MASTER OF BIOENGINEERING (MBE) DEGREE AND A MAJOR CONCENTRATION IN GLOBAL MEDICAL INNOVATION

Program Learning Outcomes for the MBE Degree and a Major Concentration in Global Medical Innovation

Upon completing the MBE degree and a major concentration in Global Medical Innovation, students will be able to:

1. Apply and integrate advanced knowledge of Bioengineering topics in at least one of the following areas: Biomaterials, Biofabrication and Mechatronics; Biomedical Imaging and Instrumentation; Cellular, Molecular, and Genome Engineering and Synthetic Biology; Computational and Theoretical Engineering in Biophysics.
2. Develop effective medical products, from concept to commercialization, within a team environment.
3. Comprehend and navigate the global medical technology industry by leveraging an internship experience.

Requirements for the MBE Degree

The MBE degree is a non-thesis master's degree. For general university requirements, please see Non-Thesis Master's Degrees. For additional requirements, regulations, and procedures for all graduate programs, please see All Graduate Students.

Students pursuing the MBE degree must complete:

- A minimum of 30-31 credit hours, depending on major concentration and course selection, to satisfy degree requirements.
- A minimum of 30 credit hours of graduate-level study (graduate semester credit hours, coursework at the 500-level or above).
- A minimum of 24 graduate semester credit hours must be taken at Rice University.
- A minimum of 24 graduate semester credit hours must be taken in standard or traditional courses (with a course type of lecture, seminar, laboratory, lecture/laboratory).
- A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University.
- A maximum of 2 courses (6 graduate semester credit hours) from transfer credit. For additional departmental guidelines regarding transfer credit, see the Policies tab.
- A minimum of 4 courses (12 credit hours) must be taken in departmental (BIOE) courses at Rice with a course type of lecture or lecture/laboratory.
- The requirements for one major concentration. When students apply to the MBE degree program, they must identify and be admitted into one of two major concentrations, either in:
  - Applied Bioengineering (class-only) or Applied Bioengineering (research option): designed as a flexible program for students who will pursue careers in research, medicine, or related fields. This MBE degree major concentration is designed for students to transition to medical school or a PhD program, or to advance their professional career in the biomedical industry, or
  - Global Medical Innovation: designed specifically for students who will pursue a career in the global medical technology industry. This MBE degree major concentration is designed to prepare engineers for careers in medical technology through education in innovation, emerging-market design projects and internships.

- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum program GPA of 3.00 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree with a minimum grade of a B- (2.67 grade points) in each course.

Both major concentrations have the same prerequisites, though applicants will be evaluated considering the different purposes of each. More information about each of these major concentrations can be found below. Curriculum must be approved by the Graduate Academic Affairs Committee and the Bioengineering Department. This is done on a case-by-case basis.

The Master of Bioengineering (MBE) degree is a professional non-thesis master's degree. Students who have a BS or BA degree in an engineering or science discipline may apply. Depending on their background, some students may need to take remedial engineering courses to earn the MBE degree. For more information, see the department website.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor, or where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's Official Certifier. Additionally, these must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Internship or Independent Study

Select 1 from the following:

- BIOE 506 GRADUATE INDEPENDENT STUDY (2 semesters required)
- BIOE 600 GRADUATE BIOENGINEERING INDUSTRY INTERNSHIP

Elective Requirements

Elective Category: Quantitative Requirement

Select a minimum of 3 credit hours from the following:

- BIOE 502 / BIOS 505 / SSPB 501 PHYSICAL BIOLOGY                         | 3            |
- BIOE 539 APPLIED STATISTICS FOR BIOENGINEERING AND BIOTECHNOLOGY        | 3            |
- BIOE 541 CELL AND MOLECULAR BIOLOGY FOR ENGINEERS                       |              |
- BIOE 552 / SSPB 502 INTRO COMPUTATIONAL SYSTEMS BIOLOGY: MODELING & DESIGN PRINCIPLES OF BIOCHEM NETWORKS |              |
- BIOE 572 BIOMECHANICS                                                  |              |
- RCEL 506 APPLIED STATISTICS AND DATA SCIENCE FOR ENGINEERING LEADERS   |              |

Elective Category: Professional Development

Select a minimum of 3 credit hours from the following:

- ENGI 501 WORKPLACE COMMUNICATION FOR_professional master's students in engineering | 3            |
- ENGI 510 TECHNICAL AND MANAGERIAL COMMUNICATIONS                        |              |
- ENGI 515 LEADING TEAMS AND INNOVATION                                    |              |
- ENGI 529 / CEVE 529 ETHICS AND ENGINEERING LEADERS                       |              |
- ENGI 555 ENGINEERING PERSUASION: HOW TO DRIVE DECISIONS AND CHANGE     |              |
- ENGI 610 / NSCI 610 MANAGEMENT FOR SCIENCE AND ENGINEERING               |              |
- ENGI 615 LEADERSHIP COACHING FOR ENGINEERS                               |              |
- RCEL 501 ENGINEERING MANAGEMENT & LEADERSHIP THEORY AND APPLICATION     |              |
- RCEL 502 ENGINEERING PROJECT MANAGEMENT                                  |              |
- RCEL 505 ENGINEERING ECONOMICS FOR LEADERS                               |              |

RCEL 542 PROFESSIONAL COMMUNICATION FOR ENGINEERING LEADERS

UNIV 594 RESPONSIBLE CONDUCT OF RESEARCH

Elective Category: BIOE General Elective

Select 1 additional course from approved departmental (BIOE) course offerings (or another department) at the 500-level or above

<table>

Footnotes and Additional Information

1. This will be considered on a case-by-case basis, and the student is responsible for obtaining and selecting an internship that best aligns with their career goals. Students typically take BIOE 506 Graduate Independent Study for 2 semesters (3 credit hours each for 6 credit hours total), or 1 semester of BIOE 600 Graduate Bioengineering Industry Internship for 6 credit hours.

2. For students formally admitted into and specifically pursuing the MBE/MD dual degrees program, up to 2 courses (6 credit hours) from the McGovern Medical School at the UT Health Science Center can fulfill MBE requirements: BIOE 695 Transfer - Foundations of Medical Science and BIOE 696 Transfer - Doctoring 1: History and Physical Exam.

3. BIOE 539 or an alternative quantitative-based BIOE course, taken at the 500-level or above, with the advisor/MBE Program Director's approval.

4. Students may complete a course offered by another department, but it must be relevant to the MBE degree.

Policies for the MBE Degree

Department of Bioengineering Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the department of Bioengineering publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2023_24/Bioengineering_Graduate_Handbook.pdf

Enrollment Status Requirements

Students may enroll for the MBE Degree with a Major Concentration in Applied Bioengineering (class-only or optional research experience) on a full-time or part-time basis. For the MBE Degree with a Major Concentration in Global Medical Innovation, students may only enroll on a full-time basis. University graduation requirements (including the minimum residency requirement for students in graduate degree programs) all still apply.

Transfer Credit

For Rice University’s policy regarding transfer credit, see Transfer Credit (https://ga.rice.edu/graduate-students/academic-policies-procedures/regulations-procedures-all-degrees/#transfer). Some departments and programs have additional restrictions on transfer credit. Students are encouraged to meet with their academic program’s advisor when considering transfer credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the MBE degree should be aware of the following departmental transfer credit guidelines:
• No more than 2 courses (6 credit hours) of transfer credit from U.S.
or international universities of similar standing as Rice may apply
towards the degree.
• Requests for transfer credit will be considered by the program
director on an individual case-by-case basis.

Additional Information
For additional information, please see the Bioengineering website:
https://bioengineering.rice.edu/

Opportunities for the MBE Degree
Fifth-Year Master's Degree Option for Rice
Undergraduate Students
In certain situations and with some terminal master's degree programs,
Rice students have an option to pursue a master's degree by adding an
additional fifth year to their four years of undergraduate studies.

Advanced Rice undergraduate students in good academic standing
typically apply to the master's degree program during their junior or
senior year. Upon acceptance, depending on course load, financial aid
status, and other variables, they may then start taking some required
courses of the master's degree program. A plan of study will need to be
approved by the student's undergraduate major advisor and the master's
degree program director.

As part of this option and opportunity, Rice undergraduate students:

• must complete the requirements for a bachelor's degree and the
  master's degree independently of each other (i.e. no course may be
  counted toward the fulfillment of both degrees).
• should be aware there could be financial aid implications if the
  conversion of undergraduate coursework to that of graduate level
  reduces their earned undergraduate credit for any semester below
  that of full-time status (12 credit hours).
• more information on this Undergraduate - Graduate Concurrent
  Enrollment opportunity, including specific information on the
  registration process can be found here (https://ga.rice.edu/
  undergraduate-students/academic-opportunities/undergraduate-
  graduate-concurrent-enrollment/).

Rice undergraduate students completing studies in science and
engineering may have the option to pursue the Master of Bioengineering
(MBE) degree. For additional information, students should contact their
undergraduate major advisor and the MBE program director.

Additional Information
For additional information, please see the Bioengineering website:
https://bioengineering.rice.edu/
