRD YEAR HINDI II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): HIND 301
Description: Continuation of HIND 301. Emphasis on developing reading and writing ability as more authentic materials and socio-cultural topics are introduced.
Course URL: clichindi.blogs.rice.edu

HIND 398 - HINDI TEACHING PRACTICUM
Short Title: HINDI TEACHING PRACTICUM
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students will work with instructor closely to acquire teaching skills in tutoring in Hindi. Instructor Permission Required. Repeatable for Credit.

HIND 399 - HINDI TEACHING PRACTICUM
Short Title: HINDI TEACHING PRACTICUM
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-6
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Students will work with instructor closely to acquire teaching skills in tutoring in Hindi. Instructor Permission Required. Repeatable for Credit.

History (HIST)

HIST 101 - MODERN EUROPE, 1500-1789
Short Title: MODERN EUROPE, 1500-1789
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Course provides an introduction to European history from 1500 to the French Revolution, tracing Europe's rise to world dominance via capitalism, the nation-state, science and technology, and a secular world view. It asks how conditions in the rest of the world allowed European imperialism and colonialism to triumph. Mutually Exclusive: Credit cannot be earned for HIST 101 and HIST 325.

HIST 102 - MODERN EUROPE, 1789-PRESENT
Short Title: MODERN EUROPE 1789-PRESENT
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Course provides an introduction to European history between the French Revolution and the collapse of the Soviet system in 1989-1990. The course examines industrialization, the development of the nation-state, World War One, fascism and communism, World War Two, European integration, decolonization and the Velvet Revolutions of 1989. Mutually Exclusive: Credit cannot be earned for HIST 102 and HIST 326.
HIST 103 - AP/OTH CREDIT IN EUROPEAN HISTORY I
Short Title: AP/OTH CREDIT IN EUROPEAN HISTORY
Department: History
Grade Mode: Transfer Courses
Course Type: Transfer
Credit Hours: 3
Course Level: Undergraduate Lower-Level
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation.

HIST 105 - AP/OTH CREDIT IN UNITED STATES HISTORY I
Short Title: AP/OTH CREDIT IN UNITED STATES HISTORY
Department: History
Grade Mode: Transfer Courses
Course Type: Transfer
Credit Hours: 3
Course Level: Undergraduate Lower-Level
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation.

HIST 107 - AP/OTH CREDIT IN WORLD HISTORY
Short Title: AP/OTH CREDIT IN WORLD HISTORY
Department: History
Grade Mode: Transfer Courses
Course Type: Transfer
Credit Hours: 3
Course Level: Undergraduate Lower-Level
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation.

HIST 108 - WORLD HISTORY SINCE 1492
Short Title: WORLD HISTORY SINCE 1492
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Class will explore the last 500 years of world history. The focus will be four long-term processes that have shaped the world today: struggles between Europeans and colonized peoples; forms of producing and exchanging goods; formation and spread of the modern state; and the development of 'bourgeois' ways of living.

HIST 111 - RED, WHITE AND BLACK IN EARLY AMERICA CREATING RACIAL IDENTIES IN THE ERA OF THE AMERICAN REVOLUTION
Short Title: RED, WHITE, & BLACK EARLY AMERICA
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This class analyzes the way peoples of African, American and European descent in North America came to think of themselves as members of different racial groups from about 1750 to 1820. The class will include a mixture of lectures and discussion.

HIST 117 - EARLY AMERICA
Short Title: EARLY AMERICA
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of North America from 1500 to the conclusion of the Mexican War.

HIST 118 - THE UNITED STATES, 1848 TO THE PRESENT
Short Title: UNITED STATES 1848-PRESENT
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A continuation of HIST 117 (though 117 is not a prerequisite) surveying the social, political, cultural, and economic history of the United States from the end of the Mexican War to the present.

HIST 120 - MEDIEVAL CIVILIZATIONS
Short Title: MEDIEVAL CIVILIZATIONS
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Focusing on the period between 300-1500 CE, the course will survey political institutions, society, and culture in medieval European, Byzantine, and Islamic civilizations. Topics include Christianization of Europe, the rise of Islam, the Crusades, scholastic theology, persecution of heretics, bubonic plague, and the rise of centralized monarchies. Cross-list: MDEM 120.
Studies Minor core requirement.

politics and culture and impact on world history. Counts towards Jewish

thoughts disappear. This course studies Jewish religion, ethnicity,
cultures, Jews have adapted enough to preserve their heritage but not so

the entire planet. Throughout their history as a minority amid majority

Description: Seminar traces the history and politics of the Arab-Israeli

conflict, delving into both Palestinian and Israeli understandings of the

past and present using books, documentaries, and films. The course

seeks to understand how and at what costs Israeli and Palestinian

nationalisms have been constructed and analyzes U.S. involvement in the

conflict. This course is limited to first-year students only; any others will

be removed from this course. Cross-list: FSEM 144.

HIST 151 - THE HERO AND HIS COMPANION FROM GILGAMESH TO SAM

SPADE

Short Title: THE HERO & HIS COMPANION

Department: History

Graduation: Standard Letter

Course Type: Seminar

Distribution Group: Distribution Group I

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Lower-Level

Description: How does presentation of heroic action illustrate the basic

values of society? Historical sources including ancient texts, modern

mystery stories, and two "western" movies, show the development of a

style of community service linking heroism with alienation. The extent
to which women participate will be traced. This course is limited to first-

year students only; any others will be removed from this course. Cross-

list: FSEM 151.

HIST 186 - HISTORICAL SURVEY OF JEWISH CIVILIZATION FROM ITS

ORIGINS TO THE PRESENT

Short Title: HISTORICAL SURVEY JEWISH CIV.

Department: History

Grade Mode: Standard Letter

Course Type: Lecture

Credit Hours: 3

Restrictions: Graduate level students may not enroll.

Course Level: Undergraduate Lower-Level

Description: Jewish civilization spans over 3,000 years and virtually

the entire planet. Throughout their history as a minority amid majority

cultures, Jews have adapted enough to preserve their heritage but not so

much that they disappear. This course studies Jewish religion, ethnicity,

politics and culture and impact on world history. Counts towards Jewish

Studies Minor core requirement.
HIST 203 - DEEP HISTORY FROM THE ORIGINS OF HUMANITY TO TODAY
Short Title: DEEP HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Key developments from the origins of humanity 6 million years ago to the modern world, explored through discussions and lectures. Open to all undergraduates.

HIST 204 - THE IDEA OF AFRICA
Short Title: THE IDEA OF AFRICA
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Traces Western perceptions of Africa as a geographic, political and racial entity, from ancient times to the present day through a variety of media, including ancient texts, travelogues, maps, slave narratives, novels, films, museum exhibits in Houston, and journalists' reports. Mutually Exclusive: Credit cannot be earned for HIST 204 and FSEM 155/HIST 155.

HIST 205 - MEDIEVAL MEDITERRANEAN WORLD
Short Title: MEDIEVAL MEDITERRANEAN WORLD
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Course examines the political, institutional, military, and cultural development of the societies that successively dominated the "Middle Sea" from AD 500-1500 in Europe and the Islamic World. It highlights the Mediterranean legacy of commercial, cultural, and religious exchange and coexistence, as well as its history of confrontation and warfare. Cross-list: MDEM 210.

HIST 206 - INTRODUCTION TO ASIAN CIVILIZATIONS
Short Title: INTRO TO ASIAN CIVILIZATIONS
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A team-taught interdisciplinary course focusing on certain major philosophical, religious and artistic traditions of pre-modern Asia, with an emphasis on the historical processes by which ideas, people, products, technologies and skills circulated within and beyond state boundaries. Cross-list: ASIA 211, HART 211.

HIST 207 - SPATIAL HISTORY AND HISTORICAL GIS
Short Title: SPATIAL HISTORY HISTORICAL GIS
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course introduces students to the emerging methodologies that combine geographic information systems (GIS) with historical thinking. Students will study and evaluate the benefits and limitations of key works in historical GIS, become familiar with basic principles of cartographic design, and learn technical skills to create their own HGIS project.

HIST 209 - AMERICAN URBAN HISTORY, 1609 TO TODAY
Short Title: AMERICAN URBAN HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course surveys American urban history from colonial times to the present day. Students will study how American cities formed and altered the shape of the nation. Topic areas include urban politics, city planning the built environment, and racial and ethnic diversity.

HIST 211 - MEDIEVAL VIOLENCE
Short Title: MEDIEVAL VIOLENCE
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Discussion course looks at private and large-scale warfare during the European Middle Ages. It considers how violence was legitimized and carried out, and examines attitudes towards violence and its effects on society. Topics include theoretical approaches to violence, crusading, chivalry, Truce of God, rituals of violence, military technologies, and cinematic portrayals of medieval warfare. Cross-list: MDEM 210.

HIST 212 - CONTEMPORARY CHINA
Short Title: CONTEMPORARY CHINA
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of 40 year period (post socialism) 1976-2016 known as "China's Rise." Focus on social, political, intellectual, economic change and China's globalization.
HIST 214 - CARIBBEAN NATION BUILDING
Short Title: CARIBBEAN NATION BUILDING
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Course will focus on the slow, steady process through which nation states emerged in the Caribbean from the 18th century to the present, as well as the difficulties they face amidst increasing globalization. Equivalency: HIST 314. Mutually Exclusive: Credit cannot be earned for HIST 214 and HIST 314.

HIST 215 - BLACKS IN THE AMERICAS
Short Title: BLACKS IN THE AMERICAS
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Comparative survey of black people in the Americas from the late 15th century to the present examines the Atlantic slave trade, the movement toward slave emancipation in various countries, and 19th century black self-help efforts. Course also concentrates on economic and social conditions for blacks in the 20th and 21st centuries. Equivalency: HIST 315. Mutually Exclusive: Credit cannot be earned for HIST 215 and HIST 315.

HIST 216 - BLACK LIFE IN THE NINETEENTH-CENTURY UNITED STATES
Short Title: BLACK LIFE IN THE 19TH C. U.S.
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course traces the lives of people of African descent in America before and after the Civil War, an event which transformed enslaved people from property to citizens and forced the country to determine the place of these new citizens in American society.

HIST 217 - HISTORY: THE WORKSHOP
Short Title: HISTORY: THE WORKSHOP
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course introduces students to the craft of history; formulating a question for inquiry, finding and analyzing primary sources, critiquing secondary source, and constructing an argument in support of a thesis. Recommended for History Majors and open to all majors.

HIST 218 - HISTORY THROUGH FILM IN EAST AND NORTHEAST ASIA
Short Title: EAST/NORTHEAST ASIA FILM HIST
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level

HIST 225 - EUROPE SINCE 1945
Short Title: EUROPE SINCE 1945
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of the history of Europe from the end of World War II to 1989. The course focuses on the impact of the war on European societies as well as on decolonization, European unification, economic reconstruction, immigration, and the rise and fall of communism in Eastern Europe.

HIST 226 - COLONIAL SPANISH AMERICA
Short Title: COLONIAL SPANISH AMERICA
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of Latin American History, from 1492 to the 1820's, including the European background and the major New World indigenous civilizations. The course will examine the pre-Columbian societies, the impact of conquest and colonization, colonial political economy, slave systems and indigenous peasantry and the collapse of Iberian colonialism.

HIST 227 - LATIN AMERICAN CULTURAL TRADITIONS
Short Title: LATIN AM CULTURAL TRADITIONS
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A synthetic overview of the emergence of Latin American culture and society beginning with the 16th century encounters and continuing through independence in the 19th century. Discovery, conquest, slavery, family life, religious beliefs, and urban and rural communities are explored through chronicles, visual images, music, and maps.
HIST 228 - MODERN LATIN AMERICA
Short Title: MODERN LATIN AMERICA
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Course introduces the student to the history of contemporary Latin America. For the most part political events will provide the periodic framework of the course, but we shall also consider major economic, social and cultural developments to understand the complex social formations that comprise contemporary Latin American societies.

HIST 229 - HISTORY OF SOUTH AFRICA
Short Title: HISTORY OF SOUTH AFRICA
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level

Short Title: SPORTS, EMPIRE AND NATION
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course examines the history of the world since the 19th century through the lens of sports and athletics. It investigates who/why sport emerged as social activity and became entrenched in the modern world and what this historical development can tell us about political, social, economic and cultural change.

HIST 231 - INTRODUCTION TO AFRICAN HISTORY: NORTH, WEST, AND CENTRAL AFRICA: EARLY TIMES TO PRESENT
Short Title: AFRICAN HIST:NORTH/WEST/CENT
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: History of societies of North, West, and West-Central Africa, earliest times to the present. Through primary sources like archaeological remains, royal epics, Arabic manuscripts, travelogues, and personal narratives, we explore the rise of kingdoms, spread of Islam, slave trade, colonialism, and independence, and themes like mobility, the environment, and corruption.

HIST 232 - INTRODUCTION TO AFRICAN HISTORY: EAST, CENTRAL, AND SOUTHERN AFRICA, EARLY TIMES TO PRESENT
Short Title: AFRICAN HIST: EAST/CENT/SOUTH
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: History of societies of East, Central and Southern Africa, earliest times to the present. Through primary sources like vocabulary from dead languages, art, archaeological remains, photographs, oral traditions, and journalists' accounts, we explore Swahili origins, Great Zimbabwe, African slavery, colonialism, independence, Rwandan genocide, and themes like ethnicity, gender, and poverty.

HIST 233 - HISTORY OF MODERN SCIENCE
Short Title: HISTORY OF MODERN SCIENCE
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Main issues in the history of modern science from the Ancient Greeks to the present. Topics include: the Scientific Revolution, Newtonianism in the 18th century, Darwinism and evolution, the relativity and quantum revolutions in physics in the early 20th century, and recent developments in the life sciences like molecular biology.

HIST 234 - STATE, SOCIETY, AND THE ECONOMY IN THE MODERN MIDDLE EAST
Short Title: MIDDLE EAST:SOCIETY/STATE/ECON
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Arab societies are often studied through the lens of cultural, religious, tribal, or kinship relations, with little attention to the role of the state and the economy. This course will examine the intersection of politics, social movements, and economics in the building of nation-states from the collapse of the Ottoman Empire and up to the Arab uprisings.

HIST 239 - NATIVE AMERICAN HISTORY: FROM EUROPEAN CONTACT TO THE ERA OF REMOVAL
Short Title: NATIVE AMERICAN HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course will cover the history of Native Americans from the time of European arrival in the Americas until the era of removal.
HIST 241 - U.S. WOMEN'S HISTORY I: COLONIAL BEGINNINGS TO THE CIVIL WAR
Short Title: U.S. WOMEN'S HISTORY, I
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of American women's history examines the lives of elite, working, black, Indian, and white women, and traces changes in women's legal, political, and economic status from the mid-17th century through the Civil War. Topics include slavery, suffrage, sexuality, and feminism. Cross-list: SWGS 234.

HIST 242 - U.S. WOMEN'S HISTORY II: CIVIL WAR TO THE PRESENT
Short Title: U.S. WOMEN'S HISTORY, II
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of American women's history examines the lives of black, Asian American, Chicana, native American, and white women, and traces changes in women's legal, political, and economic status from the Civil War to the present. Topics include suffrage, anti-lynching, welfare, birth control, and the modern civil rights and feminist movements. Cross-list: SWGS 235.

HIST 243 - COPERNICUS TO DARWIN
Short Title: COPERNICUS TO DARWIN
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Main issues in the history of science from 1543 to 1859. Topics include: the medieval Aristotelian legacy, the Scientific Revolution, Newtonianism in the 18th Century, and Darwinism and evolution.

HIST 244 - GLOBALIZING MUSEUM HISTORY
Short Title: GLOBALIZING MUSEUM HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Examining museums in global history gives critical insight into their present role in society. Museums were sites of identity at local, regional, national, imperial and global levels. The collection and display of objects allowed communities, states, and empires to use cultural heritage, history, and science to interpret the past.

HIST 246 - AMERICAN CIVIL WAR ERA
Short Title: AMERICAN CIVIL WAR ERA
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of the Civil War era from 1848 to 1876. Topics include the causes of the war; the mobilization of Northern and Southern armies; race, slavery and emancipation; Reconstruction; the Civil War in contemporary popular culture and memory; and the global dimensions of the war and its aftermath.

HIST 251 - CONTINUITIES AND CHANGES IN BRAZILIAN HISTORY
Short Title: BRAZIL: CONTINUITY & CHANGE
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An exploration of themes essential to understanding modern Brazil, such as the origins of a multi-racial society, the transition from monoculture to industry, authoritarian and democratic trends, the emergence of a uniquely Brazilian culture, and the conflicts - environmental, political, and economic - over the development of the Amazon. Cross-list: LASR 251.

HIST 256 - EUROPEAN POLITICS AND SOCIETY, 1890-1945
Short Title: EUR POLITICS&SOCIETY,1890-1945
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Examination of European history in the age of total war. Includes imperialism and the development of the welfare state, institutional responses to the demands of total warfare, the crisis of liberal constitutionalism, the Russian Revolution, and the rise of fascism.

HIST 259 - US IN THE 1960s AND 70s
Short Title: US IN THE 1960s AND 70s
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: A political, cultural and economic history of the 1960s and 70s, with special attention to American culture and public policy.
HIST 266 - SLAVERY AND THE FOUNDING FATHERS
Short Title: SLAVERY & THE FOUNDING FATHERS
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Course will explore the Founding Fathers’ attitudes towards slavery, towards slavery, and towards racial difference, beginning with interpretations of the Founders as a group, and moving to case studies of individual founders. Students will write a paper about the engagement with slavery of one person from the founding generation.

HIST 268 - MODERN SLAVERY
Short Title: MODERN SLAVERY
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Slavery has re-emerged as a global issue in the 21st century. This course explores various forms of slavery and slave trades globally from the 17th century to the present, examining the emergence of contemporary human trafficking.

HIST 271 - HISTORY OF SOUTH ASIA
Short Title: HISTORY OF SOUTH ASIA
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to the history of the cultural, religious, economic and political systems of South Asia, beginning with the development of world religious systems such as Hinduism and Buddhism, indigenous state-building, the rise of Islamic power, emergent European colonialism, and subsequent resistance movements which resulted in South Asian independence in mid-20th century.

HIST 275 - MODERN MIDDLE EAST
Short Title: MODERN MIDDLE EAST
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course is an introduction to the history of the Modern Middle East. It covers the main events that shaped the region from the final years of the Ottoman Empire, to the creation of the nation-states by Western colonialism, to the struggles for independence and decolonization.

HIST 276 - MODERN ARAB HISTORY
Short Title: MODERN ARAB HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of the history and culture of the Arab world from World War I to the present. Topics include nationalism, colonialism, modern secular and Islamist politics and the “Arab Spring.” Equivalency: HIST 378. Mutually Exclusive: Credit cannot be earned for HIST 276 and HIST 378.

HIST 279 - THE CARIBBEAN IN THE AGE OF REVOLUTION, 1770-1820
Short Title: THE CARIBBEAN IN REVOLUTION
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An examination and analysis of Caribbean societies as they sought to adjust to forces unleashed by the American and French Revolutions amidst mounting antislavery sentiment in the western world. Equivalency: HIST 379. Mutually Exclusive: Credit cannot be earned for HIST 279 and HIST 379.

HIST 281 - THE MIDDLE EAST FROM THE PROPHET MUHAMMAD TO SULAYMAN THE MAGNIFICENT
Short Title: PREMODERN MIDDLE EAST HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Introduction to the Middle East from the rise of Islam to the middle of the 16th century. Topics include conquests and classical Islamic states, Arabization, Jewish and Christian communities, impact of Turkic peoples, and the Ottoman Empire, with emphasis on social, cultural, and political trends that shaped the region’s history. Cross-list: MDEM 281.

HIST 284 - SLAVERY & THE FOUNDER FATHERS
Short Title: SLAVERY & THE FOUNDER FATHERS
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course is an introduction to the history of the Modern Middle East. It covers the main events that shaped the region from the final years of the Ottoman Empire, to the creation of the nation-states by Western colonialism, to the struggles for independence and decolonization.

HIST 291 - 20TH CENTURY AMERICAN PRESIDENTS
Short Title: 20TH C. AMERICAN PRESIDENTS
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Course will study the American presidency and the evolving use of executive power from Theodore Roosevelt to Bill Clinton. It will analyze how presidents develop foreign and domestic policy, relate to congress and their cabinets, and lead the nation in wartime.
HIST 295 - THE AMERICAN SOUTH
Short Title: THE AMERICAN SOUTH
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Survey of the American South from development of Native American cultures to present. Topics include slavery and plantation economy; emergence of southern distinctiveness; Civil War and Reconstruction; political reform and the civil rights movement; rise of the Sunbelt, southern religion, music, and literature; and the future of southern regionalism. Equivalency: HIST 395. Mutually Exclusive: Credit cannot be earned for HIST 295 and HIST 395.

HIST 300 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: History
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent study under the supervision of a history faculty member. Hours are variable. Instructor Permission Required. Repeatable for Credit.

HIST 302 - TRADITIONAL CHINESE CULTURE
Short Title: TRADITIONAL CHINESE CULTURE
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An interpretive introduction to the language, philosophy, religion, art, literature, and social customs of premodern China.

HIST 305 - HISTORIES OF WORK
Short Title: HISTORIES OF WORK
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Work has been about earning a living, but also about identity, creativity, morality, and much else for people shaped by the modern capitalist world. This course draws mostly on Europe but also the Americas and other colonial and postcolonial societies since 1492 to examine the experiences and meanings of work.

HIST 307 - IMPERIAL ROME FROM CAESAR TO DIOCLETIAN
Short Title: IMPERIAL ROME
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examination of how Rome acquired, maintained, and understood her empire. Includes the development of a political, social, and ideological system reaching from Scotland to Mesopotamia during the three centuries of Rome’s greatest power.

HIST 308 - THE WORLD OF LATE ANTIQUITY
Short Title: THE WORLD OF LATE ANTIQUITY
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of the social, religious, and political history of the Roman world from Diocletian to the rise of Islam, with emphasis on the breaking of the unity of the Mediterranean world and the emergence of early medieval societies in the east and west. Cross-list: MDEM 308.

HIST 309 - CHINESE INTELLECTUAL HISTORY
Short Title: CHINESE INTELLECTUAL HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Framework and categories of modern Chinese intellectual history and its major traditions of thought in early modern and modern period.

HIST 311 - SEX, GENDER, AND FAMILY IN EUROPE, 1300-1700
Short Title: SEX & GEN IN EUROPE, 1300-1700
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: What did it mean to be child, woman, or man in Europe between 1300 and 1700? This course explores the experiences of nuns, soldiers, courtesans, sodomites, apprentices, witches, and slaves. It examines the construction of sexual identity in a period of dramatic change and increasing entanglement with non-Christian cultures.
HIST 312 - BIOMEDICAL APPROACH TO HISTORY
Short Title: BIOMEDICAL APPROACH TO HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This is a course in history of medicine, diseases and public health, demography, and nutrition. It delves on classic works on the history of human societies. It will also use historical studies from particular disciplines such as biology, demography, medicine, nutrition, anthropology, and economic concentrating around disease, medicine and public health.

HIST 314 - CARIBBEAN NATION BUILDING
Short Title: CARIBBEAN NATION BUILDING
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines the concept of "paganism" from the first through seventh centuries A.D. Includes examination of the mutually tolerant character of Roman religions, invention of the category, and Christian application to all polytheists of the empire and beyond. Cross-list: CLAS 318.

HIST 315 - BLACKS IN THE AMERICAS
Short Title: BLACKS IN THE AMERICAS
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Enriched version of HIST 215. Students may not receive credit for both HIST 215 and 315. Equivalency: HIST 215. Mutually Exclusive: Credit cannot be earned for HIST 314 and HIST 214.

HIST 316 - THE INVENTION OF PAGANISM IN THE ROMAN EMPIRE
Short Title: INVENTION OF PAGANISM
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course examines the concept of "paganism" from the first through seventh centuries A.D. Includes examination of the mutually tolerant character of Roman religions, invention of the category, and Christian application to all polytheists of the empire and beyond. Cross-list: CLAS 318.

HIST 318 - DIGITAL HISTORY METHODS
Short Title: DIGITAL HISTORY METHODS
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Explores the use of computers and new media to conduct historical research and communicate its results. While working on their own digital projects, students will consider questions like: How should history be written in the age of Google? How will historians deal with primary sources like tweets and blogs?

HIST 320 - IMPERIAL GARDENS: A CULTURAL COMPARISON
Short Title: IMPERIAL GARDENS
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course will examine the design and development of gardens (primarily those of the Islamic world - Al Andalus, the Middle East, Persia, Central and South Asia) and their use as political and religious metaphors, havens for meditation, stages of imperial performance and ritual, sites of social interaction, and affirmations of power and legitimacy.

HIST 321 - US ENVIRONMENTAL HISTORY
Short Title: US ENVIRONMENTAL HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An introduction to the interaction between humans and the natural environment in the present United States from the colonial era to recent environmentalism. The course will center on discussion and writing; readings will include primary sources as well as secondary analysis.

HIST 324 - COEXISTENCE IN MEDIEVAL SPAIN
Short Title: COEXISTENCE IN MEDIEVAL SPAIN
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course explores the history of the Iberian Peninsula from late Antiquity to the early 16th century, focusing on coexistence and conflict between medieval Spain's three religious communities - Christians, Jews, and Muslims. Cross-list: MDEM 324.
HIST 327 - MEDIEVAL BORDERLANDS
Short Title: MEDIEVAL BORDERLANDS
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Courses examines the military, political, social and cultural developments on the European frontiers between 500-1500 AD. Topics include colonization and conquest, crusades and Spanish Reconquista, piracy, slavery, encounters with native peoples, spread of Christianity, medieval colonial regimes, map-making and cultural exchanges. Cross-list: MDEM 327.

HIST 328 - POVERTY AND SOCIAL JUSTICE IN LATIN AMERICA
Short Title: POVERTY & SOCIAL JUSTICE
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course surveys the economic, political, social, environmental and geographic origins of poverty and inequality in Latin American countries since independence. It compares welfare policies to promote social justices across these nations and examines their different outcomes in historical perspective.

HIST 329 - STREETS AND URBAN LIFE: PARIS TO ISTANBUL
Short Title: STREETS AND URBAN LIFE
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Exploration of the street as a focus of urban life in 18th and 19th century. We will look at ways streets functioned as spaces of livelihood, sociability, and transgression in cities such as London, Paris, Istanbul, Amsterdam and Cairo. Cross-list: ARCH 329, HART 329.

HIST 330 - ATLANTIC SLAVE TRADE AND THE ORIGINS OF AFRO-AMERICA
Short Title: SLAVE TRADE & AFRO-AMERICA
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An examination of black society, culture, and politics from the late 15th century through the late 18th century (focusing geographically on the Caribbean, and on black life within what is now Mexico and the United States).

HIST 333 - THE CULTURE OF IDENTITY POLITICS IN CONTEMPORARY BRAZIL
Short Title: CULTURE AND IDENTITY IN BRAZIL
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course introduces students to popular cultural manifestations in the form of festivals and artistic movements in the Nordeste of Brazil. The objective is to show how the cultural can be deeply political, with cultural manifestations speaking to everyday forms of representation, new identity formations, and struggles for social justice. Cross-list: ANTH 334.

HIST 334 - AFRICAN VOICES, AFRICAN HISTORIES: TOPICS IN ORAL AND WRITTEN LITERATURE AS HISTORICAL SOURCE
Short Title: AFRICAN VOICES, HISTORIES
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Explores oral and written sources produced by Africans since 1800. Students will examine sources usually considered "literature" - poetry, oral narratives, novels, philosophy - and consider how Africans conceived of valued, and expressed history in their own words.

HIST 335 - CARIBBEAN HISTORY TO 1838
Short Title: CARIBBEAN HISTORY TO 1838
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of Caribbean history from the arrival of the Europeans to the abolition of slavery in the British West Indies in 1838, with emphasis on the social and economic history of the region. Includes the question of why slavery and the plantation system emerged and fell.

HIST 336 - CARIBBEAN HISTORY 1838-TO PRESENT
Short Title: CARIBBEAN HISTORY 1838-PRESENT
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of the social, economic, and political history of the Caribbean people from the abolition of slavery to the emergence of independent nations in the modern era.
HIST 337 - LATIN AMERICAN PERSPECTIVES  
Short Title: LATIN AMERICAN PERSPECTIVES  
Department: History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Through an analysis of sea charts, maps, paintings, and city and town plans this course traces the changes in Latin American peoples, landscapes, and settlements from the time of contact (1492) to independence in the early 19th century. Attention will be given to European, Indigenous, and emerging "Latin American" perspectives.

HIST 338 - 19TH CENTURY WOMEN'S NARRATIVES  
Short Title: 19TH C. WOMEN'S NARRATIVES  
Department: History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course examines the experiences of women in the United States during the nineteenth century through first-hand accounts and scholarly readings. Students will read a variety of materials to explore the social and legal status of women and consider the impact of race on women's lives. Cross-list: SWGS 338.

HIST 340 - HISTORY OF FEMINISM  
Short Title: HISTORY OF FEMINISM  
Department: History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Explores feminism as political thought and social movement in various times and places. Readings will include classic as well as non-canonical texts. We will consider the historical contexts of feminist action, and examine controversies over and within feminisms. Cross-list: SWGS 345.

HIST 341 - PRE-MODERN CHINA  
Short Title: PRE-MODERN CHINA  
Department: History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Survey of Chinese history from antiquity to c.1800, highlighting major themes, issues, personalities and events.

HIST 342 - MODERN CHINA  
Short Title: MODERN CHINA  
Department: History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: A survey of Chinese history from c. 1800 to the present, focusing on the related themes of imperialism, nationalism, modernization and revolution.

HIST 344 - EUROPEAN REFORMATIONS  
Short Title: EUROPEAN REFORMATIONS  
Department: History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: In the 16th century Europe's house divided. This juncture in the history of Christianity had extraordinary consequences for the modern world. The course traces the impact of Protestant and Catholic reform movements on politics, society and culture and on Europe's engagements with the rest of the world.

HIST 345 - RENAISSANCE EUROPE  
Short Title: RENAISSANCE EUROPE  
Department: History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: How did the recovery of ancient texts shape the discovery of new worlds and perhaps the destruction of the old? This course explores major developments in Western Europe from the rise of Italian humanism in the fourteenth century to the imperial expansion and devastating conflicts of the 1500s and 1600s. Cross-list: MDEM 345.

HIST 347 - BLACK AMERICA: FROM NADIR THROUGH THE GREAT DEPRESSION  
Short Title: BLACK AMERICA: THE NADIR  
Department: History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course examines the changing nature of black society, culture, and politics in the United States from the census of 1890 through the attack on Pearl Harbor.
HIST 350 - AMERICA, 1900-1940
Short Title: AMERICA, 1900-1940
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Survey of major economic, social, and political developments in the United States from 1900 to 1940.

HIST 351 - AMERICA SINCE 1945
Short Title: AMERICA SINCE 1945
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Survey of major economic, social and political developments in the United States since 1945.

HIST 352 - HISTORY OF THE COLD WAR
Short Title: HISTORY OF THE COLD WAR
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course will cover Russo-American relations from the end of World War II to the collapse of the Soviet Union in 1989, profiling the major policymakers and world leaders and exploring not only the diplomatic and military operations but also the cultural landscape of the Cold War.

HIST 353 - GERMAN HISTORY, 1648-1890
Short Title: GERMAN HISTORY, 1648-1890
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Survey of "Germanies" from the rise of absolutist state following the Thirty Years' War to the unification of Germany in 1871. Includes the development of the bureaucratic and military institutions of the modern state, changing conceptions of state and society, and the major social and economic changes of the period. Taught in English. Cross-list: GERM 344.

HIST 354 - AFTER NAZISM: GERMAN HISTORY, 1945 - PRESENT
Short Title: AFTER NAZISM: GERMAN HISTORY, 1945 - PRESENT
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course examines German politics and societies under Allied administration, West and East Germany 1949-1989, and the Federal Republic since 1990. Topics include democracy; post-1945 responses to Nazism; political economies; challenges of the "new social movements;" and national identity in context of European unification and global migration.

HIST 355 - FROM DEMOCRACY TO DICTATORSHIP: GERMAN HISTORY, 1890-1945
Short Title: GERMAN HISTORY, 1890-1945
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: From 1890-1945, Germans experienced dramatic changes in their political environment. This lecture class will examine these changes, taking into account not only political history, but also attempts to come to terms with the challenges posed by organized capitalism, the rise and fall of socialism, the development of an interventionist state, cultural critique, and political culture, the Nazi social revolution, and the Holocaust. Taught in English. Cross-list: GERM 345.

HIST 356 - JEWS AND CHRISTIANS IN MEDIEVAL EUROPE
Short Title: JEWS & CHRISTIANS-MEDIEVAL EUR
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course will focus on Jewish-Christian coexistence in medieval Europe. Will examine the Jews' legal status in Christendom, their communal life, economic activities, intellectual achievements, while also focusing on the complex dynamics of Jewish-Christian interaction, and the shifting patterns of persecution and acceptance. Cross-list: MDEM 357.
HIST 358 - HUMANITARIANISM FROM THE 19TH CENTURY TO THE PRESENT
Short Title: HUMANITARIANISM FROM 19TH C.
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course surveys the history of humanitarian sentiment and practices in the West from the 19th Century to the present. It is conceived as a critical investigation of the humanitarian movement and examines various patterns of Western interventions on behalf of "suffering humanity." Topics covered are evangelicalism, abolitionism, colonialism and war humanitarianism, as well as United Nations humanitarianism since 1945.

HIST 359 - THE UNITED STATES IN THE TWENTIETH CENTURY WORLD
Short Title: U.S. IN THE 20TH CENTURY WORLD
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Overview of the United States interactions with the wider world in the 20th century. Impact of international affairs on the evolution of U.S. Domestic institutions, changing ideas about the United States' role in the world as articulated and practiced by key public figures, private-sector activists, intellectuals, and citizens at large.

HIST 361 - HISTORY OF PREMODERN BRITAIN: TUDORS AND STUARTS, 1485 - 1707
Short Title: TUDORS AND STUARTS, 1485-1707
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Tudor and Stuart monarchs were some of the most intriguing characters to walk on the world's stage. This course will explore the foundational political and religious changes which occurred in their reigns, from the victory of Henry VII at Bosworth to the union of Great Britain in 1707.

HIST 362 - BRITAIN FROM THE INDUSTRIAL REVOLUTION TO THE PRESENT
Short Title: HISTORY OF MODERN BRITAIN
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Exploration of Britain's take-off into the Industrial Revolution, the flourishing of the Empire, and the adjustment to the end of the Empire and the diminishment of world political and economic stature since the First World War. Includes the use of novels and films to examine these transformations.

HIST 364 - CENTRAL ASIAN CONQUEST EMPIRES
Short Title: CENTRAL ASIAN CONQUEST EMPIRES
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course examines the rise of Chingis Khan and Mongol Steppe society (religion, role of women, cultural exchange, strategies of violence, imperial ideologies) as well as successor empires: Yuan, Golden Horde, Ilkhanid and eventually that ruled by Timur/Tamerlane, who reproduced Mongol imperial power in Central Asia and India. Cross-list: MDEM 364.

HIST 365 - WORLD ECONOMIC HISTORY
Short Title: WORLD ECONOMIC HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (ECON 100 or ECON 201 or ECON 211) and (ECON 200 or ECON 301 or ECON 370) and (ECON 203 or ECON 303 or ECON 375)
Description: Study and analysis of world economy focusing on the economic expansion of Western countries between the 14th and 21st centuries. Emphasis on contextual changes in economy, geography, history, society, culture, religion and politics in determining economic leadership of certain economies, such as Italy, Portugal, Spain, the United Kingdom, Belgium, the Netherlands, France, Germany, Sweden, the United States and Japan. Cross-list: ECON 365. Mutually Exclusive: Credit cannot be earned for HIST 365 and HIST 235/HUMA 235.

HIST 366 - RIO DE JANEIRO: A SOCIAL AND ARCHITECTURAL HISTORY
Short Title: RIO DE JANEIRO
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The development of Rio de Janeiro from a colonial capital to an Olympic host with emphasis on the peoples of the city and evolution of the urban panorama. Cross-list: ARCH 366.

HIST 367 - THE RISE AND FALL OF THE BRITISH EMPIRE
Short Title: RISE & FALL OF BRITISH EMPIRE
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The British Empire from the 1600s to the late 20th century. The class will examine the causes of its rise, world dominance and fall.
HIST 370 - EUROPEAN INTELLECTUAL HISTORY: BACON TO HEGEL
Short Title: EUROPEAN INTELLECTUAL HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Survey of major thinkers and intellectual movements from the scientific revolution to the French Revolution. Includes the use of primary and secondary sources to establish the main contours of philosophical, political, and cultural expression and to relate them to their historical context.

HIST 371 - HISTORY OF MODERN FRANCE
Short Title: HISTORY OF MODERN FRANCE
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of transformations in French society, culture, and politics from the French Revolution to the end of the 20th century. Taught in English.

HIST 372 - IMMIGRATION AND THE STATE: 19TH & 20TH CENTURY
Short Title: IMMIGRATION AND THE STATE
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: How did modern states organize and regulate immigration in the modern era? Lecture course explores the comparative history of labor migration and forced displacement from the point of view of state policies in the United States and Western Europe from 1800 to the present.

HIST 373 - SOCIAL AND POLITICAL THOUGHT IN 19TH CENTURY EUROPE
Short Title: 19TH C SOC/POLITICAL THOUGHT
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Social and political thinkers of the 19th century confronted revolutionary change in both politics and society: the demand for democracy as well as the challenges associated with industrial capitalism. Course combines lectures with discussion of original sources, including Smith, Mill, Marx, Proudhon, Wollstonecraft, and Weber.

HIST 374 - JEWISH HISTORY, 1500-1948
Short Title: JEWISH HISTORY, 1500-1948
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: History of the Jews’ expulsion from Spain to the establishment of the state of Israel. Life in western and eastern Europe as well as in Islamic countries, seen from the perspective of settlement, assimilation, and the particularities of the Jewish historical experience.

HIST 375 - EUROPEAN ROMANTICISM, 1750-1850
Short Title: EUROPEAN ROMANTICISM 1750-1850
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Investigation of the emergence, triumph, and defeat of romanticism as a major cultural force in European history, with emphasis on national and epochal diversity within Romanticism in Britain, Germany, and France. Includes Rousseau, Goethe, Schiller, Schlegel, Schelling, Wordsworth, Coleridge, Byron, Stendhal, Hugo, and Baudelaire, as well as music and art.

HIST 376 - NATURAL DISASTERS IN THE CARIBBEAN
Short Title: CARIBBEAN NATURAL DISASTER
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Natural disasters have had a profound impact on the Caribbean. This course examines how hurricanes, earthquakes, and volcanic eruptions affected aspects of the region's economy, political system, and social structure from colonial times to the present. Also explores opportunities these disasters presented for strengthening local institutions and promoting development.

HIST 377 - MODERN ARAB HISTORY
Short Title: MODERN ARAB HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Survey of the history and culture of the Arab world from World War I to the present. Topics include colonialism and nationalism, modern secular and Islamist politics and the "Arab Spring." Equivalency: HIST 278. Mutually Exclusive: Credit cannot be earned for HIST 378 and HIST 278.
HIST 379 - THE CARIBBEAN IN THE AGE OF REVOLUTION, 1770-1820  
Short Title: THE CARIBBEAN IN REVOLUTION  
Department: History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: An enriched version of HIST 279. Equivalency: HIST 279.  
Mutually Exclusive: Credit cannot be earned for HIST 379 and HIST 279.

HIST 380 - ASIAN AMERICAN EXPERIENCES  
Short Title: ASIAN AMERICAN EXPERIENCES  
Department: History  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This interdisciplinary course will investigate the diverse cultural traditions and shared experiences of Asian Americans in the United States. By analyzing historical works, literary texts, and films, we will explore a range of topics including Asian immigration, gender roles, identity formation, and ethnic media. Cross-list: ASIA 380.

HIST 381 - GOD, TIME AND HISTORY  
Short Title: GOD, TIME AND HISTORY  
Department: History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: How is the passage of time given meaning, and what role - if any - is assigned to divinity in shaping the direction of events? Course explores various forms of recording and interpreting events, drawing from ancient Mesopotamia, Israel, and the Greco-Roman world - the cultures in which modern ideas of history began. Cross-list: RELI 385.

HIST 382 - CULTURAL TRENDS IN MEDIEVAL ISLAM, 750-1400  
Short Title: CULTURAL TRENDS MEDIEVAL ISLAM  
Department: History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment limited to students with a class of Junior or Senior. Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Islamic cultural transformation in the context of caliphal Baghdad and the peripheral regions of India, Anatolia and Central Asia - before and after Mongol invasions. Close examinations of the rise of ghulam states and Turkic sultanates, ideologies of kingship, literature and arts, conversion and sufi mysticism.

HIST 384 - MODERN GIRL AND ASIA IN THE WORLD  
Short Title: MOD GIRL & ASIA IN THE WORLD  
Department: History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Using the textbook "The Modern Girl Around the World," this course examines the phenomenon of the so-called modern girl in Asia and the world, 1890-1949. Topics include: modernity, consumer culture, sexuality, and liberation. Cross-list: ASIA 328, SWGS 384.

HIST 386 - CARTER, REAGAN, AND THE END OF THE COLD WAR  
Short Title: CARTER, REAGAN&END OF COLD WAR  
Department: History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Course will examine American policy during the climactic years of the Cold War. Topics will include detente under Nixon and Carter, confrontation under Reagan, the "new thinking" of Gorbachev, regional conflicts, and the fall of the Soviet Union.

HIST 387 - THE UNITED STATES IN THE WORLD: AGE OF EMPIRE AND REVOLUTION  
Short Title: U.S. IN THE WORLD: 1750-1900  
Department: History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course provides an overview of the United States' interactions with the world from the revolutionary period to the Spanish-American war. Impact of international affairs on the evolution of U.S. domestic institutions, changing ideas about America's role in the world by key political figures, private-sector activists, intellectuals, and citizens at large.

HIST 389 - MIGRATIONS AND DIASPORAS IN THE INDIAN OCEAN WORLD  
Short Title: THE INDIAN OCEAN WORLD  
Department: History  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: The Indian Ocean World presents an enormously varied arena of cultural exchange and interaction spanning coastal regions of Africa, the Middle East, South and Southeast Asia and Australia. Course introduces the region by examining societies and empires shaped by voyages of exploration, religious pilgrimages, trading diasporas and forced migration. Cross-list: ASIA 389.
HIST 390 - JOURNAL PUBLISHING WORKSHOP
Short Title: JOURNAL PUBLISHING WORKSHOP
Department: History
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Participants will explore scholarly communication through hands-on-work running the university's new undergraduate history journal, talking with editors, and discussing readings. Tasks include preparing to publish the journal's annual issues, refining the workflow, issuing a call for papers, and promoting the journal. Repeatable for Credit.

HIST 392 - PRE-MODERN POLITICAL THOUGHT FROM CICERO TO LOCKE
Short Title: PRE-MOD POLITICAL THOUGHT
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examining major texts from Cicero's De Officiis (CCE 44) to Locke's Two Treatises (1689 CE) shows how significant political questions emerged from specific historical contexts and developed over time. Writing intensive. Students will have weekly meetings in groups of three at an agreed-upon time (inclusive of the regular class meeting time).

HIST 395 - THE AMERICAN SOUTH
Short Title: THE AMERICAN SOUTH
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An enriched version of HIST 295. Equivalency: HIST 295. Mutually Exclusive: Credit cannot be earned for HIST 395 and HIST 295.

HIST 398 - THE TEN MOST IMPORTANT SUPREME COURT DECISIONS IN U.S. HISTORY
Short Title: TOPICS IN LEGAL HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Course on selected topics in legal history. Cross-list: SWGS 398.

HIST 401 - THE AGE OF ATTILA THE HUN
Short Title: THE AGE OF ATTILA THE HUN
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines the fifth century A.D. in Western Europe, when the Roman Empire ended and new kingdoms were established from Britain to North Africa. The "barbarian invasions" and Attila and the Huns will be considered. Research seminar format. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 402 - CHINESE WOMEN THROUGH TIME
Short Title: CHINESE WOMEN THROUGH TIME
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This discussion- and research- based course uses history, biography, law, fiction and film to examine the experiences and images of Chinese women from the late imperial time to the present. Topics include foot-binding, matriarchy, social constructs such as the Tiger Mom and the submissive Asian woman, crime, art etc. Students will write a final paper based on primary sources, and there will be one mid-term project involving a collaborative online experience. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 403 - ADVANCED RESEARCH SEMINAR
Short Title: ADVANCED RESEARCH SEMINAR
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Restricted to students admitted to History Honors Program. Seminar is designed to advance students from preliminary research to development of a formal prospectus for the honors thesis and a first draft of one section. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.) Instructor Permission Required.
HIST 404 - HISTORY HONORS THESIS  
**Short Title:** HISTORY HONORS THESIS  
**Department:** History  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Prerequisite(s):** HIST 403  
**Description:** Restricted to students admitted to History Honors Program. Seminar is designed to advance students from prospectus to draft and final version of the honors thesis. Prerequisite: HIST 403 and approval of Director of Undergraduate Studies. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.) Instructor Permission Required.

HIST 409 - MUSLIMS, JEWS, CHRISTIANS, HERETICS, AND PAGANS IN THE AGE OF THE CRUSADES  
**Short Title:** CHRISTIAN HOLY WARS, 1095-1492  
**Department:** History  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** This course examines the crusading movement between the proclamation of the First Crusade in 1095 and the fall of Muslim Granada in 1492. It focuses on the wars against Muslims in the Middle East and Iberia, Baltic crusades against pagans, wars against Christian heretics in Europe, and political crusades.

HIST 410 - THE EVOLVING AMERICAN CITY  
**Short Title:** THE EVOLVING AMERICAN CITY  
**Department:** History  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Urban areas, and the diverse peoples, conflicts, and experiences they contain, reflect elements of America’s transformations across the 20th and 21st centuries. This reading and research seminar examines the nature of urban and suburban life over the past century, in order to trace the influence of the metropolis on the nation as a whole.

HIST 411 - SLAVE REBELLIONS IN THE AMERICAS  
**Short Title:** SLAVE REBELLIONS IN AMERICA  
**Department:** History  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** This class examines collective violent resistance to slavery, especially during the 18th and 19th centuries. It focuses on rebellion in North America, the Caribbean and Brazil. It explores their causes, the different courses that they took, and asks what we can learn about Atlantic slavery by studying collective resistance. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 416 - SEMINAR IN CONTEMPORARY AFRICAN AMERICAN HISTORY  
**Short Title:** CONTEMP AF-AMER HISTORY  
**Department:** History  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** An examination of the exigencies of African American life from the Reagan era to the age of Obama. A reading- and writing-intensive seminar focusing on selected issues in black culture, politics, and community in the United States since the climax of the civil rights movement. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 420 - MEXICAN HISTORY  
**Short Title:** MEXICAN HISTORY  
**Department:** History  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** This course is an advanced undergraduate seminar examining the history of Mexico from Independence to the Present. It addresses topics including the war of Independence (1810-1821), civil wars and foreign invasions in the nineteenth and twentieth centuries, as well as social, cultural religious, political and economic transformations. Graduate/Undergraduate Equivalency: HIST 500. Mutually Exclusive: Credit cannot be earned for HIST 420 and HIST 500.

HIST 421 - RACE, EDUCATION AND SOCIETY IN THE URBAN SOUTH  
**Short Title:** RACE, EDUCATION & SOCIETY  
**Department:** History  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** An examination of the exigencies of African American life from the Reagan era to the age of Obama. A reading- and writing-intensive seminar focusing on selected issues in black culture, politics, and community in the United States since the climax of the civil rights movement. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 421 - RACE, EDUCATION AND SOCIETY IN THE URBAN SOUTH  
**Short Title:** RACE, EDUCATION & SOCIETY  
**Department:** History  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** An examination of the exigencies of African American life from the Reagan era to the age of Obama. A reading- and writing-intensive seminar focusing on selected issues in black culture, politics, and community in the United States since the climax of the civil rights movement. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 421 - RACE, EDUCATION AND SOCIETY IN THE URBAN SOUTH  
**Short Title:** RACE, EDUCATION & SOCIETY  
**Department:** History  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** An examination of the exigencies of African American life from the Reagan era to the age of Obama. A reading- and writing-intensive seminar focusing on selected issues in black culture, politics, and community in the United States since the climax of the civil rights movement. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)
HIST 422 - TOPICS IN THE HISTORY OF RICE UNIVERSITY
Short Title: THE HISTORY OF RICE UNIVERSITY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Research seminar on selected topics in the history of the university, with papers to be based on primary sources in the Woodson Research Center of Fondren Library and/or oral interviews. Topics will include academic departments and schools, student life, administrative evolution, community involvement, and Rice in a comparative context. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 423 - AMERICAN RADICALS AND REFORMERS
Short Title: AMERICAN RADICALS & REFORMERS
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar on radicals and reformers in American history. Readings vary and will focus on a selected group of reformers, such as abolitionists, labor radicals, socialists, feminists, pacifists, Progressives, environmentalists, or health reformers. Students may conduct original research for a thesis-driven paper related to course themes. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 424 - RAJ AND RESISTANCE
Short Title: RAJ AND RESISTANCE
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examination of the development and nature of the British-Indian relationship. From John Company to Company Raj (17th to 20th centuries), British mercantile and imperial ambitions in South Asia were met by indigenous movements of political independence and popular resistance across the subcontinent, in Bengal, Mysore, Punjab, Delhi and beyond. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 425 - 20TH CENTURY AMERICAN CONSERVATION MOVEMENT
Short Title: U.S. CONSERVATION MOVEMENT
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Exploration of the American conservation movement from Pres. Theodore Roosevelt, Sierra Club founder John Muir, and Chief of the U.S. Forest Service Gifford Pinchot to naturalists John Burroughs and George Perkins Marsh - focusing on their work in context of current issues in global warming and wetlands restoration. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 427 - HISTORY OF THE CIVIL RIGHTS MOVEMENT, 1954 TO THE PRESENT
Short Title: THE CIVIL RIGHTS MOVEMENT
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Examination of the modern Civil Rights movement, with emphasis on the goals and strategies of major spokespersons and leaders, as well as the achievements of the campaign. Includes the extent of its success or failure and whether or not an "unfinished" agenda needs to be completed. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 428 - MODERN SLAVERY AND HUMAN TRAFFICKING: GLOBAL AND LOCAL
Short Title: SLAVERY & HUMAN TRAFFICKING
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar examines contemporary slavery and human trafficking in global historical context. It examines forms of gendered unfree labor that persisted after the legal abolition of slave trades and slavery. It explores the emergence of human rights discourse, activism, and law from the 19th century onwards. Houston is the contemporary case study. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)
HIST 429 - RELIGIOUS VIOLENCE AND IDENTITY IN THE MIDDLE EAST
Short Title: MIDEAST RELI VIOLENCE&IDENTITY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: What does religious violence in the modern Middle East mean? Seminar surveys the origins, meanings and forms of sectarianism in the modern Middle East. Examines examples of religious mobilizations and sectarian violence in the late Ottoman empire between Christians and Muslims, the Arab-Israeli conflict, and Iraq following the U.S. invasion of 2003. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 432 - THOMAS JEFFERSON AND HIS AGE
Short Title: THOMAS JEFFERSON AND HIS AGE
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students with a class of Junior or Senior. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An examination of the life and writings of Jefferson, Set in the Context of his Age: The American Revolution, France on the Eve of its Revolution, the Enlightenment, his Presidency, Slavery, and the Origins of the American Political System. Open to others only with permission of instructor.

HIST 433 - THE ARAB-ISRAELI CONFLICT
Short Title: THE ARAB-ISRAELI CONFLICT
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar traces the history and politics of the Arab-Israeli conflict. Course seeks to understand how and at what costs Israeli and Palestinian nationalisms have been constructed in both Palestinian and Israeli understandings of the past and present using books, documentaries, and films. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 434 - ISLAM AND THE WEST
Short Title: ISLAM AND THE WEST
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar explores issues of contact and exploration between Western and Islamic worlds, from the Crusades to the modern era. Investigations will explore how identities are formed and reshaped through interaction with other cultures and how traditions are "invented" by relationships between civilization and despotism, freedom and tyranny, religious tolerance and holy war. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 436 - AMERICA IN THE MIDDLE EAST
Short Title: AMERICA IN THE MIDDLE EAST
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar explores evolution of American involvement in the Middle East from missionary origins in the early 19th century to superpower hegemony in the 20th. Puts into perspective central issues such as the U.S. role in the Arab-Israeli conflict, the question of terrorism, and the U.S. invasion/occupation of Iraq in 2003. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.) Graduate/Undergraduate Equivalency: HIST 603. Mutually Exclusive: Credit cannot be earned for HIST 436 and HIST 603.

HIST 437 - GLOBAL HISTORY OF SPORT
Short Title: GLOBAL HISTORY OF SPORT
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This reading and research seminar explores key aspects of the world history of sport from the late nineteenth century to the present. It investigates how and why sport history shaped, and was shaped by, various factors and historical forces, including cultural values, identity, economic interests and market forces and power relations between different categories of people.

HIST 438 - GENDER AND HISTORY
Short Title: GENDER AND HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course focuses on the disruptive force of theories of sexual difference to the practice of writing history. Historiography of gender and history projects over last ½ century in international context. Research and Methods Course. Cross-list: SWGS 438.
HIST 439 - COMPARATIVE SLAVERY FROM ANTIQUITY TO THE PRESENT: AFRICA, ASIA, AND EUROPE
Short Title: COMPARATIVE SLAVERY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar introduces the debates on the history of slavery in human society. Examines case studies in Africa, Asia and Europe with comparative analyses of topics: slavery and the state; slavery and gender; slave trades; and slave resistance. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 443 - MULTICULTURAL EUROPE, 1400-1700
Short Title: MULTICULTURAL EUROPE, 1400-1700
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The art of Europe was never the product of a single culture working in isolation. This seminar will explore the multicultural aspects of medieval and early modern Europe by focusing on the visual culture of groups who defined themselves or are today defined by nationality, race, or religion. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.) Cross-list: HART 435, MDEM 435.

HIST 448 - WESTERN EUROPEAN WELFARE STATE, 1880-1980: ORIGINS, CONSOLIDATIONS, CRISIS
Short Title: WEST EUROPEAN WELFARE STATES
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This upper level seminar looks at why and how the welfare states came into being, how they were affected by the World Wars and dictatorship, postwar expansion, and the effects of the 1970s stagflation and oil crises. Focus on Germany, Britain, and France. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 455 - HISTORY OF HUMAN RIGHTS
Short Title: HISTORY OF HUMAN RIGHTS
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar will explore the history of human rights through disciplines of anthropology and legal philosophy as well as historical case studies of individual states and human rights organizations. Students will undertake independent research on an issue, location, and period of their choosing. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 457 - FOUR MODERN REVOLUTIONS: 1776, 1789, 1917, 1989
Short Title: FOUR MODERN REVOLUTIONS
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar brings together four leading examples of modern revolution in the western world: the American Revolution, the French Revolution of 1789, the Russian Revolution of October 1917, and the Eastern European revolutions of 1989. Topics include: revolutionary subjects, reactionaries, terror, law, and constitutions. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 459 - TOPICS IN MODERN GERMAN HISTORY: NAZISM AND THE HOLOCAUST
Short Title: TOPICS MODERN GERMAN HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar uses sources from the time and historians' interpretations to analyze Nazism and the Holocaust, especially pre-war racial policy; economic policy; labor; the war experience; and the phases and legacies of the Holocaust.

HIST 461 - THE SECOND WORLD WAR: A POLITICAL HISTORY
Short Title: WW II: A POLITICAL HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: World War Two was not just a military conflict, but also a violent political and social struggle. Seminar explores the main ideologies and political blueprints devised during the war in the United States, Western and Eastern Europe. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 464 - U.S. FOREIGN POLICY IN THE ERA OF THE COLD WAR
Short Title: COLD WAR U.S. FOREIGN POLICY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar on American foreign policy during the Cold War. Readings and research. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)
HIST 477 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: History
Grade Mode: Standard Letter
Course Type: Seminar, Lecture, Laboratory, Internship/Practicum
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Topics and credit hours may vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.

HIST 478 - TOPICS IN LATIN AMERICAN HISTORY
Short Title: TOPICS LATIN AMERICAN HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar on selected topics in Latin American history. Contents vary. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 481 - GLOBAL HISTORY OF HEALTH AND WELFARE
Short Title: GLOBAL HISTORY OF HEALTH
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar explores the changing state of human welfare during industrialization by looking at the evolution of living standards in comparative international perspective. Compares experiences around the world using a broad range of indicators: region, timing of industrialization, nature of government policy, pace of change and cultural circumstances. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 490 - COLONIAL MODERNITY IN EAST ASIA
Short Title: COLONIAL MODERNITY: EAST ASIA
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: History of ideas, treaties, market and corporate strategies in imperialist and anti-imperialist movements in East Asia in 19th, 20th centuries. Uses theories of colonialism and specific case studies of fashion, architecture, mass media, urban planning, etc., to define colonial modernity transnationally. Three analytic essays and one research paper. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.) Cross-list: ASIA 490.

HIST 492 - GENDER HISTORIES OF MODERN CHINA
Short Title: GENDER HISTORIES: MODERN CHINA
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar with some lectures considers late imperial through 21st century China using conceptual tools (masculinity, femininity, gynotechnics, globalization, representation). Examines late Qing gender order, revolutionary era, party-state formation, and the Great Transformations of late 20th and early 21st centuries using visual culture, film, primary texts, and secondary histories. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.) Cross-list: ASIA 492, SWGS 492.

HIST 493 - EARLY MODERN EMPIRES
Short Title: EARLY MODERN EMPIRES
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The Ottoman, Safavid, Mughal and Uzbek Empires shared similar origins but each developed distinct imperial understandings of power and legitimacy, gender, religion, aesthetics. This seminar is a comparative and cross-regional study of early modern Islamic culture and society, its inspiration and legacy. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 494 - MUGHAL HISTORY
Short Title: MUGHAL HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Seminar on 16th century Central Asian Muslim Turks who conquered India and, in collusion with local political and social forces, developed a sophisticated syncretic royal culture. Readings include memoirs and letters of the royal family, Hindu courtiers, visiting Jesuit priests, European merchants, and Ottoman adventurers, examining religion, art, women, family, war and diplomacy. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)
HIST 495 - COMPARATIVE MODERNIZATION OF CHINA AND JAPAN
Short Title: MODERNIZATION OF CHINA & JAPAN
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Research seminar examining not only the respective modernizing experiences of Japan and China in the 19th and 20th centuries, but also the way that developments in one country influenced developments in the other. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 496 - A TURBULENT TIME: THE WORLD OF THE HAITIAN REVOLUTION
Short Title: THE HAITIAN REVOLUTION
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: An examination of the impact of the powerful forces unleashed by the Haitian Revolution on societies in the Caribbean, the U.S., and Latin America in the late 18th and early 19th centuries. Open to juniors and seniors. Open to others only with permission of instructor. (Please note that class rank is determined by year of matriculation, not credits.)

HIST 500 - GRADUATE SEMINAR IN MEXICAN HISTORY
Short Title: MEXICAN HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This reading seminar examines Mexico from the early nineteenth century to present through reading classic and current scholarship. It delves into questions in Mexican historiography such as political instability, economic development and inequality, the origins of social movements, the Mexican Revolution and the relationship with the US. Graduate/Undergraduate Equivalency: HIST 420. Mutually Exclusive: Credit cannot be earned for HIST 500 and HIST 420.

HIST 501 - WOMEN AND GENDER IN NATIVE AMERICA
Short Title: NATIVE WOMEN'S HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This reading course consists of texts that focus on women and gender in indigenous history from the colonial period to the early twentieth century.

HIST 505 - THE ATLANTIC SLAVE TRADE
Short Title: THE ATLANTIC SLAVE TRADE
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This research seminar studies four centuries of transatlantic slave voyages in comparative perspective and complements existing literature on the Atlantic economy. Primary sources will be drawn from the quantitative data of www.slavevoyages.org. Students will be able to focus on particular regions on both sides of the Atlantic.

HIST 506 - COLONIAL TO REPUBLICAN BRAZIL
Short Title: COLONIAL TO REPUBLICAN BRAZIL
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course traces the history of Brazil from colony to republic. Topics to be covered include: encounters, Jesuit missions, Indian and African slavery, plantation society, the court in Rio de Janeiro, and change and continuities in the 19th century.

HIST 508 - MODERN LATIN AMERICA
Short Title: MODERN LATIN AMERICA
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate reading seminar on Latin America from the early nineteenth century to present through reading classic and current most relevant scholarship. Political events will provide the periodic framework of the course but it will delve on major economic, social and cultural developments to understand the complex social formations that comprise contemporary Latin American societies.

HIST 509 - DIRECTED READINGS
Short Title: DIRECTED READINGS
Department: History
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate level independent readings course. Topics vary. Repeatable for Credit.

HIST 510 - DIRECTED READINGS
Short Title: DIRECTED READINGS
Department: History
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate level independent reading course. Topics vary. Repeatable for Credit.
HIST 521 - RACE, EDUCATION AND SOCIETY IN THE URBAN SOUTH
Short Title: RACE, EDUCATION & SOCIETY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An examination of urban life and education since the decision in Brown v. Board. Seminar focuses on the Brown cases, the development of the post war city in the context of American race relations, the course of court-ordered desegregation, and the impact of recent reforms on urban schools and neighborhoods Graduate/Undergraduate Equivalency: HIST 421. Mutually Exclusive: Credit cannot be earned for HIST 521 and HIST 421.

HIST 533 - SCIENCE, TECHNOLOGY, AND THE COLD WAR
Short Title: SCIENCE, TECH, & THE COLD WAR
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar examines the mobilization of science and engineering in World War II and in the ensuing confrontation between capitalism and communism. Topics include the Nuclear Age, science and diplomacy, military-industrial-academic complex, McCarthyism, the space race, and the counterculture in environmentalism, biotechnology and computing.

HIST 534 - CIVILIZING MISSIONS
Short Title: CIVILIZING MISSIONS
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Reading Seminar. The development of "civilizing missions" legitimized territorial and spiritual conquest and validated the suppression of subject customs, cultures, and religions. Graduate reading seminar will explore the idea, which became an integral part of imperial, religious, and national ideologies. Readings include (in translation) modern historical, geographical, legal, ethnographic, religious, and literary texts.

HIST 536 - AMERICA AND THE WORLD
Short Title: AMERICA & THE WORLD
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: In this graduate seminar, we will examine U.S. history in a global context, focusing particularly on imperialism and empire-building. Students are encouraged to think broadly about empire and imperial relationships of which the United States constitute an integral part, looking at domination in economic and cultural forms in addition to political subjugation, formal colonialism and military interventions/dominations.

HIST 539 - ORIGINS OF AFRO AMERICA
Short Title: ORIGINS OF AFRO AMERICA
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate research seminar focused on central issues in the articulation of black society, culture, and labor in the Americas from the 15th century to the early 19th century.

HIST 540 - INDUSTRIALIZING AMERICA
Short Title: INDUSTRIALIZING AMERICA
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate reading seminar will examine, through readings and discussion, the transformation of the United States under the impact of industrialization from 1870 through World War I. Topics include labor, immigration, feminism, the social gospel, Progressivism, the Great Migration of African Americans from the South, and the rise and fall of Victorian culture.

HIST 542 - HISTORIOGRAPHY OF THE MODERN MIDDLE EAST
Short Title: MODERN MIDDLE EAST
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Topics will vary.

HIST 549 - TOPICS IN AFRO-AMERICAN HISTORY: THE AFRICAN AMERICAN CENTURY
Short Title: THE AFRICAN AMERICAN CENTURY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate research seminar focused on key issues in the development of black society and politics in the United States from the late 19th century to mid 20th century.
HIST 558 - RELIGION, RACE, AND DIFFERENCE IN A GLOBAL PERSPECTIVE
Short Title: RELIGION, RACE, & DIFFERENCE
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate seminar will explore the relationship between religion, race, and difference in the modern world. Using both American and non-American cases, the course will explore how and why unequal multi-religious and multi-racial societies - from the United States to the Middle East and South Asia - have elaborated and adapted to modern ideas of secular citizenship and multiculturalism.

HIST 561 - TOPICS IN EUROPEAN INTELLECTUAL HISTORY
Short Title: TOPICS EUR INTELLECTUAL HISTRY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate research seminar on selected themes in European intellectual history. Contents vary. Reading knowledge of German is not required, but definitely advantageous.

HIST 563 - RACE AND SLAVERY IN THE EARLY ATLANTIC
Short Title: EARLY ATLANTIC RACE & SLAVERY
Department: History
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate research seminar designed to help students formulate, research, and produce an initial draft of what will hopefully become a publishable scholarly article dealing with race or slavery in the Atlantic World.

HIST 565 - THE ATLANTIC WORLD
Short Title: THE ATLANTIC WORLD
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate reading seminar provides an introduction to the historiography of the Atlantic World, especially Africa and the British Atlantic during the 17th and 18th centuries with comparison to France and French Caribbean and to Iberia and Spanish and Luso-America. Thematic topics will include commercial networks, political/imperial/legal structures, and slavery.

HIST 566 - NORTH AMERICA, 1500-1800
Short Title: NORTH AMERICA, 1500-1800
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate reading seminar provides overview of historical literature pertaining to British North America and the Atlantic World from 1500 to 1800. Related topics in Spanish and French North America also considered.

HIST 568 - POST-1945 U.S. HISTORY
Short Title: POST-1945 U.S. HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate reading seminar on post-1945 United States history. Contents vary.

HIST 570 - U.S. ENVIRONMENTAL HISTORY
Short Title: U.S. ENVIRONMENTAL HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate reading seminar on U.S. environmental history from the colonial era to the 20th century, including conservation and environmental movements.

HIST 571 - THE HISTORIOGRAPHY OF NATIONALISM, PLURALISM AND POLITICAL BELONGING.
Short Title: HISTORIOGRAPHY OF NATIONALISM
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar will explore the historiography of pluralism and political belonging and its relationship to various national formations, including the United States. It will read major figures such a W.E.B. Du Bois alongside exemplary figures from the colonial and postcolonial worlds to explore how claims to national belonging are made through the construction of historical narratives.
HIST 572 - AMERICA IN THE MIDDLE EAST
Short Title: AMERICA IN THE MIDDLE EAST
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate research seminar explores the history and historiography of American involvement in the Middle East from missionary origins in the early 19th century to superpower hegemony in the 20th. Participants will be expected to develop a primary-source based research essay. Instructor Permission Required.

HIST 574 - SLAVERY AND SLAVING IN AFRICA
Short Title: SLAVERY AND SLAVING IN AFRICA
Department: History
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course introduces graduate students to the key debates, scholars, and historiography relating to slavery and slaving in African history. Students will also gain basic familiarity with the narrative of slaving in Africa as well as introductions to topics in slavery studies like gender, commodities, and identity.

HIST 575 - INTRODUCTION TO DOCTORAL STUDIES
Short Title: INTRO DOCTORAL STUDIES
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate research and writing seminar on U.S. social/cultural history methods. Students will engage with a range of primary sources and secondary literature, focusing on the nature of historical investigation and interpretation. Instructor Permission Required.

HIST 577 - PEDAGOGY SEMINAR
Short Title: PEDAGOGY SEMINAR
Department: History
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: For ABD students who intend to teach. Required for those who intend to teach for the department.

HIST 578 - PROSPECTUS SEMINAR
Short Title: PROSPECTUS SEMINAR
Department: History
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Seminar on prospectus and grant-writing for third-year graduate students. Required for students in the third year.

HIST 579 - COLONIAL LATIN AMERICA
Short Title: COLONIAL LATIN AMERICA
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate reading seminar on the Spanish and Portuguese colonies in the Americas. Topics covered include: the Iberian heritage, encounters and conquests, historical demography, the colonial economy, slavery, family life, religion, and the coming of independence.

HIST 582 - MAJOR ISSUES IN BRITISH AND BRITISH EMPIRE HISTORY
Short Title: BRITAIN AND BRITISH EMPIRE
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate research seminar in modern British and British Empire history. Open to all graduate students.

HIST 583 - SOUTHERN HISTORY
Short Title: SOUTHERN HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate research seminar on the history of the American South.

HIST 584 - THE EARLY SOUTH, 1600-1800
Short Title: THE EARLY SOUTH, 1600-1800
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 4
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate research seminar focusing on the southern portions of colonial British North America.

HIST 587 - U.S. SOCIAL/CULTURAL HISTORY METHODS
Short Title: U.S. SOCIAL/CULTURAL HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate research and writing seminar on U.S. social/cultural history, with emphasis on methods and the nineteenth and twentieth centuries. Research paper required.
HIST 588 - 19TH CENTURY AMERICA
Short Title: 19TH CENTURY AMERICA
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate reading seminar on American history from the early republic to World War I. Contents vary.

HIST 590 - INTRODUCTION TO WORLD HISTORY
Short Title: INTRODUCTION TO WORLD HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate reading seminar in world history.

HIST 591 - GRADUATE READING
Short Title: GRADUATE READING
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate reading in conjunction with another course. Repeatable for Credit.

HIST 595 - THE AMERICAN SOUTH
Short Title: THE AMERICAN SOUTH
Department: History
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate reading seminar on major scholarly literature of southern history. Includes readings, discussions, and a major paper on historiographical topic decided in consultation with the instructor.

HIST 596 - PORT CITIES IN THE ATLANTIC WORLD: SIXTEENTH-NINETEENTH CENTURIES
Short Title: ATLANTIC WORLD PORT CITIES
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This graduate seminar investigates the social and economic history of key port cities in the Atlantic World from the sixteenth through the nineteenth centuries. Emphasis will be placed on slavery and the slave trade, the spatial history of the port city, and the experiences of men and women. Digital humanities methods will be demonstrated through a case study of Rio de Janeiro. Students will develop and write a final paper on the port city of their choice.

HIST 598 - THE MAKING OF THE MODERN ARAB WORLD
Short Title: MAKING OF THE MODERN ARAB WRLD
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar explores how various approaches from the secular to the religious, from the colonial to the post-colonial, and from the orientalist to the nationalist and post-orientalist have shaped the idea of what constitutes the Arab world.

HIST 599 - ADVANCED MUSEUM STUDIES
Short Title: ADVANCED MUSEUM STUDIES
Department: History
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for credit. Offered as necessary. Repeatable for Credit.

HIST 601 - MASTER'S THESIS RESEARCH
Short Title: MASTER'S THESIS RESEARCH
Department: History
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Research for master's thesis. Must take both HIST 601 and 602 to receive credit. Offered as necessary.

HIST 602 - MASTER'S THESIS RESEARCH
Short Title: MASTER'S THESIS RESEARCH
Department: History
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Continuation of HIST 601. Must complete both HIST 601 and 602 to receive credit.

HIST 603 - AMERICA IN THE MIDDLE EAST
Short Title: AMERICA IN THE MIDDLE EAST
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Graduate seminar examining the encounter between the United States and Middle Eastern societies since the nineteenth century. Graduate students will complete all UG requirements in as well as an additional 15 page essay to be submitted with the project prospectus. Final papers must be at least 25 pages and incorporate non-English research as appropriate. Graduate/Undergraduate Equivalency: HIST 436. Mutually Exclusive: Credit cannot be earned for HIST 603 and HIST 436.
HIST 604 - ECONOMIC HISTORY
Short Title: ECONOMIC HISTORY
Department: History
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Advanced graduate seminar examining world economic history and the history of political economy from 1500 to the present.

HIST 700 - THIRD-YEAR RESEARCH
Short Title: THIRD-YEAR RESEARCH
Department: History
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 4-12
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Appropriate for third-year graduate students who are working on their prospectus and have not yet taken their general exam. Repeatable for Credit.

HIST 800 - PH.D. RESEARCH
Short Title: PH.D. RESEARCH
Department: History
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 9-12
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Research for doctoral dissertation. Repeatable for Credit.

Honors Program (HONS)

HONS 470 - RICE UNDERGRADUATE SCHOLARS PROGRAM (RUSP)
Short Title: UNDERGRAD SCHOLARS PROGRAM
Department: Rice Undergrad Scholar Program
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: RUSP is a two-semester course for students pursuing careers in academia/research. With a faculty mentor, students engage in a year-long research project and attend weekly seminars on how to conduct and present research, work in the academy, apply to post-graduate education and fellowships, and understand the social impact of research. Instructor Permission Required.

HONS 471 - RICE UNDERGRADUATE SCHOLARS PROGRAM (RUSP)
Short Title: UNDERGRAD SCHOLARS PROGRAM
Department: Rice Undergrad Scholar Program
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): HONS 470
Description: RUSP is a two-semester course for students pursuing careers in academia/research. With a faculty mentor, students engage in a year-long research project and attend weekly seminars on how to conduct and present research, work in the academy, apply to post-graduate education and fellowships, and understand the social impact of research. Instructor Permission Required.

Humanities (HUMA)

HUMA 101 - FROM ANCIENT GREECE TO MEDIEVAL ISLAM:
INTRODUCTION TO WESTERN LITERATURE, HISTORY, AND PHILOSOPHY
Short Title: ANCIENT GREECE TO MED ISLAM
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Study of the foundational intellectual and artistic texts of the western tradition from Ancient Greece to Medieval Islam. Consideration of texts and images over time and in their historical development as we reflect on who we are and how we got here. Readings from Homer, Plato, the Hebrew Bible, the New Testament, Thucydides, Vergil, Augustine, and the Qu’ran.

HUMA 102 - FROM RENAISSANCE TO PRESENT: INTRODUCTION TO
WESTERN LITERATURE, HISTORY, AND PHILOSOPHY
Short Title: RENAISSANCE TO PRESENT
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Study of the foundational intellectual and artistic texts of the Western tradition from the Renaissance to Einstein. Consideration of texts and images over time and in their historical development as we reflect on who we are and how we got here. Readings from Machiavelli, Shakespeare, Kant, Flaubert, Nietzsche, Freud, Beauvoir, Einstein, Levi, Kuhn, Borges, and King, and images from such artists as Michelangelo, Goya, and Picasso.
HUMA 103 - LIBERTY AND TERROR: THE FRENCH REVOLUTION  
Short Title: LIBERTY& TERROR: FRENCH REVOLUT  
Department: Humanities Division  
Grade Mode: Standard Letter  
Course Type: Seminar  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: The French Revolution toppled an ancient monarchy and sent shockwaves throughout the world. We will interpret the historical sources, contexts, and problems of this watershed moment and investigate the problems by political, philosophical, literary, and visual documents regarding the pre-revolutionary status quo, the transformation of political liberty into repressive terror, worldwide warfare, and ideological struggle. The course will focus on historical contexts such as the influence of the Enlightenment; the emergence of citizenship and human rights; the development of social spectacles and the public sphere; the Reign of Terror and the regression to Tyranny; emancipationist discourses (the abolition of slavery, colonial revolt, radical feminism); and the contradictory figure of Napoleon. We will consider, finally, how the Revolution has come to be viewed, both within France and without, considering its many aftershocks and reverberations up until the present day.

HUMA 107 - GREEK CIVILIZATION AND ITS LEGACY  
Short Title: GREEK CIVILIZATION & LEGACY  
Department: Humanities Division  
Grade Mode: Standard Letter  
Course Type: Seminar  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: An examination of the literary, artistic, and intellectual achievements of classical Greek civilization from Homer through the golden age of classical Athens to the spread of Greek culture in the Hellenistic world. The influence of ancient Greece on Western culture will be a focus. Case studies in the later reception of classical Greek literature (e.g. tragedy), philosophy (e.g., Socrates), history (e.g., democracy), and art (e.g., Parthenon) will be examined. Cross-list: CLAS 107.

HUMA 111 - ROMAN CIVILIZATION AND ITS LEGACY  
Short Title: ROMAN CIVILIZATION & ITS LEGACY  
Department: Humanities Division  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: This course will investigate central aspects of Roman civilization: politics, religion, law, oratory, private life, public entertainment, literature, and visual art and architecture. Through case studies, we will also examine the place of ancient Rome in the western imagination, and the influence of ancient Rome on later politics, literature, and art. Cross-list: CLAS 108.

HUMA 202 - CULTURE, ENERGY AND THE ENVIRONMENT: AN INTRODUCTION TO ENERGY HUMANITIES  
Short Title: CULTURE ENERGY & ENVIRONMENT  
Department: Humanities Division  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Humanity faces extraordinary challenges in an era of climate change and energy transition. These challenges are not only technological but also questions of value, power, behavior, and understanding. This course draws upon new research across the arts, humanities and social sciences to help students better understand the cultural and social dimensions of our current patterns of energy use, their environmental impacts, and the possibility of new energy futures. Intended for both STEM majors and humanities and social science students. Cross-list: ENST 202.
HUMA 203 - CULTURES OF FUEL
Short Title: CULTURES OF FUEL
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Description: This course will focus on junior varsity intercollegiate speech and debate competition. Students will be required to prepare speeches and debate material for local, regional and possibly national competitions. Participation in intercollegiate competition is mandatory. Instructor Permission Required. Repeatable for Credit.

HUMA 210 - FORENSICS PRACTICUM
Short Title: FORENSICS PRACTICUM
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Description: This course will focus on junior varsity intercollegiate speech and debate competition. Students will be required to prepare speeches and debate material for local, regional and possibly national competitions. Participation in intercollegiate competition is mandatory. Instructor Permission Required. Repeatable for Credit.

HUMA 238 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Internship/Practicum, Lecture, Seminar
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Description: This course will focus on junior varsity intercollegiate speech and debate competition. Students will be required to prepare speeches and debate material for local, regional and possibly national competitions. Participation in intercollegiate competition is mandatory. Instructor Permission Required. Repeatable for Credit.

HUMA 300 - PJHC SUMMER SERVICE INTERNSHIP REFLECTION
Short Title: PJHC SERVICE REFLECTION
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Description: Returning PJHC Summer Service Interns reflect on their experiences in an academic context, producing short digital stories. This course is required for all returning interns who received financial support from the Program in Poverty, Justice, and Human Capabilities for service learning and suggested for PJHC minors who completed other summer service internships. Offered in the first half of the full term in the Fall, weekly. Instructor permission required. Instructor Permission Required.
HUMA 309 - ARGUMENTATION AND DEBATE
Short Title: ARGUMENTATION & DEBATE
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Designed to help students develop communication, analysis, and research skills through the construction and presentation of arguments on questions of fact, value, and policy. Debate assignments will explore current issues. The course emphasizes argumentation exercises and in-class debates.

HUMA 310 - ADVANCED FORENSICS PRACTICUM
Short Title: ADVANCED FORENSICS PRACTICUM
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will focus on varsity intercollegiate speech and debate competition. Students will be required to prepare speeches and debate material for local, regional, and possibly national competitions. Participation in intercollegiate competition is mandatory. Instructor Permission Required. Repeatable for Credit.

HUMA 311 - THE RHETORIC OF LEADERSHIP
Short Title: RHETORIC OF LEADERSHIP
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will examine the relationship between leadership and communication within organizations. Explore leadership as a communication phenomenon. Emphasis will be on leadership as a set of relationships that manifest themselves in practices that arise from the implementation of theory. Historical and contemporary leadership and communication theory will be surveyed. An important outcome is an increased understanding of the relationship between communication and leadership. Cross-list: LEAD 320.

HUMA 312 - HISTORICAL AND INTELLECTUAL FOUNDATIONS OF LEADERSHIP
Short Title: FOUNDATIONS OF LEADERSHIP
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The focus of this course is to construct a historically informed philosophy of leadership that encompasses not just what leadership is but why it is valued, when it is legitimate, what its moral purpose is, and how it both shapes and reflects societal norms. Cross-list: LEAD 301.

HUMA 313 - THEORIES OF HUMAN COMMUNICATION
Short Title: THEORIES OF HUMAN COMM
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course offers an introduction to the study of human communication and surveys explanations of human communication from a variety of perspectives. Theories of interpersonal, intercultural, nonverbal and mass communication are explored.

HUMA 314 - COMMUNICATION, TECHNOLOGY, AND CHANGE
Short Title: COMMUNICATION/TECHNOLOGY/CHANG
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: New communication technologies have profoundly altered daily life and challenge the definition of some of humanity’s basic societal structures. This course explores interpretations of this transformation from many fields to better understand the change we are currently witnessing and to ask what the human experience is gaining and losing.

HUMA 315 - COMMUNICATION LAW
Short Title: COMMUNICATION LAW
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will explore the historical development, contemporary state of and future direction of the relationship between law and communication. The central question is “What is the relation of the law to the human communication experience?”

HUMA 316 - RHETORIC OF POPULAR CULTURE
Short Title: RHETORIC OF POPULAR CULTURE
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: What really persuades people? Many scholars consider popular culture to be the most influential persuasive force in the everyday lives of contemporary humans. Music, television, social media, film, fashion, books, and other elements of popular culture comprise a tremendous amount of the universe of meaning in which the modern human resides. This course will explore these phenomena by looking at current and historical popular cultural artifacts and trends and various ways of understanding them from a variety of fields. Students will pursue an original study of a specific artifact or trend.
**HUMA 317 - INTERPERSONAL COMMUNICATION**

Short Title: INTERPERSONAL COMMUNICATION  
Department: Humanities Division  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course is a study of the historical and contemporary principles and theories of interdependent human communication. Communication skills which will increase interpersonal effectiveness will be studied, including verbal and nonverbal behavior, listening, assertiveness, and conflict resolution.

**HUMA 320 - FROM PHYSICS LABS TO OIL FUTURES: SOCIAL STUDIES OF ENERGY**

Short Title: SOCIAL STUDIES OF ENERGY  
Department: Humanities Division  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: How did whale oil become replaced by fossil fuels? What were the turning points in implementing electricity networks within urban centers? What is the role of markets and industries when producing such new energy infrastructures? This interdisciplinary course will trace ideas of energy in anthropology, science and technology studies, literary studies and environmental history, and investigate how energy production and consumption affects social life.

**HUMA 321 - EUROPEAN WOMEN FILMMAKERS**

Short Title: EUROPEAN WOMEN FILMMAKERS  
Department: Humanities Division  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Filmmaking has celebrated its first hundred years. Women's contributions were significant and deserve to widen the film canon for all filmgoers. This course will concentrate on films by European women directors, taking into account aesthetic particularities, gender commitment, and post-feminist attempts. Importance will also be given to the contexts and conditions of women's film production. All films subtitled in English. Taught in English. Cross-list: GERM 321, HART 385, SWGS 358.

**HUMA 322 - MARX, FREUD, EINSTEIN: FOREBEARERS OF MODERNITY**

Short Title: MARX, FREUD, EINSTEIN  
Department: Humanities Division  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Like no others, these three thinkers of the 19th and 20th century have influenced the intellectual, historical, social, and cultural development not only of Germany, but of the entire world. The course examines the works of these authors in the context of their own time as well as their continued importance in the present. Works by Brecht, Christa Wolf, Schnitzler, Kafka will also be considered. Taught in English. Cross-list: GERM 322.

**HUMA 324 - BERLIN, RESIDENCE, METROPOLIS, CAPITAL**

Short Title: BERLIN: RESIDENCE, METRO, CAPITAL  
Department: Humanities Division  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: The course offers an introduction to German history, politics, and culture as mirrored in the history of the old and new German capital. Berlin has always been a city of contradictions: from imperial glamour to proletarian slums, from the Roaring Twenties to Hitler's seizure of power. Emerging from the ruins of WWII Berlin became both the capital of Socialism and the display window of the Free World. After the fall of the wall, Berlin is still looking for its role in the center of a reshaped Europe. Readings and discussions encompass fine arts and literature from the 18th century to the present, including film. Taught in English. Cross-list: GERM 324.

**HUMA 325 - MODERN GERMAN WRITERS: KAFKA**

Short Title: MODERN GERMAN WRITERS: KAFKA  
Department: Humanities Division  
Grade Mode: Standard Letter  
Course Type: Seminar  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Goethe's vision of "world-literature" came true in the twentieth century. German authors, among them Kafka, transcended the confines of national traditions and redefined the concepts of literature and authorship in view of a modern globally dispersed audience. Topics may vary. Taught in English. Cross-list: GERM 325. Repeatable for Credit.
HUMA 328 - GERMAN ADAPTATIONS: TEXT TO FILM  
**Short Title:** GERMAN ADAPTATIONS: TEXT-FILM  
**Department:** Humanities Division  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Prominent novels of the 20th century will be studied for their possibilities or impossibilities of rendition from print medium to cinematic medium. From the myriad of adaptations we will concentrate on Thomas Mann: Tod in Venedig; Franz Kafka: Das Schloss; Klaus Mann: Mehistro; Gunter Grass: Die Blechtrommel; H. Boll: Katharina Blum; Jurek Becker. Jacob der Lugner. All films are subtitled in English. Taught in English. Cross-list: GERM 328.

HUMA 329 - LITERATURE OF THE HOLOCAUST AND EXILE  
**Short Title:** LIT OF HOLOCAUST & EXILE  
**Department:** Humanities Division  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Most of the authors from Germany and Austria, who were persecuted and fled into exile, used literature to search for meaning in life that apparently had been stripped of all meaning. Among these authors are the most distinguished writers of time, i.e. Th. and H. Mann, Brecht, Benjamin, Werfel, Doblin, J. Roth, S. Zweig, N. Sachs, Celan, Auslander. Taught in English. Cross-list: GERM 329.

HUMA 340 - WALTER BENJAMIN: AESTHETICS, HISTORY AND POLITICS  
**Short Title:** WALTER BENJAMIN  
**Department:** Humanities Division  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Benjamin has been celebrated as a revolutionary Marxist, a theologian of Jewish Messianism, and as an essayist and literary critic. The course offers an introduction to his writings by way of situating them in the historical background of the Weimar Republic and the crises of European society on the eve of WWII. Taught in English. Cross-list: GERM 340.

HUMA 368 - CONCEIVING AND MISCONCEIVING THE MONSTROUS IN FICTION AND IN ART, IN MEDICINE AND IN BIOSCIENCE  
**Short Title:** MONSTER  
**Department:** Humanities Division  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Distribution Group:** Distribution Group III  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** However various the forms of life, we draw boundaries between normal, not normal, and monstrous. From the Biosciences to the Arts, our conceptions of the "monstrous" illuminate our identity, perceptions, and fears. Priority for enrollment beyond the cap given to students also enrolled in ARTS 358. Cross-list: BIOC 368.

HUMA 371 - POVERTY, JUSTICE, AND HUMAN CAPABILITIES  
**Short Title:** POVERTY, JUSTICE, CAPABILITIES  
**Department:** Humanities Division  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** This course provides an overview of the study of poverty, justice, and human capabilities. The course considers theory and economic policy oriented towards improving human well-being in the US, Asia, Africa, and other regions. Readings address not just material deprivations but also gender, racial and ethnic disparities, health status, education, human rights, and political freedoms. To be considered for the course, please complete the brief questionnaire at pjhc.rice.edu/enrollment-questionnaire. Preference is given to those that have declared the PJHC minor. Formerly HUMA/SOCI 280. Instructor Permission Required. Cross-list: SOCI 371. Mutually Exclusive: Credit cannot be earned for HUMA 371 and HUMA 280/SOCI 280.

HUMA 372 - THE GERMAN FAIRY TALE: OLD AND NEW  
**Short Title:** GERMAN FAIRY TALE: OLD & NEW  
**Department:** Humanities Division  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Discussion of several prototypes from the fairy-tale collection of the Brothers Grimm and the subsequent development of the "literary" fairy tale from Goethe and the Romantics to the 20th century. Taught in English. Cross-list: GERM 326.

HUMA 373 - NEW GERMAN FILM: HITLER'S CINEMATIC CHILDREN  
**Short Title:** NEW GERM FILM: HITLER'S CINEMA  
**Department:** Humanities Division  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Distribution Group:** Distribution Group I  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** From the 1960 to 2000, Germany has developed a very distinct auteur cinema with independent filmmakers such as Fassbinder, Herzog, Wenders, Adlon, Trotta, Sander, Brueckner, Doerrie, Garnier, Tykwer, and others. The first 20 years of German film were oriented on coming to terms with the fascist past; the second 20 years focused on more contemporary issues. Film, critical reading and class discussion in English. All films are subtitled in English and will be assessed with podium technology. Taught in English. Cross-list: GERM 338, SWGS 361.
HUMA 401 - INDEPENDENT STUDY IN MEDICAL HUMANITIES RESEARCH
Short Title: IND STDY MEDICAL HUMA RESEARCH
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent Study with a faculty member at the Texas Medical Center focusing on a medical humanities research topic. Students spend up to 10 hours/week at TMC and are graded on evaluations submitted by faculty supervisors. Instructor Permission Required. Repeatable for Credit.

HUMA 402 - HEALTH, HUMANISM, AND SOCIETY SCHOLARS INTERNSHIP 1
Short Title: MEDICAL HUMANITIES INTERNSHIP 1
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The Office of the Dean of Humanities and relevant faculty match students individually with one of a variety of projects in the area of medical humanities. Students conduct research or related activities under guidance of on-site supervisor and section instructor of record. Will be continued as HUMA 403 in Spring. Department Permission Required. Repeatable for Credit.

HUMA 403 - HEALTH, HUMANISM, AND SOCIETY SCHOLARS INTERNSHIP 2
Short Title: MEDICAL HUMANITIES INTERNSHIP 2
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The Office of the Dean of Humanities and relevant faculty match students individually with one of a variety of projects in the area of medical humanities. Students conduct research or related activities under guidance of on-site supervisor and section instructor of record. Continuation of HUMA 402; part 2 of a year-long sequence. Department Permission Required. Repeatable for Credit.

HUMA 404 - LAW, JUSTICE, AND SOCIETY SCHOLARS INTERNSHIP 1
Short Title: LAW INTERNSHIP 1
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The Office of the Dean of Humanities and relevant faculty match students individually with one of the variety of internships related to law. Students will conduct research or related activities under guidance of on-site supervisor and the section instructor of record. Will be continued as HUMA 405 in Spring. Department Permission Required. Repeatable for Credit.

HUMA 405 - LAW, JUSTICE AND SOCIETY SCHOLARS INTERNSHIP 2
Short Title: LAW INTERNSHIP 2
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The Office of the Dean of Humanities and relevant faculty match students individually with one of the variety of internships related to law. Students will conduct research or related activities under guidance of on-site supervisor and the section instructor of record. Continuation of HUMA 404; part 2 of a year-long sequence. Department Permission Required. Repeatable for Credit.

HUMA 406 - ARTS AND CULTURE INTERNSHIP 1
Short Title: ARTS AND CULTURE INTERNSHIP 1
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The Office of the Dean of Humanities and relevant faculty match students individually with one of a variety of projects in the area of arts/museums/public culture. Students conduct research or related activities under guidance of on-site supervisor and the section instructor of record. Will be continued as HUMA 407 in Spring. Department Permission Required. Repeatable for Credit.

HUMA 407 - ARTS AND CULTURE INTERNSHIP 2
Short Title: ARTS AND CULTURE INTERNSHIP 2
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The Office of the Dean of Humanities and relevant faculty match students individually with one of a variety of projects in the area of arts/museums/public culture. Students conduct research or related activities under guidance of on-site supervisor and the section instructor of record. Continuation of HUMA 406; part 2 of a year-long sequence. Department Permission Required. Repeatable for Credit.

HUMA 477 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Humanities Division
Grade Mode: Internship/Practicum, Lecture, Seminar
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Topics and credit hours may vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.
HUMA 499 - RESEARCH IN THE HUMANITIES
Short Title: RESEARCH IN THE HUMANITIES
Department: Humanities Division
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: For advanced independent research in a humanities subject. Student must arrange mentorship with a faculty member and seek permission from the Dean of Humanities office, then a section of this course can be opened for the fall, spring, or summer. Department Permission Required. Repeatable for Credit.

Humanities Research Center (HURC)

HURC 101 - JETT-MOELLER RESEARCH INTRODUCTION
Short Title: JETT-MOELLER RESEARCH INTRO
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course will provide foundational research skills to a select group (7) of freshman students - equivalent of Century Scholars. Instruction will be provided by faculty and Fondren Library staff, under the coordination of the Office of Fellowships & Undergraduate Research and Humanities Research Center. Department Permission Required. Cross-list: UNIV 101. Repeatable for Credit.

HURC 201 - INTRODUCTION TO MEDICAL HUMANITIES
Short Title: INTRO TO MEDICAL HUMANITIES
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Examines the history of medicine, concepts of disease vs illness, narrative medicine, health disparities, religion, spirituality, and the role of science and technology on the practices of healthcare. Students will develop skills in close reading, interpretation, historical contextualization, critical thinking. This course is required for the minor in Medical Humanities.

HURC 210 - INTRODUCTION TO POSTHUMANISM
Short Title: INTRODUCTION TO POSTHUMANISM
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Recent advances in sciences and humanities show that the line between the human and non-human has become blurred. This interdisciplinary course will ready fictional, scientific, and philosophical texts to challenge traditional representations of the human by finding the human already enmeshed in or produced through relationships with technology, the animal, and the environment.

HURC 211 - 19TH CENTURY PSYCHOLOGICAL FICTION AND MEDICINE
Short Title: 19c PSYCH FICTION & MEDICINE
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The Romantic and Victorian periods saw debates among literary and medical authors over the nature, function, and location of consciousness. This course explores these debates to learn the history of a literary and medical movement, critically engage with present-day debates about these texts, and reflect on the changing relationship between sciences and humanities in general.

HURC 213 - THE DOCTOR IS ON
Short Title: THE DOCTOR IS ON
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Fictionalized characters such as House, Doogie Houser, and Hawkeye Pierce reinforce stereotypes as much as they challenge assumptions and (re)define cultural attitudes toward doctors (and the medical profession in general). This course examines the portrayal of healthcare professionals in television, fiction and film to discuss philosophical and ethical questions as well as the modern medical apparatus from biopolitical and social systems perspectives.

HURC 238 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Internship/Practicum, Lecture, Seminar
Credit Hours: 1-4
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Topics and credit hours may vary each semester. Contact department for current semester’s topic(s). Repeatable for Credit.
HURC 245 - INTERDISCIPLINARY APPROACHES
Short Title: INTERDISCIPLINARY APPROACHES
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Interdisciplinary study of cultural forms as diverse as poetry, advertisement, and film as well as topical interdisciplinary courses on literature and the arts, psychology, cultural studies, film media, anthropology, social theory, philosophy, law, and ethics. Taught by English Department Ph.D. candidates. Cross-list: ENGL 245. Repeatable for Credit.

HURC 299 - ENGLISH LITERATURE AND THE PUBLIC HUMANITIES
Short Title: ENGLISH LIT/PUBLIC HUMANITIES
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: In this course, students learn to apply critical humanistic methods to issues of public importance, especially in the Houston area. Participants study necessary applications of humanistic inquiry to civic life and contribute to this work themselves. Consult the Humanities Research Center or the English department for more information. Cross-list: ENGL 299. Repeatable for Credit.

HURC 301 - HRC UNDERGRADUATE FELLOWSHIP
Short Title: HRC UNDERGRADUATE FELLOWSHIP
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Independent Study
Credit Hours: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The HRC Undergraduate Fellowship requires students to attend a series of workshops and lectures. Fellow will also conduct research with HRC faculty. Contact HRC to apply. Department Permission Required. Repeatable for Credit.
Course URL: www.hrc.rice.edu/undergraduate.aspx

HURC 302 - UNDERSTANDING ENERGY: ENERGY LITERACY AND CIVICS
Short Title: UNDERSTANDING ENERGY
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Energy is a foundational driver of human development. Energy impacts our economy, politics, culture, and environment. In this course, students will learn the fundamentals of energy in the context of broader systems and will be asked to think critically about how and why we rely on particular energy resources.
Course URL: understandingenergy.rice.edu

HURC 303 - HRC RICE SEMINAR UNDERGRADUATE COURSE
Short Title: HRC RICE SEMINAR COURSE
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: HURC Rice Seminar undergraduate course requires students to attend a series of lectures by scholars studying the historical and modern day issues of the year’s Rice Seminar topic and participate in monthly discussion groups. Repeatable for Credit.

HURC 304 - HRC SUPERVISED RESEARCH
Short Title: HRC SUPERVISED RESEARCH
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Independent Study
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A course designed for students who want to pursue intensive semester-long study of a particular topic that is the specialty of visiting faculty or postdoctoral fellow. Department Permission Required.

HURC 305 - URBAN SPACES, MAPPED PLACES
Short Title: URBAN SPACES, MAPPED PLACES
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will challenge students to understand what information about a city can be analyzed and conveyed via cartography. Students will acquire mapping skills using CartoDB, Mapbox and Leaflet and will examine historical cartography via Adobe Illustrator and qGIS. Readings will include urban theory, representation in cartography, critical debates on big data and social media, and works of fiction that involve mapping and the city.

HURC 306 - HEALTH AND HUMANITIES MASTER CLASS
Short Title: HEALTH AND HUMANITIES MC
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Faculty from Rice University, University of Texas School of Public health, and University of Houston, as well as practitioners in the Texas Medical Center, will lead class discussions on different aspects of the health industry today. The class will meet Tuesday evenings at the McGovern Museum of Health and Medical Science and at Rice Thursdays. Students will read essays, case studies, and fiction or watch films to prepare for each discussion. Instructor Permission Required. Graduate/Undergraduate Equivalency: HURC 506. Mutually Exclusive: Credit cannot be earned for HURC 306 and HURC 506.
HURC 307 - CRITICAL HUMANITIES - HEALTH AND BODY
Short Title: CRITICAL HUMA - HEALTH & BODY
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course introduces the study of film form in relation to ecological experience. Topics include screen space, sound effects, camera movements, and the many ways these can be related to produce meaning. Students explore how film aesthetics "think" through social and species coexistence, life, death, technology, globality, or even "galacticality," with or without environmentalism.

HURC 401 - MASTER CLASS IN LITERARY STUDIES
Short Title: MASTER CLASS CULTURAL HERITAGE
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 2
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course consists of a series of sessions with Rice faculty and outside speakers that focus on specific texts to explore important critical questions and debates. There will be 14 Masterclass sessions per term. At the end of the year, the students will present their own work in a symposium. Instructor Permission Required. Repeatable for Credit.

HURC 311 - PUBLIC HUMANITIES MASTERCLASS
Short Title: PUBLIC HUMANITIES MASTERCLASS
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The course explores the place of humanities in the public sphere, presenting tools for critical assessment. Undergraduate and graduate students from across campus form research cohorts with Rice faculty, outside scholars, and members of local institutions. Graduate students serve as mentors for undergraduates and will be assessed on papers and the class sessions they design and lead. Graduate/Undergraduate Equivalency: HURC 511. Mutually Exclusive: Credit cannot be earned for HURC 311 and HURC 511. Repeatable for Credit.

HURC 310 - CINEMATICS: THE ECOLOGICAL PARADIGM
Short Title: CINEMATICS: ECOLOGIC PARADIGM
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course introduces the study of film form in relation to ecological experience. Topics include screen space, sound effects, camera movements, and the many ways these can be related to produce meaning. Students explore how film aesthetics "think" through social and species coexistence, life, death, technology, globality, or even "galacticality," with or without environmentalism.

HURC 308 - ADVANCED STUDY IN MUSEUMS AND HERITAGE: ARTS OF ANCIENT MEDITERRANEAN AT THE MENIL COLLECTION
Short Title: ADV STUDY IN MUSEUMS/HERITAGE
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course comprises six modules co-taught by faculty and medical professionals. Modules will address DNA and genetics, changes in medical education, the pathologization of difference, the process of dying, disability and ability, the doctor-patient relationship, and more.

HURC 306 - THE HUMANITIES OF CARE & END OF LIFE
Short Title: THE HUMANITIES OF CARE
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course introduces students to advanced ethical, legal and practical issues facing museums as they acquire and maintain collections from areas prone to looting and destruction, especially the Ancient Mediterranean. We will examine the civic engagement and operation of the Menil Collection through close, on-site archival and object study. Cross-list: HART 312. Graduate/Undergraduate Equivalency: HURC 508. Mutually Exclusive: Credit cannot be earned for HURC 308 and HURC 508.

HURC 341 - MUSEUMS AND HERITAGE: EXHIBITING ART, EXHIBITING CULTURE
Short Title: MUSEUMS AND HERITAGE
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A wide-ranging introduction to museum studies with a particular focus on the collection and exhibition of cultural heritage materials. We will examine how heritage objects are displayed and represented in museums of art, natural historical history, and heritage. Topics include looking and ethics of collecting, policies of display, changing roles for museums; exhibition design and curatorial practice. Cross-list: ANTH 341.
HURC 402 - DIGITAL HISTORY MASTERCLASS - UNDERGRADUATE
Participants
Short Title: DIGITAL HISTORY MASTER CLASS U
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will introduce graduate and upper-level undergraduate students to scholarly publishing, exploring its history, functions, processes and possible futures. It will feature guest lectures from those involved in publishing at Rice and discussions of issues such as open access, peer review, authorship, audience, and preservation. Students will be trained in conducting peer review, performing copy editing, and producing and promoting academic publications. Graduate/Undergraduate Equivalency: HURC 607. Mutually Exclusive: Credit cannot be earned for HURC 407 and HURC 607.

HURC 403 - SAWYER SEMINAR: PLATFORMS FOR KNOWLEDGE IN A WIDE WEB OF WORLDS
Short Title: SAWYER SEMINAR
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The seminar explores digital knowledge platforms (e-learning, publishing, collaborative research, crowd-sourced) that uphold our academic mission to disseminate knowledge by enabling teachers, students and researchers to discover, analyze, and share information without regard to barriers of space and time. These same platforms, however, raise questions about expertise, access, metrics, power shifts, and academic autonomy. Department Permission Required. Repeatable for Credit.

HURC 404 - THE POET AND THE MUSEUM
Short Title: THE POET AND THE MUSEUM
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course considers what it means for poets to seek meaning and inspiration in the world of the visual arts. Students will visit Houston art venues to examine objects of cultural heritage, seek insight about the practice of making, preserving and presenting art with curators and conservators, and will have an opportunity to work with two practicing artists.

HURC 405 - DIACHRONIC MAPPING: THE RICE UNIVERSITY CAMPUS
Short Title: DIACHRONIC MAPPING
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: The objective of this course is to collaboratively design a digital atlas of the Rice Campus where visual archives, locatable in time and space, can be embedded. The evolution of the campus will be presented by historians and training sessions in ArcGIS, Rhino, and Shared Shelf will be conducted by specialists. Instructor Permission Required. Graduate/Undergraduate Equivalency: HURC 605. Mutually Exclusive: Credit cannot be earned for HURC 405 and HURC 605. Repeatable for Credit.

HURC 406 - MASTERCLASS IN PUBLISHING, EDITING, PRESENTING AND PUBLIC WRITING
Short Title: MASTERCLASS IN PUBLISHING
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Offers undergraduate and graduate students insight into the public life of writing with particular attention to academic and literary publishing, editing, and presenting. Sessions organized around topics in these areas and visits with experts (agents, editors, authors, presenters, etc.) with experience in publishing, and creating series, festivals, and other forms of presentation. Meets 3 times per semester, helps develop internship possibilities for participants, and develop strategies for increasing the presentation of public writing at Rice. Instructor Permission Required. Graduate/Undergraduate Equivalency: HURC 606. Mutually Exclusive: Credit cannot be earned for HURC 406 and HURC 606. Repeatable for Credit.

HURC 407 - INTRODUCTION TO SCHOLARLY PUBLISHING
Short Title: INTRO TO SCHOLARLY PUBLISHING
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will introduce graduate and upper-level undergraduate students to scholarly publishing, exploring its history, functions, processes and possible futures. It will feature guest lectures from those involved in publishing at Rice and discussions of issues such as open access, peer review, authorship, audience, and preservation. Students will be trained in conducting peer review, performing copy editing, and producing and promoting academic publications. Graduate/Undergraduate Equivalency: HURC 607. Mutually Exclusive: Credit cannot be earned for HURC 407 and HURC 607.
HURC 408 - FUTURES OF THE BOOK
Short Title: FUTURES OF THE BOOK
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: From an ongoing interest in the book as a physical object, to the exploration of its potentials expanding into a four-dimensional digital realm, to rapidly changing demands for the storage and retrieval of knowledge, this master class will provide a platform to engage experts from various disciplines in a debate on the shifting futures of the book. Instructor Permission Required. Cross-list: ARCH 456. Graduate/Undergraduate Equivalency: HURC 608. Mutually Exclusive: Credit cannot be earned for HURC 408 and HURC 608.

HURC 423 - HRC PRACTICUM IN CULTURAL HERITAGE
Short Title: PRACTICUM IN CULTURAL HERITAGE
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This research-based course is conducted in partnership with cultural heritage institutions in Houston. Qualified and advanced students work 10 hours/week on site with curators, artists, archivists, center directors, and others to develop projects in specific research areas. Students meet regularly with instructor to discuss research and to present work at an end of semester symposium. Instructor Permission Required. Repeatable for Credit.

HURC 430 - HRC PRACTICUM IN HEALTH HUMANITIES
Short Title: PRACTICUM IN HEALTH HUMANITIES
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This research-based course is conducted in partnership with cultural heritage institutions in Houston. Qualified and advanced students work 10 hours/week on site with curators, artists, archivists, center directors, and others to develop projects in specific research areas. Students meet regularly with instructor to discuss research and to present work at an end of semester symposium. Instructor Permission Required. Repeatable for Credit.

HURC 431 - CONTAGIOUS POLITICS OF PSYCHIATRIC MEDIA
Short Title: POLITICS OF PSYCHIATRIC MEDIA
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Medical humanities/media archaeology will critique how psychiatry uses novels, photography, film, drugs, and the internet to capture patients and explain their disorders. Case studies vary year to year, but may include Tourette's syndrome, hysteria, internet addiction, and viral extremism.

HURC 432 - SPATIAL HUMANITIES
Short Title: SPATIAL HUMANITIES
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will trace the evolution of a city as it existed and as it was imagined. Views, historic maps, and ground-floor plans will be located in both time and space while their associated visual and spatial data will be integrated across digital platforms. Graduate students enroll in an additional bootcamp and mentor undergraduate students. Graduate/Undergraduate Equivalency: HURC 632. Mutually Exclusive: Credit cannot be earned for HURC 432 and HURC 632. Repeatable for Credit.

HURC 450 - SPATIAL HUMANITIES MASTERCLASS
Short Title: SPATIAL HUMANITIES MASTERCLASS
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture/Laboratory
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course explores current developments in humanistic practices and theories of cartography and 3-D modeling. Undergraduates and graduate students from across campus form research cohorts with Rice faculty, external scholars, and practitioners. Each course assigns credit hours based on the number of guess speakers and class meetings on a semester-by-semester basis. Repeatable for Credit.

HURC 480 - HURC SUPERVISED RESEARCH
Short Title: HRC SUPERVISED RESEARCH
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: A course designed for students who want to pursue intensive semester-long study of a particular topic under the supervision of a faculty member. Instructor Permission Required. Repeatable for Credit.

HURC 501 - ENVIRONMENT, CULTURE, LIMITS: THINKING THROUGH THE LONG ANTHROPOCENE IN THE UNITED STATES
Short Title: MELLON GRADUATE SEMINAR I
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A course designed for students who want to pursue intensive semester-long study of a particular topic under the supervision of a faculty member. Instructor Permission Required. Repeatable for Credit.
Course URL: www.hrc.rice.edu/mellonseminars.aspx
HURC 502 - HRC MELLON RESEARCH SEMINAR
Short Title: MELLON SEM:THE QUANTIFIED SELF
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Faculty from Rice University, University of Texas School of Public health, and University of Houston, as well as practitioners in the Texas Medical Center, will lead class discussions on different aspects of the health industry today. The class will meet Tuesday evenings at the McGovern Museum of Health and Medical Science and at Rice Thursdays. Students will read essays, case studies, and fiction or watch films to prepare for each discussion. Graduate students will have additional assignments. Graduate students will not write 5 papers required of undergraduates and may opt out of 3 lectures and the corresponding discussions. Instructor Permission Required. Repeatable for Credit.
Course URL: www.hrc.rice.edu/mellonseminars.aspx

HURC 506 - HEALTH AND HUMANITIES MASTER CLASS
Short Title: HEALTH AND HUMANITIES MC
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course explores the place of humanities in the public sphere, presenting tools for critical assessment. Undergraduate and graduate students from across campus form research cohorts with Rice faculty, outside scholars, and members of local institutions. Graduate students serve as mentors for undergraduates and will be assessed on papers and the class sessions they design and lead. Graduate/Undergraduate Equivalency: HURC 311. Mutually Exclusive: Credit cannot be earned for HURC 511 and HURC 311. Repeatable for Credit.

HURC 508 - ADVANCED STUDY IN MUSEUMS AND HERITAGE: ARTS OF ANCIENT MEDITERRANEAN AT THE MENIL COLLECTION
Short Title: ADV STUDY IN MUSEUMS/HERITAGE
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course introduces students to advanced ethical, legal and practical issues facing museums as they acquire and maintain collections from areas prone to looting and destruction, especially the Ancient Mediterranean. We will examine the civic engagement and operation of the Menil Collection through close, on-site archival and object study. Cross-list: HART 540. Graduate/Undergraduate Equivalency: HURC 308. Mutually Exclusive: Credit cannot be earned for HURC 508 and HURC 308.

HURC 511 - PUBLIC HUMANITIES MASTERCLASS
Short Title: PUBLIC HUMANITIES MASTERCLASS
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course is a discussion of issues and methods associated with HURC 401. Instructor Permission Required. Repeatable for Credit.

HURC 601 - GRADUATE MASTERCLASS
Short Title: RICE SEMINARS
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hours: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Year long intellectual inquiry during which faculty and graduate students develop, present, and discuss original scholarship that explores aspects of the seminar's annual topic. Instructor Permission Required. Repeatable for Credit.

HURC 602 - RICE SEMINARS
Short Title: INTRO TO DIGITAL HUMANITIES
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course introduces students to current digital humanities projects as well as tools for approaching humanities research in new ways. Faculty from across the humanistic disciplines will address trends in this expanding field and guide hands-on workshops. Sessions will also focus on the job market and grant opportunities. Repeatable for Credit.
HURC 605 - DIACHRONIC MAPPING: THE RICE UNIVERSITY CAMPUS
Short Title: DIACHRONIC MAPPING
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The objective of this course is to collaboratively design a digital atlas of the Rice Campus where visual archives, locatable in time and space, can be embedded. The evolution of the campus will be presented by historians and training sessions in ArcGIS, Rhino, and Shared Shelf will be conducted by specialists. Instructor Permission Required. Graduate/Undergraduate Equivalency: HURC 405. Mutually Exclusive: Credit cannot be earned for HURC 605 and HURC 405. Repeatable for Credit.

HURC 606 - MASTERCLASS IN PUBLISHING, EDITING, PRESENTING AND PUBLIC WRITING
Short Title: MASTERCLASS IN PUBLISHING
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Offers undergraduate and graduate students insight into the public life of writing with particular attention to academic and literary publishing, editing, and presenting. Sessions organized around topics in these areas and visits with experts (agents, editors, authors, presenters, etc.) with experience in publishing, and creating series, festivals, and other forms of presentation. Meets 3 times per semester, helps develop internship possibilities for participants, and develop strategies for increasing the presentation of public writing at Rice. Instructor Permission Required. Graduate/Undergraduate Equivalency: HURC 406. Mutually Exclusive: Credit cannot be earned for HURC 606 and HURC 406. Repeatable for Credit.

HURC 607 - INTRODUCTION TO SCHOLARLY PUBLISHING
Short Title: INTRO TO SCHOLARLY PUBLISHING
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will introduce graduate and upper-level undergraduate students to scholarly publishing, exploring its history, functions, processes and possible futures. It will feature guest lectures from those involved in publishing at Rice and discussions of issues such as open access, peer review, authorship, audience, and preservation. Students will be trained in conducting peer review, performing copy editing, and producing and promoting academic publications. Graduate/Undergraduate Equivalency: HURC 407. Mutually Exclusive: Credit cannot be earned for HURC 607 and HURC 407.

HURC 608 - FUTURES OF THE BOOK
Short Title: FUTURES OF THE BOOK
Department: Humanities Research Center
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: From an ongoing interest in the book as a physical object, to the exploration of its potentials expanding into a four-dimensional digital realm, to rapidly changing demands for the storage and retrieval of knowledge, this master class will provide a platform to engage experts from various disciplines in a debate on the shifting futures of the book. Instructor Permission Required. Cross-list: ARCH 656. Graduate/Undergraduate Equivalency: HURC 408. Mutually Exclusive: Credit cannot be earned for HURC 608 and HURC 408.

HURC 632 - SPATIAL HUMANITIES
Short Title: SPATIAL HUMANITIES
Department: Humanities Research Center
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will trace the evolution of a city as it existed and as it was imagined. Views, historic maps, and ground-floor plans will be located in both time and space while their associated visual and spatial data will be integrated across digital platforms. Graduate students enroll in an additional bootcamp and mentor undergraduate students. Graduate/Undergraduate Equivalency: HURC 432. Mutually Exclusive: Credit cannot be earned for HURC 632 and HURC 432. Repeatable for Credit.

Italian Language and Culture (ITAL)
ITAL 106 - ACCELERATED FIRST YEAR ITALIAN
Short Title: ACCELERATED FIRST YEAR ITALIAN
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Alternative first year Italian for students who have already completed two semesters of French or Spanish. This is an intensive course covering the equivalents of ITAL 141 and ITAL 142. Students will be prepared for ITAL 263 upon completion of the course. Mutually Exclusive: Credit cannot be earned for ITAL 106 and ITAL 141/ITAL 142.
ITAL 141 - FIRST YEAR ITALIAN I
Short Title: FIRST YEAR ITALIAN I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Development of interactional competence in Italian (sociolinguistic and sociocultural knowledge) to communicate and interact with speakers of Italian. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. No prior knowledge of this language is necessary. Placement Test is required. Mutually Exclusive: Credit cannot be earned for ITAL 141 and ITAL 101/ITAL 106/ITAL 222.
Course URL: clicitalian.blogs.rice.edu

ITAL 142 - FIRST YEAR ITALIAN II
Short Title: FIRST YEAR ITALIAN II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): ITAL 141
Description: Continuation of ITAL 141. Development of interactional competence in Italian (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Italian. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for ITAL 142 and ITAL 106/ITAL 262.
Course URL: clicitalian.blogs.rice.edu

ITAL 222 - AP/OTH CREDIT IN ITALIAN LANGUAGE
Short Title: AP/OTH CREDIT ITALIAN LANGUAGE
Department: Cntr Lang & Intercultural Comm
Grade Mode: Transfer Courses
Course Type: Transfer
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation. Mutually Exclusive: Credit cannot be earned for ITAL 222 and ITAL 101/ITAL 141.

ITAL 263 - SECOND YEAR ITALIAN I
Short Title: SECOND YEAR ITALIAN I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): ITAL 142
Description: Continuation of ITAL 142. Development of interactional competence in Italian (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Italian. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for ITAL 263 and ITAL 201.
Course URL: clicitalian.blogs.rice.edu

ITAL 264 - SECOND YEAR ITALIAN II
Short Title: SECOND YEAR ITALIAN II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): ITAL 263
Description: Continuation of ITAL 263. Development of interactional competence in Italian (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Italian. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for ITAL 264 and ITAL 202.
Course URL: clicitalian.blogs.rice.edu

ITAL 301 - ADVANCED ITALIAN I
Short Title: ADVANCED ITALIAN I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ITAL 264
Description: This course helps students develop an ADVANCED level of proficiency in Italian through the analysis and use of the target language in the context of specific topics of interest that will vary.

ITAL 302 - ADVANCED ITALIAN II
Short Title: ADVANCED ITALIAN II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ITAL 301
Description: This course helps students develop an ADVANCED level of proficiency in Italian through the analysis and use of the target language in the context of specific topics of interest that will vary. Repeatable for Credit.
JAPA 141 - FIRST YEAR JAPANESE I  
Short Title: FIRST YEAR JAPANESE I  
Department: Cntr Lang & Intercultural Comm  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: Development of interactional competence in Japanese (sociolinguistic and sociocultural knowledge) to communicate and interact with speakers of Japanese. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. No prior knowledge of this language is necessary. Placement Test is required. Mutually Exclusive: Credit cannot be earned for JAPA 141 and JAPA 101/JAPA 222.  
Course URL: clicjapanese.blogs.rice.edu  

JAPA 142 - FIRST YEAR JAPANESE II  
Short Title: FIRST YEAR JAPANESE II  
Department: Cntr Lang & Intercultural Comm  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Prerequisite(s): JAPA 141  
Description: Continuation of JAPA 141. Development of interactional competence in Japanese (sociolinguistic and sociocultural knowledge) to communicate and interact with speakers of Japanese. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for JAPA 142 and JAPA 262.  
Course URL: clicjapanese.blogs.rice.edu  

JAPA 222 - AP/OTH CREDIT IN JAPANESE LANGUAGE  
Short Title: AP/OTH CREDIT JAPANESE LANG.  
Department: Cntr Lang & Intercultural Comm  
Grade Mode: Standard Letter  
Course Type: Transfer  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation. Mutually Exclusive: Credit cannot be earned for JAPA 222 and JAPA 101/JAPA 141.  
Course URL: clicjapanese.blogs.rice.edu  

JAPA 263 - SECOND YEAR JAPANESE I  
Short Title: SECOND YEAR JAPANESE I  
Department: Cntr Lang & Intercultural Comm  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Prerequisite(s): JAPA 142  
Description: Continuation of JAPA 142. Development of interactional competence in Japanese (sociolinguistic and sociocultural knowledge) to communicate and interact with speakers of Japanese. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for JAPA 263 and JAPA 201.  
Course URL: clicjapanese.blogs.rice.edu  

JAPA 264 - SECOND YEAR JAPANESE II  
Short Title: SECOND YEAR JAPANESE II  
Department: Cntr Lang & Intercultural Comm  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Prerequisite(s): JAPA 263  
Description: Continuation of JAPA 263. Development of interactional competence in Japanese (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Japanese. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for JAPA 264 and JAPA 202.  
Course URL: clicjapanese.blogs.rice.edu  

JAPA 301 - THIRD YEAR JAPANESE I  
Short Title: THIRD YEAR JAPANESE I  
Department: Cntr Lang & Intercultural Comm  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): JAPA 264  
Description: Continuation of JAPA 264. Emphasis on developing reading and writing ability as more authentic materials and soci-cultural topics are introduced.  
Course URL: clicjapanese.blogs.rice.edu
**JAPA 302 - THIRD YEAR JAPANESE II**
Short Title: THIRD YEAR JAPANESE II  
Department: Cntr Lang & Intercultural Comm  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): JAPA 301  
Description: Continuation of JAPA 301. Emphasis on developing reading and writing ability as more authentic materials and socio-cultural topics are introduced.  
Course URL: clicjapanese.blogs.rice.edu

**JAPA 398 - JAPANESE TEACHING PRACTICUM**
Short Title: JAPANESE TEACHING PRACTICUM  
Department: Cntr Lang & Intercultural Comm  
Grade Mode: Standard Letter  
Course Type: Internship/Practicum  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course gives students with advanced proficiency in Japanese the opportunity to acquire teaching experience in the tutorial format. Includes regular meetings with supervising faculty member. Instructor Permission Required. Repeatable for Credit.

**JAPA 399 - JAPANESE TEACHING PRACTICUM**
Short Title: JAPANESE TEACHING PRACTICUM  
Department: Cntr Lang & Intercultural Comm  
Grade Mode: Standard Letter  
Course Type: Internship/Practicum  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course gives students with advanced proficiency in Japanese the opportunity to acquire teaching experience in tutorial format. Includes regular meetings with supervising faculty member. Instructor Permission Required. Repeatable for Credit.

**JWST 120 - ISRAEL: LANGUAGE AND CULTURE I**
Short Title: ISRAEL: LANGUAGE AND CULTURE I  
Department: Jewish Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: This course will combine a study of basic Hebrew vocabulary and grammar with literature, film, and popular culture from Israel. It will explore the history of Israel through a study of its culture and language, including poetry, songs, movies, and television.

**JWST 121 - ISRAEL: LANGUAGE AND CULTURE II**
Short Title: ISRAEL: LANGUAGE AND CULTURE II  
Department: Jewish Studies  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: This course is a continuation of JWST 120, but is open to any student who can read basic Hebrew. It will explore Israeli culture through literature, music, current events, and film.

**JWST 238 - SPECIAL TOPICS - BECOMING AMERICANS: THE JEWISH IMMIGRANT EXPERIENCE IN THE UNITED STATES**
Short Title: SPECIAL TOPICS  
Department: Jewish Studies  
Grade Mode: Standard Letter  
Course Type: Laboratory, Lecture, Seminar, Lecture/Laboratory, Internship/Practicum  
Credit Hours: 3-4  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Lower-Level  
Description: SPECIAL TOPIC FOR SPRING 2017: Becoming Americans  
- This course examines the history of the American Jewish immigrant experience from colonial times to the present as a means of trying to understand how newcomers navigate the processes of adaptation, acculturation, and integration into American life. We will travel to Galveston and New York City to visit significant historical sites and immigrant communities. Instructor Permission Required. Repeatable for Credit.

**JWST 301 - JEWISH FOOD: RELIGION, CULTURE, AND CONSUMPTION FROM THE BIBLE TO BAGELS**
Short Title: JEWISH FOOD  
Department: Jewish Studies  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: "We are what we eat," the saying goes. But is that true? How do choices and practices connected to eating define us and our communities? Our study of Jewish food traditions from the Bible to the present will engage this and other important issues related to religion and identity politics. Repeatable for Credit.

**JWST 317 - JEWISH GRAPHIC NOVEL**
Short Title: JEWISH GRAPHIC NOVEL  
Department: Jewish Studies  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course will examine contemporary works that combine image and text to depict Jewish history, culture, community, and identity in the form of the graphic novel.
JWST 318 - ISRAELI WOMEN WRITERS  
Short Title: ISRAELI WOMEN WRITERS  
Department: Jewish Studies  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: A discussion of selected research topics in quantitative biology and biomedical informatics. Cross-list: BIOC 592. Repeatable for Credit.
KINE 310 - PSYCHOLOGICAL ASPECTS OF SPORT AND EXERCISE  
Short Title: PSYC OF SPORT & EXERCISE  
Department: Kinesiology  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Examine the psychological foundations that underlie sport and exercise participation. Recommended Prerequisite(s): PSYC 101.

KINE 311 - MOTOR LEARNING  
Short Title: MOTOR LEARNING  
Department: Kinesiology  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Designed to provide a basic understanding of the theories related to skill acquisition, development, and movement. Learners develop an understanding of the cognitive, behavioral, and neurological concepts needed to become skilled at movements. The course will also incorporate laboratory experiences in the physiological, neurological, and psychological factors of human movement.

KINE 319 - STATISTICS FOR THE HEALTH PROFESSIONAL  
Short Title: STATS FOR HEALTH PROFESSIONAL  
Department: Kinesiology  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Topics include displaying and describing data, the normal curve, regression, statistical inference including parametric and non-parametric analyses, and hypothesis testing. Students also have the opportunity to analyze data using SPSS and Excel software.

KINE 321 - EXERCISE PHYSIOLOGY  
Short Title: EXERCISE PHYSIOLOGY  
Department: Kinesiology  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): KINE 300 and KINE 301  
Corequisite: KINE 323  
Description: This course examines the acute and chronic effects of exercise on physiological functions. Topics include nutrition, energy transfer, fatigue, metabolism, disease, aging, preventative medicine, genetics, elite performance, ergogenic aids, exercise testing, and specificity of training. Must register for co-req course KINE 323 also.

KINE 323 - EXERCISE PHYSIOLOGY LABORATORY  
Short Title: EXERCISE PHYSIOLOGY LABORATORY  
Department: Kinesiology  
Grade Mode: Standard Letter  
Course Type: Laboratory  
Credit Hour: 1  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): KINE 300 and KINE 301  
Corequisite: KINE 321  
Description: This course introduces the concepts and assessment techniques used to quantify physiological function. Laboratory experiences will require students to acquire and apply knowledge of systems physiology to make direct functional assessments using themselves as subjects. A major emphasis will be placed on metabolism and energy transfer in the body. Cardiovascular, musculoskeletal, and central nervous system function will also be covered. Individual body composition, musculoskeletal levers, metabolic power and fitness, and neuromuscular control and coordination. Must register for co-req course KINE 321 also.

KINE 326 - EXERCISE EPIDEMIOLOGY  
Short Title: EXERCISE EPIDEMIOLOGY  
Department: Kinesiology  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course provides an epidemiological foundation to exercise and physical activity research related to public health. The course is designed to present evidence of the positive effects of physical activity and exercise in preventing disease, disability, and increasing quality of life. Recommended Prerequisite(s): KINE 321 or KINE 323.

KINE 351 - HUMAN ANATOMY LAB  
Short Title: HUMAN ANATOMY LAB  
Department: Kinesiology  
Grade Mode: Standard Letter  
Course Type: Laboratory  
Credit Hour: 1  
Restrictions: Enrollment is limited to students with a major in Kinesiology. Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): KINE 300  
Description: Study of the pro-sections and cadavers are used for learning and understanding human anatomy in a gross anatomy examination laboratory at BCM in the Texas Medical Center. Hands-on examination of human anatomy in this course provides supplemental practical experience for lectures in KINE 300, Human Anatomy courses.

KINE 495 - INDEPENDENT STUDY IN SPORTS MEDICINE
Short Title: INDEPENDENT STUDY
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-3
Restrictions: Enrollment limited to students with a class of Junior or Senior. Enrollment is limited to students with a major in Kinesiology. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: To provide the student with research opportunity to gain or enhance knowledge in the sports medicine area or to explore an area of interest related to research in sports medicine. Department Permission Required. Recommended Prerequisite(s): KINE 319 and KINE 440. Repeatable for Credit.

KINE 496 - INDEPENDENT STUDY IN SPORTS MEDICINE
Short Title: INDEPENDENT STUDY
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 1-3
Restrictions: Enrollment limited to students with a class of Junior or Senior. Enrollment is limited to students with a major in Kinesiology. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: To provide the student with research opportunity to gain or enhance knowledge in the sports medicine area or to explore an area of interest related to research in sports medicine. Department Permission Required. Recommended Prerequisite(s): KINE 319 and KINE 440. Repeatable for Credit.

KINE 498 - SPECIAL TOPICS IN SPORTS MEDICINE
Short Title: SPECIAL TOPICS IN SPORTS MED
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1-3
Restrictions: Enrollment limited to students with a class of Junior or Senior. Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): KINE 300
Description: Course will address management of common sports injury to return to play. Students will learn how to identify common athletic injuries including mechanism of injury, signs and symptoms, treatment, evaluation of involved body region, and return to play decision making criteria. Fall 2015 topic: Management, Evaluation and Treatment of Sports Injuries. Recommended Prerequisite(s): KINE 321 or KINE 323. Repeatable for Credit.

KINE 499 - TEACHING PRACTICUM IN SPORTS MEDICINE
Short Title: TEACHING PRACTICUM
Department: Kinesiology
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Advanced teaching experience for upper level students who have demonstrated particular aptitude and interest in one area of kinesiology. Students will assist in conducting a course in which they have previously excelled. The student will learn techniques in course management, instruction, and evaluation. Department Permission Required. Recommended prerequisite(s): Junior or senior standing, declared major in Kinesiology, and at least an "A-" in the course serving as the practicum. Repeatable for Credit.

KORE (KORE)
KORE 141 - FIRST YEAR KOREAN I
Short Title: FIRST YEAR KOREAN I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Development of interactional competence in Korean (sociolinguistic and sociocultural knowledge) to communicate and interact with speakers of Korean. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. No prior knowledge of this language is necessary. Placement Test is required.
Course URL: clickorean.blogs.rice.edu

KORE 142 - FIRST YEAR KOREAN II
Short Title: FIRST YEAR KOREAN II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): KORE 141
Description: Continuation of KORE 141. Development of interactional competence in Korean (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Korean. The course is based on a student-centered, critical-thinking approach to language analysis/ acquisition. Mutually Exclusive: Credit cannot be earned for KORE 142 and KORE 262.
Course URL: clickorean.blogs.rice.edu
KORE 263 - SECOND YEAR KOREAN I
Short Title: SECOND YEAR KOREAN I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): KORE 142
Description: Continuation of KORE 142. Development of interactional competence in Korean (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Korean. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for KORE 263 and KORE 201.
Course URL: clickorean.blogs.rice.edu

KORE 264 - SECOND YEAR KOREAN II
Short Title: SECOND YEAR KOREAN II
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): KORE 263
Description: Continuation of KORE 263. Development of interactional competence in Korean (sociolinguistic and socio cultural knowledge) to communicate and interact with speakers of Korean. The course is based on a student-centered, critical-thinking approach to language analysis/acquisition. Mutually Exclusive: Credit cannot be earned for KORE 264 and KORE 202.
Course URL: clickorean.blogs.rice.edu

KORE 301 - THIRD YEAR KOREAN I
Short Title: THIRD YEAR KOREAN I
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): KORE 301
Description: Continuation of KORE 301. Emphasis on developing reading and writing ability as more authentic materials and socio-cultural topics are introduced.
Course URL: clickorean.blogs.rice.edu

KORE 398 - KOREAN TEACHING PRACTICUM
Short Title: KOREAN TEACHING PRACTICUM
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Under the instructor's close supervision, students with a high level of proficiency in Korean acquire teaching skills by tutoring the students in lower level. Instructor Permission Required. Repeatable for Credit.

KORE 399 - KOREAN TEACHING PRACTICUM
Short Title: KOREAN TEACHING PRACTICUM
Department: Cntr Lang & Intercultural Comm
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Under the instructor's close supervision, students with a high level of proficiency in Korean acquire teaching skills by tutoring the students in lower level. Instructor Permission Required. Repeatable for Credit.

Latin (LATI)

LATI 101 - ELEMENTARY LATIN I
Short Title: ELEMENTARY LATIN I
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Study of the fundamentals of Latin grammar with emphasis on acquisition of reading skills. Cross-list: MDEM 101.
LATI 102 - ELEMENTARY LATIN II
Short Title: ELEMENTARY LATIN II
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): LATI 101 or MDST 101
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation.

LATI 104 - AP/OTH CREDIT IN ELEMENTARY LATIN
Short Title: AP/OTH CREDIT ELEMENTARY LATIN
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Transfer
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. Cross-list: MDEM 102.

LATI 201 - INTERMEDIATE LATIN I: PROSE
Short Title: INTERMEDIATE LATIN I: PROSE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: Review of grammar and readings in Latin prose. Cross-list: MDEM 211.

LATI 202 - INTERMEDIATE LATIN II
Short Title: INTERMEDIATE LATIN II
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Prerequisite(s): LATI 201 or MDST 211
Description: Readings in Virgil. Cross-list: MDEM 212.

LATI 204 - AP/OTH CREDIT IN INTERMEDIATE LATIN
Short Title: AP/OTH CREDIT INTERM. LATIN
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Transfer
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course provides credit for students who have successfully completed approved examinations, such as Advanced Placement exams. This credit counts toward the total credit hours required for graduation.

LATI 302 - ADVANCED LATIN
Short Title: ADVANCED LATIN
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: We will read Propertius’ elegies with a view to understanding the poetics of Latin love elegy and the relationship of this genre to its social context. D1 credit.

LATI 303 - ADVANCED LATIN: PLAUTUS AND TERENCE
Short Title: ADV LATIN: PLAUTUS & TERENCE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: We will read Plautus’ Pseudolus and Terence’s Adelphoe. We will consider the background of Greek comedy and the contemporary social situation in Rome.

LATI 304 - ADVANCED LATIN: ROMAN EPIC
Short Title: ADV. LATIN: ROMAN EPIC
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Readings in Latin epic poetry, from the Republic through late antiquity. Topics will include the nature of the epic genre, the development of Roman epic, the styles of individual epic poets, and the works’ political and cultural contexts.

LATI 305 - ADVANCED LATIN: HORACE
Short Title: ADVANCED LATIN: HORACE
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Readings from Horace.

LATI 306 - ADVANCED LATIN: OVID’S METAMORPHOSES
Short Title: OVID’S METAMORPHOSES
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Readings in Ovid’s Metamorphoses. Repeatable for Credit.
LATI 307 - LATIN POETRY OF LATE ANTIQUITY
Short Title: LATIN POETRY OF LATE ANTIQUITY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Advanced study of Virgil’s great Roman epic. Areas of interest will include Virgil’s poetic technique, the history of ancient epic, and Roman politics and society, particularly in the Augustan Age. Since different books of the Aeneid will be read in different semesters, the course is repeatable for credit. Repeatable for Credit.

LATI 308 - LUCRETIUS
Short Title: LUCRETIUS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): LATI 202
Description: This course will study the great philosophical poem of the Roman Epicurean Lucretius, De Rerum Nature (On the Nature of Things). In addition to selections from the Latin, students will read the entire poem in English translation as well as scholarship on the poem from a variety of perspectives.

LATI 310 - SILVER LATIN PROSE: SENECA AND TACITUS
Short Title: SILVER LATIN PROSE: SENECA AND TACITUS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: We will read Cicero’s PRO CAELIO and several of Catullus’ longer poems as a vehicle for understanding politics and culture in the late Roman Republic.

LATI 317 - READINGS IN LIVY
Short Title: READINGS IN LIVY
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Selections from the Roman historian Livy. Close attention will be given to Livy’s prose style and narrative techniques. We will also examine his historical method, the Augustan context of his work, and the information he provides as a source on Roman history. Repeatable for Credit.

LATI 318 - READINGS IN CICERO
Short Title: READINGS IN CICERO
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will focus on the two writers who developed new pathways unforeseen directions, which remain provocative and stimulating today. This course will feature readings in Cicero (1st c. BCE), the politician, orator, and philosopher of first-century BCE Rome. The single most influential writer in Latin, Cicero is also a primary source for the fall of the Roman Republic. Spring 2016 will focus on the speech Pro Caelio, addressed to a law course in defense of the Roman aristocrat Caelius Rufus, and one of Cicero's most entertaining speeches. Repeatable for Credit.

LATI 320 - SILVER LATIN PROSE: SENECA AND TACITUS
Short Title: SILVER LATIN PROSE: SENECA AND TACITUS
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Latin culture during the Silver Age (AD 18-133) developed in unforeseen directions, which remain provocative and stimulating today. This course will focus on the two writers who developed new pathways in prose writing and new ideas about Rome, the moralist Seneca and the historian Tacitus. We will read one of Seneca’s moral essays, De brevitate vitae, and book four of Tacitus’ Annals.

LATI 391 - DIRECTED READING
Short Title: DIRECTED READING
Department: Classical and European Studies
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Independent work for qualified juniors and seniors in genres or authors not presented in other upper level courses. Repeatable for Credit.
LASR 158 - INTRODUCTION TO LATIN AMERICAN STUDIES
Short Title: INTRO LATIN AMERICAN STUDIES
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: This course immerses students into Caribbean and Latin American studies by introducing them to the history, society, politics, and culture of the region, through a cross-disciplinary and a multi-national approach. Taught in English. Open to all students. Cross-list: SPPO 158.

LASR 251 - CONTINUITIES AND CHANGES IN BRAZILIAN HISTORY
Short Title: BRAZIL: CONTINUITY & CHANGE
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: An exploration of themes essential to understanding modern Brazil, such as the origins of a multi-racial society, the transition from monoculture to industry, authoritarian and democratic trends, the emergence of a uniquely Brazilian culture, and the conflicts - environmental, political, and economic - over the development of the Amazon. Cross-list: HIST 251.

LASR 373 - WOMEN'S SOCIAL MOVEMENTS IN LATIN AMERICA AND THE CARIBBEAN
Short Title: WOMEN'S SOCIAL MOVEMENTS
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will investigate the contemporary writings of Latina and African American women in urban spaces across the U.S. We will examine the historical development of women's social movements in Latin America and the Caribbean. We will explore how they are transforming the region through their diverse forms of political engagement. This is a lecture/seminar course that emphasizes writing and discussion. Cross-list: SWGS 373.

LASR 374 - FEMINIST AND QUEER THEORY IN THE AFRICAN DIASPORA
Short Title: FEM THEORY IN AFRICAN DIASPORA
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course provides an interdisciplinary overview of the body of Black feminist and queer theory that has emerged within the last forty years. We will examine these frameworks in order to understand how racial difference shapes gender and sexual identities. This is a seminar that emphasizes research and discussion. Cross-list: SWGS 374.

LASR 375 - LATINA AND AFRICAN AMERICAN WOMEN'S ACTIVISM IN THE URBAN METROPOLIS
Short Title: WOMEN'S ACTIVISM URBAN METRO
Department: Span Port & Latin Amer Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course will investigate the contemporary writings of Latina and African American women in urban spaces across the U.S. Understanding these women's experiences in relationship to each other will reveal the shared, yet distinct, trajectories that orient their struggle to resist poverty, racism, homophobia, and sexual and reproductive violence. Cross-list: SWGS 375.
LASR 376 - CHICANA AND LATINA EXPERIENCE THRU FILM  
**Short Title:** CHICANA/LATINA EXP THRU FILM  
**Department:** Span Port & Latin Amer Studies  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** This seminar explores the Chicana and Latina experience in the U.S. We examine these women's response to each other and forces of conquest, capitalism, and patriarchy. Novels, oral life histories, film, and art will be used to interrogate these women's conceptualization and assertion of feminism, activism, and history. Cross-list: SWGS 376.

LASR 491 - LATIN AMERICAN STUDIES CAPSTONE  
**Short Title:** LATIN AMERICAN STUDIES CAPSTN  
**Department:** Span Port & Latin Amer Studies  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Graduate level students may not enroll.  
**Course Level:** Undergraduate Upper-Level  
**Description:** Students will write original seminar paper on Latin America incorporating reading and research in English and in the Spanish or Portuguese language sources; to be drawn from their research conducted during a study abroad semester in Latin America.

**Liberal Studies Core/Capstone (MLSC)**

MLSC 501 - THE SHAPING OF WESTERN THOUGHT  
**Short Title:** THE SHAPING OF WESTERN THOUGHT  
**Department:** School of Continuing Studies  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Study of the foundational, intellectual and artistic texts of the western tradition from Ancient Greece to Medieval Islam. Consideration of texts and images over time and in their historical development as we reflect on who we are and how we got here. Readings would include: The Gilgamesh Epic, Homer’s Iliad, Thucydides’ War, Plato’s Republic, Book of Genesis, Virgil’s Aeneid, Gospels of Luke and of Thomas, Augustine’s Confessions and The Qur’an. Department Permission Required.

MLSC 502 - OUR ENVIRONMENT: SCIENCE AND CULTURE  
**Short Title:** OUR ENVIRONMENT:SCIENCE & CULT  
**Department:** School of Continuing Studies  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course will examine several Shakespeare plays and their theatrical productions. The instructor will teach each play as a text (and a script) first, and then study the films of these plays in an effort to understand the choices the film-makers have made in adapting Shakespeare’s plays to the screen. In this course, then, we will be concerned with studying both Shakespeare’s plays and what happens to those plays in the hands of a creative film-maker. Department Permission Required.

MLSC 505 - SHAKESPEARE AND FILM  
**Short Title:** SHAKESPEARE AND FILM  
**Department:** School of Continuing Studies  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course will examine several Shakespeare plays and their theatrical productions. The instructor will teach each play as a text (and a script) first, and then study the films of these plays in an effort to understand the choices the film-makers have made in adapting Shakespeare’s plays to the screen. In this course, then, we will be concerned with studying both Shakespeare’s plays and what happens to those plays in the hands of a creative film-maker. Department Permission Required.

MLSC 506 - THE SOLAR SYSTEM, THE SUN AND THE MIND OF MAN  
**Short Title:** SOLAR SYSTEM,SUN & MIND OF MAN  
**Department:** School of Continuing Studies  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course will explore the beauty of our near-by cosmic environment, the solar system, both as a work of nature and also from the standpoint of a challenge to the observational and analytical capabilities of human beings. The course will follow two parallel tracks: a historical/conceptual understanding of the solar system and the various paradigms or models used to describe the physical “universe.” In the second track we will tour the solar system beginning with the Sun, examining each planet and its satellite(s) in detail. The course will be non-mathematical; however, a few equations may show to illustrate a point. Department Permission Required.
MLSC 508 - EARTH SYSTEMS DYNAMICS
Short Title: EARTH SYSTEMS DYNAMICS
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course involves exposing the advanced student to the interactions among the several mechanisms that combine to produce a working Earth. It would include concepts of Physics, Chemistry, Biology, Geology, Meteorology and Ecology. Department Permission Required.

MLSC 509 - STEREOTYPES, PREJUDICE AND DISCRIMINATION
Short Title: STEREOTYPES,PREJUDICE,DISCRIM
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: In the past century social scientists have learned an enormous amount about stereotypes, prejudice and discrimination, yet they remain poorly understood by the public at large and especially by public policy makers. We all hold stereotypes, show prejudices and discriminate although not necessarily in traditional racist or sexist ways. This course will explore what social scientists, especially social psychologists, have learned about these issues especially in the last quarter century. While we will cover traditional racial and gender issues, we will also consider material related to obesity, homosexuality, mental and physical disability and age among other topics. Department Permission Required.

MLSC 510 - MUSIC AND OTHER ARTS: COLLABORATION AND FUSION
Short Title: MUSIC AND OTHER ARTS
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will introduce students to the collaboration between music and other arts - poetry, drama, mythology, the visual arts (as applied to set and costume design) and dance - that often occurs during the creation of large musical works such as symphonies, operas and ballets. By investigating six musical masterpieces, it will be possible to discuss aspects of the collaborative process and how they lead to artistic fusion. Department Permission Required.

MLSC 513 - DNA: HUMAN IDENTITY AND ORIGINS
Short Title: DNA: HUMAN IDENTITY & ORIGINS
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: "Who am I?" "Where did I come from?" All branches of knowledge address these fundamental questions. This course examines how DNA informs the structure and function of humans, and how humans have in turn used DNA as a source of information to solve mysteries and improve lives. We will introduce the structure of DNA and show how it influences physical traits and is passed on from parent to child. We will review the original goals of the Human Genome Project and discuss how the surprising results that emerged from it have altered the way we view the role of genes in human development. We will examine how breakthroughs in DNA technology have allowed us to answer questions about human origins, worldwide migrations and personal genealogy and aided criminal investigations and medical treatment. This course will also use the specifics of DNA investigation as examples of science in action. Department Permission Required.

MLSC 515 - SCIENCE IN THE FIRST PERSON
Short Title: SCIENCE IN THE FIRST PERSON
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Have you wondered what it would be like to participate in a major scientific discovery, or to deal with highly competitive or cantankerous colleagues, or to convince a skeptical world that your idea is right and the rest of the world has got it wrong? By reading material written by scientists who have made major discoveries, we will look at how science is done from the first-person perspective. We will see how scientists confront troubling thoughts when they see the modern world in conflict with the nature they love, and why science has been called a "contact sport." Department Permission Required.

MLSC 517 - MODERN DRAMA ON FILM AND IN PERFORMANCE
Short Title: MODERN DRAMA
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will focus on drama not only as text but also as performance. We will read modern plays and discuss them as they are often discussed in English courses, concentrating on theme, character, world, imagery, language and dramatic action. In addition, we will also examine the "texts" as scripts, as working papers for actors and directors: in short, as source materials for performance. To this end we will also view movie versions of many of these plays. Department Permission Required.
MLSC 519 - PSYCHOLOGY OF BELIEFS
Short Title: PSYCHOLOGY OF BELIEFS
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Beliefs are among the most primitive, important and central of mental constructs. Many of our reactions to others are based on our beliefs and our perceptions of theirs, and it is impossible to understand racism, prejudice, religious and national conflicts without considering disagreement over basic belief systems. While there are several ways to approach the study of beliefs, we will focus on problematic beliefs, sometimes called anomalous or bizarre beliefs. Examples are beliefs in ESP and the paranormal, astrology, the reality of events that could not possibly have occurred, scientific theories and medical cures that are rejected by most experts, as well as extreme religious and political ideas. Department Permission Required.

MLSC 523 - THEORY AND PRACTICE OF PUNISHMENT
Short Title: THEORY & PRACTICE OF PUNISHMNT
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will focus on the writings of some of the most influential scholars in sociology, legal philosophy and political theory who have contributed to the creation of ideal or normative views of legal punishment and exposing the harsh realities of how non-violent and violent criminals are actually punished. Department Permission Required.

MLSC 525 - PLAGUES AND POPULATIONS
Short Title: PLAGUES AND POPULATIONS
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will examine the interaction of pathogens and human societies. It will cover the biological nature of pathogens and disease, the human immune system and therapeutic and societal interventions to prevent and cure disease. Specific diseases will be studied to determine the biology of the disease agent, its exploitation of the human host, its transmission and epidemiology and how the disease impacts the economic, political, social structure and values of the affected populations, and how the response to disease may limit its impact. Department Permission Required.

MLSC 526 - CONTEMPORARY MORAL ISSUES
Short Title: CONTEMPORARY MORAL ISSUES
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The cardinal objective of the course is to stimulate students to analyze and evaluate the opposing viewpoints of some scholars who have expressed their views on some of the most disputed moral issues in contemporary American culture. Specifically, the required readings for the class focus on abortion, the death penalty, euthanasia, world hunger and poverty, sexual morality, drugs and addiction and affirmative action. Arrangements will be made for a tour of a prison unit and the opportunity to discuss the death penalty with several inmates. Department Permission Required.

MLSC 532 - THE GRAND DESIGN
Short Title: THE GRAND DESIGN
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The book "The Grand Design" by Stephen Hawking and Leonard Mlodinow asks the big questions: how did our universe begin and is it the only one or are there multiple parallel universes; why is there something rather than nothing; why are we here; why are the laws of nature so finely tuned that they allow a stable universe? Guided by the Hawking/Mlodinow book, this course will explore these questions. We will address the question: do the laws of physics provide for the possibility of a multiplicity of universes of which ours, by happenstance or probability, turned out to have the right set of physical constants to provide for a stable universe and hence the possibility of life or is a Divine Creator necessary? To address these questions we will take a layman's tour of basic concepts of cosmology, quantum mechanics, relativity, string theory, and extra-dimensions. Department Permission Required.

MLSC 533 - SELF-DETERMINATION IN ARAB WORLD
Short Title: SELF-DETERMINATION ARAB WORLD
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course investigates the history of the struggle for self determination and democracy in the Arab world. It provides a historical perspective by exploring the antecedents to the current so-called "Arab Spring," specifically by comparing the anti-colonial nationalisms of the twentieth century with the today's pro-democracy movements. It will also examine the role of the West, including the United States, in hindering or promoting anti-colonialism, nationalism and democracy in the Arab world. Department Permission Required.
MLSC 534 - HUMAN RIGHTS IN WORLD AFFAIRS
Short Title: HUMAN RIGHTS IN WORLD AFFAIRS
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course examines the history of human rights and humanitarianism from the eighteenth century Enlightenment era to the present. How did human rights become the premier moral language of our times and the idiom in which recent generations frame their idealism? While universal human rights may seem timeless, they have a long and checkered political and philosophical history. This seminar will explore that history through anthropology and legal studies as well as through case studies of non-governmental organizations. Special attention will be given to international law and shifts in international politics in the twentieth century. The course will also analyze the passions that motivated people to pursue human rights and the empathy that led them to uproot injustice. Department Permission Required.

MLSC 535 - "PLEASE SIR, I WANT SOME MORE": DICKENS, OLIVER TWIST, POVERTY, AND SOCIAL JUSTICE
Short Title: DICKENS, TWIST, SOCIAL JUSTICE
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: During the worldwide celebrations of Charles Dickens's bicentenary in 2011-12 Oliver Twist received vibrant new attention because its treatment of children, welfare, poverty, domestic violence, and anti-Semitism seemed so relevant to contemporary issues. In this course we will read the novel alongside and against the economic and social theories and practices of Dickens's time, and ask many questions. Department Permission Required.

MLSC 536 - TRADITIONAL CHINESE CULTURE AND ITS MODERN LEGACY
Short Title: TRADITIONAL CHINESE CULTURE
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An analysis of the language, philosophy, religion, art, literature, institutions and social customs of the Qing dynasty (1644-1912), the last imperial regime and a crucial bridge between "traditional" and "modern" China. Although this course is intended in part as an exercise in appreciation, it is designed primarily to encourage critical and creative thinking about another place and time. Department Permission Required.

MLSC 537 - PROFILES FROM THE PAST: FAMOUS FIGURES IN WESTERN HISTORY
Short Title: PROFILES FROM THE PAST
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: What has happened during the course of time, regarding culture and human experience that has been transmitted from the ancient to the modern world? What ideas and concepts concerning subjects such as politics, art, music, and philosophy have been our legacy from the western past? This course will survey the answers to these questions covering the time of classical Greece through the period of the high middle ages. Department Permission Required.

MLSC 538 - OUR CHANGING PLANET
Short Title: OUR CHANGING PLANET
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The Earth can be studied by considering it to be made up of certain elements or systems that interact. The systems that we will consider in this course are the lithosphere, atmosphere, hydrosphere and biosphere. Not quite earth, air, fire and water, but close. We will then explore how these systems interact and finally attempt to evaluate the human impact on the entire earth. Department Permission Required.

MLSC 539 - IMMIGRATION AND THE STATE: EUROPE AND THE US IN COMPARATIVE PERSPECTIVE
Short Title: IMMIGRATION AND THE STTE
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The course traces the history of immigration within and to Europe and to the United States from the late 19th century to the present. How did the United States and the European states elicit, regulate or contain successive waves of labor and colonial migrants, stateless persons and asylum seekers? And what type of legal, political and cultural debates did the "immigrant question" raise in the public sphere since the advent of mass migration? We will discuss key issue regarding immigration including political asylum, guest-worker programs, assimilation and integration debates, and immigrants and the welfare state Department Permission Required.
MLSC 540 - IS ANYBODY OUT THERE: THE SEARCH FOR LIFE BEYOND EARTH
Short Title: IS ANYBODY OUT THERE
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Imagine what the reaction would be if life were discovered on another planet in the solar system or on a planet orbiting another star. With the dawn of the space age tools have become available to tackle this problem with serious scientific research. This course will look at some of this research and examine the prospects for finding life.
Department Permission Required.

MLSC 541 - HUMAN RIGHTS, GENDER EQUALITY AND RELIGIOUS BELIEFS
Short Title: EQUALITY & RELIGIOUS BELIEFS
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This class aims to explore the intertwined relationship between gender equality, human rights and religious beliefs globally. Additionally, the class will focus on realities and misconceptions on women's status in the Middle East and North Africa and explore the impact of the socio-cultural and political context on shaping gender relations across the region. Department Permission Required.

MLSC 542 - THE EPIC JOURNEY
Short Title: THE EPIC JOURNEY
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This class explores some of the classic texts of Western literature, books from the ancient world that have had, and continue to have a formative influence on who we are and how we got here. The works we will study all share a common theme: the epic journey. We explore different variations of this theme, follow ancient travelers on their journeys, and reflect with them about their discoveries. Department Permission Required.

MLSC 543 - THE CITY IN LITERATURE
Short Title: THE CITY IN LITERATURE
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: We will read a variety of writers from both the nineteenth and twentieth centuries. For some historical background and city discourse, we will also read parts of Lewis Mumford's The City in History, Jane Jacobs's The Death and Life of Great American Cities, and the essays of Michel de Certeau, Georg Simmel, E B White, among others. Department Permission Required.

MLSC 544 - WRITING LITERATURE FOR CHILDREN
Short Title: WRITING CHILDREN'S LITERATURE
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Many of us have beloved stories we either read or that someone read to us when we were children. This course returns us to those roots and delves deeply into the meaning and purpose of children's literature with the ultimate goal of trying our hand at writing several original pieces. Students will produce a portfolio of creative work that includes poetry, fiction, and/or drama for very young and older children.
Department Permission Required.

MLSC 545 - WINDOW TO THE SOUL: EXPLORING RELIGION AND ETHNICITY THROUGH MUSIC
Short Title: RELIGION & ETHNICITY MUSIC
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will explore the music of a variety of religious and ethnic groups in an attempt to bridge differences and create understanding among those of different traditions. Each class session will be based upon the music connected to a specific religious or ethnic group. Department Permission Required.

MLSC 546 - THE ROLE OF CHEMISTRY IN HISTORY
Short Title: ROLE OF CHEMISTRY IN HISTORY
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Could the outcome of a war be decided simply on the material chosen for the buttons on the soldier's garments? What in pantyhose was desired for WWII? How did phenols and formaldehyde lead to a worldwide revolution via plastics? These questions and more will be answered as we explore important molecules that have changed the course of human history. Department Permission Required.

MLSC 547 - PROFILES FROM THE PAST II: FAMOUS FIGURES IN WESTERN HISTORY
Short Title: PROFILES FROM THE PAST II
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers the span of years from the end of the middle Ages through the eve of the French Revolution. In addition to the study of a selected group of people from these years, there will also be an examination of the Renaissance, the Reformation, the Enlightenment, and Absolutism. Department Permission Required.
MLSC 548 - HISTORY OF PHILOSOPHY SET IN INTERDISCIPLINARY CONTEXT
Short Title: HIST OF INTERSIC PHILOSOPHY
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will introduce students to leading figures, ideas and arguments of the history of western philosophy, set in interdisciplinary context in this interdisciplinary MLS program. For a general educated audience philosophy is best approached from multiple perspectives - historical, literary, scientific, religious, artistic - and we will take this approach.

MLSC 549 - COMPARATIVE IMPERIAL PLEASURE GARDENS: POWER AND LANDSCAPE
Short Title: IMPERIAL PLEASURE GARDENS
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will introduce students to leading figures, ideas and arguments of the history of western philosophy, set in interdisciplinary context in this interdisciplinary MLS program. For a general educated audience philosophy is best approached from multiple perspectives - historical, literary, scientific, religious, artistic - and we will take this approach.

MLSC 550 - MODERN ASTRONOMY AND OUR PLACE IN THE UNIVERSE
Short Title: MODERN ASTRONOMY
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An introduction to modern astrophysics beyond the solar system including a brief history of astronomy from antiquity through Galileo and Newton. Our modern understanding of the formation, evolution, and death of stars; the composition and evolution of galaxies; the structure and evolution of the universe will then be surveyed. Department Permission Required.

MLSC 551 - PROFILES FROM THE PAST III: FAMOUS FIGURES IN WESTERN HISTORY
Short Title: PROFILES FROM THE PAST III
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will cover the span of years from the beginning of the French Revolution to the middle of the 20th century. In addition to the study of selected individuals such as Napoleon Bonaparte, Czar Alexander I, Cecil Rhodes, Gregor Rasputin, Vladimir Lenin, Joseph Stalin, Adolf Hitler and Mohandas Gandhi, there will be examinations of Romanticism, Nationalism, Imperialism, and Fascism. Department Permission Required.

MLSC 552 - CONSERVING BIODIVERSITY
Short Title: CONSERVING BIODIVERSITY
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Many scientists have coined the current geological age as the "Anthropocene" in reference to the impact of mankind on the planet. This course will examine biodiversity, how biodiversity influences our lives, the forces that affect biodiversity worldwide, and how we can protect it. Local species and ecosystems will be highlighted.

MLSC 553 - SOLVING THE CLIMATE CHALLENGE
Short Title: SOLVING THE CLIMATE CHALLENGE
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: In this class we will carefully examine four great novels from different eras: "Pride and Prejudice," "Great Expectations," "One Flew Over the Cuckoo's Nest," and "Atonement," to see what makes them so successful. Then we will watch and discuss the great films made from them. Department Permission Required.

MLSC 554 - MY FAVORITE NOVELS - AND GREAT FILMS MADE FROM THEM
Short Title: MY FAVORITE NOVELS AND FILMS
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: In this class we will carefully examine four great novels from different eras: "Pride and Prejudice," "Great Expectations," "One Flew Over the Cuckoo's Nest," and "Atonement," to see what makes them so successful. Then we will watch and discuss the great films made from them. Department Permission Required.

MLSC 555 - THE POLITICAL PHILOSOPHY OF THE AMERICAN REVOLUTION
Short Title: POL PHIL OF AMER REVOLUTION
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will 1) discuss the significance of some events in Colonial American that precipitate the clarion call the dissolve forever all political ties to Great Britain: 2) discuss the ideological origins of the American Revolution in the key documents, specifically the Declaration of Independence, the Constitution, the Bill of Rights and the Federalist Papers. Department Permission Required.
MLSC 600 - INTRODUCTION TO GRADUATE RESEARCH, ANALYSIS AND EXPOSITION
Short Title: INTRO GRAD RESEARCH & WRITING
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The goals of this course will be to develop the students’ abilities to perform library or Internet scholarly research at a graduate level; conduct graduate-level analysis of representative graduate-level readings and topics similar to those encountered in the MLS program; demonstrate the advanced analytical and critical thinking abilities required inside and outside the graduate classroom; express the results of scholarly research and analysis and original ideas in the written formats that meet the criteria for graduate-level essays, papers and reports; use oral expression, discussion and presentation techniques at the level expected in graduate classrooms. Department Permission Required.

MLSC 604 - EXPLORATION AND DISCOVERY IN ANTARCTICA
Short Title: EXPLOR & DISC IN ANTARCTICA
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will introduce students to the seventh continent through the history of austral exploration and through an explanation of the scientific research that has happened, is happening and will happen there. This course will begin with a basic scientific description of the highest, driest, coldest, windiest continent on Earth. Participants will then study journals of some of the original explorers as well as recent works analyzing the “glory days” of polar exploration. The class will then move from the period of exploration, through the early scientific work, and on to the modern hypothesis-driven science that is taking place now and is being planned for the future. The class will close with an examination of tourism and its effects on the nature of the Antarctic ecosystems and cryosphere. Department Permission Required.

MLSC 606 - THE HEBREW BIBLE AND ITS INTERPRETERS
Short Title: HEBREW BIBLE/ITS INTERPRETERS
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This seminar seeks to acquaint students with the principal parts of the Hebrew Bible/Old Testament, with the modern, historical-critical study of the Bible as an academic discipline, and a few episodes in the recent history of the Bible in the West. Our reading of the biblical literature will primarily be historical-critical in the sense that it emphasizes that the Hebrew Bible is rooted in the ancient Near East, its history and literature. At the same time we will be sensitive to traditional, Jewish and Christian readings of the Bible as they evolved over two millennia and examine how these faith-based traditions arose, how they differ from modern critical approaches and how the two can complement each other. Department Permission Required.

MLSC 610 - PSYCHOLOGY OF HAPPINESS
Short Title: PSYCHOLOGY OF HAPPINESS
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Truth, beauty and, yes, happiness, are issues that have engaged thoughtful people over the centuries. What is happiness (and what makes us happy)? Until recently we have relied on philosophers and religious thinkers for answers to that question, and many of them have provided useful recipes that seem to work for at least some people some of the time. The last century or so has seen many psychologists and self-help gurus who have also handed out (well, more often sold) recipes that generally seem to be less satisfactory than the wisdom of the ancients. Interestingly until recently psychologists have tended to ignore this seemingly important topic, but in the past 10 or so years social and personality psychologists, neuroscientists and even economists have begun to pose empirically answerable questions about happiness and to find some data-based answers to what makes people happy. In this course we will read some of the traditional wisdom provided by religious and philosophical thinkers, but we will focus primarily on questions and issues that are subject to empirical resolution. Department Permission Required.
MLSC 612 - THE DEAD SEA SCROLLS
Short Title: THE DEAD SEA SCROLLS
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The discovery of the Dead Sea Scrolls a little over a half a century ago in the Judean desert has been celebrated as the most significant manuscript discovery of the 20th century. Students will study the fascinating history of the discovery and publication of the Scrolls. They will read the most important Scrolls, learn about the beliefs and practices of the Jewish group that authored them and discuss what can be learned from the Scrolls about the nature of Early Judaism and the origins of Christianity. Department Permission Required.

MLSC 614 - PUBLIC SPEAKING
Short Title: PUBLIC SPEAKING
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is designed to give the student exposure to and experience using basic principles and skills of oral communication in the public context. Emphasis will be on the development of speech organization, support and delivery. Informative and persuasive speeches will be practiced. An important outcome of the course is that the student better understand and appreciate the important role public speaking plays in modern society. Instructor Permission Required.

MLSC 615 - TEN MASTERPIECES OF NORTHERN RENAISSANCE ART
Short Title: MASTERPIECES OF REN ART
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will introduce students to the great "masterpieces" of painting produced in Northern Europe during the Renaissance of the fifteenth and sixteenth centuries. Each week we will focus on a single work of art from this period and explore a constellation of issues around the creation and reception of the painting. Students will learn in-depth methods of visual analysis and interpretation of works within their historical context. These same skills and strategies may be applied to the full range of western painting and provide useful tools for enriching visits to museums or experiences of European travel. Department Permission Required.

MLSC 617 - CREATIVE NONFICTION
Short Title: CREATIVE NONFICTION
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Creative nonfiction takes many forms, including expository writing, personal essay, narrative story-telling, literary journalism, memoir, nature and science writing, travel and food writing, historical narrative, biographical narrative, and academic and cultural criticism. This course is designed to help students read and write creative nonfiction with a focus on the voice, structure, messages, style, and technique found in contemporary creative nonfiction. The material covered applies to the humanities, the social sciences, and the sciences. Department Permission Required. Repeatable for Credit.

MLSC 618 - THE AWAKENING OF RUSSIA: A MUSICAL AND HISTORICAL PASSAGE
Short Title: THE AWAKENING OF RUSSIA
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: There was a spectacular flowering of Russian culture in the aftermath of the death of Czar Nicholas I (1825-55). Ushered in was a relatively liberal era which, combined with a powerful natural upsurge, yielded a period of remarkable creativity - noted especially in this course by Russian music. This interdisciplinary course will couple the historical and musical threads of Russian culture. Department Permission Required.
MLSC 621 - ART MUSIC IN WESTERN EUROPEAN CULTURE II
Short Title: ART MUSIC IN EUROPEAN CULTURE II
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This is the second course in a sequence devoted to advanced musical understanding. In the first part of this sequence (Art Music in Western European Culture I) we will examine a wide range of music from a single time period. In this, the second part of the sequence, we will instead concentrate in depth upon one piece of music per class and will combine a focus upon advanced listening skills with music specific research techniques. The first weeks of the class will review musical listening, discourse, and the specialized skills necessary for musical research. Subsequently, each class session will focus upon a major work by a significant composer such as Mozart, Beethoven, Schubert, Mahler, and Debussy, among others. Department Permission Required.

MLSC 622 - THE SCEPTER'D ISLE: ANCIENT AND MEDIEVAL BRITAIN
Short Title: ANCIENT AND MEDIEVAL BRITAIN
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: From the murky prehistoric times of Stonehenge and New Grange to the tumultuous times of Henry II and Eleanor of Aquitaine, the dramatic combinations of history and myth have continually fascinated lovers of the British Isles. This course will explore ancient and medieval Britain, meandering from prehistoric sites to the early invaders, from the delightful legends of Glastonbury to the centuries of Roman invasions, from the Anglo-Saxon heptarchy to the Norman invasion, and from the hegemony of the Roman Catholic church to the challenge of secular kings. Department Permission Required.

MLSC 623 - WHAT MODERN WAS: CELEBRATING THE CENTENNIAL
Short Title: CELEBRATING THE CENTENNIAL
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: What constituted "modern music" in 1912? Works such as Arnold Schoenberg's Perrot lunaire, Claude Debussy's Jeux, and compositions by American composers Henry Cowell and Charles Ives set the bar for musical modernism that year. But other pieces from France, Germany, Russia, Spain, Hungary and England suggested that the future would present major changes. What did audiences in the United States know about such music? What did they think about it? What did the founders of the Rice Institute think about the new musical trends? How did the music played at the opening festivities of the Rice Institute reflect these perceptions of musical modernism? This course will consider these questions from a variety of parameters and get a sense of "what modern was" and its relationship to the momentous events of 1912 in Houston, Texas. Department Permission Required.

MLSC 624 - ADVANCED CREATIVE NONFICTION
Short Title: ADVANCED CREATIVE NONFICTION
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course offers students an opportunity to continue to practice writing creative nonfiction in a guided workshop format. The primary emphasis in the course will be on the professor and students reading and providing constructive feedback on the students' creative nonfiction writings. In addition, the students will read further examples of various types of creative nonfiction writing and complete writing exercises designed to allow them to work on the voice, structure, and technique of their writing. This course is designed for students with experience in writing creative nonfiction, such as completion of MLSC 617 or a similar course or creative writing workshop experience elsewhere. For those who have not taken a creative nonfiction course in the MLS program, consultation with the instructor is recommended before enrolling. Department Permission Required.

MLSC 625 - THE SHAPES OF POETRY: A WORKSHOP
Short Title: THE SHAPES OF POETRY
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course examines fundamental architecture of poetry. How do poets create a sense of shape? What are the nuts and bolts of a poem? Students will read widely in the history of poetry, from traditional meters and historical forms to contemporary free verse and experimental or open forms. Part workshop and part seminar, this course will feature critical and creative assignments and is designed for writers and non-writers of any level of experience. Department Permission Required.

MLSC 626 - THE BROTHERHOOD: LIVES AND LOVES OF THE PRE-RAPHAELITES
Short Title: PRE-RAPHAELITES LIVES & LOVES
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The Pre-Raphaelite Brotherhood (PRB), founded in 1848, was a small group of British artists who boldly challenged the conventions of Victorian-era art and the materialism of industrialized England. While the PRB influenced the British art world for the remainder of the century, this course will focus on the intriguing personal lives of the artists, including Dante Gabriel Rossetti, William Holman Hunt, and John Millais, rather than the art they created. These artists, along with their wives, paramours, and models (often all one and the same) were part of a highly prolific Victorian creative class which for this course will revolve around the locale of central London and the influence of the towering figure of art and architecture - critic John Ruskin. Department Permission Required.
MLSC 627 - JOHN RUSKIN AND HIS WORLD
Short Title: JOHN RUSKIN AND HIS WORLD
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will examine John Ruskin (1819-1900), who rose from a troubled childhood to become one of the most influential critics of art and architecture of his century, forever fulminating the notion that art had a moral purpose and especially that art and architecture produced in France and Italy in the Middle Ages. Department Permission Required.

Short Title: THE BIRTH OF MODERNISM
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: One hundred years have passed since the momentous decade that brought us the beginnings of modernism, the "war to end all wars," and post war cynicism. This course will examine those tumultuous years from the perspective of the wide array of music written to satisfy all types of tastes and circumstances. Department Permission Required.

MLSC 629 - EFFECTIVE THINKING
Short Title: EFFECTIVE THINKING
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The basis of success in everything, academics, personal relationships, professional life, business leadership, or anything, is effective thinking. This course will address the process and practice of how to think effectively, analytically, and creatively. Department Permission Required.

MLSC 630 - POST-BOP: JAZZ'S GOLDEN AGE
Short Title: JAZZ'S GOLDEN AGE
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: In this course we will explore the music of some of the most influential and important jazz musicians of the period, and we will also study the social, cultural and political context within which the music was created. We will focus in particular on Charlie Parker, Thelonious Monk, Billie Holiday, Miles Davis, Charles Mingus, and John Coltrane. Department Permission Required.

MLSC 631 - INTRODUCTION TO READING AND WRITING FICTION
Short Title: INTRO READING WRITING FICTION
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course provides an introduction to reading fiction critically and writing short fiction successfully. The reading portion of the class focuses on the primary elements of fiction: scenes, tension and conflict, character, point of view, structure, voice, and dialogue. For the writing portion, students will compose original prose and provide feedback on one another's work in a workshop format. Department Permission Required.

MLSC 632 - MUSIC MYTH AND MADNESS
Short Title: MUSIC MYTH AND MADNESS
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A study of biographical narratives about musicians including Bach, Bob Dylan, Thelonious Monk, Mozart, and Schumann. Considers the nature of creativity and inspiration. Examines the extent to which biography borrows from mythology and literary fiction. Materials include memoirs, letters, novels, and films. Department Permission Required.

MLSC 633 - HOW TO READ A NOVEL
Short Title: HOW TO READ A NOVEL
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: We will start this course by making one of Jane Austen's novels our "norm" and then read a survey of the novel's great variety through the nineteenth, twentieth, and twenty-first centuries. As we read the novels, we will keep asking what we mean by narrative, point of view, the nature of character, the paradigm of character relationships each novel creates, and the meaning of the end. Department Permission Required.
MLSC 700 - CAPSTONE I
Short Title: CAPSTONE I
Department: School of Continuing Studies
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The capstone course is designed to help students utilize the knowledge gained in the previous courses and to demonstrate mastery of the intellectual skills required for a Master of Liberal Studies degree. The capstone course will culminate in an extensive written paper (or original creative work such as poetry or fiction) and an oral presentation to MLS faculty and fellow students. The capstone course may be completed in one term as one course, or, optionally, the student may with the advisor’s approval, take two terms to complete the capstone. The determination as to whether the capstone will be a one or two term project should, in most cases, be made before the start of the first term. Department Permission Required.

MLSC 701 - CAPSTONE II
Short Title: CAPSTONE II
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Liberal Studies. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Continuation of MLSC 700 Capstone I; or for students who plan to take only one term to complete the capstone. Department Permission Required.

MLSC 750 - INTRODUCTION TO DIPLOMA RESEARCH
Short Title: INTRO TO DIPLOMA RESEARCH
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment limited to students in the DLS program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Open only to students in the Diploma in Liberal Studies Program. The purpose of this course is to prepare students for diploma research in general and for the diploma project research in particular. The course will accomplish this by giving students an opportunity to gain knowledge of research in the two chosen disciplines outlined in their Diploma Proposal. Department Permission Required.

MLSC 797 - ADVANCED INDEPENDENT READINGS
Short Title: ADVANCED INDEPENDENT READINGS
Department: School of Continuing Studies
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hours: 3
Restrictions: Enrollment limited to students in the DLS program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Independent study under faculty supervision and open only to students in the Diploma in Liberal Studies Program. The primary purpose of this course is to allow for study centrally relevant to the two disciplines chose by the DLS student not covered by existing coursework in liberal studies curriculum. Department Permission Required. Repeatable for Credit.

MLSC 798 - DIPLOMA PROJECT I
Short Title: DIPLOMA PROJECT I
Department: School of Continuing Studies
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment limited to students in the DLS program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Research for Diploma Project. Open only to students in the Diploma in Liberal Studies program. This is the first of a two-term course sequence in which the diploma student works on his or her diploma project under the supervision of the diploma first reader (advisor), second reader and third reader. Department Permission Required.

MLSC 799 - DIPLOMA PROJECT II
Short Title: DIPLOMA PROJECT II
Department: School of Continuing Studies
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 3
Restrictions: Enrollment limited to students in the DLS program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Research for Diploma Project. Open only to students in the Diploma in Liberal Studies program. This is the second and final course in the two-term course sequence in which the diploma student works on his or her diploma project under the supervision of the diploma first reader (advisor), second reader and third reader. Department Permission Required.
Lifetime Phys Activity Program (LPAP)

LPAP 100 - INTRODUCTION TO TENNIS
Short Title: INTRODUCTION TO TENNIS
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This class will provide the student with foundational knowledge of tennis skills and rules as well as appropriate sports person-like qualities so that the game can be played with confidence and competence throughout one’s lifetime.

LPAP 104 - INTRODUCTION TO RACQUETBALL, SQUASH, AND BADMINTON
Short Title: INTRO RACQUET SPORTS
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: An introduction to basic skills and knowledge necessary to play badminton, racquetball and squash at the beginning level.

LPAP 107 - INTERMEDIATE TENNIS
Short Title: INTERMEDIATE TENNIS
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This class is for the student who already possesses a fundamental knowledge of tennis and is looking to hone and sharpen her/his skills.

LPAP 109 - INTRODUCTION TO FOXTROT AND WALTZ
Short Title: INTRO TO FOXTROT AND WALTZ
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Course content includes demonstration of and brief lectures on the American Style Foxtrot and Waltz. Students will participate in drills created to improve footwork, arm positioning, leading and following skills.

LPAP 110 - INTRODUCTION TO GOLF
Short Title: INTRODUCTION TO GOLF
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This class will cover the fundamental skills, rules, and etiquette of golf. There is an additional $90 fee associated with this course. Class will often meet at the Memorial Hermann Park Golf Course. Students are expected to carpool or walk to class on those days.

LPAP 111 - INTERMEDIATE GOLF
Short Title: INTERMEDIATE GOLF
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Prerequisite(s): LPAP 110
Description: This class is designed for an intermediate level player. Topics covered include: swing fundamentals, set up, aim & alignment, putting, chipping, and club selection. There is an additional $60 course fee associated with this class.

LPAP 113 - MENTAL TRAINING FOR PERFORMANCE ENHANCEMENT
Short Title: MENTAL TRAINING
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course will provide a broad overview of sport psychology concepts that are relevant to most performance related activity. Specifically, the class will cover topics designed to enhance performance such as arousal and anxiety regulation, behavior modification, goal setting, leadership and communication skills, intrinsic motivation and self-confidence.
**LPAP 115 - MINDFULNESS: MEDITATION FOR STRESS REDUCTION**  
*Short Title:* MINDFULNESS MEDITATION  
*Department:* Lifetime Physical Activity  
*Grade Mode:* Standard Letter  
*Course Type:* Lecture  
*Credit Hour:* 1  
*Restrictions:* Enrollment is limited to Undergraduate level students.  
*Course Level:* Undergraduate Lower-Level  
*Description:* This course is designed to help students cultivate mindfulness by intentionally bringing awareness to the present, and noticing and letting go of judgment, critical thoughts and preconceived ideas. The course consists of instruction in and practice of mindfulness meditations as well as discussion of integrating mindfulness into everyday life.

**LPAP 116 - INTERMEDIATE SALSA/CHA CHA**  
*Short Title:* INTERMEDIATE SALSA/CHA CHA  
*Department:* Lifetime Physical Activity  
*Grade Mode:* Standard Letter  
*Course Type:* Activity Course  
*Credit Hour:* 1  
*Restrictions:* Enrollment is limited to Undergraduate level students.  
*Course Level:* Undergraduate Lower-Level  
*Prerequisite(s):* LPAP 138  
*Description:* Students will develop increased proficiency at leading and following and creating complex turns/footwork as are commonly utilized in American style salsa and cha cha.

**LPAP 117 - INTRODUCTION TO OUTDOOR LEADERSHIP**  
*Short Title:* INTRO TO OUTDOOR LEADERSHIP  
*Department:* Lifetime Physical Activity  
*Grade Mode:* Standard Letter  
*Course Type:* Activity Course  
*Credit Hour:* 1  
*Restrictions:* Enrollment is limited to Undergraduate level students.  
*Course Level:* Undergraduate Lower-Level  
*Description:* This is a survey course that addresses the theory and practice of outdoor leadership. It will explore such topics as outdoor trip planning, risk management, effective decision making, group dynamics, and environmental stewardship. In addition, it will cover outdoor skills such as rock climbing and paddling. There is a $20 fee associated with this course.

**LPAP 118 - INTRODUCTION TO TEAM SPORTS**  
*Short Title:* INTRODUCTION TO TEAM SPORTS  
*Department:* Lifetime Physical Activity  
*Grade Mode:* Standard Letter  
*Course Type:* Activity Course  
*Credit Hour:* 1  
*Restrictions:* Enrollment is limited to Undergraduate level students.  
*Course Level:* Undergraduate Lower-Level  
*Description:* This course is designed to offer an introduction to the skills, basic rules, and strategies of a variety of team sports.

**LPAP 119 - INTRODUCTION TO TEAM SPORTS OFFICIATING**  
*Short Title:* INTRO TEAM SPORTS OFFICIATING  
*Department:* Lifetime Physical Activity  
*Grade Mode:* Standard Letter  
*Course Type:* Activity Course  
*Credit Hour:* 1  
*Restrictions:* Enrollment is limited to Undergraduate level students.  
*Course Level:* Undergraduate Lower-Level  
*Description:* This course is designed to introduce students to the fundamental rules, regulations, mechanics and strategies required to officiate a multitude of team sports. In addition, students will develop strong interpersonal and communication skills necessary for effective game management.

**LPAP 120 - INTRODUCTION TO DISC GOLF/ULTIMATE FRISBEE**  
*Short Title:* DISC GAMES  
*Department:* Lifetime Physical Activity  
*Grade Mode:* Standard Letter  
*Course Type:* Activity Course  
*Credit Hour:* 1  
*Restrictions:* Enrollment is limited to Undergraduate level students.  
*Course Level:* Undergraduate Lower-Level  
*Description:* This is a course designed to offer an introduction to the fundamental disc golf and ultimate frisbee skills, basic rules, and team play strategies. The acquisition and understanding of these skills and strategies will be presented through activity and lecture sessions.

**LPAP 125 - INTRODUCTION TO SOCCER**  
*Short Title:* INTRODUCTION TO SOCCER  
*Department:* Lifetime Physical Activity  
*Grade Mode:* Standard Letter  
*Course Type:* Activity Course  
*Credit Hour:* 1  
*Restrictions:* Enrollment is limited to Undergraduate level students.  
*Course Level:* Undergraduate Lower-Level  
*Description:* This is an entry level course offering fundamental soccer skills, basic rules, and team tactics. These basic principles will be presented through active participation and instruction and evaluated through physical performance, participation and written assessment.

**LPAP 126 - INTERMEDIATE SOCCER**  
*Short Title:* INTER SOCCER  
*Department:* Lifetime Physical Activity  
*Grade Mode:* Standard Letter  
*Course Type:* Activity Course  
*Credit Hour:* 1  
*Restrictions:* Enrollment is limited to Undergraduate level students.  
*Course Level:* Undergraduate Lower-Level  
*Prerequisite(s):* LPAP 125  
*Description:* This is an intermediate level course offering advanced soccer skills and team tactics. These skills and tactics will be presented through active participation and instruction and evaluated through physical performance, participation and written assignments.
LPAP 127 - INTRODUCTION TO VOLLEYBALL/BASKETBALL

Short Title: INTRO TO VOLLEYBALL/BASKETBALL
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This is a beginning level course designed to offer an introduction to the fundamentals of basketball and volleyball including skills, basic rules, and team play strategies. The acquisition and understanding of these skills and strategies will be presented through activity and lecture sessions.

LPAP 130 - CONTACT IMPROVISATION

Short Title: CONTACT IMPROVISATION
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course is designed to help students develop the physical and perceptual skills basic to the movement of Contact Improvisation including: falling, rolling, responding to touch, momentum and gravity, and developing awareness to the physical environment. Additionally, the course provides an overview of the history of Contact Improvisation and its relevance as a global social dance form.

LPAP 131 - INTRODUCTION TO MIDDLE EASTERN DANCE

Short Title: INTRO TO MIDDLE EASTERN DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This is a beginning level course which will introduce the basic movements of Middle Eastern Dance. Students will also be expected to develop a knowledge and appreciation of Middle Eastern Dance as a cultural, communal, and recreational activity. Due to cultural restrictions, this course is for women only.

LPAP 132 - INTERMEDIATE MIDDLE EASTERN DANCE

Short Title: INTER MIDDLE EASTERN DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Prerequisite(s): LPAP 131
Description: This is an intermediate course which will introduce advanced movements of Middle Eastern Dance. Students will also be expected to develop a knowledge and appreciation of Middle Eastern Dance as a cultural, communal, and recreational activity. Due to cultural restrictions, this course is for women only.

LPAP 133 - CAPOEIRA

Short Title: CAPOEIRA
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Capoeira is a truly unique art, combining martial arts, dance and music. Students will learn the history, traditions and essential moves and strategies, as well as how to play the music associated with this activity.

LPAP 134 - INDIAN DANCE: FROM CLASSICAL TO BOLLYWOOD

Short Title: INDIAN DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course focuses on the Bharatanatyam form of dance that is very popular in South India. Bharatanatyam is the oldest of all classical Indian forms and its narrative style is known for its grace, purity, tenderness and statuesque poses.

LPAP 135 - INTRODUCTION TO DANCE

Short Title: INTRODUCTION TO DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This survey course introduces students to various dance techniques, (e.g. hip-hop, modern, ballet), choreography, improvisation, and performance as fundamental elements in the art of dance. Students will investigate dynamic and expressive methods of dance, and will develop foundational dance abilities including aerobic conditioning, coordination, alignment and dexterity.

LPAP 136 - INTRODUCTION TO LATIN DANCE: MERENGUE AND SAMBA

Short Title: INTRO TO MERENGUE AND SAMBA
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course introduces students to various dance techniques, (e.g. hip-hop, modern, ballet), choreography, improvisation, and performance as fundamental elements in the art of dance. Students will investigate dynamic and expressive methods of dance, and will develop foundational dance abilities including aerobic conditioning, coordination, alignment and dexterity.

LPAP 137 - INTRODUCTION TO DANCE: MARCHAND KARATE

Short Title: INTRO TO MARCHAND KARATE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course introduces students to various dance techniques, (e.g. hip-hop, modern, ballet), choreography, improvisation, and performance as fundamental elements in the art of dance. Students will investigate dynamic and expressive methods of dance, and will develop foundational dance abilities including aerobic conditioning, coordination, alignment and dexterity.

LPAP 138 - INTRODUCTION TO DANCE: OTTAWA CANOE

Short Title: INTRO TO OTTAWA CANOE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course introduces students to various dance techniques, (e.g. hip-hop, modern, ballet), choreography, improvisation, and performance as fundamental elements in the art of dance. Students will investigate dynamic and expressive methods of dance, and will develop foundational dance abilities including aerobic conditioning, coordination, alignment and dexterity.

LPAP 139 - INTRODUCTION TO DANCE: PADDLE AND ROW

Short Title: INTRO TO PADDLE AND ROW
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course introduces students to various dance techniques, (e.g. hip-hop, modern, ballet), choreography, improvisation, and performance as fundamental elements in the art of dance. Students will investigate dynamic and expressive methods of dance, and will develop foundational dance abilities including aerobic conditioning, coordination, alignment and dexterity.

LPAP 140 - INTRODUCTION TO DANCE: ROCK AND ROLL

Short Title: INTRO TO ROCK AND ROLL
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course introduces students to various dance techniques, (e.g. hip-hop, modern, ballet), choreography, improvisation, and performance as fundamental elements in the art of dance. Students will investigate dynamic and expressive methods of dance, and will develop foundational dance abilities including aerobic conditioning, coordination, alignment and dexterity.

LPAP 141 - INTRODUCTION TO DANCE: SQUARE DANCE

Short Title: INTRO TO SQUARE DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course introduces students to various dance techniques, (e.g. hip-hop, modern, ballet), choreography, improvisation, and performance as fundamental elements in the art of dance. Students will investigate dynamic and expressive methods of dance, and will develop foundational dance abilities including aerobic conditioning, coordination, alignment and dexterity.

LPAP 142 - INTRODUCTION TO DANCE: TAP DANCE

Short Title: INTRO TO TAP DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course introduces students to various dance techniques, (e.g. hip-hop, modern, ballet), choreography, improvisation, and performance as fundamental elements in the art of dance. Students will investigate dynamic and expressive methods of dance, and will develop foundational dance abilities including aerobic conditioning, coordination, alignment and dexterity.

LPAP 143 - INTRODUCTION TO DANCE: TWIRLERS

Short Title: INTRO TO TWIRLERS
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course introduces students to various dance techniques, (e.g. hip-hop, modern, ballet), choreography, improvisation, and performance as fundamental elements in the art of dance. Students will investigate dynamic and expressive methods of dance, and will develop foundational dance abilities including aerobic conditioning, coordination, alignment and dexterity.

LPAP 144 - INTRODUCTION TO DANCE: VAMPIRE DANCE

Short Title: INTRO TO VAMPIRE DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course introduces students to various dance techniques, (e.g. hip-hop, modern, ballet), choreography, improvisation, and performance as fundamental elements in the art of dance. Students will investigate dynamic and expressive methods of dance, and will develop foundational dance abilities including aerobic conditioning, coordination, alignment and dexterity.

LPAP 145 - INTRODUCTION TO DANCE: VOGUE DANCE

Short Title: INTRO TO VOGUE DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course introduces students to various dance techniques, (e.g. hip-hop, modern, ballet), choreography, improvisation, and performance as fundamental elements in the art of dance. Students will investigate dynamic and expressive methods of dance, and will develop foundational dance abilities including aerobic conditioning, coordination, alignment and dexterity.

LPAP 146 - INTRODUCTION TO DANCE: WALTZ DANCE

Short Title: INTRO TO WALTZ DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course introduces students to various dance techniques, (e.g. hip-hop, modern, ballet), choreography, improvisation, and performance as fundamental elements in the art of dance. Students will investigate dynamic and expressive methods of dance, and will develop foundational dance abilities including aerobic conditioning, coordination, alignment and dexterity.

LPAP 147 - INTRODUCTION TO DANCE: YOGA DANCE

Short Title: INTRO TO YOGA DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course introduces students to various dance techniques, (e.g. hip-hop, modern, ballet), choreography, improvisation, and performance as fundamental elements in the art of dance. Students will investigate dynamic and expressive methods of dance, and will develop foundational dance abilities including aerobic conditioning, coordination, alignment and dexterity.
LPAP 137 - INTRODUCTION TO EAST COAST SWING
Short Title: INTRO TO EAST COAST SWING
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Course content includes demonstration of and brief lectures on the East coast Swing, including swing and triple step versions. Students will participate in drills to improve footwork, arm positioning, and leading and following skills.

LPAP 138 - INTRODUCTION TO LATIN DANCE - SALSA/MAMBO & CHA CHA
Short Title: INTRO TO SALSA/MAMBO & CHA CHA
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Course content includes demonstration of and brief lectures on the American Style Salsa/Mambo and Cha Cha. Students will participate in drills created to improve footwork, arm positioning, and leading and following skills.

LPAP 139 - INTRODUCTION TO BALLROOM DANCE - TANGO AND RUMBA
Short Title: INTRO TO TANGO & RUMBA
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Course content includes demonstration of and brief lectures on the American Style Tango and Rumba. Students will participate in drills created to improve footwork, arm positioning, and leading and following skills.

LPAP 141 - INTERMEDIATE BALLROOM DANCE
Short Title: INTER BALLROOM DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Prerequisite(s): LPAP 109
Description: Course content includes demonstration of and brief lectures on intermediate-level American Style Foxtrot and Waltz. Students will participate in drills created to improve footwork, arm positioning, and leading and following skills.

LPAP 143 - MUSICAL THEATER JAZZ
Short Title: MUSICAL THEATER JAZZ
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course will focus on fundamental musical theater vocabulary and steps. Students will study musical theater styles from the golden era of Broadway to contemporary shows.

LPAP 144 - INTRODUCTION TO COUNTRY WESTERN DANCE
Short Title: COUNTRY WESTERN DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Course content includes demonstration of and brief lectures on the Two Step and Polka. Drills are created to improve footwork, arm positioning, and leading and following skills. Other topics: history of C&W Dance, terminology, proper body alignment, leading and following, and social dance etiquette.

LPAP 145 - INTERMEDIATE COUNTRY WESTERN DANCE
Short Title: INTER COUNTRY WESTERN DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Prerequisite(s): LPAP 144
Description: Course content includes demonstration of and brief lectures on the intermediate level Two Step and Country Western Polka. Students will participate in drills created to improve footwork, arm positioning, and leading and following skills.

LPAP 147 - INTERMEDIATE EAST COAST SWING DANCE
Short Title: INTER EAST COAST SWING DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Prerequisite(s): LPAP 137
Description: Course content includes demonstration of and brief lectures on the intermediate level of East Coast Swing, including single step and triple step versions.
Our habits and then interrupt them so we can experience greater freedom, ease in movement. The Alexander Technique helps us to first recognize

Course Level: Undergraduate Lower-Level
Description: This course teaches basic dance making skills (choreography) for all styles of dance. Units covered will include the creation of inventive movement through improvisation, structures for dance, how to extend your movement ideas, partnering, working with a group, and the selection of dance themes, music, and props. Students will be required to compose short dance studies that will be critiqued in class through codified dance criticism methods then revise work.

LPAP 149 - ADVANCED DANCE TECHNIQUE AND THEORY
Short Title: ADV DANCE TECH AND THEORY
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course helps students to develop an advanced level of dance technique through the study of different dance styles (modern dance, ballet, and jazz dance) with emphasis on understanding the anatomical body, training methods (body therapies), and performance skills. Course taught by dance staff and guest teachers. Instructor Permission Required.

LPAP 150 - IMPROVISATION DANCE
Short Title: IMPROVISATION DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: The class will focus on expanding students’ creative movement through dance improvisation which will allow for self-discovery, self-experience, and will build composition skills. Each class will focus on improvisational structures, and the elements of dance that will lead to choreography methods.

LPAP 151 - THE ALEXANDER TECHNIQUE
Short Title: THE ALEXANDER TECHNIQUE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: We all have habits of tension that interfere with our natural ease in movement. The Alexander Technique helps us to first recognize our habits and then interrupt them so we can experience greater freedom, strength, and coordination in our movement.

LPAP 152 - INTRODUCTION TO CONTEMPORARY DANCE
Short Title: INTRO TO CONTEMPORARY DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This is a beginning dance class that introduces students to contemporary dance technique and the performing of dance combinations to music. The class has a progression: core work on the floor; exercises at center; moving across the floor; and movement combinations. The majority of the classes are spent learning dance technique, the history of modern dance and modern dance choreography.

LPAP 153 - INTERMEDIATE MODERN DANCE
Short Title: INTERMEDIATE MODERN DANCE
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: An intermediate level modern dance class that incorporates a variety of modern dance techniques. The class places emphasis on correct anatomical alignment, breathe and release, rhythmic and spatial accuracy, and performance commitment. This class is for students who audition for the Rice Dance Theatre and are accepted into the company. Auditions and class registration are held during the second week of classes. Class requirements include participation in a minimum of one rehearsal per week and a dance performance series near the end of the semester.

LPAP 155 - INTRODUCTION TO BALLET
Short Title: INTRODUCTION TO BALLET
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course will introduce students to the basic principles and steps of ballet technique. It is designed to increase the students’ knowledge and understanding of the structure of the human body while engaged in ballet technique. Each student is required to attend a ballet performance during the semester.

LPAP 156 - INTERMEDIATE BALLET
Short Title: INTERMEDIATE BALLET
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Prerequisite(s): LPAP 155 or LPCR 155
Description: This class will introduce students to advanced principles and steps of ballet technique. Students must have dance experience (ballet preferred) to take this class. Students are required to attend a ballet performance during the semester.
**LPAP 157 - JAZZ DANCE/HIP HOP**  
*Short Title*: JAZZ DANCE/HIP HOP  
*Department*: Lifetime Physical Activity  
*Grade Mode*: Standard Letter  
*Course Type*: Activity Course  
*Credit Hour*: 1  
*Restrictions*: Enrollment is limited to Undergraduate level students.  
*Course Level*: Undergraduate Lower-Level  
*Description*: A beginning level dance class that teaches basic technique, performance, dance fitness, alignment, and introduces the stylistic and historical components of jazz dance and hip/hop.

**LPAP 159 - LIFEGUARDING**  
*Short Title*: LIFEGUARDING  
*Department*: Lifetime Physical Activity  
*Grade Mode*: Standard Letter  
*Course Type*: Activity Course  
*Credit Hour*: 1  
*Restrictions*: Enrollment is limited to Undergraduate level students.  
*Course Level*: Undergraduate Lower-Level  
*Description*: This course provides the skills and knowledge to become lifeguard certified. Students will learn to prevent and respond to aquatic emergencies. $35 book fee. Students must be able to swim at least 300 yards.

**LPAP 161 - INTRODUCTION TO AQUATIC ACTIVITIES**  
*Short Title*: INTRO TO AQUATIC ACTIVITIES  
*Department*: Lifetime Physical Activity  
*Grade Mode*: Standard Letter  
*Course Type*: Activity Course  
*Credit Hour*: 1  
*Restrictions*: Enrollment is limited to Undergraduate level students.  
*Course Level*: Undergraduate Lower-Level  
*Description*: This course is designed to offer basic knowledge and skill development in a variety of aquatic activities. Focus will be given to basic swimming and diving techniques as well as competitive, recreational and fitness activities.

**LPAP 162 - WATER SAFETY INSTRUCTOR**  
*Short Title*: WATER SAFETY INSTRUCTOR  
*Department*: Lifetime Physical Activity  
*Grade Mode*: Standard Letter  
*Course Type*: Activity Course  
*Credit Hour*: 1  
*Restrictions*: Enrollment is limited to Undergraduate level students.  
*Course Level*: Undergraduate Lower-Level  
*Description*: This course is designed to offer basic knowledge and skill for the beginning swimmer. The following strokes and skills will be taught during the class: water entries, floating, rhythmic breathing patterns, front crawl, elementary back stroke, back crawl, deep water exploration, and treading water.

**LPAP 164 - FITNESS SWIMMING**  
*Short Title*: FITNESS SWIMMING  
*Department*: Lifetime Physical Activity  
*Grade Mode*: Standard Letter  
*Course Type*: Activity Course  
*Credit Hour*: 1  
*Restrictions*: Enrollment is limited to Undergraduate level students.  
*Course Level*: Undergraduate Lower-Level  
*Description*: This course is designed to introduce students to triathlon training. Students will participate in a fitness conditioning program comprised of swimming, cycling, and running designed specifically for the completion of a sprint triathlon. Additionally, students will learn about technical aspects of the sport including equipment needs and maintenance, and safety requirements. Equipment needed to take the course: bike, swimsuit, running shoes.

**LPAP 165 - INTERMEDIATE FITNESS SWIMMING**  
*Short Title*: INTERMEDIATE FITNESS SWIMMING  
*Department*: Lifetime Physical Activity  
*Grade Mode*: Standard Letter  
*Course Type*: Activity Course  
*Credit Hour*: 1  
*Restrictions*: Enrollment is limited to Undergraduate level students.  
*Course Level*: Undergraduate Lower-Level  
*Prerequisite(s)*: LPAP 164  
*Description*: This intermediate course is designed to increase fitness through the sport of swimming. Course includes information about health, stroke mechanics and wellness. Students will design their own swimming program based on self-selected goals for the semester. Students must be competent swimmers.

**LPAP 166 - BEGINNING SWIMMING**  
*Short Title*: BEGINNING SWIMMING  
*Department*: Lifetime Physical Activity  
*Grade Mode*: Standard Letter  
*Course Type*: Activity Course  
*Credit Hour*: 1  
*Restrictions*: Enrollment is limited to Undergraduate level students.  
*Course Level*: Undergraduate Lower-Level  
*Description*: This course is designed to introduce students to triathlon training. Students will participate in a fitness conditioning program comprised of swimming, cycling, and running designed specifically for the completion of a sprint triathlon. Additionally, students will learn about technical aspects of the sport including equipment needs and maintenance, and safety requirements. Equipment needed to take the course: bike, swimsuit, running shoes.

**LPAP 169 - TRIATHLON TRAINING**  
*Short Title*: TRIATHLON TRAINING  
*Department*: Lifetime Physical Activity  
*Grade Mode*: Standard Letter  
*Course Type*: Activity Course  
*Credit Hour*: 1  
*Restrictions*: Enrollment is limited to Undergraduate level students.  
*Course Level*: Undergraduate Lower-Level  
*Description*: This course is designed to introduce students to triathlon training. Students will participate in a fitness conditioning program comprised of swimming, cycling, and running designed specifically for the completion of a sprint triathlon. Additionally, students will learn about technical aspects of the sport including equipment needs and maintenance, and safety requirements. Equipment needed to take the course: bike, swimsuit, running shoes.

**LPAP 170 - YOGA**  
*Short Title*: YOGA  
*Department*: Lifetime Physical Activity  
*Grade Mode*: Standard Letter  
*Course Type*: Activity Course  
*Credit Hour*: 1  
*Restrictions*: Enrollment is limited to Undergraduate level students.  
*Course Level*: Undergraduate Lower-Level  
*Description*: This course provides a solid foundation in the principals of yoga theory and practice. By incorporating traditional philosophy, physical poses (asana) and breath control (pranayama), this class helps you to discover vitality, flexibility and strength within yourself.
LPAP 171 - TAI CHI
Short Title: TAI CHI
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Translated as Grand Ultimate Boxing, Taijiquan (also Tai Chi Chuan) has five major family styles in practice today. These are the Chen, Yang, Wu, Wu (Hao), and Sun styles. Through kung fu warm ups and a series of special Chen Taiji drills called silk reeling, students will be introduced to a deeper awareness of physical fitness, body movement, and mental clarity. The student will then be taught a basic introductory level form designed to give a taste of what Chen Style Taijiquan has to offer. The students will also be introduced to some Push Hands training (a two person drill) and basic martial applications.

LPAP 172 - INTRODUCTION TO FENCING
Short Title: INTRODUCTION TO FENCING
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Fencing is a fast paced sport that develops mental agility and focus. This class will teach students the fundamentals of movement, bladework, and basic strategies in foil. Course goals are to compete at a beginner level and to understand the history and rules of the sport. Students will use exercises, drills, and bouts to develop their abilities and meet these goals.

LPAP 173 - INTERMEDIATE FENCING
Short Title: INTER FENCING
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Prerequisite(s): LPAP 172
Description: This course is designed to introduce the student to the skills and strategy necessary to participate in fencing at the intermediate level.

LPAP 175 - INTRODUCTION TO MARTIAL ARTS
Short Title: INTRO TO MARTIAL ARTS
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course is designed to introduce students to the basic principles of Martial Arts. Students will learn the philosophy and physical conditioning components associated with this martial arts form with a particular emphasis on reflex development, timing, eye-hand coordination, balance and a sense of well-being.

LPAP 176 - SELF DEFENSE FOR WOMEN
Short Title: SELF DEFENSE FOR WOMEN
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course exposes students to a program of realistic self-defense tactics and techniques. It is a comprehensive course for women that begins with awareness, prevention, risk reduction and avoidance, while progressing through the basics of hands-on defense training.

LPAP 177 - INTERMEDIATE YOGA TECHNIQUES
Short Title: INTER YOGA
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Prerequisite(s): LPAP 170
Description: This course builds on the primary principles of yoga theory and practice that are learned in basic yoga courses. This class will introduce more advanced physical poses, breath control and meditation techniques.

LPAP 178 - THE ART OF RELAXATION
Short Title: THE ART OF RELAXATION
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course is designed to provide students with an overview of the evolution of relaxation techniques and the various forms they have taken in different cultures across time. Each class will focus on the stress-relieving benefits of and different modalities for relaxation practice.

LPAP 180 - WALK, JOG, RUN
Short Title: WALK, JOG, RUN
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: The purpose of this class is to teach students how to improve cardiovascular and muscular strength and endurance as well as stress management through fitness walking and jogging.
LPAP 181 - PERSONAL FITNESS
Short Title: PERSONAL FITNESS
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Class will consist of brief lectures on health and fitness topics. Students will be exposed to activities that may be incorporated into an individualized personal fitness program. The goal of this course is to motivate the students to include physical activity as an integral part of his/her lifestyle.

LPAP 182 - WEIGHT TRAINING
Short Title: WEIGHT TRAINING
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: The class will consist of brief lectures and discussions on topics related to weight training. Students will be exposed to several different types of weight training techniques throughout the semester that may be incorporated into an individual's personal fitness program.

LPAP 183 - WEIGHT TRAINING AND CONDITIONING
Short Title: WEIGHT TRAINING & CONDITIONING
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Students will be exposed to several different types of weight training and cardiovascular conditioning techniques throughout the semester that may be incorporated into an individual's personal fitness program.

LPAP 185 - CARDIO KICKBOXING
Short Title: CARDIO KICKBOXING
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Kickboxing combines the best of boxing and other martial arts techniques and brings it to you in an exciting and easy to learn format. As the name implies, cardio kickboxing involves kickboxing movements, but with cardiovascular training principles.

LPAP 186 - PILATES
Short Title: PILATES
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This is a beginning level course designed to offer an introduction to the fundamentals and beginner/intermediate classic Pilates mat work exercises. The acquisition and understanding of these exercises, their goal, and intent will be presented through activity and lecture sessions and will be evaluated through physical performance, participation, and written assessment.

LPAP 187 - GROUP FITNESS
Short Title: GROUP FITNESS
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: The purpose of this class will be to provide students a learning opportunity in the broad area of group exercise.

LPAP 190 - INTRODUCTION TO OUTDOOR RECREATION
Short Title: INTRO TO OUTDOOR RECREATION
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course will offer students the opportunity to explore a variety of outdoor activities including teambuilding and leadership skill development, rock climbing, disc golf and camping. The class will be largely activity based and includes a $20 additional course fee.

LPAP 191 - GROUP FITNESS INSTRUCTOR TRAINING
Short Title: GROUP FITNESS INSTRUCTOR
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course is designed to provide the theoretical and practical skills necessary to achieve a national certification in group fitness instruction. The student will develop and lead group fitness routines as well as learn the general principles of anatomy, exercise science, and biomechanics. $30.00 additional course fee.
LPAP 192 - EXERCISE AND WEIGHT MANAGEMENT
Short Title: EXERCISE & WEIGHT MANAGEMENT
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course is intended for the student who shows interest in an area of study not offered or who wishes to pursue a discipline in greater depth than possible through the regular curriculum. A contract between the student and the teacher shall define the responsibilities of both student and the teacher, and will specify standards for the successful completion of the project. Department Permission Required.

LPAP 193 - WEIGHT TRAINING FOR WOMEN
Short Title: WEIGHT TRAINING FOR WOMEN
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course is designed to provide female students with a non-intimidating environment in which they can learn the fundamental principles of resistance training, the focus of the course will be on safe lifting practices, exercise variation/manipulation, and program design.

LPAP 194 - OPEN WATER SCUBA
Short Title: SCUBA
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Students will learn the basics of SCUBA in accordance with P.A.D.I. standards. Topics include diving equipment, physiology, planning and safety, and there will be practical sessions in both pool and open water sites. An additional course fee of $400, which covers the cost of all equipment, and transportation/entrance fees to dive sites, is required.

LPAP 195 - CRITICAL THINKING IN SEXUALITY
Short Title: CRITICAL THINKING IN SEXUALITY
Department: Dean of Undergraduates
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Course Level: Undergraduate Lower-Level
Description: CTIS will draw from a public health model of violence prevention to teach students the dynamics of domestic and sexual violence, bystander intervention, healthy relationships and healthy sexuality. This course is only available to first time matriculants in the fall but anyone can register for it in the spring.

LPAP 197 - DISCOVERING PERSONAL WELLNESS: CREATING AWARENESS & DEVELOPING SKILLS FOR BEHAVIOR CHANGE
Short Title: DISCOVERING PERSONAL WELLNESS
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Students will discuss the many factors that influence personal well-being, giving particular attention to individual needs and behavior change goals. Major areas to be covered include: time management, coping strategies, healthy relationships, body image, food choices, self-esteem, physical activity, spirituality, environmental awareness, alternative medicine and self-care.

LPAP 198 - NUTRITION
Short Title: NUTRITION
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: The class will consist of lectures and discussions on the science of nutrition.

LPAP 199 - INDEPENDENT STUDY
Short Title: INDEPENDENT STUDY
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Independent Study
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Independent Study is intended for the student who shows interest in an area of study not offered or who wishes to pursue a discipline in greater depth than possible through the regular curriculum. A contract between the student and the teacher shall define the responsibilities of both student and the teacher, and will specify standards for the successful completion of the project. Department Permission Required.

LPAP 238 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Lifetime Physical Activity
Grade Mode: Standard Letter
Course Type: Activity Course, Lecture, Laboratory, Seminar, Internship/Practicum
Credit Hours: 1-4
Course Level: Undergraduate Lower-Level
Description: Topics and credit hours may vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.
Linguistics (LING)

LING 107 - LANGUAGE IN THE MEDIA
Short Title: LANGUAGE IN THE MEDIA
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course explores the impact of language on media and communication, featuring lectures, discussions, and hands-on assignments. Students will examine the role of language in various media forms, including television, radio, and the internet. Cross-list: FSEM 108.

LING 200 - INTRODUCTION TO THE SCIENTIFIC STUDY OF LANGUAGE
Short Title: INTRO TO STUDY OF LANGUAGE
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group I
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course provides an overview of the scientific study of language, including the structure and functions of language, with a focus on the history, methodology, and theory of linguistics. Cross-list: ANTH 200.

LING 201 - METAPHORS IN SCIENCE AND COGNITION
Short Title: SCIENCE & COGNITION METAPHORS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hour: 1
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course introduces students to the role of conceptual metaphor in scientific thought and language, with a focus on the cognitive basis of scientific metaphor. Cross-list: ANTH 300.

LING 205 - LANGUAGE AND SOCIETY
Short Title: LANGUAGE AND SOCIETY
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course explores the role of language in the construction of social identity and institutions of social control. The course focuses on linguistic interaction in daily life and how gender, ethnic, class, activity, and geographic variation affect language use. Cross-list: SWGS 205.

LING 216 - WORDS IN ENGLISH
Short Title: WORDS IN ENGLISH
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Lower-Level
Description: The course provides an introduction to the systematic study of English words. Topics include word formation, origins and history of English, etymology, new words, slang and jargon. Students will investigate words using online lexical tools and collect and describe neologisms. Understanding of word formation helps increase mastery of English vocabulary for GRE and other tests. No linguistics background required. Mutually Exclusive: Credit cannot be earned for LING 216 and ENGL 215/LING 215.

LING 300 - LINGUISTIC ANALYSIS
Short Title: LINGUISTIC ANALYSIS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): LING 200 or ANTH 200
Description: The course provides a hands-on, data-oriented approach to how different languages construct words and sentences. Students will develop skills in linguistic problem solving and the foundations for pursuing grammatical description. Topics: word classes, morphology, tense-aspect-modality, clause structure, word order, grammatical relations, existentials/possessives/locatives, voice/valence, questions, negation, relative clauses, complements, causatives. Cross-list: ANTH 300. Graduate/Undergraduate Equivalency: LING 500. Mutually Exclusive: Credit cannot be earned for LING 300 and LING 500.

LING 301 - PHONETICS
Short Title: PHONETICS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): LING 200 or ANTH 200
Description: The course provides an introduction to the systematic study of sound as it relates to speech and sound systems in the world’s languages. Speech sounds are examined in terms of production mechanisms (articulatory phonetics), propagation mechanisms (acoustic phonetics), and perception mechanisms (auditory phonetics). Includes a basic introduction to Digital Signal Processing. Cross-list: ANTH 301. Graduate/Undergraduate Equivalency: LING 501. Mutually Exclusive: Credit cannot be earned for LING 301 and LING 501.
LING 305 - HISTORICAL LINGUISTICS
Short Title: HISTORICAL LINGUISTICS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: This course examines the theoretical, cultural, and social grounding of gender and language use. We use analytical tools from linguistics, cognitive science, cultural anthropology, psychology and biology. Emphasis is placed on the historical role of gender in such research, and the debates that result as perspectives shift.

LING 304 - INTRODUCTION TO SYNTAX
Short Title: INTRODUCTION TO SYNTAX
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): LING 300
Description: An introduction to syntactic theory and analysis. Functional and formal approaches to both universal and language specific aspects of various syntactic phenomena are compared and evaluated in the light of the data drawn from typologically and geographically diverse languages. LING 300/500 is an absolute prerequisite to this course. Graduate/Undergraduate Equivalency: LING 504. Mutually Exclusive: Credit cannot be earned for LING 304 and LING 504.

LING 305 - HISTORICAL LINGUISTICS
Short Title: HISTORICAL LINGUISTICS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (LING 200 or ANTH 200) and (ANTH 301 or LING 301)
Description: Exploration of the nature of language change. Topics covered include sound change, syntactic and semantic change, modeling language splits, the sociolinguistics of language change, and the history of European languages. Cross-list: ANTH 305. Graduate/Undergraduate Equivalency: LING 505. Mutually Exclusive: Credit cannot be earned for LING 305 and LING 505.

LING 306 - LANGUAGE, THOUGHT, AND MIND
Short Title: LANGUAGE, THOUGHT, AND MIND
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): LING 200 or ANTH 200 or LING 300
Description: Study of language as a cognitive system. Linguistic data as evidence for the cognitive structures and processes that enable people to learn and use language; how linguistic structure influences concept formation and patterns of thinking. Graduate/Undergraduate Equivalency: LING 506. Mutually Exclusive: Credit cannot be earned for LING 306 and LING 506.

LING 307 - INTRODUCTION TO LINGUISTIC MODELING
Short Title: INTRO TO LING MODELING
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): LING 200 or ANTH 200
Description: This course addresses phenomena which span a variety of linguistic domains and sub-disciplines with the objective of modeling data in various frameworks.

LING 309 - PSYCHOLOGY OF LANGUAGE
Short Title: PSYCHOLOGY OF LANGUAGE
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 203
Description: Study of human and other animal communication. Includes the structure of human language, word meaning and semantic memory, psychological studies of syntax, bilingualism, language and thought, and language errors and disorders. Cross-list: PSYC 309.

LING 310 - MORPHOLOGY
Short Title: MORPHOLOGY
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): LING 300 or LING 311
Description: Morphology is the study of word formation and the relationship between form, meaning, and syntax. This course is an introduction to morphological theory. Topics covered include approaches to word formation, morphological change, and morphological phenomena in diverse languages. Graduate/Undergraduate Equivalency: LING 510. Mutually Exclusive: Credit cannot be earned for LING 310 and LING 510.
LING 315 - INTRODUCTION TO SEMANTICS
Short Title: INTRODUCTION TO SEMANTICS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): LING 200 or ANTH 200
Description: Introduction to basic approaches to the study of meaning in linguistics and related fields. Includes the cognitive representation of meaning, lexical categorization, conceptual structures, metaphor/metonymy, meaning change, pragmatic inference, and the relation of language and mind. Cross-list: PSYC 315. Graduate/Undergraduate Equivalency: LING 515. Recommended Prerequisite(s): LING 200 or ANTH 200. Mutually Exclusive: Credit cannot be earned for LING 315 and LING 515.

LING 320 - ORIGINS AND EVOLUTION OF HUMAN LANGUAGE
Short Title: ORIGIN&EVOLUTION OF HUMAN LANG
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): LING 200 or ANTH 200
Description: How did Human Language arise, and what role did language play in the evolution of our species? This course introduces the basic sources of evidence (e.g., fossil remains, comparative primatology, neonatal development) for knowledge of human linguistic prehistory, including the spread of modern humans and human language throughout the world.

LING 322 - LANGUAGE AND ETHNICITY
Short Title: LANGUAGE AND ETHNICITY
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): LING 205
Description: This course explores the role that ethnicity plays in various language varieties used in the U.S., and the role that language varieties play in ethnic identity. We examine this from both speech production and speech perception perspectives.

LING 325 - LANGUAGE ACQUISITION
Short Title: LANGUAGE ACQUISITION
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): PSYC 101
Description: The aim of this course is to explore language development closely through a variety of theories and research findings. Students will become familiar with different theories concerning language development, and develop an understanding of relevant issues, theoretical positions and relevant methodologies in language development using critical thinking skills. Cross-list: PSYC 325.

LING 330 - CORPUS LINGUISTICS
Short Title: CORPUS LINGUISTICS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Investigation of the nature of linguistic representations from corpus-based analyses as compared to more traditional methodologies. Includes the collection of individual text data (or the exploration of existing text sources), the use of various text analysis programs (e.g. concordance software), and the production of lexical, syntactic, semantic, discourse, or cultural analyses of selected texts, using computer-based methods. Graduate/Undergraduate Equivalency: LING 530. Mutually Exclusive: Credit cannot be earned for LING 330 and LING 530.
LING 336 - INTRO TO INDO-EUROPEAN  
Short Title: INTRO TO INDO-EUROPEAN  
Department: Linguistics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Distribution Group: Distribution Group I  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: This course will begin with a brief survey of the Indo-European languages, followed by a detailed reconstruction of Proto-Indo-European phonology, morphology, and syntax. The second half of the course will deal with Indo-European culture, laws, society and poetics, together with a consideration of advanced topics in the individual branches. Cross-list: CLAS 336.

LING 340 - THEORY AND METHODS OF TEACHING ESL AND FL  
Short Title: TEACHING ESL/FL-THEORY&METHODS  
Department: Linguistics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: Introduction to the theory and practice of teaching a second language. Includes the process of language learning viewed from social, psychological, and linguistic perspectives, as well as commonly used teaching "methods," such as the audio-lingual method, situational language teaching, the natural approach, and TPR, among others. Graduates/Undergraduate equivalency: LING 540. Mutually exclusive: Credit cannot be earned for LING 340 and LING 540.

LING 340 - STRUCTURE OF ENGLISH  
Short Title: STRUCTURE OF ENGLISH  
Department: Linguistics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Description: An introduction to the structure of English and its nature as a cognitive and communicative system. Through critical examinations of traditional and modern theories of grammar as well as various methodologies for analyzing English data, students learn to discover and test generalizations underlying linguistic structure and its social function.

LING 397 - SPEECH AND HEARING SCIENCE  
Short Title: SPEECH AND HEARING SCIENCE  
Department: Linguistics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (LING 200 or ANTH 200) and (ANTH 301 or LING 301)  
Description: This course will describe the basics of speech and hearing science, including but not limited to: anatomy and physiology of speech and hearing mechanisms, neural pathways involved in speech and hearing, speech pathology and audiology, types of speech and hearing disorders, their causes, and types of therapies available for the remediation of these disorders. Mutually exclusive: Credit cannot be earned for LING 397 and LING 212.

LING 400 - LINGUISTIC ANALYSIS II  
Short Title: LINGUISTIC ANALYSIS II  
Department: Linguistics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): LING 300 or ANTH 300  
Description: Analysis of language beyond the clausal level. Grammatical and semantic analyses using corpora and concordance queries. Recording, transcription, and analysis of natural spoken discourse. The intricate relation between meaning, grammar, and discourse (i.e. the 'usage-based model'). The socially contextualized nature of language. The complex relationship between discourse and ideology.

LING 401 - ANALYSIS OF SOUND PATTERNS  
Short Title: ANALYSIS OF SOUND PATTERNS  
Department: Linguistics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): ANTH 301 or LING 301  
Description: Introduction to various theories of phonological knowledge. Course involves extensive work in the collection and analysis of empirical data, in both English and other languages, including corpora analysis, and acoustic and experimental analysis. Attention is paid to the way phonetic data informs phonological theory.

LING 404 - RESEARCH METHODOLOGY AND LINGUISTIC THEORIES  
Short Title: RSRCH METHOD & LINGUISTIC THEO  
Department: Linguistics  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Graduate level students may not enroll.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (LING 300 or ANTH 300) or (LING 500 or ANTH 500)  
Description: Compares and explores the nature of data, argumentation, goals, and assumptions of current theoretical approaches to language and linguistics. Centers on the discussion of general readings and source articles from cognitive, generative, typological, discourse-functional, and sociolinguistic orientations. Emphasizes critical thinking and awareness of the potential benefits and drawbacks of each approach.
LING 405 - DISCOURSE
Short Title: DISCOURSE
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): LING 300 or ANTH 300 or LING 500 or ANTH 500
Description: An overview of features and organization of language-in-use. Examination of the macro-structure of different genres of discourse, the interplay between language and social/cultural interaction, and the role of discourse and communication in motivating and shaping grammatical form.

LING 406 - COGNITIVE STUDIES
Short Title: COGNITIVE STUDIES
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Distribution Group: Distribution Group II
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Relations between thought, language, and culture. Special emphasis given to natural systems of classification and their underlying logical principles. Cross-list: ANTH 406.

LING 407 - LINGUISTIC FIELD METHODS
Short Title: LINGUISTIC FIELD METHODS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 5
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (LING 300 or ANTH 300) and (LING 301 or ANTH 301) and (LING 304 or ANTH 304) and (LING 311 or ANTH 323) or (LING 500 or ANTH 500) and (LING 501 or ANTH 501) and (LING 504 or ANTH 504) and (LING 511 or ANTH 523)
Description: Techniques and practice in the observation, analysis, and recording of a human language. Cross-list: ANTH 407. Repeatable for Credit.

LING 408 - LINGUISTIC FIELD METHODS
Short Title: LINGUISTIC FIELD METHODS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 5
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): ANTH 407 or LING 407
Description: Observation, analysis and recording of a human language. Focus on morphosyntactic description. Cross-list: ANTH 408. Repeatable for Credit.

LING 409 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): LING 200 or ANTH 200
Description: Special Topics in linguistics. Please contact the department for details on offered topics. FALL 2017 TOPIC: RESEARCH ON BRAILLE. This semester's Special Topics course introduces students to the linguistic, cognitive, and social aspects of braille. Students will gain a basic understanding and appreciation of braille, its relevance to the reading sciences (and vice versa) and thorough grounding in the research literature. Students will also have a chance to help design experiments and studies for future research. Repeatable for Credit.

LING 410 - RHETORIC
Short Title: RHETORIC
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Overview of classical series of rhetoric and followed by more intensive discussions both of contemporary theories and applications in a wide variety of disciplines. Cross-list: ANTH 412.

LING 411 - NEUROLINGUISTICS
Short Title: NEUROLINGUISTICS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Description: Study of language and the brain. Includes localization of speech, language, and memory functions, hemispheric dominance, pathologies of speech and language associated with brain damage, and hypotheses of the representation and operation of linguistic information in the cortex. Cross-list: ANTH 411, NEUR 411.

LING 414 - HERMENEUTICS AND LINGUISTIC ANTHROPOLOGY
Short Title: HERMENEUTICS &LINGUISTIC ANTH
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
LING 415 - SOCIOLINGUISTICS
Short Title: SOCIOLINGUISTICS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (LING 301 or ANTH 301) and (LING 311 or ANTH 323) or LING 501 or ANTH 501 or LING 511 or ANTH 523
Description: This course covers contemporary sociolinguistic theory and methodologies. We examine the linguistic consequences to speakers of their group memberships such as gender, race, class and sexuality. Cross-list: SWGS 415.

LING 416 - LANGUAGE UNIVERSALS AND TYPOLOGY
Short Title: LANGUAGE UNIVERSALS & TYPOLOGY
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): LING 300 or ANTH 300 or LING 500 or ANTH 500
Description: Investigation of what human languages have in common and a range of ways in which they can differ. Includes marking patterns in particular linguistic domains (e.g., case marking, animacy, and passives) and theoretical and methodological issues.

LING 419 - MULTILINGUALISM
Short Title: MULTILINGUALISM
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): LING 200 or ANTH 200
Description: This course analyzes multilingualism from a variety of perspectives including cognitive linguistic and socio-cultural viewpoints. Topics to be covered include neural activation, conceptual representations of the lexicon, lexical, phonological, syntactic and pragmatic interference, code switching, cultural identity, etc.

LING 427 - ADVANCED PHONOLOGY
Short Title: ADVANCED PHONOLOGY
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Graduate level students may not enroll.
Course Level: Undergraduate Upper-Level
Prerequisite(s): (LING 301 or ANTH 301) and (LING 311 or ANTH 323) or (LING 501 or ANTH 501) and (LING 511 or ANTH 523)
Description: Examination of issues in contemporary phonological theory. Special attention will be given to more advanced representational theories (feature geometry, mOnce the text is correctly formatted and readable, please provide the final text for the document.
LING 500 - LINGUISTIC ANALYSIS
Short Title: LINGUISTIC ANALYSIS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A hands-on, data-oriented approach to how different languages construct words and sentences. Students will develop skills in linguistic problem solving and the foundations for pursuing grammatical description. Topics: word classes, morphology, tense-aspect-modality, clause structure, word order, grammatical relations, existentials/possessives/locatives, voice/valence, questions, negation, relative clauses, complements causatives. Without Permission of Instructor, must have Graduate Standing. Cross-list: ANTH 500. Graduate/Undergraduate Equivalency: LING 300. Mutually Exclusive: Credit cannot be earned for LING 500 and LING 300.

LING 501 - PHONETICS
Short Title: PHONETICS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introductory study of sound as it relates to speech and sound systems in the world's languages. Speech sounds are examined in terms of production mechanisms (articulatory phonetics), propagation mechanisms (acoustic phonetics), and perception mechanisms (auditory phonetics). Includes a basic introduction to Digital Signal Processing. Without Permission of Instructor, must have Graduate Standing. Cross-list: ANTH 501. Graduate/Undergraduate Equivalency: LING 301. Mutually Exclusive: Credit cannot be earned for LING 501 and LING 301.

LING 504 - INTRODUCTION TO SYNTAX
Short Title: INTRODUCTION TO SYNTAX
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): LING 500
Description: An introduction to syntactic theory and analysis. Functional and formal approaches to both universal and language specific aspects of various syntactic phenomena are compared and evaluated in the light of the data drawn from typologically and geographically diverse languages. LING 300/500 is an absolute prerequisite to this course. Graduate/Undergraduate Equivalency: LING 304. Mutually Exclusive: Credit cannot be earned for LING 504 and LING 304.

LING 505 - HISTORICAL LINGUISTICS
Short Title: HISTORICAL LINGUISTICS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Exploration of the nature of language change. Topics covered include sound change, syntactic and semantic change, modeling language splits, the sociolinguistics of language change, and the history of European languages. Without Permission of Instructor, must have Graduate Standing. Cross-list: ANTH 505. Graduate/Undergraduate Equivalency: LING 305. Mutually Exclusive: Credit cannot be earned for LING 505 and LING 305.

LING 506 - LANGUAGE, THOUGHT, AND MIND
Short Title: LANGUAGE, THOUGHT, AND MIND
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of language as a cognitive system. Linguistic data as evidence for the cognitive structures and processes that enable people to learn and use language; how linguistic structure influences concept formation and patterns of thinking. Without Permission of Instructor, must have Graduate Standing. Graduate/Undergraduate Equivalency: LING 306. Mutually Exclusive: Credit cannot be earned for LING 506 and LING 306.

LING 510 - MORPHOLOGY
Short Title: MORPHOLOGY
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): LING 500 or ANTH 500 or LING 511 or ANTH 523
Description: Morphology is the study of word formation and the relationship between form, meaning, and syntax. This course is an introduction to morphological theory. Topics covered include approaches to word formation, morphological change, and morphological phenomena in diverse languages. Without Permission of Instructor, must have Graduate Standing. Graduate/Undergraduate Equivalency: LING 310. Mutually Exclusive: Credit cannot be earned for LING 510 and LING 310.
### LING 511 - INTRODUCTION TO PHONOLOGY

**Short Title:** INTRODUCTION TO PHONOLOGY  
**Department:** Linguistics  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Introduction to analysis techniques and theory concerning patternings of sounds in the world's languages. The course will involve extensive work with non-English data sets, and development of analytical techniques such as identification of sound alternations or restrictions, and formalization of abstract representations and rules to account for them. Without Permission of Instructor, must have Graduate Standing. Cross-list: ANTH 523. Graduate/Undergraduate Equivalency: LING 311. Mutually Exclusive: Credit cannot be earned for LING 511 and LING 311.

### LING 513 - LANGUAGE AND CULTURE

**Short Title:** LANGUAGE AND CULTURE  
**Department:** Linguistics  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Investigates the relation between language and thought, language and world view, language and logic. Without Permission of Instructor, must have Graduate Standing. Cross-list: ANTH 513. Graduate/Undergraduate Equivalency: LING 313. Mutually Exclusive: Credit cannot be earned for LING 513 and LING 313.

### LING 515 - INTRODUCTION TO SEMANTICS

**Short Title:** INTRODUCTION TO SEMANTICS  
**Department:** Linguistics  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Introduction to basic approaches to the study of meaning in linguistics and related fields. Includes the cognitive representation of meaning, lexical categorization, conceptual structures, metaphor/metonymy, meaning change, pragmatic inference, and the relation of language and mind. Without Permission of Instructor, must have Graduate Standing. Graduate/Undergraduate Equivalency: LING 315. Mutually Exclusive: Credit cannot be earned for LING 515 and LING 315.

### LING 530 - CORPUS LINGUISTICS

**Short Title:** CORPUS LINGUISTICS  
**Department:** Linguistics  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Investigation of the nature of linguistic representations from corpus-based analyses as compared to more traditional methodologies. Includes the collection of individual text data (or the exploration of existing text sources), the use of various text analysis programs (e.g. concordance software), and the production of lexical, syntactic, semantic, discourse, or cultural analyses of selected texts, using computer-based methods. Without Permission of Instructor, must have Graduate Standing. Graduate/Undergraduate Equivalency: LING 330. Mutually Exclusive: Credit cannot be earned for LING 530 and LING 330.

### LING 540 - THEORY AND METHODS OF TEACHING ESL AND FL

**Short Title:** TEACHING ESL/FL-THEORY&METHODS  
**Department:** Linguistics  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Introduction to the theory and practice of teaching a second language. Includes the process of language learning viewed from social, psychological, and linguistic perspectives, as well as commonly used teaching "methods," such as the audio-lingual method, situational language teaching, the natural approach, and TPR, among others. Without Permission of Instructor, must have Graduate Standing. Graduate/Undergraduate Equivalency: LING 340. Mutually Exclusive: Credit cannot be earned for LING 540 and LING 340.

### LING 550 - DEPARTMENTAL COLLOQUIUM

**Short Title:** DEPARTMENTAL COLLOQUIUM  
**Department:** Linguistics  
**Grade Mode:** Satisfactory/Unsatisfactory  
**Course Type:** Seminar  
**Credit Hour:** 1  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Faculty, graduate students, and invited guests meet weekly to present reports on current research or to discuss current issues in Linguistics. Without Permission of Instructor, must have Graduate Standing. Repeatable for Credit.

### LING 551 - SEMINAR IN LINGUISTIC THEORY

**Short Title:** SEMINAR IN LINGUISTIC THEORY  
**Department:** Linguistics  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Topics vary from year to year. Without Permission of Instructor, must have Graduate Standing. Repeatable for Credit.
LING 552 - SEMINAR IN SYNTAX AND SEMANTICS
Short Title: SEMINAR IN SYNTAX & SEMANTICS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course presents the major issues in Second Language Acquisition in natural and formal settings (classrooms). Particular attention will be placed on less commonly taught languages, as well as community-based efforts of language revitalization. Students must be second-year graduate students or have permission of the instructor to enroll. Without Permission of Instructor, must have Graduate Standing. Instructor Permission Required.

LING 553 - SEMINAR IN LINGUISTIC STRUCTURE
Short Title: SEMINAR IN LINGUISTIC STRUCTURE
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will examine the concepts of social class and community of practice in depth as they relate to sociolinguistic variation. Specific attention will be paid to how these concepts are treated in the field of linguistics, as well as complimentary fields such as sociology and anthropology. Cross-list: SWGS 556.

LING 554 - SEMINAR IN COGNITIVE LINGUISTICS
Short Title: COGNITIVE LINGUISTICS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): LING 301 or LING 501 or ANTH 301 or ANTH 501
Description: Topics vary from year to year. Without Permission of Instructor, must have Graduate Standing. Repeatable for Credit.

LING 555 - SEMINAR IN PHONETICS
Short Title: SEMINAR IN PHONETICS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): LING 415
Description: This course will examine the concepts of social class and community of practice in depth as they relate to sociolinguistic variation. Specific attention will be paid to how these concepts are treated in the field of linguistics, as well as complimentary fields such as sociology and anthropology. Cross-list: SWGS 556.

LING 556 - SEMINAR IN SOCIOLINGUISTICS
Short Title: SEMINAR IN SOCIOLINGUISTICS
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): LING 415
Description: This course will examine the concepts of social class and community of practice in depth as they relate to sociolinguistic variation. Specific attention will be paid to how these concepts are treated in the field of linguistics, as well as complimentary fields such as sociology and anthropology. Cross-list: SWGS 556.

LING 557 - SEMINAR IN DISCOURSE
Short Title: SEMINAR IN DISCOURSE
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will examine the concepts of social class and community of practice in depth as they relate to sociolinguistic variation. Specific attention will be paid to how these concepts are treated in the field of linguistics, as well as complimentary fields such as sociology and anthropology. Cross-list: SWGS 556.

LING 558 - SEMINAR IN LANGUAGE CHANGE
Short Title: SEMINAR IN LANGUAGE CHANGE
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): LING 505
Description: Topics vary from year to year. Without Permission of Instructor, must have Graduate Standing. Repeatable for Credit.

LING 561 - SEMINAR IN LANGUAGE DOCUMENTATION AND DESCRIPTION
Short Title: SEMINAR IN LG. DOC. & DESCRIP.
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Without Permission of Instructor, must have Graduate Standing. Repeatable for Credit.

LING 562 - SECOND LANGUAGE ACQUISITION
Short Title: SECOND LANGUAGE ACQUISITION
Department: Linguistics
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course presents the major issues in Second Language Acquisition in natural and formal settings (classrooms). Particular attention will be placed on less commonly taught languages, as well as community-based efforts of language revitalization. Students must be second-year graduate students or have permission of the instructor to enroll. Without Permission of Instructor, must have Graduate Standing. Instructor Permission Required.

LING 563 - GRADUATE RESEARCH
Short Title: GRADUATE RESEARCH
Department: Linguistics
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 1-12
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Without Permission of Instructor, must have Graduate Standing. Instructor Permission Required. Repeatable for Credit.
MGMT 500 - BCM HEALTH SERVICES ADMINISTRATION
Short Title: BCM HEALTH SERVICES ADMIN.
Department: Management
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 15
Restrictions: Enrollment limited to students in the MBA program.
Course Level: Graduate
Description: Health services research project/externship; arranged by BCM faculty with input from Jones School faculty as part of the MD/MBA (BCM/RICE) dual degree program. Course work, research, etc. taken at Baylor College of Medicine.

MGMT 501 - FINANCIAL ACCOUNTING
Short Title: FINANCIAL ACCOUNTING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the preparation, analysis, and use of corporate financial reports. Covers the basic techniques of financial reporting and analysis from the perspective of managers as well as external users of information such as investors. Required for MBA.

MGMT 502 - MANAGERIAL ACCOUNTING
Short Title: MANAGERIAL ACCOUNTING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the use of financial and cost information by managers in budgeting, resource allocation, pricing, quality control, and other contexts to help managers set goals and monitor and evaluate performance. Required for MBA.

MGMT 503 - MANAGEMENT CONTROL
Short Title: MANAGEMENT CONTROL
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course builds on earlier courses on cost management and corporate strategy and focuses on the management control systems that can be used for the effective implementation of strategy. Included topics are the balanced scorecard, stretch budgets, performance evaluation and incentives, organizational and operational controls, and the development of metrics to motivate and evaluate performance. Required for MBA.

MGMT 510 - ORGANIZATIONAL BEHAVIOR
Short Title: ORGANIZATIONAL BEHAVIOR
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of the many factors, which influence how individuals, groups, and teams behave and function in complex organizations and how they can be effectively managed. Required for MBA.

MGMT 512 - LEADING CHANGE
Short Title: LEADING CHANGE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Emphasizes understanding of what constitutes effective organizational designs; considers both the macro designing of change initiatives and the micro execution of those initiatives.

MGMT 540 - MANAGERIAL ECONOMICS
Short Title: MANAGERIAL ECONOMICS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: We study production and pricing decisions under different assumptions about firm market power. Emphasis is placed on understanding the relevant costs in firm decision-making. Examples are used from marketing and accounting areas. Required for MBA.
MGMT 541 - ECONOMIC ENVIRONMENT OF BUSINESS
Short Title: ECONOMIC ENVIRONMENT OF BUS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Examination of the global economic environment that serves as a backdrop for business decision making, with emphasis on the key macroeconomic policy goals and tools and how they affect exchange rates, interest rates, business cycles, and long-term economic growth. Required for MBA.

MGMT 543 - FINANCE
Short Title: FINANCE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the theory and practice of corporate finance, with emphasis on topics such as valuation, capital budgeting, risk and return, and capital structure. Required for MBA.

MGMT 560 - CORPORATE RESPONSIBILITY
Short Title: CORPORATE RESPONSIBILITY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: An exploration of the ethical and legal bases of managerial decision making and the social dimension of the business firm. Required for MBA.

MGMT 561 - BUSINESS-GOVERNMENT RELATIONS
Short Title: BUSINESS-GOVERNMENT RELATIONS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of how public policy influences the private competitive environment of the firm. Examines the major political institutions and actors--Congress, the President, interest groups, the media, and administrative agencies--that shape U.S. public policy. Students analyze business political strategies and formulate several of their own. Required for MBA.

MGMT 570 - COMPETITIVE AND INDUSTRY ANALYSIS
Short Title: COMPETITIVE STRATEGY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Systematic examination of models and techniques used to analyze a competitive situation within an industry from a strategic perspective. Examines the roles of key players in competitive situations and the fundamentals of analytical and fact-oriented strategic reasoning. Examples of applied competitive and industry analysis are emphasized. Required for MBA.

MGMT 571 - STRATEGY FORMULATION AND IMPLEMENTATION
Short Title: STRATEGY FORMULATION
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course focuses on formulating and implementing effective organizational strategy, including competitive positioning, core competencies and competitive advantage, cooperative arrangements, and tools for implementation.

MGMT 574 - OPERATIONS MANAGEMENT
Short Title: OPERATIONS MANAGEMENT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Systematic examination of models and techniques used to analyze a competitive situation within an industry from a strategic perspective. Examines the roles of key players in competitive situations and the fundamentals of analytical and fact-oriented strategic reasoning. Examples of applied competitive and industry analysis are emphasized. Required for MBA.

MGMT 580 - MARKETING
Short Title: MARKETING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the key concepts underlying the function of marketing and its interaction with other functions in a business enterprise. Explores marketing's role in defining, creating, and communicating value to customers. Primarily case-based with capstone simulation exercise, providing a foundation for advanced course work in marketing. Required for MBA.
MGMT 591 - ACCOUNTING THEORY
Short Title: ACCOUNTING THEORY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MGMT 601
Description: The aim of this seminar is to impart an understanding of the historical evolution of the literature on financial accounting theory and accounting principles, as well as emerging developments in accounting research. A companion objective is to come to understand the evolving dynamic of the standard-setting process for financial reporting in the United States and at the international level, including consideration of the "political" intrusions into this process. Readings will be drawn from the periodical literature, books and monographs, and reports. A term paper will be required. The prerequisite for undergraduates is BUSI 405, but the course will also be open also to a small number of other students who have taken just BUSI 305. MBA students: Prerequisite is MGMT 601. PhD students: no prerequisites. All students must obtain the prior permission of the instructor. Course may not be taken pass/fail and may not be audited. Enrollment will be limited. Mutually Exclusive: Credit cannot be earned for MGMT 591 and BUSI 491/MACC 591.

MGMT 594 - STRATEGIC BUSINESS COMMUNICATION
Short Title: STRAT BUSINESS COMMUNICATION
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture/Laboratory
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA program.
Course Level: Graduate
Description: Introduction to the strategy and practice of business presentations. Includes frequent oral presentations (both individual and team) and feedback.

MGMT 595 - DATA ANALYSIS I
Short Title: DATA ANALYSIS I
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The ever-increasing capacity of computers to analyze data and the explosion of the amount of data available have resulted in an increased role for data analysis as an aid to business decision-making. This course exposes the student to the most important ideas and methods relevant for data analysis in a business context. Emphasizing practical applications to real problems, the course covering the following topics: sampling, descriptive statistics, probability distributions, and regression analysis. Required for MBA.

MGMT 596 - STRATEGIC BUSINESS COMMUNICATIONS II
Short Title: STRATEGIC BUSINESS COMM II
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Lecture
Credit Hours: 0.75
Restrictions: Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Introduction to the strategy and practice of management communication. Assignments are based on core courses integrated across the curriculum. Includes individual communication skills assessment and development and team-based oral and written communication instruction. Required for M.B.A.

MGMT 597 - DATA ANALYSIS II
Short Title: DATA ANALYSIS II
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The ever-increasing capacity of computers to analyze data and the explosion of the amount of data available have resulted in an increased role for data analysis as an aid to business decision-making. This course exposes the student to the most important ideas and methods relevant for data analysis in a business context. Emphasizing practical applications to real problems, the course covering the following topics: sampling, descriptive statistics, probability distributions, and regression analysis. Required for MBA.

MGMT 599 - ACTION LEARNING PROJECT
Short Title: ACTION LEARNING PROJECT
Department: Management
Grade Mode: Standard Letter
Course Type: Intensive Learning Experience
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Group project in which students, under the guidance of faculty and a corporate liaison, study the scope of improvements needed, examine a company's processes, and then provide written recommendations and present findings to senior management. Required for MBA.
MGM 600 - INTERNATIONAL ENERGY SIMULATION
Short Title: INTL ENERGY SIMULATION
Department: Management
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Intensive Learning Experience
Credit Hours: 0.75
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The Jones Graduate School of Business International Energy Simulation is designed to create a real world environment in which multiple actors align and compete to achieve their distinct objectives. This year we focus on Discordia, a fictitious West African nation. You will be assigned to one of about 15 teams including government, energy companies, media, villagers, public policy institutions and others. Critical success factors include strategic thinking, the ability to build alliances, and a deep understanding of the perspectives of multiple stakeholders. Expect the unexpected. Repeatable for Credit.

MGM 601 - FINANCIAL STATEMENT ANALYSIS
Short Title: FINANCIAL STATEMENT ANALYSIS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Study of how investors, financial analysts, creditors, and managers use financial statement information in evaluating firm performance and in valuing firms. Emphasizes industry and firm-level analysis of accounting information using financial accounting concepts and finance theory.

MGM 603 - FEDERAL TAXATION
Short Title: FEDERAL TAXATION
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Survey of the basic federal tax law concepts of business income and deductions, proceeding to tax aspects of different forms of business organizations, emphasizing corporations. Includes sections of tax planning for mergers and acquisitions, compensation planning, and international tax effects. Introduces tax research.

MGM 604 - MINDFULNESS AND PERFORMANCE IN HIGH RELIABILITY ORGANIZATIONS
Short Title: MINDFULNESS AND PERFORMANCE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: While organizations frequently discuss the importance of safety, safety incidents are both commonplace and costly across a number of industries. This course is designed to equip you with tools and insights that will help you and your organization prevent costly, safety-related errors and achieve higher and more reliable performance.

MGM 606 - CORPORATE FINANCIAL REPORTING: US GAAP & IFRS PART I
Short Title: CORP FIN REPUS GAAP & IFRS I
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA program.
Course Level: Graduate
Description: Course covers aspects of interest to corporate finance officers and financial statement readers on a number of critical financial reporting issues, including those related to merchandise inventories, fixed and intangible assets, business combinations, intercorporate investments, consolidated financial statements and segment reporting, and the effects of changing prices on net income and rate of return. The strategic role of the newly restructured International Accounting Standards Board, especially as viewed by the Securities and Exchange Commission and the European Commission, will be explored. Students will be apprised of the sweeping and fundamental changes that are occurring today in the milieu of international financial reporting. Repeatable for Credit.

MGM 609 - MANAGING ENERGY TRANSITIONS
Short Title: MANAGING ENERGY TRANSITIONS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: "Managing in a Carbon- Constrained World" focuses on the business challenges and opportunities presented by the fast-changing dynamics of climate change and renewable/alternative sources of energy - at the international, federal, and state levels. Consideration will be given to successes and failures of "first movers." We will consider how to reconcile conflicts between the goal of a lower carbon future and the priorities of energy security and restoring a strong, sustainable, economy. The course will close with corporate responses to the challenge. The course is intended to benefit students who intend to pursue careers as leaders in industry, finance, government, diplomacy, international agencies, non-government organizations (NGO's), media, or in academia. The course will challenge you to understand diverse points of view. A background in economics, finance, management, engineering, or public policy will provide a strong foundation, but other disciplines may also apply. Repeatable for Credit.
MGMT 610 - FUNDAMENTALS OF THE ENERGY INDUSTRY
Short Title: FUNDAMENTALS OF THE ENERGY IND
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course is based on the principle that one cannot understand commodity markets without a good grasp of the technology and physical infrastructure behind production, transportation, and distribution of energy commodities and linkages between different segments of the energy complex. The review of the industry infrastructure will be followed by discussion of the institutional framework of the energy markets in the US and other developed economies, including discussion of the different types of participating business entities, types of transactions and regulatory infrastructure. The course will be divided into three groups of lectures, covering the natural gas industry, power and coal business and oil/refined products markets, with an additional shorter lecture on regulatory issues.

MGMT 611 - GEOPOLITICS OF ENERGY
Short Title: GEOPOLITICS OF ENERGY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Geopolitics of Energy builds on critical thinking developed in core courses such as Strategy, Finance and Ethics. The modules deal with historical themes, access to resources, operational issues occurring during the life of an investment, and decisions at the end of investment life (at expected maturity or prematurely). Scenario Planning is used - not to predict the future but to consider the viability of strategies under alternate future directions. The course uses the case method to a significant extent and deals with diverse regions and levels of economic development. Class participation, individual and group exercises, along with a final examination account for grading. Repeatable for Credit.

MGMT 612 - COMPETITION, CARBON AND ELECTRICITY POLICY
Short Title: COMP & CARBON & ELECT POLICY
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs.
Course Level: Graduate
Description: MGMT 612 covers the changes that have occurred over the last twenty years in the electric power industry and the challenges and profit potential of efforts to reduce the industry's emissions of carbon dioxide. The course will use original source materials to explore the impacts of policy choices on companies and consumers. We will cover economics, finance, engineering, and public policy, and a background in those disciplines will prove useful. Repeatable for Credit.

MGMT 613 - HUMAN AND SOCIAL CONTEXT AND QUESTIONS IN TECHNOLOGY ENTREPRENEURSHIP
Short Title: SOCIAL & HUMAN CONTEXT IN TECH
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course explores the human and social dynamics critical to the evolving world of technology innovation and entrepreneurship. Topics include: social systems; entrepreneurial mindset; the future of work and organizations; understanding new fields and data; the changing relationship between humans and technology; and questions in privacy, security, and regulation.

MGMT 614 - CORPORATE FINANCIAL REPORTING: US GAAP & IFRS
Part I
Short Title: CORP FIN REP US GAAP & IFRS I
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA program.
Course Level: Graduate
Description: This course can be taken without having taken Part I. We take up revenue recognition, bonds and leases for lessees, income tax reporting, shareholders’ equity (including earnings per share), and marketable securities, long-term investments and consolidated financial statements. Throughout, comparisons will be made between US GAAP and IFRS. The same textbook will be used for Parts I and II. Repeatable for Credit.

MGMT 615 - BARGAINING
Short Title: BARGAINING
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Strategic Problem Solving examines theories, concepts and techniques used by highly effective managers and executives to solve challenging strategic problems facing their organizations. Strategic problems of two major types are addressed-problems as threats and problems as opportunities. The course integrates relevant ideas from decision sciences and strategic decision making and presents a coherent framework managers can use to become more effective strategic problem solvers. Focus is on analyzing and learning how to solve strategic problems course participants have faced or are likely to deal with in their future careers. Requires second year Jones School standing or permission of the instructor. Repeatable for Credit.

<td>Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.</td>
<td>Graduate</td>
<td>The aim of this course is to gain an in-depth understanding of corporate governance and how it influences a firm's strategy and performance. The course covers the theory and mechanisms of corporate governance and comparative systems of governance and how they relate to contemporary trends. We focus on problems in listed firms, how they can be mitigated by regulation, ownership, boards, incentives, and other mechanisms, and how alternative governance models handle their problems. The course will enable students to undertake a corporate governance review of an individual company including an assessment of how ownership, board structure, managerial incentives and system characteristics influence company strategy and performance. We use a combination of readings, conventional cases, and real-time cases and the variety of governance issues and solutions around the globe. The course is appropriate for those who desire to run their own companies, those who are interested in investment portfolio management, and those who aspire to be senior corporate managers. Repeatable for Credit.</td>

MGMT 623 - COMMERCIALIZATION IN PHARMA/BIOTECH
Short Title: COMMERCIALIZATION IN PHARMA
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Provides an insider's perspective on workings and challenges of an early to mid-stage pharmaceutical company. Current company issues and case studies are used to discuss topics including pre-clinical & clinical development, licensing & business development and intellectual property and patent strategies. Intended for students considering a career in an entrepreneurial biotechnology company. Previous coursework in entrepreneurship or healthcare is preferred.

MGMT 624 - REAL ESTATE
Short Title: REAL ESTATE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: This course emphasizes the components and processes of real estate industry including identification and analysis of investment and development opportunities from an entrepreneurial standpoint. It utilizes Harvard Cases and requires a major field project. Guest lectures will constitute a portion of most sessions.

MGMT 625 - CREATIVE ENTREPRENEURSHIP
Short Title: CREATIVE ENTREPRENEURSHIP
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs.
Course Level: Graduate
Description: Designed for those wishing to form their own business. It takes the prospective entrepreneur from the conception stage through the opening of the doors on the first day of business. Students will form teams to make final presentations of their business plans. The winning team of the final presentation will be eligible to participate in the Southwest Business Plan Competition at Rice University. Numerous invited speakers. Repeatable for Credit.

MGMT 626 - VENTURE CAPITAL
Short Title: VENTURE CAPITAL
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Overview of the venture capital industry; the organization and operation of venture capital funds; investment methodology; monitoring and portfolio liquidation; leveraged investing; and specialized investments.

MGMT 627 - ENTERPRISE ACQUISITION
Short Title: ENTERPRISE ACQUISITION
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The needs approach to buying and selling businesses; enterprise valuation; deal and contract structuring; mergers and acquisitions; leveraged buyouts; consolidating fragmented industries.

MGMT 628 - ENTREPRENEURSHIP IN THE ENERGY INDUSTRY
Short Title: ENTREPRENEURSHIP ENERGY INDUST
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: The goal of Entrepreneurship In the Energy Industry is to examine the process by which entrepreneurial ideas are formed and how they obtain the technical, financial and managerial support to become viable businesses. We will use current examples of companies going through the process, cases which highlight key elements of the process, meet entrepreneurs who are living the journey and share the experiences of the classroom team, both students and teacher. Repeatable for Credit.

MGMT 629 - BUSINESS PLAN DEVELOPMENT
Short Title: BUSINESS PLAN DEVELOPMENT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs.
Course Level: Graduate
Description: This course is based on reading, analyzing and discussing business plans of actual companies in motion. Class participation is important for this course. Reading the material, discussing the business plans, and interacting with company management will also make the course more enjoyable and meaningful. During the course, we will have entrepreneurs and founders as guest lecturers. SalvageSale, BizSupplies and SimDesk are examples of business plans we will discuss.
MGMT 630 - FINANCIAL MARKETS AND INSTRUMENTS
Short Title: FINANCIAL MARKETS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The content of this course is a microeconomic focus on the functioning and structure of financial markets and financial institutions. By the end of the course students will be able to describe how information asymmetry problems affect financial transactions and market outcomes, analyze different financial market structures, and understand how no-arbitrage concepts apply to valuation tasks. We will study how firms raise external capital to fund investment in real assets and how markets and financial intermediaries assist in this. We will learn many of the details that are assumed away in other core courses, and this class will help you see how corporate finance and investments fit together as a cohesive whole. Repeatable for Credit.

MGMT 631 - HEALTH INSURANCE IN THE U.S.: THE ESSENTIALS
Short Title: HEALTH INSURANCE IN THE U.S.
Department: Management
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA program.
Course Level: Graduate
Description: The basics that all executives, especially those working in the health care industry, need to know about health insurance programs, public and private markets, pricing, risk management and how insurance companies think about their business. After covering the basics, the course examines the rapid shifts occurring as a result of the Affordable Care Act and other environmental and legislative changes. Department Permission Required.

MGMT 632 - FINANCIAL REPORTING AND GOVERNANCE
Short Title: FINANCIAL REPORT & GOVERNANCE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: The focus of the course is on the economics of financial reporting. Specifically, the course will emphasize the role of financial reporting as an important control system in corporate governance. In light of the major corporate scandals such as Enron, Tyco, WorldCom, Xerox, and Société Générale as well as the recent global financial crisis, there have been increased concerns over the failure of financial reporting as a control system. As a result, many voluntary and mandatory changes to the corporate governance structure have been proposed or implemented. Within this context of the sea of governance changes, the course will examine corporate governance functions, including top management, boards of directors and audit committees, internal control and risk assessment, external auditors and independence, fraud detection, and SEC reviews of filings and enforcement activities. We will evaluate how these functions have performed historically as well as identify and evaluate the financial reporting policies, procedures, and controls that can be employed to promote good corporate governance and ethical decisions. Special attention will be paid to the rapidly changing environment affecting corporate management as they respond to the requirements of the Sarbanes-Oxley Act and various followup reforms. The course will combine leading edge academic thought with contemporary real-life cases to examine these issues. Repeatable for Credit.
MGMT 633 - LIFE SCIENCE ENTREPRENEURSHIP & ROLES OF FOUNDERS & VENTURE CAPITAL IN HIGH-TECH STARTUPS

Short Title: LIFE SCIENCE ENTREPRENEURSHIP
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.

Course Level: Graduate

Description: The roles of physicians, scientists, engineers, and MBA's in biotech, medical device, and other life science companies will be described and characterized. The major trends and innovations driving the creation of new products in large established companies and venture-capital-backed startup companies are discussed. This pragmatic, experienced-based course describes the venture capital process, formation, and capitalization of high-tech companies, sources of technologies, role of tech transfer at universities and medical schools, startup operational issues, role of VCs and board members, execution time frames, liquidity process, IPOs and mergers, and payout prospects for founders and investors. Live, ongoing case studies are presented by guest entrepreneurs. These case studies of ongoing biotech, medical device, and healthcare informatics companies are presented by many notable M.D. and Ph.D. founders and CEOs. Rules of professional and ethical conduct of M.D.s, Ph.D.s, scientific advisory boards, clinical advisory boards, and boards of directors are reviewed. In the final classes, a high-tech, career-planning guide is discussed, plus a special lecture on leadership, intelligence, and entrepreneurship will be presented. Insider secrets and success stories from decades of highly successful VC practice in medical, biotech and infotech companies will be shared. Cross-list: BIOE 633.

MGMT 634 - COMMERCIALIZING TECHNOLOGY IN DEVELOPING COUNTRIES

Short Title: TECH IN DEVELOPING COUNTRIES
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.

Course Level: Graduate

Description: This course provides a unique opportunity for students to 1) apply their business school knowledge, 2) learn about business in developing countries and 3) learn about social entrepreneurship 4) and help the poor. The course includes lectures, cases, and discussions around needs, opportunities, and challenges of operating social enterprises (including both for-profits and non-profits) in developing countries. Students taking this course may also be able to participate in a once-in-a-lifetime trip to Africa that tourism can never duplicate. All students will be on project teams and will participate in the development of business plans for commercializing new technologies. Repeatable for Credit.

MGMT 635 - EMERGING TECHNOLOGIES

Short Title: SOCIAL ENT. IN DEV. COUNTRIES
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA program.

Course Level: Graduate

Description: This course provides a unique opportunity for students to 1) apply their business school knowledge, 2) learn about business in developing countries, 3) learn about social entrepreneurship 4) and help the poor. The course includes lectures, cases, and discussions around needs, opportunities, and challenges of operating social enterprises (including both for-profits and non-profits) in developing countries. Students taking this course may also be able to participate in a once-in-a-lifetime trip to Africa that tourism can never duplicate. All students will be on project teams and will participate in the development of business plans for commercializing new technologies in developing countries. Repeatable for Credit.

MGMT 636 - MARKETING FOR SMALL BUSINESS

Short Title: MARKETING FOR SMALL BUSINESS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs.

Course Level: Graduate

Description: This course is designed to help students develop and manage a creative and economical marketing strategy for a small business. We will use real world examples to learn how to effectively market through the use of web sites, search engine optimization (SEO), social media, online and local advertising. Students will experience a balance of theory and practical learning to apply these tools in harmony which will intensify awareness and profitability. Repeatable for Credit.

MGMT 637 - DILEMMAS IN FOUNDING NEW VENTURES

Short Title: DILEMMAS IN FOUNDING VENTURES
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.

Course Level: Graduate

Description: Frameworks for making informed decisions about human capital when founding a new venture, including co-founders, early hires, advisors, board members, and investors.

MGMT 638 - QUANTITATIVE INVESTMENT STRATEGIES

Short Title: QUANTITATIVE INVESTMENT STRAT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.

Course Level: Graduate

Corequisite: MGMT 645

Description: Repeatable for Credit.
MGMT 639 - MARKETING OF PROFESSIONAL SERVICES IN THE GLOBAL ECONOMY  
**Short Title:** MKTING OF PROF SERVICES  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the MBA or PMBA programs.  
**Course Level:** Graduate  
**Description:** This fast-paced, highly interactive and energetic course will explore the fundamental concepts, strategies and best practices of marketing professional services in today's global economy—and how this marketing differs from marketing tangible goods and non-professional services. Students will learn the importance of branding, public relations, crisis communications and Web 2.0 to promoting professional services today, and how to successfully integrate those vehicles with traditional marketing strategies. Repeatable for Credit.  

MGMT 640 - THE ENTREPRENEURIAL EXPERIENCE  
**Short Title:** THE ENTREPRENEURIAL EXPERIENCE  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the MBA program.  
**Course Level:** Graduate  
**Description:** The class will answer the question "What does it take to lead and manage a New Enterprise?" Once a New Enterprise is launched, the challenges facing an entrepreneur are unique, dynamic and require a much different skillset than managing an established business. This class will explore how to manage an uncertain environment with extremely limited resources, develop an "entrepreneurial" mindset, find the right support resources and advisors, appease investors, maintain a work life balance and manage everting that will be thrown at the entrepreneur. This class will pull from the Instructor 30+ years as an entrepreneur and advisor including starting and exiting two Inc. 500 companies and will include practical input from a number of guest speakers. Repeatable for Credit.  

MGMT 641 - ENTREPRENEURIAL STRATEGY  
**Short Title:** ENTREPRENEURIAL STRATEGY  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the EMBA, MBA or PMBA programs.  
**Course Level:** Graduate  
**Description:** Review of classic investment theory, with emphasis on measuring and managing investment risk and return. Includes the development of modern portfolio theory and asset pricing models, an introduction to option and futures contracts, market efficiency, and stock valuation. Recommended for most finance students.  

MGMT 642 - FUTURES AND OPTIONS I  
**Short Title:** FUTURES AND OPTIONS I  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** An introduction to forward, futures, option, and swap contracts, including the basic valuation principles, the use of these contracts for hedging financial risk, and an analysis of option-like investment decisions. Recommended for finance students.  

MGMT 643 - EQUITY PRACTICUM I - WRIGHT FUND  
**Short Title:** EQUITY PRACTICUM I WRIGHT FUND  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Internship/Practicum  
**Credit Hours:** 2  
**Restrictions:** Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** MGMT 543  
**Description:** Students will gain hands on exposure to many aspects of investment management by managing 'live' portfolio (the M.A. Wright Fund) of endowed assets. The first semester's work (students must continue to MGMT 644) is predominately focused on stock analysis and valuation. Admission is by application and interview only. Department Permission Required.  

MGMT 644 - EQUITY PRACTICUM II - WRIGHT FUND  
**Short Title:** EQUITY PRACTICUM II WRIGHT FND  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Internship/Practicum  
**Credit Hours:** 2  
**Restrictions:** Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** MGMT 643 and MGMT 648  
**Description:** Recommended Prerequisite(s): MGMT 645 (may taken the same semester).  

MGMT 645 - PORTFOLIO MANAGEMENT  
**Short Title:** PORTFOLIO MANAGEMENT  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Review of classic investment theory, with emphasis on measuring and managing investment risk and return. Includes the development of modern portfolio theory and asset pricing models, an introduction to option and futures contracts, market efficiency, and stock valuation. Recommended for most finance students.
MGMT 646 - CORPORATE INVESTMENT POLICY  
**Short Title:** CORPORATE INVESTMENT POLICY  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** This course examines the investment decisions faced by corporate financial managers. We begin by developing a general framework for corporate valuation, and then we use this framework to review and expand on the capital budgeting issues developed in the core finance course. For example, we review the foundations of option valuation, and then apply these tools to value real options. We also cover new material on estimating the cost of capital and the effects of leverage. In this course, you will learn the state of the art in the analysis of corporate investment decisions. The course format is a mixture of theory, empirical evidence, and practical application. The theory provides the framework for our analysis. The empirical evidence provides a core of stylized facts to support our theoretical intuition. And, the practical applications put to use the theoretical foundations and empirical evidence in real world decision making.

MGMT 647 - CORPORATE FINANCIAL POLICY  
**Short Title:** CORPORATE FINANCIAL POLICY  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Examination of corporate investment and financing, with emphasis on valuation methods and how financial policy impacts corporate value. Includes the implications of agency costs, asymmetric information and signaling, taxes, mergers and acquisitions, corporate restructuring, real and embedded options, and financial risk management. Recommended for finance students.

MGMT 648 - APPLIED FINANCE  
**Short Title:** APPLIED FINANCE  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Study of the theory and practice of the fundamental principles in finance emphasizing hands-on experience with a wide range of corporate finance and investments applications. The course provides extensive opportunity to implement finance theory at a practical level and to develop advanced analytical spreadsheet expertise.

MGMT 649 - DATA MINING FOR BUSINESS ANALYTICS  
**Short Title:** DATA MINING FOR BUS ANALYTICS  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Seminar  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the MBA program. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** MGMT 543 and MGMT 642  
**Description:** This course covers fundamental principles behind data mining applications, introduce popular data mining algorithms and techniques, examine how data mining technology can be used in decision making, work on real-world data "hands-on" with open-source software, explore Deep Learning and their impact. Repeatable for Credit.

MGMT 650 - FUTURES AND OPTIONS II  
**Short Title:** FUTURES AND OPTIONS II  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** MGMT 595 or MGMP 595 or MGMW 595  
**Description:** In-depth analysis of the theory and practice of derivative securities. Develops a general set of valuation, hedging, and risk management techniques which are then applied to the equity, interest rate, currency, and commodity markets.

MGMT 651 - FIXED INCOME MANAGEMENT  
**Short Title:** FIXED INCOME MANAGEMENT  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Study of fixed income securities and markets in the U.S. and abroad, with an emphasis on the term structure of interest rates and the pricing of fixed income securities, derivatives, and portfolios. Include Treasury, Corporate Debt, and Mortgage-Backed Securities.

MGMT 652 - MERGERS AND ACQUISITIONS  
**Short Title:** MERGERS & ACQUISITIONS  
**Department:** Management  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 1.5  
**Restrictions:** Enrollment limited to students in the EMBA, MBA or PMBA programs. Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** The course examines the merger and acquisition process from the perspectives of buyers and sellers. Attention is paid to the internal (make) versus external (buy) growth opportunities and their value consequences. The course also analyzes the M&A transaction process through the study of cases. An additional focus will be in the interaction of strategic planning, value planning, financial strategies, and investment decisions.
MGMT 563 - CROSS-BORDER INVESTMENTS
Short Title: CROSS-BORDER INVESTMENTS
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Cross-Border Investments builds on critical thinking developed in Core courses such as Strategy, Finance and Ethics. The course examines the strategic rationale and valuation of international investments in various real-world scenarios including corporate acquisitions, leveraged buyouts, and public equities. While the primary focus is on fundamental analysis and return on investment, students will also deepen their understanding of the international economy, political risk, corporate governance and other non-financial considerations. The approach is case-oriented and class participation will be a critical determinant of grades. Repeatable for Credit.

MGMT 564 - REAL ESTATE CAPITAL MARKETS: PUBLIC & PRIVATE
Short Title: RE CAP MARKETS: PUBLIC & PRIV
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course has two major objectives: First, to provide an overview of topics related to real estate capital markets. Specifically, this course will focus on how to raise capital for: private real estate development, construction, acquisition, and investment; and, Public Companies, more specifically, REITs. It will build on your real estate and finance knowledge and interest; and provide depth and breadth of the financial markets and its players, on Wall Street, and outside of Wall Street. This course will devote time to understand the working of the Capital Markets, considered by most industry leaders to be the source of the “lubricant” necessary to turn the wheels towards the creation of value; and, by others, to be source of the “leverage” necessary to profit from a “Zero Sum Game.” Second, this course is an elective related to real estate in a series available to prepare Rice MBA students interested in career opportunities in the Real Estate Industry in finance, and more specifically in Banking, and Investment banking, Private Real Estate Companies, and REITs. You need to have a reasonably good understanding of the creation of value through the workings of various asset classes of real estate, and be able to build on that knowledge by learning the sources of Capital and how Capital can accessed. You will be challenged to determined what came first the “chicken” or the “egg” (i.e. Does having control of the “real estate,” give you access to capital; or, alternatively by having control of the “capital” give you the opportunity to acquire real estate? You will also need to have an understanding of financial analysis to evaluate the Capital needs of an investment, and to determine alternative financial strategies. Repeatable for Credit.

MGMT 565 - ENERGY DERIVATIVES
Short Title: ENERGY DERIVATIVES
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Examines the physical energy markets, common financial instruments, and their applications, including cross-commodity hedges, dual variable assets, synthetic options, and swaps. Decision criteria for both outright and risk management trading are covered with respect to both fundamental and technical analysis. Eight guest speakers from various companies throughout the industry will participate.

MGMT 567 - INTERNATIONAL FINANCE
Short Title: INTERNATIONAL FINANCE
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs.
Course Level: Graduate
Description: Exploration of special problems encountered by financial officers in international arenas. Includes the economics of the foreign exchange market, exchange rate risk management, international portfolio management, capital budgeting for international projects, and international financing strategies.

MGMT 568 - APPLIED RISK MANAGEMENT
Short Title: APPLIED RISK MANAGEMENT
Department: Management
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): MGMT 642
Description: This course focuses on applied risk management projects. The hands-on experience allows in-depth analysis and understanding of practical risk management issues and exposure to different risk management tools including Value at Risk and Monte Carlo simulations. The course emphasizes student development and application of skills rather than lectures.
MGMT 659 - REAL ESTATE FINANCE: ASSET VALUATION

Course Level: Graduate

Description: This course provides an introduction to the concepts and techniques used to analyze and commercial real estate assets and the instruments commonly used to finance these assets. The topics covered include financial analysis of income-generating real property, analysis of mortgage instruments, commercial mortgage-backed securities (CMBS), and real estate investment trusts (REITs). This course is designed for students who are interested in commercial real estate; topics pertaining to single-family residential real estate will be covered only in passing. The course will offer all students an opportunity to develop their business presentation skills through case discussions and a final project presentation. The final project involves the detailed analysis of a CMBS deal, including separate, linked analyses of the mortgage collateral pool, the mortgages, and the note structure. The final project will require the use of all of the tools developed in the course.

Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.

Credit Hours: 1.5

MGMT 660 - REAL ESTATE CONTRACT NEGOTIATIONS FOR BUSINESS PROFESSIONALS

Course Level: Graduate

Description: Legal risk pervades business dealings. This course explores legal risk by educating the student on legal theories, then how to identify, quantify, reduce and accept legal risk, in the context of real estate transactions. Course Level: Graduate

Description: Exploration of U.S. and foreign law as it relates to the law-business interface of importing-exporting trade problems, foreign operations, and foreign investments. Includes the extraterritorial impact of U.S. law, corporate organization, foreign exchange, joint ventures, withdrawal from foreign ventures, and third-country manufacturing.

Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.

Credit Hours: 3

MGMT 662 - ADVANCED OPERATIONS AND SUPPLY CHAIN MANAGEMENT

Course Level: Graduate

Description: This is a project-based course. The class will act as a team to construct a portfolio of large cap stocks designed to outperform the S&P 500 with minimal tracking error. Stock selection will be by quantitative methods. The basic approach will be to assume a factor model and use the Arbitrage Pricing Theory to find the mean-variance frontier for active weights. Other quantitative methods – for example, pairs trading – may be explored to improve portfolio selection. Alternative volatility and correlation estimation methods will be examined. The effects of model misspecification, estimation error, and parameter instability will be analyzed by evaluating performance out of sample. Initial analysis will be done industry by industry. Each student will be responsible for analyzing the returns of the stocks in one industry. When these analyses are complete, other tasks will be assigned as the team builds a portfolio and develops risk analysis methods. Students will present their results to the class via oral and written reports. Repeatable for Credit.

Restrictions: Enrollment limited to students in the MBA or PMBA programs. Enrollment is limited to Graduate level students.

Credit Hours: 1.5

MGMT 664 - OPERATIONS LEADERSHIP LAB

Course Level: Graduate

Prerequisite(s): MGMT 645
