

MASTER OF ENERGY TRANSITION AND SUSTAINABILITY (METS) DEGREE

Program Learning Outcomes for the METS Degree

Upon completing the METS degree, students will be able to:

1. Explain the interconnections among Earth, Energy, and Environmental Systems and impacts on society.
2. Evaluate controls on global and regional energy supply and demand and the flow of energy and money across the energy value chain.
3. Identify and select technical (engineering) solutions to energy problems
4. Develop and apply technical, quantitative, and practical skills for the production, storage, deployment, and use of energy resources in sustainable ways.
5. Conduct integrated, interdisciplinary team-based research on energy systems, and communicate this understanding to the general public.

Requirements for the METS Degree

The METS degree is a non-thesis master's degree. For general university requirements, please see [Non-Thesis Master's Degrees \(https://ga.rice.edu/graduate-students/academic-policies-procedures/regulations-procedures-non-thesis-masters-degrees/\)](https://ga.rice.edu/graduate-students/academic-policies-procedures/regulations-procedures-non-thesis-masters-degrees/). For additional requirements, regulations, and procedures for all graduate programs, please see [All Graduate Students \(https://ga.rice.edu/graduate-students/academic-policies-procedures/regulations-procedures-all-degrees/\)](https://ga.rice.edu/graduate-students/academic-policies-procedures/regulations-procedures-all-degrees/). Students pursuing the METS degree must complete:

- A minimum of 11 courses (minimum of 31 credit hours) to satisfy degree requirements.
- A minimum of 31 credit hours of graduate-level study (graduate semester credit hours, coursework at the 500-level or above).
- A minimum of 24 graduate semester credit hours must be taken at Rice University.
- A minimum of 24 graduate semester credit hours must be taken in standard or traditional courses (with a course type of lecture, seminar, laboratory, lecture/laboratory).
- A minimum residency enrollment of one fall or spring semester of part-time graduate study at Rice University.
- A maximum of 2 courses (6 graduate semester credit hours) from transfer credit. For additional departmental guidelines regarding transfer credit, see the [Policies](#) (p. 2) tab.
- The requirements for one area of specialization (see below for areas of specialization). The METS degree program offers two areas of specialization:
 - [Engineering](#) (p. 1), *or*
 - [Geosciences](#) (p. 2).
- A minimum overall GPA of 2.67 or higher in all Rice coursework.
- A minimum program GPA of 2.67 or higher in all Rice coursework that satisfies requirements for the non-thesis master's degree.

Note: Some of the listed courses are not offered every year, and some may also have prerequisites or require instructor permission.

The courses listed below satisfy the requirements for this degree program. In certain instances, courses not on this official list may be substituted upon approval of the program's academic advisor or, where applicable, the department or program's Director of Graduate Studies. Course substitutions must be formally applied and entered into Degree Works by the department or program's [Official Certifier \(https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/\)](https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/). Additionally, these course substitutions must be approved by the Office of Graduate and Postdoctoral Studies. Students and their academic advisors should identify and clearly document the courses to be taken.

Summary

Code	Title	Credit Hours
Total Credit Hours Required for the METS Degree		31

Degree Requirements

Code	Title	Credit Hours
Core Requirements		
BIOS 580	SUSTAINABLE DEVELOPMENT AND REPORTING	3
CHBE 549 / EEPS 549	(ECONOMICS AND POLICIES OF THE ENERGY TRANSITION)	3
CHBE 552	TRANSITIONING TO LOW CARBON ENERGIES: ENGINEERING FUNDAMENTALS	3
CHBE 680 / EEPS 680	ENERGY TRANSITION SEMINAR	1
EEPS 582	GEOSCIENCES FOR THE ENERGY TRANSITION	3

Area of Specialization

<i>Select 1 of the following Areas of Specialization:</i>	15
Engineering	
Geosciences	

Capstone Requirement

CEVE 507	ENERGY AND THE ENVIRONMENT	3
Total Credit Hours		31

Areas of Specialization

Students must complete a minimum of 5 courses (minimum of 15 credit hours) to satisfy the requirements for one area of specialization.

Area of Specialization: Engineering

Students must complete a minimum of 5 courses (minimum of 15 credit hours) to satisfy the requirements for the METS degree program's Engineering area of specialization.

Code	Title	Credit Hours
<i>Select a minimum of 5 courses (minimum of 15 credit hours) from the following:</i>		
CHBE 506	TECHNOECONOMIC ANALYSIS AND ENGINEERING DECISION TOOLS	

CHBE 510	FUNDAMENTALS AND APPLICATIONS IN ELECTROCHEMICAL ENERGY CONVERSION
CHBE 515	SEPARATION TECHNOLOGIES FOR CHEMICAL AND BIOMOLECULAR PROCESSES
CHBE 517	MATERIALS IN ENERGY AND SUSTAINABILITY
CHBE 521	ANALYSIS OF ENERGY SYSTEMS
CHBE 568	INDUSTRIAL CHEMICAL PROCESSES AND THE ENERGY TRANSITION
EEPS 585	COMPUTATIONAL AND DATA SCIENCE IN THE ENERGY INDUSTRY

Total Credit Hours 15

Area of Specialization: Geosciences

Students must complete a minimum of 5 courses (minimum of 15 credit hours) to satisfy the requirements for the METS degree program's Geosciences area of specialization.

Code	Title	Credit Hours
<i>Select a minimum of 5 courses (minimum of 15 credit hours) from the following:</i>		15

EEPS 579	APPLIED SUBSURFACE SYSTEMS: ANALYTICAL METHODS FOR ENERGY AND SUSTAINABILITY
EEPS 585	COMPUTATIONAL AND DATA SCIENCE IN THE ENERGY INDUSTRY
EEPS 586	DATA SCIENCE METHODS AND DATA MANAGEMENT
EEPS 593	INTRODUCTION TO GEOTHERMAL ENERGY SYSTEMS
EEPS 637	EARTH'S NATURAL RESOURCES FOR THE ENERGY TRANSITION
EEPS 638	THE SCIENCE OF NATURE-BASED CARBON SEQUESTRATION
EEPS 648	EXPLORATION GEOPHYSICS

Total Credit Hours 15

Policies for the METS Degree

Professional Science Master's Graduate Program Handbook

The General Announcements (GA) is the official Rice curriculum. As an additional resource for students, the Professional Science Master's Program publishes a graduate program handbook, which can be found here: https://gradhandbooks.rice.edu/2024_25/Natural_Sciences_Professional_Masters_Graduate_Handbook.pdf.

Admission

Admission to graduate study in Energy Transition and Sustainability is open to qualified students holding a bachelor's degree in a related science or engineering program that included coursework in general chemistry, physics, and advanced math. Scores from the general Graduate Record Examination (GRE) must be submitted. Highly qualified candidates will demonstrate good critical thinking and communication skills, and strong quantitative abilities. Department faculty evaluate the

previous academic record and credentials of each applicant individually and make admission decisions.

Transfer Credit

For Rice University's policy regarding transfer credit, see [Transfer Credit \(https://ga.rice.edu/graduate-students/academic-policies-procedures/regulations-procedures-all-degrees/#transfer\)](https://ga.rice.edu/graduate-students/academic-policies-procedures/regulations-procedures-all-degrees/#transfer). Some departments and programs have additional restrictions on transfer credit. Requests for transfer credit must be approved for Rice equivalency by the appropriate academic department offering the Rice equivalent course (corresponding to the subject code of the course content) and by the Office of Graduate and Postdoctoral Studies (GPS). Students are encouraged to meet with their academic program's advisor when considering transfer credit possibilities.

Program Transfer Credit Guidelines

Students pursuing the METS degree should be aware of the following program-specific transfer credit guideline:

- No more than 2 courses (6 credit hours) of transfer credit from U.S. or international universities of similar standing as Rice may apply towards the degree.

Additional Information

For additional information, please see the Energy Transition and Sustainability website: <https://mets.rice.edu/>.

Opportunities for the METS Degree

Fifth-Year Master's Degree Option for Rice Undergraduate Students

In certain situations and with some terminal master's degree programs, Rice students have an option to pursue a master's degree by adding an additional fifth year to their four years of undergraduate studies.

Advanced Rice undergraduate students in good academic standing typically apply to the master's degree program during their junior or senior year. Upon acceptance, depending on course load, financial aid status, and other variables, they may then start taking some required courses of the master's degree program. A plan of study will need to be approved by the student's undergraduate major advisor and the master's degree program director.

As part of this option and opportunity, Rice undergraduate students:

- must complete the requirements for a bachelor's degree and the master's degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
- should be aware there could be financial aid implications if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
- more information on this *Undergraduate - Graduate Concurrent Enrollment* opportunity, including specific information on the registration process can be found [here \(https://ga.rice.edu/undergraduate-students/academic-opportunities/undergraduate-graduate-concurrent-enrollment/\)](https://ga.rice.edu/undergraduate-students/academic-opportunities/undergraduate-graduate-concurrent-enrollment/).

Rice undergraduate students completing studies in science and engineering may have the option to pursue the Master of Energy Transition and Sustainability (METS) degree. For additional information,

students should contact their undergraduate major advisor and one of the Directors of Graduate Studies of the METS degree program.

Additional Information

For additional information, please see the Energy Transition and Sustainability website: <https://mets.rice.edu/>.
