The central focus of Rice University’s Social Policy Analysis program is policy design, analysis, and communication. Interdisciplinary in nature, the curriculum’s emphasis is on integrating rigorous instruction in theory and method with hands-on, skills-based instruction by social science faculty. The primary goal of the program is to train Rice students to obtain the specialized knowledge, skill and experience to be leaders in the field of social policy analysis.

The Social Policy Analysis program focuses on the evaluation of alternative interventions that proposed to improve human well-being. Graduates will be able to answer questions like: Which early interventions lead to greater educational attainment for low-income children? Which juvenile rehabilitation programs are more likely to reduce the recurrence of criminal behavior? How does healthcare policy influence our daily health behaviors? Without evidence-based research and rigorous evaluations to test these ideas, there is no way to know which solutions work and for whom. In a time of limited resources and rising demands, our leaders need the analytical expertise to make a demonstrable, sustained impact on the most pressing issues facing our cities and nation. The Social Policy Analysis program will train Rice students to meet these needs.

Bachelor’s Program

- Bachelor of Arts (BA) degree with a major in Social Policy Analysis

Social Policy Analysis does not currently offer an academic program at the graduate level.

Director and Undergraduate Advisor

Melissa Marschall, Political Science

Advisory Board

Flavio Cunha, Economics
