Sociology is a branch of the social sciences that evolved in response to the revolutionary social changes of the 19th century, such as industrialization and urbanization, that ushered in the modern era. Sociology’s founding fathers include Emile Durkheim, Max Weber, Karl Marx, Herbert Spencer, and George Herbert Mead. They explored how social relationships and interactions affect individuals and large-scale social institutions, including religion, government, and education.

Today, sociologists use qualitative techniques, including ethnography; participant observation; and case studies of a variety of social phenomena, processes, and problems as methods for exploring the meaning of social life and culture to those who live it, and in building inductive theory. Quantitative techniques engage in hypothesis testing of established theories and concepts, using techniques that include experimental designs, survey questionnaires, and network analysis. Sociology as a discipline includes “ways of knowing” that link it closely to methods of the natural sciences, and more interpretive and critical perspectives that are closer to scholarship in the humanities.

The Sociology department does not have a terminal MA program. Students seeking only a master's degree are not admitted. However, the Master of Arts degree is earned as a student progresses toward the PhD.

Bachelor's Program
- Bachelor of Arts (BA) Degree with a Major in Sociology (ga.rice.edu/programs-study/departments-programs/social-sciences/sociology/sociology-ba)

Minor
- Minor in Sociology (ga.rice.edu/programs-study/departments-programs/social-sciences/sociology/sociology-minor)

Master's Program
- Master of Arts (MA) Degree in the field of Sociology*

Doctoral Program
- Doctor of Philosophy (PhD) Degree in the field of Sociology (ga.rice.edu/programs-study/departments-programs/social-sciences/sociology/sociology-phd)

* Although students are not normally admitted to a Master of Arts (MA) degree program, graduate students may earn the MA degree as they work towards the PhD.

A required end product of the course will be a publishable research paper using a comparative analysis of global cities. SECTION TWO: This course explores the relationship between social factors and health, illness, and mortality, with a heavy emphasis on equilitative experiences of illness, the doctor-patient relationship, and the socialization of medical students and new doctors. SECTION THREE: This course examines the causes and consequences of societal stratification in different institutional spheres. Students will be expected to examine key theoretical perspectives as well as understand and critique different methodological approaches to the study of social stratification. SECTION FOUR: Designed to familiarize students with the historical and contemporary theoretical explanations of the formation of, identification with, and implications of racial and ethnic categories in the United States and globally. Additionally, this course will cover empirical studies that investigate the perpetuation of racial and ethnic inequality in comparative, international perspective. SECTION FIVE: This course focuses on the mechanisms that lead to and/or perpetuate marginalization of social groups (e.g. racial, socioeconomic, religious, etc...) in urban areas. In particular, this course examines policies (i.e. public housing, cash welfare, corporation tax breaks, zoning laws) that increase or decrease the generational marginalization of groups. SECTION SIX: This course will delve extensively into criminology. The course will cover four broad areas: 1) how crime is imagined and portrayed, 2) empirical patterns of crime, 3) theories of crime causation and victimization, and 4) societal responses to crime, encompassing studies of social control, policing, the legal system, and punishment. Instructor Permission Required. Repeatable for Credit.
