The Master of Industrial Engineering degree is a graduate degree program administered by the George R. Brown School of Engineering, with the participation of the Rice University Departments of Mechanical Engineering and Statistics, and the Rice Center for Operations Research.

The program is designed to explore modern industrial systems, which arise in fields such as manufacturing, services, supply chain management, energy, transportation and healthcare. Analyzing and optimizing their performance is very challenging; for example, the number of ways that Federal Express can route its vehicles vastly exceeds the number of atoms in the universe. These analyses are crucial, their financial impact typically exceeds the profit margins in many industries, such as transportation and retailing.

To meet these challenges, the Master of Industrial Engineering degree emphasizes improving the quality and reliability of complex systems. It provides students with a deep set of analytical and engineering skills to make data-driven decisions needed in every major economic sector. Graduates will help industry, governments, and non-profits improve efficiency in changing and uncertain environments.

Industrial Engineering does not currently offer an academic program at the undergraduate level.

**Master's Program**
- Master of Industrial Engineering (MIE) Degree ([link to program](https://ga.rice.edu/programs-study/departments-programs/engineering/industrial-engineering/industrial-engineering-mie/#outcomestext))

**Coordinated Program**
- Master of Industrial Engineering (MIE) Degree / Master of Business Administration (MBA) Degree ([link to program](https://ga.rice.edu/programs-study/departments-programs/engineering/industrial-engineering/business-administration-mba-industrial-engineering-mie/#outcomestext))

**Directors**
- Andrew J. Schaefer
- Eylem Tekin

**Professors**
- Michael D. Byrne, Psychological Sciences
- Patricia DeLucia, Psychological Sciences
- Fathi Ghorbel, Mechanical Engineering
- Illya V. Hicks, Computational & Applied Mathematics
- C. Fred Higgs III, Mechanical Engineering
- Marcia K. O’Malley, Mechanical Engineering
- Amit Pazgal, Business
- Eduardo Salas, Psychological Sciences
- Andrew J. Schaefer, Computational & Applied Mathematics
- Laura Schaefer, Mechanical Engineering
- Pol D. Spanos, Mechanical Engineering
- Richard A. Tapia, Computational & Applied Mathematics
- Yin Zhang, Computational & Applied Mathematics

**Associate Professors**
- Leonardo Dueñas-Osorio, Civil and Environmental Engineering
- Philip A. Ernst, Statistics
- Philip T. Kortum, Psychological Sciences

**Assistant Professors**
- Matthew Brake, Mechanical Engineering
- Pedram Hassanzadeh, Mechanical Engineering
- Joseph Huchette, Computational and Applied Mathematics
- Santiago Segarra, Electrical and Computer Engineering

**Assistant Teaching Professor**
- Eleazar Marquez, Mechanical Engineering

**Professor in the Practice**
- John Dobelman, Statistics

**Lecturer**
- Eylem Tekin, Industrial Engineering

For Rice University degree-granting programs:
- To view the list of official course offerings, please see Rice’s [Course Catalog](https://courses.rice.edu/admweb/!SWKSCAT.cat?p_action=cata)
- To view the most recent semester’s course schedule, please see Rice’s [Course Schedule](https://courses.rice.edu/admweb/!SWKSCAT.cat)

**Industrial Engineering (INDE)**

**INDE 501 - FUNDAMENTALS OF INDUSTRIAL ENGINEERING**
- **Short Title:** FUND INDUSTRIAL ENGINEERING
- **Department:** Industrial Engineering
- **Grade Mode:** Standard Letter
- **Course Type:** Lecture
- **Credit Hours:** 3
- **Restrictions:** Enrollment is limited to Graduate level students.
- **Description:** Introduction to fundamental tools in industrial engineering. Topics include productivity analysis, material handling, logistics, design of experiments, quality control, location theory, warehouse design, supply chain management and scheduling. Instructor Permission Required.
INDE 509 - INTRODUCTION TO HUMAN FACTORS ENGINEERING  
**Short Title:** INTRO TO HUMAN FACTORS ENG  
**Department:** Industrial Engineering  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** INDE 501  
**Description:** Analysis and design of engineering systems considering human characteristics and limitations. Design of control, displays, tools, workstations and groups. Human factors research methods. Instructor Permission Required.  

INDE 511 - GRAPH ALGORITHMS  
**Short Title:** GRAPH ALGORITHMS  
**Department:** Industrial Engineering  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** Graph Algorithms in Operations Research. Topics include: spanning trees, graph search algorithms, shortest path problems, worst case time complexity analysis, computational complexity, dominating set problems, vertex and edge cover problems, python implementations, and other problems in graph optimization. Instructor Permission Required.  
Recommended Prerequisite(s): INDE 545 or CAAM 378  

INDE 543 - MANUFACTURING PROCESSES AND SYSTEMS  
**Short Title:** MANUFACTURING PROC AND SYS  
**Department:** Industrial Engineering  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** INDE 501  
**Description:** Fundamentals of manufacturing processes and systems. Topics include machining, casting, 2D printing, material flow, capacities, bottlenecks, and just-in-time systems. Simulation and optimization of various manufacturing systems. Trade-offs among various processes. Instructor Permission Required.  

INDE 545 - PRESCRIPTIVE ANALYTICS  
**Short Title:** PRESCRIPTIVE ANALYTICS  
**Department:** Industrial Engineering  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** A survey of methods for combining mathematical models and large data sets to produce optimal decisions. Topics include decision analysis, dynamic programs, mathematical programs and various heuristics. Instructor Permission Required.  

INDE 546 - COMPUTATIONAL PRESCRIPTIVE ANALYTICS  
**Short Title:** COMP PRESCRIPTIVE ANALYTICS  
**Department:** Industrial Engineering  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** INDE 545  
**Description:** A continuation of INDE 545 that focuses on computational approaches to prescriptive analytics. Topics include decomposition approaches to large-scale optimization, modeling languages, decision analysis and discrete-event simulation software. Emphasis will be placed on using relevant software on practical problems. Instructor Permission Required.  

INDE 561 - SUPPLY CHAIN MANAGEMENT  
**Short Title:** SUPPLY CHAIN MANAGEMENT  
**Department:** Industrial Engineering  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Prerequisite(s):** INDE 545  
**Description:** Supply chain management is the integrated management of the flow of materials, products, services, and cash from the suppliers all the way to the customers and from the customers back to the suppliers. Due to the complex nature of today's supply chains, effective management of these flows is a challenging task. This course aims to familiarize students with the concepts and models that are useful in designing and managing effective and efficient supply chains. Topics include facility location and distribution models, forecasting, sales & operations planning, supply chain coordination, inventory management, transportation, supplier selection, pricing & revenue management, and sustainability in supply chains. Instructor Permission Required.  

INDE 562 - INTRODUCTION TO CONTINUOUS OPTIMIZATION  
**Short Title:** INTRO TO CONTINUOUS OPT  
**Department:** Industrial Engineering  
**Grade Mode:** Standard Letter  
**Course Type:** Lecture  
**Credit Hours:** 3  
**Restrictions:** Enrollment is limited to Graduate level students.  
**Course Level:** Graduate  
**Description:** An introduction to the formulation of unconstrained and constrained optimization models, and their numerical implementations to problems in science and engineering. Emphasis on Newton-type and interior-point methodologies. Instructor Permission Required.  
Recommended Prerequisite(s): INDE 545 or CAAM 378
INDE 567 - OPTIMIZATION METHODS IN FINANCE  
Short Title: OPT METHODS IN FINANCE  
Department: Industrial Engineering  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): MATH 212 and CAAM 210  
Description: Fundamentals of financial optimization. Asset-liability management, arbitrage and asset pricing, mean-variance models, portfolio optimization. This course covers models and algorithms for solving linear, quadratic, integer, and stochastic optimization models encountered in financial and data science applications. Department Permission Required. Recommended Prerequisite(s): INDE 545

INDE 571 - PROBABILITY AND STATISTICAL INFERENCE  
Short Title: PROB & STATISTICAL INFERENCE  
Department: Industrial Engineering  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Topics include probability, random variables, probability distributions, transformations, moment generating functions, common families of distributions, independence, sampling and convergence, basics of estimation theory, hypothesis testing, Bayesian inference, ANOVA, regression. Introduction to statistical software. Department Permission Required.

INDE 572 - STOCHASTIC PROCESSES AND SIMULATION  
Short Title: STOCH PROCESSES & SIMULATION  
Department: Industrial Engineering  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): INDE 571  
Description: Topics include Markov chains, renewal processes, queuing theory, statistical quality control, discrete-event simulation, random number generators, Monte Carlo methods, resampling methods, Markov Chain Monte Carlo, importance sampling and simulation based estimation for stochastic processes.

INDE 573 - DISCRETE-EVENT SIMULATION  
Short Title: DISCRETE-EVENT SIMULATION  
Department: Industrial Engineering  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): (STAT 518 and STAT 519) or INDE 571  
Description: Simulation of discrete-event dynamic systems. Topics include introduction to simulation models; modeling with Simio, a comprehensive simulation package with animation capabilities; statistical aspects such as input and output analysis, random variate generation, variance reduction techniques; optimization via simulation. Department Permission Required.

INDE 577 - DATA SCIENCE AND MACHINE LEARNING  
Short Title: DATA SCI & MACHINE LEARNING  
Department: Industrial Engineering  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Fundamentals of data science and machine learning. Topics include: introduction to scikit-learn, Keras and tensorflow2, linear and logistic regression, clustering, support vector machines, random forest trees, neural networks, deep learning, natural language processing. Instructor Permission Required. Recommended Prerequisite(s): Three semesters of calculus recommended. A background in some programming language would be extremely useful.

INDE 590 - MASTER’S IN INDUSTRIAL ENGINEERING CAPSTONE EXPERIENCE  
Short Title: MIE CAPSTONE EXPERIENCE  
Department: Industrial Engineering  
Grade Mode: Research  
Credit Hour: 1  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: MIE students are required to write a field report related to one of the required core courses in the curriculum. Students should coordinate this with the INDE 590 instructor/capstone director, prepare a report relevant to the course material, and present it in class. Instructor Permission Required. Recommended Prerequisite(s): INDE 501 and INDE 545 and INDE 571.

INDE 597 - TOPICS IN INDUSTRIAL ENGINEERING  
Short Title: TOPICS IN INDUSTRIAL ENG  
Department: Industrial Engineering  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Topics and credit hours may vary each semester. Spring 2020: This course introduces the theory and practice of revenue management and dynamic pricing, with a focus on application areas such as the airline industry and online advertisements. Topics include state-of-the-art revenue optimization algorithms (single-leg revenue management (RM), network RM, booking limits, bid price control, overbooking), auctions, market analytics, offer optimization, and forecasting and estimation from data. Instructor Permission Required. Repeatable for Credit.

INDE 677 - SPECIAL TOPICS  
Short Title: SPECIAL TOPICS  
Department: Industrial Engineering  
Grade Mode: Standard Letter  
Course Type: Seminar, Lecture, Laboratory, Internship/Practicum  
Credit Hours: 1-4  
Restrictions: Enrollment is limited to Graduate or Visiting Graduate level students.  
Course Level: Graduate  
Description: Topics and credit hours vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.
