The minor in Data Science is an interdisciplinary undergraduate program administered by the George R. Brown School of Engineering. The Data Science minor curriculum emphasizes doing data science and aims to teach students best practices in the field. Students learn technical competencies by taking core courses in statistics, computer science, and machine learning. This knowledge base is complemented with courses that inform the student of the broader impact of the information age on human activity, including discussions on data privacy, ethics, reproducibility, communication, decision-making, and data visualization. This program culminates with a capstone experience whereby students work in teams to complete a semester-long data science project selected from a variety of disciplines and industries. The curriculum is summarized in terms of four foundational competencies: quantitative, communications, ethics, and substantive application.
