BACHELOR OF SCIENCE IN COMPUTER SCIENCE (BSCS) DEGREE

Program Learning Outcomes for the BSCS Degree

Upon completing the BSCS degree, students will be able to:

1. Be knowledgeable about algorithms and their use. Students will analyze new problems, choose appropriate algorithms for their solutions, and develop analytical skills in the manipulation of algorithms.
2. Demonstrate the ability to design and implement complex software systems. Students will demonstrate skill in their design and implementation and function effectively in teams.
3. Be knowledgeable about programming languages and their use. Students will demonstrate an understanding of distinguishing and mapping two different programming languages.
4. Demonstrate a deep knowledge in a subarea of Computer Science. Students will be able to explain issues in the selected subarea and demonstrate a depth of knowledge.
5. Communicate effectively to a client and user.

Requirements for the BSCS Degree

For general university requirements, see Graduation Requirements (https://ga.rice.edu/undergraduate-students/academic-policies-procedures/graduation-requirements/). Students pursuing the BSCS degree must complete:

- A minimum of 23-25 courses (84-85 credit hours), depending on course selection, to satisfy the major requirements.
- A minimum of 128-129 credit hours, depending on course selection, to satisfy degree requirements.
- A minimum of 14 courses (51 credit hours) taken at the 300-level or above.
- A maximum of 5 courses (15 credit hours) from study abroad or transfer credit after matriculation at Rice may be applied towards specific major requirements. For additional departmental guidelines regarding transfer credit, see the Policies (p. 2) tab.

The BSCS degree is designed for students who are interested in an in-depth study of computer science to prepare themselves for a professional career in the computing industry.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major’s academic advisor, or where applicable, the department’s Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major’s Official Certifier (https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

Bachelor of Science in Computer Science (BSCS) Degree

University Graduation Requirements

Additional Credit Hours to Complete Degree Requirements

Science

at the 300-level or above to total a minimum of 11 credit hours

In consultation with a major advisor, select additional coursework

at the 300-level or above to total a minimum of 11 credit hours

Elective Requirements

Select 2 courses from departmental (COMP) course offerings (a

minimum of 3 credit hours each) at the 300-level or above

Capstone Requirement

Design Component

Select 1 course from the following:

COMP 410 SOFTWARE ENGINEERING METHODOLOGY

COMP 413 DISTRIBUTED PROGRAM CONSTRUCTION

COMP 416 GENOME-SCALE ALGORITHMS AND DATA

STRUCTURES

COMP 460 / ARTS 460 ADVANCED COMPUTER GAME CREATION

Capstone

In consultation with a major advisor, select additional coursework

at the 300-level or above to total a minimum of 11 credit hours

Total Credit Hours Required for the Major in Computer Science

84-85

Additional Credit Hours to Complete Degree Requirements

University Graduation Requirements

12-13

31

Total Credit Hours

128-129

Footnotes and Additional Information

* Note: University Graduation Requirements include 31 credit

hours, comprised of Distribution Requirements (Groups I, II, and

III), FWIS, and LPAP coursework. In some instances, courses

satisfying FWIS or distribution requirements may additionally

meet other requirements, such as the Analyzing Diversity (AD)

requirement, or some of the student’s declared major, minor, or

certificate requirements. Additional Credit Hours to Complete Degree

Requirements include general electives, coursework completed

as upper-level, residency (hours taken at Rice), and/or any other

additional academic program requirements.

1 Typically, the Math and Science courses are taken during the

freshman and sophomore years.

2 The Computer Science department has determined that credit

awarded for PHYS 141 CONCEPTS IN PHYSICS I is not eligible for

meeting the requirements of the Computer Science major.

3 The Computer Science department has determined that credit

awarded for PHYS 142 CONCEPTS IN PHYSICS II is not eligible for

meeting the requirements of the Computer Science major.

4 At most 1 of these courses total (across Electives and Capstone)

may be an independent study project (COMP 390, COMP 490, or

COMP 491). Departmental approval is required to use a 600-level

course as an elective.

5 The capstone sequence represents a coherent set of courses in

a computer science specialization chosen by the student.

Departmental Transfer Credit Guidelines

For Rice University’s policy regarding transfer credit, see Transfer

Credit (https://ga.rice.edu/undergraduate-students/academic-policies-

procedures/transfer-credit/). Some departments and programs have

additional restrictions on transfer credit. The Office of Academic Advising

maintains the university’s official list of transfer credit advisors (https://
oaa.rice.edu/advising-network/transfer-credit-advisors/) on their

website: https://oaa.rice.edu. Students are encouraged to meet with their

academic program’s transfer credit advisor when considering transfer

credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the BSCS degree should be aware of the following

departmental transfer credit guidelines:

• Requests for transfer credit will be considered by the program

director (and/or the program’s official transfer credit advisor) on an

departmental basis.

• All courses taken after matriculation at Rice and used for transfer

credit must meet the following restrictions:

• Such courses must have been offered as part of a regionally

accredited four-year degree program in Computer Science at a

U.S. or international college or university of similar standing.

• Massive open online courses, continuing education courses, and

courses designed solely for online degree programs will not be

accepted.

• No more than 5 courses (15 credit hours) may apply towards

major requirements.

• No more than 3 courses (12 credit hours) may apply towards

the “Computer Science Courses” section of the Core Requirements.

• No more than 2 courses (8 credit hours) may apply towards

upper-level coursework within the “Computer Science Courses”

section of the Core Requirements.

Policies for the BSCS Degree

Program Restrictions and Exclusions

Students pursuing the BSCS degree should be aware of the following

program restriction:

• As noted in Majors, Minors, and Certificates (https://ga.rice.edu/

undergraduate-students/academic-opportunities/majors-minors-
certificates/), under Declaring Majors, Minors and Certificates, students

may not obtain both a BA and a BS in the same major. Students

pursuing the Bachelor of Science in Computer Science (BSCS) Degree

may not additionally pursue the BA Degree with a Major in Computer

Science.

Transfer Credit

For Rice University’s policy regarding transfer credit, see Transfer

Credit (https://ga.rice.edu/undergraduate-students/academic-policies-

procedures/transfer-credit/). Some departments and programs have

additional restrictions on transfer credit. The Office of Academic Advising

maintains the university’s official list of transfer credit advisors (https://
oaa.rice.edu/advising-network/transfer-credit-advisors/) on their

website: https://oaa.rice.edu. Students are encouraged to meet with their

academic program’s transfer credit advisor when considering transfer

credit possibilities.

Departmental Transfer Credit Guidelines

Students pursuing the BSCS degree should be aware of the following

departmental transfer credit guidelines:

• Requests for transfer credit will be considered by the program

director (and/or the program’s official transfer credit advisor) on an

departmental basis.

• All courses taken after matriculation at Rice and used for transfer

credit must meet the following restrictions:

• Such courses must have been offered as part of a regionally

accredited four-year degree program in Computer Science at a

U.S. or international college or university of similar standing.

• Massive open online courses, continuing education courses, and

courses designed solely for online degree programs will not be

accepted.

• No more than 5 courses (15 credit hours) may apply towards

major requirements.

• No more than 3 courses (12 credit hours) may apply towards

the “Computer Science Courses” section of the Core Requirements.

• No more than 2 courses (8 credit hours) may apply towards

upper-level coursework within the “Computer Science Courses”

section of the Core Requirements.

Footnotes and Additional Information

* Note: University Graduation Requirements include 31 credit

hours, comprised of Distribution Requirements (Groups I, II, and

III), FWIS, and LPAP coursework. In some instances, courses

satisfying FWIS or distribution requirements may additionally

meet other requirements, such as the Analyzing Diversity (AD)

requirement, or some of the student’s declared major, minor, or

certificate requirements. Additional Credit Hours to Complete Degree

Requirements include general electives, coursework completed

as upper-level, residency (hours taken at Rice), and/or any other

additional academic program requirements.

1 Typically, the Math and Science courses are taken during the

freshman and sophomore years.

2 The Computer Science department has determined that credit

awarded for PHYS 141 CONCEPTS IN PHYSICS I is not eligible for

meeting the requirements of the Computer Science major.
• No more than 2 courses (8 credit hours) may apply towards the Capstone Requirement.

Additional Information
For additional information, please see the Computer Science website: https://www.cs.rice.edu/

Opportunities for the BSCS Degree
Academic Honors
The university recognizes academic excellence achieved over an undergraduate’s academic history at Rice. For information on university honors, please see Latin Honors (https://qa.rice.edu/undergraduate-students/honors-distinctions/university/) (summa cum laude, magna cum laude, and cum laude) and Distinction in Research and Creative Work (https://qa.rice.edu/undergraduate-students/honors-distinctions/university/). Some departments have department-specific Honors awards or designations.

Fifth-Year Master’s Degree Option for Rice Undergraduate Students
In certain situations and with some terminal master’s degree programs, Rice students have an option to pursue a master’s degree by adding an additional fifth year to their four years of undergraduate studies.

Advanced Rice undergraduate students in good academic standing typically apply to the master’s degree program during their junior or senior year. Upon acceptance, depending on course load, financial aid status, and other variables, they may then start taking some required courses of the master’s degree program. A plan of study will need to be approved by the student’s undergraduate major advisor and the master’s degree program director.

As part of this option and opportunity, Rice undergraduate students:

• must complete the requirements for a bachelor’s degree and the master’s degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
• should be aware there could be financial aid implications if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
• more information on this Undergraduate - Graduate Concurrent Enrollment opportunity, including specific information on the registration process can be found here (https://qa.rice.edu/undergraduate-students/academic-opportunities/undergraduate-graduate-concurrent-enrollment/).

Rice undergraduate students completing studies in science and engineering may have the option to pursue the Master of Computer Science (MCS) degree. For additional information, students should contact their undergraduate major advisor and the MCS program director.
