

BACHELOR OF ARTS (BA) DEGREE WITH A MAJOR IN BIOSCIENCES AND A MAJOR CONCENTRATION IN BIOCHEMISTRY

Program Learning Outcomes for the BA Degree with a Major in Biosciences and a Major Concentration in Biochemistry

Upon completing the BA degree with a major in Biosciences and a major concentration in Biochemistry, students will be able to:

1. Demonstrate a broad knowledge of core concepts in biology.
2. Demonstrate an advanced understanding of biochemistry.
3. Demonstrate the ability to access scientific literature in the biological sciences and to use critical thinking skills to evaluate primary and secondary sources of biological research.
4. Demonstrate the ability to apply the process of science, including designing experiments and/or building mathematical models, and collecting, analyzing, and interpreting data.
5. Demonstrate effective oral, written, and visual communication skills, including communicating science to diverse audiences.

Requirements for the BA Degree with a Major in Biosciences and a Major Concentration in Biochemistry

For general university requirements, see [Graduation Requirements \(https://ga.rice.edu/undergraduate-students/academic-policies-procedures/graduation-requirements/\)](https://ga.rice.edu/undergraduate-students/academic-policies-procedures/graduation-requirements/). Students pursuing the BA degree with a major in Biosciences and a major concentration in Biochemistry must complete:

- A minimum of 62 credit hours to satisfy major requirements.
- A minimum of 120 credit hours to satisfy degree requirements.
- A minimum of 22 credit hours taken at the 300-level or above.
- Core courses common to all major concentrations.
- The requirements for the major concentration in Biochemistry. When students **declare the major** (<https://ga.rice.edu/undergraduate-students/academic-opportunities/majors-minors-certificates/#text>) in Biosciences, students must additionally identify and declare one of the four major concentrations, either in:
 - [Biochemistry](#) (p. 1), **or**
 - [Cell Biology and Genetics \(https://ga.rice.edu/programs-study/departments-programs/natural-sciences/biosciences/cell-biology-and-genetics-ba/#requirementstext\)](https://ga.rice.edu/programs-study/departments-programs/natural-sciences/biosciences/cell-biology-and-genetics-ba/#requirementstext), **or**
 - [Ecology and Evolutionary Biology \(https://ga.rice.edu/programs-study/departments-programs/natural-sciences/biosciences/ecology-and-evolutionary-biology-ba/#requirementstext\)](https://ga.rice.edu/programs-study/departments-programs/natural-sciences/biosciences/ecology-and-evolutionary-biology-ba/#requirementstext), **or**

- [Integrative Biology \(https://ga.rice.edu/programs-study/departments-programs/natural-sciences/biosciences/integrative-biology-ba/#requirementstext\)](https://ga.rice.edu/programs-study/departments-programs/natural-sciences/biosciences/integrative-biology-ba/#requirementstext).

Because of the common core requirements, it is possible for students to change their major concentration at any time, even after initially declaring the major. To do so, please contact the [Office of the Registrar \(registrar@rice.edu\)](mailto:registrar@rice.edu).

The BA degree emphasizes broad foundational knowledge of biology with in depth exposure to the subfield of biochemistry. Biosciences majors are strongly encouraged to pursue their research interests through independent research experiences. The BA degree program offers greater flexibility than the BS due to fewer required independent research courses as detailed below.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major's academic advisor or, where applicable, the department's Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major's [Official Certifier \(https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/\)](https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

Footnotes and Additional Information

* **Note:** [University Graduation Requirements](#) include 31 credit hours, comprised of Distribution Requirements (Groups I, II, and III), FWIS, and LPAP coursework. In some instances, courses satisfying FWIS or distribution requirements may additionally meet other requirements, such as the Analyzing Diversity (AD) requirement, or some of the student's declared major, minor, or certificate requirements. [Additional Credit Hours to Complete Degree Requirements](#) include general electives, coursework completed as upper-level, residency (hours taken at Rice), and/or any other additional academic program requirements.

¹ PHYS 101 **and** PHYS 103 **or** PHYS 111 may be substituted for PHYS 125. The BioSciences department has determined that credit awarded for PHYS 141 *CONCEPTS IN PHYSICS I* is not eligible for meeting the requirements of the Biosciences major.

² In certain instances, and with appropriate approvals, the lower-level courses STAT 280 or STAT 180 may be substituted for STAT 305 (or STAT 315/DSCI 301).

³ Students must select 1 elective course (3 credit hours) from courses offered by the *Wiess School of Natural Sciences* or the *George R. Brown School of Engineering and Computing* at the 200-level or above, designated as a lecture course. Courses offered by the *Wiess School of Natural Sciences* or the *George R. Brown School of Engineering and Computing* include the following subject codes: ASTR, BIOE, BIOS, CEVE, CHBE, CHEM, CMOR, COMP, DSCI, EDES, EEPS, ELEC, ENGI, GLHT, HEAL, KINE, MATH, MECH, MSNE, NEUR, NSCI, PHYS, RCEL, and STAT.

⁴ PHYS 102 **and** PHYS 104 **or** PHYS 112 may be substituted for PHYS 126. The BioSciences department has determined that credit awarded for PHYS 142 *CONCEPTS IN PHYSICS II* is not eligible for meeting the requirements of the Biosciences major.

⁵ BIOS 310 must be taken for at least 3 credit hours to fulfill an Elective Laboratory Requirement. BIOS 310 can only fulfill Elective Laboratory Requirements once for the BA.

⁶ The Capstone Requirement is **in addition** to the other lecture course requirements. The same course may not be used to satisfy more than one requirement for this major and/or major concentration.

Policies for the BA Degree with a Major in Biosciences and a Major Concentration in Biochemistry

Advising

Rice University policies are governed primarily by the General Announcements; students are encouraged to look there first for academic policies. Advising information specific to the Department of BioSciences can be found by clicking on the *Undergraduate Program* tab on the [department website](https://biosciences.rice.edu/) (<https://biosciences.rice.edu/>).

Program Restrictions and Exclusions

Students pursuing the BA Degree with a Major in Biosciences and a Major Concentration in Biochemistry should be aware of the following program restrictions:

- As noted in [Majors, Minors, and Certificates](https://ga.rice.edu/undergraduate-students/academic-opportunities/majors-minors-certificates/) (<https://ga.rice.edu/undergraduate-students/academic-opportunities/majors-minors-certificates/>), under *Declaring Majors, Minors and Certificates*, students may not obtain both a BA and a BS in the same major. Students pursuing the BA Degree with a Major in Biosciences and a Major

Concentration in Biochemistry may not additionally pursue the BS Degree with a Major in Biosciences.

- Students pursuing the major in Biosciences may pursue only one major concentration within the major.
- Students pursuing the major in Biosciences and a major concentration in Biochemistry may not additionally declare the minor in Biochemistry and Cell Biology.

Transfer Credit

For Rice University's policy regarding transfer credit, see [Transfer Credit](#) (<https://ga.rice.edu/undergraduate-students/academic-policies-procedures/transfer-credit/>). Some departments and programs have additional restrictions on transfer credit. Requests for transfer credit must be approved for Rice equivalency by the designated transfer credit advisor for the appropriate academic department offering the Rice equivalent course (corresponding to the subject code of the course content). The Office of Academic Advising maintains the university's official list of [transfer credit advisors](#) (<https://oaa.rice.edu/advising-network/transfer-credit-advisors/>) on their website: <https://oaa.rice.edu>. Students are encouraged to meet with the applicable transfer credit advisor as well as their academic program director when considering transfer credit possibilities.

Opportunities for the BA Degree with a Major in Biosciences and a Major Concentration in Biochemistry

Academic Honors

The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see [Latin Honors](#) (<https://ga.rice.edu/undergraduate-students/honors-distinctions/university/>) (*summa cum laude*, *magna cum laude*, and *cum laude*) and [Distinction in Research and Creative Work](#) (<https://ga.rice.edu/undergraduate-students/honors-distinctions/university/>). Some departments have department-specific Honors awards or designations.

Departmental Honors

Instructions on applying for the [Distinction in Research and Creative Work](#) (<https://ga.rice.edu/undergraduate-students/honors-distinctions/university/>) award from the Department of BioSciences can be found by clicking on the *Undergraduate Program* tab on the [department website](https://biosciences.rice.edu/) (<https://biosciences.rice.edu/>).

Research in the BioSciences

Research is highly encouraged for all biosciences majors, and there are many opportunities for independent research at Rice. Information about research for credit and research internships specific to the Department of BioSciences can be found by clicking on the *Research* tab on the [department website](https://biosciences.rice.edu/) (<https://biosciences.rice.edu/>).
