

MINOR IN DATA SCIENCE

Program Learning Outcomes for the Minor in Data Science

Upon completing the minor in Data Science, students will be able to:

1. Formulate questions in a domain that can be answered with data.
2. Use tools and algorithms from statistics, applied mathematics, and computer science for analyses.
3. Visualize, interpret, and explain results cogently, accurately, and persuasively.
4. Understand the underlying social, political, and ethical contexts that are importantly and inevitably tied to data-driven decision-making.

Requirements for the Minor in Data Science

Students pursuing the minor in Data Science must complete:

- A minimum of 7 courses (22-26 credit hours, depending on course selection) to satisfy minor requirements.
- A minimum of 5 courses (15-19 credit hours, depending on course selection) taken at the 300-level or above.
- 1 course (3-4 credit hours, depending on course selection) to satisfy the Prerequisite.
- 4 courses (12-14 credit hours, depending on course selection) to satisfy the Core Requirements.
- 1 course (3-4 credit hours, depending on course selection) to satisfy the Elective Requirement.

The courses listed below satisfy the requirements for this minor. In certain instances, courses not on this official list may be substituted upon approval of the minor's academic advisor or, where applicable, the Program Director. (Course substitutions must be formally applied and entered into Degree Works by the minor's [Official Certifier \(https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/\)](https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/)). Students and their academic advisors should identify and clearly document the courses to be taken.
