The Applied Physics Graduate Program (APP) includes faculty from the departments of electrical and computer engineering, physics and astronomy, bioengineering, chemistry, chemical and biomolecular engineering, materials science and nanoengineering, and statistics.

A joint effort of both the Wiess School of Natural Sciences and the George R. Brown School of Engineering at Rice where the application of physics principles is beneficial, and overseen by the Smalley-Curl Institute (SCI), the Applied Physics Graduate Program is administered by a committee composed of members from the participating departments mentioned above. The objective is to provide an interdisciplinary graduate education in the basic science that underlies important technology. The faculty believes that the experience obtained by performing research at the intellectually stimulating interface of physical science and engineering is particularly effective in producing graduates who succeed in careers based on new and emerging technologies.

Due to the interdisciplinary nature of the program, students can involve virtually any of the research facilities in either the natural sciences or engineering schools of Rice University. Prospective students are urged to contact the Program Chair or SCI for detailed descriptions of research facilities and ongoing research projects.

Applied Physics does not currently offer an academic program at the undergraduate level.

Master's Program

- Master of Science (MS) Degree in the field of Applied Physics*

Doctoral Program

- Doctor of Philosophy (PhD) Degree in the field of Applied Physics (ga.rice.edu/programs-study/departments-programs/interdisciplinary/applied-physics/applied-physics-phd)

* Although students are not directly admitted to a Master of Science (MS) degree program, graduate students must earn the MS in lieu of a qualifying exam as they work toward the PhD.
