The Department of Chemistry offers undergraduate chemistry majors leading to both the bachelor of science (BS) degree and the bachelor of arts (BA) degree. The BS program rigorously prepares students for advanced work in chemistry or a related discipline, and the degree requirements are consistent with the guidelines for certification by the American Chemical Society. This curriculum provides a broad and comprehensive introduction to core areas of chemistry while promoting depth of understanding in one or more specific fields. BS students complete a series of foundation courses in general chemistry, analytical chemistry, biological chemistry, inorganic chemistry, organic chemistry, and physical chemistry. Students then complete one or more specializations, or “tracks,” consisting of in-depth courses both in and out of the specialization. The BA degree is a more flexible program that provides a comprehensive overview of all areas of chemistry, including laboratory experiences, but can be coupled more easily with other majors or professional career paths. Both degree programs offer students a solid background in the fundamental principles of chemistry, the properties and reactions of chemical compounds, and their uses.

Graduate studies emphasize individual research together with a fundamental understanding of chemistry beyond the students’ specific interests. Faculty research interests include the synthesis and biosynthesis of organic natural products; supramolecular chemistry, molecular recognition and biological catalysis; bioinorganic and organometallic chemistry; main group element and transition metal chemistry; the design of nanophase solids; molecular photochemistry and photophysics; infrared kinetic spectroscopy, laser, and NMR spectroscopy; studies of electron transfer in crossed beams; theoretical and computational chemistry; the study of fullerene molecules, carbon nanotubes, and their derivatives; polymer synthesis and characterization; molecular electronics; molecular machines; and chemical-based nanotechnology.

Chemistry (CHEM)

CHEM 101 - INTRODUCTION TO SCIENTIFIC RESEARCH
Short Title: INTRO SCIENTIFIC RESEARCH
Department: Chemistry
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Research
Credit Hours: 5
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course is for high school students of the classes 2019 and 2020. As visiting students, the students will conduct scientific research in the laboratories of Rice faculty in the areas of Nanotechnology, Chemistry, Materials, and Engineering. Two applications need to be submitted for enrollment into this course. First, the Research Experience in Chemistry application (see course URL for link to application below) should be emailed, along with all required documents as indicated in the application, to CHEM101@rice.edu. Upon confirmation of acceptance from the Chemistry department, students must then complete the visiting student application process for high school students. Instructions to do this can be found in the Application Checklist at summer.rice.edu. Instructor Permission Required. Repeatable for Credit.

CHEM 110 - FRESHMAN CHEMISTRY SEMINAR
Short Title: FRESHMAN CHEMISTRY SEMINAR
Department: Chemistry
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This half-semester course introduces freshmen to chemical research at Rice and in Houston. The course is offered both semesters, and although some of the same material is covered in both semesters, the fall course emphasizes material for students interested in the PhD track towards academic and industrial chemistry careers, while the spring semester places greater emphasis on research in the Texas Medical Center (TMC) for students who plan to pursue the health professions. Additional tours and activities TBA. All first-year non-transfer students are eligible to enroll in CHEM 110 regardless of AP credit.
CHEM 111 - AP/OTH CREDIT IN GENERAL CHEMISTRY I
Short Title: AP/OTH CREDIT IN GEN CHEM I
Department: Chemistry
Grade Mode: Transfer Courses
Course Type: Transfer
Credit Hours: 3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Provides transfer credit based on student performance on approved examinations in chemistry, such as the Chemistry Advanced Placement exam or the International Baccalaureate higher-level chemistry exams. This credit counts toward the total credit hours required for graduation, and satisfies major requirements in lieu of CHEM 121, but does not count for distribution.

CHEM 112 - AP/OTH CREDIT IN GENERAL CHEMISTRY II
Short Title: AP/OTH CREDIT IN GEN CHEM II
Department: Chemistry
Grade Mode: Transfer Courses
Course Type: Transfer
Credit Hours: 3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Provides transfer credit based on student performance on approved examinations in chemistry, such as the Chemistry Advanced Placement exam or the International Baccalaureate higher-level chemistry exams. This credit counts toward the total credit hours required for graduation, and satisfies major requirements in lieu of CHEM 122, but does not count for distribution.

CHEM 113 - AP/OTH CREDIT IN GENERAL CHEMISTRY LAB I
Short Title: AP/OTH CREDIT-GEN CHEM LAB I
Department: Chemistry
Grade Mode: Transfer Courses
Course Type: Transfer
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Provides transfer credit based on student performance on approved examinations in chemistry, such as the Chemistry Advanced Placement exam or the International Baccalaureate higher-level chemistry exams. This credit counts toward the total credit hours required for graduation, and satisfies major requirements in lieu of CHEM 123, but does not count for distribution.

CHEM 114 - AP/OTH CREDIT IN GENERAL CHEMISTRY LAB II
Short Title: AP/OTH CREDIT-GEN CHEM LAB II
Department: Chemistry
Grade Mode: Transfer Courses
Course Type: Transfer
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Provides transfer credit based on student performance on approved examinations in chemistry, such as the Chemistry Advanced Placement exam or the International Baccalaureate higher-level chemistry exams. This credit counts toward the total credit hours required for graduation, and satisfies major requirements in lieu of CHEM 124, but does not count for distribution.

CHEM 121 - GENERAL CHEMISTRY I
Short Title: GENERAL CHEMISTRY I
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Introduction of chemical phenomena emphasizing problems and methods in Chemistry. Either CHEM 121 or CHEM 151 may be taken as a prerequisite for higher study in chemistry, but only one of these may be taken for credit. Students must also register for CHEM 123 General Chemistry Laboratory I. The course and the co-requisite lab are graded jointly.

CHEM 122 - GENERAL CHEMISTRY II
Short Title: GENERAL CHEMISTRY II
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Prerequisite(s): CHEM 111 or CHEM 121
Description: A continuation of CHEM 121. Either CHEM 122 or CHEM 152 may be taken as prerequisites for higher study in chemistry, but only one may be taken for credit. Students must also register for CHEM 124 General Chemistry Laboratory II. The course and the co-requisite lab are graded jointly.

CHEM 123 - GENERAL CHEMISTRY LABORATORY I
Short Title: GENERAL CHEMISTRY LAB I
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Required laboratory component of CHEM 121. Students must also register for CHEM 121. Credit may only be received for either CHEM 123 or CHEM 153 but not both. The course and the co-requisite lab are graded jointly. Distribution Credit for CHEM 123 no longer eligible beginning Fall 2019.
CHEM 124 - GENERAL CHEMISTRY LABORATORY II
Short Title: GENERAL CHEMISTRY LAB II
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hours: 1
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Prerequisite(s): CHEM 113 or CHEM 123 or CHEM 153
Description: Required laboratory component of CHEM 122. Students must also register for CHEM 122. Credit may not be received for both CHEM 124 and CHEM 154. The course and the co-requisite lab are graded jointly. Distribution Credit for CHEM 124 no longer eligible beginning Fall 2019.

CHEM 151 - HONORS CHEMISTRY I
Short Title: HONORS CHEMISTRY I
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Corequisite: CHEM 153
Description: An accelerated introduction to chemical phenomena emphasizing principles and theories in chemistry. Recommended strongly for students who plan to major in chemistry or have a strong high school background. Students with AP credit in Chemistry who intend to pursue advanced study in Chemistry are strongly encouraged to take CHEM 151 and CHEM 152. Students must also register for CHEM 153, which is laboratory that meets once per week. Either CHEM 121 or CHEM 151 may be taken as a prerequisite for higher study in chemistry, but only one of these may be taken for credit. The course and the co-requisite lab are graded jointly. Recommended prerequisite(s): high school chemistry and physics.

CHEM 152 - HONORS CHEMISTRY II
Short Title: HONORS CHEMISTRY II
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Corequisite: CHEM 154
Description: A continuation of CHEM 151. Students with AP credit in Chemistry who intend to pursue advanced study in Chemistry are strongly encouraged to take CHEM 151 and CHEM 152. Students must also register for CHEM 154 which is a laboratory that meets once per week. Either CHEM 122 or CHEM 152 may be taken as a prerequisite for higher study in chemistry, but only one of these may be taken for credit. The course and the co-requisite are graded jointly.

CHEM 153 - HONORS CHEMISTRY LABORATORY II
Short Title: HONORS CHEMISTRY LAB II
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Corequisite: CHEM 151
Description: Required laboratory component of CHEM 151. Students must also register for CHEM 151. The course and the co-requisite lab are graded jointly. Distribution Credit for CHEM 153 no longer eligible beginning Fall 2019.

CHEM 154 - HONORS CHEMISTRY LABORATORY II
Short Title: HONORS CHEMISTRY LAB II
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Prerequisite(s): CHEM 153 or CHEM 123 or CHEM 113
Corequisite: CHEM 152
Description: Required laboratory component of CHEM 152. Students must also register for CHEM 152. The course and the co-requisite lab are graded jointly. Distribution Credit for CHEM 154 no longer eligible beginning Fall 2019.

CHEM 157 - THE CHEMISTRY OF ART
Short Title: THE CHEMISTRY OF ART
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Seminar
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: The chemistry of the materials and methods used to create, conserve and authenticate art objects will be presented. Topics will include sculpture, painting, photography, textiles, jewelry, furniture, etc. Taught in conjunction with the Conservation Department and Staff of the MFAH. Some classes will be held at the MFAH or HMNS.

CHEM 176 - THE CHEMISTRY OF COOKING
Short Title: THE CHEMISTRY OF COOKING
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Distribution Group: Distribution Group III
Credit Hours: 3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: This course examines the chemistry involved in the composition, transformation, and consumption of food. Topics include chemical properties and reactions of food, cooking tools, and techniques, sensory perception, and nutrition. Lectures and hands-on kitchen experiments are taught in conjunction with Rice Dining Service. Knowledge of high school chemistry is expected.
CHEM 201 - ADVANCED TOPICS IN GENERAL CHEMISTRY  
Short Title: ADV TOPICS IN GEN CHEMISTRY  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.  
Course Level: Undergraduate Lower-Level  
Description: CHEM 201 is a one-semester lecture course intended for 1st-year undergraduates who have completed a high school AP Chem course (or equivalent) and wish to reinforce or deepen their understanding of challenging core topics. Focus areas include: quantum descriptions of atoms and molecules, chemical thermodynamics, and reaction kinetics and dynamics. Completion of AP Calculus or concurrent enrollment in Math 101 or 111 is expected.

CHEM 210 - WILD TOPICS IN CHEMISTRY AND NANOTECHNOLOGY  
Short Title: WILD TOPICS CHEM AND NANOTECH  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hour: 1  
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.  
Course Level: Undergraduate Lower-Level  
Description: A variety of topics related to chemistry and nanotechnology will be discussed. Some topics are classical while others are current. Topics may include nanocars, molecular electronics, how to form a start-up company. Grades will be based upon attendance and quizzes. Cross-list: CEVE 210, MSNE 210. Repeatable for Credit.

CHEM 211 - ORGANIC CHEMISTRY I  
Short Title: ORGANIC CHEMISTRY I  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.  
Course Level: Undergraduate Lower-Level  
Prerequisite(s): CHEM 112 or CHEM 122 or CHEM 152  
Corequisite: CHEM 213  
Description: Organic chemistry of aliphatic and aromatic compounds with emphasis on structure, functional groups, bonding, stereochemistry, and reaction mechanisms. CHEM 211 may be taken as a prerequisite for higher study in chemistry. CHEM 211 and CHEM 213 are co-requisites and must be taken together in the same semester.

CHEM 212 - ORGANIC CHEMISTRY II  
Short Title: ORGANIC CHEMISTRY II  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.  
Course Level: Undergraduate Lower-Level  
Prerequisite(s): CHEM 211  
Corequisite: CHEM 214  
Description: Continuation of CHEM 211 with an emphasis on aromatic compounds, reactivity and biologically relevant molecules. Either CHEM 212 or CHEM 320 may be taken as a prerequisite for higher study in chemistry, but only one of these may be taken for credit. CHEM 212 and CHEM 214 are co-requisites and must be taken together the same semester. Mutually Exclusive: Credit cannot be earned for CHEM 212 and CHEM 320.

CHEM 213 - ORGANIC CHEMISTRY DISCUSSION  
Short Title: ORGANIC CHEMISTRY DISCUSSION  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 0  
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.  
Course Level: Undergraduate Lower-Level  
Corequisite: CHEM 211  
Description: CHEM 211 and CHEM 213 are co-requisites and must be taken together in the same semester.

CHEM 214 - ORGANIC CHEM DISCUSSION II  
Short Title: ORGANIC CHEM DISCUSSION II  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Seminar  
Credit Hours: 0  
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.  
Course Level: Undergraduate Lower-Level  
Corequisite: CHEM 212  
Description: CHEM 212 and CHEM 214 are co-requisites and must be taken together in the same semester. Repeatable for Credit.

CHEM 215 - ORGANIC CHEMISTRY LAB  
Short Title: ORGANIC CHEMISTRY LAB  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Laboratory  
Credit Hours: 2  
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.  
Course Level: Undergraduate Lower-Level  
Prerequisite(s): CHEM 211  
Description: Synthesis, purification, and characterization of organic compounds. Experiments related to topics covered in CHEM 211, 212. Includes identification of unknown organic compounds. One lab per week.
CHEM 217 - ORGANIC LABORATORY FOR CHEMICAL ENGINEERS
Short Title: ORGANIC LAB CHEM ENGINEERS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Prerequisite(s): CHEM 211
Description: Organic laboratory designed for chemical engineering majors. Emphasis placed on the synthesis and the characterization of organic compounds. This laboratory does not satisfy requirements for science majors or premedical students. This course meets 7 times during the semester.

CHEM 220 - UNDERGRADUATE CHEMISTRY SEMINAR
Short Title: UNDERGRADUATE CHEMISTRY SEM
Department: Chemistry
Grade Mode: Satisfactory/Unsatisfactory
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: An introduction to modern chemical research through seminars and/or directed reading.

CHEM 238 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Internship/Practicum, Lecture, Seminar, Laboratory
Credit Hours: 1-4
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: Topics and credit hours vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.

CHEM 280 - UNDERGRADUATE TEACHING PRACTICUM
Short Title: UG TEACHING PRACTICUM
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 1-3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Lower-Level
Description: In this course, undergraduates who have previously excelled in CHEM courses will develop teaching skills while supporting faculty as teaching assistants (TAs) in a particular CHEM course for the benefit of the students taking that particular course. This course is open only to undergraduates with special permission of the course instructor and can be repeated for credit. Instructor Permission Required. Repeatable for Credit.

CHEM 301 - PHYSICAL CHEMISTRY I
Short Title: PHYSICAL CHEMISTRY I
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 112 and CHEM 122 or CHEM 152 and MATH 212 or MATH 222
Description: An introduction to fundamental principles in quantum chemistry, chemical bonding and molecular spectroscopy. Mutually Exclusive: Credit cannot be earned for CHEM 301 and CHEM 312.

CHEM 302 - PHYSICAL CHEMISTRY II
Short Title: PHYSICAL CHEMISTRY II
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 112 and CHEM 122 or CHEM 152 and MATH 212
Description: An introduction to the principles of thermodynamics, statistical thermodynamics, kinetic theory of gases, chemical kinetics and the statistical mechanics. Mutually Exclusive: Credit cannot be earned for CHEM 302 and CHEM 311.

CHEM 320 - ORGANIC CHEMISTRY II
Short Title: ORGANIC CHEMISTRY II
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to students with a major in Chemistry or Chemical Physics. Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 211 and CHEM 215 or CHEM 365 (may be taken concurrently)
Description: A continuation of CHEM 211 that is in greater depth than CHEM 212. Primarily for chemistry majors and science or engineering students with a strong interest in chemistry research. Either CHEM 212 or CHEM 320 completes the two-semester organic chemistry sequence and may be taken as a prerequisite for higher study in chemistry. Majors and minors should request instructor permission to enroll. Mutually Exclusive: Credit cannot be earned for CHEM 320 and CHEM 312.

CHEM 330 - ANALYTICAL CHEMISTRY
Short Title: ANALYTICAL CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 211
Description: A treatment of modern analytical chemistry with an emphasis on instrumentation. Applications of analytical chemistry as applied to areas of medicine, forensics, and material. Taught in the Fall.

CHEM 401 - ADVANCED ORGANIC CHEMISTRY
Short Title: ADVANCED ORGANIC CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Upper-Level
Description: The principles of structure and bonding are used to explain and predict reactivity in organic chemistry. Extensive practice with reaction mechanism and curved-arrow formalism. Topics include conformational analysis, acidity/basicity, functional group preparation, stereoselective synthesis, and organo-element chemistry. Graduate/Undergraduate Equivalency: CHEM 501. Mutually Exclusive: Credit cannot be earned for CHEM 401 and CHEM 501.

CHEM 415 - CHEMICAL KINETICS AND DYNAMICS
Short Title: CHEMICAL KINETICS & DYNAMICS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Upper-Level
Prerequisite(s): MATH 212 and (PHYS 102 or PHYS 112)
Description: A review of the principles of classical thermodynamics and an introduction to the theories and methods of statistical thermodynamics with applications to problems in chemistry. Graduate/Undergraduate Equivalency: CHEM 515. Mutually Exclusive: Credit cannot be earned for CHEM 415 and CHEM 515.

CHEM 425 - ORGANIC GEOCHEMISTRY
Short Title: ORGANIC GEOCHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 212 or CHEM 320
Description: This course covers the organic geochemistry of the natural environment. Topics include: production, transport, decomposition, and storage of organic matter in the marine and terrestrial environments, use of isotopes to track biogeochemical processes, and natural and perturbed carbon cycle issues, including past and recent climate shifts. Cross-list: ENST 425, ESCI 425.
CHEM 430 - QUANTUM CHEMISTRY  
Short Title: QUANTUM CHEMISTRY  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): (CHEM 310 or CHEM 312) and MATH 212 and (PHYS 102 or PHYS 112)  
Description: The purpose of this course is to provide the student with a working knowledge of the basic concepts and mathematical formalism of quantum mechanics. Topics include the mathematics of quantum mechanics, one-dimensional problems, central field problems, the harmonic oscillator, angular momentum, perturbation theory, spin, and introduction to methods of modern electronic structure theory, with applications in atomic and molecular structures, spectroscopy, and chemical bonding. Graduate/Undergraduate Equivalency: CHEM 530.  
Mutually Exclusive: Credit cannot be earned for CHEM 430 and CHEM 530.  

CHEM 475 - PHYSICAL METHODS IN INORGANIC CHEMISTRY  
Short Title: PHYS METH INORGANIC CHEMISTRY  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): CHEM 360  
Description: A survey course of research techniques used in modern inorganic chemistry. Topics covered will include X-ray diffraction, mass spectrometry, magnetism, and various spectroscopies (IR, Raman, UV-Vis, NMR, EPR, XPS, and Mossbauer). Graduate/Undergraduate Equivalency: CHEM 575. Mutually Exclusive: Credit cannot be earned for CHEM 475 and CHEM 575.  

CHEM 477 - SPECIAL TOPICS  
Short Title: SPECIAL TOPICS  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Internship/Practicum, Lecture, Seminar, Laboratory  
Credit Hours: 1-4  
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.  
Course Level: Undergraduate Upper-Level  
Description: Topics and credit hours vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.  

CHEM 491 - RESEARCH FOR UNDERGRADUATES  
Short Title: RESEARCH FOR UNDERGRADUATES  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Research  
Credit Hours: 1-5  
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): CHEM 391  
Description: Independent chemical research at Rice or in other Teams Medical Center groups. Ordinarily taken by students who have taken CHEM 391. Students spend at least 3 hours per week in the laboratory for each semester hour of credit, in addition to other requirements. Instructor permission required. Prior to enrollment, students must secure a position in a laboratory. Application materials, found on the department website, must be submitted by August 1st for Fall term, December 1st for Spring term, or April 1st for Summer term. Instructor Permission Required. Repeatable for Credit.  

CHEM 492 - UNDERGRADUATE HONORS RESEARCH  
Short Title: UNDERGRADUATES HONORS RESEARCH  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Research  
Credit Hours: 5  
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.  
Course Level: Undergraduate Upper-Level  
Prerequisite(s): CHEM 391  
Description: The 1st half of the Honors Research Program. CHEM 492 and CHEM 493 function as a pair and must be taken in the same academic year. Registration for CHEM 492 requires a commitment to register for CHEM 493. Requirements include at least 15 hours of laboratory research per week and written and/or oral progress reports. The sequence will culminate in the completion of a thesis (research report) in the spring term. Instructor permission required; for approved students only. Applications must be submitted to the course instructor February 1 - August 1. Students are encouraged to apply early. Students who complete the Chemistry Honors Research Program are given primary consideration for "Distinction in Research and Creative Work," a university award for select undergraduates, chosen by the department and granted at commencement, which appears on the transcript and diploma. Ordinarily offered Fall term. Instructor Permission Required.
CHEM 493 - UNDERGRADUATE HONORS RESEARCH
Short Title: UNDERGRADUATE HONORS RESEARCH
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 5
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 492
Description: The 2nd half of the Honors Research Program. CHEM 492 and CHEM 493 function as a pair and must be taken in the same academic year. Requirements include at least 15 hours or laboratory research per week and a thesis (research report). Students who complete the Chemistry Honors Research Program are given primary consideration for "Distinction in Research and Creative Work," a university award for select undergraduates, chosen by the department and granted at commencement, which appears on the transcript and diploma. Ordinarily offered in Spring. Instructor Permission Required.

CHEM 495 - TRANSITION METAL CHEMISTRY
Short Title: TRANSITION METAL CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Undergraduate, Undergraduate Professional or Visiting Undergraduate level students.
Course Level: Undergraduate Upper-Level
Prerequisite(s): CHEM 211 and CHEM 360
Description: Structure, bonding and reactivity of coordination and organometallic compounds; ligand field theory; electronic spectroscopy; magnetism; reaction mechanisms; catalysis. Graduate/Undergraduate Equivalency: CHEM 595. Mutually Exclusive: Credit cannot be earned for CHEM 495 and CHEM 595.

CHEM 501 - ADVANCED ORGANIC CHEMISTRY
Short Title: ADVANCED ORGANIC CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The principles of structure and bonding are used to explain and predict reactivity in organic chemistry. Extensive practice with reaction mechanism and curved-arrow formalism. Topics include conformational analysis, acidity/basicity, functional group preparation, stereoselective synthesis, and organo-element chemistry. Graduate/Undergraduate Equivalency: CHEM 401. Mutually Exclusive: Credit cannot be earned for CHEM 501 and CHEM 401.

CHEM 505 - PROPOSAL WRITING AND REVIEW IN CHEMISTRY
Short Title: PROPOSAL WRITING IN CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course teaches how to prepare scientific proposals including developing an idea, writing, and peer review including creating a mock panel review.

CHEM 511 - SPECTRAL METHODS IN ORGANIC CHEMISTRY
Short Title: SPECTRAL METHODS ORGANIC CHEM
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CHEM 212 or CHEM 320
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. Elucidation of organic structures by physical techniques. Interpretation of infrared, ultraviolet, nuclear magnetic resonance, and mass spectral.

CHEM 515 - CHEMICAL KINETICS AND DYNAMICS
Short Title: CHEMICAL KINETICS & DYNAMICS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CHEM 212 or CHEM 320
Description: Description and analysis of the rates of unimolecular, bimolecular, and composite chemical reactions in gas and solution phases. Both macroscopic kinetics and microscopic reaction dynamics are covered. Graduate/Undergraduate Equivalency: CHEM 415. Mutually Exclusive: Credit cannot be earned for CHEM 515 and CHEM 415.

CHEM 520 - CLASSICAL AND STATISTICAL THERMODYNAMICS
Short Title: CLASSICAL & STAT THERMODYNAMIC
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CHEM 310 or (CHEM 311 or CHEM 312) and MATH 212 and (PHYS 102 or PHYS 112)
Description: A review of the principles of classical thermodynamics and an introduction to the theories and methods of statistical thermodynamics with applications to problems in chemistry. Graduate/Undergraduate Equivalency: CHEM 420. Mutually Exclusive: Credit cannot be earned for CHEM 520 and CHEM 420.

CHEM 523 - ADVANCED ANALYSIS METHODS FOR MOLECULAR DYNAMICS FROM STATISTICAL MECHANICS TO MACHINE LEARNING
Short Title: MOLECULAR DYNAMICS METHODS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. Modern methods to extract physical and chemical information from molecular dynamics simulation will be presented, including the determination of reaction coordinates, free energies calculations, and estimation of experimentally measureable observables. The theoretical background and different applications will be discussed. The students will apply the methods on practical examples.
CHEM 525 - FUNDAMENTAL PHOTOLUMINESCENCE SPECTROSCOPY  
Short Title: FUND PHOTOLUM SPECT  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. This course aims to cover basic topics in photoluminescence spectroscopy such as instrumentation, different photoluminescent species, solvent relaxation, photoluminescence quenching, energy transfer and anisotropy. Novel applications of photoluminescence spectroscopy such as sensing, multiphoton excitation and the fluorescence of proteins will also be discussed. Undergraduates may register for this course by a Special Registration form.

CHEM 530 - QUANTUM CHEMISTRY  
Short Title: QUANTUM CHEMISTRY  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: The purpose of this course is to provide the student with a working knowledge of the basic concepts and mathematical formalism of quantum mechanics. Topics include the mathematics of quantum mechanics, one-dimensional problems, central field problems, the harmonic oscillator, angular momentum, perturbation theory, spin, and introduction to methods of modern electronic structure theory, with applications in atomic and molecular structures, spectroscopy, and chemical bonding. Graduate/Undergraduate Equivalency: CHEM 430. Mutually Exclusive: Credit cannot be earned for CHEM 530 and CHEM 430.

CHEM 533 - NANOSCIENCE AND NANOTECHNOLOGY I  
Short Title: NANOSCIENCE & NANOTECHNOLOGY  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. An introduction to the basic principles of nanoscience and nanotechnology. Size dependent physical properties of nanoscopic solids will be described using solid state physics and molecular orbital theory as a foundation. Wet chemical techniques that produce nanoscale materials (e.g. carbon nanotubes, semiconductor and metallic nanocrystals, dendrimers...) will be introduced in the second half of the semester. Expected to be taught Spring 2019. Cross-list: CEVE 533, MSNE 534.

CHEM 537 - BIOPHYSICAL CHEMISTRY  
Short Title: BIOPHYSICAL CHEMISTRY  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course will cover selected modern experimental and theoretical approaches to biophysical problems. Specifically, protein folding, single molecules and cytoskeleton dynamics will be discussed from theoretical and experimental points of view.

CHEM 541 - MOLECULES THAT CHANGED THE WORLD  
Short Title: MOLECULES CHANGED THE WORLD  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): CHEM 212 or CHEM 320  
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. This course will expand on our learned knowledge of some of the Nature's most intriguing molecules and the ability of Man to discover, synthesize, modify and use them to our advantage in what areas were not formerly envisioned. Undergraduates may register for the course by filling out a special registration form. These forms can be brought to DBH 243 for processing.
CHEM 542 - MEDICINAL CHEMISTRY I  
Short Title: MEDICINAL CHEMISTRY I  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Prerequisite(s): (CHEM 212 or CHEM 320) and BIOC 301  
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. An introductory course intended to provide the student with an overview of the elements of drug discovery, design and development. Targets for drug discovery will be discussed, as well as considerations of drug optimization with respect to the biological target and drug metabolism. A summary of the FDA and patent processes will also be included. Undergraduates may register for the course by filling out a special registration form. These forms can be brought to DBH 243 for processing.

CHEM 545 - PHYSICAL ORGANIC CHEMISTRY  
Short Title: PHYSICAL ORGANIC CHEMISTRY  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): CHEM 311  
Description: Study of organic reaction mechanisms. Includes Huckel M.O. theory, kinetics, isotope effects, linear free energy relationships, thermochemical group additivity, substituent and solvent effects, acidity, and free radical chemistry. Recommended Prerequisite(s): CHEM 311. Repeatable for Credit.

CHEM 547 - SUPRAMOLECULAR CHEMISTRY  
Short Title: SUPRAMOLECULAR CHEMISTRY  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): CHEM 212 or CHEM 320  
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. An examination of noncovalent interactions and their impact in biology, chemistry, and engineering. Topics will include self-assembly, molecular recognition, protein folding and structure, nucleic acid structure, polymer organization, crystallization and applications of the above for the design and synthesis of nanostructured materials.

CHEM 548 - PEPTIDE CHEMISTRY DESIGN, SYNTHESIS AND STRUCTURE  
Short Title: PEPTIDE CHEMISTRY  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 1.5  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: Undergraduates may register for this course by Special Registration form. The course examines solid phase peptide synthesis and strategies to prepare both simple and complex peptide primary architectures. This is followed by looking at analytical methods to assess peptide purity and structure. The course will then consider the design and characterization of peptide sequences that will result in specific 3D structures.

CHEM 551 - BIOMOLECULAR CONCEPTS  
Short Title: BIOMOLECULAR CONCEPTS  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Prerequisite(s): CHEM 310 or CHEM 311  
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. This course will explore quantitative concepts and tools from chemistry and physics relevant to molecular biology. An executive survey of molecular biology and the basic experimental approaches to biomolecular structure will be followed by a discussion of the structural basics of proteins and nucleic acids. The motion and energy landscapes of proteins will be discussed. Protein folding and evolution and the dynamic basis of gene regulation will be explored. Mutually Exclusive: Credit cannot be earned for CHEM 551 and CHEM 451.

CHEM 552 - CHEMICAL BIOLOGY  
Short Title: CHEMICAL BIOLOGY  
Department: Chemistry  
Grade Mode: Standard Letter  
Course Type: Lecture  
Credit Hours: 3  
Restrictions: Enrollment is limited to Graduate level students.  
Course Level: Graduate  
Description: This course examines biological problems from a chemical perspective. Starting with the structural and functional properties of amino acids, nucleotides, and sugars, we discuss how these molecules organize into higher-order structures (e.g., proteins and nucleic acids). Topics include macromolecular structure-function relationships, developing hybrid chemical/biological drugs, and modern target discovery approaches.
CHEM 553 - STRATEGIC APPLICATIONS OF NAMED REACTIONS IN ORGANIC SYNTHESIS
Short Title: NAMED REACTIONS IN SYNTHESIS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: In this course we will cover the mechanism and strategic applications of approximately 150 widely used named reactions in organic synthesis. The students will learn how to navigate the vast chemical literature effectively using sophisticated search engines like SciFinder and Reaxys and will get the opportunity to prepare and give 10-minute presentations on 5 recent named rxns. Recommended Prerequisite(s): CHEM 211 and CHEM 212. Repeatable for Credit.

CHEM 554 - DRUG DISCOVERY AT THE INTERFACE OF CHEMISTRY AND BIOLOGY
Short Title: DRUG DISCOVERY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Drug discovery requires a close integration of chemistry and biology. This course explores the design and development of new medicine from a chemical biological perspective. Topics includes fundamental methods for biomolecule synthesis and engineering and application to hybrid chemical/biologic drugs, as well as modern approaches for target discovery and validation.

CHEM 557 - NANOCARBONS
Short Title: NANOCARBONS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. This course will survey the chemistry, physics, and selected applications of carbon nanotubes. Fullerenes, carbon nanotubes, and graphene will be the main focus. Students are expected to have a solid background in physical chemistry. Undergraduate students may register for this course by Special Registration form.

CHEM 558 - NANOCRYSTALS
Short Title: NANOCRYSTALS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course will provide a detailed investigation into the chemical and physical principles of inorganic nanocrystals. Topics will include nucleation and growth, crystal faceting, surface ligand chemistry, size-dependent properties and scaling relationships, interparticle forces, and nanoparticle self-assembly. Proficiency in physical chemistry and inorganic materials is strongly encouraged.

CHEM 559 - SPECTROSCOPY AT THE SINGLE MOLECULE/PARTICLE LIMIT
Short Title: SPEC SINGLE MOLECULE/PARTICLE
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CHEM 310 or (CHEM 311 and CHEM 312)
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. This course will cover principles of electronic spectroscopy of molecules and nanoparticles with emphasis on single molecule/particle spectroscopy methods and analysis techniques.

CHEM 570 - NANOTECHNOLOGY FOR TEACHERS, TEACHING CHEMICAL CONCEPTS VIA INQUIRY I
Short Title: TEACHING CHEMICAL CONCEPTS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Using the Concept Development Approach, this course will teach teachers how to engage students in inquiry science and provide teachers with in depth conceptual knowledge about chemical fundamentals. The course will include hands-on activities and discussions about chemical concepts that include atomic molecular theory, atomic structure, quantum energy levels, thermodynamics, equilibrium, and bonding. Nanotechnology research with environmental applications will be highlighted throughout the course. Instructor Permission Required.

CHEM 571 - TEACHING CHEMICAL CONCEPTS VIA INQUIRY II, NANOTECHNOLOGY FOR TEACHERS
Short Title: CHEMICAL CONCEPTS · INQUIRY II
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Using the Concept Development Approach, this course will teach teachers how to engage students in inquiry science and provide teachers with in depth conceptual knowledge about chemical fundamentals. The course will include hands-on activities and discussions about chemical concepts that include gas laws, kinetic molecular theory, acid base equilibrium, and phase equilibrium. Nanotechnology research with biological applications will be highlighted throughout the course. Instructor Permission Required. Recommended Prerequisite(s): CHEM 570.
CHEM 575 - PHYSICAL METHODS IN INORGANIC CHEMISTRY
Short Title: PHYS METH INORGANIC CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: A survey course of research techniques used in modern inorganic chemistry. Topics covered will include X-ray diffraction, matrix isolation, mass spectrometry, magnetism, electrochemistry, and various spectroscopies (IR, Raman, UV-Vis, NMR, EPR, XPS, EXAFS, and Mossbauer). Graduate/Undergraduate Equivalency: CHEM 475. Mutually Exclusive: Credit cannot be earned for CHEM 575 and CHEM 475.

CHEM 580 - MICROSCOPY METHODS IN MATERIALS SCIENCE
Short Title: MICROSCOPY METHODS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture/Laboratory
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: This course covers theory and applications of electron microscopy techniques with an emphasis on transmission and scanning transmission electron microscopy (TEM, STEM). Topics include modern instrumentation and hardware, electron diffraction, imaging modes, tomography, and spectroscopy (energy dispersive x-ray spectroscopy (EDS), electron-energy loss spectroscopy (EELS), cathodoluminescence (CL)). Previous experience with electron microscopes recommended. Can be taken alone or concurrently with lab course MSNE 582. Instructor Permission Required. Cross-list: MSNE 580.

CHEM 582 - ELECTRON MICROSCOPY CENTER LAB
Short Title: ELECTRON MICROSCOPY CENTER LAB
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Laboratory
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Corequisite: CHEM 580
Description: Hands-on laboratory using the instruments in the electron microscopy center. The students will gain the knowledge necessary to operate the instruments and analyze data independently. Must be taken concurrently with CHEM 580. Instructor Permission Required. Cross-list: MSNE 582.

CHEM 583 - ORGANOMETALLIC CHEMISTRY I
Short Title: ORGANOMETALLIC CHEMISTRY I
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Organometallic Chemistry I. An introduction to organometallic chemistry, focusing on transition metal structure, bonding, and reactivity. This course is the first half of a two-course sequence, together with CHEM 584: Organometallic Chemistry II. Each course is a half-semester course. Expected to be taught 1st half of the term. Recommended Prerequisite(s): CHEM 320 or CHEM 212 or CHEM 360.

CHEM 584 - ORGANOMETALLIC CHEMISTRY II
Short Title: ORGANOMETALLIC CHEMISTRY II
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): CHEM 583
Description: Organometallic Chemistry II. An introduction to organometallic chemistry, focusing on transition metal structure, bonding, and reactivity. This course is the first half of a two-course sequence, together with CHEM 583: Organometallic Chemistry I. Each course is a half-semester course. Expected to be taught 2nd half of the term.

CHEM 586 - CHEMICAL TOOLS FOR BIOLOGY
Short Title: CHEMICAL TOOLS FOR BIOLOGY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Enrollment is open to all students. Undergraduate enrollment requires instructor permission via special registration form. Selected topics in modern chemical biology. The development and application of chemical methods to probe, perturb, and understand biological systems. Topics include protein and DNA chemistry, classical and modern approaches to inhibitor development, and chemical reaction design in living cells. Expected to be taught Fall 2018.

CHEM 595 - TRANSITION METAL CHEMISTRY
Short Title: TRANSITION METAL CHEMISTRY
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Structure, bonding and reactivity of coordination and organometallic compounds; ligand field theory; electronic spectroscopy; magnetism; reaction mechanisms; catalysis. Graduate/Undergraduate Equivalency: CHEM 495. Mutually Exclusive: Credit cannot be earned for CHEM 595 and CHEM 495. Repeatable for Credit.

CHEM 600 - GRADUATE SEMINAR
Short Title: GRADUATE SEMINAR
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Seminar
Credit Hour: 1
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Section 1: PHYSICAL CHEMISTRY-NANO Section 2: ORGANIC AND BIOLOGICAL CHEMISTRY Section 3: NANOCHEMISTRY Section 4: CARBON NANO CHEMISTRY. This seminar series is open to all chemistry graduate students or graduate students whose home department is chemistry. Students from other departments may audit the course with instructor permission. Repeatable for Credit.
CHEM 650 - CHEMICAL PHYSICS OF CONDENSED AND BIOLOGICAL MATTER
Short Title: CHEM PHYS CONDENSED&BIO MATTER
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 3
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: The principles underlying the structure and dynamics of condensed phase and biological matter. Both experimental phenomenology and theoretical approaches will be used. Starting with a review of intermolecular forces, the course will describe the structure and thermodynamics of clusters, crystalline solids, metals, liquids, glasses and biomolecules. A unified picture of reactions and classical and quantum phase transitions in condensed matter will be presented. The energy landscape theory of the dynamics of glasses and protein folding will also be covered. Expected to be taught Fall 2018. Mutually Exclusive: Credit cannot be earned for CHEM 650 and CHEM 450.

CHEM 656 - CLASSICS IN TOTAL SYNTHESIS
Short Title: CLASSICS IN SYNTHESIS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Lecture
Credit Hours: 1.5
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Prerequisite(s): (CHEM 211 and CHEM 212 and CHEM 401 and CHEM 442)
Description: Selected total synthesis will be discussed. Special emphasis will be placed on retro-synthetic analysis, synthetic strategies and technologies, asymmetric synthesis and catalysis.

CHEM 677 - SPECIAL TOPICS
Short Title: SPECIAL TOPICS
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Seminar, Lecture, Internship/Practicum, Laboratory
Credit Hours: 1-4
Restrictions: Enrollment is limited to Graduate or Visiting Graduate level students.
Course Level: Graduate
Description: Topics and credit hours vary each semester. Contact department for current semester's topic(s). Repeatable for Credit.

CHEM 700 - TEACHING PRACTICUM
Short Title: TEACHING PRACTICUM
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Internship/Practicum
Credit Hours: 2
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Open to graduate students in chemistry and only in exceptional circumstances to undergraduates. Repeatable for Credit.

CHEM 800 - GRADUATE RESEARCH
Short Title: GRADUATE RESEARCH
Department: Chemistry
Grade Mode: Standard Letter
Course Type: Research
Credit Hours: 1-15
Restrictions: Enrollment is limited to Graduate level students.
Course Level: Graduate
Description: Repeatable for Credit.

Department and Code Legend
Note: Internally, the university uses the following descriptions, codes, and abbreviations for this academic program. The following is a quick reference:

Course Catalog/Schedule
- Course offerings/subject code: CHEM

Department Description and Code
- Chemistry: CHEM

Undergraduate Degree Descriptions and Codes
- Bachelor of Arts degree: BA
- Bachelor of Science degree: BS

Undergraduate Major Description and Code
- Major in Chemistry: CHEM
- Major in Chemical Physics: CPHY

Graduate Degree Descriptions and Codes
  - Master of Arts degree: MA
  - Doctor of Philosophy degree: PhD

Graduate Degree Program Description and Code
- Degree Program in Chemistry: CHEM

CIP Code and Description
  - CHEM Major/Program: CIP Code/Title: 40.0501 - Chemistry, General
  - CPHY Major/Program: CIP Code/Title: 40.0508 - Chemical Physics

Classification of Instructional Programs (CIP) 2010 Codes and Descriptions from the National Center for Education Statistics: https://nces.ed.gov/ipeds/cipcode/
