BACHelor OF ARTS (BA) DEGREE WITH a mAJOR IN ECOLOGY AND EVOLUTIONARY BIOLOGY

Program Learning Outcomes for the BA Degree with a Major in Ecology and Evolutionary Biology

Upon completing the BA degree with a major in Ecology and Evolutionary Biology, students will be able to:

1. Locate primary scientific literature and demonstrate the ability to apply critical thinking and problem solving skills to evaluate published and proposed research in the biological sciences.
2. Demonstrate an understanding of the modern scientific method, including a familiarity with current methods for designing experiments and/or mathematical models, and the ability to analyze and interpret data.
3. Demonstrate effective oral and written communication skills, including an ability to communicate effectively and work with diverse groups.
4. Demonstrate familiarity with the diversity of life.
5. Demonstrate a comprehensive knowledge of biology and an in-depth understanding of ecology and evolutionary biology.
6. Demonstrate understanding of the practice and culture of science, scientific ethics, and the relationship between science and society.

Requirements for the BA Degree with a Major in Ecology and Evolutionary Biology

For general university requirements, see Graduation Requirements (ga.rice.edu/undergraduate-students/academic-policies-procedures/graduation-requirements). Students pursuing the BA degree with a major in Ecology and Evolutionary Biology must complete:

- A minimum of 20 courses (49 credit hours) to satisfy major requirements. Additional credit hours may be required depending on course selection.
- A minimum of 120 credit hours to satisfy degree requirements.
- A minimum of 60 credit hours outside of major requirements.
- A minimum of 11 courses (33 credit hours) at the 300-level or above.

The Ecology and Evolutionary Biology major is intended for students pursuing a wide range of careers in the life sciences. Coursework emphasizes a broad understanding of basic biology, together with in-depth knowledge of ecology and evolutionary biology that culminates in a required 400-level capstone course incorporating primary scientific literature, presentations, and writing in an advanced topic. The BA program is well suited for students with an additional major outside of the sciences, and students are strongly encouraged to take advantage of study abroad opportunities.

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major's academic advisor, or where applicable, the department's Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major's Official Certifier [https://registrar.rice.edu/facstaff/degreeworks/officialcertifier].) Students and their academic advisors should identify and clearly document the courses to be taken.
