The professional master’s degree in Subsurface Geoscience is designed for students who wish to become proficient in applying geological knowledge and geophysical methods to finding and developing reserves of oil and natural gas.

The MSSG degree program offers three areas of specialization:

- **Energy Data Management**: prepares students to understand exploration and production as a data-driven business, to become data enabled geoscientists to match demands in the energy industry, or
- **Geology**: prepares students to be explorationists, with strong skills in using seismic and other geophysical methods along with geological principles to find oil and natural gas, or
- **Geophysics**: prepares students to become technical experts in aspects of exploration seismology.

The MS in Subsurface Geoscience (MSSG) degree is part of the professional science master’s (PSM) program at Rice housed in the Wiess School of Natural Sciences. These master’s degrees are designed for students seeking to gain further scientific core expertise coupled with enhanced management and communication skills. They instill a level of scholastic proficiency that exceeds that of the bachelor’s level, and create the cross-functional aptitudes needed in modern industry. This program will allow students to move more easily into careers related to energy data management, geology, and/or geophysics.

A coordinated MBA/MSSG degrees program is also offered in conjunction with the Jesse H. Jones Graduate School of Business.

Subsurface Geoscience does not currently offer an academic program at the undergraduate level.

**Master’s Program**

**Director**

Colin A. Zelt

**Professors**

Jonathan Ajo-Franklin
Alan R. Levander
Julia K. Morgan
Fenglin Niu

**Associate Professors**

Helge Gonnerman
Richard Gordon

**Assistant Professors**

Melodie E. French
Jeffrey Nittouer

**Adjunct Faculty**

Kenneth Abdulah
Omer Alpak
Mauricio Araya
Kevin Biddle
Oner Celepcikay
Detlef Hohl
Jeffrey Nunn
Malcolm Ross
Kurt Rudolph
Eric Scott
